This seminar will be an analytical examination of musical transcripts and composers' manuscripts of works by some of the most innovative jazz composers. Many of these manuscripts and transcriptions are held by the University of Pittsburgh jazz archives, which houses the music and recordings of jazz innovators who have participated in the University of Pittsburgh jazz seminar beginning in 1970. The course will also draw on the archival services of the Klaus Kuhnke-Archiv, in Bremen, Germany; and the Rutgers University Institute of Jazz Studies, Dan Morgenstern, director. (Morgenstern is a frequent participant in the Pitt annual jazz seminar and a contributor to Pitt's international jazz archive journal.) This course is primarily theory-based analysis, and will require that students understand and develop a thorough knowledge of accepted analytical techniques. It will examine works by major innovators such as Art Tatum, Bud Powell, Charlie Parker, Dizzy Gillespie, Sonny Stitt, Sonny Rollins, Wes Montgomery, Jim Hall, and Dodo Marmarosa in detail.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2720 - ADVANCED JAZZ COMPOSITION
Minimum Credits: 3
Maximum Credits: 3
This course offers tutorial instruction in jazz composition, orchestration and analysis to graduate students in music.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2730 - ADVANCED JAZZ IMPROVISATION
Minimum Credits: 3
Maximum Credits: 3
This course studies the performance techniques used in the various styles and idioms of jazz, as used by major innovators in improvising music. (One of the major differences with students who study jazz in the U.S. As opposed to those students from eastern and Western Europe is that in the U.S. Almost all improvisation courses concentrate solely on the bebop/hardbop school; this course will also include older periods such as Dixieland, Ragtime, and Swing.) This course is designed to familiarize the students with such innovative figures as Louis Armstrong (Dixieland), Jelly Roll Morton (Ragtime), Benny Goodman, Earl 'Fatha' Hines (Swing), Charlie Parker (Bebop), Miles Davis (Cool), Art Blakey (Hardbop), John Coltrane (1960's) and Eric Dolphy.

Academic Career: GRAD

Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2740 - SMALL ENSEMBLE
Minimum Credits: 3
Maximum Credits: 3
This course is designed as a performance course that focuses on the repertoire of the small jazz ensemble from 1940 through 1960. The student will be expected to learn the repertoire of such major jazz innovators as Charlie Parker, Dizzy Gillespie, Art Blakey and the jazz messengers, Thelonious Monk, John Coltrane, Bill Evans, Oscar Peterson, Miles Davis, Sonny Rollins, Stan Getz, etc. Grades in this course will be based solely on the student's ability to perform from memory in a concert setting, works from the major artists listed above.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PhD)

MUSIC 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
Independent study is used only to allow time in the student's schedule to prepare for the comprehensive examination or prospectus meeting. It is not appropriate to register for independent study to complete the requirements for any other course; nor, as a rule, is independent study an appropriate option for first- or second-year students (or any other student having many outstanding course requirements). Grading: s/n. Note: for students in composition and theory and historical musicology, no more than six credits of independent study may be counted toward the 72 credits required for the Ph.D. Degree; for students in ethnomusicology, no credits earned in courses of independent study may be counted toward the 72 credits required for the Ph.D. Degree.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

MUSIC 3000 - PHD DISSERTATION
Minimum Credits: 1
Maximum Credits: 9
Research for and writing of the doctoral dissertation in music.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MUSIC 3902 - DIRECTED STUDY FOR PHD STUDENT
Minimum Credits: 3
Maximum Credits: 3
Directed study on musical topics for students in the Ph.D. program.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

Neurobiology

MSNBIO 2001 - NEUROPHYSIOLOGY
Minimum Credits: 4
Maximum Credits: 4
The topics covered in this course include the electrophysiological analysis of resting and action potentials, a description of both the pre- and postsynaptic ionic mechanisms involved in synaptic transmission, and an overview of specific examples of how the cellular mechanisms described earlier in the course can be integrated into models of the functioning of small neural networks.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2002 - NEUROSCIENCE 2
Minimum Credits: 4
Maximum Credits: 4
The second of the core courses is a continuation of neuroscience 1. Much of the course is devoted to the biochemical basis of chemical synaptic transmission with an emphasis on regulatory mechanisms.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2005 - BIO BASE OF NEUROPSYCH DISORDS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SNC Basis

MSNBIO 2006 - NEUROSCIENCE 3
Minimum Credits: 4
Maximum Credits: 4
This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. The course will provide an introduction to topographic anatomy of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2008 - PRO-SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Each member of the program faculty presents an overview of the topic on which s/he works and then leads a discussion of a research article in that area. Critical analysis of experiments and of research is emphasized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

MSNBIO 2010 - SCIENTIFIC ETHICS
Minimum Credits: 1
Maximum Credits: 1
The course is an introduction to basic ethical issues that arise in the course of conducting scientific research. It is intended for graduate students in the center for neuroscience who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by class discussion of issues.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**MSNBIO 2041 - DEVELOPMENTAL NEUROSCIENCE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to provide an overview of principles that govern the developmental assembly of a complex nervous system. Topics covered include formation of neural tube and neural crest, birth and proliferation of neurons, cell migration, neuronal differentiation, synapse formation, synaptic plasticity, development of CNS circuits, and behavior. These topics will be discussed in the context of experimental results obtained by anatomical, biochemical and electrophysiological techniques using vertebrate and invertebrate animals.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**MSNBIO 2070 - HUMAN PHYSIOLOGY**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
Lectures and reading on the following: (1) functions of the cardiovascular system; (2) respiration; (3) digestion and absorption in the gut; (4) kidney function and the regulation of body fluids; (5) the regulation of metabolism; and (6) reproduction.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSNBIO 2100 - CLLR & MOLECULAR NEUROBIOL 1**  
**Minimum Credits:** 5  
**Maximum Credits:** 5  
This course is the first component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers nerve cell biology, protein chemistry, regulation of gene expression, receptor function, and second messenger signaling in a lecture format. A background in basic biology is required.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Neurobiology (PHD) or Neuroscience (PHD or MS)

**MSNBIO 2101 - CLLR & MOLECULAR NEUROBIOL 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is the second component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers the electrical properties of neurons, synaptic transmission, and neural development. A background in basic biology is required.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Neurobiology (PHD) or Neuroscience (PHD or MS)

**MSNBIO 2102 - SYSTEMS NEUROBIOLOGY**  
**Minimum Credits:** 6  
**Maximum Credits:** 6  
This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. This course provides an introduction to the structure of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions. It is taught primarily in a lecture format with some laboratory work.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Neurobiology (PHD)
MSNBIO 2103 - SYSTEMS NEUROBIOLOGY CONFR
Minimum Credits: 2
Maximum Credits: 2
This course is a co-requisite to systems neurobiology and involves conference integrated into a non-didactic laboratory and conference format designed to develop research skills. Students will be expected to read and discuss original scientific literature.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

MSNBIO 2110 - STATS METHODS FOR NEUROSCIENCE
Minimum Credits: 4
Maximum Credits: 4
This course provides a brief survey of statistical methods that are of use in cognitive neuroscience. The first part of the course will present a compressed version of material often covered in a semester-long course in elementary statistics. The latter part of the course will introduce various more advanced methods. Topics include probability (laws of probability, conditional probability, bayes' theorem, random variables, binomial, poisson, and normal distributions, and poisson and other point processes), exploratory data analysis (descriptive methods for single samples and multiple samples, scatterplot smooths, histograms, and density estimators), elementary statistical inference (standard errors and confidence intervals, goodness-of-fit and significance tests, ANOVA and regression, and maximum likelihood and Bayesian inference). Additional topics may include Bayesian classification, roc curves, information theory, Fourier analysis and signal processing, multivariate analysis, PCA and ICA, the bootstrap, nonparametric regression, and integrate-and-fire models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2112 - NEUROBIOLOGY OF DISEASE
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder. Participants will be asked to do some background reading each week, to prepare a short grant application on a topic of relevance to the neurobiology of disease, and to then participate in the peer review of an application of another course participant. Reading will consist of reviews and recent research articles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2121 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 9
A series of special topics courses are offered by individual members of the department or by small groups of the faculty. The general format involves the detailed analysis of a specific research area, exploring its development and current status by the presentation and discussion of research papers.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MSNBIO 2125 - NEUROBIOLOGY JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
Original research papers will be presented by students followed by discussion with students and faculty. The topics covered are those at the forefront of research in neuroscience and cell biology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2126 - NEUROBIOLOGY SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Faculty and students discuss recent papers in the area of developmental neurobiology; presented and discussed by faculty and students.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2128 - INTRODUCTION TO RESEARCH
Minimum Credits: 1
Maximum Credits: 1
First year graduate students learn about the research being conducted in the different laboratories in the department in this seminar course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2129 - DEVELM NEUROBIOL VERTEBRATES
Minimum Credits: 3
Maximum Credits: 3
The course gives a broad introduction to the field of developmental neurobiology. The major events such as cell migration, axon guidance, synapse formation, and cell death are considered, as are the factors that influence them.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2135 - HISTORCAL PERSPCTV IN NEUROSCI
Minimum Credits: 2
Maximum Credits: 2
This seminar course explores the origins and evolution of modern neuroscientific concepts from the 17th and mid-20th centuries. Discussions of primary and secondary source material will focus on understanding the role of contemporary philosophical, scientific, social and technological factors in the development of neuroscientific thought. Another goal is to develop an appreciation of their contributions to current neuroscientific dogma.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2161 - MASTER'S RESEARCH AND THESIS
Minimum Credits: 1
Maximum Credits: 15
A directed study-project which results in thesis for a Master's degree. Course is taken as many terms as necessary to complete and defend project before degree is awarded.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSNBIO 2600 - MS THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSNBIO 2610 - DEVELOPMENTAL NEUROBIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth introduction to the field of development neurobiology. Topics include basic embryology, the origin of neurons and glia, cell migration axonal growth and synapse formation, neuronal death and mechanisms underlying the formation of specific neuronal circuits.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MSNBIO 2612 - ADVANCED DEVELOPMENTAL BIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course will examine selected topics in developmental biology at an advanced level. Topics may include pattern formation in insects, cell lineage analysis, cell-cell interactions and the specification of cell fates, cell adhesion molecules, genetic approaches to mammalian embryo genesis and the extracellular matrix in development. Emphasis will be placed on the critical reading of papers and classroom discussion.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2614 - NEUROPHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course will examine the molecular mechanism of drug action for different classes of drugs that act on the nervous system, antidepressants, antipsychotics, and drugs to relieve pain, drugs for neurological diseases, and drug abuse and addiction.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2620 - MOLECULAR PHYSIOLOGY OF SYNAPSES
Minimum Credits: 3
Maximum Credits: 3
Advanced course designed for students interested in neurophysiology, neural computation, and imaging. It covers selected topics ranging from ion channel function to synaptic transmission and computational analysis of neural circuits. Classes include didactic presentations with textbook references & discussions of original papers. Some presentations will describe biophysical methods & using computer programs for data analysis & simulation. Students will be expected to participate in classroom discussions, complete problem sets & write a term-paper that reviews a research problem.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2622 - MECHANICS & CLINICAL PRESENTATION OF PAIN
Minimum Credits: 3
Maximum Credits: 3
This course provides attendees with vocabulary and knowledge about anatomy, physiology, mechanisms, and modulation of pain. This fundamental knowledge is complemented by assigned readings from literature and clinical presentations about pain syndromes and pain management. The course is offered in the fall term.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

MSNBIO 2623 - PAIN MODELS: RATIONALE, TEST INTERPRETATION
Minimum Credits: 1
Maximum Credits: 1
This course will focus on the design and analysis of animal and human pain models and will incorporate classroom presentations about various pain models (e.g. inflammatory, neuropathic, etc.). Classroom discussions will be based on assigned readings and include the relevant history and rationale for use of different tests/models, including critical assessment of strengths/weaknesses and limitations to interpretation of outcomes. Importantly, data acquisition, analysis and presentation will be included in evaluating the interpretability of outcomes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSNBIO 2624 - GRANT WRITING
Minimum Credits: 3
Maximum Credits: 3
The course will cover the fundamentals of grant writing with a focus on NIH style pre-doctoral grants. Through a combination of lectures and student led critiques and discussions, students will work their way through the essential components of a fundable proposal starting with specific aims and ending with an introduction to a revised application. Students will generate each component of a grant application which will be critiqued by faculty.
and the other members of the class.

**Academic Career:** GRAD  
**Course Component:** Lecture

**Course Requirements:** PLAN: Neurobiology (PhD) or Neuroscience (PhD)

---

**MSNBIOS 2630 - INTRO PARLEL DISTB PROCESSING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduces mathematical and computer techniques used in constructing models of information processing by parallel distributed processing (pdp) networks; principles of input output functions and adaptation (learning) functions in single units and in networks; the relation between pdp networks, neurobiology, artificial intelligence, and cognition.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**MSNBIOS 2632 - ADVANCED NEUROPHYSIOLOGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The primary objective of this course is for students to develop critical scientific reasoning by learning to evaluate the essential components of classic research presented in well written papers. Secondarily, students will gain a solid foundation in neurophysiology by examining, in detail, the underlying principles underlying current flow through a neuron's membrane, the generation and propagation of action potentials, synaptic transmission at the neural muscular junction, and sensory transduction. Course material will consist of papers from Hodgkin, Huxley, Katz, Fatt and others. Complementing the classic papers will be contemporary work on the same topic. Students will be expected to have had basic neurophysiology and be familiar with electrostatics, electric circuits and differential equations.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**MSNBIOS 2640 - ISSUES IN CORTICAL PHYSIOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar course will examine the role of the cerebral cortex in perceptual/motor functions. Topics include cortical columnar organization, feature detection, population coding, dynamic receptive field properties, local circuits and multiple representations. Students will read primary source articles as well as some theoretical monographs.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**MSNBIOS 2650 - JOURNAL CLUB**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**MSNBIOS 2651 - PAIN JOURNAL CLUB**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This discussion-based course uses assigned readings to examine pain mechanisms and management with an emphasis on critical literature evaluation and topical developments in the field of pain.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

2618
MSNBIO 2652 - TOPICS NEUROLOGICAL DISORDERS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

MSNBIO 2660 - NEUROBIOLOGY SEMINAR SERIES
Minimum Credits: 1
Maximum Credits: 1
Nationally and internationally recognized researchers in the field of neuroscience present scientific findings. Students meet informally with each speaker to discuss seminal topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2680 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 9
A series of special topics courses are offered by individual members of the department or by small groups of the faculty. The general format involves the detailed analysis of a specific research area, exploring its development and current status by the presentation and discussion of research papers.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MSNBIO 2681 - SEMINAR IN CORTICAL CIRCUITS
Minimum Credits: 1
Maximum Credits: 1
This discussion-based course uses current readings to examine cortical function with an emphasis on circuit analyses using electrophysiological, computational, behavioral and/or developmental approaches.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2682 - CURRENT RESEARCH ON PAIN
Minimum Credits: 1
Maximum Credits: 1
An advanced graduate level course for students interested in current research on pain mechanisms, management and clinical presentation of pain. Presentations by course participants form the basis for class participation and discussion.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSNBIO 2683 - CURRENT TOPCS DEVELM NEUROBIOL
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: [(MSNBIO 2100 or NROSCI 2100) and (MSNBIO 2101 or NROSCI 2101)] or INTBP 2000; Plan: Neuroscience (PHD) or Neurobiology (PHD)

MSNBIO 2690 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in neurobiology.
MSNBIO 3001 - RESEARCH APPRENTICESHIP
Minimum Credits: 1
Maximum Credits: 3
Students doing laboratory research with a faculty member who is not their mentor may register for this course.

MSNBIO 3030 - SEMINARS IN SYNAPTIC FUNCTION
Minimum Credits: 1
Maximum Credits: 1
This discussion-based course uses recently published research articles to examine synaptic function, including neurotransmitter release, receptor regulation, and different forms of synaptic plasticity.

MSNBIO 3110 - PHD RESEARCH DISSERTATION
Minimum Credits: 1
Maximum Credits: 15
A directed study-project which results in thesis for a doctor of philosophy degree.

MSNBIO 3121 - ADVANCED TOPICS
Minimum Credits: 1
Maximum Credits: 9
This course is offered by individual members of the department for post-comprehensive examination students. The general format involves the detailed analysis of a specific research area, exploring its development and current status by the presentation and discussion of research papers.

MSNBIO 3600 - PHD DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Neurological Surgery

NSURG 2907 - INDEPENDENT STUDY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

NSURG 5383 - INDIVIDUAL STUDY OR RESEARCH
Minimum Credits: 0
Maximum Credits: 0
The department of neurological surgery will arrange an individual study or research experience for third year medical students in an area of their interest.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NSURG 5420 - NEUROSURGERY SUBINTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
During this four-week elective the student will work as a subintern sharing in the operation of the neurosurgery service. Points of interest will be pathophysiology of neurological problems, neurological diagnosis and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate in all conferences.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NSURG 5422 - PEDIATRIC NEUROSURGERY
Minimum Credits: 0
Maximum Credits: 0
A four-week elective offering the student a sub internship sharing in the full operation of the neurosurgery service with the house staff. Points of emphasis will be pathophysiology of neurological problems, neurological diagnosis and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate actively in all conferences. The elective objectives are: to perform a careful, problem-oriented, neurological examination; to recognize, evaluate and direct the diagnostic work up of common neurosurgical problems such as lumbar and cervical disc herniation, brain tumor, head trauma, intracranial aneurysm, etc.; to recognize and manage increased intracranial pressure, brain herniation, and electrolyte and metabolic disturbances, peculiar to neurological patients; and the basic principles of neurosurgical techniques as well as basic neurosurgical topographic anatomy.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NSURG 5430 - INTRO CLINICAL NEUROPHYSIOLOGY
Minimum Credits: 0
Maximum Credits: 0
During this four-week elective the student will be exposed to the use of electrodiagnostic tools with particular emphasis on the utilization of auditory, visual and somatosensory evoked potentials in the study of clinical neurological disorders in man. Computational analysis of ongoing EEG will also be utilized. Diagnostic assessment both intraoperative and ICU monitoring will be performed. Opportunities are available to participate in research in electrophysiology and computational analysis of data.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NSURG 5435 - INTRO TO CLINICAL NEUROSURGERY
Minimum Credits: 0
Maximum Credits: 0
This introductory clinical elective ill provide students with experiences in the care of neurosurgical patients. A student will work as a member of the clinical team, sharing in the full operation of the neurosurgery service with the house staff. Points of emphasis will be pathophysiology of neurological/neurosurgical problems, neurological diagnosis, and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate actively in all conferences. Students will have the opportunity to be exposed to cutting edge specialized areas of neurosurgery including gamma knife radiosurgery, neuroendoscopy, and endovascular neurosurgery. In selected cases, students may elect to participate in ongoing research projects in neuro-oncology, neuro-trauma, spine biomechanics, functional neurosurgery, and neurophysiology.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U
NSURG 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NSURG 5705 - HEAD AND NECK DISSECTION (ILS)
Minimum Credits: 0
Maximum Credits: 0
This course fulfills the integrated life science (ILS) graduation requirement. The course is a four-week selective combining precepted anatomic dissection, various imaging modalities, lectures, operating room exposure, and clinical pathology in a systematic manner. The areas to be covered include anatomy of the head and neck. The course will include lectures in anatomy, pathology and imaging modalities; precepted anatomical dissections and clinical experiences. Clinical experiences will include, but are not limited to, exposure to neurosurgical and otorhinolaryngological procedures in the operating rooms, shadowing time in clinic, as well as assisting in neuropathological examinations. All students will be exposed to the diagnostic modalities appropriate for each anatomic area. They will also have the opportunity to see patients and follow their evaluations and management. To fulfill course requirements, each student will be expected to prepare a formal case presentation correlating the clinical findings, anatomy, diagnostic modalities, pathology and treatment plan.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NSURG 5810 - INJURY RESEARCH AND CONTROL
Minimum Credits: 0
Maximum Credits: 0
Students in four-week elective may join basic research projects or initiate their own research projects at center for injury research and control (circl). Center conducts injury control research, gathers and disseminates information on injuries, provides training for healthcare professionals and informs public and community leaders on injury control measures. Students work with epidemiologists to identify risk factors associated with specific injury types. Designed for those interested in gaining residency experience in epidemiologic methods with emphasis on surveillance and/or descriptive injury evaluation.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NSURG 5880 - NEUROSURGICAL RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Student will participate in an ongoing research project in the department of neurosurgery under the supervision of an advisor. Objectives include training in basic neurosurgical research techniques and procedures as well as the opportunity to gain in-depth knowledge in the basic neurosciences. This elective is offered in four-week blocks and two blocks must be elected.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NSURG 5899 - IND STDY IN NEUROL SURGERY
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

NSURG 5900 - EXTRAMURAL NEUROSURGERY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in neurological surgery may be arranged at an institution other than the university of Pittsburgh School of Medicine.
Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before
the course may be added to the student schedule for credit.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Neurology

NEURO 5366 - NEUROLOGY CORE CLERKSHP
Minimum Credits: 0
Maximum Credits: 0
The (3-week) neurology clerkship focuses on common neurological problems: presentation, diagnosis and treatment. NSURG, neuropath and
neurorad experiences are also provided. Clinical teaching includes INPT and OPT settings. Exposure to NSURG or neuropath Brain cutting are
required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature.
Performance-based evaluations and NBME shelf exam are main modes of student evaluation. Must accompany registration in PSYCH 5366.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5389 - CLINICAL NEUROLOGY ELECTIVE
Minimum Credits: 0
Maximum Credits: 0
This four week elective will provide a broad exposure to neurological disorders in an inpatient and outpatient setting. Students may rotate on the
inpatient neurology ward, the neurology consult service, or the pediatric neurology service. Students will do initial patient evaluations and will follow
patients daily. They will be involved in diagnostic and therapeutic decision making. An emphasis will be placed on neuroanatomical correlation.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5393 - INDEPENDENT STUDY IN NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
This is a third-year level elective. This course may be arranged as a research or a special clinical period of time. All electives are four weeks in
duration and will be more specifically identified as to content on the student's transcript at the time credit is given.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5410 - NEUROLOGY ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
A four week acting internship is offered on the clinical neurology service. Students will be the primary person responsible for initial patient
evaluations and will follow patients daily, order tests and perform procedures including lumbar puncture. They will assimilate test and treatment
results for discussion with the attending neurologist during daily rounds. Students will be directly involved with diagnostic and therapeutic decision
making. An emphasis will be placed on neuroanatomical correlation.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5420 - CLINICAL NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
Four week elective on consult service at health center hospitals and outlying hospitals; participation in investigation and management of patients;
discussion of cases and basic mechanisms pertinent to understanding neural function and pathogenesis of neurological diseases. History taking,
detailed physical and neurological examination, and recording information on patients will be required.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U
NEURO 5421 - STROKE SERVICE
Minimum Credits: 0
Maximum Credits: 0
This four week clinical neurology elective will place an emphasis on the evaluation and treatment of patients with cerebrovascular disease including ischemic cerebral infarction and intracerebral hemorrhage. Patients will be seen in the inpatient ward and in an outpatient stroke clinic. Students may participate in ongoing acute stroke trials. They will observe carotid and transcranial doppler ultrasound studies.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5425 - OUTPATIENT CLINICAL NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
This four week elective is a closely supervised clinical clerkship providing a broad exposure to common and unusual outpatient neurologic conditions. Initial manifestations of disease, physical exam findings, effective diagnostic evaluation and treatment options are emphasized. Students will actively participate in initial and follow visits of patients with faculty. Students will also work in neurology subspecialty clinics including stroke, epilepsy, multiple sclerosis, neuromuscular disease, aphasia and neurological rehabilitation.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5430 - NEONATAL NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
A four week elective consists of a closely supervised clinical clerkship in neonatal neurology. Students will participate in the diagnostic investigation and management of neonates and young infants with neurologic disorders in both inpatient and outpatient settings. Students, with attending supervision, will learn the neurologic examination of the newborn and evaluation of children with suspected neural disorders. The understanding of neural function and development with its relationship to brain disorders will be emphasized.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5435 - PEDIATRIC NEUROMUSCULAR DISEASE
Minimum Credits: 0
Maximum Credits: 0
This four week elective is a closely supervised clinical clerkship which will provide an opportunity to study a variety of pediatric neuromuscular disorders. Students will participate in the diagnostic evaluation and management of patients in the muscular dystrophy association clinic and have an opportunity to observe electromyographic examinations. Students will perform new patient evaluations and participate in the planning and interpretation of diagnostic studies.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5440 - PEDIATRIC NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
Four week elective on consult service; participation in investigation and management of patients; discussion of cases and basic mechanisms pertinent to understanding neural function and pathogenesis of neurological diseases. History taking, detailed physical and neurological examination, and recording information on patients will be required.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

NEURO 5441 - CHILD NEUROLOGY/EPILEPSY
Minimum Credits: 0
Maximum Credits: 0
A four week elective at Childrens' Hospital will provide the student with the opportunity to see inpatients and outpatients with seizures. Students will participate in the evaluation, diagnosis and treatment of these patients and will help to evaluate patients undergoing surgical consideration. Students
will learn to identify certain seizure patterns by review of seizures and EEGs recorded on video tape. They will review neuroimaging studies and be involved in discussions about antiepileptic drug management.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**NEURO 5445 - BEHAVIORAL NEUROLOGY**
Minimum Credits: 0  
Maximum Credits: 0  
A four to twelve week elective is offered at highland drive VA Medical Center for students who have an interest in cognitive and psychiatric manifestations of neurological disease. Typical clinical problems include cognitive and personality changes after stroke, head trauma, epilepsy, dementia, neurodegenerative disorders, movement disorders, amnestic syndromes, confusional states and patients with obsessive compulsive presentations. Teaching will include neuropsychological assessments, case conferences and clinical bedside attending rounds.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**NEURO 5450 - NEUROLOGY BOOT CAMP**
Minimum Credits: 0  
Maximum Credits: 0  
Students who are entering the field of neurology or with strong interest in neurology and related fields require a solid foundation of knowledge and skills before embarking on internship and assuming the duties of an intern. This intensive course addresses relevant knowledge and skill building activities by educators deeply involved in postgraduate training.

**Academic Career:** MEDS  
**Course Component:** Practicum  
**Grade Component:** S/U Basis

**NEURO 5650 - INDIVIDUALIZED CLINICAL COURSE**
Minimum Credits: 0  
Maximum Credits: 0  
An individualized course of study may be arranged with the department to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty members, as well as the student's scheduling advisor. When approvals have been received, the course will be scheduled and department notified.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

**NEURO 5730 - CLINICAL NEUROSCIENCES (ILS)**
Minimum Credits: 0  
Maximum Credits: 0  
This 4 week elective will satisfy the requirement of the integrated life science course of the senior year. The course objectives are: introduce students to clinical academic medicine; educate students in the conduct, design and interpretation of clinical trials; illustrate how basic science findings lead to clinical research advances, and provide additional subspecialty experience. The course will consist of seminars illustrating how basic scientific observations lead to clinical research, internships with a clinical neuroscience residency mentor and a pbl where a clinical research project is designed.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** H/HS/S/LS/U

**NEURO 5875 - INDEPENDENT STUDY IN NEUROLOGY**
Minimum Credits: 0  
Maximum Credits: 0  
A research project can be arranged with a faculty person on or off-site. Approval of all projects must be secured at the departmental and student affairs level. These independent study opportunities will be more specifically identified as to content on the student's transcript at the time credit is given.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U
NEURO 5876 - BASIC RESEARCH IN NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
In this elective the student will be involved in the study of the molecular mechanisms that underly neuronal injury in ischemic stroke and the physiological repair mechanisms that injury triggers. One major focus is how prior ischemia induces the expression of neuroprotective gene products, such as stress proteins and death suppressor genes. Another interest is the role of neural stem cells in neural plasticity after injury. Techniques include animal surgery, cell culture, immunohistochemistry, in situ hybridization, Northern analysis and fluorescein detection of calcium.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NEURO 5877 - COGNITIVE NEUROSCIENCE RESEARCH
Minimum Credits: 0
Maximum Credits: 0
This four week elective involves research in cognitive neuroscience. Students can participate in one of several research projects including: computer modeling of human language, computer modeling of the somatosensory cortex, behavioral studies of patients with language disorders and functional neuroimaging of language function. Emphasis will be placed on the relationship between cognitive structures of the mind and the neurobiologic implementation of mental structures in the cellular and molecular hardware of the brain.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NEURO 5878 - ALZHEIMER'S DISEASE RESEARCH
Minimum Credits: 0
Maximum Credits: 0
An eight week elective places a special emphasis on memory and cognitive problems associated with aging and dementia. Emphasis is placed on clinical diagnosis and the use of neuropsychological testing, laboratory and neuroimaging studies in the diagnosis of dementia. There will be an opportunity to be involved in experimental therapeutic trial being carried out in patients with Alzheimer's disease.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NEURO 5879 - MOLECULAR NEUROBIOLOGY/GENETICS
Minimum Credits: 0
Maximum Credits: 0
This neurology elective will provide exposure to research directed at identifying molecules expressed during critical phases of neuronal differentiation using rat cerebellum as a model system. This tissue is studied using molecular biological methods to clone genes in granule cells to study their regulation. Methods used include standard cloning techniques, preparation of RNA from rat tissues, Northern blot analysis, in situ hybridization and histochemistry.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NEURO 5900 - EXTRAMURAL NEUROLOGY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in neurology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Neuroscience

NROSCI 2000 - RESEARCH AND THESIS MS DEGREE
Minimum Credits: 1  
Maximum Credits: 12  
Students working on their early research requirement may (but are not required to) register for NROSCI 2000.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Neuroscience (MS, PHD)  

**NROSCI 2001 - NEUROPHYSIOLOGY**  
Minimum Credits: 4  
Maximum Credits: 4  
The topics covered in this course include the electrophysiological analysis of resting and action potentials, a description of both the pre- and postsynaptic ionic mechanisms involved in synaptic transmission, and an overview of specific examples of how the cellular mechanisms described earlier in the course can be integrated into models of the functioning of small neural networks.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  

**NROSCI 2002 - NEUROSCIENCE 2**  
Minimum Credits: 4  
Maximum Credits: 4  
This course focuses on molecular neurobiology and the biochemistry of neuronal communications. Although this course is a continuation of neuroscience 1, that course is not a prerequisite.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  

**NROSCI 2004 - TOPICS IN BASIC NEUROSCIENCE**  
Minimum Credits: 3  
Maximum Credits: 3  
The course explores current areas of research in the neuro sciences. Topics to be covered include: (1) pulse generation by hypothalamic gnrh neurons, (2) sleep; mechanisms and disorders and (3) computational neuroscience methods.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  

**NROSCI 2005 - COGNITIVE NEUROSCIENCE**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will cover fundamental findings & approaches in cognitive neuroscience, with the goal of providing an over view of the field at an advanced level. Topics will include high-level vision, spatial cognition, working memory, long term memory, learning, language, executive control, and emotion. Each topic will be approached from a variety of methodological directions, i.e. Computational modeling, cognitive assessment in brain-damaged humans, non-invasive brain monitoring in humans and single-neuron recording in animals. Lectures will alternate with sessions in seminar format.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Neuroscience (MS or PHD)  

**NROSCI 2006 - NEUROSCIENCE 3**  
Minimum Credits: 4  
Maximum Credits: 4  
This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. The course will provide an introduction to topographic anatomy of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
NROSCI 2007 - JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
This course is intended for all graduate students and faculty members. Papers will be selected from current periodicals in neuroscience for presentation. Emphasis is placed on a critical evaluation of experimental procedure and interpretation of data.
Academic Career: GRAD
Course Component: Colloquium
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2008 - PRO SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Each member of the program faculty presents an overview of the topic on which s/he works and then leads a discussion of a research article in that area. Critical analysis of experiments and of research is emphasized.
Academic Career: GRAD
Course Component: Colloquium
Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 2009 - GENERAL PROFESSIONAL SKILLS
Minimum Credits: 1
Maximum Credits: 3
Seminar for advanced graduate students and postdoctoral fellows. Provides guidance on communication skills, job seeking, and grant writing. Includes workshops and discussions with faculty and outside consultants.
Academic Career: GRAD
Course Component: Directed Studies
Course Requirements: PLAN: Neuroscience (MS or PHD)

NROSCI 2010 - SCIENTIFIC ETHICS
Minimum Credits: 1
Maximum Credits: 1
The course is an introduction to basic ethical issues that arise in the course of conducting scientific research. It is intended for graduate students in the center for neuroscience who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by class discussion of issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NROSCI 2011 - FUNCTIONAL NEUROANATOMY
Minimum Credits: 4
Maximum Credits: 4
This course deals with human neuroanatomy and covers the basic structure of the central nervous system from spinal cord to cerebral cortex. Emphasis is placed on major systems and subsystems within the brain, and on their functional significance. The basic structure and morphology of nerve cells will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (MS or PHD)

NROSCI 2012 - NEUROPHYSIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course examines the electrical properties of nerve cells and the mechanisms by which nerve cells communicate. The following topics will be covered: electrical principles used by nerve cells, the basis of the resting potential, the function of voltage-dependent ionic channels, the mechanisms by which action potentials are generated, neurotransmitter receptor function, and the physiology of fast synaptic communication.
Academic Career: GRAD
Course Component: Lecture
NROSCI 2014 - SPEAKING OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Fulfills neuroscience advanced elective requirement. You will learn strategies for giving presentations about science to both a scientific audience and a public audience. Topics covered will include (1) how to engage your audience, (2) the art of breaking down your message, (3) tips for how to make clear, interesting slides, and (4) pointers on presentation style. All audiences want to learn interesting new scientific information, and have it delivered as a good story in an understandable manner by a personable, easy to approach person. You want to emphasize your message, stay focused, and convey the importance of your message while being interesting, maintaining the attention of the audience and making the learning process enjoyable. Guest speakers will provide background information about various uses of scientific information in the public domain. Communication skills, including knowing your audience and why they are interested in the information you are speaking about, how to translate scientific jargon into understandable concepts for the public, and how to keep the audience engaged will be discussed. Pointers will be given on answering questions, being conversational, and conveying the "big picture". Students will give a number of presentations in this course and learn to receive and give feedback effectively.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Neuroscience (PhD) or Neurobiology (PhD)

NROSCI 2017 - SYNAPTIC TRANSMISSION
Minimum Credits: 3
Maximum Credits: 3
This course examines the mechanisms by which neurotransmitters are synthesized and released and the biochemistry of synaptic responses. Basic physiological, biochemical, and morphological characteristics of neural transmission will be discussed. An emphasis will be placed on the experimental approaches used to examine these processes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

NROSCI 2035 - CONTROL OF MOVEMENT
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

NROSCI 2041 - DEVELOPMENTAL NEUROSCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide an overview of principles that govern the developmental assembly of a complex nervous system. Topics covered include formation of neural tube and neural crest, birth and proliferation of neurons, cell migration, neuronal differentiation, synapse formation, synaptic plasticity, development of CNS circuits, and behavior. These topics will be discussed in the context of experimental results obtained by anatomical, biochemical and electrophysiological techniques using vertebrate and invertebrate animals.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Neuroscience (PhD) or Neurobiology (PhD)

NROSCI 2043 - NEURAL PLASTICITY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
NROSCI 2045 - READINGS IN NEUROSCIENCE 1
Minimum Credits: 1
Maximum Credits: 3
This is the first of a two-term course taken during the fall and spring terms of the first year of graduate study in the department of neuroscience. The goal of the course is to develop skills in critical evaluation of the primary scientific literature, with a focus on problems involved in investigating the neural basis of behavior and the functional properties of neural systems.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 2046 - READINGS IN NEUROSCIENCE 2
Minimum Credits: 1
Maximum Credits: 3
This is the second of a two-term course taken during the fall and spring terms of the first year of graduate study. It is intended to provide formal instruction by the department faculty on how to critically read the scientific literature in neuroscience.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 2052 - NEUROPHYSIOLOGY LABORATORY
Minimum Credits: 2
Maximum Credits: 2
Designed to give "hands on" experience with some of the more important neurophysiological preparations and procedures which are described in the neurophysiology lecture course (2012). Experiments will include: (1) examination of the ionic basis of the resting potential (2) computer-based simulation of action production (3) measurement of action potential conduction velocity (4) intracellular recording of synaptic potentials and (5) determination of the neurotransmitter functioning at a specified synapse. Students will also design & conduct a small neurophysiological experiment.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

NROSCI 2070 - HUMAN PHYSIOLOGY
Minimum Credits: 4
Maximum Credits: 4
Lectures and reading on the following: (1) functions of the cardiovascular system; (2) respiration; (3) digestion and absorption in the gut; (4) kidney function and the regulation of body fluids; (5) the regulation of metabolism; and (6) reproduction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2074 - BIOCHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
This is a general biochemistry course oriented towards graduate students without a strong biochemistry background; as such, lectures will emphasize a strong introductory base prior to moving on to more advanced detail. The material will concentrate on eukaryotic biochemistry, with an emphasis on the relationship of basic biochemical mechanisms in physiological processes. Lectures and reference material will include both text book and original research literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

NROSCI 2078 - BIO BASE OF NEUROPSYCH DISORDS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder.
Academic Career: GRAD
**NROSCI 2081 - MOLECULAR NEUROBIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3

This is a general, introductory molecular biology course with a strong emphasis on transcriptional and signal transduction mechanisms in the specialized environment of the neuron; as such, lectures will emphasize a strong introductory base prior to moving on to more advanced detail. Special topics covered will include stimulus secretion-transcription coupling, the role of cellular oncogenes in signal transduction pathways, and the coordinate expression of co-existing transmitters.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

---

**NROSCI 2090 - APPLD STATISTICS IN NEUROSCI 1**

Minimum Credits: 4  
Maximum Credits: 4

An applied course, covering experimental design and statistical analysis useful for research in neuroscience. A computer component is an integral part of the course. Emphasis is on the analysis of variance, independent groups designs and power analysis. As time permits, other topics such as regression analysis and repeated measures designs will be explored.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

---

**NROSCI 2091 - APPLD STATISTICS IN NEUROSCI 2**

Minimum Credits: 2  
Maximum Credits: 2

Advanced applied statistics course covering some mixed ANOVA designs and an introduction to regression analysis.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

---

**NROSCI 2095 - RESEARCH SEMINAR**

Minimum Credits: 1  
Maximum Credits: 4

This course is available to graduate students outside the department of neuroscience who wish to register for a 1000 level course in the department yet receive graduate credit. Typically, the standard course work is supplemented by extra readings and/or tutorial sessions, to make it more appropriately a graduate level course.

Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

---

**NROSCI 2097 - TEACHING NEUROSCIENCE**

Minimum Credits: 1  
Maximum Credits: 3

Each student teaching a course during this term should register for this class. The faculty supervisor will meet with the student-teacher to review outlines for lectures. The supervisor will observe 8 - 10 hours of the student's teaching and provide the student-teacher with critical feedback.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad SN Basis

---

**NROSCI 2100 - CLLR & MOLECULAR NEUROBIOL 1**

Minimum Credits: 5  
Maximum Credits: 5

This course is the first component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers nerve cell biology, protein chemistry, regulation of gene expression, receptor function, and second messenger signaling in a lecture format. A background in basic biology is required.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2101 - CLLR & MOLECULAR NEUROBIOL 2
Minimum Credits: 3
Maximum Credits: 3
This course is the second component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers the electrical properties of neurons, synaptic transmission, and neural development. A background in basic biology is required.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2102 - SYSTEMS NEUROBIOLOGY
Minimum Credits: 6
Maximum Credits: 6
This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. This course provides an introduction to the structure of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions. It is taught primarily in a lecture format with some laboratory work.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2103 - SYSTEMS NEUROBIOLOGY CONFR
Minimum Credits: 2
Maximum Credits: 2
This course is a co-requisite to systems neurobiology and involves conference integrated into a non-didactic laboratory and conference format designed to develop research skills. Students will be expected to read and discuss original scientific literature.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

NROSCI 2106 - NEUROSCIENCE SEMINAR SERIES
Minimum Credits: 1
Maximum Credits: 1
Nationally and internationally recognized neuroscience researchers present scientific findings. Students meet with speakers to discuss seminar topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2107 - CUR RES NEURAL BASIS COGNITION
Minimum Credits: 1
Maximum Credits: 1
Presentations of current research by students and faculty of the center for the neural basis of cognition, and by visiting researchers from other universities. Areas of cognition covered include perception, memory, language, attention, motor control, and executive functions. Disorders of cognition as well as developmental issues are considered. Methodologies include single neuron recording studies, functional brain imaging studies, computational modeling studies, and behavioral investigations using normal populations and individuals with cognitive disorders.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis
Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2110 - STATS METHODS FOR NEUROSCIENCE
This course provides a brief survey of statistical methods that are of use in cognitive neuroscience. The first part of the course will present a compressed version of material often covered in a semester-long course in elementary statistics. The latter part of the course will introduce various more advanced methods. Topics include probability (laws of probability, conditional probability, bayes' theorem, random variables, binomial, poisson, and normal distributions, and poisson and other point processes), exploratory data analysis (descriptive methods for single samples and multiple samples, scatterplot smooths, histograms, and density estimators), elementary statistical inference (standard errors and confidence intervals, goodness-of-fit and significance tests, anova and regression, and maximum likelihood and bayesian inference). Additional topics may include bayesian classification, roc curves, information theory, fourier analysis and signal processing, multivariate analysis, PCA and ICA, the bootstrap, nonparametric regression, and integrate-and-fire models.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**NROSCI 2112 - NEUROBIOLOGY OF DISEASE**

Minimum Credits: 2  
Maximum Credits: 2  

This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder. Participants will be asked to do some background reading each week, to prepare an essay on a topic of relevance to the neurobiology of disease. Reading will consist of reviews and recent research articles.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Neuroscience (PHD) or Neurobiology (PHD)

---

**NROSCI 2410 - TRANSLATING SCIENCE**

Minimum Credits: 3  
Maximum Credits: 3  

Students will work in creative teams of 2-3 students/team to develop creative new outreach tools for communication of science to the public (new lectures, laboratories, videos, films, activities). At the beginning of the semester, didactic lectures will cover background information about how to effectively communicate scientific information, how to break down a message, production of effective, engaging slides, animations and videos, and the use of hands-on activities to engage the audience. Guest speakers with expertise in film, video and use of museum exhibits will be included. Students will then choose a topic area they wish to create an outreach lecture/video/etc. In, and with the assistance of Dr. Cameron you will choose a scientific advisor with specific expertise on the topic you will develop an outreach tool for. Students will do background reading for the development of their outreach tool and have discussions with their advisor. If developing a lecture, students will develop a set of PowerPoint slides for the lecture, the lecture text with background references, and hands-on activities to complement the lecture for both a junior high and a high school version of the lecture. They will present the lecture at one of the grade levels it was designed for. For other activities, the activity will be developed along with background information regarding the use of the activity. The activity will be presented to a public group.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

---

**NROSCI 2800 - WRITING IN NEUROSCIENCE**

Minimum Credits: 1  
Maximum Credits: 3  

Individual instruction on any aspect of technical writing, with an emphasis on scientific English.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

---

**NROSCI 2902 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 12  

Students doing laboratory research with a neuroscience faculty member should register for this course.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Neuroscience (MS, PHD)
NROSCI 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
Students doing laboratory research with a neuroscience faculty member should register for this course.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 12
Students working on their dissertation may register for this course.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 3001 - APPRENTICESHIP
Minimum Credits: 1
Maximum Credits: 3
Students doing laboratory research with a faculty member who is not their mentor may register for this course.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 3005 - SEMINAR IN NEUROANATOMY
Minimum Credits: 1
Maximum Credits: 3
Students discuss research articles published recently in the general area of neuroanatomy. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3006 - SEMINAR IN NEUROLOGY
Minimum Credits: 1
Maximum Credits: 3
Students discuss research articles published recently in the general area of neurology. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3007 - SEMINAR IN NEUROPHARMACOLOGY
Minimum Credits: 1
Maximum Credits: 3
Students discuss research articles published recently in the general area of neuropharmacology. The goal of the course for the students is to gain perspective on this ongoing research, and generally to receive instruction on how to critically evaluate the scientific literature.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3008 - SEMINAR IN NEUROPSYCHIATRY
Students discuss research articles published recently in the general area of neuropsychiatry. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

### NROSCI 3009 - SEM: BIOCHEMISTRY AND BEHAVIOR

Minimum Credits: 1  
Maximum Credits: 3  
Students discuss research articles published recently in the general area of biochemistry and behavior. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### NROSCI 3010 - SEMINAR IN MEMBRANE BIOPHYSICS

Minimum Credits: 1  
Maximum Credits: 3  
Students discuss research articles published recently in the general area of membrane biophysics. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### NROSCI 3011 - SEMINAR IN NEUROPHYSIOLOGY

Minimum Credits: 1  
Maximum Credits: 3  
Students discuss research articles published recently in the general area of neurophysiology. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### NROSCI 3012 - SEM: HOMEOSTATIC MECHANISMS

Minimum Credits: 1  
Maximum Credits: 3  
Students discuss research articles published recently in the general area of homeostatic mechanisms. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### NROSCI 3017 - SEM BIOPHYS GLUTAMATE RECPT

Minimum Credits: 1  
Maximum Credits: 3  
Students will read, present, and discuss articles concerning the biophysical mechanisms by which glutamate receptors function. The goals of the seminar are to increase the student's knowledge and understanding of how ligand-gated ion channels function, enhance their ability to critically read and evaluate the scientific literature, and improve their presentation skills.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### NROSCI 3019 - SEMINAR IN AUTONOMIC FUNCTION

Minimum Credits: 1  
Maximum Credits: 3  
Students discuss research articles published recently in the general area of autonomic function. The goal of the course for the students is to gain
perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 3021 - ADV SEM IN NEURODEGENERATION
Minimum Credits: 1
Maximum Credits: 3
Seminar designed for advanced graduate students who have completed the core curriculum or its equivalent. The goal of the course is to provide a systematic overview of the processes fundamental to the CNS response to injury and disease. Principal emphasis will be placed upon factors that initiate and mediate the spatiotemporally organized cascades of cellular responses to a variety of pathological insults (ischemia, neurotoxins, viral infection) or disease states (ALS, Alzheimer's, Parkinson's).

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3022 - SEMINAR IN THE SYNAPSE
Minimum Credits: 1
Maximum Credits: 3
This course will cover current readings in cellular neuroscience with dual emphasis on synaptic neuroscience and the signal transduction mechanisms that likely underlie alterations in synapses.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3023 - SEMINAR IN COGNITIVE NEUROSCIENCE
Minimum Credits: 1
Maximum Credits: 3
This course will cover current readings in cognitive neuroscience, with a dual emphasis on (1) single-neuron recording studies in monkeys and (2) neuropsychological and computational findings directly relevant to nonhuman primate models. Students will present and discuss selected primary research papers.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3024 - SEMINAR IN THE HIPPOCAMPUS
Minimum Credits: 1
Maximum Credits: 3
This course will cover papers dealing with the hippocampal physiology and related topics including anatomy, unit activity, synaptic plasticity and the role of hippocampus in memory and learning.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3025 - SEMINAR IN NEUROIMMUNOLOGY
Minimum Credits: 1
Maximum Credits: 3
This seminar will cover current literature examining the interaction between the nervous system and the immune system. Topics will include signaling mechanisms through which the immune system influences the brain and outputs of the central nervous system that affect immune function. The impact of stress on the function of the immune system will be highlighted throughout.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

NROSCI 3030 - SEMINARS IN SYNAPTIC FUNCTION
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Neuroscience (MS, PHD)

**NROSCI 3041 - SEMINAR IN NEURAL NETWORKS**  
Minimum Credits: 1  
Maximum Credits: 3  
Students discuss research articles published recently in the general area of neural networks. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**NROSCI 3052 - TUTORIAL IN REPRODUCTIVE BIOLOGY**  
Minimum Credits: 3  
Maximum Credits: 3  
Students discuss research articles published in the general area of reproductive biology. The goal of the course for the students is to receive instruction on the details of the subject matter, and more generally on how to critically evaluate the scientific literature.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**NROSCI 3058 - TUTORIAL IN HOMEOSTASIS**  
Minimum Credits: 3  
Maximum Credits: 3  
Students discuss research articles published in the general area of homeostasis. The goal of the course for the students is to receive instruction of the details of the subject matter, and more generally on how to critically evaluate the scientific literature.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**NROSCI 3059 - TUTORIAL BIOLOGICAL BASES LEARNING**  
Minimum Credits: 3  
Maximum Credits: 3  
Students discuss research articles published in the general area of the biological bases of learning. The goal of the course for the students is to receive instruction on the details of the subject matter, and more generally on how to critically evaluate the scientific literature.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

**NROSCI 3060 - TUTORIAL IN NEUROCHEMISTRY**  
Minimum Credits: 3  
Maximum Credits: 3  
This tutorial is in the general area of neurochemistry and neuropharmacology. The goal of the course for the students is to receive instruction on the details of the subject matter, and, more generally, on how to critically evaluate the scientific literature.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**NROSCI 3902 - DIRECTED STUDY**  
Minimum Credits: 1  
Maximum Credits: 6  
Students doing laboratory research with a neuroscience faculty member may register for this course.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis
Nurse Anesthesia

NURSAN 2700 - BASIC PRINCIPLES OF ANESTHESIA
Minimum Credits: 5
Maximum Credits: 5
This course prepares the student for entry into the clinical setting using classroom lecture and workshops. Basic concepts of anesthesia practice, techniques, monitoring, pharmacology, and responsibilities of the nurse anesthetist are presented. Students are introduced to anesthesia management strategies for common problems and situations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2701 - CHEM & PHYSICS OF ANESTHESIA
Minimum Credits: 3
Maximum Credits: 3
Provides a detailed study of chemical and physical principles which apply to physiology, pharmacology and anesthesia equipment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2715 - ADV PRACT INITIATIVES FOR CRNA
Minimum Credits: 3
Maximum Credits: 3
Course focuses on the expansion of the knowledge base and refinement of practice skills of experienced CRNA's. Students identify an area of study in the field of nurse anesthesia in which they wish to improve knowledge and clinical expertise. Students develop and implement a comprehensive plan which includes establishing specific goals, developing a program of independent study, negotiation of a clinical practice site and completion of a defined clinical practicum. Objectives are met thru a learning contract, an oral and poster presentation and a written scholarly paper.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2720 - APPLD PHYSLGY & PATHPHYLGY
Minimum Credits: 4
Maximum Credits: 4
Integrates basic physiologic principles with clinical anesthesia management regimes. Designed to formulate approaches to anesthesia nursing management in the presence of various common pathophysiologic conditions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2730 - ADV PRINCIPLES OF ANESTHESIA 1
Minimum Credits: 4
Maximum Credits: 4
Provides in-depth study of specialized areas of nurse anesthesia practice. Lectures concentrate on the theoretical basis for specific anesthesia nursing interventions and the rationale for their use in each of the areas of sub specialization. These areas encompass pediatric, obstetric, and regional anesthesia management as well as acute and chronic pain management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2731 - APPLIED PHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course provides the basis for an in-depth understanding of the pharmacology of clinical anesthesia practice. Specific properties of anesthetic agents and commonly used adjunctive drugs are discussed and critically analyzed for appropriate application in clinical situations. Development of a comprehensive knowledge base with respect to drugs used by the nurse anesthetist in the clinical setting will be achieved through lecture, presentation, situational examples, and case analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2740 - ADV PRINCIPLES OF ANESTHESIA 2
Minimum Credits: 3
Maximum Credits: 3
The course provides in-depth study of specialized areas of nurse anesthesia practice. Lectures concentrate on the theoretical basis for specific anesthesia nursing interventions and relevant research-based rationale for their use in each of the areas of sub specialization. The focus is on anesthetic care for patients with diseases requiring cardiac, thoracic, vascular, pulmonary cardiac/lung transplant procedures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2750 - ADV PRINCIPLES OF ANESTHESIA 3
Minimum Credits: 3
Maximum Credits: 3
Provides an in-depth study of specialized areas of nurse anesthesia practice. The concentration is on the theoretical basis for specific anesthesia nursing interventions and the rationale for these interventions in each area of sub-specialization. Course will focus on anesthesia for neurologic, trauma, renal, respiratory, hepatic and hematologic disorders.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURSAN 2700; CREQ: NURSAN 2794 or NURSAN 2795; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2751 - TEAM TRAINING IN PATIENT SAFETY
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2760 - CRNA ROLE SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This course prepares the nurse anesthetist for new areas of responsibility as a professional contributing to education, research, and advanced practice roles. Students gain experience in developing and implementing a community service project designed to promote a positive image of nurse anesthetists. Current legislative, legal and ethical issues are presented. Professional opportunities and issues are explored.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia(DNP, MSN)

NURSAN 2780 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Allows individual student to pursue a specific problem or area of study with faculty guidance. Examples of individual projects which may be pursued include library study focused on a specific area relevant to anesthesia nursing or clinical work in a health care delivery setting.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2785 - THESIS**
Minimum Credits: 1  
Maximum Credits: 3  
Individual instruction provides guidance in the preparation of a scholarly written report relating to anesthesia nursing. This report synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2787 - SEDATION PHARMACOLOGY**
Minimum Credits: 3  
Maximum Credits: 3  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSAN 2788 - SEDATION SKILL DEVELOPMENT**
Minimum Credits: 3  
Maximum Credits: 3  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NUR 2004 and NUR 2031; CREQ: NURSAN 2787 and NUR 2034

**NURSAN 2789 - SEDATION PRACTICUM**
Minimum Credits: 3  
Maximum Credits: 3  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NUR 2004 and NUR 2031; CREQ: NUR 2034 and NURSAN 2787 and NURSAN 2788

**NURSAN 2791 - CLINICAL PRACTICUM**
Minimum Credits: 0  
Maximum Credits: 0  
This initial clinical course is designed to integrate with basic didactic coursework. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be introduced to anesthesia equipment, procedures, medications and the perioperative environment. Students will be required to meet or exceed level specific objectives and experiences will build from simple cases and techniques to the more complex. Clinical experience will be guided by certified registered nurse anesthetists and anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** CREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2792 - CLINICAL PRACTICUM**
Minimum Credits: 0  
Maximum Credits: 0  
This second clinical course is designed to integrate with more advanced didactic coursework with focus on pathophysiology. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to more complicated cases and will be required to
meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2793 - CLINICAL PRACTICUM**  
Minimum Credits: 0  
Maximum Credits: 0  
This third clinical course is designed to build on more advanced didactic coursework including focus on pathophysiology, applied pharmacology and specialty case management. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2794 - CLINICAL PRACTICUM**  
Minimum Credits: 0  
Maximum Credits: 0  
This fourth clinical course is designed to assist the nurse anesthesia student to apply concepts from didactic coursework including focus on cardiovascular, thoracic, and vascular anesthesia. Advanced airway techniques and sophisticated laboratory analysis will be included. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2795 - CLINICAL PRACTICUM**  
Minimum Credits: 0  
Maximum Credits: 0  
This fifth clinical course is designed to assist the nurse anesthesia student to apply concepts from didactic coursework including focus on neurosurgical, trauma, orthopedic, renal transplant and hepatic transplant anesthesia. Students will apply advanced principles of fluid and blood management and demonstrate the ability to treat perioperative hematologic disorders. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2796 - CLINICAL PRACTICUM**  
Minimum Credits: 0  
Maximum Credits: 0  
This sixth clinical course is designed to assist the nurse anesthesia student to synthesize content from all advanced principles courses and to become increasingly independent in their clinical practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 2797 - CLINICAL PRACTICUM**  
Minimum Credits: 0  
Maximum Credits: 0
This seventh clinical course is designed to assist the nurse anesthesia student to synthesize all didactic content and to demonstrate their ability to meet all program outcome criteria for clinical practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to all types of cases for patients across the acuity spectrum. Students will be expected to manage anesthesia with a high degree of autonomy in this clinical rotation. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 3251 - TEAM TRAINING IN PATNT SAFETY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSAN 3282 - DIR SEMINARS IN NURS ANES PRA**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This seminar based course series is designed to provide the nurse anesthesia program DNP student with a strong theoretical and practical foundation grounded in nurse anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including nurse anesthesia education, nurse anesthesia simulation methods, clinical research for the nurse anesthetist and nurse anesthesia administration, and nurse anesthesia policy. The seminar series focus and content will change according to current state of-the-art practice in nurse anesthesia with consideration given to faculty and student areas of interest, to include international practice in developing countries.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**NURSAN 3751 - TEAM TRAINING PATIENT SAFETY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSAN 3782 - DIRECTED SEM IN ANESTHESIA**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This seminar based course series is designed to provide the nurse anesthesia program DNP student with a strong theoretical and practical foundation grounded in nurse anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including nurse anesthesia education, nurse anesthesia simulation methods, clinical research for the nurse anesthetist and nurse anesthesia administration. The seminar series focus and content will change according to current state of-the-art practice in nurse anesthesia with consideration given to faculty and student areas of interest.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Nurse Anesthesia (DNP, MSN)

**NURSAN 3783 - REGLTN REIMBMNT NURS ANES PRAC**  
**Minimum Credits:** 3  
**Maximum Credits:** 3
This course examines the current regulatory requirements of governmental and non-governmental entities that impact and control nurse anesthesia practice. Approaches to influence positive changes in this practice discipline are explored. The generation of revenue in the specialty of anesthesia, including billing procedures and requirements of governmental and private health insurance providers, effective departmental organizational structure, and fraud are discussed. Current legal and advanced professional issues are included.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSAN 3784 - CURR, INSTC EVAL NURS ANES ED**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will prepare CRNAs for the various roles of an educator within a nurse anesthesia program. Concepts of academic and clinical curriculum development specific to nurse anesthesia programs, best practice methodologies for clinical and didactic instruction, and evaluation approaches for academic and clinical performance will be included.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSAN 3785 - INTRODUCTION TO THE NURSE ANESTHETIST ROLE**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This introductory course will provide student socialization into the role of nurse anesthesia practice and prepares the student for more advanced content within curriculum. This course provides fundamental concepts related to the professional role, anesthesia types and anesthesia processes. Safety principles essential to preventing negative outcomes for both patients and providers will be emphasized.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Nurse Anesthesia; CREQ: NURSAN 3099

**NURSAN 3786 - BASIC PRINCIPLES OF ANESTHESIA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course prepares the student for entry into the clinical practice setting by presenting fundamental concepts of general, regional, pain management, and sedation anesthesia. Airway management techniques, positioning, and an introduction to anesthetic pharmacology are emphasized. Anesthetic management strategies for patients with common diseases and perioperative problems are examined.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Nurse Anesthesia; PREQ: NURSAN 3785 ; CREQ: NURSAN 3790

**NURSAN 3787 - BASIC PRINCIPLES OF ANESTHESIA LAB**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course provides students with necessary skills to enter clinical practice. Psychomotor, critical thinking and affective skills will be developed using a variety of experiential learning approaches. Best practices in simulation educational methods will be used and will include a variety of approaches. Students will demonstrate attainment of entry level skills required for clinical practice.  
**Academic Career:** GRAD  
**Course Component:** Credit Lab  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Nurse Anesthesia; PREQ: NURSAN 3785 ; CREQ: NURSAN 3790

**NURSAN 3788 - CHEMISTRY AND PHYSICS IN ANESTHESIA**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course provides the nurse anesthesia student with a fundamental understanding of chemical, biochemical and physics principles as they relate to physiology, pharmacology and the practice of anesthesia. Essential concepts related to chemistry and physics principles necessary to provide safe and effective anesthesia care are emphasized. Chemistry and physics concepts will be related to anesthesia equipment and processes in order to illustrate their importance to practice.  
**Academic Career:** GRAD
NURSAN 3790 - BASIC CLINICAL CARE 1: INTRO TO TECHNOLOGY, MONITORING, AND PRACTICE
Minimum Credits: 1
Maximum Credits: 1
This initial clinical course is designed to integrate with basic didactic coursework. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be introduced to basic level anesthesia technology and equipment, medications, monitoring procedures, and the peripoperative environment. Experiences will begin with simple cases and techniques and build to more complex ones. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Clinical case conferences and ongoing assessments will be conducted to evaluate the students' ability to apply basic didactic coursework into clinical anesthesia care.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3790

NURSAN 3791 - ADVANCED PRINCIPLES ANATOMY, PHYSIOLOGY & PATHOPHYSIOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
This first course in a 2-course series is designed to help students understanding of advanced concepts in Anatomy, Physiology and Pathophysiology related to anesthesia care. Advanced principles of patient management supported by best evidence will be applied to the clinical practice of nurse anesthesia across a variety of body systems and surgical procedures. Students will formulate and evaluate approaches to anesthesia management in the presence of pathophysiologic conditions affecting the Central Nervous System (CNS), neuromuscular, cardiovascular, respiratory, skeletal, and immune systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3786 ; CREQ: NURSAN 3792

NURSAN 3792 - BASIC CLINICAL CARE 2: BASIC PRE-OPERATIVE, INTRAOPERATIVE, AND POST-OPERATIVE CARE
Minimum Credits: 1.5
Maximum Credits: 1.5
This second clinical course promotes development of skills gained in NURSAN 3790 and integrates prior basic didactic content with more advanced concepts. The primary focus will be on the application of physiology and pathophysiology into anesthetic practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas as well as increasingly complicated cases. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and Anesthesiologists. Clinical case conferences will be conducted to assess the students' ability to combine more advanced didactic content into patient specific perioperative anesthesia care.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3790; CREQ: NURSAN 3791

NURSAN 3794 - EVIDENCE BASED NURSE ANESTHESIA PRACTICE
Minimum Credits: 1
Maximum Credits: 1
This course builds on knowledge and skills acquired in NUR 2000 and NUR 2011. Translation of research evidence to nurse anesthesia clinical practice is a focus. Students will critique research papers, quality improvement projects and programmatic evaluations. Students will gain an understanding of how clinical practice guidelines (e.g., American Society of Anesthesia, American Heart Association, World Health Organization, and Centers for Disease Control) are developed, evaluated and disseminated. Differences between research projects, quality improvement projects and program evaluation projects will be explored. Students will gain an understanding of methods for integrating clinical practice guidelines into capstone projects.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NUR 2034 and NUR 2000

NURSAN 3795 - ADVANCED PRINCIPLES OF ANATOMY, PHYSIOLOGY, AND PATHOPHYSIOLOGY 2
Minimum Credits: 2
Maximum Credits: 2
This second course in the series is designed to review the relevant anatomy and physiology of the endocrine, renal, hepatic, gastrointestinal, (and other intraabdominal organ), immune, hematologic and genitourinary systems. Students will develop in-depth understanding of how pathophysiology involving these systems will influence anesthetic choices and management approaches. Referencing best-evidence and clinical protocols, students will describe management approaches for surgical and therapeutic procedures related to these systems. Additionally, the pathophysiology of psychiatric illness, infectious disease, cancer and obesity will be reviewed and approaches to anesthesia care in the presence of these conditions will be developed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3791 ; CREQ: NURSAN 3797

NURSAN 3796 - ADVANCED PHARMACOLOGY FOR NURSE ANESTHETISTS
Minimum Credits: 3
Maximum Credits: 3
This course provides the basis for in-depth understanding of the pharmacology of clinical anesthesia practice. Specific properties of anesthetic agents and commonly used adjunctive drugs are discussed and evaluated for appropriate application in clinical situations. Development of a comprehensive knowledge base with respect to drugs used by the Nurse Anesthetist in the clinical setting will be achieved through lecture, presentation, situational examples, and case analysis. Students will formulate specific pharmacologic plans through synthesis of a variety of concepts.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NUR 2034 ; CREQ: NURSAN 3797

NURSAN 3797 - ADVANCED CLINICAL CARE 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This third clinical course is designed to begin integrating more advanced clinical concepts into the clinical experience. Primary focus will be on application of the principles of advanced physiology, pathophysiology and applied pharmacology to management of increasingly advanced clinical cases. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and Anesthesiologists. Supplemental clinical case conferences will focus on the students' ability to integrate more advanced didactic content into patient specific clinical anesthesia care. Particular emphasis will be placed on discussion of approaches to pain management, regional anesthesia, obstetrics and pediatrics.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3792; CREQ: NURSAN 2730

NURSAN 3799 - DIRECTED SEMINAR: THE BSN TO DNP STUDENT ANESTHETIST
Minimum Credits: 1
Maximum Credits: 1
This seminar based course is designed to provide the Nurse Anesthesia Program DNP Student with a strong theoretical and practical foundation grounded in Nurse Anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including Nurse Anesthesia Education, Nurse Anesthesia Simulation Methods, Clinical Research for the Nurse Anesthetist and Nurse Anesthesia Administration, and nurse anesthesia policy. The focus and content will change according to current state 'of-the-art practice in Nurse Anesthesia with consideration given to faculty and student areas of interest, to include international practice in developing countries.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3794; CREQ: NURSAN 3800

NURSAN 3800 - NURSE ANESTHETIST ROLE SEMINAR
Minimum Credits: 1.5
Maximum Credits: 1.5
This course prepares the nurse anesthesia student for their new role as a CRNA and Advanced Practice Registered Nurse. Areas of professional responsibility and potential professional roles will be addressed including APRN, educator, military member, consultant, self-employed practitioner, CRNA clinician, leader, change agent, organizational leadership position and administrator. Licensure, accreditation, certification and educational requirements for CRNAS as APRNS will be reviewed. Pathways to active involvement in community service and legislative advocacy will be discussed and analyzed. Legal, financial, malpractice and ethical issues related to nurse anesthesia practice will be addressed.
NURSAN 3801 - ADVANCED CLINICAL CARE 2
Minimum Credits: 1.5
Maximum Credits: 1.5
This fourth clinical course is designed to assist the nurse anesthesia student to integrate advanced clinical concepts being covered concurrently in the classroom with the clinical experience. Primary focus will be on specialty case management, including cardiovascular, thoracic, and vascular anesthesia. Advanced airway techniques and sophisticated laboratory analysis will be included. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas to manage increasingly complicated and specialty cases. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Supplemental clinical case conferences will be conducted with focus on these specialty populations. These conferences will correspond to current didactic courses.

NURSAN 3803 - ADVANCED CLINICAL CARE 3
Minimum Credits: 1.5
Maximum Credits: 1.5
This fifth clinical course builds upon experiences gained in NURSAN 3801 and prior courses. The focus will be on demonstration and refinement of more advanced skills as well as incorporating content from concurrent didactic coursework into patient care. Students will demonstrate the ability to implement patient specific plans of care for neurosurgical, neurovascular, and trauma, renal, hepatic and emergency procedures. Students will also demonstrate the ability to manage complex pathophysiology. Students will gain an awareness of the broader professional roles and responsibilities of the CRNA (administrative, patient advocacy, process and patient safety evaluator). Supplemental clinical case conferences will be conducted with focus on these specialty populations and the CRNA role.

NURSAN 3804 - ADVANCED CLINICAL CARE 4: SYNTHESIS OF PERIOPERATIVE CARE
Minimum Credits: 2
Maximum Credits: 2
This sixth clinical course builds upon experiences gained in NURSAN 3803 and prior courses and is designed to help the student refine their knowledge base and develop increasing sophistication in practice. Students will be able to provide care for any combination of patient acuity level and complexity of procedure across the lifespan. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Integrated clinical case conferences will require students to present their patients and defend their plan of care with rationale based on best practices.

NURSAN 3805 - COMPREHENSIVE ANESTHESIA REVIEW SEMINAR
Minimum Credits: 2
Maximum Credits: 2
This course is designed to comprehensively review the body of knowledge necessary to enter Nurse Anesthesia practice. Nurse Anesthesia student preparation for both the DNP Comprehensive Examination and the National Board of Certified Registered Nurse Anesthetist National Certification Examination will be enhanced. Review topics will include: Basic Sciences, Equipment, Instrumentation, Technology, Basic Principles of Anesthesia and Advanced Principles of Anesthesia. A series of seminars and presentations interspersed with comprehensive, computerized examinations will be administered to allow students to evaluate their knowledge level and their test taking skills.
NURSAN 3806 - TRANSITION TO CLINICAL PRACTICE
Minimum Credits: 2
Maximum Credits: 2
This final clinical course is designed to help the student transition from the student role to clinical practice. Students will be expected to create sophisticated patient and case specific management plans. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists, but students will be expected to practice with little or no prompting from their clinical supervisors and understand their limitations. Clinical experiences will include specialty cases and experiences in all areas of practice as assigned. Clinical case conferences will be held that challenge the breadth of the students' knowledge base across the full scope of the clinical and professional role of the CRNA.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3804

Nurse Midwife

NURNM 3500 - AMBULATORY ROLE PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
This course targets the implementation of evidence-based practices and interventions that serve as the basis for the nurse midwifery care of health conditions associated with pregnant and non-pregnant women within ambulatory healthcare settings. The implementation of culturally sensitive and appropriate gynecological, antepartal, and postpartum care drawn from diverse theoretical frameworks is also a primary focus of the course.
Academic Career: GRAD
Course Component: Practicum
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3507 and NURNM 3513; CREQ: NURNM 3511; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3501 - GLOBAL/COMMUNITY ROLE PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This practicum focuses on nurse midwifery assessment of various community level women's and maternal-child health issues and planning for intervention. Public health, epidemiologic, ethical and legal considerations are applied to critiquing proposed projects.
Academic Career: GRAD
Course Component: Practicum
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3508 and NURNM 3509; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3502 - HIGH RISK CHILDBEARING FAMILY
Minimum Credits: 4
Maximum Credits: 4
This course targets evidence based-practices and interventions that serve as the basis for family-centered nurse midwifery care of high risk conditions associated with pregnancy, labor and delivery, postpartum, and the neonatal period. Theories related to the woman's and family's experience associated with a high risk pregnancy are discussed and examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3500; CREQ: NURNM 3504; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3503 - INTEGRATION ROLE PRACTICUM
Minimum Credits: 7
Maximum Credits: 7
This course is the culminating nurse midwifery practicum with the student focusing on the practice of full scope nurse midwifery under the guidance and supervision of a Certified Nurse Midwife preceptor. Full scope nurse midwifery care encompasses counseling and management during the preconception, pregnancy, labor and birth, postpartum, neonatal period, and across the reproductive life cycle within the family.
Academic Career: GRAD
Course Component: Practicum
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3504; CREQ: NURNM 3510; PLAN: Nurse Midwife (NURSMW-DNP)
NURNM 3504 - LABOR & BIRTH ROLE PRACTICUM
Minimum Credits: 4
Maximum Credits: 4
This practicum targets the nurse midwifery model of care in implementation of evidence-based practices and interventions that serve as the basis for the management of health conditions associated with family-centered pregnancy, labor and birth, postpartum, and the neonatal period. The implementation of culturally sensitive and appropriate antepartal to postpartal to neonatal care drawn from diverse theoretical frameworks is also a primary focus of the course.
Academic Career: GRAD
Course Component: Practicum
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3500; CREQ: NURNM 3502; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3505 - MANAGEMENT FETUS/NEONATE IN DYAD
Minimum Credits: 2
Maximum Credits: 2
This course focuses on nurse midwifery management of the fetus/neonate within the mother-newborn dyad and family. Emphasis is on selected theories, principles, and techniques from the physical and behavioral sciences central to the nurse midwifery model of care for the fetus/neonate. The NM DNP scope of practice with interprofessional collaboration and referral is incorporated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3507; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3506 - MANAGEMENT WOMEN'S COMPLEX HEALTH ISSUES
Minimum Credits: 2
Maximum Credits: 2
This course focuses on nurse midwifery model of care with women experiencing complex reproductive health issues. Emphasis is on selected theories, principles and techniques from the physical and behavioral sciences central to the nurse midwifery management of women, women's issues, health promotion for women, and diagnosing and managing complicated reproductive health problems. The NM DNP scope of practice with interprofessional collaboration and referral is incorporated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNP 2523 and NURNP 2515 and NURNP 2505; CREQ: NURNM 3513; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3507 - NEONATAL ROLE PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This practicum focuses on the nurse midwifery model of care for the neonate within the mother-newborn dyad and family. Examination, assessment and management of the neonate from birth through the first 28 days of life are applied in practice.
Academic Career: GRAD
Course Component: Practicum
Grade Component: GradLG/SU3

NURNM 3509 - ROLE SEMINAR 1: PROFESSIONAL NURSE MIDWIFE
Minimum Credits: 1
Maximum Credits: 1
This introductory seminar is designed for enculturation to the art and science of the nurse midwifery profession for care of women, newborns, and families in diverse settings. Articulation of nurse midwife (NM) role with the Doctor of Nursing Practice (DNP) will be developed. Midwifery history, philosophy of care, ethics, standards, and competencies will be emphasized in developing the role and scope of NM DNP practice.
Academic Career: GRAD
Course Component: Seminar
Grade Component: GradLG/SU3
Course Requirements: CREQ: NUR 2010 and NUR 3099; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3510 - NURSE MIDWIFE ROLE SEMINAR 2
Minimum Credits: 1
Maximum Credits: 1
This is a culminating seminar emphasizing issues unique to the implementation of the role of the Nurse Midwife (NM) in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice for DNP care trends, health care needs of women, maternal-infant dyads and childbearing families in diverse environments, and legislative and professional practice issues. Professional, inter-professional, economic, cultural, and legal issues related to NM practice will be emphasized. Identification, assessment, and advanced management of common and complex health problems in specific populations will be addressed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3513; CREQ: NURNM 3503; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3511 - NORMAL CHILDBEARING FAMILY
Minimum Credits: 4
Maximum Credits: 4
This course targets evidence-based practices and interventions that serve as the basis for nurse midwife (NM) management of normal and common health conditions associated with pregnancy, labor and delivery, postpartum, and the neonatal period. Theories related to the woman's experience of pregnancy, childbirth, and the taking-on of the maternal identity/role in context of family are also examined.

Academic Career: GRAD
Course Component: Lecture
Grade Component: GradLG/SU3
Course Requirements: PREQ: NURNM 3505 and NURNM 3506; CREQ: NURNM 3500; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3512 - WOMEN'S HEALTH ROLE PRACTICUM 1
Minimum Credits: 1
Maximum Credits: 1
This is an entry level clinical practicum focused on well-woman care and includes intermediate level seminars that emphasize issues unique to the implementation of the role of the Nurse Midwife (NM) as provider of primary care for women in various settings. This course is designed to develop assessment skills and differential diagnoses with beginning management skills, and to analyze factors that have an impact on advanced nursing practice, emphasizing the scope of practice in NM and DNP health care trends, health care needs in diverse environments, and professional practice issues. Professional, inter-professional, economic, cultural, and legal issues related to NM DNP practice experiences will be emphasized.

Academic Career: GRAD
Course Component: Practicum
Grade Component: GradLG/SU3

Nurse Practitioner

NURNP 2026 - ROLE SEMINAR 1
Minimum Credits: 1
Maximum Credits: 1
This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
NU RN P 2027 - ROLE SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This is a culminating seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors which impact advanced nursing practice with emphasis on scope of practice of the np, health care trends, health care needs in diverse environments, legislative and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NU RN P 2028 - ROLE PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This course is designed to provide each student with a practicum experience in role development for the nurse practitioner. Experiences emphasize clinical decision making in an interprofessional environment with a focus on the nurse practitioner as a principal provider of care for individuals with population specific health care needs and conditions.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Graduate School of Nursing

NU RN P 2029 - ROLE SEMINAR 2
Minimum Credits: 2
Maximum Credits: 2
This is a culminating seminar emphasizing issues unique to transitioning to the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, and legislative and professional practice issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2026 or NURNP 2406

NU RN P 2100 - MGT ADLT EPIS/CHRNC HLTH PROB
Minimum Credits: 4
Maximum Credits: 4
This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced nursing practice in the diagnosis and management of common episodic and complex chronic dysfunctions/alterations in the acutely ill adult-gerontology population. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for adult-gerontology patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2033; CREQ: NUR 2034 or NUR 2434; PROG: Graduate School of Nursing

NU RN P 2101 - MGT ADLT EPISODIC/CHRONIC HLTH
Minimum Credits: 3
Maximum Credits: 3
This clinical course is designed to provide opportunities to apply a theoretical, practical and evidenced based foundation for advanced nursing practice in the diagnosis and management of common episodic and complex chronic dysfunctions/alterations in the acutely ill adult-gerontology population. Through clinical experience, students implement advanced practice skills in patient/family assessment, develop and implement a management plan and evaluate the plan's effectiveness when caring for adult-gerontology patients across the continuum of the acute care services. Health promotion, health protection, and health restoration appropriate to these patients and families will be emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NURNP 2100 or NURNP 2401
NURNP 2102 - MGT: CMPLX HLTH PROB 2
Minimum Credits: 3
Maximum Credits: 3
This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in adult-gerontology patients who are acutely and/or critically ill. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2104

NURNP 2104 - CPLX HLTH PROB ACTLY/CRIT ILL
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a theoretical foundation for advanced nursing care of the acutely and critically ill adult-gerontology patient. Through didactic information, laboratory experience, and course assignments, students develop the knowledge base and psychomotor skills central to planning, implementing and evaluating health care for adult-gerontology patients with complex health problems that are commonly seen across the continuum of acute care delivery systems. Health maintenance, health promotion, disease prevention and health protection appropriate to this patient population will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2101 and NURNP 2100

NURNP 2105 - CLIN EMPHSS - CARDIOPULMONARY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with cardiopulmonary dysfunctions/alterations. The course integrates the pathophysiology of cardiopulmonary dysfunctions/alterations with appropriate diagnostic parameters and management strategies. Through ongoing clinical experience, students implement the nursing process when caring for patients who are acutely ill and apply the clinical decision-making process in the care of these patients. Health promotion, protection, and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NURNP 2102

NURNP 2106 - CLIN EMPHASIS - CRITICAL CARE
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Through ongoing clinical experience, students implement the nursing process when caring for patients who are critically ill and apply the clinical decision-making process in care of patients. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NURNP 2102

NURNP 2107 - CLINICAL EMPHASIS - ONCOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive, evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with cancer. The course integrates the pathophysiology of problems associated with cancer and its treatment with appropriate diagnostic parameters and management strategies. Through ongoing clinical experiences the student will implement the clinical decision-making in the care of the acutely ill adult-gerontology patient with cancer. Health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NURNP 2102

NURNP 2109 - CLIN EMPHASIS - DIRECTED STUDY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with dysfunctions/alterations in a selected area of clinical specialization. The course integrates the pathophysiology of dysfunctions/alterations in the selected area with appropriate diagnostic parameters and management strategies. Through ongoing clinical experience, students implement the nursing process when caring for patients who are acutely ill and apply the clinical decision-making process in the care of these patients. Health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NURNP 2109

NURNP 2110 - MASTER'S THESIS
Minimum Credits: 1
Maximum Credits: 3
Individual instruction provides guidance in conducting a nursing research study. The thesis includes the review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

NURNP 2161 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Students elect an area of interest and work with a specific faculty member to meet agreed-upon objectives.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Nursing students only

NURNP 2194 - CLN EMPHSS:TRMA EMRGY PREPRDNS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive practical foundation for the clinical application of advanced nursing practice in the management of selected dysfunctions/alterations commonly seen in the traumatized adult-gerontology patient. Through ongoing clinical experience, students implement the nursing process when caring for adult-gerontology patients who are emergent, traumatized, or involved in disasters, and apply the clinical decision-making process in the care of these patients in all phases of the trauma cycle.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NURNP 2102

NURNP 2218 - FAMILY THEORY FOR NPS
Minimum Credits: 3
Maximum Credits: 3
This theory course is concerned with the exploration and application of the various family health theories with respect to NP practice. Focus is on the definition and development of the family, types of families, family assessment and care of the family with application of family health theories. Examination and analysis of cultural diversity within families, health care policies, and end-of-life issues are included. Ethical issues with regard to the care of the family are also addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
NURNP 2246 - MGT: ADOLESCENT HLTH THEORY
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: (NUR 2034 or NUR 2234 or NUR 2434) and (NUR 2033 or NUR 2433); CREQ: NURNP 2540

NURNP 2303 - MANAGEMENT AND PRACTICUM 1 PMH ADULT ACUTE AND CHRONIC
Minimum Credits: 2
Maximum Credits: 2
Students develop advanced practice skills in the clinical management of patients with common acute and chronic primary health care needs and problems. Emphasis is on the synthesis of diagnostic findings with the development, implementation and evaluation of general management strategies. Clinical practica enable students to integrate knowledge derived from courses and readings with that obtained from experiences which will include precepted clinical work in primary health care settings with adult medical patients.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2033 or NUR 2433; CREQ: NURNP 2314 and NURNP 2515

NURNP 2310 - MASTER'S THESIS
Minimum Credits: 1
Maximum Credits: 6
Individual instruction provides guidance in the preparation of a scholarly written report which synthesizes the components of a research project; review of literature, method ology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion, as well as the appropriate institutional human rights reviews.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

NURNP 2314 - MANAGEMENT AND PRACTICUM 2 PMH ADULT ACUTE AND CHRONIC
Minimum Credits: 1
Maximum Credits: 1
This practicum focuses on diagnosis and management of primary health care needs and problems. Students are precepted in primary health care settings where they learn to plan, implement and evaluate therapeutic regimes for adult patients with acute and chronic illnesses commonly encountered.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NUR 2004 or NUR 2204 or NUR 2404) and (NUR 2033 or NUR 2433); CREQ: (NUR 2034 or NUR 2234 or NUR 2434) and NURNP 2303

NURNP 2320 - NEUROBIOL PSYCHIATRIC DISORDRS
Minimum Credits: 2
Maximum Credits: 2
This course builds upon the knowledge base developed in the pathophysiology course, extending and applying this content to psychiatric disorders. It is designed with a threefold purpose: (a) to transition students from general concepts utilized in advanced practice to specific theories that are unique to the role of the psychiatric/mental health nurse practitioner; (b) to develop an appreciation of current biological theories as a major dimension in understanding the etiology, course, and outcome of selected psychiatric disorders; and, (c) to prepare students to utilize research findings as the empirical basis for the advanced practice of nursing. Content will focus on the major biological theories of psychiatric disorders in relationship to their respective technologies, neuroanatomical structures, neurochemical pathways, specific behaviors and symptomatology. Current research findings will be presented to supplement theoretical content.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404
NURNP 2325 - PSYCHOPHARMACOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course builds upon the conceptual principles developed in nur2034 advanced pharmacology and is designed to prepare students to manage the pharmacological aspects of treatment in patients with psychiatric disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NUR 2004 or NUR 2204 or NUR 2404) and (NUR 2034 or NUR 2234 or NUR 2434) and NURNP 2331; CREQ: NURNP 2320

NURNP 2330 - PSYCHIATRIC DIAGNOSIS THEORY
Minimum Credits: 2
Maximum Credits: 2
This course builds upon the diagnostic reasoning skills developed in the diagnostic physical exam and differential diagnosis courses, theory and clinical. It is designed to prepare students to utilize these skills in conducting psychiatric evaluations and in the preparation of case formulations across the life span. A bio-psycho-social perspective will be used to conceptualize case formulation and the examination of differential diagnoses. This course is open to students in other graduate programs in the school of nursing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2314 and NURNP 2515 and NURNP 2320; CREQ: NURNP 2331; PROG: School of Nursing

NURNP 2331 - PSYCHIATRIC DIAGNS PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
This clinical course is designed to complement and expand on the application of diagnostic reasoning skills developed in diagnostic physical exam across the life span, differential diagnosis theory and differential diagnosis clinical. In addition to the diagnoses of common health problems, the student will develop advanced diagnostic skills in relation to psychiatric disorders across the life span. The focus is on the identification and synthesis of pertinent physical, biological, psychological, and social data in order to complete a comprehensive psychiatric evaluation. The students will refine their diagnostic skills in a psychiatric setting with psychiatric patients across the life span.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2320; CREQ: NURNP 2330

NURNP 2340 - MGT ACUT HLTH PRO PSYTRC
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the theory and concepts relevant to management of the primary health care needs and problems of clients with a diagnosed psychiatric problem across the life span. The focus is on selected theories and principles from the physical and behavioral sciences central to planning, implementing, and evaluating therapeutic regimens for clients with acute psychiatric problems across the life span encountered in a primary care setting. Emphasis is also placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans. This course builds directly on the knowledge base developed in the physical diagnosis and primary health care courses, expanding that base to the care of clients who have a diagnosed psychiatric problem.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2331; CREQ: NURNP 2325 and NURNP 2341; PROG: School of Nursing

NURNP 2341 - MANAGEMENT PRACTICUM OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS
Minimum Credits: 2
Maximum Credits: 2
The goal of this practicum is to provide the student with an opportunity to refine advanced practice skills in the clinical management of the primary health care needs and psycho-biological problems of clients with psychiatric disorders across the life span. The practicum focuses on synthesizing relevant psycho-therapeutic modalities with the management of common health problems into the client's plan of care, and evaluating the effectiveness of these interventions.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2331; CREQ: NURNP 2340 and NURNP 2325; PROG: School of Nursing

NURNP 2345 - MGMT CHRONIC HLTH PROBS PSYTRC
Minimum Credits: 2
Maximum Credits: 2
This course focuses on theory and concepts relevant to the management of chronic psychiatric and primary health care needs/problems of clients with long-term psychiatric disorders across the life span. The focus is on selected theories and principles from the physical and behavioral sciences central to planning, implementing, and evaluating therapeutic regimens for the client populations commonly encountered in psychiatric settings. Emphasis is also placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans for clients experiencing long-term psychiatric problems. This course builds on the scientific knowledge acquired in previous psychiatric mental health nurse practitioner core and theory courses. It offers a framework for integrating a primary care approach in the management of chronic and severe psychiatric problems across the life span.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2341; CREQ: NURNP 2346; PROG: School of Nursing

NURNP 2346 - MGMT PRACM CHRONIC HLTH PROBS
Minimum Credits: 2
Maximum Credits: 2
This clinical course is designed to provide the student with a culminating practicum experience in the role of the psychiatric mental health nurse practitioner (PMHNP). Experiences emphasize clinical decision-making in an interdisciplinary environment with focus on the PMHNP as a principal provider of care for clients with chronic and severe psychiatric disorders across the life span in a variety of psychiatric settings.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2341; CREQ: NURNP 2345

NURNP 2361 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
An in-depth study in a particular area of interest by arrangement with a designated faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

NURNP 2401 - MGT ADLT EPISODIC/CHRONIC HLTH
Minimum Credits: 4
Maximum Credits: 4
This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced practice nursing in the diagnosis and management of common episodic and chronic dysfunctions/alterations. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2033 or NUR 2433; CREQ:NUR 2034 or NUR 2434 or NUR 2234

NURNP 2402 - MGT CMPLX HLT PROB ACU/CRIT 2
Minimum Credits: 3
Maximum Credits: 3
This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in adult-gerontology patients who are acutely and/or critically ill. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized
NURNP 2405 - MANAGEMENT: ADULT ACUTE/CHRONIC CLINICAL 1
Minimum Credits: 3
Maximum Credits: 4
This practicum is focused on the management of primary health care needs. Students are precepted in an ambulatory health care setting and carry out the diagnostic process as they provide primary health care services to adults with chronic primary health care needs and problems. Students learn to plan, implement and evaluate therapeutic regimens for patients with acute and chronic illnesses commonly encountered in primary health care settings.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURNP 2515 or NURNP 2415

NURNP 2406 - ROLE SEMINAR 1
Minimum Credits: 1
Maximum Credits: 1
This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

NURNP 2414 - CPLX HLTH PROB ACTLY/CRIT ILL
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a theoretical foundation for advanced nursing care of the acutely and critically ill adult-gerontology patient. Through didactic information, laboratory experience, and course assignments, students develop the knowledge base and psychomotor skills central to planning, implementing and evaluating health care for adult-gerontology patients with complex health problems that are commonly seen across the continuum of acute care delivery systems. Health maintenance, health promotion, disease prevention and health protection appropriate to this patient population will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2101 or NURNP 2401

NURNP 2415 - MGT: ADLT ACUTE/CHRONIC THEORY
Minimum Credits: 4
Maximum Credits: 4
This theory course is concerned with management of primary health care needs. Focus is on selected theories and principles from the physical, medical, nursing, and behavioral sciences central to planning, implementing, and evaluating regimes for patients with acute and chronic illnesses commonly encountered in primary health care settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NUR 2033 or NUR 2433) and (NUR 2004 or NUR 2404 or NUR 2204); CREQ: NURNP 2505

NURNP 2418 - FAMILY THEORY FOR NPS
Minimum Credits: 3
Maximum Credits: 3
This theory course is concerned with the exploration and application of the various family health theories with respect to np practice. Focus is on the definition and development of the family, types of families, family assessment and care of the family with application of family health theories. Examination and analysis of cultural diversity within families, health care policies, and end-of-life issues are included. Ethical issues with regard to the care of the family are also addressed.
Academic Career: GRAD
NURN 2420 - MGT: PEDIATRIC HEALTH THEORY
Minimum Credits: 2
Maximum Credits: 2
This theory course taught concurrently with NURN 2521: MGT: Pediatric Health Clinical deals with the management of health concerns and problems occurring in the pediatric age group (birth to 18 years). Focus is on selected theories and principles from the physical and behavioral sciences central to assisting children and their families in solving acute and chronic health problems commonly encountered in the primary health care setting. Physiologic & developmental variation is emphasized as well as the cultural, ethical and environmental context. This course encompasses lectures and readings on state-of-the-art practice and current research that provides the evidence base for practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NURN 2540 or NU RN 2440) and (NUR 2031 or NUR 2231) and (NUR 2034 or NUR 2234 or NUR 2434); CREQ: NURNP 2521 or NURNP 2421

NURN 2421 - MGT: PEDIATRIC HEALTH CLINICAL
Minimum Credits: 2
Maximum Credits: 2
This clinical course focuses on the management of health issues occurring in the pediatric age group (birth to 21 years) with application of principles from the physical and behavioral sciences. Physiologic and developmental variations are emphasized as well as the cultural, ethical, and environmental context.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURNP 2520 or NURNP 2420

NURN 2423 - MANAGEMENT: WOMEN'S HEALTH 1
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the health care of women. Emphasis is on selected theories, principles and techniques from the physical and behavioral sciences central to the assessment of women, women's issues, health promotion for women, and diagnosing and managing common gynecologic needs and problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2031 or NUR 2231; CREQ: NUR 2033 or NUR 2433

NURN 2426 - MANAGEMENT: GERIATRIC HEALTH
Minimum Credits: 2
Maximum Credits: 2
This theory course explores the evidence base for the evaluation, diagnosis and management of problems commonly encountered in the geriatric population. Emphasis is on the aging process, health promotion, and the diagnosis and management of common health problems of older adults in primary care settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2031 or NUR 2231

NURN 2429 - ROLE SEMINAR 2
Minimum Credits: 2
Maximum Credits: 2
This is a culminating seminar emphasizing issues unique to transitioning to the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, and legislative and professional practice issues.
Academic Career: GRAD
Course Component: Lecture
NURNP 2430 - PSYCHIATRIC DIAGNOSIS THEORY
Minimum Credits: 2
Maximum Credits: 2
This course builds upon the diagnostic reasoning skills developed in the diagnostic physical exam and differential diagnosis courses, theory and clinical. It is designed to prepare students to utilize these skills in conducting psychiatric evaluations and in the preparation of case formulations. A biopsychosocial perspective will be used to conceptualize case formulation and the examination of differential diagnoses. This course is open to students in other graduate programs in the school of nursing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2026 or NURNP 2426

NURNP 2440 - PEDIATRIC WELL CHILD CARE THRY
Minimum Credits: 3
Maximum Credits: 3
This course provides students with an introduction to primary health care for children, where theories and concepts pertinent to the delivery of health care to well children and adolescents are explored. Emphasis is placed on anticipatory guidance as well as the identification and management of developmental and behavioral issues in children. Child development theories and issues will be explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NURNP 2446 - MGT: ADOLSCNT HEALTH THEORY
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NUR 2033 or NUR 2433) and (NUR 2034 or NUR 2434); CREQ: (NURNP 2440 or NURNP 2540)

NURNP 2500 - PED PHYSCL DIAG & DVLP THEORY
Minimum Credits: 2
Maximum Credits: 2
Focuses on pediatric health assessment; recognizing illness and confirming wellness; on selected theories, principles, and techniques from the physical and behavioral sciences central to collecting and analyzing a pediatric database, birth through adolescence. Physiological and developmental variations are emphasized as well as the cultural and environmental context.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURNP 2501 - PED PHYSCL DIAG & DVLP CLINCL
Minimum Credits: 1
Maximum Credits: 1
This clinical course focus in on practicing, analyzing, and critiquing the diagnostic process as it relates to infants, children and adolescents. Physiologic and developmental variations are emphasized as well as the cultural and environmental context.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURNP 2503 - MGT: ADULT ACUTE/CHRONIC 1 THRY

2658
Minimum Credits: 2
Maximum Credits: 2
This theory course is concerned with diagnosis and management of primary health care needs and problems. Focus is on selected theories and principles from the physical and behavioral sciences central to diagnosing illness and planning, implementing, and evaluating therapeutic regimens for patients with acute illnesses commonly encountered in primary health care settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2006 and NUR 2031 and (NUR 2034 or PHARM 2002); CREQ: NURNP 2505

NURNP 2505 - MGT ADLT ACUTE/CHRNC CLN ILLN
Minimum Credits: 3
Maximum Credits: 4
This practicum is focused on the management of primary health care needs. Students are precepted in an ambulatory health care setting and carry out the diagnostic process as they provide primary health care services to adults with chronic primary health care needs and problems. Students learn to plan, implement and evaluate therapeutic regimens for patients with acute and chronic illnesses commonly encountered in primary health care settings.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURNP 2515

NURNP 2510 - MASTER'S THESIS
Minimum Credits: 1
Maximum Credits: 9
Individual instruction provides guidance in the preparation of a scholarly written report. This report synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

NURNP 2514 - ADULT ACUTE/CHRONIC 2 THEORY
Minimum Credits: 2
Maximum Credits: 2
This theory course is concerned with diagnosis and management of primary health care needs and problems. Focus is on selected theories and principles from the physical and behavioral sciences central to diagnosing illness, planning, implementing and evaluating therapeutic regimens for patients with chronic illnesses and problems commonly encountered in primary health care settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURNP 2517

NURNP 2515 - MGT: ADLT ACUTE/CHRONIC THEORY
Minimum Credits: 4
Maximum Credits: 4
This theory course is concerned with management of primary health care needs. Focus is on selected theories and principles from the physical, medical, nursing, and behavioral sciences central to planning, implementing, and evaluating regimes for patients with acute and chronic illnesses commonly encountered in primary health care settings.
Academic Career: GRAD

**NURNP 2526 - MGT: GERIATRIC HEALTH THEORY**
Minimum Credits: 2
Maximum Credits: 2
This theory course explores the evidence base for the evaluation, diagnosis and management of problems commonly encountered in the geriatric population. Emphasis is on the aging process, health promotion, and the diagnosis and management of common health problems of older adults in primary care settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2031 or NUR 2231

NURNP 2527 - ADV MGT: CMPLX GERIAT HLTH ISS
Minimum Credits: 3
Maximum Credits: 3
The focus of this theory course is on advanced concepts related to current and complex geriatric management issues. The course builds on the foundation of geriatric care management presented in NURNP 2526. Utilization of health care resources, health care policies, and end-of-life care and caregiver issues will be presented. Primary care is the emphasis but the concepts will be applied across the continuum of care.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2526

NURNP 2528 - SEMINAR IN GERIATRIC CARE
Minimum Credits: 1
Maximum Credits: 1
This course will focus on the role of the intra-professional team in regard to geriatric syndromes, current research, pharmaceuticals, and timely geriatric issues related to health care delivery.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2526

NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
This clinical course is designed for students to gain experience in the assessment, diagnosis and management of older adults in a variety of settings. The application of evidence based protocols will be included in the prevention, early diagnosis and management of geriatric syndromes. An interdisciplinary team approach will be emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

NURNP 2540 - PEDIATRIC WELL CHILD CARE THRY
Minimum Credits: 3
Maximum Credits: 3
This course provides students with an introduction to primary health care for children, where theories and concepts pertinent to the delivery of health care to well children and adolescents are explored. Emphasis is placed on anticipatory guidance as well as the identification and management of developmental and behavioral issues in children. Child development theories and issues will be explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NURNP 2543 - MGT: COMMON PED PROBS THEORY
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide students with an opportunity to develop an understanding of the common health problems that exist in children and adolescents and how to identify, diagnose, and manage these problems as pediatric nurse practitioners. Students are provided with clinical experiences that provide them with opportunities to identify, diagnose and manage children with common health problems.
Academic Career: GRAD
Course Component: Lecture
NURNP 2545 - MGT: COMMON PEDIATRIC PROBLEMS CLINICAL
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide students with clinical experiences that give them opportunities to identify, diagnose, and manage newborns, children, and adolescents with common health problems in primary health care settings.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURNP 2546 - MGT: ADOLESCENT HEALTH THEORY
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NUR 2033 or NUR 2433) and (NUR 2034 or NUR 2434); CREQ: (NURNP 2440 or NURNP 2540)

NURNP 2547 - MGT: ADOLESCENT HEALTH 1 CLINICAL
Minimum Credits: 1
Maximum Credits: 1
Clinical practicum provides all PNP students with an opportunity to learn and practice how to do a complete history and physical exam on adolescents and how to provide primary care to this population. Students have an opportunity to practice multiple pelvic exams in clinical sites with young women under the supervision of a nurse practitioner or physician for 4 hours/week. All students will spend 4 hours/week in a school based health clinic or adolescent clinic where they will provide primary care to adolescents under the supervision of an NP or physician.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2543; CREQ: NURNP 2546

NURNP 2548 - MGT: ADOLESCENT HEALTH 1 CLINICAL
Minimum Credits: 1
Maximum Credits: 1
Clinical practicum provides all PNP students with an opportunity to learn and practice how to do a complete history and physical exam on adolescents and how to provide primary care to this population. Students have an opportunity to practice multiple pelvic exams in clinical sites with young women under the supervision of a nurse practitioner or physician for 4 hours/week. NURNP 2549 - MGMT: ADVANCED PEDIATRIC HEALTH PROBLEMS THEORY
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide the student with an advanced study of children with primary, complex, and chronic health conditions and disabilities. Emphasis is placed on the identification, assessment, and management of chronic pediatric problems, neurodevelopmental disabilities, and behavioral issues. The influence that these conditions have on children and their families is also integrated. Emphasis is placed on understanding the physiologic rationale for treatment measures as well as the provision of physical and psychological care to children and families.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2520 or NURNP 2420; CREQ: NURNP 2550
NURNP 2550 - MGT: ADV PED HLTH PRBS CNL
Minimum Credits: 2
Maximum Credits: 2
The purpose of this clinical course is to provide students with an opportunity to provide comprehensive primary health care services to children with primary health care needs, developmental concerns, complex and chronic health problems. Concepts and content from NURNP 2549 will be applied in clinical practice.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2521 or NURNP 2421; CREQ: NURNP 2549

NURNP 2561 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Allows the student the opportunity to acquire knowledge and skill through independent experiences involving little or no formal interaction between the student and instructor. Typically selected when no formal course is available that meets the student's individual learning needs.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

NURNP 2570 - CMPRHSV NEONATAL ASSMNT THRY
Minimum Credits: 2
Maximum Credits: 2
This course addresses the complete neonatal assessment process. It includes a genetics overview, perinatal and neonatal physiology, neonatal pharmacology, common neonatal diagnostic and laboratory testing and invasive procedures. The comprehensive neonatal assessment, including prenatal through neonatal history and neonatal physical examination is reviewed. Family function, dynamics, crisis theory and the grieving process are also examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404

NURNP 2571 - GEN MGT OF SICK NEONATE-THEORY
Minimum Credits: 4
Maximum Credits: 4
This theory course builds on the neonatal assessment theory course and assists the students in developing the neonatal assessment skills necessary to function in the role of the NNP in the neonatal intensive care nursery (NICU), particularly in emergency situations. It focuses on the knowledge necessary to resuscitate and stabilize a sick newborn. In addition, the course discusses the physiology of pain and pain management. The course is taught with an accompanying clinical course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2570; CREQ: NURNP 2571

NURNP 2572 - GEN ASSMNT & MGT SICK NEONATE
Minimum Credits: 5
Maximum Credits: 5
This clinical course builds on the physical diagnosis and the neonatal assessment and general management courses. The students master the neonatal assessment skills necessary to function in the role of the NNP in the neonatal intensive care nursery (NICU). The students will obtain and evaluate a complete neonatal patient database, including conducting a history and physical examination. The students will also learn stabilization and resuscitation in the delivery room and during transport. In addition, the course affords the students the opportunity to perform neonatal therapeutic and diagnostic procedures in the clinical setting.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2570; CREQ: NURNP 2571

NURNP 2573 - NEONATAL DISEASE PROCESS 1
Clinical management of neonatal (preterm and term infants in the neonatal intensive care unit) patients requires a broad knowledge base. This theory course will provide a thorough understanding of the embryology, physiology, pathophysiology and management of common neonatal disease processes. This is the first in a series of 2 consecutive courses and will focus on the cardiovascular, pulmonary, gastrointestinal/nutrition, renal/genitourinary and hematologic systems as well as fluids and electrolytes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2571; CREQ: NURNP 2028

NURNP 2574 - NEONATAL DISEASE PROCESS 2
Minimum Credits: 4
Maximum Credits: 4
Clinical management of neonatal (preterm and term infants in the neonatal intensive care unit) patients requires a broad knowledge base. This theory course will provide a thorough understanding of the embryology, physiology, pathophysiology and management of common neonatal disease processes. This is the second in a series of 2 consecutive courses and will focus on the endocrine & metabolic, immune, neurobehavioral, musculoskeletal, eyes/ears/nose/throat and dermatologic systems. It also includes discharge planning and follow-up care for the high-risk neonate.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2573; CREQ: NURNP 2028

NURNP 2580 - MGT: WOMEN'S HEALTH THEORY 2
Minimum Credits: 2
Maximum Credits: 2
Course is concerned with specialized care of women as they make decisions regarding, prepare for, and experience child bearing and transitions to parenting. Emphasis is on the physiology of pregnancy and pathophysiology of complications of pregnancy. Antepartal surveillance of mother and fetus, diagnosis and management of patient problems, and models of prenatal care are explored. Theories relating to the woman's experience of pregnancy, childbirth, and the taking-on of the maternal identity are investigated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NURNP 2515 and NURNP 2523 and NURNP 2585 and HUGEN 2017; CREQ: NURNP 2581

NURNP 2581 - WOMEN'S HEALTH CLINICAL 2
Minimum Credits: 2
Maximum Credits: 2
This clinical course is designed to provide students with an opportunity to care for women who are planning pregnancy, pregnant, experiencing childbirth or making the transition to parenting. The focus is on the development of clinical decision making skills and the opportunity to explore non pharmacologic and pharmacologic treatment modalities.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: COREQ: NURNP 2580

NURNP 2582 - MGT: ADLT ACUTE/CHRNC 1 ANP CLN
Minimum Credits: 2
Maximum Credits: 2
This practicum is concerned with diagnosis and management of primary health care needs and problems. Students are assigned to an ambulatory health care setting and carry out the nursing process as they provide primary health care services to adults with primary health care needs and problems. Students learn to plan, implement and evaluate therapeutic regimens for patients with acute and chronic illnesses commonly encountered in primary health care settings.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NURNP 2515

NURNP 2583 - WOMEN'S HEALTH THEORY 3
Focus is on the specialized care of women necessitated by significant deviations from health. Emphasis is on the integration of concepts of pathophysiology of the reproductive and reproductive endocrinology systems with diagnosis and management of patient problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: NURNP 2585 and NURNP 2587; CREQ: NURNP 2584

**NURNP 2584 - WOMEN'S HEALTH CLINICAL 3**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This clinical course is designed to provide students with an opportunity to care for patients who have significant deviations from normal in the gynecologic/reproductive system and to afford students the opportunity to integrate gynecologic and non-gynecologic care. The focus is on the development of clinical decision making skills and the opportunity to explore nonpharmacologic and pharmacologic treatment modalities.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: NURNP 2583

**NURNP 2585 - MGT:ADLT ACUT CHRNC 1 WHNP CLN**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This practicum is concerned with diagnosis and management of primary health care needs and problems. Students are assigned to an ambulatory health care setting and carry out the nursing process as they provide primary health care services to adults with primary health care needs and problems. Students learn to plan, implement and evaluate therapeutic regimens for patients with acute and chronic illnesses commonly encountered in primary health care settings.

**Course Requirements:** CREQ: NURNP 2515

**NURNP 3025 - DIAG MGT PSYTRC CONDS PRIM CRE**  
**Minimum Credits:** 4  
**Maximum Credits:** 4
This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

### NURNP 3038 - DNP NP ROLE PRACTICUM

**Minimum Credits:** 1  
**Maximum Credits:** 10  
A culminating practicum experience in role development for the DNP np. Experiences emphasize clinical decision making in a multidisciplinary environment with focus on the nurse practitioner as a principal provider of care.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

### NURNP 3218 - FAMILY THEORY FOR NPS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This theory course is concerned with the exploration and application of the various family health theories with respect to np practice. Focus is on the definition and development of the family, types of families, family assessment and care of the family with application of family health theories. Examination and analysis of cultural diversity within families, health care policies, and end-of-life issues are included. Ethical issues with regard to the care of the family are also addressed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### NURNP 3225 - DIAG & MGT PSYTRC CONDS

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### NURNP 3425 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### Nurse Specialty Role

### NURSP 2035 - NURSING CASE MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
This course is designed to examine the role of professional nursing within existing and emerging models of primary health care, with emphasis on the nurse's dual responsibilities for coordinating care for a caseload of patients and promoting their self-management of health-related needs. Multiple facets of case management are explored, including use of clinical guidelines and standard protocols and mobilization of community resources.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2036 - HEALTH BEHAVIOR CHANGE
Minimum Credits: 3
Maximum Credits: 3
This course focuses on models and theories of behavioral health that can be used to encourage healthy habits among individuals and families across the life span. Evidence-based strategies for initiating and maintaining behavioral change are considered in relation to health promotion as well as prevention and treatment of several disorders commonly observed in health care settings. Methodologies for targeted intervention with individuals and groups and evaluation of outcomes are explored for their application in various health care settings.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2061 - ORGANIZATIONAL & MANAGEMENT THEORY
Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2064 - PRACTICUM IN NURSING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Course is designed for students enrolled in the administration minor and serves as the clinical practicum. Course will provide students with opportunities to observe, apply, analyze and discuss selected administrative and managerial skill and processes which are relevant to the practice of nursing administration. Seminar portion will provide content, discussion and individual and group activities. A critical course component is a practicum with a designated preceptor employed full-time in a selected site. Negotiated sites and experiences are tailored to enhance student's career goals.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSP 2070 - INFO TECHNOLOGY PROJECT MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course provides students with an introduction to information technology project management. Students will learn how to create a comprehensive project management plan which includes: scope, integration, communication, time, cost, risk, quality and human resources management. This course also covers the following topics: system life cycles, messaging standards and procurement.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSP 2071 - DESIGN & PROCESS OF INSTRUCTION
Minimum Credits: 3
Maximum Credits: 3
This course provides students with the conceptual knowledge base and practice experiences necessary for competent classroom and clinical instruction. Students synthesize a conceptual foundation for developing effective learning activities for individuals and groups to provide realistic problem solving opportunities. Instructional design principles and related educational technologies are applied to both classroom and clinical teaching. Traditional and innovative learning environments are analyzed in relationship to the advanced role of the nurse. Issues and research findings important to classroom and clinical teaching are addressed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### NURSP 2072 - MEASUREMENT AND EVALUATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Concepts and methods for learning measurement and evaluation as they relate to teaching and learning in nursing and the health sciences are reviewed and assessed. Course activities offer the student opportunities to study and use a variety of measurement and evaluation techniques that are appropriate for classroom and clinical healthcare settings. Opportunities are provided for students to critique and evaluate ethical, legal and social issues involving measurement and evaluation as well as uses and limitations of evaluation methods in diverse healthcare settings and educator roles.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

### NURSP 2073 - PRAC 1 NUR ED: TCH/LRNG ASSMNT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to enable students to put into practice all the elements of clinical, didactic, simulation, research-focused, and laboratory instruction, under the supervision of an accomplished preceptor/mentor in diverse learning environments. Students have the opportunity to implement the role of nurse-educator through a guided, supportive, personally-designed practicum experience with one or more settings, populations, or roles, as determined by each student's learning needs.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NURSP 2071; PROG: School of Nursing

### NURSP 2074 - PRAC 2 NUR ED: EDUC PRG MGT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course builds on the principles of NURSP 2073 practicum 1 in nursing education: teaching and learning assessment. In this course students have the opportunity to further develop and implement the role of nurse educator through a guided, supportive practicum experience under the direct supervision of an accomplished preceptor. Students are able to choose the teaching environment that best meets his or her learning needs.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NURSP 2071 and NURSP 2072 and NURSP 2073; PROG: School of Nursing

### NURSP 2075 - INTRO TO HEALTH INFORMATICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

### NURSP 2076 - CLINICAL INFORMATION SYSTEMS

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course focuses on an analysis of nursing information systems within the context of the health care system. Emphasis is placed on the use of computers for documentation in clinical settings.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: NURSP 2075 or NURSP 2275 or NURSP 2475

### NURSP 2082 - INFORMATICS THEORIES & ISSUES
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers relevant theories and models from the fields of: nursing informatics, communication, information science and computer science. The foundations of behavioral theories, group dynamics and principles of adult learning will be introduced. Students will apply these theories and models to emerging issues in informatics.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### NURSP 2083 - SYSTEM USABILITY AND EVALUATION METHODS
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### NURSP 2084 - SYSTMTC DATA ANALYS INFORMTCS
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers key applications for data analysis in nursing informatics practice. Core application areas include: evaluation methods, terminology linkage and interoperability analysis, and database utilization for quality improvement. Emphasis will be placed on the practice implications for nurse informaticists.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

### NURSP 2085 - NURSING INFORMTCS PRACTICUM 1
**Minimum Credits:** 3  
**Maximum Credits:** 4  
This course provides an opportunity for the learner to synthesize previous nursing informatics coursework. The student will implement the theory learned in class in a real-world setting and demonstrate beginning competency as an informatics nurse.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NURSP 2076 or NURSP 2276

### NURSP 2086 - NURSING INFORMTCS PRACTICUM 2
**Minimum Credits:** 3  
**Maximum Credits:** 4  
The course employs an application focus in which the learner demonstrates leadership, comprehension, critical thinking, and problem-solving abilities within the context of a real-world environment. The student will assume the role of a beginning nursing informatics specialist.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NURSP 2085 or NURSP 2285

### NURSP 2087 - INTERNET & HEALTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to survey applications and technologies for health informatics. Web-based and multimedia approaches will be emphasized. The focus will be on the design, development and evaluation of applications that support training, education and access to health information. The course is taught in a web-enhanced format.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Nursing students only.

NURSP 2088 - INTRODUCTION TO DATABASE MANAGEMENT SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course provides students with the conceptual knowledge base and practice experiences necessary to understand the design and function of a modern relational database management system. It will provide students with the historical and practical knowledge needed to design a relational database. The students will have hands on experience with databases and other software that interfaces with databases. Standards as they apply to the logical and physical design of databases will be stressed. The future of database design and remote access including mobile devices will be discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSP 2090 - HEALTHCARE OUTCOMES
Minimum Credits: 3
Maximum Credits: 3
Knowledge and understanding of healthcare outcomes is an important competency for healthcare professionals. This course will provide students with opportunities to discuss and analyze key issues in the healthcare quality movement. Conceptual frameworks used in explaining healthcare outcomes and identification of driving forces defining the development of various outcomes will be addressed. Specific healthcare outcomes and the influence that they have on advance practice nursing and policy formulation will be examined and analyzed. Finally, the strategies and skills healthcare professionals will need to practice and manage effectively within this outcomes environment will be detailed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2091 - FINC ECON HEALTH CARE LEADERS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2092 - LEADERSHIP DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Nursing students only.
NURSP 2093 - EDUC & MENTORING CLIN SETTING
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a theoretical, practical, and evidence-based foundation for graduate students in the education of clients/patient/families, nurse colleagues, and other health care providers. Students will broaden their knowledge base in the dynamics of human behavior, values clarification, educational psychology, and motivation which are fundamental to behavior change and sustaining that change (transformation). Content includes principles of andragogy and pedagogy, analysis of learning styles, replete with instruments and a contemporary model focusing upon behavior change of employees, mentoring, the role and function of preceptors, coaching and feedback skills and application of a competency model will be emphasized. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSP 2095 - CONTEM ISS NUR & CNL ROLE SEM
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the major contemporary issues facing the nursing profession. Patient safety, process improvement, effective patient care and family partnerships, improved care coordination and implementation of evidence based practice are examples that the CNL role could impact. The course also focuses on successful implementation of the CNL role through knowledge, evidence-based practice and application of leadership principles. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

NURSP 2096 - CNL CLINICAL PRACTICUM 1
Minimum Credits: 2
Maximum Credits: 2
This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN competencies and curricular expectations for clinical nurse leader education and practice (2013) will provide the framework for the practicum.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: (NURSP 2061 or NURSP 2261 or NURSP 2461) and (NURSP 2090 or NURSP 2290)

NURSP 2097 - CNL CLINICAL PRACTICUM 2
Minimum Credits: 3
Maximum Credits: 3
This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN competencies and curricular expectations for clinical nurse leader education and practice (2013) will provide the framework for the practicum.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PREQ: NURSP 2061 and NURSP 2090 or NURSP 2261 and NURSP 2290; CREQ: NURSP 2096 or NURSP 2296

NURSP 2161 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Nursing students only.
NURSP 2180 - ADV SPLIT: ADULT EPISDC/CHRNC AC
Minimum Credits: 4
Maximum Credits: 4
This course is designed to develop a foundation for advanced nursing practice in the care of patients with common episodic and chronic
dysfunctions/alterations. The student will develop advanced practice skills in patient/family assessment, developing and implementing a nursing plan
and evaluating the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health maintenance,
disease prevention and health restoration appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2185 - ADVANCED SPECIALTY OPTION: COMPLEX HEALTH PROBLEMS IN ACUTE CARE
Minimum Credits: 2
Maximum Credits: 2
This course is designed to develop a theoretical foundation for advanced nursing care of the acutely and critically ill adult-gerontology patient.
Through didactic information and course assignments, students develop the knowledge base central to planning, implementing and evaluating
nursing care for acutely and critically ill adult-gerontology patients with complex health problems that are commonly seen across the continuum of
acute care delivery systems. Health maintenance, health promotion, disease prevention and health protection appropriate to this patient population
will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: (NUR 2004 or NUR 2404) and (NUR 2034 or NUR 2434)

NURSP 2190 - ADV SPLIT: CARDIOUMNRY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing practice in the care of adult-
gerontology patients with cardiopulmonary dysfunctions/alterations. The course integrates the pathophysiology of cardiopulmonary
dysfunctions/alterations with appropriate diagnostic parameters and management strategies. Health promotion, protection, and maintenance
appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2004

NURSP 2191 - ADV SPLIT: CRITICAL CRE
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with
selected dysfunctions/alterations commonly seen in critical illness. Didactic content focuses on information central to planning, implementing and
evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the critical care setting. Aspects of health promotion
and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2004

NURSP 2192 - ADV SPLIT: ONCOLOGY
Minimum Credits: 3
Maximum Credits: 3
NUR 2004 This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology
patients with cancer dysfunctions/alterations. Didactic content focuses on information central to planning, implementing and evaluating therapeutic
regimens for adult-gerontology patients with problems commonly seen in the oncology setting. Aspects of health promotion, protection, and
maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
NURSP 2193 - ADV SPECLTY OPTION: DIR STUDY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with dysfunctions/alterations in the selected area of clinical specialization. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the selected area of clinical specialization. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2004

NURSP 2195 - ADV SPECIALITY OPTION: TEP
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis & management of selected dysfunctions/alterations commonly seen in the trauma, emergency and disaster affected adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the trauma, emergency, and disaster settings. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2004

NURSP 2261 - ORGANIZATIONAL & MGT THEORY
Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2270 - INF TECHNOLOGY PROJ MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course provides students with an introduction to information technology project management. Students will learn how to create a comprehensive project management plan which includes: scope, integration, communication, time, cost, risk, quality and human resources management. This course also covers the following topics: system life cycles, messaging standards and procurement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NURSP 2272 - USING DATA TO DRIVE DECISIONS
Minimum Credits: 2
Maximum Credits: 2
This course is the first practicum and is designed to apply the knowledge, skills and critical thinking developed through the core content courses of the administrative program. Using a data base of a 'virtual hospital', students are presented with common administrative problems they are likely to encounter in an administrative role. Particular emphasis is given to solving problems with the appropriate balance of cost and quality.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: (NURSP 2061 or NURSP 2261 or NURSP 2461) and (NURSP 2091 or NURSP 2291 or NURSP 2491)

NURSP 2273 - NURSING ADMINISTRATION RESIDENCY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to synthesize the knowledge, skills, and critical thinking developed through the core content courses of the administrative program within a practice environment. Students will be assigned a preceptor based on their identified learning needs and area of interest. It is anticipated that students will be exposed to and involved in various experiences that nursing administrators face in today's health care environment. In collaboration with their preceptor, the student will identify, design and implement a relevant project at the beginning of the semester. The project must be approved by the course instructor. Once a week students will complete an online journal through blackboard that illustrates how they have met the objectives below. Each objective must be met by the conclusion of the term. The course instructor will provide feedback on a weekly basis.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NURSP 2275 - INTRO TO HEALTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Nursing

NURSP 2276 - CLINICAL INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on an analysis of nursing information systems within the context of the health care system. Emphasis is placed on the use of computers for documentation in clinical settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NURSP 2282 - INFORMATICS THEORIES ISSUES
Minimum Credits: 3
Maximum Credits: 3
This course covers relevant theories and models from the fields of: nursing informatics, communication, information science and computer science. The foundations of behavioral theories, group dynamics and principles of adult learning will be introduced. Students will apply these theories and models to emerging issues in informatics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2283 - SYSTEM UsABILITY EVAL METHODS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2285 - NURSING INFORMATICS PRACTICUM 1
Minimum Credits: 3
Maximum Credits: 4
This course provides an opportunity for the learner to synthesize previous nursing informatics coursework. The student will implement the theory learned in class in a real-world setting and demonstrate beginning competency as an informatics nurse.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NURSP 2286 - NURSING INFORMATCS PRACTICUM 2
Minimum Credits: 3
Maximum Credits: 4
The course employs an application focus in which the learner demonstrates leadership, comprehension, critical thinking, and problem-solving abilities within the context of a real-world environment. The student will assume the role of a beginning nursing informatics specialist.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NURSP 2288 - INT TO DATA BASE MGT SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course provides students with the conceptual knowledge base and practice experiences necessary to understand the design and function of a modern relational database management system. It will provide students with the historical and practical knowledge needed to design a relational database. The students will have hands on experience with databases and other software that interfaces with databases. Standards as they apply to the logical and physical design of databases will be stressed. The future of database design and remote access including mobile devices will be discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NURSP 2290 - HEALTHCARE OUTCOMES
Minimum Credits: 3
Maximum Credits: 3
Knowledge and understanding of healthcare outcomes is an important competency for healthcare professionals. This course will provide students with opportunities to discuss and analyze key issues in the healthcare quality movement. Conceptual frameworks used in explaining healthcare outcomes and identification of driving forces defining the development of various outcomes will be addressed. Specific healthcare outcomes and the influence that they have on advance practice nursing and policy formulation will be examined and analyzed. Finally, the strategies and skills healthcare professionals will need to practice and manage effectively within this outcomes environment will be detailed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2291 - FINC ECON HLTH CRE LEADERS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2292 - LEADERSHIP DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.
NURSP 2293 - EDUC & MENTORING CLIN SETTING
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop a theoretical, practical, and evidence-based foundation for graduate students in the education of patient/families, nurse colleagues and other health care providers. Students will broaden their knowledge base in the dynamics of human behavior, values clarification, educational psychology and motivation which are fundamental to behavior change and sustaining that change (transformation). Content includes principles of andragogy and pedagogy, analysis of learning styles, replete with instruments and a contemporary model focusing upon behavior change of employees. Mentoring, the role and function of preceptors, coaching and feedback skills and application of a competency model will be emphasized.

NURSP 2295 - CONTEM ISS NUR & CNL ROLE SEM
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the major contemporary issues facing the nursing profession. Patient safety, process improvement, effective patient care and family partnerships, improved care coordination and implementation of evidence based practice are examples that the CNL role could impact. The course also focuses on successful implementation of the CNL role through knowledge, evidence-based practice and application of leadership principles.

NURSP 2296 - CNL CLINICAL PRACTICUM 1
Minimum Credits: 2
Maximum Credits: 2
This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN end of life program competencies provide the framework for the practicum.

NURSP 2297 - CNL CLINICAL PRACTICUM 2
Minimum Credits: 3
Maximum Credits: 3
This course is designed to synthesize the knowledge, skills and critical thinking developed through the core content courses of the clinical nurse leader area of concentration. Students practice the role of the CNL in a clinical setting within the healthcare milieu. The AACN and end-of-program competencies provide the framework for the practicum.

NURSP 2310 - MASTER'S THESIS
Minimum Credits: 1
Maximum Credits: 6
Individual instruction provides guidance in the preparation of a scholarly written report which synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion, as well as
the appropriate institutional human rights reviews.

**Academic Career:** GRAD
**Course Component:** Thesis Research
**Grade Component:** Grad SN Basis

**NURSP 2361 - INDEPENDENT STUDY**
**Minimum Credits:** 1
**Maximum Credits:** 3
An in-depth study in a particular area of interest by arrangement with a designated faculty member.

**Academic Career:** GRAD
**Course Component:** Independent Study
**Grade Component:** Grad LG/SNC Basis

**NURSP 2371 - NURSING ADMIN SEM AND PRAC 1**
**Minimum Credits:** 3
**Maximum Credits:** 3
Course is designed to provide opportunities to observe, apply, analyze, and discuss selected administrative and managerial skills and processes relevant to the practice of nursing administration. Seminar portion will provide content discussion, and individual and group activities. A critical course component is a practicum with a designated preceptor employed full time in a selected site. Negotiated sites and experiences are tailored to enhance student's career goal. Student selects site outside of current employing agency.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** School of Nursing students only.

**NURSP 2372 - USING DATA TO DRIVE DECISIONS**
**Minimum Credits:** 2
**Maximum Credits:** 2
This course is designed to apply the knowledge, skills and critical thinking developed through the core content courses of the administrative program. Using a data base of a 'virtual hospital', students are presented with common administrative problems they are likely to encounter in an administrative role. Particular emphasis is given to solving problems with the appropriate balance of cost and quality.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** PREQ: (NURSP 2061 or NURSP 2261 or NURSP 2461) and (NURSP 2091 or NURSP 2291 or NURSP 2491)

**NURSP 2373 - NURSING ADMIN RESIDENCY**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course is designed to synthesize the knowledge, skills, and critical thinking developed through the core content courses of the administrative program within a practice environment. Students will be assigned a preceptor based on their identified learning needs and area of interest. It is anticipated that students will be exposed to and involved in various experiences that nursing administrators face in today's health care environment.

**Academic Career:** GRAD
**Course Component:** Practicum
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** PREQ: NURSP 2272

**NURSP 2383 - MTHS IN TEC EVAL & USABILITY**
**Minimum Credits:** 2
**Maximum Credits:** 2
This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation, and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

**NURSP 2388 - DATABASE MANAGEMENT**
Minimum Credits: 2
Maximum Credits: 2
This course provides students with the conceptual knowledge base and practice experiences necessary to understand the workings of a modern relational database management system. It will provide the students with the historical and practical knowledge needed to design a relational database. The students will have hands-on experience with databases and other software that will interface with databases. Standards, such as html, SQL, ODBC and normalization will be stressed in both the theory and practical aspects of this course. The future of database design and access from non-traditional environments will be discussed. Use of databases on servers will be demonstrated.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2461 - ORGANIZTNL & MANAGEMENT THEORY
Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2475 - INTRO TO HEALTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NURSP 2491 - FINC ECON HEALTH CARE LEADERS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2492 - LEADERSHIP DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

NURSP 3092 - LEADERSHIP IN COMPLEX SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This advanced level leadership course focuses on leading complex organizations and systems to facilitate the transformation of health care. Using
principles of chaos and complexity theory, students will explore methods for assessing organizations, identifying emerging issues, and facilitating organization-wide changes to meet the ongoing challenges facing health care organizations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSP 3094 - EVIDENCE-BASED QUALT IMPROVMNT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course students will learn how to create and implement a culture of clinical and service excellence. Using quality improvement theories, they will analyze their own organization and themselves in relationship to quality improvement challenges. Evidence-based qI systems and best practices will be examined. Students will analyze information systems/technology opportunities to enhance healthcare quality. They will also have an opportunity to apply selected quality tools and techniques to solve actual problems in their workplaces.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

**NURSP 3096 - CLIN SYMS ANALYSIS & DESIGN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course students will apply knowledge they have learned throughout their program in meeting challenges experienced by nursing leaders. Using a web-designed structure, students will access a virtual hospital and use financial and clinical data to successfully resolve issues presented in a case study format. These case studies are designed to simulate actual problems facing nursing leaders both today and in the future. Through class discussions, students will then learn multiple approaches to resolving complicated issues.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

**NURSP 3097 - DNP RESIDENCY: ADMINISTRATION**  
**Minimum Credits:** 1  
**Maximum Credits:** 10  
This course is designed to provide a culminating practicum experience for the DNP leadership student. Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies related to the leadership complex issues, organizations and systems.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

**NURSP 3292 - LEADERSHIP IN COMPLEX SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This advanced leadership course focuses on leading complex organizations and systems to facilitate the transformation of health care. Using principles of chaos and complexity theory, students will explore methods for assessing organizations, identifying emerging issues, and facilitating organization-wide changes to meet the ongoing challenges facing health care organizations.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NURSP 3294 - EVIDENCE-BASED QUALT IMPROVMNT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this doctoral level course, students will learn how to create and implement a culture of clinical and service excellence. Using quality improvement theories, they will analyze their own organization and themselves in relationship to quality improvement challenges. Evidence-based qI systems and best practices will be examined. Students will analyze information systems/technology opportunities to enhance healthcare quality. They will also have an opportunity to apply selected quality tools and techniques to solve actual problems in their workplaces.  
**Academic Career:** GRAD
Course Component: Lecture

Nursing

NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE I
Minimum Credits: 2
Maximum Credits: 2
This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NUR 2011 or NUR 2211 or NUR 2411

NUR 2002 - RESEARCH PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
This course builds on the knowledge and skills acquired in NUR 2000/2400 and NUR 2011/2411 and focuses on the continuing development of an understanding of the research process through participation in an ongoing research project and course seminars. Students identify a researcher who is conducting an ongoing project and who is willing to serve as a preceptor. Students prepare a contract defining the role of the student and how he/she will meet the course objectives while working with the designated preceptor. A written log is submitted documenting the student's learning activities for the practicum. Seminars are held on a regular basis by the primary teacher and focus on discussion of the research process, guided critiques of published research, and presentations by the students of their practicum experiences.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NUR 2007 or NUR 2407 or NUR 2207

NUR 2003 - HLTH PROMO DISEA PREVN POPLTN
Minimum Credits: 3
Maximum Credits: 3
Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010
goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Nursing students only.

**NUR 2004 - PATHPHYLGY ACROSS LIFE SPAN**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the lifespan.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Nursing students only.

**NUR 2005 - ADVANCED HUMAN PHYSIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This 12 week graduate level course is designed to present a broad overview of human physiology, emphasizing integrative aspects and current advances. All body systems are reviewed at levels from the molecular to the organismal. Current concepts in cellular biology and molecular genetics are also discussed.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** School of Nursing students only.

**NUR 2006 - ADV APPLD PHARMACOLOGY FOR NPS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This advanced pharmacology course is designed to teach the pharmacology, pharmacokinetics and pharmacotherapeutics of selected drugs used in the management of common acute and chronic illnesses across the life-span as well as contemporary immunizations practices and legal, ethical and economic parameters of prescribing.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** School of Nursing students only.

**NUR 2007 - RESEARCH FOR EBP 2**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
During this course students build on the knowledge they acquired in NUR 2000/NUR 2200 and NUR 2011/ NUR 2211 to develop an evidence-based protocol to address an answerable clinical question. Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** (NUR 2000 and NUR 2011) or (NUR 2200 or NUR 2211 or NUR 2400 or NUR 2411)

**NUR 2008 - ETHICS FOR ADV PRACTICE NUR**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course provides a web-based learning experience that includes a review of basic terms, concepts, and theories related to ethics. The student is guided through methods of ethical decision-making in clinical, research, health care organizational, local and international settings. The course
provides a foundation for the study of ethics-based advanced nursing practice as integrated in specialty-specific courses.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis

NUR 2009 - POLICY/ORG/FINCG/ OF HLTH CARE
Minimum Credits: 0
Maximum Credits: 0
The purpose of this web-enhanced course is to equip the graduate prepared nurse with beginning skills to influence health policy, to provide leadership in the healthcare delivery system, and to utilize basic principles of fiscal management in making high-quality cost-effective choices in the use of health care resources. The course consists of three units. The first unit explores the policymaking process, the role of the advanced practice nurse or advanced generalist and the effect of public policy on healthcare delivery systems. The second unit examines the organization and delivery of healthcare with an emphasis on the continuum of health care, including acute, specialized, and community based systems. Preparation for a nursing leadership role in these integrated care systems is emphasized. The third unit presents an overview of healthcare financing as it relates to the delivery of health care services. The nurse's role as the monitor of quality control, patient safety, and cost-effective care is examined in the context of clinical decision making.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: School of Nursing students only.

NUR 2010 - HEALTH PROMO/DISEASE PRVNTN
Minimum Credits: 3
Maximum Credits: 3
Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

Course Requirements: School of Nursing students only.

NUR 2011 - APPLIED STATISTICS FOR EBP
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2012 - ADLT PHYSL DIAG CLN PRAC - ANP
Minimum Credits: 1
Maximum Credits: 1
This clinical course focuses on assisting students in gaining beginning skills in the diagnostic process and teaching students the process of obtaining, evaluating, presenting and recording a complete adult data base. Focus is on identifying stressors to health and formulating a list of patient health needs, risks and problems to serve as a foundation for planning comprehensive primary health care.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2013 - PHYSICAL DIAGNOSIS - MS-CNS
This clinical course is designed to assist students to gain beginning skills in the diagnostic process and guide the students in the process of obtaining, evaluating, presenting and recording a complete adult data base. Students identify stressors to health and formulate a list of patient health needs, risks and problems to serve as a foundation for planning comprehensive health care in the acute care setting.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2015 - PED PHYS DIAGNOSIS THEORY**  
Minimum Credits: 2  
Maximum Credits: 2  
This didactic course focuses on health assessment of the pediatric patients from newborn to adolescents. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to obtaining a complete health history and performing a complete develop mentally appropriate physical examination. Emphasis is placed on the process of clinical decision making and formulation of clinical diagnosis. A developmental and systems approach will be applied to the decision making/differential diagnosis process.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2016 - PHYSICAL DIAGNOSIS**  
Minimum Credits: 2  
Maximum Credits: 2  
This course focuses on health assessment of the adult. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to developing the patient data base and to applying the diagnostic process.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2017 - PHYSICAL DIAGNOSIS FNP**  
Minimum Credits: 1  
Maximum Credits: 1  
This course focuses on health assessment of the adult. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to developing the patient data base and to applying the diagnostic process.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2018 - PHYSICAL DIAGNOSIS WHNP**  
Minimum Credits: 1  
Maximum Credits: 1  
This clinical course focuses on assisting students in gaining beginning skills in the diagnostic process and teaching students the process of obtaining, evaluating, presenting and recording a complete adult data base. Focus is on identifying stressors to health and formulating a list of patient health needs, risks and problems to serve as a foundation for planning comprehensive primary health care.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2019 - PED PHYSICAL DIAGNOSIS CLINICAL**  
Minimum Credits: 1  
Maximum Credits: 1  
This course focuses on the performance of the health assessment of the child. Students practice performing a patient database, the physical exam, developmental assessment, and to applying the diagnostic process.

**Academic Career:** GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2020 - PHYSICAL DIAGNOSIS AC
Minimum Credits: 1
Maximum Credits: 1
This clinical course is designed to assist students to gain beginning skills in the diagnostic process and guide the students in the process of obtaining, evaluating, presenting and recording a complete adult data base. Students identify stressors to health and formulate a list of patient health needs, risks and problems to serve as a foundation for planning comprehensive health care in the acute care setting.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2021 - PHYSICAL DIAGNOSIS PMH
Minimum Credits: 1
Maximum Credits: 1
This course focuses on health assessment of the adult. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to developing the patient data base and to applying the diagnostic process.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2025 - PHYSICAL DIAGNOSIS-AN
Minimum Credits: 1
Maximum Credits: 1
This course focuses on health assessment of the adult. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to developing the patient data base and to applying the diagnostic process.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404; CREQ: NUR 2031 or NUR 2231; PLAN: Nurse Anesthesia (MSN)

NUR 2030 - PROFESSIONAL COMMUNICATIONS
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the development of skills necessary for effective professional communications, both written and oral. Scientific writing and effective oral presentation principles will be discussed. Students will learn to use computer software to develop audiovisual aids to enhance oral presentations. This course will focus on writing effective abstracts, project proposals, professional reports, IRB applications, and research reports, as well as writing for publication and making effective oral presentations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2031 - DIAGC PHYSCL EXAM LIFE SPAN
Minimum Credits: 3
Maximum Credits: 3
This didactic course focuses on the use of the diagnostic history and physical examination to formulate a health assessment in patient populations across the lifespan. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to obtaining a complete health history and performing a methodical physical examination on patients across the life span.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404; PLAN: NURSAN-MSN or NURSAN-DNP; SUBPLAN: MSNNNP or DNPNNP or DNFPNLP or DNPPNP or MSNCNL or DNPMSN or DNPPAGAC or DNPPNA or ODNPNA or MSNADM or OCNL or ONAD or DNPAGNP-SP or DNPPCNP or DNPPGACN or DNPPMHN
NUR 2032 - DIFFERENTIAL DIAGNOSIS CLN
Minimum Credits: 2
Maximum Credits: 2
This clinical course builds upon the diagnostic process that is introduced in NUR 2031 and expanded upon in NUR 2033. Using a problem-based approach, students will use the information on the diagnostic process that is taught in NUR 2033 and apply it to the clinical setting. Differential diagnoses will be formulated based on the accurate and thorough health history and physical exam conducted on patients across the lifespan. Students will learn the process of verbally presenting patient cases, formulating differential diagnoses, formulating patient problem lists, and identifying stressors to health.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2031 or NUR 2231; CREQ: NUR 2033 or NUR 2433; PROG: Graduate School of Nursing

NUR 2033 - DFFRNCL DIAG ACROSS LIFE SPAN
Minimum Credits: 2
Maximum Credits: 2
This didactic course builds upon the diagnostic process introduced in NUR 2031. Using a problem-based approach to symptoms, students will be introduced to the diagnostic framework, algorithms, and terminology that will allow them to move from symptom to diagnosis. Evidence-based diagnosis will focus on the accuracy of the health history and sensitivity of the physical exam, laboratory studies and tests to "rule in" or "rule out" specific diseases. Students will learn the importance of formulating clinical impressions that lead to hypothesis testing in the care of patients across the life span.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2031 or NUR 2231; CREQ: NUR 2032 or NUR 2432; PROG: Graduate School of Nursing

NUR 2034 - ADVANCED PHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is a basic science course covering the principles of drug action for several important classes of drugs. A basic knowledge of principles of chemistry and biochemistry will be helpful in understanding the chemical basis of drug receptor interactions. The course begins with fundamentals of pharmacodynamics and pharmacokinetics and then covers the pharmacology of the central nervous system, respiratory system, gastrointestinal system, renal/cardiovascular system, endocrine system, immunosuppression, antibiotics and antifungals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404

NUR 2044 - NUR GRAD ORIENTATION MODULE
Minimum Credits: 0
Maximum Credits: 0
This module provides a web-based graduate nursing orientation that is designed to provide graduate nursing students with an overview of the school of nursing and information that they will need to successfully complete their programs and achieve their career goals.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: School of Nursing students only.

NUR 2045 - RESEARCH PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This course focuses on the student's development of selected research skills in collaboration with a mentor and his or her research team. Each student has the opportunity to design a practicum that complements prior research experience and is tailored to his or her current learning needs. The array of course activities may include but not be limited to developing a research proposal, submitting it as part of a grant application, preparing a protocol for submission to the institutional review board, assisting with recruitment or data collection activities for ongoing investigation, learning data management skills, participating in performance of laboratory procedures, participating in research team meetings, conducting literature searches, and preparing abstracts and/or manuscripts for presentation or publication.
Academic Career: GRAD
Course Component: Practicum
NUR 2049 - RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
This seminar focuses on assisting students to identify their area of research concentration for their doctoral studies and subsequent research trajectory. Students are introduced to a variety of research programs in nursing. Students will be expected to examine relevant concepts from nursing science and to identify faculty areas of expertise that can support their own research agenda.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Nursing students only.

NUR 2050 - RES PRACTICUM 1: GRANT WRITING
Minimum Credits: 1
Maximum Credits: 1
The seminar portion of this course focuses on assisting the student to develop a pre-doctoral grant proposal. The seminar will address the sections of the proposal with special attention to writing the background section. The laboratory portion focuses on experience with a mentor who will assist the student to understand the grant writing process through work with the mentor on their research projects as well as guidance for the student in writing a pre-doctoral proposal.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Nursing students only.

NUR 2051 - RESEARCH PRACM 2: PILOT STUDY
Minimum Credits: 1
Maximum Credits: 1
The seminar portion of this course focuses on assisting the student to develop a pilot project. The seminar will address the development and conduct of a pilot study. The laboratory portion focuses on experience with a mentor who will assist the student to set up and run a pilot project.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2052 - RES PRACM 3: MANUSCRPT DVLPMT
Minimum Credits: 1
Maximum Credits: 1
The seminar portion of this course focuses on the development of manuscript skills. The laboratory portion focuses on experience with a mentor and the preparation and submission of an article for publication related to the student's work.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Nursing students only.

NUR 2061 - ORGANIZTNL & MANAGEMENT THEORY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the organization and management, particularly of nursing personnel, in health services organizations. Organizational theories, their analysis, and their application to health care services systems will be explored. Management theories will also be discussed. Emphasis will be placed on personnel management aspects relevant to nursing such as licensure, certification, advance practice, nurse extender, etc.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2062 - ORGANIZTNL THRY & SYSTMS ANAL
This course is about organizations, organizations as health services systems, organizational theories and their analysis. Special attention is given to the relevance of these theories and their application to health service organizations and to systems of care delivery in relation to the nurse practitioner role. Elements that contribute to organizational performance and their interrelationships are emphasized and supported by theory, including sessions on restructured delivery systems, modes of reimbursement, and technological supports to assist in systems analysis.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2063 - MANAGEMENT & PERSONNEL THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on management of health service organizations and their personnel, with consideration of performance, motivation, conflict resolution, evaluation and new management models; also, technological systems (i.e., Informatics). Special attention is given to professional personnel and advanced practice nurses in diverse settings (e.g., Acute care, community centers, and ambulatory facilities). Select observations and interviews complement the seminar discussions.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2064 - PRACTICUM IN NURSING SYSTEMS**

Minimum Credits: 3  
Maximum Credits: 3  
Course is designed for students enrolled in the administration minor & serves as the clinical practicum. Course will provide students with opportunities to observe, apply, analyze & discuss selected administrative & managerial skill & processes which are relevant to the practice of nursing administration. Seminar portion will provide content, discussion and individual and group activities. A critical course component is a practicum with a designated preceptor employed full-time in a selected site. Negotiated sites and experiences are tailored to enhance student's career goals.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: NUR 2061 and 2090

**NUR 2065 - INTEGRATIVE SEMINAR HEALTH SYS**

Minimum Credits: 2  
Maximum Credits: 4  
Analysis of relevant organizational, management, and financial theory in diverse health service settings/systems. On site observational and practice experiences and target interviews complement seminar discussions. Attention is given to interdisciplinary personnel in the management of services. Two additional credits of precepted practice experience will be required of students with limited or no management experience.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

**NUR 2066 - INTEGRATIVE SEM & ADMINV PRACM**

Minimum Credits: 2  
Maximum Credits: 2  
This capstone course presented in the seminar format will enable students to demonstrate their abilities to integrate the knowledge acquired in the administrative program by planning and implementing a project within a selected health care system. Discussion will provide opportunities to share and discuss planned programs. Seminars will also include key practicing administrators from area hospitals who will provide topical updates on various issues.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.
NUR 2067 - ADVANCED SPECIALTIES INTERNSHIP
Minimum Credits: 3
Maximum Credits: 6
The internship gives students an opportunity to work with a professional in their selected specialty and to develop skills needed to function in their specialty role. The focus of the internship will necessarily vary with the selected specialty.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NUR 2071 - DESIGN & PROCESS OF INSTRUCTION
Minimum Credits: 3
Maximum Credits: 3
This course provides students with the conceptual knowledge base and practice experiences necessary for competent classroom and clinical instruction. Students synthesize a conceptual foundation for developing effective learning activities for individuals and groups to provide realistic problem-solving opportunities. Instructional design principles and related educational technologies are applied to both classroom and clinical teaching.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2072 - MEASUREMENT AND EVALUATION
Minimum Credits: 3
Maximum Credits: 3
Theories of measurement and evaluation are analyzed as they relate to the various aspects of instruction in nursing. Class activities are designed to offer the student opportunities to study and use a variety of measurement and evaluation techniques appropriate for classroom and clinical nursing settings. Opportunities are provided for students to analyze ethical, legal, and social issues involving measurement and evaluation as well as uses and limitations of evaluation instruments in a variety of nursing situations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2073 - PRACTICE 1 NSG ED: TCH/LRNG ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
This course is designed to enable nursing education graduate professional students to put into practice all the elements of clinical, didactic, simulation, research-focused, and laboratory instruction, under the supervision of an accomplished preceptor/mentor in diverse learning environments. Students have the opportunity to implement the role of nurse-educator through a guided, supportive, personally-designed practicum experience with one or more settings, populations, or roles, as determined by each student's learning needs.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NUR 2074 - PRACTICUM 2 FOR NURS EDUCATORS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to help prospective teachers of nursing conceptualize and operationalize elements of clinical and didactic instruction in a variety of practice settings. Students have the opportunity to enact the role of nurse educator through guided, preceptorship experience in an area relevant to student's practice and educational interests. Prerequisite courses provide a theoretical foundation for activities that characterize instruction/learning in a practice profession. Philosophical and experiential issues specific to nursing education are emphasized in class.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NUR 2075 - NURSING INFORMATICS 1
Minimum Credits: 3
Maximum Credits: 3
This course focuses on computer applications that facilitate the advanced practice of nursing. A conceptual foundation for understanding informatics
and an analysis of various application programs that facilitate management of information are covered. Additional elements included are historical developments regarding computers in health care; ethical, legal, financial, and security issues of using computer technology in health care; and computer system requirements from a nursing perspective.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

### NUR 2076 - NURSING INFORMATICS 2

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on the analysis and evaluation of nursing information systems within the context of the health care system. Elements covered include current information systems, decision support and expert systems, problems in information analysis, nursing classification systems and their values, systems analysis and design issues, strategic planning and cost analysis.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Nursing students only.

### NUR 2077 - RESEARCH COMPUTING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on computing tools and techniques currently used in nursing research. Principles for organizing, collecting, storing, managing, and analyzing data will be examined. Different data entry procedures and methods, creating spreadsheets, managing databases, and statistical analysis will be introduced and practiced.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### NUR 2078 - CLINICAL DIAGNOSTICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. The course is designed for nurse practitioners who may practice where on-site laboratory and diagnostic services may not be available. Included are EKG and x-ray interpretation and performing and interpreting selected laboratory tests. Suturing, casting, splinting workshops and wound care techniques are also included.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: NUR 2033 or NUR 2433; PROG: School of Nursing

### NUR 2079 - CHILDREN W/DISABILITIES: CLIN 1

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

### NUR 2080 - HEALTH POLICY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course addresses the multi-faceted nature of the health policy arena from social, environmental, political, legislative, and administrative perspectives. In-depth study of the policy process--analysis, formulation, implementation, evaluation--will be placed in context through discussion of existing major policies which affect the healthcare system. Strategies appropriate for the health care provider in promoting change are included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

**NUR 2081 - DATA MGMNT FOR RESEARCHERS**
Minimum Credits: 2
Maximum Credits: 2
This course focuses on computing tools and techniques currently used in health science research. Principles for organizing, collecting, sorting, managing, and analyzing data will be presented. Software for scanning, spreadsheets, database management, and statistical analysis will be presented.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**NUR 2085 - NUR INFORMTCS SEMINAR & PRAC 1**
Minimum Credits: 3
Maximum Credits: 3
This course gives the students the opportunity to implement the theory learned in class in a real-world setting. Students will be expected to discuss theoretical basis for the design, development, implementation, testing, and evaluation of information systems in health care. Practicum experience focuses on the development of skills necessary to assume the role of a specialist in nursing informatics. This practicum focuses on one aspect of a project in informatics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

**NUR 2086 - NUR INFORMTCS SEMINAR & PRAC 2**
Minimum Credits: 3
Maximum Credits: 3
This course gives the students the opportunity to implement the theory learned in class in a real-world setting. Students will be expected to discuss theoretical basis for the design, development, implementation, testing, and evaluation of information systems in health care. The practicum experience focuses on the development of skills necessary to assume the role of a specialist in nursing informatics. This practicum focuses on the implementation of a project in informatics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

**NUR 2089 - CHLDREN W/DISABILITIES: CLIN 2**
Minimum Credits: 2
Maximum Credits: 2
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

**NUR 2151 - NUR ADLT EXPERNG CARDC ARRHYTM**
Minimum Credits: 3
Maximum Credits: 3
Course focuses on nursing care of adults with cardiac arrhythmias. Critical decision making and nursing responsibilities with respect to electrocardiographic interpretation and the institution of prescribed treatment are addressed. Emphasis is placed on the fundamentals of basic electrocardiography including arrhythmia classification, recognition and etiology. Knowledge of the anatomy and physiology of the heart including coronary blood flow are synthesized and applied to the interpretation of cardiac conduction disturbances along with nursing implications.

Academic Career: GRAD
Course Component: Lecture
NUR 2177 - SCHOOL NURSE ROLE
Minimum Credits: 3
Maximum Credits: 3
Course is designed to prepare the professional nurse for certification as a school nurse in Pennsylvania; both the theory component and the practicum are required for eligibility. The school nurse role is explored thru the historical, legal, ethical, research and practice perspectives. The biological, physical, developmental, behavioral, cultural & psychosocial needs of children of all ages in a school setting examined. Application of nursing process & research findings employed when analyzing needs of school age children & children with special needs in the school setting.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2178 - SCHOOL NURSE PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
Course serves as a field experience in school nursing for RN students with a BDN or MSN degree from an NLN accredited school. Students apply competencies learned in prior courses while experiencing the school nurse role in both an elementary and secondary school setting. Time is spent in a child/adolescent oriented community wellness setting.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NUR 2177

NUR 2200 - RESEARCH FOR EBP 1
Minimum Credits: 2
Maximum Credits: 2
Course examines the interaction of theory, research, and clinical expertise in the development of evidence based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: NUR 2011 or NUR 2211 or NUR 2411

NUR 2202 - HLTH POLC & MGT IN PUBLC HLTH
Minimum Credits: 3
Maximum Credits: 3
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2204 - PATHPHYLGY ACROSS LIFE SPAN
Minimum Credits: 4
Maximum Credits: 4
Course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2207 - RESEARCH FOR EBP 2
During this course students build on the knowledge they acquired in NUR 2000/NUR 2200 and NUR 2011/NUR 2211 to develop an evidence-based protocol to address an answerable clinical question. Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: (NUR 2000 or NUR 2200 or NUR 2400) and (NUR 2011 or NUR 2211 or NUR 2411)

**NUR 2208 - ETHICS FOR ADV PRACTICE NUR**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course provides a web-based learning experience that includes a review of basic terms, concepts, and theories related to ethics. The student is guided through methods of ethical decision-making in clinical, research, health care organizational, local and international settings. The course provides a foundation for the study of ethics-based advanced nursing practice as integrated in specialty-specific courses.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Nursing students only.

**NUR 2209 - POLICY/ORG/FINCG OF HLTH CARE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The purpose of this web-enhanced course is to equip the graduate prepared nurse with beginning skills to influence health policy, to provide leadership in the healthcare delivery system, and to utilize basic principles of fiscal management in making high-quality cost-effective choices in the use of health care resources. The course consists of three units. The first unit explores the policymaking process, the role of the advanced practice nurse or advanced generalist and the effect of public policy on healthcare delivery systems. The second unit examines the organization and delivery of healthcare with an emphasis on the continuum of health care, including acute, specialized, and community based systems. Preparation for a nursing leadership role in these integrated care systems is emphasized. The third unit presents an overview of healthcare financing as it relates to the delivery of health care services. The nurse's role as the monitor of quality control, patient safety, and cost-effective care is examined in the context of clinical decision making.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Nursing students only.

**NUR 2210 - HLTH PROMOTION & DISEASE PREVN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Nursing students only.

**NUR 2211 - APPLIED STATISTICS FOR EBP**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and non parametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.  
**Academic Career:** GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

**NUR 2231 - DIAGN PHYSCL EXAM LIFE SPAN**
Minimum Credits: 3
Maximum Credits: 3
This didactic course focuses on the use of the diagnostic history and physical examination to formulate a health assessment in patient populations across the lifespan. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to obtaining a complete health history and performing a methodical physical examination on patients across the life span.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NUR 2004 or NUR 2204 or NUR 2404; SUBPLAN: Clinical Nurse Leader (Nurse Specialty Role-MSN)

**NUR 2234 - ADVANCED PHARMACOLOGY**
Minimum Credits: 3
Maximum Credits: 3
This is a basic science course covering the principles of drug action for several important classes of drugs. A basic knowledge of principles of chemistry and biochemistry will be helpful in understanding the chemical basis of drug receptor interactions. The course begins with fundamentals of pharmacodynamics and pharmacokinetics and then covers the pharmacology of the central nervous system, respiratory system, gastrointestinal system, renal/cardiovascular system, endocrine system, immunosuppression, antibiotics and antifungals.

Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2204 or NUR 2004 or NUR 2404

**NUR 2244 - NUR GRAD ORIENTATION MODULE**
Minimum Credits: 0
Maximum Credits: 0
This module provides a web-based graduate nursing orientation that is designed to provide graduate nursing students with an overview of the school of nursing and information that they will need to successfully complete their programs and achieve their career goals.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: School of Nursing students only.

**NUR 2265 - FUNDMS DIASTER MASS CSLTY CARE**
Minimum Credits: 2
Maximum Credits: 2
This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**NUR 2278 - CLINICAL DIAGNOSTICS**
Minimum Credits: 3
Maximum Credits: 3
This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. The course is designed for nurse practitioners who may practice where on-site laboratory and diagnostic services may not be available. Included are EKG and x-ray interpretation and performing and interpreting selected laboratory tests. Suturing, casting, splinting workshops and wound care techniques are also included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2033 or NUR 2433; PROG: School of Nursing
NUR 2280 - INT TO GENTCS & MOL THERPUTCS
Minimum Credits: 3
Maximum Credits: 3
This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current and future genetic diagnoses and therapies encountered in nursing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 2299 - BASIC SCIENCE OF CARE
Minimum Credits: 2
Maximum Credits: 2
This course is designed to develop a theoretical, practical, and evidence-based foundation for the delivery of safe, effective, evidence-based care. The delivery of quality health care requires that the various disciplines within the health care sciences work collaboratively to achieve excellence in health, health care delivery, and health care outcomes. Through didactic information, discussion, and problem-based learning sessions, students from the schools of the health sciences will develop the knowledge base and critical thinking skills central to problem identification and planning, implementing and evaluating health care across the continuum of care delivery systems. The two overarching goals of the course are to a) develop a better understanding of how the health-care system works, or fails to work and identify some potential 'solutions' toward reform, and b) develop a theoretical and practical foundation for the delivery of safe, effective, evidence-based care and appreciate that the delivery of such care requires an interdisciplinary approach.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 2350 - CRISIS INTERVENTION THEORY
Minimum Credits: 3
Maximum Credits: 3
Course will focus on the theory and concepts relevant to psychological crisis. Selected theories from nursing, sociology, psychology, systems, and learning will be used to plan, implement, and evaluate therapeutic regimens for clients experiencing crisis, particularly in a primary care setting. Emphasis will also be placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2351 - CRISIS INTERVENTION PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
This practicum provides the student with an opportunity to refine skills in the clinical management of clients who are experiencing a developmental or situational crisis. Student will be expected to (a) synthesize relevant crisis intervention theory with the management of the crisis situation, and (b) evaluate the effectiveness of these interventions. Experiences include precepted clinical work in ambulatory or inpatient settings with adult clients.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2360 - RURAL NURSING
Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare students to function as a culturally competent advanced practice nurse within a rural environment. Content will be presented on the following topics: definition of rural, philosophical and theoretical oasis for rural nursing practice, ethnographic and quantitative research studies, culturally competent practice, analysis of key concepts, health care resources, rewards and challenges of advanced nursing practice in a rural area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.
NUR 2400 - RES FOR EBP 1
Minimum Credits: 2
Maximum Credits: 2
This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NUR 2011 or NUR 2211

NUR 2404 - PATHOPHYS ACROSS LIFE SPAN
Minimum Credits: 4
Maximum Credits: 4
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2407 - RES FOR EBP 2
Minimum Credits: 2
Maximum Credits: 2
Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (NUR 2000 or NUR 2200 or NUR 2400) and (NUR 2011 or NUR 2211 or NUR 2411)

NUR 2410 - HEALTH PROMO/DISEASE PRVNTN
Minimum Credits: 3
Maximum Credits: 3
Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to Health People 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 2411 - APPLIED STATISTICS FOR EBP
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
NUR 2432 - DIFFERENTIAL DIAGNOSIS CLN
Minimum Credits: 2
Maximum Credits: 2
This clinical course builds upon the diagnostic process that is introduced in NUR 2031 and expanded upon in NUR 2033. Using a problem based approach, students will use the information on the diagnostic process that is taught in NUR 2033 and apply it to the clinical setting. Differential diagnoses will be formulated based on the accurate and thorough health history and physical exam conducted on patients across the lifespan. Students will learn the process of verbally presenting patient cases, formulating differential diagnoses, formulating patient problem lists, and identifying stressors to health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2031 or NUR 2231; CREQ: NUR 2033 or NUR 2433

NUR 2433 - DIFFRNCL DIAG ACROSS LIFE SPAN
Minimum Credits: 2
Maximum Credits: 2
This didactic course builds upon the diagnostic process introduced in NUR 2031. Using a problem-based approach to symptoms, students will be introduced to the diagnostic framework, algorithms, and terminology that will allow them to move from symptom to diagnosis. Evidence-based diagnosis will focus on the accuracy of the health history and sensitivity of the physical exam, laboratory studies and tests to "rule in" or "rule out" specific diseases. Students will learn the importance of formulating clinical impressions that lead to hypothesis testing in the care of patients across the life span.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2031 or NUR 2231; CREQ: NUR 2032 or NUR 2432

NUR 2434 - ADVANCED PHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is a basic science course covering the principles of drug action for several important classes of drugs. A basic knowledge of principles of chemistry and biochemistry will be helpful in understanding the chemical basis of drug receptor interactions. The course begins with fundamentals of pharmacodynamics and pharmacokinetics and then covers the pharmacology of the central nervous system, respiratory system, gastrointestinal system, renal/cardiovascular system, endocrine system, immunosuppression, antibiotics and antifungals
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2004 or NUR 2204 or NUR 2404

NUR 2465 - FUNDMS DISTR/MASS CASUALTY CRE
Minimum Credits: 2
Maximum Credits: 2
This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2478 - CLINICAL DIAGNOSTICS
Minimum Credits: 3
Maximum Credits: 3
This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. The course is designed for nurse practitioners who may practice where on-site laboratory and diagnostic services may not be available. Included are EKG and X-ray interpretation and performing and interpreting selected laboratory tests. Suturing, casting, splinting workshops and wound care techniques are also included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: NUR 2033 or NUR 2433
NUR 2480 - INTRO GENETCS & MOLEC THERPUTC
Minimum Credits: 3
Maximum Credits: 3
This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current and future genetic diagnoses and therapies encountered in nursing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2650 - DOMESTIC VIOLENCE
Minimum Credits: 3
Maximum Credits: 3
Violence is becoming more prevalent in our culture. As health care providers we must possess an awareness of our own attitudes toward both violence and victims, an understanding of the process of violence, the skills necessary to perform a complete violence assessment, and the therapeutic actions needed for positive outcomes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2660 - THE CLINICAL INTERVIEW
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the theory and concepts relevant to psychiatric, medical, and qualitative research interviewing and to obtaining a patient history in the psychiatric and medical setting. The focus is on selected interviewing techniques developed by various authorities. Emphasis will be placed on specific basic and advanced techniques that are useful in obtaining accurate information and in detecting critical processes such as suicide ideation or the presence of psychosis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 2680 - INTRO GENETCS & MOLEC THERPUTC
Minimum Credits: 3
Maximum Credits: 3
This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current and future genetic diagnoses and therapies encountered in nursing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2681 - ADV TOPICS IN HUMAN GENETICS
Minimum Credits: 3
Maximum Credits: 3
This is a 12-week graduate level course that will emphasize the clinical aspects of genetic disorders including diagnosis, current standard treatment, available gene testing and molecular therapy, ethical/cultural issues, support group availability and the state of current research in the field. This will be accomplished using a problem based learning approach with case resolutions to demonstrate the clinical variation of genetic disorders, including the variety of causes, treatments, testing and ethical concerns. This course is also designed to introduce the student to resources related to teaching genetics/genomics and appropriate design of genetic/genomic research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 2690 - EXPLORING CANCER CARE
Minimum Credits: 2
Maximum Credits: 2
The overall objective of this course is to provide the student a broad introduction to cancer care and the role of the professional within this specialty. Through the use of discussion, presentations and observational experiences, students explore various aspects of cancer care. Specific cancers, therapies and care issues are explored. The health needs of the cancer patient and family are examined. Health promotion through education, screening and early detection as recommended thru the American cancer society and healthy people 2000/2010 will be emphasized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 2800 - COORDINATING CLINICAL TRIALS
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide individuals with a basic understanding of clinical trials research conducted in accordance with federal regulations. Aspects of clinical trials research such as regulatory requirements, informed consent, pre- and post-study activities, audit procedures, and budgetary issues will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2000 or NUR 2200 or NUR 2400

NUR 2801 - COORDINATING CLN TRIALS PRAC
Minimum Credits: 1
Maximum Credits: 2
The course is designed to familiarize the student with the various roles and responsibilities of a clinical research coordinator. Each student may select one or more research areas. Preceptors in these areas will guide observations that exemplify the role of the clinical research coordinator. Each student will also participate in the review of research proposals at the university of Pittsburgh institutional review board and an observational experience at the clinical and translational research center (CTRC). The CTRC is an NIH funded center at the University of Pittsburgh used for inpatient and outpatient studies. The course includes opportunities for discussion of research protocols and review of procedures from a variety of perspectives.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: CREQ: NUR 2800

NUR 2820 - PRINC/PRA FORENSIC NUR & LNC
Minimum Credits: 3
Maximum Credits: 3
This course provides knowledge in areas of the law; the process of a lawsuit; and ethical, legal, and social issues (ELSI) related to nurse consulting and forensic nursing (FN). It is designed to provide an overview of how nursing knowledge and skills can be transferred and translated into legal nurse consulting (LNC) and forensic nursing examination (FNE) practice. Approaches and methods in legal nurse consulting and forensic nursing are discussed including but not limited to screening cases, analyzing health professional malpractice cases, performing medical records review and examination, quality assurance and risk management, preparing effective written and verbal reports and abstracts, and preparing for testifying as an expert witness. Specific activities focused on the development of investigative techniques in forensic nursing examination are included. Emphasis is placed on the application of nursing skills and knowledge to questions of law and health in criminal and civil investigations and other court related issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2821 - ADV PRA IN FORENSIC NUR & LNC
Minimum Credits: 3
Maximum Credits: 3
Advanced practice in forensic nursing (FN) and legal nurse consulting (LNC) is designed to provide the learner with an opportunity to combine nursing knowledge with forensic science and legal principles in scientific investigation, evidence collection and preservation, analysis, and legal documentation. The course explores forensic principles and roles as applied to advanced practice in forensic nursing and legal nurse consulting throughout the life span. Techniques of forensic assessment and physical examination, evidence collection, chain of custody, forensic documentation that withstands courtroom scrutiny, and challenges of the roles will be discussed. Participation in case analyses including ethical, legal, sociocultural issues (ELSI) allow for critique and development of skills relevant to the various roles in forensic nursing practice.
Academic Career: GRAD
Course Component: Lecture
NUR 2822 - SEM/PRAC IN FORENSIC NUR & LNC
Minimum Credits: 3
Maximum Credits: 3
The seminar and practicum in forensic nursing and legal nurse consulting course provides the student with an opportunity to attend a seminar with other students who are completing their practicum experience in a variety of settings and mentored by diverse preceptors. Emphasis is placed on the application of nursing skills and knowledge to areas of practice in law (reviewing malpractice cases for and attorney, collaborating with law enforcement, health, correctional, or psychiatric settings) where a forensic nurse or legal nurse consultant practices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2820

NUR 2823 - FORENSC PMH NUR & CORRCTNL NUR
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of forensic psychiatric mental health nursing and correctional nursing practice. The course focuses on the role of the forensic psychiatric mental health nurse (FPMHN) and correctional forensic nurse (CFN) in caring and providing interventions for the criminally insane, adjudicated criminal defendants unable to stand trial by reason of insanity or mental disorder/defect, or incarcerated offenders in rehabilitation or in treatment, as well as survivors and their families who are affected by interpersonal violence. Emphasis is placed on the role of the nurse when FPMHN and CN intersect with the law to affect patient outcomes. Research themes, standards of practice, evidence-based interventions and outcomes are discussed. The application of ELSI (ethical, legal and sociocultural issues) in FPMHN and CFN are presented. The role of the CFN in various correctional facilities and level of client treatment needs will be explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2820

NUR 2829 - CONTEM ISSUES CROS CULTL HLTH
Minimum Credits: 3
Maximum Credits: 3
Purpose of course is to increase awareness of how the delivery and acceptance of health care may be influenced by social, cultural, and environmental factors. It will provide an overview of how these factors influence a person's response to stressors, daily health and living needs. Goal is to help students increase their understanding of culturally congruent care by utilizing cultural concepts, theories and research. Students will analyze factors that facilitate/ hinder communication about health needs, acceptance of the health care regimen and access to health care systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

NUR 2830 - ADV LEADERSHIP CLINCAL PRACTICE
Minimum Credits: 6
Maximum Credits: 6
This course is designed for experienced nurse managers currently operating at a department director level or above. The course will include an advanced level overview of nursing leadership in the areas of finance, clinical practice, information technology, leadership development, and human resource management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

NUR 2865 - FUNDMS DISTR/MASS CASUALTY CRE
Minimum Credits: 2
Maximum Credits: 2
This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.
Academic Career: GRAD
**NUR 2901 - BASIC SCI OF CARE CONTINUATION**  
Minimum Credits: 0  
Maximum Credits: 0  
This course builds upon NUR 2900 as a continuation in the development of a theoretical, practical, and evidence-based foundation for the delivery of safe, effective, evidence-based care. The delivery of quality health care requires that the various disciplines within the health care sciences work collaboratively to achieve excellence in health, health care delivery, and health care outcomes. Students from the schools of the Health Sciences will develop the knowledge base and critical thinking skills central to problem identification and planning, implementing and evaluating healthcare across the continuum of care delivery systems. Collaborative problem-solving will be emphasized, and the recognition that professionalism includes the personal obligation of all healthcare professionals to work together to remove the barriers to the delivery of safe, effective and evidence-based care.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Nursing students only.

**NUR 3000 - RESEARCH FOR EBP 1**  
Minimum Credits: 2  
Maximum Credits: 2  
This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Nursing students only.  
Course Requirements: CREQ: NUR 3011

**NUR 3002 - RESEARCH PRACTICUM**  
Minimum Credits: 2  
Maximum Credits: 2  
Course builds on knowledge and skills acquired in NUR 2001/3001 and focuses on the continuing development of an understanding of the research process thru participation in an ongoing research project and course seminars. Students identify a researcher who is conducting an ongoing project and who is willing to serve as a preceptor. Students prepare a contract defining the role of the student and how he/she will meet the course objectives while working with the designated preceptor. A written log is submitted documenting the student's learning activities for the practicum.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Nursing students only.

**NUR 3003 - HEALTH PROMOTION**  
Minimum Credits: 2  
Maximum Credits: 2  
Health promotion and disease prevention are examined from theoretical foundations to clinical applications. Epidemiological principles are discussed as a basis for focusing health promotion activities and designing interventions. The impact of biology, environment, behavior, nutrition, spirituality, stress and critical life events are explored in a variety of settings. Current research in health promotion is used as the basis for identifying appropriate interventions.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Nursing students only.

**NUR 3004 - PATHPHYLGY ACROSS LIFE SPAN**  
Minimum Credits: 4  
Maximum Credits: 4  
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function across the lifespan. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction alterations.
NUR 3005 - HEALTH PROMO/DISEASE PRVNTN
Minimum Credits: 3
Maximum Credits: 3
Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

NUR 3007 - RESEARCH FOR EBP 2
Minimum Credits: 2
Maximum Credits: 2
During this course students build on the knowledge they acquired in NUR 3000 to develop an evidence-based protocol to address an answerable clinical question. Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

NUR 3008 - ETHC PBLC POLC HLTHCRE ORG
Minimum Credits: 3
Maximum Credits: 3
This course is divided into three components: the health policy component of the course presents an analysis of functions of the public and private sector in creating and implementing health policy. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government, types of government and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and management of patient outcomes.

NUR 3010 - PHD DISSERTATION
Minimum Credits: 1
Maximum Credits: 9
The Ph.D. dissertation fulfills two major purposes: (1) to establish the student's competency in the conduct of scholarly research, including demonstrated ability to carry out, analyze, and report scholarly research at a high level of professional competency, and (2) to contribute to the science of nursing through the dissemination of results from the investigation.

NUR 3011 - APPLIED STATISTICS FOR EBP
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will
learn to calculate effect sizes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NUR 3012 - PUBLIC POLICY IN HEALTH CARE
Minimum Credits: 2
Maximum Credits: 2
This course offers political and analytical insights into understanding U.S. health policy-making and into developing strategies that influence health policy outcomes. The course presents an analysis of the functions of the public and private sector in creating and implementing health policy across diverse patient populations. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government and various types of public and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and the impact of public policy on patient health outcomes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 3013 - ETHICS IN HEALTHCARE
Minimum Credits: 1
Maximum Credits: 1
Philosophical and clinical foundations in ethics are analyzed and used to provide a basis for guidelines in ethical decision-making and practice. Content will include legal-ethical issues in practice, ethical implications in the role of the doctorally prepared nurse, historical and political influences on ethics in health care, diversity in race, gender, and sexual orientation, and principals of justice, autonomy, and provider-patient relations. Additionally this course describes general ethical practices and ethical principles associated with the proper conduct of research, scientific integrity and protection of human subjects.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 3016 - THEORETICAL FOUNDATIONS FOR RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course focuses upon the relationship of theory to research with an emphasis on the role of theory in the design and interpretation of research. Attention is given to the evaluation of theory, the utility of theories in research, and the comparison of research strategies from various theoretical perspectives. Emphasis is placed upon midrange, multidisciplinary theories relevant to clinical research.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HPS 1653 or PHIL 1610; PROG: School of Nursing

NUR 3017 - PHYSICAL DIAGNOSIS
Minimum Credits: 2
Maximum Credits: 2
This course focuses on health assessment of the adult. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to developing the patient data base and to applying the diagnostic process.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NUR 3018 - FOCUS GROUP PRACTICUM
Minimum Credits: 2
Maximum Credits: 6
This course builds upon the student's didactic knowledge gained in NUR 3055 or equivalent through the supervised experience of planning, conducting, analyzing, and preparing reports for focus groups. Emphasis is placed upon the student's mastery of the ability to formulate questions, facilitate discussion, including the management of difficult participants, note taking, and analysis of data and preparation of the report. Students will be expected to lead at least two focus groups and to serve as note taker in at least two additional groups. It is expected that a secondary component
of the practicum will be to develop an understanding of cultural differences in approaches to health and health care through the conduct of focus groups among different cultural groups as well as learning from the focus group experiences of others.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

NUR 3020 - QUANTITATIVE RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of quantitative research methods, including various research designs appropriate for studying health care phenomena. Some of the quantitative methods included are: descriptive, comparative, correlational, survey, methodological, epidemiological, experimental and quasi-experimental designs, clinical trials, evaluation research, longitudinal, and secondary analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: None

NUR 3022 - QUALITATIVE RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the study of research traditions that guide the collection and analysis of qualitative data. The course provides an overview of various qualitative methods, such as phenomenology, grounded theory, case study, ethnography, hermeneutics and historical approaches. It includes a focus on the philosophical perspectives underlying each of the methods.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PREQ: PSYED 2019 or BIOST 2042

NUR 3023 - ISSUES INFLUENCING LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
Considers the influences of economic, ethical, social, cultural, technological, and political issues in relation to their impact on leadership in professional nursing. Federal health-care policy, legislation, and research that directly and indirectly affect access to health care, its quality, use, and financial support are examined in a board context.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

NUR 3027 - SEM ON STRUCTURE OF KNOWLEDGE
Minimum Credits: 3
Maximum Credits: 3
In this course the focus is on the organization and integration of evidence from a series of scientific work in order to structure the results in such a manner that the perspectives, assumptions, and ways of knowing are evident. Structuring involves historical review, critical inquiry, and synthesis of disseminated knowledge. The process results in creating a knowledge structure that is used for the advancement of science.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PREQ: NUR 3016 and (HPS 1653 or PHIL 1610)

NUR 3030 - PROFESSIONAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on competencies needed to develop and sustain a program of research. Emphasis will be placed on developing skills that support a program of research, and assist in the dissemination of knowledge, e.g., Abstract/oral/poster presentations grant preparation, IRB submission, grants management. The course will include presentations by researchers conducting multidisciplinary research using a variety of funding mechanisms. Students will analyze strategies used in initiating and sustaining a research career.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
NUR 3036 - CAPSTONE PROJECT
Minimum Credits: 2
Maximum Credits: 2
Students will undertake a systematic investigation of a clinically based or administration based problem selected by the student and supported by faculty. Course requirements include identification of the problem to be addressed, review and critique of pertinent literature, and implementation of the project. The project will use an evidence-based practice model, and it will by systematically developed in consultation with the student's capstone committee who will evaluate each step of the process. This process can begin in NUR 2007: research for evidence-based practice 2.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

NUR 3037 - CAPSTONE CLINICAL
Minimum Credits: 1
Maximum Credits: 1
This practicum represents the final clinical course for the DNP degree. Here the student will experience a mentored and supervised immersion in a clinical practice where the project designed and approved in the capstone project course will be implemented and evaluated. The practice site, approved by the capstone committee must provide access to the necessary and appropriate population for project implementation, as well as support for full expression of the DNP scope of practice.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 3036 or NUR 3236; PROG: School of Nursing

NUR 3040 - RES EMPHASIS: CRITICAL CARE
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore current and future trends in physiologic research involving adults who are critically or acutely ill with the potential for acute decompensation. Emphasis will be placed on strategies that have the potential to restore or optimize physiologic function, evaluation of outcomes, ethical issues, and new developments in genetic research. The course will include presentations by multidisciplinary faculty who are currently conducting biobehavioral research in these areas and student presentations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

NUR 3041 - RESEARCH EMPHASIS SEMINAR - ADOLESCENT HEALTH
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the developmental trajectory of research on adolescent health and development, as well as theoretical/conceptual models applicable to such research. Key research areas will be critically evaluated. Topics will focus primarily on research related to transitions experienced during adolescence (e.g., Biological, psychological, social cognitive). An emphasis will be placed on the integration of biological and behavioral research and its inherent methodologies. Human and lower animal studies will be utilized. The course will include presentations, discussion, and critiques of selected readings. Students will provide a class presentation and paper focusing on a developmental conceptual model applicable to their selected area of research with adolescents.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

NUR 3042 - RES EMPHSS SEM-CHRNC DISORDRS
Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to provide an in-depth examination of the cross-discipline literature on chronic illness. The common manifestations of chronic disorders will be addressed, including such common features as impact on cognitive function, functional ability, quality of life, adherence to treatment, depression, sleep, pain, stress, physical activity, dietary considerations, as well as other areas relevant to student interests. Discussion of these paradigms across chronic disorder populations and settings will be included, varying with the interests of the students in the course. Students will be expected to complete an in-depth critical review of the research literature on a specific feature of chronic disorders as well as a review of clinical research evidence related to a set of common features within a specific chronic disorder of interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
NUR 3043 - RES EMPHSS SEM: WOMEN'S HEALTH
Minimum Credits: 3
Maximum Credits: 3
This seminar is directed toward expanding the capability of scientists for knowledge building that will maximize the health of women and transform the values and structures of the health care system. This course will examine the influence of gender, ethnicity, socioeconomic class and other barriers that may affect the quality of health care for women by exploring exemplars of current research in women's health.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

NUR 3044 - RES EMPHSS SEM:CANCER SURVISHP
Minimum Credits: 3
Maximum Credits: 3
The cancer survivorship research emphasis seminar focuses on synthesis of the empirical evidence in cancer survivorship and critical evaluation of theories from multiple disciplines underlying this research. Students will examine controversies and methodological issues associated with investigations of the physical, psychological and social responses to cancer and cancer therapy and discuss innovations in cancer survivorship research. Emphasis will be placed on the examination of the influence of underrepresented populations on research in cancer survivorship.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 3045 - RESEARCH PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This course focuses on the student's development of selected research skills in collaboration with a mentor and his or her research team. Each student has the opportunity to design a practicum that complements prior research experience and is tailored to his or her current learning needs. The array of course activities may include but not be limited to developing a research proposal, submitting it as part of a grant application, preparing a protocol for submission to the institutional review board, assisting with recruitment or data collection activities for ongoing investigation, learning data management skills, participating in performance of laboratory procedures, participating in research team meetings, conducting literature searches, and preparing abstracts and/or manuscripts for presentation or publication.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

NUR 3049 - RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
This seminar focuses on assisting students to identify their area of research concentration for their doctoral studies and subsequent research trajectory. Students will learn how to: generate evidence through research; critically appraise quantitative and qualitative knowledge; and conduct a systematic literature review to address a specific research question. Students will be introduced to a variety of research programs related to nursing, including interdisciplinary and translational research programs lead by nurse researchers. Students will distinguish primary from secondary data analyses. Students will be expected to examine relevant concepts from nursing science and to identify faculty areas of expertise that can support their own research agenda.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

NUR 3050 - GRANT WRITING
Minimum Credits: 1
Maximum Credits: 1
This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
NUR 3051 - BUILDING A PROGRAM OF RESEARCH
Minimum Credits: 1
Maximum Credits: 1
This seminar addresses sequential development of a research trajectory by engaging the student in focused discussion of the rationale for and design of preliminary studies. Students explore various approaches to conducting and funding preliminary studies as well as how to foster interdisciplinary collaboration and build a research team. In addition, they consider key issues in conducting responsible science and human subject protection as well as dissemination of research findings.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

NUR 3052 - MANUSCRIPT DEVELOPMENT
Minimum Credits: 1
Maximum Credits: 1
This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. Multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

NUR 3053 - GENERAL PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
This practicum is designed for the BSN-Ph.D. student only and focuses on continued experience with a research mentor. The student participates as a team member with the faculty on their research projects. The student also continues to develop their own research with the assistance of the mentor.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

NUR 3054 - PRAC FOR NUR & HLTH SCI EDUC
Minimum Credits: 3
Maximum Credits: 3
This course is designed to help teachers conceptualize and operationalize the elements of clinical and didactic instruction in a variety of practice settings. Students have the opportunity to enact the role of educator through a guided seminar/ preceptorship experience in an area relevant to the student's practice and educational interests. This course will provide a theoretical foundation for application and synthesis activities that characterize instruction and learning in a practice profession. Philosophical and experiential issues specific to health sciences education are emphasized in class discussion.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NUR 3055 - COMNY DVLP: PREP FACLTN APPLC
Minimum Credits: 2
Maximum Credits: 2
This seven-week workshop will introduce students to the focus group as a data-gathering tool and will prepare them to use focus groups in their work. The workshop will use lectures, discussions and interactive exercises to familiarize students with all aspects of focus groups. Topics to be covered include the theoretical basis of focus groups, formulating questions, recruiting participants, facilitating the discussion, taking notes and applying the data. It is recommended that students read one text. In addition, students will complete a series of assignments designed to sharpen their listening, facilitating and analytical abilities. Critical components of the class will be observation of and hands-on experience with facilitating discussions, taking notes and reporting. Ability to role play highly desirable.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 3056 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES
Minimum Credits: 2
Maximum Credits: 2
Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote...
health and prevent disease. The specific topics to be covered include five goals: 1) introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeautic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### NUR 3058 - INT'L RES AND COLLABORATION

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This interdisciplinary elective course prepares graduate students for professional conduct and research collaboration in a global context. Topics include globalization, building collaborative international relationships, international research ethics, and sources of funding for international research. Students will become familiar with the status of research in their professions world-wide, evaluate research topics of international interest, evaluate requirements for adaptations in research methods, and collaborate with international colleagues or with a mentors/researchers engaged in international research to produce a hypothetical feasible research proposal. Synthesis of the knowledge gained in this course will be evidenced by 1) weekly maintenance of a diary or on-line blog demonstrating growth in international knowledge and cross-culture communication skills, and 2) development of an abbreviated proposal for international research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### NUR 3060 - INDEPENDENT STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course focuses on the student's development of unique knowledge and skills in collaboration with a faculty mentor. Each student has the opportunity to design an independent study that complements prior knowledge and is tailored to the student's current learning needs. Content of the independent study will reflect an in-depth focus in a particular area of study as arranged between the student and designated faculty member. Content to be covered may include, but is not limited to, theoretical approaches from the biomedical and psychosocial sciences, research designs and methods, data analytic techniques, and advanced clinical practice issues.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis

### NUR 3090 - HEALTHCARE OUTCOMES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Identifying, measuring, achieving, evaluating, altering and matching appropriate healthcare outcomes for various patient populations and healthcare settings are key skills for successful administrators. This seminar format course will focus on specific topical areas which can be integrated with clinical experiences.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** School of Nursing students only.

### NUR 3094 - EVIDENCE-BASED QUALT IMPROVMNT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course students will learn how to create and implement a culture of clinical and service excellence. Using quality improvement theories, they will analyze their own organization and themselves in relationship to quality improvement challenges. Evidence based qi systems and best practices will be examined. Students will analyze information systems/technology opportunities to enhance healthcare quality. They will also have an opportunity to apply selected quality tools and techniques to solve actual problems in their workplaces.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: School of Nursing
NUR 3099 - THE SCI OF HLTH CARE DELIVERY
Minimum Credits: 2
Maximum Credits: 2
This course is designed to develop a theoretical, practical, and evidence-based foundation for the delivery of safe, effective, evidence-based health care. Participants in this course will develop the knowledge base and critical thinking skills central to identifying and solving problems in the planning, implementation and evaluation of health care across the continuum of care delivery systems and across professions. The two overarching goals of the course are to a) develop a better understanding of how the healthcare delivery system works and fails to work, and b) develop a foundation for organizational and systems leadership for care reform, quality improvement and systems thinking in the delivery of safe, effective, evidence-based care using interprofessional approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 3110 - RESEARCH INSTRUMENTATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the general properties of skillful measurement integral to the research process. The domain sampling model is presented as the major theory of measurement error with the parallel test model presented as a special case of domain sampling model. The construct, criterion and content validity of psychosocial instruments are explored and methods for evaluating each of these relative to specific instruments are presented. The theory of reliability is approached from the domain sampling model and factors are identified that reduce the reliability of an instrument. Methods to estimate reliability such as internal consistency, alternative forms and long-range stability are included. The basic concepts of biomedical instrumentation and the static characteristics that describe instruments performance (e.g., Accuracy, precision, resolution, reproducibility, zero drift, sensitivity drift, and linearity) of physiological instruments are reviewed. Also, a basic discussion will be held on laboratory standardization's (e.g., CDC) and reliability of laboratory assays (use of split samples, coefficient of variation measures). A variety of scaling methodologies will be discussed as well as the principals involved in the design and formatting of questionnaires.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2019 or BIOST 2042; PROG: School of Nursing

NUR 3115 - ADV QUAN METHS HLTH SCI RES
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of advanced statistical techniques in current health science research. Aspects of methodology relevant to statistical analysis such as design, statistical power, sample size, and statistical significance will be conceptually integrated with data analysis. Statistical strategies popular in a variety of areas of research, such as epidemiology, nursing and medicine, will be considered for their utility in answering research questions and/or testing hypotheses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 3212 - PUBLIC POLICY IN HEALTH CARE
Minimum Credits: 2
Maximum Credits: 2
This course offers political and analytical insights into understanding U.S. Health policy-making and into developing strategies that influence health policy outcomes. The course presents an analysis of the functions of the public and private sector in creating and implementing health policy across diverse patient populations. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government and various types of public and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and the impact of public policy on patient health outcomes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 3213 - ETHICS IN HEALTHCARE
Minimum Credits: 1
Maximum Credits: 1
Philosophical and clinical foundations in ethics are analyzed and used to provide a basis for guidelines in ethical decision-making and practice. Content will include legal-ethical issues in practice, ethical implications in the role of the doctorally prepared nurse, historical and political influences
on ethics in health care, diversity in race, gender, and sexual orientation, and principals of justice, autonomy, and provider-patient relations. Additionally this course describes general ethical practices and ethical principles associated with the proper conduct of research, scientific integrity and protection of human subjects.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**NUR 3236 - CAPSTONE PROJECT**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

This course is designed to provide a culminating practicum experience for the DNP leadership student. Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies related to the leadership of complex issues, organizations and systems.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**NUR 3237 - CAPSTONE CLINICAL**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This practicum represents the final clinical course for the DNP degree. Here the student will experience a mentored and supervised immersion in clinical or administrative practice where the project designed and approved in the capstone project course will be implemented and evaluated. The practice site, approved by the capstone committee must provide access to the necessary and appropriate population for project implementation, as well as support for full expression of the DNP scope of practice.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: NUR 3036 or NUR 3236

**NUR 3250 - GRANT WRITING**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**NUR 3252 - MANUSCRIPT DEVELOPMENT**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. Multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.

Nursing Administration

NURSAD 2008 - ALTERNTV RESEARCH REQUIREMENT
Minimum Credits: 1
Maximum Credits: 3
Consists of two major learning experiences. One is a three credit course in 1) advanced research methods, 2) advanced statistics, or 3) independent study. The other three-credit requirement is met through completion of 1) a research project, 2) a research paper or 3) a research practicum. The combination of courses/requirements selected must provide experience in utilization of research findings, identification of researchable problems, and implementation of the research process.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Nursing students only.

NURSAD 2010 - THESIS NURSING ADMINISTRATION
Minimum Credits: 1
Maximum Credits: 3
Individual instruction provides guidance in the preparation of a scholarly written report. This report synthesizes the components of a research project: review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Nursing students only.

NURSAD 2017 - ADV CLINCAL NURSING ADMINSTRTR
Minimum Credits: 4
Maximum Credits: 4
Five key administrative functions are integrated with clinical nursing. Clinical resource persons provide content concerning the current level of nursing practice and future trends in each clinical area. Theoretical content is followed by student experience in a clinical facility with emphasis on the analysis of current and projected clinical nursing practice and the identification of the implications for nursing service administration.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.
NURSAD 2020 - ORGANIZATIONAL THEORY
Minimum Credits: 3
Maximum Credits: 3
Provides opportunities for students who plan to pursue careers in teaching, administration, or in any professional practice to learn about organizations. The assumption is made that one can be a more effective professional if equipped with knowledge of the milieu in which one will work. The focus of the course is on the elements that impact on professional performance and their interrelationships. The elements studied include external environment, purposes and goals, work, structure, and coordination.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSAD 2025 - COMPUTER APPLICATIONS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students with knowledge about computer technology. Principals in the computer industry are discussed in relation to their impact on the health care arena. Students will gain skill in using and evaluating computer technology as it relates to nursing work in practice, education, administration and research settings. Opportunities are provided for developing intermediate and advanced computer literacy in the areas of managing information for nursing administration and nursing education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSAD 2035 - RESIDENCY PREPARATION
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to prepare the students for the residency by: (1) refining skills of interviewing and being interviewed; (2) assessing progress through the program and identify own strengths and areas needing development; (3) developing ability to present oneself by letter and in person to obtain a satisfactory residency placement.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Nursing students only.

NURSAD 2036 - RESIDENCY NURSING ADMINSTRTN
Minimum Credits: 3
Maximum Credits: 11
Enables the student to integrate the content of prior courses into practice. The student works with a preceptor, devoting full time to the activities in the agency that have application to nursing administration, and has contact with other departments in the agency that interrelate with nursing. Monthly seminars are held to analyze experiences in relation to management principles and concepts.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSAD 2037 - RESIDENCY IN NURSAD & BUS ADM
Minimum Credits: 5
Maximum Credits: 11
This is the culminating course for the dual degree program in nursing administration and business administration. It enables students to integrate the content of prior courses into practices. Students work with a preceptor, devoting full time to the activities in the agency that have application to nursing administration and business administration. Students have contact with agency departments that interrelate with nursing. Biweekly seminars are held to analyze experiences in relation to management principles.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.
NURSAD 2039 - NURSING ADMINISTRATION PROCESS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to improve the skill in administrative processes that students bring to the practice of management. Experiences will be provided to enable the students to assess themselves in those administrative skills critical to the practice of management and to further develop those skills. Examples of administrative skills included are budgeting, ethics, and conflict management or financial management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSAD 2040 - MANAGEMENT THEORY
Minimum Credits: 3
Maximum Credits: 3
Provides an overview of the essence of managerial work. The work of managers is viewed as that of decision making in the interest of improved organizational performance; course content is structured to examine decision making. The major concepts presented are decision making, planning, organizing, communication, power, politics, and organizational change.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURSAD 2061 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
The student has the opportunity to acquire knowledge and skill through independent experiences involving little or no formal interaction between the student and instructor. Independent study is when no formal course is available that meets the student's individual learning needs.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Nursing students only.

Nursing Education

NURSED 2008 - ALTERNATVE RESEARCH REQUIREMENT
Minimum Credits: 1
Maximum Credits: 3
Consists of two major learning experiences. One is a three credit course in 1) advanced research methods, 2) advanced statistics, or 3) independent study. The other three credit-requirement is met through completion of 1) a research project, 2) a research paper or 3) a research practicum. The combination of courses/requirements selected must provide experience in utilization of research findings, identification of researchable problems, and implementation of the research process.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Nursing students only.

NURSED 2010 - THESIS NURSING EDUCATION
Minimum Credits: 1
Maximum Credits: 3
Individual instruction provides guidance in the preparation of a scholarly written report. This report synthesizes the components of a research project: review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion. Prerequisites and co-requisites determined by area of specialization.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Obstetrics and Gynecology

OGBYN 5341 - OBSTETRICS AND GYNECOLOGY
Minimum Credits: 0
Maximum Credits: 0
This is a four week clerkship at Magee-Womens Hospital. The clerkship is divided among obstetrics, gynecology, and outpatient services. The daily schedule includes teaching rounds, small group tutorials, and lectures, in addition to patient responsibilities. Students are expected to take call and remain in the hospital overnight approximately twice a week during their rotation on obstetrics. At the end of the clerkship, an oral and/or written examination will be given.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OGBYN 5345 - CLERKSHIP REPEAT COURSE
Minimum Credits: 0
Maximum Credits: 0
This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OGBYN 5387 - INDIVIDUAL STUDY OR RESEARCH
Minimum Credits: 0
Maximum Credits: 0
The department of obstetrics, gynecology and reproductive sciences will arrange an individual study or research experience for third year medical students in an area of their interest.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OGBYN 5420 - OBSTETRICAL SUBINTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
This elective is offered for a four-week period of time. The student will function similar to an intern on the obstetrical service. Examine patients on admission to the labor suite, assess these patients during labor, assist at their delivery and follow them during their postpartum hospitalization.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OGBYN 5430 - GYNECOLOGICAL SUBINTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
The student will function similar to an intern on the gynecologic service during this four-week elective. Time will be spent on the ward and/or private gynecology services. The subintern will work up patients following admissions, examine these patients and establish a differential diagnosis. Student will assist at the surgical procedures of these patients and their postoperative care.
Academic Career: MEDS
OBGYN 5432 - MINIMALLY INV GYN SURGERY  
Minimum Credits: 0  
Maximum Credits: 0  
This elective will teach minimally invasive gynecologic surgery as well as the principles of evaluation and management of women with pelvic pain. Students will learn to take pertinent history and perform the (pelvic pain specific) physical exams on women with endometriosis as well as women with other sources of chronic pelvic pain. There will be exposure to all disciplines of minimally invasive gynecologic surgery including laparoscopic deep excision of endometriosis, presacral neurectomy, reconstruction for pelvic organ prolapse, hysterectomy, myomectomy, and adnexal surgery. Students will participate in the pre-op evaluations with the faculty and will have the opportunity to scrub in on cases. The students will renew their understanding and appreciation of pelvic anatomy (retroperitoneal and pelvic support anatomy) from the laparoscopic perspective.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: Grad LG/SU5

OBGYN 5435 - OBSTETRIC/GYNECOLOGY ELECTIVE  
Minimum Credits: 0  
Maximum Credits: 0  
This clinical elective can be customized to meet individual needs. Students may elect to concentrate on maternal-fetal medicine, genetics, or gyn-one. The rotation will include both in-patient and ambulatory experience. Students must make advance arrangements and a specific descriptive course title may be assigned for recording on the official transcript.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

OBGYN 5440 - OBSTETRICAL AND AMBULTRY CARE  
Minimum Credits: 0  
Maximum Credits: 0  
This four-week elective offers hands-on experience in the delivery room and clinic at mercy hospital. The ob service consists mostly of 600 clinic deliveries per year with 24 hour, in-house coverage by attending staff. The clinic has a supervisory obstetrician/gynecologist full-time in attendance.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

OBGYN 5445 - OUTPATIENT GYNECOLOGY  
Minimum Credits: 0  
Maximum Credits: 0  
The student will function similarly to an intern. Time will be spent at office sites as well as hospital affiliates. The sub intern will obtain histories and physicals, establish a differential diagnosis and assist in developing a plan of care with an additional focus on the cultural and socioeconomic challenges of a diverse population. The student will assist in minor and major surgical procedures as well as post-operative care. S/he will assist in the management of obstetrical patients during the antepartum, intrapartum and postpartum periods. The student will also have the opportunity to interact with patients who experience termination procedures. The sub internship will be offered for a four-week period with one weekend call required.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: Grad LG/SU5

OBGYN 5450 - REPRODUCTIVE ENDOCRINOLOGY  
Minimum Credits: 0  
Maximum Credits: 0  
This four week elective offers a clinical experience in two areas: the evaluation of couples with infertility and the diagnostic evaluation and management of endocrine dysfunctions involving the hypothalmic-pituitary-ovarian axis. The majority of work will be evaluating and managing these problems in outpatient areas. Inpatient gynecological procedures including laparoscopy, hysteroscopy, microsurgical techniques for resection of endometriosis and tuboplastic procedures for restoration of fertility will be observed.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U
OBGYN 5460 - MATERNAL AND FETAL MEDICINE
Minimum Credits: 0
Maximum Credits: 0
In this four-week elective students will follow high-risk obstetrical patients as outpatients in the perinatal and medical clinics and as inpatients in the labor suite. Students will become familiar with the principles of biophysical and biochemical monitoring of the fetus during labor as well as the techniques of antepartum fetal evaluation. These include amniocentesis, sonography, and antepartum fetal heart rate monitoring. Management of pregnancies with underlying medical problems of the mother will be an integral part of the elective.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5470 - GYNECOLOGIC ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
Students will participate as a member of a team providing care to patients with gynecologic malignancies during this four-week elective at Magee-Womens Hospital. Student will learn the staging classifications, the appropriate workup and be involved in the treatment and follow up of patients. The individual will scrub in the operating room and be involved in the administration of chemotherapy and radiation therapy for gynecologic malignancies.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5480 - UROGYNECOLOGY SUBINTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Elective with intensive exposure to women with urinary incontinence and other pelvic floor defects. Student will see patients in an office setting learning to obtain an appropriate history, neurologic and pelvic examination. Student will also assist in the surgical procedures and post-operative care of these patients. Additional exposure is planned for cystometric evaluations, pharmacologic intervention, pelvic floor muscle rehabilitation, behavioral and biofeedback intervention protocols.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5487 - FAMILY PLANNING
Minimum Credits: 0
Maximum Credits: 0
The focus of this elective is to learn more about the gynecologic subspecialty of family planning. During the four weeks of the elective, the student will be present in several clinical settings to include: planned parenthood of Western Pennsylvania; family planning clinics in the Magee outpatient clinic - one specializing more in IUDS, implants, and sterilization pre-operative evaluations and the other specializing more in pre-operative preparation and evaluation for dilation and evacuation procedures); time will be spent with faculty in the private office seeing general GYN patients, family planning consults, and abortion patients; Magee or, both sterilization surgery and dilation and evacuation procedures. The student will decide on a topic from the current medical literature and present a full review to the family planning faculty, fellows and research staff.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5488 - REPRODUCTIVE GENETICS
Minimum Credits: 0
Maximum Credits: 0
Clinical reproductive genetics with the opportunity to tailor the experience to the student's interest. Core experience in genetic counseling will include advanced maternal age (AMA), abnormal family history, prenatal screenings, teratogen exposure, prenatally detected anomalies, adult genetics clinic and cancer counseling. The student will observe invasive diagnostic procedures (CVS and amniocentesis) as well as in the cytogenetics lab. The student will attend weekly fetal diagnosis & treatment center meetings and weekly clinical genetics meetings. The student will observe how genetics impacts personalized medicine. There may be opportunity to attend adult genetics clinic and participate in research.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U
OBGYN 5490 - WOMEN'S HEALTH
Minimum Credits: 0
Maximum Credits: 0
This elective is an interdisciplinary offering by the department of obstetrics, gynecology and reproductive sciences and the department of medicine. The goal is to introduce students to the breadth and complexity of gender-specific health care. A variety of ambulatory clinical sites will be utilized to provide experience in women's health care, including, but not limited to: health maintenance and preventive care; family planning; genetic counseling; menopause and hormone replacement; osteoporosis; coronary artery disease; depression; violence against women.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5495 - MIDLIFE HEALTH
Minimum Credits: 0
Maximum Credits: 0
Course objectives: extract a targeted history from patients presenting to the midlife health center; perform a physical exam focused on perimenopausal and menopausal issues; be familiar with the gynecologic and medical needs of midlife female patients; develop a differential diagnosis for common conditions in perimenopause and menopause, such as abnormal vaginal bleeding; be familiar with the indications and contraindications with commonly used therapies for menopausal issues; competently assist on various surgical procedures; write postoperative orders on patients; be familiar with the work-up and management of postoperative complications. Students planning to practice primary care medicine, gynecology, urology, or geriatrics will benefit from this intensive exposure to the health needs of midlife-aged women. He/she will see patients in an office setting, learning to obtain an appropriate history and physical exam focused on menopausal issues. He/she will also be exposed to procedures such as endometrial biopsies and vulvar biopsies. He/she will be exposed to standard pharmacologic interventions, as well as integrative approaches such as acupuncture. In addition, the student may assist in the surgical procedures and postoperative care of these patients.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5500 - OB & GYN MEDICINE ABROAD
Minimum Credits: 0
Maximum Credits: 0
The student will function similarly to an intern with faculty mentorship by designated OB/GYN faculty and staff. The student will spend this four-week elective at an international hospital and rural clinical affiliation. The sub intern will obtain histories and physicals, establish a differential diagnosis and assist in developing a plan of care with an additional focus on the cultural and socioeconomic challenges and resources of a developing country. The student will assist in minor and major surgical procedures as well as pre and post-operative care. He/she will assist in the management of obstetrical patients during antepartum, intrapartum and post partum periods. Course objectives: understand the multifaceted challenges in accessing and delivering care in developing countries; recognize the disparity gap in healthcare as it relates to the personnel, medical and surgical resources; evaluate patients with OB/GYN problems endemic to the international site; manage pregnant patients with both normal and high acuity medical and obstetrical issues; evaluate the course of normal labor and delivery and the post partum period; assist on OB/GYN procedures and recognize common pathology; assist in the planning and implementation of family planning programs and post abortive care.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5580 - SEXUALLY TRANSMITTED DISEASES
Minimum Credits: 0
Maximum Credits: 0
This rotation, located in the clinics of the Allegheny county health department, will provide an opportunity to gain practical experience under the direct guidance and supervision of the attending physician in the diagnosis and treatment of commonly seen sexually transmissible diseases including gonorrhea and syphilis. Opportunities will be available for obtaining skills in the commonly performed laboratory procedures such as gram staining and culturing and in performing darkfield examinations. Limited experience in contact investigation will be gained.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of obstetrics, gynecology and reproductive sciences to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule
the course and notify the department student coordinator.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OBGYN 5725 - INFECTIOUS DISEASE-OB/GYN (ILS)**
Minimum Credits: 0
Maximum Credits: 0
This four week selective emphasizes the many unique features of infections in obstetrics, gynecology, and reproductive medicine. Students will learn the pathogenesis of organisms relevant to the female reproductive tract, and about transmission of organisms to the fetus. Students will evaluate pregnant and non pregnant patients with reproductive tract infections and discuss clinical and management issues daily with faculty. Students will also be exposed to contemporary laboratory techniques of identifying pathogenic organisms.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OBGYN 5885 - OB AND GYN RESEARCH**
Minimum Credits: 0
Maximum Credits: 0
The research elective at Magee-Womens Hospital will involve the student in basic or clinical research projects under the supervision of a full-time faculty member. The student will participate in the design and conduct of the study as well as in the analysis of the data obtained during the study. The student will then be expected to participate writing a report of the study which should be of a quality suitable for publication in a refereed journal. This elective is offered in four-week time blocks.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

**OBGYN 5886 - INDIVIDUAL STUDY**
Minimum Credits: 0
Maximum Credits: 0
The department of obstetrics, gynecology and reproductive sciences will arrange an individual clinical experience to fit the student's needs.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OBGYN 5899 - INDEPENDENT STUDY OB/GYN**
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

**OBGYN 5900 - EXTRAMURAL OB AND/OR GYN**
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in obstetrics and/or gynecology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**Occupational Therapy**
OT 2100 - FDS OCCUPATIONAL SCIENCE & OT
Minimum Credits: 3
Maximum Credits: 3
History, philosophy, science of profession of occupational therapy are introduced. Focus is on changing frames of reference for practice; the roles and functions of occupational therapist, healthcare, wellness, educational settings in which occupational therapists practice and the meaning of occupation and occupation science.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Occupational Therapy (MOT)

OT 2101 - HUMAN MOVEMENT ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Course examines the biomechanical components of human performance. Functional interrelationships between the musculoskeletal and articular systems are examined for normal and abnormal movement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 2022; PLAN: Occupational Therapy (MOT)

OT 2102 - GROUP THEORY AND PRACTICE
Minimum Credits: 2
Maximum Credits: 2
Group process as a tool to assess and facilitate societal participation is studied. Emphasis is placed on enhancing communication and leadership skills, and clinical reasoning abilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2102; PLAN: Occupational Therapy (MOT)

OT 2103 - OCCUPATION ACROSS THE LIFESPAN
Minimum Credits: 3
Maximum Credits: 3
Human development from conception through senescence and death is studied, with the emphasis on adulthood and late life maturity. The focus is on age-associated changes in sensory, motor, cognitive, emotional, and psychosocial functions and their implications for self-care, play-leisure, school and work occupations in the context of occupational therapy services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2104 - CLINICAL PSYCHIATRY
Minimum Credits: 2
Maximum Credits: 2
Psychiatric diagnoses that are highly prevalent in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, psychiatric management, morbidity, and prognosis are reviewed. The influence of psychiatric pathology on daily living skills and routines, and societal participation is examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2105 - CLINICAL MEDICINE
Minimum Credits: 2
Maximum Credits: 2
General medical diagnoses that are leading causes of disability in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed. Influence of medical pathology on activities of daily living and routines, and societal participation is examined.
学术事业：GRAD
课程组件：讲座
成绩组件：毕业信等级
课程要求：PREQ：OT 2100和HRS 2022；PLAN：职业治疗（MOT）

OT 2106 - CLINICAL RESEARCH FOR OT
最少学分：3
最多学分：3
OT和康复研究被考查。重点在于解释基于数据的科学研究，并通过应用研究结果到实践、管理或教育中来推导结论。临床研究在证据基础上的实践被探索。科学方法、证据等级、测量水平以及研究结果的解释被研究。伦理考虑，包括研究与人类受试者的知情同意、保密性以及对照组讨论。
学术事业：GRAD
课程组件：讲座
成绩组件：毕业信等级
课程要求：PREQ：OT 2100；PLAN：职业治疗（MOT）

OT 2107 - PSYCHSOC/COGNITIVE THEORY & PRACT
最少学分：4
最多学分：4
OT过程对心理健康和社会/认知功能障碍的客户提供深入研究。理论、原则、评估、干预的注意力集中在活动和日常生活的表现以及社会参与上。临床推理技能考虑智力诊断和计划干预被强调。实验室提供经验学习，并通过实习得到强化。
学术事业：GRAD
课程组件：讲座
成绩组件：毕业信等级
课程要求：PREQ：OT 2102和OT 2104；PLAN：职业治疗（MOT）

OT 2108 - CLIN NEUROLOGY & ORTHOPEDICS
最少学分：3
最多学分：3
神经学和骨科诊断是导致儿童、青少年、成人以及老年人残障的主要原因被定义和描述。病因、症状和体征、临床过程、医疗管理、发病率和预后被审查。此课程提供神经学和骨科病理学对日常活动和参与社会的影响的理解。
学术事业：GRAD
课程组件：讲座
成绩组件：毕业信等级
课程要求：PREQ：HRS 2022和OT 2100；PLAN：职业治疗（MOT）

OT 2109 - NEUROBEHAVIORAL SCIENCE
最少学分：4
最多学分：4
神经科学概念，包括正常体表感觉、特殊感觉、运动、认知和情绪功能系统的掌握和主要神经元的运动性损伤的讨论。
学术事业：GRAD
课程组件：讲座
成绩组件：毕业信等级
课程要求：PREQ：OT 2105；PLAN：职业治疗（MOT）

OT 2110 - BIOMECHANICAL THEORY & PRACT 1
最少学分：2
最多学分：2
OT过程对涉及生物力学障碍的客户进行介绍。重点为临床评估及其在诊断推理中的作用。
学术事业：GRAD
课程组件：讲座
成绩组件：毕业信等级
课程要求：PREQ：OT 2101和OT 2105和OT 2113；PLAN：职业治疗（MOT）
OT 2111 - OT AND THE HEALTH CARE SYSTEM
Minimum Credits: 2
Maximum Credits: 2
This course addresses the practitioner, managerial and contributor roles of the occupational therapist. The content focuses on healthcare trends, reimbursement regulations, legislative policies, practice environments, strategies for maintaining continued competence, and emerging professional issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2112 - NEUROREHABILITATION THRY & PRA
Minimum Credits: 3
Maximum Credits: 3
OT interventions that influence performance of activities and routines of daily living and societal participation by altering structure and function of human nervous system are addressed. Theories, principles, and assessments that address restoration of neurobehavioral function are emphasized. Lectures are supplemented with experiential laboratory experiences.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2109; PLAN: Occupational Therapy (MOT)

OT 2113 - REHABILITATION THEORY & PRACT
Minimum Credits: 3
Maximum Credits: 3
Course examines the interface between functional impairment, activity, and societal participation. Emphasis is on person-task environment analysis and adaptation to compensate for dysfunction during self-care, home management, school/work, and play/leisure occupations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 2022 and OT 2100; PLAN: Occupational Therapy (MOT)

OT 2114 - BIOMECHANICAL THEORY & PRACT 2
Minimum Credits: 4
Maximum Credits: 4
OT process for clients with physical dysfunctions involving biomechanical impairments is studied in-depth. Theories, principles, assessments and interventions focus on performance of activities and routines of daily living and participation in society. Clinical reasoning skills for making diagnostic judgments and planning interventions are emphasized. Experiential learning is provided in a laboratory setting and reinforced in fieldwork.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2110; PLAN: Occupational Therapy (MOT)

OT 2115 - DEVELOPMENTAL THEORY & PRACT
Minimum Credits: 4
Maximum Credits: 4
OT process for children is studied in-depth. Theories, principles, assessments, and interventions focus on the performance of activities and routines of daily living and societal participation. Clinical reasoning skills for making diagnostic judgments and planning interventions are emphasized. Experiential learning is provided in a laboratory setting and reinforced in fieldwork.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2103 and OT 2109; PLAN: Occupational Therapy (MOT)

OT 2116 - INTEGRATIVE CAPSTONE SEMINAR
Minimum Credits: 2
Maximum Credits: 2
Course addresses the role of the OT as a contributor to the profession. Problem-focused and solution-oriented students pose, and subsequently solve
questions related to clinical issues. Solutions are evidenced in quantitative or qualitative learning products.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2106; PLAN: Occupational Therapy (MOT)

OT 2117 - MANAGEMENT OF OT PRACTICE
Minimum Credits: 3
Maximum Credits: 3
Addresses the role of the OT as a manager of OT services. Focus is on principles and practices of administration and supervision as they are applied in diverse practice environments (e.g., Hospitals, school systems, community agencies).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2111; PLAN: Occupational Therapy (MOT)

OT 2118 - SP TOPICS OT THEORY & PRACTICE
Minimum Credits: 2
Maximum Credits: 2
Course enables students to examine a theoretical perspective, practice area, evaluation procedure, intervention protocol, or professional issue in-depth.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: OT 2110; PLAN: Occupational Therapy (MOT)

OT 2119 - OT FIELDWORK EDUCATION A (FW2)
Minimum Credits: 1
Maximum Credits: 10
Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PREQ: OT 2114 and OT 2115 and OT 2118; PLAN: Master of Occupational Therapy

OT 2120 - OT FIELDWORK EDUCATION B (FW2)
Minimum Credits: 1
Maximum Credits: 10
Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PREQ: OT 2114 and OT 2115 and OT 2118; PLAN: Occupational Therapy (MOT)

OT 2121 - OT FIELDWORK EDUCATION C (FW2)
Minimum Credits: 1
Maximum Credits: 6
Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop specialized skills.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Occupational Therapy (MOT)

OT 2199 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
A topic of interest to the student is examined in-depth under the guidance of a faculty mentor. It is the student's responsibility to contract with a faculty member for this tutorial.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

OT 3000 - ADVCMNTS IN FUNCT ASSMNT
Minimum Credits: 4
Maximum Credits: 4
This course focuses on building a concept matrix using (a) the international classification of functioning, disability and health (ICF) assessment levels (condition, impairment, activity, participation) and (b) methods of assessment (self-report, proxy report, clinical judgment, clinic performance, and home performance) to support a comprehensive assessment plan for a specific patient population. Students will also be introduced to item response theory and its utility for functional assessment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

OT 3001 - ADVCMNTS FUNCT ASSMNT: COLLQ
Minimum Credits: 3
Maximum Credits: 3
Using the ICF-methods matrix approach, the colloquium focuses on development of an ICF-methods matrix for a specific patient population.

Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad Letter Grade

OT 3100 - EVID ANAL FOR IMPRVG CLN INTRV
Minimum Credits: 4
Maximum Credits: 4
This course uses systematic methods (e.g. Prisma, Pedro, Consort, Strobe, Trend, CASP) and critical thinking to evaluate the rigor of evidence to enable practitioners to evaluate research articles for the purpose of developing clinical protocols and best practice guidelines.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

OT 3101 - EVID ANAL CLN INTR: COLLOQUIUM
Minimum Credits: 3
Maximum Credits: 3
For a specific population, students will gather and analyze intervention literature that will support development of evidence-based clinical protocols and practice guidelines required by third party payers.

Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad Letter Grade

OT 3400 - MASTER PRACTNR SEMINAR 1
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on classic, current, and emerging theories relevant to the chosen area of clinical expertise.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

OT 3401 - CLIN EDUC TR COGNATE SEMINAR 1
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
OT 3402 - PROF LDRS COGNATE SEMINAR 1
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on classic, current, and emerging theories of leadership, organizational behavior, and management.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

OT 3500 - MASTER PRACTNR COGNATE SEM 2
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on analysis and synthesis of research evidence relevant to the student's chosen area of clinical expertise and capstone project. Students will complete a comprehensive oral examination at the completion of this course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

OT 3501 - CLIN EDUCR COGNATE SEMINAR 2
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

OT 3502 - PROFESSIONAL LEADER SEMINAR 2
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on analysis and synthesis of research evidence relevant to the student's chosen focus of clinical or professional leadership, organizational behavior or management and capstone project. Students will complete a comprehensive oral examination at the completion of this course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

OT 3702 - PROF LDRS COGNTE PRAC & CPSTNE
Minimum Credits: 5
Maximum Credits: 5
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

Opthalmology

OPHTH 5385 - INDIVIDUAL STUDY OR RESEARCH
Minimum Credits: 0
Maximum Credits: 0
The department of opthalmology will arrange an individual study or research experience for third year medical students in an area of their interest. These electives are at the junior level and will be four weeks in duration.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

OPHTH 5420 - OPHTHALMOLOGY
Minimum Credits: 0
Maximum Credits: 0
This elective will provide exposure to both general and sub-specialty disciplines in ophthalmology. The student will spend time with the full-time staff on specialty services, in the emergency room, operating room, eye clinic, Children's Hospital Clinic, VA Hospital or and eye clinic. Time is also scheduled at the ophthalmology learning center to study programmed sequences dealing with general clinical problems in ophthalmology. Attendance at weekly surgical rounds is encouraged. Ophthalmic library is available to students.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OPHTH 5430 - PEDIATRIC OPHTHALMOLOGY**
Minimum Credits: 0
Maximum Credits: 0
This elective will provide in-depth exposure to the field of pediatric ophthalmology. It is intended for students exploring the possibility of a career in ophthalmology, as well as for those who wish to gain more ophthalmologic experience prior to a career in another, likely pediatric, field.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OPHTH 5650 - INDIVIDUALIZED CLINICAL COURSE**
Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of ophthalmology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OPHTH 5815 - OPHTHALMOLOGY RESEARCH**
Minimum Credits: 0
Maximum Credits: 0
Research opportunities are available with appropriate staff members. Call to discuss the various research programs. The individual can then make the necessary arrangements for a research elective with the staff member of his choice.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

**OPHTH 5899 - INDEP STUDY IN OPHTHALMOLOGY**
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

**OPHTH 5900 - EXTRAMURAL OPHTHALMOLOGY**
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in ophthalmology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U
OMFP 2111 - SURGICAL ORAL PATHOLOGY 1
Minimum Credits: 1
Maximum Credits: 3
This course will provide training and experience in the full range of oral surgical pathology procedures. The course will train the resident through hands-on experience in describing gross specimens as they arrive from the contributor, proper preparation for embedding, microscopic description, generation of a diagnosis, and decision-making in the need to order special stains and immunohistochemical procedures. This course includes instruction in laboratory administration, contributor relations, and histopathologic methods.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

OMFP 2114 - SURGICAL ORAL PATHOLOGY 4
Minimum Credits: 1
Maximum Credits: 4
This course will provide training and experience in the full range of oral surgical pathology procedures. The course will train the resident through hands-on experience in describing gross specimens as they arrive from the contributor, proper preparation for embedding, microscopic description, generation of a diagnosis, and decision-making in the need to order special stains and immunohistochemical procedures. This course includes instruction in laboratory administration, contributor relations, and histopathologic methods.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

OMFP 2117 - SURGICAL ORAL PATHOLOGY 7
Minimum Credits: 1
Maximum Credits: 3
This course will provide training and experience in the full range of oral surgical pathology procedures. The course will train the resident through hands-on experience in describing gross specimens as they arrive from the contributor, proper preparation for embedding, microscopic description, generation of a diagnosis, and decision-making in the need to order special stains and immunohistochemical procedures. This course includes instruction in laboratory administration, contributor relations, and histopathologic methods.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

OMFP 2121 - ORAL AND MAXILFACIAL HISTOPATH 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2124 - ORAL AND MAXILFACIAL HISTOPATH 4
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2127 - ORAL AND MAXILFACIAL HISTOPATH 7
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
OMFP 2131 - OMFP JOURNAL CLUB 1
Minimum Credits: 0
Maximum Credits: 0
This course is a conference where departmental faculty and residents meet to discuss current scientific articles of interest to the field. This will serve as a forum to address controversial and evidence-based topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2134 - OMFP JOURNAL CLUB 4
Minimum Credits: 0
Maximum Credits: 0
This course is a conference where departmental faculty and residents meet to discuss current scientific articles of interest to the field. This will serve as a forum to address controversial and evidence-based topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2137 - OMFP JOURNAL CLUB 7
Minimum Credits: 0
Maximum Credits: 0
This course is a conference where departmental faculty and residents meet to discuss current scientific articles of interest to the field. This will serve as a forum to address controversial and evidence-based topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2141 - TMJ AND PAIN CONFERENCE 1
Minimum Credits: 0
Maximum Credits: 0
This course will involve analysis of case histories of patients who have pain in the head and neck region. Students will be provided cases beforehand and will investigate patient medical and dental history, current medications, differential diagnosis, possible treatments, and treatment outcomes. Topics may also include trigeminal neuralgia, multiple sclerosis, migraine headaches, cranial arteritis, and temporomandibular joint surgery.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2144 - TMJ AND PAIN CONFERENCE 4
Minimum Credits: 0
Maximum Credits: 0
This course will involve analysis of case histories of patients who have pain in the head and neck region. Students will be provided cases beforehand and will investigate patient medical and dental history, current medications, differential diagnosis, possible treatments, and treatment outcomes. Topics may also include trigeminal neuralgia, multiple sclerosis, migraine headaches, cranial arteritis, and temporomandibular joint surgery.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

OMFP 2147 - TMJ AND PAIN CONFERENCE 7
Minimum Credits: 0
Maximum Credits: 0
This course will involve analysis of case histories of patients who have pain in the head and neck region. Students will be provided cases beforehand and will investigate patient medical and dental history, current medications, differential diagnosis, possible treatments, and treatment outcomes. Topics may also include trigeminal neuralgia, multiple sclerosis, migraine headaches, cranial arteritis, and temporomandibular joint surgery.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
OMFP 2151 - OMFP RESEARCH 1
Minimum Credits: 1
Maximum Credits: 3
The resident, with the assistance of the program director, will select a research mentor and research project that exposes him/her to methods of research, critical review of the scientific literature, analysis of data, and presentation of the results before his/her peers. A comprehensive understanding of institutional review board and human subjects committee policies will be required. The research may include, but is not limited to, basic research, clinical trials, epidemiologic studies, and public health issues.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

OMFP 2154 - OMFP RESEARCH 4
Minimum Credits: 1
Maximum Credits: 3
The resident, with the assistance of the program director, will select a research mentor and research project that exposes him/her to methods of research, critical review of the scientific literature, analysis of data, and presentation of the results before his/her peers. A comprehensive understanding of institutional review board and human subjects committee policies will be required. The research may include, but is not limited to, basic research, clinical trials, epidemiologic studies, and public health issues.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

OMFP 2161 - ORAL MEDICINE CLINIC 1
Minimum Credits: 1
Maximum Credits: 2
This course has three main components. The first will be observing and assisting faculty members with their clinical oral pathology/oral medicine patients. The second component of the course is the resident's taking responsibility for his/her own clinical patients, under the direct supervision of a faculty member. The third will be the training and evaluation of first professional students in the urgent care clinic rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

OMFP 2164 - ORAL MEDICINE CLINIC 4
Minimum Credits: 1
Maximum Credits: 2
This course has three main components. The first will be observing and assisting faculty members with their clinical oral pathology/oral medicine patients. The second component of the course is the resident's taking responsibility for his/her own clinical patients, under the direct supervision of a faculty member. The third will be the training and evaluation of first professional students in the urgent care clinic rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

OMFP 2190 - CLINICAL MEDICINE LAB ROTATION
Minimum Credits: 2
Maximum Credits: 2
This is a required four-week hospital rotation. This training will involve observation of laboratory techniques, the clinical correlations of laboratory results, and exposure to the decision-making process in the clinical laboratories. The resident will be expected to spend two weeks each in two different clinical laboratories (e.g., Clinical hematology, clinical microbiology, clinical immunopathology, clinical chemistry, molecular diagnostics, and transfusion medicine). Direct supervision will be by the directors of the specific laboratories.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

OMFP 2191 - DERMATOPATHOLOGY ROTATION
Minimum Credits: 2
Maximum Credits: 2
The oral and maxillofacial pathologist is often called upon in his/her practice to diagnose pathologic conditions of the skin of the face and neck. In addition, many conditions are expressed both on the skin and in the oral cavity. This four-week rotation will provide the resident with an experience in the decision-making process in gross dermatopathology, experience with diagnosis of shave biopsy procedures, differential diagnosis, and
The opportunity to observe clinical dermatology is encouraged.

**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

**OMFP 2192 - HEAD & NECK PATHOLOGY ROTATION**  
**Minimum Credits:** 7  
**Maximum Credits:** 7  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

**Oral and Maxillofacial Surgery**

**ORSUR 5110 - HOSPITAL EXTERNSHIP**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course will consist of a rotating externship in oral and maxillofacial surgery at the university of Pittsburgh, health center hospitals. Students will participate in emergency room coverage, ward rounds, ambulatory clinical care, and operating room coverage.  
**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**ORSUR 5241 - ORAL SURGERY 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This introductory course in oral and maxillofacial surgery is an integral part of dental education and clinical practice. It involves reinforcing and correlating the dental student's knowledge of the basic sciences with physical evaluation and risk assessment for patients requiring oral surgery. Basic dentoalveolar surgery techniques, suturing, flap design and extraction of impacted teeth are discussed as well as complications of dentoalveolar surgery.  
**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ORSUR 5280 - PHYSICAL DIAGNS & EVALUATION**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course in physical evaluation provides an introduction to the techniques involved in performing a routine history and physical examination. The lecture format is augmented by clinical laboratory sessions and is intended to inform the second year student of the use of physical evaluation as a tool in the armamentarium of the health care provider.  
**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ORSUR 5282 - ORAL SURGERY 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is a continuation of basic dentoalveolar surgery techniques and includes discussion of the prevention and management of odontogenic infection.  
**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ORSUR 5313 - ORAL SURGERY 3**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course involves reinforcing basic oral surgery techniques and discussions of the surgical management of the medically compromised patient,
hospital dentistry and the diagnosis and treatment of facial trauma. The evaluation and surgical management of patients with dentofacial deformity, craniofacial deformity and cleft lip and palate are also discussed. The course concludes with presentations on the surgical management of oral cysts, benign oral tumors, and the management of salivary gland disorders.

**Academic Career:** DMED  
**Course Component:** Lecture

This course is designed to permit the student to be able to evaluate, manage, and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### ORSUR 5369 - OMFS ROTATION
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring reparative surgical procedures on the hard and soft tissues.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

### ORSUR 5379 - CLINICAL ORAL SURGERY
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed to permit the student to be able to evaluate, manage, and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### ORSUR 5388 - CLINICAL ORAL SURGERY 1
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course is designed to provide clinical experiences in the area of oral surgery for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with oral surgery needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with oral surgery needs.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Letter GRD

### ORSUR 5389 - OMFS ROTATION 3
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring reparative surgical procedures on the hard and soft tissue.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

### ORSUR 5441 - PHYSICAL DIAGNS & EVALUATION
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course in physical evaluation provides an introduction to the techniques involved in performing a routine history and physical examination. The lecture format is augmented by clinical laboratory sessions and is intended to inform the student of the use of physical evaluation as a tool in the armamentarium of the health care provider.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### ORSUR 5449 - CLINICAL ORAL SURGERY
- **Minimum Credits:** 1  
- **Maximum Credits:** 1
This course is designed to permit the student to be able to evaluate, manage and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

**ORSUR 5489 - CLINICAL ORAL SURGERY**
Minimum Credits: 3
Maximum Credits: 3
This course is designed to permit the student to be able to evaluate, manage and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

**ORSUR 5900 - INDEPENDENT STUDY**
Minimum Credits: 1
Maximum Credits: 4
This independent study course is designed for the pre-doctoral dental student who desires to pursue additional knowledge in specific areas of oral and maxillofacial surgery. The content of the course is specified by the student and approved and monitored by a full-time faculty member. The teaching format is designed to encourage independent student experiences with the faculty acting in an advisory capacity with limited personal interaction.

Academic Career: DMED
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

**ORSUR 5910 - HOSPITAL EXTERNSHIP**
Minimum Credits: 3
Maximum Credits: 3
This course will consist of a rotating externship in oral and maxillofacial surgery at the university of Pittsburgh, health center hospitals. Students will participate in emergency room coverage, ward rounds, ambulatory clinical care, and operating room coverage.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

**ORSUR 5911 - HOSPITAL EXTERNSHIP**
Minimum Credits: 1
Maximum Credits: 1
The participant will participate at MUH department of dental medicine for a two week rotation. During this time they will function with the oral surgery residents in the clinic seeing patients presenting with both inpatient and outpatient emergencies. Participants will also rotate in the operating room for an observational experience with oral and maxillofacial surgery staff and residents.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

**ORSUR 5912 - ADVANCED ORAL SURGERY**
Minimum Credits: 3
Maximum Credits: 3
This advanced clinical oral surgery elective is a clinical rotation in oral surgery that is restricted to students who are interested in pursuing advanced training in oral and maxillofacial surgery. Students will have the opportunity to participate in and be exposed to oral surgery patients requiring more difficult surgical procedures along with man aging medically compromised patients.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

**ORSUR 5913 - BASIC ORAL SURGERY**
Minimum Credits: 3  
Maximum Credits: 3  
This basic oral surgery elective is a clinical rotation in oral surgery where the student has the opportunity to participate in or be exposed to oral surgery patients requiring routine and surgical extractions, minor preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, assisting other students and managing medically compromised patients.  
Academic Career: DMED  
Course Component: Clinical  
Grade Component: Grad Letter Grade

ORSUR 5914 - HOT TOPICS IN DENTISTRY  
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: DMED  
Course Component: Independent Study  
Grade Component: Grad HSU Basis

ORSUR 5941 - HOSPITAL EXTERNSHIP  
Minimum Credits: 3  
Maximum Credits: 3  
This course will consist of a rotating externship in oral and maxillofacial surgery at the university of Pittsburgh medical center hospitals. Students will participate in emergency room coverage, ward rounds, ambulatory clinical care and operating room coverage.  
Academic Career: DMED  
Course Component: Clinical  
Grade Component: Grad LG/SU3 Basis

ORSUR 5942 - ADVANCED ORAL SURGERY  
Minimum Credits: 3  
Maximum Credits: 3  
This advanced clinical oral surgery elective is a clinical rotation in oral surgery that is restricted to students who are interested in pursuing advanced training in oral and maxillofacial surgery. Students will have the opportunity to participate in and be exposed to oral surgery patients requiring more difficult surgical extractions, preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, and managing medically compromised patients.  
Academic Career: DMED  
Course Component: Clinical  
Grade Component: Grad LG/SU3 Basis

ORSUR 5943 - BASIC ORAL SURGERY  
Minimum Credits: 3  
Maximum Credits: 3  
This basic oral surgery elective is a clinical rotation in oral surgery where the student has the opportunity to participate in or be exposed to oral surgery patients requiring routine and surgical extractions, minor preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, and managing medically compromised patients.  
Academic Career: DMED  
Course Component: Clinical  
Grade Component: Grad LG/SU3 Basis

ORSUR 5944 - HOT TOPICS IN DENTISTRY  
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: DMED  
Course Component: Independent Study  
Grade Component: Grad HSU Basis

ORSUR 5971 - HOSPITAL EXTERNSHIP  
Minimum Credits: 3  
Maximum Credits: 3  
This course will consist of a rotating externship in oral and maxillofacial surgery at the university of Pittsburgh medical center hospitals. Students will participate in emergency room coverage, ward rounds, ambulatory clinical care, and operating room coverage.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

ORBIOL 2035 - AGE RELTD CHANGES ORAL CAVITY
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 2100 - RESEARCH PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
This course provides an opportunity to gain a working familiarity with the research goal(s) of a designated laboratory and with the experiments designed and methodologies employed to meet this end.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

ORBIOL 2110 - TEACHING PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
This practicum encourages the acquisition and refinement of skills necessary to the delivery of effective instructive presentations in a classroom or laboratory setting. Performance is critiqued by the faculty.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

ORBIOL 2160 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ORBIOL 2191 - PATHOBIOLOGY 1
Minimum Credits: 2
Maximum Credits: 2
This Didactic Conference is designed to introduce graduate students to the basic and advanced concepts on the biological basis of oral diseases and oral manifestations of systemic diseases. Emphasis is given on the molecular basis of diseases. In addition, the control of cell/tissue functions by drugs and host defense during bacterial and viral infections, autoimmune diseases, transplantation, cancer, and immunodeficiency will be discussed. This course will provide an overview of the biological basis of emerging technologies such as genetic engineering, bone remodeling and wound repair, tissue engineering, stem cell technology, as well as genetic basis of human diseases, temporomandibular joint diseases and craniofacial anomalies.

ORBIOL 3509 - COMPOSITION OF MINERALIZED TIS
Minimum Credits: 3
Maximum Credits: 3
Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease. All registrants for the course are expected to attend all lectures and prepare a presentation and discussion on the assigned research paper. Presentation of the research paper and class participation will be the basis for evaluation.

Minimum Credits: 5
Maximum Credits: 5

The objectives of this course are to familiarize the student with normal biochemical processes and their roles in the maintenance of homeostasis. The first part of the course deals with the chemical structures and composition of the building blocks of important body constituents. The second part will focus on the mechanisms of reactions and regulations of metabolic pathways. The consequences of deviation from normal metabolic processes will also be discussed. Emphasis is placed on processes occurring in the oral cavity.
Academic Career: DMED
ORBIOL 5112 - DIRECTED STUDY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad Letter Grade

The goal of this course is to acquaint students with the molecular structures of important body constituents and the metabolism of biomolecules in health and disease.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

ORBIOL 5113 - MOLECULAR AND CELL BIOLOGY PART 1
Minimum Credits: 4
Maximum Credits: 4
The goal of this course is to acquaint students with the molecular structures of important body constituents and the metabolism of biomolecules in health and disease.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5114 - MOLECULAR AND CELL BIOLOGY PART 2
Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to acquaint students with the molecular structures of important body constituents and the metabolism of biomolecules in health and disease.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5115 - MICROBIAL PHYSIOLOGY & IMMUNOLOGY
Minimum Credits: 3
Maximum Credits: 3
A course in microbial physiology, oral flora and immunology for first year dental students. Major areas included are the properties of prokaryotic and eukaryotic cells, microbial metabolism, microbial genetics, microbial growth, the control of microbial growth, microbial classification, the properties of viruses and basic immunology. Emphasis is placed on the role of microorganisms in the development of dental caries and periodontal disease.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5120 - BODY TISSUES
Minimum Credits: 2
Maximum Credits: 2
This course initially focuses on the morphological aspects and methodology of cell biology. Morphology and function of the typical cell are considered in detail. Embryological development of the human is followed from fertilization to the development of general body form. A brief presentation of the principles of genetics, and induction and differentiation is made. The histogenesis and structure of the four basic tissues is given emphasizing the relationship of structure and function, and potential dental clinical correlations.

Academic Career: DMED

ORBIOL 5125 - GEN EMBRYOLOGY & CRANIOFACIAL ORGANIZATION
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5130 - ORAL TISSUES AND EMBRYOLOGY
The overall goal of this course is to transmit sufficient information for an in-depth understanding of the developmental and structural features of the oral cavity and face so that the student can understand the scientific basis for oral diagnosis and treatment planning. In this course, the basic principles of development, structure, and function are considered as they relate to craniofacial complex. Students will relate concepts from other disciplines i.e., Anatomy, physiology, biochemistry, to oral histology and common clinical procedures.

**Academic Career:** DMED
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

---

**ORBIOL 5140 - SYSTEMIC GROSS ANATOMY**

Minimum Credits: 4  
Maximum Credits: 4  
The primary educational goals of this course are to instruct predoctoral dental students in gross anatomy so that they will have a clear and lasting understanding of the anatomical concepts and relationships that are prerequisites for future courses in their education and for the years of practice that will follow. The course will provide a student with an in-depth knowledge and appreciation of the gross anatomy of the human body, particularly those portions directly involved in the practice of dentistry.

**Academic Career:** DMED
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

---

**ORBIOL 5141 - SYSTEMIC HUMAN PHYSIOLOGY 1**

Minimum Credits: 3  
Maximum Credits: 3  
The goal of the course is to provide an opportunity for the dental students to know the principles of cellular and systemic human physiology, appreciate the significance of normal physiology to understand pharmacology and pathology and ultimately establish a foundation for the practice of dental medicine.

**ORBIOL 5144 - SYSTEMIC HUMAN PHYSIOLOGY 2**

Minimum Credits: 3  
Maximum Credits: 3  
In this coursework, we will discuss the fundamental principles and concepts that govern each organ and organ system functions in the human body and their integration to maintain homeostasis, as well as some clinical aspects of failure of these systems. The organ systems covered in this course include: sensory, gastrointestinal tract and endocrine systems that include pituitary, thyroid, parathyroid, insulin/glucagon/pancreas, male and female reproduction, and metabolism and temperature regulation. The goal of the course is therefore to provide an opportunity for the dental students to know the principles of cellular and systemic human physiology, appreciate the significance of normal physiology, to understand pharmacology and pathology, and ultimately establish a foundation for the practice.

**Academic Career:** DMED
**Course Component:** Lecture
**Grade Component:** Letter GRD
ORBIOL 5170 - NEUROANATOMY
Minimum Credits: 2
Maximum Credits: 2
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ORBIOL 5171 - IMMUNOLOGY & INFECTIOUS DISEASES
Minimum Credits: 4
Maximum Credits: 4
Academic Career: DMED
Course Component: Lecture
Grade Component: Letter Grade

ORBIOL 5172 - NUTRITION
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5173 - IMMUNOLOGY & INFECTIOUS DISEASES 2
Minimum Credits: 2
Maximum Credits: 2
Academic Career: DMED
Course Component: Lecture
Grade Component: Letter Grade

ORBIOL 5174 - CRANIOFACIAL GENETICS
Minimum Credits: 4
Maximum Credits: 4
This course will present students with several scenarios where genetics has a measurable contribution to the etiology of dental disease, and they will gain a general appreciation of the importance of human/molecular genetics in the context of society today.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5175 - INFECTIOUS DISEASES/IMMUNOLOGY LAB
Minimum Credits: 0
Maximum Credits: 0
Academic Career: DMED
Course Component: Practicum
Grade Component: No Grade Required

ORBIOL 5180 - CARIOLOGY AND MGT OF CARIES
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Letter Grade

ORBIOL 5214 - PHARMACOLOGY AND THERAPEUTICS
Minimum Credits: 4
Maximum Credits: 4
The goal of this course is to provide a comprehensive background in the fundamentals of physiologic pharmacology. The course is oriented to second year dental students to establish the basis for safe and effective dental therapeutics. Students will acquire a broad understanding of systemic diseases
and medications that are needed to provide quality dental care.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5244 - CRANIOFACIAL GENETICS
Minimum Credits: 2
Maximum Credits: 2
Academic Career: DMED
Course Component: Lecture

Course Component: Lecture
Grade Component: Grad HSU Basis

ORBIOL 5817 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ORBIOL 5847 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and this directed study is designed for the approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ORBIOL 5877 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
ORBIOL 5878 - FACULTY POSTNS DENTAL SCHOOLS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

ORBIOL 5900 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
This course is designed to provide the student with an opportunity to conduct in-depth study in a particular subject area of their choice.
Academic Career: DMED
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

ORBIOL 5912 - ADVANCED ORAL HISTORY
Minimum Credits: 2
Maximum Credits: 2
This course will consist of two parts. The first part will be lecture format covering the structure and development of the oral cavity. The second part will be a journal club format with presentations and discussions of recent reviews or journal articles relating to the course topic.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

ORBIOL 5913 - CURRENT TOPICS IN TMJ
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

ORBIOL 5914 - CLINICAL GERIATRICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

ORBIOL 5931 - AGING AND ORAL HEALTH
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Seminar
Grade Component: Grad Letter Grade

ORBIOL 5940 - SURVIVAL SKILS CAREER DENT RES
Minimum Credits: 2
Maximum Credits: 2
The focus of this course will be applied and, as such, students will be required to read and discuss scientific literature and other materials. Particular emphasis will be placed on the process of defining ideas and hypotheses. As a result, students will understand how research is planned, supported and published.
Academic Career: DMED
Course Component: Seminar
Grade Component: Grad Letter Grade
ORBIOL 5941 - IMMUNOLOGY ORAL FACIAL COMPLEX
Minimum Credits: 1
Maximum Credits: 1
This course uses literature reviews, student presentation, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections, microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies. Autoimmune diseases and immunodeficiency disorders will also be discussed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ORBIOL 5942 - AGE RELTD CHNGS ORAL CAVITY
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture

ORBIOL 5943 - SOFT TIS HD NECK ANAT TCH PRAC
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad SN Basis

ORBIOL 5944 - COMPOSITION OF MINERALIZED TIS
Minimum Credits: 2
Maximum Credits: 2
Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease. All registrants for the course are expected to attend all lectures and prepare a presentation and discussion on the assigned research paper. Presentation of the research paper and class participation will be the basis for evaluation.

Oral Medicine and Pathology

OMP 2030 - ORAL HISTOPATHOLOGY
Minimum Credits: 1
Maximum Credits: 1
This is a course in histopathology. It represents an individualized program which provides concentrated instruction in the microscopic aspects of those oral diseases related to the specific clinical specialty in which the resident is enrolled.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

OMP 2111 - DENT MGT MEDL COMPROMSD PATNT
Minimum Credits: 0
Maximum Credits: 0
This course is offered to graduate and specialty dental students. A seminar format is used for this course that presents patients having significant medical pathologies and taking systemic medications. Interactions with dental therapy will be discussed and proper patient management presented. Material presented during each case will be coordinated with the required text and current scientific review articles.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

OMP 2141 - DENT MGT MEDL COMPROMSD PATNT
Minimum Credits: 0
Maximum Credits: 0
This course is offered to graduate and specialty dental students. A seminar format is used for this course that presents patients having significant medical pathologies and taking systemic medications. Interactions with dental therapy will be discussed and proper patient management presented. Material presented during each case will be coordinated with the required text and current scientific review articles.

Grade Component: Grad Letter Grade

OMP 2242 - OMF SURGICAL PATHOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
This is the second segment of an advanced oral pathology series which allows postdoctoral students to augment their understanding of clinical and histopathologic diagnosis. Clinical differential diagnosis and the microscopic features of disease processes will be stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

OMP 2273 - OMF SURGICAL PATHOLOGY 3
Minimum Credits: 1
Maximum Credits: 1
This is the third segment of an advanced oral pathology series which allows postdoctoral students to augment their understanding of clinical and histopathologic diagnosis. Clinical differential diagnosis and the microscopic features of disease processes will be stressed.
Academic Career: GRAD
OMP 2900 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
This independent study course is designed for the graduate student who desires to pursue additional knowledge in specific areas of the diagnostic sciences. These areas include any of the following: general, systemic or oral pathology, or oral medicine. The content of the course is specified by the student and approved and monitored by a full-time faculty member. The teaching format is designed to encourage independent student experiences with the faculty acting in an advisory capacity with limited personal interaction.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade

OMP 5211 - GENERAL & SYSTEMIC PATHOLOGY 2
Minimum Credits: 2
Maximum Credits: 2
This course is organized to present the pathologic processes which underlie the basis for a variety of human disease states. The fundamentals of cell injury and cell death, inflammation and repair and the abnormalities associated with intra and extravascular fluid derangements are covered. Many of these principles are recapitulated in lectures on dental pulp and periapical lesions. Additionally, material relating to autoimmune and environmental diseases and a number of infectious diseases is presented. The oral manifestations of these processes is stressed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

OMP 5241 - SYSTEMIC PATHOLOGY 1
Minimum Credits: 4
Maximum Credits: 4
This course follows general pathology by completing the series of infectious diseases and continuing with a review of the principles of genetic, metabolic, deficiency and neoplastic diseases. Systemic pathology is the study of organ system pathoses. Relevant diseases of the hematopoietic, cardiovascular, pulmonary, renal, gastrointestinal and central nervous systems are presented. Emphasis is placed on the oral manifestations of systemic diseases with a particular focus on the dental management of patients with these diseases.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

OMP 5243 - INTRO TO PATIENT EVALUATION
Minimum Credits: 2
Maximum Credits: 2
This course will prepare the student to apply diagnostic concepts to treatment planning. It will instruct the student in methodology, leading from the patients' histories and examination findings, to development of an appropriately sequenced, comprehensive treatment plan, encompassing ideal as well as reasonable options. The course will utilize group seminars with faculty in general practice and the specialties. Students will present cases using study models radiographs and photographs to develop treatment options with modifications dictated by unique patient circumstances.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

OMP 5277 - DIAGNOSIS & TREATMENT PLANNING
Minimum Credits: 1
Maximum Credits: 1
This course will prepare the student to apply diagnostic concepts to treatment planning. It will instruct the student in methodology, leading from the patients' histories and examination findings, to development of an appropriately sequenced, comprehensive treatment plan, encompassing ideal as well as reasonable options. The course will utilize group seminars with faculty in general practice and the specialties. Students will present cases using study models radiographs and photographs to develop treatment options with modifications dictated by unique patient circumstances.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis
OMP 5282 - SYSTEMIC PATHOLOGY 2
Minimum Credits: 2
Maximum Credits: 2
Systemic pathology 2 is the continuation and completion of systemic pathology 1. Topics include a discussion on diabetes mellitus and diseases associated with the integument. In addition, the endocrinopathies are presented as well as an overview of obstetric/gynecologic pathology and diseases of the male reproductive system. The dental management of patients with these diseases is emphasized.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

OMP 5314 - ORAL PATHOLOGY
Minimum Credits: 2
Maximum Credits: 2
The objective of the course in oral pathology is to familiarize the student with the pathologic, etiologic, and diagnostic concepts of diseases commonly manifest in and around the oral cavity. It is designed to teach the application of basic general and systemic pathologic principles to the specific oral pathoses. The course emphasizes oral and craniofacial developmental anomalies, oral cysts, tumors of odontogenic and non-odontogenic structures, tumor-like lesions, salivary gland and neuromuscular diseases.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

OMP 5329 - EMERGENCY CLINIC ROTATION 1
Minimum Credits: 1
Maximum Credits: 1
This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring immediate intervention.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

OMP 5340 - ORAL & MAXILLOFACIAL PATHOLOGY
Minimum Credits: 4
Maximum Credits: 4
This course in oral and maxillofacial pathology is designed to familiarize the student with the clinical and radiographic presentation of conditions affecting the oral and para oral regions. The more common conditions and important, but uncommon conditions will be presented and discussed. The clinical significance and biologic behavior of these oral lesions will be addressed. Histologic features will be shown in cases where they enhance understanding of the disease process.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

OMP 5359 - ORAL DIAGNS & TREATMENT PLNNG
Minimum Credits: 3
Maximum Credits: 3
This course will prepare the student to apply diagnostic concepts to treatment planning. It will instruct the student in methodology, leading from the patients' histories and examination findings, to development of an appropriately sequenced, comprehensive treatment plan, encompassing ideal as well as reasonable options. The course will utilize group seminars with faculty in general practice and the specialties. Students will present cases using study models, radiographs and photographs to develop treatment options with modifications dictated by unique patient circumstances.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

OMP 5377 - DIAGNOSIS & TREATMENT PLANNING
Minimum Credits: 1
Maximum Credits: 1
This course will prepare the student to apply diagnostic concepts to treatment planning. It will instruct the student in methodology, leading from the patients' histories and examination findings, to development of an appropriately sequenced, comprehensive treatment plan, encompassing ideal as well as reasonable options. The course will utilize group seminars with faculty in general practice and the specialties. Students will present cases using study models radiographs and photographs to develop treatment options with modifications dictated by unique patient circumstances.
Academic Career: DMED
OMP 5379 - EMERGENCY CARE CLINIC
Minimum Credits: 3
Maximum Credits: 3
This course will prepare the student to diagnose and manage dental emergencies. These skills will be acquired by multiple clinical experiences during emergency clinic rotations. Proficiency in differential diagnosis and treatment of emergent dental conditions will be developed in conjunction with assessment of the patients' coexisting medical and dental conditions. Students will apply and interpret appropriate diagnostic tests and radiologic examinations. Palliative emergent treatment will be provided either in the emergency clinic or appropriate specialty clinic.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

OMP 5412 - ORAL MEDICINE
Minimum Credits: 1
Maximum Credits: 1
This course will demonstrate clinical diagnosis of oral lesions. The material will be presented according to similarities and differences of lesion appearance. Emphasis will be placed on how a differential diagnosis is determined based on lesion history, appearance and diagnostic tests. Treatment modalities for the lesions will be presented in context with their etiology and pathogenesis.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

OMP 5419 - EMERGENCY CARE CLINIC
Minimum Credits: 3
Maximum Credits: 3
This course consists of multiple one-week, full-time rotations in the emergency care clinic. Students will evaluate oral and/or dental conditions in patients who present to the clinic with an emergency or other urgent dental problem. The course will emphasize the application of clinical and/or roentgenographic methodologies for determining differential diagnoses. Students will then either provide expeditious palliative or definitive treatment or refer the patient to the appropriate specialty clinic for treatment.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

OMP 5429 - EMERGENCY CLINIC ROTATION 4
Minimum Credits: 1
Maximum Credits: 1
This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring immediate intervention.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

OMP 5449 - CLINICAL ORAL MEDICINE
Minimum Credits: 1
Maximum Credits: 1
In this course, the students are given patients for whom they obtain and interpret medical, pharmacologic and dental histories, conduct physical and oral examinations, interpret roentgenographs, and diagnose oral lesions, dental caries, defective restorations and periodontal disease with assistance from specialty consultants as needed. Students then develop a comprehensive, appropriately sequenced treatment plan. This includes modifications or alternatives predicated by compromised health and/or other regulatory constraints.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

OMP 5817 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This course will provide the student the opportunity to do research in an area of oral medicine/pathology of mutual interest to the faculty and student.
OMP 5847 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This course will provide the students with the opportunity to do research in an area of oral medicine/pathology of mutual interest to the faculty and student.

OMP 5911 - INTRO ORAL HD & NECK ONCOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the student to the field of oral and head and neck oncology. Emphasis will be placed on how to obtain appropriate biopsies, gross and microscopic evaluation of tumors and their treatment and prognosis. This course will be especially beneficial for students who contemplate a career in oral and maxillofacial surgery. Evaluation consists of written, oral and/or practical participation.

OMP 5912 - ORAL CANCER
Minimum Credits: 3
Maximum Credits: 3
This course will consist of a two week assignment in the department of otolaryngology/head and neck surgery. The course is intended to provide the student with clinical experience in the diagnosis and treatment of oral and head and neck cancers. The two week assignment will entail clinic and operating room exposure to patients with cancer of the oral cavity and head and neck regions. Students will participate in clinical evaluations of patients and attend patient rounds and conferences.

OMP 5913 - ORAL MEDICINE
Minimum Credits: 3
Maximum Credits: 3
Seminars consisting of open dialogue, case presentations, oral pathology, oral medicine, oral radiology and oral surgery clinical correlation, with emphasis on the appropriate treatment/management of HIV/AIDS patients. This course will provide students with an experience in interactive learning regarding patient care and physician work-up on medically complex patients.

OMP 5914 - CLN PATHLGC CORRE OMF PATHLGY
Minimum Credits: 3
Maximum Credits: 3
This course will challenge the student in identification of clinical, radiographic and histopathologic features of some common and some not so common oral abnormalities. Disease conditions that impact on the delivery of dental care and those requiring biopsy for diagnosis will be discussed. Diagnosis and treatment of common mucocutaneous diseases will be discussed.

OMP 5915 - CLN CORRELATNS ORAL PATH & RAD
Minimum Credits: 2
Maximum Credits: 2
This course will involve presentation of individual case studies of common and somewhat unusual clinical, radiographic and where appropriate,
histologic material. Through the use of kodachrome slides and radiographic films, students will learn to build confidence in their diagnostic skills and develop useful differential diagnoses for the entities discussed.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**OMP 5943 - ORAL MEDICINE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Seminars consisting of open dialogue, case presentations, oral pathology, oral medicine, oral radiology, and oral surgery clinical correlation, with emphasis on the appropriate treatment and management of HIV/AIDS patients. Students will have the opportunity to follow patients from initial evaluation through surgical biopsy and oral pathology diagnosis. This course will provide students with an experience in interactive learning regarding patient care and physician work-up of medically complex patients.  
**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**OMP 5944 - CLN PATHLGC CORRE OMF PATHLGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will challenge the student in the identification of clinical, radiographic and histopathologic features of some common and some not so common oral abnormalities. Disease conditions that impact on the delivery of dental care and those requiring biopsy for diagnosis will be discussed. Diagnosis and treatment of common mucocutaneous diseases will be discussed.  
**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**Organization Studies**

**BORG 2001 - BEHAVIORAL SCIENCE IN BUSINESS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Applied social psychology of learning, perception, motivation, and problem solving; the behavior of individuals and small groups. Leadership, job satisfaction, effective communication supervision, and attitude change.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BORG 2002 - ORGANIZATIONAL ANALYSIS**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Applications of behavioral science techniques in an organizational framework. An analysis of the phenomena and theories of large, complex formal organizations. Studies the organization as an economic, social, decision-making, bureaucratic, and political system.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BORG 2003 - ACCEL ORGANIZATIONAL BEHAVIOR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An accelerated version of "behavioral science in business" and organizational analysis" intended for students with an appropriate background in psychology and sociology, and with work experience."  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.
BORG 2004 - ORGANIZATIONAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
An analysis of the phenomena and theories of large, complex, formal organizations. Studies the organization as an economic, social, decision-making, bureaucratic, and political system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2009 - INTRPRSNL SKILLS FOR MANAGRS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Explicit training in interpersonal skills: presenting oneself to others, effective verbal and nonverbal communication, persuasion, and the use of interpersonal resources to become an effective manager and leader.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2010 - INTRPRSNL SKILLS FOR MANAGRS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
Examines communication theory in the context of managerial activities, focusing on how managers communicate, and with whom, by what means, and for what purposes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2011 - ORGANIZATIONAL DEVELOPMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Encourages students to recognize and understand that isolated and narrow approaches to systems change are almost doomed to failure. Systematically integrated and synthesized approaches to behavioral changes for complex organizations are stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BOAH 2401; PROG: Joseph M. Katz Grad Sch Bus

BORG 2031 - INTERPRSNL SKILLS FOR MANAGERS
Minimum Credits: 3
Maximum Credits: 3
Students in this course receive explicit training in interpersonal skills: presenting themselves to others, effective verbal and nonverbal communication, persuasion, and the use of interpersonal resources to become effective managers and leaders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2045 - THE FARM STAND PROJECT COURSE
Minimum Credits: 1
Maximum Credits: 3
Each farm stand is a small produce stand located in an inner city community. Farm stands are sponsored by community based organizations, such as a food pantry, a resident's council or a local church.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2046 - PROJECT CRSE-ORGANIZTNL BEHAV
Minimum Credits: 3
Maximum Credits: 3
Students in this course will work directly with a company dealing with real-life situations in the organizational behavior area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2047 - LDRS, FOLLOWERSHIP & STAR PERF
Minimum Credits: 2
Maximum Credits: 2
Students will learn the star performer productivity model and closely explore three of nine strategies that make up the model: followership, leadership and perspective.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2060 - INDEP STUDY IN ORGNIZTN BEHAVR
Minimum Credits: 1
Maximum Credits: 6
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2061 - IND STUDY ORGNZTNL BEHAVIOR 2
Minimum Credits: 1
Maximum Credits: 9
Self-designed elective course in organizational behavior
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2112 - PROJ COUSE ORGNL LEADERSHIP 1
Minimum Credits: 2
Maximum Credits: 2
This project course focuses on an experience-based learning approach to understanding effective organizational leadership. Students will be engaged in an ongoing organizational leadership audit and asked to participate in ongoing discussions with an external organization as part of this project. As part of this project, students will prepare an individualized project portfolio that will outline their leadership competencies in and key 'lessons learned' this activity will require students to utilize Webfolio 3.0, An advanced electronic portfolio management system that helps individuals and institutions archive, organize, reflect and present information contained in documents, graphics, presentations, web projects, audio and video, or any other digital media. Students will receive feedback on their electronic portfolios by faculty and member from the external sponsoring organization.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2113 - PROJ COUSE ORGNL LEADERSHIP 2
Minimum Credits: 2
Maximum Credits: 2
A continuation of BORG 2112
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: BORG 2112; PROG: Katz Graduate School of Business

BORG 2209 - INTRPRSNL SKILLS FOR MANAGRS 1
Minimum Credits: 2
Maximum Credits: 2
Explicit training in interpersonal skills: presenting oneself to others, effective verbal and nonverbal communication, persuasion, and the use of interpersonal resources to become an effective manager and leader.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2301 - BEHAVIORAL SCIENCE IN BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Applied social psychology of learning, perception, motivation, and problem solving; the behavior of individuals and small groups; leadership, job satisfaction, effective communication supervision, and attitude change.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 2304 - ORGANIZATIONAL ANALYSIS
Minimum Credits: 1.5
Maximum Credits: 1.5
An analysis of the phenomena and theories of large, complex, formal organizations. Studies the organization as an economic, social, decision-making, bureaucratic, and political system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BORG 3005 - INNOV/ORGNL CHANGE: MICRO-LVL
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on individual-level and team-level behaviors aimed at innovation and change in organizations. We will be exploring topics such as employee voice and proactive behaviors, team diversity and innovation, innovation implementation, creativity, and barriers to change in organizations. The purpose of this course is to examine theory and empirical research in these areas in order to help you to develop skills in developing conceptual models and research questions, as well as understanding, critiquing, and extending theory and research published in top academic journals. Each week we will cover a topic in depth, review a selected set of readings, discuss critical issues relating to theory and research methods, and discuss ways to extend conceptual and empirical models.

Grade Component: Grad HSU Basis

BORG 3011 - FOUNDTNS OF ORGANIZTN THEORY
Minimum Credits: 3
Maximum Credits: 3

2752
Provides an in-depth coverage of some of the classic works in the area such as Bernard, March and Simon, MacGregor, Argyris, and Thompson. These authors have given the major foundation to most of the empirical research on organizations and have furthered theoretical and conceptual developments. Emphasis is placed on relating these works to the student's own interests and aspirations.

**BORG 3012 - RES METH IN ORGNZTNL STUDIES 1**
Minimum Credits: 3  
Maximum Credits: 3  
Designed to provide a broad survey of research methods and approaches to instrument development relevant to conducting organizational studies. Students will be expected to critically review a number of actual research studies in order to assess the appropriateness of the research method employed and the measuring instruments utilized. Each student will also be expected to develop his or her own research philosophy as to when each method is best suited for the objective as moderated by the student's interests and abilities.

**BORG 3014 - SYSTMS CHANG & ORGNZTNL DEVELP**
Minimum Credits: 3  
Maximum Credits: 3  
It is one thing to research and understand organizational phenomena, it is another to purposefully intervene in an organization to improve its efficiency and effectiveness. This seminar explores the growing field of organizational development and provides a set of theories and methods of conducting organizational change. Students will be exposed to various theories of changing at the individual, group, and organizational levels, including systems theory as an integrating framework. Explores guidelines for future research on systems change.

**BORG 3019 - ADV TOPC ORGANIZTNAL STUDIES**
Minimum Credits: 3  
Maximum Credits: 3  
Seminar provides the students with extensive examination of special topics. For example, each student might be asked to focus on a particular area of
investigation by reviewing the relevant literature and developing a new conceptual model, theory, or interpretation of that identified area. Such an intensive approach is expected to help students pinpoint their developing interest, become aware of the up-to-date research in that area, and possibly begin formulating research questions that lead to a dissertation topic.

BOAH 2456 - MANAGING OFFSHORE OUTSOURCING
Minimum Credits: 2
Maximum Credits: 2
This course provides an in-depth assessment of the operational and legal challenges that must be addressed to effectively outsource a company's business processes to overseas locations. The fundamental learning objective is to enhance students' functional skills across the life cycle of these initiatives from process identification and internal restructuring through contract negotiations and ongoing vendor management. We begin with a review of existing frameworks and tools to identify processes that are viable candidates for external sourcing (e.g., Business mapping notation, business process reengineering principles). The consolidation of business processes into domestic shared-service units or captive centers abroad will be treated as a transition stage to more extensive co-sourcing and outsourcing relationships with third-party vendors. From there, students will examine the challenges of developing and executing an offshoring strategy and structuring effective relationships with foreign-based, outsourcing partners. Special attention will be focused on the performance management and corporate social responsibility aspects of these initiatives. A multifunctional perspective is maintained throughout, examining outsourcing trends and best practice in the areas of finance & accounting, HRM, procurement, call center management/customer support, and it.

**BOAH 2532 - NEGOTIATIONS TEAMWORK & CHNG 1**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
We negotiate daily in a variety of contexts: business, family, and social. Negotiation serves several purposes: (1) establishing new or renewing old relationships; (2) changing behaviors and expectations; and (3) resolving disputes. A key goal of this course is to learn the techniques of effective negotiating and collaborative problem solving. Successful negotiations and teamwork reduce costs, improve outcomes, and build constructive relationships. Negotiations are part of a broader set of exchanges that take place within and across organizational contexts. This is the first half of a two-part course on negotiations, teamwork, and change. This course will introduce you to effective techniques for negotiating and collaborative decision making in dyads, as well as in groups. It will further cover the methods for negotiating, facilitating, and leading change in organizational contexts. This is an experiential course and you will be involved directly in negotiating, leveraging team dynamics, and facilitating change in a range of contexts. These experiences will involve a host of tangible and not-so-tangible outcomes, ranging from monetary terms and conditions to matters of goodwill, trust, and information-sharing.

**BOAH 2537 - CONFL RESOL IN THE WORKPLACE 1**

**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course is designed to build on the skills you learned in the prerequisite negotiation course (BOAH 2532 Negotiations, Teamwork and Change) to improve your skills in analyzing and resolving disputes in a variety of settings. Most of the lessons and principles covered in the course are not necessarily specific or unique to business-related or managerial applications, even though that will be the focal setting of study. A basic premise of the course is that while analytic skills are needed to discover optimal solutions to problems, a broad array of conflict management skills are often needed to get these solutions accepted and implemented. The course will allow participants the opportunity to develop these skills experientially, where considerable emphasis will be placed on learning from simulations and case analysis.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BOAH 3025 - THEORY & METHODS IN HR MGMT
Minimum Credits: 3
Maximum Credits: 3
Explores conceptual frameworks that can be used in formulating questions for human resource management.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 3027 - OBHR RESEARCH WORKSHOP I
Minimum Credits: 3
Maximum Credits: 3
Survey of methods used in organizational behavior research and a critical review of major research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 3028 - OBHR RESEARCH WORKSHOP II
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to provide a hands-on experience in the development, design and execution of rigorous behavioral science research within the fields of organizational behavior and human resource management. We will review a variety of trends and issues facing the management of people and process in organizations and require students to identify a critical area of interest or research to pursue across this two semester course. As a class, we will explore a variety of different methodological approaches and discuss the fit between students' specific research questions and different techniques. Our goal is two-fold: (1) to help students develop a sophisticated understanding for what constitutes rigorous research within the field; and (2) to coach students through the research process in order to create an empirical or theoretical paper that can be used to shape a future program of research.
Academic Career: GRAD
Course Component: Seminar

Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 3099 - RDGS ORGNZTNL BEHAVIOR/HR MGT
Minimum Credits: 3
Maximum Credits: 3
Readings in research topics and independent study in organizational behavior and human resources.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 9000 - MBA LEARNING ORGNIZTN WORKSHOP
Minimum Credits: 0
Maximum Credits: 0
During this workshop, students will design their MLOS into several subunits within a network-enabling them to learn first-hand, about leadership, systems, and processes. Subsequently, these MLOS will become the forum for cases, group exercises, and group projects in several courses-such as competing in a global economy, organizational transformation, and managing strategic performance.

ODO 2020 - MODERN COMPUTING ORTHODONTICS
Minimum Credits: 0
Maximum Credits: 0
The course in modern computing in orthodontics is designed to introduce the student to computer hard and software currently in use in the department of orthodontics and dentofacial orthopedics. The clinical application of current imaging, database and record storing software will be introduced in preparation for use in patient care.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ODO 2021 - CLINICAL PEDIATRIC ORTHO 1
Minimum Credits: 1
Maximum Credits: 1
The clinical pediatric orthodontics course series is designed to afford the resident in pediatric dentistry the clinical experiences necessary to ensure competency in diagnosis of abnormalities in the developing dentition and treatment of those conditions which can be corrected or significantly improved by early utilization of limited procedures. Residents will be afforded the opportunity to participate in the provision of comprehensive, multidisciplinary dental care under supervision of faculty from the department of pediatric dentistry and the department of orthodontics and dentofacial orthopedics.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

ODO 2022 - CLINICAL PEDIATRIC ORTHO 2
Minimum Credits: 1
Maximum Credits: 1
The clinical pediatric orthodontics course series is designed to afford the resident in pediatric dentistry the clinical experiences necessary to ensure competency in diagnosis of abnormalities in the developing dentition and treatment of those conditions which can be corrected or significantly improved by the early utilization of limited procedures. Residents will be afforded the opportunity to participate in the provision of comprehensive, multidisciplinary dental care under supervision of faculty from the department of pediatric dentistry and the department of orthodontics and dentofacial orthopedics.

ODO 2041 - BIOMECHANICAL ORTHODONTICS 1
Minimum Credits: 1
Maximum Credits: 1
This course is an introduction to solid mechanics and materials science and emphasis is placed towards the application to orthodontic structure. Also special emphasis is placed upon the application of mechanics principles to the analysis, materials selection, and design of orthodontic elements and orthodontic appliances.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ODO 2045 - ORTHO CEPHALOMETRICS 1
Minimum Credits: 1
Maximum Credits: 1
The objectives of this course are to teach the resident the identification of radiographic anatomical landmarks, cephalometric analysis and the proper superimposition of serial cephalometric headfilm tracings. Each resident is assigned a specific cephalometric analysis which they research and present in seminar followed by class discussion and examples of application.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ODO 2046 - ORTHO CEPHALOMETRICS 2
Minimum Credits: 1
Maximum Credits: 1
The objectives of this course are to teach the resident the identification of radiographic anatomical landmarks, cephalometric analysis and the proper superimposition of serial cephalometric headfilm tracings. Each resident is assigned a specific cephalometric analyses which they research and present in seminar followed by class discussion and examples of application.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ODO 2051 - ORTHODONTIC LAB TECHNIQUES 1
Minimum Credits: 5
Maximum Credits: 5
The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.
Academic Career: GRAD

Minimum Credits: 0
Maximum Credits: 0
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad HSU Basis

ODO 2057 - ORTHO DIAG & TREATMENT PLAN 1
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide the first year student in orthodontics with a fundamental understanding of the concepts of orthodontic diagnosis and treatment planning. In the first term students will acquire knowledge pertaining to orthodontic diagnostic records, the etiology of malocclusion and various treatment modalities common to the practice of orthodontics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
ODO 2058 - ORTHO DIAG & TREATMENT PLAN 2
Minimum Credits: 1
Maximum Credits: 1
The second term of orthodontic diagnosis and treatment planning provides students with the opportunity to apply diagnostic and treatment planning skills acquired in the first term to selected orthodontic cases. The application of independent thought in case analysis will be stressed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ODO 2059 - ORTHO DIAG & TREATMENT PLAN 3
Minimum Credits: 1
Maximum Credits: 1
The third term of orthodontic diagnosis and treatment planning provides students with the opportunity to apply diagnostic and treatment planning skills acquired in the first two sections of the course. Students will have additional opportunities to apply diagnostic and treatment planning skills previously acquired to additional orthodontic cases. The application of independent thought in case analysis is stressed.
Academic Career: GRAD
Course Component: Seminar

**Maximum Credits:** 1

The introduction to orthodontic research course series is designed to introduce and further the resident in orthodontics and dentofacial orthopedics' course study toward fulfilling research requirements for a certificate of completion in the specialty. Under the supervision of the departments director of research, the resident will identify a research topic, form a research committee, complete a literature review and research proposal, gain institutional review board approval, complete data collection, analyze the data and submit a draft and/or final revision of a scientific paper for peer review.

**Academic Career: GRAD**

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**ODO 2140 - CRANIOFACIAL ANOMALIES**

**Minimum Credits:** 2  
**Maximum Credits:** 2

An overview course for first year orthodontic residents and other graduate dental specialty residents. Topics include: etiology of craniofacial anomalies, the role of the geneticist, plastic surgeon, speech and language development person and orthodontist in treating these patients. In addition, the role of the ENT, pediatric dentist and oral and maxillofacial surgeon is discussed.

**Academic Career: GRAD**

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**ODO 2150 - CONTEMPORARY ORTHODONTICS 1**

**Minimum Credits:** 0  
**Maximum Credits:** 0

The course will review the textbook, "contemporary orthodontics", by W. Proffit and H. Fields and the textbook, "orthodontics; current principles and techniques", by Graber, Vanarsdall and Vig. During the course, the orthodontic resident will be introduced to the fundamental concepts of orthodontics that will enable a better understanding of the everyday orthodontic decisions, practice, and techniques.

**Academic Career: GRAD**

ODO 2171 - EVIDENCE BASED CARE 1
Minimum Credits: 0
Maximum Credits: 0
The course series in evidence-based care is designed to introduce the graduate student in orthodontics to the concepts of evidence-based health care. Pertinent literature regarding the efficacy of currently accepted treatment modalities as well as the methods for evaluation of process and outcome will be included in the initial portion of the course. The student will also be exposed to currently accepted outcomes. The presentation of clinical cases for diagnosis and treatment planning will allow the student to plan evidence-based care for their own patients.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ODO 2172 - EVIDENCE BASED CARE 2
Minimum Credits: 0
Maximum Credits: 0
The course series in evidence-based care is designed to introduce the graduate student in orthodontics to the concepts of evidence-based health care. Pertinent literature regarding the efficacy of currently accepted treatment modalities as well as the methods for evaluation of process and outcome will be included in the initial portion of the course. The student will also be exposed to currently accepted outcomes. The presentation of clinical cases for diagnosis and treatment planning will allow the student to plan evidence-based care for their own patients.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ODO 2173 - EVIDENCE BASED CARE 3
Minimum Credits: 0
Maximum Credits: 0
This series in evidence based care is designed to introduce the graduate student in orthodontics to the concepts of evidence based care. Pertinent literature regarding the efficacy of currently accepted treatment modalities as well as the methods for evaluation of processes and outcome will be included in the initial portion of course. The students will also be exposed to currently accepted outcome measures and methods of evaluating clinical outcomes. The presentation of clinical cases for diagnosis and treatment planning will allow the students to plan evidence based care for patients.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ODO 2211 - ADVANCED FACIAL GROWTH
Minimum Credits: 1
Maximum Credits: 1
The course series in advanced facial growth is designed to continue the course of study initiated in the introductory facial growth courses. These courses will provide the second year graduate student in orthodontics an opportunity for in-depth study of growth in each of the regions of the craniofacial skeleton and modification of this growth for therapeutic purposes. Clinical application of the basic concepts of facial growth which were learned in the intro course will be pursued. Review and critical analysis of current literature will be included.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ODO 2243 - ENVIRONMENT ORTHO PRACTICE 1
Minimum Credits: 1
Maximum Credits: 1
Environment of orthodontic practice 1 is a course developed for orthodontic residents to enable them to appreciate and comprehend the complexity of the future environment in which they will practice. Didactic presentations along with lively group discussions will be utilized to challenge the participants to examine information at higher cognitive levels. Major areas of emphasis will be the discussion of office designs, utilization of auxiliaries, information systems, effective communication, OSHA, EPA, der regulations, taxes, retirement, ethics, PRA/risks management and wellness model of health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ODO 2244 - ENVIRONMENT ORTHO PRACTICE 2
Environment of orthodontic practice 2 is a course developed for orthodontic residents to enable them to appreciate and comprehend the complexity of the future environment in which they will practice. Didactic presentations along with lively group discussions will be utilized to challenge the participants to examine information at higher cognitive levels. Major areas of emphasis will be the discussion of office designs, utilization of auxiliaries, information systems, effective communication, OSHA, EPA, de-regulations, taxes, retirement, ethics, PRA/risks management and wellness model of health.

**ODO 2400 - AMER BOARD ORTHO PREP CRSE 1**

Minimum Credits: 1  
Maximum Credits: 1  
The American board of orthodontics preparation course 1 is designed to introduce third year residents in orthodontics and dentofacial orthopedics for
completion of the American board of orthodontics' phase ii (written) and phase iii (case presentation and case diagnosis) requirements for attaining
diplomate status as well as completing the certificate in orthodontics at the university of Pittsburgh. Under the supervision of DRS. Janet and Robert
Robison, the resident will prepare to identify and define abo requisites for case selection and quality of cases. The residents will focus on the
specifics of abo guidelines to ensure excellence in presentation. The phase ii written aspect encompasses the analysis and comprehension of the
literature as recommended by the abo reading list. Further, case analysis for the phase iii diagnostic aspect of the examination will be simulated and
the resident's format refined.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ODO 2410 - AMER BOARD ORTHO PREP CRSE 2**

Minimum Credits: 1  
Maximum Credits: 1  
The American Board of Orthodontics preparation course 2 is designed to review essential concepts with third year residents in orthodontics and
dentofacial orthopedics for completion of the American Board of Orthodontics' phase ii (written) and phase iii (case presentation and case diagnosis)
requirements for attaining diplomate status as well as completing the certificate in orthodontics at the University of Pittsburgh. Under the supervision
of DRS. Janet and Robert Robison, the resident will prepare to identify and define abo requisites for case selection and quality of cases. The residents
will focus on the specifics of abo guidelines to ensure excellence in presentation. The phase ii written aspect encompasses the analysis and
comprehension of the literature as recommended by the abo reading list. Further, case analysis for the phase iii diagnostic aspect of the examination
will be simulated and the resident's format refined.

**ODO 5221 - ORTHODONTICS 2**

Minimum Credits: 1  
Maximum Credits: 1  
Objectives of the course are to introduce the pre-doctoral student to the processes of normal growth and development and enable them to recognize
and identify deviations from normal. To teach the student to identify problems and to design an appropriate plan for dealing with them. The course
emphasizes application to clinical orthodontics and postnatal craniofacial bone growth.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ODO 5242 - ORTHO DIAGNS & TRMNT PLANNING**

Minimum Credits: 1  
Maximum Credits: 1
The objective of this course is to teach the pre-doctoral student the diagnostic process. How to conduct an extra-oral and intra-oral examination of a patient, how to collect and analyze pertinent patient records and how to produce a comprehensive description of the patient's problem and to synthesize the various elements of the description into a rational problem list will be discussed.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ODO 5245 - ORTHODONTICS 3 LAB**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This laboratory component objective is to teach the pre-doctoral student the diagnostic process, how to conduct an extra-oral and intra-oral examination of a patient, how to collect and analyze pertinent patient records and how to produce a comprehensive description of the patient's problem and to synthesize the various elements of the description into a rational problem list will be discovered.

**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**ODO 5272 - OCCLUSION 2-DVLP OF DENTITION**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
The goal of this course is to provide students with the ability to recognize and describe the normal pattern of growth and development of the dentition of a child from birth through the primary dentition and into the early permanent dentition. Treatment modalities for abnormal development at the various dental stages are discussed.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ODO 5274 - ORTHODONTICS 4 (TREATMENT)**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
The course objective is to teach: (a) the pre-doctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; (b) the use of different orthodontic appliances; and (c) the treatment of patients needing limited orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ODO 5275 - ORTHO DIAG TREATMENT PLN LAB**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This laboratory component objective is to teach the pre-doctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; the use of different orthodontic appliances; and the treatment of patients needing limited orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**ODO 5314 - ORTHODONTICS 4 (TREATMENT)**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
The course objective is to teach: (a) the pre-doctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; (b) the use of different orthodontic appliances; and (c) the treatment of patients needing limited orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Lecture

Minimum Credits: 1
Maximum Credits: 1
The objectives of this course are to teach the resident the identification of radiographic anatomical landmarks, cephalometric analysis and the proper superimposition of serial cephalometric headfilm tracings. Each resident is assigned a specific cephalometric analyses which they research and present in seminar format followed by class discussion and examples of application.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2051 - ORTHODONTICS LAB TECHNIQUES 1
Minimum Credits: 4
Maximum Credits: 4
The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.
Academic Career: GRAD
ORTHO 2052 - ORTHODONTICS LAB TECHNIQUES 2
Minimum Credits: 0
Maximum Credits: 0
The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

ORTHO 2053 - ORTHODONTICS LAB TECHNIQUES 3
Minimum Credits: 0
Maximum Credits: 0
The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

ORTHO 2054 - ORTHODONTICS LAB TECHNIQUES 4
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

ORTHO 2057 - ORTHO DIAG & TREATMENT PLAN 1
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide the first year student in orthodontics with a fundamental understanding of the concepts of orthodontic diagnosis and treatment planning. In the first term students will acquire knowledge pertaining to orthodontic diagnostic records, the etiology of malocclusion and various treatment modalities common to the practice of orthodontics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2058 - ORTHO DIAG & TREATMENT PLANNING 2
Minimum Credits: 1
Maximum Credits: 1
The second term of orthodontic diagnosis and treatment planning provides students with the opportunity to apply diagnostic and treatment planning skills acquired in the first term to selected orthodontic cases. The application of independent thought in case analysis will be stressed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2059 - ORTHO DIAG & TREATMENT PLAN 3
Minimum Credits: 1
Maximum Credits: 1
The third term of orthodontic diagnosis and treatment planning provides students with the opportunity to apply diagnostic and treatment planning skills acquired in the first two sections of the course. Students will have additional opportunities to apply diagnostic and treatment planning skills previously acquired to additional orthodontic cases. The application of independent thought in case analysis is stressed.
ORTHO 2060 - ORTHODONTICS SEMINAR 1
Minimum Credits: 1
Maximum Credits: 1
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.

ORTHO 2061 - ORTHODONTICS SEMINAR 2
Minimum Credits: 0
Maximum Credits: 0
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.

ORTHO 2062 - ORTHODONTICS SEMINAR 3
Minimum Credits: 2
Maximum Credits: 2
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.

ORTHO 2063 - ORTHODONTICS SEMINAR 4
Minimum Credits: 1
Maximum Credits: 1
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.

ORTHO 2064 - ORTHODONTICS SEMINAR 5
Minimum Credits: 0
Maximum Credits: 0
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.

ORTHO 2065 - ORTHODONTICS SEMINAR 6
Minimum Credits: 1
Maximum Credits: 1
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.
ORTHO 2066 - ORTHODONTICS SEMINAR 7
Minimum Credits: 1
Maximum Credits: 1
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2067 - ORTHODONTICS SEMINAR 8
Minimum Credits: 0
Maximum Credits: 0
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2068 - ORTHODONTICS SEMINAR 9
Minimum Credits: 1
Maximum Credits: 1
These seminars are devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress, and short and long range treatment results. Treatment objectives and methods are discussed by the students and faculty.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ORTHO 2069 - ORTHODONTICS SEMINAR 10
Minimum Credits: 1
Maximum Credits: 1
Seminars devoted to differential diagnosis, treatment planning (active and retention phases), evaluation of treatment progress and short and long term treatment results. Treatment objective and methods are discussed by the students and faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2070 - SURGICAL ORTHO: DIAG TRMNT PLN
Minimum Credits: 1
Maximum Credits: 1
Dentofacial deformity affects approximately 10% of the population. These patients typically have a severe malocclusion for which a combination of orthodontics and surgery is indicated. The objectives of this course are to prepare the dental specialist to adopt a systematic approach to diagnosis, treatment, planning and management for these patients. The didactic component will provide a theoretical basis before the oral and maxillo-facial surgery and orthodontic residents rotate through the clinical component in the dentofacial program.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 2071 - DENTOFACIAL PROGRAM 1
Minimum Credits: 1
Maximum Credits: 1
This seminar emphasizes the team approach for the treatment of patients with congenital and/or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
ORTHO 2072 - DENTOFACIAL PROGRAM 2
Minimum Credits: 1
Maximum Credits: 1
This seminar emphasizes the team approach for the treatment of patients with congenital and/or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2073 - DENTOFACIAL PROGRAM 3
Minimum Credits: 0
Maximum Credits: 0
This course emphasizes the team approach to the treatment of patients with congenital and/or acquired deviations manifested in the craniofacial complex. Case presentations with group discussions is the format utilized. The differential diagnosis and treatment planning of these patients is completed and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2074 - DENTOFACIAL PROGRAM 4
Minimum Credits: 1
Maximum Credits: 1
This seminar emphasizes the team approach for the treatment of patients with congenital and/or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2075 - DENTOFACIAL PROGRAM 5
Minimum Credits: 1
Maximum Credits: 1
This seminar emphasizes the team approach for the treatment of patients with congenital and/or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2076 - DENTOFACIAL PROGRAM 6
Minimum Credits: 0
Maximum Credits: 0
This course emphasizes the team approach to the treatment of patients with congenital and/or acquired deviations manifested in the craniofacial complex. Case presentations with group discussions is the format utilized. The differential diagnosis and treatment planning of these patients is completed and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2077 - DENTOFACIAL PROGRAM 7
Minimum Credits: 1
Maximum Credits: 1
This seminar emphasizes the team approach for the treatment of patients with congenital and/or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
ORTHO 2078 - DENTOFACIAL PROGRAM 8
Minimum Credits: 1
Maximum Credits: 1
This course emphasizes the team approach to the treatment of patients with congenital and/or acquired deviations manifested in the craniofacial complex. Grade Component: Grad Letter Grade

ORTHO 2090 - ORAL PHYSIOLOGY
Minimum Credits: 1
Maximum Credits: 1
This course in oral physiology attempts to summarize basic aspects of oral neurophysiology as they relate to the everyday practice of orthodontics. The student will achieve an understanding of neural anatomy, the mechanoreceptors in the oral cavity responsible for oral posture and reflexes, systems of central nervous tissue responsible for reflexes, and pattern generation, the functioning of skeletal muscle as an organ system and special adaptations in carnivore and primate jaw-closing muscles, and finally an in-depth understanding of mastication and swallowing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 2091 - GROWTH AND DEVELOPMENT 1
Minimum Credits: 1
Maximum Credits: 1
Objectives of this course include introducing the resident to the processes of normal growth and development and to enable them to recognize and identify deviations from normal.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2092 - GROWTH AND DEVELOPMENT 2
Minimum Credits: 1
Maximum Credits: 1
Objectives of this course include introducing the resident to the processes of normal growth and development and to enable them to recognize and identify deviations from normal.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 2093 - GROWTH AND DEVELOPMENT 3
Minimum Credits: 1
Maximum Credits: 1
Objectives of this course include introducing the resident to the processes of normal growth and development and to enable them to recognize and identify deviations from normal.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 2101 - CLEFT PALATE 1
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to familiarize the orthodontic resident with clefting. The diagnosis, specific treatment timing methods, modalities and mechanisms are presented as they relate to the technical management of cleft palate malocclusions. Review of literature, case presentation of cleft patients for orthodontic diagnosis, treatment planning, technique selection and orthodontic appliances are discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2102 - CLEFT PALATE 2
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to familiarize the orthodontic resident with clefting. The diagnosis, specific treatment timing methods, modalities and mechanisms are presented as they relate to the technical management of cleft palate malocclusions. Review of literature, case presentation of cleft patients for orthodontic diagnosis, treatment planning, technique selection and orthodontic appliances are discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2103 - CLEFT PALATE 3
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to familiarize the orthodontic resident with clefting. The diagnosis, specific treatment timing methods, modalities and mechanisms are presented as they relate to the technical management of cleft palate malocclusions. Review of literature, case presentation of cleft patients for orthodontic diagnosis, treatment planning, technique selection and orthodontic appliances are discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2104 - CLEFT PALATE 4
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to familiarize the orthodontic resident with clefting. The diagnosis, specific treatment timing methods, modalities and mechanisms are presented as they relate to the technical management of cleft palate malocclusions. Review of literature, case presentation of cleft patients for orthodontic diagnosis, treatment planning, technique selection and orthodontic appliances are discussed.

ORTHO 2111 - DEVELOPING DENTITION: AN OVERVIEW
Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to teach the residents the ability to recognize and describe the normal pattern of growth and development of the dentition and facial complex of a child from birth through primary dentition and into early permanent dentition. Seminars include lectures, literature review class discussions and case presentations. Treatment modalities for abnormal development at the various dental stages are discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2112 - DEVELOPMENT OF THE DENTITION 2
Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to teach the residents the ability to recognize and describe the normal pattern of growth and development of the dentition and facial complex of a child from birth through primary dentition and into early permanent dentition. Seminars include lectures, literature review class discussions and case presentations. Treatment modalities for abnormal development at the various dental stages are discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2113 - SPEECH AND HEARING PATHOLOGY
Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce the orthodontic student to the basic principles of speech and hearing and specifically how these relate to speech problems encountered in the patients with dental and/or facial abnormalities. The course concludes with chairside speech screening of orthodontic patients including trial therapy if the patient population is available.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 2117 - DENTOFACIAL DEFORMITIES
Minimum Credits: 2
Maximum Credits: 2
This seminar emphasizes the team approach for the treatment of patients with congenital and or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

ORTHO 2121 - OCCLUSION AND MALOCCLUSION 1
Minimum Credits: 1
Maximum Credits: 1
This course is intended to provide the resident with the opportunity to critically examine the pertinent dental literature on the subject of occlusion. This course deals with (a) the morphologic relation of the dentition in static occlusion (b) the dynamic relationship of the functioning dentition and (c) the role that the dental occlusion plays in the etiology of TMJ disorders and methodologies utilized in their treatment.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
ORTHO 2122 - NORMAL AND MALOCCLUSION 2
Minimum Credits: 1
Maximum Credits: 1
This course is intended to provide the resident with the opportunity to critically examine the pertinent dental literature on the subject of occlusion. This course deals with (a) the morphologic relation of the dentition in static occlusion (b) the dynamic relationship of the functioning dentition and (c) the role that the dental occlusion plays in the etiology of TMJ disorders and methodologies utilized in their treatment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2123 - OCCLUSION AND MALOCCLUSION 3
Minimum Credits: 1
Maximum Credits: 1
This course is intended to provide the resident with the opportunity to critically examine the pertinent dental literature on the subject of occlusion. This course deals with (a) the morphologic relation of the dentition in static occlusion (b) the dynamic relationship of the functioning dentition and (c) the role that the dental occlusion plays in the etiology of TMJ disorders and methodologies utilized in their treatment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2124 - TMJ SCIENTIFIC BASC & CLIN MGT
Minimum Credits: 1
Maximum Credits: 1
This course presents the comprehensive knowledge of the muscular and skeletal aspects of temporomandibular disorders in health and diseases and an essential understanding of the clinical management of temporomandibular disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ORTHO 2131 - INTRO TO ORTHO RESEARCH 1
Minimum Credits: 1
Maximum Credits: 1
Major goal is to enhance the residents' ability to utilize learned research methodology as a tool in seeking solutions to significant problems related to the field of orthodontics. This course is to guide the residents toward completion of their thesis in order to obtain their md degree and publication of their research. Appropriate form of orthodontic research and ethics in-involved are also covered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2132 - INTRO TO ORTHO RESEARCH 2
Minimum Credits: 1
Maximum Credits: 1
Major goal is to enhance the residents' ability to utilize learned research methodology as a tool in seeking solutions to significant problems related to the field of orthodontics. ORTHO 2140 - CRANIOFACIAL ANOMALIES
Minimum Credits: 2
Maximum Credits: 2
An overview course for first year orthodontic residents and other graduate dental specialty residents. Topics include: etiology of craniofacial anomalies, the role of the geneticist, plastic surgeon, speech and language development person and orthodontist in treating these patients. In addition, the role of the ENT, pediatric dentist and oral and maxillofacial surgeon is discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2141 - DENTO-FACIAL PATHOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
This course is unique in that it provides the orthodontic resident didactic and clinical experience in pathology relevant to the practice of orthodontics. Illustrative cases are presented to demonstrate the complexity of medical and dental services that encompass the treatment of these individuals. Requires residents to scientifically evaluate, apply, and analyze data obtained from patients and formulate a treatment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
ORTHO 2142 - DENTO-FACIAL PATHOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
This course is unique in that it provides the orthodontic resident didactic and clinical experience in pathology relevant to the practice of orthodontics. Illustrative cases are presented to demonstrate the complexity of medical and dental services that encompass the treatment of these individuals. Requires residents to scientifically evaluate, apply, and analyze data obtained from patients and formulate a treatment.

Minimum Credits: 0
Maximum Credits: 0
This series in evidence based care is designed to introduce the graduate student in orthodontics to the concepts of evidence based care. Pertinent literature regarding the efficacy of currently accepted treatment modalities as well as the methods for evaluation of processes and outcome will be included in the initial portion of course. The students will also be exposed to currently accepted outcome measures and methods of evaluating clinical outcomes. The presentation of clinical cases for diagnosis and treatment planning will allow the students to plan evidence based care for patients.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ORTHO 2211 - ADVANCED FACIAL GROWTH
Minimum Credits: 1
Maximum Credits: 1
The course series in advanced facial growth is designed to continue the course of study initiated in the introductory facial growth courses. These courses will provide the second year graduate student in orthodontics an opportunity for in-depth study of growth in each of the regions of the craniofacial skeleton and modification of this growth for therapeutic purposes. Clinical application of the basic concepts of facial growth which were learned in the intro course will be pursued. Review and critical analysis of current literature will be included.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2212 - ADVANCED FACIAL GROWTH 2
Minimum Credits: 1
Maximum Credits: 1
The course series in advanced facial growth is designed to continue the course of study initiated in the introductory facial growth courses. These courses will provide the second year graduate student in orthodontics an opportunity for in-depth study of growth in each of the regions of the craniofacial skeleton and modification of this growth for therapeutic purposes. Clinical application of the basic concepts of facial growth which were learned in the intro course will be pursued. Review and critical analysis of current literature will be included.

ORTHO 2243 - ENVIRONMENT OF ORTHO PRACTICE 1
Minimum Credits: 1
Maximum Credits: 1
Environment of orthodontic practice 1 is a course developed for orthodontic residents to enable them to appreciate and comprehend the complexity of the future environment in which they will practice. Didactic presentations along with lively group discussions will be utilized to challenge the participants to examine information at higher cognitive levels. Major areas of emphasis will be the discussion of office designs, utilization of auxiliaries, information systems, effective communication, OSHA, EPA, der regulations, taxes, retirement, ethics, PRAC/risks management and wellness model of health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 2244 - ENVIRONMENT OF ORTHO PRACTICE 2
Minimum Credits: 0
Maximum Credits: 0
Environment of orthodontic practice 2 is a course developed for orthodontic residents to enable them to appreciate and comprehend the complexity of the future environment in which they will practice. Course Component: Lecture
Grade Component: No Grade Required

ORTHO 2341 - CONTEMPORARY ORTHODONTICS
Minimum Credits: 1
Maximum Credits: 1
This course is offered in the spring term to third year graduate students in orthodontics as a final summary of clinical and educational aspects of graduate training. Through weekly lectures and discussions with the departmental chair, students are challenged to formulate their experiences into an individualized approach to the upcoming challenges of private practice. Following exploration and revisiting of salient aspects of orthodontic treatment and practice by the chair, students are encouraged to continue the course on a weekly basis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ORTHO 2342 - ORTHO CLINICAL FELLOWSHIP 2
Minimum Credits: 1
Maximum Credits: 1
This course series is designed to provide the graduate student with an opportunity to pursue one or more areas of study which may fall outside of the traditional course of study leading to a master's degree in orthodontics. The student will participate in designing his or her own course of study under the direction of the fellowship's director, and is afforded the opportunity to pursue a course of study which will increase the student's exposure to specialized areas of clinical interest and better prepare him or her to enter the clinical practice of orthodontics.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

ORTHO 2345 - ORTHO CLINICAL FELLOWSHIP 5
Minimum Credits: 1
Maximum Credits: 1
This course series is designed to provide the graduate student with an opportunity to pursue one or more areas of study which may fall outside of the traditional course of study leading to a master's degree in orthodontics. The student will participate in designing his or her own course of study under the direction of the fellowship's director, and is afforded the opportunity to pursue a course of study which will increase the student's exposure to specialized areas of clinical interest and better prepare him or her to enter the clinical practice of orthodontics.
Academic Career: GRAD
Course Component: Independent Study

**ORTHO 2900 - INDEPENDENT STUDY**
Minimum Credits: 1
Maximum Credits: 3
This course is available for the design of special projects of reading and/or research on topics related to orthodontics. The format is determined by the instructor with consideration of the student's goal.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade

**ORTHO 5110 - DENTAL FACIAL ABNORMALITIES**
Minimum Credits: 0
Maximum Credits: 0
This seminar emphasizes the team approach for the treatment of patients with congenital and/or acquired deviations with manifestations in the craniofacial complex. Case presentations and group discussion is the format utilized. The differential diagnosis and treatment planning of these patients are evaluated and recommendations for treatment made.

Academic Career: DMED
Course Component: Seminar
Grade Component: Grad HSU Basis

**ORTHO 5165 - MODEL PREPARATION**
Minimum Credits: 0
Maximum Credits: 0
At the completion of this course, the student will be able to make, pour and trim diagnostic casts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

**ORTHO 5171 - ORTHO 1 (DVLP OF DENTITION)**
Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to provide students with the ability to recognize and describe the normal pattern of growth and development of the dentition of a child from birth through the primary dentition and into the early permanent dentition. Treatment modalities for abnormal development at the various dental stages are discussed.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
ORTHO 5221 - ORTHODONTICS 2
Minimum Credits: 1
Maximum Credits: 1
Objectives of the course are to introduce the pre-doctoral student to the processes of normal growth and development and enable them to recognize and identify deviations from normal. To teach the student to identify problems and to design an appropriate plan for dealing with them. The course emphasizes application to clinical orthodontics and on postnatal craniofacial bone growth.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 5231 - NORMAL AND ABNORMAL OCCLUSION
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to acquaint the pre-doctoral student with the various definitions of associated "static" occlusion, "functional" occlusion and temporomandibular disorders. The characteristics of normal occlusion will be distinguished from that of malocclusion. Occlusion and orthodontics will be discussed in relation to temporomandibular disorders. The pre-doctoral student should be able to distinguish between the causes of temporomandibular disorders.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 5242 - ORTHODONTICS 3 (DIAGNOSIS)
Minimum Credits: 2
Maximum Credits: 2
The objective of this course is to teach the predoctoral student the diagnostic process. How to conduct an extra oral and intra-oral examination of a patient, how to collect and analyze pertinent patient records and how to produce a comprehensive description of the patient's problem and to synthesize the various elements of the description into a rational problem list will be discussed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 5245 - ORTHODONTICS 3 LAB
Minimum Credits: 0
Maximum Credits: 0
This laboratory component objective is to teach the predoctoral student the diagnostic process, how to conduct an extra-oral and intra-oral examination of a patient, how to collect and analyze pertinent patient records and how to produce a comprehensive description of the patient's problem and to synthesize the various elements of the description into a rational problem list will be discovered.
Academic Career: DMED
Course Component: Practicum
Grade Component: No Grade Required

ORTHO 5272 - OCCLUSN 2 - DVLP OF DENTITION
Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to provide students with the ability to recognize and describe the normal pattern of growth and development of the dentition of a child from birth through the primary dentition and into the early permanent dentition. Treatment modalities for abnormal development at the various dental stages are discussed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ORTHO 5274 - ORTHODONTICS 4 (TREATMENT)
Minimum Credits: 2
Maximum Credits: 2
The course objective is to teach; a. The predoctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; b. The use of different orthodontic appliances; and c. The treatment of patients needing limited orthodontic treatment modalities.
Academic Career: DMED
**ORTH 5275 - ORTHODONTICS 4 LABORATORY**

Minimum Credits: 0  
Maximum Credits: 0

This laboratory component objective is to teach the predoctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; the use of different orthodontic appliances; and the treatment of patients needing limited orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** No Grade Required

**ORTH 5314 - ORTHODONTICS 4 (TREATMENT)**

Minimum Credits: 2  
Maximum Credits: 2

The course objective is to teach; a. The predoctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base, b. The use of different orthodontic appliances, and c. The treatment of patients needing limited orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ORTH 5325 - ORTHODONTICS 4 LABORATORY**

Minimum Credits: 0  
Maximum Credits: 0

This laboratory component objective is to teach the predoctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; the use of different orthodontic appliances; and the treatment of patients needing limited orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** No Grade Required

**ORTH 5345 - ORTHODONTICS 5 (ADV. ORTHO)**

Minimum Credits: 1  
Maximum Credits: 1

The course objective is to teach (a) the predoctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; (b) the use of different orthodontic appliances, and (c) the treatment of patients needing advanced orthodontic treatment modalities.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ORTH 5349 - CLINICAL ORTHODONTICS**

Minimum Credits: 3  
Maximum Credits: 3

The objective of this course is to teach the predoctoral student the treatment planning process based on the collection and analysis of pertinent patient records and a rational problem list; the use of different orthodontic appliances in patient care. Clinical cases are diagnosed and treatment plans presented by the student to the faculty.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

**ORTH 5379 - CLINICAL ORTHODONTICS**

Minimum Credits: 3  
Maximum Credits: 3

The objective of this course is to teach the predoctoral student the treatment planning process based on the collection and analysis of pertinent patient records and a rational problem list; the use of different orthodontic appliances in patient care. Clinical cases are diagnosed and treatment plans presented by the student to the faculty.

**Academic Career:** DMED

**Grade Component:** Grad LG/SU3 Basis

**ORTHO 5941 - ADVANCED CARDIAC LIFE SUPPORT**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The content presented in this course is a standardized curriculum developed by the American heart association for the purpose of managing acute cardiac events prior to the initiation of more definitive care. The objectives of this course are to provide the student with the knowledge and skills necessary to become certified in advanced cardiac life support.

**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**ORTHO 5942 - CRANIOFACIAL ANOMALIES**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course presents a comprehensive introduction to the diagnosis and treatment planning principles of an interdisciplinary team approach to cleft lip and palate and craniofacial anomalies. The objectives of this course are to provide a sound basis for the clinical examination, diagnosis and interactive team management of patients principally with the severe dental presentations associated with the various craniofacial anomalies.

**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**Orthopedic Surgery**

**OSURG 3710 - ORTHOPAEDICS SEMINAR**
Minimum Credits: 1
Maximum Credits: 1
This seminar is designed to be an interactive forum for current basic science and clinical topics in orthopaedics. Speakers include orthopaedics residents, post-doctoral fellows and faculty as well as invited experts.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**OSURG 5320 - PEDIATRIC ORTHOPAEDICS**
Minimum Credits: 0
Maximum Credits: 0
This four-week elective will allow the student concentrated exposure to all aspects of pediatric orthopaedics with a primary object of gaining an appreciation of the physical examination of musculoskeletal disorders in children. Students will be assigned to one of several specific orthopaedic teams and will be integrated to the service and have close contact with orthopaedic residents. Assignment choices will include concentrations in sports medicine, spina bifida/cerebral palsy and adult spinal disorders and there will also be significant exposure to general pediatric orthopaedics and fracture care. Students will be on the call schedule once a week with the pediatric orthopaedic resident. The student may choose to have operating room exposure.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OSURG 5325 - SPORTS MEDICINE**
Minimum Credits: 0
Maximum Credits: 0
This four-week elective offers exposure to general sports medicine. Students will be assigned to one of several specific orthopedic teams, which may include concentration in shoulder and elbow disorders or knee disorders. The student will observe orthopedic evaluations in the office as well as become involved in the medical coverage of sporting events depending on the season. While not required, the student may observe surgery if desired. The course objectives are: to understand the mechanism and pathophysiology of sports-related injuries; to become knowledgeable in orthopedic sports medicine physical examination; and to evaluate and monitor rehabilitation following sports-related injuries.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OSURG 5330 - ORTHOPAEDIC TRAUMA**
Minimum Credits: 0
Maximum Credits: 0
This is an intensive 4-week exposure to orthopaedic trauma during which the student will be assigned to the orthopaedic trauma team. Students will take call in the hospital once per week. Students will participate in the real-time evaluation of acutely-injured patients in the emergency department; the initial evaluation to include interpretation of radiographic studies, as well as the pre- and postoperative management of acutely-injured patients with orthopaedic injuries. Course objectives include: appreciate the implications of multiple trauma; understand the role of orthopaedic injuries in the management of the multiply-injured patient; understand the trauma care system of a major tertiary medical care system; and become comfortable with the basic skills required to evaluate a multiply-injured patient with orthopaedic injuries.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OSURG 5335 - ORTHOPAEDIC FOOT AND ANKLE**
Minimum Credits: 0
Maximum Credits: 0
This elective is a four week exposure to foot and ankle orthopaedics. The student will be integrated on to the service and will have close contact with the orthopaedic resident. The student will observe foot and ankle evaluations in an office setting and will have the opportunity to observe surgery. Course objects include: appreciate the clinical and radiographic assessment of the foot and ankle; gain an appreciation and understanding of the evaluation and treatment of foot and ankle injuries; and become knowledgeable in the examination of the foot and ankle.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**OSURG 5340 - ORTHOPAEDIC HAND SERVICE**
Minimum Credits: 0
Maximum Credits: 0
This elective is a four week exposure to hand orthopaedics. The student will be integrated on to the service and will have close contact with the orthopaedic resident. The student will observe hand evaluations in an office setting and have the opportunity to observe surgery. Objectives include: appreciate the clinical assessment of the hand and upper extremity; gain an appreciation and understanding of the evaluation and treatment of hand and upper extremity conditions and procedures; and become knowledgeable in the examination of the hand and upper extremity.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OSURG 5389 - CLINICAL CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
This elective will offer the student early in his/her clinical experience an opportunity to learn more about diseases of the musculoskeletal system, their diagnosis and their treatment. The student will be assigned to a clinical service and will participate in both in-patient and ambulatory care. Teaching by preceptorship and demonstration will recognize the student's limited clinical experience.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OSURG 5392 - INDIVIDUAL STUDY OR RESEARCH
Minimum Credits: 0
Maximum Credits: 0
A student may participate as a member of an existing research team in the orthopaedic research laboratory or pursue independent research interests. Students interested in this elective should plan the rotation well in advance with both the preceptor and the department's student coordinator. Time periods for this elective are in four week blocks of time.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OSURG 5410 - OSURG ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
The goal of the four week elective is to meet the needs of a student whose career plans include specialization in orthopaedic surgery. This elective is designed to integrate the student into one of the specialty services at the university hospitals. The student should be highly motivated and will function as an integral part of the house staff team.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OSURG 5420 - CLINICAL PRECEPTORSHIP
Minimum Credits: 0
Maximum Credits: 0
This rotation is designed for students who are interested in learning about the musculoskeletal system, its disease processes and treatment. The student will be integrated into one of the clinical services at the university hospitals and will be involved in the outpatient care of the patients in the emergency room and the orthopaedic ambulatory care clinic. The elective is four weeks in duration.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OSURG 5451 - OPERATIVE SPORTS MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This four-week elective will integrate the students into the sports medicine orthopaedic services in both an inpatient and an outpatient setting. The course objectives are: to improve the student's musculoskeletal system exam skills; to assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; to develop an appreciation of the roles of surgeons, primary care physicians, athletic trainers, and physical therapists in the sports medicine team approach to the care of athletes.

Academic Career: MEDS
OSURG 5455 - PRIMARY CARE/SPORTS MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This four-week elective is for the student who is interested in learning more about sports medicine, the musculoskeletal system, its exam and their treatment. Students will be exposed to a variety of sports/musculoskeletal injuries in a multi-provider outpatient sports medicine team approach. Objectives are: improve the student's musculoskeletal system exam skills; assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; develop an appreciation in the sports medicine team approach to the care of athletes.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OSURG 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of orthopaedic surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's advisory dean. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OSURG 5881 - ORTHOPAEDIC RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Students interested in orthopaedic research may participate as a member of an existing research team in the orthopaedic research laboratory or pursue independent research interests. Students interested in this elective should contact the coordinator and plan the rotation months in advance. Time periods for this elective are in four week blocks.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OSURG 5899 - INDEPENDENT STUDY ORTHO SURG
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

OSURG 5900 - EXTRAMURAL ORTHOPAEDIC SURGERY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in orthopaedic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Otolaryngology
OTO 5390 - OTOLARYNGOLOGY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Students undertaking this elective may join ongoing basic research projects in the laboratory. The student will be given an opportunity to learn research techniques.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OTO 5420 - HEAD AND NECK SURGERY
Minimum Credits: 0
Maximum Credits: 0
This four-week course concentrates on the management of patients with tumors of the head and neck. Special emphasis is on oncologic surgery, but the elective includes reconstructive surgery of the head and neck, major inflammatory diseases, and management of the airway and swallowing disorders. There will be general ear, nose, and throat experience as well. The objectives are to record and interpret a complete medical history, perform and evaluate an examination of the head and neck and to develop an appropriate management plan.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OTO 5425 - COMBINED OTOLARYNGOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four-week elective combines two weeks each of the head and neck and pediatric otolaryngology rotations. The course will constitute an intensive rotation as a member of the surgical teams. The focus is on management of patients with tumors of the head and neck and children with a variety of diseases of the ear, nose and upper digestive tract. Each week the student will spend two days in the patient office and three days in the operating room, functioning as an integral member of the teams. Teaching rounds will be conducted twice daily by the house staff and attending staff.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OTO 5430 - OTOLARYNGOLOGY PRIVATE PRACTICE
Minimum Credits: 0
Maximum Credits: 0
In this four-week course the student will work as a colleague in a private practice office two days a week seeing patients and working as an assistant in the operating room three days a week. The preceptor is involved in the practice of general ear, nose, and throat to offer experience in recognizing and managing common ENT complaints such as headaches, dizziness, neck mass, trouble swallowing, etc. The objectives are to record a complete medical history, record and evaluate a complete examination of the head and neck and to develop a plan of management.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OTO 5440 - GENERAL OTOLARYNGOLOGY
Minimum Credits: 0
Maximum Credits: 0
This 4 week course will provide the student an opportunity to observe treatment of patients in a large, diversified private practice. The practice includes head and neck surgery, plastic and reconstructive surgery and post-operative care. This service provides excellent clinical exposure to the disease of head and neck for students. Recommended for primary care physicians and students considering surgical specialties. The objectives are to evaluate and diagnose a patient with a complaint of the head and neck, to diagnose the problem and to develop a plan of management.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OTO 5450 - PEDIATRIC OTOLARYNGOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four-week elective course is designed for the student desiring a career in primary medicine, pediatrics or otolaryngology. The student will attend the pediatric otolaryngology outpatient department, surgery and work rounds with staff and residents. In addition, all department activities,
including participation in ongoing research, will be available to the students. The objectives of the course are to record and to interpret a pediatric otolaryngology history, to perform a complete pediatric head and neck exam and to formulate a management plan.

**OTO 5460 - NEUROTOLOGY**
- **Minimum Credits:** 0
- **Maximum Credits:** 0
This course deals with patients with disorders of the hearing and balance systems. Special emphasis is on evaluation, physical examination and special testing -vestibular and audiological -of patients who present with complaints related to hearing, balance, facial dysfunction and medical and surgical management. In addition, the student will have the opportunity to participate in otologic surgery. The objectives are to learn techniques used in evaluation of hearing and balance disorders, to interpret a medical history and to outline a plan of management.

**OTO 5650 - INDIVIDUALIZED CLINICAL COURSE**
- **Minimum Credits:** 0
- **Maximum Credits:** 0
An individualized course of study may be arranged with the department of otolaryngology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

**OTO 5816 - OTOLARYNGOLOGY RESEARCH**
- **Minimum Credits:** 0
- **Maximum Credits:** 0
This 4 week experience allows a student to participate in a clinical or basic laboratory research project in otolaryngology. The student can select to work with any faculty in the department. Participation in design, data collection and analysis, and manuscript preparation is expected. The actual total participation may extend beyond the 4 week period.

**OTO 5899 - INDEP STUDY IN OTOLARYNGOLOGY**
- **Minimum Credits:** 0
- **Maximum Credits:** 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

**OTO 5900 - EXTRAMURAL OTOLARYNGOLOGY**
- **Minimum Credits:** 0
- **Maximum Credits:** 0
A clinical experience in otolaryngology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Pathology

MSPTH 2444 - IMMUNOGENETICS
Minimum Credits: 3
Maximum Credits: 3
This course will cover the basic principles of immuno genetics from both the practical and theoretical points of view. Principles of serology molecular techniques and techniques to measure cellular interactions and studies of major histocompatibility complex will be examined. After defining the genetic structure of this complex and related regions of immunological importance, the significance of these genetic regions in controlling the immune response and in the susceptibility to disease will be evaluated.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MSPTH 5381 - INDIVIDUAL STUDY
Minimum Credits: 0
Maximum Credits: 0
Opportunities are available for third year students to do a variety of electives in the department of pathology. These electives include: anatomic pathology, immunopathology, ob/gyn and perinatal pathology, pediatric pathology, neuropathology, pathology practice, clinical chemistry, and tumor immunology. Independent study is also available in other areas pending consultation with individual faculty.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSPTH 5382 - PATHOLOGY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Research opportunities are available for third year students within the department of pathology. Research areas include: anatomic pathology, immunopathology, ob/gyn and perinatal pathology, pediatric pathology, neuropathology, pathology practice, clinical chemistry, and tumor immunology. Research opportunities are also available in other areas pending consultation with individual faculty.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSPTH 5420 - ANATOMIC PATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
During this four or eight week elective, the student will have the opportunity to study and review normal and pathologic anatomy as provided by surgical and autopsy materials. Under the direction of the staff, the student will process surgical specimens and perform autopsies. The findings will be correlated with the clinical data to provide insight into disease processes and their progression, may participate in ongoing investigations being conducted by the staff.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5421 - BASIC PATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
This fourth year level elective will conduct a systematic, hands-on review, covering many organ systems, of gross and microscopic pathology. Cpc cases will be studied representing a wide variety of medical, surgical, pediatric and ob/gyn problems. Gross and microscopic specimens will be used. Various pathology facilities will be visited and students will be invited to attend regularly scheduled conferences in anatomic and clinical pathology.

Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MSPTH 5425 - INTRO TO AUTOPSY PATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
The autopsy remains an enigma in the medical community. Myths and misconceptions continue to be pervasive. This course will introduce the student to the field of autopsy pathology, teaching them to communicate the benefits and expectations of the autopsy to their clinical colleagues and patient's families. Each student will participate in the UPMC hospital autopsy service, working with pathology residents, attending physicians and pathology assistants as we attempt to answer difficult medical questions, correlate clinical and pathological findings, and present this information to the clinical services. Activities include review of hospital charts and case discussions with clinical services prior to the autopsy; observing autopsy gross dissections; review of histologic slides to make pathologic diagnoses; interpretation of clinical laboratory tests as they relate to the autopsy; and completion of autopsy reports and death certificates. There will also be opportunities for participation in clinical conferences and active presentation at pathology meetings. Objective are to: 1. To learn the policies and procedures for UPMC hospital autopsies. 2. To learn the various myths and misconceptions about autopsies. 3. To learn how to communicate autopsy findings to clinical services and patient's families. 4. To understand how pathologists use clinical information, autopsy gross and microscopic examinations, and clinical testing to conclude a patient's cause of death.

Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSPTH 5427 - THE NODULAR THYROID
Minimum Credits: 0
Maximum Credits: 0
This elective is intended for MSIII and IV level medical students. The student will follow patients through three phases of predominantly outpatient thyroid nodule management including preoperative assessment, operative procedures and postoperative follow-up. Cooperation of the departments of surgery, radiology, endocrine medicine and pathology will be required. The student will maintain a patient log (learning log) and at the conclusion of the rotation will give a 10-15 minute focused presentation on a relevant topic of the student's choice. The student will gain an in depth understanding of the multi-disciplinary approach to thyroid disease. Preoperative phase will include: thyroid interdisciplinary conference; non-gynecologic cytology sign out; molecular anatomic pathology; endocrine clinic; surgery clinic, clinical chemistry; immunopathology; radiologic us guided FNA biopsies; and medical management of non-surgical thyroid disease. Goals of the preoperative phase include: clinical assessment of patients with thyroid nodules and correlation with radiologic, pathologic and molecular data; understanding of thyroid related laboratory values; and applications and limitations of fna of the thyroid. Operative phase will include intraoperative involvement in thyroidectomies; understanding of indications; and complications and postoperative care. Goals of the operative phase include: understanding of the indications and complications of thyroidectomy; lymph node dissection; follow through of thyroid surgical specimens; gross evaluation; microscopic features of specific thyroid processes; and staging of carcinomas. Postoperative phase will include: surgery clinic; discussion with patients regarding thyroid disease; follow-up of surgical pathology cases; and presentation of a relevant topic. Goals for the postoperative phase include: completion of clinical-radiologic-pathologic-molecular correlation of data as applied to diseases of the thyroid.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5430 - CLINICAL IMMUNOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four or eight week elective is designed to provide a broad exposure to both clinical and laboratory immunology. The student will become familiar with the diagnostic evaluations and clinical management of a variety of patients with immunodeficiency diseases or autoimmune disorders. Daily teaching sessions will be held covering patient and laboratory aspects of immunology.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5441 - SURGICAL & PERINATAL PATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
The course meets student current or future career objectives in general surgical, gynecological, obstetrical and perinatal pathology. It includes participation in department activity as patient diagnostic workup, teaching conferences, research project with emphasis on clinico-pathological correlation studies, immunohistochemical, DNA analysis and cytogenetic studies of gynecological tumors, breast tumors, trophoblastic disease, pregnancy loss, placental pathology, perinatal pathology and sexually transmitted disease.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5442 - INTERSTITIAL LUNG DISEASE
Minimum Credits: 0
Maximum Credits: 0
This elective is designed to give students a stronger foundation in interstitial lung disease for internship and residency training. It it emphasizes three
core concepts: (1) the sine qua non of an interdisciplinary approach to lung disease (during this elective involving physicians from at least four different specialties), (2) the indications, benefits and limitations of laboratory testing including blood tests and histologic examination in the setting of lung disease, and (3) the importance of confirming or excluding interstitial lung disease as the cause of shortness of breath, since some interstitial lung diseases are readily curable with intervention while others are potentially devastating. The lungs possess two noteworthy properties. First, their large surface area forms the most extensive interface between the human organism and the environment. However, this interface with is the one most difficult to protect and often even voluntarily exposed to noxious stimuli. Secondly, the lungs are the only organs that encounter the entire cardiac output of blood, and are theoretically exposed to hematogenous factors of all other tissues in the body. It is therefore not surprising that the lungs are often involved in systemic diseases. Despite its anatomic complexity, histologically the lung only exhibits a rather limited repertoire of reaction patterns to injury. The three most important ones are airspace organization, inflammatory infiltrates and fibrosis. Each one has characteristic radiographic and physical examination correlates. Although most clinical entities of lung disease have well described histopathologic findings, many of these entities show significant histopathologic overlap. It is therefore of high importance to integrate the findings and impressions of primary caregivers, radiologists and pathologists in order to arrive at the correct diagnosis and formulate the most appropriate treatment plan. This constitutes the rationale and strength of this elective. While many medical school rotations emphasize and encourage interdisciplinarity, the primary responsibilities of the student usually lies within a single specialty. This elective, although initiated by pathologists, is meant to be a true multidisciplinary and in-depth experience. Students will be held accountable by faculty from all participating specialties. The focus shall be the need for diagnosis and treatment of a patient with lung disease utilizing pathology, radiology and medicine as tools, rather than teaching pathology, radiology or medicine utilizing patients as ways and means.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5450 - PEDIATRIC PATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four or eight week course is to introduce the student to a range of procedures used in diagnostic anatomic pathology as well as in research. This includes anatomic, histologic and histochemical techniques. The student would be expected to take full part in the diagnostic work and daily departmental teaching conferences. Each student will be given a defined research or clinically-oriented problem to be completed by the end of the elective.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5460 - NEUROPATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four or eight week course is offered as an introduction to special aspects of pathology, neurology and neurosurgery. The student will participate in the major academic activities of the unit including multidisciplinary conferences and seminars, brain dissections, microscopic review and investigations in progress within the division.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5471 - HEMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
An introduction to diagnostic hematopathology introducing a state-of-the-art approach to diagnosing disorders of the hematopoietic/lymphoid system, evaluation of proliferations, in-depth exposure to selected disorders, evaluation of peripheral smears and biopsies, a variety of hematologic laboratory tests, and the utility of bone marrow and lymph node examinations.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5480 - PATHOLOGY PRACTICE
Minimum Credits: 0
Maximum Credits: 0
In this four-week clerkship, the student will become familiar with the activities of both clinical and anatomical pathology. The former will encompass brief tours of duty in the hematology, microbiology and clinical chemistry sections of the laboratory. The student assigned to anatomical pathology will visualize the activities of surgical pathology including frozen section diagnosis. Students will also attend autopsies when performed.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5485 - LABORATORY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This four-week elective is designed to provide a broad exposure to the clinical laboratories. The student is exposed to chemistry, hematology, microbiology, immunology, histocompatibility, transfusion medicine, coagulation, point-of-care testing, information systems, laboratory administration and quality assurance. The student learns testing basics, result interpretation, clinical correlation and principles of transfusion medicine. The student also has an opportunity to undertake a small research project. Attendance at all teaching sessions is expected.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5487 - MUSCULOSKELETAL ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
This medical school elective is intended for MS3 and MS4 levels. The goal of the experience is increased awareness of multidisciplinary modalities in the diagnosis of musculoskeletal disease, particularly oncologic processes. The student will rotate through the three main components of the course each week: outpatient orthopedics, musculoskeletal radiology and bone/soft tissue pathology. The student will evaluate patients in outpatient orthopedic clinics with Drs. Goodman, Mcgough and Weiss. Opportunities to scrub in and participate in operative procedures will be incorporated. Review of pertinent radiographic imaging will occur both in clinic and in the UPMC Shadyside radiology department with subspecialty musculoskeletal radiologists. The student will participate in evaluation of musculoskeletal imaging and observe procedures performed by interventional radiologists in order to obtain diagnostic tissue for cytologic and/or histologic examination. The student will also attend surgical pathology sign-out in the upmc department of pathology bone and soft tissue center of excellence. During these exposures to orthopedics, radiology and pathology, the student will maintain a log of patients seen, imaging reviewed and pathology case material reviewed with differential diagnoses and plans for further workup as necessary. Patient follow-up correlation with radiologic and pathologic data and cost effective diagnostic strategies will be emphasized. Experiences in the frozen section laboratory and in the fluorescence in situ hybridization (FICH) laboratory are included. Weekly orthopedic conference is also an important component allowing for complete clinical, radiologic and pathologic correlation. At the conclusion of the rotation, the student will give a 15 minute oral presentation on a relevant topic. The purpose of this course is to outline the diagnostic evaluation of musculoskeletal diseases encountered with attention to cost effective strategies, demonstrate understanding of history and physical examination findings and integrate radiographic and pathologic data where appropriate and demonstrate understanding of the pathologic basis of the disease process and how the pathologic information impacts treatment.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSPTH 5860 - IMMUNOLOGY
Minimum Credits: 0
Maximum Credits: 0
The immunology program in the division is oriented toward basic and clinical immunology genetics. These problems focus on the structure and function of the major histocompatibility complex and the genetic and immunological interactions that occur between the mother and the fetus. The student will learn some of the basic principles of transplantation immunobiology and how basic research in this area impinges on a variety of problems in clinical medicine. A minimum of 2 four-week blocks is required.
Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MSPTH 5861 - BIOLOGY OF CANCER
Minimum Credits: 0
Maximum Credits: 0
This four or eight week course will stress the investigations relevant to clinical oncology. Subjects include carcinogen target cell interactions,
analysis of tumor progression and regression, tumor metastasis, cell differentiation and therapeutic responses. Students will be exposed to various experimental techniques such as electron microscopy, tissue and cell cultures, animal models and selected biochemical studies.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MSPTH 5862 - BIOCHEMISTRY PATHOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This four or eight week elective is to provide students with an experience studying the biochemical basis for both clinical and experimental disease. Students will have a brief rotation through selective areas of the clinical biochemistry laboratory and will then be assigned to work with a staff pathologist, providing review of laboratory data and consultation on unusual clinical problems.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MSPTH 5863 - TUMOR IMMUNOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is designed to provide exposure to basic and clinical aspects of tumor immunology. Students may elect to spend up to four weeks on this rotation. During this elective the student will have the opportunity to investigate various aspects of tumor immunology as it relates to pathophysiology of tumor invasion and metastasis. The student may also have the opportunity of rotating through clinical labs.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MSPTH 5865 - HEAD, NECK AND ORAL PATHOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
The student participates in slide sign-out in the morning and afternoon with the attending pathologists. The slide readings offer a focused review of head, neck and oral histology and histopathology as well as integrate the related case histories. The student also takes part in frozen section call for the operating room with the head and neck pathologist to learn evaluation of gross specimens and appropriate margins of resection. A portion of the rotation will also include participation in clinical consultations in the hospital or outpatient clinics, where experience will be gained in assessment and diagnosis of head and neck pathology. The student also plans a review of slides from the pathology case files to ensure a comprehensive review of head, neck and oral histopathology is obtained. The student attends relevant pathology conferences and ENT tumor board as time and schedule permit. The student will also construct an oral presentation on a pertinent head and neck pathology topic agreed upon between the attending and student.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU5

**MSPTH 5869 - INDEPENDENT STUDY IN PATHOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Opportunity for flexible independent study in anatomic, clinical or investigative pathology for a maximum of 3 months. Must be arranged and approved in advance.

**Academic Career:** MEDS  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

**MSPTH 5900 - EXTRAMURAL PATHOLOGY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
A clinical experience in pathology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U
Pediatric Dentistry

PEDENT 2005 - MASTER'S RESEARCH AND THESIS
Minimum Credits: 1
Maximum Credits: 3
This course will provide the advanced pediatric dentistry specialty resident the opportunity to design, research, and present a thesis at the Master's of dental science level.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PEDENT 2010 - GRAD PEDIATRIC DENT CLINIC 1
Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience in principles of preventive dentistry, cavity preparations and restorative procedures, interceptive orthodontic appliance fabrication, and treatment of the handicapped patient for newly enrolled advanced pediatric dentistry specialty residents.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2020 - GRAD PEDIATRIC DENT CLINIC 2
Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2030 - GRAD PEDIATRIC DENT CLINIC 3
Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients, patients with handicapping conditions, and patients requiring limited orthodontic therapy.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2040 - GRAD PEDIATRIC DENT CLINIC 4
Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2050 - GRAD PEDIATRIC DENT CLINIC 5
Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate, and orofacial abnormalities, patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
PEDENT 2060 - GRAD PEDIATRIC DENT CLINIC 6
Minimum Credits: 1
Maximum Credits: 3
This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2070 - GRAD PEDIATRIC DENT CLINIC 7
Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2080 - GRAD PEDIATRIC DENT CLINIC 8
Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the third year advanced pediatric dentistry specialty resident in the dental treatment of pediatric patients with advanced restorative and orthodontic treatment needs. Rotation through children's hospital of Pittsburgh will be included as part of this clinic.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2090 - GRAD PEDIATRIC DENT CLINIC 9
Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the third year advanced pediatric dentistry specialty resident in the dental treatment of pediatric patients with advanced restorative and orthodontic treatment needs. Rotation through children's hospital of Pittsburgh will be included as part of this clinic.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2100 - GRAD PEDIATRIC DENT CLINIC 10
Minimum Credits: 1
Maximum Credits: 1
This clinic will provide training and experience for the third year advanced pediatric dentistry specialty resident in the dental treatment of pediatric patients with advanced restorative and orthodontic treatment needs.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2110 - GRAD PEDIATRIC DENT SEM 1
Minimum Credits: 1
Maximum Credits: 1
This course will provide an introduction to the specialty of pediatric dentistry. Material on preventive principles, restorative techniques, and dental materials will be provided. Seminars on physical and mental handicapping conditions will be given.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
PEDENT 2120 - GRAD PEDIATRIC DENT SEM 2
Minimum Credits: 1
Maximum Credits: 1
This course will provide an introduction to advanced pediatric dentistry. Various topics on pediatric dentistry are included for discussion. Diagnosis, case presentation and case review will be included in this seminar.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2130 - GRAD PEDIATRIC DENT SEMINAR 3
Minimum Credits: 1
Maximum Credits: 3
This course will provide material to the first year advanced pediatric dentistry specialty resident on pulp biology. Topics on pulp morphology, response and treatment are discussed. Diagnosis, case presentation and case review will be included in this course.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

PEDENT 2140 - GRAD PEDIATRIC DENT SEM 4
Minimum Credits: 1
Maximum Credits: 1
This course will provide material to the first year advanced pediatric dentistry specialty resident on the diagnosis and treatment of traumatic injuries. The use of pharmacotherapeutic agents in the management of the pediatric dental patient will also be discussed in this course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2150 - GRAD PEDIATRIC DENT SEM 5
Minimum Credits: 1
Maximum Credits: 1
This course will provide the second year advanced pediatric dentistry specialty resident material on the dental treatment of patients with cleft lip, cleft palate and/or other craniofacial abnormalities. Topics on genetics, epidemiology, pathogenesis, growth and development, speech, and syndromes will be included in this course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2160 - GRAD PEDIATRIC DENT SEMINAR 6
Minimum Credits: 1
Maximum Credits: 3
This course will provide material to second year advanced pediatric dentistry specialty residents on the maintenance of the dental arch through the use of space maintaining appliances. Additional topics on systemic diseases, fluorides and general anesthesia are discussed.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

PEDENT 2170 - GRAD PEDIATRIC DENT SEM 7
Minimum Credits: 1
Maximum Credits: 1
This course will provide material to the third year advanced pediatric dentistry specialty resident on pediatric dental practice management. Office design, practice finance and payment options are discussed in this course. Computer utilization and practice alternatives are also presented.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PEDENT 2200 - GRAD PEDIATRIC DENT SEM 10
Minimum Credits: 1
Maximum Credits: 1
This course will provide material to the third year advanced pediatric dentistry specialty resident on pediatric dental practice management. Office design, practice finance and payment options are discussed in this course. Computer utilization and practice alternatives are also presented.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2230 - SPECIAL WORK
Minimum Credits: 1
Maximum Credits: 3
This course will provide the opportunity for the advanced specialty resident to pursue the independent study of a topic of interest in pediatric dentistry.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade

PEDENT 5211 - PEDIATRIC DENTISTRY 1
Minimum Credits: 1
Maximum Credits: 1
Course lectures focus on restorative procedures for primary teeth with attention to the anatomy of the teeth, similarities and differences from permanent teeth and the modifications in cavity preparations necessary relative to these morphologic differences. Modifications for application of rubber dam in children are also discussed. The pre-clinic provides practical experiences in these procedures.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PEDENT 5242 - PEDIATRIC DENTISTRY 2
Minimum Credits: 2
Maximum Credits: 2
A preclinical course introducing the second year dental student to current concepts of clinical pediatric dentistry including restorative and space maintenance treatment modalities. A second goal of the course is to present skills and techniques to develop motor coordination in anticipation of clinical care for the pediatric dental patient.

Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

PEDENT 5253 - PEDIATRIC DENTISTRY 3
Minimum Credits: 1
Maximum Credits: 1
A lecture course presenting concepts of arch management, pulpal therapy and traumatic injury treatment for pediatric patients.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PEDENT 5315 - PEDIATRIC DENTISTRY 5
Minimum Credits: 1
Maximum Credits: 1
Course lectures focus on infant oral health, nursing bottle caries, adolescent dentistry, and children with clefts, systemic disorders, and handicapping conditions. Emphasis on the diagnosis of child abuse, periodontal concerns and hard and soft tissue lesions along with surgical procedures will be presented.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PEDENT 5379 - CLINICAL PEDIATRIC DENTISTRY
Minimum Credits: 3
Maximum Credits: 3
This course will focus on preventive and restorative procedures for the pediatric dental patient. Clinical experiences in the diagnosis and treatment planning of children and adolescents will be provided.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PEDENT 5449 - CLINICAL PEDIATRIC DENTISTRY 2**

Minimum Credits: 1  
Maximum Credits: 1  
This course will focus on preventive and restorative procedures for the pediatric dental patient. Clinical experiences in the diagnosis and treatment planning of children and adolescents will be provided.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**PEDENT 5900 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 1  
This course will provide the opportunity for the first professional dental student to pursue the independent study of a topic of interest in pediatric dentistry.

**Academic Career:** DMED  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

**PEDENT 5915 - ADVANCED PEDIATRIC DENTISTRY**

Minimum Credits: 1  
Maximum Credits: 1  
The advanced pediatric dentistry elective is a clinical rotation in the graduate pediatric clinic where the student has the opportunity of treating advanced pediatric restorative and management cases. Treatment of children requiring advanced management techniques including, but not limited to, premedication, n20/02, and general anesthesia will be provided by the dental students under the direct supervision of attending faculty. Advanced treatment planning and restorative procedures will also be undertaken.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**Pediatrics**

**PEDS 5345 - PEDS CLERKSHIP REPEAT COURSE**

Minimum Credits: 0  
Maximum Credits: 0  
This course will be registered when the necessity to record a student's makeup of an unsatisfactory clerkship is required. This course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

**PEDS 5351 - PEDIATRIC INPATIENT MEDICINE**

Minimum Credits: 0  
Maximum Credits: 0  
A 4 week inpatient pediatric clerkship in which students will participate in all aspects of patient care and management. Expectations are to read both the current literature and the standard pediatric textbooks in order to understand childhood growth and development and important pediatric disease processes. Attendance at conferences, lectures and rounds is expected. Students are part of the floor medical team and take call every 4 days. Each student will present a clinicopathologic conference (CPC). At the end of the rotation a 3 hour multiple choice exam is given.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U
PEDS 5386 - INDIVIDUAL STUDY OR RESEARCH
Minimum Credits: 0
Maximum Credits: 0
The department of pediatrics will arrange an individual study or research experience for third year medical students in an area of their interest.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

PEDS 5401 - ADV PEDIATRIC IN-PATIENT (AI)
Minimum Credits: 0
Maximum Credits: 0
Four week acting internship at children's hospital. Students have same responsibility as intern-total patient care including complete history, physical exam, assessment lab data, case formulation, communication with attending and referring physician, formulation of discharge plans, discharge summary. Performance of procedures including lumbar punctures, iv and intra-arterial punctures, bladder tap, bone marrow aspiration, performance and interpretation gram stain of CSF, blood smear for red cell, white cell platelet morphology. Interpret routine films and urinalysis.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5406 - EXTRAMURAL ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Students will register for this course when participating in a pediatric acting internship at an institution outside of the University of Pittsburgh School of Medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5410 - PRIMARY CARE PEDIATRICS
Minimum Credits: 0
Maximum Credits: 0
The general purpose of this elective is to provide students with component experiences of a primary care physician. To this end, the student will 1) examine newborn infants in a neonatal high-risk setting, counsel parents regarding well baby issues and help formulate plans for common newborn problems; 2) develop management plans for children who present for initial neonatal visits, acute illnesses and chronic problems; 3) enhance knowledge of common pediatric behavioral and developmental issues and diagnosis and follow-up of otitis media & 4) learn how to provide telephone advice.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5421 - ALLERGY AND IMMUNOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four week elective offers an opportunity to participate in the clinical evaluation and management of ambulatory patients who present with a large variety of immunologically mediated diseases of either hypersensitivity or deficient immune response origin. Under supervision, students will carry out the initial evaluation and subsequent re-evaluation of patients with asthma, allergic rhinitis, urticaria, drug allergy, insert allergy, immunodeficiency syndromes, as well as a large variety of clinical immunology and/or collagen-vascular diseases.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5425 - PEDIATRIC RHEUMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
The students will get outpatient and inpatient exposure in the field of pediatric rheumatology with a particular emphasis on outpatient clinics. There is in-depth one-on-one teaching through the pediatric rheumatology attending physicians. Students will generally work with one particular attending physician for a clinic section, but will be exposed to different attending physicians throughout the rotation. The student will be directly involved in patient care, assessment and decision-making. Participation in academic conferences and selected lectures is mandatory.
PEDS 5430 - PEDIATRIC CARDIOLOGY
Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital. Diagnosis and management of child with congenital and rheumatic heart disease. Interpret EKG, echocardiograms and chest roentgenograms. Observe cardiac catheterization lab, take pediatric cardiac history, attend cardiac catheterization and cardiac surgery conferences. Pursue basis of selection of patients for cardiac catheterization and cardiac surgery.

PEDS 5440 - ENDCRNLGY, METBLSM & DIABETES
Minimum Credits: 0
Maximum Credits: 0

PEDS 5450 - PEDIATRIC INFECTIOUS DISEASES
Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital of consult experience on infectious disease of hospitalized pediatric patients including rounds, lectures, conferences and seminars. Study antibiotic therapy, diagnosis and management of CNS, pulmonary and urinary tract infections. Evaluate gram-stained smear, urine cult results and antibiotic tests.

PEDS 5455 - PEDIATRIC DERMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
Medical students will be exposed to both common and rare skin disorders seen in both outpatient and inpatient settings. Objectives: 1) develop a familiarity with terminology used to describe primary and secondary skin lesions; 2) develop a familiarity with both the diagnosis and treatment of common skin disorders such as, acne and eczema, lesions, such as hemangiomas and nevi, as well as rare skin conditions such as Geno dermatoses including ichthyoses and epidermolysis bullosa; 3) develop interviewing skills with pediatric patients and their families; 4) obtain experience in performing cutaneous physical exams in pediatric patients.

PEDS 5460 - NEONATOLOGY
Minimum Credits: 0
Maximum Credits: 0
Four week elective at Magee Women's Hospital neonatal intensive care unit joining residents as acting intern. Experience in all areas of newborn care including recognition and treatment of critical infants. Perform exams, utilize basic lab procedures and x-ray, perform umbilical vessel catherization, arterial and venous puncture, bladder tap, endotracheal intubation. Discuss dynamics of sick, premature and dying infants.

PEDS 5465 - BREASTFEEDING ELECTIVE
This elective will prepare future physicians, especially those pursuing careers in OB/GYN, family physicians, pediatrics and internal medicine, to support women to breastfeed. During this four week elective, students will see mother-infant dyads in the newborn follow-up clinic in primary care center, seeing patients with other providers of lactation services in the hospital and community setting and completing directed readings.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LU/U

### PEDS 5470 - GENETICS

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week clinic and laboratory elective at children's hospital. Diagnostic and genetic counseling of common and rare hereditary disorders, syndromes of congenital anomalies, evaluation of in-and-out patients. Lab experience in cytotechnology techniques including interpreting karyotypes.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LU/U

### PEDS 5480 - NEPHROLOGY

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week elective at children's hospital. In- and outpatient rounds and consults, participation in hypertension and pathology conferences. Understanding of urinalysis; evaluation of laboratory studies and radiology of renal disease, electrolyte disorders and pediatric hypertension.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LU/U

### PEDS 5490 - HEMATOLOGY/ONCOLOGY

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week elective at Children's Hospital. Clinic exposure to pediatric hematology and oncology problems in outpatient chemotherapy unit and various inpatient services. Participate in hematology/oncology clinics and sickle cell clinics. Instruction in peripheral blood and marrow morphology. Participate in rounds and lectures and extensive reading.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LU/U

### PEDS 5491 - NEONATOLOGY

The clinical elective in neonatology at Children's Hospital is designed to provide the student with an experience in neonatology that emphasizes the multidisciplinary care of the critically ill newborn. The CHP unit is the region's only level IIIC NICU, and offers the highest level of neonatal care, including surgical services and ECMO. As a referral center, the CHP NICU cares for a unique population of high-acuity, medically-complex infants with a wide variety of problems, including cardiorespiratory failure, infections, surgical issues, genetic disorders and congenital anomalies. Currently, the newborn medicine program only offers an elective in the Magee-Womens hospital NICU, which cares for a very different population of infants, with an emphasis on premature infants and infants with transient problems related to the neonatal transition. The elective rotation in the CHP NICU will offer students exposure to a one-of-a-kind patient population, a full-spectrum of neonatal medicine, and a level of multidisciplinary care not available anywhere else in the region. Students will join the CHP NICU team under the direct supervision of neonatology faculty. The NICU team is made up of attending neonatologists, neonatal-perinatal medicine fellows, neonatal nurse practitioners, pediatric residents, neonatal nurses, and specialized ancillary providers, including pharmacists, nutritionists and therapists. The student will be involved in all aspects of care, including initial assessment, stabilization, diagnostic evaluation and ongoing ICU management. The student will perform procedures such as arterial puncture, umbilical arterial or venous catheterization, lumbar puncture, thoracentesis, paracentesis and endotracheal intubation under the supervision of NICU staff. The student will gain experience in family-centered care. Students will be supervised directly by newborn medicine faculty, with one-on-one precepting throughout the rotation. Newborn medicine fellows and neonatal nurse practitioners will be available as teaching resources. The course director is available in the NICU should the student require additional support. Educational methods will include bedside teaching focused on the student's panel of patients, daily NICU rounds, demonstration of clinical skills and procedures, and didactic sessions (the newborn medicine program's seminars in neonatal medicine, core lecture series, and newborn grand rounds). Key references will be provided. Students may attend sessions of the AAP/AHA neonatal resuscitation program (scheduled bimonthly). The course director will provide an updated schedule of educational activities on the first day of the rotation. This 4 week inpatient rotation takes place in the neonatal intensive care unit at CHP. Students
will assume the care of a panel of 2-4 NICU patients, selected according to their interests

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5500 - EMERGENCY PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital in emergency department. Experience in assessment and management of acute illnesses and injuries. Technical skills such as drawing blood, starting IVs, lumbar punctures. Interpret lab studies and x-rays in acute situations. Distinguish mildly acute from serious in emergency situations. Interaction skills with acutely ill and injured child.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5510 - PEDIATRIC GASTROENTEROLOGY

Minimum Credits: 0
Maximum Credits: 0
Four week elective at children's hospital involves supervised direct patient contact and formal didactic sessions including inpatient consults, outpatient clinics and assisting in all GI procedures. Eight week research elective provides opportunity to gain skills in clinical or basic investigation of bile acid metab, gastroesophageal reflux or GI immunology.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5520 - DEVELOPMENTAL PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
Four week elective in child development unit. Focuses on normal child development and development and behavioral disabilities. Includes didactic sessions, reading, field experience and team assessments in outpatient clinic setting. Develop assessments of inpatients at children's hospital and in the ICU at Magee Women's Hospital.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5521 - TRIPLE BOARD PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0
This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at Children's Hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5530 - POISON CENTER

Minimum Credits: 0
Maximum Credits: 0
4 week elective at poison center. Basic principles of managing cases of exposure to toxic materials. Under close supervision, manage poison case via the telephone. Exposure to principals of development and operation of a poison center. Includes rounds on toxicology patients at Children's Hospital. 8 week elective includes independent research.

Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

PEDS 5540 - PEDIATRIC PULMONOLOGY
Minimum Credits: 0
Maximum Credits: 0
4 week elective at Children's Hospital. Includes history taking, physical exam, choice of diagnostic procedures, perform pulmonary lab tests, reading chest radiographs. Inpatient, outpatient and ICU patients seen. Basic review of pulmonary physiology. Observe and participate in lab testing procedures, interpret results with staff. Observe and help in research projects and clinical investigation.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5550 - ADOLESCENT MEDICINE**
Minimum Credits: 0
Maximum Credits: 0
4 week elective at children's hospital. Includes normal and abnormal adolescent development, reading and discussion. Learn exam skills and lab testing. Diagnosing sexually-related problems. Participate in psychosocial assessments of teens. Work in outpatient clinic and inpatient consults.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5560 - AMBULATORY PEDIATRICS**
Minimum Credits: 0
Maximum Credits: 0
This four-week elective is designed to provide a primary care pediatric experience in a community setting. The hours and specific duties will be determined by each practice. The student is responsible for contacting and setting up the elective and then obtaining approval from the medical student program director in the department of pediatrics. Supervision and evaluation is provided by the primary care physicians in the practice.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5570 - ADOLSCNT AND YOUNG ADLT MEDICN**
Minimum Credits: 0
Maximum Credits: 0
This four week elective encompasses a diverse offering in adolescent and young adult medicine. Its clinical content is based at an urban teaching hospital and its college health affiliates. Daily rounds, preceptorships and conferences are part of the rotation with supervision by mercy's full-time pediatric faculty.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5580 - SCHOOL HEALTH**
Minimum Credits: 0
Maximum Credits: 0
This elective is designed to provide a unique school health experience utilizing urban and suburban schools including school based clinics for teaching sites. This specialized experience will include experience with health education, team meetings and school consultation.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

**PEDS 5650 - INDIVIDUALIZED CLINICAL COURSE**
Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of pediatrics to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: MEDS
Course Component: Lecture
Grade Component: H/HS/S/LS/U
PEDS 5720 - MOLECULAR MEDICINE (ILS)
Minimum Credits: 0
Maximum Credits: 0
This course is designed to teach the fourth year medical student some basics of molecular biology and how molecular techniques are being employed to diagnose and treat disease. This course will focus on several single-gene diseases. Forensic use of DNA will also be featured. This course will have 3 lectures and 3 clinics per week and each student will be obliged to give a presentation on a topic selected.
Academic Career: MEDS
Course Component: Lecture
Grade Component: H/HS/S/LS/U

PEDS 5845 - PEDIATRIC RESEARCH
Minimum Credits: 0
Maximum Credits: 0
4 week research elective available with individual pediatric faculty members at children's hospital.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

PEDS 5899 - INDEPENDENT STUDY PEDIATRIC
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

PEDS 5900 - EXTRAMURAL PEDIATRICS
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in pediatrics may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Periodontics

PERIO 2100 - MASTER'S RESEARCH AND THESIS 1
Minimum Credits: 1
Maximum Credits: 3
The candidate for a certificate in periodontics has the option of doing research and writing a thesis for the Master's degree. The student must select the type of research that they wish to pursue.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PERIO 2110 - PERIO SPECIALTY CLINIC 7
Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
PERIO 2111 - PERIODONTAL LIT REVIEW 1
Minimum Credits: 2
Maximum Credits: 2
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2112 - SPEC TOPICS IN PERIODONTICS 1
Minimum Credits: 0
Maximum Credits: 0
This seminar will feature guest lecturers invited to present specific topics related to the practice of periodontics and periodontal therapy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2113 - TMJ JOINT DISORDERS - 1
Minimum Credits: 0
Maximum Credits: 0
The graduate student will review craniomandibula structure and function will be taught to diagnose, determine the etiology of, and classify temporomandibular disorders. Both didactic and clinical instruction in the management of these patients will be provided.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2114 - MINERALIZED TISSUE BIOLOGY
Minimum Credits: 1
Maximum Credits: 1
Understanding the present efforts to elucidate mechanisms for bone healing encompasses study of numerous growth factors and signaling molecules. The role of each factor will be described and related to potential therapeutic products. At the completion of the course the student will be familiar with bone biology; given the opportunity to demonstrate capacity for critical evaluation of a paper on tissue engineering and its foundation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PERIO 2115 - ANESTH PRINC PERIODONTOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

PERIO 2117 - PERIODONTICS AND OCCLUSION
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide the graduate student with a review of the literature on the relationship of occlusion on the periodontium. This also includes the basic concepts of occlusion and its relationship to temporo-mandibular problems.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2119 - PERIODONTICS SPECIALTY CLINC 1
Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of
periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2120 - PERIO SPECIALTY CLINIC 8**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2130 - PERIODONTICS SPECIALTY CLINIC 9**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2140 - PERIODONTAL TREATMENT PLANNING 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2141 - PERIODONTAL TREATMENT PLANNING 5**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2142 - PERIODONTICS JOURNAL CLUB - 1**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science and practice of periodontics. It will focus on correlating and comparing new information with established concepts.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2143 - TREATMENT PLANNING SEMINAR**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This is a multidisciplinary didactic and clinical course planned to provide prosthodontic and periodontic residents with a systemic approach to diagnosis, treatment planning, and management of partially edentulous patients.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade
PERIO 2144 - PERIO ASPCTS OF DENTL IMPLANTS
Minimum Credits: 1
Maximum Credits: 1
This course is designed to present to the graduate resident the different implants systems, selection criteria of implant cases, and guided tissue regeneration as it applies to implantology. The management of failing implants will be also discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2145 - INTERDISCIPLINARY SEMINAR - 1
Minimum Credits: 1
Maximum Credits: 1
This seminar will bring together several dental disciplines to evaluate case situations and develop comprehensive treatment plans. Mutual appreciation of the aspects and problems facing each specialty will be developed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2146 - PERIODONTAL RESEARCH 1
Minimum Credits: 1
Maximum Credits: 3
The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PERIO 2147 - IMPLNT PROSTHDNT SEMINAR 2
Minimum Credits: 2
Maximum Credits: 2
This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2148 - PERIODONTAL RESEARCH 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2149 - PERODONTICS SPECIALITY CLINC 2
Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the first year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2150 - PERIO SPECIALITY CLINIC 10
Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2151 - PERIODONTAL LITRATUR REVIEW 2
Minimum Credits: 2
Maximum Credits: 2
Literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2152 - PERIODONTAL TREATMENT PLANNG 2
Minimum Credits: 2
Maximum Credits: 2
This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2153 - ANESTH PRINC PERIODONTOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

PERIO 2160 - PERIO SPECIALTY CLINIC 11
Minimum Credits: 1
Maximum Credits: 1
This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2170 - PERIODONTICS AND OCCLUSION
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide the graduate student with a review of the literature on the relationship of occlusion on the periodontium. This also includes the basic concepts of occlusion and its relationship to temporo-mandibular problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2180 - PERIODONTIC LITRATUR REVIEW 7
Minimum Credits: 2
Maximum Credits: 2
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
PERIO 2181 - PERIODONTAL LITERATURE REVIEW 8
Minimum Credits: 2
Maximum Credits: 2
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2182 - PERIO LITERATURE REVIEW 9
Minimum Credits: 2
Maximum Credits: 2
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2183 - LITERATURE REVIEW SEMINAR 3
Minimum Credits: 2
Maximum Credits: 2
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2184 - LITERATURE REVIEW 4
Minimum Credits: 3
Maximum Credits: 3
The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2190 - ADVANCED PERIODONTAL CONCEPTS
Minimum Credits: 2
Maximum Credits: 2
This advanced periodontal concepts course is designed to familiarize the graduate student with advanced concepts in the science and art of clinical periodontics through intensive study of textbooks and by means of clinical demonstrations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 2199 - INTRO TO PERIO SPECIALTY CLINC
Minimum Credits: 3
Maximum Credits: 3
This course allows the resident to select a special project.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PERIO 2210 - SPEC TOPICS IN PERIODONTICS 4
Minimum Credits: 1
Maximum Credits: 1
This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### PERIO 2211 - PERIODONTAL LIT REVIEW 3

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### PERIO 2212 - SPEC TOPICS IN PERIODONTICS 2

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This seminar will continue the guest lecture series related to specific topics in periodontics.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### PERIO 2213 - HOSPITAL PERIODONTICS - 1

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA Residents in the periodontal care of VA patients.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### PERIO 2216 - PERIODONTAL RESEARCH 3

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

### PERIO 2218 - PRIN OF PERIODONTAL EDUC - 2

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course provides experience in clinical and didactic teaching of periodontal concepts and periodontal treatment by graduate students.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### PERIO 2219 - PERIO SPECIALTY CLINIC 12

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade
PERIO 2220 - PERIODONTICS SEMINAR 2
Minimum Credits: 2
Maximum Credits: 2
This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2223 - PERIODONTICS JOURNAL CLUB - 3
Minimum Credits: 1
Maximum Credits: 1
This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2230 - SPEC TOPICS IN PERIODONTICS 3
Minimum Credits: 1
Maximum Credits: 1
This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2240 - PERIODONTAL TREATMENT PLANNING 2
Minimum Credits: 1
Maximum Credits: 1
This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2241 - HOSPITAL PERIODONTICS 2
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA residents in the periodontal care of VA patients.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2242 - PERIODONTICS JOURNAL CLUB 2
Minimum Credits: 1
Maximum Credits: 1
This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2243 - IMPLANTOLOGY
This is a clinical course offered in conjunction with the department of oral and maxillofacial surgery in the school of dental medicine. Residents in the graduate periodontics program will rotate through the oral and maxillofacial surgery department and Montefiore Hospital. This course will help the graduate periodontics resident to interact with the oral and maxillofacial resident and will place some implants in conjunction with the oral and maxillofacial surgery residents.

**PERIO 2244 - PERIODONTAL LITERATURE REVIEW 4**
- **Minimum Credits:** 2
- **Maximum Credits:** 2
- A literature review seminar designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.
- **Academic Career:** GRAD
- **Course Component:** Seminar
- **Grade Component:** Grad Letter Grade

**PERIO 2245 - INTERDISCIPLINARY SEMINAR - 2**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- This course will focus on the interaction of different dental disciplines in analyzing dental conditions and determining comprehensive treatment plans.
- **Academic Career:** GRAD
- **Course Component:** Seminar
- **Grade Component:** Grad Letter Grade

**PERIO 2246 - PERIODONTAL RESEARCH 4**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- Continuation of ongoing research to finalize protocols and initiate pilot studies.
- **Academic Career:** GRAD
- **Course Component:** Seminar
- **Grade Component:** Grad Letter Grade

**PERIO 2247 - PERIODONTAL TREATMENT PLANNING 3**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.
- **Academic Career:** GRAD
- **Course Component:** Seminar
- **Grade Component:** Grad Letter Grade

**PERIO 2249 - PERIODONTICS SPECIALTY CLINIC 4**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- This course is the clinical practice of periodontics for second year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planning and periodontal surgery.
- **Academic Career:** GRAD
- **Course Component:** Clinical
- **Grade Component:** Grad LG/SU3 Basis

**PERIO 2250 - SPEC TOPICS IN PERIODONTICS 5**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The
presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2253 - PERIO TREATMENT PLANNING 4**

Minimum Credits: 1  
Maximum Credits: 1  
This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2254 - PERIODONTICS JOURNAL CLUB 4**

Minimum Credits: 1  
Maximum Credits: 1  
This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2260 - SPEC TOPICS IN PERIODONTICS 6**

Minimum Credits: 1  
Maximum Credits: 1  
This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PERIO 2280 - SPECIAL WORK**

Minimum Credits: 1  
Maximum Credits: 3  
This course allows the resident to select a special project.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2288 - SPECIAL WORK - 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course allows the resident to select a special project.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PERIO 2289 - PERIODONTICS SPECIALTY CLINIC 3**

Minimum Credits: 1  
Maximum Credits: 1  
Continuation of previous periodontics specialty clinic courses involving increasing complexity of case types and treatments.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

**PERIO 2300 - MASTER'S RESEARCH AND THESIS 3**
The candidate for a certificate in periodontics has the option of doing research and writing a thesis for a Master's degree. The student must select the type of research that they wish to pursue.

**Academic Career**: GRAD  
**Course Component**: Thesis Research  
**Grade Component**: Grad SN Basis

---

**PERIO 2311 - CELL BIOLOGY AND BIOCHEMISTRY**

Minimum Credits: 2  
Maximum Credits: 2  
Update of selected topics in biochemistry and cell biology for understanding the etiology and pathogenesis of periodontitis and regeneration of periodontal attachment apparatus. Topics include structure and functions of eukaryotic cells; composition and assembly of extracellular matrix and basement membranes; adhesion spreading differentiation of eukaryotic cells; mineralized and non-mineralized tissues; turnover of connective tissues in health and disease; tissue response (inflammation and wound healing); bone formation, remodeling, pathologic bone loss and bone regeneration.  
**Academic Career**: GRAD  
**Course Component**: Seminar  
**Grade Component**: Grad Letter Grade

---

**PERIO 2312 - MICROBIOLOGY AND IMMUNOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
Current topics in microbiology immunology assessing impact on concepts of pathogenesis of periodontal diseases. Topics include mechanisms of bacterial pathogenesis-extracellular factors, cell surface components and carries and periodontal diseases; bacterial adhesion-initial events in host-microbe interactions; environmental regulation of virulence; invasion of host cells and tissues-evasion of the immune response; mediators of the immune response; new strategies for development and delivery of antimicrobials and vaccine development and immunopathogenesis of periodontitis.  
**Academic Career**: GRAD  
**Course Component**: Seminar  
**Grade Component**: Grad Letter Grade

---

**PERIO 2313 - HOSPITAL PERIODONTICS 3**

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.  
**Academic Career**: GRAD  
**Course Component**: Seminar  
**Grade Component**: Grad Letter Grade

---

**PERIO 2314 - PERIODONTICS JOURNAL CLUB 5**

Minimum Credits: 0  
Maximum Credits: 0  
Periodontics journal club 5 provides a continuing review of the recent dental and medical journals.  
**Academic Career**: GRAD  
**Course Component**: Seminar  
**Grade Component**: Grad Letter Grade

---

**PERIO 2315 - PERIODONTICS JOURNAL CLUB 6**

Minimum Credits: 1  
Maximum Credits: 1  
Periodontics journal club 6 provides a continuing review of recent dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.  
**Academic Career**: GRAD  
**Course Component**: Seminar  
**Grade Component**: Grad Letter Grade

---

**PERIO 2316 - PERIODONTICS RESEARCH 5**
Minimum Credits: 1
Maximum Credits: 1
Continuation of ongoing research to finalize and complete the data and start writing a thesis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2317 - PERIODONTICS RESEARCH 6
Minimum Credits: 1
Maximum Credits: 1
Continuation of ongoing research to finalize the research project and complete writing a thesis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2318 - PERIODONTICS SPECIALTY CLINC 5
Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2319 - PERIODONTICS SPECIALTY CLINC 6
Minimum Credits: 3
Maximum Credits: 3
This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants. The course involves increasing complexity of case types and treatments.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2320 - PERIODONTAL LITRATUR REVIEW 5
Minimum Credits: 2
Maximum Credits: 2
The periodontal literature review 5 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2321 - PERIO LITERATURE REVIEW 6
Minimum Credits: 2
Maximum Credits: 2
The literature review 6 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals. The review of the literature also includes basic science literature and its relation to treatment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2322 - PERODONTAL TREATMENT PLANNG 6
Minimum Credits: 1
Maximum Credits: 1
This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2341 - HOSPITAL PERIODONTICS 4
Minimum Credits: 1
Maximum Credits: 1
This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5110 - ADVANCED PERIODONTICS
Minimum Credits: 0
Maximum Credits: 0
This course is designed to provide the first professional student with lectures and demonstrations on advanced types of therapy used in the treatment of periodontal disease.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

PERIO 5141 - PERIODONTOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
The 21st century dentist will see a shifting paradigm toward a more significant and possibly dominant role of bioscience in our biochemical profession. The course continuum of periodontology i and ii will review and show application of the relevant basic science principles utilized in the field of periodontology. It will then build upon those basic principles in helping to achieve diagnostic, therapeutic, and preventive skills in the management of periodontal diseases. A major emphasis will be placed on the effect of oral health/disease on the systemic health/disease of our patients. Finally, in light of current, ongoing, and expanding research in the area of oral/systemic relationships, emphasis will be placed on the combined and cooperative roles of both the dentist and physician in providing comprehensive healthcare to our patients.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5149 - CLINICAL PERIODONTICS 1
Minimum Credits: 0
Maximum Credits: 0
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

PERIO 5151 - PREVT DEN-INTRO PERIO CLINIC
Minimum Credits: 1
Maximum Credits: 1
The course is intended to introduce the dental student to preventive measures via lectures and preclinical seminars. Various topics such as health vs. Unhealthy oral structures, the role of plaque in dental disease, nutritional aspects of oral health, fluorides, pit and fissure sealants, remineralization, are presented during the lecture series. Gingival and plaque indices are used to monitor student's progress in achieving an adequate plaque control level.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5172 - PERIODONTOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade
PERIO 5178 - INTRO TO CLINICAL PERIODONTICS
Minimum Credits: 1
Maximum Credits: 1
This course will provide students with information and training in all phases of periodontal screening and evaluation, basic demonstration of oral hygiene procedures and professional tooth cleaning by polishing teeth and basic supragingival scaling. The teaching methods employed will include lectures and discussion, one-on-one instruction and demonstration and hands-on student participation.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

PERIO 5210 - INSTRUMENTATION PROCEDURES
Minimum Credits: 1
Maximum Credits: 1
This course is intended to introduce the dental student to the proper use of instrumentation for performance scaling and root planing procedures via lectures and simulation clinic exercises. Topics such as rest position, fulcrums, instrument grasp(s), and operator positioning will be covered.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5211 - PERIODONTOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide didactic instruction that teaches the student to diagnose periodontal health and to recognize the changes that occur in the transition from health to disease. Major emphasis will be placed on the biology of the healthy periodontium, the epidemiology, etiology, and the clinical radiographic and histological features of periodontal disease.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5212 - PERIODONTOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5213 - PERIODONTAL CLINIC 1
Minimum Credits: 0
Maximum Credits: 0
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PERIO 5240 - INSTRUMENTATION PROCEDURES
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5242 - PERIODONTOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
Second year students will receive instruction in the etiology of periodontal diseases, clinical examination and charting. They will be taught to arrive at a diagnosis, determine the prognosis, and devise a treatment plan. Finally, the following periodontal therapy will be demonstrated and discussed: chemical and mechanical control of plaque, and scaling and root planing; reevaluation; periodontal surgery -- indications, contraindications, goals,
and maintenance.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

**PERIO 5243 - PERIODONTAL CLINIC**
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

**PERIO 5279 - CLINICAL PERIODONTICS 1**
Minimum Credits: 3
Maximum Credits: 3
Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning patient communication, patient home care instructions, subgingival scaling and root planning, instrument sharpening selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

**PERIO 5313 - PERIODONTAL CLINIC 3**
Minimum Credits: 1
Maximum Credits: 1
Third year students will receive instruction in clinical examination and charting, occlusion and surgical anatomy. They will be taught to arrive at a diagnosis and treatment plan. Finally, the following periodontal therapy will be discussed: introduction to periodontal surgery, different types of periodontal surgery, suturing, post-operative management, periodontal considerations in restorative, orthodontics, and periodontal treatment, maintenance.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

**PERIO 5319 - CLINICAL PERIODONTICS 2**
Minimum Credits: 2
Maximum Credits: 2
Procedures will include clinical diagnostic methods, treatment decision making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

**PERIO 5343 - PERIODONTAL CLINIC 3**
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

**PERIO 5344 - PERIODONTAL CLINIC 5**
Minimum Credits: 1
Maximum Credits: 1
Third year students will receive instruction in occlusion adjustment, TMJ dysfunction syndrome, indications for periodontal surgery, osseous surgery, guided tissue regeneration, treatment of furcation defects, mucogingival surgery, splints, and treatment of acute periodontal conditions.

Academic Career: DMED
PERIO 5349 - CLINICAL PERIODONTICS 3
Minimum Credits: 2
Maximum Credits: 2
Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 5359 - CLINICAL PREVENTIVE DENTISTRY
Minimum Credits: 3
Maximum Credits: 3
This clinical course will provide patient care with a focus on patient education and the role of bacterial plaque in dental diseases and dental prophylactic procedures.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

PERIO 5376 - PERIODONTOLOGY 6
Minimum Credits: 1
Maximum Credits: 1
This course will introduce the fourth year dental student to some of the more recent advances in periodontics and periodontal research. Topics covered will include mechanisms of bacterial infectious disease, concepts of disease activity, new diagnostic tests, antimicrobial therapies, efficacy of non-surgical vs. Surgical therapy, implantology, and periodontics in the practice of dentistry.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5379 - CLINICAL PERIODONTOLOGY 4
Minimum Credits: 3
Maximum Credits: 3
Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and soft tissue grafts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 5389 - CLINICAL PREVENTIVE DENTISTRY
Minimum Credits: 3
Maximum Credits: 3
This clinical course will provide patient care with a focus on patient education and the role of bacterial plaque in dental diseases and dental prophylactic procedures.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 5415 - PERIODONTOLOGY 6
Minimum Credits: 1
Maximum Credits: 1
This course will introduce the fourth year dental student to some of the more recent advances in periodontics and periodontal research. Topics covered will include mechanisms of bacterial infectious disease, concepts of disease activity, new diagnostic tests, antimicrobial therapies, efficacy of
non-surgical vs. Surgical therapy, implantology and periodontics in the practice of dentistry.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5419 - CLINICAL PERIODONTICS 5
Minimum Credits: 2
Maximum Credits: 2
Procedures will include clinical diagnostic methods, treatment decision making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

PERIO 5449 - CLINICAL PERIODONTICS 6
Minimum Credits: 2
Maximum Credits: 2
Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning. Patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and soft tissue grafts.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 5459 - CLINICAL PREVENTIVE DENTISTRY
Minimum Credits: 3
Maximum Credits: 3
This clinical course will provide patient care with a focus on patient education and the role of bacterial plaque in dental diseases and dental prophylactic procedures.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PERIO 5489 - CLINICAL PERIODONTICS
Minimum Credits: 3
Maximum Credits: 3
This clinical course will provide patient care with a focus on patient education and the role of bacterial plaque in dental diseases and dental prophylactic procedures.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 5817 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.

Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

PERIO 5847 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.

**Academic Career:** DMED

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SU3 Basis

---

**PERIO 5900 - INDEPENDENT STUDY**

Minimum Credits: 1
Maximum Credits: 3
This course is designed to provide the student with an opportunity to conduct in-depth study in a particular subject area of their choice.

**Academic Career:** DMED

**Course Component:** Independent Study

**Grade Component:** Grad LG/SU3 Basis

---

**PERIO 5910 - ADVANCED PERIODONTICS**

Minimum Credits: 3
Maximum Credits: 3
Dental students will have the opportunity to become familiar with periodontal surgical concepts and techniques through study of the periodontal literature and through participation in mentor - resident and faculty supervised periodontal flap procedures.

**Academic Career:** DMED

**Course Component:** Clinical

**Grade Component:** Grad HSU Basis

---

**PERIO 5911 - SURGICAL ASPCTS DENTL IMPLANTS**

Minimum Credits: 2
Maximum Credits: 2
This course will enable the participant to gain didactic and clinical knowledge in the following aspects of dental implants: basic concepts; treatment planning; order of treatment; basic flap surgery; suturing techniques; failures; management of peri-implantitis; implant types; systems and designs; biomechanics; patient management; and preparation.

**Academic Career:** DMED

**Course Component:** Lecture

**Grade Component:** Grad LSU Basis

---

**PERIO 5920 - TEMPORMAND JOINT SYNDROME**

Minimum Credits: 0
Maximum Credits: 0
This course provides the student with a review of the anatomy of the head and neck and its relationship to the temporomandibular joint problem. It also includes the examination and treatment of patients with a TMJ problem. Therapy includes the use of splints and the restoration of occlusion.

**Academic Career:** DMED

**Course Component:** Clinical

**Grade Component:** Grad HSU Basis

---

**PERIO 5930 - PREVENTIVE DENTSTRY IN PRACTC**

Minimum Credits: 0
Maximum Credits: 0
This course will help to integrate preventive measures in general practice and specialities; it will investigate such topics as flouridation, pit and fissure sealants, nutrition, remineralization. Participants will visit various dental offices, report to the group, as well as read assigned topics.

**Academic Career:** DMED

**Course Component:** Lecture

**Grade Component:** Grad HSU Basis

---

**PERIO 5940 - ADVANCED PERIODONTICS - 2**

Minimum Credits: 3
Maximum Credits: 3
This course has an overall goal of allowing hands-on exposure to flap access surgery. The student will participate in pre-surgical evaluation and surgical treatment planning of patients with mild and/or moderate periodontal disease, and patients in need of crown elongation surgery. Through observation and participation with their mentor-resident and faculty, they will learn to apply proper flap design, periodontal flap incisions and reflection, surgical debridement and flap closure.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

---

**PERIO 5941 - TEMPOROMANDIBULAR DISORDERS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will provide a background on the treatment of temporomandibular disorders using non-invasive/minimally invasive means, such as occlusal appliances (biteguards/nite guards). The documentation of TMD, its treatment using biteguards, minor/local occlusal adjustments, palliative therapy and/or biofeedback stress management will be reviewed.

**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

---

**Pharmacology**

**PHARM 2000 - PHARMACO-THERPUTCS IN NURSNG**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course describes the pharmacokinetics and pharmacotherapeutics of selected drugs.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 2001 - PHARMACEUTICAL ANALYSIS**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
Current methods utilized in pharmaceutical research for the analysis and isolation of drugs and their metabolites. Theories of extraction, solvent partition and forms of chromatography (adsorption, partition, gas, liquid, counter current, ion exchange, gel-filtration and electrophoresis) are discussed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 2002 - ADVANCED PHARMACOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course is designed primarily for graduate students in the health sciences who require an appreciation of pharmacology in their careers. The one term course defines basic principles of drug action, drug disposition and pharmacokinetics. Specific areas of discussion include central nervous system, cardiovascular, respiratory, gastrointestinal and endocrine pharmacology.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHARM 2003 - INTRO TO PHARMACOEPIDEMIOLOGY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population.

**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

**PHARM 2004 - DRUG METABOLISM**
Minimum Credits: 2
Maximum Credits: 2
This lecture course deals largely with the metabolism of drugs and other xenobiotics by human and other mammalian systems. The implications of induction and inhibition of metabolic enzymes are presented as a background for the introduction to the study of drug-drug interactions. The use of model systems in metabolic studies is presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

**PHARM 2005 - RESEARCH DISCUSSION COURSE**
Minimum Credits: 2
Maximum Credits: 2
Course is designed for students enrolled in the non-thesis MS program. The focus of the course is enhancement of the students' understanding of scientific literature and research methodologies. It will also provide an opportunity for students to learn about and discuss research careers, challenges of clinical vs. Preclinical research, research ethics, and professional development.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

**PHARM 2007 - SPECIAL TOPICS IN DRUG RSRCH**
Minimum Credits: 3
Maximum Credits: 3
Various topics that are currently of interest to pharmaceutical scientists will be presented. Emphasis will be on the chemistry, techniques involved, and the strategy of drug design. The goal of the course is to expose pharmacy students to areas of research that are currently being actively pursued within both the pharmaceutical industry and academic institutions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

**PHARM 2010 - MASTER OF SCIENCE THESIS**
Minimum Credits: 1
Maximum Credits: 12
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

**PHARM 2015 - COMPREHENSIVE EXAM: NTMS**
Minimum Credits: 1
Maximum Credits: 3
Students will be assigned several research papers to study and review independently. The research papers will serve as the base for an in-class comprehensive examination to assess the student's critical thinking skills, writing competence, and ability to synthesize and integrate knowledge acquired during the MS program.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

**PHARM 2510 - EXECUTIVE BOARDROOM SERIES 1**
Minimum Credits: 1
Maximum Credits: 1
This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles
learned in previous courses. Students are engaged in a structured understanding of the "business of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course follows the dollar from patient to product and service in the following manner: patient->health insurance pharmacy benefit->PBM->pharmaceutical industry->pharmacies. The selection process requires a one-page narrative on the potential contribution(s) of this course to the student's education and/or career goals.

**Academic Career:** GRAD  
**Course Component:** Colloquium  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 2511 - EXECUTIVE BOARDROOM SERIES 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This interactive course brings in top pharmaceutical and health care executives and builds on business and management concepts. Students are engaged in a structured understanding of the "businesses of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course focuses on "entrepreneurship in medicines and health care" and analyzes the fundamentals of entrepreneurism amongst successful executive finders, binders, and minders.  
**Academic Career:** GRAD  
**Course Component:** Colloquium  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3000 - TOPICS IN NEUROSCIENCE**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The objectives of the course are to strengthen the abilities of research-directed, pre- and postdoctoral students to understand and evaluate current research and to describe that research to others in a concise and meaningful way and to broaden students' understanding of fundamental workings of the central nervous system so as to increase their understanding and appreciation for the basic science which under lies and supports current research in the therapeutic treatment of behavioral and psychiatric disorders.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3001 - ADVANCED PHARMACEUTICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A lecture course dealing with the optimization of drug dosage in patients. Pharmaceutic, pharmacokinetic and pharmacodynamic factors in optimizing drug therapy are discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3002 - ADVANCED PHARMACOKINETICS**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course deals with fundamental aspects of pharmacokinetic concepts from model building, data analysis and parameter estimates after various routes of drug administration.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 3003 - IONIC EQUILIBRIA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A detailed study of the physical chemistry and mathematical modelling of equilibria processes relevant to pharmaceutical systems. Special emphasis will be placed on solution theory, acids and bases, complexation, solubilization and protein binding.  
**Academic Career:** GRAD
PHARM 3004 - ADVANCED PHARMACOKINETICS 2
Minimum Credits: 2
Maximum Credits: 2
This course deals with application of pharmacokinetic concepts to optimizing dosing regimen of drugs in patient population.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3005 - ADVANCED PHARMACEUTICAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Modern methods of drug analysis such as: radioimmunoassay emit, circular dichroism, computerized gas chromatography and mass spectrometry, and liquid scintillation spectrometry are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3006 - TRANSFER OPERATIONS
Minimum Credits: 4
Maximum Credits: 4
An advanced study of momentum, heat and mass transfer with application to complex pharmaceutical problems. Cartesian and non-Cartesian systems will be considered. Newtonian and non-Newtonian flow will be addressed. Diffusional applications covered will focus on membrane transport, dissolution and the release of drugs from conventional and non-conventional dosage forms.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3007 - STRUCTURE PROPERTY RELATIONSHIPS
Minimum Credits: 3
Maximum Credits: 3
The physicochemical properties of a drug controls and/or determines the pharmaceutical dosage form. An appreciation of these properties will lead to a rational development of drug delivery systems. This course will provide the scientific framework for understanding as well as a priori predicting some of these properties using thermodynamic and extrathermodynamic principles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3008 - ADVANCED DRUG DELIVERY & TARGETING
Minimum Credits: 3
Maximum Credits: 3
This course covers current advances in drug delivery and targeting. It is designed for intermediate upper level graduate students. The course will make use of invited speakers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3009 - ADVANCES IN PHARMACUTICAL SCIENCES
Minimum Credits: 1
Maximum Credits: 1
Discussion series on contemporary topics that have direct or indirect impact in the field of pharmaceutical sciences. Each topic will be presented by a
speaker and will serve as the basis for detailed discussion.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Pharmacy students only.

PHARM 3010 - PHD DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 12
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PHARM 3012 - GRADUATE CLINICAL CLERKSHIP 1
Minimum Credits: 4
Maximum Credits: 4
Under the direction of various faculty preceptors, the student will spend six weeks at a medicine clerkship site and on specialty rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3013 - GRADUATE CLINICAL CLERKSHIP 2
Minimum Credits: 4
Maximum Credits: 4
Under the direction of various faculty preceptors, the student will spend six weeks at a medicine clerkship site and on specialty rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3014 - GRADUATE CLINICAL CLERKSHIP 3
Minimum Credits: 4
Maximum Credits: 4
Under the direction of various faculty preceptors, the student will spend six weeks at a medicine clerkship site and on specialty rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3015 - GRADUATE CLINICAL CLERKSHIP 4
Minimum Credits: 4
Maximum Credits: 4
Under the direction of various faculty preceptors, the student will spend six weeks at a medicine clerkship site and on specialty rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3016 - ADVANCED THERAPEUTICS 1
Minimum Credits: 3
Maximum Credits: 3
A weekly discussion of the major disease states and their treatment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 3017 - ADVANCED THERAPEUTICS 2
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3018 - CLINICAL PHARMACOKINETICS
Minimum Credits: 3
Maximum Credits: 3
A lecture course in which pharmacokinetics principles are applied to the clinical use of drugs. Dosage adjustment of aminoglycosides, anti-arrhythmics, anti-convulsants and theophylline based on therapeutic drug monitoring in the clinical setting is discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3020 - PHARMACOGENOMICS
Minimum Credits: 3
Maximum Credits: 3
Pharmacogenomics is the study of how an individual's genetic inheritance affects the body's response to drugs. The course will examine factors that affect drug response including genetics, as well as additional factors such as environment, diet, age, concurrent drug therapy and health status. Methods important to pharmacogenomics research are presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3021 - SPEC TOPICS IN PHARMACOGENOMICS
Minimum Credits: 1
Maximum Credits: 1
This discussion/laboratory course will expand on topics discussed in the pharmacogenomics lecture. Selected methods will be demonstrated and contemporary topics in pharmacogenomics will be discussed.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3022 - CONCEPTS OF PHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
Course is designed primarily for graduate students in the health sciences who require an appreciation of pharmacology in their careers. The one term course defines basic principles of drug action, drug disposition and pharmacokinetics. Specific areas of discussion include central nervous system, cardiovascular, respiratory, gastrointestinal and endocrine pharmacology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Pharmacy students only.

PHARM 3023 - FOUNDATIONS PHARMACEUTICAL SCI
Minimum Credits: 5
Maximum Credits: 5
The development of new drugs and new dosage forms, elucidation of mechanisms underlying drug metabolism, and assessments on drug effects and therapeutic responses have been the cornerstone of pharmaceutical sciences. Future pharmaceutical researchers will need broad knowledge of molecular and cell biology of human diseases, understand the principles of chemistry and biochemistry, and learn enabling technologies to gain reliable information that guides research activities. This course will provide students with an overview at the cellular and molecular level on
principles of pharmaceutical sciences and contemporary methodologies. Emphasis is placed on understanding of pharmaceutical research by which
drugs are developed, formulated, and evaluated.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3024 - PHARMACEUTCL SCIENCES SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3025 - PHARMACEUTCL SCIENCES SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3026 - PHARMACY LITERATURE REVIEW
Minimum Credits: 1
Maximum Credits: 1
Weekly program in which graduate students and faculty review current literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Pharmacy students only.

PHARM 3027 - TOPCS IN BIOPHARM/PHARMCKNTCS
Minimum Credits: 1
Maximum Credits: 2
Course involves a discussion of current topics of interest in the area of pharmacokinetics and drug metabolism.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Pharmacy students only.

PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS
Minimum Credits: 4
Maximum Credits: 4
Topics include analgesics, antibiotics, antihistamines, autonomic drugs, CNS drugs, cardiovascular drugs, digestive pharmacology, drug abuse, drug
laws, hypoglycemics, principles of drug action and reproductive pharmacology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 3029 - MODLNG & SIMUL IN DRUG DEVELP
Minimum Credits: 3
Maximum Credits: 3
Designed for graduate pharmacy, medicine, and engineering students interested in the application of mathematical modeling techniques to the drug
development. Course covers pharmacokinetic, pharmacodynamic, disease progress and clinical modeling and simulation. Various software packages

will be used including S-PLUS, NONMEM, WinNonlin, WinNonMix, and the trial simulator from Pharsight. Instruction is small group in style with specific practical application of theoretical concepts.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3031 - PHYTOCHEMISTRY & CHEMOTAXONOMY
Minimum Credits: 3
Maximum Credits: 3
A chemical and spectral study of constituents of primary and secondary plant metabolism. The course includes a consideration of the relationships existing between classical plant groupings and certain defined secondary phytoconstituents, based on current knowledge from literature references.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3032 - MEDICINAL CHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
The course is designed for graduate students starting the second year of a Ph.D. program in chemistry and pharmacy. It teaches the basics of medicinal chemistry and will endow the students with the necessary skills to understand medicinal chemistry scientific literature and to make meaningful proposals of the design/synthesis of drug-like compounds. Topics include energetics of drug-protein interactions, introduction to different types of target classes, introduction to structure based design, including computational chemistry, as well as optimization of hit into leads compound. The course incorporates an extensive exercising part where students are asked to propose and (virtually) perform small target oriented drug discovery projects. Students are required to verbally present twice during this course. Additionally, students are tested twice in written.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 3033 - AMINO ACID & PEPTIDE CHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
The chemistry of amino acids and peptides, including methods of protection and deprotection of the functional groups, peptide coupling, racemization, and both solution and solid phase methods of peptide synthesis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3034 - TOPICS IN TRANSLATIONAL RSRCH
Minimum Credits: 1
Maximum Credits: 1
This course is structured as a journal club focused on translational investigations and is being offered jointly with the universities of Minnesota, North Carolina, and Pittsburgh for 1st and 2nd year graduate students from all three programs who will participate in discussions by live video teleconferencing. Articles emphasizing methods which allow for translation from preclinical to clinical investigation will be discussed in several different therapeutic areas with emphasis on pharmacometrics, genomics, biomarker validation, and drug discovery.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade

PHARM 3035 - MOLECULAR BASIS FOR TOXICITY
Minimum Credits: 3
Maximum Credits: 3
Explanations of how chemical poisons function in physiological systems. Molecular interactions of the toxic agents will rely on biochemical and chemical principles, including protein binding, stereochemistry, and reaction mechanisms. Areas to be covered include: selective toxicity of drugs, mixed function oxidase and metabolic activation, lethal synthesis, naturally occurring toxic substances, pesticides and pollutants.

Academic Career: GRAD
Course Component: Lecture
PHARM 3036 - DRUG DELIVERY & TISSUE ENGR
Minimum Credits: 1
Maximum Credits: 1
Course is designed to provide the recent developments in the field of drug delivery and regenerative therapies to graduate students. This course, structured as a journal club, will introduce different concepts in drug/gene delivery research through analyzing recent scientific literature. It will also expose students to novel regenerative therapies under development and their role in personalized medicine. If possible, we will also introduce some clinical examples where such regenerative therapies have been successfully used in patients. The course will use scientific research articles from high impact factor journals to introduce these concepts. The course is intended primarily for first/second year graduate students enrolled in the MS or Ph.D. program specifically in the pharmaceutics track. Postdoctoral researchers may participate with prior approval from the course coordinators.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3037 - BIOSYNTHS OF NATRL CONSTITUNTS
Minimum Credits: 2
Maximum Credits: 2
A study of the biosynthesis of plant and fungal secondary metabolites with emphasis on the processes leading to the major classes of these metabolites in various organisms. Special emphasis is given to compounds with biological activity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3038 - ESSENTIALS COMPV GRANT WRTNG 1
Minimum Credits: 2
Maximum Credits: 2
Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3039 - ESSENTIALS COMPV GRANT WRTNG 2
Minimum Credits: 2
Maximum Credits: 2
Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3040 - STATISTICAL METHODS
Minimum Credits: 3
Maximum Credits: 3
Course is designed to teach graduate students standard and advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze simple as well as complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, homework assignments, and exams. At the end of this course, students will have skills to construct and test statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 3041 - STATISTICAL METHODS 2
Minimum Credits: 3
Maximum Credits: 3
Part two of two. Course is designed to teach graduate students standard and advanced statistical methods of data analysis. Major topics covered will be descriptive statistical methods, probability, the most widely used discrete and continuous distributions, parameter estimation techniques, hypothesis testing, contingency tables, regression methods, multi-sample inference, design and analysis techniques for epidemiological data including power calculations, nonparametric techniques, and survival analysis. Introduction to multivariate statistical analysis will include applications of latent variable modeling. Students will be taught to apply statistical software packages, such as JMP, SPSS, SAS, or other appropriate programs to real data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3042 - RESEARCH PRACTICUM
Minimum Credits: 1
Maximum Credits: 12
Course provides practical training in advanced research methodology and skills. Students will be engaged in active research with a faculty member or designate as approved by the student's doctoral committee or by the graduate program director. Students enrolled in the graduate program may register to earn 1-12 units per term until they have advanced to candidacy for the Ph.D. Degree.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 3043 - TEACH ME TO TEACH YOU
Minimum Credits: 1
Maximum Credits: 1
Course is designed to introduce graduate students to the art and science of teaching. Course will essentially consist of a brief presentation by faculty on different aspects and approaches to teaching followed by a 30 minutes presentation of basic concepts related to individual research carried out by graduate students.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PHARM 3045 - ADVANCED STATISTICAL METHODS
Minimum Credits: 3
Maximum Credits: 3
Course is designed to teach graduate students advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, in homework assignments, and in exams. At the end of the course, students will have skills to construct and test complex statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 3047 - INT PATNT-CENTERED RES METHODS
Minimum Credits: 3
Maximum Credits: 3
This course is designed for graduate level clinicians and applied researchers. Patient-centered research methods open unique research opportunities, using data they often already have, that cannot be addressed with traditional nomothetic methods such as randomized clinical trials. The course consists of two segments: idiographic experimental designs and data analysis. By the end of the course, students will acquire and practice the skills needed to design an idiographic patient-centered study, statistically analyze the study data and appropriately interpret the results.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 3048 - DRUG DSGN & DEVELOP JOURN CLUB
Minimum Credits: 1
Maximum Credits: 1
Course is designed to provide an opportunity for the students to informally learn and discuss concepts and applications in the area of drug discovery, design and development.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

PHARM 3049 - SCIENTIFIC WRITING SKILLS
Minimum Credits: 2
Maximum Credits: 2
Course is designed to provide the systematic approach of reading and writing a scientific paper to graduate students. Writing a review or a research paper in the peer reviewed journals is an integral part of the graduate curriculum. Course will introduce different components of a scientific paper, how to read and summarize a scientific paper, methodical approach towards writing a paper and managing references using endnote software.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 3062 - ADV MTHS PHRMCTL OUT POLC RES
Minimum Credits: 3
Maximum Credits: 3
Graduate level course designed to develop student understanding and skills related to research designs and analytic methods for conducting population-based studies drawn from large observational survey and claims databases.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD

PHARM 3063 - GRADUATE RESEARCH ROTATION
Minimum Credits: 3
Maximum Credits: 3
Special research projects are conducted under the supervision of a faculty member to acquaint the graduate student with advanced research techniques.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3065 - EXPERIMENTAL DESIGN
Minimum Credits: 3
Maximum Credits: 3
The student will develop a written research proposal based upon the national institutes of health (NIH) format. This proposal should not be a direct extension of the student's previous or present research activities. The proposal will be evaluated at an oral examination.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3066 - CLINICAL EXPERIMENTAL DESIGN
Minimum Credits: 1
Maximum Credits: 1
A written research proposal will be evaluated at an oral examination.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 3067 - CLINICAL PHARMACY ENVIRONMENTS
Minimum Credits: 2
Maximum Credits: 2
The successful completion of clinical research is dependent upon an understanding of how healthcare is delivered in the environment where it is conducted. A significant number of clinical studies involve drugs and/or the acquisition of drug concentrations. This course is designed for students who do not have clinical pharmacy experience within the U.S. Healthcare system. The goal is to improve these students' abilities to design clinical/translational research studies by introducing fundamental concepts of how pharmaceutical care is delivered in a U.S. Academic health system. To meet this objective, students will gain an appreciation of how pharmaceutical care is delivered through didactic lectures and guided exposures to multiple clinical pharmacy environments with experienced clinical pharmacists. During each field observation, students will be expected to identify the application of pharmacy and therapeutics interventions. Students will also learn how clinical data is generated and stored to deliver daily patient care and how databases may be used for research purposes. Additionally, students are expected to gain an appreciation for the privacy regulations that are associated with accessing protected health information (phi) for research and their implications for designing and conducting clinical/translational research.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PHARM 3140 - INTRO TO TRANSLATIONAL RES HLTH SCI**
Minimum Credits: 2
Maximum Credits: 2
Course will provide students with a comprehensive survey of the processes involved in transLating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

**PHARM 4999 - FULL TIME STATUS**
Minimum Credits: 0
Maximum Credits: 0
Designed to accommodate summer billing for pharmacy students.

**Academic Career:** GRAD
**Course Component:** Clinical
**Grade Component:** No Grade Required

**PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS**
Minimum Credits: 4
Maximum Credits: 4
First of six semester sequence of courses that support the students' development of competence in four major areas- clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS**
Minimum Credits: 4
Maximum Credits: 4
The second of six courses that support the students' development of competence in clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.
PHARM 5112 - COMMUNITY HEALTH 1
Minimum Credits: 1
Maximum Credits: 1
Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5113 - COMMUNITY HEALTH 2
Minimum Credits: 1
Maximum Credits: 1
A continuation of experiential education from term 1. Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5114 - ANATOMY AND PHYSIOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
First part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 5115 - ANATOMY AND PHYSIOLOGY 2
Minimum Credits: 3
Maximum Credits: 3
Second part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Pharmacy students only.

PHARM 5116 - BIOCHEMISTRY 1
Minimum Credits: 3
Maximum Credits: 3
First of two course sequence that enables students to appreciate the chemical process which govern the function of living systems, the molecular basis of disease, the rationale behind use of certain drug classes, and the biochemical basis of clinical diagnostic procedures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5117 - BIOCHEMISTRY 2
Minimum Credits: 3
Maximum Credits: 3
Course builds on principles introduced in biochemistry 1. First portion of course covers topics in molecular biology and gene regulation, particularly as they relate to the etiology and treatment of disease. Second portion of course covers the intermediary metabolism of carbohydrates, proteins, and lipids. Emphasis is placed on errors of intermediary metabolism responsible for human disease.
PHARM 5118 - PRINCIPLES OF DRUG ACTION
Minimum Credits: 4
Maximum Credits: 4
To enable students to apply principles of drug-receptor interactions, conceptualize principles of medicinal chemistry with regard to drug design and development, understand the relationship between drug action and chemical structure, understand the relationship between dosage forms and oral bioavailability, understand basic pharmacokinetic and pharmacodynamic concepts.

PHARM 5119 - DRUG DEVELOPMENT 1
Minimum Credits: 4
Maximum Credits: 4
Course examines sources of drugs and the process of drug development and the drug approval process. Since drug metabolites may play an important role in the activity or toxicity of a drug, early phases of the approval process require extensive metabolism studies. Course also covers the biochemistry of drug metabolism and chemical pathways of metabolism.

PHARM 5120 - THE EMERGING PROFESSIONAL
Minimum Credits: 1
Maximum Credits: 1
The emerging professional is designed to stimulate the development of professional attitudes and behaviors and an understanding of the opportunities within the pharmacy profession. Professionalism, ethics, management of self, and the profession of pharmacy are themes of the course.

PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE
Minimum Credits: 3
Maximum Credits: 3
The third of a six course sequence that supports students' development of competence in four major areas: clinical skills, social science in pharmacy, managing as a professional pharmacist, and professional inquiry.

PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION
Minimum Credits: 3
Maximum Credits: 3
The fourth of a six-course sequence that supports students' development of competence in four major areas: clinical skills, psychosocial dimensions of practice, managing as a professional pharmacist, and professional inquiry.
PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS
Minimum Credits: 1
Maximum Credits: 1
Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5213 - COMMUNITY PHARMACIST PRA 2
Minimum Credits: 1
Maximum Credits: 1
Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5214 - PHARMACOTHERAPY OF INFECTUS DS 1
Minimum Credits: 4
Maximum Credits: 4
Introduces students to the organisms responsible for infectious diseases, the epidemiology and pathophysiology of infection, the immunology of host defenses, the major classes of antibiotics and anti-infectives useful in the therapy and prophylaxis of disease, and the thought process leading to cost-effective and safe antimicrobial drug use. At the end of the course, students are expected to be able to select and monitor treatments of various bacterial, fungal, and viral infections.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5215 - PHARMACOTHERAPY OF INFECTUS DS 2
Minimum Credits: 4
Maximum Credits: 4
Introduces students to the organisms responsible for infectious diseases, the epidemiology and pathophysiology of infection, the immunology of host defenses, the major classes of antibiotics and anti-infectives useful in the therapy and prophylaxis of disease, and the thought process leading to cost-effective and safe antimicrobial drug use. At the end of the course, students are expected to be able to select and monitor treatments of various bacterial, fungal, and viral infections.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5216 - PHARMACOTHERAPY OF CARDIAC DISEASE
Minimum Credits: 4
Maximum Credits: 4
Provides a comprehensive evaluation of the pathophysiology and treatment of cardiovascular disease. The pharmacology and therapeutic use of cardiovascular drugs is presented in relation to the management of hypertension, coronary artery disease, heart failure, arrhythmia, thromboembolic disorders, and acute myocardial infarction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 5217 - NEPHROLOGY
Minimum Credits: 2
Maximum Credits: 2
Provides a comprehensive evaluation of the pathophysiology and treatment of renal disease, fluid and electrolyte disturbances, and acid-base disorders. The pharmacology and therapeutic use of drugs is presented in relation to the management of renal disease progression, acute renal failure, end stage renal disease and its complications, as well as acidosis, alkalosis, and electrolyte abnormalities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5218 - PHARMCKNTC & DRUG RESPONSE
Minimum Credits: 3.5
Maximum Credits: 3.5
Course provides students with a fundamental understanding of the mathematical relationships that are available to quantify the rate and extent of drug absorption, distribution, metabolism and excretion.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY
Minimum Credits: 4
Maximum Credits: 4
Course provides students with a fundamental understanding of the physical-chemical properties of various drug dosage forms. Students will compound several different dosage forms in the laboratory portion of the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5220 - CASE CONFERENCE SERIES 3
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade

PHARM 5221 - CRITICAL CARE
Minimum Credits: 1
Maximum Credits: 1
Provides a comprehensive evaluation of the pathophysiology and diagnosis of common ICU problems. A complete discussion of pharmacotherapy (pharmacology, pharmacokinetics, pharmacodynamics, etc.) Will be applied to developing treatment strategies in acute care settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5223 - GASTROENTEROLOGY/NUTRITION
Minimum Credits: 2
Maximum Credits: 2
Students demonstrate and apply concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected gastrointestinal diseases and states of nutritional deficiency. Students develop the ability to design, monitor, and refine safe and cost effective treatment plans and provide appropriate information to patients, caregivers, and health professionals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 5225 - ADVANCED PHARMACEUTICAL CARE 1
Minimum Credits: 1
Maximum Credits: 1
Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in 'capstone' experiences to manage pharmaceutical care problems in ambulatory and acute care settings.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5310 - PROFESSION OF PHARMACY 5
Minimum Credits: 3
Maximum Credits: 3
Course provides knowledge and experience in the major areas of clinical skills, psychosocial dimensions, pharmacy management, and professional inquiry. Specific topics include pharmacy law, pharmacoeconomics, drug use and disease state management, and institutional pharmacy systems and practice. Individual and group presentations will be used to critically examine recent clinical trials and enhance the communication skills of students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS
Minimum Credits: 2
Maximum Credits: 2
Provides the knowledge, skills and attitudes necessary to practice pharmacy. Will focus on clinical skills, psychosocial dimensions of practice, pharmacy management and professional inquiry. Topics include principles of pharmacoeconomics, pharmacoeconomic decision making, quality improvement and total quality management, and population-based decision making. Individual and group presentations, case analyses and projects will be used to incorporate pharmacoeconomic principles into therapeutic decision-making and enhance the communication skills of students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5312 - HEALTH SYSTEM PHARMACY 1
Minimum Credits: 1
Maximum Credits: 1
Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5313 - HEALTH SYSTEM PHARM 2
Minimum Credits: 1
Maximum Credits: 1
Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5314 - IMMUNOLOGY
Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry, and therapeutics in the evaluation and treatment of selected diseases of the immune system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and provide appropriate information to patients, caregivers and health professionals.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.

**PHARM 5315 - ONCOLOGY/HEMATOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of various types of cancer and diseases of the blood. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.

**PHARM 5316 - PULMONOLOGY/RHEUMATOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected pulmonary and rheumatic diseases. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.

**PHARM 5317 - GASTROENTEROLOGY/NUTRITION**

Minimum Credits: 2  
Maximum Credits: 2  

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected gastrointestinal diseases and states of nutritional deficiency. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.

**PHARM 5318 - ENDOCRINOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected disorders of the endocrine system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.

**PHARM 5319 - NEUROLOGY/PSYCHIATRY**

Minimum Credits: 4  
Maximum Credits: 4  

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected disorders of the nervous system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and provide appropriate information to patients, caregivers and health professionals.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Pharmacy students only.
treatment of selected neurological and psychiatric disorders. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5320 - POPULATION HEALTH AND MANAGEMENT**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The course focuses on the United States health system and its connection to the pharmacist, principles of management and business for the pharmacist, and public health pharmacy. Core concepts addressed will include: health disparities, program development and evaluation, health literacy, health behavior change, access to essential medicines, health care reform, payment structures, business planning, personal and professional management, human resources, advocacy, emergency preparedness, safety nets, cultural competency, and global health.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**PHARM 5321 - CRITICAL CARE & NEPHROLOGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The aim of this course is to provide students with an overview of the U.S. Health care delivery system. This course covers the structure of health care delivery systems and delivery of health care services including personnel and facilities; organization, financing, and quality assessment with special attention to medication distribution and management.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PHARM 5322 - PHARMACY LAW**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is focused on pharmacy law, with a focus on general concepts of constitutional law and an overview of the legal process in the United States. Students will learn by analyzing statutes, regulations, and case law examples. The areas covered will include laws and regulations relevant to pharmacy practice, civil liability including malpractice, and some business-related legal material.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**PHARM 5324 - CASE CONFERENCE SERIES 5**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  

**PHARM 5400 - PHARMD SEMINAR**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students learn communication and organizational skills necessary to present professional seminars.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad IHSU Basis  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5401 - PHARMD ADV PHARM PRACT EXPRN 1**  
**Minimum Credits:** 5  
**Maximum Credits:** 5  
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.
Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5402 - PHARMD ADV PHARM PRACT EXPRN 2
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5403 - PHARMD ADV PHARM PRACT EXPRN 3
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5404 - PHARMD ADV PHARM PRACT EXPRN 4
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5405 - PHARMD ADV PHARM PRACT EXPRN 5
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5406 - PHARMD ADV PHARM PRACT EXPRN 6
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5407 - PHARMD ADV PHARM PRACT EXPRN 7
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5408 - PHARMD ADV PHARM PRACT EXPRN 8
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Pharmacy students only.

PHARM 5409 - PHARMD ADV PHARM PRAC EXPRN 9
Minimum Credits: 5
Maximum Credits: 5
Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.
Academic Career: GRAD

**Course Component:** Clinical
**Grade Component:** Grad HSU Basis
**Course Requirements:** School of Pharmacy students only.

**PHARM 5800 - SPECIAL TOPICS**
Minimum Credits: 1
Maximum Credits: 3
Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

**Academic Career:** GRAD
**Course Component:** Independent Study
**Grade Component:** Grad Letter Grade
**Course Requirements:** School of Pharmacy students only.

**PHARM 5801 - PHARMCTCL CRE TO UNDSV POPLTN**
Minimum Credits: 1
Maximum Credits: 6
A sequence of courses that address issues related to providing pharmaceutical care to underserved populations. Topic areas that will be addressed include: psychosocial factors impacting health, political and economic influences on health care access, community advocacy and resources, patient assessment, clinical problem solving skills, pharmacotherapy management, and patient education. Students will have opportunities for interdisciplinary care and educational sessions.

**Academic Career:** GRAD
**Course Component:** Practicum
**Grade Component:** Grad Letter Grade
**Course Requirements:** School of Pharmacy students only.

**PHARM 5802 - CRITICAL CARE PHARMACOTHERAPY**
Minimum Credits: 3
Maximum Credits: 3
Provides students with opportunities to expand their knowledge base in pharmacotherapy of acute care patients. Course will introduce concepts of physiology, pathophysiology, pharmacology, pharmacokinetics, and pharmacotherapy of commonly encountered disease states and medications in critically ill patients. Course will focus on integration of pharmacotherapy and clinical practice to develop competent, patient-focused clinicians.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** School of Pharmacy students only.

**PHARM 5804 - CMPLMNTRY/ALTNTV MED PRACTCS**
Minimum Credits: 3
Maximum Credits: 3
Provides students with the opportunity to understand the field of complementary/alternative medicine practices (cam). Students will learn about the different modalities considered to be complementary/alternative therapies. Emphasis will also be given to understanding the evolution of the field.
through credentialing of the practitioners, reimbursement by third party payers, and specific scientific research issues.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5805 - COMMUNITY PHARMACY MANAGEMENT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Discussion of the principles and procedures of management involved in community pharmacy practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5806 - PEDIATRIC PHARMACEUTICAL CARE**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Provides students with opportunities to acquire the knowledge and skills necessary to provide pharmaceutical care to pediatric patients of all ages.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5807 - SMOKING CESSATION COUNSELING**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Course will focus on teaching basic behavior change counseling skills with individuals and in groups. Although the didactic content of the class will focus on smoking cessation, the skills learned can be applied to all types of behavior change counseling. Students will practice these skills in a number of different counseling venues. Class is only open to nonsmokers.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5808 - COMPREHENSIVE DIABETES MGMNT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This internet-based course provides students with a multidisciplinary foundation in the principles of diabetes management. Students will develop their knowledge and ability to assess, manage, educate and monitor patients with diabetes. Pathophysiology, monitoring, complications, and treatment including pharmacotherapy, medical nutrition therapy, and exercise therapy will be explored.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.

**PHARM 5809 - PRINCIPLES & TECHNIQUES TCHNG**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students will explore the art and science of teaching and careers in higher education. After an introduction to the literature in higher education and the principles of instructional design, participants will have opportunities to design and deliver a unit of instruction on a current healthcare topic, facilitate learning in a laboratory setting, and apply principles of assessment to the evaluation of teaching by peers. Students must be able to attend practica sessions on selected dates at the Bidwell Training Center (1650 Metropolitan Street, Pittsburgh, PA 15233).

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Pharmacy students only.
PHARM 5810 - APHA IMMUNIZATION PROGRAM
Minimum Credits: 1
Maximum Credits: 1
Pharmacy-based immunization delivery is an innovative and interactive training program that teaches pharmacists the skills necessary to become a primary source for vaccine information and administration. This program teaches the basics of immunology and focuses on practice implementation and legal/regulatory issues. Pharmacy-based immunization delivery is conducted in two parts. The first part -- a self-study learning component -- is designed to ensure that all participants have a solid understanding of the role of pharmacists as vaccine advocates, educators, and administrators. The second part -- the live training seminar -- involves an active learning experience that reinforces and expands on the self-study learning component. In addition, participants receive hands-on injection technique training.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5811 - CLINICAL NUTRITION
Minimum Credits: 1
Maximum Credits: 1
Course examines the provision of adequate nutrition and nutritional support to ambulatory and hospitalized patients as well as the relationships between nutrition and disease and drug therapy and nutrition.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5812 - HEALTHCARE INNOVATIONS 1
Minimum Credits: 1
Maximum Credits: 1
Students will be able to effectively participate in a healthcare innovation application team as either a leader or participant that results in the application of an evidence-based healthcare innovation, which leads to improved patient care. Students will be able to develop detailed and effective strategic frameworks from which they can outline and track their progress in implementing a healthcare innovation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5813 - ACUTE CARE PHARMACOTHERPY SIMUL
Minimum Credits: 3
Maximum Credits: 3
Course is designed to allow students to apply clinical knowledge, skills and attitudes gained in previous courses to care for patients with advanced cardiovascular diseases and those that are critically ill. Students will expand on the concepts gained throughout the pharmacotherapy of cardiovascular disease course. Course utilizes simulation based learning to enhance clinical decision-making processes. A major component of the course is self-study requiring an adult learning approach to education. The adult learning concept will require students to be responsible for and highly interactive in achieving the objectives of the course. This learning environment will foster clinical decision making and reinforce concepts learned throughout the school's curriculum. Also, it will provide an excellent source for objective assessment of student knowledge and performance.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.

PHARM 5814 - GLOBL HLTH: DETERMNTS & APPLC
Minimum Credits: 3
Maximum Credits: 3
This course for third professional year pharmacy students will introduce and discuss important topics in global health, focusing specifically on care of the underserved in a global context. Topics discussed will include health policy and economics, determinants of health, essential medicines, community-oriented primary care, structural violence, malnutrition and tropical medicine. In addition to readings and weekly discussion groups, students will have the opportunity to gain valuable practice-based skills by working in underserved clinics in Pittsburgh.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Pharmacy students only.
PHARM 5815 - CONCEPTS MANAGED CARE PHARM
Minimum Credits: 2  
Maximum Credits: 2  
The purpose of this course is to understand the fundamental concepts in managed care pharmacy and the relation to the healthcare system. This course supports the school's mission by enabling students to better navigate and understand the healthcare system from the perspective of different stakeholders to help optimize pharmaceutical care.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

PHARM 5816 - NEPHROLOGY PATIENT CARE  
Minimum Credits: 1  
Maximum Credits: 1  
The purpose of this course is to introduce students to the delivery of pharmaceutical care to end-stage renal disease (ESRD) patients receiving outpatient hemodialysis therapy. The course is structured as a longitudinal patient-centered experience. It integrates nephropharmacology-related concepts and continuous, direct patient care. This is accomplished via critical evaluation of all clinical data and involvement in patient care activities, multidisciplinary patient rounds, case studies, oral presentations, pharmacotherapeutic discussions, literature evaluations, and other selected exercises. Patient and interprofessional communication is a fundamental aspect of this course. Participating students are expected to be self-motivated, self-directed individuals who embrace independent learning and self-assessment.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PHARM 5817 - ADVANCED INFECTIOUS DISEASES  
Minimum Credits: 1  
Maximum Credits: 1  
Students will expand upon and apply knowledge and skills developed in the required Infectious Diseases 1 and 2 course sequence and Advanced Pharmaceutical Care 1 to new and complex infectious disease case scenarios, be introduced to the principles of antimicrobial stewardship, learn basic skills relevant to performing antimicrobial stewardship activities in a health system, and explore current controversies in infectious diseases to optimize the health of patients with complex infectious diseases.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Pharmacy students only.

PHARM 5818 - MEDICAL PARASITOLOGY  
Minimum Credits: 1  
Maximum Credits: 1  
Course offers a concise presentation of the protozoan and helminthic parasites of medical importance, with an emphasis on parasitic morphology and life cycle, disease transmission, pathogenesis, prophylaxis, therapy and epidemiology.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PHARM 5819 - COMNY LDRS INNOV & PRAC (CLIP)  
Minimum Credits: 3  
Maximum Credits: 3  
Course is designed especially for students interested in advancing and leading change in community pharmacy practice. The objective is to mentor and support students in effective and meaningful community pharmacy-based patient care research. Students will engage in a combination of on-line lecture content and small group; weekly discussions throughout the summer months. Students will initiate and complete a research project in the community. The purpose of the project is to:  
1. Familiarize students with the key components in carrying out a valid research project from conceptualization to final report (abstract; meeting presentation).  
2. Develop research problem solving skills through working group discussions and by working research problem solving skills through working group discussions and by working closely with project mentor.  
3. Enhance verbal and written communication skills through formal and informal presentations and scientific writing.  
4. Contribute to the diversity of the students' expertise through meeting and discussing with experts in community practice and research nationally.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad Letter Grade
PHARM 5820 - PHARMACY INNOVATION 1
Minimum Credits: 1
Maximum Credits: 1
The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.
Academic Career: GRAD

Grade Component: Grad Letter Grade

PHARM 5824 - MENTORED RESEARCH 1
Minimum Credits: 1
Maximum Credits: 2
The purpose of this course is to give PHARMD students in the research area of concentration an experiential educational offering within a research laboratory. The general focus of the research by the faculty in the center for clinical pharmaceutical sciences is to determine and evaluate the factors and quantitative relationships that lead to variability in disease progression and drug response in patients. Research is focused on the translational and clinical aspects of scientific research. Ongoing studies include clinically relevant animal models of disease through large population studies in order to bridge the bench to bedside to improved public health through clinical and translational research. Disease state interests include but are not limited to the areas of infectious disease, nephrology, critical care, stroke, psychiatric disorders, liver disease, oncology, and cardiovascular disease.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

PHARM 5825 - HEALTHCARE INNOVATIONS 2
Minimum Credits: 2
Maximum Credits: 2
Course is to provide the students who have successfully completed Healthcare Innovations 1 the opportunity to apply what they have learned by
observing successful and unsuccessful innovation applications within the VA health system in Pittsburgh and using the innovation model master in
Part 1 of this two-part course to provide evaluative insight as to why the innovations observed may have succeeded or failed to succeed. As part of
this course, the students will also learn about the veterans engineering resource center (VERC) program at the VA and how it guides the development
and implementation of innovations that aim to improve healthcare quality and outcomes for participating veterans.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PHARM 5826 - ADV PED PEDIATRIC PHARMCTCL CARE
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to extend knowledge and skills in intensive and/or advanced pediatric specialties, building on previously developed
fundamental knowledge of pediatric physiology, pathophysiology, pharmacology and therapeutics, so as to advance pharmaceutical care for infants
and children with selected disorders. The course will focus on integration of science and practice to achieve outcomes that enhance patient care and
quality of life.
Academic Career: GRAD
Course Component: Lecture

PHARM 5827 - SMOKNG CESSATN IN UNDSV SET
Minimum Credits: 1
Maximum Credits: 1
This course for third professional year pharmacy students will allow the student real-life practice providing smoking cessation counseling and
education in underserved settings. Students generally provide on-site smoking cessation services at either the salvation army harbor light, a 90 day
inpatient alcohol and other drug program for homeless and low-income men in Allegheny county, or the Birmingham free clinic, a walk-in clinic on
the South Side of Pittsburgh. Students will meet with clients weekly at their site to provide smoking cessation counseling, education, and support,
including the provision of nicotine replacement therapy. Students will have monthly debriefs with the course coordinator throughout the semester to
supplement experiences on site with a focus on motivational interviewing skills.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PHARM 5830 - DISCOVRNG SCNTFC INQRY (DSI)
Minimum Credits: 2
Maximum Credits: 2
The primary purpose of the course is to adequately prepare learners to execute an outcomes research-based project during the P4 curriculum. As a
required component of the pharmacotherapy scholars program, this course will enable P3 students in the spring semester to design a study, submit the
required institutional review board documents, and strengthen their data analysis skills.

PHARM 5890 - INT'L PHARM SCHOLARLY EXPRN 1
Course allows the student to personalize their PharmD education by proposing, developing, and implementing a mentored scholarly project in an international setting. The goal of these international project experiences is to provide the student with an experience to build specific skills in research and practice while providing opportunities for cross-cultural learning and awareness. Projects will be developed in conjunction with an identified faculty mentor and should be developed to meet a site-specific need. Students will complete their project abroad during the summer and will present their project and experience when they return. Instructor's permission required.

**PHARM 5892 - GLBL HLTH: INT'L PHARM EXPERN**  
Minimum Credits: 1  
Maximum Credits: 1  
Course will introduce and discuss important topics in global health and pharmacy practice, culminating in a one-week experience over spring break to Lagos, Nigeria. The overarching goal of this course is for students to experience the practice of pharmacy in a global setting and learn ways to strengthen pharmacy systems locally and internationally. The rich multi-cultural patient population in varied settings will expand students' knowledge, skills, and attitudes in working with diverse health beliefs and practices.

**PHARM 5910 - US HEALTHCARE SYSTEM**  
**PHARM 5911 - HC SALES & MARKETING**  
Minimum Credits: 3  
Maximum Credits: 3  
This course educates students on contemporary healthcare sales and marketing as it directly applies to pharmacy. Sales concepts to be covered include understanding management prospects, developing your sales value proposition, finding management and penetrating the no-talk zone, generating leads: marketing to management, generating leads, cold calling management, meeting the prospect for the first time, presenting to prospects’ the executive briefing, preparing a management proposal that works, negotiating with management, selling to targeted key or major accounts, managing your sales cycle and forecasting, managing sales objections; using storytelling as a business sales tool; managing your competition, following up after the sale, and making a difference with business ethics. Health care marketing is undergoing dramatic reinvention and change because of emerging trends, reform uncertainties, the emergence of social marketing and a renewed focus on quality, outcome and prevention. Executives are demanding higher impact and bigger returns from marketing investments and marketing professionals are more closely aligning their efforts with strategic objectives, customer experience and the integration of communications across multiple platforms and channels. This course offers effective approaches to proactive health care marketing with specific action steps, strategies, techniques and tactics to move markets and increase visibility, awareness, understanding, market share and profitability.

**PHARM 5912 - LEADERSHIP ETHICS HEALTHCARE**  
Minimum Credits: 3  
Maximum Credits: 3  
This course provides a foundational introduction to pharmaceutical/health care leadership and ethics. An analysis of dominant methods in leadership
theories and healthcare ethics will be discussed and analyzed from historical, systematic, and religious perspectives. Ethical dilemmas of leadership, the foundation and context of moral choice, the moral implication of decision-making within healthcare organization and the impact on employees, morale, personal integrity, and the patients. Practical issues are engaged to illustrate effective leadership and ethical frameworks for sound decision making. Students will be able to understand and analyze health care leadership and ethics theory and methods as well as major applied topics; critically relate health care leadership and ethics with multi-disciplinary fields in health care as a diverse and national enterprise; integrate academic learning with experiential learning in clinical/organizational experiences; and demonstrate knowledge, skills, competencies and character traits to provide ethical leadership.

Course Requirements: PLAN: Pharmacy Business Admin (PHARMB-M5)

**PHARM 5913 - EXPERIENCE ADAPTIVE DESIGN**

Minimum Credits: 1.5
Maximum Credits: 1.5

This course is designed to provide the knowledge and practical skills necessary to become an adaptive design learner/leader/teacher (LLT). LLT's develop the adaptive capacity of people and all other organizational resources to create more access to effective, patient-centered care at continually lower cost. Experience adaptive design (EAD) is a learning-by-doing experience. They will learn to use adaptive design based on the Toyota Production System (TPS) methodology to continually improve services and to introduce new services to their pharmacy. This course requires that students are able to put their learning into practice by doing a work improvement project or by introducing a new service at their worksite. They will be required to submit a written report and make a 10 minute presentation of their final project. Students will use the textbook 'designed to adapt: leading healthcare in challenging times', reading from publications, videos, and case studies.

Academic Career: GRAD
Course Component: Lecture

Course Requirements: PLAN: Pharmacy Business Admin

**PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM**

Minimum Credits: 2
Maximum Credits: 2

Following the healthcare dollar: this interactive offering will engage students in a structured understanding of the business side of medicines in the health care industry and other related fields. For instance, students will study different leadership styles and corporate cultures in an organization, follow health spending longitudinally and vertically on medicines from consumer to product and service, discover how market conditions affect operations and profitability and learn about the executive's career development path. Entrepreneurship in healthcare: students will engage in a structured understanding of the business side of medicines in the health care industry and other related fields. This course delves into entrepreneurship in medicines and health. The fundamentals of entrepreneurship medicines and health will be discussed and students will study and contrast the primary entrepreneurship styles including characteristics of those who succeed through discovery, adaptation, and fortitude. Entrepreneurship and intrapreneurship models will be utilized. Students will contrast methods of innovation and supporting business cultures. The impact of market conditions will be analyzed in terms of how they affect success of such endeavors and learn about the executive's career development path. Many past students have used the learning and networking opportunities from this course to shape and propel their careers.

**PHARM 5915 - EXECUTIVE HEALTHCARE INNOV**

Minimum Credits: 1.5
Maximum Credits: 1.5

This course will give students an understanding of managing change through the lens of complexity theory using the principles of implementation science. They will understand the levers important in change and how to assess an organization for readiness to change. Students will be able to effectively participate in a health care innovation application team as either a leader or participant that results in the application of an evidence-based health care innovation, which leads to improved patient care. They will be able to develop detailed and effective strategic frameworks from which they can outline and track the progress in implementing a health care innovation.

Philosophy

PHIL 2020 - PLATO
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Plato, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2021 - STUDIES IN PLATO
Minimum Credits: 3
Maximum Credits: 3
Study of platonic texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2041 - STUDIES IN ARISTOTLE
Minimum Credits: 3
Maximum Credits: 3
Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2050 - TOPICS IN HISTORY OF PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected texts and topics in the history of philosophy. Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2060 - HELLENISTIC PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in Hellenistic philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2061 - STUDIES IN HELLENISTIC PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected texts and topics in Hellenistic philosophy (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2070 - ANCIENT PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2071 - STUDIES IN ANCIENT PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected topics and texts in ancient philosophy (readings in Greek). Course may be repeated for credit if the material is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2075 - TOPICS IN ANCIENT PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2080 - MEDIEVAL PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in medieval philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2100 - HOBBES
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Hobbes. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2105 - THOMAS HOBBES
Minimum Credits: 3
Maximum Credits: 3
An intensive look at the range of Hobbes' work. Some influential secondary sources will be examined, e.g., Leviathan and the air pump, squaring the circle, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2110 - DESCARTES
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Descartes, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2120 - SPINOZA
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Spinoza, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2130 - LEIBNIZ
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Leibniz, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2140 - LOCKE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Locke, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2160 - HUME
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Hume, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PHIL 2170 - KANT
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Kant. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2171 - KANTIAN ETHICS
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in Kantian ethics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2172 - ANALYTICAL KANTIANISM
Minimum Credits: 3
Maximum Credits: 3
The seminar will explore some of the central questions of Twentieth-Century analytical Kantianism. Students will read and discuss the work of Reichenbach, Lewis, Sellars, Strawson, McDowell, and Kant.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2175 - STUDIES IN KANT
Minimum Credits: 3
Maximum Credits: 3
Study of Kantian texts and topics. Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2180 - HEGEL
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Hegel, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2190 - NIETZSCHE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Nietzsche, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2195 - DEWEY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on John Dewey, taken almost exclusively by students in the doctoral program usually during their second or third year of residence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2196 - JAMES
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate course on William James.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2200 - FREGE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Frege, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2210 - WITTGENSTEIN
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Wittgenstein. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2220 - HEIDEGGER
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Heidegger, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2221 - BEING AND TIME
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate graduate seminar on being and time taken almost exclusively by students in the doctoral program usually in their second or third year of residence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2225 - QUINE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of quine. Taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PHIL 2230 - MARX
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on Marx, taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents may vary with instructors.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2245 - ANALYTIC PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on various topics in analytic philosophy. The subject matter will change.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2300 - ETHICS (CORE)
Minimum Credits: 3
Maximum Credits: 3
This is an introductory to intermediate level graduate seminar in ethics, required of all students in the doctoral program in philosophy, and taken in the first or second year of residence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosophy (PHD)

PHIL 2305 - TOPICS IN ETHICS
Minimum Credits: 3
Maximum Credits: 3
A study of selected topics in ethics. Course may be repeated for credit if material is different.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2310 - MORAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in moral theory, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2315 - MORAL PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced level graduate seminar taken almost exclusively by graduate students in the doctoral program usually during their second or third year in residence.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PHIL 2316 - ETHICS AND PUBLIC LIFE
Minimum Credits: 3
Maximum Credits: 3
This course will aid students in making and evaluating normative arguments and analyzing normative concepts as relevant to the formulation and
administration of public policy. It will also present and discuss a number of substantive issues of ethical responsibility, rights and justice that are relevant to government officials, both in the U.S. And other countries.

**PHIL 2317 - ENVIRONMENTAL ETHICS**
- Minimum Credits: 3
- Maximum Credits: 3
This course explores major issues of moral theory and political philosophy as they arise from an interest in the preservation of and respect for non-human nature. The course explores the question of whether traditional, moral and social theories need revision when non-human nature is brought into the domain of ethical inquiry. It asks what are the principles that best guide policy toward environmental preservation at the same time that they promote social justice.

**PHIL 2330 - POLITICAL PHILOSOPHY**
- Minimum Credits: 3
- Maximum Credits: 3
This is an intermediate to advanced graduate seminar in political philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**PHIL 2331 - CNTMPRY THEORIES OF JUSTICE**
- Minimum Credits: 3
- Maximum Credits: 3
In this course we will read some of the most important contributions to conversations and debates about justice in recent philosophy and political theory. We will discuss John Rawls' "theory of justice", along with some communitarian, egalitarian, feminist and postmodern responses. We will then consider other approaches to theories of justice less strictly focused on distribution of goods. Michael Walzer distinguishes several spheres of justice and amartyasen places issues of the distribution of goods in the context of human capabilities.

**PHIL 2335 - TOPICS CONTEMPORARY PHILOSOPHY**
- Minimum Credits: 3
- Maximum Credits: 3
This is an intermediate to advanced graduate seminar on various topics in contemporary philosophy. The subject matter will change.

**PHIL 2340 - PHIL PERSPECTIVES ON FEMINISM**
- Minimum Credits: 3
- Maximum Credits: 3
This is an intermediate to advanced graduate seminar in philosophical issues related to feminism, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**PHIL 2380 - RATIONAL CHOICE**
- Minimum Credits: 3
- Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the theory of rational choice, taken almost exclusively by students in the doctoral program,
usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2381 - DECISION THEORY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the decision theory taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2382 - TOPICS IN DECISION THEORY
Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in decision theory. Course may be repeated for credit if material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2385 - RATIONALITY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in philosophical issues related to rationality, taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of this course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2390 - PHILOSOPHY OF LAW
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of law, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2391 - TOPICS IN PHILOSOPHY OF LAW
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate graduate seminar on various topics in the philosophy of law. The subject matter will vary with the instructor.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2400 - METAPHYSICS-EPISTEMLOGY (CORE)
Minimum Credits: 3
Maximum Credits: 3
This is an introductory to intermediate level graduate seminar in metaphysics and epistemology, required of all students in the doctoral program in philosophy, and taken in the first or second year of residence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosophy (PHD)
PHIL 2420 - PHILOSOPHY OF LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of language, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2421 - TOPICS IN PHILOSOPHY OF LANG
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in various topics in the philosophy of language taken by students in the doctoral program. The exact content of this course varies from one occasion to another.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2430 - SINGULAR REFERENCE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in singular reference taken almost exclusively by graduate students in the doctoral program usually during their second or third year of residence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2440 - PHILOSOPHY OF MIND
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of mind, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2445 - PHILOSOPHY OF ACTION
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of action taken almost exclusively by students in the doctoral program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2460 - EPISTEMOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in epistemology, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2470 - PHILOSOPHY OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of religion, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**Academic Career:** GRAD  
**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**PHIL 2500 - ADVANCED LOGIC (CORE)**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the first term of an introductory graduate course in mathematical logic. Topics are completeness of propositional logic and quantification theory and elementary set theory.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Philosophy or History and Philosophy of Science (PHD)

**PHIL 2501 - ADVANCED LOGIC/2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the second term of an introductory graduate course in mathematical logic. Topics are incompleteness of arithmetic, decidability, axiomatic set theory and topics in philosophical logic.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: [(ECON 0100 and 0110) or (ECON 0800)] and (STAT 0200 or 1000 or 1100 or 1152); MIN GRAD: "C" for (ECON 0100 and 0110); PLAN: Economics (BA or BS) or Economics - Statistics (BS) or Mathematics-Economics (BS)

**PHIL 2505 - TOPICS IN PHILOSOPHICAL LOGIC**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is an intermediate to advanced graduate seminar in various topics in philosophical logic, taken almost exclusively by students in the doctoral program. The exact content of this course varies from one occasion to another.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PHIL 2510 - TOPICS IN LOGIC**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Study of selected topics in logic. Course may be repeated for credit if material covered is different.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PHIL 2530 - SET THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is an intermediate to advanced graduate seminar in set theory, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.  
**Academic Career:** GRAD
PHIL 2533 - DESCARTES
Minimum Credits: 3
Maximum Credits: 3
An examination of some of the major works of Descartes. Also a look at his precursors, his culture and his influences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2540 - MODEL THEORY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in model theory taken almost exclusively by students in the doctoral program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2544 - UNDERSTDG ARISTOTLES TELEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Through a study of a wide range of Aristotelian texts, this course explores (i) the precise nature of Aristotle's commitment to the thesis that the development, structure, and functioning of living things in general and the action and productive activities of human beings in particular are goal-directed; and (ii) the ways in which this commitment shapes and is shaped by central aspects of his metaphysics, epistemology, science, and ethical theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2547 - ARISTOTLE'S PHILOSOPHY OF SCI
Minimum Credits: 3
Maximum Credits: 3
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2555 - ARISTOTLE'S CONCP NATURAL SCI
Minimum Credits: 3
Maximum Credits: 3
Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims, methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2565 - THE GENE:TRANSFRM/FRGMNT CONCP
Minimum Credits: 3
Maximum Credits: 3
The course covers the period from Gregor Mendel to the molecular gene of the 1990s. We explore its status as a hypothetical construct, and as a spatial concept in terms of its localization in the cell. Discussion of its status as a fundamental unit in biology leads to consideration of its place in the theoretical biology, in speculations about the origin of life, and in debates over the levels at which natural selection acts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PHIL 2580 - PHILOSOPHY OF MATHEMATICS
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2585 - TOPICS IN PHILOSOPHY OF MATH
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on topics in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2590 - MATHEMATICS FOR FOUNDATIONS
Minimum Credits: 3
Maximum Credits: 3
This course is designed primarily for students training to do serious research in the philosophical foundations of mathematics (e.g. Set theory and category theory) and/or physics (e.g. Statistical mechanics, quantum mechanics, and relativity).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2599 - BEHAVIORAL GENETICS
Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in history of science. Course may be repeated for credit if material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2600 - PHILOSOPHY OF SCIENCE CORE SEM
Minimum Credits: 3
Maximum Credits: 3
This seminar is an intensive and advanced introduction to some of the main themes and problems in philosophy of science including the nature of evidence, theory comparison, the theory-observation distinction, the meaning of theoretical terms, scientific explanation and scientific change.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosophy (PHD) or History and Philosophy of Science (PHD)

PHIL 2610 - SPECIAL TOPICS IN HPS
Minimum Credits: 3
Maximum Credits: 3
This course deals with selected special topics in the history of the philosophy of science. It is an intermediate to advanced graduate seminar, usually taken by students in the doctoral program. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2620 - PHILOSOPHY OF SOCIAL SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of social science, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2621 - RECNT TOPICS PHIL SOCL SCIS
Minimum Credits: 3
Maximum Credits: 3
In this seminar we will read and discuss recent works in the philosophy of social sciences. The choice of authors and topics will depend on who is doing the most interesting new work in the field.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2624 - PHIL OF CLSSC & QUNTM MECHC
Minimum Credits: 3
Maximum Credits: 3
The first part introduces some of the main philosophical topics about classical and quantum mechanics and also relativity theory. The second part will pursue some special topics in greater depth.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2625 - RECNT TOPICS IN PHIL OF SCI
Minimum Credits: 3
Maximum Credits: 3
In this seminar we will read and discuss recent works in the philosophy of science. The choice of authors and topics will depend on who is doing the most interesting new work in the field.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2626 - TOPICS IN PHILOSPHY OF PHYSICS
Minimum Credits: 3
Maximum Credits: 3
The course will examine some of the fascinating problems to which the modern physical theories of quantum mechanics and relativity have given rise. No previous formal training in physics or mathematics will be presupposed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2627 - PHILOSOPHY OF QUANTUM MECHAN
Minimum Credits: 3
Maximum Credits: 3
This course will review the Hilbert space formalism of quantum mechanics, consider interpretations of that formalism, (for instance, hidden variable theories, relative state formulations, stochastic reduction schemes), and the difficulties-empirical, logical, and conceptual- to which interpretations are prone.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2628 - PHILOSOPHY OF PHYSICS
Minimum Credits: 3
Maximum Credits: 3
This seminar investigates philosophical issues in the foundations of fundamental theories of physics.
PHIL 2629 - RACE: BIOLOGY, PSYCH, ETHICS
Minimum Credits: 3
Maximum Credits: 3
Race is a controversial and fascinating topic, at the intersection of various disciplines—particularly, evolutionary biology, genetics, psychology, medicine, history and ethics. This seminar explores the recent debates about races in biology, psychology and ethics.

PHIL 2632 - PHILOSOPHY & NEUROSCIENCE
Minimum Credits: 3
Maximum Credits: 3
The seminar will discuss issues concerning the nature of mechanisms, models of mechanisms, and the concepts of reduction and information in the neurosciences (and occasionally in molecular biology). Cases will be drawn from recent (well cited) work in cognitive neuroscience and neurobiology on memory (especially studies on working memory, procedural memory and implicit memory) and perception.

PHIL 2633 - PHIL OF COGNITIVE SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course will survey the main philosophical questions provoked by cognitive science. Students will acquire a comprehensive grasp of the main issues in this field. We will discuss questions such as: is the mind modular? Is the mind embodied and situated? Do we ascribe mental states by simulation or by means of a theory? What is consciousness?

PHIL 2634 - TOPCS PHIL COGNITIVE SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This class focuses on advanced topics that have been recently debated in the philosophy of cognitive science. Students will acquire an in-depth understanding of these debates.

PHIL 2640 - PHILOSOPHY OF PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of psychology, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

PHIL 2641 - EXPERIMENTAL PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
The seminar will be a survey of recent work in experimental philosophy. We will look at experimental studies aimed at advancing debates in a number of areas of philosophy including metaphysics, semantics, epistemology, philosophy of science and ethics. This seminar will also give students the opportunity to explore ways in which experimental methods can be brought to bear on philosophical issues.
PHIL 2645 - TOPICS PHILOSOPHY OF PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
We will consider credible challenges to the orthodox view that the mind works by computing symbolic representations. They derive from research in connectionism, dynamical systems theory, embodied mind approaches and elsewhere and give promise as accounts of emotions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2646 - CARNAP AND REICHENBACH
Minimum Credits: 3
Maximum Credits: 3
A survey of the philosophies of Rudolf Carnap and Hans Reichenbach with special emphasis on the philosophy of science.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2648 - SCI PHIL IN ARISTOTLE'S GENRT
Minimum Credits: 3
Maximum Credits: 3
A study of this treatise both as a systematically structure scientific work and as a source for Aristotle's metaphysics, theory of science and philosophy of biology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2650 - PHILOSOPHY AND PSYCHOANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on the topic of philosophy and psychoanalysis taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2651 - PHILOSOPHY AND PSYCHOANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second part of philosophy and psychoanalysis taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2652 - PHILOSOPHY OF PSYCHIATRY
Minimum Credits: 3
Maximum Credits: 3
This course examines conceptual, methodological, and some historical issues in psychiatry. General analyses of psychiatric disorders and classifications, and their reliability and validity, will lead to a consideration of the DSM and ICD. The function of etiological, reductive, and mechanical dimensions (including genetic and neuroimaging research) will be discussed. Historical topics include the contrast between and transition from psychoanalytical, narrative approaches to the rise of bio-chemical psychiatry. Extended consideration of schizophrenia and depressive disorder will be course themes. The seminar closes with a discussion of legal and ethical issues in psychiatry.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PHIL 2655 - ARISTOTELIAN/TRACTARN PHIL SCI
Minimum Credits: 3
Maximum Credits: 3
A study of Aristotle's program for understanding causality and laws of nature as grounded in the powers and capacities of natural objects and the diametrically opposed program of Wittgenstein's Tractatus which tries to explain science in terms of logical relations between expressions instead of causal relations between things and linguistically based scientific laws in place of laws of nature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2656 - ARISTOTLE-MODALITY OF CHANGE
Minimum Credits: 3
Maximum Credits: 3
Aristotle's views on the nature, causes and modality of change and what it is for events to be necessary or contingent, actual or possible.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2657 - PHILOSOPHY OF BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Central issues in the philosophy of biology from Darwin to the present including essentialism, reductionism, theory structure and explanation. Topics may include debates on units of selection, species concept, relationship between classical and molecular genetics, relationship between developmental and evolutionary biology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2659 - NEUROBIOL, REDUCTN & EMERGENCE
Minimum Credits: 3
Maximum Credits: 3
This is an introductory level graduate seminar on the relations of the mind and the brain. Recent developments in the neurosciences, in theoretical brain science, and in computer science suggest that powerful new perspectives on understanding the "mind-brain" will be covered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2660 - PHILOSOPHY OF SPACE AND TIME
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of space and time, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2662 - CAUSALITY
Minimum Credits: 3
Maximum Credits: 3
Consideration of various theories of causality and how the theories relate to questions of metaphysics, epistemology and explanation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2665 - LAWS OF NATURE, MDRN TREATMENT
An examination of recent accounts of the nature and function of laws of nature.

**PHIL 2672 - GENES AND BEHAVIOR**
Minimum Credits: 3
Maximum Credits: 3
The relations between genes and behaviors will be considered from both classical (heritability) as well as molecular perspectives. Examples will be drawn from model organism research (worm, fly, and mouse) as well as human studies. The latter will consider the IQ controversy, normal personality genetics, and analyses of schizophrenia and other mental disorders. The roles of the environment and intermediate phenotypes (end phenotypes) including brain imaging studies will be discussed. Philosophical approaches will include articles from the reductionist, interactionist, and emergentist literature.

**PHIL 2675 - SCIENTIFIC EXPLANATION**
Minimum Credits: 3
Maximum Credits: 3
This is a graduate seminar in scientific explanation taken almost exclusively by students in the doctoral programs of philosophy and HPS usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**PHIL 2677 - FDS OF QUANTUM FIELD THEORY**
Minimum Credits: 3
Maximum Credits: 3
Quantum theories of systems with infinitely many degrees of freedom face foundational problems without analog in the conventional philosophy of ordinary non-relativistic quantum mechanics. This seminar explicates those problems, along with the technical tools needed to address them.

**PHIL 2680 - SCIENTIFIC REALISM**
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on the topic of scientific realism, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**PHIL 2681 - REALISM**
Minimum Credits: 3
Maximum Credits: 3
What, if anything, makes scientific claims true or false? Is scientific language about anything? If it is, can we know which scientific claims are true, or can we arrange our beliefs to converge towards the truths? If not, what purpose can the enterprise of science serve? This seminar will examine these and related questions.

**PHIL 2687 - EPISTEMLOGY OF EXPERMNTL PRACT**
Observation and experimentation have long been taken as central to the legitimacy of scientific claims. This seminar examines the assumptions and inferences involved in reasoning about experimental results.

**PHIL 2689 - EXPLANNS, CAUSES, AND MECHNSM**
Minimum Credits: 3  
Maximum Credits: 3  
A study of theories of explanation and causality as they relate to the recent work on mechanisms. Cases will come from biology and neuroscience. The concept of information will also be considered.

**PHIL 2690 - THEORIES OF CONFIRMATION**
Minimum Credits: 3  
Maximum Credits: 3  
This is an intermediate to advanced graduate seminar on the topic of induction and confirmation, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**PHIL 2695 - PRAGMATISM**
Minimum Credits: 3  
Maximum Credits: 3  
The course focuses on key pragmatic texts from C. S. Pearce to the present. But it will also give some consideration to the historical background of pragmatism and to later critical responses and reactions. Emphasis will be upon those pragmatic teachings, especially in semantics, epistemology, and philosophy of science, that bear on currently controverted issues.

**PHIL 2699 - EXPERMNT & SCIENTIFIC PRACTICE**
Minimum Credits: 3  
Maximum Credits: 3  
This will be a course on the epistemology of science. An honest way to do epistemology of science is to ask, given a theory and a set of evidence: to what extent does this evidence support this theory? In this course we will not investigate the topography of evidential warrant so directly. We will turn instead to some recent studies of the experimental practices through which particular pieces of evidence emerge as evidence.

**PHIL 2700 - SCIENCE AND RELIGION**
Minimum Credits: 3  
Maximum Credits: 3  
This course will treat issues that can be grouped under two main questions: (1) is the understanding of the world furnished by science incomplete such that supernaturalist religions (notably theism) can remedy this incompleteness, or, on the contrary, (2) is there a clash between contemporary science and theism? Instances of (1) and (2) respectively are appraisals of Dostoyevski's thesis that "if god does not exist, all things are (ethically) permissible" and of the claim that "miracles defy scientific explanation".

**PHIL 2800 - ZOOLOGICAL PHILOSOPHY**
Zoological philosophy is an approach to philosophical problems that takes seriously the fact that humans are animals, and that brings experience and scientific knowledge to bear on philosophical problems. The seminar typically focuses on several such problems.

**PHIL 2900 - TEACHING PHILOSOPHY**
Minimum Credits: 1
Maximum Credits: 1
A practicum approach to train tas an tfs wherein faculty and senior graduate students train the more junior tas on how to teach philosophy. This course has been approved as an alternative to FACDEV 2200 for philosophy graduate students.

**PHIL 2902 - PRE-MA DIRECTED STUDY**
Minimum Credits: 1
Maximum Credits: 9
This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.

**PHIL 2950 - DISSERTATION SEMINAR**
The purposes of this seminar (which has very successful counterparts at other top graduate programs in philosophy) are multifold. It gives students working on dissertation projects a community of others in the same boat. It provides them with feedback on work in progress, and practice presenting their work to an audience wider than their committee. (This is important for the impression they make on the job market.) Supposing that each student admitted to candidacy makes a seminar presentation each semester, it hastens time to completion by imposing interim deadlines on the road to a completed dissertation. The seminar gives students who have been comprehensively evaluated but not yet defended a prospectus examples of other students who have successfully negotiated the transition.

**PHIL 2990 - INDEPENDENT STUDY**
Minimum Credits: 1
Maximum Credits: 9
This is a course through which students can receive graduate degree credit in philosophy for work that they undertake largely or entirely on their own, with little or no faculty supervision.

**PHIL 2999 - PROSPECTUS RESEARCH**
Each doctoral student in philosophy, when he or she is ready to begin working on the doctoral dissertation in earnest, must submit to a prospective dissertation committee a document, called a "prospectus", outlining the proposed dissertation topic, the envisioned treatment of that topic, and a rough plan for how to proceed. This course is a special directed study course for preparing that document.
PHIL 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 9
This course gives academic credit for research toward and writing of the doctoral dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PHIL 3902 - POST-MA DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Physical Medicine and Rehabilitation

PMDREH 5410 - REHABILITATION SUB-INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
During this four-week elective for fourth year medical students, participants will function at an intern-level the student will be given intern-level responsibilities to manage inpatient rehabilitation patients. Student will be teamed with one attending and one or more PM&R residents and will be responsible for caring for their own patients, which includes rounding, writing notes, admitting and discharging patients, staffing team conferences with therapists, nurses, and other health care providers, and communicating with families under supervision of the team. Students will also be able to participate in therapy sessions and will gain exposure to prescription of orthoses. The student will be assigned to one team for the entire month to gain experience in the longitudinal care of rehab patients. Teaching will be bedside as well as small didactic sessions at the discretion of the attending. There is no exam and students will be evaluated on their participation and meeting the course objectives.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PMDREH 5450 - REHABLTTN MEDICL CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
This four-week elective will demonstrate to the student the basic problems of patients and basic concepts of care for patients, referred to the division of rehab medicine. The student will be taught physical diagnostic techniques applicable to the disorders of musculoskeletal and neural systems. Students are expected to evaluate inpatients and develop a treatment plan under the supervision of division physicians. Common patient problems include hemiplegia, back pain, cervical spondylosis, arthritis and amputations. Electrodiagnostic studies will also be demonstrated.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PMDREH 5460 - PED PHYSCL MED/REHAB-INPATIENT
Minimum Credits: 0
Maximum Credits: 0
In this four-week elective the student will function in the capacity of an intern and care for hospitalized children with rehabilitation needs. Diagnosis will include cerebral palsy, myelomeningocele and other neuromuscular disorders. Skills in the physical and medical management of pediatric disability and an awareness of the other medical disciplines involved in the care of these children would be stressed.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PMDREH 5461 - PED PHYSCL MED/REHAB-OUTPATNT
Minimum Credits: 0
Maximum Credits: 0
In this four-week elective the student will be involved in clinical evaluations of pediatric patients with multiple neuromuscular problems. This would include the differential diagnosis and physical exam as well as emphasis on electro diagnosis. In addition, some fundamentals of bracing and prosthesis prescriptions will be covered.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PMDREH 5465 - DISABILITIES CLERKSHIP

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Students will participate in the medical care of patients in a variety of inpatient clinical settings and in both adult and pediatric outpatient settings. Teams consist of physiatrists, pediatricians, nurse practitioners, physical therapists, occupational therapists, and social workers. The student's role will include serving as liaison to the medical center, assisting in the daily care of individuals with disabilities, providing clients and staff with education about specific medical topics and advocating for the program and its clients within the medical center.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PMDREH 5650 - INDIVIDUALIZED CLINICAL COURSE

**Minimum Credits:** 0  
**Maximum Credits:** 0  
**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

### PMDREH 5810 - PM&R RESEARCH

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This four-week elective will allow the student to gain valuable experience in cutting edge research in physical medicine and rehabilitation (PM&R). The student will be precepted by faculty affiliated with the department of PM&R by meeting the following objectives: identify different sources of research funding; become familiar with effectively formulating grant proposals and budgets; learn to identify obstacles to performing productive research in an academic setting; assist in formulating effective research methodology; publication of an abstract.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

### PMDREH 5899 - IND STDY IN PHYSCL MED & REHAB

**Minimum Credits:** 0  
**Maximum Credits:** 0  
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

**Academic Career:** MEDS  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

### PMDREH 5900 - EXTRAMURAL PHYSCL MED & REHAB

**Minimum Credits:** 0  
**Maximum Credits:** 0  
A clinical experience in Physical Medicine & Rehabilitation may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**Physical Therapy**
PT 2025 - PHYSIOLOGY OF EXERCISE
Minimum Credits: 2
Maximum Credits: 2
Structures and function of muscle, principles of neuromuscular recruitment for physical work, excitation-contraction coupling, contractile biochemistry, including sources of fuel for muscular work, and shifts in energy demands and fuel sources with physical activity under conditions of steady state, fasting, exercise and stress will also be covered. Examples of the impact of structural and physiological change with growth, aging disease, drugs, and performance enhancing substances are reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2026 - CARDIOPULMONARY PT 1
Minimum Credits: 2
Maximum Credits: 2
Students gain a basic understanding of structure and function of cardiovascular and pulmonary systems, cardiorespiratory fitness and pulmonary physiology in both healthy and diseased state. Principles of physical training for persons with and without cardiopulmonary dysfunction are addressed through lecture, demonstrations, and student participation in monitoring and interpreting signs and symptoms of physical work in healthy and disease states. Interactions of skeletal muscle and the cardiovascular and respiratory systems are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2027 - CARDIOPULMONARY PT 2
Minimum Credits: 2
Maximum Credits: 2
Evidence-based study of the application of physiological and clinical sciences to the physical therapy management of individuals with cardio-pulmonary system dysfunction. Learning experiences include weekly literature review and directed professional discussions with colleagues (class mates, instructor and lecturers), and a case-based approach to applying knowledge and decision-making to examination, evaluation, prognosis, and intervention in cardiopulmonary pt.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2028 - HEALTH AND WELLNESS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2029 - KINESIOLOGY AND INTRO TO
Minimum Credits: 3
Maximum Credits: 3
Introduction to the principles of the causes and treatment of musculoskeletal movement dysfunction. Basic principles of biomechanics and kinesiology of the musculoskeletal system with applications to the treatment of musculoskeletal dysfunction are also included. This material will be presented in lecture format and will be supplemented by direct laboratory experience.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2030 - ANATOMY
Minimum Credits: 7
Maximum Credits: 7
An overview of the musculoskeletal causes of movement dysfunction concentrating on the upper extremities. Basic principles of musculoskeletal evaluation, biomechanics, kinesiology and treatment are included. In depth study of the musculoskeletal and peripheral nervous system of the human body also included. Directed laboratory experience using prosected cadavers, skeletal material, models and audio-visual tapes. The adaptation of this knowledge and skills to diverse populations in a variety of practice populations emphasized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2031 - MUSCULOSKELETAL PT 1**
Minimum Credits: 6
Maximum Credits: 6
An overview of the musculoskeletal causes of movement dysfuncational, concentrating on the lower extremities. Class room, laboratory and clinical sessions are used to facilitate the attainment of competencies in prevention, screening, diagnosing and designing and managing a PT plan of care for patients with physical dysfunction resulting from musculoskeletal causes. The adaption of this knowledge and skills to diverse populations in a variety of practice environments is emphasized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PT 2025 and PT 2029 and PT 2030 (All Courses MIN GRADE ’C’); PLAN: Physical Therapy (DPT)

**PT 2032 - MUSCULOSKELETAL PT 2**
Minimum Credits: 5
Maximum Credits: 5
A continuation of PT 2031.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2033 - MUSCULOSKELETAL PT 3**
Minimum Credits: 3
Maximum Credits: 3
A continuation of PT 2032.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2034 - MANUAL THERAPY**
Minimum Credits: 1
Maximum Credits: 1
This course will be a review and practice of manual techniques for evaluating and treating the spine and extremities.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**PT 2035 - CLINICAL BIOMECHANICS**
Minimum Credits: 3
Maximum Credits: 3
Student will be introduced to quantitative methods for biomechanical analysis of gait and other human movement. Equipment and methods to be studied include automated motion analysis, videography, force platform, and kinesiological electromyography. The student will do a project involving the biomechanical analysis of movement using this equipment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
PT 2040 - SURVEY OF HUMAN DISEASE 1
Minimum Credits: 2
Maximum Credits: 2
A systematic approach to obtaining a pertinent history and identifying patient problems through interviews or other appropriate methods. Includes the recognition of signs and symptoms of systemic disease, cardiovascular, respiratory and neuromusculoskeletal causes of movement dysfunction. The recognition of patient problems that may require other professional attention in addition to that from a physical therapist is emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2041 - PATIENT MANAGEMENT 1
Minimum Credits: 4
Maximum Credits: 4
Provides an introduction to physical therapy interventions used to help alleviate patients' movement dysfunction and problems with pain that may be caused by a variety of pathologies. Developing knowledge and skills in proper patient and therapist body mechanics, transfer techniques, wheelchair design, patient positioning and draping and use of ambulatory assistive devices are stressed, as are the knowledge and skills of the physical modalities of heat, light, cold, water and massage.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2042 - PATIENT MANAGEMENT 2
Minimum Credits: 3
Maximum Credits: 3
Provides instruction in PT interventions used to help alleviate movement dysfunction and pain in a variety of patient populations. Content includes: upper and lower extremity orthotic and prosthetic intervention, pathological process and PT management for patients with amputations, cancer, wounds, burns and arthritis, and intervention for issues in women's health (prosthetics, osteoporosis).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2045 - SURVEY OF HUMAN DISEASE 2
Minimum Credits: 2
Maximum Credits: 2
An introduction to human diseases that affect the respiratory, hepatic, renal, and gastrointestinal systems. Environmental and psychogenic causes of diseases are also studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2050 - ADVANCED MANUAL THERAPY
Minimum Credits: 2
Maximum Credits: 2
This 2-credit elective course will introduce students to a variety of manual therapy techniques that are used to treat musculoskeletal conditions in the clinical practice of physical therapy. The course will include a combination of lecture and hands-on lab. The techniques will span the spectrum from soft tissue procedures such as transverse friction massage and manual trigger point therapy to mobilization procedures for the spine and extremity joints. Participants should have a basic working knowledge of the manual therapy procedures taught within the musculoskeletal tract.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

PT 2052 - PEDIATRIC PHYSICAL THERAPY
Minimum Credits: 3
Maximum Credits: 3
Lecture and laboratory activities focusing on the preparation of the student for a pediatric clinical affiliation and a possible career in physical therapy.
PT 2055 - GROWTH AND DEVELOPMENT 1
Minimum Credits: 2
Maximum Credits: 2
Major emphasis is on the evaluation and treatment of children. General principles of growth and development of the major systems will be reviewed, in addition to common diseases and diagnoses affecting those systems. Students will learn to prioritize appropriate evaluation and treatment strategies for pediatric patients; interpret results of clinical findings; develop and prioritize problem lists; and formulate treatment goals that are functional and age appropriate.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2056 - GROWTH AND DEVELOPMENT 2
Minimum Credits: 2
Maximum Credits: 2
A continuation of PT 2055.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2059 - GERIATRICS
Minimum Credits: 2
Maximum Credits: 2
Course provides information and sources of information to enable students to appreciate changes in physical function (including physical, cognitive and social aspects) of the older adult and consider the potential impact the changes may have on health status and assessment and treatment in pt. An overview of systemic, behavioral and cognitive changes that typically occur with advanced age and the impact of the changes on physical function are also discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2060 - NEUROSCIENCE
Minimum Credits: 4
Maximum Credits: 4
Considers gross and cellular organization of central nervous system and its relationship to peripheral somatic and visceral systems; the physiological properties of neurons, their associated structures; and the problem mechanisms for reception, transmission, and integration of information at spinal, supraspinal and cortical levels. Concepts of normal sensory-motor integration, to include influence of neural centers on motor activity and postural control, and clinical manifestations of dysfunctions of major neural elements will be discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2061 - NEUROMUSCULAR PT 1
Minimum Credits: 3
Maximum Credits: 3
First of a three part series of courses which introduce the student to basic neurological rehabilitation principles. Course intended to provide the student with knowledge and understanding of human movement and function throughout the neuromuscular system. Students will be introduced to a neuromotor evaluation scheme for patients with neurologic impairments. Information presented regarding motor behavior, motor control as it relates to normal/abnormal movement and function. Case studies and problem solving format will be used throughout this course.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2062 - NEUROMUSCULAR PT 2**
Minimum Credits: 5
Maximum Credits: 5
A continuation of PT 2061.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2063 - NEUROMUSCULAR PT 3**
Minimum Credits: 3
Maximum Credits: 3
A continuation of PT 2062.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2071 - RESEARCH METHODS IN PT**
Minimum Credits: 2
Maximum Credits: 2
Purpose of this course is to instruct students in the basic principles of research in physical therapy. Topics to be covered include research methodology and study design, hypothesis testing, and principles of data collection and outcome assessment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2072 - EVIDENCE-BASED PRACTICE 1**
Minimum Credits: 1
Maximum Credits: 1
Course designed to provide an introduction to the concepts of evidence-based practice in physical therapy. Course will integrate classroom lecture and discussion, and small-group forums to help students learn how research evidence impacts the practice of PT. Emphasis of course will be interpreting research evidence on PT interventions and adapting the evidence into clinical practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2073 - EVIDENCE-BASED PRACTICE 2**
Minimum Credits: 1
Maximum Credits: 1
Course is to apply principles of evidence-based practice to decisions regarding selection of appropriate physical therapy treatments. Integrate lectures, discussion and research forums to help students learn how to appraise the research literature regarding treatments, and how to apply research evidence to treatment decisions for individual patients. Emphasis on interpreting research evidence on aspects of diagnosis and prognosis related to PT and adapting the evidence into clinical practice. Students will develop a summary data collection form for a specific patient population.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT)

**PT 2074 - EVIDENCE-BASED PRACTICE 3**
Minimum Credits: 1
Maximum Credits: 1
Primary objective of course will be presentation of the group information collected during the student's first full time clinical internship. Written and
oral summaries collected data will be presented by the student groups assembled during PT 2073.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PLAN: Physical Therapy (DPT)

---

**PT 2075 - EVIDENCE-BASED PRACTICE 4**

**Minimum Credits:** 2

**Maximum Credits:** 2

Primary objective of course will be benchmarking data presented in PT 2074 against anticipated outcomes in the literature. Students will work in groups assembled in PT 2073. Each group responsible for searching the literatures to determine expected outcomes for their particular patient-type. Each group will perform a systematic review of the literature related to interventions for their patient-type and will document the usage of evidence-base interventions in their own data and its relationship to outcomes of care.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PLAN: Physical Therapy (DPT)

---

**PT 2076 - EVIDENCE-BASED PRACTICE 5**

**Minimum Credits:** 1

**Maximum Credits:** 1

Course will run concurrent with student's full-time, yearlong clinical internship. Requirements will be completion of a personal portfolio of clinical outcomes for patients seen during the internship experience. A variety of patient types will be examined by each student depending on the clinical setting. Each student's portfolio will be evaluated by members of the PT faculty at 6 months and after completion of the year-long internship.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad HSU Basis

**Course Requirements:** PLAN: Physical Therapy (DPT)

---

**PT 2077 - EVIDENCE-BASED PRACTICE 6**

**Minimum Credits:** 1

**Maximum Credits:** 1

Course will run concurrent with student's full-time, yearlong clinical internship. Requirements will be completion of a personal portfolio of clinical outcomes for patients seen during the internship experience. A variety of patients' types will be examined by each student depending on the clinical setting. Each student's portfolio will be evaluated by members of the PT faculty at 6 months and after completion of the year-long internship.

PT 2081 - PT LEADERSHIP & PROF DVLP 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2082 - PT LEADERSHIP & PROF DVLP 2
Minimum Credits: 1
Maximum Credits: 1
An introduction and overview of the profession of physical therapy including its scientific basis, standards of practice, ethical and legal responsibilities, and role in the delivery of health care by referral, delegation and consultation with a multidisciplinary health care team.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2083 - PT LEADERSHIP & PROF DEVELP 3
Minimum Credits: 3
Maximum Credits: 3
Examination of management principles for effective and efficient patient care services by providing knowledge of health care systems, organizational structures and personnel management policies in the environments of practice. Introduction to the teaching-learning process for use in therapeutic intervention and in meeting the educational needs of patients, students, colleagues and the community. Discussion of opportunities and responsibility for continued professional development.
Academic Career: GRAD

Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis

PT 2131 - CLINICAL EDUCATION 2
Minimum Credits: 3
Maximum Credits: 3
This part-time clinical is focused on the development of professional skills. It will be a hands-on experience allowing the student to perform patient management skills that they are learning in the classroom. Clinical responsibilities will increase throughout the semester. Students must also regularly attend and participate in departmental clinical rounds. This weekly forum will provide the opportunity for faculty, clinicians, and students to present clinical case reports with an interactive group discussion. Students must meet specific clinical benchmarks in order to successfully pass this course.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis

PT 2132 - CLINICAL EDUCATION 3
Minimum Credits: 4
Maximum Credits: 4
This is a full-time six-week clinical internship under the supervision of physical therapists that have met the qualifications for clinical faculty. It may occur in either an inpatient or outpatient setting. Students must meet specific clinical benchmarks in order to successfully pass this course.

**Physicians Assistant Program**

**PAS 2101 - INTRODUCTION TO PAS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course traces the history, development, and current status of the physician assistant profession. Students will explore the role of the physician assistant as part of the healthcare team. The student will research and investigate the state and national legislation that governs the profession. Topics will include a historical perspective of the profession, current trends, and issues of the profession; the pa role in health care delivery, competencies integral to the pa profession; political and legal factors that affect pa practice; importance of biomedical ethics, patient confidentiality, and professionalism, in relation to their role as health care providers; content reviewing the professional organizations, program accreditation, graduate certification, certification maintenance, license application, employment issues and professional liability will be discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physician Assistant Studies (MS)

---

**PAS 2102 - ANATOMY**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course with a lab studies the organization of the human body and the way in which anatomical relationships serve as a basis for function. The medical aspects of the structural and functional organization of the human body are also a focus of attention. The lectures are designed to provide guidance or explain difficult or conceptual material. The major learning experience occurs in the laboratory with cadaveric dissection.  
**Academic Career:** GRAD
**PAS 2103 - MEDICAL PHYSIOLOGY**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is an introduction to the physiology and microanatomy of the human body, and as such its major objectives are to give students an appreciation of both the normal functioning and the structure of tissues and organs. In accomplishing this goal, it is desirable for students to correlate lecture information pertaining to cell and organ system physiology with laboratory exposure to the histology and ultra structure of human tissues and organs.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physician Assistant Studies (MS)

**PAS 2104 - GENTC & MOL MECH OF HLTH & DS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course introduces the student to the understanding of genetic and molecular medicine as it applies to clinical practice. A strong knowledge base of cell structure, genetic variation, inheritance patterns and specific genetic disorders is required. In addition to knowledge, the application of genetic knowledge and molecular medicine involves the development and integration of skills including but not limited to: accurate history taking; creation of precise documentation of and interpretation of the pedigree; integration of genetic understanding into patient assessment; comprehension of the role of genetic testing and counseling; and management and referral of patients with genetic issues. Physician assistant students must be familiar with the ethical, legal and social issues of genetics. Due to the constantly changing knowledge in this field, pa students must demonstrate the ability to utilize information literacy skills to ensure that as clinicians they are self-directed life-long learners.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PAS 2101 and PAS 2102 and PAS 2103 and PAS 2105 and PAS 2106 and PAS 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

**PAS 2105 - HEALTH POLICY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course introduces the student to how the health care system works. The focus is on basic principles of health policy, system failures. Topics include reimbursement, access to health care, workforce, quality assurance, long-term health care. In addition, topics will include public policy, funding issues, healthcare disparities, managed care and the medically underserved. The course will conclude with an opportunity to review and discuss moral and ethical issues in healthcare from the perspective of a physician assistant.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physician Assistant Studies (MS)

**PAS 2106 - INTRPTG EVALUATING MEDICAL LIT**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course introduces the basic concepts, terminology and methodology of quantitative and qualitative research as it applies to medical practice. This course will stress the knowledge and skills necessary for locating, interpreting, evaluating and applying quality medical research to clinical practice and professional development; the ability to appropriately critique medical literature; and the basic comprehension needed for participation in research and the development of research and grant proposals. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Physician Assistant Studies (MS)

**PAS 2107 - PATIENT EDUCATION & COUNSELING**
Minimum Credits: 2
Maximum Credits: 2
This course is a practical approach to understanding how patients present, learn and change based on the research on theories, models and techniques of: personality and learning styles; how to assess patient knowledge, attitude and readiness to change; and the effects of literacy, health literacy, individual coping mechanisms, ecological barriers and culture on patient comprehension and adherence. The use of validated interpersonal skills improves the clinician/patient relationship, demonstrates respect for the patient's well-being and individuality, thereby reducing medical errors and lawsuits, and increasing patient adherence. Extensive self-reflection on the student's own barriers, biases, stereotypes, culture and assumptions is required. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2101 and PAS 2102 and PAS 2103 and PAS 2105 and PAS 2106 and PAS 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2201 - HIST TAKING & PHYSCL EXAM 1
Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the basic interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications. Students will learn the clinical significance of the physical examination, the components of the complete physical exam and will be able to perform these examination techniques. Topics in this course will include: a general overview of history taking and physical examination; clinical reasoning; documentation; interviewing skills; the general survey; skin; the head and neck; the lungs; the cardiovascular exam.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2201 and PAS 2102 and PAS 2103 and PAS 2105 and PAS 2106 and PAS 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2202 - CLINICAL MEDICINE 1
Minimum Credits: 3
Maximum Credits: 3
This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. preventative measures to assist in disease prevention will also be discussed. Content includes infectious diseases, dermatology, disorders of the head, eyes, ears nose and throat, cardiopulmonary disorders, and endocrinopathies. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2101 and PAS 2102 and PAS 2103 and PAS 2105 and PAS 2106 and PAS 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2203 - DIAG & THERAPEUTIC PROC 1
Minimum Credits: 3
Maximum Credits: 3
This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include methods of wound care and closure, burns, hyper/hypothermia, assessment of pulmonary function, arterial blood gases, ent procedures, bioterrorism, radiology. . The laboratory component of this course will allow the student to practice the skills and procedures common to pa practice.

Academic Career: GRAD

PAS 2204 - PHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course presents a study of drugs and their interactions with and within living tissue. This course introduces the student to general drug classifications and medicinal agents most likely encountered in primary care settings and the pharmacological principals, dosing, patient education, pharmacodynamics, and therapeutic parameters and indications, about commonly prescribed drugs. Areas covered include drug receptor theory, mechanisms of action, pharmacokinetics, pharmacodynamics, antimicrobial therapy, cardiovascular medications, and drugs affecting the autonomic nervous system, complementary medicines. Each of these topics will be explored through lecture, class discussions, and case presentations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PAS 2101 and PAS 2102 and PAS 2103 and PAS 2105 and PAS 2106 and PAS 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2205 - PATHOPHYSIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course examines the biological basis of common clinical disease states. Pathophysiology is treated as a disruption of normal homeostatic mechanisms that progresses beyond the normal compensatory capabilities of the human body.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2301 - HIST TAKING & PHYSICAL EXAM 2
Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications as they pertain to the specific organ systems presented. The students will learn the clinical significance of the physical examination, the components of the physical exam and will be able to perform these examination techniques for the material introduced in this course. Topics in this course will include: a general overview of history taking and physical examination as it pertains to course content; clinical reasoning; documentation; interviewing skills; of the abdominal exam, female/male genitalia, musculoskeletal system, neurological system, and assessment of special populations-which includes the pregnant patient, pediatrics, and examining the older adult.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2302 - CLINICAL MEDICINE 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of Clinical Medicine I and is an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes disorders of the GI system, obstetrics and gynecology, nephrology, disorders of the urinary tract, musculoskeletal diseases, neurology, behavioral medicine, and hematolgy/oncology. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2303 - DIAGC & THERPUTIC PROCEDR 2
Minimum Credits: 3
Maximum Credits: 3
This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected
procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include GI procedures, NG tube placement, intravenous placement, central line monitoring, bladder catheterization, musculoskeletal procedures, immobilization, joint injection, lumbar puncture, electrocardiography, transfusion medicine. The laboratory component of this course will allow the student to practice the skills and procedures common to PA practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to general drug classifications and medicinal agents most likely encountered in primary care settings and the pharmacological principals, dosing, patient education, pharmacodynamics, and therapeutic parameters and indications, about commonly prescribed drugs. Topics include drugs used in gastroenterology, obstetrics and gynecology, immunology, complementary medicine, psychotropic medications, opioid and non-opioid analgesia, chemotherapeutic agents. Each of these topics will be explored through lecture, class discussions, and case presentations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2305 - HEALTH ISSUES ACROSS LIFESPAN
Minimum Credits: 2
Maximum Credits: 2
This course introduces the physician assistant student to diseases, exam findings and diagnostic evaluations, and treatments common to the pediatric and geriatric populations. Course content will be introduced using a variety of teaching techniques including both traditional lectures as well as cooperative and collaborative group work. Case studies will be presented to reinforce course content and form the discussion in class.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2306 - FUNDAMENTALS OF SURGERY
Minimum Credits: 1
Maximum Credits: 1
A series of lectures introduces fundamental principles of peri-operative medicine, procedure oriented patient evaluations, preoperative assessment, prevention of post-operative complications, surgical instrumentation, operative techniques, anesthesia, pre- and post-operative management of patients, post-operative complications, co-morbid states, and documentation. The history of the physician assistant in surgery, including surgical reimbursement issues will be discussed. Selected topics will include the most commonly performed surgical procedures as well as issues relevant to various surgical sub-specialties.

Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2701 - CLINICAL ROTATION 1
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week clinical rotation focuses on the evaluation and management of the ambulatory and hospitalized patient on an internal medicine service. Students learn how to take an accurate and pertinent history, conduct a physical examination, recognize patterns of illness, and acquire approaches to disease management. The student participates in the full range of inpatient care, formulating a problem list, taking part in daily rounds, performing technical skills, participating in the management of patient problems, and planning for discharge and follow-up care.

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)
PAS 2702 - CLINICAL ROTATION 2
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week clinical rotation focuses on the evaluation and management of the ambulatory patient in a primary care setting. The student participates in the full range of outpatient care through the life span, including collecting patient data and information from diagnostic studies, developing a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care. This clinical rotation encompasses the comprehensive and longitudinal care of patients with a special emphasis on care of individuals in the context of families and communities.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2703 - CLINICAL ROTATION 3
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week clinical rotation focuses on the evaluation and management of patients in the emergency department setting. The student participates in the appropriate triage, stabilization, diagnosis and management of patients with urgent and emergent problems and develops skills in working with the pre-hospital emergency medical team and secondary referral systems.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2704 - CLINICAL ROTATION 4
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week rotation focuses on the evaluation and care of infants and children in an ambulatory setting. The student participates in well-child preventative care, the evaluation and management of common pediatric problems, and the patient education of children and their care-givers.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2705 - CLINICAL ROTATION 5
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week rotation focuses on the evaluation and management of surgical patients and become familiar with the clinical presentations and management of common surgical problems. The student is involved in pre-operative, intra-operative and post-operative patient care and develops an understanding of the PA as a member of the surgical team. The student will learn to develop skills necessary in evaluating patients in the perioperative period and to optimize patients' medical conditions in preparation for surgery. Students learn the natural history of common surgical diseases and the proper operative management and their postoperative treatment. The student will participate in developing the correct diagnoses and management of the surgical patient. The student will also participate in the management of acute pain and postoperative complications.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2706 - CLINICAL ROTATION 6
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week rotation focuses on the evaluation and management of patients with psychiatric and behavioral health problems in ambulatory and/or inpatient settings. The student participates in psychiatric evaluations, monitoring of therapy, and appropriate referral to other health care professionals and facilities.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)
PAS 2707 - CLINICAL ROTATION 7
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week rotation focuses on the evaluation and management of women patients, including prenatal care and gynecologic problems. The student participates in the collection of patient data and information from diagnostic studies, development of a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2708 - CLINICAL ROTATION 8
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week rotation focuses on the evaluation and management of geriatric patients, including experience in a long-term care setting. The student participates in the collection of patient data and information from diagnostic studies, development of a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2709 - CLINICAL ROTATION 9
Minimum Credits: 4
Maximum Credits: 4
This 3 credit, four-week clinical rotation focuses on the evaluation and management of the ambulatory and hospitalized patient on an internal medicine service. Students learn how to take an accurate and pertinent history, conduct a physical examination, recognize patterns of illness, and acquire approaches to disease management. The student participates in the full range of inpatient care, formulating a problem list, taking part in daily rounds, performing technical skills, participating in the management of patient problems, and planning for discharge and follow-up care.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2710 - CLINICAL ROTATION 10
Minimum Credits: 3
Maximum Credits: 3
This 3 credit, four-week clinical rotation builds on the family medicine rotation and focuses on the evaluation and management of the ambulatory patient in a primary care setting. The student participates in the full range of outpatient care through the life span, including collecting patient data and information from diagnostic studies, developing a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care. This clinical rotation encompasses the comprehensive and longitudinal care of patients with a special emphasis on care of individuals in the context of families and communities.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2711 - CLINICAL ROTATION 11
Minimum Credits: 4
Maximum Credits: 4
This 4 credit clinical practicum is a six-week clinical rotation that designed to provide the physician assistant student with an elective opportunity in any of the previous rotation specialties or a rotation designed by the student, in conjunction with a faculty member, to enhance the student's knowledge or skill in a specific specialty.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physician Assistant Studies (MS)
PAS 2712 - SUMMATIVE EVALUATION
Minimum Credits: 1
Maximum Credits: 1
The summative evaluation is designed to assure that each student has met arc-pa and the program's defined cognitive and clinical skills performance objectives prior to graduation. In addition to assessing the student's proficiency by individual competencies we will be assessing student performance through the interaction of the program specific competencies. The summative evaluation includes measurement of the dimensions of cognition, technical skill, integration, rapport, behavior and attitude. The evaluation is comprised of an objective examination of medical knowledge, procedural skill through clinical skills evaluation, and objectively structured clinical examinations to evaluate interactions between the student and patient (history taking, physical examination and clinical reasoning) assessment of critical thinking and professional behavior. Students are required to pass this course in order to graduate from the program.

Grade Component: Grad LG/SNC Basis

PHYS 2541 - THERMDYNMCS & STATSTCL MECHNCS
Minimum Credits: 3
Maximum Credits: 3
This is the first term of a 2-term course with emphasis on statistical mechanics. Discussion of microcanonical, canonical, and grand canonical ensembles, the passage to quantum mechanics, and the use of density matrix. The Gibbs approach to the second law. Fermi-Dirac and Bose-Einstein statistics, in both weak and strong degeneracy approximations. Transport phenomena including the fluctuation dissipation theorem and the master equation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 2542 - THERMDYNMC & STATSTCL MECHNC 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is the second part of the two-term sequence, PHYS 2541-2542 on thermodynamics and statistical mechanics. Topics covered include Liouville theory and the ergodic problem, the problem of irreversibility. Einstein radiation, the density matrix and quantum statistics, grand ensembles, fluctuations, critical phenomena, and noise.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 2555 - ADV CLSSCL ELECTRY & MAGNTSM**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
This is the first term of a two-term study of Maxwellian electromagnetism. Both the physical concepts involved and the mathematical formulation of the theory will be explored. The theory will be applied to a variety of physical systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 2556 - ADV CLSSCL ELECTRY & MAGNTSM 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the second term of a two-term course. This course covers electrodynamics based on Maxwell's equation with emphasis on properties of electromagnetic waves. The special theory of relativity, covariant theory electro dynamics and radiation phenomena will be discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 2565 - NON-RELATIVSTC QUNTM MECHANC 1**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the first term of a two-term course. Subjects covered include the general principles of wave mechanics and matrix mechanics, Dirac notation, the solution of bound state problems, especially the central force problem.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 2566 - NON-RELATIVSTC QUNTM MECHANC 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The second term of this course applies the previously developed abstract form of quantum mechanics to more complicated systems. Angular momentum and permutation symmetries are discussed. Approximation methods for multiparticle and scattering problems are developed. Finally the theory of electromagnetic radiation by atoms is presented.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 2675 - MODERN PHYSICAL METHODS 1**  
**Minimum Credits:** 3  
**Maximum Credits:** 3
This course provides an introduction to modern methods used for physical measurements, giving the student the opportunity to work with research grade instruments. Topics covered include many aspects of modern electronics, resonance phenomena in a variety of physical systems, vacuum systems, spectroscopy and computer control of experiments. The course provides a solid introduction to experimental techniques for those who have not had the normal compliment of undergraduate physics laboratory courses and a challenge to those who have.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

**PHYS 2676 - MODERN PHYSICAL METHODS 2**
Minimum Credits: 3
Maximum Credits: 3
This course emphasizes the use of modern techniques in physical measurements, giving the student an opportunity to work with research grade instruments and to perform sophisticated analysis of the data obtained. Topics include resonance phenomena, spectroscopy, electronic particle detection and computer control and data acquisition.

PHYS 3540 - INTRO ASTROPHYSICS & COSMOLOGY
Minimum Credits: 3
Maximum Credits: 3
This class will provide a broad overview of the physical principles important for astrophysics, and applications to a range of astrophysical phenomena. Concepts covered will include gravitation, radiative processes, radiative transport, fluid dynamics, and nuclear, atomic, and molecular processes. Sample applications might include extrasolar planets, gravitational collapse, stellar structure, star formation, galaxy evolution, accretion disks, compact objects, and galaxy clusters.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3542 - ADVANCED STATISTICAL PHYSICS
Minimum Credits: 3
Maximum Credits: 3
Statistical physics typically deals with the thermal properties of systems with large numbers of interacting dynamical variables, i.e., With many degrees of freedom, and the special techniques used to determine those properties. As such, the ideas, methodologies and results from the study of statistical physics inform virtually all fields of physics, from condensed matter and solid state to astrophysics and cosmology. This course is aimed at a wide audience of primarily second year (and more senior) graduate students with interests in experimental or theoretical physics and astrophysics/cosmology. The aim is to provide a broad perspective of the concepts and techniques of statistical physics, which, as noted, cut across many areas of active research. Depending on the composition of the class, an attempt will be made to include some examples from different disciplines. Topics to be covered (depending somewhat on the background and interests of individuals in the class) include: a review of ideal quantum gases (Sommerfeld model of a metal; Bose-Einstein condensation; magnetism in Fermi systems (landau levels, hall effect); white dwarf stars; fluctuations and response; phase transitions and critical phenomena (experimental survey, criticality = a new state of matter?); Phenomenology (mean field theories, landau theory, classification); order parameters, scaling, fluctuations, response, universality, broken symmetry; renormalization group overview as a mechanism; interacting systems (brief introduction to second quantization; weakly interacting boson gas (broken symmetry, excitation spectrum, superfluidity); bcs as a mean field theory; nonequilibrium, stochastic processes (brownian motion and diffusion; fluctuation/dissipation; markov processes, master equation; boltzmann equation and fluid mechanics).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3550 - STELLAR STRUCTURE
Minimum Credits: 3
Maximum Credits: 3
Stars are the most common astrophysical objects. They create most of the atomic elements and most of the observable optical light in the sky. This class provides an overview of the physics of stars and the interstellar medium. Topics will include hydrostatic equilibrium, nuclear processes, radiative transfer, metallicity and opacity, convection, stellar evolution, stellar explosions, properties of the interstellar medium, and energy feedback from stars.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3580 - GALC & EXTRAGALACTIC ASTRONOMY
Minimum Credits: 3
Maximum Credits: 3
Galaxies are the fundamental building blocks of the present universe. This class will give an overview of galaxies, their properties, and their formation and evolution with an emphasis on current research areas. Topics will include observational properties (morphology, masses, colors, concentration), scaling relations, evolution with redshift, stellar populations, gas and dust, dynamics and dark matter, evolution and mergers, and active galaxies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3701 - RADIATIVE PROCESSES IN ASTRPHYCS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PHYS 3705 - ATOMIC AND OPTICAL PHYSICS
Minimum Credits: 3
Maximum Credits: 3
Descriptions are given of experimental and theoretical methods of investigating atomic collision processes involving electrons, positive and negative ions, excited atoms/molecules, ground state atoms/molecules and photons. The processes include elastic and inelastic scattering, ionization, recombination, reactive collisions, etc. Both historical and modern state-of-the-art approaches to the problems are covered. Applications to areas as widely different as lasers, fusion plasmas, planetary upper atmospheres and interstellar clouds are touched upon.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3706 - ATOMIC STRUCTURE & INTERACTNS
Minimum Credits: 3
Maximum Credits: 3
Topics: atomic collisions such as electron-atom scattering, excitation and ionization, electron-ion recombination, ion atom and ion-molecule interactions. Experimental and theoretical methods used in atomic collision research. Applications of atomic collisions to laboratory and natural (e.g., Geophysical or astrophysical plasmas). Collision related aspects of plasma physics. The emphasis of the course is less on formal theory than on interaction of theory and experiment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3707 - INTRO TO MANY-BODY PHYSICS
Minimum Credits: 3
Maximum Credits: 3
It is difficult to find a current topic in physics that doesn't deal with many interacting degrees of freedom. The universe of such problems is conveniently divided into ones in which quantum descriptions are essential and others in which a classical description will suffice. Despite this seeming division, the ideas and concepts cross over; an example is the idea of a field description. Very similar effective field theories describe a superconductor at low temperatures, a quantum system, and a classical system like a quantity of liquid argon coexisting with its vapor. Concepts, for example, of broken symmetry and gauge invariance are portable. Many of the same general concepts and techniques carry over from one subfield to another; a number of examples can be cited and will be mentioned at appropriate points during the course. This is a one-term nuts-and-bolts introduction to the quantum physics of interacting, many-particle systems. The course includes second quantization, many body physics and a brief introduction to relativistic quantum mechanics. The approach will generally be intuitive and hands-on. The course typically will begin with second quantization for fermionic and bosonic systems, with examples typically involving electrons, phonons and photons, arising from the quantization of the electromagnetic field. Applications will typically include (i) the interacting electron gas and plasmons (ii) the interaction of the radiation field and matter, (iii) electron phonon interaction, dressed electrons and the polaron problem. There will typically be some discussion of condensation phenomena and superfluidity (typically Bogoliubov theory, broken symmetry and goldstone bosons); superconductivity (pairing, BCS and Landau-Ginzburg theories). There will generally be some exposure to greens functions and Feynman diagrams. In addition the course will include a brief introduction to relativistic quantum mechanics and the Dirac equation. Throughout there will be discussion of applications of the techniques and concepts in various subfields of physics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3712 - TOPICS IN NONLINEAR DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
An introduction to some of the basic concepts and methods influencing current theories in nonlinear dynamics. Topics will include an introduction to the qualitative theory of dynamical systems (flows, maps, phase portraits, attractors, stable and unstable manifolds), bifurcation theory for equilibria and periodic orbits (center manifold theory, normal forms), transitions to chaos (Ruelle-Takens theory, period-doubling cascades), and chaotic dynamics (strange attractors, ergodic theory); an introduction to bifurcations in spatially extended systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3713 - QUANTUM OPTICS
Minimum Credits: 3
Maximum Credits: 3
Topics to be considered include the statistical properties of chaotic classical light, quantization of the free radiation field, pure and mixed free field
states, photon statistics, photon antibunching, squeezed states, atomic absorption and emission of radiation, resonance fluorescence, rabi oscillations, two-photon cascade emission, many-level processes, transient excitation of atoms and atomic ensembles, time evolution of light-driven nonlinear media, superradiance and relaxation processes.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 3714 - QUANTUM DYNAMICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Topics include Hamiltonian classical dynamics; classical and quantum maps; regular and chaotic semiclassical mechanics; Rydberg atoms in strong external fields; closed orbit theory; quantum diffusion and localization; metal insulator and gas-plasma transitions; superradiant Mesoscopic systems; ballistic electrons in semiconductor structures.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 3715 - SOLID STATE PHYSICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a one-term course on the ideas of solid-state physics, emphasizing the special ways one must think about crystalline materials. This is a mature subject, but continuously, over more than seven decades, new ideas and phenomena have emerged. In one term we can only consider the basic ideas along with a few more recent developments to enable students working in solid state physics, condensed matter, nanoscience and related fields to approach the voluminous literature and enhance their own research efforts, and also to allow other students to have an appreciation for an extremely large part of current research activity in physics. Roughly speaking, there will be three parts to the course: some variation on emphasis can be expected depending on the instructor and on the interests of the class. (I) phonons: crystal lattices; diffraction and scattering; reciprocal lattice; lattice vibrations, quantization; thermal properties. (II) electrons: free electron model; density of states; thermal properties; Bloch's theorem, electron states and energy bands; semiconductor statistics; quasi-classical electron dynamics; Boltzmann equation and transport. (III) additional topics: electron-electron and electron-phonon interactions; hall effect; landau levels; superconductivity; electromagnetic response.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 3716 - ADVANCED SOLID STATE PHYSICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a second, graduate level solid state course. The topics could be adjustable given the cross section of the department and topical developments in the field. Depending on the makeup of the department, the scope (and title) could be broadened. Topics suitable for this course include: a brief exposure to ‘practical’ group theory (1-2 weeks maximum); optics and spectroscopy relevant to the solid state (including linear and non-linear response and complex dielectric constant); coherence and correlation (including the density matrix, Bloch equations, optics); introduction to NMR (e.g. Two-level system, rotating reference frame, characteristic times); superconductivity II (e.g. Type II, magnetic effects) beyond the Ginsburg-Landau theory (done in statistical physics II); magnetism II (more advanced topics: using model and phase transitions done in statistical physics II, spin waves and landau levels in solid state physics I); transport theory II (i.e. Beyond the basic Boltzmann equation examples in solid state physics I).  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PHYS 3717 - PARTICLE PHYSICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the first term of a two term sequence exposing the student to basic methods and recent developments in high energy physics. Particle physics involves completely relativistic phenomena and requires the generalization of non-relativistic quantum concepts to the relativistic regime in order to develop the phenomenological and calculational methods suitable for relativistic processes in which the number and type of particles can change. The student will be taken out of the realm of the Schroedinger equation and into relativistic quantum fields. The first term is suitable as a one semester course for students not specializing in high energy physics. The course examines experimental and phenomenological foundations of particle physics. The known particles and fundamental interactions are investigated. Modern experimental techniques of particle physics are discussed (including basic properties of particle interactions with matter). General features of electromagnetic, weak, and strong interactions, and their associated symmetries, are explored.  
**Academic Career:** GRAD
PHYS 3718 - ADVANCED PARTICLE PHYSICS
Minimum Credits: 3
Maximum Credits: 3
This is the conclusion of the 2-term sequence PHYS 3717/3718. This course covers the standard model in detail and includes: the phenomenology of weak interactions; group theory and the quark model; the parton model for deep inelastic scattering and other high energy processes; an introduction to gauge theories of electroweak and strong interactions. Various topics of current interest in particle physics beyond the standard model will also be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3721 - PHYSICS OF PLANETARY ATMOSPHERES
Minimum Credits: 3
Maximum Credits: 3
Structure of the atmospheres of the earth, planets and interplanetary medium are discussed. Physical processes involved in the aurora, airglow, and PCA events, in the creation of the ionosphere and the role of the magnetosphere in solar-terrestrial coupling are studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3723 - CONTEMPORARY PARTICLE PHYSICS 1
Minimum Credits: 3
Maximum Credits: 3
This course is the first term of a two-term contemporary survey of experimental and theoretical particle. This term will cover (1) an overview of basic particle physics phenomenology including basic interactions and conservation laws, quark model, cross sections, resonances, phase space, decays; (2) particle accelerators and colliders, experimental detectors and techniques; (3) an introduction to gauge theories using Weinberg-Salam as the basic model; (4) weak interactions including neutral currents, quark decays, heavy quark decays, discovery w, z and cp violation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3724 - CONTEMPORARY PARTICLE PHYSICS 2
Minimum Credits: 3
Maximum Credits: 3
Topics to be covered in the second term of this two-term course will include: (1) e+e-colliders; (2) parton model, lepton quarks interactions, structure functions and fragmentation, (3) qcd, jets and hadron physics; (4) future machines, proton decay and grand unified theories.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3725 - GENERAL RELATIVITY 1
Minimum Credits: 3
Maximum Credits: 3
This course will cover the basic conceptual foundations of general relativity, calculational techniques, and current observational probes. Topics include the equivalence principle, geodesic deviation, tidal forces, the description of gravitation as spacetime curvature, and Einstein's equations. These ideas will be applied to current observations, including post-Newtonian parameters and solar system probes, the Schwarzschild metric and black holes, gravitational wave generation and detection, gravitational lensing, and gravitational explanations for dark energy phenomenology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3726 - GENERAL RELATIVITY 2
Minimum Credits: 3
Maximum Credits: 3
This is the second term of a two-term survey of general relativity. Subjects to be treated during the year include conservation laws, equations of...
motion, gravitational radiation, gravitation collapse, and cosmology.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### PHYS 3730 - INTRODUCTION TO BIOPHYSICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The post genomic age presents many new challenges and opportunities to physicists. This course will prepare the students to face those challenges and to work in this exciting multidisciplinary area of science. In this course we will review useful physical ideas and techniques that have contributed significantly to the recent development in biophysical research. This includes the use of statistical approaches for understanding gene regulation and signal transduction in biological and chemical networks; nonlinear dynamics for understanding biological pattern formation, ecology, and population dynamics; hydrodynamics for understanding cell motility and taxis; and information theory for signal processing in neuronal networks. The study of biophysics thus requires a broad range of physics knowledge and techniques. The course will also introduce basic concepts in biology that range from molecular to cellular biology. Topics to be covered include: introduction to biology; microscopy techniques; basics of cell biology; genetics (the genetic code, gene replication, gene expression, genetic networks); molecular biology techniques; energy in biological systems and the statistical view of biological dynamics; entropy and free energy in biology; two-state models in biology and neurobiology.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### PHYS 3750 - STELLAR STRUCTURE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The aim of this course is to give the student a fundamental understanding of the structure of stars and their evolution. Emphasis will be placed on the physical interplay between stellar atmospheres and interiors. Topics to be discussed include the physics of spectral types, radiative transport in stars, models of stellar atmospheres, nuclear burning in main-sequence stars and in red giants, nucleosynthesis and the origin of matter, white dwarfs, neutron stars, and the ages of globular clusters.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### PHYS 3751 - INTERSTELLAR MEDIUM

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course is designed for physicists who are interested in the physical conditions and evolution of the interstellar medium. The goal is to discuss components of the interstellar medium, such as multi-phase gas, iii regions, molecular clouds, the interstellar magnetic field, and interstellar grains.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### PHYS 3765 - FIELD THEORY 1

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the first semester of a graduate course in quantum field theory. The assumed prerequisites are a basic graduate course in quantum mechanics, and familiarity with the rudiments of special relativity. The course develops the perturbative approach to relativistic field theory. It begins with a study of the Lorentz group and the method of second quantization. Scalar and spin-1/2 field theories are discussed, including an elementary introduction to renormalization (at the one-loop level). The theory of interacting electrons and photons (qed) is constructed, with applications to a number of physical processes. In more detail, the topics covered will be: Lorentz and poincare groups; free scalar field theory; free spin-1/2 field theory; field quantization; symmetries and conservation laws; interacting scalar field theories, Yukawa theory; perturbation theory and Fynman rules; elementary renormalization theory; quantum electrodynamics.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### PHYS 3766 - FIELD THEORY 2

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the second semester of a graduate course in quantum field theory. It builds on the material covered in phys 3765 (field theory 1). The course
further develops the techniques of relativistic quantum field theory, covering the path integral approach to field theory, additional topics in quantum electrodynamics, symmetry breaking, non-abelian gauge theories, and the standard model. In more detail, the topics covered will be: Green's functions, asymptotic scattering theory, and the LSZ formalism; functional integration and the path integral; quantization of abelian (QED) and non-abelian (Yang-Mills) fields; the renormalization group; spontaneous symmetry breaking of global and local symmetries; the standard model.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3767 - TOPICS IN PARTICLE PHYSICS

Minimum Credits: 3
Maximum Credits: 3
The syllabus will include: action approach to space-time and internal symmetries; functional integral formulation of field theories; nonabelian gauge symmetries and quantization of Yang-Mills fields; introduction to renormalization theory and the renormalization group; theory of global and local broken symmetries; Higgs mechanism, Weinberg-Salam theory, and grand unified theories (mainly SU(5)).

PHYS 3770 - TOPICS IN QUANTUM PHYSICS

Minimum Credits: 3
Maximum Credits: 3

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3785 - COSMOLOGY

Minimum Credits: 3
Maximum Credits: 3
This class will give an overview of the standard cosmological model and the wide range of observational tests. Topics include the expansion history of the universe, thermodynamic history, nucleosynthesis, recombination, inflation, perturbations and the microwave background, structure formation, evidence for dark matter and dark energy, and future probes of dark energy.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHYS 3790 - PARTICLE ASTROPHYSICS

Minimum Credits: 3
Maximum Credits: 3
Particle physics plays an increasingly important role in astrophysics. This class will cover areas of common interest between these fields. Topics may include dark matter (particle abundances, particle candidates, direct and indirect detection), neutrino masses and oscillations, high energy cosmic rays and detection schemes, high density matter in neutron stars, models for inflation, baryogenesis, cosmological phase transitions, and models for dark energy.

Plastic Surgery

PLSSURG 5450 - PLASTIC RECONSTRUCTIVE SURGERY  
Minimum Credits: 0  
Maximum Credits: 0  
Four-week elective. Student participates in clinical care of patient on plastic surgical service, in acute management of facial and hand injuries in ER or OR. Also involved in pre- and post-operative care. Act as assistant in elective plastic surgery operations in wide variety of conditions. Instruction given in biology of wound healing and fundamental techniques of plastic surgery. Emphasis on scope and interaction of plastic surgery with other specialties and various methods of reconstruction available for various deformities.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

PLSSURG 5650 - INDIVIDUALIZED CLINICAL COURSE  
Minimum Credits: 0  
Maximum Credits: 0  
Academic Career: MEDS  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U

PLSSURG 5883 - SURGICAL RESEARCH  
Minimum Credits: 0  
Maximum Credits: 0  
Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.  
Academic Career: MEDS  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U

PLSSURG 5899 - INDEPENDENT STUDY PLASTIC SURG  
Minimum Credits: 0  
Maximum Credits: 0  
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.  
Academic Career: MEDS  
Course Component: Independent Study  
Grade Component: H/HS/S/LS/U
PLSSURG 5901 - EXTRAMURAL PLASTIC SURGERY
Minimum Credits: 0  
Maximum Credits: 0
A clinical experience in plastic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

Political Science

PS 2000 - PROFESSION OF POLITC SCIENCE
Minimum Credits: 1  
Maximum Credits: 1
This course is a professionalization seminar in which first-year graduate students meet weekly with various faculty members to discuss various issues surrounding political science as a profession. Topics will include writing a dissertation, the publication process, teaching, work-life balance, and other issues.
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2010 - FOUNDTS OF QUANTIT METHODS
Minimum Credits: 3  
Maximum Credits: 3
This course is designed to introduce the beginning graduate student to the major conceptual and theoretical issues of contemporary political science. During the term, focus will be in three basic areas of inquiry; a) political science as a science; b) paradigms, frameworks, approaches; and c) examination of contemporary examples of applications of the above in various substantive fields of political science.
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2020 - EMPIRICAL METHODS OF RESEARCH
Minimum Credits: 3  
Maximum Credits: 3
This seminar is the second in a three-course methodological sequence required for graduate students in political science. It introduces students to techniques of research design and analysis, and is designed to enable students to read and understand empirical social science research. Problems of scientific method, concept formation, measurement, and statistical inference are explored; students learn to use some of the statistical techniques common in political research.
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2030 - POLITICAL RESEARCH AND ANALYSIS
Minimum Credits: 3  
Maximum Credits: 3
This course aims to provide the student with (1) the ability to read, interpret, and criticize virtually any piece of political science research using quantitative methods and (2) the ability to design and carry out original research applying quantitative methods to relevant data.
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2040 - CORE POLITICAL THEORY
This seminar in political thought forms one of the core requirements of the graduate program in political science. Its aim is to introduce graduate students to the traditional concerns of the subfield of political theory and to explore the relevance of this subject matter even to political scientists who do not choose to specialize in it.

**Academic Career:** GRAD

---

**PS 2050 - ADVANCED METHODOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Selected topics in data collection and statistical analysis. Content of the course will vary depending upon the interests of the instructor and the needs of students. Possible topics include experimental design, advanced regression, and dimensional analysis.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**PS 2060 - QUALTV RES: DESIGN & METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.

---

**PS 2114 - CAPSTONE SEMINAR**

Minimum Credits: 3  
Maximum Credits: 3  
The intent of the capstone seminars is to provide students with a focused experience in working on a real world problem of policy and management in a team setting under expert faculty guidance. Each seminar is focused on a prescriptive question - what should a specified public official or institution do about a specified problem?

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

---

**PS 2115 - POLICY DESIGN/IMPLEMENTATION**

Minimum Credits: 3  
Maximum Credits: 3  
Uses concepts, models and strategies for developing new and more appropriate solutions for public policy problems. Analyzes constraints and opportunities surrounding the implementation of public policies and programs. Emphasis on strategies of planned change, dissemination of innovations, and knowledge utilization in the public sector.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**PS 2116 - COMPARATIVE PUBLIC ADMINSTRTN**
The public bureaucracy is a political institution and must be understood as a key factor in the policymaking process. At the same time it is a formal structure charged with the legal implementation of policy. These two competing understandings of administration will be examined from a variety of theoretical and analytical perspectives. The principal geographical focus will be on Europe, but there will also be discussions of administration in other areas.

**Academic Career:** GRAD  
**Course Component:** Lecture

---

**PS 2200 - AMERICAN GOVERNMENT AND POLITICS**  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar provides an opportunity to analyze selected aspects of government and politics in the United States through a program of intensive reading, seminar discussions, and written essays. Some prominent interpretations of American government and politics are identified and examined. Readings on and discussion of topics such as political leadership and mass behavior provide a basis for consideration of the seminar's major theme, leader-follower interaction.

** Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2212 - US EXECUTIVE BRANCH POLITICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This Ph.D. seminar course examines both the theoretical and empirical literature on the U.S. Executive branch. The focus of this course is strictly centered on the study of political institutions and organizations’ political behavior related topics (e.g. presidential popularity; presidential elections; presidential nominations) will be covered in other courses. Although the primary focus of this course will be at the U.S. federal level, some attention will be given to the U.S. subnational level (i.e. American states). The course is broken down into three sections. The first section provides an overview of interdisciplinary research on institutions and organizations from both economics and sociological theoretical traditions. The second section of this course focuses on the internal functioning of the executive branch, including, but not limited to, president-agency relations. The final section focuses on analyzing executive branch actors' external relations with other institutional actors (i.e. legislative, judiciary, organized interests) within a separation of powers constitutional framework. The aim of the final section is to integrate insights from both institutional and organizational perspectives.

** Course Component: Seminar  
** Grade Component: Grad LG/SNC Basis  

** Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2213 - JUDICIAL PROCESS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course examines courts and judges as political actors. It emphasizes the non-legal factors that affect the decisions judges make and that influence judicial interactions with other political actors and institutions. Most material will focus on the US court system, but there will be some work of a comparative nature. Students will be responsible for critically analyzing reading materials and producing an independent research project.

** Academic Career: GRAD  
** Course Component: Seminar  
** Grade Component: Grad Letter Grade  

** Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2214 - LAW AND THE PUBLIC'S HEALTH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

The purpose of this course is to provide graduate students with an understanding of the legal structures that define, support, and limit government's authority and responsibility in the interest of public health. The course consists of both didactic and case-related materials selected from primary legal sources as well as from scholarly analyses in public health research and policy. Students will analyze case studies of contemporary public health issues in light of both the law and the practical aims of government's public health functions.

** Academic Career: GRAD

** Grade Component: Grad LG/SNC Basis  

** Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2215 - RELIGION AND POLITICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3
This course will examine the intersection of religion and politics in the United States from various theoretical, historical, legal and psychological perspectives. Major theoretical questions addressed in the course include: (1) what is the appropriate role for religion in the democratic "marketplace of ideas", and (2) how does American pluralism in religious belief, practice, and orientation influence political socialization, behavior and value cleavages.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2230 - MASS POLITICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2231 - ETHICS AND PUBLIC LIFE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will aid students in making and evaluating normative arguments and analyzing normative concepts as relevant to the formulation and administration of public policy. It will also present and discuss a number of substantive issues of ethical responsibility, rights and justice that are relevant to government officials, both in the U.S. and other countries.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2233 - POLITICAL COGNITION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the relevance of psychological theories of information processing and attitude change for the study of mass political behavior, with particular emphasis on American political behavior. Theoretical perspectives examined include cognitive heuristics, schema theory, attribution, stereotyping, and others. Study of such cognitive perspectives is intended to facilitate assessment of the political aptitude of the mass public.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2234 - SURVEY RESEARCH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides an overview of survey research methods with an emphasis on its application in the social sciences. Topics covered include sampling, survey nonresponse, writing survey questions and designing survey instruments, data collection methods (including use of emerging technologies in surveys), use of randomized experiments in surveys, accessing and analyzing public data sets, and ethical issues in the conduct of surveys. A major theme of the course is the various potential sources of error in surveys and the methods for minimizing these errors within the framework of available resources. At the conclusion of the course, students will be able to (1) apply appropriate survey research methods to the design and conduct of their own survey, and (2) evaluate the appropriateness of survey methods used in scientific publications and the popular media.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2235 - AMERICAN ELECTORAL BEHAVIOR**
This seminar complements PS 2230: Mass Politics. Like 2230, this seminar examines the America micropolity. But while 2230 focuses primarily on what happens in citizens' proverbial heads when they think about politics, this course will emphasize the practical applications and consequences of those thoughts - what people do in the electoral arena, what factors influence that behavior, and how electoral outcomes can be predicted or explained.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2241 - BUREAUCRACY, ORGNIZTN & POLITICS**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar focuses on topics with the aim of theoretically integrating general microlevel theories of organization and behavior to macrolevel theories about the role of bureaucracy and administration, and issues of accountability, responsiveness, and policymaking.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2261 - AMERICAN PUBLIC POLICY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will concentrate primarily on policy processes within and between American political institutions. Literature will be reviewed and assessed for its contribution to our understanding of conceptual approaches, institutional roles, public opinion/policy linkages, cross-institutional and inter-level policy processes, new techniques in policy analysis, budgetary politics, and the ethical bases of policy choice.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2262 - HEALTH POLICY IN UNITED STATES**

Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to current problems of health care and health policy in the United States. Description and analysis of the proposals, current practices, and the reactions of interest groups will be the central theme of the course.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2263 - ADMINSTRTN OF PUBLIC AFFAIRS**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to complex issues, problems and concepts in public administration. Topics include: ethics, organizational theory, evaluation, basic management functions, personnel, finance, and productivity.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2264 - PUBLIC POLICY ANLYSIS & EVALTN**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to policy-making processes; the methodology and techniques of policy analysis; the application of methods to the evaluation of new and existing programs; uses and limitations of different methods of policy evaluation.

**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2265 - ENVIRONMENTAL ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PS 2270 - TOPICS IN AMERICAN POLITICS
Minimum Credits: 3
Maximum Credits: 3
Special topics in American politics will be discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2301 - THEORY & CONCEPTS COMP POLITICS
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytic frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytic tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state and to making policy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2302 - SEMINAR IN POLITICAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
An examination of the process of political development in contemporary third world countries. Among the topics will be "political decay", social origins of democracy and dictatorship, system functionalism, economic development and political change, social, psychological and cultural factors in development. Contemporary political systems will be examined, with emphasis on elites and their ideologies, parties and interest groups, and the role of the military and the bureaucracy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2304 - RESEARCH SEMINAR IN COMPARATIVE POLITICS
Minimum Credits: 3
Maximum Credits: 3
This graduate level seminar examines existing and current policy problems and developments across selected political and economic systems. Analytical perspectives are compared and contrasting implications examined in depth. Traditional and contemporary theories of explanation are applied and evaluated in the context of empirical descriptions of national and cross-national issues, conflicts, and policy proposals.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
PS 2305 - COMPARATIVE POLICY
Minimum Credits: 3
Maximum Credits: 3
The analysis of the politics of policymaking and substantive public policies. Emphasis on the impact of institutional factors on policy choices and on the role of public bureaucracies. Most examples will be drawn from industrialized countries, and from social and economic policies.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2306 - PROPSL WRITING & GRNTSMANSHIP
Minimum Credits: 3
Maximum Credits: 3
This course will be conducted in workshop format. It is designed to help students write proposals for dissertation research, but will also cover more generally the area of grantsmanship. The approach to the course will be to focus on each student's own research project. Students will draft and submit for collective discussion different components of their proposals, leading up to a completed grant proposal ready to be submitted to one or more agencies for funding during the next cycle of competitions.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2309 - POLITICS & POLICY-MAKING IN EU
Minimum Credits: 2
Maximum Credits: 2
This 1.5-Credit course will deal with the factors determining - and the process leading to - deeper integration. The normative arguments 'based on the fiscal federalism theory 'for and against greater centralization will be contrasted with the positive analysis of the extent to which policy transfer towards the European level actually takes place in various policy fields. The importance and role of the distributional consequences in determining the shifting balance between member states and the EU in the group of 'shared policies' will be analyzed. All policies have spatial redistributive effects, but only for a few of them is this 'revealed' through the EU budget. This budgetary redistributive impact may be explicit or implicit, real or perceived, exclusive or accessory, indispensable or subsequent. The way multilevel governance functions in each of the three major EU 'spending' policies (agriculture, structural funds, research) will be studied: the process and the actors involved, member states and the European institutions, stable and 'opportunistic' coalitions during policy transfer, policy shaping, and policy implementation. The outcome of the interplay of these forces will be compared with the 'normative' conclusions on the form of these policies and the relative EU power.

PS 2313 - COMPARATIVE POLITICAL BEHAVIOR
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the study of comparative mass political behavior. It is designed to emphasize cross-national similarities and differences in public opinion, voting behavior and political participation, and thus will complement the U.S.-dominated material presented in PS 2701 'American Electoral Behavior' and PS 2230 'Mass Political Behavior.' The course will first cover the comparative perspective on traditional subjects in the behavior field, such as turnout, the structure and sophistication of mass opinion, media impact, partisanship and models of voting behavior. It will then turn to more specialized areas such as political protest, the development and impact of democratic values, trust and "social capital" in new democracies, and the analysis of public opinion and participation in ethnically, religiously and linguistically divided societies.

PS 2319 - EU POLITICS AND PRACTICE
Minimum Credits: 3
Maximum Credits: 3
This course is an intensive introduction to the history, organization, and politics of the European Union (EU). An historical overview of the immediate post-World War II period will be provided, but the major emphasis will be on the EU's governing institutions, its key political actors, and the fundamental issues they confront in EU politics and policymaking. The European Union today is among the most significant actors in international politics and economy; but its quality as a "democratic system" and the degree to which it represents the people of Europe remains hotly debated. This course therefore dedicates special attention to the European Union's influence as a global power and its legitimacy as a political system.

PS 2320 - EURP HUMN SECU/SECU DVLP NEXUS
Minimum Credits: 2
Maximum Credits: 2
Because of Civil Wars in several parts of the world, especially in sub-Saharan Africa, the international organizations have reshaped their development agenda by emphasizing the importance of security and peace as preconditions for development. This approach has been explicitly mentioned among the aims of the United Nations by Secretary General Kofi-Annan in his roadmap for the implementation of the U.N. Millennium summit. In parallel, the concept of human security has been promoted by several Western governments, N.G.O.S and independent commissions in order to take into account the need to address not only state security needs but also human individuals' vulnerability in crisis situations. Aid policies have taken into account these evolutions, though the concept of human security itself has been discussed in a controversial way. The European union is progressively integrating it into its security agenda and has started 'securitizing' its development agenda and African policy, including instruments like the Cotonou convention with African, Caribbean and pacific states. The course explores the reasons for the merging of security and development policies in the European union and its member states and the emergence of a European human security agenda, within the wider context of the united nations, world bank and OECD. The focus will be European policies towards crisis areas in Africa and Asia potential case to be discussed are: regulations about antipersonnel landmines, small arms and light weapons, conflict timber and conflict diamonds; policies of conditionality and sanctions; assistance to transitional justice; peace building, security governance, security sector reform in fragile states.

PS 2323 - EXPRML RESEARCH IN POL BHVR
Minimum Credits: 3
Maximum Credits: 3
This course is an advanced seminar focusing on how experimental methods can inform research in political behavior. The first part of the course will focus on experimental design. Students will learn how to design and implement lab experiments, survey experiments, and field experiments. We will cover various aspects of experimental design - including where to get funding, how to get IRB approval, subject recruitment, subject compensation, randomization, identifying an appropriate control group, internal and external validity, ethical considerations, deception, and methods for analyzing experimental results. Students will also learn how to program surveys and experiments in Z-tree, MTURK, and qualtrics. The second part of the course will focus on applied topics. We will study how experimental methods are useful for investigating special topics in political behavior, including voter mobilization, public opinion, racial attitudes, ethnic identity, group identity, gender issues, asking about sensitive topics, and methods for estimating both attitudinal and behavioral responses to experimental treatments. Students will propose and design their own experiments throughout the course, and will fully develop one experimental design as a final project.

PS 2335 - SEMINAR IN SE ASIAN DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
An interdisciplinary approach to issues in the political economy of development in Southeast Asia. Topics will include the patterns of political and economic development during colonial rule, the rise of nationalism, and the political and economic situation during the early phase of independence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2336 - PEASANT POLITICS
Minimum Credits: 3
Maximum Credits: 3
This course will look at Chinese politics from the point of view of the peasants, and at the rural sector as a set of problems (historically as well as currently) for those in power. In order to provide a comparative perspective, we shall also look at some important books on peasant life in southeast Asia and Latin America. Some of the topics to be addressed are: the nature and structure of peasant society; the political economy of rural life; forms of peasant political activity; peasants and the modern state.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2337 - TOPICS IN CHINESE POLITICS
Minimum Credits: 3
Maximum Credits: 3
This seminar begins with a critique of the theory of socialism, the examination of the performance of central planning in China, and the political, social and economic origins of reform. The course then proceeds with detailed studies of the various economic, political and social reform programs; decentralization of planning, ownership, investment, productivity and efficiency, price, equality, workplace, agriculture, political democratization and participation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2341 - GOVERNMENT POLICY OF THE RUSSIAN FEDERATION
Minimum Credits: 3
Maximum Credits: 3
A reading seminar dealing with the alternative interpretations of the Soviet political system since the death of Stalin.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2342 - EAST EUROPE: COMMUNICATIONS POSTCOMMUNISM
The main purpose of this course is to introduce students to the political systems and dynamics, history, economics and cultures that have shaped contemporary East Europe. The focus of the course is the analysis of current and possible future developments in this region. Literature will be covered that focuses, inter alia, on the history of the countries of the region, on the nature of state and society relations, elite dynamics and political culture and institutions during the communist, transition and post-communist periods and on the international setting of these states. Though overwhelmingly concerned with political developments, we will of necessity touch on historical, sociological and economic changes that have affected and will affect this region. In the process of exploring these dimensions we will also examine the variety of concepts, theories and explanatory approaches that have been utilized to examine political developments in the region. We will assess their validity for analyzing politics both before and after the extraordinary changes that swept the region in 1989. We will consider to what extent approaches taken from the study of other regions have or might be utilized to study this region. Attention will also be devoted to consideration of the phenomena of transition and "post-communism" and whether and how these are useful for analyzing political developments in the region.

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Political Science (MA or PHD)

### PS 2343 - COMPARATIVE MILITARY SYSTEMS

**Minimum Credits:** 3

**Maximum Credits:** 3

This is a reading seminar, designed to stimulate a research project of one's choice, on the nature of military systems throughout the world. Needless to say, while it should appeal to the sociologist and political scientist, it has strong historical dimension. The literature we will be considering concerns the social origins of military personnel; their recruitment, their training; the process of value inculcation; inter- and intra-service rivalries; mutinies; coups d'état, civil-military relations; and the role of the military in "nation-building."

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

### PS 2344 - COLLECTIVE MEMORY

**Minimum Credits:** 3

**Maximum Credits:** 3

This is a seminar on collective memories of defeat in the two nations vanquished in World War II, Japan and Germany. It will explore the transformation of the moral order following the defeat in the two nations. We will critique the theoretical perspectives on collective memories, and examine how the memories are transmitted to the new generation and how the new generation, in turn, reconstructs the past and defines the meaning of the legacy. We will also discuss their social, cultural and political implications today.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

### PS 2345 - POL ECONY: PRIVTZATN E EURP

**Minimum Credits:** 3

**Maximum Credits:** 3

An examination of political, economic, and institutional change in the former communist nations of eastern Europe and the cis.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Political Science (MA or PHD)

### PS 2360 - COMP POLIT: WOMEN & PBLC POLCY

**Minimum Credits:** 3

**Maximum Credits:** 3

This course will provide an overview of the growing literature on women in politics in several settings; the U.S., Eastern and Western Europe, and the third world. The course will also attempt to integrate some of the specialized studies on women and politics into broader theoretical concerns; dependency, development, the growth of the welfare state, political integration, participatory and leadership roles.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Political Science (MA or PHD)
PS 2372 - COMPARATIVE FEDERALISM
Minimum Credits: 3
Maximum Credits: 3
This course begins with a discussion of federalism through the reading of both classic texts (Madison) as well as more contemporary interpretations (Riker, Weingast). It then evaluates the effects of federalism along several dimensions such as representation, political violence, and economic performance. It concludes with consideration of why states choose federal systems over unitary ones. There is a pronounced trend towards more decentralized political systems in the world today.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2373 - COMPARATIVE WELFARE STATES
Minimum Credits: 3
Maximum Credits: 3
Starting from the mid-nineteenth century the seminar is an historical and political critique of the main theories of the contemporary welfare state. Attention is roughly divided equally between the diverse origins of the British, French, Swedish and German welfare states in the nineteenth century; the impact of new social theories and social thought on the design of welfare states early in the century and between the wars; and how the organization and structure of welfare states following the war was influenced by this experience.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2374 - THE POLITICAL ECONOMY DVLP
Minimum Credits: 3
Maximum Credits: 3
This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, “why are there rich nations and poor nations and rich people and poor people”? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2375 - POLITICS ADV INDUSTRL SOCIETY
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide a greater understanding of the political economies of advanced industrial states. It therefore confines itself to cases of the advanced capitalist countries of Europe, North America, and Asia, Britain, France, w. Germany, Japan, Sweden, and the U.S. The course will focus on the similar and different ways political forces influence the structure and process of the economy in the countries studied.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2376 - DEVELP, ENVRNMNT & THE ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This course has two broad goals. The first is to equip the student with the tools of economic analysis necessary for an understanding of international environmental problems. These include standard concepts from microeconomics such as issues of industrialization, economic growth, and development. The second is to apply these concepts to the analysis of environmental issues faced by developing economies. The class will analyze studies from different parts of the world.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)
PS 2377 - ECON DVLP STRATEGIES & PRACTCS
Minimum Credits: 3
Maximum Credits: 3
This course will consider both the historical evolution of local economic development activity in the United States and the current dynamics of urban government's efforts at economic development. It is concerned with how change in terms of local government entrepreneurship have modified urban governance, with particular attention to the role of electoral politics in public investment decisions and to the legal system within which local policymakers must maneuver.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2378 - POLITICAL SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
The variety of political arrangements in the twentieth century presents a number of puzzles that will make up the subject matter of this course. Are the differing mechanisms of governments to be explained by levels of economic development, institutional histories, the intentions of social movements, transnational constraints or slow-changing national political cultures? Is the state an autonomous actor or the creature of other social forces? Are regime changes consequences of some sort of "structural" change or are they simply consequences of rulers' stupidity?
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2379 - ECONOMICS OF DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Focuses on development theories; classical, neo-classical, Marxian, dualistic (economic and non-economic) as well as models of agricultural development and administration, productivity enhancement, saving and investment and the foreign sector. Students are expected to apply development models to current problems, analyze and construct policy approaches to issues of current importance in less developed countries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2380 - SOCIAL MOVEMENTS
Minimum Credits: 3
Maximum Credits: 3
This seminar will take up current issues in the study of social movements: the historical development of forms of contention; the interactions of plebeian disruption and elite reform; transnational aspects of social movements; rational-action models of individual participation and movement tactics; movements as sources of identity; new frontiers in research methods.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2381 - SEMINAR POLITICAL INSTITUTIONS
Minimum Credits: 3
Maximum Credits: 3
The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.
Academic Career: GRAD

Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (PHD or MA)

PS 2401 - EU'S EMERGING GLOBAL AUTHORITY
Minimum Credits: 2
Maximum Credits: 2
In the 20 years since the fall of the berlin wall, the European union has sought to develop its international role in multiple ways and address the global void created by the end of the east-West divide. This short course examines the extent to which the EU has - or has not - emerged as a global authority and norm setter by considering a series of contemporary foreign policy areas where the EU has been engaged. This 1.5-Credit course commences with an introduction to the diversity of EU external policies and raises questions such as - why does the EU have competencies in specific areas? What are the limitations? To what extent can and does the EU "export" its values and norms? We will also consider how the EU's global authority is viewed by third countries: what is the perception of the EU's image as reflected by the media in Asia or the USA, for example? The course also considers some contemporary EU foreign and security issues, including the recent development of EU "battle groups" and case-studies of the 20+ EU overseas policing and military missions undertaken since 2003. This focus is contrasted with an examination of the EU's civilian capacities including development assistance, particularly in Africa, and international election monitoring. By the conclusion of the course students will have a broad understanding of the complexity of the EU's global involvement and be able to contribute to the debate on whether the EU has now become a significant global authority.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2481 - GRADUATE CONFERENCE
Minimum Credits: 3
Maximum Credits: 3
This is a graduate course, reading seminar or research seminar which is not offered regularly as part of the departmental program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2501 - THEORY OF INTERNATIONAL RELATION
Minimum Credits: 3
Maximum Credits: 3
This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2502 - INTERNATIONAL ORGANIZATION
Minimum Credits: 3
Maximum Credits: 3
This course examines the contemporary structures of governance within international policies as they are found at national, regional and international level, and the challenges and stresses to which such structures are vulnerable. It also considers major traditions and theorizing about sources of conflict, order and integration in international politics and reviews current evaluations of major international organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2503 - TOPICS IN INT'L DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Topics in international development will explore specific current issues in international development.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2504 - NATIONALISM
Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to explore nationalism as a determinant of the foreign policy behavior of states. It begins with a critical examination of the theoretical literature concerning nationalism. This includes a survey of the various types of nationalism referred to in that literature including traditional nationalism, liberal nationalism and integral nationalism as well as the role of nationalism in the phenomenon of fascism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2505 - TOPICS IN INTERNATIONAL RELTNS
Minimum Credits: 3
Maximum Credits: 3
Seminars in world politics under this title will address specific substantive and/or theoretical issues in international relations that will vary each time the course is offered. It is listed to afford faculty a means for exploring topics in international relations that will not become a regular component of the graduate curriculum.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2506 - INTERNATIONAL POLITICS**
Minimum Credits: 3
Maximum Credits: 3
This seminar will strive toward an appreciation of what is posited as a new age of global interdependence, marked by - perhaps a cause of - the end of the cold war, and entailing manifold new risks and opportunities for nations and transnational sectors of interest and power. The final stage of the seminar will involve cautious, informed expressions of national security needs for the U.S. in the next century.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2507 - IDEAS AND PUBLIC POLICY**
Minimum Credits: 3
Maximum Credits: 3
In recent years, political scientists have devoted considerable attention to the "power of ideas" and "knowledge" as determinants of political change. This course will critically evaluate these emerging research programs and attempt to synthesize their insights. A major goal will be to "cut across" the traditional divide that separates comparative politics and international relations (IR) theory.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)
PS 2511 - AMERICAN FOREIGN POLICY
Minimum Credits: 3
Maximum Credits: 3
For students who already have some knowledge of this subject who wish to broaden or deepen their understanding. The course deals with major issues of U.S. foreign policy mainly through readings and discussions. Topics such as domestic sources, trade deficits and protectionism, nuclear and conventional arms control, deficit spending and U.S. strategy, Soviet-American relations, China and its triangle, and vulnerable authoritarian regimes will be examined.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2512 - RUSSIAN FOREIGN POLICY
Minimum Credits: 3
Maximum Credits: 3
A reading course focusing on alternative interpretations of Russian foreign policy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2513 - CULT & COGNTN IN FORGN POLICY
Minimum Credits: 3
Maximum Credits: 3
The "organizational culture" perspective examines the rituals, beliefs, and deeply embedded assumptions shared by members of an organization. The "organizational cognition" perspective places concepts such as learning, problem solving, and memory in an organizational context. In this seminar we will consider the potential utility of these contending perspectives for explaining leadership, choice, implementation, and change in foreign policy organizations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2514 - POL STRATEGY IN INTERNTL RLTNS
Minimum Credits: 3
Maximum Credits: 3
This research seminar is designed to evaluate the theoretical underlay of the literature relating to diplomatic strategy and to explore the possibilities of adding to or developing further theories of diplomatic strategy. This course will look at various peace strategies and at strategies at the highest level of analysis, e.g. containment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2517 - FOREIGN POLICY AND DIPLOMACY
Minimum Credits: 3
Maximum Credits: 3
Emphasizes comparative study of foreign policy by examining selected countries including the United States. Objectives are to question the feasibility of constructing a general analytical model and to understand values, processes and instruments of foreign policy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2518 - SECURITY & INTELLGNC STUDIES
Minimum Credits: 3
Maximum Credits: 3
The meaning of "security" has changed and broadened in recent decades as the range of threats to national and international security has widened, to include some that were previously ignored and others that were unimaginable. This course examines the concepts of "security" itself, the evolution of
threats to national and international security (including conventional military, nuclear, chemical and biological weapons), as well as forms of terrorism and threats to economic security and the environment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2519 - FOREIGN POLICY DISASTERS
Minimum Credits: 3
Maximum Credits: 3
This course will use a case study approach in order to examine the causes of foreign policy disasters or failures and to consider how they might be avoided. The focus of the course will be on intelligence and its assessment, on the strategic concepts and assumptions underlying decision making and on the particular problems of foreign policy implementation. The case studies will be drawn largely but not exclusively from the United States and an attempt will be made to identify common themes that run through foreign policy disasters.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2520 - ROLE STRATEGIC INTELLGNC ISS
Minimum Credits: 3
Maximum Credits: 3
Examines the role of strategic intelligence in the formulation and execution of the defense policy of various governments, primarily the United States. Attention is given to the organization and management of the U.S. intelligence community, to the new technological developments relevant to intelligence gathering and considers likely future developments in international security.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2521 - CONFLICT THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will examine armed struggle, resistance, insurgency, terrorism and actions by non-state actors in the Middle East. We will consider the politics and actions of different groups, as well as the way people live during situations of conflict involving such non-state actors. We will explore meanings of violence, the logics of armed groups, and the implications of killing in warfare. We will also analyze the role of the state vis-a-vis these actors and the part the state plays in violent confrontation. Case studies will include Hizballah, the Palestinian liberation organization, including Hamas, the Algerian liberation movement and others.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2523 - EAST ASIAN INTERNTL RELATIONS
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine international relations in East Asia, from the late 19th century to the present, from two perspectives; the changing structures or patterns of East Asian relations, and the foreign policies of the principal players (China, Japan, the United States, and the Soviet Union). Topics to be explored may include some or all of the following: the diplomacy and political economy of imperialism in East Asia; World War I and its consequences; the Washington Conference system and its breakdown; the Chinese revolution and its consequences.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2525 - IA REGNL FORGN POLICY WORKSHOP
Minimum Credits: 3
Maximum Credits: 3
This course will deal, on a semester-by-semester basis, with the problems and characteristics of foreign policy-making and inter-state relations in
specific regions of the world. The course will focus on a different region each term. Designated regions to be covered include the Middle East, the Soviet Union, Latin America, Western Europe, Asia and Africa.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2530 - NORMS & IDEAS IN WORLD POLIT
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine the role of ideational factors such as norms, causal ideas and collective identities in international politics from a variety of theoretical, methodological and epistemological perspectives. It will address issues such as sovereignty, international intervention, international cooperation, regional integration, and international sources of domestic change.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2534 - CIVIL WARS
Minimum Credits: 3
Maximum Credits: 3
This course will introduce graduate students to the Civil Wars literature. In the first part of the course, we will examine theoretical debates about why groups sometimes resort to violence against the state or other domestic groups. We will consider grievances, opportunities, informational asymmetries, and commitment problems as plausible mechanisms explaining the onset of Civil Wars. We will also discuss terrorism as one of the strategies of political violence. In the second part of the course, we will discuss possible solutions to Civil Wars and evaluate the relative merits of these solutions. Mechanisms such as intervention, peacekeeping and power sharing will be emphasized.
Academic Career: GRAD

Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2540 - INTERNATIONAL POLITICAL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2541 - POLIT OF GLOBL ECON RELATION
Minimum Credits: 3
Maximum Credits: 3
This course examines the politics of a wide variety of international economic relationships. It is based on the premise that economic issues have emerged alongside of traditional power and security issues as central to an understanding of contemporary world politics. The course will examine the politics of trade, monetary affairs, multinational corporations, technology, and aid.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2542 - NORTH-SOUTH RLTNS & INT'L ECON
Minimum Credits: 3
Maximum Credits: 3
Addresses the issue of the debate between first and third world countries over the terms of trade and distribution of the world product. Examines the contrasting interests of nation state and international organizations. It considers alternative solutions and their policy implications.
Academic Career: GRAD
PS 2543 - INTERNATIONAL POLITICAL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This political economy is the study of the interaction between economic and political processes in an international order moving toward globalization. This course provides an introduction to the major analytic frameworks within which this interaction may be analyzed. It also examines their value and their implications for understanding particular dilemmas facing policy-makers responsible for making economic policy in the international arena.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2544 - INT’L COOPER REGIM ECON SECU
Minimum Credits: 3
Maximum Credits: 3
Cooperation among governments can be hard to achieve due to the lack of a central authority in the international system. We will examine the conditions under which cooperation may be expected to occur and learn how to model different types of cooperation problems using basic game theory. Institutionalist scholars argue that international institutions (and regimes, more broadly) facilitate cooperation among governments. We will explore various institutional mechanisms that may help in this regard.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2545 - QUAN APPLCS INT’L POL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This course will expose students to the quantitative literature in a broad range of IPE research programs, including international capital mobility and the state's economic policy choices, economic regionalism and trade institutions, and international trade and its effect on military conflict and national security policy. All students will be expected to execute a simple quantitative research paper on an IPE topic of their choice.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2546 - GLOBALIZATION & INT’L POLITICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2551 - PSYCHOLOGY & INTERNATIONAL RELATIONS
Minimum Credits: 3
Maximum Credits: 3
This course concerns the interface of cognitive psychology with international relations. This interface is considered within the context of the general topic of reasoning in the social sciences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2552 - POWER AND INTERDEPENDENCE
Minimum Credits: 3
Maximum Credits: 3
Provides an assessment of new forces in world affairs that have forced reconsideration of traditional ideas of national security; analyzes the strategies of governments as they pursue national interests defined in conventional military terms and in terms of economic welfare, cultural integrity, and social unity. Economic dependence and interdependence, rapid technology transfer, and spreading weapons capabilities are also examined.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2554 - NUCLR WEAPONS & INT'L POLITICS
Minimum Credits: 3
Maximum Credits: 3
Designed as an exploration of how the world has changed, and how it has not changed, in the presence of weapons of mass destruction. It is organized around three main themes; the utility of force, conventional as well as contemporary world setting; the means for regulating conflict in the face of continued national rivalry and competition; and the requirements for making national security policy that serves both legitimate national interests and the cause of peace.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2555 - DEFENSE POLICIES
Minimum Credits: 3
Maximum Credits: 3
Focuses on U.S. defense policy issues and processes pertaining to the strategic and intermediate range nuclear weaponry; large-scale conventional conflict, e.g. that which would occur in Europe and the Persian Gulf; small scale or "low-intensity" conventional conflict; "power projections"; and counter insurgency.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2556 - PROBLEMS INTRNATIONAL SECURITY
Minimum Credits: 3
Maximum Credits: 3
Provides forum for lectures, discussion and presentation of student research on salient security problems in the contemporary international system. Some topics which form the basis of this course are regional instability (Middle East and Persian Gulf, South Africa, Latin America); strategic instability (nuclear weapons proliferation and U.S.-Soviet relations); tactical instability (arms transfer, terrorism, insurgency); and political and economic instability (North-South relations).

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PS 2557 - NON-MIL APPRCH TO INT'L SECRTY
Minimum Credits: 3
Maximum Credits: 3
This course challenges some of the orthodoxies of strategic thinking and considers alternative paradigms, approaches, and perspectives to those currently in vogue. It also looks at some of the issues on the current security agenda and offers a critique of conventional ways of thinking about these challenges.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2560 - NATN, NATN-STATES INT'L POLIT
Minimum Credits: 3
Maximum Credits: 3
This course examines the historical development of interstate politics during the last three hundred years - the period in which it came to be seen as...
concerned with the interests and resources of "nations". It examines the various meaning and evaluations offered of nationality, nationalism and "the national interest" as well as competing strategies for defending and advancing "the national interest".

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2561 - TOPICS GLOBAL POLITICAL ECONOMY**
Minimum Credits: 3
Maximum Credits: 3
Courses offered under this rubric will concentrate on examining in detail a specific recurrent issue in the field of international economic policy or will focus on a major current problem or an emerging issue in this field.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2562 - CUR ISSUES US SECURITY POLICY**
Minimum Credits: 3
Maximum Credits: 3
During the past decade, the U.S. has had to make considerable changes in its thinking about the scope of defense policy, about the kinds of threats against which policy makers must be prepared, and about the resources, human and material, which must now be available for use in protecting national security. This course examines these challenges and the strategic, economic and technical debates surrounding them.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2563 - PEACEMAKING AND PEACEKEEPING**
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce graduate students to the literature on conflict resolution and post-conflict recovery. In the first part of the course, we will examine the process by which belligerents in Civil Wars reach cease-fires and negotiate peace, why peace sometimes lasts and sometimes falls apart and what can be done to make peace more stable. Next, we will explore the longer-term prospects for economic and democratic rebuilding as well as reconciliation after Civil Wars. We will end the course by considering the consequences of Civil Wars for the regional and international peace and focus on terrorism, refugees, and weak states as destabilizing factors.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2564 - GLOBALIZATION & WELFARE DEVELOPING COUNTRIES**
Minimum Credits: 3
Maximum Credits: 3
This course examines the redistributive effects of globalization and on the restructuring of the welfare state. Common assumptions about the state's welfare role have changed in the last two decades. This course examines this issue in the context of health, gender and welfare policy.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2565 - DILEMMAS OF GLOBALIZATION**
Minimum Credits: 3
Maximum Credits: 3
At the beginning of a new century, globalization has replaced the Cold War as the organizing principle upon which the international system of commerce and security is founded. Yet its character, sources and consequences often remain obscure or are the subject of fierce debate, despite a wealth of academic studies, policy analyses and regular incantation by politicians. In this research seminar, students will explore such questions, attempting to define and apply the concept to the functioning of the global economy.

Academic Career: GRAD
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2566 - STATES AND MARKETS**  
Minimum Credits: 3  
Maximum Credits: 3  
All economic activity relies on and is shaped by governments and laws. But the scope, character, objectives and effects of intervention by governments in economic activity vary considerably. This course examines the varying roles played by government in the economy, exploring the arguments for (among other strategies) regulation, corporatism, public ownership and privatization and the dynamics driving changes in government-industry relationships.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**PS 2567 - WOMEN, INT'L DVLP & GLBL HLTH**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will examine the impact of recent international developments on women's lives, in a broad sense on their health and well-being, as well as explore the responses of diverse groups of women to such developments. The focus will be on societies in the global south. The objective is to use this examination to identify, critically evaluate, and address gendered dimensions of globalization, in order to support women's own goals for creating and sustaining healthy lives and communities.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2604 - POL PRA/RESN EURPN SOCL THGHT**  
Minimum Credits: 3  
Maximum Credits: 3  
A survey of the development of European social thought and social science from the late nineteenth century to the present focusing on the revisions of positivist thinking. Various questions raised by the post-empiricists will be discussed; subjective knowledge, the limits of language, intentionality and historical explanation. Special attention will be given to the historical and social context of social explanation as it relates to the British idealists Durkheim, Weber and the Frankfurt school.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)

**PS 2605 - DEMOCRACY AND DIFFERENCE**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will examine and compare philosophical approaches to issues of how democratic societies do and should organize their policies and institutions to recognize, accommodate or transcend social differences that often underlie conflict and injustice in contemporary societies.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**PS 2606 - CNTMPRY THEORIES OF JUSTICE**  
Minimum Credits: 3  
Maximum Credits: 3  
In this course we will read some of the most important contributions to conversations and debates about justice in recent philosophy and political theory. We will discuss John Rawls' "Theory of Justice", along with some communitarian, egalitarian, feminist and postmodern responses. We will then consider other approaches to theories of justice less strictly focused on distribution of goods. Michael Walzer distinguishes several spheres of justice and Amartya Sen places issues of the distribution of goods in the context of human capabilities.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Political Science (MA or PHD)
PS 2607 - DMCRTC THRY & DEMOCRATIZATION
Minimum Credits: 3
Maximum Credits: 3
The course has three objectives for students: 1) to develop a broad knowledge of the main currents in modern and contemporary democratic theory and a familiarity with their main problems; 2) to study how normative theories of democracy inform or might inform processes of democratization; 3) to apply this knowledge in solving some puzzle or problem by comparing cases, assessing claims, developing arguments, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2612 - POLITICAL THEORY OF MARXISM
Minimum Credits: 3
Maximum Credits: 3
This seminar will be devoted to an intensive and extensive consideration of Marxian political theory. Drawing upon extensive readings in Marx's works, attention will be directed to such issues as human nature and alienation, criticisms of liberalism, the historical significance of capitalism, the concept of class and class conflict in modern societies, the nature and role of the state, ideology and false consciousness, and the revolutionary process.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2620 - TOPICS IN POLITICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar opens with an analysis of the logical structure of political theory, understood as systematic and realistic reflection on the purposes of government. With the help of Plamenatz and Skinner the work of major political theorists, both classical and contemporary, is analyzed and appraised.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2629 - POLITCL THEORY--SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Topics include: the continuing debate over justice; the nature and justification of liberalism; Marx and Marxism; the market socialist alternative to capitalism; the political significance of public choice theory; contractarian political theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2701 - ADVANCED METHODOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course aims to provide students with an overview of statistical methods appropriate for the analysis of longitudinal data, or data collected on multiple units (individuals, states, dyads, countries) at more than one point in time. The course will focus on models for the analysis of 'panel data,' which (by convention) is used to describe data with relatively large number of units and relatively few time points. We will cover different approaches to the analysis of panel data, including structural equation models, fixed and random effects models, dynamic econometric models, and longitudinal hierarchical growth ('multi-level') models.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2702 - METHODS: CAUSAL INFERENCE
This course focuses on the challenge of causal inference in the social sciences. We will begin by approaching causal inference from the standpoint of experimental analysis. We will then study several non-experimental methods that aim to recover causality using observational data, including matching, instrumental variables, difference-in-differences, and regression discontinuity. The class will combine methodological training with exposure to important recent research in the social sciences that employ these methods. The goal of the class is not only to convey the concepts and math central to causal inference but also to help students develop their capacity for research design.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2703 - FORMAL POLITICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces students to formal modeling of political and economic phenomena. It has a social choice and a game-theory component. The former explores issues involved in the aggregation of individual preferences through majority and other voting rules. The latter-larger of the two components-surveys non-cooperative game theory and explores its applications to various questions of interest to political scientists.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PS 2720 - ADV METHODLGY: MATRIX ALGEBRA
Minimum Credits: 2
Maximum Credits: 2
This is a course in advanced methodology in political science. The class will focus on topics related to matrix algebra.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2725 - ADV METHLGY: PROBABLTY THEORY
Minimum Credits: 2
Maximum Credits: 2
This is a course in advanced methodology in political science. The class will focus on topics related to probability theory.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2730 - ADV METHLGY: MUM LIKEHOOD ESTIM**  
Minimum Credits: 3  
Maximum Credits: 3  
This is a course in advanced methodology in political science. The class will focus on topics related to maximum likelihood estimation.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2735 - ADV METHLGY: CAUSAL MODELING**  
Minimum Credits: 2  
Maximum Credits: 2  
This is a course in advanced methodology in political science. The class will focus on topics related to causal modeling.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2740 - ADV METHODOLOGY: TIME SERIES**  
Minimum Credits: 3  
Maximum Credits: 3  
This is a course in advanced methodology in political science. The class will focus on topics related to time series.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2745 - ADV METHODOLOGY: SURVEY DESIGN**  
Minimum Credits: 2  
Maximum Credits: 2  
This is a course in advanced methodology in political science. The class will focus on topics related to survey design.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Political Science (MA or PHD)

**PS 2750 - ADV METHODOLOGY: MEASUREMENT**  
Minimum Credits: 2  
Maximum Credits: 2  
This is a course in advanced methodology in political science. The class will focus on topics related to measurement.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PS 2755 - ADV METHLGY: EXPERIMENTAL DSGN**  
Minimum Credits: 2  
Maximum Credits: 2  
This is a course in advanced methodology in political science. The class will focus on topics related to experimental design.  
**Academic Career:** GRAD  
**Course Component:** Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2760 - ADV METHODOLOGY: QUAL TV METHODS
Minimum Credits: 2
Maximum Credits: 2
This is a course in advanced methodology in political science. The class will focus on topics related to qualitative methods.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Course Component: Independent Study  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Political Science (MA or PhD)

PS 3000 - RESEARCH AND DISSERTATION PHD  
Minimum Credits: 1  
Maximum Credits: 12  
This course is for students who have passed their dissertation overview and are currently working on their Ph.D. dissertation.  
Academic Career: GRAD  
Course Component: Thesis Research  
Grade Component: Grad SN Basis

Prosthodontics

PROSTH 2005 - MASTER'S RESEARCH AND THESIS  
Minimum Credits: 1  
Maximum Credits: 3  
This course covers the initiation of a research project leading to the master's degree. A topic is selected, followed by a literature review and writing of the research proposal. The research is then conducted, and a thesis is written and defended.  
Academic Career: GRAD  
Course Component: Thesis Research  
Grade Component: Grad SN Basis

PROSTH 2020 - GRADUT REMOVABLE PROSTHDNT  
Minimum Credits: 2  
Maximum Credits: 2
This course examines in detail the mechanics of RPD function and its application to design. Complex RPD situations and their relationship to a complicated occlusion, with or without fixed partial dentures, is explored.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PROSTH 2030 - GRADUATE FIXED PROSTHODONTICS
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course exposes the student to concepts of tooth preparation and their relationship to total rehabilitation of the patient. Emphasis is placed on diagnostic preparation, dental materials knowledge, esthetics and the total relationship to occlusion. Modification of design for integration with RPD, is stressed. Laboratory skills are emphasized.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### PROSTH 2040 - DENTAL MATERIAL PROSTHODONTICS 1
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course presents an introduction to biomaterials. Application of biomaterials in removable and fixed prosthodontics will be emphasized.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PROSTH 2050 - DENTAL MATERIAL PROSTHODONTICS 2
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
Demonstrations of different clinical applications of BIO materials, as well as laboratory fabrication of appliances for active cases currently being treated in the prosthodontic department will be presented.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PROSTH 2060 - OCCLUSION 2
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course examines the history of the development of occlusion and how it relates to today's scientific understanding. The anatomic, physiologic, and pathologic basis of normal and abnormal occlusion is examined as it relates to prosthodontics. Face-bow and articulator mechanics are reviewed with their relationship on oral rehabilitation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### PROSTH 2070 - ADVANCED PROSTHODONTICS 1
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
During this course, the students become more experienced in treating difficult cases with medical complications and cases which need multi-disciplinary approaches.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

### PROSTH 2080 - ADVANCED PROSTHODONTICS 2
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
Emphasis is placed on the clinical, laboratory, and technical skills necessary to treat the partially edentulous patient using a removable appliance. Coordination with fixed appliances is mandatory.

**Academic Career:** GRAD
PROSTH 2090 - ADVANCED PROSTHODONTICS 3
Minimum Credits: 2
Maximum Credits: 2
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation.
Knowledge of porcelain and its handling qualities are stressed.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2100 - ADVANCED PROSTHODONTICS 4
Minimum Credits: 2
Maximum Credits: 2
This course emphasizes the total treatment of the geriatric patient. Considerations are given to prosthodontic rehabilitation with implants, orthognathic treatment planning and the difficult prosthodontic patient.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2101 - ADVANCED PROSTHODONTICS 5
Minimum Credits: 2
Maximum Credits: 2
Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation.
Knowledge of porcelain and its handling qualities are stressed.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2110 - ADV MAXILLOFACIAL PROSTH 1
Minimum Credits: 1
Maximum Credits: 1
This course exposes the graduate resident to the principles of radiation oncology and the management of the cancer patient. Emphasis is placed on the oral biological changes that occur with treatment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 2117 - IMPLANT PROSTHODONTICS SEM 1
Minimum Credits: 2
Maximum Credits: 2
This is a didactic course designed to review all aspects of implant dentistry at the in depth level. Diagnostic and treatment planning procedures, selection of implants to include biomechanical and biomaterials considerations, surgical procedures for implant placement, prosthodontic procedures to include provisional and definitive implant restorations, and maintenance procedures will be presented and illustrated.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2120 - ADV MAXILLOFACIAL PROSTH 2
Minimum Credits: 2
Maximum Credits: 2
This course emphasizes the surgical treatment of the head and neck cancer patient and the role of the maxillofacial prosthodontist as part of the surgical team.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
PROSTH 2130 - ADV MAXILLOFACIAL PROSTH 3
Minimum Credits: 2
Maximum Credits: 2
This course emphasizes the various intra-oral prosthesis necessary for rehabilitation of the maxillectomy, mandibullectomy trauma, burn and cleft palate patient. Knowledge of healing and function in the maxillofacial patient is emphasized.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2143 - TREATMENT PLANNING SEMINAR
Minimum Credits: 1
Maximum Credits: 1
This is a multidisciplinary didactic and clinical course planned to provide prosthodontic and periodontic residents with a systemic approach to diagnosis, treatment planning, and management of partially edentulous patients.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2147 - IMPLNT PROSTHDNT SEMINAR 2
Minimum Credits: 2
Maximum Credits: 2
This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2148 - IMPLANT LITERATURE REVIEW
Minimum Credits: 1
Maximum Credits: 1
This is a didactic course planned to review pertinent research and scientific literature in implant dentistry. Specific topics include: historical review of implantology and edentulism, osseointegration and its requirements, implant types and classifications, surgical and prosthodontic procedures, augmentation and grafting, and long term perspective and prospective studies in implant dentistry.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2150 - PROSTHODONTICS SEMINAR 1
Minimum Credits: 2
Maximum Credits: 2
This course is an introductory review of basic prosthodontic principles and their application to advanced prosthodontic procedures. Thorough understanding of this course is essential to comprehensive treatment planning.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2160 - PROSTHODONTICS SEMINAR 2
Minimum Credits: 1
Maximum Credits: 1
This course is a description of the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2170 - PROSTHODONTICS SEMINAR 3
This course discusses the special considerations given to the geriatric and the handicapped prosthodontic patient. Maxillofacial patients and those undergoing immune suppression and cancer therapy are discussed.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PROSTH 2180 - PROSTHODONTICS SEMINAR 4**  
Minimum Credits: 2  
Maximum Credits: 2  
This course is the final in a series that entails the review of advanced graduate procedures, including TMJ and implantology.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PROSTH 2181 - PROSTHODONTIC SEMINAR 6**  
Minimum Credits: 2  
Maximum Credits: 2  
This course is another part of a series that entails the review of advanced graduate procedures, including TMJ and implantology.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**PROSTH 2182 - PROSTHODONTICS SEMINAR 5**  
Minimum Credits: 1  
Maximum Credits: 1  
Continuation course for the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PROSTH 2190 - SPECIAL WORK**  
Minimum Credits: 1  
Maximum Credits: 1  
This course covers special work by graduate students in related subjects to prosthodontics; hospital assignment for patient care, special research projects, and extensive literature review.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**PROSTH 2200 - OCCLUSION**  
Minimum Credits: 1  
Maximum Credits: 1  
This is an introductory course in physiologic, gnathologic and denture occlusion. The basic principles and techniques are covered.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**PROSTH 2210 - SPECIAL PROSTHODONTICS CLINIC**  
Minimum Credits: 1  
Maximum Credits: 9  
This course provides the resident with experience providing special clinical care of multi-disciplinary cases involving dental and medical treatment under direct faculty supervision.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade
PROSTH 2211 - COMPREHNSV TREATMENT PLANNING 1
Minimum Credits: 2
Maximum Credits: 2
This is a multidisciplinary course in comprehensive/diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

PROSTH 2220 - ORAL IMPLANTS
Minimum Credits: 1
Maximum Credits: 1
This course emphasizes the importance of medicine anesthesia, oral surgery, and diagnosis in the consideration of oral implants for the patient. The biologic basis of bone growth and bone healing is emphasized along with proper surgical protocol and proper implant selection for the successful placement of both endosseous and subperiosteal fixtures. The important relation of prosthodontics with oral implantology is stressed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2230 - TEMPOROMANDIBULAR JOINT DYSFU
Minimum Credits: 1
Maximum Credits: 1
This course exposes the student to the etiology, diagnosis, and treatment of TMJ and myofascial pain dysfunction syndromes. Radiology and drug therapy are reviewed. Various treatment modalities involving electronic instrumentation and splint therapies are reviewed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2231 - TMD CLINIC 1
Minimum Credits: 1
Maximum Credits: 1
This course exposes the student to the etiology, diagnosis, and treatment of TMJ and myofascial pain dysfunction syndromes. Radiology and drug therapy are reviewed. Various treatment modalities involving electronic instrumentation and splint therapies are reviewed.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PROSTH 2232 - TMD CLINIC 2
Minimum Credits: 1
Maximum Credits: 1
Additional exposure to the etiology, diagnosis and treatment of TMJ and myofascial pain dysfunction syndromes.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

PROSTH 2240 - LITERATURE REVIEW 1
Minimum Credits: 2
Maximum Credits: 2
This course covers classic and current literature review in the following areas: bone resorption, articulators, face-bow, hinge axis, and immediate dentures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2241 - COMPREHNSV TREATMENT PLANNING 2
Minimum Credits: 2  
Maximum Credits: 2  
This is a continuation of PROSTH 2211, for the spring term. The course provides a multidisciplinary approach to comprehensive diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis

PROSTH 2242 - OCCLUSION 2
Minimum Credits: 2  
Maximum Credits: 2  
This is a multidisciplinary course in temporomandibular disorders and dysfunctions. It presents an approach to (1) differential diagnosis and etiology, (2) diagnostic imaging and other procedures, (3) occlusion and occlusal related dysfunctions, (4) myofunctional therapy and (5) definitive therapeutic interventions.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PROSTH 2250 - LITERATURE REVIEW 2
Minimum Credits: 1  
Maximum Credits: 1  
This course covers classic and current literature review in the following areas: color, splinting, porcelain, crown preparation, impression materials, dies and pontics.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PROSTH 2260 - LITERATURE REVIEW 3
Minimum Credits: 2  
Maximum Credits: 2  
This course covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PROSTH 2270 - LITERATURE REVIEW 4
Minimum Credits: 2  
Maximum Credits: 2  
This course covers classic and current literature review in the following areas: maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

PROSTH 2271 - COMPREHNSV TREATMT PLANNING 3
Minimum Credits: 2  
Maximum Credits: 2  
This is a continuation of PROSTH 2211, and PROSTH 2241 for the summer term. The course provides a multidisciplinary approach to comprehensive diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis

PROSTH 2272 - LITERATURE REVIEW 6
Minimum Credits: 2
Maximum Credits: 2
This course covers classic and current literature review in the following areas. Maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PROSTH 2273 - LITERATURE REVIEW 5
Minimum Credits: 1
Maximum Credits: 1
Continuation course that covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2281 - HOSPITAL PROSTHDNT ROTATION 2
Minimum Credits: 2
Maximum Credits: 2
Second part of course designed to provide hospital training in the management of prosthodontic problems in patients with chronic medical conditions.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

PROSTH 2283 - HOSP PROSTHODONTIC ROTATION 3
Minimum Credits: 2
Maximum Credits: 2
Third part of course designed to provide hospital training in the management of prosthodontic problems in patients with chronic medical conditions.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

PROSTH 2300 - ESTHETICS IN DENTISTRY
Minimum Credits: 0
Maximum Credits: 2
Esthetic dentistry course is a clinically oriented course where the students will learn and appreciate the basic principles and philosophies of esthetic dentistry. This course emphasizes the importance of smile analysis, golden proportion related to tooth proportions, gingival esthetics, anterior and posterior porcelain restorations, soft tissue parameters with implant dentistry. Post-graduate prosthodontic residents will be able to obtain combined knowledge given by each discipline (prosthodontics, periodontology, orthodontics). The residents will be equipped with the skills to properly diagnose diminished esthetics and treatment plan for optimum esthetic results. Residents will attend multidisciplinary didactic courses, they will perform anterior porcelain laminate veneer restorations as well as anterior - posterior porcelain restorations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 2305 - CEREC BASIC TRAINING
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

PROSTH 2400 - REMOVABLE PARTIAL DENTURES
Minimum Credits: 1
Maximum Credits: 1
A seminar/case based course where advanced students (prosthodontic residents) will gain experience in surveying and designing a variety of clinical
removable partial dentures. The majority of cases will involve clinical cases which will include the various Kennedy classes and modification while some simulated models may be used. The assessment of partial edentulism encompasses everything from the loss of a single tooth to the loss of all teeth but one. All disciplines of dentistry may be involved. The integration of all considerations is where the specialty of prosthodontics has the most to offer a patient. The management of the many variables in partially edentulous conditions is the essence of specialty-level prosthodontic therapy.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5142 - DENTAL MATERIALS
Minimum Credits: 2
Maximum Credits: 2
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5146 - DENTAL MATERIALS 1 LAB
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

PROSTH 5171 - PRINCIPLES DENTAL OCCLUSION 1
Minimum Credits: 3
Maximum Credits: 3
A clinically oriented course where students learn the basic principles of occlusion, articulation and functional waxing techniques this course introduces students to occlusal terminology and concepts mandibular movement, use of articulators, face bows, mounting of casts, occlusal adjustments; and fabrication of occlusal splints. This course had a clinical and a laboratory component.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5211 - FIXED PARTIAL DENTURES 1
Minimum Credits: 1
Maximum Credits: 1
During this course the preparation of posterior teeth for a fixed partial denture along with making an impression, fabrication of an all metal cast fixed partial denture and provisionalization of the prepared teeth are introduced.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5213 - COMPLETE DENTURES 1
Minimum Credits: 1
Maximum Credits: 1
The goal of this lecture series is to prepare the student for the complex task of complete denture fabrication. During the length of this course the student will be exposed to the materials and techniques needed to treat patients in the clinic setting.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5215 - FIXED PARTIAL DENTURES 1 LAB
Minimum Credits: 2
Maximum Credits: 2
This is the laboratory component of the didactic course ’Fixed Partial Dentures 1’. Students perform the procedures necessary to fabricate an all metal cast fixed partial denture and the provisionalization of the prepared teeth.

Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade
PROSTH 5217 - COMPLETE DENTURES 1 LAB
Minimum Credits: 2
Maximum Credits: 2
The goal of this laboratory course is to prepare the student for the complex task of complete denture fabrication. During the length of this course the student will be exposed to the materials and techniques needed to treat patients in the clinic setting.
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade

PROSTH 5241 - REMOVABLE PARTIAL DENTURES
Minimum Credits: 1
Maximum Credits: 1
Didactic introduction to the treatment of totally edentulous patients with removable complete dentures begins with terminology, patient examination and ridge and arch classification. Continues with the oral anatomy, pertinent bio. materials and the mechanical and physiologic principles utilized in edentulous impression making. Concludes with jaw relation records, the use of artificial denture teeth and the steps required to fabricate, insert, adjust and maintain complete dentures.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5245 - REMVBL PARTIAL DENTURES LAB
Minimum Credits: 2
Maximum Credits: 2
An introductory laboratory course in which the student utilizes a variety of biomaterials to fabricate a technique set of maxillary and mandibular complete dentures for a dental typodont. Provides experience in material handling while making impressions, dental casts and baseplates and wax occlusion rims. Concludes with the performance of sequential laboratory procedures-tooth articulation, waxing, flasking, and boil-out, packing, processing and finishing dentures.
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade

PROSTH 5251 - FIXED PARTIAL DENTURES - 2
Minimum Credits: 1
Maximum Credits: 1
During this course the preparation of posterior teeth for a fixed partial denture along with making an impression, fabrication of an all metal cast fixed partial denture and provisionaization of the prepared teeth are introduced.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5256 - FIXED PARTIAL DENTURES 2 LAB
Minimum Credits: 3
Maximum Credits: 3
This is the laboratory component of the didactic course 'Fixed Partial Dentures 2'. Students perform the procedures necessary to fabricate an all metal cast fixed partial denture and the provisionaization of the prepared teeth.
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade

PROSTH 5271 - DIGITAL DENTISTRY 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade
PROSTH 5273 - FIXED PARTIAL DENTURES 3
Minimum Credits: 1
Maximum Credits: 1
This course will provide instruction on the preparation, placement and cementation of porcelain veneers, porcelain and composite inlays and onlays; and single unit all ceramic crowns.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5276 - FIXED PARTIAL DENTURES 3 LAB
Minimum Credits: 2
Maximum Credits: 2
This is the laboratory component of the didactic course 'Fixed Partial Dentures 3'. Students perform the procedures necessary to fabricate porcelain veneers, porcelain and composite inlays and onlays; and single unit all ceramic crowns.
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade

PROSTH 5282 - COMPLETE DENTURES 2
Minimum Credits: 1
Maximum Credits: 1
Didactic completion of the treatment of totally edentulous patients with removable complete dentures. Explains the use of biomaterials to improve the oral health of long term denture patients. Continues with the treatment procedures required to fabricate various types of immediate complete dentures. Concludes with the procedures required to rebase, reline and repair existing complete dentures.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5311 - IMPLANTOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
This course in implant dentistry is a multidisciplinary teaching program structured to provide a basic learning didactic experience. It presents an approach to the historical and biological basis for implantology, patient evaluation and treatment planning, implant surgery, provisionation, definitive prosthodontic procedures and maintenance protocols.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5346 - IMPLANTOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
This course in implant dentistry is a multidisciplinary teaching program, structured to provide basic learning didactic experience. It presents an approach to historical and biological basis for implantology, patient evaluation and treatment planning, implant surgery and provisionation, definitive prosthodontic procedures, and maintenance protocols.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 5348 - DIGITAL DENTISTRY 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

PROSTH 5367 - CLINICAL REMOVABLE PROSTHODONTICS 1
This course is designed to provide clinical experiences in the area of removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with removable prosthodontic needs.

PROSTH 5900 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
This course is intended to direct first professional students in research projects in prosthodontics.
Academic Career: DMED
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

PROSTH 5910 - ADV PROSTH TRMNT PLANNING
Minimum Credits: 1
Maximum Credits: 1
This course is structured to develop the student's ability to plan and implement treatment for patients with complex prosthodontic problems, including but not limited to fixed, implant, and removable prosthodontics, geriatric prosthodontics, TMJ problems, re-establishment of vertical dimension, surgical prosthodontics and other prosthetic procedures.
Academic Career: DMED
Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 5915 - DENTAL IMPLANT SELECTIVE
Minimum Credits: 1
Maximum Credits: 1
A hands-on approach is offered for the surgical and restorative phases of implant dentistry. Students will surgically place implants and assist with cases. Each student will restore one prosthetic case. Advanced seminars will be given on implant dentistry.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 5916 - COMPLETE DENTR FABRICATION-VA
Minimum Credits: 1
Maximum Credits: 1
This externship permits the fourth year dental student working one-on-one with a hospital staff dentist to complete one full denture in a hospital setting on medically compromised geriatric patients. In addition the student will understand the operation of a dental clinic within a hospital setting.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

Psych Mental Health Nursing

NURPSY 2008 - ALTERNTV RESEARCH REQUIREMENT
Minimum Credits: 1
Maximum Credits: 3
Consists of two major learning experiences. One is a course in 1) advanced research methods, 2) advanced statistics, or 3) independent study. The other requirement is met through completion of 1) a research project, 2) a research paper or 3) a research practicum. The combination of courses/requirements selected must provide experience in utilization of research findings, identification of researchable problems, and implementation of the research process.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Nursing students only.

NURPSY 2010 - MASTER'S THESIS
Minimum Credits: 1
Maximum Credits: 3
Individual instruction provides guidance in the preparation of a scholarly written report. This report synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: School of Nursing students only.

NURPSY 2020 - ADV PSYMH: GROUP THEORY & RES
Minimum Credits: 2
Maximum Credits: 2
Examines models of group interventions in PSYMH from a holistic perspective & incorporates theory/research from nursing & related sciences to develop a framework for guiding advanced nursing practice. Clinical therapeutic focus on use of group intervention in altering human responses associated with mental & emotional problems. Various classifications of systems of nursing phenomena considered readvances in psychobiology & use of group interventions with specific client populations. Group management skills explored within context of selected clinically-related mgt role & case mgt.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURPSY 2021 - CLINICAL PRACTICUM & CONFERENCE
Minimum Credits: 1
Maximum Credits: 1
This clinical practicum is taken concomitantly with NURPSY 2020 and includes practice and a weekly clinical conference. Clinical applications of theoretical knowledge focus on experiences in short-term group interventions and in the clinically related role of manager.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURPSY 2022 - FAMLY THEORY/THERAPY TECHNQS
Minimum Credits: 2
Maximum Credits: 2
This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURPSY 2023 - FMLY THRPY ROLE SEM & CLN PRAC
Minimum Credits: 1
Maximum Credits: 1
This clinical practicum is taken concomitantly with NURPSY 2022 and includes clinical experiences as a family therapist. Experiential seminars are held. Knowledge gained from theory course is applied and synthesized into a conceptual framework for advanced nursing practice.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.
NURPSY 2024 - INDIVIDUAL PSYCHOTHERAPY THEORY
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURPSY 2025 - INDIVIDUAL PSYCHOTHERAPY PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
The goal of this practicum is to provide the student with an opportunity to gain beginning skills in the practice of individual psychotherapy with clients. The student will be expected to provide psychotherapy to a client through the beginning (initial interview), middle, and terminal phases of treatment, utilizing concepts learned in NURPSY 2024 individual psychotherapy theory.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURPSY 2061 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
An indepth focus in a particular area of interest. Students arrange study with a designated faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Nursing students only.

Psychiatry

PSYC 5345 - CLINICAL NEUROSCIENCE REPEAT
Minimum Credits: 0
Maximum Credits: 0
This course is registered when the clinical neuroscience clerkship is failed and all or part of it must be repeated. If less than the full clerkship is taken, the transcript should reflect the specific number of weeks repeated.
Academic Career: MEDS
Course Component: Clinical
Grade Component: Grad LG/SU5

PSYC 5365 - CLINICAL NEUROSCIENCES
Minimum Credits: 0
Maximum Credits: 0
The neurosciences clerkship integrates psychiatry and neurology. NSURG, neuropath and neurorad experiences are also provided. The block is five weeks psych and three weeks neurology. Clinical teaching includes INPT and OPT settings. Field trips, NSURG or neuropath brain cutting, emergency room, and one aa meeting are required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5366 - CLINICAL PSYCHIATRY CORE CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
The psychiatry clerkship is five weeks of clinical psychiatry. Focus in on common psychiatric conditions: presentation, diagnosis, treatment and prognosis. Clinical teaching includes INPT and emergency room settings. Field trips, and one aa meeting are required. Didactic teaching on two
afternoons include interactive lectures, case conferences and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PSYC 5410 - ACTING INTERNSHIP IN PSYCHIATRY

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four/eight week elective in a number of AI's available in psychiatry. assigned to a clinical module at WPIC of their choice that will provide experience in diagnostic and management of psychiatric patients; enhance ability to conduct a psychosocial and clinical interview; proficiency in gathering clinical data relevant to a psychiatric evaluation, arriving at a correct diagnosis of psychiatrically ill patients; plan and carry out a treatment approach towards a psychiatric patient; effectively utilize the resources and skills of related mental health professions.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PSYC 5411 - ADOLESCENT PSYC ACTING INTERN

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week elective. Students will observe the assessment and treatment of hospitalized adolescents and their families. Patients are treated in therapeutic milieu along with individual group and family therapy sessions. Students attend team meetings, in-service sessions among other activities. Participate in establishing psychiatric diagnosis. Individual or informal seminar instruction cover normal and atypical developmental stages.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PSYC 5412 - TRIPLE BOARD ACTING INTERNSHIP

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at children's hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PSYC 5415 - INTRO TO CLINICAL PSYCHIATRY

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This four-week elective is for those students interested in getting experience in clinical psychiatry outside of the core clinical neurosciences clerkship. Students will develop basic skills in the interviewing and assessment, diagnosis and management of psychiatric patients in the inpatient units. Course objectives include: conduct comprehensive psychiatric interview and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and management treatment; plan and implement a biopsychosocial treatment plan for patients with psychiatric illnesses; and utilize the resources and skills of related mental health professionals.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### PSYC 5420 - PSYCHIATRIC EMERGENCY SERVICES

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Twenty-four hour psychiatric assessment center and emergency room where students may participate for one to 3 months in the assessment, diagnosis and disposition planning of patients. Students also participate in a comprehensive course covering diagnostic interviewing, lethal assessment and specific methods for interviewing efficiently under time constraints. This course consists of didactic presentations, role playing, interviewing of patients in class and a bibliography of required and suggested readings.
PSYC 5425 - MGT OF PSYCHIATRIC ILLNESSES
Minimum Credits: 0
Maximum Credits: 0
Four week elective designed to allow students to learn in a service-learning model. Students will participate at non hospital sites interacting with social workers, nurse practitioners, primary care physicians, and psychiatrists. Primary goal of this elective is to learn to identify and manage psychiatric illness in the primary care setting.

PSYC 5430 - PEDIATRIC PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
Assessment of children and families referred to behavioral science program, children's hospital and consult liaison. Help consult in abuse and neglect problems at hospitals and special settings. Acquainted with community resources. Skills in behavioral syndromes assessment principles of consultation and liaison activity.

PSYC 5441 - OUTPATIENT ADOLSCNT PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
Four week elective in which the student will observe and participate in complete evaluations of children, adolescents, and their families. Expected to rotate in a general clinic and through some of the specialty child psychiatry clinics as well. There will be an opportunity to observe group therapy sessions. Teaching will be in individual, group and conference settings.

PSYC 5442 - ADV OUTPATIENT CHLD & ADOLSCNT
Minimum Credits: 0
Maximum Credits: 0
Four/eight week for those individuals who are considering a career in behavioral pediatrics, or general or child psychiatry. Active role demanded of student. Those interested will serve as a co-clinician with shared and supervised responsibility for assessment and treatment of children and adolescents. Literature-intensive, assigned texts and articles. Students will learn clinical skills as part of a multi-disciplinary approach to outpatient treatment, working with other mental health professionals. Student will spend time in general clinic and varied specialty clinics.

PSYC 5443 - SEX ABUSE OF CHILDREN & ADOLSCNT
Minimum Credits: 0
Maximum Credits: 0
Four week elective, clinical and research aspects of child sexual abuse will be examined from a variety of perspectives. Discussions with instructors and selected readings. Clinical aspects of child sexual abuse including how to identify and gather information from children, methods of reporting abuse to the proper authorities. Legal and child protective aspects. Psychiatric and physical problems will be addressed.

PSYC 5448 - INTRO TO GERIATRIC PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
This course will provide an introduction to psychiatric care of the geriatric patient. Experiences will include new assessments, interviewing, psychotherapy and pharmacotherapy, collaboration with geriatricians and other related issues. Experiences will be in both inpatient units and in-home visits. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and manage treatment; plan and implement biopsychosocial treatment plan for patients with elders with psychiatric illnesses; utilize the resources and skills of related mental health professionals, learning how to collaborate with other providers and agencies; understand how family and community contents affect mental health of the elderly; summarize the assessment and treatment of a patient with dementia; employ a cognitive screening evaluation to assess and follow patients with cognitive impairment and state the limitations of these instruments; summarize the special considerations in prescribing psychotropic medications of the elderly, especially toxicity risks; appreciate the role of loss in the etiology of psychiatric disorders in the elderly.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5450 - GERIATRIC PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
Four/eight week elective provides the students the opportunity of being involved in all aspects of care of elderly inpatients and outpatients. Involvement in individual, couple, family and group programs. Function as members of the multi-disciplinary team. Assume increasing responsibility for individual patients as their rotations proceed. Attend a weekly case conference. Supervised by a resident and faculty member of the team to which they are assigned.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5455 - EMERGENCY PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
Student will learn clinical interviewing, the mental status examination, basic psychiatric diagnosis, basics of evaluation of suicidal and homicidal potential, emergency therapeutics, and basic aspects of psychiatry and the law.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5458 - PSYCHIATRIC ASSESSMENT
Minimum Credits: 0
Maximum Credits: 0
This elective experience will develop skills at psychiatric interviewing as well as assessment of new patients. Forty (40%) percent time will be spent in the psychiatric emergency room doing evaluations with faculty and resident preceptors, 40% rotating at other sites (child, adult, geriatric) doing assessments of new ambulatory patients, plus a full day of didactics and supervision. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, and formulate working diagnosis using the dsm-iv multi axial system; elicit, describe and record the key components of a mental status examination; make a clear and concise psychiatric case presentation; learn different approaches to assessment across the lifespan; understand the indications and procedures for involuntary mental health commitment; develop a collaborative, multi-disciplinary and biopsychosocial approach to patient care; demonstrate empathy, facilitative approaches and sensitivity to diversity.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5459 - NEUROSCIENCE AT THE BEDSIDE
Minimum Credits: 0
Maximum Credits: 0
Personalized medicine is the new catchphrase for the role of cutting edge translational science on routine clinical care. Can we use an imaging result to predict treatment response? How will a person's genetic make-up inform choice of medication? How does awareness of risk affect management? In psychiatry, personalized medicine remains somewhat of a 'holy grail' elusive but hotly pursued by neuroscientists and clinicians. In this elective experience, students will get a taste of that pursuit through a mixture of scientific and clinical activities that will be individualized by students in particular areas ranging from neuroimaging, pharmacotherapy, genomics, ethics and service research. Students will investigate a particular area of interest through a literature review and specific directed experiences, presenting a capstone project to a scientific audience at the end. Overall supervision will be conducted by the course director.

Academic Career: MEDS
PSYC 5460 - CONSULTATION & LIAISON PSYCH
Minimum Credits: 0
Maximum Credits: 0
Four/eight week elective focuses on psychiatric problems in medical and surgical patients. Under the supervision of full-time faculty and chief resident. Respond to requests for psychiatric evaluation of patients on inpatient units. Conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patient's family in the clinical problem, makes treatment recommendations and provides appropriate follow-up during the patient's hospital stay. Multi-disciplinary team integrates the biological with psychosocial perspective to achieve view.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5462 - PSYCHIATRY AND FAMILY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This four-week elective focuses on psychiatric and general medical problems in a variety of patients. Student will work on the consultation/liaison service at St. Margaret's hospital where the student will respond to requests from physicians for psychiatric evaluation of patients on inpatient units. The student conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patients family in the clinical problem, makes treatment recommendations and when appropriate does follow up during the patient's hospital stay. The multi-disciplinary team on the service attempts to integrate the biological with the psychosocial perspective to achieve a comprehensive view of patient care. Students will participate in family medicine case conferences, attend outpatient experiences at primary care clinics, participate in palliative care interventions and work on the medical care of the psychiatry patient (MCP) service at WPIC. Learning opportunities include: supervised clinical assessments; hospital rounds; case conferences and seminars. This elective can prepare a student for combined family medicine/psychiatry residency programs.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5465 - COMMUNITY PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
This four-week elective intends to teach students how to care for seriously and persistently mentally ill adults and adolescents who are in community-based psychiatric treatment programs. Students will precept with team psychiatrists, get exposure to group and individual therapy, and follow one or two patients for continuing care over the month. Home visits and other community outreach will be an integral part, along with collaboration with a variety of team members and other providers. Students will be involved in case management, treatment teams, and systems liaising (e.g., Assisting patients leave state hospitals and return to the community). The course objectives are: to build basic skills in psychiatric interviewing, assessment, and patient management; to learn how to work with "challenging" clients, situations, and systems; to plan and implement biopsychosocial treatment plans for patients with psychiatric illnesses; to utilize the resources and skills of related mental health professionals, working collaboratively with multiple disciplines and agencies; to understand how continuity of care can be achieved and how it can help improve patient outcomes; and to learn how the funding of mental health care affects service delivery and patient outcomes.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5471 - MAYVIEW STATE HOSPITAL
Minimum Credits: 0
Maximum Credits: 0
Eight week elective at Mayview State Hospital. Become aware of the social and community programs of the chronic mentally ill and participate in the supervised group therapy experience. Participate in ongoing research at Mayview depending on the student's ability and interest. Interview and assessment techniques for psychiatric inpatients. Prescription practice for psychotropic medications. Treatment of non-responsive schizophrenic patient. Drug metabolism, conduct a neurological evaluation of psychotic and depressed individuals.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PSYC 5481 - ADDICTIONS TREATMENT PROGRAM
Minimum Credits: 0
Maximum Credits: 0
Four/eight week placement providing the opportunity of being included in all aspects of care both in and outpatient, for chemical dependency. Participation and involvement in all medical-psychological aspects; detoxification and rehabilitation, individual, family and group counseling; evaluation/assessment, treatment planning; working with adult, adolescent, elderly and pregnant patients in various modalities. Function as an integral part of the clinical multi-disciplinary team. Recognize how to avoid prescribing inappropriately for chemically-dependent patients.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**PSYC 5482 - DUAL DIAG:MENTAL & SUBS ABUSE**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Experience treatment of patients with both mental illness problems and substance abuse problems at the Western psychiatric institute and clinic. Full member of interdisciplinary treatment team as primary therapist for two patients. Some time will be spent at off-site locations within the community.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**PSYC 5483 - ADDICTION MED DUAL DIAGNOSIS**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective will provide the student with experiences in addiction medicine and psychiatry, with a special focus on patients with dual diagnosis of substance use and other psychiatric disorders. Various rotation sites will be available including outpatient and inpatient detoxification services, treatment of opiate dependence (including methadone and buprenorphine maintenance programs), individual and group dual diagnosis treatment, and specialized perinatal addiction treatment for pregnant women and women with young children. Optional rotation sites in the HIV clinic and center for liver disease may also be available (depending on availability), as patients with addiction frequently engage in risky behaviors such as needle-sharing or unprotected sex that can lead to transmissible diseases such as HIV and hepatitis. Patients with psychiatry and substance use disorders often have a history of trauma, and thus the student will have ample opportunity to learn how to diagnose post-traumatic stress disorder (PTSD) and deliver trauma-informed care. Evidence-based treatments for addiction will be demonstrated with a special focus on motivational interviewing (MI), a collaborative, patient-centered technique for facilitating behavioral change. Supervision will be provided by medical directors of the various sites. The student participating in this elective will have the opportunity to: 1) assess patients in need of detoxification and provide appropriate treatment; 2) manage opiate dependence utilizing opioid-replacement therapies; 3) perform assessments and intakes on new patients referred for dual diagnosis treatment; 4) observe and interview patients during individual pharmacotherapy management sessions; 5) participate in individual and group dual diagnosis sessions; 6) interact with and provide education to family members when possible; 7) observe and assist with current substance abuse research within the department.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**PSYC 5485 - ADULT INTENSIVE OUTPATIENT PRG**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Elective introduces student to acutely ill psychiatric patients. Partial serves as a step-down for hospitalized patients with a mix of mood and psychotic disorders, frequently with significant comorbidities. Treatment occurs in group, individual and family sessions by multidisciplinary treatment team.  
Student participates in variety of clinical experiences: running group psychotherapy sessions; carrying small case load of individual patients for individual psychotherapy and pharmacotherapy; conduct family sessions; perform assessments and intakes on new patients; participate in treatment team meetings.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**PSYC 5500 - NEUROBEHAVIORAL PSYCHIATRY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four week elective to learn different diagnosis of neuropsychiatric disorders in developmentally disabled population; neurology principles and treatment pertaining to developmental disabilities; behavioral neurology principles and treatment pertaining to developmental disabilities; to work on a treatment team and learn inpatient case formulation and therapeutic management skills. John Merck multiple disabilities program for children/adolescents/adults and their families in and outpatient clinic and community liaison program. Reasons for admission is acute psychiatric symptomatology.  
**Academic Career:** MEDS
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

PSYC 5510 - SLEEP AND ITS DISORDERS  
Minimum Credits: 0  
Maximum Credits: 0  
Eight week elective to provide a basic knowledge of sleep, regulation of a relationship of sleep stages to other physiobiological process; to develop basic skills and apply them to comprehensive assessment of patients with complaints of disturbed sleep. Assist in the evaluation of patients with disorders. Participate in history taking and in the administration of structured interview to patients and their bed partners. Learn principles and procedures of polysomnography and will participate in the processes of data interpretation, treatment recommendation and formulate a treatment plan.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

PSYC 5520 - BIOLOGICAL RHYTHMS  
Minimum Credits: 0  
Maximum Credits: 0  
Eight week elective in understanding more the interrelationships between the sleep-wake cycle and the circadian rhythms of core body temperature and different neuroendocrine axes; to participate in the evaluation of subjects and patients including history taking and recruitment. Provide as opportunity to learn about polysomnography and clinical neuroendocrinology including hormone assay procedures; participate in data collection and subsequent analysis. Material will be provided; expected to critically review relevant literature. Design a research study.  
Academic Career: MEDS  
Course Component: Independent Study  
Grade Component: H/HS/S/LS/U

PSYC 5531 - WOMEN'S MENTAL HEALTH  
Minimum Credits: 0  
Maximum Credits: 0  
A four week elective that provides students with the opportunity to assess and treat psychiatric disorders in women, both within inpatient and outpatient settings. Students will have the opportunity to assess up to five patients per day. Issues addressed include: pregnancy, postpartum, breast and gynecological oncology as well as other problems such as premenstrual dysphoric disorder and long term care of patients with cancer. Weekly breast or gynecologic conferences and student involvement in special projects are also encouraged.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

PSYC 5650 - INDIVIDUALIZED CLINICAL COURSE  
Minimum Credits: 0  
Maximum Credits: 0  
An individualized course of study may be arranged with the department of psychiatry to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

PSYC 5890 - CHLD & ADOLSCNT DEPRESSION RES  
Minimum Credits: 0  
Maximum Credits: 0  
Four week elective to understand the manifestations of affective disorder in childhood and adolescence; to learn structured assessment techniques for children axis 1 psychiatric disorders; to become familiar with several different research methodologies used in this population including neuroendocrine and pharmacological of childhood depression and safety side effects. Conduct structured interview of both parent and child with use of techniques appropriate to age and development of child. Formulate a specific treatment plan.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U
PSYC 5892 - PSYCHOPHYSIOLOGY
Minimum Credits: 0
Maximum Credits: 0
Eight week elective provides an introduction to basic noninvasive electrophysiobiological techniques and psychophysioiogical responses used to
study autonomic nervous system responsitivity to psychological influences on physiology and pathophysiology will be taught and basic research.
Readings will supplement lab work. Students will successfully collect at least one type of electrophysiobiological data; effectively critique a
published article in psychophysiology; design a feasible psychophysioiogical experiment.
Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

PSYC 5893 - NEUROPHARMACOLOGY
Minimum Credits: 0
Maximum Credits: 0
Four week elective on various central neurotransmitter systems will be described and their possible role processes will be analyzed in relation to
pharmacological effects. Catecholamines, serotonin, GABA, acetylcholine and receptors will be discussed and existing experimental evidence
regarding their role. Independently conduct a thorough library search; effectively critique and evaluate published research papers and write a
comprehensive document based on a critical literature review.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

PSYC 5894 - PSYCHOPHAR OF MOOD DISORDERS
Minimum Credits: 0
Maximum Credits: 0
Eight week elective that offers the opportunity to conduct lab studies of cell membrane function in patients with mood disorders. Blood components
are used to study ion transport phenomena and other aspects of membrane function, and membrane structural components such as phospholipids.
Orientation is to ward off the biological foundations of major mood disorders, and the mechanisms underlying the therapeutic actions of
psychopharmacological agents; to design an experiment that employs basic lab methods to investigate clinical phenomena; to analyze and interpret
data from experiments.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

PSYC 5895 - INDEPENDENT RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Four week interdisciplinary work, combining research and clinical work, involving areas of overlap between psychiatry and other disciplines or
institutions, i.e. psychophysiology, behavioral approaches in psychiatry, research design in the treatment of chronic psychiatric disease, research
literature and psychopharmacology, neuroendocrinology of major psychiatric disorders, somatopsychiatric factors in human disease.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

PSYC 5896 - LAW AND PSYCHIATRY
Minimum Credits: 0
Maximum Credits: 0
Four week elective to conceptualize issues and perform law medicine consultations in general areas of mental health law, medical ethics and
professional responsibility with specific projects on patient's rights, informed consent, medical experimentation, legal guidelines effecting patient
care and other areas of medicine where legal, social and ethical issues predominate. An experience as a jail psychiatrist providing psychiatric
examination, as an advocate for patient's rights in a state hospital or as a consultant to lawyers at neighborhood legal service could be arranged.
Academic Career: MEDS
Course Component: Internship
Grade Component: H/HS/S/LS/U

PSYC 5897 - BEHAVIORAL MEDICINE
Minimum Credits: 0
Maximum Credits: 0
Four week elective aimed at familiarizing the student with theory and practical applications within the programs of one or two of participating faculty members. Techniques include behavioral assessment, nutritional intervention for diabetes and obesity, and interventions for enhancing coping with chronic disease or pain such as relaxation and biofeedback therapy. Develop an assessment and treatment plan for a representative case; conduct a behavioral treatment session of a selected case; critically evaluate the clinical behavioral medicine literature.

Academic Career: MEDS  
Course Component: Internship  
Grade Component: H/HS/S/LS/U

**PSYC 5898 - INTRO TO CLINICAL PSYC RESEARCH**  
Minimum Credits: 0  
Maximum Credits: 0  
Eight week elective exposure to clinical research projects. Variety of research projects available. Each student will be assigned a faculty mentor or mentors based on his/her particular interests. Current projects involve clinical, biochemical, neuropsychological, neuroanatomic and electrophysiology studies in schizophrenia. Experiences range from "bench-top" lab assays to patient interviewing techniques; data collection, basic computer skills and basic lab skills; basic knowledge of current psychiatric nomenclature and diagnostic instruments.

Academic Career: MEDS  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U

**PSYC 5899 - INDEPENDENT STUDY**  
Minimum Credits: 0  
Maximum Credits: 0  
Four week elective wherein the students are welcome to do an independent study or the possibilities of other studies besides the following ones: anorexia nervosa and bulimia nervosa; epidemiology of major psychiatric disorders; outpatient management of cognitive disorders; outpatient behavioral treatment of neurotic disorders; behavioral techniques in the management of general medicine disease; genetic factors in major psychiatric disorders; outpatient drug and alcohol valid disorders and their management.

Academic Career: MEDS  
Course Component: Independent Study  
Grade Component: H/HS/S/LS/U

**PSYC 5901 - EXTRAMURAL PSYCHIATRY**  
Minimum Credits: 0  
Maximum Credits: 0  
A clinical experience in psychiatry may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**PSYC 5903 - INDEPENDENT STUDY**  
Minimum Credits: 1  
Maximum Credits: 3  
This course is intended for the nonmedical graduate student. It provides the opportunity to participate in ongoing clinical or laboratory research under the direction of a departmental faculty preceptor. The student, in collaboration with the faculty member, will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and time table for completing the experience.

Academic Career: MEDS  
Course Component: Independent Study  
Grade Component: H/HS/S/LS/U

**Psychology**

**PSY 2000 - RESEARCH AND THESIS MS DEGREE**  
Minimum Credits: 1  
Maximum Credits: 9  
Students who are planning, conducting or completing the master's thesis may register for this course.

Academic Career: GRAD  
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2005 - STAT ANAL 1/ADV STATS-UG
Minimum Credits: 3
Maximum Credits: 3
This course is the first of a two course sequence to provide the knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Students will learn techniques to conduct a variety of statistical tests; the appropriate interpretation of results will be emphasized. Topics include descriptive statistics, graphing data, sampling distributions, hypothesis testing (including power, effect sizes, and confidence intervals), t-tests, correlations, multiple regression, and polynomial regression. Students use SAS for statistical computations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2010 - STATISTICAL ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-course sequence to provide knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Topics covered include one-way and factorial analysis of variance, analysis of covariance, repeated measures and mixed model analysis of variance, mixed model analysis of covariance, outlier detection, and transformations. Students will continue to use SAS for statistical computing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2015 - STATISTICAL ANALYSIS 3
Minimum Credits: 3
Maximum Credits: 3
The focus of the course is a simple and multiple linear regression analysis. Topics include: least squares fitting procedures, analysis of variance and tests of significance for correlations and regression weights, analysis of residuals, transformations, multiple and partial correlations, problem of multi-collinearity, weighted least squares analysis, analysis of covariance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2020 - ADVANCED EXPERIMENTAL DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course deals with the design and analysis of experimental data. Topics include: randomized block, split-plot and incomplete block designs, Latin squares, multiple comparison tests, and applications to repeated measures designs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2025 - PSYCHMTRC FOUNDS OF ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Empirical data collection requires that major concepts be carefully measured. This course discusses the theory behind empirical measurement of psychological concepts and the creation of scales to measure variables. The course will offer the student practical experience in scale construction, with the creation of a new scale and the administration and assessment of this scale. We also briefly discuss the history of psychological testing and the use and interpretation of standardized scales.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2050 - ADVANCED DATA ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course is intended to provide the knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. A few basic but powerful techniques for model-building and statistical inference will be introduced early in the course. Students will then use these techniques to conduct statistical tests involving more complex research designs, for example, multi-variate ANOVA, polynomial regression, and hierarchical linear models. Students will learn to use SAS.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**PSY 2075 - HISTORY & SYSTEMS OF PSYCHOLOGY**
Minimum Credits: 3
Maximum Credits: 3
The course provides a survey of the historical and philosophical backgrounds of psychology. It is designed for students with an extensive background in psychology, but little or no training in the history and philosophy of science. The emphases are on 19th century European experimental psychology and the development of American psychology to 1960.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**PSY 2100 - RESEARCH METHODS SOCIAL PSYCH**
Minimum Credits: 3
Maximum Credits: 3
This course covers the fundamentals of a broad array of research issues and techniques. Topics covered include experimental and quasi-experimental design, questionnaire construction, interviewing, survey research, content analysis and qualitative research methods. Also discussed are reliability, validity and a variety of scaling techniques. Systematic attention is focused on the relation between the nature of the research setting and the types of design opportunities and problems that are likely to be encountered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**PSY 2104 - QUALITATIVE RESEARCH METHODS**
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to qualitative research methods through lectures and class discussion of readings on varied approaches to the collection, analysis, and reporting of qualitative data. Students gain experience through class projects using actual data sets. Several classic qualitative studies illustrative of contrasting epistemological, design, and analytic approaches to qualitative research will be read and discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**PSY 2105 - SOCIAL RESEARCH SEMINAR**
Minimum Credits: 1
Maximum Credits: 1
This weekly graduate seminar series serves as an introduction to ongoing research relevant to the field of social psychology through presentations by students and faculty from the social psychology program, the department of psychology and other departments and universities. Seminar activities will also include discussion of journal articles, research in progress, and professional issues.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**PSY 2110 - TOPICS IN SOCIAL PSYCHOLOGY**
Minimum Credits: 3
Maximum Credits: 3
Course focuses on a single topic within social psychology, such as group formation and development, victimization, social comparison, or the self. Choice of topic varies from one instructor to another.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PSY 2111 - FOUNDATIONS OF SOCIAL PSY
Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to provide graduate students with an overview of theory and research in social psychology, with an emphasis on historical trends and basic principles. The course is designed to serve as a foundation for thinking about social psychology. Students are expected to discuss the readings each week in a seminar-style format, to submit written responses to the readings, and to write a final paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2125 - SOCIAL PSYCHOLOGY: ATTITUDES
Minimum Credits: 3
Maximum Credits: 3
The course emphasizes the nature of attitude formation and change including classic as well as current theoretical approaches. Topics include: theoretical approaches to attitude formation, attitudes and behavior, changing attitudes by changing behavior, consistency models, persistence of attitude change, self-generated attitude change, applications to marketing, "brainwashing", political persuasion and propaganda.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2130 - INTERPERSONAL RELATIONS
Minimum Credits: 3
Maximum Credits: 3
Survey of theories and empirical research from social psychology and personality relevant to the study of close interpersonal relationships. Topics covered include empathy, altruism, affiliation, aggression, sexuality, and interpersonal power.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2135 - SOCIAL PERCEPTION & COGNITION
Minimum Credits: 3
Maximum Credits: 3
Using lecture and discussion, the course provides a historical overview of social psychological theories of person perception, casual attributions, and interpersonal attraction. The second half of the course focuses on current research and theory in these areas.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2155 - PSYCHOLOGY OF SMALL GROUPS
Minimum Credits: 3
Maximum Credits: 3
This course surveys theory and research dealing with small group processes. Topics include formation and development of groups, group composition effects, social influence in groups, group structure and group performance. This course is useful for students in various areas of psychology and such related disciplines as sociology, social work, business and health-related professions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2200 - CLINICAL PSYCH RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
Graduate level examination of major research methods used in clinical psychology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PSY 2205 - PSYCHOPATHOLOGY
Minimum Credits: 3
Maximum Credits: 3
Provides a critical background in research strategies, phenomena, empirical research, & models of adult psychopathology. Emphasis on etiological & pathological research, with both psychological & biological findings to be discussed. Concentration will be on the major psychopathologies with clinical onset in adulthood, including schizophrenia, affective disorders, anxiety, addictions, & eating disorders. Conceptual & methodological issues that cross diagnostic categories will be stressed. Treatment approaches and differential diagnosis will be covered but not emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2210 - CLINICAL PROGRAM RESEARCH SEM
Minimum Credits: 1
Maximum Credits: 1
This monthly graduate seminar series serves as an introduction to ongoing research relevant to the field of clinical psychology through research presentations by students and faculty from the clinical psychology program, department of psychology, and other departments.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis

PSY 2220 - CLINIC PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This graduate course involves supervised experience in interviewing, assessment and psychotherapy within the clinical psychology center. This course is open only to graduate students in the clinical psychology program.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2225 - EXTERNSHIP PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This graduate course involves supervised experience approved by the clinical psychology center in interviewing, assessment and psychotherapy at any of several specialty clinics in the university and community. This course is open only to graduate students in the clinical psychology program.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2230 - CLINICAL COGNITIVE ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
This graduate course focuses on the intellectual assessment of adults and children. Following a discussion of the history of theories of intelligence, the major instruments for assessing intellectual functioning will be reviewed, with a focus on the Wechsler Scales. Students will administer, score, and interpret several measures. The communication of assessment results will be emphasized. A brief introduction to the assessment of brain diseases and learning disability will also be provided.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2235 - CLIN PSYCHOPATHOLOGY ASSESSMNT
Minimum Credits: 3
Maximum Credits: 3
This graduate course covers psychometric theory and major methods for assessing psychopathology with an emphasis on objective tests such as the MMPI-2 and structured interviews. Both theoretical and practical issues of administration and interpretation are addressed. Open only to graduate students in the clinical psychology program.
Academic Career: GRAD
PSY 2245 - DEVELOPMENTAL PSYCHOPATHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This graduate course reviews models of social development and considers several theoretical issues with implications for both normal social development and for the emergence of psychopathology. Social experiences that are seen as crucial for normal development or which may set the stage for later problems are discussed. Both theoretical formulations and empirical findings are critically reviewed with an emphasis on attachment, peer relationships and family relationships.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2250 - PSYCHLGCL TRMNT: SYSTMS & PRIN
Minimum Credits: 2
Maximum Credits: 2
This graduate course covers the history and systems of psychotherapy, with a particular focus on psychotherapy process and outcome research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2251 - PSYCHLGCL TRMNT: COGV & BEHVRL
Minimum Credits: 2
Maximum Credits: 2
This graduate course covers the history and theoretical foundations of cognitive and behavioral therapies as well as evidence on their effectiveness for a range of psychopathology in adulthood. Students will be exposed to basic principles of operant conditioning, behavioral analysis, counter-conditioning, strategies and case material will be introduced, but the class will focus on critical evaluation of treatment research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2252 - PSYCHLGCL TRMNT: BEHVRL MEDICN
Minimum Credits: 2
Maximum Credits: 2
This graduate course examines history and current status of psychological therapies designed for health risk prevention and management of physical disease. Areas emphasized are risk factor modification, secondary prevention/rehabilitation, coping with medical illness and procedures, and community/public health interventions. Critical evaluation of research on these topics will be stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2253 - PSYCHLGCL TRMNT: FMLS & CHLD
Minimum Credits: 2
Maximum Credits: 2
This graduate course provides an overview of family systems theory and family interventions with children. The history and conceptual underpinnings of family systems approaches will be introduced along with a background in normal family development. Specific orientations, including structural, functional/behavioral, and strategic approaches will also be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2255 - COGNITIVE & BEHAVIORAL APPRCH
Minimum Credits: 3
Maximum Credits: 3
This course covers the basics of theory, research and application in clinical psychology from a cognitive and behavioral point of view. Topics in assessment and therapy are discussed.
Academic Career: GRAD
PSY 2260 - BIOLOGICAL BASIS OF PSYCHPATH
Minimum Credits: 3
Maximum Credits: 3
This course contains five major sections - (1) basic characteristics of the model; (2) biological explanations of various types of deviant behavior; (3) relevant assessment strategies; (4) relevant treatment approaches; (5) research issues in selected topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2265 - CLINICAL INTERVIEWING
Minimum Credits: 2
Maximum Credits: 2
A practicum in the development of clinical interview techniques.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2280 - ETHICS & PROFESSIONAL ISSUES 1
Minimum Credits: 1
Maximum Credits: 1
This course introduces first-year clinical students to some of the core issues in professional psychology, including an overview of ethics and diversity issues and some orientation to the clinic and the team process. The largest part of the course will be devoted to the development of fundamental clinical skills.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2281 - ETHICS & PROFESSIONAL ISSUES 2
Minimum Credits: 1
Maximum Credits: 1
This course provides information for first-year clinical students regarding core issues in professional psychology, including a series of lectures on psychopharmacology, followed by a summary of process research in psychotherapy. There will be additional presentations in the areas of ethics, diversity, and several empirically supported treatment models. This course will be offered annually in the summer term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2282 - ETHICS & PROFESSIONAL ISSUES 3
Minimum Credits: 1
Maximum Credits: 1
This course addresses a number of topics of relevance for second-year clinical students, including ethics and diversity, as well as information regarding specific empirically supported treatment models and more general therapy techniques, such as relaxation skills training and emotional self-regulation. This course will be offered each year in the fall term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2300 - DEVELOPMENTAL RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
This course will provide a graduate level examination of major research methods used in developmental psychology from newborn through adolescence.
Academic Career: GRAD
PSY 2310 - FOUND: DEVELM PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
A survey of theories and current research problems in developmental psychology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PSY 2315 - DVLPMNTL PSYCH: INFANCY
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the development of basic cognitive processes such as sensation, perception, memory, and thought during the first 18 months of life.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2320 - LANGUAGE DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course offers a brief overview of theory and research in language acquisition. The focus is on normal language development in monolingual children. Issues include phonological, semantic, syntactic and pragmatic development, learnability theory, the use of input and the biological basis of language acquisition.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2325 - DVLPMNTL PSY: SOCL DEVELOPMNT
Minimum Credits: 3
Maximum Credits: 3
This course covers the central theory and research concerning social and emotional development. Topics covered include: interpersonal relations with peers and family; aggression and pro-social behavior; sex-role development and moral development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PSY 2330 - DEVELM PSYCH: COGNITV DEVELP
Minimum Credits: 3
Maximum Credits: 3
This course examines children's cognitive development in areas such as perception, language, memory and learning skills. Several theoretical perspectives, including Piagetian theory and the information-processing approach are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2335 - DEVELM PSY: SOCL-COGNTV DEVELP
Minimum Credits: 3
Maximum Credits: 3
A survey of recent research problems and techniques in the development of perception with an emphasis on theoretical controversies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PSY 2340 - GESTURE, SPEECH & DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on theory and methods related to the study of spontaneous hand gestures and their relationship to accompanying speech and cognition. Topics to be covered include the use of symbolic and referential gestures, the relationship between gesture and speech, the comprehension of gestural signals, the role of gesture in early communicative development, gesture and conceptual change, brain bases of the gesture-speech link, gestural behavior in special populations, and the role of gestural communication in the evolution of language.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 2376 - TOPICS SEM IN DEVELM PSYCHLGY
Minimum Credits: 2
Maximum Credits: 3
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in developmental psychology.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

PSY 2400 - HUMN COGNTN: RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
This course covers procedures for developing, executing, communication and funding cognitive research. Topics covered include: sampling, experimental design, strong inference, research formulation, hypothesis testing, literature review, experimental procedures, computerized experimentation, scientific writing, oral presentation, and human subjects' procedures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2402 - COGNITIVE PROGRAM RESEARCH SEM
Minimum Credits: 1
Maximum Credits: 1
This series of presentations serves as an introduction to ongoing research relevant to the field of cognitive psychology. Presentations are made by graduate students and faculty of the cognitive psychology program, the department of psychology, and other departments.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis

PSY 2403 - RESEARCH SEMINAR COGNITIVE PSY
Minimum Credits: 2
Maximum Credits: 2
Designed for all first year graduate students in cognitive psychology. Student initiates a research project during the term and writes a brief report of it. Course instruction emphasizes how to conceptualize research issues, deal with journal literature, and write research reports. Course is intended to help student carry out a master's equivalent research project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2410 - FOUNDATIONS COGNITIVE PSYCH
Minimum Credits: 3
Maximum Credits: 3
This course will introduce core issues, theories, and experimental findings in cognitive psychology. Topics to be covered include history of cognitive psychology, sensory perception, attention, memory, imagery, language, reasoning, learning and expertise, problem solving, decision making, and individual differences in cognition. The goal is to understand foundational theories and issues as well as the research methods used in this area, in other words, how human cognition can be studied scientifically, and why the results of experimental investigations support particular theories.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
PSY 2420 - FOUNDATIONS: BEHAVIORAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
A survey of current research problems and techniques in the area of the analysis of behavior.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2430 - COMPLEX LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course examines human conceptual behavior. Issues associated with the formation, structure and use of concepts and categories will be discussed. This course is designed for graduate students with a background in cognitive psychology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2450 - LEARNING AND PROBLEM SOLVING
Minimum Credits: 3
Maximum Credits: 3
This course is a core course module which is taken by first or second year graduate students in the cognitive-development program of the department. The course covers basic issues in problem solving and reasoning from the perspective of cognitive psychology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2455 - HUMAN COGNITION: LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
This is a graduate level course in language processes. It offers intensive coverage of the basic (adult) psycholinguistic topics such as speech perception, word meaning, and sentence comprehension.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2460 - HUMAN COGNITION: LEARNING & MEMORY
Minimum Credits: 3
Maximum Credits: 3
This is a basic half-term module in learning and memory. It offers intensive coverage of the basic theoretical and experimental approaches to learning and memory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2465 - PERCEPTION AND ATTENTION
Minimum Credits: 3
Maximum Credits: 3
This is an advanced course on attention. Topics covered include selective attention, vigilance, theories, skill acquisition, automatic processing, feature search, physiology of attention, and learning effects. Students read and discuss current research papers in the area and are expected to carry out either an empirical or review research project in the area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2470 - HUMAN COGNITION: SKILL ACQUISITION
Minimum Credits: 3
Maximum Credits: 3
A course in the human cognition graduate core sequence dealing with the learning of cognitive skills, such as technical job skills and professional problem solving skills. Emphasis is on the acquisition of facility, the nature of effective practice, and the representation of knowledge that contributes to skilled performance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2471 - MAPPING HUMN BRN CONNECTIVITY
Minimum Credits: 3
Maximum Credits: 3
This class will cover background and technical methods of mapping high definition fiber tracking of brain connectivity for basic research and clinical imaging. Students will learn to map/quantify anatomical connections of the human brain. These techniques are used to study brain systems, disorders, and development, and to assist in planning neurosurgery. Students may take an optional one-credit laboratory in which they will learn to use advanced computation software to execute research projects including developing technical methods, mapping brain networks, or clinical analysis of data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2475 - BEHAVIORAL NEUROSCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course will explore the links between behavior (normal and abnormal) and the brain. Cognitive and affective processes will be emphasized. Throughout the course, students will be exposed to research involving humans and animals at a variety of levels: e.g., Analysis of behavior, neuroimaging studies of whole brain activity, recordings from single brain cells, examinations of brain chemistry, and manipulations and study of genetic information. No prior knowledge of biology or neuroscience is required. The format of the course will include both lectures and discussions of scientific papers. The lectures will introduce basic facts and methods of cognitive, systems, cellular, and molecular neuroscience, and they will provide overviews of topics in cognitive and affective neuroscience, considering both normal and clinically-impaired behavior and brain function. The readings will provide an opportunity to consider different methods in the context of the primary literature, permit selected topics to be explored in greater depth, and provide a foundation for self-exploration and evaluation of cognitive and affective neuroscience literatures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2476 - TOPICS SEM IN COGNITIVE PSYCHOLOGY
Minimum Credits: 1
Maximum Credits: 4
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in cognitive psychology.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

PSY 2477 - DESIGN OF EDUCATIONAL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Students will work in teams to enact an innovative educational design process with real projects and real clients. The educational systems being (re)designed may include a museum exhibit, a high school robotics unit, a college lab course, or a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSY 2480 - CMPTL NEUROSCIENCE METHODS
Minimum Credits: 3
Maximum Credits: 3
The course offers an introduction to modeling methods in neuroscience and cognitive neuroscience. It illustrates how models can extend and evaluate different assumptions that are beyond current empirical methods. Basic techniques of modeling biophysics, excitable membranes, small network and large scale network systems will be introduced. Both simulation and mathematical analysis will be illustrated.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**PSY 2500 - RESEARCH METHODS IN HLTH PSYCH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An introduction to research design, with an emphasis on contemporary applications within biopsychology. The course covers the more formal aspects of experimental design, the logic of scientific inference, the critical review of existing literature, derivation of hypotheses, and selection of appropriate research strategies.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**PSY 2502 - HEALTH FUNDAMENTALS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a 3-credit proseminar intended for graduate trainees in biological and health psychology. Key conceptual and methodological issues in several major areas of concentration will be presented and discussed in a seminar format, in the context of current research. Requirements include active class discussion, brief presentations, and several papers involving summary and critique of current issues in each area of concentration. Areas of concentration will include cardiovascular behavioral medicine, psychoneuroimmunology and behavioral oncology, addictions and health behavior, and health cognition.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**PSY 2505 - HEALTH PROGRAM RESEARCH SEM**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Review of current research and topics in biopsychology.  
**Academic Career:** GRAD  
**Course Component:** Colloquium  
**Grade Component:** Grad SN Basis

---

**PSY 2510 - FOUNDATIONS: PERCEPTION**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The objective of this course is to extend our consideration of the mechanisms underlying perception beyond the introductory level. Basic principles of psychophysics and sensory physiology are examined, then specific topics are studied in greater detail. Topics to be covered include: theoretical approaches to perception; mechanisms of neural coding; cortical organization and its relation to perceptual mechanisms; the perception of color, motion and form; perceptual development; neurophysiological approaches to perception and perception in non-visual senses.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**PSY 2520 - PSYCHONEUROIMMUNOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course provides a general background in the new interdisciplinary area of research dealing with effects of physical and psychological stress on the ability of the immune system to withstand illness and disease. Emphasis is on experimental studies which demonstrate ways in which environmental factors alter immunocompetence of animals and humans and on neural and endocrine factors that may mediate such effects. The possible significance of nervous system immune system interactions for development of disease states such as cancer is discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---
PSY 2525 - INTRO TO BEHAVRAL PHARMACOLOGY
Minimum Credits: 3
Maximum Credits: 3
Seminar objectives include: 1) providing an overview of basic principles in pharmacology 2) understanding environmental factors which may promote drug self-administration as well as alter the physiological and behavioral effects of many drugs, and 3) examining the effects of drug-environment inter-relationships on subsequent responses to drugs. Drugs of abuse and selected therapeutic agents will be the primary focus. This course will be aimed at exploring how behavioral factors can influence drug taking and effects; it will not emphasize neurochemical actions of drugs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2530 - SOCIAL PSYCHOLOGY AND HEALTH
Minimum Credits: 3
Maximum Credits: 3
A major direction of health psychology is the study of social phenomena in the maintenance of good health, and the development of disease. An example is the effect of support from family and friends for coping with stress or with illness, for understanding the nature of one's risk for illness and the development of health beliefs. Topics covered include theory and research on emotion, social comparison, risk perception, adherence to prevention or curative prescription, social support and attribution theory as related to health and illness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2532 - HEALTH JUDGMENT & DECISIONS
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the area of "health cognition", which addresses how thinking and reasoning processes are related to health behavior and illness. It begins with a review of how cognitive processes such as risk perception, cost/benefit analysis, judgmental heuristics, norm perceptions, cognitive dissonance, and control perceptions are related to the adoption of healthy and unhealthy behaviors and the processing of health information. We will also consider the concurrent influence of motivational and affective influences such as defensiveness. Attention will be devoted to how people make health-related decisions (such as whether to screen for cancer), how they respond to health communications, and how they mentally represent illness (as well as the extent to which cognitions determine the course and recovery from illness).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2535 - STRESS, HEALTH AND DISEASE
Minimum Credits: 3
Maximum Credits: 3
This course considers the role of stress in health and illness, including the impact of stress on physiological activity, on health related behaviors, and on how people react to being ill. Students will discuss the nature of the stress construct, its theoretical history, and will learn about research on conditions that intensify or diminish stress impact on important emotional and cognitive outcomes. Stress management and therapeutic techniques related to stress reduction will be discussed. The course will use readings and discussions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2550 - PHYSIOLOGICAL BASIS OF BEHAVR
Minimum Credits: 3
Maximum Credits: 3
This course deals with the standard topics in physiological psychology, but from a clinical perspective. Thus, in addition to covering the basic structure and function of the nervous system, the course will include material on disorders such as epilepsy, Parkinson's disease, and schizophrenia.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2560 - HUMAN CARDIOVSLR PSYCHPHYSLGY
Minimum Credits: 3
Maximum Credits: 3
Cardiovascular psychophysiology examines the influence of psychological processes on cardiovascular function. The course examines evidence supporting three perspectives on psychological processes related to cardiovascular function; a stress-arousal perspective, an information processing perspective and a metabolic need perspective.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 2570 - PRINCIPLES OF BEHAVIOR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course deals with the basic and applied behavioral principles that have emanated from a study of learning and motivation in both animals and humans. Focus will be on nature and phenomena of Pavlovian and instrument/operant conditioning but will include their relation to processes traditionally viewed as underlying "unlearned" modifications of behavior. Emphasis given to research problems illustrating contemporary aspects of biopsychology. Conditioned emotional and acquired motivational states will be examined.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 2575 - TOPICS IN PSYCHOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in psychology.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 2576 - TOPICS SEMINAR IN HEALTH PSYCH**  
**Minimum Credits:** 2  
**Maximum Credits:** 3  
This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in biopsychology.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis

**PSY 2580 - TOPICS IN PHONOLOGICAL THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides an opportunity for students' basic training in phonological theory to explore one or more topics in depth. The subject matter of the course varies according to the particular interests of students and instructor in a given year. Topics that are likely to be covered are auto segmental and metrical phonology; categorical phonology; markedness; and phonological universals; lexical phonology; and feature geometry.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 2945 - PSYCHOLINGUISTICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is a general introduction to psycholinguistics, which will look at processes of language understanding, language production, and language acquisition. Throughout the course, we will consider the relationship between theoretical linguistic concepts and constructs, and psycholinguistic data. We will also touch on related areas, such as processes of reading, language and the brain, and language and thought.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 2970 - TEACHING OF PSYCHOLOGY**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course is required of all graduate students fulfilling the departmental teaching requirement. This requirement involves full responsibility for
teaching an undergraduate course in psychology during one term.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
Independent research project developed under the supervision of a faculty advisor.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 9
Students who are planning, conducting or completing the Ph.D. dissertation may register for this course.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 3010 - SEMINAR IN QUANTITATIVE METHODS
Minimum Credits: 3
Maximum Credits: 3
The course covers conceptual, philosophical, and methodological issues in test bias. The definitions of bias are compared and analyzed. Research on the three principle sources of potential bias in standardized test performance are reviewed and critically evaluated. The course covers, in depth, methods for detecting biased items in tests, as well as mathematical models of bias in selection and prediction. Empirical research on racial, ethnic and sex bias and their implications for the IQ controversy are reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 3020 - SEM: PSYCHOLOGIST AS SCIENTIST
Minimum Credits: 3
Maximum Credits: 3
Seminar provides an introduction to the nature and structure of scientific activities pursued by academic psychologists. Representative topics include: (a) the role of programmatic research in psychology, (b) the process of journal publication and preparation of research findings, (c) the role of theoretical papers, book and monographs, (d) how to review a submitted manuscript, (e) role of extramural funding in research, (f) sources of funding, process of grant review, (g) how to write a grant application and other related topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 3105 - SEMINAR IN SOCIAL PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This seminar provides a general review of recent theoretical and empirical work in social psychology. Social perception and cognition, attitude formation and change, interpersonal relations, and group dynamics are among the topics covered in the seminar.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3110 - SEMINR: TOPICS SOCIAL PSYCHLGY
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on a single topic within social psychology, such as group formation and development, victimization, social comparison, or the self. The choice of topic varies from one instructor to another.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PSY 3130 - SPECIAL TOPICS IN GENDER ROLES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Special topics in the psychology of women. Previous foci have included "women and victimization" and "women, achievement and work".  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSY 3135 - SEMINAR IN SOCIAL COGNITION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The focus is on one or more of the following - developments in the distinction between self and other; growth of intentionality; understanding of social causality and agency; metacommunicative skills. The age span under consideration is limited to the first 24-36 months of life. The goals of the seminar are to examine critically the existing literature, and to consider fruitful directions for future research.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PSY 3205 - SEMINAR IN BEHAVIOR GENETICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a survey of recent topics in the field of experimental psychopathology.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PSY 3216 - ADV SEMINAR BEHAVR & MEDICINE**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
An ongoing seminar covering topics in behavioral medicine. Specific topics to be announced in advance.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SNC Basis

**PSY 3220 - SEMINAR: FAMILY RES & THERAPY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A review of methods, common methodological problems and current literature in family research.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**PSY 3225 - SEMINAR IN EMOTION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Topics include contemporary issues in emotion research with an emphasis on emotion expression, developmental perspectives, communication, pathology and methods.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
PSY 3230 - SEM IN TREATMENT OF CHLDHD DIS
Minimum Credits: 3
Maximum Credits: 3
This advanced graduate seminar will focus on recent developments in the prevention and treatment of children's problems. It will include research and theory on treatments that work (i.e. empirically-validated treatments), as well as on newly emerging prevention and intervention approaches for children at risk (e.g. abused children) and for younger children who rarely receive treatment (e.g. infants). An attempt will be made to cover the age range from infancy to adolescence by examining representative approaches to age-related problems and disorders.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3235 - SEMINR IN PROJECTIVE TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
This course covers the theory and application of projective techniques including the Rorschach, the TAT, and selected others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3245 - SEMINAR IN ADDICTION
Minimum Credits: 3
Maximum Credits: 3
Seminar will explore addictive behaviors. The primary focus will be on opiate addiction, alcohol use, tobacco smoking and relevant eating disorders. Focus is on the commonalities and differences among the addictions. A major theme is self-control process in control of addictive behavior. Theories on physiological and behavioral basis of dependence, advances in treatment and relevant issues will be discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3290 - RESEARCH CHILD PSYCHOPATHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on major research problems in the field of child psychopathology. Issues of classification, differential diagnosis, course, and outcome of disorder are addressed. Particular disorders are used to illustrate the issues, trends and methodological problems which characterize current research in child psychopathology. These include attention deficit disorder, conduct disorder, childhood depression and anxiety disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 3295 - SEMINAR IN MINORITY THERAPY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to enhance understanding of the sociocultural and historical variables influencing the behavior, attitudes and hence the psychotherapy experience of ethnic and cultural minorities, including African Americans, Hispanics, Native Americans and Asian-Americans. The literature regarding diagnostic and treatment issues with minorities is reviewed. The goal is to increase knowledge of strategies and promote development of personal styles of therapeutic interaction with minorities, as well as to explore personally held myths and stereotypes.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3315 - SEMINAR IN INFANCY
Minimum Credits: 3
Maximum Credits: 3
An intensive review of a current area of research in infant cognition. Specific topics to be announced in advance.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PSY 3320 - SEM IN LANGUAGE DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Examination of theory and research in language acquisition. Issues include: phonological, semantic, syntactic, and pragmatic development as well as recent developments in the field.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3330 - SEM: DEVELOPMENTAL COGNITION
Minimum Credits: 3
Maximum Credits: 3
An intensive analysis of an area of current research in cognitive development. Specific topics to be covered will be announced in advance.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3335 - SEM: PERCEPTUAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Topics covered in this seminar include: perception and development, perception of spatial layout; visual guided behavior and its development; pattern perception; and formal models of perceptual development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3340 - SEM: SOCIAL-COGNITIVE DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
A survey of recent research in social-cognitive development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3405 - SEMINAR IN ANIMAL LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course considers a number of miscellaneous topics in data and theory of animal learning, memory and behavior. Some sample topics include: time allocation and scaler expectancy theories, content of associative learning, comparative psychology of learning, representation of context, and intra-event association.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3410 - SEMINAR IN COGNITIVE PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Examination of connectionist models for normal and abnormal cognitive functioning including connectionist modeling techniques basic to advanced level. Simulation programs concerning constraint satisfaction, learning, categorization, attention and sequential information processing, hybrid connectionist/control architectures, limitations, and interactions between connectionist and symbolic processing will be discussed. Sensitivity analysis techniques are described and effects of pathology and the physiological feasibility of connectionist assumptions are considered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3455 - PSYCHOLOGY OF READING
Minimum Credits: 3
Maximum Credits: 3
This seminar examines basic issues in linguistic cognition. One theme is the applicability of recent grammatical theories to problems of language comprehension, production and acquisition. Another is the extent to which linguistic cognition can be considered modular versus fully interactive. Theoretical and empirical literature is discussed. Students select a particular problem in the acquisition or use of language to develop a presentation and a paper.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 3460 - PSY & INTERNATIONAL RELATIONS
Minimum Credits: 3
Maximum Credits: 3
This course will focus upon interface of cognitive and social psychology and study of international relations. Topics include: interrelations of beliefs and attitudes, perception, problem solving and decision making as they relate to international relations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 3470 - INFORML REASONING & ARGUMNTATN
Minimum Credits: 3
Maximum Credits: 3
Focus is on informal reasoning; that is, reasoning involving plausibility and "probable truth", with special emphasis on argumentation. Also includes issues related to reasoning in various subject matter domains.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3485 - SEMINAR LRNG & INSTRUCTNL PROC
Minimum Credits: 3
Maximum Credits: 3
A review of recent literature in research on instructional and tutorial processes.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3490 - ADV SEM: LRNG & INSTRNL PROCS
Minimum Credits: 3
Maximum Credits: 3
This seminar is concerned with the content and nature of the field of instructional psychology and its relation to experimental studies of cognition, learning and performance. Three components involved in prescriptive instructional theory are covered; (1) analysis of the desired competence, (2) identification of the related states of the learner, (3) selection of conditions implemented to bring about change.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSY 3520 - SPECIAL TOPC PSYCHOPHARMACLGY
Minimum Credits: 3
Maximum Credits: 3
Review of current literature in the area of psychopharmacology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 3575 - CONDITNING & PHYSIOLGCL REGLTN
Minimum Credits: 3
Maximum Credits: 3
This seminar will survey the recent advances in theory and research on the role of conditioning processes in the regulation of physiological activity.
e.g. conditioned tolerance and sensitization to drugs, conditioned hypo- and hyperalgesia, conditioned immunomodulation, etc.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**PSY 3902 - DIRECTED STUDY**

- **Minimum Credits:** 1
- **Maximum Credits:** 9

Specific research topics carried out under the direction of a particular member of the faculty.

**Academic Career:** GRAD

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Psychology (PHD)

---

**Psychology in Education**

**PSYED 2001 - INTRO TO RESEARCH METHODOLOGY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Introduces basic language and concepts of empirical research with emphasis on the applicability of research methodology (statistics, measurement, design, and evaluation) for improvement of professional practice in education.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

---

**PSYED 2002 - PSYCH OF CROS-CLTL DEVELP/LRNG**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course teaches concepts of human development and learning and the effects of culture on these variables. Cross-cultural research literature is used to describe the roles that culture plays in cognitive development, communication, learning and individual differences in ability, achievement, and social skills. Laboratory experiences utilize cultural experiences to explain cross-national and micro-cultural differences in development and learning. The course is designed for international students and U.S. students whose future careers involve other cultures.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

---

**PSYED 2004 - EDUCATNL PSYCH FOR INSTRUCTION**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course focuses on the main ideas, research findings, and instructional implications of cognitive psychology for major topics in educational psychology (development, learning, curriculum, measurement, and classroom and group processes). Both child and adult learners are studied. A premise of the course is that instructional procedures should be related to cognitive processes and to knowledge already attained by the learner.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

---

**PSYED 2010 - GROUP DYNAMICS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course is designed to provide an introductory course in group dynamics and group process for students who are not pursuing a professional degree in counseling nor intending to become professional counselors. It is primarily designed to increase students' awareness of the presence of group dynamics as they affect human interaction and to give students the experience of an awareness of how group dynamics operate to enhance or retard the learning process, effective communications and/or personal growth and development.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad HSU Basis

---
PSYED 2014 - STATISTICAL METHODS 1
Minimum Credits: 3
Maximum Credits: 3
Topics include frequency distributions, histograms, bar graphs, stem-and-leaf displays, boxplots, scatter diagrams, measures of central tendency, measures of variability, measures of relative position, correlation, regression, and introduction to sampling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 2015 - STATISTICAL METHODS 2
Minimum Credits: 3
Maximum Credits: 3
Continuation of PSYED 2014. Topics include point estimation, interval estimation, sampling distributions, one-sample and two-sample tests of hypothesis for means, variances, proportions, and correlation coefficients.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 2016 - STATISTICAL METHODS 3
Minimum Credits: 3
Maximum Credits: 3
Continuation of PSYED 2015. Topics include one- and two-way analysis of variance, multiple comparisons for main effects and interactions, analysis of covariance, multiple comparisons for adjusted means, and analysis of variance for randomized block designs, nested designs, repeated measures designs, non-orthogonal designs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 2017 - STATISTICAL METHODS 4
Minimum Credits: 3
Maximum Credits: 3
Topics include analysis of variance for nested designs, mixed designs, higher order factorial designs, and incomplete designs, analysis of variance for nonorthogonal designs, analysis of covariance for factorial designs and repeated measures designs, analysis of covariance with multiple covariates, and interpretation of computer output.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 2018 - STATISTICS 1
Minimum Credits: 3
Maximum Credits: 3
Introduction to descriptive and inferential statistics. Topics include frequency distributions, graphs, stem-and-leaf displays, boxplots, scatter diagrams, measures of central tendency, measures of variability, correlation, sampling distributions, point estimation, introduction to hypothesis testing, introduction to interval estimations, chi-square analysis, one-sample and two-sample tests of hypothesis for means, variances, proportions, and correlation coefficients.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2019 - STAT 2: ANALYSIS OF VARIANCE
Minimum Credits: 3
Maximum Credits: 3
Topics include one- and two-way analysis of variance, multiple comparisons for main effects and interactions, analysis of covariance, multiple comparisons for adjusted means, randomized block designs, nested designs, repeated measures designs, non-orthogonal designs and linear regression. SPSS for Windows will be used.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2018
**PSYED 2030 - EXPERIMENTAL DESIGN**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Topics include characteristics of experimental research, steps for implementing an experiment, internal and external validity, classification of experimental designs, and design techniques such as random sampling, random assignment, blocking, analysis of covariance, and gain scores.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: PSYED 2019

**PSYED 2072 - EDUCATIONAL/PSYCHOLGICAL MEASUREMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to basic principles of measurement and a survey of educational and psychological testing. Topics include the role of testing in decision-making, proper and improper uses of tests, test score interpretations (norm-referencing and criterion-referencing), ascertaining the validity and reliability of test scores and interpretations, classroom assessment and item analysis, and an overview of the different types of tests: standardized achievement and ability tests, intelligence tests, personality tests, and other non-cognitive tests (e.g. attitude surveys, interest inventories).  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: PSYED 2001 and (PSYED 2014 or PSYED 2018)

**PSYED 2073 - CONSTRUCTING ACHIEVEMENT/ABILITY TESTS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A basic course in the construction of measures of cognitive achievement and ability. Topics include test planning, item writing, test tryout, item analysis, reliability, validity, criterion-referencing, norm-referencing, item banking, and aptitude test design. Students write items, critique items written by others, construct tests, try out and revise tests, and develop test manuals to document the process of test development and the quality of their tests.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: PSYED 2001 and (PSYED 2014 or PSYED 2018)

**PSYED 2105 - PHYSIOLOGICAL BASIS OF BEHAVIOR**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with the standard topics in physiological psychology but adds a clinical perspective. The basic structure and function of the nervous system will be covered, and techniques for assessing disorders of the brain will be considered.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSYED 2106 - PSYCHOLOGY OF LEARNING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course surveys the field of learning and considers how classical questions have been addressed by particular theorists and schools within psychology. Questions concerning what is learned, how it is learned, what determines when we use old learnings in new situations, who are the "best" learners, are addressed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSYED 2107 - SURVEY OF DEVELOPMENTAL PSYCHOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course prepares students to understand individuals from a developmental perspective. The course covers development from the time of conception until the end of life. Physical, cognitive, emotional, and psychosocial processes are considered.
PSYED 2108 - SURVEY OF SOCIAL PSYCHOLOGY  
Minimum Credits: 3  
Maximum Credits: 3  
The course examines how human individuals influence each other's thoughts, feelings and behavior. The influences studied include culture, race, sex, group memberships and interpersonal action. Particular attention will be given to the school as a social institution, especially in an urban setting.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PSYED 2109 - PERSONALITY THEORY  
Minimum Credits: 3  
Maximum Credits: 3  
The course is designed: (a) to inform the student about the most important theories of personality; (b) to evaluate the claims, merits and shortcomings of each theory; (c) to consider implications for education, family life and childrearing, psychological treatment, and other human activities; (d) to acquaint students with relevant philosophy of science; (e) to assist students in formulating and revising the conceptual frameworks which they employ as psychologists and educators.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

PSYED 2110 - INTRODUCTION TO GROUP COUNSELING  
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide students with a basic understanding of group process from both a theoretical and experiential perspective. Major perspectives which provide the foundation for the contemporary practice of group counseling will be explored. Each theoretical perspective will be studied in terms of its key concepts, history, current status, and group applications. Students will also take part in a group process lab which will assist them in understanding group theories and the principles of group dynamics through an actual group experience.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PSYED 2111 - FAMILY SYSTEMS AND THERAPY 1  
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to develop in students an awareness of the theory and actuality of what occurs in families. Course activities focus on the dynamics of the family and a structural model of family systems change. Aspects of assessment and interviewing with families and parents/couples is covered through lecture, demonstration and role-play activities.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PSYED 2112 - DEVELOP OF EXCEPTIONAL CHILDREN  
Minimum Credits: 3  
Maximum Credits: 3  
This course provides an overview of the factors involved in the physical, emotional and cognitive development of exceptional children and youth. Topics include attitudes of parents, professionals and others toward exceptional children; special problems in the assessment of exceptional individuals; and the unique characteristics of exceptional children which affect normal development from infancy to adulthood.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PSYED 2113 - EMOTIONAL DISORDERS IN CHILDSHOOD  
Minimum Credits: 3  
Maximum Credits: 3
This course examines emotional and behavioral disorders of childhood and adolescence in terms of current conceptual models. Through an examination of current prevention, treatment, and intervention research, students develop an understanding of problems as well as principles of prevention, treatment and intervention. The format includes lectures, film illustrations, small group exercises, and case-based learning.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2120 - COUNSELING 1-SKILLS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course will include theoretical models of counseling; units on crisis intervention, family support and intervention, home based models of intervention, the reflective practitioner; and counseling skills for child and youth care practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2121 - COUNSELING 2-THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to explore some of the major theoretical perspectives which provide the foundation for the contemporary practice of counseling. Theoretical perspectives which embrace a number of different points of view such as 1) psychodynamic, 2) humanistic-existential, 3) cognitive-behavioral, 4) systems and family dynamics will be explored in depth and theories which represent each of these perspectives will be studied. Learning experiences which allow for observation of the practice of some of these approaches are included in the course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2122 - COUNSELING 3-INTERVENTIONS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Objectives of this course are to increase students' ability to apply counseling theory to some of the specific problems they will encounter in educational and clinical settings, to acquaint students with both conceptual models and intervention strategies, and to develop advanced skills in counseling through case discussion and presentations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2123 - ETHICAL ISSUES IN COUNSELING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to provide students in the counseling programs with knowledge of professional issues regarding their profession. Students are expected to reflect on and understand their own values; to be knowledgeable about their professional orientation; and to know when and how to make referrals. They are also expected to understand their relationship to other professions. Issues in certification and accreditation, selected moral and ethical/legal issues unique to specific counseling population; and current research in professional issues are also addressed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2124 - MULTI-CULTURAL COUNSELING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The objectives of this course are: 1) to develop a knowledge of culture and the cultural factors that influence counseling, 2) to develop an understanding of the values and attitudes which promote and inhibit counseling across cultures, 3) to develop a knowledge and understanding of issues related to counseling racial minorities, 4) to increase one's awareness of the causes and consequences of prejudice and discrimination, and 5) to broaden the counselor's repertoire of counseling skills effective with various racial and cultural minorities.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
PSYED 2127 - HUMAN LEARNING  
Minimum Credits: 3  
Maximum Credits: 3  
This course presents students with an understanding of various learning theories and their application in a wide variety of settings. Consideration is given to current research focusing on biological aspects of learning, classical and operant conditioning, social cognitive theory, information processing and selected cognitive concepts in learning.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PSYED 2141 - CHILD AND YOUTH WORK 1 - INTRO  
Minimum Credits: 3  
Maximum Credits: 3  
This course introduces contemporary issues in the vibrant and growing field of positive youth development. Our developmental-ecological perspective emphasizes both individual growth and the impact of systems on children and youth. Class topics include: settings where child and youth development occurs (e.g. community-based programs, religious and cultural institutions, residential treatment); the impact of popular media, social media, and other technology on youth development; and issues of diversity and privilege. We investigate efforts to support the development of thriving and other positive outcomes, as well as traditional prevention approaches. The course is benchmarked to the child and youth work competencies of the North American competency project and to the certification program of the child and youth care certification board, inc.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PSYED 2143 - CHILD YOUTH WRK 2: ADV ISSUES  
Minimum Credits: 3  
Maximum Credits: 3  
This course expands and deepens on themes introduced in Child and Youth Work I. Topics include the challenges of ecological approaches to learning and development; the roles of decision-makers at multiple levels (government, program directors, youth workers, youth themselves); and the benefits and challenges of youth-adult partnership approaches to child and youth work.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

PSYED 2190 - RES SEM IN PSYCH IN EDUC  
Minimum Credits: 3  
Maximum Credits: 3  
Research seminar for students in psychology in education.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

PSYED 2197 - INDEPENDENT STUDY  
Minimum Credits: 1  
Maximum Credits: 6  
Independent study for students in psychology in education.  
Academic Career: GRAD  
Course Component: Independent Study

PSYED 2201 - SEM IN ELEM AND SEC CNSLG
Minimum Credits: 3
Maximum Credits: 3
This course is designed for master's level school and educational counseling students, providing them with an understanding and appreciation of the specific professional issues currently faced by elementary, middle and secondary school counselors. The course will cover these areas: the development of school and educational counseling; organization, consultation and management of school counseling programs, counseling needs and presenting problems of elementary and secondary school students; use of computers, tests and inventories; and sources of referrals.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 2202 - SEM IN POST-SECONDARY COUNSLNG
Minimum Credits: 3
Maximum Credits: 3
This course includes an overview of the history of post-secondary education with particular focus on the student personnel function at this level and the role of the counselor in post-secondary education. Developmental models for direct service, program development, and consultation are reviewed and applied to case material and prototypical programs.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 2203 - ORGNZTNL INTRVN EDUC SETNGS
Minimum Credits: 3
Maximum Credits: 3
This course explores how the counselor can impact systems and organizational variables that affect client functioning. The counseling profession has come to realize that many behavioral and adjustment problems may not necessarily be self-generated by clients but may well have their bases in systems, organizations or groups that impact negatively upon the people within them. Course will focus on system concepts, methods of intervening, providing developmentally focused assistance, theories and principles of change, and various models of consultation and consultation practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2204 - ADV GRP INTRVN EDUC SETTINGS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students with an understanding and appreciation of group models and practice currently utilized within educational settings. Group counseling models - such as 1) theme-centered, 2) value clarification, 3) behavior modification, 4) reality therapy, 5) transactional analysis are studied. The learning experience will allow the student to develop a short-term group counseling program, including the program design, implementation strategies, evaluation procedures, and exploration or research possibilities within the field.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSYED 2205 - CAREER DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students in counseling & related fields with an overview of career guidance & counseling. History of career counseling & major perspectives of vocational choice theory are presented. Developmental perspective is highlighted as the framework for a systematic approach to the planning of program & counseling interventions. Career development programs for children, youth, & adults are presented. Planning & program models with individuals & groups are identified. Research & social issues pertinent to career counseling are explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2209 - ABNORML PSYCHOLOGY & COUNSLNG
Minimum Credits: 3
Maximum Credits: 3
This course focuses upon issues in abnormal psychology that are important for counselors practicing in schools and mental health settings. Specific topics of the course include the relationship between normal and abnormal behavior; differential diagnosis involving the DSM-IV; dynamics of major
disorders; and selected approaches to counseling with client's representative of different populations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSYED 2233 - COMMUNITY-BASED ACTION RES 1**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
**Academic Career:** GRAD

**PSYED 2250 - DYNAMICS OF THE CULTURAL PROCESS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides students in cross-cultural counseling with the opportunity to acquire a knowledge of the complex dynamics of the process known as culture. Three major areas are explored: (1) the phenomenon of culture as a challenge to human understanding, (2) the effects of culture upon individual development, and (3) the importance of an understanding of culture for the cross-cultural counselor.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2251 - CULTURAL ISSUES IN COUNSELING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores how cultural factors affect mental health. Attention is given to how cross-cultural counselors might appropriately intervene given the interplay between cultural factors and the mental health condition of the client. The course will focus on race, class and sex influences on mental health; social isolation, marginality, and status inconsistency; and mental health problems and coping mechanisms.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2252 - CROSS CULTURAL GROUP ISSUES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This multicultural counseling group course is designed to deal with morality, attitudes, and values with the underlying philosophy that the behavior of each individual spells out goals and objectives that deal with factual information, controversy inherent in stereotypes and prejudice, and the basic need for self-esteem. Goals and objectives for the class are both affective and cognitive and will begin with a focus on the individual's concept of self and expand to the understanding of other world issues and problems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2253 - FDS COM CNSL CROSS-CULTL SET**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this seminar is to provide graduate students in the cross-cultural counseling program with an opportunity to integrate knowledge from various perspectives. Counseling theories, models, counselor roles, functions and accountability practices appropriate for the cross-cultural setting are emphasized.  
**Academic Career:** GRAD  
**Course Component:** Seminar

**PSYED 2261 - ADOLESCENT DEVELOPMENT 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The adolescent development course sequence for teacher education students covers developmental pathways from middle childhood through adolescence across multiple contexts (e.g. individual, family, peers, school, community, and cultural) and the important considerations and
relationships in these contexts. This first course in the sequence for teacher education students focuses on the importance of and considerations for forming authentic, meaningful relationships with all adolescents and the vital role such relationships play in promoting positive outcomes. Students will learn about developmental theories and concepts that are important in forming such relationships and will apply the concepts in their work with adolescents in educational settings. Key developmental tasks for adolescents are introduced in the context of understanding adolescent thinking and behavior. In addition to reading about development from a variety of sources, students will have the opportunity to apply the new information in their practice settings.

**PSYED 2263 - ADOLESCENT DEVELOPMENT 3**
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- **The adolescent development course sequence for teacher education students covers developmental pathways from middle childhood through adolescence across multiple contexts (e.g. individual, family, peers, school, community, and cultural) and the important considerations and relationships in these contexts. This class is the third course in the sequence for teacher education students. The course focuses on the nature and types of atypical development, especially as they relate to educational settings. Topics covered include learning, emotional, developmental, and behavioral disabilities, as well as psychological difficulties, with a continuing focus on the importance of positive relationships and the particularly vital role such relationships play in promoting positive outcomes for youth with disabilities. Students will learn about the ways in which "typical" development is impacted by a disability and the potential implications of these impacts on adolescents' educational, social, and psychological functioning and development. Using a developmental framework, students will analyze and evaluate current interventions and/or teaching methods and apply knowledge of development to improve these approaches. Students will have the opportunity to apply the concepts in their work with adolescents in applied settings.**

**PSYED 2289 - SPECIAL TOPICS EDUC CNSLG**
Minimum Credits: 1  
Maximum Credits: 3  
This course is designed to enable students in educational counseling to focus their studies upon special programs or issues in the field as they arise. Topics of the seminar will vary, permitting faculty and students to focus upon areas of their special interests or upon unique areas crucial to the field.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**PSYED 2291 - SUPRVS D RES IN EDUC CNSLG**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will allow students in educational counseling to pursue their own independent or collaborative research projects under the supervision of a faculty member.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad SN Basis

**PSYED 2292 - COUNSELING PRACTICUM**  
Minimum Credits: 2  
Maximum Credits: 2  
This practicum provides for the development of basic individual counseling skills. The practicum provides an opportunity to perform, on a limited basis, some of the counseling activities that a regularly employed staff member in the field setting would be expected to perform. During the practicum experience, the student receives supervision from a professional staff member at the field site; group supervision from program faculty; and individual supervision from members of the program faculty.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis

**PSYED 2295 - INDIVIDUAL CNSL SUPERVISION**  
Minimum Credits: 1  
Maximum Credits: 1  
Through this course, students receive intensive individual supervision of their counseling practice from a member of the program faculty.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis

**PSYED 2296 - INTERNSHIP IN SCHOOL CNSLNG**  
Minimum Credits: 1  
Maximum Credits: 6  
In this course, advanced students in educational counseling who have successfully completed the practicum experience serve as counseling interns in the pupil personnel services of cooperating school districts. Interns are expected to perform the same range of duties that are performed by professional school counselors.  
Academic Career: GRAD  
Course Component: Internship  
Grade Component: Grad HSU Basis

**PSYED 2298 - DIR STUDY IN SCHOOL COUNSELING**  
Minimum Credits: 1  
Maximum Credits: 3  
In this course, students pursue their study of special problems or issues in the field of educational counseling under the direction of a faculty member.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

**PSYED 2299 - THESIS RES IN SCHOOL CNSLNG**  
Minimum Credits: 1  
Maximum Credits: 9  
In this course, students in educational counseling who are pursuing the master of arts degree investigate the research problem which culminates in
their master's thesis.

**Academic Career:** GRAD
**Course Component:** Thesis Research
**Grade Component:** Grad SN Basis

**PSYED 2301 - FOUNDATIONS OF REHABILITATION**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course provides an overview of the field of rehabilitation for students in rehabilitation counseling and related fields. Students are introduced to the history, philosophy, and legislation of the rehabilitation movement in the United States; the basic concepts of rehabilitation; and the major steps in the rehabilitation process. Current trends and issues in rehabilitation and rehabilitation counseling are also discussed.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 2302 - MEDL/PSYCHLGCL ASPCTS OF DISAB**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

The purpose of this course is to provide basic information concerning the medical and psychological aspects of selected physical and mental disabilities commonly seen in rehabilitation clients. The limitations imposed by specific disabilities and the implications for vocational rehabilitation are discussed.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 2303 - VOCATIONAL ASSESSMENT IN REHAB**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This is a practitioner oriented course. It emphasizes a multifaceted approach to helping persons to obtain understanding of themselves and their environment. Topics covered include: assessment in the interviews, behavioral assessment, principles underlying testing of rehabilitation clients, and program evaluation.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 2304 - COMMUNITY PROGRAMS IN REHAB**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

In this course students become knowledgeable about the major systems for the delivery of rehabilitation services to disabled and handicapped persons, and about local community agencies that deliver those services. Students learn to utilize appropriate community resources for the rehabilitation client. The course consists of a series of presentations at rehabilitation agencies and classes at the university.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 2305 - VOCATIONAL REHAB AND PLACEMENT**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

In this course students study the basic parts of the vocational rehabilitation process: vocational counseling and coordination, vocational evaluation, work adjustment, and placement. The emphasis is on what a rehabilitation counselor should know and be able to do to enable a person to solve vocational problems, and to obtain optimal vocational attainment.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 2306 - SEM ALCHOL PROB REHABILITATION**
- **Minimum Credits:** 3
- **Maximum Credits:** 3
This course surveys the alcoholism field and addresses epidemiological, historical, social and clinical aspects of the disorder. Issues concerning diagnosis, treatment and prevention are addressed from the perspectives of current clinical and research literatures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2307 - PSYCHOPATHOLOGY AND ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
The objectives of this course are to provide training in the skills and knowledge areas essential to the support of people with long term mental illness in employment, including the functional implications of psychiatric diagnoses, the utilization of information obtained from assessment procedures, career counseling, job development, placement, and retention and an understanding of culturally diverse ethnic groups. Training will be provided also in VR/MH and service provider interagency collaboration.

PSYED 2316 - ADP PROFESSIONAL SEMINAR 1
Minimum Credits: 1
Maximum Credits: 1
This course, taken concurrently with Community-Cased Practice Learning I, engages students across all specializations in their practice learning placements. The ADP professional seminar will develop students' sense of identity as an applied developmental scientist and will help them to actively develop professional ethics and standards in this process. As part of the ADP professional seminar, students will collaborate with faculty, agency supervisor, and master student colleagues to progress with completion of the master's written capstone project.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 2317 - ADP PROFESSIONAL SEMINAR 2
Minimum Credits: 1
Maximum Credits: 1
This course, taken concurrently with community-based practice learning ii, engages students across all specializations in their practice learning placements. The ADP professional seminar will develop students' sense of identity as an applied developmental scientist and will help them to actively develop professional ethics and standards in this process. As part of the ADP professional seminar, students will collaborate with faculty, agency supervisor, and master student colleagues to progress with completion of the master's written capstone project.

Academic Career: GRAD
PSYED 2349 - CHILD LIFE PRACTICE HOSPITALS
Minimum Credits: 3
Maximum Credits: 3
This seminar identifies important concepts and practices to working as child life specialists in medical/hospital settings. Given the complex interdisciplinary nature of the child life specialist's role, and the need for ongoing consultation and collaboration with a variety of professionals involved in a child's care, this course will cover a range of practical and professional topics. These topics include family coping strategies, hospital policies and practices (e.g. charting, notes, supervision, etc.), death and dying, medical terminology, and interdisciplinary consultation and communication. Students will gain an understanding of the theories and concepts underlying practices, the necessary and important day-to-day practices in hospital settings, and strategies for successful collaborations with medical professionals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2391 - SUPRVSD RES IN REHAB CNSLG
Minimum Credits: 3
Maximum Credits: 3
This course will allow students in rehabilitation counseling to pursue their own independent or collaborative research projects under the supervision of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

PSYED 2392 - PRACT IN REHAB CNSLG
Minimum Credits: 1
Maximum Credits: 6
Students enrolled in the practicum in rehabilitation counseling have their practicum experience in selected rehabilitation counseling agencies. The student's work is supervised by a staff member at the agency and by faculty in the rehabilitation counseling program.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 2393 - PRACT IN REHAB CNSLG
Minimum Credits: 1
Maximum Credits: 6
Students enrolled in the practicum in rehabilitation counseling have their practicum experience in selected rehabilitation counseling agencies. The student's work is supervised by a staff member at the agency and by faculty in the rehabilitation counseling program. Students are expected to function at a higher level than was expected in Practicum 1.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 2396 - INTERNSHIP IN REHAB COUNSELING
Minimum Credits: 1
Maximum Credits: 6
In this course, advanced students in rehabilitation counseling who have successfully completed the practicum experience serve as counseling interns in selected rehabilitation agencies. Interns are expected to perform the same range of duties that are performed by professional rehabilitation counselors.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

PSYED 2397 - INTRNSHIP IN PSYCHIATRIC REHAB
Minimum Credits: 1
Maximum Credits: 6
In this course, advanced students in rehabilitation counseling who have successfully completed the practicum experience serve as counseling interns.
in selected rehabilitation agencies. Interns are expected to perform the same range of duties that are performed by professional rehabilitation counselors.

**Academic Career:** GRAD  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis

**PSYED 2398 - DIRECTED STUDY IN REHAB CNSLG**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
In this course, students pursue their study of special problems or issues in the field of rehabilitation counseling under the direction of a faculty member.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**PSYED 2399 - THESIS RESEARCH IN REHAB CNSLG**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
In this course, students in rehabilitation counseling who are pursuing the master of arts degree investigate the research problem which culminates in their master's thesis.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**PSYED 2410 - APPLIED REGRESSION ANALYSIS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Study of topics related to simple and multiple linear regression, including model specification and assumptions, methods of estimation, significance tests of model parameters and various types of multiple regression and predictor-selection techniques. The relationship of partial and semi partial correlation to regression is covered as well as the use of interaction terms and dummy variables in regression. SPSS and SAS are used to illustrate the correct interpretation of regression results.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**Course Requirements:**  
**PREQ:** PSYED 2410 and PSYED 2422

**PSYED 2422 - DATA ANAL USING CMPTR PACKAGES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introductory course in using SPSS and SAS for data analysis. The course focuses on quantitative methods where specific attributes or variables are measured according to different scales of measurement. Statistical procedures are then applied to study relationships between the variables. The course addresses all stages to data analysis: reviewing research questions and identifying variables of interest; reviewing protocols used to collect data; coding data and creating data codebooks; reading data, screening data, transforming data, and performing file manipulations; and analyzing data using descriptive and basic inferential methods.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**Course Requirements:**  
**PREQ:** PSYED 2001 and (PSYED 2014 or PSYED 2018)
PSYED 2490 - SUPERVISED RESEARCH IN ADP
Minimum Credits: 1
Maximum Credits: 18
The student demonstrates ability to apply research skills by planning and completing a research project under direction of an appropriate faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PSYED 2491 - SUPERVISED RSRCH IN RES M ETH
Minimum Credits: 1
Maximum Credits: 9
The student demonstrates ability to apply research skills by planning and completing a research project under the guidance of an appropriate faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

PSYED 2494 - M.A. PROJECT IN RSRCH METHDLGY
Minimum Credits: 1
Maximum Credits: 9
Student prepares a library-based research paper that reviews, organizes, synthesizes, and critiques previously conducted research and scholarly discussion pertaining to quantitative research methodological issues and/or techniques in the areas of statistics, research design, and/or measurement.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PSYED 2498 - DIRECTED STUDY IN RES M ETH
Minimum Credits: 1
Maximum Credits: 3
Student pursues study of various topics under the direction of faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PSYED 2499 - THESIS RES IN RSRCH METHODOLOGY
Minimum Credits: 1
Maximum Credits: 9
Under the guidance of the thesis advisor, the student plans and completes a theoretical or empirical study on a quantitative research methodology topic and prepares a thesis in the form stipulated in the university style and form manual.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PSYED 2502 - SCHOLARLY PAPER
Minimum Credits: 1
Maximum Credits: 3
Preparation of a paper with format, content, and quality appropriate for publication in a professional journal. The paper is prepared with the assistance of a faculty mentor and must be reviewed and approved by the faculty reader designated by the program in child development/child care.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

PSYED 2503 - DVLP: CONCPTN THRGH ERLY CHLHD
Minimum Credits: 3
Maximum Credits: 3
Focuses on developmental pathways from conception through early childhood within contexts of family, daycare/school, community and culture. Pathways are considered with regard to developmental changes in transactions between individuals and social life conditions, with focus on patterns of change in participation in social-cultural practices. Besides a review of current literature, students will be engaged in qualitative investigations of the social lives of young children.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Course focuses on developmental pathways from middle childhood through adolescence (ages 7-18) within the contexts of family, school, community and culture. Pathways are considered in regard to developmental changes in transactions between individuals and social life conditions, with regard to patterns of change in participation in social cultural practices. Students will be engaged in qualitative investigations of the social lives of children and adolescents.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Psychology in Education (MS or PHD)

**PSYED 2505 - DVLP PATHWAYS: A SERVICE MODEL**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

A contextual approach toward understanding children, youth, and families as their developmental pathways are influenced by various systems including mental health systems, child welfare system, school systems, judicial systems, and community contexts. Microcultural systems analysis combined with case study will provide a basis for understanding a variety of developmental pathways.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**PSYED 2506 - PSYCHLGCL DVLP MATUR & OLD AGE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Studies age-related physical, psychomotor, cognitive, and affective changes in maturity and old age from a life span development perspective. Recent research findings and issues related to studying aging are stressed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2510 - ASSMNT CHLD DVLP REAL WRLD**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

The course is intended for interdisciplinary graduate students (masters and doctoral) from such programs as applied developmental psychology, developmental psychology, social work, early childhood special education, health and rehabilitation sciences, and nursing. The course content and applied group activities will help prepare graduate students as emerging leaders to understand ‘best practices’ in the measurement of both children’s development and the quality and impact of services and interventions that are applied to them and to their families. These ‘best practices’ are both professionally sanctioned by the major national early childhood professional organizations and many also have a research evidence-base that supports their use. Thus, this course will help students to understand and use various applied assessment strategies that can: (1) describe the development and progress of children (birth to adulthood) and families in functional ways; (2) sensitively monitor children's progress in intervention programs; (3) be applied by teachers and other direct care professionals; (4) collect evidence of children's daily functioning in natural everyday settings; (5) be selected to conduct applied program evaluation research for schools, agencies, and human service programs; and (6) document the impact and outcomes of intervention programs. The course will help students who are interventionists, but is not primarily clinical in orientation. Rather, it is designed to prepare future leaders-researchers, program administrators, program evaluators, and policy specialists-in best practices and their implications. It is a required course in the ADP MS course sequence.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**PSYED 2511 - CHILD BIRTH-5 FAMILY & CULTURE**
Minimum Credits: 3
Maximum Credits: 3
Basic course in the dynamics of human development during the first five years of life. Content includes patterns of growth, both physical and psychological, the interaction of these patterns with the environment, especially family relationships, and subcultural variations.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

PSYED 2512 - CHILD 6-12 FAMILY AND CULTURE  
Minimum Credits: 3  
Maximum Credits: 3  
Normative and behavioral characteristics of children between the ages of six and twelve years are examined in light of theoretical formulations of the psychodynamics of personality development, including basic developmental tasks of the period. Topics include: normative and behavioral characteristics of the period, both physical and psychological, function of play and peer relationships, subcultural variations. Some attention is given to common deviations.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

PSYED 2514 - ACTIVTY & ENVIRMNTL PLANNG 1  
Minimum Credits: 3  
Maximum Credits: 3  
A study of the theoretical rationale for activity and environmental programming, its relationship to the development of children and youth and its therapeutic implications.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

PSYED 2515 - ACTIVTY & ENVIRMNTL PLANNG 2  
Minimum Credits: 3  
Maximum Credits: 3  
Continuation of PSYED 2514.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  

PSYED 2516 - DEVELP CURRICULUM & ACTIVITIES  
Minimum Credits: 3  
Maximum Credits: 3  
Study of the theoretical rationale for activity and environmental programming; its relationship to the development of children and youth; and practical applications in media selection, use, and environmental design for various populations.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  

PSYED 2517 - CONTEM ISS CHILD FMLY: BIRTH-6  
Minimum Credits: 3  
Maximum Credits: 3  
Topics such as day care, child and adolescent abuse, mother hood, and assessment of high-risk infants will be considered as they pertain to public health.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  

PSYED 2519 - QUALTV METHODS: PARTCPNT OBSRV  
Minimum Credits: 3  
Maximum Credits: 3  
This research methods course introduces one of the main methods of qualitative research participant observation. Special attention is paid to the
naturalistic study of child and youth development in context. Students will gain competence in key areas of ethnographic research including: establishing access to a site, writing ethnographic field notes capable of supporting rigorous research, articulating research questions, determining a unit of analysis, developing conceptual categories, coding, and writing up findings. Students conduct seven weeks of fieldwork in order to complete a pilot study of their choosing. Please note that the use of data analysis software such as NVIVO and ALTAS/TI is not permitted.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2520 - COUNSELING 1-SKILLS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will include theoretical models of counseling; units on crisis intervention, family support and intervention, home based models of support and intervention, the reflective practitioner; and counseling skills for child and youth care practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2521 - THRY MEANG PRA PLAY & ACTIVTY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a comprehensive overview of the role of play and activity in human development, with a particular focus on ways of utilizing play and activity to promote positive growth in social, emotional, physical, and cognitive domains; and on interpreting the meaning of individual and group play and activity. Play and activity in the lives of persons of all ages will be considered with some emphasis on the early and school years. While academic learning is essential in this course, the focus will be on hands-on, real play as the ideal way to learn about it, and encouragement of a life-long playful spirit.

**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2522 - CHLD ABUSE/NEGLECT:PRGM DEVELP**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course focuses on the conceptualization, design and implementation of therapeutic and developmental interventions that focus on child abuse and neglect. Coverage includes identification of those developmental and systematic factors that contribute towards abuse and neglect and that can be appropriately addressed by programming interventions; and on programmatic philosophies and strategies that serve a preventive/interventive function.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2523 - CHLD ABUSE & NEGLECT: FLD ANAL**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This interdisciplinary seminar will accompany the supervised experiences students will have either in direct clinical work or research in settings dealing with child abuse and neglected children and their parents. The course will be co-taught by instructors with expertise in clinical work with children and parents in research in the area of child abuse and neglect.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**PSYED 2524 - BEHAVIORAL ASESMENT & INTRVNTN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course helps graduate students respond to the needs of K-12 students with emotional and behavioral problems in school settings. These problems include disruptive, oppositional and aggressive behaviors, limited interpersonal and study skills, and behaviors caused by learning difficulties, mental illness and stressful life events. The emphasis of the course is on research-based positive behavioral supports and interventions. In addition, students learn consulting strategies to assist those who teach challenging youth.

**Academic Career:** GRAD
PSYED 2528 - ADOLESCENT-FAMILY AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
A course dealing primarily with normal adolescent development. Theory and research are examined in an attempt to understand adolescence from a psychological and cultural point of view. There is also emphasis on helping the student relate more effectively with the adolescent and his/her family. Some attention is given to physical development and common psychological deviations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2530 - ADP: PROFSSNL IDENY & LEADRSHP
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce the field of applied developmental psychology (ADP). This course focuses on helping students to develop a professional identity, ethical reasoning skills, and leadership skills that align with ADP. Students will gain knowledge of the overall field, reading an advanced textbook and related literature, while getting to know how developmental thinking is being applied in our local community of practice. Attention will focus on the relations and partnerships that are necessary for the development, implementation, and evaluation of programs and policies that effectively support the positive biopsychosocial & spiritual development of children and youth in contexts of their families, schools and communities. The course introduces students to local experts who apply developmental thinking in different systems of practice, including education, juvenile justice, child welfare, and behavioral health. In this process, students will frame their own professional development, considering their goals in relation to needed competencies and opportunities in the field, and think critically about ethical principles and their applications.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2532 - PSYCHOSOCIAL ASPCTS OF ILLNESS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to enable students to understand the nature of and dynamics of pediatric illness, appreciate the impact an acute or prolonged health care experience may have upon children throughout the developmental process, better understand a family health care philosophy and gain an understanding of the multi-faceted role child life specialists play in today's health care environment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PSYED 2534 - COMMNCTN SKILL PROFESSNL DVLP
Minimum Credits: 3
Maximum Credits: 3
One half of this course deals with effective communication skills for clinicians to use in working with clients and the other half, with fundamental skills involved in communicating with other professionals, agencies, and systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2538 - ADVANCED COUNSELING SKILLS
Minimum Credits: 3
Maximum Credits: 3
Course will teach indirect communication techniques, methods for dealing with secondary gains, methods to help clients develop a sense of empowerment and the therapeutic use of visual imagery. The course will emphasize hands-on practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: PSYED 2520

PSYED 2540 - METHODS & PRACTICES OF ADP RES
This course is designed to introduce students to ways of thinking like an applied developmental psychologist. This class teaches the fundamentals of how to investigate applied developmental questions, from how to read scholarly articles, why and how to connect research and practice, and how to begin to explore questions relevant to both students' own specific applied developmental interests and the field at large. To these ends students will study text on how to think and know in ADP, as well as participate in activities to develop practical investigative skills.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Psychology in Education (MA or MS or PHD)

**PSYED 2542 - EBIS IN REAL WORLD CONTEXTS I**  
Minimum Credits: 3  
Maximum Credits: 3  
Evidence-based interventions (EBIS) are the foundation of effective and high-quality prevention and intervention programs in education, human services, and healthcare. Both pre-service and continuing education of interdisciplinary professionals must emphasize the acquisition of knowledge and applied competencies about diverse ebis in this continuously evolving area. Many forms of prevention and intervention are used in education, human services, and healthcare, but few such practices have 'practice-based evidence' conducted in real-world settings which validate their continued use. Thus, in this course, students will gain knowledge and skills in evidence-based contextual and individual interventions, their content, methodology, implementation, and evaluation. The course will help students who are interventionists but is not primarily clinical in orientation. Rather, it is designed to prepare future leaders’ practitioners, researchers, program administrators/directors, program evaluators, and policy specialists - in best practices and their implications.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2543 - EBIS IN REAL WORLD CONTEXTS 2**  
Minimum Credits: 3  
Maximum Credits: 3  
Evidence-based interventions (EBIS) are the foundation of effective and high-quality prevention and intervention programs in education, human services, and healthcare. In this second part of a 2-course sequence, students will: learn about and apply qualitative and quantitative data-based decision-making techniques and measures to collect evidence of child/youth daily performance and to assess the dimensions of various home, school, and community contexts which hinder or promote progress; create EBI plans for individuals and groups to promote progress in real-world settings; apply a short-term EBI in a real-life case situation; and evaluate the quality, impact, or outcomes of the data-based decision making methods and process.

**Academic Career:** GRAD  
**Course Component:** Lecture

**PSYED 2549 - SUPRVSN ADM CHLD YOUTH WORK**  
Minimum Credits: 3  
Maximum Credits: 3  
This course is focused on issues and skill development in areas of supervision and administration relevant to effective staff development and management of child and youth care programs. Among the topics covered will be organizational dynamics and design; goal setting; handling conflict, team work, giving feedback, performance evaluation, staff training, budgeting, and fund raising and marketing.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**PSYED 2550 - HUMAN DIVERSITY PROFSSNL ENVRN**  
Minimum Credits: 3  
Maximum Credits: 3  
Offers theoretical, research and experiential understanding of human development in a multicultural society. Examination of diversity will focus on age, gender, race, ethnicity, class, religion and disability. Students will identify specific problems related to the management of diversity in the professional environment and design a proposal for ameliorating the specific problem chosen.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
PSYED 2551 - SEM SUPERVISION & ADMINSTRTN
Minimum Credits: 2
Maximum Credits: 2
An overview of key issues and skill areas in administering and supervising child care services today such as demographic needs, public policy, strategic planning, staff development, and leadership development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 2553 - SEMINAR IN CHILD/YOUTH CARE
Minimum Credits: 2
Maximum Credits: 2
Examination of theory, research and practice of child and youth care work with special needs school-aged children and adolescents.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 2557 - COGNITIVE-BEHAVIOR THERAPY
Minimum Credits: 3
Maximum Credits: 3
This course introduces the theory and practices of cognitive-behavioral therapy (CBT) to help students develop a basic therapeutic skill set. The CBT approach applies to a variety of clinical problems and practice settings. CBT is a flexible approach and is used in diverse settings such as inpatient, outpatient and partial hospital programs as well as in schools and community-based programs. Students will learn about how CBT may be used to address issues such as depression, anxiety, attention-deficit/hyperactivity disorder, and other emotional and behavioral disorders. In addition to clinical practice, many people find the principles of the cognitive-behavioral model useful in maintaining a healthy emotional outlook in their own lives. This course will emphasize both theory and practice of cognitive-behavioral skills.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2560 - PROF SEM SCH-BASD BHVRL HLTH
Minimum Credits: 3
Maximum Credits: 3
This course addresses critical contemporary issues in designing, implementing, and evaluating school-based behavioral health programs and services. Through a partnership with experienced mentors practicing in the field of school-based behavioral health, students will create new resources that reflect best practices. Using in-class and on-line discussions, problem-based learning, and simulations, students will explore real-life situations they are likely to encounter in future supervisory and administrative positions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2562 - PLAY THERAPY AND FIELD WORK
Minimum Credits: 3
Maximum Credits: 3
Supervised experience in direct interaction with children on an individual basis in play interviews with concomitant consideration of children's developmental dynamics as revealed in a one-to-one relationship. An ongoing weekly seminar is a part of the course.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2503 and PSYED 2520

PSYED 2563 - OVERVIEW OF CHILD DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
An intensive examination of current knowledge about the processes and characteristics of normal child development, encompassing social, personality, cognitive and emotional development from birth through adolescence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
PSYED 2564 - CURRNT THEORY RES IN CHLD DVLP
Minimum Credits: 3
Maximum Credits: 3
An up-to-date review of the theories and research which guide current understanding and practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2565 - PROGRAM DESIGN AND EVALUATION
Minimum Credits: 3
Maximum Credits: 3
An integration of child development theory and research in the design of programs for children, youth, and families. Focus is on skills in designing developmentally appropriate and interventive programs, structure of service models, and program evaluation. The major paper for the graduate program will be part of this course's requirements.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2540

PSYED 2567 - PROFESSIONAL LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
Professional leadership focuses on empowering practitioners in applied developmental psychology, education, and related human service professions to use a knowledge base to recognize and develop their leadership potential, to identify and solve professional problems and issues, and to have the knowledge background, thinking, and practical skills to enable them to function in leadership positions. The course will be divided into three sections designed to address specific areas pertinent to leadership: leadership theory, leadership thinking, and leadership applications. Applications include effective personal presentation and specific leadership skills, such as strategic planning, marketing, and grantsmanship.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 2568 - TOPICS IN CHILD DEVELOPMENT
Minimum Credits: 1
Maximum Credits: 3
A highly focused consideration of a selected topic related to the field of child development and child care.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

PSYED 2588 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
This advanced course focuses on selected topical areas of special importance for child care and child development. Each time it is offered a different topic is addressed from theoretical, research, intervention, and professional practice perspectives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2590 - MASTER'S RESEARCH TEAM
Minimum Credits: 1
Maximum Credits: 1
This weekly course is designed for students who are pursuing a research project as their option for their master's program. Topics include discussions and hands-on support for how to design, conduct and write-up results for a research project.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
PSYED 2596 - INTERNSHIP IN ADP
Minimum Credits: 1
Maximum Credits: 6
A university-approved agency based supervised internship in developmental/interventive practice with and/or for children, youth and families.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 2598 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
Directed study provides an opportunity for focused work with faculty supervision. The student must present a plan for the independent study for approval by the supervising faculty member prior to registration for the course.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

PSYED 2599 - THESIS
Minimum Credits: 1
Maximum Credits: 6
Designed to help the student to carry out his or her research or creative project and to write an acceptable thesis. This course is subject to repeated registration.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PSYED 2605 - CHILD YOUTH CARE BASIC COURSE
Minimum Credits: 3
Maximum Credits: 3
This strategy-based course, offered in partnership with the Allegheny partners for out-of-school time (APOST) of the united way, is attended by both University students and local youth workers. Hands-on, interactive sessions introduce essential concepts and skills in professional child and youth care, geared towards settings including early childhood education, after-school programming, foster parenting, residential treatment, basic care, emergency shelters, recreation, corrections, community youth services, and developmental disabilities. The course prepares participants for child and youth care certification with topics such as professional ethics, assessment, developmentally-based programming, and activity development. University students taking this course for credit will complete reading and writing assignments to accompany the practice-focused sessions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2622 - CHILD LIFE PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
Credits for approved hospital-based child life practicum experience.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 2632 - APPLIED RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
This introductory methods seminar focuses on applied research design including developing conceptual definitions, applying models of theory testing and theory building, and developing relevant policy and practice research questions. This course will cover key debates occurring in the field of applied research in terms of producing evidence to support policy, practice, and program development, and is designed to encourage practical skill development; experiential learning opportunities are integrated into course content. Students will gain an understanding of applied research design and an improved skill set in proposing, designing, and evaluating applied studies of interventions and programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
PSYED 2709 - ADV SEMINAR FAMILY & DISABLTY
Minimum Credits: 3
Maximum Credits: 3
This course will explore the many aspects of family life when a disabled child or adult is present. The aims of the course are to examine theory, research and intervention strategies relevant to families with a disabled member.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2722 - CHILD LIFE INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
Credits for approved hospital-based child life internship placement.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

PSYED 2765 - COMNY-BASED PRA LEARNING 1
Minimum Credits: 2
Maximum Credits: 2
This course provides students with the opportunity to participate in an individual community-based practice learning experience with a partner agency. As part of the placement, students engage in activities that lead to the production of an agreed-upon, tangible product to meet an identified need for the agency. This product will also meet the requirements for the student written capstone project for the master's program and will serve as the presentation topic for the master's comprehensive exam. This course is taken concurrently with the ADP Professional Seminar I & II.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2766 - COMNY-BASED PRA LEARNING 2
Minimum Credits: 2
Maximum Credits: 2
This course provides students with the opportunity to participate in an individual community-based practice learning experience with a partner agency. As part of the placement, students engage in activities that lead to the production of an agreed-upon, tangible product to meet an identified need for the agency. This product will also meet the requirements for the student written capstone project for the master's program and will serve as the presentation topic for the master's comprehensive exam. This course is taken concurrently with the ADP Professional Seminar 1 & 2.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 2892 - PRACT IN CROSS-CULTURAL CNSL
Minimum Credits: 2
Maximum Credits: 2
This practicum provides for the development of basic individual counseling skills. The practicum provides an opportunity to perform, on a limited basis, some of the counseling activities that a regularly employed staff member in a multi-cultural or cross-cultural field setting would be expected to perform. During the practicum experience, the student receives supervision from a professional staff member at the field site, group supervision from program faculty, and individual supervision from members of the program faculty.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 2896 - INTERN IN CROSS-CULTURAL CNSLG
Minimum Credits: 1
Maximum Credits: 6
In this course, advanced students in cross-cultural counseling who have successfully completed the practicum experience serve as counseling interns in agencies which provide counseling services for diverse cultural populations. Interns are expected to perform the same range of duties that are performed by counselors regularly employed by these agencies.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

**PSYED 2898 - DIR STUDY IN CROS-CULTRL CNSL**
Minimum Credits: 1
Maximum Credits: 3
In this course, students pursue their study of special problems or issues in the field of cross-cultural counseling under the direction of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

**PSYED 2899 - THEESIS RES CROSS-CULTRL CNSLG**
Minimum Credits: 1
Maximum Credits: 18
In this course, students in cross-cultural counseling who are pursuing the master of arts degree investigate the research problem which culminates in their master's thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

**PSYED 2992 - PRACT STUDENT PERSONNEL SERVS**
Minimum Credits: 2
Maximum Credits: 2
This practicum provides for the development of basic individual counseling skills. The practicum provides an opportunity for the student to perform, on a limited basis, some of the counseling activities that a regularly employed staff member in the field setting would be expected to perform, during the practicum experience, the student receives super vision from a professional staff member at the field site, group supervision from program faculty, and individual supervision from members of the program faculty.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

**PSYED 2996 - INTERN STUDENT PERSONNEL SERVS**
Minimum Credits: 1
Maximum Credits: 6
In this course, advanced students in student personnel services who have successfully completed the practicum experience serve as counseling interns in the student personnel services programs of various colleges, universities, and other institutions at the post-secondary level. Interns are expected to perform the same range of duties that are performed by counselors who are regular staff members of the student services program which serves as the field placement.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

**PSYED 2998 - DIR STUDY STDNT PERSNNL SERVS**
Minimum Credits: 1
Maximum Credits: 3
In this course, students pursue their study of special problems or issues in the field of student personnel services under the direction of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

**PSYED 2999 - THEESIS RES STDNT PERSNNL SERVS**
Minimum Credits: 1
Maximum Credits: 18
In this course, students in student personnel services who are pursuing the master of arts degree investigate the research problem which culminates in their master's thesis.
Academic Career: GRAD
PSYED 3030 - QUASI-EXPERIMENTAL DESIGN
Minimum Credits: 3
Maximum Credits: 3
Topics include characteristics of quasi-experimentation, classification of quasi-experimental designs, nonequivalent control group designs, interrupted time-series designs, statistical analysis of data from quasi experimental designs, and design techniques such as matching and ancova.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3031 - PREPARING RES & DISSER PROPSLS
Minimum Credits: 3
Maximum Credits: 3
Methodological and substantive issues in (1) conceptualizing a research problem, (2) analyzing and synthesizing empirical literature, and (3) designing a study, are utilized to aid students in understanding the inquiry process. The relative importance of measurement, research design, and statistical considerations in various types of studies are discussed to show their relationship to theoretical and substantive considerations in doing educational research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3099 - DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 18
Student plans and completes a doctoral dissertation under the guidance of the dissertation advisor.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PSYED 3101 - PSYCHOLOGICAL ASSESSMENT 1
Minimum Credits: 3
Maximum Credits: 3
This course is designed to assist the student in developing competency in the administration, scoring, and interpretation of individual intelligence tests. The emphasis is on Stanford-Binet and Wechsler tests.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3102 - PSYCHOLOGICAL ASSESSMENT 2
Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize the student with the administration, analysis and interpretation of personality assessment techniques. Standardized psychometric instruments, including rating scales and inventories, interviews, and projective techniques are among the techniques reviewed. The purpose is to help the student develop an understanding of the person through the assessment process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PSYED 3190 - RES SEM IN PSYCHOLOGY IN EDUC
Minimum Credits: 3
Maximum Credits: 3
Advanced seminar in research for doctoral students in psychology in education.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
PSYED 3197 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Independent study for doctoral students in psychology in education.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

PSYED 3400 - MATH FOR MULTIVARIATE METHODS
Minimum Credits: 3
Maximum Credits: 3
Coverage of the mathematical tools necessary for the development of multivariate statistical methods and linear models including the statistics analytical system (SAS) and Matlab. Topic covered include vector and matrix algebra; vector spaces, basic matrix operations, linear equations, and generalized inverses, latent roots and vectors, quadratic forms, and matrix differentiation. SAS IML for windows and Matlab will be used.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2016 or PSYED 2019

PSYED 3408 - HIERARCHICAL LINEAR MODELING
Minimum Credits: 3
Maximum Credits: 3
This course is on hierarchical models for continuous and discrete outcomes. Hierarchical models are used when the units of observation are grouped within clusters. Observations in a cluster typically are not mutually independent for given covariate values as required by conventional linear and logistic regression models. Longitudinal or repeated measures data can also be thought of as clustered data with measurement occasions clustered within subjects. The focus of the course is on hierarchical linear models and their assumptions, as well as practical aspects of developing models to address research questions and interpreting the findings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: PSYED 2410 or PSYED 3410

PSYED 3410 - REGRESSION
Minimum Credits: 3
Maximum Credits: 3
Various types of regression analyses will be covered such as simple linear regression, multiple regression, nonlinear regression, and logistic regression. Model selection, validation, residual analysis, diagnostics, and remedial measures of regression analyses will be discussed. Some of the remedial measures that will be covered are robust regression, ridge regression and bootstrapping. Regression analyses of qualitative and quantitative predictors as well as interaction effects of these variables will also be covered. These topics will use matrix algebra which will be introduced in class. SAS will be used.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2016 or PSYED 2019

PSYED 3412 - GENERAL LINEAR MODELS
Minimum Credits: 3
Maximum Credits: 3
Various types of analysis of variance will be introduced from the general linear models framework. One-way, two-way, higher-order ANOVA and ANCOVA using within-subjects, between-subjects, and mixed designs will be covered. Simple effects (simple main effect, simple comparisons, marginal comparisons, and interaction contrasts) analyses will also be discussed. Issues related to equal and unequal sample sizes as well as ANOVA diagnostics and remedial measures (e.g., transformation and weighted least square) will be covered. Some of the advance topics include incomplete design, fractional factorial, Latin Square, and nested designs. These topics will use matrix algebra.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2016 or PSYED 2019
PSYED 3413 - NONPARAMETRIC STATISTICS
Minimum Credits: 3
Maximum Credits: 3
Covers a number of flexible inferential techniques outside the realm of classical normal-theory tests. Two general areas are covered: 1) contingency table analysis, and 2) one, two, and k-sample procedures for testing for between-group differences, multiple regression, and analysis of covariance. At the conclusion of the course, students should be able to critically choose between normal-theory and nonparametric tests using analytic and empirical criteria, and to correctly interpret the results of the nonparametric tests.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2016 or PSYED 2019

PSYED 3416 - MULTIVARIATE STATISTICS
Minimum Credits: 3
Maximum Credits: 3
Topics include an introduction to the multivariate normal distribution, q-q plots, and box-cox transformations and assumptions for applying multivariate linear models. The analysis of two group designs, manova, mancova mixed models, repeated measurement designs and seemingly unrelated regression (sur) models are analyzed in the course. Also included are the exploratory data analysis techniques of principal component analysis, discriminant analysis, canonical correlation analysis, cluster analysis, and multidimensional scaling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 3410

PSYED 3417 - STRUCTURAL EQUATION MODELING
Minimum Credits: 3
Maximum Credits: 3
This course will introduce structural equation modeling (SEM). Some fundamental materials necessary for SEM will be reviewed; i.e. Matrix algebra, covariance algebra, multiple regression; and factor analysis. SEM is a family of techniques. Some of the different SEM techniques that will be discussed include path analysis, confirmatory factor analysis, general SEM, and mediation/moderation models. Advance SEM techniques will also be discussed, e.g. Mean and covariance SEM, latent growth curve models, multi-sample/multi-group SEM, dealing with missing and non-normal data, and mixture modeling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2410 or PSYED 3410

PSYED 3418 - META-ANALYSIS IN EDUC QUAN RES
Minimum Credits: 3
Maximum Credits: 3
Introduction to a methodology for conducting quantitative literature reviews in which the outcomes of empirical research studies are aggregated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3419 - MEAN-CENTE APPRCHS/STDNG DVLP
Minimum Credits: 3
Maximum Credits: 3
Course introduces one of the main methods of qualitative research, participant observation. Students will learn by doing and are, therefore, required to conduct fieldwork in order to complete a pilot study of their choosing. The primary purpose of course is to provide a hands-on, in-depth understanding of the epistemological and methodological aspects of qualitative data analysis. Course includes a project that requires you to spend time in youth-serving organizations. Clearances are required prior to first site visit: (a) federal criminal history record, (b) Pennsylvania criminal record check, and (c) Pennsylvania child abuse history clearance. Clearances less than 3 years old will be accepted. Outcome objectives include: 1. Understand reciprocal relationship between generating & using theory in participant observation studies. 2. Write ethnographic fieldnotes capable of supporting research studies. 3. Identify and resolve ethical issues that arise during fieldwork. 4. Gain knowledge of components of qualitative data analyses including: articulating conceptual definitions, developing research questions, using existing research and theory, determining the unit of analysis, developing conceptual categories, coding, displaying data and findings. 5. Identify sources of invalidity in qualitative research. 6. Develop a basic understanding of apa style of writing up a research study.
Academic Career: GRAD
PSYED 3420 - CMPTR APPLC TO RES METHODOLOGY
Minimum Credits: 3
Maximum Credits: 3
Course in advanced computer-based applications. Topics include design and conducting Monte Carlo studies, computer adaptive testing, and application of Bayesian methods to education. Students will learn the required steps for conducting a monte Carlo study or a computerized experiment: how to design the study, how to simulate data, and how to evaluate results. Procedures in SAS as well as other programs will be considered. Students will also design and implement a small monte Carlo study. For the computer adaptive testing (CAT) component, students will be introduced to cat and issues related to cat assessments: developing and maintaining item pools, selecting items, estimating ability, and validity of scores from cat assessments. Students will be introduced to the theory of Bayesian methods, application of Bayesian methods in educational measurement and statistics, and software that is available to implement Bayesian methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3430 - CASE STUDY & SINGL SUBJCT RES
Minimum Credits: 3
Maximum Credits: 3
This course addresses a number of methodological issues related to the design and analysis of single subject studies. The rationale and philosophy of these designs in educational and psychological research is examined in detail. Nonparametric techniques are used to analyze single subject data to the exclusion of classical (e.g. time series) methods. The complementary roles of quantitative and non-quantitative data analyses are emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2001

PSYED 3450 - INTRO TO EDUCATNAL EVALUATION
Minimum Credits: 3
Maximum Credits: 3
Issues relevant to doing evaluation and utilizing results are addressed. Both evaluation "theory" and practical experience are utilized to prepare people who will be providing or using evaluation information. Special emphasis is given to: a) differences between evaluation and research; b) problems in using quantitative or qualitative methods when assumptions are not met; and c) issues that affect the usefulness of information in decision making.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3460 - THEORTCL FOUNDS OF EDUCTNL RES
Minimum Credits: 3
Maximum Credits: 3
Investigates philosophical and theoretical foundations of methods used to do educational research. Particular emphasis is given both to classical quantitative, objective methods and to qualitative approaches to research. The roles of theory, hypotheses, observation, interpretation, and verification in the inquiry process are addressed. Prior study of research methods is needed to take advantage of this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2072 and (PSYED 2016 or PSYED 2019)

PSYED 3470 - CRIT-REFERENCED TESTING TECHNQ
Minimum Credits: 3
Maximum Credits: 3
Reviews criterion-referencing and its application to educational practice. Topics include curriculum-driven test development, concepts of mastery, item specification development, item-banking, item validation techniques, matching items to instructional events, setting passing standards for competency tests, reliability, decision consistency, equivalency of test forms, diagnostic testing, score reporting, and implications of cognitive psychology for criterion-referenced testing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2072

PSYED 3471 - CONSTR QUESTNR CONDC SURVEYS
Minimum Credits: 3
Maximum Credits: 3
Introductory course in survey research methodology. The course considers practical considerations in the construction of questionnaires including determining questionnaire content, selection of item types and wording of items, selection of an administration method, piloting questionnaires, and locating existing questionnaires. Discussion about conducting survey research considers sample selection, analyzing information obtained from questionnaires using SPSS, evaluating questionnaires, sources of error and how to reduce measurement error in survey research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2001 and (PSYED 2014 or PSYED 2018)

PSYED 3474 - COMPUTER ASSISTED TESTING
Minimum Credits: 3
Maximum Credits: 3
This course deals with the theoretical basis of using computers in testing, surveys computerized testing systems implemented in the field, and provides an opportunity for participants to initiate their own computer applications to testing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3475 - PSYCHOMETRIC THEORY
Minimum Credits: 3
Maximum Credits: 3
Basic course in classical and modern psychometric theory. Topics include basic formulations, composite tests, validity and reliability, test length, factors affecting precision, estimation, prediction, item parameters, test construction, and test equating. Both criterion-referencing and norm referencing applications are included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2001 and (PSYED 2014 or PSYED 2018)

PSYED 3476 - GENERALIZABILITY THEORY
Minimum Credits: 3
Maximum Credits: 3
Generalizability theory (g-theory) is an extension of classical test theory. It allows for the existence of multiple sources of error through the application of ANOVA procedures. By assessing each source of error we can better characterize the measurement and improve research designs. G-theory can be applied to a broad range of measurement, evaluation, and testing issues in education and psychology. The course will cover the principles and uses of applications to norm-referenced and domain-referenced testing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2001 and (PSYED 2014 or PSYED 2018)

PSYED 3477 - ITEM RESPONSE THEORY
Minimum Credits: 3
Maximum Credits: 3
Continuation of PSYED 3475. Advanced measurement topics in item response theory models and their applications to achievement, aptitude, and attitude measurement. Includes one-, two-, and three-parameter models; item and test information functions; test characteristics curves; test design; item fit and selection; tests for unidimensionality and model fit; IRT equating; adaptive testing strategies; item banking; and Bayesian, maximum likelihood, and EM estimation. Reviews major computer packages for IRT parameter estimation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 3475
PSYED 3478 - TEST DESIGN STRATEGIES
Minimum Credits: 3
Maximum Credits: 3
Emphasizes the scientific design of measurements of cognitive abilities. Considers how the findings of modern cognitive psychology and modern latent trait theories of psychometrics can be integrated and applied to the design and creation of test items of increased construct validity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 3475

PSYED 3479 - FACT ANLYTC METH & INSTRM DSGN
Minimum Credits: 3
Maximum Credits: 3
The course will cover factor analysis, principal components, and confirmatory factor analysis in the context of instrument development and validation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PSYED 3484 - ADV TOPICS IN MEASUREMENT
Minimum Credits: 3
Maximum Credits: 3
Seminar on specialized topics in educational and psychological measurement organized around faculty and student interests. Students may request a specific seminar series on topics not covered by ordinary course offerings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 3475

PSYED 3485 - ADV TOPICS IN RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
Includes new strategies in research design, and application of mathematical and behavioral design models for educational research. Topics vary each term around interests of the students enrolled.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSYED 3486 - ADV TOPICS IN STATSTCL METHODS
Minimum Credits: 3
Maximum Credits: 3
Special topics to cover specific statistical procedures and issues. May be arranged around interests of students enrolled.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSYED 3489 - SPEC TOPICS IN RESEARCH METH
Minimum Credits: 3
Maximum Credits: 3
Special topics in research methods presented in seminar for mat.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSYED 3491 - SUPERVISED RSRCH IN RES MATH
Minimum Credits: 1
Maximum Credits: 18
The student demonstrates ability to apply research skills by planning and completing a research project under direction of an appropriate faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

PSYED 3495 - TEACHING INTRNSHIP IN RES METH
Minimum Credits: 3
Maximum Credits: 3
Provides students with training in teaching a section of a research methodology course. It includes the development of course lectures, assignments, and part of the midterm or final exam and the delivery of the lectures.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

PSYED 3498 - DIRECTED STUDY IN RES METH
Minimum Credits: 1
Maximum Credits: 3
Student pursues study of various topics under the direction of faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PSYED 3499 - DISSERTATION RES IN RES METH
Minimum Credits: 1
Maximum Credits: 18
Student registers for this course while conducting research for a doctoral dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad LG/SNC Basis

PSYED 3503 - PSYCH OF ADOLESCENCE AND YOUTH
Minimum Credits: 3
Maximum Credits: 3
Considers psychophysical characteristics; social and economic trends underlying modern life-stage concepts; application of theory and research in cognitive, psychosocial and moral development; parental relationships, sexuality, drugs and alcohol, and delinquency and their applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3515 - SEM IN EGO/MORAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
The seminar studies theories, conceptual frames and empirical research in ego and moral development, together with related topics of cognitive and social development. Works analyzed include those of Jean Piaget, Jane Loevinger, Lawrence Kohlberg, and Robert Kegan. Implications for education and for counseling/psychotherapy are examined. Each student selects and pursues a particular research topic which may be suitable for a thesis or dissertation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3516 - SEM IN COGNITION & INSTRUCTION
Minimum Credits: 3
Maximum Credits: 3
Seminar surveys recent developments in cognitive psychology and applied cognitive psychology, relevant to teaching and instruction. Topics include, but not necessarily restricted to, cognitive theories of motivation, understanding, problem solving, learning strategies, mathematical thinking, musical...
cognition, and so on. Students develop proposal for research or innovative instructional practice.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**PSYED 3519 - THEORIES OF COGNITIVE DEVELOP**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course provides the opportunity to examine, critically, a selected sample of theories of cognitive development from birth through adolescence. Each theory will be discussed in terms of its precision, scope and educational applications. The theories examined will include: information processing accounts of development; constructivist theory (e.g. Piaget's theory); and social constructivist theory (e.g. Bruner's and Vygotsky's theories). Recent attempts to apply these theories to classroom instruction will be reviewed.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**PSYED 3520 - PSYCHOLOGY OF TEACHING**
**Minimum Credits:** 3
**Maximum Credits:** 3
The course focuses on how to teach and instruct from the standpoint of psychological theory and research. The course is organized by the content or subject to be taught and the type of teaching approach. Questions of what to teach, how to teach, and how to judge the quality of teaching are addressed. Students review research and propose implications for education that can be scientifically tested.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 3522 - ADULT LEARNING**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course presents psychological theory, research and analytical methods applicable to the variety of settings in which adults learn and to the variety of objectives adults have for learning. The roles of memory, prior knowledge and self-regulated learning in these and other task domains are considered. Students should emerge with an understanding of how to analyze what is involved in selected domains of learning and how to identify the more important questions for research.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 3524 - BEHAVR MANAGEMENT IN EDUCATION**
**Minimum Credits:** 3
**Maximum Credits:** 3
The course provides an examination of traditional Pavlovian and Skinnerian models of behavior management, as well as the newer influences of social learning theory, self-management, and cognitive behavior modification. The focus will be upon research design, critical assessment of the field, and application. All students will design and execute a behavioral project.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 3526 - SEM CROSS-CULTL FAMILY & DVLP**
**Minimum Credits:** 3
**Maximum Credits:** 3
This seminar examines human development as it is affected by culture. Students deal with psychological, social, and educational processes that affect child, adolescent, and adult development, family patterns, and childrearing practices to prepare children to become adults in different societies. Each seminar participant chooses one culture as the basis for study, then uses that culture as a vehicle through which to evaluate a variety of cultural factors that affect human development.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

---

3022
PSYED 3528 - PSYCHLGCL DVLP MATUR/OLD AGE
Minimum Credits: 3
Maximum Credits: 3
This course studies age-related physical, psychomotor, cognitive and affective changes in maturity and old age from a life-span development perspective. Recent research findings and issues related to studying aging are stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3530 - FMLY ISS & CHILDREN'S SCHOOLNG
Minimum Credits: 3
Maximum Credits: 3
The focus of this course is on current issues concerning the family with direct relevance to children's development and schooling. Examples include work and family, daycare, divorce, and child maltreatment. These issues will be explored both from a developmental perspective and in relation to current social and political conditions, directives, and debate. Implications for social policy and school reform are considered and discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3531 - FAMILY INFLU ON CHILD DEVELP
Minimum Credits: 3
Maximum Credits: 3
This course provides an analysis of the multiple pathways through which parents, siblings, and families shape child development. Each of several pathways--the determinants of parenting, parental influences, marital influences, and sibling influences--is examined and discussed across three developmental periods: infancy, early childhood, and middle childhood. Primary attention will be paid to the unique impact of parental care on early development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2503 or PSYED 2504

PSYED 3532 - FAMILY RES METHODS AND ISSUES
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to research methods relating to human relationships and families. Students survey a variety of research methodologies including experimental, correlational, and qualitative designs and observational and self-report measurement. Assessment techniques and instruments currently used in family research will be illustrated and discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PSYED 2016 or PSYED 2019

PSYED 3533 - DEVELP ADAPTN AND MALADAPTN
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the developmental psychology and psychopathology of children from infancy to middle childhood. Emphasis is on the organization of development and processes of both adaptation and maladaptation. The course is designed to enhance sensitivity to specific developmental issues emerging during this period and their outcomes. Etiology, assessment, and prediction will each be considered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3534 - SOCIOEMOTIONAL DVLP & SCHOOLNG
Minimum Credits: 3
Maximum Credits: 3
Beginning with infancy, this course considers key issues in social and emotional development with important implications for school functioning. The development of attachment with primary and alternative caregivers, the socialization of motivation and self-regulation, and the role of the educational system in fostering socioemotional development are the three broad topics given consideration.
Academic Career: GRAD
PSYED 3535 - CULTURE AND COGNITION
Minimum Credits: 3
Maximum Credits: 3
This course will examine cultural influences on children's cognition. Students will be introduced to thinking and research in cross cultural psychology. The implications of this work for the assessment of children's learning and development will be discussed. A multicultural perspective on the education of minority children in the United States will be presented and evaluated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3536 - COGNITIVE DEVELOPMENT & SCHOOLING
Minimum Credits: 3
Maximum Credits: 3
Beginning with infancy, this course focuses on children's cognitive development within interpersonal, educational, and cultural contexts. Both domain-general and domain-specific (e.g. literacy, mathematics) learning processes and outcomes will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3537 - CHILDHOOD AND ADOLESCENCE
Minimum Credits: 3
Maximum Credits: 3
Survey of psychological theory and research on cognitive, social and personality development during childhood and adolescence. Application of research to the educational and social-emotional needs of children and adolescents. Among topics considered will be parent-child relationships, sexuality, substance use, and delinquency. Cultural diversity in development also will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3585 - SP TOPICS: SERVICE LEARNING PROGRAM
Minimum Credits: 3
Maximum Credits: 3
Study cross-cultural issues in family and child development course satisfies degree requirements and electives in development and educational psychology, child development and other schools of education academic programs. Credits apply to programs in other schools. Coursework is graduate level, but undergraduates are eligible to apply. Students in educational psychology, child development, social work, Africana and Latin American studies, and related disciplines are encouraged to apply.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 3588 - FAMILY RESEARCH PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
The purpose of the family research practicum is to provide hands-on experience in conceptualizing, designing, implementing and evaluating family research studies which are written up for presentation, publication, or formal degree requirements.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 3589 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 1
Students will address selected topics for study.
Academic Career: GRAD
PSYED 3591 - SUPV RES APPLIED DEVELM PSY
Minimum Credits: 1
Maximum Credits: 18
Students will pursue selected topics under the guidance of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

PSYED 3592 - PRACTICUM IN COLLEGE TEACHING
Minimum Credits: 3
Maximum Credits: 3
The practicum in college teaching allows doctoral students the opportunity to teach, or assist in teaching, a course in educational psychology.
Students may be assigned to assist a faculty member with a course, or be assigned a course as primary instructor, under faculty supervision. In addition to a full range of responsibilities involving course preparation, planning, classroom instruction, testing student progress, assigning grades and course evaluation, students are expected to attend an accompanying seminar in college teaching.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 3598 - DIRECTED STDY APPLD DEVELM PSY
Minimum Credits: 1
Maximum Credits: 6
Federal and state reforms in recent decades have focused on the establishment of standards and assessments as means of improving teaching and learning and closing the achievement gap between more and less privileged students. Reforms such as no child left behind, the common core state standards, and the federal race to the top competition have resulted in a proliferation of standards and high-stakes tests, and have been accompanied by both desirable and undesirable changes in school and district practices. In this course we will explore the debates surrounding these various standards and assessment reforms. The topics this course will address include the use of assessments to lever instructional change, the assumptions about learning that underpin different types of assessments and test-based accountability, and research investigating the influence of high-stakes testing on instruction and learning. This course also will consider research pertaining to high-stakes teacher evaluation including value-added models, pay for performance, and direct assessment of teaching quality.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PSYED 3599 - DISSER RES APPLD DEVELM PSYCH
Minimum Credits: 1
Maximum Credits: 18
Student registers for this course while conducting research for a doctoral dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PSYED 3601 - PROFESSIONAL SEM IN SCHOOL PSYCH
Minimum Credits: 3
Maximum Credits: 3
This course orients beginning school psychology students to contemporary school psychology as a profession. There is a discussion and review of professional issues including roles and functions, future trends in employment, professional advancement and career options, time frames for professional study, ethics, certification, and the resources available to the practicing school psychologist.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 3602 - INTERVENTION WITH CHILDREN
Minimum Credits: 3
Maximum Credits: 3
This course presents an introduction to intervention methods appropriate for use with children. While the focus is on brief psychotherapy with children and their parents, other methods such as intensive psychotherapy, play therapy, biofeedback, and psychopharmacological treatments are also discussed. Particular emphasis is placed on the factors involved in decision-making among the various intervention choices.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3632 - APPLIED RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
This introductory methods seminar focuses on applied research design including developing conceptual definitions, applying models of theory testing and theory building, and developing relevant policy and practice research questions. This course will cover key debates occurring in the field of applied research in terms of producing evidence to support policy, practice, and program development, and is designed to encourage practical skill development; experiential learning opportunities are integrated into course content. Students will gain an understanding of applied research design and an improved skill set in proposing, designing, and evaluating applied studies of interventions and programs.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3691 - SUPERVISED RES IN SCHOOL PSYCH
Minimum Credits: 1
Maximum Credits: 9
This course provides the opportunity for students to engage in a research project to pursue scholarly inquiry in school psychology, under faculty supervision. The study results in a research proposal or paper, as documentation of the experiences.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

PSYED 3692 - PRACTICUM IN SCHOOL PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
The practicum in school psychology requires one day per week at a designated training site. The purpose is to provide students with a broad range of experiences with children, their parents, and the professionals who work with them. Typically students will begin as observers to gain familiarity with the setting. Later they are given increased responsibilities in the referral process by focusing on individual cases of children referred for psychological services.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 3696 - INTRNSHIP IN SCHOOL PSYCHOLOGY
Minimum Credits: 1
Maximum Credits: 6
The internship in school psychology is designed to allow the student to function as a school psychologist under supervision. The student is given specific responsibilities in such areas as: parent and teacher interviews, classroom observations, psychological assessments, report writing, consulting with parents and teachers, interpreting test results, and recommending interventions. The internship requires full-time participation for one school year.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

PSYED 3698 - DIRECTED STUDY IN SCHOOL PSYCH
Minimum Credits: 1
Maximum Credits: 3
This course provides the opportunity for a student to pursue, under faculty supervision, a particular topic, issue or problem in school psychology. This study results in an outcome project which is submitted to the faculty as documentation of the study experienced.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

PSYED 3699 - DISSERTATN RES IN SCHOOL PSYCH
Minimum Credits: 1
Maximum Credits: 18
Student registers for this course while conducting research for a doctoral dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

PSYED 3700 - SEMINAR IN COUNSLNG PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to introduce the student to counseling psychology as a profession. The focus is on the historical development of current professional issues and trends. Attention is given to ethical and legal issues, relations of counseling psychology to other professions, career options in counseling psychology, and changing roles of counseling psychologists.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 3701 - ADV SEM IN COUNSELING PSYCH
Minimum Credits: 3
Maximum Credits: 3
This proseminar is a course which focuses upon the history of psychology with special reference to the history of counseling and psychotherapy. Students will study major examples from the history of ideas which had a particular impact upon our consideration of the nature of man and the manner in which we view the therapeutic process. The relevance of historical ideas and trends to the formulation of contemporary theories of counseling, and the continuance of certain historical themes in contemporary theory and research will also be studied.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PSYED 3702 - INDIVIDUAL COUNSLNG 1 (SKILLS)
Minimum Credits: 3
Maximum Credits: 3
Course in counseling skills is for beginning students in the counseling psychology program.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3703 - INDIVIDUAL COUNSLNG 2 (THEORY)
Minimum Credits: 3
Maximum Credits: 3
This course is an overview of major theoretical perspectives which provide the foundations for the contemporary practice of counseling. Each theoretical perspective will be explored in terms of key concepts, historical development, strategies and techniques, current status and appraisal. The course will also introduce the student to a consideration of the effectiveness of psychotherapy and trends in theory, including common factors and integration of various perspectives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3704 - INDIV COUNSLNG 3 (RES & PRACT)
Minimum Credits: 3
Maximum Credits: 3
Objectives of this course are to increase students' understanding of conceptual models relevant to counseling practice, to familiarize students with recent developments in theory and counseling research, increase skill in case conceptualization, and develop advanced skills in counseling interventions.
Academic Career: GRAD
PSYED 3705 - ADVANCED GROUP COUNSELING
Minimum Credits: 3
Maximum Credits: 3
There are four goals in this course which include: (1) an understanding of existing theoretical models of group functioning; (2) an explanation of the variables that affect the conduct of group work; (3) an understanding of the effect a group has on one's behavior as a group participant; (4) increased knowledge of the research literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3706 - ETHC & HIST & SYS IN CNSLG PSY
Minimum Credits: 3
Maximum Credits: 3
This seminar addresses the ethical standards of psychologists with an emphasis on the ethical issues encountered by counseling psychologists in professional practice. Ethical dilemmas that may arise in relationships with clients and professional colleagues are examined and methods for resolving such dilemmas are evaluated. In addition, the course provides an exploration of the historical and philosophical backgrounds of psychology, particularly 19th century European experimental and American psychology to 1960.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3707 - ETHICS IN COUNSLNG PSYCHOLOGY
Minimum Credits: 2
Maximum Credits: 2
This seminar addresses the ethical standards of psychologists with an emphasis on the ethical issues encountered by counseling psychologists in professional practice. Ethical dilemmas that may arise in relationships with clients and professional colleagues are examined and methods for resolving such dilemmas are evaluated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3708 - FAMILY SYSTEMS AND THERAPY 2
Minimum Credits: 3
Maximum Credits: 3
Family Systems and Family Therapy 2 is an advanced seminar intended to develop students' conceptual base for understanding family system dynamics. The development of skills in 1) role functioning and 2) designing interventions to facilitate change, is emphasized. Attention is paid to special topics and problems of families, such as alcoholism, single-parent families, and the changing educational and career contexts that influence families.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3709 - ADV SEM IN FAMILY & DISABILITY
Minimum Credits: 3
Maximum Credits: 3
This course will explore the many aspects of family life when a disabled child or adult is present. The aims of the course are to examine theory, research, and intervention strategies relevant to families with a disabled member.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

PSYED 3710 - PSYCHOPATHOLOGY
Minimum Credits: 3
Maximum Credits: 3
Course reviews major categories of adult psychopathology from the standpoint of practicing counselors and counseling psychologists. Students will
become familiar with current psychiatric diagnosis and classification (DSM-III-R) and will examine etiology, assessment and case management issues for a range of adult disorders. This is an advanced level course aimed at students in counseling, rehabilitation, or psychology programs.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 3711 - VOCATIONAL PSYCHOLOGY**
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with understanding the forces which affect career development and helping clients to develop careers, in light of these forces. The frame of reference is that which a counseling psychologist should have about career development. The course is designed for counseling psychology doctoral students.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 3717 - SUPERVISION SEMINAR**
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the training and clinical supervision of counselors and psychologists who are preparing for professional careers. Students will explore existing theories of supervision and examine the research and practice associated with counselor training.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**PSYED 3721 - ADV SEM IN COUNSELING RESEARCH**
Minimum Credits: 3
Maximum Credits: 3
A seminar to explore methodological issues and outcome research in counseling.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad SN Basis

**PSYED 3724 - DEVELOPMENTAL COUNSELING-ADULT**
Minimum Credits: 3
Maximum Credits: 3
Life structure, adaptation, socialization and personality development perspectives on adult development are reviewed. Current adult development theorists such as Levinson, Vaillant, Schlossberg, Gould and others are studied to relate theory to systems of developmental counseling intervention. In addition biographical interviewing is demonstrated and case materials analyzed.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**PSYED 3725 - PROF PRACTICE COUNSLNG PSYCH**
Minimum Credits: 0
Maximum Credits: 0
This seminar examines important new developments affecting the private practice of psychology in the 90's. Changes in third party payments, the emergence of managed mental health care, provider panels, and liability issues are among topics to be addressed. Both threats and opportunities for psychologists will be explored.

Public & International Affairs

PIA 2002 - PUBLIC POLICY ANALYSIS & EVALTN
Minimum Credits: 3
Maximum Credits: 3
Introduction to policy-making processes; the methodology and techniques of policy analysis; the application of methods to the evaluation of new and existing programs; uses and limitations of different methods of policy evaluation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2003 - SEM IN RESEARCH DSGN & METHODS
Minimum Credits: 3
Maximum Credits: 3
This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: "what works?" Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term "mixed method."

PIA 2010 - PUBLIC MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Welcome to the revolution that is transforming public administration and government to a new dynamic built on public management and governance. Governance is a concept that allows us to think in terms other than government, politics, and bureaucracy. The "rhetorical distancing" makes it easier to think about networks, partnerships, and interrelationships between the public, nonprofit, and private sectors. Governments continue to be critical players in governance. But, that's not "the whole story". For instance, government actors, both elected and appointed, now spend as much time engaged in intersectoral relations as they do in intergovernmental relations. Modern management is no longer simply the effective utilization of
personnel, but the effective negotiation and linkages of partnership relations external to the organization. The governance of, for instance, a metropolitan transportation system or watershed can no longer be described as intergovernmental. Not only is it inter-jurisdictional coordination, it is persuading, partnering, and connecting with a myriad of networks that weave public-private, intersectoral, and organizational interests. The implications of this transformation form the subjects of this course. We will grapple with skill-set issues like managing contracts to capture value, technology issues like incompatible technology systems, communication issue like unequal distribution of information throughout a network, and cultural issues like dissonance created from the interplay of political and organizational culture value differences among varies public, private, non-profit sector actors.

PIA 2011 - MANAGING INTERNATIONAL ORGNs
Minimum Credits: 3
Maximum Credits: 3
This course, designed for students in all GSPIA masters programs, examines the challenges of management of international organization, that is, organizations that are comprised of states. It approaches management at three levels: at the macro level, we will explore the political environment and governance structures of international organizations; at the micro level, we will look at how individual managers cope with the standard management tasks, including managing staff and budgets, in an international environment, and at a Meso level, we will study the challenges of project management and of inter-organization coordination. We will also look at cross-cutting issues, including the problem of corruption, the continued attempts to reform international organizations, and the relationships between management and policy in an international environment. Students will select a specific international organization for in-depth analysis.

PIA 2021 - GLOBAL GOVERNANCE
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in the field of international affairs (IA). It is designed to give students knowledge of the major theoretical approaches and issues in international politics. The course introduces students to basic concepts and schools of thought in IA and examines major institutions and processes through which foreign policies are made and implemented. A major objective is to relate theories and models to major national and international policy debates through the close examination of case studies. Reference will be made throughout to contemporary developments. The interlocking objectives of this course are: 1) to provide a grounding in the nature and characteristics of international affairs; 2) to develop a broad understanding of the outstanding features of today's world and how it differs from other periods; and 3) to learn the key concepts for categorizing and analyzing the dynamics of international politics.

Academic Career: GRAD

PIA 2022 - QUANTITATIVE METHODS
Minimum Credits: 3
Maximum Credits: 3
Introduction to quantitative methods is a foundation course that provides an overview of statistical methods and hands-on applications to managerial decision-making in the public sector. Understanding statistical analysis and being able to work with data are important competencies of professionals in public policy and administration. Course topics include program evaluation, data collection and measurement in public policy and administration, descriptive statistics, hypothesis testing, processes for selecting statistical tests and assessment of statistical assumptions, measures of association and
other bivariate statistics, index variable construction, regression analysis, and an overview of selected other statistical and quantitative methods applied to problems of public administration. Students get hands-on experience through the use of a statistical analysis tool. Recognizing the social, political, and economic context of data collection, analysis, and reporting practices in the public sector, this course also discusses the ethics of data analysis and information technology policy and management.

PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS
Minimum Credits: 3
Maximum Credits: 3
Imagine that you are a newly minted MPA/MPA/mid and have the good fortune of landing a job working for the World Bank in India. Your first substantial project is to assist on a multi-year, multi-sector rural development and poverty reduction program with a budget of $150 million. The project's goals are to broadly improve the livelihoods and quality of life of the poorest of the poor in Andhra Pradesh. As a new member of the team that will develop the project's next phase of initiatives, the task team leader has asked you to review the results of the project's initial phase of activities and to make some recommendations to the team for how to improve the project's next phase, based on your review of raw household survey data that were collected to establish a baseline assessment of household livelihood levels and to help inform policy development. You first grab the project appraisal document that gives a short summary of findings from the survey and find out that, unsurprisingly, manual labor is the main source of livelihood for the poor, their lives are characterized by frequent illness, they have no land of their own, they are uneducated and have few schools, and they find obtaining credit difficult.[1] This provides you with very little help, and so you open the dataset to (a) understand what the project already has achieved in terms of results and (b) develop ideas for what kinds of policies you think are most likely to be successful in achieving stated project goals. Course work in policy analysis and the economics of development would prepare you to design policy in an intelligent and efficient way. This course should prepare you to make sense of those data.

PIA 2027 - MACROECONOMICS
Minimum Credits: 3
Maximum Credits: 3
Macroeconomics is the study of the economy as a whole, by which we usually mean the national economy. In this course we will cover all the traditional areas of macroeconomics. What determines the long-run growth of an economy and why are some economies rich and others poor? We will also examine the causes of economic fluctuations sometimes called business cycles. What causes booms, recessions, inflation and unemployment and are there policies to counter these phenomena? Macroeconomics also studies the interaction between the financial and productive sectors in an economy. What is the role of monetary policy in establishing financial stability in an economy and how does this effect the functioning of the economy? Time permitting; we will analyze international aspects of macroeconomics such as the role of the balance of payments and exchange rates on aggregate economic activity.

Academic Career: GRAD
Course Component: Lecture

Course Requirements: PREQ: PIA 2024 or PIA 2008; PROG: Graduate School of Public and International Affairs

PIA 2028 - PUBLIC POLICY ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
How can we improve the ability of society to choose between alternative policies? This course provides a framework to assess alternative policies on the dimensions of efficiency, equity, and political feasibility. The comparative institutional framework requires an interdisciplinary perspective which draws on economics, political science, and political economy. Throughout the course, we will consider how insights from these disciplines provide insight into the choices confronting policymakers seeking to bring society closer to their conception of the good life. The course is organized into three parts: an introduction to policy analysis; a framework for comparative markets and governments; and applications of the framework. One of the main goals of the course, besides mastering the material (as evidenced by an in-class midterm), is a series of papers applying these concepts as well as an original research paper conducting a policy analysis.

PIA 2030 - PROFSSNL COMMNCTN IN ARABIC 1
Minimum Credits: 2
Maximum Credits: 2
This course is intended to provide a solid foundation for both spoken and written Arabic with an emphasis on the mastery of Arabic phonics and communication skills. The student will be introduced to the basic grammatical structure of Arabic, and a vocabulary of at least 800 basic words. Many of these words open up varieties of word families, so the student's effective vocabulary should be well in excess of 2000 words. While the concentration is on speaking Arabic, there will be also a major exposure to reading and writing, which builds up vocabulary as well as encourages students to learn about the dialects, the customs and traditions of the Arab world. Students' participation and group activities engaging conversation in Arabic are vital to the course. The course is conducted entirely in Arabic.

PIA 2100 - INFORMATION TECHNOLOGY
develop a comprehensive view of a community exposed to known risk, recognize the interdependencies among different emergency support functions (ESFs) that will enable students to develop skills for monitoring risk in a given region. Practice in using this matrix will enable students to making in rapidly changing, urgent environments. Fourth, we will engage in a watch floor exercise, using the US matrix of emergency support making in emergent events, how and why it differs from routine management practices and what specific skills contribute to effective decision briefley at how these practices differ from local to state to national to international jurisdictions. Third, we will consider the process of decision through West Africa in 2014, we will review the conditions and dynamics that contribute to disaster in metropolitan and rural regions around the world. Second, we will review the basic policies and practices that are currently in place for mitigation, response, and recovery from disaster, looking and New Jersey, the dramatic losses from the November 7, 2013 typhoon Haiyan that struck the Philippines, or the unprecedented spread of Ebola made disasters. As we reflect on the consequences of the January 12, 2010 Haiti earthquake; the March 11, 2011 earthquake, tsunami, and nuclear reactor breach in Northeast Japan, the continuing costs from October 29, 2012 superstorm Sandy as it struck the coastal communities of New York and New Jersey, the dramatic losses from the November 7, 2013 typhoon Haiyan that struck the Philippines, or the unprecedented spread of Ebola through West Africa in 2014, we will review the conditions and dynamics that contribute to disaster in metropolitan and rural regions around the world. Second, we will review the basic policies and practices that are currently in place for mitigation, response, and recovery from disaster, looking briefly at how these practices differ from local to state to national to international jurisdictions. Third, we will consider the process of decision making in emergent events, how and why it differs from routine management practices and what specific skills contribute to effective decision making in rapidly changing, urgent environments. Fourth, we will engage in a watch floor exercise, using the US matrix of emergency support functions (ESFs) that will enable students to develop skills for monitoring risk in a given region. Practice in using this matrix will enable students to develop a comprehensive view of a community exposed to known risk, recognize the interdependencies among different emergency support functions, and design strategies for action that would engage the whole community in event of a sudden, damaging hazard. Fifth, we will study the links between the vulnerability of communities to disaster and the consequences of political and economic instability that lead to civil conflict, regrettably frequent in societies exposed to recurring risk. Finally, we will engage in a simulated decision making process that illustrates the conflicting interests among multiple policy audiences in recovery from a hypothetical earthquake disaster in Pacific rim nations. The goal of the simulation will be to devise the most appropriate strategy, given conflicting interests and limited information, for citizens of a region coping with the consequences of a major disaster.

PIA 2101 - MGNG EMERGENCIES & DISASTERS
Minimum Credits: 3
Maximum Credits: 3
Emergencies and disasters create an extraordinarily difficult set of challenges for public managers. In disaster, public managers are legally responsible for the protection of life, property and continuity of operations in their respective communities. Yet, they are suddenly confronted with situations they have never encountered before. How do they assess the situation? What resources are available to them? How do they formulate a strategy of action to bring the situation under control? What information do citizens need to protect their own lives and property? How do they make informed decisions under the urgent stress of disaster, when lives and property are at risk? What is the most effective means of reducing the damage, destruction and disruption to lives and communities that unmitigated disasters bring? Do short term policy goals limit or facilitate long term strategies for disaster reduction in urban environments exposed to risk? As the population of the world increases, the incidence of disasters, both natural and man-made, also increases as people move into vulnerable coastal regions and amass in megacities. In this course, we will take up Mr. Annan's challenge, cast more than a decade ago, but add to it a set of analytical and policy skills that can be used to frame the issues of risk so that other participants in local, national and international policy processes will understand the global need for disaster risk reduction, and act in constructive ways to fulfill it. First, we will review the scope of risk to human communities that is emerging on a global scale from natural and man-made disasters. As we reflect on the consequences of the January 12, 2010 Haiti earthquake; the March 11, 2011 earthquake, tsunami, and nuclear reactor breach in Northeast Japan, the continuing costs from October 29, 2012 superstorm Sandy as it struck the coastal communities of New York and New Jersey, the dramatic losses from the November 7, 2013 typhoon Haiyan that struck the Philippines, or the unprecedented spread of Ebola through West Africa in 2014, we will review the conditions and dynamics that contribute to disaster in metropolitan and rural regions around the world. Second, we will review the basic policies and practices that are currently in place for mitigation, response, and recovery from disaster, looking briefly at how these practices differ from local to state to national to international jurisdictions. Third, we will consider the process of decision making in emergent events, how and why it differs from routine management practices and what specific skills contribute to effective decision making in rapidly changing, urgent environments. Fourth, we will engage in a watch floor exercise, using the US matrix of emergency support functions (ESFs) that will enable students to develop skills for monitoring risk in a given region. Practice in using this matrix will enable students to develop a comprehensive view of a community exposed to known risk, recognize the interdependencies among different emergency support functions, and design strategies for action that would engage the whole community in event of a sudden, damaging hazard. Fifth, we will study the links between the vulnerability of communities to disaster and the consequences of political and economic instability that lead to civil conflict, regrettably frequent in societies exposed to recurring risk. Finally, we will engage in a simulated decision making process that illustrates the conflicting interests among multiple policy audiences in recovery from a hypothetical earthquake disaster in Pacific rim nations. The goal of the simulation will be to devise the most appropriate strategy, given conflicting interests and limited information, for citizens of a region coping with the consequences of a major disaster.

PIA 2102 - ADMINISTRATIVE THEORY
Minimum Credits: 3
Maximum Credits: 3
Explores various theoretical approaches, models, and value premises by which the task of managing and analyzing complex organizations is carried out. Provides students with rudiments needed to design their own analytical models for coping with administrative problems.

PIA 2103 - MGNG PEPL PBLC/NONPROFT SECT
Minimum Credits: 3
Maximum Credits: 3
This course, designed for students in all GSPIA Master's programs, provides a broad overview and hands-on practice in the skills needed for
successful supervision and management of people in public and non-profit organizations. Skills covered include effective hiring, training, motivation, and direct supervision of staff; evaluation and reward systems; effective communication in a multicultural or international environment; labor management relations and participative approaches to management. It places the challenges of managing people within the broader context of political or board control, budgeting, planning, and information management.

**Academic Career:** GRAD

**PIA 2104 - FINANCIAL MANAGEMENT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Financial management plays a central, if not strategic and controlling role in public administration. It is the one element that can, and does, most easily shape and condition administrative behavior patterns. It involves the allocation and management of scarce resources. This course introduces the students to the basic financial management concepts and practices in the public and non-profit sectors. The purpose of the course is to familiarize potential administrators with the elements of financial management and how these various elements are (or can be) used to help accomplish organizational goals and objectives. The ability to read and understand basic financial statements used in the public and nonprofit sectors will be emphasized. One does not need to be an accountant to take this course. The course will focus on understanding the financial world of governments, how they are financed; the major expenditure elements; how to read and understand the major financial documents and financial statements. Several classes will focus on the non-profit sector. A significant amount of time will be spent reviewing the major taxes used to finance governments as well as understanding the significant tax policy issues surrounding the use of these taxes. Major items impacting upon the financial conditions of governments including the funding of public pension systems; capital budgeting; and debt management will also be reviewed.

**PIA 2108 - MATCHING MONEY WITH MISSION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course traces the historic origins and contemporary expressions of philanthropy to offer an overview of the multiple dimensions of this growing and increasingly global source of capital and innovation in the nonprofit sector. Students become familiar with who gives, why, and how they structure their philanthropy. The course assesses different strategies and how new approaches like ephilanthropy and giving circles open and
diversify the field. Global, faith-based, and venture philanthropy are among the topics covered. Market-based approaches like social enterprise and corporate social responsibility, along with accountability, impact measures, transparency, and their public policy implications are explored. The course draws on case studies and guest speakers. Students participate in GSPIA's student philanthropy project, gaining hands-on grant-making experience throughout the semester by awarding funds to area nonprofits. This exercise links philanthropic theory to practice. At the end of this course students are able to articulate a robust definition of philanthropy's goals and the structures that advance them; demonstrate a range of hands-on grant-making skills; connect applied learning in grant-making to policy and practice issues examined in the course; model effective team work and decision-making practices that enhance grant-making; incorporate knowledge gained from practitioners and course work into personal philanthropic practices; recognize how contemporary issues in philanthropy intersect with the nonprofit, public and civic sectors; develop a research topic that contributes to peer learning; better assess community needs through an enhanced understanding of the Pittsburgh nonprofit sector.

Minimum Credits: 3
Maximum Credits: 3
This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2116 - TOPICS ENVIRONMENTAL MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Over the past forty years, environmental topics have moved from a second or third tier policy issue to what Al Gore proposes will be the "central organizing principle" of civilization. Environmental issues now affect nearly every aspect of public policy, government administration, and business strategy. This course provides a graduate-level analysis and assessment of environmental policy and management and an overview of the significant trends in the field. Topics include the definition and framing of environmental and sustainability issues; public policy tools and strategies; environmental trends in the private sector; local government approaches to environmental and sustainability issues; corporate behavior and trends; and the influence of global factors on national and private sector practices. The coming transition from environmental to sustainability management and policies is a major focus of the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2117 - PROGRAM EVALUATION
Minimum Credits: 3
Maximum Credits: 3
This course provides knowledge and skills in program evaluation. The course is organized in three parts: part 1: theory of program evaluation; part 2: designs for program evaluation; and part 3: methods for collecting and analyzing data. Program evaluation is a form of applied social research which draws on multiple social science disciplines to answer practical questions about the effectiveness, efficiency, fairness, and impact of programs in the public, nonprofit, and private sectors. Program evaluations are carried out at local, national, and international levels in areas of housing, education, counseling, nutrition, job training, health care, immigration, peacemaking, and counter terrorism. Program evaluation is an essential aspect of public administration, international affairs, and international development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2118 - SCI, TECHNOLOGY & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
Examines the way governments employ science and technology to achieve public policy objectives. Deals primarily with the United States, but it seeks to employ the U.S. Experience to examine other governments in developing as well as developed nations.

**PIA 2119 - POLICY DESIGN/IMPLEMENTATION**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Uses concepts, models and strategies for developing new and more appropriate solutions for public policy problems. Analyzes constraints and opportunities surrounding the implementation of public policies and programs. Emphasis on strategies of planned change, dissemination of innovations, and knowledge utilization in the public sector.

**PIA 2120 - REGULATORY POLICY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course analyzes regulation of economic and environmental activities by governments and government agencies. We address the following questions: how do regulations arise? What is the rationale for government regulation of economic industries? Are regulations effective in achieving government objectives? What are the politics of economic regulation that is, what political factors influence origin, change, and enforcement of regulations? After reviewing major theoretical perspectives on government regulation (public interest, capture, and reputational theories), the course considers some of the most current issues of regulatory policy, including financial markets, natural resources, environment, transportation, regulation of risk (workplace regulations and environmental safety), and globalization of regulation. We begin by analyzing regulatory reasons for the great recession of 2008 given the timeliness of the topic. After considering the financial crisis, emphasis shifts for several weeks to natural resource and environmental regulation (including regulation of energy markets, air, fisheries, forests, and land). We conclude with shorter modules on transportation regulation, how governments regulate risky technology, and global dimensions of regulatory policy, including exporting regulatory standards from developed countries to developing economies.

**PIA 2121 - HSNG POLICY: REVITAL METRO REGN**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will frame housing policy in the context of changing demographics in metropolitan housing markets. We will give particular attention to the role of housing policy in revitalizing metropolitan regions. This course will also examine key policies towards fair housing, affordable housing, and economic development. This course will address housing policy and housing markets from two perspectives: person-centered (housing mobility, household migration, and tenure choice) and unit centered (housing markets and zoning). We will address issues of tenure type (renter-occupied and owner-occupied housing), housing subsidies, and market type (urban vs. Rural, city vs. Suburban, U.S. Vs. Non-U.S.) Used in housing policy formulation and housing market evaluation. The course will conclude with linkages to other policy areas related to the cost, quality, and spatial distribution of housing: transportation, crime, education, employment, and environmental concerns.

**PIA 2122 - MGNG & FINANCING URBN SERVICES**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course examines issues related to the public economy of local government taxation and spending. The problems facing central cities and metropolitan areas are highlighted using the Pittsburgh and Allegheny County region as context. The course is designed to maximize the student's participation while making the learning environment as "real world" as possible. To accomplish those goals students select either a city to develop a financial plan, a particular coping strategy to deal with fiscal stress, or an analysis of a nationally recognized best practice for the budget process. Students learn how to finance public services, infrastructure, and economic development (a model is discussed early in the course).
**PIA 2123 - THEORY & PRACT LOCAL GOVERNMENT**
Minimum Credits: 3
Maximum Credits: 3
This course introduces the historical and legal frameworks in which local governments exist. It will examine the position of local government under American federalism and will compare current theories of government reorganization with traditional reform efforts. This seminar seeks to provide students with analytical skills and contextual knowledge to understand the societal function of local government.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2124 - COMP METROPOLITAN GOVERNANCE**
Minimum Credits: 3
Maximum Credits: 3
This course is about the governing of metropolitan regions in the United States. The concepts of metropolitan region is relatively new. Faced with rapid growth of suburbs, the creation of satellite cities, new modes of transportation, an academic roundtable of regional planning proposed that a "new political or administrative entity" at the metropolitan level needed to be created that was different from the precinct, ward, municipality, county, or state. The year was 1926. Seventy-one years later, Anthony Downs lamented, "as congress shifts many federal powers to lower levels of government it is missing a unique opportunity to resolve a fundamental flaw in America's government structure; the absence of any authority at the metropolitan regional level. Metropolitan regions have become the most important functional units of economic and social life in almost all modern societies" (Downs, 1997). The road to the metropolitan region takes us through the land of local government. Local governments are the building blocks of the metropolitan regions. The American system of governing and government is best understood as a territorial based distribution of power and responsibility. It is steeped in both law and popular culture. Over 40 years ago, Arthur Maas (1959) defined the structure of local government in the United States as an "areal" division of power wherein the territorial bounded local governments were by culture and practice, an integral part of the system of organizing the divided power between the federal, state, and local governments. With this background, we will compare and contrast governance strategies that have been or are being considered in regions throughout North America. These strategies will be analyzed through lectures, discussions, innovation presentations, brief policy memos and the use of formal debates between teams of students organized early in the semester.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2125 - CITY & REGION THEORY & PRACTICE**
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course into the issues of urban and regional governance and change. We will examine issues and problems related to regional fragmentation and cooperation in metropolitan areas, regional environmental management and politics, land use and land management, and public-private partnerships.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2126 - STATE & METRO POLITICS & POLICY**
Minimum Credits: 3
Maximum Credits: 3
The course will review the decision process in state government. It will provide an overview and an insider analysis of the diverse strategies used by political officials, lobbyists, community activists, media and local governments to produce policy outcomes to their liking. The course is a seminar that will review and analyze theory; provide practical knowledge through case studies and presentations by elected officials, lobbyists, media, and citizen groups.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad Letter Grade
**Course Requirements:** Graduate School of Public and International Affairs students only.
PIA 2127 - MANGNG & FINANCNG URBAN SERVC
Minimum Credits: 1
Maximum Credits: 3
Focuses on four major municipal service areas; parks and recreation, public safety (police and fire protection), streets and highways, sanitation and water. Provides class members with insights into major policy issues and technical aspects of each service area.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2128 - LAW AND POLITICS
Minimum Credits: 3
Maximum Credits: 3
Familiarizes students with the legal and political settings in which day-to-day operation of local and regional government takes place.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2129 - LAW AND CIVIL SECURITY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to acquaint students with the maintenance or creation of civil society in conditions of political instability prompted by such things as security threats, disasters, or political upheaval. In particular, the course will explore the rule of law and the protection of rights and liberties as a bulwark of civil society and consider the requirements for their continued preservation. Upon completing this course students should be able to critically assess the concept of civil society and its requisite components from a historical, philosophical, and legal perspective and understand the role of rights, liberties, political processes, organizations, institutions, and norms to preserve civil society even in periods of conflict. The course is divided into (1) historical and theoretical foundations of civil society; (2) management of political, economic, and natural disasters and rights and liberties; (3) analysis of public policy solutions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2130 - VOLUNTEER MGT NON-PROFIT SECTR
Minimum Credits: 3
Maximum Credits: 3
This course is for nonprofit management students. Emphasizes the strategies used for the recruitment and retention of key actors in nonprofit organizations, and the various human resource development tools techniques for maximizing their contributions to the achievement of the organization's mission.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2131 - LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership and provides students with feedback on their own leadership styles. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Students learn how to explore concepts regarding leadership, teams and organization culture; assess their own leadership skills and style; receive feedback from colleagues on their style and behavior; and plan for their own leadership development.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2132 - GROUP DYNAMCS IN ORGANIZATIONS
Minimum Credits: 3
Maximum Credits: 3
Uses literature, a variety of demonstrations, exercises and simulations to actively involve students in the various dynamics often occurring in small group situations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2133 - ADV SEM: SYMS THINKG PBLC POLC
Minimum Credits: 3
Maximum Credits: 3
Based on general theories of systems with a strong emphasis on cybernetics. It aims at laying the foundations for "social systems' cybernetics" -- a contemporary, not-yet conventional mode of thinking about socio-cultural systems for purposes of analysis and synthesis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2134 - SEM PRSNNEL MGT & LABR RELTNS
Minimum Credits: 3
Maximum Credits: 3
This course provides in-depth treatment of current issues in human resources management in public and non-profit organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2135 - NEGOTIATIONS 1
Minimum Credits: 2
Maximum Credits: 2
Explores collective bargaining processes and techniques. Unit determinations, selection of bargaining representatives, and formulation of contract demands and positions will be examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2136 - NEGOTIATIONS 2
Minimum Credits: 2
Maximum Credits: 2
Deals with concepts and practices in public/employer bargaining agent relationships, and stresses methods of administration of collective-bargaining agreements and the resolution of grievances thereunder.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2137 - NEGOATNG & MGNG CONFL PBLC ORG
Minimum Credits: 3
Maximum Credits: 3
By the end of this course, students will 1) understand the theory and practical benefits/costs of conflict resolution techniques; 2) have practiced using these techniques; 3) have developed a conflict resolution policy and program for an organization (chosen from your current employment or a "hypothetical" firm)
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2138 - CONFLCT RESOLUTION WORKPLACE 2
Minimum Credits: 2
Maximum Credits: 2
A continuation of pia 2137 - conflict resolution in the workplace 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2139 - CURRENT TOPICS PERSONNEL ADMIN
Minimum Credits: 3
Maximum Credits: 3
This course provides in-depth treatment of current issues in human resources management in public and non-profit organizations. Focus will be on reforms in the personnel area, in the U.S. And internationally. Students will also get an opportunity to apply the skills they have learned by working on a major project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2140 - FINCL PRA ECON & ENV SUSTNBLY
Minimum Credits: 3
Maximum Credits: 3
This course examines the financial practices and processes required to promote economic and environmental sustainability (both public and private comparisons). Emphasis is put on how the economic component husbands the wise use of resources to effectively achieve specific organizational successes, promoting societal or external long-term prosperity, enhancing the opportunity for living things in the environment. On the environmental and social sides stress is put on respecting things and people both in particular organizational and external community. Next focus is put on financial indicators (both early warning and long term) that have been developed and applied to predict potential financial problems before they arise. Attention is focused on financial indicators (the financial monitoring trend system-ftms) that have been developed to promote stable and sustainable financial management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2141 - ECONOMIC ASPECTS OF GOVERNMENT
Minimum Credits: 3
Maximum Credits: 3
Explores the justifications for government intervention in markets and examines the methods and consequences of government regulation and control of the economy. Topics include the efficiency and equity of public decision making; market failure; social optimality and private incentives; income and wealth redistribution; imperfect competition, asymmetric formation and disequilibrium in markets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2142 - PUBLIC SECTOR ACCOUNTABILITY
Minimum Credits: 3
Maximum Credits: 3
Explores concepts of the accountability of government and its personnel and analyzes the more significant means for implementing such accountability.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2143 - PRODUCTIVITY IN PUBLIC SECTOR
Minimum Credits: 3
Maximum Credits: 3
Examines theory, techniques, approaches and development in ongoing productivity research projects; reviews existing standards and attempts to improve and employ them to better solve governmental problems and improve productivity.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2144 - PUBLIC SECTOR ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
This course assumes minimal accounting background. Participants may use the course as an option to familiarize themselves with the fundamental operations of the uses and potential of private and public sector accounting in public and not-for-profit management. Alternatively, the course serves as an introduction to other financial management courses in GSPIA. Though it includes basic theory and mechanics of accounting, great effort will be devoted to applications and practices in everyday public administration. A major operating premise is that public administrators can better understand accounting only as they fully grasp how public and not-for-profit organizations operate. This requires grounding in accounting used to measure performance and decision making, as well as an understanding of reporting rules and standards. Additionally, emphasis is placed on the relationship between accrual modified and cash flow measures in order to interpret accounting information. Sufficient coverage is provided to give students a clear understanding of the utility of information contained in financial statements. The course presents financial accounting as an important system for investor, creditor, and public management decision making. Assignments emphasize applications of conceptual issues in financial accounting that public administrators will encounter. Materials are designed to develop student's analytical and critical thinking skills.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2145 - BENEFIT COST ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course is intended to give the students a grounding in the concepts and tools of benefit-cost effectiveness analysis. In determining whether or not to undertake a program or project, which of several possible projects should be undertaken, or how to evaluate an ongoing or completed project, benefit-cost analysis is a widely used method. The advantages or and limitations of benefit-cost analysis will be covered in order to give a perspective on public vs. Private considerations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2146 - VOLUN MGT IN NON PROFIT SECTOR
Minimum Credits: 2
Maximum Credits: 2
Volunteerism has been one of the most productive and positive forces in our society. The benefits of volunteering have far reaching impact - no matter how small or large the task, whether performed locally, nationally or internationally; whether conducted in a traditional non-profit organization or in the corporate sector; volunteers have provided meaningful services, adding great value to any organization. This course will teach you how to establish a volunteer program, recruit and train volunteers, measure the program effectiveness as well as recognize and retain quality volunteers in a non-profit organization. Volunteers can be the pure lifeblood of an organization; hence, you'll need the right tools to ensure success.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2147 - PERSNNL MGT IN NONPROFIT SECTO
Minimum Credits: 2
Maximum Credits: 2
This course is designed to increase the students understanding of the skills needed for effective management of human resources in non-profit organizations. Staff are one of the most important assets to any organization and managing people is critical to the success of both public and private sectors alike. This course presents an overview of human resources management to explore the problems and challenges managers encounter as they make decisions about recruitment and selection, job analysis, job descriptions, performance evaluations, training and development, managing difficult employees, and complying with employment laws. Its purpose is to provide students with a perspective of human resources management that
they can integrate and use in their efforts to manage people and manage their performance towards achieving the mission and vision of the organization.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2148 - HEALTH POLICY
Minimum Credits: 3
Maximum Credits: 3
Almost one-sixth of the American economy is devoted to health programs. This graduate course examines whether our programs are effective, efficient, and equitable, and why they are so difficult to change. Upon completing this course students are able to understand and criticize our current programs and the changes that are currently being debated in Washington, as well as the models that other richer countries have developed. They are able to carry out analyses of health policy issues, including questions of how much we should be willing to sacrifice to get better health. The course considers topics including: does medical care improve health?; Is an ounce of prevention worth more than an ounce of cure?; How should we value health?; What should be the limits of government paternalism in health?; What, if anything, is wrong with spending 25% or more of gnp on health care?; How can we ration health in an intelligent and politically feasible way?; Will tighter regulation of drug prices dry up new drug development? If so, is that bad? What obligation, if any, do the richer countries have to try to improve health in the poorer countries?.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2149 - HEALTH, FINANCE & DELIVERY
Minimum Credits: 3
Maximum Credits: 3
The objective of the course is to develop an understanding of the natural alignment of payment and service delivery; the former determines the latter. Throughout the course we will examine the US and compare it with other nations, both in terms of system-specific details, as well as the culture of, and surrounding, the health care sector. Students analyze the key features of payment and delivery systems that affect different health outcomes and health status. While considering different reform movements, students predict whether the reforms will bring about desired change. The course helps students drill down to core determinants of value and performance excellence and then understand how they get incented. Students completing course are able to assess the "functionality" of different health systems based on key dimensions. The course is organized in four parts: 1) the ideal: how delivery systems would function in a customer focused, Toyota/lean world; 2) the real: error, waste, inefficiency and bad practices (overuse, underuse, misuse); 3) payment: how it aligns or misaligns with value; and 4) levers of change: health reform. Each student selects a nation and analyzes its health system, with special focus on how payment determines service delivery and how service models determine population health. Students consider these dimensions: coverage; incentive/payment systems; quality, safety, and efficiency; training and workforce; health records and data analysis; end of life care; and Health status. Each of these is set in each country’s individual political, cultural, and ethical context.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2150 - APPLIED POLICY IMPACT ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
The course provides intermediate methodological and statistical skills required for identifying, specifying, diagnosing, and applying quantitative policy enforcement and criminal justice, organizational reform and innovation, strategic management in non-profit organizations, and international development.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2151 - INTRODCTN MANAGEMENT SCIENCE
Minimum Credits: 3
Maximum Credits: 3
An introduction to basic theory and application of selected management science techniques such as input/output analysis, linear and goal programming. The most common mathematical methods--proportions, linear equations and functions--will be applied to simple planning and policy analysis models.

Academic Career: GRAD
PIA 2152 - DECISION THEORY
Minimum Credits: 3
Maximum Credits: 3
Introduction to decision theory approaches to solution of management problems, with emphasis on the public sector. Covers expected value, utility, incremental analysis, the cost of uncertainty and value of information, and Bayesian strategy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2153 - CALCULUS FOR PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
The course is an introduction to optimization methods using calculus and their application to public policy and planning problems. In addition to calculus the students learn the use of an artificial intelligence software package.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2154 - TOPICS IN MANAGEMENT SCIENCE
Minimum Credits: 3
Maximum Credits: 3
A survey of analytical approaches to managerial problems, drawing on both quantitative and non-quantitative methods. Topics include pert/cpm, linear programming, inventory analysis, decision theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2155 - THRY GAMES:CONCP METH APPLC
Minimum Credits: 3
Maximum Credits: 3
The main ideas of zero and non-zero sum games with two or more players will be covered in the course. The emphasis will be on applications to management, political processes and international affairs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2156 - INFORMATION, LAW & SECURITY
Minimum Credits: 3
Maximum Credits: 3
Information technology and the information that it generates has increasingly become part of our daily lives shaping our practices, discourses, and institutions in fundamental ways. Personal information is used by consumers, professionals, and organizations to a variety of ends and in a number of different settings. The growing reliance on personal information not only challenges long standing demarcations between public and private institution in terms of responsibilities, obligations, and limits, but also calls for a reconsideration of how to ensure the protection of long standing civil liberties and civil rights. This course will consider the impact of emerging technologies within existing constitutional, statutory, and international guidelines and will then explore a range of policy solutions for managing the use of personal information in our public and private sectors.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
PIA 2157 - DYNAMIC OPTIMIZATION POLC MAKNG
Minimum Credits: 3
Maximum Credits: 3
The course is an introduction to the methods of optimal control theory and their applications to policymaking in economics, the environment and the political processes. In addition to the methods of optimal control the students will learn the use of gams and macsyma.
Academic Career: GRAD
Course Component: Lecture

PIA 2158 - THE CITY AND THE 21ST CENTURY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

PIA 2159 - ADVANCED SEMINAR
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

PIA 2160 - NETWORK ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Relations tie actors such as organizations and people together into networks. Each actor has an own network of contacts, a social capital that may bring the actor advantages, more or less so, compared to other actors, depending on the properties of the actor's network, such as its size, range, density and holes or disconnects among the contacts, which impinge on the actor's performance. The actor's own network is part of the larger network among all the members of a system, in which the actor may be central, peripheral or even isolated. The larger network among all members of the system may be fragmented into cliques, may be integrated and flat or centralized with a center-periphery configuration. The course teaches concepts and theories about actors' own networks and systemic networks and trains analyses. Analyses of individual actors' own networks will use SPSS, and analyses of systemic networks will use specialized software, UCINET.
Academic Career: GRAD
Course Component: Lecture

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2161 - FOREIGN STUDY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

PIA 2162 - INCENTIVES & BEHAVIOR IN ORGS
Minimum Credits: 3
Maximum Credits: 3
An incentive is a factor that motivates behavior, such as the expectation of a reward or the fear of punishment. Drawing on literature from behavioral economics and game theory, this course delves into the role which incentives play in cooperation, conflict, and resource allocation. Applications may include cases from public and nonprofit organizations, criminal activities, humanitarian crises, development, and diplomacy. Students will gain an introduction to the quantitative analysis of strategic behavior through in-class exercises, independent assignments, and group case-studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
PIA 2163 - POLICY RESEARCH AND ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
When society is confronted with a choice between a status quo policy and various alternatives, which policy should it choose? This course builds on GSPIA's core course in policy analysis by providing students with a framework to conduct policy-relevant research. From an analytical perspective, we will show how microeconomics, political economy, and detailed understanding of economic and political institutions can be used to systematically compare public policies. In particular, we will adopt a framework that compares public policies on dimensions of efficiency, equity, and political feasibility. The goal of this course is for students to gain credibility as policy analysts capable of original research that improves the ability of society to respond to policy problems effectively in a dynamic political environment. While the course is taught primarily from microeconomic perspectives (in particular, 'rational choice' and political economy), we conclude by considering the limitations of conventional microeconomic approaches to analyzing public policies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2164 - NATRL RESORCS GVRNC AND MGT
Minimum Credits: 3
Maximum Credits: 3
This course considers how institutions influence resource and environmental outcomes. In particular, this course will focus on how the design of property rights influences prospects for effective management of resources such as energy, water, and biodiversity. Although the problem of resource management is complex, we will study how the structure of property rights, the rules governing ownership in society, provides a framework to understand when societies succeed and fail in their effort to manage resources effectively. In a general sense, the course will show why property rights, and the political institutions within which property rights are specified and enforced, are the key to understanding the extent to which societies are able to manage natural resources effectively.

PIA 2167 - GRANT WRITING
Minimum Credits: 2
Maximum Credits: 2
This course is an introduction to grant writing for nonprofit organizations (NPOs) and nongovernmental organizations (NGOs) that are based both within and outside the U.S. Upon completing the course, students should be able to research potential funders for specific programmatic projects within a nonprofit organization and draft a grant proposal requesting funding for the project. This course includes identifying an organization that requires funding for a specific project. The student researches the organization, decides on a fundable project, researches potential funders, and submits a grant proposal and concept paper to the chosen organization.
PIA 2168 - MGT INFO SYSTEMS IN GOVERNMENT
Minimum Credits: 3
Maximum Credits: 3
Focuses on the definition, design and evaluation of management information systems (MIS) relevant to governmental and quasi-governmental activities. Topics include conceptual foundation of MIS, their structure and design, their use in achieving organization goals, their impact on society and organizations.

PIA 2169 - PUBLIC POLICY AND NPOS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2170 - MGMNT NON-PROFIT ORGANIZATIONS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2171 - LEGAL ISSUES FOR NPOS
Minimum Credits: 2
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2172 - FUNDRAISING FOR NPOS
Minimum Credits: 2
Maximum Credits: 2
This course is an introduction to comprehensive fundraising techniques commonly employed by nonprofit organizations (NPOS) and nongovernmental organizations (NGOS) that are based both within and outside the U.S. Upon completing the course, the student should have a working knowledge of the fundraising techniques common to all national and international nonprofit organizations. This course includes identifying an individual organization that requires funding to sustain its programs and examining how it goes about raising monies for its annual budget and goals. Students examine annual fund, telemarketing, foundation funding (proposal writing), direct mail, special events, major gift, and planned giving techniques.
PIA 2173 - PROJCT DEVELP & PROPOSAL WRTNG
Minimum Credits: 3  
Maximum Credits: 3  
Project development and proposal writing are valuable skills for which there are increasing demands in the job market. Such skills are also applicable in program planning and in writing theses/dissertations and journal articles. This course covers the fundamentals of project development and proposal writing, with "hands-on" experience in the various aspects culminating in the preparation of a complete proposal.

PIA 2174 - MKTG/STRATGC PLN NONPRFT ORGNS
Minimum Credits: 3  
Maximum Credits: 3  
Course is intended to equip the student with both a theoretical and practical application of strategic planning and marketing concepts to non-profit institutions. Literature is drawn from several professions/disciplines including organization theory, economics, political science, social work and public administration.

PIA 2175 - GOVERNANCE FOR NON-PROFITS
Minimum Credits: 2  
Maximum Credits: 3  
The topics of leadership and governance in non-profit organizations are increasingly important from both practical and theoretical perspectives. A key strategic issue facing many NPOS is how to enhance the quality of interaction among governing boards (trustees/directors) and the executive staff, especially the executive director. This broad issue area includes several sub-topics: recruitment and selection of board members; distinctions between leadership and management; legal and fiduciary responsibility of boards; board-executive relations; the board's role in fundraising; leadership.

PIA 2176 - TRNG & DVLPMNT NON-PROFT ORGNS
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on directing training needs assessment methods, training management, and evaluation needed to direct staff, directors, boards and volunteers in non-profit organizations. It will identify significant issues in the development of effective non-profit training and development, and will explore the resources available to assist non-profit managers in meeting their organization's training and development needs.

PIA 2177 - ANLYTC TECQ:PBLC & NONPRF MGT
Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce the student to a community participation approach to local economic development carried out by a nonprofit organization. It would focus on the practical steps for putting together nonprofit housing developments and commercial and industrial business enterprises under participation conditions.
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2178 - INTRO COMMNTY ORGNIZTN & PLNNG
Minimum Credits: 4
Maximum Credits: 4
An overview of community organization history, theory and strategy with an emphasis on the planning process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2179 - COMNY ORGZTN STRATGY & TACTIC
Minimum Credits: 3
Maximum Credits: 3
Students learn fundamental organizing skills, through classroom sessions and a field project. Students gain an understanding of the role of community organization in advancing social welfare. Students advance their understanding of the community organization profession and its responsibilities and opportunities. This course will seek to help students master a variety of strategies and tactics, with an understanding of when to use each.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2180 - MANAGING EMERGENCY DISASTERS
Minimum Credits: 3
Maximum Credits: 3
Emergencies and disasters create an extraordinarily difficult set of challenges for public managers. In disaster, public managers are legally responsible for the protection of life, property and continuity of operations in their respective communities. Yet, they are suddenly confronted with situations they may have never seen before. How do they assess the situation? How do they formulate a strategy of action to bring the situation under control? What information do citizens need to protect their own lives and property? How do managers of nonprofit and private organizations make informed decisions under the urgent stress of disaster, when lives and property are at risk? As the world's population increases, the incidence of disasters, both natural and man-made, also increases as people move into vulnerable coastal regions and amass in megacities. This course will examine the conditions that confront public, private, and nonprofit managers in communities exposed to risk from natural, technological, and deliberate disasters. It will review the current organizational plans for assessing risk, and examine the requirements for enabling communities to reduce their exposure to risk.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2181 - LAW AND ADMINISTRATIVE PROCESS
Minimum Credits: 3
Maximum Credits: 3
Introduction to the legal system and an understanding of the law relating to administrative actions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2182 - GREAT PUBLIC POLICY ISSUES
Minimum Credits: 3
Maximum Credits: 3
Critically examines the historical, social, political and economic foundations underlying the premises that have been used in developing, modeling, and operationalizing the American ideology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2183 - ORGANIZATIONAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Concerns the dynamics of consulting processes and focuses on the kinds of activities the consultant will be expected to cope within an organizational structure.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2184 - STRATEGIC MANAGEMENT SEM
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2185 - STRATEGIC MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course deals primarily with the concept of organizational strategy - how organizations position themselves to succeed in an ever changing environment. Secondarily, it deals with managerial strategy - how leaders and managers in organizations make important decisions under conditions of uncertainty. Strategic management consists of a set of tools to help organizations thrive in dynamic and (sometimes) competitive environments. The essence of strategic management is the ability to leverage the organization's strengths and 'comparative advantages' to respond to emerging opportunities and challenges in its external environment. In government and nonprofit organizations, the practice of strategic management is complicated by the need to work effectively within the political system and to collaborate with other agencies for the delivery of goods and services. Purely competitive strategies must be tempered by a broader view of what is in the best interests of society at-large, not just the organization's self-interests. This course will help you to understand and apply the concepts and methods of strategic management in public and nonprofit organizations. Strategic planning is one of the many tools of strategic management. Strategic planning is a step-by-step process, usually undertaken every 3-5 years, to help an organization develop its strategy for the future. The strategic plan might, for example, highlight opportunities for the organization to grow by offering its services in new locations, add new services to its portfolio, alter its mission statement, or even merge with another organization. Alternatively, a strategic plan might identify ways for the organization to reduce its size, cut programs and staff, or even go out of business in an orderly way.

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2186 - GVRNC REGNL SYS COMP PERSP
Minimum Credits: 3
Maximum Credits: 3
The course is an introduction to recent thinking on the role of innovation systems for economic growth. The focus is on a regional level and in particular on the importance of the governance of regional innovation systems. The topic is studied in a comparative perspective, emphasizing the differences between regions and nations and how these differences matter. The emphasis is on understanding various contrasting perspectives, such as the similarities and differences between the role of institutions (economics) and the design of institutions or governance (political science). Another area of debate is on methodology; abstract generalizations (economics) versus comparative case-studies (business administration, sociology etc.). The course is designed to replicate important parts of the research process, first clarifying central concepts and then applying these to empirical material. By the end of the course students should know the central concepts in the literature on regional innovation systems and the main tensions in research and public policy on economic growth. They should be able to apply these insights to diverse case studies.

**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2188 - ECON DVLP STRATEGIES & PRACTCS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on sub-national, local economic development. This course will encompass theory, policy, process and practice in state and local economic development. Our focus will be largely in the North American urban context over the post-World War II period, with international comparisons. We will also use examples from Pittsburgh in furthering our understanding of local economic development practice. We will find that in the U.S. Context, there are different interpretations and meanings to economic development, both in theory and practice. These certainly differ at the international scale, as well. Specific topics include: equity issues in economic development, economic cluster analysis, tax increment financing, brownfields revitalization, retail, and regional governance. The purpose of the course is to provide the student with knowledge of the approaches to economic development in theory and practice, techniques and methods of analysis, and debates ongoing in the field. Students will select one economic development policy or case to analyze in depth over the course of the term.  
**Academic Career:** GRAD

**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2189 - SEMINAR POLITICAL INSTITUTIONS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.  
**Academic Career:** GRAD

**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2192 - ETHICS AND PUBLIC LIFE**
Minimum Credits: 3
Maximum Credits: 3
In order to understand the role of ethics in public life, this course will explore the intersection of ethics, management and public policy. The first section of the course will be devoted to a discussion of the nature of ethics and applied ethics. Here a framework useful in the ethical analysis of issues, problems and dilemmas in public life will be constructed. The second section will demonstrate the use of this framework in the analysis of managerial problems in public organizations while, in the third section, an evaluation of policy issues from a normative point of view will be undertaken.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2193 - GENDER, RACE & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
This course will examine normative issues of justice, rights, opportunity, and freedom, as relevant to public policy relating to women and people of color. While much of the discussion will focus on policy issues under discussion in the United States many will be relevant to other nations and to an international context, and some will directly involve other countries. The course will discuss the "dilemmas of difference" that face policy making affecting disadvantaged groups regarded by the dominant society in some way as different.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2194 - ENVIRONMENTAL ETHICS
Minimum Credits: 3
Maximum Credits: 3
This course explores major issues of moral theory and political philosophy as they arise from an interest in the preservation of and respect for non-human nature. The course explores the question of whether traditional moral and social theories need revision when non-human nature is brought into the domain of ethical inquiry. It asks what are the principles that best guide policy toward environmental preservation at the same time that they promote social justice.

**PIA 2203 - ADVANCED SEMINAR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3
This course provides a broad overview to the main themes in the field of public administration. Taking both an historical and a functional perspective, it explores the different intellectual strands in the field, including public management and bureaucratic politics, issues of accountability and control, organizational theory and organizational behavior, organizational learning and the diffusion of innovation, policy formation, implementation and evaluation, and new approaches to delivering public services, including network management and public-private partnerships. Taking a comparative perspective, we look at the relationship between theory and empirical research and examine the relevance of traditional models in an environment of complex interrelationships between public, private, and nonprofit sectors, across multiple levels of government. Students play an active role in designing the class and in leading discussions. Upon completing this course students should (1) have a broad understanding of the structure of the fields of public administration and public policy, their histories, and the current issues in the fields; (2) have a familiarity with major works and key journals in the field and know how to synthesize the body of literature; (3) have explored in-depth an important issue in the field (from a theoretical and, if possible, an empirical perspective) and learn to draft a paper for submission to a scholarly journal. This course begins with an introduction to the main themes of the field and is then structured around topics chosen in consultation with students. Individual students take responsibility for assisting in identifying readings and in leading class discussion. Students work together to build a wiki with an annotated reading list for the topics selected.

PIA 2204 - GRANT WRITING AND FUNDRAISING
Minimum Credits: 3
Maximum Credits: 3
Grant writing and fundraising are critical skills for people working in the nonprofit sector. 'Grants' are funds donated by an organization such as a foundation or government agency, while other fundraising strategies are used to obtain donations from individuals. This course aims to provide an introduction to grant writing and fundraising for nonprofit organizations (NPOS) and nongovernmental organizations (NGOS), the term more commonly used for international nonprofits. No matter what role or position you may have ' as a program coordinator, executive director, corporate/community liaison, or a development professional ' all nonprofit and public sector professionals need to be familiar with how nonprofit organizations obtain funding from a variety of donors. Moreover, the writing, planning, analysis, and collaboration skills required to prepare fundraising plans and grant proposals are applicable and useful in every profession.

PIA 2208 - ENRGY PROD & LOCL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
The production of primary energy resources ' oil, gas, coal, solar, wind, and water ' can have broad implications for local economies, affecting employment and income, local government revenues and liabilities, property values, and more. The course will emphasize policy issues related to energy production as well as conceptual frameworks for understanding the energy-local economy nexus. Much of the course will address issues raised by oil and gas production in the continental U.S., but attention will also be given to renewable energy and energy production in developing
PIA 2215 - SYSTEMS THEORY
Minimum Credits: 3
Maximum Credits: 3
Increasingly, the social, economic, and political context in which public organizations function is characterized by interdependent, evolving systems of individuals, organizations, and systems of systems. Understanding this complex world of interacting organizations and systems presents a challenging, fascinating, difficult, but always interesting task. In this seminar, we will follow the evolution of this process over the last six decades and assess how these theoretical frameworks have changed our conception of public policy and the operational context for public organizations. Since systems theory is strongly interdisciplinary, we will also explore basic concepts as they were borrowed from physics, mathematics, biology, engineering, and computer science to inform current organizational frameworks of complex adaptive systems and their application to policy and practice in current public and international affairs. Students will write five short papers assessing the evolving state of complex systems and the impact of theoretical framework in analyzing public policy issues today.

PIA 2220 - ADV SEM: EVID INFRN PUBLC POLC
Minimum Credits: 3
Maximum Credits: 3
The main purpose of the seminar is to probe patterns of evidence and inference in the policy sciences. This purpose will be attained by focusing on methodology, that is, the systematic and critical examination of methods and theories used to make knowledge claims in disciplines and specialties we will treat as "argument fields". The central organizing device of the seminar is that of argumentation, specifically, the "structural model of argument" developed in the early 1950s by Stephen Toulmin and detailed in the main text of the seminar.

PIA 2227 - ADV METHS OF POLC RES ANAL
Minimum Credits: 3
Maximum Credits: 3
This course in advanced methods of policy analysis focuses on four types of methods: -structured analytic techniques used in the intelligence community to make intelligence estimates and to identify national security threats; -problem structuring techniques used to solve ill structured or 'wicked' problems in areas of technology assessment, development planning, intelligence analysis, and economics; -forecasting techniques based on expert judgment which are appropriate when quantitative data are unavailable to make estimates of future states of energy, environment, technology, and related areas; -argument mapping techniques used to assess the quality of scientific and policy reasoning and to enhance critical thinking capabilities among professional policy analysts and planners. The seminar will feature short (30-45 minute) presentations by members of the sis program and professional analysts, researchers, and trainers in the intelligence community (IC) and elsewhere. Students should note that the methods covered in this course are part of a current analytic reform movement among intelligence analysts and elsewhere in the wider public, private, and nonprofit sectors. The course is open to qualified masters and doctoral students.

PIA 2228 - ADV SEM POLICY MAKING PROCESS
Minimum Credits: 3
Maximum Credits: 3
Integrates theoretical, conceptual and methodological foundations of modern policy research analysis.

PIA 2280 - LAW AND THE PUBLIC'S HEALTH
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide graduate students with an understanding of the legal structures that define, support, and limit government's authority and responsibility in the interest of public health. The course consists of didactic and case-related materials selected from primary legal sources as well as from scholarly analyses in public health research and policy. Students will analyze case studies of contemporary public health issues in light of both the law and the practical aims of government's public health functions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2281 - CNTMPRY THEORIES OF JUSTICE
Minimum Credits: 3
Maximum Credits: 3
In this course we will read some of the most important contributions to conversations and debates about justice in recent philosophy and political theory. We will discuss John Rawls' "theory of justice", along with some communitarian, egalitarian, feminist and postmodern responses. We will then consider other approaches to theories of justice less strictly focused on distribution of goods. Michael Walzer distinguishes several spheres of justice and Amartya Sen places issues of the distribution of goods in the context of human capabilities.

### PIA 2290 - TOPICS IN PUBLIC ADMINISTRATN

**Minimum Credits:** 1
**Maximum Credits:** 3
This course traces the historic origins and contemporary expressions of philanthropy to offer an overview of the multiple dimensions of this growing and increasingly global source of capital and innovation in the nonprofit sector. Students become familiar with who gives, why, and how they structure their philanthropy. The course assesses different strategies and how new approaches like ephilanthropy and giving circles open and diversify the field. Global, faith-based, and venture philanthropy are among the topics covered. Market-based approaches like social enterprise and corporate social responsibility, along with accountability, impact measures, transparency, and their public policy implications are explored. The course draws on case studies and guest speakers. Students participate in GSPIA's student philanthropy project, gaining hands-on grantmaking experience throughout the semester by awarding funds to area nonprofits. This exercise links philanthropic theory to practice. At the end of this course students are able to articulate a robust definition of philanthropy's goals and the structures that advance them; demonstrate a range of hands-on grantmaking skills; connect applied learning in grantmaking to policy and practice issues examined in the course; model effective team work and decision-making practices that enhance grantmaking; incorporate knowledge gained from practitioners and course work into personal philanthropic practices; recognize how contemporary issues in philanthropy intersect with the nonprofit, public and civic sectors; develop a research topic that contributes to peer learning; better assess community needs though an enhanced understanding of the Pittsburgh nonprofit sector.

### PIA 2301 - INTERNATIONAL POLITICAL ECONMY

**Minimum Credits:** 3
**Maximum Credits:** 3
This course focuses on institutions, policies and political relationships that have shaped international economic affairs. The course will explore relations between economic processes and political processes in the context of international politics, with particular reference to the dilemmas that such relations present to policy-makers. The questions to be asked include: 1. What analytic challenges arise in trying to understand the interaction between the exercise of power and the pursuit of wealth? How do different 'schools' of international political economy (IPE) depict this relationship? 2. What are the most influential such schools, what are the assumptions, key concepts and values of each and what are the implications of each for public policy? 3. Historically, what are the main economic and political forces that have shaped the international economy? 4. What domestic and external strategies have states adopted in order to develop their own economies and to benefit from exchanges with other countries (while minimizing their vulnerability)? 5. For what purposes have states sought to cooperate with each other in the management of the international economy? How successful have their efforts been? What kinds of institutions have they created so as to protect their national interests while cooperating with others? What have been the strengths and weaknesses of particular international organizations, and what might be done to strengthen them? 6. To what extent has the ability of states to direct their own economies been weakened by the advent of globalization? 7. What are the major challenges currently facing policy-makers in the management of the international economy?

### PIA 2302 - INTERNATIONAL FINANCIAL POLICY

**Minimum Credits:** 3
**Maximum Credits:** 3
The course focuses on the international financial system and its significance for policy-making. Topics include: the balance of payments, foreign exchange markets, fixed and flexible exchange rates, purchasing power parity, the eurocurrency markets and alternative monetary regimes. The course is designed to give students a command of the basic theoretical tools used in analyzing international financial issues and the ability to apply this theory to the real world. A team project on a current or historical international financial issue is a course requirement.

PIA 2303 - SECURITY & INTELLGNC STUDIES
Minimum Credits: 3
Maximum Credits: 3

Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war and especially since 9/11 are notably different from those of the past and, at times, seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment past and present and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

PIA 2304 - DILEMMAS OF GLOBALIZATION
Minimum Credits: 3
Maximum Credits: 3

At the beginning of a new century, globalization has replaced the cold war as the organizing principle upon which the international system of commerce and security is founded. Yet its character, sources and consequences often remain obscure or are the subject of fierce debate, despite a wealth of academic studies, policy analyses and regular incantation by politicians. In this research seminar, students will explore such questions, attempting to define and apply the concept to the functioning of the global economy.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2305 - FOREIGN POLICY AND DIPLOMACY
Minimum Credits: 3
Maximum Credits: 3

This course examines how the United States government makes foreign policy and conducts its diplomatic relations with foreign governments and international organizations. It is designed for students who want to pursue a career in foreign affairs. Its main focus will be the state department and embassies, but it will also look at the role of the president and the national security council, the pentagon and other government agencies, congress, the media and think tanks. Key concerns will be the interagency process and the interaction of Washington with overseas missions. The course will acquaint students with how the state department and embassies are organized and function. It will discuss how recent secretaries of state have used the department's machinery, and it will introduce students to key diplomatic activities: working with allies, dealing with Russia, negotiating treaties, conducting shuttle diplomacy. Students will be introduced to the relevant functions of foreign service officers. There is a strong emphasis on drafting: press guidance, briefing memos, reporting cables, etc. Students will also assume the role of 'desk officer' and manage an issue of their choice throughout the course. Normally there will be a field trip to Washington to meet people working at state, on the hill, at think tanks and in foreign embassies. At the conclusion of the course, students will participate in a crisis management exercise that they design and execute. The goal is to develop the professional drafting, reporting, briefing and policymaking skills required to function effectively in Washington's foreign affairs community.

PIA 2306 - COMPETING PERSP ON GLBL ENERGY
Minimum Credits: 3
Maximum Credits: 3

This course provides professional school students in the fields of business, law, engineering, public policy and other areas with a first-hand experience of the global impact of contemporary developments in the natural gas and other energy sectors. Participants will first witness the effect that Marcellus shale has had in Western PA and then see how these developments are impacting the US's foreign policy and trade practices. After this, students will be familiarized with a very different side of the global natural gas and energy equation by travelling to Moscow, where they will see the
kremlin's view of global and regional gas and energy markets. The course ends with an exploration of the role that transit states like Bulgaria play in
global energy markets and efforts by these players to use their territory and energy alternatives to bargain with larger states at both ends of energy
pipelines. Throughout this exploration, students will be exposed to a variety of stakeholders and a gain an understanding of energy's impact on
domestic and international politics, economies, societies and the environment.

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**Course Requirements:** Graduate School of Public and International Affairs students only.

PIA 2307 - HUMAN SECURITY

**Minimum Credits:** 3

**Maximum Credits:** 3

This course introduces the core concepts of human security, examines the institutions that promote them, and probes the advantages and limitations
of human security as a means of addressing difficult policy issues. Human security treats individuals and communities, rather than states and
institutions, as the fundamental units of analysis. It calls for an integration of individuals' security and integrity with state security and sovereignty.
Analyzing security at the level of individuals instead of states raises important challenges and opportunities for observers and practitioners of
development, conflict and peace, human security, and investigate substantive policy agendas affecting human security on a range of global issues.
We grapple with both direct and structural violence especially among vulnerable populations, and with debates about prioritizing or narrowing
human security threats and referents. And we explore how a diverse set of actors develop global public policy responses by articulating new policy
agendas and defining policy recommendations. Throughout the term we assess the advantages and drawbacks of the human security.

PIA 2309 - BUS STRATS/OPRTNS EMERGNG MKTS

**Minimum Credits:** 3

**Maximum Credits:** 3

Global environmental problems -- climate change, stratospheric ozone destruction, species extinction and loss of biodiversity, and the contamination
of air, land and water -- affect the lives of every person on earth today as well as of future generations. For the first time in history, human economic
activity, and our ever-increasing population and consumption, threaten to surpass the ecological limits of the earth. This course examines the range of
global and multinational environmental problems, and the international treaties and agreements, institutions, mechanisms and policies developed to
address them, taking into account the socioeconomic and geopolitical contexts and overarching issues such as balance between environmental
protection and economic development, and between international regulation and national sovereignty. Topics to be covered include the 1972
Stockholm conference on the human environment and the 1992 Rio conference on environment and development; agenda 21 and sustainable
development; ozone depletion and the Vienna convention and the Montreal and subsequent protocols to the convention; transboundary air pollution
and water pollution; marine pollution, the conservation of living marine resources and the un law of the sea convention; global warming and the 1992
framework convention on climate change, the 1997 Kyoto protocol, and the fourth and fifth conferences of the parties to the climate change
convention, held in Buenos Aries and 1998 and Bonn in 1999 respectively; access to fresh water; toxic and hazardous substances and the Basel
convention; chemical pollutants; nuclear weapons, waste disposal and power plant safety and environmental damage and the convention on nuclear
safety and other instruments; protection of wildlife and biodiversity, including conventions on biodiversity, wildlife conservation, and trade in
endangered species; habitat protection, including forests, wetland, and cultural heritage sites; desertification; and Antarctica. Crosscutting issues such
as the relationship between international and environmental law and international trade, human rights, national security, and international finance and
investment, will also be addressed.

PIA 2310 - STATES AND MARKETS

**Minimum Credits:** 3

**Maximum Credits:** 3
The current economic crisis has brought political debate back to central and long-standing questions in public policy: what role, if any, should governments play in the economy? How far should they be involved in the creation, regulation, and ownership of manufacturing and service industries (such as banks)? How far (and for what purpose) should they intervene in international trade? How far should they take responsibility for creating and preserving jobs? Should they be the providers of healthcare and pensions? More fundamentally, how far should the state try to reduce inequality and redistribute wealth? How can we make sure that public goods (such as roads, hospitals and national security) are provided adequately and reliably while still allowing for and encouraging individual enterprise and responsibility? This course explores these vital issues as found in broad political debate and in relation to particular industries and services.

PIA 2312 - GLBLZATN & WELFR DVLPNG CNTRYS
Minimum Credits: 3
Maximum Credits: 3
Can developing countries maintain welfare states in the era of globalization? Do they have the capacity to ensure that markets can coexist with strong social policies? This course examines the redistributive effects of globalization and its consequences for the social welfare of people in developing countries. The extent of government responsibility to protect and promote the welfare of citizens in developing countries under conditions of globalization has been at the center of political economy and policy debates for the last two decades. This course examines the impact of such changes in the context of labor, education, health, and social security policy. Upon completing this course students should be able to critically assess existing models, understand recent challenges, and predict sustainable approaches for the future. The course is divided into (1) introduction and theoretical context; (2) comparison of welfare states in developed and developing countries; (3) recent challenges; (4) case studies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2320 - CASES IN POLITICAL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
Course is organized around case exercises. They take the form of either simulations of policy deliberations and negotiations or reconstructions of decision-making episodes requiring the preparation, presentation and defense of policy briefs.

Academic Career: GRAD
Course Component: Lecture
PIA 2321 - POLITICAL ECONOMY OF INT'L TRADE
Minimum Credits: 3
Maximum Credits: 3
This course will be structured as a research seminar that will focus on the trading relationships among advanced industrial states. Beginning with a historical overview, it will consider a number of contemporary policy issues that Japan, North America, and Europe now face. These include the relative balance between foreign direct investment and trade, and their relative effects on national competitiveness; the tension between the forces of globalization and regionalization in modern trade; and the role of international institution and bilateral negotiations in mediating trade conflict.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2322 - WORLD ECONOMIC PATTERNS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students of international affairs, development, public management, and planning with an up-to-date overview of the geographic organization of the world economy. Changing structures of production and consumption are described and analyzed. Strong emphasis is placed on creating a contemporary understanding of global economic patterns based on the study of empirical information.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2323 - INTEL PERSP COLD WAR ERA
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the Cold War era, 1947 - 1991, from the perspective of the major intelligence services of the two main protagonists, the Soviet Union's KGB and the United States central intelligence agency. Rather than a detailed history of the era, we will focus on piecing together the understandings -- and more importantly the fundamental misunderstandings -- of the two opposing superpowers' intelligence services, in an effort to explain the erratic and dangerous geopolitics of the cold war.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2324 - PEACEMAKING AND PEACEKEEPING
Minimum Credits: 3
Maximum Credits: 3
This course offers case studies of multilateral peacekeeping and peacemaking efforts in relation to regional and ethnic conflicts, such as those in Bosnia, Kosovo, Rwanda and Somalia. It looks at the underlying rationale for intervention in such conflicts and the problems and dilemmas that arise.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2325 - CUR ISSUES US SECURITY POLICY
Minimum Credits: 3
Maximum Credits: 3
In this course, we will focus less on the modalities of U.S. Defense policy (force structure, weaponry, and operations) and more on the broader debate about the changing global security environment, the role of the United States in that environment, the place of military force as an instrument of political policy, and the ability of military force to fulfill that role. In that effort, we will also take a retrospective look at the evolution of U.S. National security strategy and theories about the nature of military force in the modern era.
Academic Career: GRAD
Course Component: Lecture
**PIA 2326 - PROLIFRTN WEAP MASS DESTRUCT**
Minimum Credits: 3
Maximum Credits: 3
This course focuses on issues related to the proliferation and possible use of nuclear, chemical, and biological weapons. It offers an overview and assessment of existing non-proliferation efforts, looks at the dynamics of proliferation in each of these areas, and examines the implications for both national and international security.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2327 - TERRORISM & COUNTER TERRORISM**
Minimum Credits: 3
Maximum Credits: 3
This course will deepen our understanding of the post-9/11 security environment by examining contemporary terrorist groups and the history from which they spring. We will address a number of questions, including, what is terrorism and how has the terrorist threat changed over time? What are the data that we use to understand terrorist behavior and the patterns of terrorism? What motivates terrorists to engage in political violence against non-combatants? At what point does violent militancy cross over into terrorism? Does terrorism ever succeed, and, if so, under what circumstances? How does terrorism end? While much of our focus will be on so-called 'Islamist terrorism,' we will also explore other types of terrorism, including secular and sacred groups active in the United States, Western Europe, and elsewhere. Time permitting, we will also consider a number of other topics, including 'cyber-terrorism,' deradicalization, and state terrorism. As befitting the complex nature of terrorism, we will draw on numerous academic disciplines in studying these topics, including political science, sociology, psychology, history, anthropology, and economics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2328 - ETHICS AND NATIONAL SECURITY**
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar will focus on appreciating the ethical quandaries confronting principals who make foreign policy decisions. Students will practice articulating foreign policy positions that are sound with respect to the political, ethical, and policy aspects of foreign policy issues. We will consider these concerns surrounding the following topics for the purpose of advancing strategic interests: war, human rights, humanitarian intervention, counterintelligence, counterterrorism, foreign aid, and distributive justice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2329 - CMP CRIME INF WARFR & SECURTY**
Minimum Credits: 3
Maximum Credits: 3
As societies have become more reliant on information technologies, so they have become more vulnerable to disruption through attacks on information systems. This course examines the national information infrastructure, highlights its vulnerabilities to both criminal exploitation and attempts by terrorists or hostile nations, and look at what can be done to enhance security in this area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2330 - TOPICS GLOBAL POLITICAL ECONMY**
Minimum Credits: 1
Maximum Credits: 3
Courses offered under this rubric will concentrate on examining in detail a specific recurrent issue in the field of international economic policy or will focus on a major current problem or an emerging issue in this field.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2331 - POVERTY AND THE WORLD ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This course evaluates the existence of widespread poverty in the global economy and explores why it continues to plague so many countries throughout the world. Emphasis is on the kinds of questions scholars and practitioners ask about poverty and development, and how they have attempted to answer them. Issues of poverty are analyzed as both internal and external political, economic, and social phenomena. Readings cover many of the classic texts in the field, policy-related issues, debates on North-South relations, and case material on Latin America, Africa, East Asia, and South Asia. Upon completion of the course, students should be able to understand the different theoretical debates about development, think critically about issues of poverty, and evaluate the merits of different strategies intended to alleviate it. This course is divided into three parts: (1) different theoretical debates about poverty; (2) political, economic, and social causes and consequences of poverty; (3) the role of a global economy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2332 - NEW ISSUES IN SECURITY POLICY
Minimum Credits: 3
Maximum Credits: 3
The September 11, 2001, terrorist attack raised fundamental questions about the security of the United States and about the future of u.s. foreign policy. This course will examine some of the urgent and long-term issues raised by this attack and subsequent events; it will give students an opportunity to explore it in depth both the background to current policy problems and the options available to policy-makers in Washington and abroad for dealing with these problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2333 - POL ECON PROLIFRTN ARMS CTRL
Minimum Credits: 3
Maximum Credits: 3
This course seeks to address a single overarching question. Is the construction of a viable, global nonproliferation regime possible? It takes this to be one of the key international security public policy issues of our day. How shall we characterize the diffusion of weapons and military-useful technologies and what is the best way to conceptualize a transparent, multilateral framework of agreements and controls that might mediate or circumscribe their use.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2334 - DEFENSE POLICIES
Minimum Credits: 3
Maximum Credits: 3
Focuses on U.S. Defense policy issues and processes pertaining to the strategic and intermediate range nuclear weaponry; large-scale conventional conflict, e.g., That which would occur in Europe and the Persian Gulf; small-scale or "low-intensity" conventional conflict; "power projections"; and counter insurgency.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2335 - APPROACHES CONFLICT RESOLUTION
Minimum Credits: 3
Maximum Credits: 3
The resolution of disputes at national and international levels requires creative approaches to conflict resolution. Resolving disputes through successful negotiation has become a valued skill and could even be considered a "fine art." Of course, some disputes cannot be completely resolved,
especially those which have evolved into violent conflict. In these cases, successful negotiation can lead to a more peaceful and productive situation which could eventually evolve into a permanent settlement. This course first examines the nature of conflicts: how they begin and can sometimes lead to violence or even war. We then analyze the role of negotiation and its potential for mediation to defuse disputes. This course covers both the theory and the practical application of conflict resolution using case studies and role playing. The course objective is to provide students with both the theory of conflict resolution as well as the skills involved in successful negotiation. In relation to the negotiation process, the course focuses on the following questions: when is negotiation feasible and desirable as an approach to conflict resolution? What format (bilateral/multilateral) and procedure is appropriate for a given negotiation? What are the main issues in setting up a negotiation? How can negotiation "formulas" be devised and evaluated?

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2336 - STRATGC INTEL INT'L SECU STDS**

Minimum Credits: 3
Maximum Credits: 3
This course seeks to make students familiar with the challenges the United States confronts in adapting its intelligence community in ways appropriate to the security challenges of the twenty first century. Phenomena such as terrorism, transnational organized crime, humanitarian disasters, environmental degradation, emerging and re-emerging diseases and cyber-threats have replaced soviet military power and political expansionism as key items on the national security agenda. This poses new and demanding requirements for United States intelligence collection and analysis. Consequently, the course not only elucidates the nature of these challenges, but also gives particular emphasis to the kinds of skills and ways of thinking that are relevant to meeting them. In addition, it is designed to provide opportunities for students to use the skills they obtain in a practical manner that is relevant to contemporary national security challenges and problems. Consequently, several sessions will introduce the class to analytic methods and software tools that are used in intelligence analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2337 - U.S. SECURITY POLICY IN ASIA**

Minimum Credits: 3
Maximum Credits: 3
Last year, the US spent well over 663 billion dollars on its military. The combined military spending of china, Japan, South Korea, and North Korea amounted to 178 billion, or just over one-quarter of the US total. The US keeps dozens of military bases throughout Asia and regularly conducts large military operations in that region. The governments in East Asia do not keep military bases outside their own region and do not position their troops directly adjacent to us borders. Yet despite these obvious imbalances, over one-half of all Americans believe china is a threat to the world and American media pundits provide us with frequent and dire warnings on threat posed to the US by china and North Korea. Perhaps it is time to rethink the concept of security in Asia, who poses a threat to whom, and who defines security. This course is designed to provide future policy makers and leaders with critical new ways of thinking about security issues from a wide range of assumptions. We will analyze security's relations to historical legacies, militarization, us exceptionalism, nationalisms and patriotism, gender, ethnicity, and class. We will investigate security in Asia by deconstructing traditional security studies and asking new questions about old assumptions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

**PIA 2338 - SOCIAL DVLP IN INT'L ORGNIZTNS**

Minimum Credits: 3
Maximum Credits: 3
This course aims to provide a comprehensive understanding of social development policies and practices undertaken by leading international development agencies, such as the world bank, the united nations, and the department for international development. It builds on the growing recognition among development practitioners that economic development alone cannot ensure sustainable development nor eradicate poverty. In so doing, it introduces multidisciplinary research perspectives and analytical tools for studying social dimensions of contemporary development problems. Upon completing this course students will be able to read and critically evaluate the utility of social development strategies put forth for various development agencies, understand the use and sequence of social analysis tools in development project cycles, and gain experience in writing policy memos and papers that effectively utilize social analysis and assessments. Part i (theories of social policy and development) introduces the theoretical foundations of conventional social policy and recent challenges to these foundations from the 'development context.' It compares the goals and institutions of 'social policy' with those of 'social development.' Part ii (applied policy case studies) examines a number of policy and program cases on education, health, rural and urban development, and gender, as it compares and contrasts best social development practices in the field. Analytically, the focus remains on institutions, decision-making processes, and the relationship between economic policy and social policy as we inquire how development policies promoted by major international organizations can be made socially more effective and economically productive.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2339 - POWER AND INTERDEPENDENCE
Minimum Credits: 3
Maximum Credits: 3
Provides an assessment of new forces in world affairs that have forced reconsideration of traditional ideas of national security; analyzes the strategies of governments as they pursue national interests defined in conventional military terms and in terms of economic welfare, cultural integrity, and social unity. Economic dependence and interdependence, rapid technology transfer, and spreading weapons capabilities are also examined.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2340 - SPACE AND NATIONAL SECURITY
Minimum Credits: 3
Maximum Credits: 3
This course examines how space-based services provide critical support to military and intelligence operations and contribute to national security more broadly. The course is designed to investigate several interrelated themes, weaving together relevant aspects of technology, strategy, and policy. The material is approached from both functional and historical perspectives, exploring the basics of military and intelligence space operations and ending with an examination of the space-related technical, strategic, and political challenges facing the nation today and in the foreseeable future. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. Upon completion of this course students should be able to understand and evaluate policy proposals for national security space and intelligence systems, strategies, and operations. Students should be able to perform competent policy analyses, develop well-reasoned positions, and communicate those positions in concise, persuasive professional papers. The course is taught in three phases. Phase 1 focuses on the fundamentals of satellite operations. Here students explore, at a non-engineering level, the basic principles of orbit and learn what kind of military and intelligence missions are flown in space, at what orbit each mission is flown, and why. Phase 2 surveys key developments in space operations and national policy in the cold war. Students examine how military satellite programs developed during that period and what missions they came to support. Phase 3 examines America's dependence on space today, surveys emerging threats to the nation's space infrastructure, and considers the implications of these developments for U.S. National security policy. Students weigh the pros and cons of such controversial programs and concepts as ballistic missile defense, anti-satellite weapons, space control, and orbital weapons designed to attack targets on earth.

PIA 2343 - HUMANITARIANISM WORLD POLITICS
Minimum Credits: 3
Maximum Credits: 3
This course examines the politics of humanitarianism in international society. We will consider the moral principles underlying humanitarianism and evaluate how the humanitarian community actually function and why. The course will address both state-centric humanitarian responses (such as military intervention) and transnational humanitarian efforts (such as the work of NGOs in emergencies). It will focus on assistance rather than development, and on man-made rather than natural disasters.

PIA 2345 - GLOBAL INTRL SECU & COUNTERRSRM
Minimum Credits: 3
Maximum Credits: 3
This seminar is structured to assess the dimensions and importance of terrorism as a present and future security issue. It examines the internal security instruments and counterterrorist methods that states and militaries have at their disposal. Terrorist organizations are dynamic and are capable of adapting to counterterrorist efforts. For this reason, any program to combat terror, whether initiated by a single state or a consortium of states, must be flexible and adaptive. The class will seek to understand how this terror-counterterror dynamic plays out over time. Of necessity, the course will examine the role of 9/11 in reshaping the dynamics of internal security and counterterrorism in the 21st century. Looking back over the past seven years, what kinds of internal security infrastructure have been put in place in the United States and in other modern liberal states? Certainly there is some point where the nature of the modern liberal polity is altered by the application of economy-wide internal security measures. Are the European or Japanese constructions of terrorism and internal security, for example, similar to and/or compatible with those of the United States?
Counterterrorism has become a major element of U.S. Contemporary foreign policy. It has exerted a strong influence on our relations with our allies, and has engendered anti-American sentiment among less friendly states and transnational organizations and networks, especially in the middle east, but globally as well. The class will analyze the dynamic between recent foreign/military policy and what some commentators have characterized as the rise of global jihad. Throughout the term, we will be alert to the causes of terrorism and the inability in many cases of states to address them. Each student in this class will write an internal security country case study, to be selected in consultation with the instructor. The end result will be an enhanced understanding of the workings of terrorism, counterterrorism, and the global dimensions of internal security.

PIA 2349 - ISSUES AMERICAN INTELLIGENCE
Minimum Credits: 3
Maximum Credits: 3
This course focuses on issues of U.S. Intelligence clandestine operations, intelligence analysis, and how U.S. Policymakers use them, as well as selected current intelligence topics, such as terrorism, weapons of mass destruction, North Korea, and China. We consider these issues against a backdrop of traditional American views on the ethics, morality, and the proper roles of U.S. Intelligence. As part of the students' professional development, the instructor also teaches the students to write brief analytical-style memoranda, which is useful in any professional career. By the end of the course, the students are conversant with the structure and functions of the U.S. Intelligence community and selected foreign intelligence services. Students are also proficient at writing short intelligence-style analytical memos, and at presenting short oral briefings on analytical topics.

PIA 2351 - ESPNGE COVERT ACTN & COUNINTEL
Minimum Credits: 3
Maximum Credits: 3
Few aspects of intelligence are as misunderstood or wrongly portrayed as human intelligence (HUMINT). Movies, books, television, and even scholarly works do not address the nuances of the oldest profession: stealing secrets. This course will provide an in-depth examination of the role, impact, and conduct of HUMINT espionage, covert action, and counterintelligence. Emphasis will be placed on gaining as complete of an understanding of these three disciplines as is possible in an unclassified setting. Case studies and readings taken from actual events will form the basis of students conducting operational role-playing, target analysis exercises, agent recruitment, handling, debriefing, and report writing. Extensive practical tradecraft exercises will give these classes added realism. Readings will also be drawn from published memoirs of recently retired CIA operations officers and historical studies of modern US intelligence operations. The course grade will derive from a mid-term essay exam, but the majority of the grade will come from class practical exercises where students will learn and demonstrate tradecraft skills.

Academic Career: GRAD
Course Component: Lecture
PIA 2352 - STRATEGY AND POLICY
Minimum Credits: 3
Maximum Credits: 3
This course examines the nexus of military strategy and national policy, exploring the development and use of military power for political ends. In short, it is about how states make war. The course is designed to investigate several interrelated themes. First is the role of military theory as a foundation for doctrine and strategy. The second explores the relationship of military strategy to national objectives and political decision-making. The context in which the foregoing issues are examined is provided in the third theme: the social, technical, and intellectual evolution of warfare from the early nineteenth century to the present. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. The course is taught in five phases; the first is foundational and the four that follow are historically oriented. The course phases are: (1) basic concepts and theory; (2) the 19th century through the first World War; (3) the interwar period through the second World War; (4) the cold war; and (5) the post-cold war era and beyond. Phase 1 lays a theoretical foundation that students apply in analyzing historical developments presented in each of the four subsequent phases. Additional theories are introduced in phases 2 through 5 in context of the technological and intellectual developments that inspired them. In each of these phases, students also explore the evolving nature of civil-military relations and the impacts of social, intellectual, and technological developments on military strategy and national policy. At the end of the course, students are invited to synthesize their knowledge of military theory, strategy, and policy to assess the strengths and weaknesses of current U.S. Strategic thought and discuss prospects for more effective strategies and policies in the future.

PIA 2354 - HIST OF AMERICAN INTELLIGENCE
Minimum Credits: 3
Maximum Credits: 3
This course is a survey of the history of U.S. Intelligence agencies and their roles in defense, foreign, law enforcement, and commercial policy. We focus on historical U.S. Trends in intelligence collection, analysis, covert operations, and how U.S. Policymakers have used them. We compare U.S. Approaches to intelligence in times of both peace and war. We contrast U.S. Intelligence methodologies with those of both our allies and our opponents. We spend some time examining the historical arguments in the U.S. Over ethics, civil liberties, resources, and the proper roles of U.S. Intelligence. Finally, we consider how these historical trends inform and influence the current evolution of the U.S. Intelligence community. The course is taught by a serving CIA operations officer with over three decades of experience in intelligence and diplomacy. He has served in East Asia, Europe, Latin America, the U.S., In CIA headquarters, and most recently in South Asia.

PIA 2355 - WWII, COLD WAR & IMPCT DVLPNG
Minimum Credits: 3
Maximum Credits: 3
This is a policy-relevant history course that examines the international relations of the 20th century, as well as the lasting legacy of the cold war today. After discussing the causes, conduct, and consequences of World War II, students study the rise of the soviet union and iron curtain, postwar trusteeships, and the process of decolonization by which large swaths of Africa and Asia obtained their independence. Class lectures cover just war theory, the geopolitics of war, the rise of NATO, and the major cold war conflicts in Cuba, Afghanistan, Iran, and Vietnam. Using historical case studies, students learn important practical skills useful for a career in diplomacy, international negotiation, or statecraft, as seen through the eyes of master practitioners.

PIA 2356 - MODERN IRAN
Minimum Credits: 3
Maximum Credits: 3
This course covers the contemporary political structure and the recent historical development of the middle eastern state of Iran from the pre-revolution period forward to the modern day. Historical themes emphasized in this course include political Islam and theocratic government, US-Iranian relations (both pre-1979 and post-1979), oil and politics, the nuclear question, sectarian politics and political violence, and Palestine-Israel in the contemporary political setting. Course topics to be delivered focus on the modern epistemology of Iranian politics, history, and culture and use as the fulcrum of this analysis the 1979 revolution and its impact upon both regional and global societies. A common theme running through this course will be the relationship between Iran and the West, specifically the relationship between the current Iranian government and the United States since the 2008 presidential election. Students will access these and other topical themes through weekly class readings and authorship of original academic reviews, as discussed below. In addition students will author an original research paper of substantial length at the conclusion of the semester which will be based upon individually designed and instructor-approved research questions.
Academic Career: GRAD
Course Component: Lecture

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2357 - CHALLENG OF MILITARY TRANSFORM
Minimum Credits: 3
Maximum Credits: 3
This course examines current trends in U.S. Defense transformation from the perspective of meeting the principal challenges of the post-cold war security environment. Transforming the defense establishment has been likened to producing a revolution in military affairs (RMA), in which technologies are incorporated into a militarily significant number of systems, which are then combined with innovative operational concepts and new organizational adaptation to produce quantum improvements in military effectiveness. The course will: look at the rationale for military transformation; define transformation; discuss methods for implementing transformation and; will examine current trends and challenges to U.S. Defense transformation. Besides coming to grips with the formidable challenges of fighting a global war on terrorism, the military must adapt to the requirements of fighting more effectively in myriad environments: urban terrain and counterinsurgency settings; multi-national coalitions; high intensity warfare and; lawless areas with little governmental control. These challenges will be examined in light of resistance strategies that state and non-state actors might wish to employ so as to thwart the goals of U.S. Military transformation.

PIA 2358 - POL ECONOMY INT'L FINANCIAL SYS
Minimum Credits: 3
Maximum Credits: 3
Why do states select the economic financial policies that they do, and with what effects? This elective course introduces students to the interplay of politics and economics within international financial system. Topics include the trilemma (fixed exchange rates, free capital movement, and independent monetary policy), and how reputation and perception ' distinct from policy choices ' have real effects in areas as diverse as credit ratings, sovereign debt, and political risk. We will analyze large, rising powers within the international financial system, and explore the strength of financial and monetary policy special interests. Group presentations throughout the semester will address current events, touching upon each of the BRICS countries. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policy-makers who are non-experts in the specific topic under consideration.
Academic Career: GRAD

PIA 2359 - ETHNIC CONFLICT AND CIVIL WAR
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

**PIA 2361 - LIBTY/SECRTY AGE/INFO WAR TERR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course considers the societal, political and legal dimensions of emerging technologies within a broader theoretical context of liberty, security and democracy. The events of September 11 and the rise of the information age pose distinct challenges to the balance between liberty and security in a democratic context. As society becomes ever more information-based, the tendency, and perhaps necessity, of individuals to distribute their personal information continues to increase. Yet, as personal information becomes more important and is accessible to a greater number of people and institutions, concerns of privacy protection and civil liberties abound. Couple the escalating information society with the increasing reliance on technology for the purpose of intelligence gathering and surveillance in the aftermath of September 11, 2001 and the result is a growing public policy debate regarding the balance that should be forged between liberty, security and democracy. The course will first explore the theoretical underpinnings of democracy with a specific focus on the concepts of liberty and security. From here we move into a discussion of the regulatory challenges prompted by the events of September 11 and the rise of the information age and explore the implications for privacy, liberty and security. This portion of the course will focus on traditional doctrines of privacy and civil liberties and consider the impact of September 11 and the information age on the protections afforded under existing constitutional, statutory and international guidelines. The next section of the course will focus on the emerging technologies associated with information gathering and surveillance under the auspices of the war on terror and the rise of the information age. We will consider how the existing regulatory framework provide for the protection of privacy, civil liberties and security and explore the changes in regulation brought about because of the nature of technological innovation and waning importance of geographical and territorial space in legal doctrine both domestically and abroad. This portion of the course will also consider the potential role for technology as a protective of privacy and civil liberties.

**PIA 2362 - FOREIGN POLICY AND DIPLOMACY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Examines institutions and processes through which states conduct their relations. The course looks at foreign policy as a function of national government, the special problems it poses for executive and legislative institutions, the role of bureaucracies in shaping foreign policy, and the normative issues that foreign policy raises in democracies. It also deals with the history and conventions of diplomacy.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2363 - INTERNATIONAL HISTORY**
Minimum Credits: 3
Maximum Credits: 3
This course examines how history can inform policymaking. It does this by looking at key watersheds in international history - watersheds that continue to shape the world in which we live. One immediate goal of the course is to acquaint you with these watersheds, to increase what one might call your historical literacy - your knowledge of these key points in time - and your understanding of how these times continue to affect us. But the course does not stop with understanding, but tackles the question of how to act on that understanding. Unlike graduate history courses that focus on the "how" of history (how to research and write history - how we learn what happened), this course focuses on the "what" of history...And specifically what we do in light of what has happened. The idea is not just that history teaches lessons or that history can repeat itself or that "those who cannot remember the past are condemned to repeat it," but that an appreciation of how events have unfolded in the past may make us better able to deal with the complexity of what is going on at present.

Academic Career: GRAD

PIA 2365 - TRANSNATIONAL CRIME
Minimum Credits: 3
Maximum Credits: 3
Since the end of the cold war, threats to national and international security have become more varied and diffused. Some of these threats are subtle and insidious rather than overtly military in character. Transnational organized crime has this character. The course is intended to provide substantive knowledge about major transnational criminal organizations and the threats they pose to domestic and global governance and to international security and stability. Accordingly, it places the challenge posed by transnational organized crime in the context of broader issues of globalization, governance, and disorder. The purpose of this course is to examine the phenomenon of transnational organized crime, in all its variations and manifestations, to identify major transnational criminal organizations and activities, to assess the threat posed to national and international security and stability, and to evaluate the policy implications of this threat. Attention is given to the initiatives governments have taken in response to the transnational crime challenge, and an assessment made of the adequacy of these initiatives. Throughout the course students will be encouraged to become familiar with analytical techniques that are used by intelligence and law enforcement agencies in understanding, assessing, and responding to organized crime.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2366 - INTERNATIONAL ORGANIZATIONS
Minimum Credits: 3
Maximum Credits: 3
This course examines multilateral diplomacy and international cooperation, paying special attention to the role that institutions play in shaping the modern world. Students learn practical skills relevant to a career in a multilateral setting, as well as information about the history of major institutions and some important political science theories on the nature of cooperation. The class is divided into three parts: part 1 examines the role institutions play in international politics and covers the various theoretical debates surrounding their efficacy. Part 2 covers the history, structure, and function of major international organizations like the united nations, NATO, the European union, African union, organization of American states, and others. Part 3 examines some managerial techniques important to working in a multilateral setting, and is designed to give students concrete skills that will be important in a career in multilateral diplomacy.

Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2367 - NUCLEAR WEAP POLC:PAST & PRES
Minimum Credits: 3
Maximum Credits: 3
This course examines the theories and concepts that have informed nuclear policies of the United States beginning in the 1960s, the evolution of U.S. Policy from the cold war to the contemporary debate, and the relationship of U.S. Nuclear policy to arms control and non-counter proliferation policy. The course analyzes cold war developments in U.S. Nuclear strategy, strategic arms control, and efforts to stop the global spread of weapons of mass destruction. In the examination of post-cold war nuclear issues, the course analyzes how a dramatically changed and dynamic international environment is affecting the basic cold war precepts of past policies, and the new directions in U.S. Nuclear strategy, arms control, and force requirements that have been proposed in response to these changes. The course includes analysis of the political and moral issues associated with nuclear weapons and strategy. Because of the interrelationship between nuclear weapons policy and the history of the cold war, the course includes discussion of the historical, political and cultural contexts of particular nuclear policies.

PIA 2368 - MULTINATIONAL REGIONALISM
Minimum Credits: 3
Maximum Credits: 3
This course is meant to give students of international organizations a detailed overview of world institutions which work primarily at the regional scale. Three types of multinational regional organizations will be covered: regional collective defense alliances, regional affinity groups, and regional economic blocs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2369 - INTEL SUPRT POLCYMK:IMPCT 9/11
Minimum Credits: 3
Maximum Credits: 3
This graduate elective course focuses on how, why, and to what extent the attacks of 9/11 altered the role of the intelligence community in supporting the needs of American policymakers. The course includes guest speakers, of national and international standing, on national security policymaking and intelligence collection and analysis. This course prepares students interested in either policymaking or intelligence careers to understand the changing character of intelligence and its proper relationship to the policymaking process. In other words, how do policy officials make best use of the intelligence community and how do intelligence officials best serve the needs of effective policymaking. The course focuses on the following topics: the nature of intelligence failure; the emergence of, and challenges relating to, new security threats; alternative analytical approaches to intelligence assessment; the role of new intelligence collection techniques; the role of information technology and tradeoffs between improved intelligence collection and protecting civil liberties; the role and effectiveness of congress in overseeing the intelligence community; and the impact of 9/11 intelligence reforms. A case-study approach is employed to address most of these topics.

PIA 2370 - TERRORISM AS INTELGNC PROB
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the important and topical issue of international terrorism and how the U.S. intelligence community responds to demands from U.S. policymakers and allies to detect terrorist threats, to collect intelligence on terrorist groups, and to analyze and assess their intentions, plans and capabilities. Rather than examining international terrorism from a theoretical point of view, we will look at the tactical and strategic issues of most concern to the U.S. intelligence community.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2371 - NORTH-SOUTH RLTNS & INT'L ECON
Minimum Credits: 3
Maximum Credits: 3
Addresses the issue of the debate between first and third world countries over the terms of trade and distribution of the world product. Examines the contrasting interests of nation states and international organizations. It considers alternative solutions and their policy implications.
PIA 2372 - POLIT OF GLOBL ECON RELATION  
Minimum Credits: 3  
Maximum Credits: 3  
This course examines the politics of a wide variety of international economic relationships. It is based on the premise that economic issues have emerged alongside of traditional power and security issues as central to an understanding of contemporary world politics. The course will examine the politics of trade, monetary affairs, multinational corporations, technology and aid.

PIA 2373 - INTERNATIONAL POLITICAL ECONOMY  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

PIA 2374 - THEORY OF INTRNATNAL RELATION  
Minimum Credits: 3  
Maximum Credits: 3  
This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical questions areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

PIA 2375 - CHINA IN THE WORLD  
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2376 - TRANSATLANTIC RELATIONS  
Minimum Credits: 3  
Maximum Credits: 3  
This course examines the changing patterns of the United States' relations with its partners in Europe as (1) the EU adapts its institutions to an enlarged community that embraces most of the continent and (2) the United States strives to sustain its hegemonic position. Earlier post-Cold War conditions forced a rethinking of euro-American ties and of multilateral institutions. Now that process is complicated by repercussions from the 'war on terrorism' and the Iraq affair as well as the impact of the global economic crisis. Moreover, attitudes and interests of forces outside the Atlantic world impinge directly on foreign and domestic policies alike. Governments on both sides of the Atlantic-partners in the effort to build an open, democratic world system—are at odds over a host of issues. From the American and diverse European perspectives, the course considers the shifting terms of cooperation/rivalry between U.S. and European governments; the interplay among the process of European construction, the reorientation of NATO, and the insular tendencies within Western societies; topical disputes over Iran, Afghanistan, managing financial institutions and operations, and the Tokyo treaty on global warming; the differing strategies for contending with the multiple elements of globalization which affect all items on the euro-American agenda. Stress is placed on how these matters are viewed and interpreted from the vantage of various governments and
institutions. To make sense of thinking and behavior it is essential to place policy issues in a multi-layered context that includes historical experience, political culture, governmental structures, and current politics. Central is how the U.S. and Europeans view one another. Upon completion of this course, students should have an informed understanding of how countries on both sides of the Atlantic view their external relations and the place of the other in their diplomatic fields of vision. They should be able to interpret the interplay between domestic and external politics, the influence of the EU, and characteristic diplomatic styles of each party. Sensitivity to the behavioral nuances of the European-American pattern of interaction is an ancillary goal.

PIA 2379 - INTRODUCTION TO CYBER CRIMES
Minimum Credits: 3
Maximum Credits: 3
Traditionally, crime has taken place in the physical world. Since the dawn of the internet, criminal activities on the web have been continually increasing. Crime is no longer restricted to a town, city, state or even country because internet crime transcends all different types of jurisdictions. In this course, students will learn the types of crimes that occur online, as well as receiving an overview of how these crimes are conducted. Since this course focuses on computing technologies, students will be given the basic necessities needed to understand the technologies they will be utilizing throughout this course, as well as future courses. Students will learn safe computing practices and how to gather the necessary data to help track down criminals on the web. Topics covered will include introduction to various technology topics, distributed denial of service attacks, ecommerce fraud, counterfeiting, 0-day exploits, discussion on various cyber criminals and nation state threats, etc. Lastly, students will learn about the different organizations, both public and private, and the various policies and laws that are intended to counter the increase in cybercrime.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2380 - ADV INDUSTRL STATE INT'L ECON
Minimum Credits: 3
Maximum Credits: 3
Examines the implications of the variations in the domestic structure of advanced industrialized nations for their prospects of achieving power and prosperity in the international system. The course will therefore examine the subsystemic factors that constrain or enhance state action in response to systemic pressures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2381 - POL STRATEGY IN INTERNTL RLTNS
Minimum Credits: 3
Maximum Credits: 3
The research seminar is designed to evaluate the theoretical underlay of the literature relating to diplomatic strategy and to explore the possibilities of adding to or developing further theories of diplomatic strategy. The course will look at various peace strategies at the highest level of analysis, e.g. containment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2382 - THEORY & CONCPTS COMP POLITICS
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytical frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytical tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state aid to making policy.
Academic Career: GRAD

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2386 - U.S. POLICY TOWARDS AFRICA
Minimum Credits: 2
Maximum Credits: 2
This course, taught by a former us ambassador to the Congo, Somalia and the central African republic, will examine comparatively some major
themes and dilemmas in U.S. Relations with sub-Saharan Africa. It will consider in turn the history and current problems of at least four contrasting African states - Nigeria; the central African republic; the democratic republic of the Congo (formerly Zaire); and Somalia - and will explore the goals and course of U.S. Relations with each state. The course will conclude with an assessment of these cases (and others studied by students) as a basis for an appropriate continent-wide us policy toward Africa.

Academic Career: GRAD

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2387 - NATO AND ALLIANCE MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the organization and operation of history's most successful alliance, the North Atlantic treaty organization, as a key forum for international cooperation. In today's world nations are working together more intensely than ever and on a wider range of challenges. Thus, students who want to work in any branch of government are likely to find themselves working with their counterparts in other countries, particularly if they work in military and security related areas. Moreover, even if they are working in non-military fields, they may find themselves working alongside NATO-led forces, where an understanding of how the alliance works would also help. Throughout the course, students will follow and analyze current developments at NATO, and they will also be introduced to its history since 1949. Special attention will be paid to NATO's crisis management missions in Bosnia, Kosovo, and Afghanistan, as well as to NATO's relations with partners, including Russia, and with other international organizations, including the European Union and the UN. There will also be an emphasis on negotiations among allies at NATO. Normally the course will include a field trip to Washington to meet people working on NATO issues today. At the conclusion of the course, students will also participate in a NATO crisis management exercise that they design and execute. The goal of the course is to develop the knowledge and skills necessary to function effectively in a key international organization.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2388 - INTERNATIONAL LAW AND POLICY
Minimum Credits: 3
Maximum Credits: 3
This course explores the development and application of international law to relations among states and its expansion to non-state actors (e.g., private individuals, international organizations, NGOs, and multinational corporations). Students learn how and why international law is created and develop an understanding of the mechanisms and institutions of its enforcement. Students learn about inter alia, the nature of international disputes, the subjects of international law, and the forums in which disputes are settled. Students understand the emerging challenges faced in an international law paradigm including organized violence, global markets, cultural coherency and conflict, identity and citizenship, technological evolution, and environmental regulation. The course is organized into three parts: 1) historical and theoretical foundations of international law; 2) emerging conflicts and existing paradigms; and 3) analysis of public policy solutions. Each student is required to participate in roundtable discussions on case problems as assigned. For an assigned number of roundtables in which a student does not participate, he/she is asked to provide a policy analysis of the given roundtable presentation, including an assessment of the various positions and the applicable law.

PIA 2390 - TOPICS IN INTERNATIONAL AFFRS
Minimum Credits: 3
Maximum Credits: 3
Topics in international affairs will explore specific current issues in international affairs.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2391 - ECON/BUDGT POLC-INT'L**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course takes a comparative approach to how governments decide on economic and policy priorities and considers how such priorities are reflected in budgetary planning.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2392 - POST-CRISIS STABILIZATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This introductory course is designed to provide students with a greater practical understanding of the realities of the provision of humanitarianism assistance as presently practiced. Participants will be given important background information and will work with analytical tools essential to understanding the roles, structures, and missions of the organizations engaged in response. This practical knowledge will be presented within the context of the recent literature and debates increasingly focusing on post-crisis intervention. The course is intended to enable graduates to move beyond the conventional headlines to a clearer and more pragmatic understanding of events. Students will learn the fundamentals of working in a post-conflict environment and skill essential to pursuing a professional career. Class sessions will make regular use of internet services to enable students to gain real-time exposure to serving humanitarian workers.  

**Academic Career:** GRAD  
**Course Component:** Lecture

**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2394 - ISS IN GLBL ECON & FINCL SECU**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will discuss trends in global economic and financial security and ways to enhance it. The focus will be on ways to ensure global monetary and financial stability, including through appropriate regulation to reduce the incidence of financial crises and asset price bubbles. Other critical issues, including food and energy security and the role of finance in promoting development, will also be discussed. Although this is a policy course, students should expect to learn a good deal of economics and finance in the process of learning about these issues. These will be important intellectual tools as the future policy discussions on economic security and development will likely continue to focus more and more on finance and thus require more knowledge of finance than in the past. This course will be less narrowly technical, more policy and political economy oriented, but nonetheless appropriate for students concentrating in global markets, development, finance and trade.  

**Academic Career:** GRAD  
**Course Component:** Lecture

PIA 2398 - STRENG INTR-AGENC NEGTN

Minimum Credits: 3
Maximum Credits: 3
This course will be useful for those interested in conflict resolution, international affairs decision-making, and the bureaucratic politics of policy. Negotiations skills will be promoted.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2399 - INT'L ECONOMIC ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This elective course examines international organizations, with emphasis on institutions that govern countries' international economic policies and that affect international economic flows. We will study the Bretton woods institutions (the GATT/WTO, the IMF, the world bank) in-depth, along with regional economic arrangements (the EU), the OECD, the foreign aid regime (DAC), the system of bilateral investment treaties (BITs), international financial regulatory bodies (such as the BCBS, the FSB, and the FSF), and OPEC. Students will learn about international economic dilemmas that arise within an anarchic international system, and arrangements among countries to mitigate and govern such issues. Students will study how power and political processes work within and outside of international institutional arrangements. At the end of the course, students will be able to analyze the role of international economic organizations as both amalgamations of states that hold varying preferences, and as autonomous actors, within the international system within current events. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphics/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policymakers who are non-experts in the specific topic under consideration.
Academic Career: GRAD
PIA 2401 - THE AMERICAN WAY OF DIPLOMACY
Minimum Credits: 3
Maximum Credits: 3
This course examines how the United States government conducts relations with foreign governments and international organizations. Its main focus will be the state department and embassies, but it will also look at the role of the president and the national security council, the pentagon and other government agencies, and congress. Key concerns will be the interagency process and the interaction of Washington with overseas missions. The course will acquaint students with how the state department and embassies are organized and function. It will discuss how recent secretaries of state have used the department's machinery. Throughout the course, students will be introduced to the relevant functions of foreign service officers. At the conclusion of the course, students will participate in a diplomatic crisis management exercise that they design and execute. The goal is to develop the professional drafting, reporting, briefing and policymaking skills required to function effectively in Washington's foreign affairs community.

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2407 - IDEAS AND PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
In recent years, political scientists have devoted considerable attention to the "power of ideas" and "knowledge" as determinants of political change. This course will critically evaluate these emerging research programs and attempt to synthesize their insights. A major goal will be to "cut across" the traditional divide that separates comparative politics and international relations (IR) theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2408 - DMCRTC THRY & DEMOCRATIZATION
Minimum Credits: 3
Maximum Credits: 3
The course has three objectives for students: 1) to develop a broad knowledge of the main currents in modern and contemporary democratic theory and a familiarity with their main problems; 2) to study how normative theories of democracy inform or might inform processes of democratization; 3) to apply this knowledge in solving some puzzle or problem by comparing cases, assessing claims, developing arguments, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2409 - PROPSL WRITING & GRNTSMANSHIP
Minimum Credits: 3
Maximum Credits: 3
This course will be conducted in workshop format. It is designed to help students write proposals for dissertation research, but will also cover more generally the area of grantsmanship. The approach to the course will be to focus on each student's own research project. Students will draft and submit for collective discussion different components of their proposals, leading up to a completed grant proposal ready to be submitted to one or more agencies for funding during the next cycle of competitions.
Academic Career: GRAD

PIA 2410 - AMERICAN LEGISLATIVE PROCESS
Minimum Credits: 3
Maximum Credits: 3
Focus is on the journal literature of the last decade involving representation, legislators and their behavior, legislative structures, legislative parties, interest groups, executive-legislative relations, legislative reform, national and subnational legislative systems.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2411 - AMERICAN FOREIGN POLICY
Minimum Credits: 3
Maximum Credits: 3
For students who already have some knowledge of this subject who wish to broaden or deepen their understanding. The course deals with major issues of U.S. foreign policy mainly through readings and discussions. Topics such as domestic sources, trade deficits and protectionism, nuclear and conventional arms control, deficit spending and U.S. Strategy, soviet-American relations, China and its triangle, and vulnerable authoritarian regimes will be examined.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2412 - ANLZNG CRITL INT'L SECU CHAL
Minimum Credits: 3
Maximum Credits: 3
This course consists of three 15-hour weekend workshops 'meeting Friday 6-9pm, Saturday 9am-5pm (1-hour lunch break), and Sunday 9am-1pm'each of which explores a critically important international security topic in the news today. The topics planned for 2015 include: the pros and cons of nuclear abolition; assessing the need for missile defenses; and analyzing China's military capabilities. Using films, lectures, discussion and debate, and group simulations, these workshops will expose students to the key factors shaping each security challenge. The objective is to promote balanced and critical thinking in assessing threats and evaluating choices facing security and intelligence practitioners. In addition to a reading list of articles and monographs' all downloadable or available via the university's digital library' and two books (both provided courtesy of the instructor), the syllabus also provides students with a bibliography of books, journal articles, and major monographs for those wishing to pursue more advanced study. Grades will be determined on the basis of classroom participation and three take-home essays.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2413 - CULT & COGNTN IN FORGN POLICY
Minimum Credits: 3
Maximum Credits: 3
The "organizational culture" perspective examines the rituals, beliefs, and deeply embedded assumptions shared by members of an organization. The "organizational cognition" perspective places concepts such as learning, problem solving, and memory in an organizational context. In this seminar we will consider the potential utility of these contending perspectives for explaining leadership, choice, implementation, and change in foreign policy organizations.
Academic Career: GRAD

PIA 2414 - INTERAGENCY PROC & INTEGRATION
Minimum Credits: 3
Maximum Credits: 3
This course is intended for students who anticipate government careers who must be acquainted with the problems and opportunities that come from the combined expertise of various government agencies in addressing a policy problem through an integrative, "whole of government" approach. While the term "interagency" sometimes connotes military and civilian cooperation, this course will examine the concept of interagency broadly as cooperation between two or more government organizations. The first third of the course will examine the history of interagency cooperation at the highest-levels of government decision-making. In the second third of the course, we will use a case study approach to examine significant policy problems that the U.S. Government has attempted to address using experts from multiple agencies. A special attention shall be paid to reconstruction efforts in Iraq and Afghanistan. The last third of the course will entail role-play of various levels of U.S. Government decision-making as we tackle a series of hypothetical but practical problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2415 - CYBER WAR AND INT'L RELATIONS
Minimum Credits: 3
Maximum Credits: 3
This course is a seminar on the strategies of defensive information warfare, with impacts and directions taken from discussion of recent international incidents involving information attacks (in Mexico, India/Pakistan, Georgia, Estonia, Taiwan, etc.). The instructional approach will mix lecture and class discussion, with strong emphasis on student participation. The primary course text will be Sun Tzu's art of war. Students will be asked to
prepare and present discussion during class, to submit two 5-10 page homework assignments, and to prepare a final paper or project. The general flow of topics will include an introduction, models of information warfare, offensive measures, defensive measures, target selection, international issues, impact analysis, profiles of information warriors, in-depth examples, policy responses to IW, and a course summary.

**Academic Career:** GRAD

PIA 2424 - FRGN PLCYS MIDDLE ESTRN STATES
Minimum Credits: 3
Maximum Credits: 3

PIA 2425 - INTERNATIONAL TRADE LAW
Minimum Credits: 3
Maximum Credits: 3

PIA 2426 - SPECIAL INTELLIGENCE TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to expose students to the key factors shaping three critical special intelligence topics that together are emblematic of the variety of major challenges facing intelligence practitioners and policymakers over the next decade. Case studies will be employed to illustrate each of the three special intelligence topics dealing with such issues as the intelligence/policymaker relationship, coping with the "politicization" of intelligence, recognizing the limitations of intelligence collection and analysis, and confronting tradeoffs between national security and personal liberties. Each workshop will commence with a film on Friday evening that is germane to the topic at hand. We then discuss and debate the film's implications, setting the stage for Saturday's lectures, class discussions, and possible group work or a guest speaker. On Sunday, we conclude with a national security simulation during which the class breaks down into smaller teams to address a challenging topic. Grading is based on class participation and the successful completion of a take-home essay due two weeks after each workshop.

PIA 2427 - UNITED STATES NAT'L SECURITY
Minimum Credits: 3
Maximum Credits: 3
National security professionals confront an international political environment that is volatile, uncertain, complex and ambiguous. For the us, this has meant adapting to new challenges, threats and opportunities. Whether the US has successfully adapted to these challenges remains an open question,
This course treads squarely into this minefield by examining the history of drug control policy in the United States and the internationalization of drug prohibition. The course is historical and comparative in orientation: in tracing the roots of the war on drugs and considering the experience of other countries, we seek to enhance our understanding of American style drug control and the feasibility of alternative approaches. Topics may include the history of drug control policy in the U.S. And internationally, the nature of drug abuse and addiction and current drug use patterns, the different components of drug control policy, such as crop eradication, drug interdiction, leadership decapitation, law enforcement, and drug treatment and prevention, the structure of the drug trade in the Andes, Mexico, Afghanistan, the golden triangle, and the U.S., The relationship between drug trafficking and terrorism/insurgency, including the role of the FARC and the Taliban and drug-related violence in Mexico, and alternatives to drug prohibition, including legalization and harm reduction. The course highlights similarities and differences between the war on drugs and the war on terror with an eye towards understanding how our experience with the first can better inform our response to the second.

PIA 2430 - ETHNIC POLITICS
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces students to the comparative study of ethnic politics. It provides an overview of theoretical questions and methodological innovations across four main topics: the sources of ethnic mobilization and cleavage choice; the consequences of ethnic mobilization for democratization; the impact of ethnicity on redistributive politics; and the relationship between ethnicity and patterns of political violence. Readings for each topic are drawn from various political science subfields as well as from other disciplines. They also reflect a range of regional contexts, including the United States, eastern and Western Europe, Latin America, South Asia, and sub-Saharan Africa. The purpose of the course is to provide graduate students with the background necessary for analyzing and developing policy responses to these issues, and for undertaking original research on questions relating to ethnic politics. It should enable them to critically engage recent scholarship, understanding which theories have yet to be adequately tested and which theoretically interesting questions have yet to be asked. Master's students may produce a written paper that analyzes a question in ethnic politics and proposes a policy response. Doctoral students should ultimately be able to produce a research paper that serves as the basis for a prospectus, dissertation chapter, or publishable article.

Minimum Credits: 3
Maximum Credits: 3
This graduate seminar will focus on a major issue of politics and policymaking in Japan in comparative perspective, examining the relationship between state and society in Japan and its similar and unique elements to other advanced industrialized societies. Theme of the course may vary.
PIA 2434 - CIVIL-MILITARY RELATIONS
Minimum Credits: 3
Maximum Credits: 3
This course explores the relationship between militaries and the polities they serve. Militaries remain crucial institutions in the modern world, serving as the guardians of sovereignty and safety. However, militaries also possess the tools and capability to threaten the very people and polities they are meant to protect. Striking the proper balance between military capability and civilian control of the armed forces is therefore an essential task for all states. But how is this delicate balancing act to be achieved? What factors make success and failure in this venture more or less likely? In exploring these questions, we examine classical theories of civil-military relations and the direct rebuttals they spawned. We also consider some of the key issues in the study and practice of civil-military relations, including coups, the influence of civilians on battlefield performance, challenges raised by the increasing presence of civilian contractors on modern battlefields, the 'gap' between military and civilian values and beliefs, and the impact of the military's presence on college campuses. We conclude by examining the confluence of the various facets of the civil-military relationship and their manifestation in the George W. Bush and Barack Obama administrations.

PIA 2436 - PEASANT POLITICS
Minimum Credits: 3
Maximum Credits: 3
This course will look at Chinese politics from the point of view of the peasants, and at the rural sector as a set of problems (historically as well as currently) for those in power. In order to provide a comparative perspective, we shall also look at some important books on peasant life in southeast Asia and Latin America. Some of the topics to be addressed are: the nature and structure of peasant society; the political economy of rural life; forms of peasant political activity; peasants and the modern state.

PIA 2438 - FORGN POLICY OF PRC, 1949-2000
Minimum Credits: 3
Maximum Credits: 3
This course will explore Chinese communist foreign policy during the Maoist (1949-1976) and post-Mao years. We will focus both on PRC policy towards specific regions (the U.S., Europe, Africa, Taiwan, and the Middle East) as well as issue-areas (such as economic development, civil-military relations, trade, human rights, intellectual property rights). In the course we will attempt to sift through various explanations of Chinese foreign policy.
Academic Career: GRAD
Course Component: Seminar
PIA 2439 - ARAB REVOLUTION & SOCIAL MOVMS
Minimum Credits: 3
Maximum Credits: 3
In this course, students will study the 2011 Arab revolutions as politics in process, and consider the factors that led to the current uprisings as well as the path that each continues to take. During the course, we will pay particular attention to the issues, conflicts and questions people face every day in volatile times. Was this a media-inspired revolution? What are the class and sectarian dynamics of the Arab spring? How can we begin to think critically about gender issues in the region? What are the specificities of each revolt? As the events are ongoing and unfolding, this course needs to remain flexible so as to react and respond to the most current events. Therefore, the course will largely be driven by student research that will be the basis for class discussions.

PIA 2458 - POLITICAL ISLAM
Minimum Credits: 3
Maximum Credits: 3
In the past several decades and especially since September 11, 2001, societies and policymakers around the world have debated the compatibility of Islam and democracy, the growth of violent Islamist movements, and the relations of such movements to terrorism and suicide bombings. In many instances, such debates seem to boil down to a 'clash of civilizations.' To explore these issues we will examine a diverse body of literature drawing on literature in political science, anthropology, economics, sociology, and history. The empirical focus on the course will be Muslim-majority countries in the Middle East as well as Central and South Asia. This course begins by investigating the nature of the state in Islamic history and thought. We will explore the interaction between religion and the state prior to the rise of 20th century Islamist movements, focusing on the case of the Ottoman Empire. We then explore the rise the origins of contemporary Islamist movements, beginning with the Muslim brotherhood in Egypt. We then consider a range of country case studies from around the Muslim world and explore several key questions: what are the intellectual origins of such movements? What impact do they have upon domestic politics in the countries where they emerge? Are islamist movements compatible with democratic forms of governance? When do such groups engage in violence? How have governments responded to such violence and to what result? The course will explore these and other pressing questions by examining a broad range of movements (both violent and non-violent) in authoritarian and democratic settings, as well as in failed or persistently weak states.

PIA 2459 - POLICY APPLICS OF GAME THEORY
Minimum Credits: 3
Maximum Credits: 3
This course is aimed at introducing game theory to graduate students in public policy. Game theory is a mathematical methodology for theory building, the use of which has ballooned within several disciplines, including political science and economics. As with any methodology, the ability to use game theory well comes only after much practice and exposure, more than can be achieved in one semester. However, the course has two goals, both of which are aimed at providing a foundation for understanding scholarly work in a policy context and for going on to future training in game theory if you desire. The first goal of the course is for students to understand some of the main types of strategic settings (games), and how to predict what strategies actors (players) will choose in those settings. In the first part of the course we will cover games of perfect information, which are games in which the players know all the relevant information about the strategic interaction in which they find themselves, including the other players' preferences. This is only one type of strategic setting. The final part of the course will touch on games of imperfect information, in which players are not certain of key aspects of the strategic environment. Other extensions of game theory are left for future classes. The second goal of the course is to give students a perspective on theory (in general) and how it is relevant to making policy prescriptions. We will of course be focused only on one type of theoretical argument 'game theoretic ones' but some of the ways we use game theory will hopefully illustrate the importance of theory of any kind. Like any methodology, game theory has limitations, and like most, it can often be useful if employed properly. During the course, the goal is that students will gain an understanding of how game theory can be helpful for thinking about policy.

PIA 2460 - LAT AM SOCIAL & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, glonacal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in
interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).

### PIA 2461 - THE U.S. IN THE MIDDLE EAST

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course investigates the recent history of political, economic, and cultural interaction between the United States and the Middle East. The course will be conducted as a text-based, investigative seminar as opposed to a traditional, chronological history. Themes to be explored throughout the semester include the politics of oil, interactions between Islam and the West, American culture and politics post-9/11, Iranian-US relations, Iraq since 2003, and the ongoing Palestinian-Israeli conflict. Students will access these and other topical themes through weekly class readings and authorship of original academic reviews, as discussed below. In addition students will author an original research paper of substantial length at the conclusion of the semester which will be based upon individually designed and instructor-approved research questions.

### PIA 2492 - EURP HUMN SECU/SECU DVLP NEXUS

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Because of Civil Wars in several parts of the world, especially in sub-Saharan Africa, the international organizations have reshaped their development agenda by emphasizing the importance of security and peace as preconditions for development. This approach has been explicitly mentioned among the aims of the United Nations by Secretary-General Kofi Annan in his roadmap for the implementation of the un millennium summit. In parallel, the concept of human security has been promoted by several Western governments, NGOs and independent commissions in
order to take into account the need to address not only state security needs but also human individuals' vulnerability in crisis situations. Aid policies have taken into account these evolutions, though the concept of human security itself has been discussed in a controversial way. The European union is progressively integrating it into its security agenda and has started 'securitizing' its development agenda and African policy, including instruments like the Cotonou convention with African, Caribbean and pacific states. The course explores the reasons for the merging of security and development policies in the European union and its member states and the emergence of a European human security agenda, within the wider context of the united nations, world bank and the OECD. The focus will be European policies towards crisis areas (Balkans, Caucasus, middle east, great lakes Africa, South and South East Asia) and peace building activities like: regulations about antipersonnel landmines, small arms and light weapons, conflict timber and conflict diamonds; policies of conditionality and sanctions; assistance to transitional justice; peace building, security governance, security sector/system reform in fragile states.

PIA 2501 - DEVELOP POLICY & ADMINISTRATION
Minimum Credits: 3
Maximum Credits: 3
This is a survey of development policies, issues, institutions, and resources for professionals working in development. Lectures, discussions, and presentations in class focus on analysis of development policies, and on new and significant policy issues, skills, methodologies, and resources. The course helps students develop the ability to analyze development issues from several perspectives, understand the breadth of international development as a field of professional service and academic study, and clarify their priorities for acquiring skills in preparation for that service.
Students completing the course will be able to grasp the history of approaches and experiences with development, identify and critically analyze major institutions involved, assess political and institutional environments of development, employ some key social science and administrative tools, and recognize and understand principles of other significant skills and emerging methodologies in development practice. The course is organized in three parts: 1) dynamics of development and social change; 2) development management: who's in charge; And 3) contemporary issues and skills. Throughout the course we will introduce, discuss, and return to case studies that illuminate key issues and themes: the global HIV/AIDS pandemic, microfinance programs in development, the chad-cameroon oil pipeline project, water system privatization, and the global and local food prices and production.

**PIA 2502 - GLOBAL ENVIRONMENTAL POLICY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The 1992 Rio Declaration on environment and development states that 'to achieve sustainable development, environmental protection shall constitute an integral part of the development process.' We discuss the linkages between development and the environment, and the role of women, indigenous peoples, and the poor in achieving equitable development and environmental protection. Using tools from economics and policy analysis, we explore the conceptualization of environmental problems (market or government failure); various policy instruments to rectify environmental problems (regulations, voluntary programs, taxes, tradable permits, payments for environmental services and international treaties such as the Basel Convention, the Montreal Protocol, and the Kyoto Protocol), and the link between trade and the environment. Students' case presentations illustrate the challenges of environmental management in developing countries and the roles of civil society, NGOs, corporations, and international institutions such as the world bank, world trade organization, and united nations environmental program. Over the course of the semester, students are responsible for several policy memos and PowerPoint presentations.

**PIA 2503 - TOPICS ETHNIC CONFL & CVL WARS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

PIA 2506 - SEX AND HUMAN SECURITY
Minimum Credits: 3
Maximum Credits: 3
What effect do relations between men and women have on human security? What is the connection between global gender inequality and security? How does taking gender and sex into account shift national and global policies, priorities, and human security outcomes for both men and women? How well are international institutions doing in addressing the connection between sex and security, and what else remains to be done? In this course we examine the relationship between human security and sex relations using gender as a category of analysis. We thus address the gender gap in traditional notions of security, which have neglected the majority of threats females face and resulted in grave community- and nation-wide impacts. We begin by studying the merits of different analytical approaches to gender as applied to security issues (traditional and human security), and evidence backing a gendered analysis. Through a gender lens we then critically examine the causes and implications of several major security issues, and we learn to develop more effective gender-aware responses: sexual violence (as a strategy of war, in peacekeeping, and in peace), displacement (refugees, IDPS), child soldiering, and modern slavery. Throughout the course we critically assess institutional and policy responses to the intersection between sex and security and attempt to improve upon them.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2507 - HUMAN RIGHTS: POLITICS & PRACT
Minimum Credits: 3
Maximum Credits: 3
In this course students examine global human rights as an evolving social and political institution, analyze human rights violations and the challenges of human rights practice, and learn how serious threats to human security may be addressed. We examine key human rights concepts, theories and laws, and related controversies that often obstruct international action on human rights (e.g. origins and nature of rights, universality and cultural relativity claims, conflicting rights, state sovereignty, and notions of obligations and accountability). We then examine the field of international action for human rights (e.g. states, inter-governmental actors, non-governmental actors and civil society) and the core dimensions and challenges of human rights work. Throughout the course, human rights target groups (such as women, children, and refugees) and current topics (such as genocide, child soldiering, gender violence, and peacekeeping) are examined as case studies, illustrating key principles and challenges, and providing insight into the range and depth of current human rights and their practice across fields. Students also select a specific human rights topic for major assignments, including a human rights issue brief and a comparative case study of international action on human rights.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2508 - NGOS ADVOCACY INT'L POLITICS
Minimum Credits: 3
Maximum Credits: 3
Ngos are increasingly respected and visible as political actors influencing a wide range of human security and international development issues. To what extent do they influence politics and policy globally, and what kind of impact do they have? How do they become influential, how do they get the work done? What are the challenges they both face and pose? In what ways is NGO advocacy changing international politics and institutions? In this course we examine NGOS as political actors whose influence extends to the global level. We begin by analyzing the nature of NGOS as political actors and their relationship to broader social movements, political institutions, and social goals in international settings. We examine how NGOS shape themselves and their work in relation to such broader contexts, and how they coordinate with other political actors to achieve change. We then learn how NGOS develop comprehensive and effective international advocacy plans, and we study core NGO tactics and their coordination in political actions. Throughout the course case studies demonstrate how theory, context, and practice are linked. Students also select their own case study for assignments, which are inter-linked as part of a term-long simulation in which the political strategies of real NGOS are evaluated, an original international coalition is formed, and a convincing global strategy of action on common political goals is developed. Students therefore learn to effectively analyze NGOS' international political action while gaining practical skills for international NGO influence. The course engages with theoretical concepts but is heavily skills-oriented. It will enable students to (a) analyze and assess the work of nongovernmental actors in international politics, and (b) construct a comprehensive NGO political strategy through simulated governance of real-life NGOS. In the course of the simulation, we will develop specific skills in activities key to NGO political influence, such as analyzing lobbying opportunities, ensuring ethical responsibility, building an international coalition, and working with global mass media. Importantly, all NGOS, whether based locally, nationally, or internationally, can and often do have an influence on international politics, therefore the course does not focus exclusively on international nongovernmental organizations but rather adopts a framework for exploring any NGOS' international influence, for example through their participation in larger networks and coalitions. Examples of international NGO advocacy include: the international campaign to ban landmines, international child soldier campaign, jubilee and debt relief campaigns, campaign for an international criminal court, and many other human rights campaigns for example on health issues and gender issues. The inclusion of NGO advocacy in international politics is important for issues across a
range of fields, from development to security to political economy and human rights. Ngo advocacy is core to the very idea of human security, which is intended not only to address people's needs over those of states, but to make people's participation essential in addressing those needs.

### PIA 2510 - ECONOMICS OF DEVELOPMENT

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course introduces the main principles of economics of development. This course has three objectives. The first is to provide students with an appreciation for the problems and constraints that poor or less developed countries (IDCs) face. The second is to provide economic frameworks that facilitate analysis of these problems and the generation of relevant policy recommendations. We discuss questions such as: why are some countries rich and others poor? Why must governments intervene in the development process? How should governments decide among possible public investment opportunities? The third objective is to provide country- and issue-specific contexts within which students can apply the knowledge they acquire during the course. Students gain experience with important statistical databases (such as the world development indicators) and an exposure to a wide range of both quantitative and qualitative materials.

**Academic Career:** GRAD

**Grade Component:** Grad Letter Grade

### PIA 2513 - RELIGION AND INT'L DEVELOPMENT

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Religious ideas, beliefs, and institutions are influential almost everywhere development practitioners work. This course engages students actively in understanding the roles of religion and culture in economic, social, and political change; the varieties of religious institutions and movements in poor societies; and the significance of religion in several key policy areas. The approach draws on sociology, economics, political science, and anthropology to understand the practical implications of religion for development work. Students completing the course will be able to use and critically assess major approaches to the study of religion and social change, recognize key doctrinal and institutional features of major world religions, incorporate religious institutions and thought into an analysis of civil society, assess the roles of religious actors in conflict situations, evaluate options and strategies for working with faith-based organizations, and apply diverse ethical perspectives to major development policy issues. The course is organized into three parts: (1) an introduction to religion, culture, and development; (2) a comparative survey of major issues and case studies including each of the major "world religions" and key issues such as gender, inclusion and exclusion, human rights, religion and social movements, and faith-based organizations; and (3) religion and the policy and practice of development, including conflict, hiv/aids, and topics determined by the class.

PIA 2514 - HUMAN RIGHTS & SOCIAL POLICY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2515 - POLC MAKING UNDER CONDITNALITY
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce GSPIA students to working under the conditionality of the world bank's economic reform and structural adjustment program (ERSAP). Case studies of ERSAP in various developing countries will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2516 - COMP LOCL GVRNC & CIVL SOCIETY
Minimum Credits: 3
Maximum Credits: 3
This course will be taught as a reading seminar, and will examine local government and development management in a comparative perspective in Latin America, Eastern Europe and Africa. Focus will be on issues of democracy, representation, and issues related to civil society.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2517 - WORLD CITIES
Minimum Credits: 3
Maximum Credits: 3
Economic development will bear acceptable fruit only if it is accompanied by appropriate political development. The movement of hundreds of millions of people to cities presents unprecedented opportunity for innovation. This class provides the chance for students to do research on cities of their choice and to present creative plans to the class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2518 - ETHICS IN INT'L AFFRS & DEVELP
Minimum Credits: 3
Maximum Credits: 3
This course examines issues of normative judgment in the context of international affairs and economic and social development. It introduces and compares several basic conceptual frameworks for such normative analysis and applies them to specific issues. Theories and issues will examined with specific case-studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2519 - COMPARATIVE GOVERNANCE
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
PIA 2520 - FOOD SECu: AGRICULTR RURL DVLP
Minimum Credits: 3
Maximum Credits: 3
Focuses on the nature of the rural sector, how it may be developed and its role in the development of nations. Topics include agricultural production and marketing; land tenure and agrarian reform; research, extension and credit; local development and rural cooperatives, planning and implementing integrated rural development programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2521 - TOPICS IN COMPARATIVE POLITICS
Minimum Credits: 3
Maximum Credits: 3
Special topics in comparative politics will be discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2522 - GLOBAL ENERGY
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to analyze the world resource situation in terms of public policy. A secondary objective is to assess the impact of cities and city-living on limited resources. It will look at how scarce resources are distributed geographically, and examine the possibility of devising strategies for building cooperative regimes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2523 - GLOBAL ENERGY POLICY
Minimum Credits: 3
Maximum Credits: 3
This course addresses global energy issues. First, we examine energy sources globally including oil, gas, nuclear, hydro, biofuels, solar and wind. Specifically, we explore methods to estimate the benefits and costs/risks (economic, environmental, health, political) from various energy sources. We discuss how market forces, market failures, lobbying, and government policies influence the gaps between private and social costs of energy. Second, we examine incentive policies for the adoption of renewable energy (e.g. carbon pricing, cap & trade, renewable portfolio standards, pull-push innovation policies), barriers to their adoption (infrastructure, storage, and intermittency), and overall benefits from restructuring towards a greener economy. Third, we address incentive policies to increase energy efficiency (e.g. fuel economy standards, rebates, leed certification). Fourth, we examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide. Fifth, we examine the geopolitics of energy sources (e.g. US, EU/Russia, China/Africa, Central Asia & Middle East). We discuss the growing recognition that investment in energy efficiency and renewable energy can mitigate national security concerns stemming from fossil fuel dependency.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2524 - FINANCING NGOS FOR DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Examines approaches used to generate and manage the finances of nongovernmental organizations (NGOs) involved in developed activities. The financing of a variety of these organizations will be analyzed, including those involved in sectoral initiatives in health care, environmental protection, rural development, transnational religious charities and democratization. The application of pertinent management issues to the financing of nongovernmental organizations will be a major component of the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.
PIA 2525 - POLITICS OF DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course examines the relationships between political, economic and socio/cultural factors of development. In addition, it looks at the role played by foreign multinational corporations and foreign governments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2526 - NGOS CIVIL SOCIETY & DVLP
Minimum Credits: 3
Maximum Credits: 3
This course explores the range of non-state actors in developing/transition countries that are important to promoting socioeconomic and political change. We will examine the origins, evolution and multiple roles played by this diverse group of non-state actors, including business and professional associations, trade unions and political movements, policy advocacy groups and civic education/democracy-building organizations. Among the issues preoccupying practitioners and researchers, and this course, are: what factors influence the presence and vibrancy of civil society in different countries? How has the state in various times and places -- determined the context in which civil society organizations pursue their goals? With what strategies and with what success have civil society organizations been able to influence or change state policies? What autonomy and accountability issues arise in state-civil society relations, and how does the international donor community facilitate or complicate these relationships? In the process we will introduce specific tools from the social disciplines and development practice for working with civil society organizations, including assessing the strength of civil societies, measuring social capital, and assessing 'partner' organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2527 - FINCL MGT FOR NGOS & NONPRF
Minimum Credits: 3
Maximum Credits: 3
This skills course covers various accounting methods in both private sector organizations as well as NGOs. Upon completing this course students should be able to read and understand annual reports of profit and nonprofit organizations, analyze the published financial statements within the reports to ascertain the well-being of the organization, and to make managerial decisions based upon the results of this analysis. This course is divided into (1) understanding basics of accounting for all organizations; (2) measurements and analysis of financial statements using accounting tools such as common-size statements, liquidity and profitability analysis, debt vs. equity; and (3) budgeting and cost-benefit analysis using contribution margin.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2528 - GOVRNC LOCAL GVRNT CIVIL SOCY
Minimum Credits: 3
Maximum Credits: 3
It is not possible to divorce development issues from issues of governance and civil society. Nor can the debate and selection of policy choices be detached from the capacity of institutions to implement policy. This course attempts to define this balance by looking at issues of local government, governance and civil society in Latin America, eastern Europe, Asia and Africa. It focuses on the dynamics of governance with primary attention being the grass roots base of democracy. Focus is on the nexus between theories of governance and the practical implications of that theory on political behavior. The institutional state can be defined as the set of structures and processes- including the public service, the nature of social relationships, and internal organizational dynamics- that though it evolves over time, is a permanent part of the dynamics of government. Formal institutions are organizationally or socially based units that have effective authority over aspects of policy and implementation, are based on formal rules, common values, and standard modes of behavior as well as regulations that are widely accepted.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2535 - QUALITATIVE DIMENSNS OF DEVELP
Minimum Credits: 3
Maximum Credits: 3
Examines and critiques newer theories of development, with particular attention given to the cultural context of and values in development. Students expected to acquire some skill in epistemological reflection and in applying qualitative techniques in the measurement of development.

Academic Career: GRAD
Course Component: Lecture

Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2551 - GENDER AND DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
The premise of this course is that development processes affect women and men in different ways. Creating this difference are gendered access to resources; socially and culturally created gender identities; gender relations between women and men; and gender roles determining the types of employment assigned to women and men. New development interventions, therefore, have to incorporate these differences into their design and implementation in order to ensure sustainable, inclusive, and positive outcomes for all. Upon completing this course students will be able to read and critically evaluate the utility of different approaches to gender for the purposes of overall development; conduct gender analysis as part of social analysis within project cycles; and write policy memos/papers proposing alternative policy designs and program recommendations. The course is organized in three parts. Part I (theories) surveys various theories of gender and development, devoting significant attention to feminist theories of development. The overarching goal of part I will be recognizing 'gender' as a valid and substantive development issue within the dominant development paradigms. Part II (gendered social policy) analyzes comparative regional and national case studies around the world to map out the complex ways in which social policies are filtered through formal institutions of state, families, communities, markets, and politics and compares their gendered impacts. Part III (issues) surveys non-traditional policy areas that have helped highlight the growing awareness of the importance of gender in the development process as it inquires, "how do these issues impact the development potential of women and men differently in developing countries?"

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course examines the management of organizations working in international development and humanitarian assistance with a focus on NGO management. This course has three key objectives. The first is to introduce students to the work and environment faced by development organizations. The second is to provide theoretical and practical frameworks for the analysis of management challenges and generation of relevant recommendations. Big questions we investigate include: why are NGOs fundamental for development? How can NGOs improve their accountability and effectiveness? How to best approach a complex decision problem? What are the key opportunities and dangers in organizational "partnerships" between governments and NGOs, northern and southern organizations, etc.? How can NGOs leverage community participation? The third objective is to help students develop transferable management skills, which will help them get a job in international development. Assignments emphasize primary research and focus on building critical writing, analytical, and presentation skills that demonstrate a broad understanding of the key management challenges facing development organizations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2553 - GLOBAL HEALTH POLICY
Minimum Credits: 3
Maximum Credits: 3
The millennium development goals prioritize investment in health for human welfare. We examine underlying economic problems and proposed policy solutions to address major diseases health issues such as AIDS, TB, malaria, diarrhea, and respiratory illnesses. We examine challenges in addressing children's and women's health issues, including child labor and trafficking. We study world trade organization (WTO) provisions that assist or impede poor countries' access to drugs. We study WTO cases on health protection (e.g., US-EU beef hormone debate). We discuss the costs
and benefits of genetically modified organisms in our food supply. Students' case presentations examine cases of successful global health interventions (e.g., Small pox eradication, arresting AIDS in Thailand) and new challenges (SARS, avian flu, health-related impacts of climate change), as well as the roles of the world bank, the world health organization, corporations, NGOs, and civil society in improving public health in developing countries.

**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2555 - FRCE MIGRTN:UNHCR DURBL SOLTNS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the politics of China, Japan, and the Koreas by looking at the relationship between state and industrial development in these countries. Specifically in this course, each of the countries we will study has undergone a harrowing socio-economic transformation from an agrarian to an industrializing nation. However, each of these countries has adopted very different state structures and policies in achieving their goals. We will look at the rise of the state in each nation and the subsequent roles they have played in industrialization. Some of the questions we will take up are: how do societies react to the rise of industry, to new forms of labor in modern industry? How are traditional societies and cultures changed? What happens to traditional identities when a people and country adapt to modern culture? What are the effects of global timing upon the state and people? After taking this course you should gain a better understanding of the political and economic problems and challenges facing East Asian nations today.

**PIA 2560 - PROJECT AND PROGRAM DESIGN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Provides students with conceptual basis and operational capabilities to design, evaluate, and administer projects and programs.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2561 - GRASSROOTS PROJECT PLANNING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Through project-based activities, donor-supported interventions in developing societies around the world take on meaning, purpose and structure. Sometimes, projects realize their purposes and intentions as part of a larger government program initiative, or to develop a particular sector of a country. In other instances, projects are more limited in their purposes and intentions, and are the result of local initiatives to attract resources to addressing a particular problem. At all times, and in all situations, however, projects have been viewed as the primary method and means through which donors and governments, and donors and communities interact. This course joins the ongoing debate about project-based development activity through a focus on the planning and design of donor-funded development interventions (projects). Applying both theory and practice, the course will explore current methods and tools of project design. By the end of the course, students will have participated in a collaborative planning and design process to identify and develop an NGO-based project in response to a USAID request for proposals (RFP).

PIA 2571 - ECONS MIDL EAST & N AFR REGN
Minimum Credits: 3
Maximum Credits: 3
The focus of this course is on the countries of the middle East and North Africa (MENA), the area comprising the Arab states, Iran, Israel, and turkey. They face enormous economic challenges in the twenty-first century: stagnant real wages, deteriorating competitiveness, and rapidly growing populations and labor forces. Why after years of negative per capita income growth, has the region been unable to accumulate sufficient reform momentum to sustain economic growth? Do important differences across countries hold lessons for the future? What are the social consequences of economic stagnation, and how might future adjustment costs be managed to protect the poor? How have individual countries in the region defined the challenges ahead? And what issues must be addressed to realize a more prosperous future?

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2572 - EARNINGS & EMPLYMN THIRD WORLD
Minimum Credits: 3
Maximum Credits: 3
This class presents a description of current labor market practices with contrasts to institutional and political economy approaches. The focus will be on developing an understanding of the determinants of wage rates and employment levels in the labor markets, the role of education and training on wage levels; the consequences of government intervention in solving social problems (e.g. the minimum wage issue); poverty, inequality, income distribution, and labor migration issues. Empirical country studies from different regions (Africa, Asia, Latin America, and Central and Eastern Europe) are presented and the conclusions from these studies are the basis for evaluating public policy proposal.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2573 - LATIN AMERCN DEVELOPMENT SEMNR
Minimum Credits: 3
Maximum Credits: 3
Examines a set of development policies in Latin America, using economic analysis. A recent topic has been the effects of structural adjustment policies on employment and earnings in selected Latin American countries in the 1980s.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2574 - AFRICAN DEVELOPMENT SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This course explores development issues in sub-Saharan Africa. It facilitates multidimensional considerations of these issues and examines the very meaning of "development" as a concept for Africa. Historical and contemporary paths of development in Africa are examined. Important analytical focuses of the course include the roles of both internal and external factors influencing development policy and management. This includes African regional organizations, nation states, and traditional societies; external factors such as, international regimes; as well as European, North American, Middle Eastern, and Asian state participants in African development activities. Students completing this course are expected to have: a better background for understanding Africa, African peoples and civilizations; knowledge of the social and cultural issues affecting development in Africa; alternative frames of reference for interpreting information about Africa; appreciation of various challenges facing Africa; and the capacity to
develop and defend a well-designed policy position on an African development issue. The course is divided into: part 1 (the underdevelopment of Africa: scale and sources); part 2 (the non-development of Africa, 1960-present); part 3 (contemporary approaches to African development); part 4 (emerging challenges and opportunities for African development); and part 5 (African policy debates: where do we go from here?)

Academic Career: GRAD

PIA 2575 - POLITICS, ISLAM, AND THE STATE
Minimum Credits: 3
Maximum Credits: 3
The course provides an accessible and comprehensive account of political Islam over the span of the past century. Drawing on insights from comparative politics and Islamic studies, it explains the complex interaction between Islam, society, the state, and processes of globalization. The course demonstrates that political Islam, far from being a monolithic phenomenon, varies considerably from country to country depending on its position in relation to society, the state, and the broader political environment. The course provides a portrait of Islam and politics through a combination of detailed case studies and country overviews that span the globe, with a focus on the middle east, central Asia, and South Asia. It also provides a detailed account of the global jihadist movement.

Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2578 - POL ECONOMY PROPERTY RIGHTS
Minimum Credits: 3
Maximum Credits: 3
Political economy can be defined as the study of the origins and consequences of institutions, which are the formal and informal rules that constrain and liberate individuals. Property rights are arguably the most important institutions because they govern ownership relations. The political economy of property rights is concerned with the origins of property rights and the consequence of alternative property regimes for various outcomes, including natural resource use, economic growth, agricultural productivity, and post-conflict state building. In particular, this course will cover the following topics: the role of property rights in economic growth in historical and modern perspective; the origins of property rights; the relationship between property rights and natural resources; and land reform in developing countries. This course will provide students with precise knowledge of alternative property regimes, their consequences, and the relationship between political reform and land reform, as well as the role of property rights in attaining economic development. From a practical perspective, this course provides students with a thorough understanding of the problems involved in designing and implementing land reform in developing countries. By the end of this course, students will understand why issues such as economic development, natural resource use, and even the development of democracy are fundamentally questions involving property rights.

Academic Career: GRAD
Course Component: Lecture

PIA 2580 - COMP POLIT: WOMEN & PBLC POLCY
Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of the growing literature on women in politics in several settings; the U.S., Eastern and Western Europe, and the third world. The course will also attempt to integrate some of the specialized studies on women and politics into broader theoretical concerns; dependency development, the growth of the welfare state, political integration, participatory and leadership roles.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2581 - COMPARATIVE WELFARE STATES
Minimum Credits: 3
Maximum Credits: 3
Starting from the mid-nineteenth century the seminar is an historical and political critique of the main theories of the contemporary welfare state. Attention is roughly divided equally between the diverse origins of the British, French, Swedish and German welfare states in the nineteenth century; the impact of new social theories and social thought on the design of welfare states early in the century and between the wars; and how the organization and structure of welfare states following the war was influenced by this experience.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2582 - LATIN AMERICAN POLITICS
Minimum Credits: 3
Maximum Credits: 3
This course is a reading seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topics of `regime transition' in Latin America.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2583 - ECONOMIC DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
A comprehensive survey of the major analytical literature of development economics. Covers approaches to and theories of development; dualistic models of the development process; the impact of the international economy; and development planning. Both major theoretical literature and empirical findings in each area are covered. Primary focus will be on the analytical techniques and literature; though some time will be spent on discussion of researchable topics in the area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2584 - POLITICAL ECONOMY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
In this class students will continue (from "economics of education") to develop techniques for economic analysis. The subject is placed in a broader intellectual and political context. Particular attention is given to critique of neoclassical economic analysis, to alternative frameworks for economic analysis, including class-conflict and institutional approaches, and the applications of economic analysis in the educational policy process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2587 - ECONOMICS OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This class introduces students to the economic analysis of education, with particular emphasis given to the economics of education in developing countries. Among the topics to be covered are: human capital theory, educational production functions, rate of return analysis, various issues in educational policy and finance.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2588 - SEMINAR IN POLITICAL DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
An examination of the process of political development in contemporary third world countries. Among the topics will be "political decay", social origins of democracy and dictatorship, system functionalism, economic development and political change, and social, psychological and cultural factors in development. Contemporary political systems will be examined, with emphasis on elites and their ideologies, parties and interest groups, and the role of the military and the bureaucracy.

**Academic Career:** GRAD

**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2589 - ADVANCED SEMINAR**

Minimum Credits: 3  
Maximum Credits: 3  
This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 2590 - WORLD FOOD ECONOMY**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to the dynamics of world production & trade in foodstuffs & agricultural produce. Emphasis will be placed on using the tools of economic analysis to examine the evolution of agricultural sector with economic development, including the issues of agricultural self-sufficiency, & environmental degradation, the role of technical change in agricultural production, food security, famines, & food aid, the impact of economic policies on agricultural growth and performance, the institutions and mechanisms involved in international trade in agricultural products.

PIA 2602 - NATNL SECU DFNS TRANSFRM
Minimum Credits: 3
Maximum Credits: 3
U.S. National security strategy and policy face great challenges in the 21st century. Political, military, legal, and economic factors will affect both strategy and policy. This course will assess those factors and their effects on possible solutions to those challenges. The course approaches national security from both military and government-wide perspectives and addresses the executive branch, the congressional, and the global environments. The professor will emphasize a practitioner's approach to issues and will use lectures, readings and original source documents, class discussions, and guest speakers from the national security community. Students will deliver short written papers, mostly in the form of one-page memos, and will undertake group assignments leading to oral class presentations. The primary focus is on contemporary issues and events, but the instructive value of history is also prominent throughout the course. For students who wish to take this course, prior knowledge of or study in national security is strongly recommended but not required. This course will help students with foreign policy and security studies concentrations prepare for the evolution and challenges of coming years.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2603 - AFRCN CONFLS: CAUSES & CONSQ
Minimum Credits: 3
Maximum Credits: 3
A half-century after most African nations gained their independence, the continent continues to be a disproportionate generator of conflict and instability. Simultaneously its global importance grows, due to external preoccupations with energy security, anti-terrorism efforts, emigration, and disease. Despite these complex dynamics, the international community's engagement with Africa continues to be largely focused on crisis management and humanitarian assistance. This course will explore the underlying reasons: historic, political, economic and cultural -- for Africa's
chronic weakness and dependency, as well as the West's often myopic response to these pressing problems. It will take a close look at some of the most destructive developments in the post-colonial period, including state collapse, genocide, and HIV/AIDS. We will then seek to better understand the manifestations of crisis in Africa and how to more effectively tailor our responses. To that end, we will delve into the world of humanitarianism, from its traditional charitable manifestations to more recent trends such as humanitarian intervention, r2p, and reconciliation.

**PIA 2604 - GEOPOLITICS OF SOUTH ASIA**

*Minimum Credits: 3*

*Maximum Credits: 3*

This course will look at the region against the historical backdrop of its relations with the world. But the major focus will be on the dramatic developments within South Asia during and since the 90's and the region's evolving relations with the US, China, Russia, Japan, Iran the middle East and central Asia. Especially how the US is helping India in realizing its aspirations for a big power status, and a factor of stability in the region, and Pakistan in its salvation from chronic weakness by building its capacity to reform itself. Pakistan, both as a partner and potential target, in the war against religious extremism and terrorism, has become a major foreign policy challenge for the us and is likely to occupy an important place in the national security and foreign interests of America for some time. The course will look at these threats and challenges specially the US war against extremism, more particularly the Taliban and Al Gaeda, being fought with the help of two critical allies, Pakistan and Afghanistan.

**PIA 2605 - SUSTNBLY & ENVRN POLC PRIMER**

*Minimum Credits: 3*

*Maximum Credits: 3*

With world population now over 6 billion ' and two thirds of these people in developing countries, economic development is an urgent priority. Science, however, tells us we are approaching real limits on arable land, freshwater, marine resources and clean air. How we manage the future demands international cooperation on an unprecedented scale as no state can address these challenges ‘ and sustain prosperity alone. This course offers an overview to the state of the planet ‘ and the perspectives of various countries and groups in meeting these challenges. We will examine key issues ‘ including climate change, food and energy, water, biodiversity, and pollution ‘ among the major environmental questions and explore existing national and international efforts to address them. This seminar will bring in practitioners, policy makers and foundation/NGO/IGO experts to meet with the students, and include a mix of team and individual projects to help build professional skills. This course would be valuable to those interested in the so-called global issues, including environment, public health and population, conflict resolution, and the role of IGOS and NGOS.

**PIA 2606 - WASHINGTON PRACTICUM**

*Minimum Credits: 3*

*Maximum Credits: 3*

The Washington practicum is an opportunity for D.C. semester students to combine the practical training and professional development of an internship with your graduate coursework. The practicum encourages you to develop in-depth knowledge of an organization and its relationship to certain issues and policy process, to define your own career aspirations, and to network in a professional setting. Students will prepare a job description with your internship supervisor, complete an institutional analysis of the internship site, and submit a policy memo. Your grade will be based on these three assignments.

**PIA 2607 - STATE CRAF SMART POWER DIG ERA**

*Minimum Credits: 3*

*Maximum Credits: 3*

This course examines new approaches to the practice of statecraft in an era of rapid global change. Globalization, including accelerating digital communication, is upsetting traditional international order and institutions, and changing the pace and intensity of decision making. Nation-state governments, while still the primary actors, must adjust to new sub-national, regional and transitional forces and players in a far more complex global arena. As digital communication brings publics into politics and policy far more than ever before, this course helps participants better understand and
prepare for these and other current challenges for smart power. Features guided classroom discussion, presentations by officials and outside experts, and in-class exercises such as a resource allocation/strategic planning session (somewhat akin to one of the major elements of the PMF and FSO oral exams) as well as policy simulations. The course's emphasis on policy, institutional and professional concerns, will be particularly relevant to those seeking employment in public service, NGOs, public policy think tanks and consulting firms.

PIA 2705 - NEIGHBORHOOD & COMMUNITY DVLP  
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on neighborhood and community development in urban areas. We will study characteristics of neighborhood development and the policies that have affected change over time. Students will learn to analyze neighborhood data, measure change, and understand the impacts neighborhood organizations play in their communities. The first part of the course will focus on urban theory, urban history and policy, particularly regarding housing and urban renewal, and data analysis. Students then study community revitalization planning and the rise of community development. In fall 2012, students will work on issues related to accessibility to parks and recreation for disadvantaged neighborhoods and populations in Pittsburgh and will work with the Pittsburgh Parks Conservancy on linking people and parks. This will include work on sustainability, transportation, and urban schools.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2707 - URBZ SUSTNBL DVLP INT'L CNTXT  
Minimum Credits: 3  
Maximum Credits: 3  
This course examines the relationship between economic development and urbanization, with an emphasis on understanding how the process of growth is associated with urbanization and its consequences. The course is divided into three sections. The first is a general overview of global trends of urbanization and development, as well as an introduction to principal development debates. The second section covers the principal theories relating urbanization and development. The last section of the course focuses on key issues that have emerged during the rapid urbanization of the developing world, ranging from growing income inequality, poverty, and socio-economic exclusion, to the informal economy and rising violence. We examine the policies and processes that have attempted to address these issues, such as participatory community planning, antipoverty programs, etc. Though the course takes a broad theoretical perspective on these processes, there is a focus on Latin America when looking at examples.

Grade Component: Grad Letter Grade  
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2709 - CRITICAL ISSUES IN PLANNING  
Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to expose the student to the multidimensionality of planning issues and to raise ethical and political concerns (e.g. racial discrimination, cultural differences, class) that face all planners. It will address selected provocative and perplexing contemporary urban and regional issues by exploring the applicability of alternative planning and social sciences theories. The course will be designed to be attractive to advanced graduate students who seek inspiration to define topics for research and challenges for their career choices.

PIA 2715 - GIS FOR PUBLIC POLICY  
Minimum Credits: 3  
Maximum Credits: 3  
A geographic information system (GIS) is a powerful tool for the public sector and used in a variety of disciplines. GIS builds on existing methods while offering new dimensions. This course provides students with a solid foundation of the principles and applications of GIS, an introduction to the desktop software ArcGIS, and demonstrates its uses in the public sectors. Students utilize ArcGIS to analyze and display spatial and demographic data. The construction of policy is then predicated on analysis. Skills learned in core courses can be brought to this course and built upon. Students have the flexibility to focus on their particular area of interest within the public sector through project work. The course is taught via lecture and hands-on experience using the ArcGIS software.

PIA 2741 - TOOLS WORKING INT'L DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course examines more than a dozen major humanitarian crises from around the world during the past 25 years. It analyzes key cross-cutting themes and how response and recovery efforts have been managed, while giving additional attention to reducing disaster risks. Through readings, class discussions and negotiation exercises we will consider the performance and respective roles of primary actors such as United Nations agencies, NGOs, international organizations, military forces and the official authorities of affected countries. The course has a strong experiential emphasis as reflected by visiting speakers with first-hand field experience, and contact with disaster management graduate students and practitioners in other countries. Students will participate in three simulated negotiations by agencies working in Haiti, Darfur, and Pakistan. They will also work together in comparative research teams, engaging with selected overseas partners, and prepare a joint presentation. Two short papers also will be assigned. Broader themes will include the role of leadership, ethical dilemmas, state-NGO-military relations, policy advocacy by NGOs, the growth of local and national capabilities, the evolution of the international system of humanitarian response, and programmatic ideals such as 'do no harm' and 'disaster risk reduction'. By the end of the course, participants will acquire a deeper understanding of political, military, and humanitarian responses to major humanitarian crises, as well as current initiatives that seek to reduce people's exposure to future threats. This fifteen week course is designed for graduate students interested in working in humanitarian or international crisis activities, whether on behalf of host governments, institutional donors, civilian international or local agencies, military forces, or the media.
Academic Career: GRAD

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2746 - HOUSING POLICY & URBAN DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This is a course about city rebuilding, and efforts to provide a decent living environment. It focuses on the evolution of public policy in the fields of housing and urban development. Changing roles of the public and private sectors are examined.
PIA 2751 - LAND USE CTRL & DVLP LAW
Minimum Credits: 3
Maximum Credits: 3
This course explores and analyzes the evolution of property law by examining the impact of local government planning and management on the common law of property rights and on the operation of the land market.

PIA 2752 - LINK TRNSPTN ECON COMNY DVLP
Minimum Credits: 3
Maximum Credits: 3
This course examines the traditions of urban transportation, economic development, environmental, and business district planning for the purpose of understanding their practical interrelationships. This course is particularly well suited to second year graduate students whose interests include city planning, transportation engineering, environmental enhancement, economic development programming, community organization, urban administration, or survey research.

PIA 2755 - REGIONAL DVLPMT & GLOBL ECONY
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on two major themes: the reorganization of industrial production and its effects on regional development, and industrial policy responses to these changes. Both of these topics have spurred considerable research and debate in the past few years in the regional development literature. We will explore the constraints and opportunities of these changes through a set of readings on both the general themes and specific case studies.

PIA 2756 - LOCALLY BASED INITIATIVES
Minimum Credits: 3
Maximum Credits: 3
The locally based initiatives on which this course focuses are case studies and demonstrations of actions by people and organizations that are addressing issues (like poverty, community revitalization, economic development, and factory closings) that do not have entirely locally based causes or solutions.

PIA 2772 - POLITICAL POWER
Minimum Credits: 3
Maximum Credits: 3
In the United States and around the world scholars and practitioners are struggling with the twin problems of weak cities and public disenchantment with government. In this class, students will be encouraged to develop new ideas on how to make cities work--and work well.
PIA 2790 - TOPICS IN URBAN & REGNL PLANNING
Minimum Credits: 3
Maximum Credits: 3
Topics in urban and regional planning will explore a wide range of issues that are of importance to future profession also in urban and regional affairs. These issues will be examined in the context of the political, economic, social and cultural implications of various problems and any possible alternative interventions.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2796 - URP POLICY SEMINAR
Minimum Credits: 3
Maximum Credits: 6
Topics will vary.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2800 - TRAFFIC MGMNT AND OPERATIONS
Minimum Credits: 3
Maximum Credits: 3
Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2820 - URBAN TRANSPORTATION PLANNING
Minimum Credits: 3
Maximum Credits: 3
The urban transportation planning process is the main thrust of this course. The topics covered in the course include transportation planning and decision making, urban transportation modelling system, demand and supply analysis, and project implementation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2850 - PBLC SERVC SKILS & COMNC 21STC
Minimum Credits: 3
Maximum Credits: 3
Students will be given exposure to a variety of resources on the emerging context of professional public service as well as normative frameworks regarding the types of skills and competencies needed by public service professionals as we enter the 21st century. Areas covered include financial analysis, negotiation, political and legal analysis, and ethical dimensions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2896 - MPPM POLICY SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This is the final required course for students in the executive degree program. Students prepare individual reports in policy analysis format on topics of their choice, approved by the instructor. Methods of policy analysis will be re viewed, and students will give an oral presentation as well as a final written paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2955 - PRIVT SECURITY & PUBLC LAW ENFR
Minimum Credits: 3
Maximum Credits: 3
Examines the burgeoning growth of private security in the United States. Topics include the practical impact of private security on crime patrol, the legal authority of private security personnel, and issues of integrating private and public law enforcement functions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2964 - WHITE COLLAR CRIME
Minimum Credits: 3
Maximum Credits: 3
Probes the concept, nature, and extent of "white collar crime" in Western societies. Conceptual controversies, proposed typologies, legal regulations, theories of causation, social and economic costs, and strategies for control of "white collar crime" will be explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 3000 - INTERMEDT QUANTITATIVE METHS
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the fundamental techniques of regression analysis, focusing on the linear regression model. Emphasis is on applied econometrics, with the goals of the course being to enable students to interpret empirical results in social science work they read and to use statistical software to employ these techniques successfully in their own work.
Academic Career: GRAD

PIA 3001 - SEMINAR IN RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
Advanced techniques for utilizing quantitative data in the conduct of social science research and policy analysis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3002 - SEMINAR IN ORGANIZATION THEORY
Minimum Credits: 3
Maximum Credits: 3
An advanced seminar in organization theory; covers in-depth analyses of current issues, research, and conceptual questions associated with the field of administration.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3003 - ADV SEM POLICY MAKING PROCESS
Minimum Credits: 3
Maximum Credits: 3
Integrates theoretical, conceptual and methodological foundations of modern policy research analysis.
Academic Career: GRAD
**PIA 3004 - SEM IN RESEARCH DSGN & METHODS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term 'mixed method.'

**Course Requirements:** Graduate School of Public and International Affairs students only.

**PIA 3010 - THEORIES SOCAL SCI & PBLC POLICY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course has two purposes. The first is to engage the student with the central themes and boundaries of public and international affairs including an awareness of the differences and similarities among various "specialisms" within this category of knowledge. The second is to encourage the student to reflect on pivotal theoretical issues which cut across specialisms and to apply these theoretical concerns to specific policy questions. Such knowledge and intellectual skills are essential for a career as a scholar of public and international affairs.

**PIA 3013 - ENVIRONMENTAL ECONOMICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.
PIA 3014 - THE POLITICAL ECONOMY DVLP
Minimum Credits: 3
Maximum Credits: 3
This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.

PIA 3015 - SYSTEMS THEORY
Minimum Credits: 3
Maximum Credits: 3
Increasingly, the social, economic, and political context in which public organizations function is characterized by interdependent, evolving systems of individuals, organizations, and systems of systems. Understanding this complex world of interacting organizations and systems presents a challenging, fascinating, difficult, but always interesting task. In this seminar, we will follow the evolution of this process over the last six decades and assess how these theoretical frameworks have changed our conception of public policy and the operational context for public organizations. Since systems theory is strongly interdisciplinary, we will also explore basic concepts as they were borrowed from physics, mathematics, biology, engineering, and computer science to inform current organizational frameworks of complex adaptive systems and their application to policy and practice in current public and international affairs. Students will write five short papers assessing the evolving state of complex systems and the impact of theoretical framework in analyzing public policy issues today.

PIA 3016 - ADV SEM: ECONS POLITS COUN
Minimum Credits: 3
Maximum Credits: 3
This co-taught seminar will examine five broad topics in the economics and politics of counterinsurgency (coin): (1) the causes of insurgency and Civil War, (2) patterns of recruitment and participation, (3) the organization of insurgent groups, (4) violent strategies used by warring factions, and (5) development policy targeted at reducing the ability of insurgent groups to produce violence.

PIA 3017 - ADV SEM: INT'L PBLC MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3

PIA 3019 - INTGD SEMINAR IN INT'L AFFAIRS
Minimum Credits: 3
Maximum Credits: 3
This course will introduce GSPIA Ph.D. students to the various approaches to the study of international affairs as well as a few broad areas of inquiry in the field. It covers 'great books' in the study of international affairs, concentrating each week on a classic or important new work. This approach will provide a stable platform from which international affairs students may delve deeper into the literature while apprising non-international affairs students of the general structure and large debates in the field. Given the vastness of the field, there are many topics that we will not be able to cover. However, familiarity with the arguments covered is essential for navigating and making sense of the sprawling literature. By the end of the semester, students will possess the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on the topics we do and do not cover.

Academic Career: GRAD
PIA 3020 - ADV SEM: EVID INFRN PUBLIC POLC
Minimum Credits: 3
Maximum Credits: 3
This seminar examines methodological disputes in the policy sciences. We will use a structural model of argument based in large part on the work of Stephen Toulmin, the English-born philosopher and applied philosopher of science who spent the latter part of his career working with well-known international relations and public policy specialists at the university of southern California. Much of Toulmin's structural model of argument was built into the computer program we will use this term. The program is called rationale and it was developed by a Pitt philosophy of science Ph.D., Tim Van Gelder, who also gained significant expertise in computer science. He is at the Melbourne University in Australia. We will use rationale to study the methodology of the policy sciences. By using the structural model of argument to study methodology we will expand the range of research methods available to us as policy-oriented social scientists. Hopefully, this will protect us from the dogma that there is one set of 'approved' methods and from the despair that comes from believing that 'anything goes.' In addition, it will alert us to the dangers of winding up in one or another methodological cul-de-sac in which orthodoxy reigns.

PIA 3050 - QUALITATIVE RSRCH DSGN & MTHS
Minimum Credits: 3
Maximum Credits: 3
This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.
Academic Career: GRAD

PIA 3098 - DOCTORAL TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
In an increasingly competitive academic job market, teaching experience can be a decisive factor in doctoral students' ability to secure an academic job after graduation. This practicum provides an opportunity for doctoral students to develop teaching skills by creating and delivering a course to members of the community. The practicum will begin with pedagogical and teaching policy training. Under the supervision of the course instructor, doctoral students will then be responsible for all elements of teaching a course in one of GSPIA's doctoral fields (creating a syllabus, delivering lectures, leading class discussions, creating and evaluating course work). After every class delivery, doctoral students will have a rare and invaluable opportunity to receive instant feedback on their performance. At the end of the practicum, students will put together a teaching portfolio which includes a statement of teaching philosophy, the teaching materials developed during the practicum, student feedback and a reflection upon the feedback received.

PIA 3227 - ADV METHS OF POLC RES ANAL
Minimum Credits: 3
Maximum Credits: 3
This course in advanced methods of policy analysis focuses on four types of methods: -structured analytic techniques used in the intelligence community to make intelligence estimates and to identify national security threats; -problem structuring techniques used to solve ill structured or 'wicked' problems in areas of technology assessment, development planning, intelligence analysis, and economics; -forecasting techniques based on expert judgment which are appropriate when quantitative data are unavailable to make estimates of future states of energy, environment, technology, and related areas; -argument mapping techniques used to assess the quality of scientific and policy reasoning and to enhance critical thinking capabilities among professional policy analysts and planners. The seminar will feature short (30-45 minute) presentations by members of the sis program and professional analysts, researchers, and trainers in the intelligence community (IC) and elsewhere. Students should note that the methods covered in this course are part of a current analytic reform movement among intelligence analysts and elsewhere in the wider public, private, and nonprofit sectors. The course is open to qualified masters and doctoral students.

PUBHLT 2003 - THE POLITICS OF PUBHL IN PA
Minimum Credits: 1
Maximum Credits: 1
This introductory course will explore the politics of public health in Pennsylvania. It will provide an overview of the political process including the structure of state government, state governmental process, development of political agendas, the use of this structure and the process to meet public health goals. Detailed attention will be directed toward the identification of specific public health issues of interest to legislators and the development of position papers on those issues by students participating in the class.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PUBHLT 2004 - BUILDING INTERDIS PARTNERSHIPS
Minimum Credits: 3
Maximum Credits: 3
Provides a forum for exploring the possibilities of multidisciplinary education and service provision. Students will learn how their professional frames of reference influence their perspectives on community issues and on collaboration with other service providers, and how to bridge professional frames of reference.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

PUBHLT 2005 - INTERDISCIPLINARY PREVENTION
Minimum Credits: 3
Maximum Credits: 3
A problem-based format is used to develop an interdisciplinary team intervention to address prevention of a chronic health condition identified among a selected low-income population. Health-care needs of consumers in rural settings are highlighted. Students collaborate in problem-solving and decision making within a team model and identify the advantages and disadvantages of the team approach. Essential components of team function will be addressed. The course sites are located in rural counties of Western Maryland.

PUBHLT 2013 - METHODS OF TEACHING
Minimum Credits: 1
Maximum Credits: 1
This graduate course proceeds through a series of modules that stress the practical application of learning and instructional theory to the university classroom. You will begin by identifying the best practices of college teaching and learn about the theories that drive the application of these practices. We proceed to learning about the foundations of course development/lesson planning and having these elements align with your means of assessment and strategies for teaching. By the end of this course, you will be able to develop a lesson plan that includes all of the essential elements of instruction. This course will be taught in a manner that models what you should be exhibiting in the classroom, demonstrating the basic methods of effective instructional development and good teaching. Students completing this course are expected to apply their learning in a teaching practicum the following term.

**PUBHLT 2015 - PUBLIC HEALTH BIOLOGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This core course will provide an introduction to the biological foundations of many systems that are important in public health. The major determinants of human disease will be considered from an integrated ecological perspective that brings together molecular and population-based approaches to the study of infectious disease (with particular focus on HIV/AIDS, polio, emerging infections, and disease outbreaks following natural disasters) and genetically-determined diseases including "simple" genetic diseases such as cystic fibrosis and "complex" diseases such as hypertension. The host response to infection will be considered, as will the disorders that result from defects in this system, including allergy and asthma. Current developments in genomic science will be covered, including the ethical, legal and social implications of the increased capability to detect and predict disease outcome in individuals and populations. On completion of this course, students will have an understanding of the biological bases of many conditions that are important to public health, and that they will encounter as public health students and practitioners.

**PUBHLT 2017 - PUBLIC HLTH TEACHING PRACTICUM**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is the second part of a sequence of interdisciplinary courses offered through the Graduate School of Public Health as an option for doctoral students who are considering an academic career. Students seeking employment in the field of higher education are often required to submit previous university experience, such as teaching portfolios or other means of evidence that can attest to their knowledge and instructional abilities. The practicum is intended to provide you with experience applying the basic tools and skills that you acquired from the methods of teaching course.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**PUBHLT 2018 - OVERVIEW LGBT HLTH DISPARITIES**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Students will review the historical development of lesbian, gay, bisexual and transgender health focus area. The impact of stigma and disparity on the health of populations will be explored. An overview, by systems, of conditions of greater prevalence among lesbian, gay, bisexual and/or transgender populations will be presented and discussed. Students will develop a greater understanding of the health disparities among lesbian, gay, bisexual and transgender populations and develop critical thinking skills regarding the impact of marginalization on the health and wellbeing of subpopulations, using lesbian, gay, bisexual and transgender populations as a model. Course will include lectures and active participation in class discussions. This course will serve as the introductory overview course for the lesbian, gay, bisexual and transgender health and wellness certificate program.

**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110; PLAN: Graduate Sch of Public Health (CERT-4)

PUBHLT 2019 - PUBLIC HEALTH SPECIAL STUDIES
Minimum Credits: 1
Maximum Credits: 15
Properly qualified students may undertake advance study under the guidance of a faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Graduate Sch of Public Health (CERT-4)

PUBHLT 2020 - ADVNCD TOPICS IN LGBT RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course will provide a critical overview of current cutting edge research topics in the field of lesbian, gay, bisexual and transgender (LGBT) health. Students will be expected to review the existing literature on these topics, summarize the strengths and weaknesses of individual papers, and then design a study or set of studies that would be expected to add to the evidence base on a given health topic.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PUBHLT 2018; PLAN: Epidemiology (PHD) and Graduate Sch of Public Health (CERT-4)

PUBHLT 2021 - LGBT PROGRAM DVLP & EVALUATION
Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introduction to the multi-phased process of developing and evaluating programs designed for lesbian, gay, bisexual and transgender populations. Theories of health behavior are used to critique and analyze existent programs, with an emphasis on modifications designed to address specific needs of lesbian, gay, bisexual and transgender individuals. The relation of applied research to program evaluation, the link of theory to research and the translation of research information to applied programmatic activity and evaluation will be a focus of the course. Grant writing fundamentals will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Graduate Sch of Public Health (CERT-4)

PUBHLT 2022 - THE DEAN'S PH GRAND ROUNDS
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to socialize our students to the broader profession of public health through engaging them in substantive programs on a wide range of topics that reflect the breadth of public health. This course will enable them to interact with researchers and practitioners from other settings and universities around the world. The course will help to build their capacity to work in interdisciplinary teams to address challenging and complex public health problems. This course requires that all GSPh students (with the exceptions noted below) participate in GSPh sponsored lectures, symposiums, and other events, outside of the classroom, during the first fall and spring terms for which they are enrolled and in residence in Pittsburgh. Two terms are required for graduation. Joint degree students, certificate only students and non-degree students are exempt from this requirement.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis

PUBHLT 2023 - PARTCPTRY MODLNG & SIMUL IN PH
Minimum Credits: 3
Maximum Credits: 3
Computational modeling and simulation has become central to public health policy design and decision-making at all levels, from local to international. Overwhelmingly, model-building has become an interdisciplinary team effort, in which domain experts (e.g., Physicians, public health professionals, epidemiologists, infectious disease modelers, policy makers, and computer programmers) all participate in constructing models. Unlike courses in modeling proper--where mathematical or programming techniques are taught--this course equips students to be "participatory" modelers.
(working with programmers and other modelers), and offers hands-on experience in working with programmers, and in evaluating one's collaborative model, through sensitivity analyses and appropriate visualization. Other topics will include how to present model results, how to consume them, and how to match the technique to the problem in public health.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIOST 2041; PROG: Graduate School of Public Health; PLAN: Excluded Plans = Epidemiology (PHD, DPH, MPH, MS)

**PUBHLT 2024 - GLOBAL HEALTH SEMINAR**  
Minimum Credits: 1  
Maximum Credits: 1  
This course explores the field of global health, including the roles and agendas of key actors; ethical and human rights aspects of global health disparities and research and service programs designed to address these disparities; socio-cultural considerations for global health research and service programs; and the rewards and challenges of working in a resource-poor setting or with an underserved population. Students will also be exposed to resources for internships, field placements, and career opportunities in global health. Health and safety issues r/t working abroad will also be covered.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Global Health (CR4) or Peace Corps (TR); LVL: Graduate Year 1

**PUBHLT 2025 - CONCEPTS/METHODS GLOBAL HEALTH**  
Minimum Credits: 2  
Maximum Credits: 2  
This course is designed for students who plan to work in global health and is required for students enrolled in the GSPH global health certificate and peace corps master's international tracks. The course focuses on public health in low- and middle-income countries and also covers issues related to globalization. The course will provide students with the theoretical knowledge and practical skills needed to 1) identify, collect and interpret health and economic data, 2) produce a report on public health priorities at the country level, and 3) propose a course of action (including activities, partners, and measurable indicators) for a priority health issue.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN:Global Health (AC or CR4); or SUBPLAN: Peace Corps (PCORPS-TR)

**PUBHLT 2026 - GLOBAL HEALTH PRACTICUM**  
Minimum Credits: 1  
Maximum Credits: 3  
The practicum provides an opportunity for certificate students to integrate and apply knowledge in global health through a structured, supervised field experience. Learning objectives, assignments, and site are based on the learning needs and career goals of the student and determined in consultation with the certificate director.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**PUBHLT 2027 - TRANSFRMING GLBL HLTH ED ACTN**  
Minimum Credits: 2  
Maximum Credits: 2  
This course is a capstone experience for students in the global health certificate. It is designed to give students the opportunity to apply what they have learned in their training to the challenge of real-world problem-solving in collaboration with individuals and organizations in the developing world. Students will form two teams, and each team will collaborate with experts from a developing country on a significant health issue in that country. The final product will be a policy paper analyzing the problem and proposing relevant, timely and actionable interventions. This course is different from typical courses that follow a prescribed syllabus. It is a hands-on experience, and for the most part the activities and content of each week will be determined as the course goes along, as students, working in their groups, pursue the background research, consultation, and brainstorming necessary to produce their policy papers. Accordingly there is a great emphasis on independent work (in teams), self-motivation, and active learning.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: PUBHLT 2025; PLAN: Global Health (CR4)
PUBHLT 2028 - PEACE CORPS MASTRS INT'L INSHP
Minimum Credits: 0
Maximum Credits: 0
This course is restricted to students in the graduate school of public health peace corps masters international track and is to be used by students during the peace corps field experience portion of the PCMI program.
Academic Career: GRAD
Course Component: Internship
Grade Component: No Grade Required
Course Requirements: SUBPLAN: Peace Corps (PCORPS-TR or PC-TR) or Peace Corps Master's Intl (PCMI-TR)

PUBHLT 2029 - MMPH PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
This course is designed to build and expand upon the experience of the individual student in the MMPH program. The practicum will blend the students existing clinical and/or professional work with additional practical experience with a major public health focus.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

PUBHLT 2030 - RESEARCH ETHICS
Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to topics in research ethics and the responsible conduct of research particularly pertinent to basic and non-clinical, population-based research employing a variety of methods. Students will learn key concepts and methods of ethical reasoning and requirements of human subjects' protection and nonhuman animal research, and will analyze historical and contemporary examples of research misconduct, as well as ethical concerns arising in their own work. Using lecture and small group discussion of assigned readings and participants' research, the course will develop students' skills requisite to design and conduct ethical research, avoid research misconduct, and ethically negotiate the tasks and milestones of academic education and careers (e.g. issues of mentorship and publication). Students will be evaluated (by letter grade) on the basis of the quality of their discussion contributions and quiz/exam responses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

PUBHLT 3000 - INTRO TO TRANSTAL RES HLTH SCI
Minimum Credits: 2
Maximum Credits: 2
This course will provide students with a comprehensive survey of the processes involved in transLating research discoveries into practices that promote health and prevent disease. The specific topics to be covered are listed in the lecture schedule and include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process, will be discussed. The course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Public Works & Engr Admin

PWEA 2996 - SPEC INVSTGTN FOR MPW STUDENTS
Minimum Credits: 1
Maximum Credits: 6
A special project course in which students may broaden their knowledge by studying approved topics or problems in public works engineering or administration under the guidance of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

PWEA 2997 - RESEARCH, M.P.W.
Minimum Credits: 1
Maximum Credits: 15
Non-thesis option research project under the guidance of the faculty advisor.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

PWEA 2999 - M.P.W. THESIS
Minimum Credits: 1
Maximum Credits: 15
Research for the M.P.W. Thesis under the guidance of the major advisor.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Quantv Methods-Operations Mgt

BQOM 2001 - MULTIVARIATE STATISTICS
Minimum Credits: 3
Maximum Credits: 3
Introduce students to multivariate methods and techniques. Basic knowledge of matrix algebra, probability theory and math stats.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2002 - PROBLTY & STATSTCL ANALYSIS 2
Minimum Credits: 2
Maximum Credits: 2
Utilizes the probability and classical decision-theory techniques learned in "probability and statistical analysis 1" in studying standard statistical tools for management decision making. Two of the commonly used techniques, regression analysis, and Bayesian decision making, are discussed. A better understanding of these topics is achieved through the use of computer packages to analyze business problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2003 - ACCEL PROBLTY & STATCL ANALYS
Minimum Credits: 3
Maximum Credits: 3
A combination of probability and statistical analysis 1 and 2 designed for students who enter the MBA program with a demonstrated proficiency in undergraduate mathematical and statistical subjects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2004 - PROBLTY & STATSTCL ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
Utilizes the probability and classical decision theory techniques learned in probability and statistical analysis 1” in studying standard statistical tools for management decision making. Two commonly used techniques, regression analysis and Bayesian decision making are discussed. Other topics may include forecasting, decision theory with multiple attributes, the analytic hierarchy process, experimental design, and nonparametric methods. A better understanding of these topics is achieved through the use of computer packages to analyze business problems."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BQOM 2005 - MGT SCIENCE AND OPERATIONS MGT
Minimum Credits: 2
Maximum Credits: 2
Two objectives are to give a better understanding of operations management problems and to develop mathematical modeling and methodological
skills to solve such problems. A variety of problems are considered, including: product mix, product blending, transportation planning, facility
location, production planning, employment scheduling, line balancing, facility layout, and project management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2006 - MGT SCIENCE AND OPERATIONS MGT
Minimum Credits: 3
Maximum Credits: 3
More extensive version of Introduction to Operations Management" offered in the full-time MBA program. Additional topics may include the
simplex method and techniques for solving multiple objective problems." 
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2013 - ADVANCED OPERATIONS MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Develops modeling skills to deal with complex problems by focusing on a variety of cases. The management science/ operations research perspective
is emphasized with particular attention to developing an appreciation for the assumptions, data requirements, and model complexity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2015 - OPTIMIZATION 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Follows Introduction of Operations Management" by considering approaches of analyzing linear and nonlinear optimization problems with emphasis
on linear programming and related methods."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2016 - OPTIMIZATION 2
Minimum Credits: 1.5
Maximum Credits: 1.5
Follows Optimization 1" and develops methodologies for addressing optimization problems having a discrete set of alternatives. Emphasis is on
integer and dynamic programming methods."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2017 - SIMULATION 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Objectives are to model real-world systems efficiently to choose a simulation language appropriate for a particular problem, to decide what
probability distributions to use as input to a simulation model, to determine if a particular simulation model is a valid representation of a proposed
system, and to analyze simulation output data correctly.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2411; PROG: Katz Graduate School of Business

BQOM 2018 - SIMULATION 2
Minimum Credits: 2
Maximum Credits: 2
Business around the world is fast recognizing the power of process modeling and simulation, and consider it an integral part of business decision-making and continuous improvement initiatives. This course focuses on the application of simulation to the management of operational process. It uses discrete-event simulation to model queuing behavior such as manufacturing processes, service-oriented business processes, hospital emergency rooms, and call centers. Systems that evolve over time and are subject to feedback are of special interest. We will adopt a special-purpose simulation language (e.g. Arena, Extend+, SimQuick) as the principle means for modeling dynamic system simulation. Through considerable hands-on experience, students will learn practical decision making techniques to approach the process and operations management issues.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2019 - PRODUCTION MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Introductory course in operations analysis and management. Thrust is on the applications of management tools and techniques in the production of goods and services rather than the study of techniques per se. Topics covered include operational measures of performance, nature and variation of demand and demand management, batch and small lot production.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2020 - PRODUCTION MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of production management 1". Specifically, issues in shop floor control, project planning and location of facilities will be discussed."

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2021 - DECISION MAKING COMPLEX ENVRN
Minimum Credits: 1.5
Maximum Credits: 1.5
Examines in detail the thought processes of the decision maker when faced with social, personal, business, or political contemporary problems. Through the analytic hierarchy process, decision makers use a framework to organize thoughts in a consistent way, to compare elements and criteria which weigh most heavily in arriving at the best alternative among given options.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2023 - MANUFACTURING STRATEGY
Minimum Credits: 2
Maximum Credits: 2
Addresses strategic issues in manufacturing management. The interrelationships between operations strategies and other functional areas is also addressed. Topics covered include the intertwined issues of technology and productivity, automation and labor policies, computer integrated manufacturing and justification procedures for investment in CIM.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BQOM 2025 - TOTAL QUALITY MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Addresses the issues in quality measurement and management, and the relationship between quality and productivity of an organization. Topics covered include total quality management, monitoring quality control techniques, thoughts from Deming, Juran and Crosby.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2026 - STRATEGIC COST MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This course deals with the strategic implications of alternative methods of product cost measurement. The discussions will primarily be case based and will cover cost measurement issues in both conventional and modern manufacturing environments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2027 - STRATEGIC COST MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of cost management for manufacturing competitiveness 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2033 - SIMULATION
Minimum Credits: 3
Maximum Credits: 3
Objectives are to model real-world systems efficiently; to choose a simulation language appropriate for a particular problem; to decide what probability distributions to use as input to a simulation model; to determine if a particular simulation model is a valid representation of a proposed system; and, to analyze simulation output data correctly.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2035 - PRODUCTION MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
An introductory course in operations analysis and management. Thrust is on the applications of management tools and techniques in the production of goods and services rather than the study of techniques per se. Topics covered include operational measures of performance, nature and variation of demand and demand management, batch and small lot production. Second half of the course focuses on more specific issues in shop floor control, project planning and location of facilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2037 - SIX SIGMA METHODOLOGIES
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide the students with an in-depth knowledge of six sigma and why organizations adopt it as a management strategy, with a focus on highly disciplined processes that develop and deliver near-perfect products and services consistently. The course emphasis is on the DMAIC approach to problem solving: define, measure, analyze, improve, and control; using the certification for six sigma green belt
(CSSGB) primer. Additionally, other quality tools will be reviewed and six sigma projects will be analyzed, showing how organizations achieve breakthrough profitability and significant gains within their quality programs.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BQOM 2038 - SIMUL: DSGN & CTRL OPER SYMS**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Increased competition in many industries has resulted in a greater emphasis on improving productivity and quality and also to reduce costs. This course aims for these goals. It provides students with necessary knowledge for designing, controlling and evaluating the performance of the operations system. This course emphasizes the hands on experience.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BQOM 2039 - SIX SIGMA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A wide range of companies have found that when six sigma and lean thinking philosophies are fully embraced, the enterprise thrives. Several definitions have been proposed for six sigma and lean thinking. The threads common to these definitions are: use of teams that are assigned well-defined projects that have direct impact on the organization's bottom line training in "statistical thinking" at all levels and providing key people with extensive training in advanced statistics and project management emphasize the dmaic approach to problem solving: define, measure, analyze, improve, and control. A management environment that supports these initiatives as a business strategy. The purpose of this course is to provide the in-depth knowledge behind six sigma and lean thinking. Also there will be an emphasis on the ability of the students to "transform" the knowledge to solve/do real life projects also based on the performance of the students (projects and the written test), we are exploring the possibility of the students getting a green belt certification from Katz and/or partner companies.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BQOM 2040 - OPER MGMT PROBLM SOLVING PROJ**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will first present most common problems encountered in managing "making and movement" of goods and services. We will then choose a sample of problems, (including at least one "real" world example) for detailed investigation.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BQOM 2051 - OPERATIONS MANAGEMENT PROJECT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Lecture

BQOM 2139 - SIX SIGMA THEORY AND PRACTICE
Minimum Credits: 3
Maximum Credits: 3
Six Sigma theory and practice has been designed to provide the student with: "strong theoretical knowledge of the six sigma green belt body of knowledge. Practical, hands-on, experience with the Six Sigma methodology. A Katz Six Sigma green belt certificate, for students earning a grade of "B" or better. Six Sigma is a disciplined, data-driven approach to process improvement aimed at the near-elimination of defects from every product, process, and transaction. Lean topics will be included in this course. Six Sigma utilizes the following five-phase problem solving methodology known by the acronym DMAIC: 1. Define the projects, the goals, and the deliverables to customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate data to make sure it is credible and set the baseline. 3. Analyze and determine the root cause(s) of the defects. Narrow the causal factors to the vital few. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. To integrate theory and practice, students will be grouped in teams and work under the mentorship of a Six Sigma black belt on an industry client field project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BQOM 2401

BQOM 2151 - OPER MGMNT PROJECT 1 (CALGON)
Minimum Credits: 1.5
Maximum Credits: 1.5
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BQOM 2152 - OPERATIONS MANAGEMENT PROJECT
Minimum Credits: 1.5
Maximum Credits: 1.5
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2219 - ADVANCED OPERATIONS MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
Develops modeling skills to deal with complex problems by focusing on a variety of cases. The management science/operations research perspective is emphasized with particular attention to developing an appreciation for the assumptions, data requirements, and model complexity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2301 - PROBLY & STATSTCL ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
Introduction to the probability and classical decision theory most useful in a managerial environment. Topics include probability concepts, random variables, probability distributions, point and interval estimation, and hypothesis testing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2304 - PROBLY & STATSTCL ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
Utilizes the probability and classical decision theory techniques learned in Probability and Statistical Analysis 1 in studying standard statistical tools for management decision making. Two commonly used techniques, regression analysis and Bayesian decision making are discussed. Other topics may include forecasting, decision theory with multiple attributes, the analytic hierarchy process, experimental design, and nonparametric methods. A better understanding of these topics is achieved through the use of computer packages to analyze business problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2306 - MGT SCIENCE AND OPERATIONS MGT
Minimum Credits: 3
Maximum Credits: 3
More extensive version of introduction to operations management offered in the full-time MBA program. Additional topics may include the simplex method and techniques for solving multiple objective problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2401 - STATISTICAL ANALYSIS: UNCERT
Minimum Credits: 3
Maximum Credits: 3
This course provides students with a set of integrated statistical tools and methodologies useful in a managerial environment. The emphasis is on the use of real data for modeling and solving problems in the areas of marketing, finance, human resources and operations management. Topics covered include: data analysis and modeling, estimation, confidence intervals, hypothesis testing, simple and multiple regression, analysis and design of experiments and statistical quality control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BQOM 2404 - STATCL ANAL: UNCR PRED QUALT 1**
Minimum Credits: 1.5
Maximum Credits: 1.5
Provides students with a set of integrated statistical tools and methodologies useful in a managerial environment. Topics covered include data analysis and modeling, simple and multiple regression (estimation, testing and prediction) analysis and design of experiments, nonparametric statistics quality control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BQOM 2405 - STATCL ANAL: UNCR PRED QUALT 2**
Minimum Credits: 1.5
Maximum Credits: 1.5
Continuation of BQOM2404.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BQOM 2410 - DCSN TECHNLGY IN MFG & OPRATNS**
Minimum Credits: 2
Maximum Credits: 2
This course provides a foundation in the use of decision technologies for solving complex management problems in a variety of functional areas. Emphasis is given to the utilization of optimization and simulation. Particular attention is devoted to problems in manufacturing and operations management.

**BQOM 2501 - ENTR SYMS & INTGN BUS PROCES**
Minimum Credits: 3
Maximum Credits: 3
This course introduces concepts in ERP and integrated nature of business processes. Students are introduced to all the major components of SAP
ERP. The course participants in enterprise systems and integration of business processes will gain extensive theoretical foundations of the enterprise resource planning (ERP) using the SAP ERP software. The theoretical knowledge is practically implemented and deepened during the course by the use of case studies and hands-on exercises using the SAP ERP system. After completion of the course, students have a comprehensive, theoretical and practical knowledge of the central SAP ERP modules. This includes the organizational and data structure and the integration of a variety of business processes and functional areas. This course is designed to prepare the student for the SAP ERP10 certification exam. The certification - as completion of the course - will be held at the University of Pittsburgh and is a three-hour, 80 multiple-choice questions based knowledge test. Passing the exam leads to a sap certification widely acknowledged in business: the SAP certified business associate with SAP ERP 6.0. The course addresses the following functional areas of the SAP ERP systems: logistics, finance, controlling and human capital management. Furthermore, the integration with the SAP systems SAP business intelligence (BI) and SAP strategic enterprise management (SEM) is presented.

BQOM 2511 - REVNU MGT PRICING ANALYTICS
Minimum Credits: 2
Maximum Credits: 2
Increasingly, due to shortening product life cycles and capital-intensive capacity decisions, companies are being forced to place greater emphasis on managing constrained, but perishable inventory and capacity. In this course, we study quantity and pricing strategies to improve profitability. The main goals of this course are to provide the insights and tools that will enable students to: (1) be able to identify pricing and revenue opportunities; (2) understand the critical differences among different types of opportunity and the approaches needed to address them; (3) understand key concepts including the impact of constrained capacity, opportunity costs, customer response, demand uncertainty, and market segmentation; and (4) be able to formulate and solve pricing and revenue optimization decisions as constrained optimization problems at the level necessary to estimate potential benefits. The focus of the course will be on imparting a broad understanding and grasp of basic techniques rather than the technical nuances of a particular algorithm.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or BQOM 2411); PROG: Joseph M. Katz Grad Sch Bus

BQOM 2512 - ADVANCED DECISION TECHNOLOGY
Minimum Credits: 1.5
Maximum Credits: 1.5
While contemporary decision technologies are increasingly important in today's competitive environment for dealing with complex problems, they can also yield wrong or misleading solutions. The course will consider current applications of these technologies in these areas and students will analyze a variety of cases in these areas using commercial software packages. Emphasis in the course will be given to the potential and limitations in using decision technologies and to alternative approaches to dealing with complex problems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or 2411); PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BQOM 2513 - ADVANCED OPERATIONS MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Focuses on the use of management science/operations management in practice by reviewing a number of successful applications and by solving a variety of case studies. The case studies in the course will give practice in applying many of the methodologies studied in the program, including optimization, simulation, queuing theory, inventory theory and decision theory. One of the objectives in using the cases is to discuss the pros and cons of different models proposed by members of the class to the same problem.

**BQOM 2519 - PRODUCTION MANAGEMENT 1**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
An introductory course in operations analysis and management. Thrust is on the applications of management tools and techniques in the production of goods and services, rather than the study of techniques per se. Topics covered include operational measures of performance, nature and variation of demand and demand management, batch and small lot production.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.
BQOM 2520 - PRODUCTION MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BQOM 2519. Specifically, issues in shop floor control, project planning and location of facilities will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2521 - DECISION MAKING COMPLEX ENVIRONMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Examines in detail the thought processes of the decision maker when faced with social, personal, business or contemporary political problems. Through the analytic hierarchy process, decision makers use a framework to organize thoughts in a consistent way and to compare elements and criteria which weigh most heavily in arriving at the best alternative among given options.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2523 - PROCESS ENGINEERING
Minimum Credits: 1.5
Maximum Credits: 1.5
This course studies the design and engineering of the business processes - the way businesses organize work in service as well as manufacturing operations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2524 - PRODUCTION MANAGEMENT & PROCESS IMPROVEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course is concerned with the continuous improvement principles involved in the production of goods and services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2525 - TOTAL QUALITY MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Addresses the issues in quality measurement and management, and the relationship between quality and productivity of an organization. Topics covered include total quality management, monitoring quality-control techniques and thoughts from Deming, Juran and Crosby.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2526 - STRATEGIC COST MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BQOM 2527 - STRATEGIC COST MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BQOM 2526 - strategic cost management 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2529 - STATISTICAL QUALITY CONTROL
Minimum Credits: 1.5
Maximum Credits: 1.5
The objectives of this course are to make the student thoroughly understand the use and the development of several statistical techniques for quality improvement. These techniques include: control charts, process capability indices, design of experiments and Taguchi Methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 2530 - DISTRIBUTION NETWORKS
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will focus mainly on the operational and tactical aspects of multi-facility network management, but will also briefly touch upon its strategic implications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2411; PROG: Katz Graduate School of Business

BQOM 2531 - GLOBAL SUPPLY CHAIN MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of distribution networks (BQOM 2530).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2411; PROG: Katz Graduate School of Business

BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course will consider multi-facility supply and demand network management from all three perspectives: operational, tactical and strategic. We will emphasize the creation and maintenance of value in the supply network, an activity critical to the survival of all organizations. Value creation can be accomplished by increasing revenue (e.g., By making the delivery system more flexible and responsive to the customer) and/or by decreasing cost (e.g., By eliminating unnecessary activities, and efficiently managing the others, from the distribution channel). Topics covered will include those in the shorter version of the course but in more detail. In addition, network design in uncertain situations, inter-organizational partnerships for effective inventory control, and revenue management will be covered. Using real-life case studies and software packages, we will examine these intricacies of supply and demand network management, learning about the underlying tools, methodologies and decision support systems.

**BQOM 2544 - PROCESS MGT CNTNS IMPROVMNT**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is intended to study the interactions that govern the efficiency of the process, process of converting raw material in the most efficient way - products and services - resulting in a "satisfied" customer. The course first will focus on the study of process fundamentals. We will then illustrate complementary and contradictory relationships among the non-financial measures of process performance, thereby suggesting ground rules for value based process architecture. We will examine some of these interactions, and discuss general principles and concepts managers need to know to understand the impact of their decisions on the organization as a whole. We will present 'what if' scenarios to facilitate the continuous improvement in the business enterprise.  
**Academic Career:** GRAD

Minimum Credits: 1.5  
Maximum Credits: 1.5  

BQOM 2572 - DECISN TECHN: FINANCL SERVS 2
Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course is a continuation of BQOM 2571. Methodologies considered include simulation, decision analysis, and stochastic optimization.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BQOM 2574 - DATA MINING 1  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Data mining, the process of extracting managerially useful knowledge from a set of data, involves applying techniques from statistics and artificial intelligence/expert systems to multivariate numerical and categorical information. Data mining is used extensively in marketing, for analysis of scanner and consumer data from traditional transactions and over the web, and in finance.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BQOM 2575 - DATA MINING 2  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Continuation of data mining 1.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BQOM 2578 - DATA MINING  
Minimum Credits: 3  
Maximum Credits: 3  
Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides you with experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminant analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. The course is methods oriented, as opposed to being methodology oriented, so you will learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2700 - SUPPLY/VALUE CHAIN MGMT PROJ  
Minimum Credits: 2  
Maximum Credits: 2  
This project course is an opportunity for students to apply their management skills and develop their understanding of the challenges of supply/value chain management. In this course a select group of students will work closely with a faculty member to create a specific deliverable that meets the needs of a client organization. This course allows students to engage in experiential learning through a project course that specializes in a topic that may touch one or several of these areas: supply chain management, value chain management, supplier diversity and global sourcing.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis  
Course Requirements: Katz Grad School of Business students only.

BQOM 2801 - STATSTCL ANAL: UNCERT  
Minimum Credits: 3  
Maximum Credits: 3  
Provides students with a set of integrated statistical tools and methodologies useful in a managerial environment. The emphasis is on the use of real data for modeling and solving problems in the areas of marketing, finance, human resources and operations management. Topics covered include
data analysis and modeling, simple and multiple regression (estimation, testing and prediction), analysis and design of experiments, nonparametric statistics and statistical quality control.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BQOM 2811 - DCSN TECHNLGY IN MFG & OPRATNS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a foundation in the use of decision technologies for solving complex management problems in a variety of functional areas. Emphasis is given to the utilization of optimization and simulation. Particular attention is devoted to problems in manufacturing and operations management.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BQOM 2904 - PROBLEM SOLVING AND CREATIVITY

**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
There are numerous books and articles written on creativity and problem solving nowadays. Reading them provides information on how other people were able to do their things and be successful. The course will attempt to help students enhance their creativity which will be done by participation and full involvement by the members of the class for the duration of the term.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BQOM 3005 - STATISTICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Basic stochastic processes and their underlying mathematical theory. Areas covered include the poisson process, renewal theory and their applications, Markov Chains, regeneration processes, and Markov decision processes.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

### BQOM 3010 - INDEP STUDY OPRATIONS RESEARCH

**Minimum Credits:** 1  
**Maximum Credits:** 9  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

### BQOM 3011 - LINEAR PROGRAMMING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
An in-depth coverage of the mathematical properties and algorithms of linear programming including the simplex and revised simplex algorithms, duality theory together with economic interpretations, and the dual simplex algorithm. Discusses special computational techniques for solving large-scale linear programs.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

### BQOM 3012 - NONLINEAR PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
Theory of nonlinear programming followed by a survey of solution methods. Theoretical topics include: concepts of convex sets and functions, optimality conditions with and without differentiability, duality, optimality and duality with generalized convex functions, and the problem of nonlinear constraints. Algorithms will be analyzed in terms of their mathematical and computational characteristics.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BQOM 3013 - STOCHASTIC PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Basic stochastic processes and their underlying mathematical theory. Areas covered include the poisson process, renewal theory and their applications, Markov chains, regeneration processes, and Markov decision processes.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BQOM 3014 - NETWORKS
Minimum Credits: 3
Maximum Credits: 3
The first part of the course studies the mathematics of networks, the problems that arise in the analysis and design of networks, the proven results dealing with the nature of networks and network flows, important algorithms, and solution techniques. The latter part of the course deals with the nature of networks and network problems as they arise in certain areas of application.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BQOM 3015 - STATISTICAL DECISION THEORY
Minimum Credits: 3
Maximum Credits: 3
The main of this course is to study the different decision making theories people have developed with the objective of drawing comparative conclusions not only from a theoretical perspective but also practical. The course starts by looking at classical decision analysis and ends with theories that use subjective information as the primary input. Emphasis is given to the study of the theoretical assumptions of the theory and how they relate to real situations.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BQOM 3016 - CURRENT TOPICS IN OPERATIONS
Minimum Credits: 3
Maximum Credits: 3
This course is intended to acquaint doctoral students with some of the most important current foci in MS/or by reading papers and listening to outside speakers. Students will be expected to write reviewer-like reports, to develop their own research proposals, and to defend their proposals in a group setting.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 3017 - ADV TOPICS OPERATIONS RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Topics vary depending on student interest. Potential topics include queueing and inventory theory, statistical methodology in simulation, and multiple objective optimization. Since the content varies, students may enroll in this seminar for multiple credit.
BQOM 3018 - DECISION MAKING IN COMPLEX ENVIRONMENT
Minimum Credits: 3
Maximum Credits: 3
Decision making in a complex environment is a comprehensive framework that can be used to integrate perceptions and purposes into an overall synthesis of any problem. Applications to portfolio selection, resource allocation, cost/benefit analysis and conflict resolution will be illustrated and developed in the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BQOM 3019 - TOTAL QUALITY MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide in depth knowledge of TQM principles. Main components of TQM will be studied in depth, including strategic planning for quality, leadership role, organizational and cultural change, benchmarking, human resource utilization, reward/recognition systems, employee training, continuous improvement process, the role of information systems in quality management, general problem solving techniques and tools, quality function deployment, statistical process control, Taguchi Methods and design of experiments.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 3020 - SIMULATION
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to give an up-to-date treatment of the important aspects of simulation methodology. The topics covered include: modeling and generating stochastic inputs, output data analysis, variance reduction techniques, experimental design and model validation. Application of the simulation techniques in manufacturing, finance, marketing and other functional areas will be explored. An overview of the simulation languages including Arena will be given.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 3021 - GRAPH THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will cover basic concepts on graph theory useful in the study of networks in operations research and Bayesian statistics. Emphasis will be given to conceptual aspects rather than theoretical developments.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BQOM 3022 - OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to classical and current topics in mathematical programming, intended for students who are not in the Odsai area or who have limited prior exposure to such material. Course topics include a review of linear and matrix algebra, duality and optimality conditions in linear programming, solution methods for linear programming, branch and bound, modern integer programming heuristics, convexity and convex functions, optimality conditions for nonlinear problems, solution methods for nonlinear programming, and bounded horizon dynamic programming.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

**BQOM 3023 - DATA MINING SEMINAR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is a primarily methodological and secondarily computational treatment of data mining topics of recent, current, and developing interest in the management science literature. Three subsets of the literature will be covered in depth: (1) data mining papers that have appeared in the KGSB a-journal list; (2) ensemble methods; and (3) optimization-based approaches to data mining. Grading in the course will be based on presentations and a term project. Familiarity with data mining topics and tools at least to the level of BQOM 2578 or equivalent or permission.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**BQOM 3099 - READINGS IN OPERATIONS RESEARCH**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: Katz Grad School of Business students only.

**Radiology**

**RAD 5330 - IMAGING CLERKSHIP (3 WEEKS)**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Three-week course designed to increase experience in radiology and imaging. Will be accomplished by lectures, seminars and student case presentations. All lectures are at a senior medical student level emphasizing clinical applicability. By course end students are expected to understand basic uses and limitations of anatomic and physiologic imaging modalities in diag. rad., nuc. med., and MRI. Students will be expected to acquire basic understanding of common radiographic studies and understand indications and limitations of different imaging methods used in evaluating common clinical problems.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**RAD 5384 - EXPERIMENTAL RADIATION ONCOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Students undertaking this elective may join ongoing basic research projects in the laboratory or, with permission, initiate their own projects. Students will be expected to participate in all aspects of their segment of the ongoing research; experimental design, data collection, data analysis and reporting.  
Academic Career: MEDS  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U

**RAD 5421 - DIAGNOSTIC RADIOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
A four-week elective in diagnostic radiology offered to those who wish to gain additional exposure to the field. Students may choose a broad based curriculum which will expose the individual to all areas of radiology or may choose to do a focused radiology elective in angio/interventional radiology, ultrasound, or neuroradiology.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**RAD 5422 - ADVANCED RADIOLOGY**
A four-week intensive elective course in advanced diagnostic radiology for fourth year medical students. The course will include didactic lectures and demonstrations that will be presented by members of the radiology faculty. Students will also gain clinical exposure to radiology in some of the following assignments: thoracic imaging/musculoskeletal imaging/pediatric radiology/abdominal imaging/nuclear medicine/women's imaging/neuroradiology. Students will also have access to the radiology learning lab, teaching files, and other educational materials for individual study. Participants are required to present a comprehensive clinical case with an emphasis on the radiology features pertinent to their case presentation. The case should be of a patient the student encountered in prior clinical rotations. A written examination will be required at the end of the elective.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**RAD 5425 - VASCULAR/INTERVENTION RADIOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
A four-week clinical elective. Service covers all aspects of angiographic and interventional procedures below the neck. Diagnostic procedures and common interventional procedures are performed. The medical student will scrub into interventional cases with radiology staff, fellows and residents, attend daily case review sessions, and perform clinical rounds on patients being followed by the interventional radiology service.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**RAD 5430 - NUCLEAR MEDICINE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Nuclear medicine involves the formulation and use of radioactive substances used as tracers of metabolic processes. They may be used in vitro or in vivo in patients for therapy or for diagnosis where radioactivity is quantified and displayed by various instruments. Students are brought into the service for hands-on demos of the various procedures exemplified by clinical material. The principle routine clinical studies include functional imaging of brain, heart, bones, kidneys, liver, thyroid, adrenal and various neoplasms by means of monoclonal antibodies.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**RAD 5435 - CLINICAL RADIOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
A four-week elective designed to increase understanding of diagnostic radiology. Students will be assigned to one-week rotations in four different areas: thoracic imaging, musculoskeletal imaging, pediatric radiology, abdominal imaging, nuclear medicine, women's imaging, and neuroradiology.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**RAD 5440 - INDEPENDENT STUDY IN RADIOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Elective (4 weeks) is available to senior students with a particular interest in a subspecialty area of radiology. Student will design an intensive, independent study elective with a staff radiologist in the interest area. A written proposal is required to be submitted to the director of undergraduate medical education in radiology outlining the goals and objectives of the elective which has been approved by the faculty advisor. The prospectus is required a minimum of one month in advance of beginning project for credit.

**Academic Career:** MEDS  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

**RAD 5450 - CARDIOVASCULAR RADIOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This four-week clerkship allows a student to become involved in the clinical and experimental activities of an active cardiovascular radiology section. Patient evaluation, treatment, and follow-up are stressed and experimental invasive therapies are evaluated.
RAD 5620 - CLINICAL RADIATION ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four week elective offers the student instruction and experience in clinical radiation oncology and an intro to radiotherapy physics at the joint radiation oncology center. Facilities will be at the university medical center, Magee Women's Hospital and Shadyside Hospital. The student will spend time with faculty members in consult, exam, treatment and follow-up of the particular subgroups of malignant disease managed by the individual physician. Student will attend department conference, treatment planning sessions, operative radioactive isotope insertion, etc.

RAD 5630 - INTRO TO CLIN RADTN-ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four-week clinical elective offers the student instruction and experience in clinical radiation oncology and an introduction to radiobiology and radiation therapy physics in the Department of Radiation Oncology. The student will spend time with faculty members in consultation, examination, treatment, management and follow-up of the particular subgroups of malignant disease managed by the individual physician. The student will attend departmental conferences, treatment planning sessions, radiosurgery planning and treatment, operative radioactive isotope insertions, etc. The student will be introduced to the physics aspects of radiation therapy. The elective is planned so that each student will have the opportunity to obtain an overall view of the field of radiation oncology.

RAD 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0

RAD 5651 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0

RAD 5826 - EXPERMNTAL RADIATION ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
Students undertaking this four week elective may join ongoing basic research projects in the lab or with permission, initiate their own related projects. This lab is involved in evaluating the role of biologic response modifiers on hematopoietic recovery after treatment of tumors in mice. In addition, we are inserting genes into hematopoietic stem cells that contain them. Objectives are experimental design, cell collection and counting, sizing and culture and DNA isolation. Involvement expected in ongoing research, experimental design, data collection, analysis and report.

RAD 5827 - EXPERIMNTAL DIAGNOSTC RADOLGY
Minimum Credits: 0
Maximum Credits: 0
This 4 week elective is designed for the student interested in a career in radiology and who wishes to pursue a research project. The student needs to find a radiology faculty member who is willing to collaborate in a research project. These research projects can vary according to the combined
interest of the student and the faculty preceptor. The student and faculty preceptor need to submit a written research proposal before this elective can be approved.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

---

**RAD 5840 - RADIATION ONCOLOGY RESEARCH**

Minimum Credits: 0  
Maximum Credits: 0  
This elective provides research project opportunities in radiation oncology to interested and motivated students. Project areas include clinical studies, prospective or retrospective clinical studies, creating a database, evaluating outcomes of solid tumors. The objective is to teach the basic approach to research in the specialty.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

---

**RAD 5841 - RESEARCH IN RADIOLOGY**

Minimum Credits: 0  
Maximum Credits: 0  
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

---

**RAD 5899 - IND STUDY RADIATION ONCOLOGY**

Minimum Credits: 0  
Maximum Credits: 0  
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

**Academic Career:** MEDS  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

---

**RAD 5900 - EXTRAMURAL RADIOLOGY**

Minimum Credits: 0  
Maximum Credits: 0  
A clinical experience in radiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

REL 2137 - BIBLICAL INTERPRETATION
Minimum Credits: 3
Maximum Credits: 3
This course surveys the methods used in the modern academic study of the Hebrew bible. Rather than approaching the bible as "revealed scripture," scholars over the last two centuries have developed a variety of literary strategies that seek to reconstruct the world and the circumstances that produced the Hebrew bible. Also considered are the immense contributions of archaeology during the last two centuries and how modern literary-critical techniques have been applied to the text of the Hebrew bible. This seminar is offered in conjunction with RELGST 1675: reading the Hebrew Bible

REL 2160 - CATHOLICISM IN THE NEW WORLD
Minimum Credits: 3
Maximum Credits: 3
This course examines the history of the Roman Catholic church since 1492 in the Americas using various moments of internal crisis or external conflict as focal points for study. Topics include: missionary and military contact with new world indigenous populations after 1492, the impact of the Protestant reformation on the new world, the minority situation of Catholics in the new United States, the impact of the French & Haitian revolutions, the Irish famine and its consequences, the Mexican revolution, conflicts between Catholic ethnics, the divisive impact of the Catholic church's support for fascist regimes in the 1930s and 1940s, counter-cultural forms of Catholicism (Catholic workers, conscientious objectors, civil rights activists, pacifists), Vatican II, 1962-65 and its impact, liberation theology and structural reform in Latin America, shifting theological positions on social and moral issues, and the sexual abuse crisis, 2000 to the present. The course also addresses the aesthetic traditions of Catholicism including sacred architecture, music, and the arts, including vernacular forms. This seminar is offered in conjunction with RELGST 1372: Catholicism in the new world

**REL 2343 - MODERN ISRAEL**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The idea of a Jewish-initiated return to the ancient biblical homeland in the last quarter of the 19th century marked a significant break with traditional Jewish thinking on the theme of return and redemption. The subsequent migration to Palestine and the building of institutional Jewish life there culminating in the independent state of Israel (1948) has not only been a watershed in modern Jewish history, it has also had a major impact on Judaism and global affairs. This seminar traces the history of modern Israel from the idea of the return through the state of Israel today. It is offered in conjunction with RELGST 1256: modern Israel.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**REL 2344 - GENDER AND JEWISH HISTORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar highlights the impact of gender in modern Jewish history, revealing the divergent experiences of Jewish women and Jewish men as they adapted to the modern world. We take a transnational approach to this history, tracing the ways in which circumstances in Europe, America, and the middle East shaped how Jews understood and responded to gender roles. In exploring such themes as religion, politics, education, anti-Semitism, work, and family, we see how gender and its effects indelibly marked Jewish life in the modern world.

REL 2400 - EAST ASIAN BUDDHISM
Minimum Credits: 3
Maximum Credits: 3
The transmission of Buddhism to East Asia was a momentous development in the history of world cultures and religions. Not only did it precipitate major changes in the cultures of China, Korea and Japan, it also was attended by a transformation within Buddhism itself. Beginning with an introduction to the basic concepts of Buddhism, this course examines the major doctrinal, meditative, devotional, and institutional traditions and themes within Chinese and Japanese Buddhism in historical perspective. Particular attention is paid to the problems of transmission of thought from one culture to another and to the ways in which Buddhism changed to meet those challenges and make itself relevant to the members of East Asian traditions. This seminar is offered in conjunction with RELGST 1550: East Asian Buddhism.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

REL 2401 - BUDDHIST MEDITATIVE TRADITIONS
Minimum Credits: 3
Maximum Credits: 3
This seminar examines the relationships between doctrine, practice, and institution and the culture(s) in which they grew by looking at three themes or sources of authority in Buddhist meditative traditions such as Chan/Zen, approached historically: (a) mythology, genealogy, and ideology, (b) meditative techniques, soteriological stratagems, and the enlightenment experience, and (c) monastery organization, operation, and rituals. The seminar concludes by exploring the relationship between Zen and nationalism or "orientalism" as Zen moves out of the monasteries and out of East Asia and into the West.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2420 - JAPANESE RELIGIOUS TRADITIONS
Minimum Credits: 3
Maximum Credits: 3
This course provides an historical overview of religion in Japan from the 3rd century BCE up to the present. It introduces many of the events, texts, doctrines, institutions, personalities, and practices in the history of religion in Japan and examines issues related to myth, shamanism, ritual, art, and politics. This seminar is offered in conjunction with RELGST 1570: Japanese religious traditions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

REL 2422 - POPULAR REL CHANGING JAPAN
Minimum Credits: 3
Maximum Credits: 3
The majority of Japanese today claim not to have any religious faith but most participate in religious activities. Why is this? Those Japanese who do espouse religious faith often pray at both Buddhist temples and Shinto Shrines without feeling conflicted. How is this possible? To answer these and other questions, religion in contemporary Japan is examined primarily on the basis of ethnographic studies. This seminar is offered in conjunction with RELGST 1572: popular religion in a changing Japan.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

REL 2505 - RELIGION, COMMUNICTN & CULTURE
Minimum Credits: 3
Maximum Credits: 3
We consider religious phenomena as expressions of human communication and therefore view the study of religion as the interpretation of particular forms of communication; metaphor, symbol, paradox, myth and ritual.
Academic Career: GRAD

Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2520 - JESUS AND JUDAISM
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2550 - TEACHING RELIGIOUS STUDIES
Minimum Credits: 3
Maximum Credits: 3
This is a seminar on how to teach undergraduates about religion, ideology and similarly controversial subjects.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2700 - RELIGION AND MODERNITY
Minimum Credits: 3
Maximum Credits: 3
This course is one of the two core seminars in the doctoral program. In it, we address fundamental developments and issues in the study of religion and modernity.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2705 - MYTH, SYMBOL AND RITUAL
Minimum Credits: 3
Maximum Credits: 3
Myths, symbols and rituals of different cultures are explored comparatively as to their significance, role and overall relationship to one another.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

REL 2710 - PERSPECTIVES ON RELIGION
Minimum Credits: 3
Maximum Credits: 3
A serious introduction to the study of religion is undertaken by reviewing the efforts and insights of the principal scholars who have worked in the field and made significant contributions to the literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2715 - THEORIES OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
This seminar examines some of the theoretical writings that have set the agenda for contemporary religious studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2725 - READINGS IN STUDY OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
A variety of individual projects exploring methodologies in use in the academic investigation of religion may be initiated by students under the guidance of a senior faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

REL 2730 - PHILOSOPHY OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
The central focus is on arguments for and against the existence of god of traditional Western theism. We scrutinize carefully the argument from religious and mystical experiences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2745 - RITUAL PROCESS
Minimum Credits: 3
Maximum Credits: 3
We examine the role of ritual and ritual-like phenomena in religion and other forms of human expression.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2750 - ETHNOGRAPHY: STUDY OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
This course introduces graduate students to techniques and methodologies appropriate to the ethnographic study of contemporary religious movements.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2760 - SOCIOLOGY OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
This course commences with a discussion of the classical tradition of the sociology of religion, and then proceeds to consider some of the major preoccupations of sociologists of religion since the 1960s -- e.g. civil religion, new religious movements, religious conversion, secularization, church-state relations, fundamentalism and the global context of contemporary religious change.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2765 - CULTURAL SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course involves discussion of the main trends in the sociological consideration of systems and patterns of beliefs, values and symbols and the social vehicles in terms of which culture is produced, sustained and interrupted. It is particularly concerned with the theoretical issue of the place of culture in sociological analysis, on the one hand, and interpretations of contemporary cultural phenomena, on the other. Thus the course has both theoretical and empirical components.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
REL 2800 - JEWISH-CHRISTIAN RELATIONS
Minimum Credits: 3
Maximum Credits: 3
The question of how Christianity relates to what was for a long time the only tolerated religious minority within European society is an important point of departure for the study of European social, cultural and even political history. This course assess closely critical moments in the relationship from, the emergence of Christianity through the medieval and into the modern period.
Academic Career: GRAD

Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

REL 2805 - SAINTS EAST AND WEST
Minimum Credits: 3
Maximum Credits: 3
A Russian monk once observed that "each saint is a unique event." Indeed, in various religious traditions we encounter men and women who are recognized and venerated as particularly holy and unique witnesses to the divine. Just as each saint is unique within his or her tradition so is each tradition of saints unique in its articulation and expression of the overall religious culture. By looking cross-culturally at materials on saints and problematizing the notion of sainthood itself, we examine religious themes, ideas and symbols found in them. These diverse writings are often marked by a very personal tone, a deeply felt relation with the divine (sometimes reflecting a saint's inner struggles, sometimes his/her mystical experience of union), but also by pleas and calls for social and/or religious reforms. Our examples of devotional literature include Hindu, Muslim and Christian sources, medieval as well as modern. This seminar is offered in conjunction with RELGST 1540: Saints East & West.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 2807 - MYSTICISM EAST AND EAST
Minimum Credits: 3
Maximum Credits: 3
Mysticism, understood as a living experience of theological doctrines, constitutes an unexpected point of convergence between such different religious traditions as Hinduism and Eastern Orthodox Christianity. We look into how this spiritual kinship is forged from distinct practices in India and in the traditions of Orthodox Christianity by examining the selected mystical writings of the Hindu sages and holy men and women of the orthodox church, past and present. The course is structured around three central themes: god as mystery: negative theology (Hindu and orthodox ways of unknowing the divine), god as person: the Hindu notion of avatar and orthodox understanding of incarnation, and god as prayer: two selected methods of contemplation (Hindu yoga and Orthodox Hesychast prayer). This seminar is offered in conjunction with RELGST 1545: Mysticism East & East.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

REL 2820 - EVIDENCE AND ARGUMENT
Minimum Credits: 3
Maximum Credits: 3
In this seminar, we critically examine the intellectual practice of the disciplines; their uses of evidence, forms of argument, genres of publication, institutional structures, and roles in the wider society.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2821 - KANT & HEIDEGGER TRUTH & ART
Minimum Credits: 3
Maximum Credits: 3
In this seminar we examine Gadamer's claim that truth in the humanities -- and thus e.g. in the study of religion - is like the truth of a work of art. As
suggested by Gadamer, we pursue this goal by looking closely at Kant's and Heidegger's aesthetics, with some attention to Hegel as well.

**Academic Career:** GRAD

Grade Component: Grad Letter Grade

REL 3341 - AMERICAN RELIGIOUS HISTORY
Minimum Credits: 3
Maximum Credits: 3
Survey of religious history in North America from the beginning to the present.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 3342 - RELG IN EURO-AMERICA 1700-1900
Minimum Credits: 3
Maximum Credits: 3
Religions are among the oldest forms of transnational organizations. From the time of Columbus, voyage in 1492 to the apex of Western imperialism in the mid-20th century, Western religions structured human relations, enabled action and survival, and provided Utopian visions of hope. They were also contributors to genocide, slavery, and oppressive moral, economic, and political systems. This seminar introduces critical issues in the religious history of the new Atlantic world created as a result of the "Columbian encounter." We begin in the 18th century when the colonization process is well underway and conclude at the moment when the United States is poised to surpass great Britain as the world's most powerful empire. The seminar supplies the historical content, critical terms, and theoretical concepts necessary for the study of the history of religion in the Atlantic world between the 18th and 20th centuries. We assume that each religion needs to be understood in light of its relations to those traditions that stand beside it and that each religion had to reckon with the Protestantism that came to dominate colonial North America. Topics include the end of witchcraft prosecutions in the West, the spiritual transformation of indigenous Americans, the creation of syncretic slave religions in the Americas, the impact of capitalism and imperialism upon religious expansion and sect formation, alternatives to mainstream traditions (including magic and occultism), the effects of religion on gender roles, the enlightenment critique of religion, and the impact of the social sciences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

REL 3345 - RELIG THOUGHT OF THE 19TH C
Minimum Credits: 3
Maximum Credits: 3
This course examines the major currents of Protestant thought in the period by focusing on a concern common to almost all of them; the life of Jesus. The influence of Schleiermacher and the hermeneutical problem of the relationship between religion and history are given special consideration.
Academic Career: GRAD

**REL 3510 - SYSTEMS OF RELIGIOUS THOUGHT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The chief objective of this seminar is to train students in the analysis and interpretation of systems of religious thought, mainly, how to identify their unique principles and how to recognize their points of inconsistency.
We take up the question of the "essence" of Christianity as discussed in a number of 19th century European theological tracts wherein those writers sought an answer to the question: what are the indispensable constitutive features of Christianity?

We examine the variety of theological perspectives that have been developed in various areas of the third world and of their implications for theological activity and social responsibility.

The political, social and religious context of liberation theology in Latin America are examined closely.

A variety of individual reading and research projects may be undertaken by students under the close supervision of a senior faculty member.

An examination of the Judeo-Christian views of nature and how these relate to that tradition's views of science and technology and what ethical guidelines this tradition may offer with respect to contemporary ecological issues.

A critical analysis of the relations between church and society in Latin America with emphasis on the issues of socio-political ethics.
Minimum Credits: 3  
Maximum Credits: 3  
We focus on selected contemporary Protestant and Roman Catholic ethicists who endeavor to apply Christian ethical perspectives to issues of social concern.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

REL 3546 - LAW, THEOLOGY AND ETHICS  
Minimum Credits: 3  
Maximum Credits: 3  
We address distinctions and relations between law, morality and religion as well as treat issues as diverse as censorship, civil disobedience and punishment.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

REL 3547 - CHRISTIAN ETHICS AND POLITICS  
Minimum Credits: 3  
Maximum Credits: 3  
An analysis of issues in contemporary political philosophy and their implications for Christian social ethics.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

REL 3548 - SEMINAR IN WEBER AND TROELTSCH  
Minimum Credits: 3  
Maximum Credits: 3  
An examination of the contribution of Max Weber and Ernst Troeltsch to the history and theory of Christian ethics.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

REL 3549 - DIRECTED STUDY IN ETHICS  
Minimum Credits: 3

REL 3761 - CRITICAL ISSUES: SOC OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
A panoramic survey of the major developments in the field since the time of the "classics".
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 3799 - PH.D. COLLOQUIUM
Minimum Credits: 1
Maximum Credits: 1
An intensive examination of a specific theme drawn from one of the four Ph.D. areas developed in the program. Students produce an original research paper as part of their contribution to the semester's work.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis

REL 3902 - DIRECTED STUDY-PH.D. LEVEL
Minimum Credits: 3
Maximum Credits: 9
Students develop and carry out research projects under the supervision of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

REL 3990 - INDEPENDENT STUDY - PH.D. LEVEL
Minimum Credits: 1
Maximum Credits: 9
This reading course is to help students prepare for Ph.D. comprehensive examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

RELGST 2345 - GENDER AND JUDAISM
Minimum Credits: 3
Maximum Credits: 3
This seminar places Jewish women at the center of modern history, revealing experiences of modernity that often differed both from those of Jewish men, and from those of women who did not share their religious and cultural background. We take a transnational approach to this history, exploring the ways that Jewish women shaped, and were shaped by, the circumstances in Europe, America, and the middle east. In exploring such themes as religion, politics, education, work, and family life, we will see how Jewish women negotiated the constraints placed upon them and worked to create new possibilities and opportunities.

RESTD 5111 - DENTAL ANATOMY-MORPHOLOGY
Minimum Credits: 2
Maximum Credits: 2
The purpose of the course is to introduce the student to: (a) the anatomy of the primary and permanent teeth, (b) the supporting structures of the human dentition, (c) the importance of dental anatomy to patient care.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

RESTD 5115 - DENTAL ANATOMY-MORPHOLOGY LAB
Minimum Credits: 1
Maximum Credits: 1
The laboratory is designed to develop psychomotor skills by carving teeth from wax, identify the anatomical landmarks of each tooth carved, and identify the average anatomical size of the teeth carved.
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade

RESTD 5143 - PRINS OPERATIVE DENTISTRY 1
Minimum Credits: 2
Maximum Credits: 2
This amalgam restorations course considers the terminology, principles and procedures of the following basic concepts in clinical operative dentistry: 1. Moisture control and soft tissue management of the operating field, 2. Rotary and hand instrumentation, 3. Dental caries, 4. Cavity preparation and restoration of all teeth using amalgam alloy, 5. Pulpal protection - varnished, liners and bases, 6. Occlusion, and 7. Dental biomaterials amalgam.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

RESTD 5147 - PRINS OPERATIVE DENTISTRY 1 LAB
Minimum Credits: 2
Maximum Credits: 2
This course provides the opportunity to develop psychomotor skills in the following operative procedures: 1. Rubber dam isolation, 2. Instrumentation, 3. Dental caries detection, 4. Preparation of various amalgam cavity preparations, 5. Placement of pulpal protection, 6. Restoration and various cavity preparations with amalgam, and 7. Occlusal adjustments.
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad Letter Grade

RESTD 5172 - PRINS OF OPERATIVE DENTISTRY 2
Minimum Credits: 1
Maximum Credits: 1
This course will acquaint the student with the materials and techniques involved in the use of tooth colored restorative materials. Composite resin, class ionomer, bonding agents and sealant materials are reviewed along with the techniques of restoring Class 1 through Class 6 caries, diastema closure, and direct veneers.
Academic Career: DMED
Course Component: Lecture
Grade Component: Letter Grade

RESTD 5176 - PRINS OPERATIVE DENTSTRY 2 LAB
Minimum Credits: 2
Maximum Credits: 2
This laboratory course is designed to give the student hands on experience with a variety of composite resin and glass ionomer restorative materials. Proper techniques of cavity preparation, placement and finishing of the various materials is also discussed.
Academic Career: DMED
Course Component: Practicum
Grade Component: Letter Grade

RESTD 5185 - INTRA-CORONAL RESTORATIONS LAB
Minimum Credits: 0
Maximum Credits: 0
These laboratory sessions are designed to provide hands-on experience in preparing six different preparations for intra-coronal restorations; provide hands-on experience in fabricating wax patterns; provide supervised experience in developing ability to visualize a path of insertion for a preparation; enable the student to plan and prepare restorations for badly damaged teeth.
Academic Career: DMED
Course Component: Practicum
Grade Component: No Grade Required

RESTD 5244 - GERIATRICS
Minimum Credits: 1
Maximum Credits: 1
Students will be introduced to the concepts of geriatrics and the multidisciplinary approach to the treatment of the geriatric patient in traditional and non-traditional settings. Guest lecturers will be invited to provide information germane to their specific fields.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

RESTD 5281 - PRINS OF OPERATIVE DENTISTRY 3
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

RESTD 5313 - ENDODONTICS 3
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

RESTD 5319 - CLINICAL RESTORATIVE DENTISTRY
Minimum Credits: 3
Maximum Credits: 3
This course will provide patient care in a clinical setting under faculty supervision. Treatment procedures will include amalgam restorations, composite restorations, castings and endodontic therapy.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad Letter Grade

RESTD 5342 - PRACTICE ADMINISTRATION
Minimum Credits: 1
Maximum Credits: 1
This course introduces students to the management concepts required in dental practice. Material is presented on managing the following areas of dental practice: personnel, insurance, equipment purchasing, legal responsibilities, accounting, computer usage, record keeping and other crucial areas. Although focusing primarily on private dental practice, alternative practice options are discussed, including HMOs, hospitals and publically funded dental services.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**RESTD 5348 - CLINICAL ENDODONTICS 1**
*Minimum Credits:* 2  
*Maximum Credits:* 2  
This course will focus on endodontic procedures for the adult dental patient. Clinical experiences in the diagnosis and treatment planning will be provided.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**RESTD 5349 - CLINICAL RESTORATIVE DENTISTRY 2**
*Minimum Credits:* 2  
*Maximum Credits:* 2  
This course will provide patient care in a clinical setting under faculty supervision. Treatment procedures will include amalgam restorations, composite restorations, castings and endodontic therapy.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**RESTD 5371 - PRACTICE MANAGEMENT**
*Minimum Credits:* 1  
*Maximum Credits:* 1  
The student will be exposed to technology used in a dental office, will be able to evaluate different insurance plans and options for participation, will understand concepts in effectively managing employees, and will develop knowledge of the business end of a dental practice.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**RESTD 5375 - ESTHETIC RESTORATIVE DENTISTRY**
*Minimum Credits:* 1  
*Maximum Credits:* 1  
This course for third year students builds on knowledge of restorative dentistry materials, armamentarium, and clinical procedures as they relate to the practice of esthetic restorative dentistry. This course is introduced after the student has experienced patient care and basic restorative procedures on patients in the clinical environment. In this course, students will learn the principles of esthetic direct and indirect restorations and how to place, contour, and finish the restorations to achieve an esthetic result. In addition, students will discuss the importance of treatment planning, identifying options for treatment, and the need to engage patients in treatment decisions.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**RESTD 5379 - CLINICAL RESTORATIVE DENTISTRY 3**
*Minimum Credits:* 3  
*Maximum Credits:* 3  
This course will provide patient care in a clinical setting under faculty supervision. Treatment procedures will include amalgam restorations, composite resin restorations, porcelain restorations, castings and endodontic therapy.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**RESTD 5399 - ENDODONTIC EMERGENCIES**
### RESTD 5419 - CLINICAL RESTORATIVE DENTISTRY
- **Minimum Credits:** 3
- **Maximum Credits:** 3
- This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients presenting with pulpal pathoses.
- **Academic Career:** DMED
- **Course Component:** Clinical
- **Grade Component:** Grad Letter Grade

### RESTD 5448 - CLINICAL ENDODONTICS 2
- **Minimum Credits:** 3
- **Maximum Credits:** 3
- This course will focus on endodontic procedures for the adult dental patient. Clinical experiences in the diagnosis and treatment planning will be provided.
- **Academic Career:** DMED
- **Course Component:** Clinical
- **Grade Component:** Grad Letter Grade

### RESTD 5449 - CLNCL RESTORATIVE DENTISTRY 5
- **Minimum Credits:** 2
- **Maximum Credits:** 2
- This course will provide patient care in a clinical setting under direct faculty supervision. Treatment procedures will include amalgam restorations, composite resin restorations, porcelain restorations, castings, and endodontic therapy.
- **Academic Career:** DMED
- **Course Component:** Clinical
- **Grade Component:** Grad Letter Grade

### RESTD 5847 - DIRECTED STUDY
- **Minimum Credits:** 1
- **Maximum Credits:** 3
- This directed study is designed for the undergraduate dental student who desires to pursue research interests in oral and maxillofacial radiology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.
- **Academic Career:** DMED
- **Course Component:** Directed Studies
- **Grade Component:** Grad LG/SU3 Basis

### RESTD 5877 - DIRECTED STUDY
- **Minimum Credits:** 1
- **Maximum Credits:** 3
- This directed study is designed for the undergraduate dental student who desires to pursue research interests in oral and maxillofacial radiology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.
- **Academic Career:** DMED
- **Course Component:** Directed Studies
- **Grade Component:** Grad LG/SU3 Basis

### RESTD 5900 - INDEPENDENT STUDY
- **Minimum Credits:** 1
- **Maximum Credits:** 3
- This course provides the student with the opportunity to independently originate, organize and complete a scientific investigation on a topic in
restorative dentistry.

**Academic Career:** DMED  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

**RESTD 5919 - AEGD CLINICAL ROTATION**  
Minimum Credits: 3  
Maximum Credits: 3  
This elective course is a clinical rotation in the aged clinic where the student will have the opportunity to treat dental patients who require iv or general anesthesia sedation. In conjunction with the supervising faculty, the participant will review the patient's medical history and diagnose the patient's dental needs. The participant will develop, sequence and phase the patient's treatment plan. Comprehensive restorative treatment will be performed.  
**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

**RESTD 5923 - SPORTS DENTISTRY**  
Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**RESTD 5924 - ADVANCED COMPOSITE TECHNIQUES**  
Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad SN Basis

**RESTD 5941 - ADVANCED ENDODONTICS**  
Minimum Credits: 3  
Maximum Credits: 3  
This course includes lectures, seminars and clinical practice. The lectures include advanced techniques in instrumentation and obturation of endodontic treatment of complex cases. Endodontic surgery techniques are reviewed.  
**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**RESTD 5943 - AMALGAM RESTORS TCH PRACTCM**  
Minimum Credits: 1  
Maximum Credits: 3  
The participant will provide preclinical laboratory instruction to dental students during the amalgam restorations course adjunctive and supplemental to instruction provided by the course faculty. The student's participation in this course will provide experience as an educator at the professional school level.  
**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**RESTD 5949 - AEGD CLINICAL ROTATION**  
Minimum Credits: 3  
Maximum Credits: 3  
This elective course is a clinical rotation in the AEGD clinic where the student will have the opportunity to treat dental patients who require iv or general anesthesia sedation. In conjunction with the supervising faculty, the participant will review the patient's medical history and diagnose the patient's dental needs. Following consultation with the patient's physician(s) and the school's anesthesia department, the participant will develop, sequence and phase the patient's treatment plan.  
**Academic Career:** DMED
Scientific Computing

**SCICMP 2100 - TOPICS IN SCIENTIFIC COMPUTING**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

Efficient computing techniques used in large-scale scientific computations are the focus of the course. Vector and pipelined processors for scientific computations, parallel computing, graphics, simulation techniques, and algorithmic design are among the possible topics covered. Students have access to sophisticated equipment.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

Social Welfare

**SWWEL 2008 - URBAN ANALYSIS**
- **Minimum Credits:** 2
- **Maximum Credits:** 2

The course provides students with knowledge of and appreciation for the nature of the city and the process of urbanization, and their effects on the human condition. Students will be helped to understand the significance of the urban environment for social welfare, and to gain an understanding of major urban problems. Students will analyze alternative programs for dealing with the problems. Pittsburgh will be used as a case study.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** School of Social Work students only.

**SWWEL 2009 - CRIMINAL JUSTICE SYSTEMS**
- **Minimum Credits:** 2
- **Maximum Credits:** 2

This is an introductory course about the juvenile and criminal justice system. It is conducted with lectures, discussion and guest speakers. Included are the interphasing of apprehension and detection, the policy, prosecution and adjudication, courts, incarceration and parole, and varied theories explaining them.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** School of Social Work students only.

**SWWEL 2012 - ETHNCITY, AGING & MENTAL HLTH**
- **Minimum Credits:** 2
- **Maximum Credits:** 2

Factors of race and ethnic identification are examined in relationship to differential allocations of social and economic resources and to mental health status. Implications for social work intervention are discussed.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** School of Social Work students only.

**SWWEL 2016 - SERVICE DELIVERY SYS ELDERLY**
- **Minimum Credits:** 2
- **Maximum Credits:** 2

This course identifies, describes and assesses the major federal, state, and community programs (particularly those under the older Americans act as amended in 1972 and 1973) that are having a considerable impact on older Americans. The student is enabled to increase his understanding of the awareness of society's efforts in developing a variety of programs and services designed to meet the needs of older Americans.

**Academic Career:** GRAD
**Course Component:** Lecture
SWWEL 2020 - CHILD AND FAMILY ADVOCACY
Minimum Credits: 3
Maximum Credits: 3
This is a practical skills course in legal advocacy for non-lawyers. The emphasis is on practical techniques and courtroom skills to enhance the professional effectiveness of social workers in the courtroom setting. Typical areas of discussion include rules of evidence, legal procedure, expert witnesses, interview techniques, cross-examination, law reform, case review and readings and the legal rights of children.

SWWEL 2028 - SEMINR CRIMNL JUSTC & SOCL WRK
Minimum Credits: 2
Maximum Credits: 2
The seminar addresses various topics such as juvenile delinquency, the impact of the criminal justice system on the offender, professional social work in correctional practice, etc. The seminar provides students with an opportunity to pursue topics of special interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWWEL 2035 - GLOBL PERSPECTIVES SOCIAL WORK
Minimum Credits: 3
Maximum Credits: 3
This seminar-style course is designed to provide students an opportunity to engage in an introductory exploration of global social issues/problems/developments and to global approaches to address these issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWWEL 2039 - SOCIAL POLICY AND GERONTOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to examine the dynamics and procedural steps in social policy making and implementation first in a general context and then more specifically in relation to the older population. The last half of the course is devoted to the identification of major issues in social policy for the aged and intensive analysis of selected policy decisions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2051 - ECONOMICS AND SOCIAL WORK
Minimum Credits: 3
Maximum Credits: 3
This course provides an understanding of basic economic theory, and discusses its application to social welfare policy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021 and SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWWEL 2054 - COMMUNITY MENTAL HLTH PRACTICE
Minimum Credits: 2
Maximum Credits: 2
This course discusses systems of health, community mental health, mental retardation and agency delivery of services. It also focuses on the
interrelationships of those systems and on their impact on individuals.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWWEL 2056 - HEALTH SYSTEMS & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
Building on a background knowledge in social welfare, this course focuses on issues and problems in the U.S. healthcare system including the historical development of health care, the structure and function of the healthcare system, current and proposed financing mechanisms and the social, political and ethical issues which shape healthcare policy.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2057 - MENTAL HEALTH & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
Historical development of mental health policies and the structure of the mental health delivery system and the policies and legal base that guide it. Special emphasis is given to how policies affect the care of persons with chronic mental illness.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**SWWEL 3059 - CHILD AND FAMILY POLICY**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course reviews the life of children in the U.S. From 1600 to present. It is based on the work of Robert Bremner and an analysis of early legislation and legal actions.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** School of Social Work students only.

**SWWEL 3060 - CHILD AND YOUTH POLICY**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course addresses key issues in child and youth policy through the critical analysis and application of social, cultural, philosophical, psychological, and biological theory. Starting from work of John Rawls, students will develop an understanding of various philosophical frameworks pertaining to issues of equality, distribution, and liberty and will use these principles to articulate a conception of social justice to guide child and youth policy. The class will then move to consider the role of psychological and biological theories and their relationship to and meaning for child and youth policy. Following this discussion, the class will turn to critical social and cultural theories and will debate the implications of these perspectives for the ways in which we think about and treat young people.

**Academic Career:** GRAD
SWWEI 3061 - POLIT ECON PBLC WELFARE POLC
Minimum Credits: 3
Maximum Credits: 3
This is a period of critical shifts in the basic aspects of our economic life. The nature of economic and technological change and its impact on social welfare policy are reviewed and analyzed from a number of different perspectives. Specific issues include shifts in the labor force; industrial policy and social welfare; and the consequences for the delivery systems of health and human services.

SWCED 2045 - FMLY LIFE CYCL CHLD ADLSCNT
Minimum Credits: 3
Maximum Credits: 3
Understanding the family life cycle, whether child and adolescent or adult can underscore critical developmental issues and passages. Focusing on
theoretical and practical aspects of family life cycles this course will increase awareness of exciting growth and development stages of children and youth from birth to adolescence, as well as help you appreciate your role in addressing issues with child and adolescent relationships.

SWCED 2046 - FAMILY THERAPY DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
Directed study will focus on family therapy theories and systems as well as ethical guidelines in professional practices.

SWCED 2049 - FAMILY THERAPY SYSTEMS & THEORY
Minimum Credits: 3
Maximum Credits: 3
This course presents systems theory, bridging from an "individual" to a "systems" way of thinking.

SWCED 2052 - THEORY & PRACTC COUPLE THERAPY
Minimum Credits: 3
Maximum Credits: 3
An in-depth examination of the practice of marital counseling. Within this course the focus is on the marital therapist's skilled employment of conjoint interviewing techniques and on the unique treatment issues - sexual dysfunction, divorce, remarriage - brought by couples to the therapeutic area.

SWCED 2053 - SYSTEM CHANGE TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
This is a practice course in which advanced skills in family and marital intervention are developed. Students are expected to increase their knowledge and facility in such areas as highly sophisticated engagement techniques, methods for enhancing communication, contracting with clients, utilizing paradoxical interventions, and devising a variety of therapeutic tasks and homework assignments.

SWCED 2054 - ADVANCED FAMILY THERAPY
Minimum Credits: 3
Maximum Credits: 3
This course intensively explores theory and practice in family and marital practice. This may involve concentration on a selected theory, or the development of an integrated eclectic stance. Lecture, discussion and student case presentations will be utilized to document theoretical and strategic applications.

SWCED 2055 - ETHICS AND PROFESSIONALISM
Minimum Credits: 3
Maximum Credits: 3
The areas that must be understood and mastered for independent practice will be covered in this course. These include self-supervision, consultative and supervisory methods, applied research techniques, the management of private practice, and a variety of related legal and ethical issues in marital and family practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2056 - RESEARCH ISSUES FAMILY THERAPY
Minimum Credits: 3
Maximum Credits: 3
This course will review family and marital research. A historical overview of family research, and an overview of factors to use in judging the quality of research. Small groups will be formed to conduct independent reviews of specific areas of family research to be presented in class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2057 - CLIN ISS COUPLES FMLY TREATMNT
Minimum Credits: 3
Maximum Credits: 3
Will focus on the application of systems thinking to specific clinical issues and settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2058 - PRACTICUM 1
Minimum Credits: 3
Maximum Credits: 5
The focus of supervision will be the application of the student's selected theory (or theories) in actual case situations. Students will be supervised in small groups. The student will be expected to have a minimum of six client contact hours a week of family or couples therapy in their own agency, private practice or other setting. Supervision is based on on-going case material drawn from these sources.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2059 - PRACTICUM 2
Minimum Credits: 3
Maximum Credits: 5
Continuation of SWCED 2058 Practicum 1.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2060 - OVERVIEW EMPLOYEE ASSIST PROGMS
Minimum Credits: 2
Maximum Credits: 2
This course is open to any helping professional interested in exploring workplace and EAP practice. This overview course provides information on development and management of employee assistance programs, as well as the benefits of EAPs to organizations and their impact on both individuals and organizations. Students will gather knowledge to prepare for entry into the field of employee assistance, and current EAP practitioners will enhance their knowledge and skills for their current work. This course will also acquaint students with leading EAP practitioners in the region, as well as regional and national EAP organizations, as it explores issues and trends for the future of workplace practice/employee assistance. You will learn: history, models, and settings for EAP practice. Personal and psychological problems prevalent in the workplace. Clinical practice in managed behavioral health care. Substance abuse and workplace issues. Ethical, legal, and other governmental policies and regulations. EAP administration,
marketing, and evaluation. Preparation for the national EAP certification (CEAP) examination
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2061 - EAP INSTIT: CISD IN WORKPLACE
Minimum Credits: 1
Maximum Credits: 1
This institute will address issues of critical incident stress debriefing and related issues and responses in various workplace settings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2062 - EAP ETHC VALU CHNGNG ENVRN
Minimum Credits: 1
Maximum Credits: 1
This two-day EAP institute will provide a framework for addressing challenges to EAP's ethics and values amidst organizational change on day one. Day two will examine how to cope and manage various organizational changes and the EAP roles in organizational changes.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2063 - EAP: MENTAL ILLN SUBS ABUSE
Minimum Credits: 1
Maximum Credits: 1
EAP institute will provide an overview of mental illness and substance abuse commonly called MISA or dual-diagnosis. From this overview the institute will examine workplace issues and treatment considerations, as well as research/assessment aspects of dual-diagnosis for MISA.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2064 - EAP INSTIT: WELFARE TO WORK
Minimum Credits: 1
Maximum Credits: 1
A two-day intensive workshop will focus on Workforce 2000 and issues of diversity in the workforce.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2065 - EAP SUMM INSTU: TRNG TRAINER
Minimum Credits: 1
Maximum Credits: 1
This institute will enhance training capacity and help examine the training issues and roles for EAP's and other human service professionals in the workplace. Will examine EAP roles and issues in workplace training and explore hands-on group exercises in developing and presenting our own training sessions.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2066 - EAP PRACTICUM/SUPERVISION GRP
Minimum Credits: 5
Maximum Credits: 5
Assignment to appropriate EAP and/or substance abuse clinical setting for clinical work on weekly basis. Weekly 2-hour group supervision session.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Social Work students only.

**SWCED 2067 - EAP INSTU: MGNG WRKPLAC CNFLCT**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This 2-day EAP institute will address EAP practitioner rules in resolving and mediating conflicts that arise in workplace settings. Students will examine potential workplace conflicts and learn conflict resolution skills to help ameliorate these situations. The course will feature trainers from the Pittsburgh mediation center and a panel of EAP practitioners for case studies.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

**SWCED 2068 - LEGAL ISSUES IN THE WORKPLACE**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This institute will overview the key policy and legal implications of policies impacting workplace -- such as ADA, affirmative action, etc. The instructor will work with a panel of employee assistance and human resource practitioners on legal cases relative to workplace settings.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

**SWCED 2069 - SUBSTANCE ABUSE-WORKPLACE ISSS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Examines substance abuse assessment and treatment. Focus will be on issues of substance abuse in workplace settings with special emphasis on "fitness for duty" and "return to work" considerations in the workplace.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

**SWCED 2070 - UNDST & TREATING EATING DISRDS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The eating disorders will be studied in relation to diagnostic criteria, demographics, cross cultural data, gender, sexual orientation, medical consequences, other psychiatric conditions and their implications for treatment, sex abuse, family dynamics, heredity, and cultural expectations of thinness and dieting.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWCED 2071 - SUBSTANCE ABUSE: (MISA)**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
One of two introductory courses for MISA training series. This course will provide a comprehensive examination of drug and alcohol abuse from a biopsychosocial perspective.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.
SWCED 2072 - MENTAL ILLN/HLTH: INTRO (MISA)
Minimum Credits: 3
Maximum Credits: 3
This course is a basic introduction to major mental disorders and the mental health system. It is directed to chemical dependency and mental health professionals who currently work with individuals who have a mental illness or to other health care and helping professionals who are interested in acquiring a basic knowledge of mental illness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2073 - COMORBID MNTL ILLN SUBS ABUSE
Minimum Credits: 3
Maximum Credits: 3
Capstone of three-course MISA training series. This course provides an overview of treatment issues for people coping with both mental illness and substance abuse.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2074 - EAP ADLSCNT ADLT SUBS ABUSE
Minimum Credits: 1
Maximum Credits: 1
A one-day program on evidence-based practice with adolescents and adult substance abusers. Focus will be on strategies for engaging and retaining challenging adolescents their families in treatment; multi-systemic assessment & intervention; strategies for relapse prevention allying with larger systems of care. Students will also complete directed study for academic credit beyond the institute.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2080 - EAP CAPSTONE SEMINAR
Minimum Credits: 1
Maximum Credits: 1
EAP students, in concluding their certificate program, present on a topic they have researched to demonstrate mastery and competency of EAP material.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2081 - EAP INSTU: INCORPATNG EAP PRA
Minimum Credits: 1
Maximum Credits: 1
This two day institute will help students to: understand the national employee assistance standards and practice principles; enhance assessment skills and resources; make effective and targeted referrals; focus more intensely on follow-up; and use case study applications to practice situations.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2082 - EAP INSTU:WRKFRCE DVLP & DIVRS
Minimum Credits: 1
Maximum Credits: 1
Two-day institute focuses on current workplace issues and practices related to diversity and workforce recruitment and retention.
Academic Career: GRAD
Course Component: Workshop
SWCED 2083 - EAP INSTIT: COMPASSION FATIGUE

Minimum Credits: 1
Maximum Credits: 1
Compassion fatigue is known to professionals by many names-secondary traumatic stress disorder, vicarious traumatization. It is simply a byproduct of caregiving i.e. the more intense and personal the caregiver, the more vulnerable. This course will offer an understanding of the emotional, psychological, physical, social, spiritual impacts of the work we are doing, as well as tools to prevent and treat negative effects of this critical work.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWCED 2084 - EAP INSTIT: COACHNG FOR LIFE

Minimum Credits: 1
Maximum Credits: 1
This one-credit institute will explore aspects, skills, and techniques for the growing field of coaching. This institute will differentiate coaching from counseling as it examines models and tools applied to various counseling settings including: life, career, executive, small business and general employee assistance programs.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2092 - PROGRAM EVALUATION INSTITUTE

Minimum Credits: 3
Maximum Credits: 3
Workshop on advanced program evaluation methods.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCED 2093 - OVERVIEW CONTEM PROGRAM EVAL

Minimum Credits: 3
Maximum Credits: 3
This course offers a review of modern program evaluation methods involving collaborative research framework.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWCED 2094 - OVERVIEW CHLD WELFARE POLICIES

Minimum Credits: 3
Maximum Credits: 3
This course provides a review of child welfare policies, programs and evaluation findings. This course is particularly pertinent to students interested in learning about contemporary program evaluation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWCED 2095 - EVALUATION DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This course is designed to conduct independent evaluation research under the supervision of the instructor.

Academic Career: GRAD
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

SWCED 2096 - CAPSTONE SEMINAR IN EVALUATION  
Minimum Credits: 1  
Maximum Credits: 1  
Implementation of evaluation study and presentation of findings to community experts and leaders.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: School of Social Work students only.

SWCED 2097 - DRCTD STUDY: EMPL ASSIST PRGM  
Minimum Credits: 1  
Maximum Credits: 3  
Directed study will be by appointment with instructor and will require independent reading and written assignments. Courses complemented in this way can then meet American association of marriage and family therapist requirements for application for clinical membership certification.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

Social Work General

SWGEN 2004 - BUILDING INTERDIS PARTNERSHIPS  
Minimum Credits: 3  
Maximum Credits: 3  
Provides a forum for exploring the possibilities of multi-disciplinary education and service provision. Students will learn how their professional frames of reference influence their perspectives on community issues and on collaboration with other service providers, and how to bridge professional frames of reference.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad HSU Basis  
Course Requirements: School of Social Work students only.

SWGEN 2006 - RURAL SOCIAL WORK  
Minimum Credits: 3  
Maximum Credits: 3  
Students will explore the distinctive nature that characterizes rural social work practice within the context of cultural competency. Learning will incorporate a historical policy background for rural social work in the United States; enhanced practitioner skills for rural settings; and current issues and trends facing rural communities. Utilizing an ecological systems framework, students will examine the interface of individuals, families, and communities in the rural setting; and increase their awareness of issues regarding age, gender, ethnicity, sexual orientation, religion, ability, and socioeconomic status. Social work values and ethics will be interwoven throughout the course, with a specific focus on dual relationships, social/economic justice, and strengths-based practice.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2007 - SOCIAL WORK AND THE LAW  
Minimum Credits: 3  
Maximum Credits: 3  
This course will provide students with a basic understanding of the law, legal processes, and legal systems as they relate to social work practice and an introduction to the field of forensic social work. The course will challenge students to think about the variety of ways that social work practice, social policy, and law intersect. In particular, it will focus on specific aspects of the intersection between law, policy, and practice, including: the significance of courts and case law to issues of social justice, the intersection of social work and law on issues of significance to social workers, models of legal reasoning/decision making, the role of social workers in legal proceedings, the role of social workers in using the law for social reform or protection of civil rights, the use of social science by courts, legal regulations and case law that influence social work practice, and tensions between the law and social work values and ethics.
SWGEN 2017 - CONTEM ISS CHLD FMLY: BRTH - 6
Minimum Credits: 3
Maximum Credits: 3
Topics such as day care, child and adolescent abuse, motherhood, and assessment of high-risk infants will be considered as they pertain to public health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWGEN 2018 - APPLD ISS CHILDREN & FAMILIES
Minimum Credits: 3
Maximum Credits: 3
Topics such as day care, child and adolescent abuse, motherhood, and assessment of high-risk infants will be considered as they pertain to public health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWGEN 2019 - INTGNRTNL PROGS: APPRCH HUMN
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the background, conceptual development, and outcomes of intergenerational programs appropriate to students' professional environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

SWGEN 2027 - COMPUTR APPLC SOCL WRK PRACTNR
Minimum Credits: 2
Maximum Credits: 2
This course provides an introduction to computer skills, data processing, and selected applications directed toward enhancing the social work practitioner's ability to organize, analyze, and interpret data available or collected in agency settings. In addition, skills needed to understand quantitative findings in research reports will be covered. Skill development in the use of word processing, spreadsheet, and statistical analysis software is a course goal.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWGEN 2034 - FDS SOCL WRK PRA DIVRS POPLTNS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on issues of cultural diversity and oppression. Students are prepared to practice with, and on behalf of, diverse populations using empowerment as a guiding frame of reference.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWGEN 2058 - FEMINIST SOCIAL WORK
This course focuses on gender and social work, beginning with a critical examination of the concept of feminist practice, with attention to oppression, power, and privilege in helping relationships and in women's lives more broadly. It explores meanings of gender as it intersects with race/ethnicity, class, sexuality, age, and ability in the lives of women in general and specifically as social workers and clients. Taught in a seminar format, this course examines topics such as work, welfare, family, violence, justice system involvement, health, mental health, and women as agents of change and is appropriate for students concentrating in micro or macro levels of practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

---

**SWGEN 2062 - ADVOCACY AND LOBBYING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide an overview of how a nonprofit organization can engage in effective public policy advocacy and lobbying on behalf of its mission and the people it serves. Advocacy includes a broad range of activities, which attempt to influence a specific policy, legislative, regulatory or implementation outcome. Social workers play critical roles in the advocacy process, policy analysis, issue development, public education, constituency organizing, lobbying, voter engagement, and creating an entire advocacy campaign. This course will focus on the best practices to deepen your understanding of advocacy tools, processes, and models.

**Academic Career:** GRAD

### SWGEN 3025 - DIRECTED STUDY

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  

A doctoral course in which the student defines the topic area and obtains approval for it from a member of the faculty who serves as his/her mentor.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### SWGEN 3028 - DIRECTED STUDY IN TEACHING

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This is an elective offered for students who wish to have an experience in teaching. The experience includes mentoring by a current teacher in the program in a course of the student's selection and development of an educational plan including bibliography and readings.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### SWGEN 3039 - COMPREHENSIVE STUDY

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  

This would be limited to students who have completed all courses but have not yet passed the exam, or have two or fewer courses to take and need to be full-time. Students may register for up to nine credits, and may register twice at most. The advisor will serve as faculty of record.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

### SWGEN 3044 - THEORY 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

The general issues involved in applicability of social science theory provides a framework for an exploration of selected social psychological theories. Concepts from role theory, interrelated with socialization and behavioral theories, are presented and analyzed. Students will then apply selected theoretical concepts to a social problem area of their choice, in order to assess the theory's contribution to an understanding of the problem.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

### SWGEN 3053 - THEORY 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course covers macro social science perspectives relevant to social work: economic, organizational and social control aspects of society. Classical theories (Marx, Weber, and Durkheim) are studied and applied to particular social problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

### SWGEN 3055 - ANAL THRY MICRO INTRV SOCL WRK

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

3200
This course examines the research and theoretical foundations of the primary micro interventions used in social work practice. Among these are the social systems/ecological approach, cognitive/behavioral, psychosocial, task-centered, client-centered, and various brief interventions.

**Academic Career:** GRAD  
**Course Component:** Lecture

**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWRES 2021; CREQ: SWCOSA 2099; SBPLAN: COSA (Social Work-MS)

**SWRES 2021 - FOUND S SOCIAL WORK RSRCH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to familiarize students with the basic elements of research and their implication for social work practice. Students will gain knowledge of the various components of research methodology, including the formulation of a researchable question, strategies of research design,
questionnaire construction, and data analysis and interpretation. Lab sessions will allow students to develop their skills in the various topics covered in lecture.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

### SWRES 2023 - DIRECTED STUDY IN RESEARCH

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A supervised experience in designing, implementing, and reporting an individually defined empirical research project. This course provides research experience for advanced research students.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### SWRES 2024 - CLINICAL RESEARCH

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course considers the practical issues involved in designing clinical evaluations and applied research in mental health and social service settings. Treatment outcome research, process research, and the methodological problems relevant to operationalizing and defining outcomes are considered. Instruments representative of the clinician, a research team, relevant others, clients, and the respondents are analyzed. Scaling issues and appropriate statistics are discussed. Student research proposals are developed and presented in class.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### SWRES 2025 - SOCIAL WORK RESEARCH & LAB 1

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is a two-term course designed to familiarize students with the basic elements of research and their implication for social work practice. Students will gain knowledge of the various components of research methodology, including the formulation of a researchable question, strategies of research design, questionnaire construction, and data analysis and interpretation. Lab sessions will allow students to develop their skills in the various topics covered in lecture.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

### SWRES 2026 - SOCIAL WORK RESEARCH & LAB 2

**Minimum Credits:** 2  
**Maximum Credits:** 2  
A continuation of SWRES 2025.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

### SWRES 2028 - ADMINISTRATIVE DATA PROCESSING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide a theoretical and functional framework of data processing. Logical and physical manipulation of data are stressed. Social work practice situations are employed as a laboratory environment in which the student is expected to demonstrate mastery of physical and electronic processing of data. Emphasis is placed upon computer applications to complete such tasks as: text editing, text formatting, information retrieval and data base management.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.
SWRES 2033 - EVALUATIVE RESEARCH SOCL SERVS
Minimum Credits: 3
Maximum Credits: 3
This course explores major issues and knowledge needed for evaluating the effects of social programs. Links to practice issues of accountability, program monitoring, and program planning will be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099; SBPLAN: Direct Practice (Social Work-MSW)

SWRES 2045 - QUALITATIVE RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to selected methods of qualitative research. These methods are applicable to investigating questions which arise in social work practice situations and can be used to evaluate interpersonal practice. Qualitative designs, data acquisition strategies, and analytic techniques, including the use of computers, will be examined through both formal descriptions and studies that exemplify their use.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099; SBPLAN: Direct Practice (Social Work-MSW)

SWRES 2047 - COMMUNITY BASED PARTCIPTRY RSRCH
Minimum Credits: 3
Maximum Credits: 3
This course is intended for students primarily focused on community organizing who want to better understand theories, principles and methods of applied, action research with communities and community partners, as well as how Community-based Participatory Research (CBPR) is used in community planning and organizing to address local issues and social needs. This course is proposed to be coordinated with COSA field placements in the east end of Pittsburgh, especially Homewood, and will serve as an integrated field seminar for these students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021; CREQ: SWCOSA 2099; SBPLAN: COSA (Social Work-MS)

SWRES 2051 - SINGLE SUBJECT RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course examines the feasibility of using single-subject methodology to evaluate effectiveness in social work practice. Single-subject research designs are examined in terms of self-monitoring and external monitoring approaches. Different social work contexts are illustrated in order to demonstrate contextual situations to which single-subject designs may be applied. Each student is expected to carry out a self-monitoring project or use single-subject research in work with a client.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099; SBPLAN: Direct Practice (Social Work-MSW)

SWRES 2085 - ASSESSMENT OF RESEARCH
Minimum Credits: 2
Maximum Credits: 2
This course will focus on studying research in order to respond to the following questions: why do research? - How to set studies--how to make studies useful for policy determination--how to determine the appropriate application of policy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 2099 - FIELD WORK
Minimum Credits: 1
Maximum Credits: 8
The field practicum emphasizes the integration and application of social work values, knowledge and skills in practice settings. Placements are in community service delivery systems and are individualized to combine the student's choice of concentration area, certification program and specialized skills interest.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWRES 3009 - ORGANIZATIONAL RESEARCH**
- Minimum Credits: 3  
- Maximum Credits: 3  
This course is the second level, required research course for all COSA students. Examination of variables which influence organizational development and maintenance, adaptation and change, integration and innovation, and goal setting and planning will provide the focus for the course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWRES 3020 - RESEARCH METHODS 1**
- Minimum Credits: 3  
- Maximum Credits: 3  
Basic design issues are explored and related to specific survey research skills, such as sampling, questionnaire construction, and measurement, issues, and data collection. Alternative research designs will also be explored. The relationship of research design and methods of casual inference will be emphasized.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

**SWRES 3021 - MULTIVARIATE ANALYSIS**
- Minimum Credits: 4  
- Maximum Credits: 4  
A class research project will be designed and implemented. Alternative data analysis strategies will be learned and applied to the project data.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

**SWRES 3022 - RESEARCH METHS: CAPSTONE SEM 1**
- Minimum Credits: 1  
- Maximum Credits: 1  
Research Capstone 1 involves instruction in the developmental process and refining of a research question and conceptualization attached to (1) data collected as part of the students' GSA experience, or (2) secondary data available to the student. If neither of these sources of data is relevant, the student should register for 2-3 credits of directed study to enable the collection of new data that will be the basis for later data analysis and manuscript preparation to be conducted in research capstone 2 (SWRES 3023, 3 credits, Spring term). The Capstone 1 experience involves implementation of skills in the preparation and writing of an introduction section for an APA-style empirical research paper. The end product for this term is a well-written introduction for the study that will be completed in the Capstone 2 course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Social Work students only.

**SWRES 3023 - RES METHODS: CAPSTONE SEM 2**
- Minimum Credits: 3  
- Maximum Credits: 3  
In the Spring term of the capstone sequence, the student will complete the data analysis and write the method, results, and discussion sections of the manuscript. Included in this will be instruction in the preparation of tables and figures in APA style and format. Some lecture time may be devoted to statistical and psychometric procedures. Some instruction will be individualized to address the specific methodological and analytic issues raised within each student's study purpose. Each section of the manuscript will be reviewed and evaluated with feedback guiding subsequent drafts resulting
in a submission-ready paper. The goal of Capstone 2 is to have a final paper ready for submission to a peer-review journal by the end of the term.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWRES 3024 - DIRECTED STUDY-RESEARCH PRACTCM**  
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Provides students an opportunity to work with faculty on research projects carrying out specific research skills leading to publication of findings.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**SWRES 3026 - EVALUATIVE RESEARCH**  
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course focuses on the methodological and practical problems arising from efforts to design and implement evaluative research of social service programs. It explores the difficulties inherent in program evaluation efforts, emphasizing an analytic view of factors leading to these difficulties. It also explores alternative actions available to the applied researcher. This course assumes solid knowledge of basic research methods and design.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWRES 3027 - DATA PROCESSING**  
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course is designed to offer the knowledge and skills required in processing quantitative research data. Questionnaire construction, coding, programming, and analysis of data are presented. Emphasis is placed on learning the SPSS computer program.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWRES 3028 - ADMINISTRATIVE DATA PROCESSING**  
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will provide a theoretical and functional framework of data processing. Logical and physical manipulation of data are stressed. Social work practice situations are employed as a laboratory environment in which the student is expected to demonstrate mastery of physical and electronic processing of data. Emphasis is placed upon computer applications to complete such tasks as: text editing, text formatting, information retrieval and data base management.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWRES 3029 - INFERNTL STAT SOCL WORKERS**  
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course deals with bivariate statistical procedures (e.g. t-tests, one-way analysis of variance, correlation and regression) applied to social work and social research problems. Solutions to the research/statistical problems are achieved by use of both mainframe computer (primarily SPSSX) and microcomputer programs.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.
SWRES 3033 - EVALUATIVE RESEARCH SOCL SERVS
Minimum Credits: 3
Maximum Credits: 3
Explores major issues and knowledge needed for evaluating the effects of social programs. Links to practice issues of accountability, program monitoring, and program planning will be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3039 - COMPETENCY
Minimum Credits: 1
Maximum Credits: 9
Completion of a competency research paper demonstrates integration of several aspects of doctoral course work and requires doctoral defense before an appointed committee. A doctoral student may register for competency research credits during the period of time in which he/she is working on research and has completed all other course requirements.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

SWRES 3040 - DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 9
The doctoral dissertation represents a new, creative effort at a level higher than that expected in the competency paper. A doctoral student may register for dissertation research credits after successful completion of the competency, during any semester in which he/she is working on a dissertation and has completed course requirements.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

SWRES 3041 - MENTAL HLTH SERVICES RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course will review the major research methodologies being applied to services research questions. The research literature on topics such as mental health services in primary care, access, and adherence will be examined. Students will be expected to write a research proposal for a services study.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3045 - QUALITATIVE RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to selected methods of qualitative research. These methods are applicable to investigating questions which arise in social work practice situations and can be used to evaluate interpersonal practice. Qualitative designs, data acquisition strategies, and analytic techniques, including the use of computers, will be examined through both formal descriptions and studies that exemplify their use.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWRES 3047 - COMMUNITY ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
This course is designed to acquaint students with the knowledge and skills of research techniques commonly used in community organization. The variety of survey methods available to conduct community needs assessment-focus groups, in-person interviews, telephone and mail surveys will be discussed. Students will learn techniques for field observation and analysis of data archives. Emphasis will be placed on assessing utility of these approaches for evaluation of social work practice in community settings.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: School of Social Work students only.

Sociology

SOC 2000 - RESEARCH FOR THE MASTERS DEGR
Minimum Credits: 3
Maximum Credits: 3
This course is limited to sociology students who are doing research for, and completing the empirical paper.

Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

SOC 2001 - CORE SEMINAR IN SOCIOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
This basic course is taught in modular form, with different faculty members conducting 3/4 weeks of seminars each. The modules provide introductions to the three concentrations in the sociology graduate program; global comparative sociology; social network processes; gender, race and class. Compulsory for and restricted to first year graduate students in sociology.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

SOC 2002 - CORE SEMINAR IN SOCIOLOGY 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of the core seminar in sociology 1. It is also taught in modular form with each set of 3/4 weeks of seminars being devoted to one of the following: global and comparative sociology; social network processes; gender, race and class. Compulsory for and restricted to first-year graduate students in sociology.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

SOC 2003 - LOGICS OF SOCIAL INQUIRY
Minimum Credits: 3
Maximum Credits: 3
This course will concentrate on the different forms of research methodology that are particularly appropriate for the concentration areas in the graduate program. (Global and comparative sociology; social network processes; and gender, race and class). These forms span the epistemological spectrum employed by contemporary sociology. Compulsory for first-year students in sociology.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

SOC 2004 - CENTRL THEMES IN SOCIAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will focus on pivotal issues of contemporary social theory. The main specific themes introduced and discussed generally have relevance to each of the three concentrations in the sociology graduate program (global and comparative sociology; social network processes; gender, race, and class). There will be a special emphasis on the synthesis of social and cultural theories.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

SOC 2010 - EMPIRICAL PAPER
Minimum Credits: 3
Maximum Credits: 3
This course is limited to sociology students who are doing research for, and completing the empirical paper.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

SOC 2011 - GLOBAL & COMPARATIVE SEMINAR 1
Minimum Credits: 3
Maximum Credits: 3
This is the first in a sequence of courses in the concentration area of global and comparative sociology. The specific content will vary from instructor to instructor, but there will definitely be attention paid to transnational connections and processes, as well as to basic features of comparative sociology and the changing character of world society.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2012 - GLOBAL & COMPARATIVE SEMINAR 2
Minimum Credits: 3
Maximum Credits: 3
This is the second in a sequence of courses in the concentration area of global and comparative sociology. The specific content will vary from instructor to instructor, but there will definitely be attention paid to transnational connections and processes, as well as to basic features of comparative sociology and the changing character of world society.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2021 - SOCIAL NETWORK PROCESSES SEM 1
Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course introduces concepts, theories and methods for describing social systems as small as a companionship or as large as the global system. A social system is conceived as a network of relations among the participants, be they individuals, organizations, nations or other kinds of actors. Concepts are introduced to describe participation of an actor, formation of groups and systemic properties of a network. We review theory about dynamics & processes of a SYS methods for analyzing social networks are learned by using software to analyze data on networks.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2031 - GENDER, RACE, CLASS SEMINAR 1
Minimum Credits: 3
Maximum Credits: 3
This seminar examines gender, race and social class as interconnected dimensions of structured social inequality and axes of social stratification. We will examine empirical social and historical research on the dynamics of race, class and gender and as well as theories of class analysis, theories of racialization and feminist/gender theories. The course will cover these issues in the contemporary United States, as well as drawing upon comparative and historical research. Students will be expected to read, discuss and lead class presentations on books and articles.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2032 - GENDER, RACE, CLASS SEMINAR 2
Minimum Credits: 3
Maximum Credits: 3
This seminar examines gender, race and social class as interconnected dimensions of structured social inequality and axes of social stratification. We will examine empirical social and historical research on the dynamics of race, class and gender and as well as theories of class analysis, theories of racialization and feminist/gender theories. The course will cover these issues in the contemporary United States, as well as drawing upon comparative and historical research. Students will be expected to read, discuss and lead class presentations on books and articles.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

3208
**SOC 2034 - RACIALIZATION**
Minimum Credits: 3  
Maximum Credits: 3  
This seminar will examine recent theorizing and historical and empirical studies of racialization and social mobilization around issues of race, including racist and antiracist movements. Much of our attention will focus on race in the U.S., but we will also consider issues of global racism and antiracism and case studies of the processes of racialization in other regions of the world. The seminar will be discussion based, with weekly readings as well as the opportunity for students to pursue a topic of interest through a literature review or research project.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**SOC 2035 - THEORIES AMER RACE RELATIONS**
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to introduce graduate students to historical and contemporary sociological theory and empirical research on race and racism. The course will focus primarily on research based in the United States. Students should leave with an understanding of the sociology of race that will inform graduate student research projects.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

**SOC 2101 - SOCIOLOGICAL THEORY 1- CLSSICAL**
Minimum Credits: 3  
Maximum Credits: 3  
The course provides an opportunity for in-depth study of selected writings of Karl Marx, Max Weber, Emile Durkheim and at least one other of the "classical originators" of the sociological discipline (Georg Simmel or Alexis de Tocqueville, for example). With appropriate flexibility depending on the "fourth figure" selected, the primary issues chosen for comparative examination are conceptions of the nature of knowledge, modes of theoretical reasoning, and principal substantive concerns addressed by these writers over the course of their lives.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**SOC 2102 - SOCIOLOGICAL THRY 2-POST-CLSSICAL**
Minimum Credits: 3  
Maximum Credits: 3  
Sociological theory has developed in three phases: the classics (such as the works of Durkheim, Weber, Simmel and Mead), the post-classic theory developed on the basis of the classics (such as the works of Parsons, Merton, Homans and Blau), and the recent phase of theorizing (such as works by Collins, Giddens, Habermas, and Alexander). In this course, major original works of the post-classic intermediate phase are read and discussed from the standpoint of how they built upon, revised and extended the classics and how they are relevant to us today.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Sociology (MA or PHD)

**SOC 2103 - SOCIOLOGICAL THEORY 3 - RECENT**
Minimum Credits: 3  
Maximum Credits: 3  
This course mainly involves discussion of the work of sociological theorists whose writings have gained prominence since the early 1970s; although it considers these recent developments against the background of two previous major phases in the production of sociological theory -- namely, the classical phase which ended around 1920 and the phase which lasted from the late 1930s until the late 1970s. Both original writings and analyses of leading recent sociological theorists will be used.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**SOC 2201 - STATISTICAL METHODS**
Minimum Credits: 3  
Maximum Credits: 3
This course provides a practical and thorough introduction to statistical techniques in use in the social sciences. Multivariate regression and structure equation modeling provide the primary topics. Within regression, particular attention will be paid to regression diagnostics with a variety of graphical and computational tools. Logistic regression, dummy variable regression and nonlinear estimation is considered. Data analysis is central to a critical understanding of the tools considered and it will be one on mainframes and micros.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2202 - QUANTITATIVE METHODS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Complementing courses on qualitative methods, computer methods and statistics, this course will provide an overview of quantitative research methods in the social sciences. Topics will include specification of research able questions, experimental and quasi-experimental research designs, and will concentrate on survey research issues such as sampling, measurement, questionnaire construction and item writing, and collection and organization of data. The issues will be illustrated by sociological literature.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Sociology (MA or PHD)

**SOC 2203 - QUALITATIVE METHODS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with the methods of qualitative social inquiry. Students study specific qualitative techniques, such as the interview. Participant observation, analysis of documents, and unstructured observation, problems of doing research in natural settings are also considered.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Sociology (MA or PHD)

**SOC 2204 - COMPUTER METHODS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines advances in computer science applicable to social research. Included is a review of the theory of data structures and fundamental algorithms; the theory and techniques of displaying scientific information in graphical form; the use of relational data base methodology for social analysis; and the processing and analysis of natural language data. The course requires student projects in each of the application areas.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2205 - RESEARCH DESIGN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Sociology uses many forms of research methods. These range from large scale quantitative surveys to in depth qualitative participant observation studies. Designing a research project involves selecting methods appropriate for the research problem, taking account of resources, what is already known, and other factors. This course will cover the conceptual, philosophical, and technical issues that sociologists must deal with to design a research project.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2223 - SIMULATION OF SOCIAL PROCESSES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
With the growing availability of fast pcs in the past decade, sociologists have been developing simulation methods for the analysis of social processes. A variety of theoretical frameworks have been employed (e.g. symbolic interactionism and network exchange theory). Some simulation langs are close to natural language, enabling persons who are not expert programmers to write programs that embody theoretical models of interdependent processes. The course will survey these recent developments and also introduce one such language and applications to explanatory
problems in sociology.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2230 - COMPARATIVE RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to systematic comparative research in sociology. This seminar will consider some aspects of methods and generalizations related to cross-cultural inquiries in contrast to area studies. Topics will include individual and society, work and organization, socialization, and aging. The overview will cover both quantitative and qualitative approaches.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2231 - EVALUATION RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Discussion of methods for designing, carrying out and interpreting studies which seek to assess the extent to which various program and/or policies achieve their objectives and to analyze factors which may hinder the attainment of goals.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2234 - DISASTER RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Disasters, natural and man-made, represent unique conditions for the insight into the actions of individuals, families, organizations, communities and even whole societies under extreme (and unexpected as well as unwanted) stress. The seminar explores attitudes and behavior in the context of preparedness for emergency, in a warning environment, in the course of a disaster and in its aftermath.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2235 - PUBLIC OPINION
Minimum Credits: 3
Maximum Credits: 3
Following a brief exposure to the history of public opinion research and the theoretical underpinnings of concerns with, and implications of, public opinion in general, the participants in the seminar will be involved in identifying and interpreting major opinion trends. While most of the data perusal will focus on American public opinion, not insignificant attention will be paid to salient cross national comparisons.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2240 - SEMINAR IN POPULATION
Minimum Credits: 3
Maximum Credits: 3
The seminar introduces theories and methods of demographic research. Part (a) concerns the theoretical and conceptual literature on fertility, mortality and migration. Readings and lectures stress the relationships between demographic behavior and social change in developing countries. Part (b) concerns the sources of demographic data, and the methods of estimating fertility, mortality and migration rates.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2251 - THEORIES OF GENDER & SEXUALITY
Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of important tendencies and controversies in gender and sexuality studies, emphasizing emerging directions in
scholarship as well as foundational readings. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines (including anthropology, history, law, economics, philosophy, and literary studies) and sampling a range of methodologies, this course will work through some of the key movements and problems that have shaped and continue to shape contemporary thinking about gender and sexuality. Readings are likely to include works by Lila Abu-Lughod, Judith Butler, Nancy Chodorow, Patricia Hill Collins, R.W. Connell, Michel Foucault, Nancy Fraser, Linda Gordon, Judith Halberstam, Chandra Mohanty, Uma Narayan, and Joan Scott.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SU3 Basis

### SOC 2301 - ECLGY, ENVRN & SOCIETL EVOLUTN

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course seeks an understanding of the evolution of human societies in their physical environments and resource bases. The ways in which humans use energy and matter is crucial. The time frame for the course is that of human history. Harsh and benign environments will be considered as well as the rise and fall of civilizations. Throughout, the role of technology will be kept central in an understanding of the interface between a society and its environment.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### SOC 2302 - SOCIOLGY OF RELIGION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course commences with a discussion of the classical tradition of the sociology of religion, and then proceeds to consider some of the major preoccupations of sociologists of religion since the 1960s -- e.g. civil religion, new religious movements, religious conversion, secularization, church-state relations, fundamentalism and the global context of contemporary religious change.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### SOC 2303 - POLITICAL SOCIOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The variety of political arrangements in the twentieth century presents a number of puzzles that will make up the subject matter of this course. Are the differing mechanisms of governments to be explained by levels of economic development, institutional histories, the intentions of social movements, transnational constraints or slow-changing national political cultures? Is the state an autonomous actor or the creature of other social forces? Are regime changes consequences of some sort of "structural" change or are they simply consequences of rulers' stupidity?

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### SOC 2304 - MODERNIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Focusing on a variety of institutions, such as the economy, the polity, stratification, family, and religion, this examines modernizing social change in comparative-institutional perspective within societies, cross-cultural perspective, and in terms of intersocietal relations.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### SOC 2305 - GLOBAL CHANGE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is directed at discussion of the processes involved in the making of the modern world into a single sociocultural system. It combines matters usually discussed in courses on modernization, the comparative analysis of whole societies, international relations, and the relationship between individual and societies into a cohesive whole. Among the specific topics treated are global culture and in formation, forms of resistance to globalization, and the impact of globalization on local life.

**Academic Career:** GRAD
SOC 2306 - SOCIOLOGY OF REVOLUTION
Minimum Credits: 3
Maximum Credits: 3
An inquiry into various theories, frameworks and models elaborated by social scientists to explain the origins, dynamics and outcomes of this most complex matrix of social change.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2307 - NATIONALITY AND CITIZENSHIP
Minimum Credits: 3
Maximum Credits: 3
This course deals with changing conceptions of nationhood and citizenship. It considers citizenship comparatively and historically in the context of shifts in the meaning of the nation. The literature on the development of citizenship is considered in reference to current ideas about post-national citizenship. The notion of post-national citizenship rests on observations of a trend that has resulted in immigrants to certain countries being granted voting and other rights without obtaining national citizenship.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2308 - POLITICAL ECONOMY OF DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2309 - CULTURE AND POWER
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar will explore the power of culture and the culture of power through different theoretical perspectives. We are especially interested in issues of cultural resistance, transformation, domination, hierarchy, and colonialism. We will also explore how culture and power shape collective and individual identities especially in societies undergoing radical transition. Our discussion will include cases from Japan, India, Germany, England, and others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2310 - CULTURE AND POWER 2
Minimum Credits: 3
Maximum Credits: 3
In this course we will explore culture at the level of the nation, concentrating on Europe. What is a nation? How do people define nations and their cultural boundaries? How are national identities negotiated, maintained, and remembered? This will not be a purely comparative course, but as we explore these questions we will discuss how the answers do or do not differ across countries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2311 - CULTURE AND POLITICS 3
Minimum Credits: 3
Maximum Credits: 3
The course explores issues of cultural identity from a comparative global perspective. To that end it includes discussions of related themes of migrations and the global movement of peoples, as well as relevant discussions of ethnicity and nationalism.

**SOC 2312 - CULTURE AND POLITICS 4**
Minimum Credits: 3
Maximum Credits: 3
The course explores issues of cultural identity from a comparative global perspective. To that end it includes discussions of related themes of migrations and the global movement of peoples, as well as relevant discussions of ethnicity and nationalism, part IV.

**SOC 2313 - RACE AND THE CITY**
Minimum Credits: 3
Maximum Credits: 3
Race in the city is a seminar based writing/research intensive course focusing on the study of current and historical race relations in urban areas with a special interest in Pittsburgh. The course will examine how race in the city is related to economic, political and cultural forces. Students will complete projects using both qualitative and quantitative methods. This course is a practical introduction to theoretical and methodological issues in urban sociology and race theory. Contemporary and traditional literature will be discussed.

**SOC 2315 - GLOBAL CITIES**
Minimum Credits: 3
Maximum Credits: 3
The notion of the global city has received increasing attention. Some reasons are: the crystallization of truly global economy and the dominant place of certain cities within it; large-scale migration, resulting in complex aggregates of people of different ethnic and racial groups; and the desire of urban elites to "internationalize" their cities. The sudden interest in globally oriented urban research has resulted in new relationships among sociologists, geographers, anthropologists, & historians. This course considers the overall picture & the reconstruction of urban sociology.

**SOC 2316 - COLLECTIVE MEMORY**
Minimum Credits: 3
Maximum Credits: 3
This is a seminar on collective memories of defeat in the two nations vanquished in World War II, Japan and Germany. It will explore the transformation of the moral order following the defeat in the two nations. We will critique the theoretical perspectives on collective memories, and examine how the memories are transmitted to the new generation and how the new generation, in turn, reconstructs the past and defines the meaning of the legacy. We will also discuss their social, cultural and political implications today.

**SOC 2321 - SOURCES AND METHODS IN EAS**
Minimum Credits: 3
Maximum Credits: 3
This course is designed to train students in research on original source material, as part of the graduate studies training in Chinese history.

**SOC 2331 - CHURC & RELIGION IN LATN AMERC**

3214
The profound and pervasive influence of religion in Latin American culture and social life are discussed. Past and present importance of the church as a social institution is emphasized.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2339 - THEORETICAL ISS SOCL MOVMS RES**  
Minimum Credits: 3  
Maximum Credits: 3  

**SOC 2340 - WORLD-SYSTEMS: THEORY AND RES**  
Minimum Credits: 3  
Maximum Credits: 3  

A world-system is a self-contained social system extending across many societies. The course will convey sociological theories and methods for describing world systems. Theories will be reviewed about world-systemic phenomena such as the international division of labor, dependency, center-periphery formation, modernization and globalization. Theoretically grounded hypotheses will be tested by computer analyses of worldwide data on individual participation, national development, and transnational linkages in the polity, economy, technology, science, education and culture.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2341 - SOCIAL MOVEMENTS**  
Minimum Credits: 3  
Maximum Credits: 3  

Various theories and models to study social movements are examined. Emphasis is placed on structural conditions that contributed to the emergency of the movements, their development over time and what changes, if any, are brought about to the social system in which the movements occurred.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2342 - CULTURAL SOCIOLOGY**  
Minimum Credits: 3  
Maximum Credits: 3  

This course involves discussion of the main trends in the sociological consideration of systems and patterns of beliefs, values and symbols and the social vehicles in terms of which culture is produced, sustained and interrupted. It is particularly concerned with the theoretical issue of the place of culture in sociological analysis, on the one hand, and interpretations of contemporary cultural phenomena, on the other. Thus the course has both theoretical and empirical components.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2345 - COMPARATIVE MILITARY SYSTEMS**  
Minimum Credits: 3  
Maximum Credits: 3  

A reading seminar, designed to help the student to identify a research topic. Topics include: the general relationship between the military and society; civil-military relations; coups; mutinies; recruitment & social origins of military personnel; training and value-inculcation; military "ideology"; combat motivation and morale; war crimes; veterans; the military as "national-builder"; and the consequences of military service. The readings are "comparative", with selections in each topic from a variety of nations and chronological eras.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SOC 2346 - MICORDYNAMICS SOCL MOVEMENTS**
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar will focus on the microdynamics of social movements, including the political imaginary, strategic action, and collective identity, and the complexities of race, gender, sexuality, age, and social class in the process of mobilizing for social change.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2351 - MODERN GERMAN SOCIAL THOUGHT**
Minimum Credits: 3
Maximum Credits: 3
Close reading of major texts (and occasional secondary sources) in German social thought since 1800, and in its social context. Special emphasis upon the emergence of German classical sociology from Tonnies and Simmel to Weber and Mannheim. Specific readings change from year to year.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2401 - GLOBALIZATION AND INEQUALITY**
Minimum Credits: 3
Maximum Credits: 3
This course covers selected topics in the study of stratification and inequality. A major focus concerns various competing accounts of the changing class structure of modern societies. Additional, related topics to be covered in the course are gender stratification, race stratification, and theories of the welfare state.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2402 - COMPLEX ORGANIZATIONS**
Minimum Credits: 3
Maximum Credits: 3
Theories and research about formal organizations -- about the interaction between organizations and their environments and about the interactions among people and groups within the organization -- provide the subject matter. This is a survey course in which the object will be to know each type of theory well enough so that it can be used later.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2403 - KNOWLEDGE IN SOCIETY**
Minimum Credits: 3
Maximum Credits: 3
A synthesis of theories and research findings on the social bases of scientific, technical and professional knowledge and of its effects on social change. The history of the social scientific study of knowledge in the context of the development of modern states and economies is the initial theme. The comparative study of the social organization of knowledge production, structuring, storing, distribution, utilization and mandating constitutes the core of the course. Current research in the United States, Europe and Asia is reviewed.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2404 - SOCIAL PSYCHOLOGY**
Minimum Credits: 3
Maximum Credits: 3
This course offers a survey of the field of social psychology. Emphasis is placed on the sociological analysis of social psychological phenomena.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2405 - ECONOMIC SOCIOLOGY**

3216
Minimum Credits: 3
Maximum Credits: 3
This course is primarily concerned with the sociology of economic action and institutions and reflects an increasing interest in economic life and the relationships between the disciplines of economics and sociology on the part of sociologists. The treatment of the economic factor in the early crystallization of sociology and the current state of the sociology of economic life reviewed in reference to contemporary economic developments.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2406 - MEDICAL SOCIOLOGY**
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the sociology of health, illness and medical care as a major specialty area of scholarly activity and empirical research. Three competing conceptual frameworks in medical sociology will be examined, compared and then used to analyze issues in public health, health policy, medical care and clinical medicine on the basis of recent research.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2408 - SPACE, POWER, AND INEQUALITY**
Minimum Credits: 3
Maximum Credits: 3
This course examines the intersections of spatiality, power, and social inequality. Place will be examined as a site of social interaction and the exercise of power. Topics will range from considerations of the micro-scale of personal life and the body, to mid-scale questions about group boundaries and the negotiation of spatial dimensions of social life, to macro-scale issues of built environments, territorial organization, ecosystems, and the global economic political order.

**Grade Component:** Grad LG/SNC Basis

**SOC 2426 - HISTL SOCLGCL PERSP PBLC HLTH**
Minimum Credits: 3
Maximum Credits: 3
Seminar will examine, through assigned readings and discussions, the historical and sociological influences on specific topics within the broad field of public health. Particular attention will be placed on the impact of five general themes on the evolution and current status of public health, the role of government, urbanization, industrialization, religion, and advances in science and technology.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SOC 2428 - PROFESSIONS**
Minimum Credits: 3
Maximum Credits: 3
One aim is a review of distinctive features making some occupations professions and the theoretical questions that have justified their study for about 2000 years. A second is a study of such topics as the process of professionalization, relations between professions and the state, inter professional relations, socialization into professions, and paraprofessions. Thirdly, cross-national comparative material will be used to explain why the sociology of professions has been mainly a product of Anglo-American sociology and to scrutinize the generality of its main propositions.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis
SOC 2429 - WOMEN IN SOCIETY
Minimum Credits: 3
Maximum Credits: 3
This course examines the multiple ways in which the social category "woman" is created from the biological given of female sex. We focus on how the various social institutions and the dominant ideologies interact with the socialization process to produce a "feminine" character. Contemporary research on women is explored as are current issues in feminist research methods. The goal is to produce an understanding of women's experiences in American society as they are shaped by the intersection of sex, race, class and sexual preference.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2430 - COMPARATIVE SOCIAL POLICIES
Minimum Credits: 3
Maximum Credits: 3
Cross-national perspectives add an important dimension to political sociology. This seminar in feminist studies of states and social policies uses in-depth reading and critical discussion of current research to create the conceptual, empirical, and methodological foundations for comparative scholarship in social policy. Students will present research proposals, theoretical analyses, critical literature reviews, or works-in-progress. Topics will vary, but will be on the politics of gender differentiation as they play out in state institutions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2442 - DEVIANCE
Minimum Credits: 3
Maximum Credits: 3
This seminar explores changes in the definition of behavior which lead the same behaviors to be considered 'sins', 'crimes', 'illnesses', or 'alternative life-styles'. Materials focus on the relative influence of different social origins/sources, correlates and consequences of deviant behavior. Particular attention will be paid to conflicts among various social control institutions over the definition, management and disposition of deviance.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2451 - FAMILY
Minimum Credits: 3
Maximum Credits: 3
An exploration into the origins, changes and continuity of the family as a human institution. Present threats and challenges to the present form of the institution are discussed and chances of survival in the future are examined.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 2461 - STRUCTURAL SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Actors (persons, organizations, countries, or other social groups) form a social system with a structure given by the relations among the actors. The course aims at conveying classical and contemporary theories and social network analytic methods describing how an actor's position in the social structure affects the actor's beliefs and behavior.
Academic Career: GRAD

SOC 2902 - DIRECTED STUDY FOR MA STUDENTS
Minimum Credits: 1
Maximum Credits: 12
Registration is limited to students in good academic standing who wish to study or carry out a project in an area not normally available in a regular course. The work must be under the direct supervision of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
SOC 2905 - PROPSL WRITING & GRNTSMANSHIP
Minimum Credits: 3
Maximum Credits: 3
This course will be conducted in workshop format. It is designed to help students write proposals for dissertation research, but will also cover more generally the area of grantsmanship. The approach to the course will be to focus on each student's own research project. Students will draft and submit for collective discussion different components of their proposals, leading up to a completed grant proposal ready to be submitted to one or more agencies for funding during the next cycle of competitions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 2970 - TEACHING OF SOCIOLOGY
Minimum Credits: 1
Maximum Credits: 3
The department holds orientation and instructional sessions for its teaching assistants, and assigns a faculty member as mentor for each of its teaching fellows, thus giving them guidance in the planning of their courses and evaluation of their teaching by auditing their classes.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

SOC 2971 - GRAD WRITING FOR PUBLICATION
Minimum Credits: 3
Maximum Credits: 3
This graduate course will focus on practical advice for successfully turning master's thesis, seminar papers, and dissertations into journal articles and books. Students enrolled in the course will learn skills for writing and revision and gain understanding of the publishing process for academic journals and presses, as well as ideas for developing a successful work process and setting achievable writing goals. Course will be organized to allow students to work intensively on a writing project, with the goal of having a publishable article or manuscript by end of term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Sociology(MA)

SOC 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
All graduate study not under the direct supervision of a specific faculty member. Especially intended for those who must be registered to fulfill TA/TF requirements but no longer need formal course work. Must be approved by the student's formally validated committee chairperson at the time of registration.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

SOC 3000 - DISSER RESEARCH FOR PHD DEGREE
Minimum Credits: 1
Maximum Credits: 12
This course is open only to students who have been admitted to candidacy for the Ph.D. degree. The chairperson of the dissertation committee serves generally as the course monitor.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

SOC 3192 - TOPICS IN THEORETICAL SOCCLGY
Minimum Credits: 3
Maximum Credits: 3
This course has a content which will vary from time to time but is intended to constitute an intensive study of some important development in recent sociological theorizing. Examples of what might be included are micro-macro linkage theorizing, macrostructural theorizing, or developments in microsociological theory. Specific background requirements, if any, will be announced with each offering of the course.
Academic Career: GRAD
SOC 3193 - FEMINIST THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on "special topics" in feminist theory. Each year it deals with a different substantive issue. In 1988, for example, it concerned research methods in social science, particularly applicable to feminist issues. Other anticipated topics are women and religion and recent developments in feminist theory. Each course introduces students to a broad range of perspectives and substantive work within the topic including as much as possible concerns with race, class, and sexual preference.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 3195 - WORKSHOPPING RES PRPSL & PRODC
Minimum Credits: 3
Maximum Credits: 3
Presentation and discussion of graduate student research at all stages, including research or funding proposals, thesis and dissertation proposals or chapters, and articles being prepared for publication. All students will be expected to circulate and present their work in progress at several points throughout the semester and to provide detailed and supportive weekly feedback on the work of other workshop participants. The workshop is intended to allow each student to refine and advance their individual research program and learn the skills of constructive evaluation and critique. This course is open to graduate students in sociology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 3203 - SEM IN ADVANCED EVAL TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
Evaluates theory and methodology with emphasis upon human service organizations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 3342 - SOCIOLOGY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
An analysis of the development of modern social institutions with special reference to the sociology of the schools. The school is studied as a social system and in the context of broad social organization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

SOC 3343 - COMPARATIVE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to introduce participants to the field of comparative education and the issues which currently are the focus of comparative research in education.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

SOC 3393 - TOPICS IN POLITICAL SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course explores selected topics in political sociology.
Academic Career: GRAD
SOC 3397 - TOPCS IN SOCL MVMNTS & CULTURE
Minimum Credits: 3
Maximum Credits: 3
Humor in politics and protest: this graduate seminar will take an interdisciplinary, comparative, and historical approach to examine the role of humor in politics and protest. We will look at three broad categories of humorous expression: street theater and performance, commentators and satire, and social psychological functions of humor for developing group cohesion and collective identity. Specific cases are likely to include the impact and import of the Colbert Report and John Stewart show on U.S. politics, political cartoons in NYC history, carnival in Brazil and the Caribbean, the Orange Revolution in Poland, contemporary activist actions and groups in the global justice movement, and sexist jokes and sexual harassment. The course will contextualize humor within a theoretical framework of social psychology and sociology of emotions through a critical lens sensitive to issues of power and control.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SOC 3398 - TOPICS IN SOCIAL MOVEMENTS
Minimum Credits: 3
Maximum Credits: 3
The specific content of this course will vary from term to term. This course will focus on intensive study of important areas of social movement research and theory. Examples of such content are strategic action in social movements; the structure-agency debate in social movements; new theorizing in social movements; gender and social movements; and race and social movements. Background requirements, if any, will be announced with each offering of the course.
Academic Career: GRAD

**Spanish**

**SPAN 2190 - LITERARY TRANSLATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is intended to develop translation skills in other than legal, business or industrial uses of Spanish, namely the language of literary (including scholarly and critical), journalistic and advertising texts. It involves the discussion of translation problems and the ways to solve (or circumvent) them through actual task of translating selected passages from fiction, poetry, plays, articles and publicity blurbs.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  

**SPAN 2192 - TOPICS IN TRANSLATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will deal in depth with specific techniques and procedures for translating specific types of material, including literary, technical and scientific texts.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  

**SPAN 2195 - PROFESSIONAL TRANSLATION 1**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course is intended for those translators in training who want to gain experience in translating the types of material professional translators handle under "on the job" situations. Emphasis is on practical translation skills, introducing basic principles, pertinent technical terminology, and idiomatic expressions as they occur in original commercial and technical texts.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
SPAN 2196 - PROFESSIONAL TRANSLATION 2
Minimum Credits: 3
Maximum Credits: 3
The course is intended for those translators in training who want to gain experience in translating the types of material professional translators handle under "on the job" situations. Emphasis is on practical translation skills, introducing basic principles, pertinent technical terminology, and idiomatic expressions as they occur in original commercial and technical texts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2224 - SPEC TOPICS IN CULTRL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course allows students to do in-depth research in various aspects of contemporary culture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2225 - SEM:SPECIAL TOPICS CULTRL ANAL
Minimum Credits: 3
Maximum Credits: 3
This course provides students with the opportunity to do in-depth research in various aspects of contemporary culture and to present it both orally and in written form.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2226 - READINGS IN CRITICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/ knowledge, desire and the subject. Each year a different area or topic is chosen.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2301 - ADVANCED GRAMMAR
Minimum Credits: 3
Maximum Credits: 3
This course is designed for the graduate students or Spanish teachers who want to improve or refresh their language skills primarily in writing. It involves an advanced grammar review and problem exercises in syntax, vocabulary, and idiomatic expressions to be worked out in class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2302 - HISTORY OF THE SPANISH LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
This course will trace the development of the Spanish language from its earliest stages to its modern form. Though selected Latin examples will be included, a working knowledge of Latin will not be needed. Primary emphasis will be placed on the evolution of the phonological and grammatical components, but some semantic considerations will also be included. The class will look at several early Spanish texts in order to identify samples of the diachronic linguistic changes at work. This course is intended for advanced Spanish students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
SPAN 2303 - STRUCTURE OF MODERN SPANISH
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in Spanish linguistics, which examines Spanish phonology, morphology, syntax, and semantics, through different linguistic analytical approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2304 - SPANISH DIALECTOLOGY
Minimum Credits: 3
Maximum Credits: 3
The differing ways Spanish is spoken in Spain and Spanish America are analyzed in this class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2305 - MORPHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course deals with the study of the internal structure of Spanish words.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2306 - SPANISH APPLIED LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
A thorough analysis of the linguistic problems in teaching Spanish to speakers of English. Particular emphasis on problems of interference by transfer from the native to the target language, using contrastive analysis as a method of problem solving. Study of phonology and grammar, with attention also to certain techniques in foreign language teaching. Included is a brief survey of the teaching of Spanish in the United States and elsewhere.
Prerequisite: a good knowledge of Spanish.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2307 - METHODS OF TEACHING SPANISH
Minimum Credits: 3
Maximum Credits: 3
A course designed for those who plan to teach Spanish. Main focus is on practical information of how best (method and technique) to teach the language. Topics include: theory of learning, approaches, activities, dialogs and drills, the role of grammar, the lab, testing, vocabulary, and the like. Practice teaching, including videotaping.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2308 - SYNTAX OF SPANISH
Minimum Credits: 3
Maximum Credits: 3
A graduate level introduction to syntactic theory and methods in application to Spanish.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2309 - PHONOLOGY OF SPANISH
Minimum Credits: 3
Maximum Credits: 3
This is a graduate course in Spanish phonology which surveys the past and current research in this field.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**SPAN 2310 - SEMANTICS**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course deals with the study of meanings and their structure in Spanish.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**SPAN 2311 - HISPANIC SOCIOLINGUISTICS**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course surveys some of the major areas within sociolinguistics, focusing on research derived from Hispanic speech communities, particularly Latin American and U.S. Latino Spanish-speaking groups.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**SPAN 2312 - PRAGMATICS**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course examines how situation, or context, contributes to our understanding the meaning of Spanish utterances.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**SPAN 2313 - COMPUTRIZED LINGUISTIC STUDIES**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course deals with the use of the computer both in research in theoretical linguistics and in teaching methodologies and applied linguistics. Topics vary.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**SPAN 2314 - SPECIAL TOPICS IN LINGUISTICS**
**Minimum Credits:** 3
**Maximum Credits:** 3
Topics in methodology, applied and theoretical linguistics vary according to the needs and interests of students.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**SPAN 2315 - SEM LING AND METHODLGY**
**Minimum Credits:** 3
**Maximum Credits:** 3
Topics in methodology, applied and theoretical linguistics vary according to the needs and interests of students.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**SPAN 2316 - THRY & PRACM FRGN LANG TECHNG**
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide prospective and experienced teachers with an overview of the theoretical bases upon which language teaching methodology has traditionally been based and to explore and evaluate the ramifications of new directions in psychological and linguistic theory for language teaching.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2317 - RES/FLD MTHDS SPAN SOCIOLING
Minimum Credits: 3
Maximum Credits: 3
This course will teach research and field methods oriented toward Spanish-speaking communities. It will cover research design, hypothesis formulation and testing, grant proposal writing, sample design, questionnaire design, data-gathering in the field, coding data, and data analysis. Sociolinguistic approaches will include variation analysis, ethnography of communication, conversation analysis, sociology of language, and speech act theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2318 - SEM: APPLIED SOCIO-PRAGMATICS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on (1) intercultural communication, (2) cross-cultural speech acts (e.g. requests, apologies, compliments), (3) politeness and the lack of it, (4) nonverbal communication (e.g. gesture, gaze), (5) discourse in second language acquisition process, and (7) special jargons, particularly as they relate to Spanish (e.g. legal, medical and business Spanish). In short, this course focuses on phenomena related to the process that native English-speakers undergo in the process of acquiring a second language such as Spanish.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2319 - LANGUAGE AND THE LAW
Minimum Credits: 3
Maximum Credits: 3
This course explores some of the ways in which linguistic science can shed light on the use and misuse of language in the legal system. After an introduction to the origins and special characteristics of written English legal language ("legalese"). We will study the layman's (non-) understanding of technical legal language; the language of persuasion (e.g. exploitation of such linguistic features of ambiguity, implicit "rules of conversation" and socially stigmatized dialect features); and arguments for and against the participation of linguistics as expert witnesses in the courtroom.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2400 - PRE-COLUMBN LITERATURE & CULT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the literatures of the Mayan, Aztec and Quechuan regions, with emphasis on basic symbolism in mythology and religious poetry, and mythological aspects of pre-Columbian art, architecture and the painted codices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2404 - PRE-COLUMBIAN TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course deals with specific topics on various aspects of the Mayan, Aztec and Quechuan cultures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
SPAN 2405 - SEMINAR: PRE-COLUMBAN LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course provides the opportunity for the student to do research in specific topics and areas of research on various aspects of the Mayan, Aztec and Quechuan cultures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2410 - DISCOVERY AND CONQUEST
Minimum Credits: 3
Maximum Credits: 3
This course offers an introductory survey of the Spanish and Latin American literature of the sixteenth and early seventeenth centuries through some of the main texts of the period.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2421 - COLONIAL LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course deals with the basic texts of the Cronistas and other writers of the Colonia.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2422 - COLONIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course deals with the basic texts of the Cronistas and other writers of the Colonia, concentrating on an in-depth study of their ideological points of view.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2425 - FORMATN OF NATIONAL LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course will attempt to discern the major aspects of the process of formation of "national literatures" in Latin America, during the nineteenth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2428 - LATIN AMERICAN 19THC TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course deals with various topics ranging from romanticism to positivism to modernism, in an attempt to develop a concept of the changing cultural and economic climates in which literature was produced in the second half of the nineteenth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2429 - SEM LATIN AMERCN 19THC TOPICS
Minimum Credits: 3
Maximum Credits: 3
This seminar offers students the opportunity to do original research in the various areas of romanticism, positivism and modernism, in an attempt to develop a better understanding of the various ideological currents in which Latin American literature developed in the second half of the nineteenth century.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2430 - MODERNISM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with the main figures of Latin American modernism and postmodernism and focuses on both prose and poetry.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2434 - MODERNISM: TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with various aspects of the modernista movement in Latin America and peninsular literature, emphasizing the modernist reaction to positivism and capitalism in several Latin American countries.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2440 - VANGUARD**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with the various -isms of vanguard literatures, including those specifically Latin American (creacionism, ultraism) and those originating in Europe (surrealism, Dadaism), emphasizing their influence on the development of more recent literature.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2444 - VANGUARD TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals in depth with specific aspects of vanguard literature such as formal and linguistic innovation, poetic theory and imagery, movements and tendencies.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2445 - SEMINAR: VANGUARD**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course offers students the opportunity to do research in various aspects of vanguard literature and thought.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2450 - CONTEM LATEIN AMERCIAN NARRATIVE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with Latin American narrative since 1945, treating in depth the narrative production of the boom and the post-boom periods.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
SPAN 2452 - CONTEMP LATIN AMERICAN FILM
Minimum Credits: 3
Maximum Credits: 3
This course surveys a representative sampling of recent Latin American film, primarily feature films made for commercial distribution, but also socio-political documentary.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2453 - POSTMODERNIST FILM
Minimum Credits: 3
Maximum Credits: 3
Postmodernism as a period concept designates what Fredric Jameson has called "the cultural logic of late capitalism". Familiarly, the concept of postmodernism has been used to describe new developments in art & architecture, music, literature, philosophy, dance, performance, etc. This course makes the case for a postmodernism film. We will screen and discuss a group of films from the eighties & nineties that could be said to constitute part of the canon of postmodernist film, e.g., Pulp Fiction, Blade Runner, Silence of the Lambs, Blue Velvet, Koyaanisqatsi, Strangers in Paradise.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2460 - LATIN AMERICAN DRAMA
Minimum Credits: 3
Maximum Credits: 3
This course studies representative examples of contemporary Latin American drama from a literary as well as a sociocultural point of view.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2461 - LATIN AMERICAN NOVEL
Minimum Credits: 3
Maximum Credits: 3
This course deals with the theory and development of the novel as seen through various exemplary texts of several periods, with emphasis on the boom and post-boom periods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2462 - LATIN AMERICAN POETRY
Minimum Credits: 3
Maximum Credits: 3
This course will deal with representative contemporary poets of various Latin American countries as well as specific movements and tendencies of the twentieth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2463 - LATIN AMERICAN SHORT STORY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the origins and development of the short story in Latin American literature through the analysis of selected texts from romanticism to the post boom.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2464 - LATIN AMERICAN 20THC TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course will deal with specific topics of contemporary Latin American culture, using primarily literary but also other types of texts, including periodicals, film and television productions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2465 - SEMINAR: 20TH CENTURY TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course will allow students to do research in topics of interest to them, involving primarily literary texts but not necessarily restricted to these types of documents.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2466 - U.S. LATINO LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course will focus on U.S. Latino literature. While Mexican-Americans have roots in North America that go back to colonial times, the Latino explosion has happened mainly in the last thirty years, giving rise to new processes and forms of cultural expression, including an emerging literature that is neither a subset of U.S. Literature nor an extension of modern Latin American literature, though it has connections to both. To get an idea of what this literature involves and where it is going, we will look at some representative novels, poetry, memoirs, plays and films.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2467 - TESTIMONIO & ETHNGRAPHIC NARATV
Minimum Credits: 3
Maximum Credits: 3
This seminar will deal in depth with the question of testimony (testimonial narrative) and other forms of what is sometimes called ethnographic literature. We will interrogate these texts from a set of theoretical problems about subalternity and representation developed in the work of subaltern studies and postcolonial studies, feminist criticism and the concern in recent cultural anthropology with the problem of "writing culture".

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2469 - LATIN AMERICAN ESSAY
Minimum Credits: 3
Maximum Credits: 3
The course examines the function and social literary significance of the essay in the Spanish-American cultures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2570 - CNTMPRY HISPANIC LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course deals with various genres of contemporary Spanish and Latin American literature.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2580 - CONTEMPORARY HISPANIC FILM
Minimum Credits: 3
Maximum Credits: 3
This course surveys a representative sampling of recent Spanish and Latin American film, primarily feature films but also socio-political
SPAN 2602 - MEDIEVAL SPANISH TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course deals in-depth with various medieval topics and builds on a prior survey of medieval literature.

SPAN 2610 - RENAISSANCE
Minimum Credits: 3
Maximum Credits: 3
This course surveys the literature of the Spanish renaissance against the historical and social background of the Golden Age (1492-1600).

SPAN 2614 - RENAISSANCE TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course deals in depth with various Renaissance topics and builds on a prior survey of Renaissance literature.

SPAN 2615 - SEMINAR: RENAISSANCE TOPICS
Minimum Credits: 3
Maximum Credits: 3
This seminar deals in-depth with various Renaissance topics.

SPAN 2620 - GOLDEN AGE AND BAROQUE
Minimum Credits: 3
Maximum Credits: 3
This course consists of an analysis of the most significant plays of Calderon, Lope de Vega and Tirso de Molina, as a means of understanding the values and conventions of society during the imperial monarchy.

SPAN 2621 - SPAN LITERATURE GOLDN AGE DRAM
Minimum Credits: 3
Maximum Credits: 3
This course surveys representative dramatists and dramas of the Golden Age.

SPAN 2623 - DON QUIJOTE
Minimum Credits: 3
Maximum Credits: 3
This course involves a close reading of Don Quijote, an overview of the criticism on it, the relations between Cervantes' work and earlier work and the importance for later novelistic development.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2624 - GOLDEN AGE TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals in depth with various golden age topics and builds on a prior survey of Renaissance literature.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2625 - SEMINAR: GOLDEN AGE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar deals in-depth with various Golden Age topics.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2634 - BAROQUE TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals in-depth with various Baroque topics and builds on a prior survey of baroque literature.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2635 - SEMINAR: BAROQUE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar deals in-depth with various Baroque topics.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2657 - 19TH CENTURY TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with various nineteenth century topics, including romanticism, positivism and early modernism, with special emphasis on national and continental movements and tendencies.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2660 - REALIST & NATURALIST NARRATIVE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with realist and naturalist narrative with emphasis on the literature of the southern cone.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**SPAN 2670 - GENERATION OF 98**
A survey of the most important writers of this literary generation in Spain through the study of some of their major works.

**Course Information**
- **Name:** SPAN 2680 - GENERATION OF '27
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course deals with the most representative poets of the twenties and thirties in Spain, emphasizing the new ideals of modern poetry and the transition from "pure" poetry to poetry of political commitment.

- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**Course Information**
- **Name:** SPAN 2690 - CONTEMPORARY PENINSULAR LIT
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course deals with specific writers, genres and works of the Franco and post-Franco period.

- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**Course Information**
- **Name:** SPAN 2694 - 20TH CENTURY PENINSULAR TOPICS
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course deals in-depth with various topics of the literature and culture of the Franco and post-Franco periods.

- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**Course Information**
- **Name:** SPAN 2695 - SEMINAR: 20TH CENTURY
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This seminar deals in depth with various topics of the literature and culture of the Franco and post-Franco periods.

- **Academic Career:** GRAD
- **Course Component:** Seminar
- **Grade Component:** Grad LG/SNC Basis

**Course Information**
- **Name:** SPAN 2700 - LITERARY CRITICISM
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course deals with various critical approaches to textual and contextual analysis of literature, ranging from new criticism to post-structural criticism.

- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**Course Information**
- **Name:** SPAN 2702 - INTRO TO LITERARY STUDIES
- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course is designed to give a comprehensive overview of the literatures of Spain and Latin America; an introduction to elements of literary and cultural theory; and an understanding of literary history and textual analysis.

- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis
SPAN 2704 - SPEC TOPICS LITERARY CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This course deals with specific critical approaches such as structuralism, reader-response criticism and various post-structuralist and post-modern critical approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2705 - SEMINAR: LITERARY CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This seminar deals in-depth with specific critical approaches such as structuralism, reader-response criticism and various post-structuralist and post-modern critical approaches.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

SPAN 2706 - ANALYSIS HISPANIC LITERARY TEXTS
Minimum Credits: 3
Maximum Credits: 3
This course proposes several methods for the analysis of literary texts from Spain and Latin America. Emphasis will be given on the study of style and literary representation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2707 - LATIN AMERICAN LITERARY CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This seminar will attempt to summarize the historical process of Latin American critical thought and to analyze the most controversial aspects of contemporary Latin American literary criticism.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2711 - SOCIOCRITICAL ANALYSIS OF TEXTS
Minimum Credits: 3
Maximum Credits: 3
This course deals with the sociocritical approach to literary analysis and demonstrates its use with varied types of Hispanic literary texts of films.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

SPAN 2714 - SPECIAL TOPICS IN SOCIOCRITICISM
Minimum Credits: 3
Maximum Credits: 3
This course deals with special topics employing the socio critical approach to varied types of texts, including films.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

SPAN 2902 - MA DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Students work individually with faculty members on projects or areas defined by them in consultation with their director.
SPAN 2910 - COMPREHENSIVE EXAMINATION MA
Minimum Credits: 3
Maximum Credits: 3
This course is intended for students taking the ma comprehensive/Ph.D. preliminary examination.

SPAN 2950 - SPANISH TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This practicum provides graduate students in the department of Hispanic languages and literatures the opportunity to gain teaching experience at another institution of education. In addition to teaching, the student will evaluate the approach/method used at the institution in question and meet at regular intervals with the Spanish language coordinator at the University of Pittsburgh to discuss his/her experiences and observations.

SPAN 2970 - PROFESSNL TRANSLTN INTNSHIP
Minimum Credits: 1
Maximum Credits: 6
This course is intended to provide on-the-job training for translators in training on a one-to-one basis in an office situation.

SPAN 2990 - MA COMPREHENSIVE INDEPENDENT
Minimum Credits: 1
Maximum Credits: 3
Students work independently on projects or areas of their own definition in preparation for the ma comprehensive examination and the PhD preliminary examination.

SPAN 3000 - PHD DISSERTATION
Minimum Credits: 1
Maximum Credits: 12
Students work individually under the guidance of their dissertation director in preparation for and during the writing of the dissertation.

SPAN 3902 - PHD DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Students work individually with faculty members on projects or areas defined by them in consultation with their director.

SPAN 3910 - COMPREHNSV EXAMINATION, PH.D
Minimum Credits: 1
Maximum Credits: 6
This course is intended for Ph.D. candidates the term they present themselves for their Ph.D. comprehensive examination.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

SPAN 3990 - PHD INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Students work independently on projects or areas of their own definition to develop their dissertation topic and in preparation for the dissertation overview.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

Statistics

STAT 2001 - RESEARCH & THESIS FOR MS DEGR
Minimum Credits: 1
Maximum Credits: 6
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

STAT 2010 - STATISTICS SEMINAR
Minimum Credits: 1
Maximum Credits: 1
This course which is required of all entering graduate students, provides an introduction to the statistics program here. Also, guests from various fields (like biology, medicine, and business) will speak about their interests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

STAT 2020 - TEACHING SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

STAT 2131 - APPLIED STATISTICAL METHODS 1
Minimum Credits: 3
Maximum Credits: 3
This introductory graduate level course on applied statistics covers a wide variety of problems. We begin with simple data description and go on to standard estimation and testing problems. We then study various types of linear models. We make extensive use of the computer; the student will learn BMDP and Minitab.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2132 - APPLIED STATISTICAL METHODS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of STAT 2131.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2131

STAT 2200 - APPLIED NONPARAMETRIC STATISTICS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course will be to prepare students to use standard nonparametric tests for problems that frequently occur in applications. The Wilcoxon, Fisher (sign), Ansari-Bradley, Miller (jackknife), Kruskal-Wallis, Kendall, and Kolmogorov-Smirnov tests will be discussed. Minitab subroutines will be used to facilitate computation. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2210 - APPLIED CATEGORICAL DATA ANAL
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide contingency table techniques for research workers in the social sciences, medical sciences and other areas where it is necessary to investigate relationships between qualitative variables. Course deals with the Chi-square test and standard 2x2 and RXC contingency tables, as well as log-linear and other special types of contingency tables analysis. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2211 - CATEGORICAL DATA ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course presents techniques for analyzing categorical data such as contingency tables and log linear models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2220 - APPLIED REGRESSION
Minimum Credits: 3
Maximum Credits: 3
This course covers simple linear regression (one variable) and one way analysis of variance followed by more complicated regression models. More complex ANOVA models are treated if time permits. Some computer applications will usually be considered. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2221 - ADV APPLIED MULTIVARIATE ANALYS
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with statistical methods for describing and analyzing multivariate data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2230 - APPLIED EXPERIMENTAL DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course teaches students to design valid statistical experiments and to analyze them. Among the designs considered are: completely randomized designs, randomized block designs, Latin lemmas, factorial designs, and complete block designs. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 2231 - ADV APPLIED REGRESSION
Minimum Credits: 3
Maximum Credits: 3
This course is devoted to the study of applied regression analysis. Topics include simple linear regression, multiple regression, residual analysis, variable selection techniques and analysis of covariance, multicollinearity, nonlinear regression.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2240 - APPLIED SAMPLING
Minimum Credits: 3
Maximum Credits: 3
This course considers basic applied principles and approaches for conducting a sample survey. The following will be discussed: how to design a survey, how to analyze a survey with attention paid to different types of survey techniques and corresponding statistical methods. The course will provide survey skills for the social sciences, psychology, economics, marketing and management, and health sciences. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2250 - STATISTICAL QUALITY CONTROL
Minimum Credits: 3
Maximum Credits: 3
This course is involved with statistical methods for quality and process control. It is intended for all students who will use statistics in an industrial setting. Introductory topics include probability models and statistical estimation for quality. The main focus will be on control charts and tolerances. Acceptance sampling will also be discussed. A final but quite important topic will be Taguchi methods. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2251 - STATISTICAL PROCESS CONTROL
Minimum Credits: 3
Maximum Credits: 3
Methods of statistical quality control will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2261 - SURVIVAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to cover the design and analysis of clinical trials.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2270 - DATA MINING
Minimum Credits: 3
Maximum Credits: 3
Data mining is a collection of tools to discover patterns and relationships in data, often large observational databases. This course covers some of the main methods of data mining.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
STAT 2291 - META - ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course deals with quantitative methods for synthesizing information from various studies. Topics include combining p-values, random and fixed effects (regression) models for effect sizes, reporting or other selection bias, tests for homogeneity, and sensitivity analysis and diagnostics. Examples from medical applications are used to illustrate methods throughout the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2300 - STATISTICAL PACKAGES
Minimum Credits: 3
Maximum Credits: 3
This course will cover a variety of topics concerning computing and statistics. Basic statistical analysis packages such as BMPD, SPSS, Minitab, and IMSL will be discussed and compared. Other computational issues that will be discussed include simulation, graphics, elementary database management, and certain stand-alone statistical programs. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2310 - APPLIED MULTIVARIATE ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
We start with the basic concepts of regression and correlation. After developing the necessary linear algebra, we will study the multivariate normal and then go on to do one or more of the following: cluster analysis, discriminant analysis, directional data, and factor analysis. We will make use of the Minitab and BMDP computer packages. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2320 - APPLIED TIME SERIES
Minimum Credits: 3
Maximum Credits: 3
The objective of the course is to present at the elementary level, a unified and reasonably complete exposition of statistical methods used in time series analysis. Serious consideration is given to both time and frequency domain approaches. Real data from a number of subject fields will be analyzed as they occur in the exposition. Students will additionally be doing data and other projects utilizing course techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2220

STAT 2321 - APPLIED ADVANCED TIME SERIES
Minimum Credits: 3
Maximum Credits: 3
This course is an attempt to provide a uniform coverage of both time domain and frequency domain time series methods which can be easily understood by students with varied backgrounds.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2381 - SUPERVISED STATSTCL CONSULTING
Minimum Credits: 1
Maximum Credits: 6
In this course students will consult with clients in the consulting center. The consulting will be under the supervision of experienced consultants. Students will be taught how to provide statistical methods in conjunction with real problems and how to analyze and report the results.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: STAT 2132

STAT 2391 - ADVANCES IN APPLIED STATISTICS 1  
Minimum Credits: 3  
Maximum Credits: 3  
Foundations as well as recent developments in applied statistics will be discussed.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

STAT 2392 - ADVANCES IN APPLIED STATISTICS 2

Grade Component: Grad LG/SNC Basis

STAT 2395 - CODES AND DESIGNS  
Minimum Credits: 3  
Maximum Credits: 3  
A unified theory of linear codes, combinatorial design and statistical design will be presented. Hamming, BCH, Golay, quadratic residue and other classes of codes will be constructed. Several decoding schemes, including decoding by way of locator polynomials, will be done. Applications to statistical design and quality control will be described in detail.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

STAT 2521 - TIME SERIES 1  
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the theoretical aspects of time series analysis. In this course we discuss the probabilistic foundations of time series in both the time and frequency domains. Students should have a strong background in mathematical statistics, but the course does not assume a prior knowledge of time series analysis.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

STAT 2522 - TIME SERIES 2
STAT 2611 - THEORY OF MULTIVARIATE ANAL 1
Minimum Credits: 3
Maximum Credits: 3
This is the first semester of a two semester sequence that focuses on the theoretical aspects of the analysis of multivariate data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2612 - THEORY OF MULTIVARIATE ANAL 2
Minimum Credits: 3
Maximum Credits: 3
This is the continuation of STAT 2611.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2630 - INTERMEDIATE PROBABILITY
Minimum Credits: 3
Maximum Credits: 3
This course is the first half of a two term sequence in mathematical statistics intended for undergraduate students and graduate applied statistics majors. Topics to be covered include probability concepts, random variable, discrete and continuous variables, joint distributions, functions of random variables, and some sampling distributions
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2631 - THEORY OF STATISTICS 1
Minimum Credits: 3
Maximum Credits: 3
This is an introductory graduate course in the theory of statistical estimation. The following topics will be covered. The use of orthogonal transformations in statistical distribution theory, distribution of quadratic forms, the theory of linear estimation, the general theory of estimation and estimation from a decision theoretic point of view.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2632 - THEORY OF STATISTICS 2
Minimum Credits: 3
Maximum Credits: 3
This is the continuation of STAT 2631.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2640 - INTERMEDIATE MATHEMATICAL STAT
Minimum Credits: 3
Maximum Credits: 3
This course is the second half of a two term course. Topics to be covered include estimation, inference, linear models, and an introduction to bayesian estimation.
Academic Career: GRAD
STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS
Minimum Credits: 3
Maximum Credits: 3
This course deals with the concepts and technical tools that are useful for the study of asymptotic approximations in statistics. Topics include Laplace and saddle point methods, the limiting behavior of maximum likelihood and Bayes estimators and likelihood ratio test statistics, Edgeworth and Cornish-Fisher expansions, efficiency, influence functions, the jackknife and the bootstrap.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2661 - LINEAR MODELS THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This course will follow a coordinate-free approach to the general linear model. As much as possible proofs will be done from a geometric perspective. Topics include matrix theory for statistics, estimation, hypothesis testing, distribution theory, generalized inverses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2662 - LINEAR MODELS THEORY 2
Minimum Credits: 3
Maximum Credits: 3
This is the continuation of STAT 2661.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2691 - NONPARAMETRIC THEORY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the statistical analysis of data when no parametric assumptions are made.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2711 - PROBABILITY THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This course begins with an introduction to Lebesgue integral. Then distribution functions, probability measures and random variables are introduced. Convergence concepts and topics from the laws of large numbers and random series are also covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2712 - PROBABILITY THEORY 2
Minimum Credits: 3
Maximum Credits: 3
This is the continuation of STAT 2711.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: STAT 2711

STAT 2731 - APPL STOCHASTIC PROCESSES 1
Minimum Credits: 3
Maximum Credits: 3
This course is a non-measure theoretic treatment of stochastic processes with topics chosen from Markov chains, Poisson processes, renewal theory
and weak convergence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

STAT 2751 - RELIABILITY THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This course will cover basic concepts in reliability theory.

Strategic Planning & Policy

BSPP 2005 - PLANNING AND CONTROL
Minimum Credits: 1.5
Maximum Credits: 1.5
The nature and scope of planning and control processes. Importance is placed on approaching and performing these functions systematically. Various models and frameworks will be examined through readings, cases, and lectures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2010 - MANAGEMENT POLICY
Minimum Credits: 3
Maximum Credits: 3
Overview of the general management function and related strategic processes. The primary focus is on corporate planning strategy and policy implementation. Skill in analysis and integration of important variables is developed through cases, readings, lectures, and related exercises.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2011 - TECHNICAL STRATEGY & INTELLGNC
Minimum Credits: 1.5
Maximum Credits: 1.5
This course introduces students to central issues in the formulation and implementation of technology-based competitive strategy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2013 - ACQUISTN AND DIVESTMENT ANALYS
Minimum Credits: 1.5
Maximum Credits: 1.5
Based on current concepts of corporate business portfolios, this course analyzes the reasons for shifting the portfolio mix and the resulting implementation issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2015 - COMPETITIVE ANALYSIS
Minimum Credits: 1.5
Maximum Credits: 1.5
Analyses of various market structures and the related generic strategies which yield various risks and benefits.
Academic Career: GRAD
Course Component: Lecture
As globalization gathers pace across the business landscape, senior managers must learn to cope with increasing levels of strategic uncertainty. Globally contestable markets, radical technological and business process innovation, and shifting consumer preferences combine to stress-test corporations' strategic planning and execution capabilities. In particular, there is a need for new models of strategy and competition—incorporating concepts such as real options, scenario thinking, non-market factors, and "new game" strategies (e.g., "Bottom of the pyramid" approaches). Accordingly, this course provides participants with a set of rigorous tools and frameworks for making sense of today's high-ambiguity global environment.

BSPP 2016 - STRATGC VISN FOR A GLBL FUTURE
Minimum Credits: 2
Maximum Credits: 2

Strategic alliances and cooperative relationships between two or more firms is rapidly becoming a common feature of a firm's competitive environment. The purpose of this course, therefore, is to examine the nature of both domestic and international alliances, the reasons behind their formation, and the issues related to their management.

BSPP 2017 - MGMNT OF STRATEGIC ALLIANCES
Minimum Credits: 3
Maximum Credits: 3

Transition to a general manager focuses on the essential task of a general manager which is to make and implement high stakes decisions in a timely manner. High stakes decisions should use evidence-based decision making and a leadership framework that is context-dependent. We focus on five specific areas; top management decision making processes, the prioritization of strategic initiatives, the resource allocation process, restructuring and steward leadership, and implementing strategic initiatives. Case studies and readings will be used to present each topic along with case exercises oriented towards decision making.

BSPP 2018 - TRANSITION TO GENERAL MANAGER
Minimum Credits: 2
Maximum Credits: 2

Students in this course will work directly with a company dealing with real-life situations in the strategy area.

BSPP 2022 - PROJECT CRSE-STRATEGIC PLANNING
Minimum Credits: 3
Maximum Credits: 3

Students in this course will work directly with a company dealing with real-life situations in the strategy area.

BSPP 2023 - PROJECT COURSE - STRATEGY
Minimum Credits: 3
Maximum Credits: 3

Students in this course will work directly with a company dealing with real-life situations in the strategy area.
BSPP 2027 - INTRNATIONAL BUSINSS PRACTICES
Minimum Credits: 1.5
Maximum Credits: 1.5
Focuses on the fundamental factors that influence planning of strategy in the international context. Issues discussed include the multinational corporate (MNC) interaction with the nation states, MNC resource transmission capabilities, and the change-agent role of the MNC.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2037 - INTERNATIONAL CORPORT PLANNING
Minimum Credits: 3
Maximum Credits: 3
Stresses strategic factors unique to international corporate planning. Discusses various approaches to strategy formulation by Multi-National Corporations (MNCS); explores application to specific industries. Includes such topics as MNC interaction with the nation states, control and ownership strategies, organizational design for multinational operations, and strategies for managing cultural change process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2051 - PROJ CRSE IN COMPTV INTELLGNC
Minimum Credits: 1.5
Maximum Credits: 3
This project course will explore the global steel industry. In particular the project will include an industry structural analysis including the evolution of the industry, the identification of key competitors on a global basis, the identification of key issues facing industry participants, and strategic responses to changing dynamics of the industry and its stakeholders.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2052 - PROJ CRSE IN STRATGC CST ANAL
Minimum Credits: 1.5
Maximum Credits: 3
This course will focus on developing a model that performs strategic cost analysis to assist in decisions relating to the management of the theater facilities of the Pittsburgh cultural trust. Students in the course will work with theater management, events programming, planning and financial executives of PCT -- serving in essence as a consulting team to the organization.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2060 - INDEP STDY STRATGY PLN CONTRL
Minimum Credits: 1
Maximum Credits: 6
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2061 - IND STDY IN STRATGC PLANNING 2
Minimum Credits: 1
Maximum Credits: 9
Self designed elective course in strategic planning.
Academic Career: GRAD
Course Component: Independent Study
BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES
Minimum Credits: 3
Maximum Credits: 3
This course covers theory, conceptual frameworks, and tools used to formulate strategies for commercializing new technologies. The analytical frameworks cover elements of commercialization strategy that are equally critical to start-ups and to corporate technology ventures. In addition, we discuss some of the key challenges that differ for start-ups versus established firms. The primary deliverable in the course is a professional quality project which evaluates the commercialization alternatives for an emerging technology. Your project team will be paired with a local inventor, unless you prefer to evaluate a technology of special interest to your team. Experienced entrepreneurs and experts in financing new technology ventures will also address the class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2112 - LEADING ORGS TO INNOVATE SMARTER
Minimum Credits: 2
Maximum Credits: 2
This course addresses the critical role of a firm's top management in guiding a firm toward more positive innovation outcomes. We specifically focus on the role of executive leadership in developing a firm's capability for breakthrough innovation—a primary source of sustained competitive advantage and economic growth. We distinguish between what leaders need to do during invention and innovation, and emphasize barriers that hinder established firms' capabilities to produce breakthrough innovations. We examine how strategic leaders can augment a firm's ability to 'innovate smarter' by better utilizing the diversity of expertise that resides within the organization and within the firm's partnerships. The concepts we'll discuss are grounded in decades of research on creativity and technological innovation, as well as strategic management, leadership, and teams. We'll discuss how strategic leaders apply these concepts today.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2310 - MANAGEMENT POLICY
Minimum Credits: 3
Maximum Credits: 3
Overview of the general management function and related strategic processes. The primary focus is on corporate planning strategy and policy implementation. Skill in analysis and integration of important variables is developed through cases, readings, lectures, and related exercises.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSPP 2328 - THE BUSINESS OF HUMANITY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on strategic management in business contexts of high uncertainty and extreme complexity created by the interaction of (i) the inevitability of increasing globalization, (ii) the importance of innovation to ensure sustainable competitive advantage and (iii) the emerging social and economic imperative of building business models that focus on shared value. The business of humanity® project at the KATZ graduate school of business has researched the responses of businesses across the world to these challenges. The course will cover (i) the radically different strategic planning processes and analytical techniques, (ii) the new rules of strategy, (iii) the dynamic organizational structures and (iv) the new leadership models that are responsive to the imperative and potential of meeting fundamental human and societal needs. These processes, rules, techniques and models have been demonstrated to be effective in dealing with technological disruptions, extreme price-point pressures in growth sectors, rising societal expectations and wicked problems
Academic Career: GRAD

Academic Career: GRAD
Course Component: Lecture
Grade Component: No Grade Required
Course Requirements: Katz Grad School of Business students only.

**BSPP 2409 - STRATEGIC MANAGEMENT**
Minimum Credits: 2
Maximum Credits: 2
"Strategy" in the context of management, focuses on creating a harmonious relationship between separate units within an organization, and between a firm and its environment. The core strategic management course explores this classic concept of strategy and how it can be adapted to today's changing and turbulent environments. While the course adopts the perspective of a general manager (e.g. Head of a strategic business unit), it provides critical insight to functional managers who must align their departments' activities with the firm's overall objectives and approach to creating and capturing value (i.e. Its competitive strategy). The strategic management course employs a multi-method pedagogy. Students learn a set of perspectives, conceptual frameworks, and tools - drawn from industrial organization economics and the behavioral sciences and sociology, with which to understand the opportunities and challenges involved in developing world-class capabilities for competing effectively in globally-linked economies. Through case studies, we explore how a firm's competitive strategy shapes the way it engages customers, suppliers, competitors, and others comprising its value net. Through project assignments, we investigate how competitive advantage can be quantified using publicly available data. Together, the multiple modes of inquiry will provide insight into why competitive advantage is fundamental to a firm's long-term success; how the various activities in a firm's value chain can contribute to competitive advantage; and why, although industries support many competitive strategies, each firm tends to employ only one at a time.

**BSPP 3011 - STRATEGIC PLANNING SYSTEMS**
Minimum Credits: 3
Maximum Credits: 3
Analyzes the strategic planning process in terms of the varying combinations of subsystems which may be required for different organizational purposes. Research regarding both the design and evaluation of planning systems will be studied with the objective of developing improved models of the underlying processes.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BSPP 3012 - RSRCH IN COMPETITIVE STRATEGY**
Minimum Credits: 3
Maximum Credits: 3
This course draws on a growing body of theoretical and empirical research which examines relationships between an organization's environment, its strategy, and performance outcomes. Topics include theoretical concepts of the environment and their empirical counterparts, market definitions,
strategic alliances, competitive information flows, competitive interactions and responses, industry evolution, and the role of environmental analysts. Special attention is given to competitive intelligence processes. There is an explicit balance of theoretical and practitioner material. The course complements the research in corporate strategy seminar by focusing on business level competitive dynamics.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BSPP 3013 - FOUNDTS OF STRATEGY RESEARCH**

Minimum Credits: 3  
Maximum Credits: 3  
Examines various streams of research which have contributed to our understanding of competitive behavior at both the business unit and corporate levels of diversified organizations. Prior studies are critiqued as a means of developing proposals for improved research designs.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BSPP 3014 - RESEARCH IN CORPORATE STRATEGY**

Minimum Credits: 3  
Maximum Credits: 3  
In this course we will focus on a core sub-field of strategy, corporate strategy, which has the following defining question: what businesses should the firm compete in, and how should resources be allocated across those businesses? Corporate strategy comprises an inter-related set of three key phenomena and associated research; value creation (e.g., Diversification and vertical integration), scope (e.g., Mergers and acquisitions), and execution (e.g., Role of the corporate office). While corporate strategy is often studied purely as a "content" field, we will adopt an integrative content-process orientation in this course. Our approach will also be evidence-based, in that we'll make a conscious attempt to understand and use systematic review tools, such as meta-analyses, to arrive at a sophisticated understanding of the corporate strategy literature.  

**Academic Career:** GRAD  
**Course Component:** Seminar

Minimum Credits: 3  
Maximum Credits: 3  
Provides a systematic forum for the presentation and development of current research topics by faculty, doctoral students, and visiting scholars. Interaction among participants with diverse interests is intended to enhance the quality of research programs pursued within the field.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

**BSPP 3018 - THEORY BUILDING IN MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
The development and analysis of theory is a critical skill for academic scholars to develop. In this course we will explore the components of a theory, discuss the latest developments in theory development, and apply theory analysis to the field of management. The course is designed to complement research design and statistics courses.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BSPP 3022 - ADV TOPICS MANAGEMENT CONTROLS**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will cover current issues in the area of planning and control such as emerging organizational forms and high velocity environments from an interdisciplinary perspective. It will focus on the development of alternative paradigms with which to examine critical issues in the planning and control process.
BSPP 3024 - ADVANCED TOPICS IN STRATEGY
Minimum Credits: 3
Maximum Credits: 3
This is an advanced topics course in strategic alliances and the role of control variables.

BSPP 3099 - READNGS STRATEGC PLNNG & POLCY
Minimum Credits: 1
Maximum Credits: 9

Strategy Envirnmt & Organiztns

BSEO 2000 - STRATEGY SEMINAR
Minimum Credits: 1.5
Maximum Credits: 1.5
This seminar covers specific issues and frameworks and develops analytical skills that apply to new market strategies.

BSEO 2012 - SOCIAL ENTREPRENEURSHIP
Minimum Credits: 2
Maximum Credits: 2

BSEO 2021 - PROJECT CRSE - STRATEGIC PLNNG
Minimum Credits: 1.5
Maximum Credits: 1.5
Students will work directly with a company dealing with real-life situations in the strategy area.

BSEO 2033 - MANGNG THE NATURAL ENVIRONMNT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course focuses on the management of strategic and compliance issues related to the natural environment of the business firm.
BSEO 2034 - SUSTAINABILITY & CORPORATE RESPONSIBILITY
Minimum Credits: 2
Maximum Credits: 2
This course will address such topics as managerial approaches to the ESG issues and opportunities that occur across business processes, sustainability and social responsibility as business opportunities, environmental management systems (the 14001 standards), social responsibility guidance (ISO 26000) and reporting, and methods of dealing with stakeholders concerned about the firm's ESG performance. It introduces students to sustainable business management practices and to the role of the private sector in global sustainability development and environmental initiatives. Throughout the course, the emphasis will be on real-world managerial experience and guidance, based on numerous current cases.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BSEO 2100 - STRATEGY SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This seminar covers specific issues and frameworks and develops analytical skills that apply to new market strategies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2311 - BUSINESS RESTRUCTURING STRATEGY
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide insight into how to lead a business to success in a global environment, through the effective integration of advanced technologies with reorganized and reskilled people.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2315 - BUSINESS LAW
Minimum Credits: 3
Maximum Credits: 3
The primary objectives of this course are: (1) to identify the many types of business actions which require decision makers to analyze ethical issues; and (2) to teach students when, why, and how ethical issues should be made a part of the decision-making process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BSEO 2316 - BUSINESS LAW
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to discuss key topics of business actions and topics central to the objective of today's executive.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2318 - COMPETITIVE STRATEGY
Minimum Credits: 3
Maximum Credits: 3
This course gives students hands-on experience making strategic decisions as members of a senior management team in a multi-national firm.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BSEO 2319 - DECISION MAKING AT THE TOP
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide EMBA students with significant insight into decision making at the senior level of the firm (CEO, CFO, COO, and the other CXO).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2401 - BUSINESS ETHCS & SOCIAL PERFORM
Minimum Credits: 1.5
Maximum Credits: 1.5
This course examines concepts, issues, and tools related to the management of ethics and social responsibility in business. Students learn how to recognize and respond to ethical problems, to understand their personal responsibilities as business managers, to evaluate various ethical frameworks, to apply a process of moral decision making to ethical problems, to grasp relationships between ethical behavior and organizational structure and processes and to manage the ethical and social problems and opportunities arising from dimensions of the business environment.

**BSEO 2507 - ADVANCED MARKETING STRATEGY**

- Minimum Credits: 1.5
- Maximum Credits: 1.5

This course offers simple analytical frameworks based on which firms' marketing strategies are formulated and developed. Case write-ups, the group paper, class participation and discussions as well as a final exam will determine the overall grade for the course.

Academic Career: GRAD
BSEO 2509 - BUSINESS AND POLITICS
Minimum Credits: 2
Maximum Credits: 2
The financial crisis, international negotiations toward a climate change agreement, and crises in such industries as pharmaceuticals and even toy manufacturing have highlighted the increasing interdependence of business and government, as well as the means by which business gains strategic benefits from government regulation. This course will examine methods and patterns of business influence on government, policy-making on issues affecting business, the performance of regulatory agencies, and the behaviors of groups and trade associations in politics. The course begins with an extended case study that asks, what caused the current financial crisis that some call "the great recession"? The crisis had multiple, often interacting causes, and involved both public sector and private sector failures. Besides examining the bases of the crisis, we will ask what institutional reforms, and what critical decisions, might have ameliorated the crisis, and might prevent a future crisis. The course will examine both regulatory failure patterns and the means by which firms gain strategic, competitive advantage through shaping government decisions and programs. In examining techniques of lobbying, the course will focus on the U.S. setting and identify both effective and ineffective methods of lobbying. By the end of the course, students should have obtained a good working knowledge of the U.S. regulatory system, the major instruments of regulation, and the typical interactive patterns of regulators and regulated parties.
Academic Career: GRAD

This course examines the management practices of effective global managers. In many ways, global managers and domestic managers approach their jobs similarly.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2553 - STRATGC MGT ACQISTN DIVESTMENT
Minimum Credits: 2
Maximum Credits: 2
Given the frequency and magnitude of mergers and acquisitions (M&A) activity, most Pitt MBAS can expect their careers to be impacted by M&A transactions sooner or later - whether as analysts in the pre-merger, phase, as managers or consultants in charge of implementing the merger, or simply as professionals whose career trajectories are inevitably shaped by the event. In order to help you prepare for these roles, acquisitions and divestment will address the strategic and organizational challenges of integrating companies so as to realize the promise of value creation. Building on the premise that the real work of M&A begins after the deal is signed, this course will utilize current research findings, case studies, and practitioner experiences to equip you with a working knowledge of effective post-merger integration. At a time that most companies realize that M&A's have a poor track record of success precisely due to poor post-merger integration, the educational experience in this course will provide you with a valuable skill set. The course should be of special interest to students interested in management consulting careers, or who expect to have significant general management responsibilities in their jobs, or who want to be knowledgeable about M&A events that are likely to affect their careers sooner or later.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Maximum Credits: 3
This course examines executive leadership or the leadership of organizational units. Course topics include the following: leadership skills development, ethical decision-making, management of ethical organizations, corporate social performance, charismatic and transformational leadership, leadership of organizational change, strategic vision, organizational values, corporate governance, stakeholder management, and contingency theories of leadership.
**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** Katz Grad School of Business students only.

**BSEO 2576 - INNOVATION & ENTREPRENEURSHIP**
Minimum Credits: 2
Maximum Credits: 2
This is an experience-based course that will provide based learning opportunities for students interested in exploring commercialization pathways for innovations developed at the university of Pittsburgh.
**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** Katz Grad School of Business students only.
BSEO 2577 - MANAGING IN NETWORK INDUSTRIES
Minimum Credits: 2
Maximum Credits: 2
This course focuses on strategic and organizational challenges in platform-mediated markets that exhibit network effects. In such platform-mediated network contexts, network users participate in a network in order to interact with each other. Network effects are evident in such interactions when a network’s value to any given user depends on the number of other network users with whom they can interact—the classic example being that the value of the telephone network is proportional to the number of people who have phone service, i.e., the more people one can reach, the more valuable the phone system is to a user. A central theme in the strategic dynamics of network industries is the winner-take-all phenomenon (although not all network industries demonstrate the winner-take-all dynamic in practice). In order to understand network industries, we will focus on three key questions: (1) what are platform-mediated networks? (2) How are network industries different from other types of industries? And (3) how should strategic and organization choices reflect the unique characteristics of network industries? The 2.5-Day course will consist of the following modules: core concepts, platform control, network mobilization, platform evolution and government policy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2600 - COMMUNITY SERVC PROJECT CRSE 1
Minimum Credits: 1.5
Maximum Credits: 1.5
We will be exploring the managed health care scene in this area, investigating possible collaborative alliances with other agencies, and tracing resource needs and potential new revenue sources. In short we will be providing information for the board to conduct its strategic planning process, and we expect to learn a lot about nonprofit management and managed health care in the process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2601 - COMMUNITY SERVC PROJECT CRSE 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BSEO 2600.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2801 - BUSINSS ETHICS & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
Examines concepts, issues, and tools related to the management of ethics, social responsibility in business, and the management of public affairs and regulation. Emphasis is placed on the challenges facing firms in these areas as they navigate in a changing global business environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 2805 - MANAGING STRATEGIC PERFORMANCE
Minimum Credits: 1.5
Maximum Credits: 1.5
MSP is concerned with the implementation of corporate and business-level strategies in a global environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BSEO 9000 - ETHICS WORKSHOP
Minimum Credits: 0
Maximum Credits: 0
The purpose of this workshop is to acquaint students with a model of ethical decision making that can be applied in all MBA classes and in all management situations; to focus on recognizing ethical problems in many areas of management responsibility.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

Study Abroad

FSX 2990 - STUDY ABROAD
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

Surgery

SURG 5100 - MD-OMS RESIDENCY (7 MONTHS)
Minimum Credits: 0
Maximum Credits: 0
This program is multi-disciplinary incorporating basic physiology, pharmacology, microbiology, histology, anatomy and physical diagnosis. This rotation permits the medical student oral and maxillofacial surgery resident to gain insight as to how the basic sciences effect the overall body with emphasis on the head and neck region. Early exposure to ambulatory patients stresses the underlying pathophysiologic process of the presenting disease. Student evaluation is based on several written examinations and participation in small group problem-based conferences.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5101 - MD-OMS AMBULATORY CARE PART 1
Minimum Credits: 0
Maximum Credits: 0
This course is designed to familiarize the oms/md students with how physicians and oral and maxillofacial surgeons practice ambulatory medicine in their offices. The course is designed to expose the student to the diversity of health care delivery in the community. Each student is scheduled during the term for nine afternoons in a physician's/surgeon's office and five afternoons in a variety of other community health care settings. Faculty and practitioners meet with these students to discuss their experiences and relevant issues of health care delivery.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5201 - MD-OMS AMBULATORY CARE PART 2
Minimum Credits: 0
Maximum Credits: 0
This course is a continuation of Part 1 taken during the first year. OMS/MD students will continue to be exposed to a diversity of health care delivery in the community, either in an oral and maxillofacial surgeon's office or other nonhospital based venue (e.g. outpatient clinic). Small group discussions are conducted to share experiences and discuss relevant issues.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5323 - PLASTIC SURGERY PRECEPTORSHIP
Minimum Credits: 0
Maximum Credits: 0
This four-week elective will provide the student with a preliminary exposure to the specialty of plastic and reconstructive surgery. This preceptorship allows an opportunity to observe and have minor involvement in the clinical care of patients on the service. In addition to direct attending and resident interaction, education is obtained from weekly teaching conferences. Emphasis will be placed on the scope and interaction of plastic surgery
with other specialties and the various methods of reconstruction available for each type of deformity. Areas to be experienced will include reconstructive techniques in traumatic, congenital, neoplastic and cosmetic deformity as well as the basic biology of wound healing and wound management.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**SURG 5345 - SURGERY CLERKSHIP REPEAT**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**SURG 5360 - ORAL-MAXILLOFACIAL SURGERY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four-week junior clerkship conducted as a resident in oral-maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, first surgical assist, primary management of post-operative care, emergency room call for max trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conferences held by the department of plastic and oral-maxillofacial surgery.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**SURG 5371 - SURGERY AND PERIOPERATIVE CARE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Eight-week rotation with students participating in general surgery and anesthesiology. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**SURG 5372 - SURG & PEROPERTV CARE CLERKSHP**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Six-week rotation with students participating in general surgery. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties. Registration must accompany registration in MSANE 5372.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**SURG 5375 - SURGICAL SPECIALTIES**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Four-week course designed to teach the essentials, knowledge and skills in the management of common diseases in the specialties of otorhinolaryngology, orthopedics, ophthalmology and urology. Learning accomplished through didactic lectures, prepared written syllabi, case reports, multi-media computerized instruction and clinical experience in offices of university faculty. Assessment of student performance accomplished through a multiple-choice examination, objective evaluation of clinical skills, and estimation of clinical expertise in the ambulatory setting.
SURG 5401 - SURGERY ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Four-week clerkship, conducted as an acting internship in general surgery. Responsibilities: patient evaluating, primary management of pre- and postop care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. Daily rounds with house staff and attendings. Attend postgrad teaching rounds and conferences held by the department of surgery.

SURG 5402 - EXTRAMURAL ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Students will register for this course when participating in a surgery acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

SURG 5403 - MD/OMS ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
This four-week course is conducted as an acting internship on the endocrine service. Students eligible to register for this course will be participants in the professional medicine/oral maxillofacial surgery combined program (md/oms). Participants will have responsibility for patient evaluating, primary management of pre- and post-op care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. There will be daily rounds with housestaff and attendings. Attendance at the postgrad teaching rounds and conferences held by the department of surgery is expected.

SURG 5410 - GENERAL SURGERY ELECTIVE
Minimum Credits: 0
Maximum Credits: 0
Four-week clerkship offered at a private area medical facility student works directly with a surgical resident and attending surgeons. Responsibilities: preoperative diagnosis, intraoperative surgical assisting and postop care. Daily rounds with house staff and attendings. Attend surgical conference and is requested in advance to participate by way of case presentation or prepared problem discussion. Student "night call" approximately every fourth night corresponding to the surgical resident on service.

SURG 5411 - SURGERY INTERNSHIP PREP COURSE
Minimum Credits: 0
Maximum Credits: 0
This 4-week rotation was developed especially for 4th-year medical students matching into surgical specialties, including general surgery, vascular surgery, cardiothoracic surgery, plastic surgery, OB/GYN, and urology. Participants will have the opportunity to work with surgical specialists and residents in order to develop skill sets that are necessary for successful matriculation into a surgical internship. The course consists of interactive didactics, simulation, and technical skills practice. A wide range of topics will be covered, including management of emergencies on the surgical ward, discharging patients, dosing common medications, wound care, suturing, use of radiologic tests, placement of chest tubes and central lines, and many others. This course provides a unique opportunity for students to attain the tools needed for the transition into surgical internship with confidence, with the intention of improving patient safety, decreasing surgical intern anxiety, and improving surgical resident efficiency.
SURG 5420 - COMMUNITY HOSPITAL CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
Four-week elective provides student with exposure to general surgery as practiced outside the university environment, in suburban or rural community hospital. Elective is structured as a preceptorship. Student will evaluate patient problems, be involved in daily patient management, assist in operating room, and attend outpatient office hours with precepting surgeon. Room and board is provided at hospital outside Pittsburgh.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5430 - NEOPLASTIC DISEASE ELECTIVE
Minimum Credits: 0
Maximum Credits: 0
Four-week elective in oncology. Through the national surgical adjuvant breast project headquartered at Scaife Hall, student will study in depth, contemporary theories of tumor biology from clinical and laboratory perspective. Outpatient clinics and/or exposure, but major focus is conducting cooperative clinical studies regarding the management of patients with breast or colon cancer.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5440 - PEDIATRIC SURGERY ELECTIVE
Minimum Credits: 0
Maximum Credits: 0
Four-week elective tailored to fully integrate a student into a specific position of the house staff. Student serves as an intern, with participation in all clinics, rounds, conferences and capabilities. Time spent each week seeing patients. Special adaptations of program to particular requests can be made, including part pediatric medicine and part pediatric surgery. Will learn differences between childhood and adult diseases, take pediatric history and do complete physical.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5482 - ORGAN TRANSPLANTATION
Minimum Credits: 0
Maximum Credits: 0
This is a four (4) week elective for medical students interested in learning about renal, pancreatic or liver transplantation. The student will have an opportunity to participate as a member of a busy transplant team. They will be involved in the evaluation and treatment of a large number of patients referred here with hepatic or renal disease for consideration of resection or transplantation therapy, or patients with type i diabetes mellitus for pancreas transplantation. They will attend the various conferences and, if possible, pre-and post-transplant clinics. Students will be offered the opportunity to scrub in the operating room on both living and deceased donor transplants. There will be no mandatory call; however, students should be aware of the fact that many transplantations occur at night or on the weekends. The student can participate in the post-operative care of transplant patients, including experience in the surgical ICU. Both through selected reading materials that offer an introductory exposure to transplantation, and through participation in patient care and rounds, students will learn the basic principles of evaluation and management both pre- and post-transplantation, immune-suppression, and infectious prophylaxis.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5485 - BIOLOGICAL AND GENE THERAPY
Minimum Credits: 0
Maximum Credits: 0
This 4-week elective will provide an opportunity to study contemporary theories of tumor biology and tumor immunology both from a clinical and laboratory perspective. While outpatient clinics will be part of the experience, the major focus will be the rewards and challenges of conducting clinical studies regarding the management of patients with various tumors managed with biologic therapies.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5486 - SURGICAL SPECIALTIES
This is a four week course. The student may select two areas of special interest, and will spend two weeks on each selected specialty. Available specialties are: cardiothoracic surgery, orthopedics, neurological surgery, plastics & reconstructive surgery, urological surgery, vascular surgery, and magee surgical oncology. The student will gain clinical exposure through attending clinics, participating in daily inpatient rounds, and in the operating rooms. Instruction will be by the residents and attending surgeons on the selected services. Performance will be evaluated on a number of criteria including knowledge, patient evaluation and management planning, motivation, responsibility, and interpersonal actions. The purpose of this course is to allow students to explore possible areas of interest for which they might not get exposure in the standard curriculum. The student is expected to learn to perform a basic history and physical evaluation of patients as required by each specific service. Each student should be able to discuss the service specific approach to patient management.

**SURG 5490 - ORAL-MAXILLOFACIAL SURGERY**

Minimum Credits: 0  
Maximum Credits: 0  
Four-week clerkship conducted as a resident in oral-maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, evaluation, first surgical assist, primary management of postoperative care, emergency room call for mf trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conference held by the department of plastic and oral-maxillofacial surgery.

**SURG 5650 - SURGICAL SPECIAL STUDIES**

Minimum Credits: 0  
Maximum Credits: 0  
An individualized course of study may be arranged with the department of surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

**SURG 5700 - SURGICAL LIFE SCIENCES**

Minimum Credits: 0  
Maximum Credits: 0  
A four week elective combining anatomic dissection, imaging modalities, and clinical pathology in a systematic manner. The course will be divided into four areas, each lasting one week. Thoracic anatomy, digestive tract anatomy, musculoskeletal and gynecological/genitourinary anatomy. The course includes lectures in anatomy, pathology and imaging modalities and precepted anatomical dissections. Exposures will vary and include seeing patients and follow their evaluation and treatment.

**SURG 5884 - HISTORY OF MEDICINE**

Minimum Credits: 0  
Maximum Credits: 0  
Four-week elective. Student examines various aspects of the history of medicine, from the beginning of medical practice into the 1980s, read selected group of historical monographs and participate in in-depth discussions with members of a group of interested senior faculty, and write a short research paper.

**SURG 5885 - SURGICAL RESEARCH**
Minimum Credits: 0
Maximum Credits: 0
Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5900 - EXTRAMURAL GENERAL SURGERY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in general surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: MEDS
Course Component: Lecture
Grade Component: H/HS/S/LS/U

SURG 5902 - INDEPENDENT STUDY
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

Telecommunications

TELCOM 2000 - INTRO TO TELECOMMUNICATIONS
Minimum Credits: 3
Maximum Credits: 3
Introduction to telecommunications for non-TELCOM majors. Top-down orientation relates networking technologies to organizational goals and needs. Data communications and internet technologies and basic system performance analysis. TCP/IP, LANs, WANs, internetworking, and signals and communications media.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Information Science (MSI) or Telecommunications (MST)

TELCOM 2010 - COMPUTER NETWORKING LABORATORY
Minimum Credits: 3
Maximum Credits: 3
The objective of this lab-based course is to gain knowledge of fundamental computer networking issues through hands-on experiments with network equipment and services. The sequence of labs start at the physical layer and progress up the protocol stack to the application layer. Topics covered are signal generation and analysis at the physical layer, ethernet and wlan performance and management, ip address planning and management, ip router configuration including RIP, OSPF,BGP, MPLS protocols, TCP connection control, stateful packet filtering, network monitoring and management, signaling protocols for voip services, and web-based services configuration.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2011 - TELECOMMUNICATIONS SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Exposure to the latest issues in the telecommunications industry and research through talks by invited experts.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**TELCOM 2012 - COMPUTER NETWORKING LAB 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The objective of this lab-based course is to complement TELCOM 2010 through hands-on experiments with other network equipment and services. This lab will be modular with lab modules in internet telephony, network security, network management, application development, and wireless communications.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**TELCOM 2030 - MATHEMATICAL FOUNDATIONS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Topics in advanced mathematics that are relevant to telecom research. Topics are selected from discrete math, linear systems, and advanced probability. Students will also independently read selected topics in computer programming techniques and write programming assignments. Strongly recommended to all TELCOM Ph.D. students. (Prerequisites: calculus and linear algebra, TELCOM 2120, TELCOM 2210, TELCOM 2310)

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**TELCOM 2100 - FUNDAMENTALS OF TELCOM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**TELCOM 2110 - NETWORK DESIGN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Methods and techniques for the design of computer/telecommunication networks. Management and business perspectives on network design, estimation of traffic demand and application requirements, network cost analysis, topological design, capacity assignment, graph theory and optimization based design algorithms, virtual network design, network design tools, wireless network design issues, availability analysis and survivable network design.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications TELCOM-MST or Telecommunications Certificate TELCOM-AC or Info Science PHD w/TELE option PHDTEL-TR)

**TELCOM 2120 - NETWORK PERFORMANCE**
Introduction to techniques for performance modeling and analysis of computer systems and communication networks. Analysis of measurements, discrete event simulation and queuing theory.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** PREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2121 - NETWORK MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Techniques of planning, controlling, organizing and decision making for a telecommunications network; accounting, security, fault management, configuration, and maintenance. Protocols and architectures for network management.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2122 - TELEPHONE SYSTEM MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Telephone system administration and the application of telephone systems to assist user organizations in achieving their goals, presented from the user organization's telecommunication manager's perspective. Management of premise equipment, costs, staffing, departmental structure and management, and the services provided by a telephone company's central office.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2125 - NETWORK SCIENCE AND ANALYSIS**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores networks as a primary metaphor and mechanism for a variety of information-related phenomena. The advancement of interconnected information and communication technologies has made networks one of the dominant ways of analyzing the use and flow of information among individuals, institutions, and societies. The course starts with the basics of graph theory and moves to understand network structures such as social networks, ecological webs, it and infrastructure systems, telecommunications networks, and market distribution and allocation structures. As a prerequisite, students should have a command of mathematics through linear and matrix algebra at the Undergraduate level.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced

**TELCOM 2130 - QUEUING THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
Development and application of the mathematical techniques used for analyzing the performance of communications networks. Topics include: Markovian queues, nonMarkovian queues, products form networks, approximation techniques, non-stationary queues.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: (TELCOM 2120 and TELCOM 2310) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))
TELCOM 2200 - PHYSICAL LAYER OF COMMUNICATIONS 1
Minimum Credits: 3
Maximum Credits: 3
For students who were not electrical engineering undergraduates. Fundamental phenomena, components, and concepts related to electricity and electronics required for TELCOM 2210, as well as for other courses in the curriculum. TELCOM applications of ac circuits and bandwidth, semiconductors and amplifiers, digital electronics and logic design, Fourier theory and frequency analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2210 - PHYSICAL LAYER OF COMMUNICATIONS 2
Minimum Credits: 3
Maximum Credits: 3
Electronic communications sequel to TELCOM 2200. Bandwidth, spectrum, noise, and channel capacity, and covers practical issues such as link power budgets and bit-error rates. Broad scope of physical-layer technologies, fundamental concepts, and techniques used in transmitting information over wire-line, optical, and wireless networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: [(TELCOM 2000 or TELCOM 2100 or INFSCI 1070) and TELCOM 2200] or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2215 - UNIFIED COMMUNICATIONS
Minimum Credits: 3
Maximum Credits: 3
After describing how humans communicate orally and visually, this course goes on to describe the technology and network architectures that provide audio and video telecommunications using conventional circuit-switched telephony, newer packet-switched "internet telephony" (VOIP), and streaming video over the internet. Basic knowledge of the physical layer is helpful, but students must be familiar with TCP/IP.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2220 - DIGITAL TRANSMISSION
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2210 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2222 - PHOTONIC COMMUNICATIONS
Minimum Credits: 3
Maximum Credits: 3
Overview of optics. Fiber-optic transport including optical fiber, sources and photo-detectors, optical couplers and switches, photonic signal transport principles for the practical design of fiber-optic links, and an ion-depth discussion of the limits of wavelength multiplexing. Review of switching theory and photonic switching including photonic switching devices and corresponding architectures for switching fabrics, photonic switching in space, time, wavelength, and all combinations, and optical packet and burst switching.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)
TELCOM 2223 - DIGITAL SPEECH PROCESSING
Minimum Credits: 3
Maximum Credits: 3
The application of digital signal processing techniques in the representation, analysis and synthesis of speech signals. Topics include digital modeling of speech signals, waveform coders, time and frequency methods in speech processing, linear predictive coding of speech, and discussion of speech processing systems in the area of human-machine communication by voice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2225 - SWITCHING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Public switched telephone network, the telephone and the local loop architecture, inter-exchange networks, and signaling. Evolution of switching technology and architectures and a comparison of various systems. Traffic statistics and the theory of space-division and time-division switching networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: TELCOM 2210 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2226 - INTELLIGENT NETWORKS
Minimum Credits: 3
Maximum Credits: 3
Overview of intelligent network (in) environments, including evolving national private- and public-switched networks as well as computers and databases united with switch processors to provide new features and services. Survey of switching software, with the in as a natural step in the evolution. Emphasis on major changes in intelligent networks and in broadband and wireless networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) and TELCOM 2300 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2227 - INTERNET TELEPHONY
Minimum Credits: 3
Maximum Credits: 3
Technology for offering telephony over an internet including: voice-over-IP end points and protocols, end-to-end delay, telephony signaling protocols, gateways and network components, telephone service provision, multi-point, network issues, and the future. Presents market, policy, and economic issues; differentiates VoIP on public or private internets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) and TELCOM 2200 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2229 - DIGITAL COMMUNICATIONS 1
Minimum Credits: 3
Maximum Credits: 3
Concepts in digital modulation and coding theory with emphasis on techniques employed in a variety of communication systems, including equalization, detection of signals in noise, spread spectrum communications, modulation and coding, and frequency hopping.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: TELCOM 2210 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))
TELCOM 2230 - RANDOM SIGNALS AND NOISE
Minimum Credits: 3
Maximum Credits: 3
Random variables, their expected values and probability distributions. Conditional probability, estimation, sampling, and decision theory. Functions of random variables, random processes, convolution, and power density spectrum. Applications in statistical design, reliability, coding, signal detection, and noise discrimination.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2120 and TELCOM 2210) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2235 - DIGITAL COMMUNICATIONS 2
Minimum Credits: 3
Maximum Credits: 3
Binary and m-ary computer based communications. Representation theory and the geometric interpretation of the communication channel, maximum likelihood decisions, multicarrier modulation, spread spectrum techniques. (Prerequisites: ECE 2521) (stochastic processes or equivalent)
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2236 - INFORMATION THEORY
Minimum Credits: 3
Maximum Credits: 3
Markov source statistics, the theory of information, channel capacity for noise-free and noisy channels, Huffman codes and other source coding techniques, introduction to error correcting channel codes. (Prerequisites: ECE 2521) (stochastic processes or equivalent)
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2237 - CHANNEL CODING THEORY
Minimum Credits: 3
Maximum Credits: 3
Introduction to algebraic coding theory based error correction coding theory; techniques of linear block codes, cyclic codes, reed-solomon codes, low density parity check codes, and turbo codes. (Prerequisite ECE 2429 or digital communications i TELCOM 2229)
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2300 - SOFTWARE TOOLS AND TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
For students who are not computer science or information science graduates. Builds upon the two programming courses required for admission and presents concepts, algorithms, and methodologies related to data structures, file systems, and operating systems essential to other courses in the MST curriculum.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2310 - APPLICATIONS OF NETWORKS
Foundational principles, architectures, and techniques employed in computer networks. Protocols and mechanisms used in the internet TCP/IP protocol suite, including the operation of both wide-area and local-area networks. Special emphasis on analysis of network and transport layer protocols.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) and TELCOM 2300; CREQ: TELCOM 2200; or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

### TELCOM 2315 - NETWORK ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Analysis of network traffic and flows and network management. Methods and tools for monitoring and analyzing network traffic and performance including data mining and visualization. Techniques of planning, controlling, organizing, and decision making for a communications work; accounting, security, fault management, configuration, and maintenance.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

### TELCOM 2320 - LOCAL AREA NETWORKS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Analysis of legacy LANs (Ethernet, token ring, token bus). Description and analysis of high speed LANs and metropolitan area networks. LAN internetworking.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: TELCOM 2310; CREQ: TELCOM 2120; or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

### TELCOM 2321 - WIDE AREA NETWORKS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Basic principles of broadband networks. Protocols suitable for broadband networks, with emphasis on atm. Other technologies, such as frame relay and SMDS. Design issues for high speed networks including network characterization, application performance guarantees, traffic policing and congestion control.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: (NFSCI 1071 or TELCOM 2310) and TELCOM 2100; CREQ: TELCOM 2120; PROG: School of Information Science

### TELCOM 2325 - DISTBD MULTI-MEDIA SYSTEMS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Modeling and design of distributed multimedia systems. A framework is presented for data management, multimedia information management, knowledge management, communication management, activities management, interface management and applications to distributed systems, real-time systems, multimedia systems and information retrieval systems design.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: INFSCI 2710 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

### TELCOM 2326 - DISTRIBUTED DATABASES
Basic concepts in distributed databases and transaction processing technology. Concepts such as concurrency control, replication management, and failure recovery.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: TELCOM 2300 and INFSCI 2710 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2400 - ACCOUNTING/FINANCE FOR TELCOM**

Minimum Credits: 3  
Maximum Credits: 3  
For students who were not business or economics undergraduates. Review of accounting and finance with emphasis on the use of financial information in the decision-making process. Investing, financial accounting, and capital budgeting in the business environment. Recommended for telecommunications students with little accounting or finance background.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2411 - INFOR TECHNLGY IN ORGANIZTNS**

Minimum Credits: 3  
Maximum Credits: 3  
Assesses consequences of information systems and networks in organizational environments that must accompany installation of these systems and networks. Tools for assessment involving human, social, economic, as well as organizational relationships. System and network life cycle planning leading to development of needs for replacement systems and networks.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2412 - TELECOMMUNICATIONS MARKETING**

Minimum Credits: 3  
Maximum Credits: 3  
Strategic marketing principles; creating superior value versus price relationships. Strategic aspects of marketing and how these relate to basic marketing functions such as selling and promotion. The critical importance of achieving and sustaining competitive advantage. Case studies of major telecommunications companies.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2420 - PROJECT MANAGEMENT**

Minimum Credits: 3  
Maximum Credits: 3  
Techniques and tools to assist in the managing process. Uses case study approach.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**TELCOM 2430 - CASE STUDIES IN TELECOMMNICTNS**

Minimum Credits: 3  
Maximum Credits: 3
Investigation of selected applications, the rationale behind, and methodologies for applying network technologies to business applications. Course project.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: SWCOSA 2084 or SWCOSA 2088 (MIN GRADE 'B-' for Listed Courses)

TELCOM 2510 - U.S. TELECOMMUNICATIONS POLICY
Minimum Credits: 3
Maximum Credits: 3
A historical review of U.S. Telecommunications policy, including both theoretical objectives and practice. The role of the various U.S. Governmental agencies in the development of the telecommunications environment. Recent developments.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2511 - INTERNATIONAL TELCOM POLICY
Minimum Credits: 3
Maximum Credits: 3
Issues in international telecommunications; survey of key organizations, e.g., ITU, GATT, Intelsat, etc.; Telecommunications and economic development; international trade in services, competition, and regulation; standards; and trans-border data flow issues.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2512 - INFORMATION POLICY
Minimum Credits: 3
Maximum Credits: 3
Introduction to information policy with a focus on U.S. Federal policies. Issues and challenges faced in developing and implementing policies within organizations and companies, including the protection and use of intellectual property, first amendment concerns, access to public information, security and the protection of privacy of personally identifiable information, are addressed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2515 - INFORMATION ETHICS
Minimum Credits: 3
Maximum Credits: 3
Background to ethics as a prelude to learning the skills of ethical decision-making and then, to applying those skills to the real and current challenges of the information professions. Decision-making and challenges related to information sources and services in all formats and media; to the internet and other digital sources (cyber ethics); and to information-related topics in management.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Telecommunications (MST) or Information Science (PHD)

TELCOM 2520 - TELECOM INDUSTRY & REGULATION
Minimum Credits: 3
Maximum Credits: 3
Commercial and legal environment of telecommunications systems in the U.S. And the world. Includes brief historical review of telecommunications in the U.S.; Liberalization and privatization; international telecommunications; telecommunications in the European union; trade in services; developing countries; international organizations.

Academic Career: GRAD
**Course Component**: Lecture  
**Grade Component**: Grad LG/SNC Basis  
**Course Requirements**: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2600 - HUMAN COMMUNICATION**  
Minimum Credits: 3  
Maximum Credits: 3  
Overview of the fields of organizational and interpersonal communication of information both within an organization and between individuals. Relevant research in both fields. Emphasis on principles that affect design of telecommunications systems.  
**Academic Career**: GRAD  
**Course Component**: Lecture  
**Grade Component**: Grad LG/SNC Basis  
**Course Requirements**: CREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2610 - DESIGNING COMPTR & NETWRK SERVC**  
Minimum Credits: 3  
Maximum Credits: 3  
Underlying concepts in the creation of user-oriented services and applications that run on computer and networked systems; including the definition of service, user access to services, human-computer interaction, sensory operation and transduction, and the operation of various terminals.  
**Academic Career**: GRAD  
**Course Component**: Lecture  
**Grade Component**: Grad LG/SNC Basis  
**Course Requirements**: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2611 - ORGANIZATIONAL BEHAVIOR**  
Minimum Credits: 3  
Maximum Credits: 3  
Concepts of organizations from both philosophical and operational perspectives, focusing on the role of technology in institutional functioning. The influence of the cultural-social medium on the process of directing work toward organizational objectives; differential aspects of transporting messages within hierarchical levels; and the significance of such factors to telecommunications networks.  
**Academic Career**: GRAD  
**Course Component**: Lecture  
**Grade Component**: Grad LG/SNC Basis  
**Course Requirements**: CREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070; PROG: School of Information Science

**TELCOM 2620 - SYS ENGNRNG FOR TELECOMMNICTN**  
Minimum Credits: 3  
Maximum Credits: 3  
Systems engineering techniques and methodologies as applied to telecommunications system and networks. Determination and analysis of user need, specification preparation, conformance of design to specification, and marketing.  
**Academic Career**: GRAD  
**Course Component**: Lecture  
**Grade Component**: Grad LG/SNC Basis  
**Course Requirements**: PREQ: (TELCOM 2000 or TELCOM 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

**TELCOM 2700 - INTRO TO WIRELESS NETWORKS**  
Minimum Credits: 3  
Maximum Credits: 3  
For students with a basic background of telecommunications who are not for telecom majors. Principles of wireless communications and how they differ from wired communications. Fundamental concepts including: transmission and mitigation techniques (e.g., Modulation and coding, propagation, interference and antennas) for wireless systems, multiplexing techniques, wireless system architectures, mobility management, security, protocols and location technology. Systems include: cellular phone networks (e.g., Cdma2000, umts), wireless local area networks (e.g., Ieee 802.11G), personal area networks (e.g., Bluetooth), fixed point broadband wireless (e.g., WiMAX) and satellite systems.  
**Academic Career**: GRAD  
**Course Component**: Lecture
TELCOM 2710 - FOUNDATIONS OF WIRELESS COM
Minimum Credits: 3
Maximum Credits: 3
Radio propagation and multipath fading, antennas, digital modulation with emphasis on techniques being used in current wireless systems including pi/4 DQPSK, GMSK, error control coding in wireless systems, spread spectrum and CDMA, OFDM, MIMO, and spectrum issues. Mathematical and qualitative treatment of existing systems as examples rather than as abstractions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2000 or TELCOM 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2720 - CELLULAR & WIRELESS NETWORKS
Minimum Credits: 3
Maximum Credits: 3
Cellular and mobile communication networks and their components including first generation analog cellular phone systems; traffic engineering; mobility management; intersystem operation; second generation digital cellular standards: gsm, is-95 (cellular CDMA); short message service (SMS); 2.5 G data services (e.g., Gprs) and third generation cellular standards CDMA 2000 and wcdma/umts. Location technology and advanced services, personal area networks and wireless local area network technology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2210 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2721 - MOBL DATA/AD HOC/SENSOR NTWRK
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2210 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2725 - CODE DIVISION MULTIPLE ACCESS
Minimum Credits: 3
Maximum Credits: 3
Theory and application of code division multiple access (CDMA) techniques for digital wireless communications. Emphasis on CDMA in mobile cellular communications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2710 or (PLAN: Telecommunications (TELCOM-MST) or Telecommunications Certificate (TELCOM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2727 - APPLCTN DEVELP MOBILE DEVICES
Minimum Credits: 3
Maximum Credits: 3
Focus on information system applications that run on top of wireless infrastructure such as multimedia messaging, mobile inventory control, location aware services including wireless technologies (gsm, cdma2000, umts, 802.11, Bluetooth), mobile information systems and applications (m-business, location-based services, wireless crm), wireless information system challenges and architectures (security, reliability, mobility, power conservation, gateways, proxies), mobile application protocols (SMS, ems, mms, wap), thin and thick client mobile application development (wml, vxml, Java, j2me, j2ee, .Netcf, c#), and business case studies of mobile applications.
TELCOM 2730 - CAPSTONE IN WIRELESS NETWORKS
Minimum Credits: 3
Maximum Credits: 3
Selected applications; rationale behind and methodologies for applying wireless network technologies to business applications. Course project.

TELCOM 2810 - INFORMATION SECURITY & PRIVACY
Minimum Credits: 3
Maximum Credits: 3
Fundamental issues and first principles of security and information assurance (confidentiality/privacy, integrity, authentication, identification, authorization, availability, access control). Business issues of risk analysis and management of resources. Issues in information systems security; analysis, design, and coding of information systems/ networks for security; techniques for building secure organizational systems; e-commerce related security issues; policy, legal and ethical issues in security.

TELCOM 2813 - SECURITY MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Security management in information systems and networks. Intrusion detection systems, anomaly detection, network forensics, application logging, auditing and data management, contingency planning, digital immune systems; alarm and responses; security standards; ethical and legal issues in information; cyber-evidence.

TELCOM 2820 - CRYPTOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (des, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (rsa, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC).

TELCOM 2821 - NETWORK SECURITY
Minimum Credits: 3
Maximum Credits: 3
Principles of network security and management. Review of network vulnerabilities, security at the link, network and transport layers; dial-up security (pap, chap, radius, diameter), ipsec, ssl, and vpns. Email security (PGP, S/MIME); Kerberos; x.509 Certificates; AAA and Mobile IP; SNMP security; firewalls; filters and gateways; policies and implementation of firewall policies; state full firewalls; fire wall appliances.
TELCOM 2825 - INFO SYS & NTWRK INFRA PROTCTN
Minimum Credits: 3
Maximum Credits: 3
Techniques for the protection and survivability of information systems and networks. Critical infrastructure definition, risk management, vulnerability and risk analysis, fault and attack trees, availability analysis, traffic restoration schemes and survivable network design and management techniques; critical infrastructure simulation, CIP policy and legal issues, SCADA systems.

TELCOM 2829 - ADVANCED CRYPTOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
Algorithm complexity, advanced number theory (Galois fields, quadratic residues, zero knowledge schemes, one-time signatures), efficient implementation of encryption schemes in hardware and software and other advanced topics in cryptography.

TELCOM 2830 - CAPSTONE IN SECURITY
Minimum Credits: 3
Maximum Credits: 3
Integrative class for master's students in their final semester of the sais track. Combination of business and technical case studies and group projects. Case studies focus on business/economics aspects of providing information assurance and how this service impacts technology. Group projects involve design and development of a prototype secure and survivable information system including application development, system deployment, system optimization and system economics.

TELCOM 2921 - INDEP STUDY IN NETWORKING
Minimum Credits: 1
Maximum Credits: 3

TELCOM 2922 - INDEP STDY IN COMMNCTN SYSTEMS
Minimum Credits: 1
Maximum Credits: 3

TELCOM 2923 - INDEP STUDY: COMPUTER COMMNCTN
TELCOM 2924 - INDEP STUDY: TELCOM ADMIN
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2925 - INDP STDY: TELCOM ECON & POLCY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2926 - INDEP STUDY: HUMAN COMMUNICTN
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2927 - IND STDY IN WIRELESS COMMNCTN
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2928 - IND STDY SECU ASSURED INF SYS
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

TELCOM 2931 - SPECIAL TOPICS IN NETWORKING
Minimum Credits: 1
Maximum Credits: 3
Selected relevant subjects in networking, either as a traditional course or as a survey of new literature. Content varies depending on student and instructor interest.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2932 - SPEC TOPC COMMUNICTN SYSTEMS
Minimum Credits: 1
Maximum Credits: 3
Selected relevant subjects in telecommunications, either as a traditional course or as a survey of new literature. Content varies depending on student and instructor interest.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2933 - SPEC TOPCS IN COMPUTR COMMNCTN
Minimum Credits: 1
Maximum Credits: 3
Selected relevant subjects in telecommunications, either as a traditional course or as a survey of new literature. Content varies depending on student and instructor interest.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2934 - SPEC TOPICS IN TELCOM ADMIN
Minimum Credits: 1
Maximum Credits: 3
Selected relevant subjects in telecommunications, either as a traditional course or as a survey of new literature. Content varies depending on student and instructor interest.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2935 - SPEC TOPC TELCOM ECON & POLICY
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2936 - SPECIAL TOPICS IN WIRELESS
Minimum Credits: 1
Maximum Credits: 3
Selected relevant subjects in wireless telecommunications, either as traditional course or as survey of new literature. Content varies depending on student and instructor interest.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2937 - SP TOPC IN WIRELESS NETWORKS
Minimum Credits: 3
Maximum Credits: 3
Selected relevant subjects in wireless telecommunications, either as traditional course or as survey of new literature. Content varies depending on student and instructor interest.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)
TELCOM 2938 - SP TOPC IN TELCOM SECURITY
Minimum Credits: 3
Maximum Credits: 3
Selected relevant subjects in telecommunications security, either as traditional course or as survey of new literature. Content varies depending on student and instructor interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2940 - PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
For students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum with a business or organization.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

TELCOM 2941 - MASTER'S THESIS
Minimum Credits: 3
Maximum Credits: 6
The thesis is a report of original, theoretical, or laboratory work suitable for publication.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Theatre Arts

THEA 2000 - RESEARCH & THESIS MASTR'S DEGR
Minimum Credits: 1
Maximum Credits: 12
Individual research designed by the ma student in connection with his or her thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

THEA 2110 - SECONDARY EMPHASIS - PEDAGOGY
Minimum Credits: 1
Maximum Credits: 3
Student designs performance course in preparation for classroom laboratory for written thesis.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2111 - GRADUATE ACTING 1
Minimum Credits: 3
Maximum Credits: 3
This course commences the study of advanced acting in the master of fine arts acting program. Its purpose is to diagnose the actor's current strengths and weaknesses and build a solid foundation in the actor's craft.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2112 - GRADUATE ACTING 2
Minimum Credits: 3
Maximum Credits: 3
This course will entail a study of the realistic foundations from which all modern acting theory springs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2113 - ACTING 3
Minimum Credits: 3
Maximum Credits: 3
This is a study of realism enlarged--departures and styles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2114 - ACTING 4
Minimum Credits: 3
Maximum Credits: 3
This is a study of poetic drama and heroic styles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2115 - ACTING 5
Minimum Credits: 3
Maximum Credits: 3
This is a one-person show to present each MFA candidate.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2116 - ACTING 6
Minimum Credits: 3
Maximum Credits: 3
This is a thesis project for each MFA candidate.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2120 - PRODUCTION MENTORSHIP
Minimum Credits: 1
Maximum Credits: 6
Faculty directed supervision of some aspect of production (acting, directing, coaching, etc) that involves the mentoring of undergraduate students.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2127 - MOVEMENT 1
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce the student to concepts and skills in movement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2128 - MOVEMENT 2
Minimum Credits: 3  
Maximum Credits: 3  
This is the second term movement class for MFA actors.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

THEA 2129 - MOVEMENT 3  
Minimum Credits: 3  
Maximum Credits: 3  
This is a more advanced movement class for MFA actors.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

THEA 2130 - MOVEMENT 4  
Minimum Credits: 2  
Maximum Credits: 2  
This is a very advanced movement class for MFA actors.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

THEA 2131 - STAGE DUELING  
Minimum Credits: 2  
Maximum Credits: 2  
The intention of this class is to train actors in stage combat.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

THEA 2132 - PERIOD MOVEMENT  
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to teach actors about the types of movement to convey specific periods of time.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

THEA 2134 - LECOQ WORKSHOP  
Minimum Credits: 2  
Maximum Credits: 2  
Training in dynamic lines of energy, movement analysis, economy and strength.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

THEA 2135 - COURSE DEVELOPMENT  
Minimum Credits: 3  
Maximum Credits: 3  
Student designs performance course in preparation for classroom laboratory for written thesis.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad Letter Grade

THEA 2140 - VOICE PRODUCTION 1
THEA 2141 - VOICE PRODUCTION 2
Minimum Credits: 2
Maximum Credits: 3
This course will train the students in control of the voice for stage, in proper breathing and projection.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2142 - ACCENTS & DIALECTS
Minimum Credits: 2
Maximum Credits: 3
This course will train students in accents and dialects in order to portray a variety of characters.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2143 - VOICE AND SPEECH
Minimum Credits: 2
Maximum Credits: 3
The intention of this class is to work on voice and speech mannerisms for stage.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2147 - TECHNIQUES PERFORMANCE PEDAGY
Minimum Credits: 3
Maximum Credits: 3
Addresses the unique needs of teachers of performance. During the course of the semester students investigate how to structure lesson plans, perform vocal and physical warm ups, develop exercises to address specific pedagogical problems, coach scenes effectively, and grade performance work. Additionally, students will be exposed to a variety of acting methods in order to develop familiarity with what's being offered to students studying at the university level.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2148 - MUSICAL THEATRE
Minimum Credits: 2
Maximum Credits: 3
This course in musical theatre is designed specifically for MFA actors to get some training in musical theatre.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2149 - PROFESSIONAL ORIENTATION
Minimum Credits: 1
Maximum Credits: 3
Experimental learning credits based outside of the university. Focus on some aspect of performance that substantiates the pedagogical experience.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
THEA 2150 - DIRECTED STUDY-ACTING
Minimum Credits: 1
Maximum Credits: 3
Course content to be decided between teacher and student.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2155 - DIRECTED STUDY - PEDAGOGY
Minimum Credits: 1
Maximum Credits: 3
Course content to be decided between teacher and student.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

THEA 2160 - DIRECTED STUDY-DIRECTING
Minimum Credits: 1
Maximum Credits: 3
Course content to be decided between teacher and student.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

THEA 2161 - GRADUATE DIRECTING
Minimum Credits: 4
Maximum Credits: 4
This course will include a review and diagnostic to determine the level of the student's work.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2162 - DIRECTING 2
Minimum Credits: 3
Maximum Credits: 3
This course will look at central image concept, ensemble and improvisation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2168 - NEW PLAY PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
This course is for students involved in the presentation of new plays.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

THEA 2170 - DIR STUDY-SET, COSTUME, LIGHTS
Minimum Credits: 1
Maximum Credits: 9
Faculty directed supervision of the theory, preparation, and execution of design for the theatre.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
THEA 2171 - STAGE DESIGN
Minimum Credits: 3
Maximum Credits: 3
This is a graduate level course on designing for the stage.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2172 - HISTORY OF COSTUME
Minimum Credits: 3
Maximum Credits: 3
This is a social history of clothing from 4000 BC to modern day, linking social, political and historical events with trends and changes in clothing history.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2180 - SCENE DESIGN 1
Minimum Credits: 3
Maximum Credits: 3
This will provide a study of scenery design as it applies to productions utilizing realistic, interior settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2181 - SCENE DESIGN 2
Minimum Credits: 3
Maximum Credits: 3
This is an advanced course in scenery design for various types of non-standard, unrealistic stage settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2183 - DRAFTING
Minimum Credits: 3
Maximum Credits: 3
The use of two-dimensional media to create three-dimensional stage environments. Emphasis on skills necessary to produce technical drawings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2185 - SCENE PAINTING
Minimum Credits: 3
Maximum Credits: 3
This course will include study of the small size and large scale painting techniques used for proscenium-style theatres.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2186 - COSTUME DESIGN 1
Minimum Credits: 3
Maximum Credits: 3
This course entails a study of the basics of costume design and the psychology of clothing for the stage. Theories of design and color as well as an overview of the professional design business.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
THEA 2188 - PATTERNMAKING
Minimum Credits: 3
Maximum Credits: 3
An introduction to flat patterning and draping techniques used in costume construction. Also a study of historical clothing construction techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2189 - STAGE MAKEUP
Minimum Credits: 3
Maximum Credits: 3
This course will entail a study of stage makeup principles including facial structure analysis and utilizing different materials such as nose putty, crepe hair, and latex...To enhance a dramatic characterization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2190 - STAGE LIGHTING 1
Minimum Credits: 3
Maximum Credits: 3
This course will entail a study of stage lighting equipment and design practices for the typical proscenium and arena theatres.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2191 - STAGE LIGHTING 2
Minimum Credits: 3
Maximum Credits: 3
This includes more advanced lighting plots and special effects devices for theatre, dance and film.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2192 - DESIGN FOR FILM
Minimum Credits: 3
Maximum Credits: 3
This is a study of designing for film and how it differs from designing for the stage.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2193 - STAGE MANAGEMENT 1
Minimum Credits: 3
Maximum Credits: 3
A practical introduction to the theory and execution of stage management for the theatre.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2200 - DIR STUDY-HIST,LIT,CRITM,THRY
Minimum Credits: 1
Maximum Credits: 12
Course content to be decided in history, literature, criticism or theory.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
THEA 2201 - MATERIALS METHOD RES THEATRE
Minimum Credits: 3
Maximum Credits: 3
The goals of this seminar include the introduction of research methods and tools appropriate for scholarly work in theatre and performance studies, the introduction of several of the primary genres of scholarly writing in the field and the introduction of significant theoretical orientations current and controversial in theatre and performance studies.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

THEA 2202 - THEORIES OF THEATRE AND DRAMA
Minimum Credits: 3
Maximum Credits: 3
In this seminar, we will examine the ways in which 'hemispheric', as an analytical lens, aspires to destabilize cartographies of geopolitical power and privilege. With particular attention to current engagements with Islamic, Hispanic, Latino/a and African histories in the Americas, we will interrogate how hemispheric propositions/provocations interface with, challenge, resist and support projects of the decolonial, in theory and in practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2203 - SCRIPT ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This is a course which examines what can be deduced from the textual given which enables us a clearer sight in directing, acting or designing a particular script.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2204 - THEORIES OF ACTING & DIRECTING
Minimum Credits: 3
Maximum Credits: 3
This is an advanced study of the various theories of acting and directing.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2205 - WORLD THEATRE: 500 BCE TO 1640
Minimum Credits: 3
Maximum Credits: 3
World theatre 500 BC to 1640 investigates histories of theatre and performance (scripts, embodiment, design, audiences, conventions, cultural functions, etc.) Within local and global social, artistic and political contexts, from classical Athens to edo Japan, colonial Mexico city to Shakespeare's globe. The course focuses on evidence and interpretation as well as historical causation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2206 - WORLD THEATRE: 1640 TO 1890
Minimum Credits: 3
Maximum Credits: 3
Discusses the history of the theatre arts which includes looking at drama, design, performance traditions and audiences from the comedies of restoration England to emerging realism of Buchner, Zola, and Ibsen. Framed by questions of documentary interpretation and historical causation, the course analyzes the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. Our focus will be on Western theatre with occasional references to non-Western forms of performance and production.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
THEA 2207 - WORLD THEATRE: 1890-1970
Minimum Credits: 3
Maximum Credits: 3
Discusses the history of the theatrical arts which includes looking at drama, design, performance traditions and audiences from the late dramas of Ibsen to the plays of Beckett and Pinter. Framed by questions of documentary interpretation and historical causation, the course analyzes the larger contexts of theatrical events, including social and political history, as well as the development of nontheatrical art forms. The focus is on Western theatre with occasional references to non-Western forms of performance and production.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2208 - THEATRE FOR CHILDREN
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

THEA 2210 - DRAMATIC STRUCTURE
Minimum Credits: 3
Maximum Credits: 3
This will be a study of the structure of drama.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2212 - SEMINAR IN DRAMATIC RHYTHM
Minimum Credits: 3
Maximum Credits: 3
A study of theories of dramatic rhythm--or the effect of play construction over time--through the study of theoretical works.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2214 - TRAGEDY
Minimum Credits: 3
Maximum Credits: 3
This is a study of the genre of tragedy in historical and theoretical perspectives. Greek, Elizabethan, French classical and modern plays are to be read.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2215 - COMEDY
Minimum Credits: 3
Maximum Credits: 3
This is a study of the evolution of the comic genre from the Greeks through Becket.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2216 - ADVANCED THEORY AND METHODOLOGY
Minimum Credits: 3
Maximum Credits: 3
Recent scholars in performance studies are moving this traditional branch of cultural studies toward the integration of cultural and biological studies, primarily through various fusions of social scientific with evolutionary and cognitive perspectives. This seminar will begin with the usual culturally constructed explanations of performances in theatre, music, sports, rituals, films, and other media offered by Schechner, Conquergood, and others.
Then we will explore some of the work by philosophers, historians, film critics, and others that seeks to move performance studies in a bicultural direction.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**THEA 2220 - PLAYWRITING 2**

**Minimum Credits:** 3

**Maximum Credits:** 3

Starting with simple exercises, we will attempt to get in touch with the unique challenges and opportunities of writing for the theatre. Class time will be spent on reviewing student work and studying selected examples of published new plays.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**THEA 2225 - GREEK AND ROMAN THEATRE**

**Minimum Credits:** 3

**Maximum Credits:** 3

This is a graduate course designed to examine Greek and Roman theatre.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**THEA 2228 - ELIZABEATHAN & JACOBEAN DRAMA**

**Minimum Credits:** 3

**Maximum Credits:** 3

This is a study of Elizabethan and Jacobean plays considered against the social and political background of the times.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**THEA 2230 - SHAKESPEARE'S PLAYS**

**Minimum Credits:** 3

**Maximum Credits:** 3

Selected plays are studied for the similarities among the plays and also for the background of changing theatrical tastes.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**THEA 2231 - HIST OF SHAKESPEARE PRODUCTION**

**Minimum Credits:** 3

**Maximum Credits:** 3

This is a history of textual changes and production choices for selected plays, with an emphasis on the ways those changes illuminate both the plays and the periods.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**THEA 2233 - 17TH CENTURY THEATRE**

**Minimum Credits:** 3

**Maximum Credits:** 3

A seminar in the dramatic theories and literature, as well as theatre history and practices, during the Italian baroque period, the Spanish Golden Age, French classicism, and English restoration.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis
THEA 2235 - 18TH CENTURY THEATRE
Minimum Credits: 3
Maximum Credits: 3
A seminar in the theatre of England, France, Germany, and Italy during the rise of the middle class to economic, political, and cultural power. The course will explore such topics as bourgeois drama, sentimentality, the baroque, and the enlightenment as related to the dramatic theories and literature, as well as theatre history and practices of the period.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2237 - STUDIES IN 19TH CENTURY
Minimum Credits: 3
Maximum Credits: 3
Studies of the major plays and changes in the theatre during the 19th century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2243 - SEMINAR: SHAW
Minimum Credits: 3
Maximum Credits: 3
This course will examine the works of Shaw in depth.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2245 - STUDIES IN NRTH AMER THEATRE
Minimum Credits: 3
Maximum Credits: 3
A seminar devoted to specific topics in the history of North American theatre, drama, popular performance forms, or popular culture. Topics are variable.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2250 - AVANT-GARDE THEATRE
Minimum Credits: 3
Maximum Credits: 3
We will consider the conditions that led to the first theatrical avant-garde and conclude with the lasting effects the period had on 20th century theatre.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2258 - CONTEMPORARY EUROPEAN THEATRE
Minimum Credits: 3
Maximum Credits: 3
This course will study the changes which have taken place in European theatre.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2260 - DOCUMENTARY THEATRE
Minimum Credits: 3
Maximum Credits: 3
This course will entail a study of the historical background of the material for a documentary play and how to blend the historical material with drama.
Academic Career: GRAD
THEA 2270 - STUDIES IN ASIAN THEATRE
Minimum Credits: 3
Maximum Credits: 3
A seminar in specific topics related to theatre, drama, or performance methods of selected traditions in Asia. Topics are variable.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2271 - STUDIES IN JAPANESE THEATRE
Minimum Credits: 3
Maximum Credits: 3
A seminar in issues relating to classic and contemporary theatre, drama, or performance methods in Japan. Topics may include noh, kabuki, kyogen, and the Twentieth-Century avant-garde. Topics are variable.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2272 - THEORY/TECHNOLOGY/MEDIA
Minimum Credits: 3
Maximum Credits: 3
This course will examine a number of key theoretical debates in the history of visual and verbal media, beginning with the technology of writing itself and moving into the invention of the codex, the printing press, and 19th and 20th century forms of imagistic production. Of particular concern will be modes of competition and symbiosis among various technologies of representation at particular historical moments, such as the relations between speech and print, poetry and theater, painting and photography, and cinema and digital media. Although case studies will be drawn from a number of historical periods, special attention will be paid to the Renaissance and to recent decades, when media of all kinds have come under increasing technological and theoretical pressure. Students will have the opportunity to extend the seminar's concerns to their own areas of research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

THEA 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
Course content to be decided by teacher and student.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

THEA 2991 - PROFESSIONAL INTERNSHIP-PLAYWRITING
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2992 - PROFESSIONAL INTERNSHIP-DRAMATURGY
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis
THEA 2993 - PROFESSIONAL INTRNSHP-DIRCTING
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2994 - PROFESSIONAL INTERNSHIP-ACTING
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2995 - PROFESSIONAL INTERNSHIP-DESIGN
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2996 - PROFESSNL INTERNSHIP-STAGE MGT
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2997 - PROFSSNL INTRNSHP-THTR BUS MGT
Minimum Credits: 1
Maximum Credits: 6
Internships for highly qualified graduate students accepted for work appropriate to their degree programs at professional theatres or other professional producing organizations. Supervised jointly by the department and the participating institution.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 2998 - PROFESSNL INTRNSHIP-TECHNOLOGY
Minimum Credits: 1

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SNC Basis

THEA 3000 - DISSERTATION RESEARCH PHD DEGR
Minimum Credits: 1
Maximum Credits: 12
Individual research designed by the Ph.D. student in connection with his or her dissertation.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Urology

URLGY 5321 - UROLOGIC ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four-week elective is intended for the less experienced medical student to provide a hands-on experience in a surgical specialty. Students will be exposed to the urology service working closely with both attending and resident staff. Time will be spent in the outpatient clinic, operating room, and on the inpatient floors to provide exposure to all aspects of the practice of urologic surgery. The focus is on urologic oncology but students will also have exposure to patients with a wide range of general urologic diseases. The course objectives are: to learn to take a urologic history and perform a focused urologic physical examination; to develop experience in the performance of basic urologic procedures, possibly even to include cystoscopy; to become familiar with the proper evaluation and treatment of common urologic diseases such as prostate cancer, bladder cancer, benign prostatic hyperplasia, and urolithiasis; and to develop expertise in the role and interpretation of a wide array of imaging studies utilized in urology.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

URLGY 5470 - UROLOGICAL SURGERY (ADULT)
Minimum Credits: 0
Maximum Credits: 0
Four-week clinical clerkships in urology. Rotations through more than one hospital may be elected. The clerkship stresses inpatient and outpatient experience as an acting intern.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

URLGY 5471 - PEDIATRIC UROLOGICAL SURGERY
Minimum Credits: 0
Maximum Credits: 0
Four-week clinical elective. Student closely involved in evaluation and care of both inpatient and outpatient. Weekly pediatric urology/pediatric surgery/radiology conference will be attended in addition to weekly conferences. Student may participate in lab research.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

URLGY 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

URLGY 5810 - UROLOGY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
This four-week elective will allow the student to gain valuable experience in urological surgery. The student will be given the opportunity to learn research techniques and to participate in research in progress.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
URLGY 5899 - INDEPENDENT STUDY IN UROLOGY
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

URLGY 5900 - EXTRAMURAL UROLOGIC SURGERY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in urologic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/
