An MSW degree from an accredited school of social work is required to be considered for admission to our PhD program. Those applicants without an MSW degree, who wish to pursue an social work academic career, can apply to the joint MSW/Ph.D. program. Such applicants typically are interested in grounding themselves in the practice base of the social work profession, while also seeking to develop their advanced research and teaching expertise.

If you are interested in a faculty position in a school of social work after completing your PhD, please note that the Council on Social Work Education, the accrediting body for social work undergraduate and master's programs, requires that social work practice courses be taught by faculty with the MSW plus the equivalent of two years of full time practice experience. Therefore, it is strongly recommended that individuals who do not possess an MSW and who desire an academic position in a school of social work consider the option of our joint MSW-PhD program. We also strongly encourage those who do not have the requisite practice experience to obtain it before completing their PhD., preferably before entering the program.
Separate applications are required for admission to each program. Those seeking further information regarding this dual degree program are encouraged to contact Dr. Jeffrey Shook, director of the doctoral program, (412) 648-9365, jes98@pitt.edu.
University Center for International Studies

The University Center for International Studies (UCIS) is the primary resource for initiating and managing international programs, studies and support services while promoting the University's reputation as a leader in global education. A key goal of UCIS is to cultivate globally capable and engaged students toward lives of impact in their community and beyond. In short, to prepare graduate students who are global ready. This is achieved by certificate programs, study abroad, curriculum development, and seminars. UCIS offers 7 graduate certificates, which are academic credentials that attest to acquisition of international knowledge about a particular world region or global issue, cross-cultural understanding, and language proficiency relevant for international careers or for advanced degrees. Certificates are available in:

African Studies
Asian Studies
European Union Studies
Global Studies
Latin American Studies
Russian Studies
West European Studies

The certificates are administered through the African Studies Program, Asian Studies Center, European Studies Center, Global Studies Center, Center for Latin American Studies, and the Center for Russian and East European Studies. Four centers--European Studies Center, Global Studies, Latin American Studies, and Russian and East European Studies--are designated by the federal government as National Resource Centers.

UCIS certificates evidence language proficiency, regional knowledge and cultural competency that students find useful for international careers.

Admission to Certificate Programs

For admission, graduate students must first apply to the relevant professional school or academic department within the Dietrich School of Arts and Sciences. Applicants are encouraged to contact a UCIS international advisor as early as possible with questions about their interest in a world region or global issue. Formal admission to the UCIS certificate programs is accomplished by completing a simple application form. Generally, no additional tuition is charged for enrollment as a certificate student. Students holding a master's degree from an accredited institution may obtain any of the UCIS graduate certificates without enrolling in a graduate degree program at the University of Pittsburgh. They may apply directly to the UCIS center or program if they wish to enroll only in the certificate program.

Certificate Requirements

UCIS Graduate certificates are awarded after completion of all certificate requirements as well as completion of all requirements for the master's degree, or after the student has passed the comprehensive examinations for the doctorate. Upon graduation, both the academic degree and the certificate are posted on the student's transcript. Specific certificate requirements for each international studies certificate are listed under the program offerings below.
Advising

All UCIS certificate programs provide personalized advising services to students interested or registered in its programs in addition to those routinely offered by the students’ major advisors. Center advisors assist in selecting courses, language training, and arranging internships or study abroad to fit the students' academic and personal interests. See the program offerings below for contact information.

The Graduate Certificate

The African Studies Program offers the graduate certificate in African Studies designed to provide students the opportunity for the interdisciplinary study of Africa. Students seeking a graduate degree at any school within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. The Graduate Certificate program is specifically designed for graduate students who desire an opportunity to intensify their study of Africa and develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines. In addition, students are provided with opportunities to participate in
research projects, symposia, lectures, conferences, and workshops on Africa. They are also encouraged to participate in internship opportunities with a specific focus on Africa.

Admission to the Certificate Program

Although formal admission to the program is allowed at any point in the student's academic career, students are encouraged to apply for admission early enough to allow them ample time to complete all the requirements in a timely manner. Application information can be obtained from the African Studies Web site or students can apply for admission to the program at our office.

The Graduate Certificate

The African Studies Program offers the graduate certificate in African Studies designed to provide students the opportunity for the interdisciplinary study of Africa. Students seeking a graduate degree at any school within the University may pursue a graduate certificate in African Studies by enrolling in the program and meeting the stipulated requirements. The Graduate Certificate program is specifically designed for graduate students who desire an opportunity to intensify their study of Africa and develop real insights into issues of critical importance in their fields of research and career interests as relates to Africa. The program provides students with fundamental grounding in African Studies through exposure to the major areas of research and knowledge on Africa in their respective disciplines. In addition, students are provided with opportunities to participate in research projects, symposia, lectures, conferences, fellowships, internships and workshops on Africa.

Certificate Requirements

Graduate students may earn a certificate in African Studies upon completion of the following requirements:

A total of six African Studies courses (18 credits) is required. Any Graduate Class can count towards the African Certificate if there is at least 25% African content and individual students focus on an issue or country in Africa while doing their project and or research paper for the class. In special instances, with the consent of the academic advisor, approved upper-level undergraduate courses may be accepted.

Language proficiency: Two years of college level study of an African language or equivalent Proficiency of a European language other than English relevant to African Studies as a consequence of Africa's historical experience (French, German, Portuguese and Spanish).

A Research Paper focused on the area of concentration under the supervision of an African Studies faculty member written for a graduate class.
The Asian Studies Center at the University of Pittsburgh is widely recognized as being among the best and most comprehensive in the country in research, public service, and teaching about East Asia. The center's mandate is to promote an enhanced understanding of East Asia, South Asia, Southeast Asia, and the Pacific Islands through exceptional undergraduate and graduate academic programs, strong interdisciplinary faculty development, and energetic community outreach. ASC has nationally recognized programs in Chinese and Japanese language and culture studies, with growing strengths in Indian and Korean studies. Its affiliated faculty spans the disciplines. Typically more than 3,500 graduate and undergraduate students enroll each year in Asia-related courses. Undergraduate students from any field or school interested in Asia can supplement and strengthen their major field of study by enrolling in the Asian Studies certificate program.

The East Asian Library (EAL)

http://www.library.pitt.edu/east-asian-library

Located in Hillman Library, the EAL contains significant collections of books and periodicals in both the Chinese and Japanese languages, in addition to materials in English and other Western languages housed in the general collections. Those pursuing research on current topics concerned with Japan can make use of the Japan Information Center (JIC), which gives users direct access to a wide array of government documents, economic reports, and a wide range of data related to social and economic issues.

Financial Assistance

Advanced Certificate Requirements

The Advanced Certificate in Asian Studies may be earned by U.S. and international students from any department or school of the University. It entails a combination of second language training and multidisciplinary area studies necessary for both communicative and cultural competence. The certificate is designed for students who wish to intensify their study of Asia, either because they would like to be able to use their knowledge of that critical part of the world in their careers after graduation, or because they recognize the importance of an understanding of Asian history, language, and culture for all well-informed people.

A minimum of five upper-level courses or graduate seminars dealing with Asia, in at least two departments. The five courses must include one seminar outside the student's major department.

A research paper. The student can fulfill this requirement by presenting either an interdisciplinary seminar paper or thesis (which draws upon more than one scholarly discipline). The paper can be used to complete departmental requirements for a graduate degree as well as for the certificate, but must include research using the student's approved Asian language.

Demonstration of proficiency in reading and speaking an approved Asian language related to one of the student's countries or regions of interest. Proficiency is interpreted to mean at least three years of study or the equivalent, and may be demonstrated by successfully completing courses or by passing a special examination.

GSPIA option: Students enrolled in the Graduate School of Public and International Affairs (GSPIA) may fulfill a more targeted set of requirements for their program. For details, visit http://www.ucis.pitt.edu/asc/academics/certificate-program/graduate-certificate-program

Since 1984, the European Studies Center formerly (ESC) has offered a strong curriculum on Europe by bringing together the rich assets of a major research university to create a unique learning community. The ESC has developed an international scholarly reputation in European Union studies and was selected by the European Commission to host one of only ten European Union Centers of Excellence in the United States.

Hillman Library at the University of Pittsburgh has been a depository library for EU publications since 1974. Dr. Phil Wilkin, the West European bibliographer, has developed the Archive of European Integration that provides a wide array of EU-related documents through the Web. Please visit http://aei.pitt.edu for details.

Financial Assistance

The ESC offers several possible funding opportunities to students in its certificate program. Please visit http://www.ucis.pitt.edu/euce/content/graduate-student-funding-opportunities for further details.

Certificate

European Union Studies, ADVCT
The Certificate of Advanced Study-European Union Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to the EU and proficiency in a relevant language. Students may enroll in the Certificate through the European Studies Center (ESC) or the Center for Russian and Eastern European Studies (REES).

Requirements:

Students seeking the Certificate of Advanced Study-European Union Studies must fulfill the following requirements:

- Complete **18 credits of EU studies courses** in at least two schools or disciplines, with at least nine credits from outside the student's home department or school. Six credits must be selected from the list of core courses. Courses must be approved by the ESC, (please visit http://www.ucis.pitt.edu/esc/node/142 for the approved course list).
- Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.
- **Language proficiency:** Students must have three years of progressive college-level instruction in an official EU Member State or official EU candidate country language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.
- Participate in an EU-related cocurricular activity approved by the ESC's Graduate Advisor.
- Be awarded a graduate or professional degree.

For the full requirements for the graduate certificate, please visit http://www.ucis.pitt.edu/esc/node/44.

---

The Certificate of Advanced Study-West European Studies enables students to complement a graduate or professional degree in any discipline (including the sciences) with an interdisciplinary set of courses related to Western Europe and proficiency in a relevant language.

Requirements:

Students seeking the Certificate of Advanced Study-West European Studies must fulfill the following requirements:

- Complete **18 credits of West European Studies courses** in at least two schools or disciplines, with at least nine credits from outside the students' home department or school. Distribution of these 18 credits is tailored to each academic program. Courses must be approved by the ESC (please visit the ESC site for the approved course list).
- Write an **interdisciplinary research paper** of 15-25 pages that ideally entails the use of second language materials. The paper may be prepared for a course, but students are urged to conceptualize it with the certificate in mind.
- **Language proficiency:** Students must have three years of progressive college-level instruction in a West European language other than English, or the equivalent proficiency. Students for whom English is a second language may use English to meet the requirement.
- Be awarded a graduate or professional degree.
Global Studies Program

412-648-2113
Fax: 412-624-4672
E-mail: global@pitt.edu
www.ucis.pitt.edu/global

The Global Studies Program provides students with a "global competence," the ability to communicate effectively across cultural and linguistic boundaries and to focus on issues that transcend cultures and continents. The global studies graduate certificate is a joint offering of the University Center for International Studies (UCIS) and the Graduate School of Public and International Affairs (GSPIA), and is open to all students enrolled in a graduate program at the University.

The Global Studies Program draws on the strengths of the Area Studies Centers within the University Center for International Studies and the departments and schools at the University of Pittsburgh. The Asian Studies Center, the Center for Latin American Studies, the Center for Russian and East European Studies, and the Center for West European Studies have been designated by the U.S. Department of Education as National Resource Centers. The University Library System possesses extensive holdings of books and journals to support research and study in these world areas.

Admission to Global Studies Program

Applications to the Global Studies Program may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, students cannot be accepted until they have received notification of admission to the University of Pittsburgh.

Students holding a master's degree from an accredited institution may obtain the Graduate Certificate in Global Studies. They may apply directly to the program if they wish to enroll only for the graduate certificate.

Requirements for Certificates

Graduate students complete six courses (18 credits) in a global thematic concentration, successfully demonstrate proficiency in a second language, and write a research paper on a global topic.

The graduate certificate offers six thematic concentrations:

- Sustainable Development
- Economy and Global Governance
- Changing Identities in a Global World
- Conflict and Conflict Resolution
- Global Health
- Communication, Technology, and Society

Students take six courses developing a cohesive program of study based on their chosen thematic concentration. Students must also demonstrate proficiency in at least one foreign language. Global Studies offers scholarships for students to pursue the study of less commonly taught languages at Pitt, if they enter the program having studied a commonly taught language as an undergraduate.

Center for Latin American Studies

Contact Information

University of Pittsburgh
University Center for International Studies
Center for Latin American Studies

bravo@pitt.edu
www.ucis.pitt.edu/clas

The Center for Latin American Studies (CLAS), established in 1964, is internationally recognized for excellence in undergraduate, graduate, and professional education. In 1979 the U.S. Department of Education designated CLAS as a comprehensive National Resource Center (NRC) on Latin America—a distinction it has retained continuously to the present.

CLAS' programs cover the entire Latin American and Caribbean region. Two academic programs are especially noteworthy: The Latin American Archaeology Program, housed in the Department of Anthropology, involves research, training, and publications and emphasizes collaboration between North American and Latin American archaeologists. Fellowships and a bilingual publication series (funded by the Howard Heinz Endowment and The Andrew W. Mellon Foundation) further enhance this exceptional program. The Latin American Social and Public Policy Program draws on the impressive array of faculty and student expertise on Latin American policy issues available at the University of Pittsburgh. The program brings together researchers from different fields with the goal of contributing information of relevance to policy decisions facing Latin America. Social and Public Policy Fellowships are annually awarded to scholars interested in studying various dimensions of social policy at the University of Pittsburgh. The Latin American Social and Public Policy Graduate Certificate is available to students in this more specialized program.
Applications to the Center for Latin American Studies may be submitted either at the same time as applications to the University or after the student has been admitted. In either case, the center cannot accept students until they have received notification of admission to the University.

**Latin American Library Collection**

http://www.library.pitt.edu/eduardo-lozano-latin-american-collection

One of the major resources on Latin America available to students at the University of Pittsburgh is the Eduardo Lozano Latin American Library Collection. Its resources include exceptional collections on Bolivia and Cuba as well as extensive holdings on Argentina, Brazil, Ecuador, Guatemala, Mexico, Peru, and Venezuela.

**Financial Assistance**

Latin American Studies offers a variety of financial assistance to students in its certificate programs. Please visit http://www.ucis.pitt.edu/clas/grad_funding for further details.

**Requirements for Certificates**

CLAS offers two graduate certificates: the Certificate in Latin American Studies and the Certificate in Latin American Social and Public Policy. Requirements for each are detailed below.

**Graduate Certificate in Latin American Studies**

To fulfill the requirements for this certificate, students must complete six Latin American area studies courses: two courses in the student's major department or school and four courses in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language of the area and to submit a research paper as detailed below.

**Graduate Certificate in Latin American Social and Public Policy**
To fulfill the requirements for this certificate, students must complete six courses focusing on social and public policy issues of Latin America: three courses should be in the student's major department or school and three courses should be in at least two departments/schools other than that in which the student is receiving the advanced degree. The courses should total 18 credits. In addition, students are required to be proficient in a language in their area and to present a research paper as detailed below.

**Language Proficiency**

The certificates in CLAS require three years, or the equivalent, of college-level Spanish, Portuguese, or an Amerindian language of the area. Students must have adequate proficiency to converse and conduct research in Latin America. A standardized examination is given to each candidate by a faculty member of the Department of Hispanic Languages and Literatures.

**Interdisciplinary Research Paper**

Students in CLAS certificate programs must complete a research paper on Latin America that reflects competence in at least two disciplines. The master's thesis or a revised research paper may be used to fulfill this requirement.

**Center for Russian and Eastern European Studies**

**Contact Information**

Graduate Advisor: Dawn Seckler  
Associate Director  
Center for Russian and Eastern European Studies  
4402 Wesley W. Posvar Hall  
Phone: 412-648-9881  
das200@pitt.edu  
www.ucis.pitt.edu/crees

Established in 1965, the Center for Russian and Eastern European Studies (REES) at the University of Pittsburgh is designated by the U.S. Department of Education for Title VI funding as a National Resource Center.

There are three broad focus areas for the research conducted by faculty and graduate student specialists in the REES program. They are (1) contemporary Russian, East European, and Eurasian cultures, (2) politics, economics, and societies of Russia, Eastern Europe, and Eurasia (3) foreign policy issues as they relate to the REES world area.

The Center for Russian and East European Studies offers graduate certificates in East European Studies, Russian Studies, or Soviet Studies to students who successfully combine second language expertise and multidisciplinary area-focused courses.

**Admission Information**

Application for admission to graduate study is made directly to the academic department or graduate/professional school of the student's choice. The applicant should include a statement requesting admission to the REES certificate program.

To enroll in one of the certificate programs, admitted students should make an appointment with the REES graduate advisor as soon as possible after their arrival at the University.

**Financial Assistance**
The Center for Russian and East European Studies offers several means of financial assistance to students in its certificate program. Please visit www.ucis.pitt.edu/crees/grads.html for further details.

Certificate

Associate Director
Center for Russian and Eastern European Studies
4402 Wesley W. Posvar Hall
Phone: 412-648-9881
das200@pitt.edu
www.ucis.pitt.edu/crees

Requirements for REES Certificates

The requirements for each of the REES graduate certificates are as follows:

- Completion of six approved Russian and Eastern European area studies courses, including four courses from at least two departments other than the student’s home department, for a total of 18 credits.
- Demonstration of language proficiency equivalent to three years of college-level study in a language of the former Soviet Union (plus Mongolia) or Eastern Europe (including Turkish).
- Completion of a research paper of at least 15 pages in length, based substantially on primary sources in one or more languages of the REES world area.
Special Academic Opportunities

Special academic opportunities provide students with ways to augment their education and experience with expanded study programs both on and off campus, in both university and professional settings.

Area of Concentration (subplans) and Minors (plans)

Some graduate programs may include approved areas of concentration or minors. Areas of concentration define and describe the student's training and expertise within the broader discipline. Minors represent significant course work completed in an area related to the student's specialty. A graduate minor offered by the faculty at the Pittsburgh campus is available to any graduate student enrolled in an academic degree program on the campus provided that the school from which the student is graduating recognizes this minor. See the Schools, Departments, and Programs section of this bulletin for available areas of concentration and minors.

Certificate Programs

Students may enrich their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed at the start of the Schools, Departments, and Programs section of this bulletin.

A certificate program at the graduate level is a coherent set of courses and related work in a particular area. Most certificate programs require a minimum of 15 credits, of which 12 credits must be earned at the University of Pittsburgh. The certificate may appear on the transcript as a degree goal and will appear on the final transcript as an awarded certificate.

A student must be formally admitted into a certificate program. The requirements for each certificate vary and students should contact the certificate program director.

Cross-Registration

Carnegie Mellon University, Duquesne University, the Pittsburgh Theological Seminary, Robert Morris University, and the University of Pittsburgh offer graduate students the opportunity for cross-registration in graduate programs in the five institutions in the fall and spring terms. See Cross-Registration in the Registration section of this bulletin for further details.

Two Independent Degree Programs Simultaneously

Students may pursue two independent graduate degrees simultaneously in two different schools within the University (joint degree) or two different departments within the same school (dual degree). Students desiring to enroll in two degree programs must have approval from both program faculties and their respective deans, must be admitted into both programs, and must satisfy the degree requirements of both programs. Students are billed at the tuition rate of the primary academic program. Normally, such students should be enrolled for no more than a total of 15 credits per term.

The same examination, thesis, or dissertation cannot be used to fulfill requirements for two independent degrees, although a maximum of 6 credits of course work may be used in partial fulfillment of the requirements of both degrees. It is the responsibility of the dean or deans, if two schools are involved, to ensure that this regulation is enforced.

Cooperative, Dual-Degree, and Joint-Degree Programs

Dual- and joint-degree programs result in two degrees being awarded. Requirements for these programs include all or most of the requirements of two distinct academic degree programs. These programs may result in a student earning two separate master's degrees, a master's and a first-professional degree, or a master's or first-professional degree and a doctoral degree, but never result in a student earning two separate doctoral
degrees. Dual programs exist within a single school; joint programs exist between two or more schools; cooperative programs are administered by two or more institutions. The same course, examination, or thesis may be used to fulfill requirements only if so specified in the documents formally establishing the joint- or dual-degree program approved by the University.

Students must be admitted to both academic programs offering the dual or joint degrees being sought and must graduate from both degree programs at the same time. Students are advised to see the individual school for other specific requirements that apply.
Course Information

Please note, when searching courses by Catalog Number, an asterisk (*) can be used to return mass results. For instance a Catalog Number search of "1*" can be entered, returning all 1000-level courses.

Admin and Policy Studies

ADMPS 2003 - SEM RESEARCH DESIGN & METHODS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2050 - RACE & RACSM IN EDUC & SOCIETY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on issues of equity in education based upon the divisions of American society by social constructs of race. The course is designed to expose students to conceptual frameworks of culture, society, race, class and gender from the social sciences and humanities for understanding the experiences of subordinated minority groups in school and society. The practical problems of social and school reform in American communities and schools will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2052 - M. ED INTERNSHIP IN HIGHER ED
Minimum Credits: 3
Maximum Credits: 3
This course is a practicum experience for med in the higher education management. The internship course is unique in that students are required to be working in an institution of higher education while enrolled. An on-site supervisor will provide learning opportunities to students in conjunction with the course instructor, while the instructor will enhance the experience through weekly activities and course assignments. The course is also an opportunity to combine research and practice and to develop the professional skills necessary for a fruitful career in academic or student affairs or management in higher education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2053 - ORGANIZATION AND MANAGEMENT 1
Minimum Credits: 3
Maximum Credits: 3
This is the first of a two course sequence for M.Ed. students in the higher education management specialization. The course explores the relationships between organizational theories and the four essential components of higher education institutions strategy, structure, technology, and culture, and their practical application in complex higher education institutional settings. Heis are examined as evolving social, political, and cultural systems within resource-constrained and performance-driven environments. Contested ideas are explored through multiple perspectives that include public officials, boards of trustees, senior administrators, faculty members, staff, and students. Attention will be given to organizational characteristics that either adapt to a changing external context or may cause impediments. This course is grounded on research-based scholarship and globally-relevant case study examples from Heis in the United States and abroad.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2054 - ORGANIZATION AND MANAGEMENT 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of a two course sequence for MED students in the higher education management specialization. This course explores management theories and practices relevant to higher education, and affords them practical application as seen through the lens of working professionals, first- and second-line supervisors. The course examines management style and practices to help students discern which have a higher probability of succeeding within a postsecondary school environment. Course topics devote special attention to self-management, collaborative processes, academic and
student support services, and human resource and financial management practices. Students will become acquainted with basic functions relating to hiring, motivating, training and promoting staff, while developing capabilities to design measurable performance objectives and evaluate staff on that basis. Basic employment and labor law and related regulatory compliance issues will receive coverage. In addition, the course will explore the role of supervisors in budget creation and resource management within a broader functional and institutional context.

**ADMPS 2055 - STUDENT DEVELOPMENT THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides foundational knowledge about the nature and history of student development theory, focusing on both a solid overview of theory and the application of theory in the design of effective practice in academic and student services contexts. This course also explores developmental issues facing college students as well as factors that promote and impede development. An understanding of student development theory is integral to working in higher education and this course is designed for students pursuing both scholarly and practitioner focused careers.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMPS 2056 - STUDENT SERVICES PRG ASSMNT**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces the subject of assessment and program evaluation in colleges and universities. Issues related to assessment theory, assessment and evaluation models and methodologies, as well as the political and social contexts of assessment are explored. Students complete a hands-on assessment project from start to finish as a part of the course. Students need to have completed student development theory or an equivalent course prior to enrolling in this course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMPS 2080 - SPECIAL TOPICS**

Minimum Credits: 1  
Maximum Credits: 5  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade

**ADMPS 2086 - CURRICULUM IN SCHOOLS**

Minimum Credits: 5  
Maximum Credits: 5  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ADMPS 2089 - SPECIAL TOPICS**

Minimum Credits: 1  
Maximum Credits: 3  
This course is for administrative and policy studies newly instituted and experimental courses.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**ADMPS 2090 - RESEARCH SEMINAR**

Minimum Credits: 3  
Maximum Credits: 3  
Final seminar for candidates for the master of education degree in which each student prepares an original research paper.

**Academic Career:** GRAD
ADMPS 2091 - HIGHER EDUCATN MASTERS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
A capstone research seminar required for students seeking the master's degree in higher education.

ADMPS 2092 - K-12 PRINCIPALS CERT INTRNSHIP
Minimum Credits: 1
Maximum Credits: 3
Students, in collaboration with a faculty member, design a 180 hour clinical experience. The experience reflects areas of interest/need identified collaboratively by the student and the professor. It may take place in the student's home district or another district. Projects will be supervised by an onsite administrator and a university faculty member or designee.

ADMPS 2093 - SUPERVISOR CURR &INSTRUC INSHP
Minimum Credits: 1
Maximum Credits: 3
The practicum reviews the field based clinical experience of curriculum and instruction students for state certification.

ADMPS 2094 - RES PROCESSES SCHOOL LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
School leadership students frame a topic of interest related to school leadership, conduct a thorough review of literature on that topic, write the results in publishable format, and offer a synopsis through professional presentations. Additionally students learn about and consider a variety of approaches and techniques to disciplined inquiry in education and school leadership.

ADMPS 2096 - DUAL CERTIFICATE INTERNSHIP
Minimum Credits: 1
Maximum Credits: 3
The internship in supervision provides an examined work experience in the field resembling as closely as possible the kind of professional activities the student may perform as a certified supervisor of curriculum and instruction. Each intern designs an internship field experience with the university faculty internship instructor that includes at least eight (8) hours per week of practical field based experience at a faculty approved site with designated onsite supervision.

ADMPS 2097 - INTERNSHIP
Minimum Credits: 1
Maximum Credits: 12
Each candidate for an educational leadership certification in pa is linked with schools/ for 360 hours of university supervised and principal-mentored internship/fieldwork experiences over the 12-month lifecycle of the school. Mentors are from various geographical locations at all levels; elementary, middle, and secondary. Candidates register for one credit of internship for each of the four consecutive terms of the k-12 principal program.
Course Component: Internship
Grade Component: Grad SN Basis

ADMPS 2098 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
Study approved and directed by an academic advisor.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ADMPS 2099 - GUIDANC IN THE MASTER'S DEGREE
Minimum Credits: 1
Maximum Credits: 6
A registration unit for students preparing a master's overview and thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ADMPS 2101 - PENNSYLVANIA SCHOOL LAW
Minimum Credits: 3
Maximum Credits: 3
The principal is the educational leader in the school building. As such, the principal is responsible for maintaining an enterprise that fulfills the legal requirements of the Pennsylvania school code of 1949 (amended) and the attendant case law as interpreted by the state and federal courts. In this course, the aspiring principal will learn about local school boards, the organization and governance of education in Pennsylvania, the role of the federal government, and a variety of the legal responsibilities of the building administrators.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2102 - SCHOOL LAW FOR TEACHERS
Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth study of the legal rights and responsibilities of the classroom teacher, and examines such legal concepts as negligence, teacher suspension, teacher dismissal, and freedom of speech.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2104 - LAT AM SOCIAL & PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, gonadal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand how social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 2105 - LEADERSHIP FOR CHANGE
This course explores different strategies for bringing about school improvement and classroom change. Students learn to consider the multiple factors that shape efforts to bring about change in schools, including school culture and climate, school and teacher capacity, and school-community relationships. Special attention is given to the school leader's role in building organizational capacity to change.

ADMPS 2106 - INTERNATIONAL & GLOBAL EDUCATN

Minimum Credits: 3
Maximum Credits: 3
The course introduces different perspectives of the world as well as various conceptions of global development. Students consider these issues in examining how formal and non-formal education programs, as well as the media, contribute to developing individual's views of and engagement in local, national, international, and global communities.

ADMPS 2107 - LDRSHIP SCHOOL ORGANIZTN & MGT

Minimum Credits: 3
Maximum Credits: 3
A supportive school environment serves as catalyst for good teaching & successful learning. Manner in which school uses time, space, & other resources influences organizational dynamics of schools as well as teaching & learning in important ways. Examines operational factors that influence school's climate. Students learn organizational dynamics, working with people connected to organization, and processes to expand organizational capacity in areas as scheduling, budgeting, engaging stakeholders in decision-making, facilities, & procedures to guide daily operation of the school.

ADMPS 2109 - LEADERSHIP FOR CURR & INSTRUCTN

Minimum Credits: 3
Maximum Credits: 3
This course starts by examining cognitive theories of learning, with a particular focus on literacy and mathematics. It then discusses the implications of these theories for high quality classroom instruction and the school leadership necessary to support and sustain such instruction. The course further addresses the relationship and importance of coherence among curriculum, instruction, and assessment.

ADMPS 2111 - MONITORING STDNT DVLP & ASSMNT

Minimum Credits: 3
Maximum Credits: 3
Increasingly, research and reform experience has documented the benefits of using data on student learning & achievement as a basis for educational decision-making & school improvement. Focuses on developing skills to collect & analyze different forms of data & cultivating knowledge of collaborative inquiry processes for using that data to inform & motivate school change. Special attention to drawing on classroom assessments for decision-making. Investigate best practices in classroom assessment practices & strategies for matching assessment to students' developmental levels.

ADMPS 2112 - CREATNG POSTV RLTNS LRNG COMNY

Minimum Credits: 3
Maximum Credits: 3
The major focus will be on enhancing the student's awareness of self through the dynamics of the group experience and developing understanding of communication and leadership style. The course will also look at issues in intergroup relations and team building.
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2114 - DISABILITY LAW AND SOCIETY
Minimum Credits: 3
Maximum Credits: 3
Course provides in-depth study of the legal rights of persons with disabilities based on three federal statutes: individuals with disabilities education act (idea); rehabilitation act of 1973 (section 504); & Americans with disabilities act of 1990 (ADA). Focusing upon topics as discrimination in employment, public accommodations, & access to tele communication, course should be helpful to administrators, teachers, social workers, rehabilitation counselors, occupational & physical therapists, nurses & other professionals. Meets the school law requirement for state certification.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2115 - SUPERVISION & TEACHER LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course focuses on skills and strategies school leaders need to know to supervise teachers and develop structures for on-going teacher learning and development. Students study the history of supervision and how it continues to evolve. They analyze their own district's induction and professional development plans and design supervision models appropriate for a differentiated teaching staff.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2117 - DIFFRNTIAD INSTRNL PRACTICES
Minimum Credits: 3
Maximum Credits: 3
This course is designed to give practitioners a strong theoretical background in differentiated modes of instruction and the skills needed to work with teachers as they strive to improve and expand their pedagogy. Discussions and readings will explore classroom strategies that improve student achievement, the elements of effective instruction, instructional design related to state standards, and ways to use assessment to drive instruction. Finally, the course will discuss ways that school leaders can work with teachers to enhance their instruction and student learning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2120 - CPSTN SEM IN STUDENT SERVICES
Minimum Credits: 3
Maximum Credits: 3
Students will learn about the knowledge & skills required of a college or University student services administrator. It is assumed students will have administrative responsibility in future aspect of student services. Responsibilities may include development of vision & mission statement, designing organizational structure & budget. Focus on strategies to effectively manage & administer student services of diverse college & University campuses. Explore how organizational theory can be applied to improve policy making, personnel mgt, resource allocation & organization of administrative units.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 2122 - SEM IN POST-SECONDARY COUNSLNG
Minimum Credits: 3
Maximum Credits: 3
This course includes an overview of the history of post-secondary education with particular focus on the student personnel function at this level and the role of the counselor in post-secondary education. Developmental models for direct service, program development, and consultation are reviewed and applied to case material and prototypical programs.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 2123 - SUMMER LEADERSHIP INSTITUTE
Minimum Credits: 3
Maximum Credits: 3
Students learn to diagnose adaptive leadership challenges while developing a foundation of individual and group communication skills and a disciplined practice of reflection. The leadership institute will offer a coherent experience of teaching and learning about and for leadership supported by an approach to adult development as meaning-making (Kegan, 1994). The institute develops skills in: team building, problem framing analysis, group process skills, interpersonal skills, communication skills, writing (annotated bibliography, art of critique), shared decision-making, multicultural education/diversity (awareness of diversity, classroom interactions, and diversity in schools), school culture, and reflective practice.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 2128 - LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership and provide students with feedback on their own leadership styles. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Students learn how to explore concepts regarding leadership, teams and organization culture; assess their own leadership skills and style; receive feedback from colleagues on their style and behavior; and plan for their own leadership development.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2131 - HIGHER EDUCATION ADMINISTRATION
Minimum Credits: 3
Maximum Credits: 3
This course addresses major organizational theories and how they relate to higher education institutions. Students will develop conceptual frameworks that can be utilized as a generic base for the practice of administration and as a diagnostic tool that will assist in identifying organizational problems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2133 - GENDER AND EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This seminar examines the role that gender plays in the lives as students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in k-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment, gender and the educational professions; feminist and ant- bias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2201 - INFORMATION TECHNOLOGIES EDUCATIONAL LEADERS
Minimum Credits: 3
Maximum Credits: 3
This course provides opportunities to explore the policies and practices necessary to integrate technology in the support of teaching, learning, and administrative decision-making. Course explores the nature of the changing world of education, technology planning and policy development, and emerging issues related to technology use. Course includes face to face and on-line classes to explore common interests and resources, and builds on individual project work. It builds on basic computer literacy skills and assumes proficiency in Microsoft office products and use of the internet.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 2202 - LANGUAGE POLICIES & EDUCATIONAL MINORITIES
Minimum Credits: 3
Maximum Credits: 3
This course examines the basic problems and principles of language policies in general and language planning and implementation specifically in the education of linguistic minorities. The nature and effectiveness of education, including bilingual education programs, experienced by linguistic
minorities are considered as are the societal forces that impact and interact with the various forms of institutionalization.

AdmPS 2203 - SEM POST-SECONDARY COUNSELING
Minimum Credits: 3
Maximum Credits: 3
An overview of the history of post-secondary education with particular focus on the student personnel function at this level. Developmental models for direct service program development, and consultation are reviewed and applied to case materials and prototypical programs.

AdmPS 2302 - STATE/NATIONAL POLITICS OF EDUC
Minimum Credits: 3
Maximum Credits: 3
Students in this course analyze the broad national and international political issues relating to schooling and school systems. School politics are viewed from a variety of social science perspectives using a number of case studies and theoretical texts. An examination will be made of the dialectical relations between the state and the school in an effort to illuminate social, economic, and cultural reproduction.

AdmPS 2305 - SOCIOLOGY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This course surveys the classic and contemporary literature on schools and socialization. The relevance of sociological theory and research to education policy debate is also highlighted. Students will increase their understanding of the forces shaping learning and development that are beyond the classroom and are embedded in the larger social context.

AdmPS 2306 - HISTORY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Both a chronological order and a thematic/conceptual investigation will constitute the structure of this course. The literature on past and contemporary historical developments will be compared. Emphasis will be placed on the ideas that prevailed in different time periods. Students will examine the conflicting organizational arrangements, competing theories, and growing external pressures on education.

AdmPS 2307 - POLITICS & HISTORY OF HIGHED ED
Minimum Credits: 3
Maximum Credits: 3
This course surveys the perennial forces which have shaped the character of America's colleges and universities. In situational control and governance. Curricular goals and organization, and faculty and student life are examined against the background of political, economic, religious, social and intellectual developments in American culture.

AdmPS 2310 - CNTMPRY PHILOSOPHY OF EDUC
Minimum Credits: 3
Maximum Credits: 3
Examines how philosophies of education can contribute to one's vision of educative experience. Central educational concepts (e.g., Knowing,
learning, thinking, valuing, and being) are analyzed in alternative ways.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

ADMPS 2312 - THE SUPREME COURT & EDUCATION

**Minimum Credits:** 3  
**Maximum Credits:** 3
Assesses the extent to which supreme court decisions and their accompanying opinions have shaped educational and social policy in the United States. Policy, in this sense, means the authoritative decisions which the court has made in questions related to church/state issues, desegregation, and academic freedom, the civil rights of students and teachers, and equality of educational opportunity. Attention will be given to the flow of social history in order to identify the possible influences on the court's rationale. Some views on the development of legal philosophy will be considered.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

ADMPS 2342 - EDUCATION AND CULTURE

**Minimum Credits:** 3  
**Maximum Credits:** 3
The active experiences in the course are intended to challenge students to investigate and analyze the dynamic relationship between schooling, education, popular culture and society by addressing the normalizing effects of cultural narratives and images that influence our taken-for-granted assumptions, beliefs and actions. Class activities involve considering the moral, social and political dimensions of our educational practice by expanding our sense of what happens outside of schools and classrooms that contribute to shaping our worldviews. We work to better understand the dynamics of culture and the relationships among culture, history, power, language and knowledge. Thus we are challenged to become informed and invigorated professionals that can help reverse the patterns of dehumanization and social control that are often overlooked in the everyday world of practice.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

ADMPS 2344 - LEADERSHIP IN SERVICE LEARNING

**Minimum Credits:** 3  
**Maximum Credits:** 3
This seminar offers participants opportunities to engage and lead with their heads, hearts, and hands. Course modules introduce such critical issues as the ethics and philosophies of experiential modules on cross-cultural understanding geared to the proposed service-site. Students play active leadership roles in shaping and facilitating the seminar.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

ADMPS 2352 - ANTHROPOLOGY OF EDUCATION

**Minimum Credits:** 3  
**Maximum Credits:** 3
This introductory course provides an overview of anthropological approaches to the study of education. Ethnographic cases drawn from many cultures, knowledge systems, and time periods help to provide a broad, holistic view of education in diverse community and institutional contexts. Modules may include: nurturing a sense of place; comparing folk, popular, and elite cultures; understanding cultural continuity and change; celebrating rituals and holidays; fostering cultural resilience and responsive reform policies; framing multicultural education; and appreciating the sociolinguistics of schools and home. Students have opportunities to participate in authentic schooling activities, to draft public advocacy pieces, to create team presentations, and to refine a personalized synthesis of a topic of interest. Anthropological field research methods are discussed as a means to craft compelling analytical accounts, but research training is not part of this course.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

ADMPS 2353 - APPLIED ANTHROPOLOGY OF EDUC

**Minimum Credits:** 3  
**Maximum Credits:** 3
This advanced seminar explores practical applications of anthropology to educational programs in varied cultural settings around the world. Topics may include: theories of development and social change, the role of schooling in cultural continuity and change, globalization and transnational
influences on curriculum and policy; public advocacy and scholarship; school reform and social inequities. Authentic professional activities and meaningful case studies help students to see themselves in the field. Demonstrations of professional skills such as constructive criticism, teamwork, meeting methodological challenges, and critical analysis of texts help students to enhance their academic cv and engaged scholarship portfolio.

ADMPS 2398 - ECONOMICS OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This class introduces students to the economic analysis of education in the U.S. And developing countries. Among the topics to be covered are: human capital theory, educational production functions. Rate of return analysis, various issues in educational policy and finance
ADMPS 2399 - POLITICAL ECONOMY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
In this class students will continue (from economics of education”) to develop techniques for economic analysis. The subject is placed in a broader intellectual and political context. Particular attention is given to critique of neoclassical economic analysis, to alternative frameworks for economic analysis, including class-conflict and institutional approaches and the applications of economic analysis in the educational policy process. The course covers issues in industrialized and developing countries."

ADMPS 2402 - HEALTH, MENTAL HEALTH & SAFETY
Minimum Credits: 2
Maximum Credits: 2
Within the leader as learner block in leadership initiative for transforming schools (lifts), a k-12 principal certificate program, the health, mental health, and safety module will focus on creating the optimal conditions for teaching and learning. Aspiring school leaders will gain the knowledge and skills needed to conduct a school-wide mental health and safety audit. In addition, they will learn about implementing a crisis management plan and the role and responsibilities of a crisis management team.

ADMPS 2403 - TEACHER SUPERVISION & EFFECTIVENESS
Minimum Credits: 2
Maximum Credits: 2
The course is designed to give practitioners a strong theoretical background in supervision and the knowledge and skills necessary to work with teachers as they strive to improve and expand their pedagogy. Students will learn about various theories and models of supervision and will apply them to the current school setting with an emphasis on improving student learning. The course is designed as a project-based learning experience.

ADMPS 2404 - INSTRUCTIONAL LEADERSHIP

**ADMPS 3004 - APS DOCTORAL CORE 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the second of a required two-course sequence during which students focus on institutional, state and sector-based policy analysis, team building and communications skills. The course builds upon the professional goals set forth in core 1, while sustaining its reflective individual and study group components. Students read extensively about current and complex p-20 educational reform efforts from different points of view. Students will apply analytical tools, and communicate their findings external audiences such as elected officials. In addition, students form cross-sector research teams to address problems and construct solutions for contemporary challenges facing education at all levels. This course concludes with a comprehensive portfolio review and preliminary examination which are requisite for continuation in our doctoral programs.

Grade Component: Grad LG/SU3 Basis

ADMPS 3090 - DISSERTATION RESEARCH SEMINAR
Minimum Credits: 3
Maximum Credits: 3
A seminar for doctoral students developing research prior to the preparation of a dissertation overview.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ADMPS 3091 - RES EDUCATIONAL ADMINSTRTN 1
Minimum Credits: 3
Maximum Credits: 3
A registration unit for students working with an academic advisor to fulfill their doctoral supervised research requirement.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

ADMPS 3092 - HIGHER EDUCATION INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
An internship in administration in higher education.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

ADMPS 3093 - INTSHP IN CENTRAL OFFICE ADMIN
Minimum Credits: 1
Maximum Credits: 3
Provides an opportunity for the student to gain practical experience and demonstrate the knowledge, skills, and competencies obtained during the process of the training program in educational administration. It also furnishes the context of reality within which the student may acquire additional knowledge skills, and competencies as theory translated in the working world of the school system.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis

ADMPS 3096 - SUPV RES EDUC ADMINSTRTN 2
The concept of supervised research refers to the processes of working with an academic advisor to fulfill the requirements for doctoral level supervised research. This course is designed as the second course experience for doctoral students to prepare for the overview exam. As such, the course builds on the first supervised research experience which emphasizes the preparation of the conceptual framework for the dissertation. Students are expected to design & implement a pilot study related to the proposed dissertation & complete the methodology section of the overview document.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

### ADMPS 3097 - SUPERVISED RESEARCH
- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
  Doctoral study initiated by the student with advisor's approval and related to the student's program of study.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

### ADMPS 3098 - DIRECTED STUDY
- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
  Doctoral study approved and directed by an academic advisor.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### ADMPS 3099 - GUIDANC IN THE DOCTORAL DEGREE
- **Minimum Credits:** 1  
- **Maximum Credits:** 18  
  A registration unit for students preparing a doctoral dissertation or dissertation overview.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

### ADMPS 3101 - COMPETENT MGMT FISCAL RESORCS
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  This is a required course for all students in administrative studies which reviews and analyzes major issues and the means for managing institutional resources in education. Emphasis is placed on fiscal, human, and physical resources in both basic and higher education.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### ADMPS 3104 - HIGHR ED INSTITNL STRATGC PLN
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  This course will provide a framework for the development of an integrated institutional strategic plan. It will examine the emergence of higher education planning, the development of preplanning activities, situational analysis, and the establishment of a planning process for the preparation of institutional and department plans.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### ADMPS 3106 - STRATEGIC PLANNING EVALUATION
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
  This course will focus on a variety of planning issues and evaluation processes in basic educational organizations. School leadership expectations regarding institutional, program and personnel planning and evaluation tasks will be addressed.
ADMPS 3107 - LEADERSHIP IN ORGNIZTNL RENEWAL
Minimum Credits: 3
Maximum Credits: 3
This course focuses on how to improve and renew educational organizations through development of the leadership team, the staff, students and community. Concepts related to transformation leadership will be developed such as the culture of the school and school climate perspectives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3109 - STRATEGIC MANAGEMENT IN EDUC
Minimum Credits: 3
Maximum Credits: 3
Focuses on internal institutional management with an emphasis on computer applications in context. Topics include: planning models, decision support, financial, political and cultural considerations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3114 - COMPETENT MGT STDNT PSNL SVCS
Minimum Credits: 3
Maximum Credits: 3
Schools have a responsibility for students' health and safety while they are at school. Students who successfully complete this course will demonstrate their knowledge of research-based approaches to apply in accordance with Pennsylvania law in the areas of health, mental health, safety, and crisis management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU Elective Basis

ADMPS 3115 - STRATEGIC THINKING
Minimum Credits: 2
Maximum Credits: 2
Strategic thinking is about foresight, proactivity and innovations designed to anticipate and prepare for unanticipated problems and an unfolding future. A major aspect of this experience will focus on the acquisition, support and development of human talent in both policy and practice. The talent management portion of the course includes personnel recruitment and selection, compensation and benefits, and disciplinary policies and practices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3116 - COMPETENT MANAGEMENT OF HR
Minimum Credits: 3
Maximum Credits: 3
This course presents a review of organization theories as they apply to schools and universities. Topics include organizational typologies, competing models of organizational structure, organization-environment linkages, and the evaluation of organizational effectiveness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: LG/SU Elective Basis

ADMPS 3118 - CONFLICT MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course reviews theory and research on organizational and interpersonal conflict. Practical assessment of personal, organizational, and political conflict are applied to educational organizations. Strategies for coping and support systems for administrators are discussed.
Academic Career: GRAD
ADMPS 3127 - CURR: PERSPCTVS & ISSS (K-12)
Minimum Credits: 3
Maximum Credits: 3
The course draws on current content in the field of curriculum studies. Contemporary approaches to development and research draw on increasingly diverse disciplinary perspectives and diverse methods of inquiry. Curriculum perspectives and issues are central to the often contentious educational discourses in the public arena as well as in the academy as curriculum decisions are being made related to policy, practice and research, informed points of view are crucial to those engaged in such work. This course is intended to capture some of the contentious local, national and international discourses for which the curriculum field is known and, in particular, how these discourses influence curriculum policy and practice toward intended and unintended consequences.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3128 - HIGHER EDUC BUDGET MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the sources of revenues available to colleges and universities and various methods for allocating these funds to academic and administrative functions. Specific attention will be given to topics of fund accounting, sources of revenue, the budget process, fiscal controls and monitoring.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3129 - HIGHER EDUC HUMAN RESOURCE MGT
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the development of human resource systems that facilitate the conduct of activities in colleges and universities through the effective and efficient utilization of faculty and staff. It will include such topics as human resource strategic planning, position control and monitoring systems, recruitment and selection procedures, evaluation procedures, development and training, incentive systems, salary administration, and fringe benefits administration. Various human resource policies and practices will be explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3130 - HIGHER EDUC PROGRAM MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with faculty and staff within an academic institution. It focuses on how faculty should be managed in order to achieve optimal organization performance. Specific topics addressed include: organizational theory, institutional goals, faculty and staff responsibilities and workload, research curriculum and academic organization. Special attention is also given to faculty and administrative evaluation and development. Group discussion and case studies are the principal instructional formats utilized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3131 - STUDENT, CAMPUS, AND SOCIETY
Minimum Credits: 3
Maximum Credits: 3
A seminar focusing on current research dealing with the impact of campus environments, experiences on and off campus, and family background on achievement, values, personal development, and life goals of students in higher education.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMPS 3135 - SEMINAR IN COLLEGE TEACHING
The course is intended to provide a practicum-like experience for graduate students in the professions and disciplines who are teaching or expect to teach in higher education. Challenging topics include: analyzing and critiquing current syllabuses of class members; structuring the curriculum; teaching for understanding; process and content; teaching and learning in groups; becoming a dialogic classroom; encountering and responding to contentious discussion; and evaluating learning. Although topics will be considered conceptually through readings, the primary curriculum will develop as members of the class present specific issues from their emergent work. Participants will have the opportunity to explore their beliefs in teaching and learning as they consider a web between themselves, their subject and their students, in order to help their students learn how to weave a world for themselves.

**ADMPs 3136 - Comparative Higher Education**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar focuses on contemporary problems in post-secondary education throughout the world. The seminar will begin with a brief historical introduction, followed by a review of case studies and other documents on higher education in the United States and other countries. Special attention will be given to an examination of comparative and contrasting policies and issues in higher education as they unfold in various developing regions and in the United States.

**ADMPs 3137 - Culture Innov & Orgztn Perf**

Minimum Credits: 3  
Maximum Credits: 3  
Whether leading a department of 50 people or a division of 500, leaders need to understand the concepts, skills and practices that build strong organizational cultures. This course explores the cultural facets of organizational life in universities with special emphasis on improvement opportunities such as values clarification, cultural norms, innovation, process and people integration, key performance indicators, the balanced scorecard and the alignment of human resources systems such as hiring, faculty and staff development, performance management and career development. Students are introduced to a variety of methods used to encourage creative problem solving in teams; diffusion of innovation is explored in depth. Students work in teams with an actual University client to implement a benchmarking project, an important tool in improving organizational performance.

**ADMPs 3139 - Legal Aspects of Higher Educ**

Minimum Credits: 3  
Maximum Credits: 3  
The focus of the course is on federal and state law and higher education in the United States. Although time will be devoted to historical issues pertaining to higher education, most of the time will be devoted to in-depth discussions of contemporary issues. Issues that will be discussed include promotion and tenure, academic freedom, faculty dismissal, sexual harassment, research integrity, campus violence, and student affairs.

**ADMPs 3140 - Project Planning in Highr Educ**

Minimum Credits: 3  
Maximum Credits: 3  
Provides the student with skills for the development of a management plan for projects in the field of higher education. The course is application based and emphasizes the use of the pert planning technique.

**ADMPs 3141 - Policy Studies in Higher Educ**
Minimum Credits: 3
Maximum Credits: 3
After broad consideration of key policy issues in higher education--finance, quality, and access--this course considers organization theories in relation to theories of governance, decision-making processes in various institutions, and policy outcomes of these processes are also considered. American higher education is the major focus, international policy perspectives are included, as well.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3142 - ADV SEMINAR IN HIGHER EDUCATN
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to current developments in the field of education. This course is designed for students who have completed a substantial part of their academic program and is presented in a seminar for mat. The specific topics addressed are changed from term to term to reflect the most current emerging issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3145 - CSE STDS IN POLIT & GOVERNCE
Minimum Credits: 2
Maximum Credits: 2
This course provides an examination of politics and governance at the local, state, and federal levels. Through case studies of strategic importance, the class will examine critical leadership issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3146 - HUMAN RESOURCES 2
Minimum Credits: 3
Maximum Credits: 3
The course focuses on leadership related to Pennsylvania school law collective negotiations and contract management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3147 - SOCIAL DYNAMS & ETHICAL LDRSHIP
Minimum Credits: 1
Maximum Credits: 1
Students explore issues of equity, justice, right and wrong as these are practiced in contemporary America.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3148 - STRUCT & CULT OF COMMUNITIES
Minimum Credits: 2
Maximum Credits: 2
A community's culture is important because it shapes the way that citizens react to events and policies. The way that a leader deals with culture can unite or divide a community. Culturally skilled leaders assess the uniqueness and structure of a community's culture, understand its diversity, manage cultural differences, and recognize cultural knowledge and traditions. A culturally proficient leader effectively interacts with a community's culture in ways that build trust and unity of purpose.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3200 - EDUCATIONAL POLICY PLANNING
Minimum Credits: 3
Maximum Credits: 3
This course is designed to extend participants' knowledge of educational policy, planning, decision-making, and change. Change is conceived as a process of intentional and sustained effort to alter the structures, programs, or impact of school systems and organizations. Different models of planning and policy are further clarified by examining the complexities of implementation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**ADMPS 3201 - INTRO TO EDUCATIONAL EVALUATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Provides a general overview of evaluation, which is defined as providing information useful to decision-making. The various purposes of evaluation are identified, and the use of different types of information for each purpose are discussed. The variables that affect the usefulness of information are emphasized. Both evaluation theory and practical experience are utilized to prepare people who will be fulfilling an evaluation function, or using evaluation results for professional decision making.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**ADMPS 3203 - PROGRAM DOCUMENTATION EDUCATIONAL SYMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Educational systems experience regular cycles of self-reflection and external critique that lead to rounds of reform and programs of improvement. The central goal of program documentation is the construction of an accessible knowledge base about the implementation of a reform program to enable managers to improve the effort as it occurs, and to inform the planning of future initiatives in the system. This course will provide administration and evaluation students with opportunities to learn about the rationale & strategies for documentation that contributes to reform & improvement.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**ADMPS 3205 - DECISION-ORIENTED EDUCATIONAL RESEARCH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Decision-oriented educational research (doer) is a form of inquiry that addresses information needs of education policy makers and administrators. It views organizations as learning communities and explores how doer can contribute to organizational learning and decision making. Case examples are used to highlight how research and evaluation methods are used in educational organizations, and how cultural and structural variables affect them.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**ADMPS 3207 - SECTOR ANALYSIS & PROJECT DESIGN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a reading and discussion seminar in which participants examine selected analytical and technical approaches used by multilateral and bilateral agencies in the design of appropriate policy meant to intervene in school systems around the world. The class will survey a number of examples of sector studies, projects, and project evaluations. Visiting lecturers will contribute experiences from their own international work in this area.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

---

**ADMPS 3208 - CASE STUDY METHODS IN EDUCATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on the use of case study research methods in investigations of educational policy and practice. The limitations and possibilities of different approaches are considered. Knowledge and skills are acquired through field-based projects.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade
ADMPS 3209 - HIGH ED INSTN ASSMNT & ACCRED
Minimum Credits: 3
Maximum Credits: 3
Course addresses processes and criteria used for evaluation and accreditation of post-secondary and higher education in situations and programs. How to identify, obtain, and use meaningful information for organizational decision-making, such as institutional assessment, program evaluation, and benchmarking are investigated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3215 - IMPLEMENTING EDUCATIONAL POLICY
Minimum Credits: 3
Maximum Credits: 3
This course examines the context, processes, and outcomes of efforts to implement educational policies at the local, state/provincial, national, and global levels. Attention is given to different analytical frameworks and various strategies for implementing educational policies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ADMPS 3300 - PROSEM SOCL & COMPARTV ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
The pro-seminar is a one-credit course that should be taken by every student in the program during three semesters in conjunction with the student's supervised research project. Proseminar sessions focus on critical reviews of students' supervised research project proposals and reports. Occasional presentations by faculty or more advanced doctoral students are also scheduled.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ADMPS 3301 - SOCL THEORIES & ED GLBL CTX
Minimum Credits: 3
Maximum Credits: 3
Students will explore a range of social theories that may be helpful in informing how they understand and operate in educational institutions in local, national, and global economic, political, and cultural contexts. By examining and comparing a variety of theories and contexts, students will be encouraged to develop/refine their own theories of a) how and why society and education are organized as they are; b) how and why education and/or society have or have not changed; and c) how and why education and/or society should be changed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ADMPS 3302 - EDUCATION & DEVELOPMENT DEBATS
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces participants to the broad field of international and development education. The seminar considers alternative views about the roles played by education systems in progress and change. Case studies of education policy are related to intended and unintended consequences for national integration, economic growth, the distribution of welfare, and other outcomes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ADMPS 3311 - WAYS OF KNOWING
Minimum Credits: 3
Maximum Credits: 3
In making a distinction between ways of knowing and procedures for knowledge generating, students in this seminar will examine various epistemological, ontological and axiological schools of thought that are the basis for educational inquiry. The focus will include assumptions that form the logics of justification for truth claims embedded in educational research.
Academic Career: GRAD
ADMP 3314 - EDUCATIONAL REFORM
Minimum Credits: 3
Maximum Credits: 3
This course examines the recurrent phenomenon of educational reform in a variety of settings and from a variety of social scientific perspectives. Focus is placed on the analysis of competing explanations of educational reform and the investigation of case studies from a variety of countries and time periods. Emphasis is given to examining whether reform campaigns are structurally similar and whether a general theory of educational reform is possible.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMP 3343 - COMPARATIVE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces participants to the complementary fields of comparative, international, and development education (CIDE). Emphasis is on social justice issues in CIDE and the comparative analysis of policies and practices that constitute the organization, content, processes of education systems and institutions. Selected topics of continuing interest to educational researchers, policy makers, and practitioners are examined in relation to national and global cultural, economic, and political dynamics. Historical and contemporary examples are used to highlight the contributions of and challenges for those involved in CIDE.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ADMP 3347 - INTRNTL ORGANIZATION DEVELP ED
Minimum Credits: 3
Maximum Credits: 3
This seminar reviews policies and practices of key international organizations and actors in the complementary fields of comparative, international, and development education (CIDE) and examines their impact on national and regional educational policies. Multilateral organizations (such as UNESCO, UNICEF, and the World Bank), bilateral organizations, nongovernmental organizations, faith-based organizations, community-based organizations, and regional agencies (e.g., the inter-American development bank, the Asian development bank, and the European union) will be among the organizations and actors studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

Anatomy-Histology

ANAHS 2010 - HUMAN DEV STRUC AND FUNCT 1
Minimum Credits: 4
Maximum Credits: 4
This course surveys morphological and functional aspects of human biology from conception to death.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2011 - HUMAN DEV STRUC AND FUNCT 2
Minimum Credits: 4
Maximum Credits: 4
This course surveys morphological and functional aspects of human biology from conception to death. This course is a continuation of ANAHS 2010.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
ANAHS 2012 - HUMAN DEV STRUC AND FUNCTION 3
Minimum Credits: 1
Maximum Credits: 1
This course surveys morphological and functional aspects of human biology from conception to death. This course is a continuation of ANAHS 2010.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2020 - MAMMALIAN PHYSIOLOGY
Minimum Credits: 4
Maximum Credits: 4
In mammalian physiology, all of the more critical human physiological systems will be considered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2030 - CRANIOFAACL DEVELPMNT & GROWTH
Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to extend a student's understanding of the formation and maturation of the craniofacial complex, through lecture, assigned reading from both text and primary research sources, and the preparation of a term paper, the student is encouraged to examine some of the underlying principles, leading hypotheses, and controversial viewpoints current in the field.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

ANAHS 2040 - CONNECTIVE TISSUE BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
The cellular and extracellular components of the connective tissues are examined, using review articles and current journal articles as reference and springboards for discussion. Topics with particular relevance to the structure and function of the oral cavity are emphasized. Students are required to select articles to be included in the course, utilizing Medline, dental abstracts, current contents, etc. The students are evaluated on the appropriateness of the articles selected, presentation of paper, level of understanding exhibited and quality of their participation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2050 - DEVELOPMENTAL PHYSIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course provides a developmental and physiological basis for interpreting normal and abnormal functional processes and their implications for managing perinatal, neonatal, and pediatric patient. The course presents an overview of human development and of physiology along with a clinical view of a variety of per- and post natal dysfunctional conditions, then exploring developing and immature body systems to understand how and why dysfunctions appear.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2055 - REVIEW OF ANATOMY
Minimum Credits: 3
Maximum Credits: 3
This is the human anatomy course which is presented in the first year curriculum of the school of dental medicine.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
ANAHS 2070 - OSTEOLOGY OF THE HEAD AND NECK
Minimum Credits: 2
Maximum Credits: 2
Anatomy 2070 consists of a survey of osteology of the head and neck. It covers basic biochemistry, histology, embryology and gross anatomy. There is in depth examination of growth and development. Clinical correlation is presented by examination of pathological disorders and growth disturbances. Radiology of the head and neck, examination and management of temporomandibular joint disorders, review of cleft lip and palate are presented. Guest lectures, use of appropriate monographs and references and discussion of theoretical and applied anatomy are employed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2080 - SOFT TISSUE ANATOMY HEAD & NECK
Minimum Credits: 2
Maximum Credits: 2
Anatomy 2080 is anatomy of the head and neck with emphasis on clinical correlations and clinical anatomy. Topics covering pathology surgery and developmental problems of the head and neck are researched and presented by students. Through this approach the entire head and neck are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2090 - SURGICAL ANATOMY
Minimum Credits: 1
Maximum Credits: 3
This course emphasizes the anatomical relationships, starting from superficial landmarks and progressing to deep structures, encountered in surgical procedures of the head and neck. Included are the location of incision sites (with consideration of post-surgical appearance), the location of nerves, a study of collateral circulation, and a study of the potential spread, and treatment of, infections of dental origin. Last, but not least, is a general review of head and neck anatomy with clinical applications.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

ANAHS 2111 - HEAD AND NECK DISSECTION
Minimum Credits: 4
Maximum Credits: 4
This course is a guided head and neck dissection course in which the student has a chance to dissect those structures which are important to dental students. Emphasis is placed on the following: face; neck; temporal and infratemporal fossae; temporomandibular joint; nasal cavity and paranasal sinuses; pharynx and soft palate; pterygopalatine fossa; cranial cavity after brain removal; and the orbit.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

ANAHS 2120 - ORAL HISTOLOGY
Minimum Credits: 2
Maximum Credits: 2
This is a course for graduate students and dental residents who already have a basic knowledge of oral histology. Modern methods of histological analysis as well as the development and structure of dental hard tissues are discussed. Current topics in the histological literature related to these tissues are reviewed in class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2140 - CLINICAL ANATOMY HEAD AND NECK
Minimum Credits: 1
Maximum Credits: 1
This is a brief lecture course in which a review of the anatomy of the head and neck is presented. In addition to a general review of anatomy, emphasis is placed upon the following: growth and development of the head and neck; anatomy of the skull and larynx; tongue and floor of the mouth; cranial nerves; collateral circulation; fascial spaces; lymphatics; and the spread of infection; and the anatomical basis of emergency procedures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2211 - GRAD HEAD & NECK ANATOMY REVIEW
Minimum Credits: 2
Maximum Credits: 2
This is a brief lecture course in which a review of the anatomy of the head and neck is presented. In addition to a general review of anatomy, emphasis is placed upon the following: anatomy of the skull; muscles of mastication and the TMJ; soft palate, pharynx and larynx; tongue and floor of the mouth; cranial nerves; collateral circulation; fascial spaces, lymphatics, and the spread of infection; and the anatomical basis of emergency procedures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

ANAHS 2213 - ADVANCED HEAD AND NECK ANATOMY
Minimum Credits: 4
Maximum Credits: 4
This is a dissection and seminar course which emphasizes the anatomical relationships, starting from superficial landmarks and progressing to deep structures, encountered in clinical procedures involving the head and neck. In addition to a general review of head and anatomy, it includes anatomy related to the following: local anesthesia, denture construction, dental emergencies, the location of nerves and blood vessels, collateral circulation, surgical procedures (e.g. Incision sites), the TMJ, and the potential spread and treatment of infections of dental origin.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ANAHS 2214 - ADVANCED HEAD AND NECK ANATOMY 1
Minimum Credits: 1
Maximum Credits: 1
This is a seminar and demonstration course of advanced human head and neck anatomy. The course emphasizes the clinical relevance of the osteology and skeletal muscle relationships to dental diseases and their treatment. The course is offered to post-DMD students pursuing their specialty training in orthodontics, endodontics, periodontics and prosthodontics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2215 - ADVANCED HEAD AND NECK ANATOMY 2
Minimum Credits: 2
Maximum Credits: 2
This is a seminar and demonstration course of advanced human head and neck anatomy. This course emphasizes the clinical relevance of the vascular and nerve supply to the head and neck as they relate to local anesthesia, prosthetics, dental and medical emergencies, TMJ and oral infections.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 2216 - ADVANCED HEAD AND NECK ANATOMY LAB
Minimum Credits: 0
Maximum Credits: 0
This course serves as the laboratory component of ANAHS 2213; serves to augment the information provided in the course advanced head and neck anatomy.
Academic Career: GRAD
Course Component: Practicum
Grade Component: No Grade Required

ANAHS 2281 - ORAL HISTOLOGY
Minimum Credits: 1
Maximum Credits: 1
This course presents fundamentals of the microscopic features of dental and oral cells and tissues and serves as a basis for understanding advanced concepts.
ANAHS 2282 - OSTEOMETRY OF THE SKULL
Minimum Credits: 2
Maximum Credits: 2
The course covers an in-depth study of the osteometry of the intact skull, disarticulated bones of the skull, fossae of the skull, popular anthropologic (cephalometric) landmarks, and clinical applications.

ANAHS 3010 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 3
This designation provides credit for the planning, execution, and detailed written account (according to university guidelines) of an approved research project, the work will be evaluated by the student's dissertation committee. It is anticipated that the depth and scope of this original work will exceed significantly the level of that required for a master's degree.

ANAHS 5010 - REVIEW OF ANATOMY
Minimum Credits: 0
Maximum Credits: 0
This is the human anatomy course which is presented in the first year curriculum of the school of dental medicine.

ANAHS 5030 - ANATOMY OF HEAD AND NECK
Minimum Credits: 0
Maximum Credits: 0
This course is designed to reinforce the student's knowledge of anatomy and to foster the application of this knowledge to the routine practice of dentistry. It includes anatomy related to local anesthesia, denture construction, dental emergencies, etc. It is intended to provide the student with an anatomical basis for solving problems in the general practice of dentistry. Course work consists of students participating in seminars, examining prosecutions, and doing limited dissections of selected regions of the head and neck.

ANAHS 5110 - GENERAL HISTOLOGY
Minimum Credits: 4
Maximum Credits: 4
This course initially focuses on the morphological aspects and methodology of cell biology. Morphology and function of the typical cell are considered in detail. Embryological development of the human is followed from fertilization to development of general body form. A brief presentation of the principles of genetics, and induction and differentiation is made. The histogenesis and structure of the four basic tissues is given emphasizing the relationship of structure and function, and potential dental clinical correlations.

ANAHS 5111 - GENERAL HISTOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course initially focuses on the morphological aspects and methodology of cell biology. Morphology and function of the typical cell are considered in detail. Embryological development of the human is followed from fertilization to the development of general body form. A brief
presentation of the principles of genetics, and induction and differentiation is made. The histogenesis and structure of the four basic tissues is given emphasizing the relationship of structure and function, and potential dental clinical correlations.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 5112 - GENERAL HISTOLOGY 2 DIDACTIC/LAB
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of general histology 1. General histology 2 examines the histological structure of the organs and systems of the body. Included are an analysis of the integumentary, hematopoietic, lymphatic, digestive, respiratory, urinary, endocrine, male and female reproductive systems. Wherever possible the histological structure of the organs in each system is related to the biochemical and physiological functions occurring in each organ. Potential dental clinical correlations are stressed where applicable.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 5130 - ORAL HISTOLOGY
Minimum Credits: 3
Maximum Credits: 3
The course begins with a detailed presentation of the development of the face and oral cavity. After postnatal facial growth is considered tooth formation and eruption is analyzed. A study of the development and structure of dentin, enamel, cementum, pulp is followed by consideration of the formation and structure of alveolar bone and the periodontal ligament. The types of oral mucosa are studied with a special emphasis on the gingiva and epithelial attachment. The course ends with histological study of the paroral structures: salivary glands, lip, cheek, tongue, palates, and TMJ.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 5141 - HEAD AND NECK ANATOMY 1
Minimum Credits: 3
Maximum Credits: 3
This is a detailed lecture and laboratory course for first year dental students. The anatomy (which includes blood and nerve supply) of the following is emphasized: the skull; the neck; the face; the muscles of mastication and the TMJ; the infratemporal and pterygopalatine fossae; the nasal cavity and the paranasal sinuses; the soft palate, pharynx, and larynx; and the oral cavity, including the hard palate, tongue, and floor of the mouth. Also extensively covered are collateral circulation, lymphatic drainage, and facial spaces and the spread of infection.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 5142 - HEAD AND NECK ANATOMY 2
Minimum Credits: 3
Maximum Credits: 3
This course is the second part of a detailed lecture and lab course for first year dental students. The anatomy (which includes blood and nerve supply) of the following is emphasized: the skull, the neck, the face; the muscles of mastication and the TMJ; the infratemporal and pterygopalatine fossae; the nasal cavity and the paranasal sinuses; the soft palate, pharynx, and larynx; and the oral cavity; including the hard palate, tongue, and the floor of the mouth. Also extensively covered are collateral circulation, lymphatic drainage, and facial spaces and the spread of infection.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 5147 - ANATOMY PBL SEMINAR
Minimum Credits: 0
Maximum Credits: 0
The overall goal of the PBL seminar is to discuss clinical dental conditions which utilize and build on the concepts and principles that are being studied in the base basic science course. These discussions will emphasize how basic science concepts can be used in solving clinical problems; promote active learning and development of problem-solving skills; and enhance the communication and interpersonal skills of the student.

Academic Career: DMED
Course Component: Seminar
Grade Component: No Grade Required
ANAHS 5150 - NEUROANATOMY
Minimum Credits: 2
Maximum Credits: 2
In addition to a general survey of the development and organization, both structural and functional, of the nervous system, those aspects of this system that are more relevant to dentistry are covered in some detail. These include: the peripheral distribution, nuclei, and central connections of cranial nerves 5, 7, 8, 9, 10, 11 and 12; the nuclei and connections of the thalamus; cortical localization of function; the hypothalamus and the autonomic nervous system; and the components of the limbic system.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

ANAHS 5157 - NEUROANATOMY PBL SEMINAR
Minimum Credits: 0
Maximum Credits: 0
The overall goal of the PBL seminar is to discuss clinical dental conditions which utilize and build on the concepts and principles that are being studied in the base basic science course. These discussions will emphasize how basic science concepts can be used in solving clinical problems; promote active learning and development of problem-solving skills; and enhance the communication and interpersonal skills of the student.
Academic Career: DMED
Course Component: Seminar
Grade Component: No Grade Required

ANAHS 5910 - REVIEW OF ANATOMY
Minimum Credits: 0
Maximum Credits: 0
This is the human anatomy course which is presented in the first year curriculum of the school of dental medicine.
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ANAHS 5911 - CLINICAL ANATOMY - HEAD & NECK
Minimum Credits: 2
Maximum Credits: 2
This course is designed to reinforce the student's knowledge of anatomy and to foster the application of this knowledge to the routine practice of dentistry. It includes anatomy related to local anesthesia, denture construction, dental emergencies, etc. It is intended to provide the student with an anatomical basis for solving problems in the general practice of dentistry. Course work consists of students participating in seminars, examining prostheses, and doing limited dissections of selected regions of the head and neck.
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

ANAHS 5912 - ADVANCED ORAL HISTOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course will consist of two parts. The first part will be lecture format covering the structure and development of the oral cavity. The second part will be a journal club format with presentations and discussions of recent reviews or journal articles relating to the course topic.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ANAHS 5920 - AGE RELATED CHANGES
Minimum Credits: 1
Maximum Credits: 1
This course identifies the age-related changes that occur in the oral cavity of human and other mammalian species. Structural changes are described in both hard and soft tissues. The functional properties of these affected tissues are considered. The clinical implications of such changes manifested in older age are emphasized. The effect of pharmacologic agents, disease states and behavioral modifications associated with aging are considered to demonstrate their potential impact on the tissue of the oral cavity.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

ANAHS 5930 - CLINICAL ANATOMY - HEAD & NECK
Minimum Credits: 0
Maximum Credits: 0
This course is designed to reinforce the student's knowledge of anatomy and to foster the application of this knowledge to the routine practice of dentistry. It includes anatomy related to local anesthesia, denture construction, dental emergencies, etc. It is intended to provide the student with an anatomical basis for solving problems in the general practice of dentistry. Course work consists of students participating in seminars, examining prosections, and doing limited dissections of selected regions of the head and neck.
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ANAHS 5942 - AGE RELTD CHANGS & ORAL CAVITY
Minimum Credits: 1
Maximum Credits: 1
The effects of aging on the oral cavity and the impact of these changes on the human body will be reviewed. Current literature in oral biology and gerontology will serve as the basis for instruction.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

Anthropology

ANTH 2000 - RESEARCH AND THESIS MA DEGREE
Minimum Credits: 1
Maximum Credits: 9
This course involves directed research and writing oriented towards the completion of a master's thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ANTH 2440 - LANG AND PREHIST IN MESOAMER
Minimum Credits: 3
Maximum Credits: 3
MesoAmerica is well-known linguistically, and its linguistic prehistory is rather well understood. Archeological research has achieved knowledge in great detail for many key areas. Ethnohistorical sources in native languages abound. The integration of linguistic, archeological, and ethno historical knowledge can yield a detailed picture of the area's culture history. We will survey the ethnolinguistic history of MesoAmerica from 5000 BC to 1500 AD. Attention will be given to the ethnic associations of archeological cultures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2441 - FIELD METHODS IN LINGUISTICS
Minimum Credits: 3
Maximum Credits: 4
This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of a non (indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethnosemantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

ANTH 2442 - MAYAN LANGUAGES AND CULTURES
The 30 Mayan languages of southern Mexico, Guatemala, and Belize are among the best documented languages of MesoAmerica; they are ergative, and have both passives and antipassives. The results of comparative study of Mayan languages surpass those for any other MesoAmerican family. Some Mayans had pre-Columbian writing, and this writing system is currently being deciphered. Mayan society has been well studied by ethnographers, and ethnohistorical sources are numerous and valuable. Besides these topics, ethnographically meaningful texts in two Mayan languages.

ANTH 2443 - AMERICAN INDIAN LANGUAGES
Minimum Credits: 3
Maximum Credits: 3
Of over 1000 different languages spoken by native Americans in 1492, about 600 survive, most spoken by small numbers, although many populous Amer-Indian ethnic groups are found in MesoAmerica and the Andes. This course will survey the language families of the new world, and study the grammar and ethnographic texts of two languages. The results of historical and comparative research on Amer-Indian languages will be studied, particularly as they relate to the culture history of their region. We will also study pre-Columbian writing, literature and efforts at cultural maintenance.

ANTH 2448 - AZTEC LANGUAGE AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
The Aztecs spoke Nahuas, as did the Toltecs before them. One million present-day Nahuas still speak the language and practice an Amer-Indian culture. The Nahuas language is the best-documented of all native American languages, from the 16th century to the present. The ethnohistorical sources in Nahuas and on late pre-Columbian culture are unsurpassed in scope. All the writings in Nahuas make up a small library. In this course we will study the grammar of Nahuas, read ethnographic texts from the 20th and 16th centuries, and trace the culture history of the Nahuas-speaking peoples.

ANTH 2449 - MESOAMERICAN LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
MesoAmerica is noteworthy for its pre-Columbian culture achievements and also for the research accomplishments of ethnographers and linguists working in the area. This course will examine this culture areas convergent linguistic features, as well as pre-Columbian writing and calendar. The language families and isolates of the area will be surveyed, as well as their classification and diachronic developments. Selected language from a variety of families will be studied descriptively, and the recent phenomenon of training Indians as linguists and ethnographers will be examined.

ANTH 2450 - STRUCTURE OF AN AMERINDAN LANG
Minimum Credits: 3
Maximum Credits: 3
This seminar investigates and imparts the structure of an Amer-Indian language known through first-hand research by the professor. The theoretical models and concerns will vary according to the instructor.

ANTH 2460 - INTRO HISTORICAL LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
A survey of the principles in the basic techniques of historical linguistics; the principles and methods of historical linguistic research. The major
topics to be studied are the analysis of sound change, contact induced language change, the relationship between variation (regional and social) and language change. The comparative method and internal reconstruction.

**ANTH 2466 - TOPICS IN ANTHROPOLOGICAL LING**
Minimum Credits: 3
Maximum Credits: 3
This is a seminar for the investigation of anthropological linguistic topics of interest to the professor and students. Topics covered might include ethnobotany, ethnozoology, ethnomedicine, ethnopsychology, kinship terminology, diffusion of artifacts/cultigens and their names, and many others.

**ANTH 2486 - HISTORICAL LING AND PREHISTORY**
Minimum Credits: 3
Maximum Credits: 3
This seminar will investigate the principles by which inferences about prehistory are made: how the reconstruction of linguistic form is done, how semantic and cultural reconstruction is carried out, and how historical, ethnohistorical, and archeological knowledge is correlated with historical linguistic knowledge to create models of the prehistory of language families and cultural/ecological zones. Special attention will be given to the linguistic prehistory of several peoples and language families, which may include Indo-European, Uto-Aztecan, Otomanguean, Mixe-Zoque.

**ANTH 2490 - LING ANTHROPOLOGY CORE COURSE**
Minimum Credits: 4
Maximum Credits: 4
This course approaches language as a practice through which social relations, cultural models, and consciousness are constituted. Specific topics include: approaches to signs and significance; linguistic relativity (relationships between habits of speech, thought, and action); analysis of conversation and interaction; relationships between meaning and intention; models of variation and change; linguistic dimensions of cultural stereotypes; and the means by which languages, styles, and other aspects of cultural patterning, can be mapped onto populations. Throughout the course we pay particular attention to how tools from linguistic and semiotic anthropology can be applied to the study of topics other than language as a framework for ethnography, for textual research, and for the study of material culture.

**ANTH 2512 - PREHISTORY OF A SELECTED AREA**
Minimum Credits: 3
Maximum Credits: 3
Examines the cultural development of a specific area such as the American Southwest or the ancient near east.

**ANTH 2513 - SELECTED ARCHEOLOGICAL PROBLEM**
Minimum Credits: 3
Maximum Credits: 3
Examines current topics and controversies in anthropological archaeology. Special problem areas vary from year to year.

**ANTH 2514 - WESTERN MESOAMERICAN ARCHEOLOGY**
Minimum Credits: 3
Maximum Credits: 3
Western MesoAmerica includes the part of Mexico West of the isthmus of Tehuantepec. It excludes the Maya area. This course covers the entire span of prehistory in the region, but the emphasis is on the origins of settled agricultural life and the development of complex societies. Most time will be devoted to the late preceramic, formative, and classic periods. Coverage of sub regions will focus on those that are well known enough to be interesting to discuss: the Basin of Mexico, the Puebla-Tlaxcala Basin (and Tehuacan Valley), Morelos, the Valley of Oaxaca, the Gulf Coast.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2515 - SEMINAR: ANDEAN ARCHEOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar will focus on the major research problems confronting archaeologists in the central Andes (Ecuador, Peru and Bolivia). These will include problems of a cultural historical as well as a cultural processual nature. Problems relating to the interpretation of the evidence for early man and the development of civilization through the Inca period will be examined.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2516 - CHIEFDOMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Chiefdoms are defined more by what they are not than by what they are: societies whose hierarchical organization makes them non-egalitarian, but that lack the bureaucratic institutions of the state. Seen as stepping stones in the evolution of states or as part of another evolutionary trajectory entirely, chiefdoms are the subject of debate, including just in what sense, or even whether, the word chiefdom" has any utility. This seminar discusses how chiefdoms can be investigated and understood archeologically, using materials from all the Americas, Polynesia, Europe, and other areas."  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2517 - ARCHEOLOGICAL METHOD & THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course surveys contemporary method and theory in anthropological archeology. It begins with varieties of high level theoretical approaches to a study of prehistory, including cultural historical, cultural evolutionary, cultural ecological systems-oriented, Marxist and post-Procession Archaeologies. It covers several methodological problems; construction of research designs, uses of analogy, style, classification and site level or regional level spatial analysis.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2519 - GREEK SEMINAR: SPECIAL TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course students undertake close study of a particular Greek work, author, or subject. The course may be repeated for credit provided the specific material covered is different.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2520 - THE ARCHLGY OF SOTHRN MESOAMER**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Examines topics reacting to current archeological concerns about the ancient Maya and their neighbors.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
ANTH 2523 - INTELLCTL DEVELP AMRCN ARCHLGY
Minimum Credits: 3
Maximum Credits: 3
Examines the intellectual development of American archeology from the nineteenth century to the present day, focusing on the philosophical, theoretical, and methodological background of modern anthropological archeology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2524 - ARCHELGCL DATA RECOV & ANAL 2
Minimum Credits: 4
Maximum Credits: 4
Advanced analysis of archeological data, primarily quantitative. This course carries on where ANTH 1534 leaves off. Topics include sampling, design of variable sets, advanced database management, computer graphics (plotting, contouring, fishnet surfaces), multivariate statistics (factor analysis, cluster analysis, multi-dimensional scaling), and analysis of spatial distributions (nearest neighbor, clustering, and graphical approaches).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2525 - EUROPE IN LATER PREHISTORY
Minimum Credits: 3
Maximum Credits: 3
The time period under consideration, roughly 6000 B.C. To the romans, begins with the shift to farming (the Neolithic) and ends with the spread of iron-working technology. Problems to be investigated in the seminar include: (1) the different ways in which agriculture became established; (2) effects of technological innovations, such as animal traction, wheeled transport, and metallurgy; (3) the differential rates of socio-political change.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2526 - MARITIME ADAPTATIONS
Minimum Credits: 3
Maximum Credits: 3
This course will explore the processes of man's adaption to the world's coastlines. Stress will be placed upon the emergence of a maritime economic system from the Paleolithic period through late prehistoric time periods on a world-wide basis. Emphasis will be placed upon the (1) economic interaction between land-based and ocean-based subsistence patterns; and (2) the development of complex societies from a maritime economic base.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2528 - SOUTH AMERICAN ARCHAEOLOGY
Minimum Credits: 3
Maximum Credits: 3
The manufacture of lithic, ceramic, bone and fiber artifacts is examined in terms of process and product. The emphasis in the course is on the analysis and classification of the aforementioned industries and students will be thoroughly acquainted with the most recent research strategies and attribute oriented typologies devised for that purpose. There are no examinations though each student will be responsible for the production of a publishable report based on the analysis of a given body of archaeological material.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2530 - URBAN ANTHROPOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is a graduate level seminar in the methods and theory of contemporary historical archeology in the investigation of North American urban life. It examines the theoretical underpinning and methods that archeologists are using in various cities to define the role of archeology in and of the urban setting. Archeological work in the city; the city-site concept; processes of urban site formation, structure, and patterning; (core-periphery studies); and the impact of industrialization are discussed.
Academic Career: GRAD
ANTH 2531 - HOUSEHOLD ARCHAEOLOGY
Minimum Credits: 3  
Maximum Credits: 3  
This seminar will explore the role of the household as an important analytical unit in anthropological archaeology. Topics to be addressed include: archaeological definition of residential units, modeling the evolution of domestic life, analysis of spatial patterns at the household level, and proxemic and symbolic approaches to the prehistoric dwelling. The seminar will also consider the relationship between households and larger societal structures and the cross-cultural compositional and dynamic characteristics of households will be examined.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ANTH 2532 - ADV TOPC GIS ANAL REGN RESORCS  
Minimum Credits: 3  
Maximum Credits: 3  
A brief introduction to GIS techniques in the context of archaeological analysis. The focus will be on how to accomplish analytical tasks of proven utility in archaeology, using autocad map when a vector-based program is most useful and Idris when a raster-based is better. The course is designed to complement ant 2541: regional settlement patterns, although the GIS techniques dealt with are applicable to other scales of analysis as well.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ANTH 2533 - ANCNT STATES IN THE NEW WORLD  
Minimum Credits: 3  
Maximum Credits: 3  
Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among pre-Hispanic states in Mesoamerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ANTH 2534 - ARCHEOLOGICAL DATA ANALYSIS 1  
Minimum Credits: 4  
Maximum Credits: 4  
An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ANTH 2535 - MAYA PAST AND PRESENT  
Minimum Credits: 3  
Maximum Credits: 3  
Changes and continuities in Maya culture are traced from pre-Hispanic beginnings through the 16th century Spanish conquest and on to the present. The aims are to gain a substantive knowledge of the Maya themselves and a more methodological appreciation of how anthropologists of various stripes, archeologists, epigraphers, ethno historians, and ethnographers, have approached the study of the Maya. Substantive subjects are: ideology, politics, economics, and ethnicity and resistance.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ANTH 2536 - SPEC TOPCS COMP ARCHLGY PART 1
A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the fall term, and is concluded during the spring term in ANTH 2537: special topics in comparative archaeology ii. In order to receive credit students must complete both parts of the seminar (I and II).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2537 - SPEC TOPCS COMP ARCHLGY PART 2

Minimum Credits: 2  
Maximum Credits: 2  
A research seminar in comparative archaeology led by a regular faculty member in anthropology and the visiting scholar in the center for comparative archaeology. The topic changes from year to year depending on the expertise of the visiting scholar. Meets about five times during the spring term, and is the conclusion of ANTH 2536: special topics in comparative archaeology i offered during the preceding fall term. In order to receive credit students must complete both parts of the seminar I and II).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2538 - CULTURAL RESOURCE MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover in an introductory way all aspects of cultural resource management and historic preservation. Major topics include federal historic preservation legislation, cultural resources (historic and prehistoric archaeology, historic structures), the national register of historic places, section 106 and 110 of the NHPA, historic preservation planning, and state historic preservation plans. Course will utilize historic architectural examples as well as prehistoric and historic archaeological sites. Greater emphasis placed on how to evaluate historic properties for national register.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2540 - ORIGINS OF CITIES

Minimum Credits: 3  
Maximum Credits: 3  
This seminar explores the origins and characteristics of urban life. Prehistoric cities in the old and new worlds will be examined to better understand the social, political, demographic, and ecological processes that lead to their development. The archaeological applications or regional analytical techniques will be comprehensively reviewed. The seminar will focus on archaeological cities, but studies of modern urban forms will be examined as well. Important case studies will include Teotihuacan, Chan Chan, Anyang, and the ancient cities of Egypt and Mesopotamia.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2541 - REGIONAL SETTLEMENT PATTERNS

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will take up both theoretical and methodological aspects of regional settlement pattern studies in archeology. Appropriate objectives for settlement patterns will be discussed. Advantages and disadvantages of different field and analytic methodologies in terms of their effectiveness in achieving clearly defined goals will be explored. This exploration will be pursued primarily through critical examination and reanalysis of data from primary reports of regional settlement patterns studies from different parts of the world.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2550 - ETHNOARCHAEOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on issues in ethnoarchaeology and archaeological implications. Some of these issues have to do with theory and the role of analogy in understanding the past. Others concern how we can use material remains to make inferences about social groups including kinship,
organization, ethnicity, work groups, etc.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**ANTH 2551 - PEOPLES IN CONTACT**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course will examine contact between native and European cultures in the Americas from an archaeological and historical perspective. Prehistoric patterns of interaction including exchange and communication networks will be considered. The impact of this contact on both cultures will also be considered.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**ANTH 2552 - WOMEN MEN CHLD ARCHGL PERSPCTV**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course deals with men, women, and children in past societies through the use of archaeological, ethnographic, and historic information. Topics include division of labor, human origins, craft specialization, households and domestic economy, power, hierarchy, ideology, and culture contact. We will work to identify the presence, contribution, and relationships of men and women in each of these spheres of human society. The contribution of children and the aged will also be studied as we aim toward analyzing the role of diverse groups in societal organization.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**ANTH 2553 - ARCHAEOLOGICAL CERAMICS**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course is designed to provide you with a broad introduction to archaeological ceramics. We will cover a number of topics during the course so that you will be conversant in the archaeological literature on pottery and will have a greater understanding of the types of research problems that are most readily investigated through the analysis of archaeological ceramics. You will also gain experience in handbuilding pottery vessels so you have an understanding of pottery from the perspective of the potter and will know how the limitations and possibilities within this medium affect both the manufacture and processes used in creating pottery. We also discuss a variety of archaeological analyses of pottery. Readings drawn from archaeological, ethnoarchaeological, and material culture literature are an important component of this course.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

**Minimum Credits:** 3

**Maximum Credits:** 3

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**ANTH 2555 - WORKSHOP IN PUBLISHING**

**Minimum Credits:** 1

**Maximum Credits:** 1

This one-credit graduate course is intended as a workshop for refining papers for publication as journal articles or edited book chapters. The course is intended for relatively advanced graduate students who have a good idea at the outset of what they plan to publish and have the support of their advisor in this plan. We will go through the process of identifying suitable publication venues, revising drafts and figures for publication, and understanding what to expect from the peer-review process. Because the class involves substantial peer feedback, students are asked to commit to supporting their fellow students' revision process as well as devoting time to their own. The aim is for every student to submit a paper for publication by the end of the semester.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis
ANTH 2588 - ARCHEOLOGY CORE COURSE
Minimum Credits: 4
Maximum Credits: 4
A broad introduction to current archaeological thinking on cultural evolution, focusing on early hunters and gatherers, the rise of agriculture and settled village life, the growth of complex societies, and the development of cities. Examines the recent intellectual controversies surrounding these topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2589 - PATRIM PRESERV & POLIT ARCHLGY
Minimum Credits: 2
Maximum Credits: 2
The object of archeological research is someone's cultural patrimony (after someone else's cultural patrimony). The politics of preserving cultural heritage often appear to conflict with the needs of scientific research. This raises the issue of the broader social purposes of doing archeology. It is part of the professional responsibility of every archeologist to consider carefully who are the audiences with interests in the results of archeological research, what their needs are, and how they can be served. Seminar will discuss professional responsibilities in archeology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2595 - HISTORY PHILOSOPHY ARCHAEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Topics to be addressed include confirmation, explanation, laws, and theory-building in archaeology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2601 - SPEC PROBLEMS IN BIOLOGCL ANTH
Minimum Credits: 3
Maximum Credits: 3
Topics covered vary greatly with instructor and term.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2602 - SOCIOBIOLOGY
Minimum Credits: 1
Maximum Credits: 2
This course explores an array of current topics in sociobiological theory and method. Readings are from the primary literature.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ANTH 2605 - BEING AND BECOMING HUMAN
Minimum Credits: 3
Maximum Credits: 3
In this course we will read primary literature that is relevant to the study of human evolution, beginning with Tyson's description of an "Ourang Outang" through the inquiries into "humanness" of Burnett (monboddo), Buffon, Linnaeus, and others, to the treatises of Blumenbach on "race" and being "homo sapiens," Huxley and Darwin's arguments for "man's place in nature" and the "descent of man," and the debates between Schaaffhausen, Fuhlrott, Huxley, and king over the "status" of the first publicly announced human fossil, the feldhofer grotto neanderthal. From there we will read in chronological order the publications on subsequent fossil discoveries and the recognition (or rejection) of extinct human relatives, as well as essays on the course of human evolution; included, for example, will be Dubois (on "pithecanthropus erectus"), dart (on Australopithecus), broom (on "plesianthropus" and paranthropus), Keith and Hrdlicka (overviews), the Leakeys (Louis and Mary's discoveries at Olduvai gorge, and Richard's at Koobi Fora), and Johanson (at Hadar) and some of the more recent finds. The thrust of the course will be to tease apart fact from assumption as they were cobbled together in promoting one's favorite scenario on human evolution.
Academic Career: GRAD
ANTH 2607 - EXPRML MORPHLGY & FUNCT ANATMY
Minimum Credits: 3
Maximum Credits: 3
Techniques of experimental investigation and analysis in physical anthropology with special emphasis on an understanding of morphological and physiological changes. The course will focus on the techniques of experimental surgery used to investigate relationships of morphology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2608 - PRIMATE BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2609 - SEM IN SYSTEMATICS & EVOLUTION
Minimum Credits: 1
Maximum Credits: 3
An in-depth review of the development of evolutionary thought particularly as it pertains to taxonomy, comparative morphology, and the reconstruction of evolutionary relationships among organisms.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2612 - EVOLUTIONARY THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This course will be an in-depth survey of the historical development of evolutionary thought, with emphasis on the alternatives to theories that became incorporated into the grand evolutionary synthesis and those alternatives that have emerged since. Students will read and annotate original works in comparative anatomy, embryology, paleontology, genetics and lead class discussion based on this literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2613 - EVOLUTIONARY THEORY 2
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2614 - HISTORY OF PALEOANTHROPOLOGY
Minimum Credits: 3
Maximum Credits: 3
In this course we will read primary literature that is relevant to the study of human evolution, both neo and paleobiologically. After a brief overview of the separate histories, and thus foci, of paleontology in general and human paleontology specifically, we will begin formal reading with Blumenbach's two major works, some Buffon, Linnaeus, and Lankester (and probably a few others), Huxley's essays of 1863, Darwin's descent these basically on the topic of "man's place in nature" and then delve into specific articles and monographs on the discovery, naming, and acceptance of human fossils. These readings will cover (but not necessarily be limited to) the debate between Schaffhausen and Fuhlrott, the naming by William, king of the first new hominid species (homo neanderthalensis), the works of Eugene DuBois (homo erectus) and Raymond Dart (ustralopithecus) and reactions to them, the Leakeys' discoveries at Olduvai Gorge, and some of the more recent finds. We will also discuss ramapithecus and its relevance to the still not satisfactorily answered question, "what is a homind?" The thrust of the course will be to tease apart fact from assumption as
they were cobbled together in promoting one's favorite scenario on human evolution. Students will be expected to hand in annotated bibliographies based on the readings, and to take turns in leading discussion. Each student will also produce a term paper that will expand on a topic relevant to the course.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2618 - SPECIAL TOPICS IN SOCIOBIOLOGY
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is intended as a second or third course in the application of sociobiological theory. Each semester a single topic such as sexual selection, human sociobiology or the evolution of sociality will be explored in detail.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2630 - PHYSICAL ANTHROPOLOGY RESEARCH
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The student conducts independent research developed in consultation with, and carried out under the supervision of, a faculty member in biological anthropology.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2687 - CORE COURSE IN PHYSICAL ANTHRO
- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
This course presents an integrated view of the diverse topics that biological anthropology encompasses. Emphasis is placed on how evolutionary, genetic and developmental processes shape human biology.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2692 - PHYSICAL ANTHRO RESEARCH SEM
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed for graduate students who are conducting research in physical anthropology. They will have the opportunity to discuss and critique their various projects and hopefully to benefit from this unique interaction. The course is also appropriate for those graduate students who are in the process of developing grant proposals or over-view documents.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2694 - ETHOLOGY
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will examine animal behavior in natural environments, with special emphasis on the evolution of such behavior.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2715 - DIMENSNS OF AGING: CULT & HLTH
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.  
**Academic Career:** GRAD
ANTH 2720 - POETCS & POLITICS OF ETHNGRPHY
Minimum Credits: 3
Maximum Credits: 3
The 1980s was described as an experimental moment" in the human sciences and as a time of "crisis of representation" when anthropology has taken a literary, experimental, reflexive, modern, late-modern, postmodern, textualist turn. This seminar examines this experimental moment, its history and anthropological precursors, the critiques that have followed, and the suggestions for the future of ethnography and anthropological writing that have ensued. Readings include a number of recent experimental ethnographies as well as a sample of older "classics".

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANTH 2726 - GENDER AND HEALTH
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on recent theoretical and topical work in anthropology on questions of power and knowledge in discourses of and about male and female bodies. While much of the literature on gender and health is about women, this course will look at the way in which men and women experience sickness, disease and fitness.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2728 - ANTHROPOLOGY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Cultural anthropology is presented as an interpretive social science for disciplined inquiry into social institutions and processes, including education. Education is viewed as cultural transmission in the context of contemporary communities and society. The course includes an introduction to culture theory, anthropological fieldwork, and ethnographic analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ANTH 2729 - PROBLEMS IN NORTH AMRCN ETHNL
Minimum Credits: 3
Maximum Credits: 3
This course surveys the Northern Iroquoian peoples. Beginning with the 16th century French accounts of the Huron and working up to the present day Iroquois of New York state and Canada. While students will gain a thorough knowledge of Iroquoian culture, they will also be able to analyze the use of different theoretical approaches in anthropology to the large body of data on the Iroquois.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2731 - MEDICAL ANTHROPOLOGY 2
Minimum Credits: 3
Maximum Credits: 3
This course deals with topics surveyed in medical anthropology 1, looking at them in more ethnographic depth and with greater attention to current research findings.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2735 - ECONOMIC ANTHROPOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on major trends and debates in economic anthropology, with an emphasis on economic change and the impact of industrialization and capitalism on the third world" peoples. Particular attention will be placed on economic theory in anthropology, the nature and "future" of
peasants as an analytical category, markets and market places, "moral economy" approaches, agricultural intensification, development and underdevelopment, and anthropological approaches to political economy."

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2736 - POPULATION AND CULTURE
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course centers its attention on the complex interplay between demographic processes and outcomes (such as fertility and population growth, population decline and mortality and migration) on the one hand, and social/cultural evolution and social/cultural forms studied by cultural anthropologists and archaeologists. We will critically review major concepts and theories in demography and demographic anthropology. Course takes the subject matter of population dynamics as the framework for examining important anthropological themes, debates and theories in the context of different societies/cultures.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2737 - ANTHROPOLOGY OF FOOD
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course surveys the general subject of culinary anthropology. Topics include food exchanges and the construction of social groups, food and social boundaries, food taboos, symbolism of food, folk conceptions of food, sacrifice and food in religious contexts, world standardization of food preferences. Thus, the focus is on social aspects of food, eating, and exchange.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2738 - DEMOGRAPHY, CULTURE, AND POWER
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the interface between socio-cultural anthropology and demography. Our objective is not to learn demography but explore and critique how anthropologists and demographers have thought and written about each other's concepts, methods, and theoretical frameworks. We will emphasize how demographers and anthropologists have (or have not) taken into account inequality and differential power arrangements in their research and writing.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2740 - PACIFIC ETHNOLOGY
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the traditional and contemporary peoples and cultures of the pacific islands. The development of anthropological theory in the region is included.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ANTH 2741 - ANTHROPOLOGY OF LAW
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will examine anthropological analyses of law and law-like phenomena in a number of different societies, concentrating on the development of theory in this field. Since this theory reflects larger theoretical developments in anthropology and in post-war social science, the study of the anthropology of law is a case study in the development of modern theoretical paradigms.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
ANTH 2744 - GRANTS AND RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the formulation of individual research problems and research designs in preparation for thesis research. Course requirements center around the development of a research proposal which will include a research design, area and theoretical background, field techniques and procedures, methodology, data analysis, and significance of the research. Grantsmanship, including how to submit proposals to various agencies, will be explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2745 - HISTORY ANTHROPOLOGICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar deals with the history of anthropological ideas from the time of the Greeks to the present. Anthropological ideas and orientations are assessed and analyzed within the societal and cultural contexts that produced them following the conceptual thread, as substantive and theoretical notions and viewpoints unfold throughout the Greco-Roman period, the disintegration of classical society, the middle ages, the age of exploration, the xviii century enlightenment, and the beginning of professional anthropology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2750 - CONTEM ANTHROPOLOGICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar surveys recent developments in anthropological theory, with emphasis on social and cultural anthropology. Topics covered vary with interests of students and the instructor. The course centers on the close reading of several contemporary texts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2753 - CONFLICT AND VIOLENCE
Minimum Credits: 3
Maximum Credits: 3
This course surveys a number of anthropological theories regarding conflict and violence, with critical attention to the question of biological versus cultural determinants. Ethnographic materials are drawn from the pacific and elsewhere. The focus is largely on tribal societies, but not exclusively so, and factors influencing peace-making as well as war are considered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2756 - RELIGION AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
The objectives are to understand religion wherever and whenever found, and to understand the anthropological approach in the cross-cultural study of religion. Emphasis is given to indigenous forms of religion which develop out of the introduction of Christianity, examining the reciprocal influence of external and internal factors in shaping pathways of change.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2757 - DEATH: BUDDHIST CULTURES
Minimum Credits: 3
Maximum Credits: 3
Death is central both to Buddhist philosophical thought and to the social and institutional roles played by Buddhism. The Buddhist emphasis on impermanence is traditionally considered a necessary condition for entry into the religious life. When we add the Buddhist idea of transmigration, it is not surprising that the care of the deceased in their postmortem state has long been a principal responsibility of Buddhist ritualists throughout Asia. As ritual and beliefs surrounding death also reflect specific cultural values (and changes in those values over time), death-related practices and modes of expression moreover shed light on Buddhism as both a pan-Asian and area-specific religion. For all of these reasons, approaches to death and the
afterlife provide a useful focus for studying Buddhism as a lived tradition. This seminar explores Buddhist approaches to death, dying, and the afterlife with a focus on South Asia, Tibet, and East Asia. Topics include Buddhist cosmology and the doctrine of karmic causality; tales of exemplary deaths; accounts of journeys to the hells and other postmortem realms; Buddhism, the family, and rites for ancestors; Buddhist funerary and mortuary practices; theories of ritual and anthropological studies of mortuary rites; the placation of ghosts and revenants; changes in contemporary Buddhist funerals and issues related to unnatural deaths. We consider both Buddhist doctrinal teachings and social roles with respect to death and the afterlife, as well as interactions of Buddhism with local religious cultures.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**ANTH 2760 - JAPANESE SOCIETY, CULTUR, & ED**

Minimum Credits: 3  
Maximum Credits: 3  
Japanese education is viewed as a social and cultural process. Culture-specific patterns and theories of education observable in school practice, familial socialization, and other educational settings are viewed in their broader social and cultural contexts.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ANTH 2761 - DEVELOP EDUC & APPLD ANTHROPLGY**

Minimum Credits: 3  
Maximum Credits: 3  
This practicum includes a multi-week service-learning project with a partner community. Projects are based on principles of social change, reciprocity, transformation, local control, and sustainability. Participants need to actively engage in pre-trip activities, on-site reflections and work as well as follow-up projects that situate and extend the service-learning.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**ANTH 2763 - FIELD METHODS**

Minimum Credits: 4  
Maximum Credits: 4  
Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2764 - KINSHIP THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
The basic cultural features of kinship systems, and how anthropologists have analyzed them, provide the focus of this seminar. Concepts such as descent and consanguinity, and their structural expressions in descent groups and kindreds are explored cross-culturally. The history of kinship studies, and the relationship of kinship studies to other theoretical developments in the discipline are examined.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ANTH 2765 - TRIBAL SOCIETIES**

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the relationship between tribal societies and the development of anthropological theory. It includes an ethnographic survey of tribal societies as well as an examination of tribes in comparison with other forms of social life.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
ANTH 2766 - ANTHROPLGY & POLITICAL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This course will survey some contemporary thrusts in anthropological political economy and the different intellectual traditions that have nurtured these. Political economy is not necessarily restricted to theoretical discussions on development, underdevelopment, or the world system and in this course we will be particularly concerned with exploring the manifold linkages between inequality and power and ideology, hegemony, and culture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2767 - GENDER, CLASS & REPRODUCTION
Minimum Credits: 3
Maximum Credits: 3
This course centers attention on the interplay between gender, sexuality, class, and reproductive behavior in diverse socio-cultural contexts. The starting point are critiques from within and outside of socio-cultural anthropology (especially social history) that mainstream, positivist demography has not adequately dealt with (theoretically and methodologically) with how cross-cultural expressions and variations of gender, sexuality, and class have shaped reproductive behavior. This course will survey key works in anthropological demography, social history, and feminist demography with the objective of exploring the emergence of 'whole demographies' (Kertzer) that seek to demonstrate the importance of 'situating' reproductive behavior in 'the sociocultural and political economic context in which it is embedded,' and that 'historicize demographic analysis' by viewing historical and power-laden processes as 'ingredient[s] in the making of reproduction' (Greenhalgh).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ANTH 2774 - SPEC TOPC MATHEMATICAL ANTHRO
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to advanced quantitative methods of representing, modeling, and analyzing anthropological data. It reviews a number of methods of data analysis and representation including multidimensional scaling, factor analysis, and cluster analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2775 - APPLD ANTH: EDUC & SOCL CHANG
Minimum Credits: 3
Maximum Credits: 3
This seminar explores practical, engaged applications of anthropology to educational programs in varied cultural settings around the world. Topics may include: theories of development and social change; the role of schooling in cultural continuity and change; globalization and transnational influences on curriculum and policy; school reform and social inequities. Apprenticeship learning will be available through authentic professional activities and meaningful case studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2781 - SPEC TOPICS IN CULTURAL ANTHRO
Minimum Credits: 1
Maximum Credits: 1
This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2782 - SPECIAL TOPICS IN CULTRL ANTH
Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization in cultural anthropology of a visiting scholar.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ANTH 2783 - SOCL STRATFCTN & EXPRSSV CULT
Minimum Credits: 3
Maximum Credits: 3
The main object of the seminar is to present the view that social stratification has an important expressive component that has been consistently ignored in anthropological and sociological studies of stratification. Concentrating on a number of specific cases, spanning the evolutionary spectrum from peasant to modern industrial societies, the expressive component of class is placed in perspective in relationship to power, wealth, and other structural and ideological variables.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2784 - PACIFIC PREHISTORY
Minimum Credits: 3
 Maximum Credits: 3
This course provides a basic survey of pacific prehistory, but its primary purpose is to use the aboriginal cultures of the pacific (including Polynesia, Melanesia, Micronesia and Aboriginal Australia) as a framework for examining problems of general interest to both prehistorians and ethnographers. These may include such issues as the origins of agriculture, the nature and development of social stratification, the interrelationships between people and the natural environment, trade and exchange, the nature of prestige-based economies, etc.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2785 - ETHNOGRAPHY OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
An advanced seminar on ethnographic research methods and anthropological analysis applied to the study of education. Ethnographic methods of investigation are critically analyzed and significant ethnographic research on education is surveyed. Topics include culture theory, cultural transmission, and ethnographic analysis of education.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ANTH 2789 - CULTURAL ANTHRO CORE COURSE
Minimum Credits: 4
Maximum Credits: 4
This course is an introduction to the anthropological study of human culture and society. We will examine how different modes of description and explanation in contemporary cultural anthropology are applied to various domains (e.g., How different peoples feed themselves, mate and have children, cooperate and fight with one another, deal with the inevitability of death, etc.). By comparing the ways the human beings cope with the natural environment and each other, we will seek a better understanding of ourselves and what it is to be human.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ANTH 2902 - DIRECTED STUDY FOR MA STUDENTS
Minimum Credits: 1
Maximum Credits: 9
This course involves directly supervised research-related activities such as fieldwork or artifact analysis. Reading is not a major component of the work for this course.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ANTH 2980 - READINGS IN SELECTED FIELDS
Minimum Credits: 1
Maximum Credits: 9
This course involves student preparation of a selected bibliography on a specialized topic, reading of the materials according to a prepared schedule, and discussions of the readings with the course instructor.
Academic Career: GRAD
ANTH 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
This course involves research-related activities that are indirectly supervised by the instructor, such as fieldwork or library research.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

ANTH 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 9
This course involves directed research and writing oriented towards the completion of a doctoral dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ANTH 3007 - ETHNGRPHC APPROACHES PRGM EVAL
Minimum Credits: 3
Maximum Credits: 3
Students will be introduced to the basic principles of ethnographic research and their application to the evaluation of human service and health care programs. They will become familiar with research design in ethnographic studies; the process of fieldwork in urban settings; the methodology of participant observation and ethnographic interviewing; recording ethnographic data; ethnographic writing; and ethical questions surrounding ethnographic research.
Academic Career: GRAD
Course Component: Seminar

Artificial Intelgnc & Mgt

BAIM 2009 - INTRO TO ARTFCL INTELGNC PRGMG
Minimum Credits: 1.5
Maximum Credits: 1.5
Seven week elective course in the computer language lisp, which is a companion to the intelligent management systems' course. The vast majority of A.L. Systems are written in lisp or in high-level languages that are related to it and almost all text materials either presuppose a knowledge of the language or include a brief treatment of it. It is therefore strongly recommended that students interested in the IMS course also register for this programming course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BAIM 2011 - INTELLGNT MANAGEMENT SYSTEMS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
An introduction to artificial intelligence, expert systems, and potential uses of those approaches in business contexts. Knowledge representation, search, planning systems, evaluation, and the underlying concepts from cognitive psychology are emphasized. There is some exposure to computer tools for artificial intelligence and two applications systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BAIM 2012 - INTELLGNT MANAGEMENT SYSTEMS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of intelligent management systems 1.".
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Course Component: Independent Study
Grade Component: Grad HSU Basis

BAIM 3011 - STRUCT & INTRPRTTN CMPTR PROGM
Minimum Credits: 3
Maximum Credits: 3
An introduction to fundamental ideas in computer programming. Topics discussed include building abstractions with procedures, building abstractions with data, modularity, objects and state, metalinguistic abstraction, and computing with register machines. The programming language used is the scheme dialect of lisp. The course presupposes no formal programming as well as formal issues.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BAIM 3012 - ARTIFICL INTELGNC IN BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Focuses on the fundamental artificial intelligence (AI) ideas that underline applications in such diverse areas as natural language processing, automatic programming, robotics, machine vision, automatic theorem proving, intelligent data retrieval systems, etc. Emphasis on general computational concepts involving kinds of data structures, and properties of control strategies used by AI systems. Students will also be expected to conduct an in depth review of some area of application of AI methods and report their investigation.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.
BAIM 3013 - KNOWLEDGE-BASED EXPERT SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Focuses on key issues in the design and implementation of knowledge based systems, such as knowledge representation and methods of dealing with uncertainty. Representative systems are studied in-depth.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BAIM 3014 - ADVANCED TOPICS IN AI
Minimum Credits: 3
Maximum Credits: 3
This course will focus on artificial intelligence and expert system issues in data analysis. Readings will include papers presented at the first workshop on AI and statistics (see w. Gale, artificial intelligence and statistics"). If student interest warrants, we will be collecting and analyzing protocols of data analysts, and implementing selected portions of the resulting cognitive model during the term.

Astronomy

ASTRON 2000 - RESEARCH AND THESIS MS DEGREE
Minimum Credits: 1
Maximum Credits: 15
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ASTRON 2550 - STELLAR STRUCTURE
Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to give the student a fundamental understanding of the structure of stars and their evolution. Emphasis will be placed on the physical interplay between stellar atmospheres and interiors. Topics to be discussed include the physics of spectral types, radiative transport in stars, models of stellar atmospheres, nuclear burning in main-sequence stars and in red giants, nucleosynthesis and the origin of matter, white dwarf, neutron stars, and the ages of globular clusters.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ASTRON 2551 - INTERSTELLAR MEDIUM
Minimum Credits: 3
Maximum Credits: 3
The course is designed for physicists who are interested in the physical conditions and evolution of the Interstellar Medium. The goal is to discuss components of the Interstellar Medium, such as multi-phase gas, iii regions, Molecular Clouds, the Interstellar Magnetic Field, and Interstellar Grains.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
ASTRON 2580 - GALAXIES & EXTRAGALACTIC ASTRON
Minimum Credits: 3
Maximum Credits: 3
Selected topics in galactic and extragalactic astronomy are discussed in this course. Topics will be selected from: stellar populations; globular clusters; galactic kinematics and dynamics; external galaxies; clusters of galaxies; dark matter; active galaxies; quasars; the intergalactic medium; and galaxy formation and evolution. This is a large field of study. Most of the topics will be discussed at the introductory level, however, several topics will be covered in more depth.

ASTRON 3540 - INTRO ASTROPHYSICS COSMOLOG
Minimum Credits: 3
Maximum Credits: 3
This class will provide a broad overview of the physical principles important for astrophysics, and applications to a range of astrophysical phenomena. Concepts covered will include gravitation, radiative processes, radiative transport, fluid dynamics, and nuclear, atomic, and molecular processes. Sample applications might include extrasolar planets, gravitational collapse, stellar structure, star formation, galaxy evolution, accretion disks, compact objects, and galaxy clusters.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3550 - STELLAR STRUCTURE
Minimum Credits: 3
Maximum Credits: 3
Stars are the most common astrophysical objects. They create most of the atomic elements and most of the observable optical light in the sky. This class provides an overview of the physics of stars and the interstellar medium. Topics will include hydrostatic equilibrium, nuclear processes, radiative transfer, metallicity and opacity, convection, stellar evolution, stellar explosions, properties of the interstellar medium, and energy feedback from stars.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3580 - GALACTIC & EXTRAGALACTIC ASTRON
Minimum Credits: 3
Maximum Credits: 3
Galaxies are the fundamental building blocks of the present universe. This class will give an overview of galaxies, their properties, and their formation and evolution with an emphasis on current research areas. Topics will include observational properties (morphology, masses, colors, concentrations), scaling relations, evolution with redshift, stellar populations, gas and dust, dynamics and dark matter, evolution and mergers, and active galaxies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3705 - ASTRONOMICAL TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
This class will expose students to the basics of astronomical data analysis, with an emphasis on statistical techniques and the development of practical programming skills. Topics may include the nature of random and systematic errors, fitting and likelihood techniques, hypothesis testing, astronomical instrumentation and data reduction, and the use of large survey data sets.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ASTRON 3785 - COSMOLOGY
Minimum Credits: 3
Maximum Credits: 3
This class will give an overview of the standard cosmological model and the wide range of observational tests. Topics include the expansion history of the universe, thermodynamic history, nucleosynthesis, recombination, inflation, perturbations and the microwave background, structure formation, evidence for dark matter and dark energy, and future probes of dark energy.

Behavioral & Commumty Hlth Sci

BCHS 2135 - LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
This course examines theories about leadership and provides students with feedback on their own leadership styles. Leadership skills are defined and applied. Teams, as one context for demonstrating leadership, are explored in depth and methods for recognizing and managing group dynamics are introduced. Concepts regarding organization leadership are introduced. The course combines theory with practical application. It is highly participative and students are expected to join in a wide range of exercises and simulations. The two major assignments require that the students work in teams with other students.

Grade Component: Grad SN Basis

BCHS 2504 - OVERVIEW HEALTH COMMUNICATION
Minimum Credits: 3
Maximum Credits: 3
Health communication is the art and technique of informing, influencing, and motivating individual, institutional and public audiences about important health issues. The scope of health communication includes disease prevention, health promotion, health care policy and the business of health care as well as enhancement of the quality of life and health of individuals in the community. This class will introduce the theories and research that underlie health communication. The course will examine health communication campaigns, planning health communication and developing a health communication campaign.
Academic Career: GRAD

Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH)

BCHS 2505 - SOCCLTRL COMNY FACTS HLTH ILLN
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the sociology of health, illness and medical care as a major specialty area of scholarly activity and empirical research. Three competing conceptual frameworks in medical sociology will be examined, compared, and then used to analyze issues in public health, health policy, medical care and clinical medicine on the basis of recent research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BCHS 2506 - PROFESSIONS
Minimum Credits: 3
Maximum Credits: 3
One aim is a review of distinctive features making some occupations professions and the theoretical questions that have justified their study for about 2000 years. A second is a study of such topics as the process of professionalization, relations, socialization into professions, and para professions.
Thirdly, cross national comparative material will be used to explain why the sociology of professions has been mainly a product of Anglo-American sociology and to scrutinize the generality of its main propositions.

**Course Component: Seminar**
**Grade Component: Grad LG/SNC Basis**

**BCHS 2507 - EPIDEMIOLOGY & HEALTH SERVICES**
Minimum Credits: 2  
Maximum Credits: 2  
The course surveys epidemiologic methods and approaches, as applied to the study of health services and medical technologies. The course places particular emphasis on measurement and design issues which impact on the validity of health services research studies. The course develops a systematic approach to the assessment of medical technologies and to the application of epidemiologic and other scientific information to the formulation of health policy.

**Academic Career: GRAD**
**Course Component: Lecture**
**Grade Component: Grad Letter Grade**

**BCHS 2508 - INF MGT PBLC & NON PROF ORGNS**
Minimum Credits: 2  
Maximum Credits: 2  
The course is designed to prepare students to assist in the design and development of a management information system or components therein for use in reporting and decision making. This will include learning a data base management package, learning the benefits of displaying data/information spatially using a Geographic Information System (GIS) and the manner in which public and non-profit organizations generate, communicate, and manage information.

**Academic Career: GRAD**
**Course Component: Lecture**
**Grade Component: Grad Letter Grade**

**BCHS 2509 - SOCL BEHVRL SCI & PUBLC HLTH**
Minimum Credits: 3  
Maximum Credits: 3  
The core course provides an overview of the social and behavioral sciences and their importance in the inter-disciplinary field of public health. A primary emphasis is on the social-ecological model, its application to public health issues, and its use in the development of policies, strategies, interventions and programs. The course content will introduce students to several relevant social and behavioral theories as well as a range of community health assessment and planning models used by public health professionals in both domestic and international venues. Through a series of assigned readings, discussion exercises, group projects, quizzes and written assignments, students will enhance their knowledge and awareness of the role of social and behavioral sciences in public health and its relevance to their specific discipline. At the conclusion of the course students will be able to: identify the important social and behavioral determinants of health; describe the inter-relationships between the social, behavioral, biomedical, physiological, and environmental factors related to individual and community health; identify the major health disparities related to social, behavioral and economic factors; describe the role of culture and socio-economic status in health behavior, access to services, and decision-making; and understand the importance of community partnerships and participatory approaches in the development, implementation, management and evaluation of community policies and programs.

**Academic Career: GRAD**
**Course Component: Lecture**
**Grade Component: Grad Letter Grade**

**BCHS 2510 - GRNTSMANSHIP FOR ORGZTN ADMIN**
Minimum Credits: 3  
Maximum Credits: 3  
The course will prepare students to develop skills which will facilitate their ability to obtain external funding for their organization. The course will also examine how grantsmanship will enhance the position of the administrator. Topics include the impact of external funding on the organization, sources of funding, how to prepare an application, intellectual property issues, budgeting, animal care and human subjects requirements, use of shared resources, scientific integrity issues, and preparation for site visits.

**Academic Career: GRAD**
**Course Component: Seminar**
**Grade Component: Grad Letter Grade**

**BCHS 2511 - INDEPENDENT STUDY**
Minimum Credits: 1
Maximum Credits: 3
Students with major interests in specialty areas participate in courses of individual study, research activities, or advanced readings with a specified faculty member.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

BCHS 2512 - HLTH PROGRAMS & PROJECT MGMNT
Minimum Credits: 2
Maximum Credits: 2
Introduction to functions, techniques, skills, systems, and use of human and other resources for effective management of health programs and projects.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2513 - FINANCIAL MGT HEALTH CRE ORGNS
Minimum Credits: 2
Maximum Credits: 2
Teaches principles and techniques of financial management as applied to health care organizations, considers financial information and its use in making health care industry decisions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2514 - MENTAL HLTH DURING EMERGENCIES
Minimum Credits: 3
Maximum Credits: 3
This course will survey the psychological and social factors affecting community and individual responses to disasters and the techniques used by mental health workers to assist them. It will also explore the legal authority for mental health response and the roles and responsibilities of mental health response teams and crisis counselors. The work of critical incident stress management teams and public agencies will be described.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2520 - THEORIES HLTH BHVR & HLTH ED
Minimum Credits: 3
Maximum Credits: 3
The course is designed as an introduction to the major theories that are the foundation for most health promotion and health education interventions. It will provide the student with exposure to the current theories that are being used in health behavior and health promotion educational interventions. It will also provide students with a theoretical foundation for designing, implementing and evaluating health promotion and education programs.

Academic Career: GRAD

**BCHS 2523 - PH PRGM PLNNG & PROP SL WRITNG**

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expose students to critical health program planning, implementation and evaluation tools and strategies in a format that models actual program implementation. It is a required course for BCHS master's students and has been developed in response to requests from students for guidance in developing the skills necessary for the effective execution of public health interventions. This class complements other BCHS coursework in that it gives the student the opportunity to apply theories and models learned in other classes. In particular, the socio-ecological theory heavily influences the content of this course. Through discussions, presentations, written assignments, and in-class activities, students will learn resources for, and gain practice in, the stages of program development, including budgets and use of logic models. Students will learn how to present their program proposals in both written and oral formats.

**BCHS 2524 - OVERVIEW OF HEALTH EQUITY**

Minimum Credits: 3

Maximum Credits: 3

Achieving health equity and understanding health disparities involve a critical analysis of historical, political, economic, social, cultural, and environmental conditions that have produced an inequitable health status for vulnerable populations in the United States. Health disparities are an important focus on improving population health and one of healthy people 2020's overarching goal is 'to achieve health equity, eliminate disparities, and improve the health of all groups'. The purpose of this class is to introduce basic issues that underlie health disparities. This course will include an overview of current literature and foster discussions that will examine health disparities, explore social and environmental determinants of those disparities, critically review measurement issues, and determine public health's response to addressing these disparities and achieving health equity. Students should seek to critically reflect on their personal and professional roles in eliminating health disparities and achieving health equity.

**BCHS 2526 - HLTH EQUITY RES: METH & INTRV**

Minimum Credits: 3

Maximum Credits: 3

This course is one of the series of courses required for the certificate in health equity, and will examine the challenges in, and methods for, health inequities research and interventions. It is intended to both complement and expand upon the knowledge gained in other BCHS courses and/or professional exposure by focusing on a wide range of populations that experience health inequities. Inequities that we will explore include (but not be limited to) those evidenced by gender, ethnicity, disability, socioeconomic status, sexual orientation, and rural/urban living. Through discussions, presentations, written assignments, and in-class activities, students will gain exposure to methods and resources for research in health inequities. This
will include ethics and research in diverse communities; barriers and facilitators to engaging diverse populations in health research; advisory boards and coalitions; data bases and research designs utilized in equities research, and the application of research findings to program development. Students will work both in interdisciplinary teams and individually to effectively present their work in written and oral presentations.

**BCHS 2527 - LEADERSHIP CMMNY-BASED PH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Community-based programs encourage people to be trustees of their communities who work for the common good, become a leadership resource for the entire community, who understand and facilitate collaboration, consensus building, and creative problem solving in addressing community needs. This course is designed to familiarize students with the basic principles, methods, and tools for building leadership in communities. The aim of this course is to provide students with opportunities to develop and enhance their individual leadership skills, capacities, and personal leadership attributes with an emphasis on the ability to impact group values and solidarity. Through class lectures, simulations, and course readings, students will understand leadership capacity as a foremost predictor of successful community-based public health initiatives.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2528 - INTGRTV SEM IN HEALTH EQUITY**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This one credit seminar serves as the integrative course for the health equity certificate. Students build upon and apply the knowledge and experiences gained from all of the previous certificate core and elective courses to specific public health problems while considering a health policy framework. The seminar is designed to expose students to the critical analysis of a health policy as it affects health equity, as well as provides an opportunity for students to network with a variety of academic and community leaders that can potentially further their knowledge and practical skills in this area.  

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 2530 - INJURY PREVENTION AND CONTROL**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will provide an overview of major causes of unintentional, intentional, and occupational injury prevention and control programming.  

**Academic Career:** GRAD  
**Course Component:** Lecture

**BCHS 2532 - DIMENSNS OF AGING: CULT & HLTH**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Provides an overview of the aging experience from a cross cultural and a public health perspective. The ways in which people cope with and adapt to the aging process is the major theme.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 2533 - ISSUES LONG TERM CARE SERVICES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Long-term care is a system of institutional and community based services for the aging population. Using this frame work, services and delivery systems are analyzed for adequacy and appropriateness; system-wide issues identified and discussed; and selected components of the delivery system examined for administrative problems.  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
BCHS 2534 - CLIN ASPECTS OF DEMENTIA CARE
Minimum Credits: 2
Maximum Credits: 2
This course is designed as an independent study for students in the public health and aging program. Its focus is on the methods and technology for diagnosis and treatment of Alzheimer's Disease.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2535 - ANALYSIS OF HEALTH PROMOTION
Minimum Credits: 2
Maximum Credits: 2
Course takes a multidisciplinary approach to analyzing strategies for health promotion. Students are acquainted with information on the effectiveness of education, behavior medicine, economic and legislative strategies to promote healthier lifestyles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2538 - INTRODUCTION BEHAVRUAL RESEARCH
Minimum Credits: 3
Maximum Credits: 3
An introduction to research methods applied to the study of health organizations such as hospitals, health departments, clinics, etc. Major emphasis is on SPSS and BMBP computer packages. Develops research skills for writing essay.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2540 - SEM ADM MENTAL HEALTH-RETARDTN
Minimum Credits: 2
Maximum Credits: 2
Administration problem areas such as record keeping, budgets, mental health legislation, commitment laws, and patients' rights, relationships with professionals, lay boards, and community groups are discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2541 - RESEARCH METHODS ON AGING
Minimum Credits: 2
Maximum Credits: 2
This course is designed to familiarize students with methods for conducting research on aging populations. Through lecture, discussion and examples of current research the instructors will provide a basic understanding of the appropriate methods for data collection and the problems and issues related to the conduct of research on older adults. Students are required to have taken some courses in aging, or be familiar with the basic concepts on aging theory and research design.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2544 - REGLTN HLTH, SAFTY & ENV RISKS
Minimum Credits: 3
Maximum Credits: 3
The focus of this course is on regulatory agencies that manage risks to human health - the alphabet soup of EPA, OSHA, MSHA, FDA, NRC, NTHSA, and CPSC - although public health programs are performing. That risk requires an inquiry into the normative criteria that define success; cost per life saved", equity preserving liberty, etc. The course also examines the political basis for these programs and the feasibility of policy changes. Students are encouraged to grapple with problems faced by regulatory agencies or the regulated community."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
BCHS 2545 - INTRO COMMUNITY MENTAL HEALTH
Minimum Credits: 2
Maximum Credits: 2
Overview of field; background material regarding philosophical, social, and psychological impetus for community-based mental health programs.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2546 - THE POLIT OF PUBLC HLTH IN PA
Minimum Credits: 1
Maximum Credits: 1
This introductory course will explore the politics of public health in the state of Pennsylvania. It will provide an overview of the political process including the structure of state government, state governmental process, development of political agendas, the use of this structure and process to meet public health goals. Detailed attention will be directed toward the identification of specific public health issues of interest to legislators and the development of position papers on those issues by students participating in the class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2548 - COMNY MENTL HLTH CONSUL TECHNQ
Minimum Credits: 1
Maximum Credits: 1
Through seminar and actual consultation experience, the processes that extend the effectiveness of mental health specialists to other personnel in areas of community organization, program development, education, and service are studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BCHS 2550 - HEALTH POLICY IN UNITED STATES
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to current problems of health care and health policy in the United States. Description and analysis of the proposals, current practices, and the reactions of interest groups will be the central theme of the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2552 - POL & LEGAL FACTRS PUBLIC HLTH
Minimum Credits: 2
Maximum Credits: 2
Provides an overview of principles established by the us constitution, federal and state legislation, and judicial decisions affecting the provision of preventive and therapeutic health services, with the focus on how health services administrators recognize principles and concepts applicable to specific situations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2553 - WOMEN, INT'L DVLP & GLBL HLTH
Minimum Credits: 3
Maximum Credits: 3
This course will examine the impact of recent international developments on women's lives, health and well-being, as well as explore responses of diverse groups of women to these global changes. The focus will be on societies in Asia, Africa, and Latin America, with some attention to comparable issues in the us and Europe. Linking the fields of international development, anthropology, and global health, objective is to identify and critically evaluate gendered dimensions of globalization, in order to support women's own goals for creating and sustaining healthy lives and communities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
BCHS 2554 - INTRO TO COMMUNITY HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course uses strengths-based and social ecological approaches to prepare students for practicing public health with communities. Through in-class activities, discussions, community-based experiences and written assignments students will learn appropriate ways to engage communities and assist them in building their own capacity to identify and address health issues. Students will also learn techniques for conducting community health assessments using both primary and secondary data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (PHD, DPH, MPH)

BCHS 2555 - INT'L HLTH POLICY & MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
Introduction to the political, legal, and public health bases for international health programs; multilateral, bilateral, and nongovernmental.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2556 - SEM PROGRAM MGT IN INT'L HLTH
Minimum Credits: 1
Maximum Credits: 1
Introduction to the concepts of management of international health programs and projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2557 - INTERNATIONAL HEALTH PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
Students will be assigned to international health policies for experience abroad or on campus. Assignments will be arranged according to student goals and capabilities and coinciding program availability and appropriateness.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

BCHS 2558 - HEALTH PROGRAM EVALUATION
Minimum Credits: 3
Maximum Credits: 3
Surveys the evaluation and policy research methods applied to health. Students learn to critically assess the adequacy of evaluations and how to plan and pilot test an evaluation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2559 - COMNY DEVELP APPRCH PUBLC HLTH
Minimum Credits: 3
Maximum Credits: 3
Students will study community development as a strategy to improve health and increase community capacity. This approach emphasizes communities as cultural systems rather than aggregates of individuals and taxes a strength-based and social-ecological approach rather than one that focuses on identifying community deficits through class exercises, readings and lectures. Students will learn practical methods for engaging communities. The course is required and should be taken in the first semester. Students will not work directly with communities but participate in community simulations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Behavioral & Community Hlth Sc (MPH, DPH, PHD)
BCHS 2560 - INTRO TO POPULATION PROBLEMS
Minimum Credits: 3
Maximum Credits: 3
The impact of population growth, distribution, and change on social, economic, environmental, and health relationships is presented with a focus on the sociopolitical responses to population dynamics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2561 - DEMOGRAPHIC TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
Covers demographic techniques, including rates and ratios, standardization, complete and abridged life tables, fertility, morality, and migration measurement, and population projection and estimation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2562 - SEMINAR IN FAMILY PLANNING
Minimum Credits: 3
Maximum Credits: 3
Participants explore the history of contraception and the birth control movement. Issues related to contraceptive care and the broader concerns of women's health are discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2563 - COMMUNITY HEALTH ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Techniques for assessing and projecting selected community characteristics and population health status from the view point of community health programming. Covers both primary and secondary data such as demographic data, health-care utilization and survey data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2564 - GENDER, CLASS POLIT REPRODC
Minimum Credits: 3
Maximum Credits: 3
This course centers attention on the interplay between gender, sexuality, class, and reproductive behavior in diverse socio-cultural contexts. The starting point are critiques from within and outside of socio-cultural anthropology (especially social history) that mainstream, positivist demography has not adequately dealt with (theoretically and methodologically) with how cross-cultural expressions and variations of gender, sexuality, and class have shaped reproductive behavior. This course will survey key works in anthropological demography, social history, and feminist demography with the objective of exploring the emergence of "whole demographies" (Kertzer) that seek to demonstrate the importance of "situating" reproductive behavior in "the sociocultural and political economic context in which it is embedded," and that "historicize demographic analysis" by viewing historical and power-laden processes as "ingredients] in the making of reproduction" (Greenhalgh).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BCHS 2565 - MATRNL & CHLD HLTH APPLD RSRCH
Minimum Credits: 2
Maximum Credits: 2
This course considers the historical, social and economic factors in the design, implementation and analysis of maternal and child health applied research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
BCHS 2566 - POPULATION, HLTH & DEVELOPMNT
Minimum Credits: 2
Maximum Credits: 2
Three interrelated issues are examined: 1) rationale for comprehensive multisectoral planning for health in the context of development; 2) formulation of policy based on such a rationale; 3) implementation problems and alternative solutions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2568 - HUMAN DIVERSTY & PUBLIC HEALTH
Minimum Credits: 2
Maximum Credits: 2
This course will provide a theoretical framework for designing policy, research, and programs for diverse populations. Opportunities for expanding understanding and examining attitudes about human diversity will be presented. Community organizations and marketing methods related to program design and recruiting and sustaining volunteer or patient participation in programs will be a major focus of the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

BCHS 2570 - INTRO HLTH SERVC MOTHER & CHLD
Minimum Credits: 2
Maximum Credits: 2
The scope organization and financing of national and local health promotion, disease prevention, early detection, diagnostic treatment, and rehabilitative services are surveyed with respect to historical trends and current issues involved in maternal and child health program planning and implementation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2572 - RISK COMMUNICATION
Minimum Credits: 3
Maximum Credits: 3
Course focuses on risk communication within the context of terrorism and natural disasters. The didactic and experiential course will include core principles of risk communication, examine special challenges of risk communication with diverse audiences and media, and prepare students to create risk and crisis communication campaigns.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2574 - PUBLIC HLTH PROMTNG CHLD DVLP
Minimum Credits: 3
Maximum Credits: 3
Topics such as day care, child and adolescent abuse, motherhood, and assessment of high risk infants will be considered as they pertain to public health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2575 - SEMINAR MATERNAL & CHLD HEALTH
Minimum Credits: 3
Maximum Credits: 3
Seminar deals with current issues in society affecting the health of children and their families. For example, problems of adolescent pregnancy, child abuse and neglect, emotional abuse and sexual abuse; prevailing attitudes and responses; etiology and risk factors; and multidisciplinary preventive strategies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
BCHS 2579 - INTRO TO PH EMRGY PREPRDNS
Minimum Credits: 3
Maximum Credits: 3
Introduction to role of public health professionals in community emergency planning and response to all types of disasters. Covers theory and practice of incident command system, role of local, state and federal agencies, surveillance and information systems, risk communications, training and evaluation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2580 - ISSUES IN CMMNTY HLTH NURSING
Minimum Credits: 2
Maximum Credits: 2
Reviews current issues in public health/community health nursing (PHN/CHN): 1) evolvement of nontraditional roles and settings for PHN/CHN; 2) education of practitioners in PHN/CHN; and 3) delivery systems in PHN/CHN.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BCHS 2581 - SUPRVSN & ADMINSTRTN PHN/CHN
Minimum Credits: 2
Maximum Credits: 2
Covers supervision and staff development in PHN/CHN, administration and management of PHN/CHN services, consultation in PHN/CHN, and planning and evaluation of PHN/CHN services.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

BCHS 2582 - ADV CLINCL EXPERN COMNY NURSNG
Minimum Credits: 4
Maximum Credits: 4
Each student has an advanced clinical experience in supervision, consultation, or administration in community health nursing.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

BCHS 2585 - HISTL SOCLGCL PERSP PBLC HLTH
Minimum Credits: 3
Maximum Credits: 3
Seminar will examine, through assigned readings and discussions, the historical and sociological influences on specific topics within the broad field of public health. Particular attention will be placed on the impact of five general themes on the evolution and current status of public health; the role of government, urbanization, industrialization, religion, and advances in science and technology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BCHS 2588 - CHILD & YOUTH HEALTH: GRENADA
Minimum Credits: 3
Maximum Credits: 3
This course uses a service-learning approach to examine child and youth concerns and practices for promoting healthy outcomes. A multidisciplinary focus will be applied to understand children's health risks, health care disparities and ecological and cultural influences on health. Students will collaborate with educators and public health workers in Grenada to enhance the health and well-being of children and youth who reside in the Carriacou Community of Grenada.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
BCHS 2590 - EPDMLGCL METH ANLZNG PROBLEMS
Minimum Credits: 2
Maximum Credits: 2
Schema illustrating the classical host-agent-environment relationship will be examined in their application to social problems and the implications they hold for intervention. Format includes lectures and student presentations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BCHS 2591 - PRIN OF CONSUL & INTDIS PRACTC
Minimum Credits: 2
Maximum Credits: 2
Basic theoretical concepts and principles of consultation are identified and analyzed, and their application to interdisciplinary public health practice is examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2592 - INTGRTV SEM PBLC HLTH SOCL WRK
Minimum Credits: 1
Maximum Credits: 1
Provides the social worker an opportunity to integrate previous course content into a framework relevant to the practice of public health social work.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

BCHS 2595 - HUMAN ECOLOGY AND HEALTH
Minimum Credits: 3
Maximum Credits: 3
Emphasis on comparative analysis of biological and sociocultural adaptations which affect health illness and their management in human populations. The framework is evolutionary, ecosystemic and multidisciplinary, and is applied to populations selected internationally as affected by particular health disorders of high prevalence and of current concern. Presentations will combine lecture, student reports, and seminar discussions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BCHS 2598 - SOCIAL INEQUALITIES IN HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course critically evaluates social science and epidemiological theory and research on social inequalities in health. A consistently important finding is the positive gradient between socioeconomic position and health. Is this gradient socially patterned? This question is examined by drawing on research from U.S., Other industrialized countries, and the third world. This course devotes special attention to conceptual and measurement issues, the social context of health, hierarchical linear modeling or multilevel analysis, and ecological and life course perspectives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2011 or EPIDEM 2110

BCHS 2599 - PUBLC HLTH APPRCH WOMEN HLTH
Minimum Credits: 3
Maximum Credits: 3
Public health problems affecting women, i.e., Alcoholism, smoking, occupational health, reproductive health, aging and cancer, as well as health and social problems relating primarily to women are discussed. Etiology of health problems, prevention and treatment, high-risk groups, and controversies related to care are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
BCHS 2608 - INTRODUCTION TO CBPR
Minimum Credits: 1
Maximum Credits: 1
This course is organized around themes central to the conceptualization and implementation of community-based participatory research (CBPR). The goal of this course is to familiarize students with CBPR. Students will become conversant in seminal CBPR literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BCHS 2609 - TRANSLATING RESEARCH FOR POLIC
Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community-based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in transLating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in KT as an aspect of community-partnered research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BCHS 2610 - CONCEPT MAPPING
Minimum Credits: 1
Maximum Credits: 1
This course provides hand-on training in the participatory research method known as concept mapping (CM). CM gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CM and the associated strengths and limitations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BCHS 2995 - GLBL PERSPS ON WOMEN'S HEALTH
Minimum Credits: 2
Maximum Credits: 2
Limited educational opportunities, financial dependence, and gender bias and discrimination are intersecting factors that contribute to poor health status and well-being among women around the world. This course examines the relationship between such macro-level factors and women's health and explores promising interventions and policy changes aimed at promoting women's empowerment, gender equality, and improved and sustained health outcomes for women. Specific attention is given to examining the connection between women's health and educational and legal initiatives and microfinance programming. Illustrative case examples are drawn from instructor global experience conducted on related research in Thailand, India, and Peru and relevant readings. Key health issues discussed will include gender-based violence, reproductive and sexual health, and pregnancy outcomes. To emphasize key points, guest speakers from diverse fields, including women's studies, ethics, law, and economics will be invited to provide additional insights regarding the complexities associated with the topic and with effective and innovative intervention development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Letter GRD

BCHS 2999 - MODELING COLLECTIVE BEHAVIOR
Minimum Credits: 3
Maximum Credits: 3
Students will learn to use and create dynamic models of health behaviors, and how to apply these to plan and evaluate behavior change interventions. We study ecological and evolutionary models of individual protective action and public health cooperation amidst biological and behavioral diversity. Students will solve problems using the course's online interactive models, create models using agent-based modeling software, interpret results and describe public health implications.
BCHS 3001 - HEALTH ORGNS & HEALTH PROFSSN
Minimum Credits: 3
Maximum Credits: 3
The work of social scientists who have studied the structure and operation of health organizations and the role and operation of the health professions in modern society will be reviewed.

BCHS 3002 - HEALTH SURVEY METHODS
Minimum Credits: 3
Maximum Credits: 3
Introduces techniques for the collection of health data through survey methods.

BCHS 3003 - SEM IN ADVANCED EVAL TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
Evaluates theory and methodology with emphasis upon human service organizations.

BCHS 3004 - INTGRTV RES SEM: GRANT WRITING
Minimum Credits: 1
Maximum Credits: 1
Every graduate of a doctoral program needs to know how to write a successful grant application to fund their work. Whether you are a senior manager leading a public health program in the public or non-profit sectors or you are a researcher working in an academic setting, you will need funding to support your work! We begin this doctoral seminar by asking the question, how do you write a grant proposal that will attract the attention of a funding agency and convince them that your application is significant and should be a priority for funding? Building on the ideas articulated in BCHS doctoral students’ preliminary examination, we will focus on writing the specific aims and significance sections for an NIH grant proposal. The students’ written work will be shared with and critiqued by other students and faculty participating in the seminar. Finally, we will review and critique examples of successful and unsuccessful grant applications “both program and research grants (especially research grants that the students will most likely be writing at the beginning of their academic careers” namely, ro-3s or r-21s).”

BCHS 3005 - HISTORY & ETHICS OF HEALTH CRE
Minimum Credits: 2
Maximum Credits: 2
The historical and ethical foundations of the contemporary health-care system in the United States will be analyzed. Concepts from political science, social science, social psychology, and philosophy will be stressed.

BCHS 3007 - ETHNOGRAPHIC QUALITATIVE MTHS
Minimum Credits: 3
Maximum Credits: 3
Students will be introduced to the basic principles of ethnographic research and their application to the evaluation of human service and health care programs. They will become familiar with research design in ethnographic studies; the process of fieldwork in urban settings; the methodology of
participant observation and ethnographic interviewing; recording ethnographic data; ethnographic writing; and ethical questions surrounding ethnographic research.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**BCHS 3008 - QUALTV RESEARCH METHODOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to the use of ethnography, case studies, in depth interviews, and participant observation in research.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 3010 - RESEARCH AND DISSERTATION PHD**  
**Minimum Credits:** 1

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**BCHS 3011 - SEMINAR IN HEALTH LAW**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The status of law and the policy issues inherent in the legal context relevant to selected health matters will be analyzed. Emphasis will be on the convergence of, or inconsistency between, law and policy, developed through student presentations.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 3012 - RESEARCH ETHICS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Overview of basic ethical issues which arise in the course of carrying out biomedical and psychosocial research. Emphasis is on research involving human subjects. Each session will provide the theoretical underpinnings of a particular ethical area and its practical implications when carrying research.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**BCHS 3015 - MAPPING & SPATIAL ANALYSIS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides an introduction to the use of spatial data in public health. The two main goals are (1) to familiarize students with the use of geographic data in public health research and practice; and (2) to introduce basic spatial analytic skills applied to geographic and spatial data. Students will be taught how to use geographic information systems (GIS) to inform both community practice and research. They will learn how to create, manage, and analyze geographic data and gain hands-on experience applying these techniques to research questions. No previous knowledge of mapping or GIS is assumed. One lecture and one lab per week.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 3020 - ADV ETHNOGRAPHIC METHODS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides students who are already familiar with the basic principles and procedures of ethnographic/qualitative research with an opportunity to deepen both their understanding and their practice of these methodologies. The core of the course consists of direct experience in conducting ethnographic research under the close mentoring of the instructor, working together to conduct a diversity of studies with local
community-based child and family health and development programs.

**Academic Career:** GRAD  
**Course Component:** Lecture

**BCHS 3030 - MEASURMNT IN SOCL & BEHVRL SCI**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The goal of this two-credit course is to provide you with fundamental skills to identify, use and create scales and indices for research and evaluation. The course will be primarily based on classical measurement theory, yet we will discuss item response theory as well. We will also cover good measurement processes, including establishing and evaluating validity and reliability. We will address communication of measurement principles and applications to lay and scientific audiences. Throughout the course, materials will highlight the influence that culture and socio-demographics have on measurement tools and their validity.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**BCHS 3503 - PREVN SCI TRANLTNG KNOWL PRAC**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to provide a solid grounding in basic concepts, theories, practical approaches and methods associated with prevention (defined here as both problem prevention and health promotion). The course will focus on behavioral and Psychological areas including substance abuse, mental health, victimization, and sexually transmitted infections, including HIV.

**Academic Career:** GRAD  
**Course Component:** Lecture

**BCHS 3508 - ADVANCED METHODS CBPRP IN PH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is organized around themes central to the conceptualization and implementation of community-based participatory research and practice (CBPRP). The goal of this advanced course is to familiarize students with methods for conducting community- based participatory research and practice. Students will become conversant in seminal community-based participatory research and practice literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an advanced understanding of the appropriate methods for studying complex community issues. In addition, the course will discuss strengths and limitations related to community-based participatory research and practice.

**Academic Career:** GRAD  
**Course Component:** Lecture
**BCHS 3555 - DCTRL SEM BCHS THEORIES/MODELS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

This course is a requirement for students in the doctoral program in the department of behavioral and community health sciences. The seminar is designed to stimulate critical thinking about specific public health issues from within the framework of various behavioral and community theories and models. The purpose of this doctoral seminar is to critically apply and evaluate specific conceptual models and theoretical frameworks to particular significant public health problems or issues. This requires that seminar participants acquire close working familiarity with various conceptual tools and substantive issues. One goal underlying the selection of the substantive issues has been to select those which challenge, provoke, confront, excite, and stimulate seminar participants about economic and political controversies in contemporary healthcare and public health. Similarly, the selection of issues and reading materials dealing with those issues, challenge taken-for granted assumptions with respect to health and illness, public health and medical care as well as health policies and health politics. A final objective of the seminar is to challenge participants to reassess their conception of the field of public health and their place in it. Is it a profession? A discipline? An applied social science? What are the implications/consequences of each?

**BCHS 3703 - EXECUTIVE MANAGEMENT PRACTICUM**

**Minimum Credits:** 1  
**Maximum Credits:** 3  

The purpose of the executive management practicum is to provide a structure for students in the DRPH program to gain experience in the application of the core set of competencies in high level practice settings. The association of schools of public health has identified seven competencies that students are expected to master during their doctoral study. Four of these are the focus of the practicum: advocacy, communication, leadership, and management. Practicum sites will be chosen based on the mission of the organization and the opportunity for the student to be able to exercise and refine their skills in the areas of management, leadership, communication and advocacy.

**BCHS 3707 - MULTPL REGRESN ANAL AND MODLNG**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

This course was designed to teach advanced graduate students how to use applied multivariate regression analysis to design, propose, and test complex research questions using a causal modeling framework. The course will include a brief review of simple linear regression, and quickly move to advanced multiple regression analysis topics including multiple predictor regression, stepwise regression approaches, the analysis of longitudinal data with regression, and examining mediators, moderators and confounding variables and their relationship to the independent and dependent variables of interest. The course will also include several other brief seminars on regression diagnostics, dichotomous predictors and outcome variables, power analysis, and an introduction to other multivariate analysis frameworks including structural equation modeling and longitudinal growth modeling. Students will be required to bring their own multivariate data set and research questions to use for class assignments, preferably data directly related to their dissertation project.

**BCHS 3888 - PREP FOR COMPREHENSIVE EXAM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

The purpose of this course is to provide BCHS doctoral students with an opportunity to become familiar with the literature in their chosen field of study. In addition, this course will facilitate the transition of doctoral students from the coursework to the dissertation phase of their program. Over the course of the semester, the student will work to refine a topic for his/her dissertation by becoming familiar with the relevant body of literature and will write a paper detailing (annotated) the outline of the dissertation. This paper should detail the central themes, issues and questions which drive the research in the student's chosen field of study and of which the student needs to have a substantial knowledge in order to conduct research. In addition, the paper needs to include a review of the main theoretical concepts and methodologies that the student plans to use for his/her dissertation work. This paper will form the basis of the student's subsequent comprehensive examination (but it does not constitute the examination). Doctoral students who wish to register for this course should do so during the last semester of their coursework.
Behavioral Science

BHVSCI 2110 - CLINICAL EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
The objective of this course is to familiarize students with the concepts and methods of epidemiological research. Special emphasis will be given to the area of clinical epidemiology so that students will be able to understand how clinical research becomes the foundation for clinical practice. In addition to lectures, students will be expected to search the dental literature for relevant papers.

BHVSCI 2191 - MGT OF DENTAL FEARS & ANXIETY
Minimum Credits: 0.5
Maximum Credits: 0.5
These seminars provide training in actual assessment and the treatment of dental fears (panic disorder, phobia, generalized anxiety in patients. The topics are: evaluation of the literature regarding epidemiology and causation, literature review of assessment options and training in assessing dental fear, review of literature on treatments used to reduce dental fear, application of specific behavioral techniques, application of biofeedback as a desensitizing technique; and use of medications in alleviating dental fears. Observation of patients may occur.

BHVSCI 5060 - INTERPERSONAL SKILLS
Minimum Credits: 0
Maximum Credits: 0
Students will learn to conduct interviews using effective communication skills. Readings, lectures and exercises will deal with barriers to successful communication, active listening, empathic responding and similar matters. Supervised application of appropriate principles (role playing) and other interactional sessions will be used to provide experiential learning.

BHVSCI 5111 - HEALTH PSYCHOLOGY
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to introduce first year dental students to the field of health psychology particularly as it relates to the treatment of dental populations and conditions and the maintenance of oral health. Topics include stress, coping, communication, patient compliance, oral health promotions, facial esthetics, additions, and psychosocial aspect of oral cancer, cleft lip/palate, and HIV / Aids.

BHVSCI 5117 - COPING WITH DENTAL SCHOOL
Minimum Credits: 0.5
Maximum Credits: 0.5
This unit is presented in a small group discussion format and is meant to ease the students' transition into dental education. Students are also made aware of the range of personnel available to help them with the transition.

BHVSCI 5127 - COPING WITH DENTAL SCHOOL
Minimum Credits: 0.5
Maximum Credits: 0.5
This unit is presented in a small group discussion format and is meant to ease the students’ transition into dental education. Students are also made aware of the range of personnel available to help them with the transition.
Academic Career: DMED
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BHVSCI 5141 - HEALTH PSYCHOLOGY
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to introduce first year dental students to the field of health psychology particularly as it relates to the treatment of dental populations and conditions and the maintenance of oral health. Topics include stress, coping, communication, patient compliance, oral health promotion, facial esthetics, addictions, psychosocial aspect of oral cancer, cleft lip/palate, and HIV/AIDS.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

BHVSCI 5142 - BEHAVIORAL MEDICINE
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to introduce first year dental students to the field of behavioral medicine particularly as it relates to the treatment of dental populations and conditions and the maintenance of oral health. Topics include stress, coping, communication, patient compliance, oral health promotions, facial esthetics, addictions, and psychosocial aspect of oral cancer, cleft lip/palate, and HIV/AIDS.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BHVSCI 5181 - ADDICTIONS AND SOCIAL ISSUES
Minimum Credits: 1
Maximum Credits: 1
This course will provide students information regarding the interactions which occur between dentists and their patients. This will include information on psychopathology, sociocultural diversity and the effects of physical illness on patient attitudes and behavior. There will be a special emphasis on dealing with fears relating to occupational exposure to HIV infection and appropriate sensitivity to persons who are known to be HIV infected.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BHVSCI 5210 - ADDICTIONS AND SOCIAL ISSUES
Minimum Credits: 1
Maximum Credits: 1
This course will provide students information regarding the interactions which occur between dentists and their patients. This will include information on psychopathology, sociocultural diversity and the effects of physical illness on patient attitudes and behavior. There will be a special emphasis on dealing with fears relating to occupational exposure to HIV infection and appropriate sensitivity to persons who are known to be HIV infected.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

BHVSCI 5228 - COMMUNICATION AND INTERVIEWING
Minimum Credits: 1
Maximum Credits: 1
Communication and interviewing is a second year dental course. The goal of the communication segment is to provide the undergraduate dental student with an enhanced understanding of the psychosocial aspects of interpersonal communications and to teach skills to enhance those communications. The interviewing unit is designed to teach enhanced information gathering abilities during dental medical history taking interviews. Lectures, modeling and role playing are employed in this course.
Academic Career: DMED
**BHVSCI 5243 - BEHAVIORAL MEDICINE 2**  
Minimum Credits: 1  
Maximum Credits: 1  
This course presents an overview of dentally related subjects which have an important behavioral component. Course content includes the behavioral management of older adult dental patients, stress management for dentists, management of dental fear, substance abuse, and child abuse. Whenever possible, the application of behavioral principles to the practice of dentistry is stressed.  
Academic Career: DMED  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BHVSCI 5341 - INTRO TO BEHAVIORAL MEDICINE**  
Minimum Credits: 1  
Maximum Credits: 1  
This is an upper level course taken concurrently with clinical practice in the modules, providing you the opportunity to practice the behavioral skills discussed in class. It is the only behavioral medicine course in the four-year curriculum and fulfills the behavioral medicine requirement. There are no prerequisites. The course provides science-based behavioral solutions for common oral health problems. By the end of the course, you will be able to create and apply treatment plans for common oral health problems that incorporate behavioral solutions.  
Academic Career: DMED  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

**BHVSCI 5381 - PRINCIPLES OF ETHICS**  
Minimum Credits: 0.5  
Maximum Credits: 0.5  
This course will examine ethical issues related to the concept of professionalism and professional behavior. The concept of a code of ethics and its importance to a profession will be examined, specifically the ADA Code of Ethics and its relevance to the practice of dentistry.  
Academic Career: DMED  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

**BHVSCI 5421 - CLINICAL ETHICS**  
Minimum Credits: 0.5  
Maximum Credits: 0.5  
This course will examine ethical issues related to the practice of dentistry. Students will examine the characteristics of professions, models for the doctor/patient relationship and the roles of dentists and professionals.  
Academic Career: DMED  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BHVSCI 5960 - INTERPERSONAL SKILLS**  
Minimum Credits: 0  
Maximum Credits: 0  
Students will learn to conduct interviews using effective communication skills. Readings, lectures and exercises will deal with barriers to successful communication, active listening, empathic responding and similar matters. Supervised application of appropriate principles (role playing) and other interactional sessions will be used to provide experiential learning.  
Academic Career: DMED  
Course Component: Seminar  
Grade Component: Grad HSU Basis

**Bioengineering**

**BIOENG 2000 - BIOENG SIGNAL ACQUISITIONS LAB**  
Minimum Credits: 3  
Maximum Credits: 3
A signal is any physical quantity whose magnitude and variation with time contain useful information. In order to measure any signal, a physical quantity must first be converted to an electrical pattern (analog or digital, time-varying), such as a continuous voltage or current, via a transducer (sensor). Conversely, computers can interact with the environment using appropriate hardware to translate digital patterns to physically meaningful control signals. Lectures for this course will cover real-world issues associated with acquiring and generating signals. Signals that are relevant for biomedical engineering will be discussed specifically. Concepts will be reinforced via hands-on laboratory exercises and examples utilizing national instruments lab-view. Students will be provided with an overview of the lab-view programming language to facilitate the laboratory experience.

BIOENG 2001 - MATH METHODS BIOENGINEERING I
Minimum Credits: 3
Maximum Credits: 3
All you don't want to miss in mathematics will be covered in this first course of bioengineering graduate students. Solving systems of linear equations and ordinary differential equations will be covered with engineering examples and assignments. Finite difference methods for boundary value problems, Laplace equation, Poisson equation, parabolic partial differential equations, and hyperbolic differential equations will be discussed along with project assignments. Fourier series will be introduced as well.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2005 - RF MEDICAL DEVICES
Minimum Credits: 3
Maximum Credits: 3
The course will cover topics related to applied electromagnetics in medicine. Topics such as Maxwell equations, wave equations, transmission lines, electromagnetic theorems, introduction to antennas, and introduction to computational electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications such as MRI, biological sensors, RF ablation.

BIOENG 2016 - FUNDM PRIN BIDEGRBL METLC ALLY
Minimum Credits: 3
Maximum Credits: 3
Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology. Introduction to materials science and engineering would be preferred but is not a prerequisite.

Grade Component: Grad HSU Basis

BIOENG 2035 - BIOMECH MODELING OF MOVEMENT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on goal-directed modeling approaches used in research and industry to simulate, validate, and analyze the biomechanics involved in gross movement, posture and gait. First, students are introduced to the process of setting specific analytical goals and establishing the need for a specific quantitative biomechanical model. Then, basic underlying principles of inverse and forward dynamics simulations are covered with concepts of biomechanics, anthropometry and movement control theory. Model building, testing, optimization and validation approaches will be discussed. Special emphasis is put on computer simulation tools not only to illustrate the modeling techniques and concepts mentioned previously, but also to demonstrate the investigative and predictive power that dynamic models can offer. Applications are drawn from various fields including motor control, rehabilitation, occupational biomechanics, sports and orthopedics. Examples, assignments and projects using real experimental data collected in the laboratory range from simple single-joint movement simulations to more challenging human gait replications attempts. Finally, the limitations and current research challenges as presented in selected publications in the modeling literature will be discussed.

BIOENG 2045 - CMPTL CASE STDs IN BIOMD ENGR
Minimum Credits: 3
Maximum Credits: 3
Bioengineering 2045 computational case studies in Biomedical Engineering this is an interdisciplinary course that will combine: basic sciences such as electromagnetics and thermodynamics applied sciences such as numerical methods and simulations biomedical research and applications such as magnetic resonance imaging, hypothermia, heat transfer in biological bodies, and cardiac action potential, and mathematical concepts such as optimizations, linear and nonlinear equations. This course will be based on solving computational biomedical engineering problems using simulations. Some of the numerical topics will include: numerical solutions of matrices, finite element and finite-difference methods. These topics will be described with emphasis on their use in solving these problems. The course will cover setting up the mathematical description of the models and solving these problems using advanced computer codes and the supercomputer center at Pittsburgh. There will be 1d, 2d, and 3d modeling projects.
Academic Career: GRAD
**BIOENG 2050 - ARTIFICIAL ORGANS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is concerned with the design of artificial organs and their clinical usage. The basic physiology of four organ systems will be reviewed and the bioengineering design requirements for organ replacement systems considered. Commercially available systems will be analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanics and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above mentioned consideration.

Academic Career: GRAD  
Course Component: Lecture

**BIOENG 2061 - ERGONOMICS & OCUPTNL BIOMECHNC**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Fundamentals of ergonomics as applied to the industrial workplace. Specific topics include: occupational biomechanics, anthropometry, work physiology, cumulative trauma disorders and slip and fall prevention applied to the organization and physical design of the workstation, effects of hand tool design on workers, and analysis of manual material handling jobs.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2064 - BIOMECH ORGANS, TIS & CELLS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide the first year bioengineering graduate students with introductory materials for general biomechanics. The student will be exposed to various interdisciplinary fields in biomechanics. The topics include orthopaedic biomechanics, biomechanics of human movement, vascular biomechanics, cardio-pulmonary biomechanics, and biomechanics of biomaterials.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2065 - INTRO TO CELL MECHANOBIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The objective of this course is to provide an overview and a basic understanding of cell mechanobiology. The materials that will be covered in this introductory course include: 1) stress, strain, and deformation; uniaxial and biaxial loading, hydrostatic pressure; 2) fluid shear stress; 3) cell structure and function; 4) basic cell and molecular techniques; 5) effects of mechanical forces on cells; 6) Mechanotransductions; and 7) applications of Cell Mechanobiology to tissue engineering. This course will be of interest to students in bioengineering, biomechanics, biophysics, and cell and molecular biology.

**BIOENG 2080 - BIOMECH ORGANS, TIS CELLS -1**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Modern biomechanics is an increasingly diverse field that encompasses the mechanics of the whole human body and all the way to the cellular and molecular levels. This two-semester comprehensive course covers the application of biosolid mechanics to describe the mechanical behavior of organs, soft biological tissues, and cells; both native and engineered. The course will include a review of fundamental concepts and techniques of mechanics (e.g. Stress, strain, constitutive relations), and of the structure and composition of tissues and cells. The course will then focus on the mechanical properties of specific tissues, (e.g. Tendon, muscle, heart, vascular) and cells (e.g. Blood cells, valvular interstitial cells).  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2081 - BIOMECH ORGANS, TIS CELLS -2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is the second part of a two semester advanced graduate course that uses the application of biosolid mechanics to describe the mechanical behavior living structures. The course will be separated into the following: 1) fundamental concepts: a. Kinematics, stress, strain b. Balance principles, objectivity c. Hyperelastic materials 2) biological applications a. Mechanical properties of specific tissues, (e.g. Tendon, muscle, heart, vascular) b. Growth and remodeling using mixture theories c. Approaches used to model cells (e.g. Blood cells, myofibroblasts)  
**Academic Career:** GRAD

**Grade Component:** Grad LG/SNC Basis

**BIOENG 2150 - MEDICAL PRODUCT IDEATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering
BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by FDA and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ’students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ‘design for manufacture, workflows)

BIOENG 2383 - BIOMEDICAL OPTICAL MICROSCOPY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to teach the basic principles and applications of optical microscopy and imaging techniques commonly used in biomedical research. The enormous growth of optical microscopy has become an essential tool to investigate biological processes, diagnose diseases and quantitatively measure the biological system at unprecedented cellular and molecular level. It has become increasingly important for biomedical researchers to learn the proper use of optical microscopy, understand the advantages and limitations of each type of optical microscopy and how to apply them for specific biomedical applications. In this course, we will cover the physical principles involved in basic light, basic and advanced optical microscopy techniques. Strong emphasis will be given to biomedical applications for each type of optical microscopy. At the end of the course, a student will have a thorough understanding of basic principles of optical imaging and optical microscopy, learn how to apply optical microscopy to address biological questions and perform basic quantitative image analysis.
Academic Career: GRAD
Grade Component: Grad Letter Grade

BIOENG 2385 - ENGR MEDL FOR QUAN IMAG ANAL
Minimum Credits: 3
Maximum Credits: 3
BIOENG 2410 - BIO SIGNALS AND SYSTEMS 2
Minimum Credits: 3
Maximum Credits: 3
Graduate level introduction to mathematical foundations of signal and image processing, with many examples from biology and bioengineering. The course relates frequency domain analysis, boundary and shape analysis, communications and control theory to biological systems and bioengineering applications. Examples from human physiology include auditory, visual, and neuromuscular systems. Special attention is paid to how video, audio, music, graphics, and robotics interface with human perception and control.

BIOENG 2411 - MATHMTL MTHS CHEMICAL ENGR 1
Minimum Credits: 3
Maximum Credits: 3
Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.

BIOENG 2505 - MULTI MODAL BIOMD IMAGNG TECHN
Minimum Credits: 3
Maximum Credits: 3
In this course some newly evolving multi-modal imaging techniques and analysis methods in biomedical applications will be introduced. The course will briefly cover the fundamental physics, core signal processing, image reconstruction of a variety of current standalone imaging modalities such as X-Ray, computer tomography (CT), magnetic resonance imaging (MRI), nuclear imaging (PET, SPECT), optical imaging (fluorescence, optical diffuse tomography, bioluminescence), and ultrasound. Subsequently, the concept, fundamental physics, and image analysis of some exemplary multi-modal imaging techniques and systems will be introduced. Their applications in Biomedicine in different scales from organ to cellular and molecular level, and from structural to functional imaging will be discussed. The course will also briefly address the issues related to image-based diagnosis, intervention and therapy.

BIOENG 2515 - CARDIO SYSTM DYNAMCS & MODLING
Minimum Credits: 3
Maximum Credits: 3
The mechanical behavior of the cardiovascular system will be explored in a quantitative manner. The goal is to understand the behavior of each component in isolation and the interactions among various components. Mathematical modeling will be used with an emphasis on model development, validation, and application. The function of the intact organ will be correlated with underlying structural and cellular processes, both for normal and pathological states. Student projects will contribute to the existing library of cardio vascular models.

BIOENG 2520 - MOL CELL BIOLOGY & BIOPHYSC 1
Minimum Credits: 6
Maximum Credits: 6
Topics covered in this course are bio-macromolecules, protein purification and microscopic techniques, genetics (chromatin organization, DNA replication, recombination, transcription, translation and control of gene expression), molecular perturbation, membrane biophysics and bioenergetics.
**BIOENG 2525 - APPLIED BIOSTATISTICS**
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide an understanding of basic statistics through application. Descriptive and inferential statistics, encompassing both parametric and non-parametric methods will be taught.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Bioengineering (MBE or PhD)

**BIOENG 2533 - CONTROLLED DRUG DELIVERY**
Minimum Credits: 3  
Maximum Credits: 3  
This course will provide students with a basic understanding of the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, we will focus on topics at the interface between engineering and medicine such as biomaterials, pharmacokinetics, polymer chemistry, reaction kinetics, and biological transport phenomena. Design of transdermal, aerosol, oral, bio-mems, gene delivery, and targeted cellular delivery, will be reviewed with emphasis being placed upon us AACN regulatory considerations and the relevant physiological milieu.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2540 - NEURAL BIOMAT & TISSUE ENGR**
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to introduce students to an advanced understanding of biomaterials and tissue engineering specialized in neural applications. It will review biomaterials used for neural prosthesis, drug delivery devices, and tissue engineering scaffold. The student will gain a fundamental understanding of the biocompatibility issues relevant to a variety of neural implantable devices and the current strategies to solve these issues. Topics will include basic material science, neural tissue biocompatibility with implant, BBB and CNS drug delivery, tissue engineering and regenerative medicine for PNS, tissue engineering and regenerative medicine for CNS, neural electrode/tissue interface (including both simulating and recording electrodes, both peripheral and cortical neural interface). The student should have some exposure to biomaterials and tissue engineering before taking this course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2580 - BIOMD APPLC SIGNAL PROCESSING**
Minimum Credits: 3  
Maximum Credits: 3  
The goal of this course is to provide students with experience in applying signal processing techniques to medical and biological data. The nature of biological signals and noise, including appropriate physiological background information, will be presented. Digital filtering, spectral analysis, and automated interpretation of signals will be discussed, with examples drawn from current problems in clinical medicine and research.

**Academic Career:** GRAD

**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**BIOENG 2586 - QUAN SYSTEMS NEUROSCIENCE**
Minimum Credits: 3  
Maximum Credits: 3  
The course examines some of the major scientific results in behavioral neuroscience, and the mathematical and computational principles of brain function they illustrate. Neuroscience topics include sensory transduction, visual processing, motor control, and neural prosthetics. Students learn to
apply techniques from signals and systems, statistics, machine learning, information theory, and control theory to neuroscience data sets. Course format consists of lectures and student-led discussions of important publications in neuroscience. Upon completing the course, the student should be able to describe organizing principles of brain function, from biological and theoretical perspectives apply statistics, signal processing, and machine learning techniques to the analysis of biological data sets design novel experiments, analyses, and data interpretation demonstrate critical evaluation scientific and technical literature.

**BIOENG 2590 - BIOMED APPLICATION OF CONTROLS**
Minimum Credits: 3  
Maximum Credits: 3  
The goal of this course is to provide students with system modeling and control design experience in biological systems and medical applications. Root locus, proportional-integral-derivative, and state variable methods for feedback controller design are introduced. Specific applications to be considered include analysis of the muscle stretch reflex, the vestibulo-ocular reflex system, and control of artificial organs, including ventricular-assist devices and the artificial pancreas, characterization of design criteria in terms of application requirements and problems.

Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2600 - NEUROIMAGING**
Minimum Credits: 3  
Maximum Credits: 3  
This course consists of six state-of-the-art imaging techniques (i.e., MRI, MRS, FMRI, PET, MEG/EEG and optical). Each part of the module will present in-depth analysis of the particular technique and its application in neuroscience research. Apart from in-depth presentation of each technique, students will also get acquainted with the operation of the respective instruments. Tour to that respective imaging facility will be guided by the concerned faculty and the scientific staff member in that respective facility will assist for demonstration.

**BIOENG 2601 - PRIN & PROPS CPLX ENGNRD MATLS**
Minimum Credits: 3  
Maximum Credits: 3  
Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlying each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application

**BIOENG 2610 - INTRO MEDL CORRO MICRODEVICES**
Minimum Credits: 3  
Maximum Credits: 3  
This is an elective course for the engineering research center consisted of North Carolina A&T State University, University of Cincinnati, and University of Pittsburgh to help provide new technologies to study biodegradable metallic implant science. This course will cover the following topics: 1) microfabrication of silicon, glass, polymer devices, 2) microfluidics and electro kinetics, 3) biosensors, 4) actuators and drug delivery, 5) lab on a chip and micro total analysis systems (μ-tas), 6) genomics and proteomics related chip, 7) corrosion science, and 8) corrosion sensing devices and measurement systems.

Academic Career: GRAD  
Course Component: Lecture
BIOENG 2620 - INTRO TO TISSUE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to tissue engineering. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Tissue engineering is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology and cell. Be familiar with the general types of biomaterials used in tissue engineering. Understand techniques utilized to design, fabricate, and functionally assess tissue engineering systems. Apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution. This five part course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.

BIOENG 2630 - METHODS IN IMAGE ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Current research topics in biomedical image analysis will be explored with an emphasis on applying geometry and statistics to image segmentation, registration, and visualization. The goal is for computers to recognize and measure anatomical structures automatically in 2d, 3d, and 4d from prior knowledge and image features. Student projects will use (and contribute to) the national library of medicine visible human toolkit, a new C++/Open GL Library of proven and experimental methods being developed by a consortium of research institutions including our own.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2632 - BIOMECH 3: BIODYNAMICS OF MOVEM
Minimum Credits: 3
Maximum Credits: 3
Biodynamics, the area of focus in biomechanics 3, is the study of large-scale movements in biologic systems. As such, the course focuses on the analysis of human movement, which is used in clinical and research settings to understand how various pathologies impact movement and how interventions can be implemented to aid those affected by movement disorders. We cover the fundamentals of biomechanics of human movement using mechanical modeling techniques. The major focus is kinematic analyses in three dimensions using matrix techniques. Some fundamentals of kinetics are covered as well, 2D and 3D inverse dynamics. Upon completing the course, the student should be able to describe basic methods of kinematic/kinetic analysis used in multi-link systems and be able to implement the methods in the analysis of human movement. Students should also be able to apply the methods to study common human movements, e.g. gait analyses, eye movement analyses, etc. Finally, students should be able to use the computer programming language, matlab, to perform computations on kinematic data.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOENG 2633 - BIOMECHANICS 4
Minimum Credits: 3
Maximum Credits: 3
This is the second part of a two semester advanced graduate course that uses the application of bio solid mechanics to describe the mechanical behavior living structures. The course will be separated into the following: 1) fundamental concepts: a. Kinematics, stress, strain b. Balance principles, objectivity c. Hyperelastic materials 2) biological applications a. Mechanical properties of specific tissues, (e.g. Tendon, muscle, heart, vascular) b. Growth and remodeling using mixture theories c. Approaches used to model cells (e.g. Blood cells, myofibroblasts)

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 2650 - LEARNING & CONTROL OF MOVEMENT
The course will blend robotics, probability, and neuroscience to better understand the human motor system, particularly motor learning and control of movement. While motor control will be discussed as a feedback control problem, these theories will be compared during the entire course to what we know about the motor system. We will begin by studying muscle activation and forces, muscle sensory organs, spinal control structures, and inertial dynamics of a multi-joint limb. This will give us a sense of the machinery that the nervous system must control in order to generate coordinated movements. Probability foundations will be used as a framework to model how the nervous system updates estimates of limb position and sensory feedback during movements. Finally we will consider how disease can inform us about principles of movement control and motor learning. The course material and associated homework will require the students to use matlab to simulate control of biomechanical systems. This will allow students to appreciate the value of models to generate hypothesis and possible explain biological behaviors.

BIOENG 2668 - KINEMATICS OF HUMAN BODY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on analysis of human body motion, which includes basic concepts of multi-body motion and force transformation between joints of the body. Fundamental knowledge on motion analysis (Gait and Rehabilitation exercise analysis) and Analysis of Joint Reaction forces as the body is subject to external loads will be covered.

BIOENG 2675 - FINITE ELASTICITY OF SOFT TISSUES
Minimum Credits: 3
Maximum Credits: 3
This team-taught course is designed as the second course in graduate biomechanics that applies and builds on the concepts of finite elasticity to study the constitutive response of various soft tissues. Course topics will include kinematics of large deformation, concepts of stress, thermodynamic principles, and development of constitutive relationships for hyperelastic materials. Isotropy, transverse isotropy, incompressibility, viscoelasticity as well as isotropic damage will be discussed. Specific application areas will include the mechanics of three general types of primary load-bearing soft tissues: vascular, orthopedic, and reproductive.

BIOENG 2696 - CONTROL THEORY NEUROSCIENCE
Minimum Credits: 4
Maximum Credits: 4
Control theory is an important tool for understanding the function of the nervous system. This course introduces the general principles of control theory and its application in neuroscience. Neuroscience topics to be covered include: neural mechanisms of arm and eye movement control; balance and posture; internal models; cortex, cerebellum, basal ganglia, and spinal cord. Control theory topics include the laplace transform; block diagrams and transfer functions; state-space description; system responses; phase-lead and phase-lag compensators; PID controllers. Knowledge of differential equations is required.

BIOENG 2700 - PHARMACY & BIOTECH FOR ENGR
Minimum Credits: 3
Maximum Credits: 3
The Bioengineering Department provides courses that interface with the disciplines of chemistry, biology and engineering. This course has been designed for graduate students who are especially interested in pursuing careers in pharmacy, pharmaceutical & d (both process and commercialization), bioorganic chemistry and medicinal chemistry of natural products (phytochemistry: pharmacognosy and phytochemistry). This course is not designed to give an exhaustive (and exhausting!) List of facts but rather to outline fundamental principles and molecular concepts to address the real health care issues of the society. This course will provide an overview of fundamentals of drug development, drug design,
pharmacological and bioanalytical technologies and an insight about the bioorganic and medicinal chemistry.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2703 - REHABILITATION ENGINEERING DSGN**
Minimum Credits: 3
Maximum Credits: 3
Rehabilitation engineering design will be taught through the development of a product. The product must incorporate concepts of universal design. The process of designing a product on time under budget with proper documentation will be emphasized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2704 - FUNDMS REHAB ENGR AND TECHN 1**
Minimum Credits: 3
Maximum Credits: 3
Introduction to fundamental principles and practices related to multiple areas of assistive technology. The technology area include: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomic and man/machine modeling. In addition, common terminology, disability, ethics and models of service delivery related to assistive technology are discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2705 - PRACT REHAB ENGR & ASSTV TECHN**
The purpose of this course is to develop the clinical skills needed to apply at and resolutions to help persons with disabilities achieve their goals in the areas of productivity, education, employment, communication, and environmental access. Students will match knowledge of at products gained in BIOENG 2704 to the needs of individuals. This will be taught using a model for assessing the individual, the context, the technology-user interface and an interdisciplinary team approach.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2708 - INDIV & SOCIAL EXPRN DISABLTY**
Course investigates psychological and sociological issues of viewing disability not as solely located within the individual but instead as the outcome of interaction between the impaired individual and society. Course focuses on the experience of being disabled, emphasis on both adjustment to disability and relationship to community foundations of stigmatization and discrimination toward people with disabilities and their pervasive and effect throughout all do mains of life will be examined.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**BIOENG 2709 - REHABILITATION BIOMECHANICS**
Material at introductory graduate level. Fundamentals of Biomechanics with specific application to rehabilitation. Basic mechanics Newton's Laws, statics, dynamics and vector algebra (forces, moments, equilibrium) will form the first part of the course. The middle section focuses on Kinematics and Kinetics applied to Biomechanics. The final section examines work/energy methods and stress/strain problems. Sets are assigned regularly and there are lab exercises/ demonstrations.
BIOENG 2724 - ASSISTV TECHN FUNDING & POLICY
Minimum Credits: 3
Maximum Credits: 3
Students to develop knowledge and skill in the process and strategies necessary to acquire assistive technology devices and services for people with disabilities. Course content will focus on the process of gathering information, assessment procedures, documentation, and funding sources. Advocacy and procedures for due process will also be reviewed for situations when funding sources are limited.

BIOENG 2725 - DESIGN FOR INJURY PREVENTION
Minimum Credits: 3
Maximum Credits: 3
This course provides instruction for how to design a workplace to prevent occupational injuries. The course will primarily focus on preventing the three types of injuries, the injury mechanism, risk factors, tools for quantifying risk and engineering solutions will be covered. Upon completion of a course, students will be expected to develop custom engineering design solutions to prevent occupational injuries. Students will complete a project where they will design a solution to eliminate or reduce an existing hazard.

BIOENG 2731 - MOLECULAR MECHANISMS TISSUE GR
Minimum Credits: 3
Maximum Credits: 3
The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.

BIOENG 2750 - EXPERIMENTAL DESIGN ANALYSES
Minimum Credits: 3
Maximum Credits: 3

BIOENG 2751 - EXPERIMENT DESIGN & ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
The analysis of observations and measurements is a key component to determine the outcome of an experiment and typically provide the basis for interpretation of results. This course will allow students to learn about different approaches to analyze experiments, as well as provide a solid foundation of statistical analysis. The limitations of these approaches will be discussed and development of critical thinking by the student is encouraged.
**BIOENG 2800 - NEUROTEC: CONCS, PATNTS, DEVCS**

Minimum Credits: 3  
Maximum Credits: 3  
This survey course will introduce students to biomedical devices that interface with the nervous system. Course instructors and guest lecturers will discuss fundamental neurostimulation and recording concepts, patients who may benefit from these devices, and both existing and in-development technologies.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BIOENG 3020 - DESGN & SYNTH OF BIOMED MATRLS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This advanced biomaterials course targets graduate students already familiar with general concepts in biomaterials and organic chemistry, and want to learn more on how to design and modify or synthesize new biomaterial for specific biomedical applications. The course will be student driven using a guided literature search and question-and-answer format with minimal lecturing. The students are expected to be actively engaged in discussions and presentations. There will be 3-4 design modules, at the end of which a presentation and a paper will be submitted to summarize the rationale of the design and propose a feasible material synthesis route. The grade will be based on performance of these assignments. The class will meet twice a week for a 90 minute session.  
**Academic Career:** GRAD

BIOENG 3095 - GRADUATE PROJECTS
Minimum Credits: 1
Maximum Credits: 6
Individual study program under guidance of faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

BIOENG 3333 - ADV FINITE ELEMENT METHODS
Minimum Credits: 3
Maximum Credits: 3
This second course in the finite element method focuses on the challenges and solution strategies for nonlinear boundary value problems in mechanics. Topics include nonlinear heat transfer as well as geometric and material nonlinearity in solid mechanics. In addition, an overview is presented of various transient analysis techniques (i.e., time integration) within the finite element method.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 3528 - TIME-FREQUENCY SIGNAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course covers the theory and application of time varying spectral analysis. Topics include why spectra change, the AM/FM model of signals, Instantaneous Frequency and Bandwidth, Signal Density Functions, the Short-time Fourier transform, the Wigner Distribution, Cohen's Class of Time-Frequency Distributions, Signal Dependent Distributions and the Evolutionary Spectrum.
Academic Career: GRAD
Course Component: Lecture

BIOENG 3533 - CONTROLLED DRUG DELIVERY
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a basic understanding of the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, we will focus on topics at the interface between engineering and medicine such as biomaterials, pharmacokinetics, polymer chemistry, reaction kinetics, and biological transport phenomena. Design of transdermal, aerosol, oral, bio-mems, gene delivery, and targeted cellular delivery, will be reviewed with emphasis being placed upon us FDA regulatory considerations and the relevant physiological milieu.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

BIOENG 3600 - FORCES THAT SHAPE ORGANS
Minimum Credits: 3
Maximum Credits: 3
The course will consist of a mix of lecture, journal club, and student presentations on how embryos build organ systems. Functional organs are constructed early during embryogenesis utilizing processes such as cell signaling, cell migration and shape change, tissue patterning and tissue formation. In this course we will explore organogenesis as a physicochemical integrated process.
Academic Career: GRAD
Course Component: Lecture
BIOENG 3602 - TMJ REGENERATION AND MECHANICS
Minimum Credits: 3
Maximum Credits: 3
The primary educational goal of this course is to instruct students in the anatomy and physiology of the temporomandibular joint (TMJ), which serve as gold standards for tissue regeneration approaches. Students will be exposed to current diagnosis and treatments of temporomandibular joint diseases, and TMJ occlusion. Major emphasis will be given to understanding biomechanics of musculoskeletal systems and mechanical testing of tissues, in order to apply this knowledge to enhance the function of the TMJ through the design of better therapies. Furthermore, students will also be instructed in tissue engineering efforts to regenerate the tissues of the temporomandibular joint, such as the TMJ disc and mandibular condyle.

Bioethics

BIOETH 2001 - ETHICS AND AGING
Minimum Credits: 3
Maximum Credits: 3
This course offers an overview of ethical issues in aging. Early sessions will explore the ethical implications of stereotypes and myths regarding aging. Turning to the context of health care, students will identify and analyze moral dilemmas that arise in the long-term and end-of-life care of older adults. Concepts and topics to be critically examined include: autonomy, dependency, elder abuse, and just resource allocation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOETH 2050 - CULTURAL STUDIES COMMN SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This annual seminar focuses on a single topic crossing disciplinary and departmental boundaries. Cultural studies faculty with a broad range of research interests participate in weekly talks and discussions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOETH 2604 - CLINICAL PRACTICUM 1
Minimum Credits: 3
Maximum Credits: 3
Placements in different clinical settings to observe clinical ethics and medical sociology discussions.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOETH 2606 - CLINICAL PRACTICUM 2
Minimum Credits: 3
Maximum Credits: 3
Intensive observation experience in one clinical setting.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOETH 2658 - PHILOSOPHY OF MEDICINE
Minimum Credits: 3
Maximum Credits: 3
Issues in philosophy of medicine, with reference to American health care, including concepts of health and disease, normativity, causation, error, clinical diagnosis, prevention, and epidemiological risk.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2661 - THEORETICAL FOUNDATIONS
Minimum Credits: 3
Maximum Credits: 3
Survey of contemporary ethical thought with reference to its historical bases, intended to prepare students to read and think critically and creatively about the literature in applied ethics, especially bioethics and health policy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2664 - BIOETHICS
Minimum Credits: 3
Maximum Credits: 3
Survey of major topics and methods in bioethics, including informed consent, treatment refusal, transplantation, resource allocation, genetics, and public health.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2665 - RESEARCH ETHICS
Minimum Credits: 1
Maximum Credits: 1
Overview of basic ethical issues which arise in the course of carrying out biomedical and psychosocial research. Emphasis is on research involving human subjects. Each session will provide the theoretical underpinnings of a particular ethical area and its practical implications when carrying research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOETH 2666 - ETHCS & REGULATION OF CLIN RES
Minimum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOETH 2698 - SPECIAL TOPICS IN BIOETHICS
Minimum Credits: 3
Maximum Credits: 3
Seminar on particular topics in bioethics; topics vary from term to term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BIOETH 2902 - DIRECTED READING IN BIOETHICS
Minimum Credits: 1
Maximum Credits: 3
Students discuss with instructor set readings in bioethics. Topics and readings may vary.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

BIOETH 2904 - MA THESIS IN BIOETHICS
Minimum Credits: 1
Maximum Credits: 6
Research under the supervision of the advisor which culminates in the master's thesis.

**Academic Career:** GRAD
**Course Component:** Thesis Research
**Grade Component:** Grad SN Basis

**BIOETH 2990 - INDEPENDENT STUDY IN BIOETHICS**

**Minimum Credits:** 1  
**Maximum Credits:** 3

Students pursue a course of independent study under the supervision of a faculty member.

**Academic Career:** GRAD
**Course Component:** Independent Study
**Grade Component:** Grad SN Basis

**Bioinformatics**

**BIOINF 2011 - FDS CLIN & PH INFORMATICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3

A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, tele health, decision theory, and decision support, human-computer interfaces, system integration, the digital library, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2012 - PROBLEM-ORIENTED PROGRAMMING MI**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course is designed to introduce medical informatics students to computer programming. It will begin with an introduction to program design and structure using the unified modeling language (UML), followed by an introduction to object-oriented programming in the python language. The remainder of the course will be organized around a series of programming problems relevant to medical informatics and drawn from areas such as structured text and image processing, communications, data mining, natural language recognition, expert systems, etc.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2013 - INTRO PATIENT CARE & CLN ENVN**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course is designed to introduce biomedical informatics students who have no significant clinical experience in the U.S. To the various clinical environments in which health care providers create, manage, and use clinical information. No previous clinical experience is assumed. Students will be expected to attend lectures and will spend a significant portion of time examining and reporting on different clinical settings throughout the semester.

**Academic Career:** GRAD
**Course Component:** Clinical
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2014 - BIOMEDICAL INFORMATICS PROJECT**

**Minimum Credits:** 3  
**Maximum Credits:** 3

The course consists of three main parts. In the first part of the course the projects are conceived. In the middle part, the projects are defined and designed. In the final part, the projects are carried out, analyzed, and reported. In all three phases, students will first have classroom discussions among themselves and the instructor about their ideas for that phase of the project. Next, they will work outside of the classroom on that project phase and write a report. Finally, they will orally present the main ideas of their report to the class. The instructor will provide written and oral feedback on each stage of the project, as it occurs.

**Academic Career:** GRAD

**Grade Component:** Grad Letter Grade
BIOINF 2015 - MATHMTL FDS OF BIOMD INFORMTCS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this class is to review mathematical techniques that underly biomedical informatics. Knowledge of these mathematical subjects will be assumed in many subsequent biomedical informatics courses (e.g. Statistics and machine learning). The course is will emphasize conceptual understanding and applications rather than formal proofs. Each mathematical subject will be illustrated with problems from within biomedical informatics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2016 - FDS TRANSLATIONAL INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
The field of translational bioinformatics emerged because of the recent advances in biotechnology with which several new types of patient and disease specific data are being created for large subpopulations. Computer science methods are being rapidly adapted to process and analyze this data, with the goal of drawing biologically and medically-relevant inferences. By analyzing these different types of data individually or integratively, it is now feasible to attempt deciphering biological root cause of a disease (at least the 'why' of the disease if not 'how'), to identify biomarkers, and to design personalized medicine.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2017 - CLINICAL RESEARCH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the emerging field of clinical research informatics (CRI). It involves informatics solutions in support of scientists who conduct clinical research, as well as those who translate evidence in biological, clinical, and epidemiological studies. CRI endeavors to improve clinical research information systems, recruitment of participants to clinical trials, mining of electronic health records for comparative effectiveness research, scientific collaboration, data sharing, re-analysis of extant data, patient registries, results databases, optimization of research workflows, semantic harmonization, and more.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2031 - BIOMEDICAL INFORMATICS COLLOQ
Minimum Credits: 1
Maximum Credits: 1
The current research of biomedical informatics faculty and senior fellows will be presented.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

BIOINF 2032 - BIOMDCL INFORMTCS JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
This course meets once each week for one hour. The research being presented will be taken from recent journal papers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

BIOINF 2033 - INTRO TO RESEARCH BIOMED INFO
Minimum Credits: 1
Maximum Credits: 1
This course will explore fundamentals of basic and applied research in biomedical informatics, with instructor-lead readings and discussions on a wide range of topics, including important aspects of experimental design, modes of scientific inference, science as a way of knowing, ethical issues of scientific research, special issues in the information age, the value of awareness of the impact of culturalism in multidisciplinary research, the purpose and value of the peer-review process, and the role of informatics in medical scientific research.
**BIOINF 2051 - FOUNDATIONS OF BIOINFORMATICS**

Minimum Credits: 3  
Maximum Credits: 3  
Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**BIOINF 2052 - INTRO COMPUTATIONAL STRUCT BIOL**

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover Biomolecular structure, Statistical Mechanical Phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.

**Academic Career:** GRAD

---

**BIOINF 2054 - STATISTICAL FOUNDATIONS BIOINFORMATICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an intermediate-level understanding of statistical foundations to prepare students for the competent use of data analysis methods in common practice in bioinformatics. Statistical ideas covered include probability distributions, likelihood theory, Bayesian and Frequentist Concepts, estimation, hypothesis testing and significance testing, multiplicity adjustments, the EM and MCMC algorithms, random walks, Poisson Processes and Markov chains. Application areas include biological sequence analysis and microarray analysis. Students will learn the R statistical language. The R Packages Bioconductor and BRB ArrayTools for microarray analysis will be studied.

**Academic Career:** GRAD  
**Course Component:** Lecture

---

**BIOINF 2055 - HIGH-THROUGHPUT GENOMIC/PROTEOMIC**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an in-depth comparative study of methods for the analysis and interpretation of high-throughput genomic and proteomic data sources. Using a broad survey of literature, the student will learn approaches to normalization/transformation, finding predictive biomarkers, methods for classification, cross-validation, functional interpretation. Ways to integrate diverse data sources are explored, including clinical outcomes. Lectures, exercises in use of publicly-available software, and intensive experience in analysis/interpretation of published data sets are included.

**Academic Career:** GRAD
BIOINF 2057 - ELEMENTS IN STATCL LEARNING
Minimum Credits: 3
Maximum Credits: 3
The purpose of the course is to present the theory and practice of statistical learning algorithms, placing "statistical learning" or "data mining" techniques in the proper context with regard to their origins in simple classical methods like linear regression, to clarify the strengths and weaknesses from theoretical and practical sides. "Supervised learning" techniques studied include using regularization and Bayesian methods, kernel methods, basis function methods, neural networks, support vector machines, additive trees, boosting, bootstrap-based methods. Unsupervised learning techniques studied include cluster analysis, self-organizing maps, independent component analysis, and projection pursuit.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2058 - BAYES & EMPC BAYES CMPTL METHS
Minimum Credits: 3
Maximum Credits: 3
This course provides the students with an understanding of both the theory and practice with regard to the EM algorithm, markov-chain, sampling techniques, importance sampling, and the solution of decision trees. Students gain hands-on experience programming with s-plus.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2059 - BAYES & EMPC BAYES STATCL METH
Minimum Credits: 3
Maximum Credits: 3
The theoretical foundations of Bayesian and empirical Bayes statistical methods will be presented. The use of these methods in data analysis will be illustrated with specific examples and with discussions of common data analysis issues. Contrasts and similarities between Bayesian, empirical Bayesian, and classical methods will be evaluated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIOST 2042 and BIOST 2044

BIOINF 2081 - BIOINFORMATICS AT PITT
Minimum Credits: 1
Maximum Credits: 1
This course aims to provide students interested in computational biology and bioinformatics an understanding of different bioinformatics projects that are either ongoing or being initiated at the university of Pittsburgh. Different faculty members across the university will be invited to present their research each week. Students will be assigned relevant articles that describe research being conducted by each group.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOINF 2082 - BIOINFORMATICS JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
The research being presented will be taken from recent journal papers, specific to the field of bioinformatics and related areas.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

BIOINF 2100 - EVAL METHODS MEDICAL INFORMTCS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to expose students to the wide range of empirical evaluation and research methods used in medical informatics, to immerse students in the empirical literature of the field, and to prepare students to design and conduct studies appropriate to problems in the field.
BIOINF 2101 - PROBABILISTIC METHODS
Minimum Credits: 3
Maximum Credits: 3
This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks. Although other probabilistic models also will be studied. Medical applications are emphasized; however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. Understanding basic probability theory is helpful.

BIOINF 2102 - KNOWLEDGE REPRESENTATION & REASONING
Minimum Credits: 3
Maximum Credits: 3
Representing real-world entities and processes so that computer applications can reason about some part of reality is an important problem. Every biomedical informatics system maintains and manipulates at least an implicit (but usually explicit) representation of the world. This course will broadly survey various methods for creating representations that computer applications can use to reason about, and maintain data and knowledge about, the state of the world. Topics will include the following representational formalisms and their associated reasoning procedures: predicate logic, first-order logic, description logic, rules, tables, probabilities, and Bayesian belief networks.

BIOINF 2104 - INFO TECHNOLOGY AND HEALTH CARE ORG
Minimum Credits: 3
Maximum Credits: 3
This course is designed to facilitate exploration of a focused set of issues related to the interactions of technology, people, tasks, and organizational structure and culture within the contexts of the development, implementation, and evaluation of information systems in the health care environment and the use of information technology to facilitate health care process involvement.

BIOINF 2106 - VIRTUAL SIMULATION IN BIOMED INF
Minimum Credits: 3
Maximum Credits: 3
Using a range of biomedical problems, this course explores simulation models in medical and biomedical informatics. The course explores a range of simulation applications in the biosciences and teaches the theory and principles of simulation. Students will apply these principles as they develop their own simulation models.

BIOINF 2108 - INFORMATION RETRIEVAL
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide the student with an understanding of the theory, implementation, and evaluation methods of text-based information retrieval systems. It covers information theory, current indexing and retrieval practice, system evaluation, research efforts investigating new approaches to indexing and retrieval, text processing of medical records, and information retrieval on the internet. This course is offered from the Oregon health sciences university, and university of Pittsburgh students will take the course via videoconferencing over the internet.
BIOINF 2109 - INTERNET & HEALTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to survey applications and technologies for health informatics. Web-based and multimedia approaches will be emphasized. The focus will be on the design, development and evaluation of applications that support training, education and access to health information. The course is taught in a web-enhanced format.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2110 - CONC SOFTWR PROJ ENGR HLTH CRE
Minimum Credits: 3
Maximum Credits: 3
This course examines how health care organizations implement both clinical and financial information systems. The course will study the implementation process and how to integrate systems to create the computerized patient record (CPR). Students will have the opportunity to learn about the industry-wide implementation data standards and how to manage them.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2111 - COGNITV STUDIES HLTH INFORMTCS
Minimum Credits: 3
Maximum Credits: 3
This course is an intensive introduction to human information processing and a survey of its applications to health care informatics. The first four weeks present an overview of the basic architecture of the human information processing system. The remaining classes concentrate on underlying basic cognitive science issues and principles and on how they apply in medical informatics domain, i.e., Medical decision support, design of information systems, etc.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2112 - METHODS OF USER-CENTRED DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course covers three topics: ethnographic-based methods for determining systems design; principles of human factors and interface design; and usability assessments techniques. These topics will be examined using data and examples from medical-related domains. Students will work in teams to analyze data from pre-existing contextual inquiry (ci) interviews, generate and prototype design ideas using both (ci) data and design principles, and refine the ideas through usability assessments. Additional topics will be based on class interests.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2113 - REALTIME OUTBREAK & DISEA SURV
Minimum Credits: 3
Maximum Credits: 3
This course on theory and practice of outbreak detection presents current information about real-time public health surveillance. Key topics range from network level to application level to organizational level. Specific topics include functional requirements, terminology standards, data models, and messaging standards; algorithms for automatic detection of epidemics, including natural language processing techniques with emphasis on methods for validation. Field deployments of real-time detection systems are presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2114 - INTRO MEDICAL LANG PROCSSNG
Minimum Credits: 3
Maximum Credits: 3
Natural Language Processing (NLP) attempts to automatically retrieve, classify, summarize, or extract information from text. This course introduces students to NLP in the medical domain with emphasis on techniques, applications, and evaluation strategies used in medical language processing (MLP). Some time is spent learning about building blocks of NLP, including syntax, semantics, and pragmatics. Lecture time will focus on basic
linguistic background and NLP techniques; UMLS Tools; and Evaluation Techniques for MLP applications.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2115 - MATH MODELING TECHNIQUES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide a survey of mathematical methods used to model complex biological systems. It is organized into three sections that cover 1) continuous and deterministic state of approaches using differential equations, basic feedback models and compartmental models, 2) discrete and stochastic approaches using Markov, monte, Carlo and discrete event simulation techniques and 3) agent-based models.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2116 - CMPTL THINKG BIOMD SCIENTISTS**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course teaches computational approaches from disparate fields, specifically, machine learning, signal and image processing, natural language processing and graph theory. Fundamental algorithms for pattern recognition, classification, modeling and inference will be presented from each of these fields to provide the students with the ability to identify the best computational approach to solve a biomedical problem at hand. Each algorithm will be discussed in application to one or more area(s) of computational biomedicine and predictive medicine. Computational biomedicine examples would demonstrate modeling and prediction of macromolecular (protein and gene) structures, functions and interactions. Predictive medicine is an emerging area that studies patterns in genome sequence, and gene and protein expression phenotypes that serve as biomarkers for early detection of diseases such as cancer. Examples will be drawn from this area to demonstrate inference of the genotypic and phenotypic biomarkers through application of relevant algorithms.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2117 - APPLIED MEDICAL INFORMATICS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed to provide an overview of the field of applied medical informatics. Students will learn about the myriad issues that arise when deploying information technology into clinical environments. Practical, real world solutions to the challenges of hit will be addressed by experts involved in the day-to-day operations of these types of systems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOINF 2118 - PROBLTY STATS BIOMD INFORMTCS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is an introductory probability and statistics course intended primarily for biomedical informatics students. The first part of the course covers probability, including basic probability, random variables, univariate and multivariate distributions, transformations, expectation, numerical integration, and approximations. The second part of the course covers statistics, including study design, classical parametric inference, hypothesis testing, Bayesian inference, non-parametric methods, classification, ANNOVA, and regression. We will use r for statistical computing and applications. Examples and applications will focus on biomedical informatics and related discipline.

**BIOINF 2119 - PRBLSTC METHDS IN ARTFCL INTEL**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations artificial intelligence methods in search, probabilistic knowledge representation and reasoning, and machine learning with applications to biomedical informatics.

**Academic Career:** GRAD
BIOINF 2120 - SYMBLC MTHS IN ARTFCL INTELGNC
Minimum Credits: 3
Maximum Credits: 3
This course is designed for students who do not necessarily have a background in computer science and want to learn and apply methods in artificial intelligence to problems in biomedicine. The course will introduce and provide the foundations of artificial intelligence methods in logical knowledge representation and reasoning, biomedical ontologies and terminologies and information retrieval. Prerequisites for this course include introductory mathematics and programming.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIOINF 2012 and BIOINF 2015

BIOINF 2121 - HCI AND EVALUATION METHODS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects. Topics include: critical success factors, test plan development and user interface design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2122 - CRITL REFLCTN BIOMD INFORMTCS
Minimum Credits: 3
Maximum Credits: 3
This course will showcase presentations from DBMI researchers and invited speakers from across campus and beyond. Session will be videotaped and presented as weekly one-hour recording. The on-site Q/A session afterwards will be substituted by a facilitated asynchronous online discussion in blackboard. Special emphasis will be put on peer- and self-assessment of the contributions to the online discussion which will promote higher-level thinking among the students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2123 - TERMINOLOGY AND CODING
Minimum Credits: 3
Maximum Credits: 3
This course will cover standardized terminologies (including ontologies) and classification systems with an emphasis on how they relate to the information infrastructure that supports health care delivery and biomedical research. Consideration will be given to both theoretical and practical issues in terminologies and classification systems as well as demonstration of the application of these methods within biomedical informatics systems. A variety of vocabularies, terminologies, standards, and classification systems will be studied including: SNOMED, MESH, ICD, HI7, the foundational model of anatomy and the gene ontology. Later in the course, we will explore the relationship of terminologies, information models, messages, and document and record structures. Selected advanced topics such as semantic interoperability will also be addressed. Online students will engage in authentic learning assignments ranging from the creation of concept maps to the participation in asynchronous panel discussions which will assign students to teams with opposing viewpoints.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOINF 2124 - PRINS GLOBAL HLTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course explores challenges and opportunities in developing and supporting health information systems in developing-world settings by examining differences, and ways to both integrate and sustain systems in an appropriate way in low-resource settings. The course will review the current "state-of-the-art" in this field by looking at examples of systems currently deployed in the developing world, and explore opportunities for advancing this work through a series of case studies and hands-on exercises based on real-world scenarios.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2125 - INFORMATICS AND INDUSTRY
Minimum Credits: 1
Maximum Credits: 1
The focus of the class is to provide an opportunity for students to interact with leading industry representatives and to learn techniques/tools that would enable them to market their skills in non-academic environments. We will invite speakers from various local, regional, national, and international industry relationships that we have established.

BIOINF 2134 - PBLCTN & PRSNTN BIOMD INFRMTCS
Minimum Credits: 3
Maximum Credits: 3
This course provides a practical overview of how to write a research manuscript and how to give a scientific talk. It is usually taken after completing the project course (BIOINF 2014). Students taking this course must have a completed research project that can be used to complete the course exercises. Each week, we will target a specific section of the manuscript or scientific talk. Didactic sessions describing common problems and approaches will alternate with student presentation and peer critique. The course also covers the details of the publication process. At the end of the course, a special presentation workshop gives students the opportunity to improve their talks using videotaping and debriefing methods. By the end of the course, students will have completed a research paper and a finalized colloquium presentation.
Academic Career: GRAD
BIOINF 2200 - INTRO DENTAL INFORMATICS RES
Minimum Credits: 3
Maximum Credits: 3
This course is intended to expose trainees to the breadth and depth of dental and craniofacial research problems. The course will center on the six research areas of Craniofacial Anomalies & Injuries; infectious diseases & immunity; neo plastic diseases; chronic diseases; biomaterials, biomimetic & tissue engineering; and clinical, behavior & health promotion research. By learning about specific research problems in dentistry, trainees will be able to identify which informatics-related solutions would solve the problems. Permission of instructor is required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2201 - DENTAL INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This series of seminars and assignments is centered on the management of large-scale information technology infrastructures, with practical experience provided in management of large user bases, help desk management, systems management, end user training, disaster prevention and recovery, and computer security. This course will emphasize practical exercises within the information systems infrastructure at the school of dental medicine. The course also includes several special topics related to dental informatics in academia and industry. Permission of instructor is required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOINF 2202 - DENTAL INFORMATICS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
In this course, students will review current research projects of the center of dental informatics and seminal research in dental/medical informatics. Students will critically evaluate studies, methodologies, and results. During the course, students will prepare and conduct a joint research project of limited scale and scope resulting in a publishable paper or report. The course also includes other topics of interest for dental informaticians in academic careers.

Maximum Credits: 9
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Biological Sciences

BIOSC 2000 - RESEARCH AND THESIS MS DEGREE
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Biological Sciences (PHD)

**BIOSC 2010 - CURRENT TOPICS IN MCDB (A)**
Minimum Credits: 1  
Maximum Credits: 6  
This is an intensive course for first year graduate students. Format is combination lecture-seminar. The subject matter in this course is organized into several well-defined modules. Each module is presented assuming undergraduate knowledge of the area and aims at taking the students beyond the standard undergraduate texts and into the current literature of molecular, cell and developmental biology. First year students in the MCBD program are required to take all modules. Otherwise, selected modules can be taken independently.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**BIOSC 2011 - CURRENT TOPICS IN MCDB 1**
Minimum Credits: 1  
Maximum Credits: 6  
This is the first of six courses of a modular core course in molecular, cell and developmental biology. The subject matter in this course is organized into several well-defined modules in different subject areas. Each module is presented assuming undergraduate knowledge of the area and aims at taking students beyond the standard undergraduate texts and into the current literature. Modules presented in this course include molecular technology, genetics, protein biosynthesis and molecular evolution.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**BIOSC 2012 - CURRENT TOPICS IN MCDB 2**
Minimum Credits: 1  
Maximum Credits: 6  
This is the second of six courses of a modular core course in molecular, cell and developmental biology. The subject matter in this course is organized into several well-defined modules in different subject areas. Each module is presented assuming undergraduate knowledge of the area and aims at taking students beyond the standard undergraduate texts and into the current literature. Modules presented in this course include DNA transactions, MA transactions and transcription.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**BIOSC 2013 - CURRENT TOPICS IN MCDB 3**
Minimum Credits: 1  
Maximum Credits: 6  
This is the third of six courses of a modular core course in molecular, cell and developmental biology. The subject matter in this course is organized into several well-defined modules in different subject areas. Each module is presented assuming undergraduate knowledge of the area and aims at taking students beyond the standard undergraduate texts and into the current literature. Modules presented in this course include physical methods, protein structure and protein function.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**BIOSC 2020 - CURRENT TOPICS IN MCDB (B)**
Minimum Credits: 1  
Maximum Credits: 6  
The subject matter in this course is organized into several well-defined modules. Each module is presented assuming undergraduate knowledge of the area and aims at taking the students beyond the standard undergraduate texts and into the current literature of molecular, cell and developmental biology.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SNC Basis

**BIOSC 2021 - CURRENT TOPICS IN MCDB 4**
Minimum Credits: 1
Maximum Credits: 6
This is the fourth of six courses of a modular core course in molecular, cell and developmental biology. The subject matter in this course is organized into several well-defined modules in different subject areas. Each module is presented assuming undergraduate knowledge of the area and aims at taking students beyond the standard undergraduate texts and into the current literature. Modules presented in this course include virology and cell structure and proliferation.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2022 - CURRENT TOPICS IN MCDB 5
Minimum Credits: 1
Maximum Credits: 6
This is the fifth of six courses of a modular core course in molecular, cell and developmental biology. The subject matter in this course is organized into several well-defined modules in different subject areas. Each module is presented assuming undergraduate knowledge of the area and aims at taking students beyond the standard undergraduate texts and into the current literature. Modules presented in this course include cell dynamics.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2023 - CURRENT TOPICS IN MCDB 6
Minimum Credits: 1
Maximum Credits: 6
This is the sixth of six courses of a modular core course in molecular, cell and developmental biology. The subject matter in this course is organized into several well-defined modules in different subject areas. Each module is presented assuming undergraduate knowledge of the area and aims at taking students beyond the standard undergraduate texts and into the current literature. Modules presented in this course include developmental biology.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2025 - RESEARCH ROTATION 1
Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk.
Students in the MCDB Program do three rotations, those in the EE Program do 2 or 3. Each rotation is worth a single credit.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOSC 2026 - RESEARCH ROTATION 2
Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

BIOSC 2027 - RESEARCH ROTATION 3
Minimum Credits: 1
Maximum Credits: 6
Students in the graduate programs in the department of biological sciences perform research rotations in the first year. These rotations supplement
classroom-based educational opportunities and provide settings for students to interact with faculty, who may serve on their dissertation committees
or be their advisor, and to meet the members of different labs. Students present their results at the end of each research rotation as a brief talk.

**Academic Career:** GRAD
**Course Component:** Practicum
**Grade Component:** Grad LG/SU3 Basis

**BIOSC 2030 - ADVANCED TOPICS IN VIROLOGY**
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Viruses are the majority of organisms on our home planet, by a vast margin. All cellular organisms are blessed with viruses, viruses have a major role in shaping the evolution of cellular organisms, and an argument can be made that cellular life as we know it could not have evolved without the assistance of viruses. This course will investigate the biology of eukaryotic and/or prokaryotic viruses and their impact on their hosts.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

**BIOSC 2040 - SEMINAR IN MCDB**
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Papers to be selected from current periodicals in the biological sciences for presentation. Emphasis will be placed on a critical evaluation of experimental procedures, data, and the interpretation of data. A writing component is also included.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad SN Basis

**BIOSC 2050 - STUDENT RESEARCH SEMINAR**
**Minimum Credits:** 1  
**Maximum Credits:** 1  
In this course, students present their research to faculty, students and postdocs.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad SN Basis

**Course Requirements:** PLAN: Biological Sciences (PHD)

**BIOSC 2055 - SCI COM: PREDC FELLWSHPS GRNTS**
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The goals of this course are to inform students about the tools and background needed to prepare for seminar and poster presentations and submit pre-doctoral fellowships and grants.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2056 - SCI COM: SEM & POSTER PRSNTNS**
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The goals of this course are to prepare students for oral and written presentation of their work. Topics will include seminar preparation, maintaining linear train of thought, balancing data with context, data presentation as a reinforcement tool, preparing for 15-, 30- and 45-minute talks, preparing for broad and narrow scientific audiences, speaking with the general public, preparation of useful abstracts, assembly of effective posters, effective presentation of posters, tips and tricks for fielding questions.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2057 - SCIENCE COMMUNICATION: PAPERS**
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course covers the process of writing scientific papers, including primary data papers, review articles, and general opinion pieces. Topics include
strategies for data organization, figure preparation, targeting the introduction for the audience, logic flow in the results, and focusing the discussion.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2058 - ETHICAL PRACTICES SCNTFC RES**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course familiarizes students with areas of ethical concern in scientific research, including data integrity, intellectual property, plagiarism, collaboration and cooperation, data sharing, treatment of animal and human subjects, and responsibilities to the general public.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2070 - IMMUNOLOGY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Course will describe the role of the immune system in vertebrates. The molecular and cellular basis of immunity will be emphasized. The roles of antigens, antibodies and immunocompetent cells in pathogenesis and immunity will be covered. The applications of immunology in the design of vaccines, immunotherapeutics, immunodiagnostics, organ transplantation, cancer therapy, and immune system diseases will be discussed, as will the use of immunology in biological research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2072 - ORGNIZTN FUNCN EUKR YTIC NUCLEUS**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
The nucleus houses the genetic code of an organism, and molecular processes that occur within this structure are largely devoted toward the replication, transcription, and preservation of this information. However, the nucleus is much more than a bag of chromosomes, and the molecular processes that occur within this highly dynamic organelle demonstrate and likely require a considerable amount of spatial organization. This course will discuss and review the recent literature concerning the molecular details of key nuclear processes, and examine the role that nuclear organization plays in their function.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2090 - ADVANCED DEVELOPMENTAL BIOLOGY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will examine selected topics in developmental biology at an advanced level. Topics may include pattern formation in insects, cell lineage analysis, cell-cell interactions and the specification of cell fates, cell adhesion molecules, genetic approaches to mammalian embryo genesis and the extracellular matrix in development. Emphasis will be placed on the critical reading of papers and classroom discussion.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2100 - CLLR STRUCT AND MORPHLGY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will explore biological processes within eukaryotic cells. Topics include: mechanotransduction/biomechanics; cellular interactions; polarity; cytoskeletal dynamics; cell-matrix interactions.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Biological Sciences (PHD)

**BIOSC 2105 - CELL SIGNALING**
Minimum Credits: 2
Maximum Credits: 2
This course will examine the pathways used to transmit information within and between cells. Topics include: receptors with enzymatic activity; RTK and map kinase; protein scaffolds; BMP-, WNT- and SHH-pathways; g-protein coupled receptors; calcium and camp-dependent signaling; excitation and ion channels; mechanisms of cell death.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2110 - MICROBIAL DIVERSITY
Minimum Credits: 2
Maximum Credits: 2
This course will survey important genetic, genomic, physiological, cell biological and developmental processes that distinguish viral, prokaryotic and unicellular eukaryotic organisms. Topics include: bacteriophages, plants and animal viruses; bacterial intracellular pathogens, parasites and symbionts of plants and animals; eukaryotic pathogens.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOSC 2120 - MECHSTC ANAL ENZYM/PROTN INTER
Minimum Credits: 1
Maximum Credits: 1
The ability to experimentally test and determine binding and rate constants is critical to all aspects of biology. This course will serve to teach students experimental design and data analysis to evaluate substrate-enzyme interactions, ligand-protein interactions, cooperativity, and resulting structural transitions. The lectures will be framed around current biological questions of interest to the group.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2130 - GENETICS OF MODEL ORGANISMS
Minimum Credits: 2
Maximum Credits: 2
This course will compare genetic approaches in a variety of model systems. Topics include: genetics screens and selections; linkage mapping; genetic manipulation in haploid and diploid model systems; epigenetics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2140 - GENOMICS
Minimum Credits: 2
Maximum Credits: 2
Advances in molecular biology have enabled the collection of a great deal of sequence data. Genomic studies seek to understand the organization of, and information embedded within, entire genomes. Students will learn a variety of techniques in structural genomics (finding information within genomes), functional genomics (describing gene function and interaction), comparative genomics (assessing how that information changes) and metagenomics (assessing the gene content of multiorganism communities) directed at using genome sequence data to address questions of interest.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2145 - PROTEIN LIFE HISTORY
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the fate of proteins within cells. Topics include: protein synthesis; building blocks of protein structure; domains and protein folding; mechanisms of protein sorting; protein trafficking; directional transport and secretion; exo- and endocytosis; autophagy, ER targeting.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
BIOSC 2147 - PROTEIN STRUCTURE AND FUNCTION
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the biophysical and biochemical characterization of proteins. Topics include: methods for determining protein structure; protein folding; molecular dynamics and modeling protein movement; linking structure and function; protein-DNA interactions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2150 - NUCLEIC ACIDS
Minimum Credits: 2
Maximum Credits: 2
BIOSC 2150 focuses on the molecular biology of DNA and RNA, and how biological information is stored, replicated, recombined, and processed. Topics to be discussed include: DNA replication and its regulation; DNA segregation; homologous, illegitimate and site-specific recombination; DNA repair; structural and functional roles of RNA in the activity and regulation of telomerase; small nuclear rnas and the spliceosome; processing of ribosomal and transfer RNAs; regulation by micro RNAs and long non-coding RNAs. There will be an emphasis on the primary literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2155 - GENE EXPRESSION
Minimum Credits: 2
Maximum Credits: 2
This course will examine the regulation of gene expression from a variety of standpoints. Topics to be discussed include: transcriptional mechanisms and regulation in prokaryotes and eukaryotes; MRNA splicing; RNA processing; RNAI; chromatin.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2160 - MODEL ORGANISMS IN CONTEXT
Minimum Credits: 2
Maximum Credits: 2
This course takes a broad view of model organisms, placing their biological properties within ecological and evolutionary context. Topics include: gene vs. species phylogenies, predatory/prey interaction, mating systems, life histories, population growth.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2200 - TEACHING BIOLOGICAL SCIENCES
Minimum Credits: 1
Maximum Credits: 3
Teaching biology is a complex and multi-faceted challenge. It requires the integration of deep disciplinary knowledge with a functional understanding of learning theory and the development of practical skills for working with students. Teaching biological sciences is designed to help you explore multiple strategies for effective teaching and learning and refine your own understanding of biology through efforts to become a better science communicator. The course has both seminar and project based components. You are encouraged to coordinate your work in this course with existing teaching opportunities but this is not required.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOSC 2210 - BIOPHYSICS SEMINAR
Minimum Credits: 2
Maximum Credits: 2
Students will examine papers from the current biophysical literature with guidance from the faculty. The format of the course will include oral presentation of papers by the students and group discussion of their content.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
BIOSC 2240 - STRUCL CHMCL BASIS ENZYM FUNCN
Minimum Credits: 1
Maximum Credits: 1
This course will examine selected protein-mediated processes that are known in refined chemical detail. Attention will primarily focus on enzyme chemical mechanisms, but it will not be limited only to enzymes. For instance, recent advances in understanding an early step in blood coagulation serves to illustrate a common mode of promoting protein-protein interactions. Emphasis will be on studying a limited number of examples in detail, especially those that illustrate frequent employed chemical strategies, rather than attempting to conduct a comprehensive survey. The course will also take into account the increasing role of computer-based simulations in understanding protein structure/function relationships and reaction mechanisms.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2250 - CELL BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course will be devoted to a discussion of the current state of our understanding of cell structure and function. Eukaryotic cells will be emphasized with particular attention to animal cells. However, prokaryotic cells will be discussed for comparative purposes. Course material will emphasize the experimental basis for our understanding of cell biology and the relationship between structure and function. Most of the techniques to be considered will involve biochemical and molecular biological approaches used in the study of cell function. Thus the course will assume a familiarity with the principles of biochemistry covered in the prerequisites and will not repeat this material. Topics will include membranes, the nucleus, mitochondria and chloroplasts, the cytoskeleton, cell motility, growth and division, endocytosis and exocytosis, and selected topics on the cellular biological aspects of cancer and the immune system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2260 - MOLECULAR BIOLOGY & REGULATION
Minimum Credits: 1
Maximum Credits: 6
This is a graduate-level introduction to the isolation, characterization, modification, and expression of genes. The second half of the course will discuss the regulation of gene expression in eucaryotic cells.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIOSC 2265 - DEVELOPMENTAL BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
The mechanisms of animal development will be analyzed. The first half of the course will emphasize classic embryological investigations focusing on how the embryonic body plan becomes organized, while the second half will deal primarily with the genetic and molecular regulation of development. The experimental analysis of such processes as fertilization, morphogenetic movements, tissue interactions, pattern formation, and gene expression will be discussed using examples from a variety of animal embryos, and by discussion of the current research literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2270 - DEVELOPMENTAL BIOLOGY WORKSHOP
Minimum Credits: 1
Maximum Credits: 3
This five-day workshop will offer a series of inquiry-based experiments for high school teachers, including classroom exercises, using sea urchin gametes to study cell behavior and early development. Simple experiments examining the effects of dilution of salt water, pH change effect, sperm concentration, temperature, on fertilization will be performed.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

BIOSC 2275 - CELL BIOLOGY WORKSHOP
Minimum Credits: 1
Maximum Credits: 3
This five-day workshop will offer a series of inquiry-based experiments that are designed to provide high school teachers with insight into the cell. Participants will use microscopy, biochemical assays and molecular biological approaches to explore various aspects of cell structure and function. Topics will include organelles, cell motility, and growth and division.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis

**BIOSC 2276 - COMPUTING FOR BIOLOGISTS**  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop is tailored to the needs of high school biology teachers and will concentrate on skills relevant to using technology in the biological sciences. This workshop will highlight understanding of the home computer, and utilizing the internet, PowerPoint and other multimedia resources for use in teaching biology.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad SN Basis

**BIOSC 2278 - PHAGEHUNTING TEACHER WORKSHOP**  
Minimum Credits: 1  
Maximum Credits: 1  
This one week course is specifically designed to the needs of high school teachers to learn about and implement phage hunting in the classroom. The course includes instruction on the history of bacteriophages in science, the techniques of finding a phage, isolating and purifying a phage, extracting its DNA and manipulating it for sequencing. In addition, teachers will learn the bioinformatics of phage genomics.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad SN Basis

**BIOSC 2280 - MOLECULAR BIOLOGY WORKSHOP**  
Minimum Credits: 1  
Maximum Credits: 3  
Emphasis is a hands-on experience with a particular technique on set of related techniques.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad SN Basis

**BIOSC 2290 - BIOCHEMISTRY JOURNAL CLUB**  
Minimum Credits: 1  
Maximum Credits: 1  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**BIOSC 2320 - POPULATION BIOLOGY**  
Minimum Credits: 3  
Maximum Credits: 3  
The course will cover the same general topics as BIOSC 1320: the dynamics of single species populations, interactions between populations, and implications for the evolution of life history strategies, population regulation, and community structure.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**BIOSC 2330 - ETHOLOGY**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will examine animal behavior in natural environments, with special emphasis on the evolution of such behavior.  
**Academic Career:** GRAD
BIOSC 2350 - EVOLUTION
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to biological evolution. The first half of the course will address the history of evolutionary theory, inheritance and variation, population genetics, natural selection, speciation, and adaptation. The second part will cover evolutionary history, with an emphasis on the fossil record, phylogenetics, and the origin of evolutionary novelties, including molecular characters. Emphasis throughout will be placed on how the history of life is studied in the context of scientific methodology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2351 - ADVANCED EVOLUTION
Minimum Credits: 2
Maximum Credits: 2
This course explores factors that influence inheritance. Topics include: gene-by-environment interactions; polymorphism and polyphenism; sexual dimorphism; causes and consequences of individual variation; extended phenotypes; nutrition and the phenotype; fitness landscapes; mutation and novelty; trait mapping onto phylogenies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2355 - SPECIES INTERACTIONS
Minimum Credits: 2
Maximum Credits: 2
This course examines the interactions between species in a variety of contexts. Topics include: coevolution, mutualism & parasitism; plant-herbivore coevolution; cospeciation; hybridization and signaling of species identity; predation, predator-avoidance and aposematism; predator-prey interactions; foraging ecology; competition; tri-tropic level interactions; herbivory; context-, condition- and trait-dependent species interactions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2360 - MICROBIAL ECOLOGY
Minimum Credits: 3
Maximum Credits: 3
Integrated laboratory and field techniques dealing with microbial communities. Interactions between microorganisms (bacteria and fungi) and other components of terrestrial and aquatic ecosystems will be stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2361 - ADVANCED ECOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course examines the relationship between organisms and their environment. Topics include: colonization strategies; succession; biogeography; climate change; trait-mediated assemblages; spatial models; trophic cascades.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOSC 2370 - EVOLUTIONARY GENETICS
Minimum Credits: 2
Maximum Credits: 2
This course will consider genetic processes in population and evolutionary context. Topics include: epigenetics; maternal effects; epistasis and pleitropy; gxe interactions and the physiological basis of phenotype; responses to selection; hybrid incompatibility.
BIOSC 2380 - ECOLOGICAL GENETICS
Minimum Credits: 3
Maximum Credits: 3
This course, to be taught at the Pymatuning Laboratory of Ecology, will focus on the role of genetic mechanisms in the regulation of ecological phenomena at the population, community, and ecosystem level. Both field and laboratory observations and experiments will be employed to examine the genetic basis of these ecological phenomena.

BIOSC 2390 - FIELD ENTOMOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course, to be taught at the Pymatuning Laboratory of ecology, will examine the systematics and natural history/ecology of the insects. The insect orders, and selected families, and/or other lower taxa of each order, will be surveyed and field collections and history/ecology observations of local species will be made.

BIOSC 2450 - BIOLOGICAL SCIENCES SEMINAR
Minimum Credits: 2
Maximum Credits: 2
Papers to be selected from current periodicals in the biological sciences for presentation. Emphasis will be placed on a critical evaluation of experimental procedures, data, and the interpretation of data.

BIOSC 2500 - CURRENT TOPICS IN ECOLOGY
Minimum Credits: 1
Maximum Credits: 3
This course will cover population ecology, community ecology, and ecosystem ecology. A strong undergraduate background in ecology will be assumed. Some lectures will be included, but most emphasis will be placed on reading and discussing papers from the primary literature, including papers of both historical and current interests.

BIOSC 2510 - CURRENT TOPICS IN EVOLUTION
Minimum Credits: 1
Maximum Credits: 3
This course will cover evolutionary and systematic biology. Undergraduate coursework in ecology and genetics will be assumed. Some lectures will be included, but emphasis will be placed on reading and discussing papers from the primary literature, including papers of both historical and current interest.

BIOSC 2540 - SEMINAR IN ECOLOGY
Minimum Credits: 2
Maximum Credits: 2
Students will participate in the critical review of the current literature relating to a topic in ecology. Specific topic is to be selected later.
BIOSC 2550 - EXPERIMENTAL DESIGNS IN ECOLOGY
Minimum Credits: 3
Maximum Credits: 3
Study of designs suitable for investigation, statistical analysis, and the logical control of experiments in natural situations. Extensive use of microcomputers for data analysis. (No knowledge of programming or prior experience with computers is required.) The class will be divided into sections to accommodate students with different levels of preparation in statistics.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BIOSC 2560 - SEM IN SYSTEMATICS & EVOLUTION
Minimum Credits: 2
Maximum Credits: 2
A review of recent research in evolutionary and systematic biology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOSC 2570 - ENVRMNNTL SCI TEACHER'S WRKSHP
Minimum Credits: 1
Maximum Credits: 3
Teachers spend five days at Pymatuning Laboratory of Ecology exploring the relationship between land use, water quality and aquatic community structure. Lectures, field work, data analysis, interpretation of results. Includes development of modules for classroom use.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

BIOSC 2580 - CMP PROFICIENCY FOR BIOLOGIST
Minimum Credits: 3
Maximum Credits: 3
This course, run as a workshop, is designed to enhance the capabilities of BIOSC professionals more effectively to use the currently available Macintosh microcomputer facilities in their scientific activities. The course goals include both the honing of basic skills and the acquisition of advanced skills in order to be better able to exploit the current software. Proficiency will simplify the collection, organization, access, analysis and storage of research data and facilitate the preparation of manuscripts, poster displays and dissertations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

BIOSC 2590 - GRAD TOPICS IN STREAM ECOLOGY
Minimum Credits: 3
Maximum Credits: 3
The course format is individually tailored research projects dealing with aspects of stream ecosystem structure and function. The projects are designed jointly by the student and the instructor and the work is structured as a pilot study that would lead to submission of a grant proposal.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

BIOSC 2680 - MOLECULAR BIOPHYSICS
Minimum Credits: 2
Maximum Credits: 2
This course introduces students to the physical chemistry of biological macromolecules and the methods used to study their structure, interactions, and function. Concepts of positional and structural information will be integrated with those of thermodynamics, statistical mechanics, and kinetics. We will focus on the enzyme mase-a, a paradigm for the study of the physico-chemical properties and mechanism of function of proteins.

Academic Career: GRAD
BIOSC 2690 - MOLECULAR BIOPHYSIC LABORATORY
Minimum Credits: 3
Maximum Credits: 3
This laboratory course introduces students to modern techniques such as x-ray crystallography, NMR, and cd spectroscopy, calorimetry, and molecular dynamics simulations for the study of the structure, interactions, and function of biological macromolecules. Experiments will use the enzyme rna-se-a, a paradigm for the study of the physico-chemical properties and mechanism of function of proteins.
Academic Career: GRAD

BIOSC 2770 - DEVELOPMENT MECHANISM SEMINAR
Minimum Credits: 1
Maximum Credits: 1
A graduate seminar course in which both students and instructors will choose papers from the original literature and present them in some detail. Specialized topics are selected each year to be in line with current state-of-the art scientific research in the field of molecular mechanisms of development. Discussion will include current experimental approaches to these problems, critical analysis of data, the current state of knowledge derived from the data and the potential areas of weakness that require further experimentation.
Academic Career: GRAD

BIOSC 2810 - MACROMOLECULAR STRUCT & FUNCTN
Minimum Credits: 3
Maximum Credits: 3
Course is concerned primarily with the structure and functions of proteins and nucleic acids. These are large polymers where structure and function are determined by the sequence of monomeric units. Topics will include the physical and chemical properties of the monomer units (amino acids/nucleotides); the determination of the linear sequence of these units; the size, shape and general properties of the biopolymers in aqueous systems; and the relation between structure and function, particularly in transport (hemoglobin) and in catalysis (enzymes).
Academic Career: GRAD

BIOSC 2840 - REGULATION OF MEMBRANE TRAFFIC
Minimum Credits: 2
Maximum Credits: 2
Course analyzes membrane/protein traffic along both the biosynthetic and endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g proteins (both heterotrimeric and small), coat proteins (coatamer 1 and 2 and adaptors), signal transduction cascades (pck, pka, ip3, etc), and snare complexes in protein trafficking.
Academic Career: GRAD

BIOSC 2940 - MOLECULAR BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Course will examine the molecular basis of life processes, with a primary emphasis on genes (what they are, what they do, how they determine the properties of an organism). Topics covered will include replication of DNA, transcription of DNA into MA, and translation of RNA into protein. Much of the course will be concerned with how these processes are regulated in response to changes in the environment, and how this regulation relates to the observed properties and behavior of the organism.
Academic Career: GRAD

BIOSC 2950 - SEMINAR JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
Research papers will be discussed prior to departmental seminar.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

BIOSC 2960 - DEPARTMENTAL SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Students will attend lectures on selected topics of current research in the biological sciences. The lecturers will primarily be invited scientists from outside the university, with a few lectures by faculty from within the department or other departments in the university.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2970 - TEACHING OF BIOLOGCL SCIENCES
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2972 - TEACHING MINOR BIOLOGCL SCIS
Minimum Credits: 1
Maximum Credits: 4
Graduate students in the department of biological sciences have the option of completing the requirements for a teaching minor, to be awarded concomitant with receipt of their advanced degree from this department.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 2980 - RESEARCH REVIEWS
Minimum Credits: 1
Maximum Credits: 1
This course consists of a series of informal, faculty-presented seminars designed to acquaint graduate students with research conducted in the department.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

BIOSC 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 15
Academic Career: GRAD
Course Component: Thesis Research
 Grade Component: Grad SN Basis  
Course Requirements: PLAN: Biological Sciences (PHD)

BIOSC 3001 - PREP FOR THE STEM CLASSROOM  
Minimum Credits: 1  
Maximum Credits: 1  
This seminar series is designed for Ph.D. students and post-doctorate fellows interested in pursuing an academic career and wish to gain didactic knowledge and skills related to teaching in a science, technology, engineering and mathematics (stem) classroom. Experienced faculty provide topics and discussion based seminars.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad HSU Basis

BIOSC 3302 - MASS SPECTROMETRY FOR BIO CHEM  
Minimum Credits: 1  
Maximum Credits: 1  
This one-credit mini-course is designed for graduate students who are working in any area of life sciences and who have no prior experience in mass spectrometry. The goals of this course include giving the student an introduction to state-of-the-art techniques and approaches in biological mass spectrometry and an exploration of how mass spectrometry is aiding the understanding of molecular biochemistry.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

BIOSC 3902 - DIRECTED STUDY  
Minimum Credits: 1  
Maximum Credits: 9

Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Biological Sciences (PHD)

Biostatistics

BIOST 2000 - TEACHING PRACTICUM  
Minimum Credits: 3  
Maximum Credits: 3  
This course will provide doctoral students with an opportunity to obtain teaching experience. This course is intended for doctoral students during their dissertation stage. Teaching experience will enhance the professional growth of students. Students will further develop oral and written communication skills and an art for explaining material, which is an integral part of a biostatistician's career.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

BIOST 2011 - PRINCIPLES STATISTICAL REASONING  
Minimum Credits: 3  
Maximum Credits: 3  
Acquaints students with the concepts of statistical reasoning as applied to the study of public health problems. Students learn the general principles of statistical analysis and acquire the ability to utilize a statistical software package (Minitab) as a tool to facilitate the processing, editing, storing, displaying, analysis and interpretation of health research related data.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Graduate School of Public Health; PLAN: Excluded Plans = Biostatistics(DPH, PHD, MPH, MS, MSH)

BIOST 2013 - LONGITUDINAL DATA ANALYSIS  
Minimum Credits: 2  
Maximum Credits: 2
The course will cover statistical aspects of analyzing longitudinal data, i.e. Data collected on a cohort of individuals, for each of whom the value of a response variable is determined at various points in time. Emphasis will be placed on examples from the biological sciences and medicine. Modeling of both continuous and discrete response variables will be addressed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2044 and (2049 or 2083)

**BIOST 2014 - INTRO BIOST FOR BIOMD SCINTST**

<table>
<thead>
<tr>
<th>Minimum Credits: 3</th>
<th>Maximum Credits: 3</th>
</tr>
</thead>
</table>

Introduction to statistical theory and data analysis for bench scientists, with emphasis on the use of the R software package applied to laboratory and clinical data. Introductory statistical concepts are integrated with data preparation and analysis practice. Topics include: data management; graphics; probability concepts; probability distributions; one- and two-sample statistical tests; linear and generalized linear models; analysis of survival data; assessment of model quality.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**BIOST 2015 - ELEMENTS STATISTICAL LEARNING**

<table>
<thead>
<tr>
<th>Minimum Credits: 3</th>
<th>Maximum Credits: 3</th>
</tr>
</thead>
</table>

The purpose of the course is to present the theory and practice of statistical learning algorithms, placing "statistical learning" or "data mining" techniques in the proper context with regard to their origins in simple classical methods like linear regression, to clarify the strengths and weaknesses from theoretical and practical sides. "Supervised learning" techniques studied include using regularization and Bayesian methods kernel methods, basis function methods, neural networks, support vector machines, additive trees, boosting, bootstrap-based methods. Unsupervised learning techniques studied include cluster analysis self-organizing maps, independent component analysis and projection pursuit.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**BIOST 2016 - SAMPLING DESIGN AND ANALYSIS**

<table>
<thead>
<tr>
<th>Minimum Credits: 3</th>
<th>Maximum Credits: 3</th>
</tr>
</thead>
</table>

This is an applied statistical methods course designed to provide students with a working knowledge of introductory and intermediate-level sampling designs and associated methods of statistical analysis along with a basic understanding of the theoretical underpinnings. Students will also learn survey procedures in the SAS and STRATA software packages. Emphasis is placed on sampling human populations in large communities. Lecture topics include: simple probability samples, stratified sampling, ratio and regression estimation, cluster sampling, sampling with unequal probabilities, variance estimation and weighting in complex surveys, two-phase sampling, estimating population size and estimation of rare populations and small areas. The course will consist of two weekly 1.5 hour lectures including two special classes devoted to using SAS and STRATA.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: (BIOST 2011 or 2041) and 2093; PROG: Graduate Sch of Public Health (PPBHL)

**BIOST 2017 - ADVANCED SAMPLING METHODS**

<table>
<thead>
<tr>
<th>Minimum Credits: 2</th>
<th>Maximum Credits: 2</th>
</tr>
</thead>
</table>

Continuation of BIOST 2016 (introduction to sampling). Focus is on the design and evaluation of complex sample surveys and other observational and experimental studies involving repeated measures and cluster-correlated data. Topics include: the effect of multiple sampling stages, stratification, clustering, unequal probability sampling and non-sampling errors on estimation inference; sample weighting and imputation; capture-recapture estimation; adaptive sampling and telephone sampling.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2016 and BIOST 2081 and BIOST 2092

**BIOST 2018 - STATISTICAL FDS BIOINFORMATICS**
Minimum Credits: 3
Maximum Credits: 3
Course introduces data analysis methods widely used or gaining use in bioinformatics. Methods deal with prediction, classification, optimization, and clustering and include classification trees, flexible varieties of discriminant analysis including support vector machines. Em algorithm and Monte Carlo Markov chain, bootstrap and bagging, boosting and self-organizing maps. Methods in context of principles and models of statistical science, with emphasis on Bayesian methods. Examples from microarrays, analysis of genetic networks, proteomics, computational pharmacology, and research text mining.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BIOST 2019 - PUBLIC HEALTH STATISTICS
Minimum Credits: 2
Maximum Credits: 2
Reviews the development of biometry and public health statistics and relationships to demography and actuarial science. Introduces students to national health data systems and to life table analysis and measures of fertility, morbidity, and mortality as they apply to public health statistics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2021 - SPECIAL STUDIES
Minimum Credits: 1
Maximum Credits: 15
Qualified students may undertake advanced work or research with the approval and under the guidance of a member of the staff.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

BIOST 2025 - BIOSTATISTICS SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Biometry seminars introduce the students to current health problems involving the application and development of biostatistics methods and theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

BIOST 2030 - SOCIAL INEQUALITIES IN HEALTH
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to the current literature in socioeconomic inequalities and their impact on public health. The course will discuss such topics as race, ethnicity and gender as they relate to socio-economic and public health status and critique current methods of quantitative analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2011 or EPIDEM 2110 or HPM 2001

BIOST 2035 - EXPERIMENTAL DESIGN
Minimum Credits: 3
Maximum Credits: 3
At the end of the course the student will be able to: (1) recognize the advantages and disadvantages of different experimental designs and be able to select the appropriate design to conduct a study. (2) Properly analyze complex experiments in public health and medicine.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2049

BIOST 2040 - ELEMNS OF STOCHASTIC PROCESSES
Minimum Credits: 3  
Maximum Credits: 3  
Covers generating functions and convolutions of random variables, the poison and compound poison distributions, branching processes, random walk, and the gambler's ruin problem, Markov chains, and simple birth and death processes.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: BIOST 2043

**BIOST 2041 - INTRO TO STATISTICAL METHODS 1**  
Minimum Credits: 3  
Maximum Credits: 3  
Discusses techniques for the application of statistical theory to actual data. Topics include probability theory, estimation of parameters, and tests of hypothesis for both the discrete and continuous case.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

**BIOST 2042 - INTRO TO STATISTICAL METHODS 2**  
Minimum Credits: 3  
Maximum Credits: 3  
More techniques are given for the application of statistics to actual data with emphasis on distribution-free and multivariate methods. Interpretation of results and concepts will be stressed.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PREQ: BIOST 2041

**BIOST 2043 - INTRO TO STATISTICAL THEORY 1**  
Minimum Credits: 3  
Maximum Credits: 3  
Covers joint, marginal, and conditional probabilities; distributions of random variables and functions of random variables; expectations of random variables and moment generating functions; law of large numbers; central limit theorem.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

**BIOST 2044 - INTRO TO STATISTICAL THEORY 2**  
Minimum Credits: 3  
Maximum Credits: 3  
Covers elements of statistical inference; sampling distributions of estimators; Rao-Cramer's Inequality; problems of testing statistical hypotheses; Neyman-Pearson lemma; likelihood ratio tests.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PREQ: BIOST 2043

**BIOST 2045 - ANALYSIS CASE CONTROL STUDIES**  
Minimum Credits: 2  
Maximum Credits: 2  
Methods employed in the study of health problems in population groups within the community. The course covers measures of disease occurrence and association for various study designs, classical analysis of grouped and matched case control studies, and an introduction to logistic regression.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: BIOST 2041; CREQ: BIOST 2042

**BIOST 2046 - ANALYSIS OF COHORT STUDIES**
This introductory applied course in statistical modeling focuses on maximum likelihood and related regression methods for the analysis of cohort data. Topics include generalized linear models, generalized estimating equations, and generalized linear mixed models. The course emphasizes logistic and poisson regression, and discrete survival models with time-dependent covariates. Students analyze several cohort data sets, assess the adequacy of their models, and interpret their results.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2042 and 2049

**BIOST 2047 - INTRODUCTION BIOLOGICAL ASSAY**

Minimum Credits: 2
Maximum Credits: 2
Acquaints the student with statistical techniques in biological assay, including direct and indirect assays, quantitative and quantal responses, estimation of median effective dose, and comparisons of effectiveness.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**BIOST 2048 - OCCUPATIONAL BIOSTATISTICS**

Minimum Credits: 2
Maximum Credits: 2
Acquaints the student with the statistical methods used in the identification of occupational health problems. Includes methods of testing dose-response relationships, risk analysis, and design considerations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2042 and BIOST 2043

**BIOST 2049 - APPLIED REGRESSION ANALYSIS**

Minimum Credits: 3
Maximum Credits: 3
Deals with basic analytic techniques of regression analysis with special emphasis on valid interpretations of results using such techniques. Analysis with computer packaged programs is stressed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: BIOST 2042

**BIOST 2051 - STATISTICAL ESTIMATION THEORY**

Minimum Credits: 3
Maximum Credits: 3
Fisher's information; Rao-Cramer Inequality and Sufficient Statistics; Bhattacharyya Bounds; Rao-Blackwell Theorem; Methods of Moments; the Method of Maximum Likelihood; Newton-Raphson Method and Rao's Scoring for Parameters; estimation of several parameters; order statistics and life testing problems; estimation with censored data and survival analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2042 and 2044

**BIOST 2052 - MULTIVARIATE ANALYSIS**

Minimum Credits: 3
Maximum Credits: 3
Multivariate normal distribution, estimation of the mean vector and covariance matrix, distributions and uses of simple, partial and multiple correlation correlation coefficients, generalized T2 statistic, distribution of the sample generalized variance, Multivariate Analysis of Variance and the Multivariate Behrens-Fisher problem. Multivariate methods applied to repeated measures analysis, factor analysis, and discriminant analysis. Beginning of the course emphasizes theory; later, applications and computational methods emphasized. Lectures are of current and classical literature.
BIOST 2053 - NONPARAMETRIC METHODS STATISTICS
Minimum Credits: 3
Maximum Credits: 3
Order statistics and quantiles; the U Statistic and Hoeffdings Theorem; ranks and Midranks, Kendall's and Spearman's Rank Correlation Coefficients; the sign test; Kolmogorov-Smirnov and Cramer-Von Mises tests of Goodness of Fit; rank (order) test; Mann-Whitney (Wilcoxon) rank test; the Several-Sample Problem; the Mood-Brown Median Test; Mood's Median Test; Kruskal-Wallis H Test; Friedman's Test; efficiency of nonparametric tests; Pitman Efficiency of tests; Tests with Censored Data and Survival Analysis.

BIOST 2054 - SURVIVAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Introduces the student to the design considerations and statistical analysis of clinical trials. Covers the theoretical aspects of various models in reliability theory and the proportional hazards model, as well as the more applied problems of interpreting specific data sets and designing large-scale trials.

BIOST 2055 - INTROD Gnomc Anal 1: Applcs
Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level introduction and overview of modern high-throughput genomic data analysis. It is designed for graduate students in biostatistics and human genetics who are interested in the technology and elementary data mining of high-throughput genomic data (including but not limited to classical expression arrays, various array-based applications, next-generation sequencing and proteomics). The course is also helpful for biology students with basic quantitative training (e.g. Two elementary statistics courses and r programming) who have interests in understanding the intuition and logic underlying the data analysis methods. R is the major language used in the course.

BIOST 2056 - INTRO TO DIAG TEST EVAL & ROC
Minimum Credits: 3
Maximum Credits: 3
The course offers an introduction to concepts and approaches for statistical assessment of diagnostic systems and roc analysis. The covered material includes different measures of diagnostic accuracy, aspects of the design of accuracy studies, statistical estimation and hypothesis testing, sample size calculation and some advanced topics. General prerequisites include knowledge of basic statistical concepts and approaches related to estimation and hypothesis testing; some knowledge of regression modeling and SAS is desirable.

BIOST 2057 - PLANNING BIOMEDICAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
Students will learn statistical methods and computer software that can be used in planning observational and experimental biomedical studies. They will work as members of teams in planning such studies, and articulate through written and oral presentations the statistical issues involved in study design and analysis. Students will write statistical sections of study proposals to learn how to present the design of a study and the proposed analysis.
of its data in terms of the study's major scientific objectives.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**BIOST 2058 - SCIENTIFIC COMMUNICATION SKILLS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2

This course is meant to help students develop oral, visual and written scientific communication skills and to familiarize students with research resources. Students may use their own research topic, including work on a thesis or dissertation, or help will be provided in selecting one.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**BIOST 2060 - STATISTICAL INFERENCE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course will cover the theory of statistical inference at an advanced level. The objectives of the course are to provide the student with the statistical background to read papers in the statistical literature and to provide a foundation for the development of new statistical techniques.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**BIOST 2061 - LIKELIHOOD THEORY & APPLICATIONS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2

The purpose of this course is to introduce the student to modern likelihood theory and its applications. The course will cover maximum likelihood theory, profile likelihood theory, pseudo likelihood theory and generalized estimating equations. The course is taught at a doctoral level and much of the theory is illustrated through applications.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BIOST 2044

**BIOST 2062 - CLINICAL TRIALS: METHODS & PRACTICE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

The course lectures integrate web-based material covering fundamental concepts in the design and conduct of modern clinical trials. Topics include: experimental designs, interim monitoring, analysis methods for comparative clinical trials, ethical, organizational, and practical considerations of design, case studies, and international guidelines for publication of trials in major journals, and meta-analyses.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: BIOST 2042 and 2093; PLAN: Biostatistics (MS, MPH, or PHD)

**BIOST 2063 - BAYESIAN & EMPIRICAL BAYESIAN STATISTICAL METHODS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

The theoretical foundations of Bayesian and Empirical Bayes Statistical Methods will be presented. The use of these methods in data analysis will be illustrated with specific examples and with discussions of common data analysis issues contrasts and similarities between Bayesian, Empirical Bayesian, and classical methods will be evaluated.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIOST 2042 and 2044

**BIOST 2064 - BAYESIAN & EMPIRICAL BAYESIAN METHODS**
Minimum Credits: 3
Maximum Credits: 3
Develop theory and practice for the EM Algorithm. Markov Chain sampling techniques, importance sampling, and other advanced ideas in statistical computation. Introduces computing on Unix Workstations with X-Window and S-Plus.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BIOST 2063

BIOST 2065 - ANALYSIS OF INCOMPLETE DATA
Minimum Credits: 3
Maximum Credits: 3
This course will present missing-data problems in statistics and discuss naïve methods such as complete-case analysis, available-case analysis and imputation; standard likelihood-based methods, theory and application of multiple imputation, data augmentation, Gibbs sampler, and some recently developed methodologies in the missing-data literature and related fields.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2049 and BIOST 2051 and BIOST 2061

BIOST 2066 - APLD SURVIVAL ANAL METHS & PRA
Minimum Credits: 3
Maximum Credits: 3
This course covers fundamental concepts and methods important for analysis of datasets where the outcome is the time to an event of interest, such as death, disease occurrence or disease progression. Topics include: basic methods for summarizing and presenting time-to-event data in tabular form and graphically as life tables, non-parametric statistical techniques for testing hypotheses comparing life tables for two or more groups; approaches to fitting the semi-parametric cox proportional hazard model and other commonly used parametric models that incorporate study co-variables, methods for assessing goodness-of-fit of the models, and sample size considerations. In addition to didactic lectures, there are group projects that involve analysis of datasets and presentation of analytic reports in the classroom.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BIOST 2042 and BIOST 2049 ; PLAN: Biostatistics (DPH, PHD, MPH, MS)

BIOST 2070 - SPECIAL TOPICS 4
Minimum Credits: 2
Maximum Credits: 2
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BIOST 2071 - SPECIAL TOPICS 5
Minimum Credits: 2
Maximum Credits: 2
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2072 - SPECIAL TOPICS 8
Minimum Credits: 2
Maximum Credits: 2
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
BIOST 2075 - SPECIAL TOPICS 6
Minimum Credits: 3
Maximum Credits: 3
This course is intended to cover the utility of Sas as a data management, data manipulation, and data analysis tool. The focus of this course will not be statistical analysis but rather how to use Sas as a programming tool. By the end of the course the student should feel comfortable using Sas. Since this course is offered in the biostatistics department some of the topics covered may be more related to data issues relevant to a biostatistician.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

BIOST 2076 - SPECIAL TOPICS 7
Minimum Credits: 3
Maximum Credits: 3
Statistical analyses of data with missing values. Traditional methods such as complete-case analysis, available case analysis and imputation are discussed. Likelihood based inference and some computational techniques for missing data are presented. Recent developments in this area are exposed also.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

BIOST 2077 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Biostatistics (PHD, MPH, MS)

BIOST 2078 - INT GNOMC ANAL 2: THRY ALGRTHM
Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level course to introduce theories and algorithms for statistical analysis of high-throughput genomic data. Emphases will be given to high-dimensional data analysis and theories behind the commonly used methods. It is designed for graduate students who already have sufficient statistical background, have basic knowledge of various high-throughput genomic experiments and wish to learn advanced statistical theories for bioinformatics and genomics research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2041 and BIOST 2042 and BIOST 2055 and BIOST 2094; PLAN: Biostatistics (MS, MPH, PHD, DPH)

BIOST 2081 - MATHEMATICAL METHODS FOR STAT
Minimum Credits: 3
Maximum Credits: 3
Differentiation and integration of functions of several variables. Infinite sequences and series. Fundamentals of matrix algebra. Class examples and homework problems will emphasize applications to probability and statistics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Biostatistics (PHD, MS, MPH)

BIOST 2083 - LINEAR MODELS
Minimum Credits: 3
Maximum Credits: 3
Acquaints students with linear model techniques for analyzing both balanced and unbalanced data. The topics covered include generalized inverses, orthogonal contrasts with unbalanced data, and analysis of covariance. Analysis with computer packaged programs is discussed.
Academic Career: GRAD
Course Component: Lecture
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BIOST 2044

**BIOST 2084 - DISCRETE MULTIVARIATE ANALYSIS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This more advanced course on modeling multivariate categorical data focuses on the theory and methods underlying both asymptotic and exact inference. Log-linear models, models for Ordinal and Multinomial Data, exact logistic regression, and extensions of generalized linear models to correlated discrete data are emphasized.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIOST 2044 and 2046

**BIOST 2086 - APPLIED MIXED MODELS ANALYSIS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Mixed model analysis provides a new approach to modeling which allows one to relax the usual independence assumptions and take into account complicated data structures. This course will consider all types of mixed models into a general framework and consider the practical implications of their use. Topics will include; normal mixed models, generalized mixed models, and mixed models for categorical data, repeated measures data analysis and cross-over trials with mixed models. Software for fitting mixed models will be discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIOST 2083

**BIOST 2087 - BIOST CONSULTING PRACTICUM**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Provides advanced students (second-year masters and doctoral) with exposure and practical experience in consulting on the bio statistical aspects of research problems arising in the biomedical or other allied fields. Students initially under the supervision of a faculty member participate in discussions with investigators leading to the design and/or analysis of a current research problem.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**BIOST 2088 - SPECIAL TOPICS 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Biostatistics (PHD)

**BIOST 2089 - SPECIAL TOPICS 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**BIOST 2090 - SPECIAL TOPICS 3**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.  
**Academic Career:** GRAD
Course Component: Directed Studies  
Grade Component: Grad Letter Grade

**BIOST 2091 - SPECIAL TOPICS**
Minimum Credits: 1  
Maximum Credits: 1  
Recent concern about the effectiveness of alternative treatments and intervention programs in medicine and health, in education, in psychology, and in the social sciences has led to a consideration of how to combine or synthesize the results of independent studies. Will review the development of the field, focusing on several specific examples of meta-analysis in medicine. During the lectures the class will go through the steps of a meta-analysis that appears in the literature.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BIOST 2092 - INTRODUCTION TO COMPUTING**
Minimum Credits: 1  
Maximum Credits: 1  
Provides an overview of the university of Pittsburgh computing and electronic resources; an introduction to minitab, an interactive statistical software package for storing, displaying, summarizing and analyzing data. Both the command line and windows menu approaches of the program will be presented, techniques for computerized bibliographic database searching and the use of electronic library resources for public health.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**BIOST 2093 - SAS DATA MANAGEMENT & ANALYSIS**
Minimum Credits: 2  
Maximum Credits: 2  
The goal of this course is to provide students with an understanding of the Sas program environment as well as the skills needed to use Sas as a tool to conduct research, prepare data, and perform analyses. Upon completion of the course the student will have an understanding of Sas at the intermediate level. The course covers the utility of Sas as a data management, data manipulation, and data analysis tool. The focus will not be statistical analysis, but rather how to use Sas as a programming tool. Emphasis will be placed on program code writing. Concepts will be illustrated with numerous examples from basic descriptive analysis.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad HSU Basis

**BIOST 2094 - STATISTICAL COMPUTING IN R**
Minimum Credits: 2  
Maximum Credits: 2  
An introduction to statistical computing using r. This course will serve two purposes. In the first part of the course students will learn basic use of r package including routines that are used in day-to-day statistical analysis. In the second part of this course, students will learn advanced computing techniques including functions, loops, optimization and simulations.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: CREQ: BIOST 2041; PROG: Graduate Sch of Public Health

**BIOST 2095 - DATABASE MANAGEMENT**
Minimum Credits: 2  
Maximum Credits: 2  
Students will obtain an understanding of database models with a specific working knowledge of databases used on the pc. Microsoft access running under windows will be used to exemplify the concepts, techniques and examples. Students will learn to design, create and modify databases. In addition, they will learn how to query the database, generate reports, create subsets of the data, and import and export files. The basics of database applications design and development will be presented. Concepts presented are universal and applicable to other database management systems.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade
BIOST 2096 - NUMERICAL METHODS BIOSTSTC
Minimum Credits: 3
Maximum Credits: 3
The purpose is to familiarize students with a broader range of numerical methods which are useful in bio statistical research. Selected computational techniques used in statistical research will be covered. Background will be provided to facilitate understanding of a few numerical algorithms widely used in statistics. The following are covered: recurrence relations, power series and asymptotic expansions, generating pseudo-random deviates, basic simultaneously methodology, solutions of nonlinear equations, newton's method, vector and matrix norms, linear regression and matrix inversion.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2044 and 2049

BIOST 2097 - DATA PROCESSING AND FORTRAN
Minimum Credits: 1
Maximum Credits: 1
Students will learn to use Fortran for data screening, data manipulation, and data analysis and computer simulation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BIOST 2098 - AGENT BASED MODELING
Minimum Credits: 3
Maximum Credits: 3
An introduction to agent-based models (ABMS) as a technique for understanding how the dynamics of biological, social and other complex systems arise from the characteristics and behaviors of the agents making up these systems. Examples will emphasize the applications of abms in public health, including infectious disease transmission and control measures; health behaviors such as vaccine refusal, drug and tobacco use, exercise and obesity; community violence and health disparities, but students will have the flexibility to develop projects based on their own areas of interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLANS: Biostatistics (MS; MPH; PHD)

BIOST 3010 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 15
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

BIOST 3023 - GEOGC INF SYS SPATL DATA ANAL
Minimum Credits: 3
Maximum Credits: 3
Covers the use of Gis and Spatial Data Analysis Techniques in Empirical Public Health Research. Basic descriptive and analytical functions of Gis are introduced along with spatial and geographic concepts. The interrelationship between Gis and spatial data analysis will be demonstrated through the use of specialized Gis and spatial data analysis software with a particular emphasis on the study of spatial patterns and spatial autocorrelation in public health research.

Business Accounting

BACC 2001 - FINANCIAL ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
Students learn the basics of financial accounting terminology and methods so that financial statements published in corporate annual reports can be interpreted, analyzed, and evaluated. Specific topics covered include the meaning and use of components of the balance sheet, income statement, and
statement of cash flows.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2002 - MANAGERIAL ACCOUNTING
Minimum Credits: 2
Maximum Credits: 2
Students learn how the costs of products and services are determined in cost accounting systems. They then learn how this data is used in managerial decisions and in planning and control of business operations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2003 - ACCELERATED ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
This course covers the material in financial accounting" and managerial accounting in a single semester. Intended for students with a solid background in accounting."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2004 - MANAGERIAL ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
Students learn how the costs of products and services are determined in cost accounting systems. They then learn how this data is used in managerial decisions and in planning and control of business operations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2005 - COMPUTR-BASED INFORMTN SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
Introduction to computers, their applications, potential, and limitations, emphasizing problem definition and problem solving so that the student may make effective use of this technology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2008 - PLANNING AND CONTROL
Minimum Credits: 1.5
Maximum Credits: 1.5
Examines the nature and scope of planning and control processes. Importance is placed on approaching and performing these functions systematically. Various models and frameworks will be examined through readings, cases and lectures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2010 - INTERMEDIATE ACCOUNTING 1
This financial accounting elective is designed for accounting and finance majors who plan to be financial analysts or heavy users of financial reports. Topics covered include accounting procedures for recording and presenting financial information, asset valuations, revenue recognition, and financial statement footnote disclosures.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2011 - INTERMEDIATE ACCOUNTING 2**  
Minimum Credits: 2  
Maximum Credits: 2  
Continuation of "intermediate accounting 1" and includes topics such as accounting and reporting for contingencies, liabilities, leases, pensions and earnings per share.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2016 - INTERNATIONAL FINANCL REPORTING**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course expands your knowledge of financial accounting and reporting to include (1) some financial accounting issues faced by multinational corporations (e.g. Foreign currency translation and transactions); and (2) financial reporting principles and practices in countries other than the U.S. While we will solve some accounting problems and do some debiting and crediting, the course adopts a financial statement user's perspective.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2017 - ACCNTNG FOR NON-PROFIT ORGNS**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Primary emphasis is on accounting and reporting principles applicable to governmental organizations. Accounting and reporting principles for hospitals, colleges and universities, and voluntary organizations, and the analysis of financial performance of non-profit organizations are also examined.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2021 - ACTG FOR BUS CMBNTN & CNSLDTN**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Intended for students pursuing careers in professional accounting. Primary focus is on accounting and reporting for purchase and pooling business combinations as well as preparation of consolidated financial statements subsequent to a business combination. Additional topics include accounting for international operations and interim reporting.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2024 - AUDITING**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Students are introduced to generally accept auditing standards (gas). Internal control is studied in detail with emphasis on how to test for its effectiveness. Audit objectives, planning and sampling techniques are developed as a basis for the audit opinion.  
**Academic Career:** GRAD
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BACC 2026 - STRATEGIC COST MANAGEMENT 1  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course deals with the strategic implications of alternative methods of product cost measurement. The discussions will primarily be case based and will cover cost measurement issues in both conventional and modern manufacturing environments.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BACC 2027 - STRATEGIC COST MANAGEMENT 2  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
A continuation of cost management for manufacturing competitiveness 1.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BACC 2036 - FINANCL STATEMENT INTRPRTN  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Suggested for non-accounting majors concerned with their ability to read and understand financial statements. This course updates and extends some topics covered in financial accounting as well as introduces some more advanced financial report disclosure topics. Also, the use of financial statement information for credit analysis is illustrated."  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BACC 2037 - TAXES AND MANAGEMENT DECISIONS  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Designed as an introduction to business taxation for majors in areas such as finance or financial planning. Focuses on how managers and analysts can recognize tax problems, consequences, and opportunities associated with common business events.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BACC 2039 - ACCT CONTROLS & MGT PERF EVAL  
Minimum Credits: 3  
Maximum Credits: 3  
The first half of this course studies how managers use accounting information to make business decisions in environments characterized by risk and uncertainty. The second half deals with managerial performance evaluation. In particular, the role of accounting information in the design of managerial incentive schemes to maximize shareholder value is discussed.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: Katz Grad School of Business students only.

BACC 2041 - ACCT CTRLS & MGRL PERF EVAL 1  
Minimum Credits: 1.5  
Maximum Credits: 1.5
This course studies how managers use accounting information to make business decisions in environments characterized by risk and uncertainty.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2042 - ACCT CTRLS & MGRL PERF EVAL 2**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course deals with managerial performance evaluation. In particular, the role of accounting information in the design of managerial incentive schemes to maximize shareholder value is discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2047 - ACCTING INFORMATN SYSTEMS 1**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
A conceptual introduction to business data processing from an accounting point of view. Topics include computer concepts, decision-making and accounting reports, data management, accounting systems design, and implementation. Cases and problems from past CPA, CMA, and CIA examinations will be assigned and covered.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2048 - ACCTING INFORMATN SYSTEMS 2**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
A practical introduction to the design and usage of accounting systems. Topics include general ledger systems, controls and security, automated accounting processes, file structures, and auditing. Hands-on assignments in dbase processing and package use will be assigned and covered.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2055 - ACCOUNTING PROJECT COURSE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Project will focus on assessing and structuring supply payment terms and payments, for complex material deliveries.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2060 - INDEPENDENT STUDY IN ACCONTING**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2061 - INDEP STUDY IN ACCOUNTING 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
**Academic Career:** GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

**BACC 2062 - IND STDY INTL FINCL REPRT ANAL**
Minimum Credits: 0.5
Maximum Credits: 1
This course is an extension of BACC 2510 - international financial and reporting analysis.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BACC 2064 - PERFORMNC EVAL & MGMT CONTROLS**
Minimum Credits: 1.5
Maximum Credits: 1.5
This course studies how managers use accounting information to make business decisions in environments characterized by risk and uncertainty.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BACC 2077 - CST MGT & MGT CTRL SERVC ORGS**
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will focus on cost management and control issues in service organizations in general and the health care and financial service industries in particular.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BACC 2100 - MACC INTERNSHIP**
Minimum Credits: 3
Maximum Credits: 3
To enroll for an IFC through the MACC program, you must be a MACC student and work for a minimum of 10 hours a week for 10 weeks during the semester you intend to take the internship for credit. You may receive up to six internship credits, but only three per semester, and no more than three credits for an experience.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

**BACC 2135 - CORPORATE GVRNC MGT CONTROL**
Minimum Credits: 2
Maximum Credits: 2
This course draws from corporate finance, accounting and the economics of contracts and management control systems, to provide an understanding of how corporate governance is related to value creation. We will use cases and lectures to analyze the nature of incentive conflicts in organizations and how contractual and governance arrangements and market mechanisms mitigate such conflicts. We will apply the theoretical concepts that we develop in analyzing value creation and destruction in specific contexts such as merges and acquisitions, venture capital contracting, vertical integration and transfer pricing and highly leveraged transactions such as leveraged buyouts and leveraged recapitalizations. We will also discuss how boards function, the corporate responsibilities or directors and worldwide trends in corporate governance including the Sarbanes-Oxley act.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BACC 2251 - FORENSIC ACCOUNTING**
Fraud is extremely costly to our society, and the costs seem to be growing. The AICPA recently called forensic accounting one of the seven hot, new, “sizzling” career areas in accounting. It is estimated that there will be a shortage of between 25,000 and 50,000 professionals working in this area in the next few years in the U.S. So there are many opportunities for students knowledgeable in fraud to work in various federal agencies (e.g. FBI), major corporations, and professional service firms. The objectives of the forensics course are to familiarize students with several forms of fraud and the methods that fraud examiners use to prevent and detect it. Students will develop expertise in detecting financial statement fraud from the external auditor perspective, and learn how to use technology to detect fraud. They will acquire a basic understanding of how interviews are conducted in order to detect deception. The class will also provide a historical view of financial statement fraud. The tools used in the class will include interviewing, document examination, and public records searches, which will be helpful to students wanting to become consultants, auditors, tax professionals, managers, etc. The class, of course, includes an ethics component. It will help students to understand the common ethical dilemmas that they might encounter in the business world, and will help prepare them to resist pressure to commit fraud.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

---

### BACC 2252 - CORPORATE TAX ACCOUNTING & PLANNING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The objective of this course is to help students understand how important features of the internal revenue code influence decisions regarding how to organize and structure business operations and select the most appropriate form of doing business. The course begins with a comparison of the issues surrounding the choice of taxable business entity, comparing the regular corporation (c corporation), the small business corporation (s corporation), the partnership, and the sole proprietorship. After this, the course focuses primarily on the c corporation and the s corporation and the underlying principles that determine their respective tax bases and resulting tax obligations. Tax planning is an integral part of the course. Income shifting, tax deductions, tax credits, and income exclusions are discussed in detail. The course uses case studies (including some reflecting an international tax perspective) and tax return preparation to help students to apply the theory and detail of the tax code. Course materials are updated as tax laws change.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

### BACC 2253 - INTERNATIONAL ACCOUNTING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will explore the rapid movement toward a set of internationally consistent financial reporting methods in the global marketplace. The financial accounting standards board (FASAB) and the international accounting standards board (IASB) have formally agreed to harmonize reporting standards over time. In addition, the securities and exchange commission (SEC) is currently considering a proposed time-line for the adoption of international financial reporting standards (IFRS) in the US. The course will examine the substantive differences between us generally accepted accounting principles (us GAAP) and IFRS, which have already been adopted by many other countries. The course will also provide a framework for understanding the theory and application of IFRS versus us GAAP and explore some of the ethical issues inherent in international business reporting.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

---

### BACC 2254 - ADVANCED FINANCIAL ACCOUNTING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers topics that are of particular interest to financial report preparers and auditors. Special emphasis is placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Accounting (MS)

---

### BACC 2256 - STRATEGIC COST MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will include cost measurement issues in both conventional and modern manufacturing environments.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PLAN: Accounting (MS)

### BACC 2257 - TAX ACCOUNTING

**Minimum Credits:** 4  
**Maximum Credits:** 4  
Tax accounting is an intensive introduction to federal income-tax concepts, statutes, and regulations, and their use in accounting and planning of business activities of corporations, partnerships, and individual proprietorships. Also covered are federal income-tax concepts for individuals, including their use in accounting and planning of personal activities and investments.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Accounting (MS)

### BACC 2258 - STRATEGIC COST MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The quality, timeliness and credibility of the cost information used in corporate decision-making can have a significant impact on value creation. This is because cost information is important not only in strategy formulation and in the development and implementation of action plans that link strategies to value creation, but also because such data serve as measures of financial performance for products, processes, organizational sub-units and managers. In particular, product and service cost estimates have a major influence on corporate strategic decisions such as pricing, resource allocation, product development, supply chain design and customer focused management. In addition, product costs are informative signals of operational efficiency. Therefore, they constitute financial measures of the success of management actions such as continuous improvement and business process reengineering. Over-aggregate or obsolete cost systems can have a significant adverse impact on cost reduction in particular and overall corporate strategy and competitiveness in general. The objective of this course is to develop an integrated approach to analyzing these issues. In particular, we will study (a) how product cost measurement affects strategy and resource allocation decisions; (b) how to be sophisticated users of cost feedback and how to understand the strategic distortions that are induced by flaws in cost system design; (c) the strategic role of value-driver information and the relationship between process improvement and cost reduction; (d) the use of budgetary control systems and financial measures in performance evaluation and management and (e) incentive conflicts in organizations and their mitigation through appropriate mechanisms.

**Academic Career:** GRAD

BACC 2466 - RISK MGMT AND CMPLINC ISSUES
Minimum Credits: 2
Maximum Credits: 2
This course will be valuable to MBA and mac students interested in working for global businesses, regardless of their desired career paths. As business organizations continue to seek growth in markets outside the United States and Western Europe, they will face increasingly complex and difficult challenges, including compliance with U.S. and foreign criminal and civil laws in places that are corrupt. Compliance with the U.S. Foreign corrupt practices act, which forbids businesses from providing certain benefits to government officials, is essential for global organizations, as penalties are severe. And to succeed in their careers, auditors will need to understand that businesses in certain geographic areas maintain multiple sets of books and hide bribery and tax fraud schemes. Strategic planners and supply-chain professionals will face cross-border risks, including demands by government customs and tax inspectors for bribe payments. Energy executives will confront violence, corruption and supply-chain problems in many oil and gas-producing areas. Sales professionals will confront demands for kickbacks. The course will cover these issues, and will provide students with the knowledge and compliance tools necessary to advance their professional careers in a global economy.

Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BACC 2510 and includes topics such as accounting and reporting for contingencies, liabilities, leases, pensions and earnings per share.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2510; PROG: Joseph M. Katz Grad Sch Bus

BACC 2516 - INTERNATIONAL FINANCIAL RPTG
Minimum Credits: 1.5
Maximum Credits: 1.5
This course expands your knowledge of financial accounting and reporting to include (1) some financial accounting issues faced by multinational corporations (e.g. Foreign currency translation and transactions); and (2) financial reporting principles and practices in countries other than the U.S. While we will solve some accounting problems and do some debiting and crediting, the course adopts a financial statement user's perspective.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2517 - ACCTG FOR NON-PRFT ORGANIZTNS
Minimum Credits: 1.5
Maximum Credits: 1.5
Primary emphasis is on accounting and reporting principles applicable to governmental organizations. Accounting and reporting principles for hospitals, colleges and universities, and voluntary organizations. Analysis of financial performance of non-profit organizations are also examined.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2518 - RESTRUCTURING AND VALUATION**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course focuses on the value creation process in private firms. We begin with a broad perspective on what distinguishes private firms from publicly traded firms. This course provides students with the general perspective to appreciate these problems and also the specific tools to value their private company as an investment relative to other alternatives.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2521 - ACCT BUS COMB & CONSOLIDATIONS**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Intended for students pursuing careers in professional accounting. Primary focus is on accounting and reporting for purchase and pooling business combinations as well as preparation of consolidated financial statements subsequent to a business combination. Additional topics include accounting for international operations and interim reporting.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2524 - RISK ANALYSIS APPROACH TO AUDITING**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Students are introduced to generally accepted auditing standards (GAAS). Internal control is studied in detail with emphasis on how to test for its effectiveness. Audit objectives, planning and sampling techniques are developed as a basis for the audit opinion.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BACC 2525 - FINANCIAL STATEMENT ANALYSIS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Accounting (MS)

**BACC 2526 - STRATEGIC COST MANAGEMENT 1**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.  
**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2527 - STRATEGIC COST MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BACC 2526 - strategic cost management 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2528 - MANAGERIAL ACCOUNTING
Minimum Credits: 1.5
Maximum Credits: 1.5
Students learn how the costs of products and services are determined in cost accounting systems and how this data is used in managerial decisions and in planning and control of business operations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401; PROG: Katz Graduate School of Business

BACC 2529 - COST ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
Students learn how the costs of products and services are determined in cost accounting services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2536 - FINANCL STATMNT INTERPRETATION
Minimum Credits: 1.5
Maximum Credits: 1.5
Suggested for non-accounting majors concerned with their ability to read and understand financial statements. This course updates and extends some topics covered in financial accounting" as well as introduces some more advanced financial report disclosure topics. Also, the use of financial statement information for credit analysis is illustrated."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2537 - TAXES AND MANAGEMENT DECISIONS
Minimum Credits: 1.5
Maximum Credits: 1.5
Designed as an introduction to business taxation for majors in areas such as finance or financial planning. Focuses on how managers and analysts can recognize tax problems, consequences and opportunities associated with common business events.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401; PROG: Katz Graduate School of Business

BACC 2538 - MANAGEMENT CONTROL SYSTEMS
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will cover issues inherent in the process of planning and controlling an organization's activities. Topics selected will reflect both basic issues in designing a planning and control system and an attempt in some of the sessions to incorporate topics consistent with the students' interest. Both text and cases will be used. A basic management accounting course prior to this course is desirable.
BACC 2542 - ACCOUNTING AND FINANCE LAW
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide macc and mba candidates with advanced legal information that is necessary for effectuating management level responsibilities in the contemporary business environment. This course will enhance a business student's knowledge of the law (past that of the three credit business law elective course that is offered) in a manner that strategically is consistent with the content of the CPA exam.

BACC 2543 - TAX POLICY 1
Minimum Credits: 2
Maximum Credits: 2
Our nation was born from a revolution over taxation without representation. Nearly 250 years later, the debate over tax policy continues to dominate political debates and presidential campaigns. Why the tax system attracts all this attention is no mystery. It is the aspect of government that directly affects more people than any other. This course will explore the history of tax policy in the United States, the tax legislative process in Congress, how our tax policies influence people's decisions and behavior, international tax considerations, and ideas for future tax reform. Students will discuss what factors are important in designing a good tax system and survey the social justices and injustices that arise from how the government raises its revenue. Upon completion of this course, students should be able to think critically about our tax system and form opinions grounded in facts and policy. This course is for any student that wants to become a more educated citizen (and voter!) With respect to our nation's ongoing debate over tax reform.

BACC 2544 - TAX POLICY 2
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will build upon tax policy I by taking a more in-depth look at our federal tax system. Students will also be introduced to international tax policies and provisions. Students will continue to discuss what factors are important in designing a good tax system and survey the social justices and injustices that arise from how the government raises its revenue. Upon completion of this course, students should be able to think critically about our tax system and form opinions grounded in facts and policy.

BACC 2547 - ACCOUNTING INFORMATION SYSTEMS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
A conceptual introduction to business data processing from an accounting point of view. Topics include computer concepts, decision-making and accounting reports, data management, accounting systems design, and implementation. Cases and problems from past CPA, CMA, and CIA examinations will be assigned and covered.

BACC 2548 - ACCOUNTING INFORMATION SYSTEMS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A practical introduction to the design and usage of accounting systems. Topics include general ledger systems, controls and security, automated accounting processes, file structures and auditing. Hands-on assignments in dbase processing and package use will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2549 - STRATEGIC COST ANALYSIS
Minimum Credits: 1.5
Maximum Credits: 1.5
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401 and 2528; PROG: Katz Graduate School of Business

BACC 2557 - ACCOUNTING RESEARCH & WRITING
Minimum Credits: 2
Maximum Credits: 2
This course focuses on improving students' writing, deductive reasoning, and problem-solving skills as they conduct research to make a recommendation on the accounting treatment for transactions for which no direct or clear guidance currently exists. Weekly writing assignments are evaluated on both content and the quality of the writing.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

BACC 2558 - NON-PROFIT GOVERNMENTAL ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
This course focuses on financial reporting and disclosure for not-for-profit and governmental entities based on the standards and principles promulgated by the financial accounting standards board (FASB) and the governmental accounting standards board (GSAB). Students will learn how such entities prepare their financial reports and how to interpret and use such information. The course covers financial reporting for not-for-profit entities, balancing the focus on internal operations with fiduciary responsibility. In addition, the course examines the objectives of financial reporting for governmental units and the preparation and use of the financial statements for such entities. A sample of specific entities will be reviewed to illustrate the preparation and use of their financial statements. In addition, accounting software for governmental transactions will be introduced.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BACC 2559 - INDIVIDUAL TAX ACCOUNTING & PLANNING
Minimum Credits: 3
Maximum Credits: 3
This course focuses on individual tax return preparation and planning. Students will learn how to calculate the taxes associated with a variety of personal, investment, property, and sole-proprietorship transactions. Concepts will be reinforced through the preparation of actual tax returns that reflect different combinations of such transactions. Students will develop tax planning skills by considering how various transactions can be restructured to minimize the current or future tax liability.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 2577 - COST MGT & MGT CTRL IN SERV OR
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will focus on cost management and control issues in service organizations in general and the health care and financial service industries in particular.

Academic Career: GRAD
Course Component: Lecture
BACC 2801 - FINANCIAL ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
The major objective of this course is to help students understand the basic structure and substance of a firm's reports from a user's point of view. This includes what is (and what is not) included in the reports, how and when events affect the statements and what can be inferred from these reports about the firm's past activities, present position and the future prospects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 2901 - ACCTG & CTRL FOR HEALTH CARE
Minimum Credits: 3
Maximum Credits: 3
In this course you will develop an understanding of the various roles that accounting information plays in healthcare organizations. We will begin by analyzing the needs of managers, healthcare professionals, healthcare consumers and other parties for financial information concerning a healthcare organization's financial position, current financial performance and cash generating ability. You will learn how standard financial statements (balance sheet, income statement, and statement of cash flows) address these needs, and the strengths and weaknesses of the statements in supplying this information. Financial statement analysis concepts and techniques will be introduced as cost-effective tools that enable healthcare decision makers to draw appropriate inferences from published financial statements. We will also study key issues that arise in accounting for a healthcare organization's operations, investing and financing decisions. The final part of the course will analyze specific uses of accounting information in support of organizational decisions. We will study how accounting systems measure the cost and profitability of healthcare services, the effect of volume on profitability, and the proper use of accounting cost information in supporting decisions such as whether to invest in new equipment and whether or not to expand existing services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3001 - INTRO TO ACCOUNTING RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to provide new accounting doctoral students with an overview of accounting research. The course will discuss the variety of topics and methods addressed by accounting scholars, and will seek to provide insight into the characteristics that distinguish the highest quality research. Analytical research methods and topics, as well as applications in managerial accounting, will receive particular emphasis in the first half of the course. In the second half, we will read and analyze representative accounting research employing capital markets, archival managerial and experimental methods.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3010 - INDEPENDENT STUDY IN ACCOUNTING
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis

BACC 3011 - MANAGEMENT CONTROL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Study of management control and analysis of the problems of managing a decentralized operation. Integrates material from accounting, the behavioral sciences, economics, managerial information systems, and strategic planning in discussing these problems.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BACC 3012 - SURVEY FINANCL ACCTG RESEARCH**
Minimum Credits: 3
Maximum Credits: 3
Reviews the history and development of accounting theory emphasizing the historical development of ideas and current issues in accounting theory. Current research at KGSB in this area also will be reviewed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BACC 3014 - EXPERIMENTAL RESEARCH IN ACCTG**
Minimum Credits: 3
Maximum Credits: 3
The course covers recent experimental studies that apply behavioral decision theory, psychology, and economics to address a variety of accounting research questions. The course focuses most heavily on recent work. The goals of this course are to (1) familiarize students with recent experimental research in accounting, (2) help students develop the skills necessary to critically evaluate such research, and (3) generate ideas for future experimental research topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BACC 3015 - ANALYTCL EMPRCL RESEARCH ACCTG**
Minimum Credits: 3
Maximum Credits: 3
Seminar covers a subset of the recent mathematical research in managerial accounting. Most of the sessions are devoted to studying the role of managerial accounting in multiperson firms. The agency model of individual behavior within a multiperson firm is compared to other analytical models which have been offered as frameworks for managerial accounting. Specific papers which deal with the role of managerial accounting within a multiperson firm and are based on the agency model are discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BACC 3016 - ADVANCED TOPICS IN ACCOUNTING**
Minimum Credits: 3
Maximum Credits: 3
Discusses various topics selected from current research in the area of accounting to meet the needs and interests of the students. Previous topics have included agency theory auditing, cognitive processes and accounting research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BACC 3017 - ACCOUNTING WORKSHOP**
Minimum Credits: 3
Maximum Credits: 3
Presentation of research papers in various aspects of accounting and related areas by faculty and distinguished visitors. The student is expected to attend the workshop, participate in discussions, and present a workshop paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BACC 3018 - EMPRCL RSRCH MANGRL ACCOUNTING**
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3022 - ADV TOPICS MANAGEMENT CONTROLS
Minimum Credits: 3
Maximum Credits: 3
This seminar will cover current issues in the area of planning and control such as emerging organizational forms and high velocity environments from an interdisciplinary perspective. It will focus on the development of alternative paradigms with which to examine critical issues in the planning and control process.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BACC 3023 - ECON MODELS OF AGENCE & CONTROL
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3024 - ECON MODLS INCENTIVES/CONTROLS
Minimum Credits: 2
Maximum Credits: 2
This seminar provides students with an introduction to incentive problems in firms and markets and how contractual arrangements serve to mitigate these problems. Students are introduced to the classic papers in agency research and current working papers spanning economics, accounting and corporate finance.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

BACC 3025 - CAPITAL MARKETS RSRCH IN ACCTG
Minimum Credits: 3
Maximum Credits: 3
This course provides students with a solid understanding of capital market research in accounting and empirical research training. The class will cover topics such as the relation between stock prices and earnings, stock market anomalies, and analyst and management forecasts. Students will also replicate some classic finance and accounting papers in order to provide them with some hands-on experience working with compustat, crsp, ibes, and sdc data using sas statistical programming. The class will help students to better evaluate research in workshops, develop new ideas and do empirical tests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BACC 3026 - EMPIRICAL ARCHIVAL RES IN ACCT
Minimum Credits: 3
Maximum Credits: 3
This doctoral seminar will explore empirical archival research in accounting.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BACC 3099 - READINGS IN ACCOUNTING
Business Administration

BUSADM 3001 - BEHAVIORAL RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to familiarize you with and develop an appreciation for business research methodology. Research skills will be an important determinant of your success as an academic. The course will introduce you to a variety of research approaches, allow you to develop an understanding to effectively use these approaches in your own research, and prepare you to evaluate research done by others. The course will also provide you with an introduction to causal modeling techniques (lisrel, pls). By the end of the course you should develop a sound appreciation of the research process and a range of research approaches that can be applied to management problems. In addition, you should have an appreciation for what constitutes good research so that you can constructively critique and make use of research done by others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3002 - MULTIVARIATE ANALYSIS BHRVL RES
Minimum Credits: 3
Maximum Credits: 3
This course is intended for students engaging in business research. The course will cover topics such as multiple regression analysis, analysis of experimental data (using Anova, Ancova, Manova, and Mancova), logistic regression, and Hierarchical Linear Models (HLM). Emphasis will be placed on analyzing actual data sets using SAS and HLM software. Students enrolling in this course should already have taken at least two courses in basic statistics, and be knowledgeable about bi-variate analysis, hypothesis testing, and basic regression. The course will emphasize replication and extension of previous studies, and writing up research results based on findings from statistical analyses. Learning how to choose appropriate statistical techniques to test hypotheses and how to translate statistical results into written text are key aims of the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3003 - MULTIVARIATE STATISTICAL ANAL
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the student to several of the best known multivariate methods to make them familiar with the terminology and mathematical language of multivariate methods, and provide them with practical experience using multivariate techniques. Some of the methods covered will be comparisons of multivariate means, multivariate regression models, principal component analysis, factor analysis, canonical correlation, discriminant analysis, and clustering and distance methods. This course requires basic knowledge of matrix algebra, probability theory and mathematical statistics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3005 - PROGRAM EVALUATION
Minimum Credits: 3
Maximum Credits: 3
Previews critically and exhaustively the literature of theory, substance, and methodology inherent in evaluation research. Fields sampled include accounting, and social auditing, education, housing, management, marketing, psychology, sociology, and welfare, emphasizing the social and behavioral sciences. Particular attention is given to models for conducting short-term as well as more rigorous sophisticated evaluation processes underlying the assessment of individuals, organizations, and programs.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.
BUSADM 3006 - MULTIVARIATE ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Examines the theory of and applications for multivariate statistical methods of analysis including, but not limited to, multiple regression, multiple discriminant analysis, and factor analysis. Emphasis on the use and limitations of these tools and upon the meaning and interpretation of results. Students are expected to gain first-hand experience with several techniques by applying canned computer programs to appropriate data sets and by discussing appropriateness of applications in published literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3008 - RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with practical experience in using various social science methods of research. Topics addressed will include sampling, written and telephone surveys, field observation and experimentation. Students will also learn how to code data and develop a computer data base.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3009 - ECONM/TRANSITION:FIRM BEHAV
Minimum Credits: 3
Maximum Credits: 3
The objective of the seminar is to explore the implications of the transition from command economy to market economy for the behavior of firms operating in such an environment. The behavior of firms will be analyzed from the perspective of the functional disciplines which comprise the theory of business enterprise.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3011 - INTERNATIONAL MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
This doctoral seminar will cover the foundations of the field of international management drawing on multiple theoretical perspectives: economics, strategic management, and organizational behavior and theory. The goal of the course is to provide students with an understanding of the intellectual lineage and behavioral assumptions underlying the different approaches to studying international management. We will explore why firms choose to invest overseas and what determines their selection of location and ownership structure. We will look at the role that firm capabilities play in the international context, the influence of regional differences on organization design choices, as well as the nature of comparative management. The goals of the course will be to explore the intellectual foundations of key questions in the international management literature and to explore the ways in which the theories can be useful in undertaking empirical studies. Additional time will be devoted to specific international management topics that most closely match students' interests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3012 - STRUCTRL EQUA MODLNG (LISREL)
Minimum Credits: 3
Maximum Credits: 3
Seminar designed to introduce students to the basics of structural equation modeling through a conceptual practical non-mathematical approach.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.
BUSADM 3013 - WORK AND ORGANIZATIONS
Minimum Credits: 3
Maximum Credits: 3
This seminar is intended for Ph.D. students who wish to develop an understanding of the theoretical underpinnings of research on the management of knowledge and work in organizations. It reviews the major theoretical perspectives, but places a particular emphasis on the current empirical literature related to human resource management. Because of the multi-disciplinary nature of this research space, readings draw on a broad range of material including studies from sociology, organization theory, strategy, economics, and policy. These are used to develop an integrative understanding of the underpinnings of work and employment-related research published in top tier management journals.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

BUSADM 3019 - ORGANIZATIONAL LEARNING
Minimum Credits: 3
Maximum Credits: 3
This seminar first examines the roots of organizational learning and then explores how the evolving theories and methods for developing learning organizations serve to integrate not only the most recent theoretical advances in strategic management, organization theory, and information systems, but also the applied approaches of total quality management and business process re-engineering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3021 - BHVRL SCIENCE RES PRAC
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to provide a hands-on experience in the development, design and execution of rigorous behavioral science research. Students will be asked to design and execute a theory-based research project. We will explore a variety of different methodological approaches and discuss the fit between students' specific research questions and different techniques. Our goal is two-fold: (1) to help students develop a sophisticated understanding for what constitutes rigorous research within the field; and (2) to coach students through the research process in order to create a high-quality empirical paper for publication.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BUSADM 3053 - INTRO TO CALC FOR PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
Introduction to calculus for public policy - calculus for use in policy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3055 - INTRO TO THE THEORY OF GAMES
Minimum Credits: 3
Maximum Credits: 3
Concepts methods and applications: theory of games.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3057 - DYNAMC ANLYSIS & OPTMZTN POLCY
Minimum Credits: 3
Maximum Credits: 3
Topics in public administration will focus in depth on selected problems in public management.
BUSADM 3058 - MULTIVARIATE ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Practical overview of most commonly used methods of multivariate statistical analysis (Regression, Anova, and Ancova with Excel, SPSS and Amos).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BUSADM 3199 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Business Economics

BECN 2001 - MANAGERIAL ECONOMICS 1
Minimum Credits: 3
Maximum Credits: 3
Theories of price and output decisions and management applications. Topics include: theory and measurement of demand, production functions, cost-output relationships, pricing practices in competitive and oligopolistic markets, the roles of prices and profits in resource allocation, and the functioning of a decentralized economic system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2002 - MANAGERIAL ECONOMICS 2
Minimum Credits: 2
Maximum Credits: 2
Overview of the fundamental macroeconomic forces acting on the economy and the business enterprise. An analytical framework is developed which facilitates investigation of the sources of unemployment, economic growth, and inflation. Introduction to economic measurement and macroeconomic forecasting.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2003 - ACCEL MANAGERIAL ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
An accelerated version of managerial economics 1 and 2 intended for students with a solid background in economics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BECN 2004 - MANAGERIAL ECONOMICS 2
Overview of the fundamental macroeconomics forces acting on the economy and the business enterprise. Develops an analytic framework which facilitates investigation of the sources of unemployment, economic growth and inflation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BECN 2010 - ECONMCS OF MERGERS & ACQUISTN**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Designed to examine the theory and practice of corporate mergers, and particularly the economic considerations which provide analysis and motivation for such activities. Empirical studies will be reviewed to list hypotheses underlying the merger movement.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BECN 2011 - BUSINESS FORECASTING**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Intended for students who are interested in developing an appreciation of the values and limitations of quantitatively oriented business forecasting methodologies.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BECN 2012 - ECONOMICS OF TRANSITION**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
The objective of the course is to gain an understanding of the special problems one can expect to encounter in establishing joint ventures or undertaking other economic activities in countries undergoing transition from a command economy to a market economy. The course will conclude with a discussion of the special problems of joint ventures.

BECN 2503 - MANGNG RISK IN GLOBL ENVIRNMNT
Minimum Credits: 1.5
Maximum Credits: 1.5
The objective of this course is to familiarize students with core tools used by senior managers who develop and implement an international business strategy.
BECN 2504 - MANAG RISK GLOBAL ENTERPRISE
Minimum Credits: 1.5
Maximum Credits: 1.5
To familiarize students with the core tools utilized by senior managers who develop and implement an international business strategy. Evaluate marketplace drivers of risk adjusted returns. Study the connectivity between global commercial trade and capital markets. Evaluate regional, political and economic forces at play in the Americas, Europe and Asia and their relevance to both business development and risk variable. Construct an inventory of forensic risk analysis tools, & assess applications. Build analytical & communications skill of use in corporate setting.

BECN 2509 - GLOBAL MACROECONOMICS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This elective course focuses on the forces which drive or determine overall national/global economic activity. The course is organized around the progressive development of an open economy" macroeconomic model which is capable of handling a number of key policy and other variables."

BECN 2510 - GLOBAL MACROECONOMICS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
This follow-up course continues the focus on the forces which drive or determine overall national/global economic activity. This course expands the open economy" macroeconomics framework developed in BECN 2509.""

BECN 2511 - GLOBAL MACROECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This elective course focuses on the forces which drive over all national/global economic activity. A study of macroeconomics is crucial for an appreciation of the set of factors at the national and global level which impact upon the business firm's demand and cost patterns--factors which are largely beyond the firm's ability to control directly, but which must be taken into account as part of the decision making and strategic planning process.

BECN 2512 - KEY ISS INT'L ECON FOR MANAGRS
Minimum Credits: 3
Maximum Credits: 3
This course introduces the broad field of international economics, with emphasis on developing framework for effective management in today's global economy. Key issues and problems are explored in areas of international trade, international investment and international payments, from perspective of manager of enterprises in operating in a cross-border, international environment. The approach will be verbal, graphical and non-technical and will draw form actual data sets and late-breaking news items from such business-oriented publications as financial time economist, wall street journal and New York times.
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

**BECN 2513 - MANAGING RISK IN GLOBL ENTRPRS**
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to familiarize students with core tools used by senior managers who develop and implement an international business strategy. Independent research and team approaches in a solutions-driven environment will be utilized.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis
**Course Requirements:** Katz Grad School of Business students only.

**BECN 2523 - EURPN ENRGY LAW & MKT REGLTN**
Minimum Credits: 2
Maximum Credits: 2
This course deals with the framework within which firms must operate, set by European laws and national energy regulators. It covers the general approach of competition policy, and the specifics of cross-border energy trade, electricity market monitoring and network price regulation. It starts with general concepts of regulation and liberalization, which is a better term than de-regulation for the changes that have taken place in energy markets. Students will discuss the traditional public interest view of regulation, together with theories of private interest and regulatory capture. The perceived shortcomings of regulation led to the move to deregulate, in general, and specifically in electricity. This will be covered with a discussion of some national case studies. In the EU context, students will be briefly introduced to the way in which the EU makes policy and issues directives. They will then discuss the directives central to the liberalization of the energy industries. These industries are also subject to competition law, which covers the abuse of dominance, anti-competitive agreements between firms, and mergers between firms. Students will be given a case study of a large-scale energy merger, and asked to present the case and their recommendations (taking the part of the commission) to the class. Even though the electricity industry has been liberalized, charges for using the networks remain regulated. The final part of the course discusses the way in which limits on these charges can be set, and the students will present a case study in which they have calculated the charges for an actual firm.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** Katz Grad School of Business students only.

**BECN 2528 - ENERGY TRADING & ENERGY RETAIL**
Minimum Credits: 2
Maximum Credits: 2
This course shows how wholesale energy prices respond to market fundamentals, and how retail prices should be set to ensure that firms recover their wholesale and production costs. The course starts with a description of the cost structure of electricity generation, concentrating on the distinction between fixed and variable costs, and the characteristics of different kinds of technology. An electricity market will not be viable if generators are not able to recover their costs, but if it is sufficiently competitive, prices should be driven down to the level of marginal costs. As long as there is the right amount of capacity which means that the market should be "tight" at peak times, and as long as prices are allowed to rise at these times, this should allow generators to recover their costs. The course then discusses elements of "market architecture", what is the appropriate mix of forward, day-ahead and real-time markets (or other means of balancing the system)? It also discusses issues of market power, and why electricity markets can be particularly prone to suffering from excessive prices, given the slowness of entry and the limited response of most consumers to short-term price increases. The course also discusses the ways in which markets can be monitored and market power mitigated by regulators. The course then moves to retail markets. It starts with a discussion of traditional methods of setting prices, and the concerns faced by a monopoly power company: how can prices reflect its costs without excessive complexity. It then considers the position of a company in a competitive retail energy market, and the need to set prices that attract (or keep) its customers from rival suppliers.

Business Finance

BFIN 2004 - FINANCIAL MANAGEMENT LAB
Minimum Credits: 0
Maximum Credits: 0
This is an integral part of the financial management course.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: Katz Grad School of Business students only.

**BFIN 2005 - INTRO TO FINANCIAL MANAGEMENT**
Minimum Credits: 2
Maximum Credits: 2
An introduction to the tools used in financial decision making. Develops basic valuation models commonly used in finance, such as present value and capital asset pricing models, and focuses on their use in capital budgeting decisions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BFIN 2006 - FINANCIAL MANAGEMENT**
Minimum Credits: 3
Maximum Credits: 3
An introduction to the tools used in corporate financial decision making. Develops two basic valuation models commonly used in finance--present value models and the capital asset pricing model and focuses on the use of these models in corporate decision making. Examines capital budgeting, corporate structure policy, and corporate dividend policy.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BACC 2401 and BQOM 2401; PLAN: Business Administration (MBA)

**BFIN 2011 - CORPORATE FINANCE**
Minimum Credits: 1.5
Maximum Credits: 1.5
Focuses on the investment and financing decisions of firms. Topics include capital budgeting, theories of optimal capital structure, dividend policy and agency theory.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BFIN 2013 - EFFICIENCY OF CAPITAL MARKETS**
Minimum Credits: 1.5
Maximum Credits: 1.5
Objective is to gain an intuitive understanding of the operations of capital markets. Students read studies pertaining to the efficiency of capital markets, and study actual market responses to various events and decisions by the firm; tests of capital market efficiency are also discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**BFIN 2019 - INVESTMENT MANAGEMENT**
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course is an advanced elective; the first in a sequence of two courses aimed at familiarizing the student with operation of the capital market and the pricing of various securities traded in the market. Topics include: portfolio selection, bond and stock valuation and the behavior of stock prices.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFIN 2020 - CAPITAL MARKETS**
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
A continuation of investment management. Topics may include: bond prices, convertible securities, options, future contracts, and portfolio performance measurement.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFIN 2023 - FINANCIAL INSTITUTIONS-THEORY**
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Examines the preconditions for the emergence of financial institutions in an economy, the fundamental nature of their activities, and the basis for the development of a wide variety of institutions.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFIN 2024 - FINANCIAL INSTITUTIONS-ISSUES**
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Building on the basic theory of financial institutions, examines a wide variety of contemporary institutions emphasizing implications for managers of financial institutions. Includes: pressures of competition, innovation, portfolio constraints, and the impact of government regulation.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFIN 2025 - SPECULATIVE MARKETS**
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Organization of markets for put-and-call options on stocks, commodities, indices, and foreign exchange. Specific topics include arbitrage and hedging relationships, the valuation of options, and the implications of trading strategies in options.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BFIN 2029 - ADVANCED FINANCIAL MANAGEMENT**
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Extends the analysis of financial management by addressing in greater detail: capital budgeting, cost of capital, valuation, financial structure, and dividend policy. Other policies such as market efficiency, options, mergers, and leasing are also discussed. Covers tools and techniques of analysis leading to formation of financial policies and investment decisions.  
**Academic Career:** GRAD  
**Course Component:** Lecture
BFIN 2030 - VALUATION 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This course provides students with the skills and framework for measuring and managing the value of companies. The course begins by describing how firms create value and then develops the tools required to measure value. Students are required to demonstrate their facility with the techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2031 - CREATING VALUE THROUGH RESTRUCT
Minimum Credits: 1.5
Maximum Credits: 1.5
Building on concepts developed in valuation (BFIN 2030), this course examines how and why different types of corporate restructuring affect firm value. The course uses both case studies and readings from the applied corporate finance literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2030; PROG: Katz Graduate School of Business

BFIN 2032 - PERF MSRMTS & VALU-BASED MGT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will focus on how organizational design, control and coordination can work together to create shareholder value. The course material will use an interdisciplinary approach, drawing primarily on corporate finance, strategy and the economic analysis of incentive and control systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BFIN 2033 - INTERNATIONAL FINANCE 1
Minimum Credits: 1.5
Maximum Credits: 1.5
International finance 1 presents the conceptual foundations of international financial management from the perspective of financial markets that service international investment and decision making. The course begins with a review of the foreign exchange markets. The course concludes with a discussion of comparative analysis of systems for organizing financial intermediation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Katz Graduate School of Business

BFIN 2034 - INTERNATIONAL FINANCE 2
Minimum Credits: 1.5
Maximum Credits: 1.5
International finance 2 is an advanced seminar focusing on corporate finance issues from a global perspective. The unit of analysis is the multinational firm. This firm as a conduit of business activity supplies securities to domestic, foreign, and international markets. Our interest is to develop analytical tools that will assist our decision making regarding asset configurations, financial structures, and the distribution of profits for the multinational firm.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2036 - CORPORATE FINANCE
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to corporate financial management. The course builds on BFIN 2006 (introduction to financial management) to provide students with the conceptual framework and analytical tools necessary to appreciate, understand, and analyze the problems facing corporate financial managers. The course consists of four main parts. The first part develops the tools necessary to conduct the analysis of corporate finance problems. These tools include the analysis of data reported on financial statements, building pro-forma financial statements, the basics of put and call options, and an introduction to corporate valuation techniques. The second part of the course examines how managers set the two primary corporate financial policies: capital structure and payout policy (e.g. Dividends and share repurchases), and the process of restructuring in financial distress and bankruptcy. The third part of the course analyzes the process of issuing securities in the capital markets, including the role of the investment banker. Finally, the fourth part explores several aspects of mergers and acquisitions, including the motives for these transactions, the structure of the deal, and the role of private equity firms.

Academic Career: GRAD

Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BFIN 2037 - CORPR GVRNC & MGMNT CONTRL
Minimum Credits: 1.5
Maximum Credits: 1.5
This course draws from corporate finance and the economics of contacts and management control systems, to provide an understanding of how organizational and how contractual and governance arrangements and market mechanisms mitigate such conflicts.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2038 - VALUATION E-COMMERCE COMPANIES
Minimum Credits: 2
Maximum Credits: 2
This course examines the topic of valuing e-commerce. Students conduct a valuation of particular e-commerce companies and present their results in presentations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2039 - INVESTMENT MGT/CAPITAL MARKETS
Minimum Credits: 3
Maximum Credits: 3
Focuses on security analysis, portfolio analysis, and the fundamentals of investment theory. Topics include bond and stock valuation, determination of interest rates, effects of inflation and taxes on security values.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410 ; PROG: Katz Graduate School of Business

BFIN 2041 - FINANCL MARKETS & INSTITUTIONS
Minimum Credits: 3
Maximum Credits: 3
Integrates basic factual and descriptive materials on financial institutions and markets. Presents an overall descriptive and analytical view of the financial system as it relates to the economic process.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2042 - ACQSTN PRVTELY HELD COMPANIES
Minimum Credits: 2
Maximum Credits: 2
The course will provide an introduction to the acquisition of privately held companies along with strategies for value creation in the acquired business. The course, which is exclusively taught using the case method, takes lessons taught in the valuation courses extending these concepts to the valuation of privately held business, the structuring of the acquisition balance sheet and the execution of the acquisition process. While a discussion of secured financing alternatives will be included, the application of junior capital, both mezzanine debt and equity will be the focus of the course. A risk analysis of the target will be performed and an investment thesis intended to illustrate value creation techniques will be central to each class discussion. Upon completion, students will be better prepared how to assess both operational and financial forms of risk, develop techniques intended to reduce both forms of risk, and consider value creation strategies in marketing, operations, finance and management. Each case will involve a real company acquired over the years by PNC equity partner along with actual selling memorandum, diligence prepared by PNC principals, market research firms, accounting firms and law firms employed by PNC as part of their diligence process.

BFIN 2066 - FINANCE PROJECT COURSE
Minimum Credits: 3
Maximum Credits: 3
Brief description: project will focus on valuation of potential acquisitions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2068 - MARKETS AND TRADING
Minimum Credits: 2
Maximum Credits: 2
This course is designed to give participants a broad understanding of the operations of various financial markets with special focus on liquidity, market structure and trading. With this objective in mind, the course will concentrate on the operations of exchanges, trading systems and broker-
dealer intermediaries. Participants will be exposed to a range of issues regarding the formulation of trading decisions and market structure design and regulation. Simulation software will be used to provide hands-on experience with making tactical trading decisions in different market structure environments.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

### BFIN 2069 - FIXED INCOME SECURITIES

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course examines the concepts that are most frequently encountered in the market for fixed income securities. Specifically, the course describes the most important fixed income securities and markets and develops tools for valuing these securities and managing their interest rate and credit risk. Historically, "fixed-income" refers to securities which promise fixed cash flows over their lives such as a fixed-rate coupon bond. Now, it is generally accepted that a fixed income instrument is one whose value is driven by the level of interest rates and/or the value of a related underlying asset. This classification would include floating rate bonds, callable bonds, bond futures, bond options, caps, floors and collars, interest rate swaps, credit derivatives and asset-backed securities. The analysis of fixed income securities is quantitative in nature. We will focus on the intuition behind the various concepts presented in class but there will be a fair amount of computation involved. Students should be comfortable with linear algebra, calculus, probability distributions, regression analysis and statistical concepts like mean, variance and correlation (covariance). The course will also assume a high level of familiarity with a spreadsheet package like microsoft excel.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:**  
PREQ: (BFIN 2006 or BFIN 2410) and BFIN 2051; PROG: Joseph M. Katz Grad Sch Bus

### BFIN 2110 - CMC ABROAD-FINCL MKTS IN REGIN

**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course introduces students to the issues faced by managers in dealing in emerging financial markets. The objective of the course is to give students a feeling for how financial markets and financial institutions work in emerging markets in eastern Europe with special focus on the Czech Republic.

**Academic Career:** GRAD  
**Course Component:** Lecture

Course Requirements: Katz Grad School of Business students only.

BFIN 2139 - INVESTMENT MGT/CAPITAL MARKETS
Minimum Credits: 1.5
Maximum Credits: 1.5
This course is an advanced elective, familiarizing the student with operation of the capital market and the pricing of various securities traded in the market. Topics include: portfolio selection, bond and stock valuation and the behavior of stock prices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2140 - REAL ESTATE FINANCE
Minimum Credits: 2
Maximum Credits: 2
This course provides an introduction to real estate with a focus on the valuation and financing of real estate. The following topics are expected to be covered as the course focuses on income producing properties: economic theory of real estate, valuation technique (including pro-forma cash flow projections), financing strategies, risk analysis, taxation, and the securitization of real property interests. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate terminology and real estate markets. Classes are conducted in a standards lecture format with discussion required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410 ; PROG: Katz Graduate School of Business

BFIN 2145 - FINANCIAL MODELING
Minimum Credits: 3
Maximum Credits: 3
The course will apply finance theory to solve various problems in financial management and investments. It will take a hands-on approach in building financial spreadsheet models using Microsoft excel. Students will learn to address issues that arise in various areas of financial analyses. These issues include but are not limited to discounted cash flow valuation, cost of capital estimation, asset return calculations, portfolio theory, index models, option pricing models, bond pricing and investment performance analysis.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BFIN 2006 or BFIN 2410; PROG: Joseph M. Katz Grad Sch Bus

BFIN 2146 - RISK MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
Financial innovation helps financial systems provide more efficient resource allocation in an economy. Innovation provides societal benefits by lowering transactions costs, creating securities that allow individuals to tailor their investment so that they are more closely aligned with specific needs and making prices more informative. Participants in the economy realize these benefits in the form of lowered costs of raising funds, enhanced investment returns and more precise management of risk. The pace of financial innovation has accelerated in the past two decades with the net result being that this period has witnessed the creation of a wide variety of complex financial instruments that can be used for more effective risk management. Many of these products fall under the category of derivatives - instruments whose values derive from other more fundamental assets such as commodities, currency exchange rates, stocks (equities) and bonds (interest rates). The building blocks for many of these complex financial instruments are three basic derivative instruments, forwards/futures, options and swaps. This course will provide a detailed introduction to the derivative securities and their use in risk management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BFIN 2147 - VALUE AT RISK AND REGULATION
Minimum Credits: 2
Maximum Credits: 2
It is well known that firms that manage risk effectively are in a better position to take advantage of opportunities for long-term growth. Effective
management of risk required a clear understanding of how risk can be quantified and controlled. As a first step, this course will provide an introduction to methods available to quantify financial risks and manage them. The credit crisis that has been faced by global markets has renewed calls for more effective regulation and transparency. As a second step, this course will also examine the role of regulation in risk management and measurement. As a follow-up to the "risk management", this course will focus on applications of the material introduced in that course in using various case studies.

**BFIN 2314 - INVESTMENT MANAGEMENT**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course examines the investment process. The course will cover the following areas: alternative investments; the risk and expected return of investments; the investment management process; asset classes and asset allocation; modern portfolio theory and management; portfolio performance evaluation; portfolio rebalancing; the financial markets; mutual funds; stock evaluation approaches; and retirement planning.

**Academic Career:** GRAD

**Course Component:** Lecture
 BFIN 2339 - INVESTMENT MGT/CAPITAL MARKETS  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Focuses on security analysis, portfolio analysis, and the fundamentals of investment theory. Topics include bond and stock valuation, determination of interest rates, effects of inflation and taxes on security values.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Course Requirements:** Katz Grad School of Business students only.

 BFIN 2409 - FINANCIAL MANAGEMENT 1  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The main objective of this course is to gain understanding of the theory and practice of financial decision making. This course develops the tools and framework necessary to address the question what investment projects should be undertaken to maximize shareholder wealth? To examine this question, we will learn how to value an uncertain stream of cash flows and apply the concept of the time value of money in valuing bonds and equity. The course covers a number of market-based investment criteria and develops an entity valuation model, based on discounted cash flows (DCF) used for standard capital budgeting decisions. We will conclude with a short introduction to the concept of risk and return, resulting in the cost of capital. We will cover a case discussion on capital budgeting to put our framework in a more realistic environment.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Course Requirements:** CREQ: BACC 2401 or BQOM 2401; PROG: Joseph M. Katz Grad Sch Bus

 BFIN 2410 - FINANCIAL MANAGEMENT 2  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course builds on financial management i and develops an asset pricing framework used in corporate finance based on the trade-off between risk and return. We use modern portfolio theory to determine a suitable asset pricing model and arrive at determining the relevant discount rate to reflect the risk associated with the cash flow we focused on in financial management i. Finally, we will address how financing and capital structure choices affect project and firm value using the above techniques and methods. The course will conclude with three valuation methods: WACC, APV, and FTE and an extensive case discussion. Financial management i & ii are prerequisite courses for any other finance elective in the curriculum.  
**Academic Career:** GRAD

BFIN 3014 - SEMINAR IN CORPORATE FINANCE
Minimum Credits: 3
Maximum Credits: 3
Designed to develop the theoretical tools necessary for original research in the field of corporate finance. A number of current theories of optimal investment and optimal structure will be analyzed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.
BFIN 3016 - ADVANCED TOPICS IN FINANCE
Minimum Credits: 3
Maximum Credits: 3
This course examines empirical corporate finance in the areas of equity and debt financing, capital structure, and financial intermediaries in the primary capital market. International aspects of a number of topics are covered. The course uses a mix of influential papers and recent papers in each area. Students will present papers, write referee reports, and complete a term project.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BFIN 3018 - MARKET MICROSTRUCTURE
Minimum Credits: 3
Maximum Credits: 3
Analyzes the process and results of trading assets under a set of explicit trading rules. Research in this area examines the structure provided by various market mechanisms to model how rules for price setting evolve in markets. The purpose of this seminar is to provide an introduction to the basic paradigms that are used to explain the behavior of markets and their participants. In addition to discussing the theory underlying market microstructure, we will examine a variety of empirical papers that use tick-by-tick data on bonds, stocks, options and futures.

Business Human Resources Mgt

BHRM 2007 - INTRO TO HUMAN RESOURCES MGT
Minimum Credits: 2
Maximum Credits: 2
Introductory survey of the concepts and tools used in the management of organizational personnel. Among the issues addressed are human resources planning, personnel recruitment and selection, human resources development, compensation administration, and labor management relations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2008 - MANAGEMENT OF HUMAN RESOURCES
Minimum Credits: 3
Maximum Credits: 3
Covers basic concepts and tools used in the management of organizational personnel. Includes human resources planning, personnel recruitment and selection, human resources development, compensation administration, and labor-management relations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2010 - PUBLIC POLICY IN HUM RES MGT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
A conceptual model of the human resources/industrial relations system is developed, and concepts of worker organization and participation in the system are explored. Intensive review of the role of government and the legal framework as they relate to the management of human resources.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2011 - PUBLIC POLICY HUMN RESORC MGT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BHRM 2010.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BHRM 2015 - COLLECTIVE BARGAINING
Minimum Credits: 1.5
Maximum Credits: 1.5
Systematic introduction to employee relations in a unionized environment. Labor-management relations are examined through a review of the legislative framework regulating collective bargaining, analysis of union organizing drives, and an exploration of the negotiations process to develop a collective bargaining agreement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2016 - LABOR ARBITRTN & CONTRC ADMIN
Minimum Credits: 1.5
Maximum Credits: 1.5
Analyzes the legal and behavioral aspects of the administration of labor-management agreements, including grievance procedures, the arbitration process and decision making criteria, and industrial discipline.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2021 - STAFFING ORGANIZATIONS
Minimum Credits: 1.5
Maximum Credits: 1.5
Designed to develop an advanced framework for the analysis and understanding of organizational personnel systems. There is an in-depth exploration of human resource planning and related programmatic activity which may include job analysis, Performance appraisal, and some aspects of human resources development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2022 - COMPENSATION
Minimum Credits: 1.5
Maximum Credits: 1.5
Explores in-depth the personnel selection and compensation elements of the overall human resources system which are examined in the context of a proactive planning system for developing and utilizing organizational human resources.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2023 - HUMN RESOURCES PLNNG/STRATGY 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Personnel policies and programs as well as the available skills, knowledge and attitudes can provide particular opportunities or limitations to management as an organization's strategic goals and plans are defined. This seminar is designed to examine organizational human resources management from a strategic perspective. The key focus will be on exploring human resources planning and strategy concepts, developing an understanding of the related analytical tools, & determining how these concepts and tools can be used to enhance an organization's position.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 2024 - HUMN RESOURCES PLNNG/STRATGY 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of Human Resources Planning/Strategy 1."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 2026 - HUMAN RESOURCES MGMNT IN MFG**
Minimum Credits: 3
Maximum Credits: 3
This course examines human resources management within the manufacturing sector of the economy. It describes and analyzes relevant practices in manufacturing firms, focusing heavily on labor-management relations and conflict resolution.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

**BHRM 2027 - SEMINAR IN HUMN RESOURCE MGMNT**
Minimum Credits: 3
Maximum Credits: 3
An advanced exploration of organizational human resources management. Offers an in-depth examination of human resources planning as a framework for the design and development of specific personnel programs. Also intensive study of the theoretical and operating concepts in job analysis, performance appraisal, personnel selection, and compensation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 2032 - HRM IN MULTINATIONAL SETTINGS**
Minimum Credits: 1.5
Maximum Credits: 1.5
Designed to familiarize students with the structural, cultural, and legal implications of human resource management in multinational companies. Special emphasis is given to such issues as appropriate organizational structures for international operations, staffing overseas/foreign operating units, expatriate training and development, expatriate compensation policies, international employment legislation affecting decision making in overseas/foreign operating units, and international labor relations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 2041 - HRM IN MULTINTNL SETTINGS 1**
Minimum Credits: 1.5
Maximum Credits: 1.5
Designed to familiarize students with the structural, cultural, and legal implications of human resource management in multinational companies. Special emphasis is given to such issues as appropriate organizational structures for international operations, staffing overseas/foreign operating units, expatriate training and development, expatriate compensation policies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

**BHRM 2042 - HRM IN MULTINTNL SETTINGS 2**
Minimum Credits: 1.5
Maximum Credits: 1.5
This course is designed to familiarize students with the labor relations challenges and work-related laws that impact on employment relationships in overseas units. Special emphasis is given to industrial relations systems within the European community and those in pacific rim countries. Topics include the structure of national labor movements, legislative frameworks for collective bargaining, types of legal systems, and employment rights of MNC employees.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

### BHRM 2051 - HUMAN RESOURCE MGMNT PRACTICUM
- **Minimum Credits:** 2
- **Maximum Credits:** 6

The practicum serves two primary purposes: first it provides the opportunity for a student to gain first hand human resource experience by interning with an employer for 15 hours per week. Second, through weekly class meetings a variety of "current" topics in H.R. Are discussed, often with a guest lecturer from the business world.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

### BHRM 2052 - HUMAN RESOURCE PROJECT COURSE
- **Minimum Credits:** 2
- **Maximum Credits:** 6

This course entails research on employer-provided health care benefits to employees in the metropolitan area, including Pittsburgh, pa. The study is part of the SEIU’S (Service Employees International Union) nationwide effort to shape public policy on national health care.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

### BHRM 2060 - INDEP STUDY HUMN RESOURCES MGT
- **Minimum Credits:** 1
- **Maximum Credits:** 9

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

### BHRM 2061 - INDEP STUDY INDUSTRL RELATIONS
- **Minimum Credits:** 1
- **Maximum Credits:** 9

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

### BHRM 2308 - MANAGEMENT OF HUMAN RESOURCES
- **Minimum Credits:** 3
- **Maximum Credits:** 3

Covers basic concepts and tools used in the management of organizational personnel. Includes human resources planning, personnel recruitment and selection, human resources development, compensation administration, and labor-management relations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

### BHRM 3003 - FOUNDATIONS OF HRM MANAGEMENT
- **Minimum Credits:** 3
- **Maximum Credits:** 3

A doctoral seminar designed to provide students with an in depth grounding in the HRM as a strategic function, HR staffing, compensation and incentive reward systems, HR evaluation and appraisal, and HR development. In each area, students will be exposed to the classic literature that shaped the field, some of the key literature relating to the theory and development of the area, and current issues that are the focus of research in the field. The readings and discussion will emphasize content and methodology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BHRM 3010 - INDEP STUDY HUMN RESOURCES MGT
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis

BHRM 3011 - HUMN RESOURC SYS/ORGNZTNL ANAL
Minimum Credits: 3
Maximum Credits: 3
Focuses on research contributions which provide the foundations for the design of human resource systems. Examines approaches ranging from scientific management and classical administrative models to human resource models of personnel management systems. Also reviews research on job design, job satisfaction, human resource accounting, and organizational socialization.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BHRM 3013 - THRY METH HUMN RESORC/PSNL MGT
Minimum Credits: 3
Maximum Credits: 3
Surveys the methods and theory in the specific subdivisions of personnel management. A methodological review of issues in field research, measurement (validity, reliability), and experimental design; also, current issues in recruitment, selection, performance appraisal, compensation, equal employment opportunity/affirmative action, training and development, and other topics of interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BHRM 3018 - ADV TOPCS HRM/ORG BEHAV RESRCH
Minimum Credits: 3
Maximum Credits: 3
This course focuses on research methods in human resources and organizational behavior.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 3019 - RSRCH TOPCS HUMN RESORC MGMT
Minimum Credits: 3
Maximum Credits: 3
This seminar is intended for PH.D. Students who wish to develop an understanding of the theoretical underpinnings of research on the management of knowledge and work in organizations. We will review major theoretical perspectives, but will place a particular emphasis on the recent empirical literature related to human resource management. Because of the multidisciplinary nature of this research space, our readings will draw on a broad range of material including studies from sociology, organization theory, strategy, economics, and policy. We will use these to understand the underpinnings of the current HR research published in top tier management journals.
Academic Career: GRAD

Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BHRM 3099 - READINGS HUMAN RESOURCES MGT
Minimum Credits: 1
Maximum Credits: 9
Business Marketing

BMKT 2005 - INTRO TO MARKETING MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
Overview of the field of marketing management, including the role of marketing in the organization, the functions of marketing management, appreciation for the perspective and viewpoints embodied in a marketing organization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2006 - MARKETING MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Topics include the role of marketing in a developed society, consumer behavior, competitive behavior, social and technological change, demand analysis and measurement, marketing research and model building, and marketing planning, strategy, and control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2009 - ADVANCED MARKETING MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Designed to create an understanding of marketing problems and perspectives and the contexts in which they arise. The ability to structure and analyze marketing problems is reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2011 - MARKETING RESEARCH 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Methods and approaches to structuring problems and collecting relevant data, and the implications they have for research design. Problem-oriented, but students need to be sufficiently familiar with research techniques to understand both their uses and limitations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2012 - MARKETING RESEARCH 2
Minimum Credits: 1.5
Maximum Credits: 1.5
Emphasizes multivariate methods, including multiple discriminant analysis, factor analysis, cluster analysis, and multidimensional scaling. Brief review of multiple regression and analysis of variance also included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2019 - MARKETING INFORMATION USE
Minimum Credits: 1.5
Maximum Credits: 1.5
Course is an in-depth marketing experience, involving theoretical classroom learning and discussion in combination with actual marketing applications developed in conjunction with available project topics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2021 - INDUSTRIAL MARKETING**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
Analyzes the similarities and differences between industrial marketing and end-use marketing. Behavioral analyses and analytical models are compared as solutions to the problems. Reciprocity, buyer-seller negotiations, etc. Are highlighted as unique facets of industrial marketing.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2022 - PROJECT COURSE - MARKETING**

Minimum Credits: 3  
Maximum Credits: 3  
Students in this course will work directly with a company dealing with real-life situations in the marketing area.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2023 - INTERNATIONAL MARKETING**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
Introduces the student to a systematic treatment of marketing on a global scale. In addition to examining the problems of performing various market functions in other countries, heavy emphasis will be given to analyzing and understanding the different cultures in which a firm's products might be marketed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2024 - PRODUCT DEVELOPMENT**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
This course deals with the development of new products. It focuses on the set of decisions that need to be made in the development of new products and tools useful for making these decisions.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2025 - PRODUCT MANAGEMENT**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
Objectives are to provide an understanding of the product planning and management function, to develop competence in identifying key variables bearing on product decisions, and to develop familiarity with techniques of marketing research used in coping with product problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.
BMKT 2027 - CONSUMER BEHAVIOR
Minimum Credits: 1.5
Maximum Credits: 1.5
Examines a wide variety of social science concepts as they relate to the behavior of consumers. Although consumer research methodology is not a main focus. Students will be expected to become familiar with the more common research techniques used to study consumers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2029 - PROMOTION AND ADVERTISING
Minimum Credits: 1.5
Maximum Credits: 1.5
Advertising is a complex phenomenon--at once leading, lagging, and reflecting the values of society. The pragmatic, operational, and decision-making aspects of advertising are emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2031 - MARKETING RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Emphasizes the understanding of research purposes and processes from the viewpoint of a consumer of research. Topics include problem analysis and hypothesis formulation, research design, implementation of research, and analysis of research results.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BQOM 2401; CREQ: BMKT 2409; PROG: Joseph M. Katz Grad Sch Bus

BMKT 2033 - INTERNATIONAL MARKETING
Minimum Credits: 1.5
Maximum Credits: 1.5
Introduces the student to a systematic treatment of marketing on a global scale. In addition to examining the problems of performing various market functions in other countries, heavy emphasis will be given to analyzing and understanding the different cultures in which a firm's products might be marketed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus

BMKT 2034 - SALES MOTIVATION SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
Sales motivation systems is designed to focus on the motivation process that takes place at the front line between sales managers and salespeople. As such, upon completion of this course students will be in a position to: evaluate the customer boundary role of salespeople in you firm. Implement question based selling process within your organization. Apply cultural, gender, age, and psychological context variables to the motivation of salespeople. Design and evaluate motivation processes to ensure communication and feedback from the front line sales force in insurance and banking. Assess emotional drivers and design specific actions to leverage individual motivation towards successful sales within various channels and with differing sets of customers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2035 - CONSMR BEHAV THEORY & PRACTICE
Minimum Credits: 3
Maximum Credits: 3
A variety of social and psychological theories and concepts related to consumer behavior as well as their practical application to the field of marketing are examined and discussed. Students have the opportunity to further apply what they learn through case presentations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2037 - PROMOTION AND ADVERTISING**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Advertising is a complex phenomenon—at once leading, lagging and reflecting the values of society. The pragmatic, operational and decision-making aspects of advertising are emphasized.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2039 - MARKETING THEORY AND PRACTICE**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Interdisciplinary approach to the development and evaluation of marketing policies and the establishment of systems for planning, implementing, and evaluating marketing programs.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2044 - MARKETING PROJECT COURSE**  
Minimum Credits: 3  
Maximum Credits: 3  
Project will focus on applying e-commerce tools to disposal of returned consumer merchandise.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2051 - RESEARCH USE PRACTICUM**  
Minimum Credits: 2  
Maximum Credits: 6  
This elective course is concerned with the various social, psychological, and technical factors that affect the use, nonuse, and misuse of market information in organizations. A special organizing framework called the "inquiry center" will be used to help students learn how managers can acquire more useful information and employ it better in decision making.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2052 - PRISM PRACTICUM**  
Minimum Credits: 2  
Maximum Credits: 6  
The tasks for this practicum will include writing ads and press releases, interacting with clients in initial meetings and subsequent presentations, experiencing various industries that are involved in the advertising process, such as television and radio studios, printing shops, etc.  
**Academic Career:** GRAD  
**Course Component:** Internship  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2053 - MARKETING MANAGEMENT PROJECT**
Minimum Credits: 3
Maximum Credits: 3

Students in this course will work directly with a company dealing with real-life situations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2056 - PRACTICUM IN MARKETING RESEARCH
Minimum Credits: 1
Maximum Credits: 5
Objectives are to provide students with an opportunity to apply market research concepts and techniques learned in other courses, develop new research skills, and gain insights into the market research process which can best be obtained only through immersion in an actual project of current interest to a firm. Students are exposed to project management issues and technical issues involved in market research.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2058 - INT'L RES PROJECT IN MARKETING
Minimum Credits: 1.5
Maximum Credits: 1.5
Objectives are to provide students with an opportunity to apply marketing concepts and skills learned in other courses. Students work on an international research project with a faculty advisor and corporate sponsors. Students have the opportunity to interact closely with the sponsors and usually will travel internationally to collect data. Students are exposed to project management skills and technical issues involved in international market research.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2059 - INT'L RSRCH PROJCT IN MARKETING
Minimum Credits: 2
Maximum Credits: 2
Objectives are to provide students with an opportunity to apply marketing concepts and skills learned in other courses. BMKT 2306 - MARKETING MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Topics include the role of marketing in a developed society, consumer behavior, competitive behavior, social and technological change, demand analysis and measurement, marketing research and model building, and marketing planning, strategy, and control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2317 - MARKETING THEORY AND POLICY
Minimum Credits: 2
Maximum Credits: 2
Interdisciplinary approach to the development and evaluation of marketing policies and the establishment of systems for planning, implementing, and evaluating marketing programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2338 - ADV MKTG/PRODUCTION DEVELOPMNT
Minimum Credits: 3
Maximum Credits: 3
Designed to create an understanding of marketing problems and perspectives and the contexts in which they arise. The ability to structure and analyze marketing problems is re viewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2409 - MARKETING MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
This course examines the role of marketing in creating value for the firm. It helps students answer the central question of marketing strategy, what value to provide and to whom, using the tools of segmentation, targeting, and positioning (STP) of brands. The course shows how central aspects of marketing mix programs, product, place, pricing, and promotion, all follow from an effective STP program, and how marketing support functions such as marketing research, advertising, and new product development can support effective marketing decisions. Emerging trends in digital
marketing, competition and globalization are examined. The course emphasizes experience-based learning to develop the necessary marketing knowledge and skills among students.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** Katz Grad School of Business students only.

**BMKT 2410 - MARKETING MANAGEMENT**

Course Requirements: Katz Grad School of Business students only.

BMKT 2520 - SALES FORECASTING
Minimum Credits: 1.5
Maximum Credits: 1.5
The main purpose of this course is to present the essential aspects of a wide range of methods for short, medium and long-term forecasting. The methods to be discussed in class include simple time-series projection techniques such as exponential smoothing and decomposition methods, more elaborate time series models (arima), causal models using multiple-regression and qualitative methods such as conjoint analysis. Aside from the in-class discussion, students will have the opportunity of applying these techniques to their own data, using statistical software and spreadsheets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2521 - INDUSTRIAL MARKETING
Minimum Credits: 1.5
Maximum Credits: 1.5
Analyzes the similarities and differences between industrial marketing and end-use marketing. Behavioral analyses and analytical models are compared as solutions to the problems. Reciprocity, buyer-seller negotiations, etc., Are highlighted as unique facets of industrial marketing.

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2522 - SALES MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course is somewhat unique in that it stresses hiring characteristics that should be sought by the sales manager and various recruiting techniques that have proven effective. The entire course will provide assistance to the student in sales positions following graduation and will form the basis for sales management decisions in future years.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Katz Graduate School of Business

BMKT 2523 - INTERNATIONAL MARKETING
Minimum Credits: 1.5
Maximum Credits: 1.5
Introduces the student to a systematic treatment of marketing on a global scale. In addition to examining the problems of performing various market functions in other countries, heavy emphasis will be given to analyzing and understanding the different cultures in which a firm's products might be marketed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: (PREQ: BMKT 2411 or CREQ: BMKT 2409); PROG: Joseph M. Katz Grad Sch Bus
BMKT 2524 - PRODUCT DEVELOPMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course deals with the development of new products. It focuses on the set of decisions that need to be made in the development of new products and tools useful for making these decisions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2525 - PRODUCT MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
Objectives are to provide an understanding of the product planning and management function, to develop competence in identifying key variables having a bearing on product decisions, and to develop familiarity with techniques of marketing research used in coping with product problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2526 - PRODUCT DEVELOPMENT & MGMNT
Minimum Credits: 3
Maximum Credits: 3
This course deals with the development of new products. It focuses on the set of decisions that need to be made in the development of new products and tools useful for making these decisions. This course will also introduce the student to a systematic treatment of marketing on a global scale. In addition to examining the problems of performing various market functions in other countries, heavy emphasis will be given to analyzing and understanding the different cultures in which a firm's products might be marketed.

BMKT 2529 - PRICING AND SALES PROMOTION
Minimum Credits: 1.5
Maximum Credits: 1.5
This course focuses on two important components of the marketing mix. First we will discuss and apply different approaches for determining the pricing policy for a brand. This discussion will cover economic, psychological and managerial pricing concepts. The remainder of the course will be devoted to the study of sales promotion as a form of price-discrimination and as a tool for producing immediate sales response.

Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMKT 2530 - SERVCS MKTG:STRATEGIES/TACTICS
Minimum Credits: 1.5
Maximum Credits: 1.5
The intention of the course is to provide a managerial frame work of services marketing for managers and students with an interest in the services sector. Its focus is primarily on services businesses but much of it is relevant to services in the manufacturing businesses. The course focus is on problem solving through discussion and analysis of contemporary service marketing cases. The course is appropriate for: 1) any student seeking a
follow up course to the basic marketing course and 2) students who plan marketing careers with service firms.

**Academic Career:** GRAD  
**Course Component:** Lecture

**BMKT 2538 - CATEGORY MANAGEMENT**

Minimum Credits: 3
Maximum Credits: 3
Category management is a key business function at both retailers and manufacturers and focuses on understanding consumers of products and the stores/outlets in which the products are sold. Key aspects include rationalizing assortment, organizing the physical display, and maximizing the value of the brand portfolio by addressing the shifting needs of different market segments. In this course, students will learn the various components of category management via hands-on experience with analytical tools (e.g., Cluster analysis, market structure analysis, regression) and software (e.g., Nielsen wand data). The course will use a combination of lectures, guest lectures by leading retailers (e.g., Giant Eagle, Dicks, GNC) and manufacturers (e.g., GSK, Del Monte, Smuckers), and projects to equip students for careers in category management, marketing, and retailing.

**Academic Career:** GRAD

**BMKT 2551 - DIGITAL & SOCIAL MEDIA ANALYTICS**

**Minimum Credits:** 2

**Maximum Credits:** 2

This course presents a data-driven approach to strategic and tactical marketing decision making in the context of digital and social media. Covering the three main media types of paid, owned, and earned media, students will learn about frameworks and methods that allow them to take data from sources such as google, Facebook, and twitter to be able to generate valuable and actionable managerial insights. The focus is on learning how to use digital and social media activity data to make better decisions, not on statistical methodologies (however, familiarity with excel is needed). The course will involve a combination of lectures, guest speakers, and hands-on workshops. This course is part of the digital marketing certificate and complements the "marketing and social media strategy" course.

**Academic Career:** GRAD

**Course Component:** Lecture

**BMKT 2553 - SOCIAL MEDIA STRATEGY**

**Minimum Credits:** 2

**Maximum Credits:** 2

Social media is changing how business is done around the world in almost every industry. How does social media affect your business? This course provides students with a detailed and up-to-date understanding of social media from a business strategy perspective. Through a series of lectures, case studies, and workshops, students learn how to identify opportunities for using social media in a variety of business areas, including marketing, operations, advertising, services, and human resources. The course takes a broad perspective and considers how social media it can be used successfully for business-to-consumer, business-to-business, and intra-company purposes. A central theme in this course is for students to apply what they learn to their own businesses and industries in order to identify opportunities for strategic, value creating uses of social media in their companies. After taking this course students will see how social media impacts business in many different ways and goes beyond simply using Facebook, twitter, or other popular social platforms for basic marketing purposes.

Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis

BMKT 3011 - CURRENT RESEARCH IN MARKETING
Minimum Credits: 3
Maximum Credits: 3
Develops competence in research design and methodology through the review and critique of examples from current marketing literature. Students are expected to position each study in a broader literature. Discussion will center upon the significance of the research hypothesis, the appropriateness of the design and methodological/measurement approach, and the validity of the research findings.
BMKT 3014 - MARKETING STRATEGY
Minimum Credits: 3
Maximum Credits: 3
Identifies the foundations of all aspects of marketing including product development and management distribution channel activity, sales force
management, sales promotion, pricing, planning and strategy, information systems, and marketing organization and management, among other
topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BMKT 3015 - FOUNDATIONS OF CONSUMER BEHAVR
Minimum Credits: 3
Maximum Credits: 3
This seminar seeks provide students a broad overview of the literature in consumer decision making and behavior. Students will also be encouraged
and expected to delve more deeply into areas of their particular interest. Further, students will increase their ability to develop and present their
research ideas.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BMKT 3099 - READINGS IN MARKETING
Cardiothoracic Surgery

CTSURG 5461 - PEDIATRIC CARDIOTHORACIC SURG
Minimum Credits: 0
Maximum Credits: 0
Four-week elective with clinical experience on pediatric cardiothoracic surgery service. Student will actively participate in care of pediatric cardiac surgery patient and attend weekly med/surg cardiology conference. Covers types of congenital heart disease, physiology and patho-physiology and current methods of operative intervention for palliation or repair. Time can be spent participating in clinical or laboratory research in progress.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

CTSURG 5462 - ADULT CARDIAC SURGERY
Minimum Credits: 0
Maximum Credits: 0
Clinical experience on adult cardiac surgical service. Students will participate in preoperative, intraoperative and postoperative care of patients suffering from acquired cardiac diseases. Students will be expected to work in the cardiac ICU and on the wards assisting house staff managing day-to-day patient care issues.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

CTSURG 5463 - ADULT THORACIC SURGERY
Minimum Credits: 0
Maximum Credits: 0
Students will be assigned to the thoracic service of UPMC. Participation will be in operative experiences, clinic setting and ward work. Focuses will be on benign and malignant surgical problems of the lungs, esophagus, mediastinum, chest wall and diaphragm. Students will be exposed to minimally invasive approaches including esophagostomy, lobectomy and others.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

CTSURG 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

CTSURG 5840 - CARDIOTHORACIC SURGERY RES
Minimum Credits: 0
Maximum Credits: 0
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

CTSURG 5899 - IND STDY CARDIOTHORACIC SURG
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

CTSURG 5900 - EXTRAMURAL CARDIOTHORACIC SURG
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in cardiothoracic surgery may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM catalog with all appropriate approvals to be received before the course may be added to the student's schedule for credit.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Cell Biol & Molecular Physio

MSCBMP 2800 - MS THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSCBMP 2820 - TOPICS IN INTEGRTV PHYSIOLOGY
Minimum Credits: 4
Maximum Credits: 4
Rather than the usual survey of organ systems which is typical of most physiology courses, this course will focus on the experimental approaches used to analyze complex homeostatic mechanisms in the intact mammalian organism. An attempt will be made to show how molecular and cellular methodologies can be integrated with classical physiological approaches to answer important questions about the survival and function of the whole animal. The subject matter will be taught through lectures, problem-solving sessions, and examination of original papers.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2821 - TOPICS CELLR MOLEC ENDOCRNLGY
Minimum Credits: 2
Maximum Credits: 2
Endocrinology entails the study of the dynamic interactions among multiple organ systems that are mediated by blood-born endocrine agents and modulated at the tissue and cellular levels by locally acting paracrine and autocrine factors. Course will provide detailed analysis of the molecular and cellular endocrinology of selective endocrine systems including metabolism, male and female reproduction, steroid receptors and nuclear co-activators. Course will consist of fifteen weekly two hour sessions which will include didactic lectures as well as student presentations of primary literature.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 2830 - CELL AND MOLECULAR PHYSIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course consists of lectures, problem-solving sessions, and examination of original papers. A main focus will be on the application of modern biophysical and molecular-genetic approaches in the analysis of cellular function. Topics include: 1. Membrane transport: pumps, channels, and bioelectrical potentials; 2. Excitable membranes; 3. Regulation of ion channels; 4. Absorptive and secretory functions of epithelia; 5. Signal
transduction; 6. Molecular motors, cell motility, and muscle contraction.

**MSCBMP 2840 - REGULATION OF MEMBRANE TRAFFIC**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

Course analyzes membrane/protein traffic along both the biosynthetic & endocytic pathways. Emphasis placed on how this traffic is regulated. Topics include the role of g-proteins (both heterotrimeric & small), coat proteins (coatamer 1 & 2 & adaptors), signal transduction cascades (pke, pka, ip3, etc.), & Snare complexes in protein trafficking. Also, we will discuss the role of the cytoskeleton in transporting cargo & signal transduction. Membrane traffic in several specialized cell types will be covered including polarized epithelial cells, cells of the immune system, & neurons.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**MSCBMP 2851 - RES SEM/CELLULAR PHYSIOLOGY**

- **Minimum Credits:** 1
- **Maximum Credits:** 1

Advanced research seminar with journal club format specializing in current aspects of cellular physiology.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad SN Basis

**MSCBMP 2852 - RES SEM/CELL BIOL MEMBR TRAFFC**

- **Minimum Credits:** 1
- **Maximum Credits:** 1

Advanced research seminar with journal club format specializing in current aspects of membrane trafficking.

**Academic Career:** GRAD

Advanced research seminar with journal club format specializing in current aspects of molecular and cellular physiology.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis
MSCBMP 2856 - RESEARCH SEMINAR/STEM CELLS
Minimum Credits: 1
Maximum Credits: 1
The stem cell journal club will focus on recent articles addressing mechanisms regulating proliferation and differentiation of adult tissue-specific stem cells, interaction of these cells with stem cell niches, and use of these cells for tissue regeneration. Each week, one student will be responsible for selection and distribution of a relevant paper, and preparation of a 15 minute overview of the field and central hypotheses. The paper will then be discussed in a round-robin fashion with other members of the journal club presenting data. Students will be graded according to the quality of their introductory presentation and their participation in the discussion.
AcademicCareer: GRAD
CourseComponent: Seminar
GradeComponent: Grad SN Basis

MSCBMP 2860 - MULTIPARM MICROSCPC IMAGNG
Minimum Credits: 3
Maximum Credits: 3
A lecture/lab course which immerses students in the theory and practical aspects of modern microscopic imaging. The fields will cover the theory and implementation of all types of light and electron microscopy and computer aided imaging. Students will be expected to reach a functional capability in a selected technology.
AcademicCareer: GRAD
CourseComponent: Lecture
GradeComponent: Grad LG/SNC Basis

MSCBMP 2865 - FOUNDATIONS METHODS
Minimum Credits: 2
Maximum Credits: 2
Foundations methods will offer students hands-on experience with the methods basic to biochemistry, cell and molecular biology. Sample laboratory experiences, include RNA isolation/cDNA synthesis, rt-pcr (simple and quantitative), gene expression, organelle/protein fractionation, gels/transfers/blots, functional assays, immunofluorescence and electron microscopy. Advantages and limitations of techniques and lab results will be presented in group meetings.
AcademicCareer: GRAD
CourseComponent: Practicum
GradeComponent: Grad LG/SNC Basis

MSCBMP 2870 - HISTOLOGY
Minimum Credits: 5
Maximum Credits: 5
The objective of this lecture/lab course is student comprehension of the relationship between cell structure and organ function, and the application of this knowledge to the identification of light and electronmicroscopic images of cells and organs.
AcademicCareer: GRAD
CourseComponent: Lecture
GradeComponent: Grad LG/SNC Basis

MSCBMP 2875 - EXPERIMENTS & LOGIC CELL BIOL
Minimum Credits: 1
Maximum Credits: 1
The purpose of experiments and logic in cell biology (ELCB) is to engage the students of the cell and molecular physiology graduate program in a self-directed seminar structured to stimulate the students' ability to think scientifically and critically as future scientists. The iterative, collaborative and collegial process of ELCB is the same used by teams of collaborating scientists to develop and solve biomedical projects.
AcademicCareer: GRAD
CourseComponent: Seminar
GradeComponent: Grad HSU Basis
CourseRequirements: PROG: School of Medicine (PMEDS)

MSCBMP 2880 - CLLR BIOL NORMAL DISEA STATES
Minimum Credits: 4
Maximum Credits: 4
This one-term course will explore the cellular basis of multiple disease states. The course, which meets twice a week (two hours each session), will be taught through both lecture and in class discussion of primary literature. Each of seven modules will examine normal cell biology and function and then define how defects in these processes lead to the spectrum of pathologies associated with each disease. Discussion of how bench top findings
can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. The seven modules are as follows: the first examines insulin secretion and signaling and how these events are perturbed in diabetes mellitus. The second module focuses on cell-cell adhesion and its role in cancer progression and epithelial barrier function. The third module defines how defects in endocytosis of the low-density lipoprotein receptor leads to hypercholesterolemia. The fourth analyzes the cellular basis of hypertension and how altered internalization of the epithelial sodium channel leads to elevated blood pressure. The fifth module investigates the role of apical membrane recycling and how defects in aquaporin-2 traffic leads to nephrogenic diabetes insipidus. The sixth module examines cell migration in wound healing and angiogenesis. At the end of the course students will have an increased understanding of normal cellular function and how research in cell biology can lead to a deeper understanding of diseases that impact millions of people each year.

### MSCBMP 2885 - IMAGING CELL BIOL LIVING SYMS
**Minimum Credits:** 3  
**Maximum Credits:** 3
The focus of this new course will be to study relevant problems in cell biology, immunology, developmental biology and neurobiology and how they have been solved using imaging approaches. For example at the cell level we will investigate how techniques such as TIRF and high speed confocal have addressed basic problems in endocytosis; at the organismal level we will use multiphoton, confocal, fret, and other approaches to understand aspects of cell biology in cell polarity, respiration and organ development in C. Elegans, Drosophila, Zebra fish and mice. In each case the application will focus on how imaging tools are used to study defined problems in living systems. The course will follow a lecture/demo/journal club format. Lectures will be two part, the first 1/3 will be a description of the technology, how it was developed and how it works (10-15 minutes) followed by description of the scientific problem and how it was solved. This will be followed by benchwork demonstrations showing the approach in action. Lectures will be interspersed with a journal club discussion of a relevant paper on each technology. Students will prepare the journal club presentations in an alternating fashion. Examination will be a combination of class participation, journal club and written exam.

**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

### MSCBMP 2890 - DIRECTED STUDY
**Minimum Credits:** 1  
**Maximum Credits:** 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cell biology or physiology.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** PLAN: Cell Biol & Molecular Physio (PHD) or Interdisc Biomedical (UNK)

### MSCBMP 2895 - CELLULAR PHYSIOLOGY KIDNEY
**Minimum Credits:** 2  
**Maximum Credits:** 2
This summer course will provide an introduction to the kidney and lower urinary tract, with emphasis on kidney structure and function. The course, which meets once a week (two hours each session), will be taught through both lecture and in class discussion of the primary literature. Discussion of how bench top findings can be translated to treatments in the clinic will be facilitated by a diverse faculty that includes both basic and physician scientists. You will first learn about the specialized cell types that comprise the kidney and lower urinary tract. Subsequently, you will be introduced to renal stem cells and how they lead to kidney development. Next, you will learn the functions of the kidney, including regulation of water and ion balance. This will be followed by a discussion of the lower urinary tract. Finally, you will learn how drugs can be used to treat kidney dysfunction and how kidney transplants can be used to treat those patients with end-stage renal disease.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

### MSCBMP 3800 - PHD DISSERTATION RESEARCH
**Minimum Credits:** 1  
**Maximum Credits:** 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of forty credits of this course are required for the Ph.D. degree in the school of medicine.

**Academic Career:** GRAD
MSCBMP 3810 - INTGRTV GENOMIC APPRCH SYS BIOL
Minimum Credits: 2
Maximum Credits: 2
Integrative genomics utilizes gene modifying techniques to directly alter the expression of specific genes in living organisms. With these tools, it is possible to delete or over-express specific genes in order to directly determine the specific roles of the targeted genes in physiological and cellular functions. This course will provide detailed analysis of the methods used to genetically modify animals as well as examples of the use of genetically modified animals to investigate the roles of specific genes on selected integrated body functions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCBMP 3835 - DNA REPAIR JOURNAL
Minimum Credits: 1
Maximum Credits: 1
The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCBMP 3840 - REPRDCTV DVLP MODL ORGNSM HUMN
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INTBP 2000

MSCBMP 5834 - ADVANCED STUDY - PHYSIOLOGY
Minimum Credits: 0
Maximum Credits: 0
In depth study including research literature and laboratory experiments on selected topics; developmental neurobiology, membrane biophysics, somatosensory physiology, calcium function in regulating cell metabolism, myocardial electrophysiology, neuroendocrine mechanisms in control of puberty and reproduction.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: Grad LG/SU5

Cellular & Molecular Pathology

MSCMP 2700 - MS THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
MSCMP 2730 - MOLEC MECHS TIS GRWTH & DIFFRN
Minimum Credits: 3
Maximum Credits: 3
The course covers the anatomy, embryology, histology, function, and growth regulation (growth factors, receptors, and signaling pathways) of various differentiated tissues (central nervous system, lung, liver, pancreas, urinary and reproductive systems, breast, endocrine system, skin, bone, skeletal muscle, bone marrow). Multidisciplinary lectures are given by the members of the departments of pathology, cell biology and physiology, medicine, and surgery who have ongoing research in these areas.

MSCMP 2740 - MOLECULAR PATHOBIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Some representative of major disease categories (autoimmune, inflammatory, toxic, degenerative, infectious, genetic, and neoplastic) will be examined in terms of patient demographics (who), gross and microscopic morphology (what), and etiology/molecular mechanisms (why).

MSCMP 2750 - RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

MSCMP 2760 - INTRO TO TISSUE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to tissue engineering. Tissue engineering is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. Tissue engineering is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. Upon completing this course, the graduate and undergraduate students should: understand the basic principles behind human cell and tissue biology and cell. Be familiar with the general types of biomaterials used in tissue engineering. Understand techniques utilized to design, fabricate, and functionally assess tissue engineering systems. Apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution. This five-part course covers cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation.

MSCMP 2770 - BIOMATRLS & BIOCOMPATIBILITY
Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to biomaterials and biocompatibility and assumes some background in organic chemistry and biology. The first half of the course connects biomaterial applications. The second part of the course introduces biocompatibility issues as they follow from protein adsorption, thrombosis, inflammation and infection are primary interest. Throughout the course ties are made between the topic of student and clinically relevant material and device performance.
MSCMP 2780 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Students will focus on a selected topic in cellular and molecular pathology and write a paper under the direction of a faculty advisor.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MSCMP 2790 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in cellular and molecular pathology.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Cellular & Molecular Pathology (PHD) or Interdis Biomedical (UNK)

MSCMP 3210 - TRANSPLANT IMMUNOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course covers basic and clinical aspects of transplantation immunology. Topics include: mhc polymorphisms, principles of humoral and cellular rejections, inflammatory mechanisms of transplant immunity, chronic rejection, and transplant tolerance, immunosuppressive drug therapy, infection and malignancy in transplant recipients, tissue typing and immunological monitoring, and clinical aspects of organ transplantation, including xenotransplantation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3700 - PHD DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSCMP 3710 - CANCER BIOLOGY & THERAPEUTICS
Minimum Credits: 3
Maximum Credits: 3
This course presents biochemical and clinical aspects of cancer biology and therapy, and is designed for graduate students training in the basic sciences or medicine. The lectures cover: the biology of normal and neoplastic cells, mechanisms of neoplastic transformation, chemical and environmental carcinogenesis, viral onogenesis, breast and prostate cancer, chemotherapy, radiotherapy, gene therapy, tumor immunology, and nutrition and cancer.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3715 - BIOINF CANCER BIOL & THERPUTCS
Minimum Credits: 1
Maximum Credits: 1
Reading and discussion on bioinformatics resources available to enhance research on cancer biology and therapeutics. We will discuss bioinformatics databases and other resources related to: regulatory networks and signal transduction pathways, genes associated with cancer risk and the progression of cancer; cytogenomics, sources of information on the distribution of cancer occurrence and trends in the us population, databases DNA repair genes, their structure & function, models of cancer progression & responses to therapy, biomarkers for cancer detection, treatment & prevention.
Academic Career: GRAD
MSCMP 3720 - CELL & MOL MECHS OF NEURODEGEN
Minimum Credits: 2
Maximum Credits: 2
The goals of this course are to provide insight into the molecular and cellular basis of neurologic disorders, neuro degeneration, potential sites of therapeutic intervention, and the techniques utilized in modern neuropathology. Each session will be used to review and discuss recent literature on current topics of interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3730 - TOPICS IN EXPERMNTAL NEUROPATH
Minimum Credits: 1
Maximum Credits: 1
This course critically evaluates the latest scientific literature concerning diseases of the central nervous system. Emphasis will be placed on methodologies as they are applied to the study of human neurologic diseases. Participants will present scientific papers and lead the classroom discussions. This course is open to students of all levels and will include both basic scientists and clinicians (residents, faculty).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MSCMP 3735 - EXTRCLLR MATRX TIS BIOL BIOENG
Minimum Credits: 3
Maximum Credits: 3
Extracellular matrix (ECM) is an important structural and signaling component of all tissues. It plays a defining role in how differentiated cells and tissues respond to homeostatic signals, tissue regeneration, response to inflammation, and wound healing. Indeed one can generalize and state that there is no aspect of the biology or function of any given tissue in which ECM does not play an important role. The objective of the proposed course is to bring to students the knowledge of fundamental aspects of ECM, its importance for tissue function and its potential use in bioengineering applications. The course will start by providing information about structure and gene expression regulation of the main protein and glycosaminoglycan components of ECM. This will be followed by lectures describing the mechanisms by which ECM components interact with their receptors (integrins) and the intracellular signaling cascades and multiple protein allosteric interactions mediating the transmission of the signal from integrins to multiple intracellular targets affecting cell proliferation, function and cell-cell communication. TGF-beta is an important regulator of ECM synthesis and a special lecture will be devoted to gene regulation of ecm components and the role of TGF-beta. Subsequent lectures will focus on histologic techniques for visualization of ECM and specific tissue examples in which ECM changes define a particular biological model. ECM is known to be remodeled early in liver regeneration and re-synthesized at the end of the regenerative process. ECM signaling is defining the regulation of liver size and termination of regeneration. This will provide an example to illustrate the multifaceted aspects of ecm and cell interaction in a well-known model of tissue biology. Specific targeted lectures will also be given on ECM in wound healing, and repair of tissue in central nervous system, bone and cartilage. ECM is important as a potential barrier for cancer invasion. The mechanisms by which cells invade ECM will be examined in the context of cancer and also in the context of organ building and tissue morphogenesis in embryonic development. The cellular approaches utilizing ECM in bioengineering and tissue reconstruction will be also presented. These will include preparation of decellularized organs (a technique currently applied to liver with partial success in cell recolonization); functions of hyaluronic acid in tissue reconstruction and aspects of its signaling; ECM in vascular reconstruction, and biology of joints; ECM in muscle biology and reconstruction. The course is addressed to graduate students of the interdisciplinary biomedical science program of the school of medicine as well as the bioengineering graduate program. We are expecting a roughly equal proportion of students from those two groups in a class of 20 students. Even though both groups of students are highly sophisticated, particular attention will be given to ensure that the differences in backgrounds do not interfere with assimilation of the fundamental concepts imparted from the lectures. It is also anticipated that some of the concepts to will be presented will be summaries of a vast amount material of biomedical literature. To facilitate full development of lectures and topics which chose a format of 1.5 hours per lecture, to give the lecturers the opportunity of covering all relevant issues in proper depth. To our knowledge, there is no comparable course fully dedicated to ECM biology and bioengineering applications in either the school of medicine or the bioengineering curriculum. It should also be noted that the reviewers of the Cater Training grant noticed the absence of such a course and expressed a desire to have one developed. We believe this course will be important in generating an interest and a depth of knowledge in issues related to matrix biology as well as support the mission of the cater training grand.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSCMP 3740 - STEM CELLS
Minimum Credits: 3
Maximum Credits: 3
This course will provide a comprehensive overview of stem cell biology - an intriguing & a most-debated research area. The course will focus on the biology of stem cells & their role in health & disease with emphasis on development & carcinogenesis. Trans-differentiation of stem cells for tissue engineering applications will also be discussed. Lectures & student presentations will cover: embryonic as well as fetal & adult stem cells in blood, liver, brain, muscle, kidney, pancreas & gut. Students will also be educated on bioethical issues & existing laws governing stem cell research.

**MSCMP 3790 - BASICS OF PERSONALIZED MEDICINE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Personalized medicine is becoming a reality that is being driven by ongoing discoveries in cell biology, genomics, proteomics, and metabolomics. The translational speed of these discoveries, particularly in the diagnostic, prognostic, and theragnostic arenas, is rapid. We believe that in the future personalized medicine diagnostics will involve both physicians and basic scientists. A major obstacle to this approach is the lack of training components for basic scientists in this area. This course aims to close that gap and provide an appreciation for, and understanding of, key principles of clinical development and testing in order to help bridge this gap. The course will be designed to delve into concepts of personalized medicine.
using focused topic areas. The first week will introduce the principles and overriding concepts of clinical test development, which differ qualitatively from investigational research. Next there will be six 2-week sessions, with each section focusing on a separate testing modality. Topics will include inherited genetic diseases and predispositions, acquired genetic changes (cancer), metabolomic profiles of endocrine diseases, immune networks for transplant and rejection, proteomic profiling in blood disorders, and proteomic detection of shock and organ failure.

Chemical & Petroleum Engineering

PETE 2097 - SPECIAL PROJECTS
Minimum Credits: 1
Maximum Credits: 6
Student develops an individual project under supervision of a faculty member. Project may be experimental, design-oriented, or instructional. A written report is prepared.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

PETE 2160 - PETROLEUM RESERVOIR ENGNRNG
Minimum Credits: 3
Maximum Credits: 3
This course covers the principles of reservoir engineering and material balance calculation in petroleum reservoirs. The topics include petroleum origin and oil occurrence and migration; oil, gas, and gas-condensate reservoirs; basic drilling of oil and gas wells; p-v-t behavior of natural gas; material balances in gas reservoirs; oil reservoirs under simultaneous dissolved gas drive, gas cap drive, and water drive; generalized material balance in petroleum reservoirs; basic equations for fluid flow in reservoirs, absolute, effective, and relative permeabilities; and a design project on reservoir calculations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

PETE 2201 - RECOVRY OF OIL BY WATRFLOODING
Minimum Credits: 3
Maximum Credits: 3
Theory of immiscible fluid displacement starting with frontal advance theory and applying it to waterflooding, fluid patterns, sweep efficiency, stratified reservoirs, etc. Relative permeability experiments are simulated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

PETE 2202 - PETROLM DRILLING & PRODUCTION
Minimum Credits: 3
Maximum Credits: 3
This course covers principles of oil and gas production from hydrocarbon-bearing formations. Topics include: flow through porous media of incompressible, compressible and slightly compressible fluids; reservoir, producing formation, vertical lift, and chock performances; principles of gas lift, gas lift valves and design; and sucker rod pumping design; and design project on artificial gas lift.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

PETE 2203 - WELL TESTNG & PRRESSURE TRANSENT
Minimum Credits: 3
Maximum Credits: 3
Unsteady state flow in reservoirs, pressure drawdown testing, pressure build-up testing, multiple rate testing, and gas well testing. Pressure transient analysis testing including both oil and gas wells.
PETE 2204 - ENHANCED OIL RECOVERY PROCES
Minimum Credits: 3
Maximum Credits: 3
This course covers different topics on enhance oil recovery processes (CO2, thermal, miscible fluids and surfactants); coal-bed methane, enhanced methane recovery, and underground coal gasification; surface and in-situ heavy oil, tar sand and oil shale production; and CO2 capture, sequestration and disposal. The fundamentals, thermodynamics, reaction kinetics and transport phenomena as well as the environmental issues and regulations related to these topics are also covered.

PETE 2205 - PETROLEUM PRODUCTION ENGNRNNG
Minimum Credits: 3
Maximum Credits: 3
This course covers principles of oil and gas production from hydrocarbon-bearing formations. Topics include: flow through porous media of incompressible, compressible and slightly compressible fluids; reservoir, producing formation, vertical lift, and chock performances; principles of gas lift, gas lift valves and design; and sucker rod pumping design; and design project on artificial gas lift.

PETE 2207 - PET AND NATURAL GAS PROCESSING
Minimum Credits: 3
Maximum Credits: 3
The course covers different topics on natural gas, petroleum and petrochemical processing. The topics include natural gas cleanup, methane reforming for H2 production, partial oxidation of CH4 for synthesis gas production, and chemicals from methanol; refinery feedstocks, crude distillation and refinery products, alkylation, hydro-treating, catalytic reforming and isomerization, catalytic cracking, resid, tar sands and oil shale processing; and methanol/other alcohols, ethylene, fertilizer, and plastic production plants.

PETE 2208 - PET DRILNG & WELL CMPLTN DSGN
Minimum Credits: 3
Maximum Credits: 3
This course covers different topics related to drilling operations; directional drilling techniques; completion operations; and work-over operations. The drilling operations encompass drilling rig components, bit selection program, drilling fluid types, cementing program design and well control/safety. The directional drilling techniques include: well-path design/applications, downhole motor components, directional surveys, and logging while drilling. The well completion operations contain: formation evaluation tools, open-hole log interpretation, coring tools, flow testing, perforating, hydraulic fracturing and other stimulation techniques. The work-over operations comprise work-over rig components, cased hole log interpretation, plugs/packers/fishing tools, squeeze job design, casing integrity tests and stimulation evaluation. A special project on casing design is also included.

PETE 2209 - HYDRL FRACTURING MECHCS APPLCS
Minimum Credits: 3
Maximum Credits: 3
Course description: this class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed
recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

**PETE 2210 - PVT & ROCK FLUID PROPERTIES IN PETROLOGY**

- **Course Requirements:**
  - **Course Component:** Lecture

Chemical Engineering

CHE 2015 - MOL CHMCL & NUCLR REACTN KINET
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2016 - FUNDM PRIN BIDEGRBL METLC ALLY
Biodegradable metals have emerged as a new class of materials with significant potential for myriad biological applications, in particular, the craniofacial, orthopedics and cardiovascular areas. The latter has already witnessed clinical trials with few patients already being implanted with a biodegradable metallic stent. This course is designed to introduce the principles and various fundamental concepts of this novel class of metallic alloys. These include fundamental principles of metal alloy physics and theory, important concepts of phase diagrams, physical metallurgy concepts, metallic glass theory, processing fundamentals, biocompatibility, and toxicity issues. The effect of microstructure on biocompatibility and corrosion will also be discussed. The course objective is to introduce the student to this new family of bio-functional metals and their biodegradable properties. In doing so, the student will be familiar with these materials and their useful applications. The students are expected to have had courses in thermodynamics and physiology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CHE 2017 - CHMCL ENRGY & NATR CHMCL BOND
An overview of energy transformations arising from chemical bonding in chemical catalysis, electrocatalysis, and combustion. Students will be introduced to qualitative quantum chemistry concepts: potential energy and kinetic energy operators, wave functions, electron correlation, and GVB diagrams for analysis of chemical bonds and molecular structures in energy transformations. Students are expected to have completed Undergraduate physical chemistry course on quantum mechanics or equivalent or have prior consent from the instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CHE 2043 - ELECTRN MICRSCPY IN MATRLS SCI
Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, Laue conditions, structure factor, Ewald construction, double diffraction, twinning, Kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.
CHE 2045 - CHEMICAL ENGR PLANT DESIGN
Minimum Credits: 4
Maximum Credits: 4
This course integrates design aspects of previous courses into the design of a chemical plant. Computer process simulation, pinch technology, discounted cash flow economic analysis, and detailed design of chemical engineering units are used in the design process. Extensive computing work, plant trips, and oral and written reports are required. A unique set of state-of-the-art software is used which includes process simulation (aspen plus), process integration (Icarus) and 3d process design (CadCentre PDMS and review).

CHE 2050 - ARTIFICIAL ORGANS
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with the design of artificial organs and their clinical usage. The basic physiology of four organ systems will be reviewed and the bioengineering design requirements for organ replacement systems considered. Commercially available systems will be analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanic and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above mentioned consideration.

CHE 2051 - HEAT & MASS TRANSF IN BIO SYMS
Minimum Credits: 3
Maximum Credits: 3
Topics to be investigated include the bio heat equation; solute and water homeostasis; thrombus formation and embolism from natural and artificial surfaces; and pulmonary transport via application of indicator dilution theory. The basic physiology of the bioprocess being investigated will be reviewed and a mathematical description developed and solved either analytically or numerically. Students will be expected to participate in model development through home work problems and literature review/reports.

CHE 2101 - FUNDAMENTALS OF THERMODYNAMICS
Minimum Credits: 3
Maximum Credits: 3
In-depth development of basic thermodynamic relations for macroscopic systems is covered. Emphasis on mathematical foundation and application of free energy concepts to system analysis. Topics in solution theory are covered.

CHE 2118 - COLLOIDS AND SURFACES
Minimum Credits: 3
Maximum Credits: 3
Concepts from physical chemistry and transport phenomena are extended to study surface and colloidal phenomena, and related applications to materials processing and separations technology. Topics include: surface tension, adsorption, electrostatic double layer, dominant forces on the colloidal lengthscale, colloid stability, electrokinetic phenomena, and suspension rheology, surface probes.
CHE 2125 - CARDIOVASCULAR DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
This course presents the principles of the flow of biological fluids in mammalian vessels and application of the Navier-Stokes Equations to blood flow in pulsating vessels. Supercomputer applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2201 - FUNDAMNTL OF REACTN PROCESSES
Minimum Credits: 3
Maximum Credits: 3
The basic principles for the analysis of reaction rates in heterogeneous reacting systems will be discussed with special emphasis on three-phase reaction systems. The fundamentals of multiphase reactor design will also be presented as time permits.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2210 - PARLEL PRGG PROB IN SCI & ENGR
Minimum Credits: 2
Maximum Credits: 2
This course will cover the theory and practice of parallel programming. Students will learn to write parallel programs to solve basic computational problems using the Message Passing Interface (MPI) and time permitting, Parallel Virtual Machine (PVM). Weekly programming exercises will be given. Students will have access to three parallel computer architectures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2220 - CARDIO BIOMAT & TISSUE ENGRG
Minimum Credits: 3
Maximum Credits: 3
This course is designed to acquaint students with the fundamentals of biocompatibility while also presenting current issues and theories in cardiovascular biomaterial development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2230 - INTRO TO HETEROGENEOUS CATLYS
Minimum Credits: 3
Maximum Credits: 3
This course presents an introduction to catalysis in which the basic principles of adsorption and catalysis are discussed from both a kinetic and thermodynamic viewpoint. In addition, several commercial applications of catalytic reactions are discussed in detail.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2231 - CARDIO ORGAN REPLACEMENT
Minimum Credits: 3
Maximum Credits: 3
A one semester course in which three organ replacement systems will be discussed-vascular prostheses, artificial hearts/ventricular assist devices, and
extracorporeal/ intravenous oxygenators.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 2246 - ADVANCED HOMOGENEOUS CATALYSIS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Topics such as acid catalysis, nucleophobic and electrophobic Catalysis, phase transfer catalysis, and intramolecules catalysis are discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 2250 - CARDIO CLINICAL INTERNSHIPS**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
Professional application training in cardiovascular medicine and surgery. Students will spend three months each in bioengineering practice training programs within cardiology, cardiothoracic surgery, and vascular surgery.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 2301 - FUNDAMNTL TRANSPORT PROCES 1**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
A systematic development of the basic concepts and equations for heat, mass, and momentum transfer. Extensive problem solving of fundamental and practical natures.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 2302 - FUNDAMNTL TRANSPORT PROCES 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A systematic development of the basic concepts and equations for heat, mass, and momentum transfer. Extensive problem solving of fundamental and practical natures.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 2311 - HEMODYNAMICS AND BIOTRANSPORT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the fundamental principles of fluid mechanics and mass transport as applicable to physiological and biological systems. The fluid mechanics coverage emphasizes blood flow in the cardiovascular system. Topics include poiseuille flow and circulatory flow resistance, blood rheology and tube flow of blood, pulsatile blood flow in arteries, and microcirculatory blood flow. The mass transport coverage emphasizes steady and unsteady diffusion, mass transfer coefficients and correlations, controlled release, coupled diffusion and reactions in biological systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 2350 - DETECTOR CHMCL PHYSCL LIFE SCI**
Methods of detection are of central importance to all fields of science. During the last half century numerous advances in detector science and technology have occurred. In the medical industry detector acronyms such as CT, PET, and MRI are spoken by patients as well as doctors. In the chemical and physical sciences chromatographic, spectrometric, and spectroscopic techniques are both industrial work-horses and windows into the molecular and atomic world. This elective course will focus on understanding the theory and application of the most widely used techniques in chemical, physical, and life sciences. The course learning outcomes will be achieved by homework assignments, quizzes, in-class discussions and exercise, and a writing/presentation project.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2410 - MATHMTCL METHD IN CHMCL ENGR 1
Minimum Credits: 3
Maximum Credits: 3
Application of mathematical techniques to chemical engineering problems requiring the solution of ordinary differential equations and partial differential equations. Series solutions, transform solutions, vector calculus, and quadrature are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2411 - MATHMTCL METHD IN CHMCL ENGR 2
Minimum Credits: 3
Maximum Credits: 3
Applied numerical techniques for chemical engineers. Extensive use of the computer is made for solving equations (algebraic and differential). Numerical integration and solutions of systems of equations are discussed. Optimization techniques and parameter fitting are also covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2430 - APPLD STATSTC IN CHMCL ENGRNG
Minimum Credits: 3
Maximum Credits: 3
Techniques for experimental design are presented and then followed by analysis of experimental data. The determination of data reliability is explained and illustrated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2455 - ADV PROCESS SIMUL & PINCH ANAL
Minimum Credits: 3
Maximum Credits: 3
Modern computing tools will be used to design chemical plants and optimize heat exchange networks using pinch analysis. Aspen, ProII, Bjac and iPF Software are available.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2460 - COMPUTER INTERFACING
Minimum Credits: 3
Maximum Credits: 3
This course covers the fundamentals of computer interfacing and their application to the control of laboratory instrumentation. The basics of digital electronics and digital data handling are also covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2471 - ROBUST PROCESS CONTROL
Minimum Credits: 3
Maximum Credits: 3
This course addresses issues in the robust control of process systems. Topics covered include sensitivity and loop shaping in the frequency domain, single-input single-output and multivariable control systems, uncertainty characterization, robust stability and performance analysis, \( \mathcal{H}_\infty \) controller synthesis, and structured singular value analysis and synthesis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2500 - INTRO TO CELL & MOLECULAR BIOL
Minimum Credits: 3
Maximum Credits: 3
This course will cover the basic concepts of cell and molecular biology. Topics will include cell structure and function, the biology of DNA and gene expression, and the basics of molecular genetics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2530 - BIOCHEMISTRY FOR ENGINEERS
Minimum Credits: 3
Maximum Credits: 3
The basic principles of biochemical engineering are presented and discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2531 - FUNDMS OF BIOCHEMICAL ENGR
Minimum Credits: 3
Maximum Credits: 3
This course focuses on application of engineering principles to the production of biomolecules and pharmaceuticals. Included are batch cultivation methods, continuous bioreactors, immobilized cell system, bioreactor consideration of mammalian cell cultures, cell metabolism, metabolic, metabolic engineering, and viral vectors and vaccines.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2532 - BIOSEPARATIONS
Minimum Credits: 3
Maximum Credits: 3
Bioseparation Processes are critical for purification of peptides and proteins, nucleic acids, vaccines and viral vectors, and a host of other biomolecules of interest in pharmaceutical and biotechnology industries. This course will focus on downstream bioprocessing for separation and purification of recombinant and natural proteins, DNA, and viruses including viral vectors for gene therapy applications. Ultrafiltration, tangential or cross flow systems, precipitation, and chromatography-based processes will be examined. Ion exchange and affinity chromatography will be discussed in detail. Application of genomic manipulation and proteomics for improvements in Bioseparation Processes will also be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
CHE 2533 - CONTROLLED DRUG DELIVERY
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a basic understanding of the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, we will focus on topics at the interface between engineering and medicine such as biomaterials, pharmacokinetics, polymer chemistry, reaction kinetics, and biological transport phenomena. Design of transdermal, aerosol, oral, bio-mems, gene delivery, and targeted cellular delivery, will be reviewed with emphasis being placed upon us FDA regulatory considerations and the relevant physiological milieu.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2535 - APLD SOLID STATE CHEM
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2600 - PRIN & PROPS CPLX ENGNRD MATLS
Minimum Credits: 3
Maximum Credits: 3
Complex engineered materials are a new class of systems comprising a variety of inorganic materials. This course is designed to introduce the principles and various functional properties exhibited by inorganic materials at the Nano, Micro and Meso scales. Since inorganic materials comprising metallic and non-metallic systems are a very complicated class of materials that display myriad properties, this course is outlined to discuss the most important properties. Thus, the course will mainly cover optical, electrical, thermal and electrochemical properties of both crystalline and amorphous inorganic complex engineered materials. In each category, the principles underlying each property will be discussed followed by the material class, behavior and applications. The effect of microstructure on each of the properties will also be discussed. The course objective is to introduce the student to these complex engineered materials family and their properties. In doing so, the student should be able to identify a material for a particular application.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2610 - ATMOSPHERIC POLLUTION CONTROL
Minimum Credits: 3
Maximum Credits: 3
Industrial sources of air pollutants. Methods of sampling and measurement, control techniques. Dispersion models. Local and federal air pollution regulations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2620 - INDUSTRIAL WASTE MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Problems and approaches to industrial waste treatment and disposal; waste minimization, process selection, control, and resource recovery.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2630 - ENVIRONMENTAL IMPACT ASSESSMNT
Minimum Credits: 3
Maximum Credits: 3
Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization, and
remediation, and the decision process.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2640 - POLLUTION PREVENTION
Minimum Credits: 3
Maximum Credits: 3
This course is designed to demonstrate how fundamental engineering concepts, such as reactor design, transport phenomena, thermodynamics, and separation technology can be employed to reduce or eliminate the generation of waste in chemical processes. The course will rely primarily on industrial case studies to illustrate concepts.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2752 - INTRO TO POLYMER PHYSICS
Minimum Credits: 3
Maximum Credits: 3
Introduction to the physics, chemistry, and mechanics of polymers in the solid and molten states. Macromolecules, structure, physical properties, and the morphology of the amorphous and crystalline states. Description of the engineering properties and design with polymeric materials.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2753 - INTRODCTN TO POLYMRR PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Scope of polymer processing; thermoplastics and thermosets; basic transport phenomena; equations of motion, energy; viscous dissipation; non-newtonian fluids; poiseuille and couette flows; lubrication approximation; plasticating extrusion; calendering; injection moulding; fiber spinning; film blowing; distributive and dispersive mixing; mixers.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2754 - PRINCIPLES OF POLYMER ENGINRNG
Minimum Credits: 3
Maximum Credits: 3
This course deals with the elements of polymer science and engineering necessary for entry-level understanding of polymer technology. While the chemistry determines macromolecular microstructure, an understanding of polymer manufacture and processing requires the addition of physical chemistry and transport phenomena. The essential material covered in this class includes the elements of polymers thermodynamics, rheology, mechanical behavior, and equipment design.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2756 - POLYMERIZATION ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Principles of chemical engineering as applied to the polymerization industry. Structure and properties of polymers, thermodynamics and kinetics of polymerization, and design of polymerization reactors and processes are covered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
CHE 2757 - APPLIED POLYMER PRINCIPLES
Minimum Credits: 3
Maximum Credits: 3
Seminar on special topics in polymers, polymer processing, and polymerization engineering. Topics vary from term to term.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2758 - ASPECTS OF POLYMER THEORY
Minimum Credits: 3
Maximum Credits: 3
Introduction and development of the theoretical concepts behind polymer behavior. The course will cover the fundamentals of the statistical mechanics of polymer chains, as well as current research topics such as the behavior of polymer blends (thermodynamics and phase separation), biopolymers, scaling concepts in polymers, polymer-surface interfacial phenomenon, and computer simulations of polymer properties.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2811 - BIOMATRL & BIOCOMPATIBILITY
Minimum Credits: 3
Maximum Credits: 3
Chemical and physical properties of orthopaedic and cardiovascular biomaterials. Wear and corrosion of implant materials; fracture healing; inflammatory response; fixation and loosening of permanent implants; protein absorption; coagulation cascade, bacterial adhesion.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2812 - BIOSENSORS
Minimum Credits: 3
Maximum Credits: 3
The course will cover: what biosensors are, how they are made, how they work, where they are already used, and what their future applications are.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2850 - COAL TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
Coal will be treated from the formation, mining, preparation, combustion, conversion to synthetic gaseous and liquid fuels and chemicals, and other uses. Basic principles involved in coal conversion to synthetic fuels and environmental aspects of coal combustion and conversion are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2870 - SOLIDS PROCESSING & TRANSPORT
Minimum Credits: 3
Maximum Credits: 3
Particle technology affects as much as 80% of the chemical process industry, yet is often omitted from the undergraduate curriculum of chemical engineers. This course is designed to give advanced undergraduates as well as early-term graduate students an introduction to this rich and diverse field. Topics will range from fundamentals (particle classification, properties, and flow) to applied (hopper design, mixing, etc. Industry related examples and designs with be presented.
Academic Career: GRAD
Course Component: Lecture
CHE 2910 - SPECIAL PROJECTS
Minimum Credits: 1
Maximum Credits: 12
Individual study programs at MS Level.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

CHE 2925 - FLUID/PARTICLE SEPARATION
Minimum Credits: 3
Maximum Credits: 3
The course will cover basic principles and industrial applications of fluid/particle separations. 1. Particle characterization and interfacial phenomena. 2. Particle dynamics in fluids. 3. Structure and flow behavior of porous media. 4. Applications of fluid/particle separations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2930 - SEL TOPC FLUD/PAR PROCNG & SEP
Minimum Credits: 3
Maximum Credits: 3
The course will first provide a short review of the fundamentals of fluid/particle systems, including particle characterization and interfacial phenomena. This will be followed by in-depth discussions of selected topics in fluid/particle processing and separation, with a particular emphasis on industrial applications, such as particle formation, pneumatic/slurry transport, filtration, ultrafiltration, membrane separation, agglomeration and foam separation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2940 - PROCESS INTENSIFICATION
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a basic understanding of process intensification (pi) from a chemical engineering perspective. Pi has developed as a major trend in the chemical, pharmaceutical, and process industries over the past two decades, equally driven by economic as well as environmental pressures. Pi's main purpose is hence the development of safer, cleaner, and more efficient process alternatives to existing processes. We will introduce the guiding principles of process intensification, and then discuss micro-reaction technology and multifunctional reactor concepts as the two main directions in state-of-the-art pi technology. A major focus will be on how the interplay between reaction kinetics, reactor design, and transport phenomena can be utilized in pi design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2948 - ADVANCED SEPARATION PROCESSES
Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to the principles of irreversible thermodynamics and its applications to transport processes. A number of unconventional thermodynamically coupled separation processes will be discussed. In addition, selected topics in fluid-particle separations and their applications to chemical and biological systems will be included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
CHE 2980 - MS RESEARCH METHODOLOGY
Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of MS thesis research.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2982 - ISSUES IN RESEARCH & TEACHING
Minimum Credits: 2
Maximum Credits: 2
This course will present to graduate students issues relating to safety, ethics in science, and research methods. Topics in scientific writing, data analysis and oral presentation skills will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 2983 - LAB HLTH & SAFETY: ISS & APPLC
Minimum Credits: 2
Maximum Credits: 2
Issues related to chemical laboratory health and safety will be presented. Tools and techniques to assess the health and safety of experimental arrangements will be introduced. Using the methodology presented, the students will make an assessment of their laboratory. From the assessment, a "safe operating procedure" for their lab will be developed. For students who do not have a chemical lab activity, arrangements will be made to participate in a meaningful analysis of another lab setup.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 2990 - RESEARCH, M.S.
Minimum Credits: 1
Maximum Credits: 12
Preliminary work in preparation for MS Thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 2999 - M.S. THESIS
Minimum Credits: 1
Maximum Credits: 15
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 3001 - GRADUATE SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3002 - GRADUATE SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD  
Course Component: Colloquium  
Grade Component: Grad HSU Basis  
Course Requirements: PROG: Swanson School of Engineering

CHE 3003 - TEACHING PRACTICUM  
Minimum Credits: 1  
Maximum Credits: 1  
Teaching practicum.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis  
Course Requirements: PROG: Swanson School of Engineering

CHE 3004 - PRACTICUM  
Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization. The internship must be related to the thesis or dissertation research.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis  
Course Requirements: PROG: Swanson School of Engineering

CHE 3050 - SELECTD TOPCS IN MOL SPCTRSCPY  
Minimum Credits: 3  
Maximum Credits: 3  
Three spectroscopic methods widely used in chemical engineering research will be covered: IR, Mass, and NMR Spectroscopy.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CHE 3125 - CARDIOVASCULAR DYNAMICS  
Minimum Credits: 3  
Maximum Credits: 3  
This course presents the principles of the flow of biological fluids in mammalian vessels and application of the Navier-Stokes Equation to blood flow in pulsating vessels. Supercomputer applications.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CHE 3149 - ADV SEMINAR IN THERMODYNAMICS  
Minimum Credits: 3  
Maximum Credits: 3  
Current research topics in thermodynamics are presented and discussed.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CHE 3229 - ADVANCED SEMINAR IN KINETICS  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar focuses on developing an advanced understanding of the fundamentals and concepts in the kinetics of complex processes. Examples from diverse fields will be studied.  
Academic Career: GRAD
CHE 3240 - FUNDM OF HETEROGENEOUS CATLYS
Minimum Credits: 3
Maximum Credits: 3
Topics include chemisorption; catalyst design, preparation, and characterization; catalytic reaction; and catalyst deactivation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3245 - ADV TOPC HETERGENEOUS CATLYS
Minimum Credits: 3
Maximum Credits: 3
Reaction mechanisms and kinetics; surface spectroscopies; physical characterization techniques; chemical characterization techniques; mass and heat transfer effects; novel materials; trends in the process industry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3246 - ADVANCED HOMOGENEOUS CATALYSIS
Minimum Credits: 3
Maximum Credits: 3
Topics such as acid catalysis, nucleophilic and electrophilic catalysis, phase transfer catalysis, and intramolecules catalysis are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3247 - SURFACE CATALYZED REACTIONS
Minimum Credits: 3
Maximum Credits: 3
This course will examine recent mechanistic data on several important surface catalyzed reactions. The lectures will emphasize mechanistic data and crystal chemistry of the catalysts used in the processes. Consequently, recent advances in surface spectroscopic techniques will be described. The spectroscopic analyses will be integrated with material science research on the catalysts to provide a modern view catalytic phenomenon.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3249 - ADVANCED SEMINAR IN CATALYSIS
Minimum Credits: 3
Maximum Credits: 3
Current research topics in catalysis are presented and discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3261 - THREE PHASE REACTORS
Minimum Credits: 3
Maximum Credits: 3
The gas-solid-liquid reactor is being used more and more in energy conversion. This course will address the complex problem of handling three phases simultaneously with reaction occurring among all the phases. Contacting and mass and heat transfer are essential design considerations.
Academic Career: GRAD
CHE 3301 - ADVANCED TRANSPORT PHENOMENA
Minimum Credits: 3
Maximum Credits: 3
This Ph.D. level required course explores advanced concepts of mass, heat, and momentum transport phenomena.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3325 - ADV TOPICS IN FLUID DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
Boundary layer flow, turbulence theories, stability of flow, the Orr-Sommerfield Equation, non-newtonian fluids, and compressible flow and two-phase flow are covered. Extensive use is made of vector and tensor notation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3345 - ADVANCED TRANSPORT PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Unified treatment of transport processes including reacting systems, turbulence, interfacial considerations, phase change, coupled processes. Emphasis on recent developments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3349 - ADV SEMNR IN TRANSPRT PHENOMNA
Minimum Credits: 3
Maximum Credits: 3
Current research topics in transport phenomena are presented and discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3350 - DETECTOR CHMCL PHYSL PHYSCL LIFE SCI
Minimum Credits: 3
Maximum Credits: 3
Methods of detection are of central importance to all fields of science. During the last half century numerous advances in detector science and technology have occurred. In the medical industry detector acronyms such as CT, PET, and MRI are spoken by patients as well as doctors. In the chemical and physical sciences chromatographic, spectrometric, and spectroscopic techniques are both industrial work-horses and windows into the molecular and atomic world. This elective course will focus on understanding the theory and application of the most widely used techniques in chemical, physical, and life sciences. The course learning outcomes will be achieved by homework assignments, quizzes, in-class discussions and exercise, and a writing/presentation project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3411 - TRANSPORT PHENOMNA IN POLYMERS
Interactions between rheology, heat and mass transfer in flowing polymeric systems will be analyzed by methods rooted in continuum mechanics, emphasizing process design aspects. Application examples directed towards reaction injection molding and reactive extrusion will be included.

**CHE 3450 - PROCESS OPTIMIZATION**
Minimum Credits: 3
Maximum Credits: 3
Application of optimization techniques to process design. Linear and quadratic programming, steepest ascent methods, dynamic programming, search techniques.

**CHE 3455 - ADV PROCESS SIMUL & PINCH ANAL**
Minimum Credits: 3
Maximum Credits: 3
Modern computing tools will be used to design chemical plants and optimize heat exchange networks using pinch analysis. Aspen, ProII, Bjac and IPF software are available.

**CHE 3472 - NONLINEAR DYNAMICAL ANALYSIS**
Minimum Credits: 3
Maximum Credits: 3
Process control, transport phenomena, reactor kinetics, and other processes often result in mathematical representations composed of nonlinear differential equations. This course will focus on the analysis of nonlinear systems. Topic areas covered in this course may include (but not limited to): normal forms, stability analysis (lyapunov or input-output), passivity, bifurcation theory, phase planes, output and feedback linearization, and controller design methodologies for nonlinear systems.

**CHE 3530 - ADV ENZYMLGY: FUNDMS TO APPLCS**
Minimum Credits: 3
Maximum Credits: 3
This course will cover advanced enzyme structure and mechanism. The structure of biocatalysts will be related to their function. The mechanisms of a variety of enzymes will also be presented, along with a complete consideration of the kinetics of enzyme-catalyzed reactions. Building on this detailed investigation of enzyme function we will discuss the challenges for designing better enzymes, and improving biocatalytically-accelerated reactions.

**CHE 3531 - ADV TOPICS IN BIOCHEM ENGRNG**
Minimum Credits: 3
Maximum Credits: 3
Topics include: cell growth and metabolism, optimization of medium components, mammalian and insect cell cultures, scale-up, recombinant DNA techniques and related bioprocesses, commercial biotechnology products, enzymes in organic solvents, biosensors, and spectroscopic techniques and instrumentation.
CHE 3532 - BIOSEPARATIONS
Minimum Credits: 3
Maximum Credits: 3
This course will focus on downstream bioprocessing steps such as filtration, extraction, and chromatography. It will particularly focus on protein separation and purification. The principals of chromatography will be emphasized. Ion exchange, and affinity-based separation will be discussed in detail. Application of recombinant DNA techniques in protein purification will be examined.

CHE 3533 - CONTROLLED DRUG DELIVERY
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a basic understanding of the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, we will focus on topics at the interface between engineering and medicine such as biomaterials, pharmacokinetics, polymer chemistry, reaction kinetics, and biological transport phenomena. Design of transdermal, aerosol, oral, bio-mems, gene delivery, and targeted cellular delivery, will be reviewed with emphasis being placed upon us FDA regulatory considerations and the relevant physiological milieu.

CHE 3610 - POLLUTION PREVENTION 2
Minimum Credits: 1
Maximum Credits: 1
This course is designed to discuss pollution prevention technologies, which replace the need for downstream waste treatment and disposal. Each seminar will introduce an innovative pollution prevention technology followed by a review of the theory and the advantages compared to past and present methods.

CHE 3748 - THE GLASS TRANSITION
Minimum Credits: 3
Maximum Credits: 3
Topics include: measurement of the glass transition, influence of molecular structure and the effects of small molecules, theoretical and empirical models describing the glass transition, structural recovery and physical aging.

CHE 3749 - ADVANCED SEMINAR IN POLYMERS
Minimum Credits: 3
Maximum Credits: 3
Current research topics in polymers are presented and discussed.
CHE 3750 - MATHMTL MODLNG IN POLYM PROCNG
Minimum Credits: 3
Maximum Credits: 3
This course will emphasize: transport and physico-chemical principles, and mathematical representations thereof, concerning a family of thermally and compositionally developing low Reynolds Number Flows. Melting phenomena in the practical environments of extrusion, and injection and compression molding. As much as the conceptual aspects will be emphasized, a number of hands-on computer modeling examples will be included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3760 - THEORY & SIMUL POLYMRIC MATRLS
Minimum Credits: 3
Maximum Credits: 3
The course will cover a range of topics in the molecular description of polymeric fluids and solids. Methods ranging from Monte Carlo Simulations, molecular dynamics and self-consistent field theory will be discussed. The aim of the class is to acquaint students with current modeling methods and important practical problems that can be addressed using these methods. Students will be guided in writing computer code and will be expected to develop their own programs, knowledge of a programming language is prerequisite.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3820 - ADVANCED SEPARATIONS
Minimum Credits: 3
Maximum Credits: 3
A number of selected separation processes will be discussed including topics of current interest. Solid-liquid separation, membrane processes, activated transport, and other unusual separation methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3910 - INDIVIDUAL STUDY
Minimum Credits: 1
Maximum Credits: 3
Individual study program at Ph.D. Level.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

CHE 3920 - ELCTR STRUCT THRY MODLNG SIMUL
Minimum Credits: 3
Maximum Credits: 3
The field of electronic structure includes the study of the ground and excited states of electrons which determine the properties of atoms, molecules, solids, and other condensed matter systems. In ab initio (first-principles) electronic structure methods, many properties can be calculated directly with a high degree of accuracy starting from the microscopic description of the system as defined by the Schrödinger equation, and with no experimental input. The region of applications of this field is vast and spans a wide range of problems in different majors such as physics, chemistry, materials science, earth sciences, and biology. The purpose of this course is to give the students insight into the intellectual challenges in the theory of electrons in condensed matter and the wide scope of applications of electronic structure theory. It is the intention to cover not only the theoretical principles of electronic structure theory but also to provide a hands-on experience in modeling and simulations using an electronic structure package. In the first part of the course, the emphasis will be on the theory, specifically, on the density functional theory (DFT) which in principle can provide the exact ground state of many-electron systems. DFT, with its favorable computational requirements, is the predominant method for systematic studies of various properties of condensed matter such as binding energy, crystal structure, magnetic properties, vibrations, of the nuclei, ferroelectricity, optical properties, and many others. The shortcomings of this theory and also theoretical methods that go beyond DFT such as the GW approximation and quantum Monte Carlo methods will also be covered. In the second part of the course, the goal is to learn how to apply an ab initio DFT code in real applications in practice, the modeling and simulation section will be 'meshed' with the theory part. We will use ABINIT which is one of the most successful gnu-GPL free codes. The course is appropriate for beginning and advanced graduate students with interests in modeling and simulations in engineering, physics and chemistry. It is most useful for those who are specializing in solid state physics, materials science, or quantum chemistry both in the theoretical and experimental tracks. It is expected that the students will have some familiarity with quantum mechanics and solid states
physics. In the second part of the course, where the focus is on running and learning a computer simulation program, it would help if the students are familiar with Linux or with running a computer code in other environments.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3921 - SPECIAL TOPICS CHEMICAL ENGR
Minimum Credits: 1
Maximum Credits: 1
Covers a variety of topics of specialized interest to chemical engineering including topics in thermodynamics, reaction engineering, mathematics, electrochemistry, materials science, and biological engineering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3922 - MODELING OF SOFT MATTER
Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of several contemporary research topics pertaining to modeling soft and biological materials. Lectures will focus on self-assembly and phase transitions, colloidal dispersions, polymers, gels, liquid crystals. A brief introduction to flow of complex fluids (rheology) and computer simulation methods (such as dissipative particle dynamics, cell dynamics systems, lattice Boltzmann simulations and others) will also be provided. Special attention will be given to point out how methods learned during this course are applied in current frontier research in soft condensed matter: from studies focusing on the origin of life to studies aiming to design soft synthetic biomimetic materials. Along with the lectures the course will include short in-class implementation workshops of some of the methods using mathematical software.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CHE 3925 - ADV TOPCS IN FLUID/PARTCL SEP
Minimum Credits: 3
Maximum Credits: 3
The course will cover topics in both theory and practice of fluid/particle separations. 1. Fundamental principles: motion of particles in fluids, properties of fine particles, interactions of particles and fluids, interfacial phenomena and rate equations. 2. Applications: chemical process industry, environmental waste treatment, mineral processing, food processing and biomaterial preparation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 3930 - SEL TOPC FLUD/PAR PROCNG & SEP
Minimum Credits: 3
Maximum Credits: 3
The course will first provide a short review of the fundamentals of fluid/particle systems, including particle characterization and interfacial phenomena. This will be followed by in-depth discussions of selected topics in fluid/particle processing and separation, with a particular emphasis on industrial applications, such as particle formation, pneumatic/slurry transport, filtration, ultrafiltration, membrane separation, agglomeration and foam separation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3934 - PRATCL SCNTFC PRGMG FOR ENGNRS
Minimum Credits: 3
Maximum Credits: 3
This course will cover topics in modern scientific programming with emphasis on hands-on examples and course projects. The C++ language will be used in this course
Academic Career: GRAD
**CHE 3935 - PARTICLE-BASED MATLS MODELING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on the variety of particle-based simulation techniques that are of utility in the study of functional materials. The techniques discussed range from atomistic/quantum techniques, to Mesko-scale techniques, to microscale techniques and are useful for modeling such phenomena as: isotope separation using carbon nanotubes, surfactant migration on the surface of droplets, and granular flows in large-scale mixing devices. While the applications range of length and time scales is quite diverse we will emphasize how similar are the theoretical underpinnings of many of these techniques. Among others, we will discuss molecular dynamics, Monte Carlo, molecular mechanics, and the path integral formalism as representative atomistic and quantum simulation techniques; dissipative particle dynamics, Stokesian/Brownian dynamics and lattice Boltzmann for Meso-scale simulation; and the discrete element method.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 3936 - SYNTHESIS AND CHRCYTZN OF PFM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
We will emphasize the conceptual similarities across differing spatial scales when making or analyzing functional materials. Synthesis of particle-based functional materials with strict control over size, shape, and crystalline structure is of key importance to numerous applications. The general routes for this synthesis -- regardless of target length-scale -- can be typically grouped into two categories: `"top-down" and "bottom-up". We will introduce the process, means and strategies for a variety of methods, including gas phase synthesis (such as synthesis by combustion flame, plasma, laser ablation, chemical vapor condensation, spray pyrolysis, electrospray, and plasma spray), sol-gel processing and microemulsion processing. As the structure of the resultant functional materials is often the critical component determining the ultimate properties, and the properties determine the materials feasibility for a given application, we will discuss a number of analytical techniques aimed at measuring both structural characteristics and physical properties of functional materials. We will examine methods of structure determination including spectroscopic and microscopic techniques. Spectroscopic techniques discussed will include x-ray and fluorescence spectroscopy. While we will examine the use of optical techniques such as optical microscopy and dynamic light scattering, the utility and function of electron microscopes -- TEM and SEM, in particular -- and atomic force microscopy will also be discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 3940 - PROCESS INTENSIFICATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide students with a basic understanding of process intensification (pi) from a chemical engineering perspective. Pi has developed as a major trend in the chemical, pharmaceutical, and process industries over the past two decades, equally driven by economic as well as environmental pressures. Pi's main purpose is hence the development of safer, cleaner, and more efficient process alternatives to existing processes. We will introduce the guiding principles of process intensification, and then discuss micro-reaction technology and multifunctional reactor concepts as the two main directions in state-of-the-art pi technology. A major focus will be on how the interplay between reaction kinetics, reactor design, and transport phenomena can be utilized in pi design.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CHE 3948 - ADVANCED SEPARATION PROCESSES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide an introduction to the principles of irreversible thermodynamics and its applications to transport processes. A number of unconventional thermodynamically coupled separation processes will be discussed. In addition, selected topics in fluid-particle separations and their applications to chemical and biological systems will be included.  
**Academic Career:** GRAD  
**Course Component:** Lecture
CHE 3980 - PHD RESEARCH METHODOLOGY
Minimum Credits: 1
Maximum Credits: 1
This course involves the discussion and application of research methodology important for the successful completion of Ph.D. dissertation research.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CHE 3990 - ADVANCED GRADUATE PROJECTS
Minimum Credits: 1
Maximum Credits: 15
Preliminary work for Ph.D. Dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHE 3999 - PH.D. DISSERTATION
Minimum Credits: 1
Maximum Credits: 15
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Chemistry

CHEM 2000 - RESEARCH AND THESIS MS DEGREE
Minimum Credits: 1
Maximum Credits: 12
Course designed to be taken by master's degree students who are writing their thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHEM 2110 - CHEMICAL SYMMETRY
Minimum Credits: 3
Maximum Credits: 3
Group theory and molecular symmetry, with emphasis on their application to the theoretical aspects of bonding in inorganic and organometallic complexes, as well as to the experimental techniques (electronic, vibrational, and photoelectron spectroscopy) typically used to elucidate the nature of intramolecular interactions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2120 - DESCRIPTIVE INORGANIC CHEM
Minimum Credits: 3
Maximum Credits: 3
This course is intended to provide a solid background in modern inorganic chemistry for those doing research in all branches of chemistry. Much of the course material is descriptive, but the objective of the selection and presentation of the material will be to develop an understanding of the principles controlling the structures and reactivity of inorganic materials. Aspects of all areas of inorganic chemistry will be discussed, including main group, transition metal, and organometallic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
CHEM 2180 - INORGANIC CHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
Modern bonding theories are developed to the level that permits some understanding of the effects of structure and bonding on chemical properties. Periodic relationships are discussed and applied to selected families of elements. Emphasis is placed on those aspects of structure, bonding and periodic relationships that are helpful in unifying a large body of chemical knowledge. Selected topics of current interest in inorganic chemistry are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2190 - SEMINAR IN INORGANIC CHEMISTRY
Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2210 - ELECTROANALYTICAL CHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
Fundamental electrode processes common to all electrochemical cell methods; thermodynamics and kinetics of electrode processes; reaction coordinate diagrams for faradaic currents; exchange current and activation polarization; non-faradaic currents and electric double layer. Mass transfer processes. Linear sweep, cyclic and pulse voltammetric methods and their application to analysis as well as the study of reaction mechanisms and problems in battery technology, electrocatalysis, photovoltaic cells and chemically modified electrodes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2220 - CHEMICAL SEPARATIONS
Minimum Credits: 3
Maximum Credits: 3
A broad thermodynamic and kinetic framework encompassing all chemical separations is used to classify techniques. Concepts such as separation efficiency are generalized. The most powerful and widely used separations techniques are chromatographic, thus solution chemistry will be discussed to provide a chemical framework for chromatography. The use of gas and liquid chromatography will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2230 - ANALYTICAL SPECTROSCOPY
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of optical spectroscopic methods of analysis for determining composition and structure. The course includes analytical applications as well as mechanisms and instrumentation. Recent developments such as Fourier Transform IR Spectroscopy and the use of lasers in spectroscopy are emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2260 - INTERMEDIATE ANALYTICAL CHEMISTRY
Minimum Credits: 2
Maximum Credits: 2
This course is about becoming a professional. Students read the current scientific literature on a topic of current interest in analytical chemistry or a related area (spectroscopy, separations, electrochemistry, sensors...). They teach the class about a scientific area, and the class will discuss this area. Finally, we will attend public scientific lectures of famous scientists.
Academic Career: GRAD
CHEM 2290 - SEMINAR IN ANALYTICAL CHEMISTRY
Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2310 - ADV ORGANIC CHEMISTRY 1
Minimum Credits: 3
Maximum Credits: 3
A qualitative discussion of modern mechanistic interpretations of relations between structure and reactivity. Special emphasis is placed on the roles of reactive intermediates such as Carbonium ions, carbanions, carbenes and radicals. Study of the factors that influence the equilibria and reaction mechanisms of organic molecules.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2320 - ADV ORGANIC CHEMISTRY 2
Minimum Credits: 3
Maximum Credits: 3
A course designed to cover modern synthetic methods for the assembly of complex organic molecules (stereospecific olefin synthesis, cycloaddition reactions, sigmatropic rearrangements, organometallic chemistry, natural product synthesis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2370 - SYNTHETIC ORGANIC CHEMISTRY
Minimum Credits: 2
Maximum Credits: 2
Reactions of major interest and wide applicability in synthetic chemistry are presented. Reaction mechanisms and the effect of structure on reactivity are stressed and emphasis is placed on recently developed methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2380 - TECHNIQUES OF ORGANIC RESEARCH
Minimum Credits: 2
Maximum Credits: 2
A course which serves as a guide to the interpretation of ultraviolet, infrared, nuclear magnetic resonance and mass spectra of organic compounds.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2390 - SEMINAR IN ORGANIC CHEMISTRY
Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2410 - THERMODYNAMCS & STATCL MECHNC
CHEM 2420 - QUANTUM MECHANICS & KINETICS
Minimum Credits: 3
Maximum Credits: 3
Basic quantum mechanics, with emphasis on the theory of chemical structure and dynamics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2430 - QUANTUM MECHANICS AND KINETICS
Minimum Credits: 3
Maximum Credits: 3
Basic quantum mechanics, with emphasis on the theory of chemical structure and dynamics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2440 - THERMODYNAMICS & STATCL MECHNC
Minimum Credits: 3
Maximum Credits: 3
Development of equilibrium statistical mechanics and thermo dynamics. Applications to chemical systems. These applications include solutions, phase transitions (Ising Model) and reaction theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2490 - SEMINAR IN PHYSICAL CHEMISTRY
Minimum Credits: 1
Maximum Credits: 1
Only students planning to present a seminar should register for this course. Others may attend without registering.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2530 - MOLECULAR SPECTROSCOPY
Minimum Credits: 3
Maximum Credits: 3
This course is a one-term introduction to the subject and covers atoms, and diatomic and polyatomic molecules. The main topics are: a) theory of the absorption and emission of light, and of selection rules; b) rotational spectra; c) vibrational spectra; d) electronic spectra and e) laser spectroscopy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2540 - INTRO TO MASS SPECTROMETRY
Minimum Credits: 3
Maximum Credits: 3
A basic, yet comprehensive, introduction to mass spectrometry is presented including a summary of instrumentation, spectral interpretation procedures, and data handling. Applications of mass spectrometry to geology, biochemistry, energy research and the environment are emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
CHEM 2550 - INTRO TO MAGNETIC RESONANCE
Minimum Credits: 3
Maximum Credits: 3
An introduction to the fields of nuclear magnetic resonance and electron parametric resonance spectroscopy for persons with no previous experience in these fields.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2560 - MASS SPECTROMETRY OF ORGANICS
Minimum Credits: 2
Maximum Credits: 2
Advanced topics in mass spectrometry will be discussed including tandem mass spectrometry, Fourier Transform Mass Spectrometry, advanced interpretation of mass spectra of organic molecules and newer types of ion sources. Each student will be assisted in exploring a mass spectrometry topic of specific interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CHEM 2600 - SYNTHESIS & CHARCTRZTN POLYMRS
Minimum Credits: 3
Maximum Credits: 3
Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (Ft-IR, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2605 - SYNT & CHARCRZTN POLYMRS LAB
Minimum Credits: 1
Maximum Credits: 1
This course is the laboratory component of CHEM 1600. Students will gain practical experience in the synthesis of polymers and the use of modern techniques used in the characterization of the polymers they synthesize.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

CHEM 2610 - SYNT & CHARCRZTN POLYMER LAB
Minimum Credits: 0
Maximum Credits: 0
Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (Ft-IR, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

CHEM 2620 - ATOMS, MOLECULES AND MATERIALS
Minimum Credits: 3
Maximum Credits: 3
This course will use qualitative molecular orbital theory to understand the design and performance of new materials. A link will be made between small molecule" intuition and the solid-state perspective on large molecules, clusters and solids."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
CHEM 2700 - GRADUATE RESEARCH SEMINAR
Minimum Credits: 0
Maximum Credits: 0
Seminar given by faculty on graduate research opportunities in chemistry. This course is designed especially to help students in their selection of a research adviser.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

CHEM 2810 - BIOLOGICAL CHEMISTRY 1
Minimum Credits: 3
Maximum Credits: 3
This course considers the chemical properties of amino acids, oligopeptides, and proteins; the biosynthesis of proteins; the physical interactions that determine the proper ties of proteins; the conformational properties of polypeptide chains and biomacromolecules, integral membrane proteins and ion channels; interactions between proteins and other molecules; enzyme kinetics; catalytic antibodies; and biosynthesis of small molecules.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2820 - BIOLOGICAL CHEMISTRY 2
Minimum Credits: 3
Maximum Credits: 3
This course focuses on long range chemical communication in biological systems: nonequilibrium structures, molecular transport, signaling and receptors, and sampling techniques (measurements and analysis).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 2890 - SEMINAR BIOLOGICAL CHEMISTRY
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CHEM 2970 - TEACHING OF CHEMISTRY
Minimum Credits: 1
Maximum Credits: 1
This course is for graduate students who are teaching assistants/fellows in the department.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

CHEM 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
Research credits towards a MS and Ph.D. degree.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

CHEM 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 12
Research credits for the Ph.D. Degree.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CHEM 3001 - PREPARATION FOR STEM CLASSROOM
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

CHEM 3100 - ADVANCED TOPICS INORGNC CHEM 1
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term, but all focus on some aspect of inorganic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LSU Basis

CHEM 3110 - ADVANCED TOPICS INORGNC CHEM 2
Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term, but all focus on some aspect of inorganic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3120 - ADVANCED TOPICS INORGNC CHEM 3
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all focus on some aspect of inorganic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LSU Basis

CHEM 3200 - ANALYTICAL CHEMISTRY COLLOQUIUM
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all focus on some aspect of analytical chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

CHEM 3210 - DIGITAL ELECTRONICS
Minimum Credits: 2
Maximum Credits: 2
This basic course investigates digital electronics and applications of small computers in labs. The emphasis will be a "hands-on" lab in conjunction with lecture. The introduction to digital electronics includes basics of digital logic systems and implementation using integrated circuits. Labs utilize circuits in simple experiments designed to demonstrate various parameters associated with building blocks of digital systems. Second half of course covers microcomputer architecture and hardware, peripherals, software and interfacing. Experiments allow students to interface.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SNC Basis

CHEM 3300 - ADVANCED TOPICS ORGANIC CHEM 1
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all consider some specific aspect of organic chemistry.
CHEM 3310 - ADVANCED TOPICS ORGANIC CHEM 2
Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term but all consider some specific aspect of organic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3320 - ADVANCED TOPICS ORGANIC CHEM 3
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all consider some aspect of organic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3330 - ADVANCED TOPICS ORGANIC CHEM 4
Minimum Credits: 2
Maximum Credits: 2
Mini-course. Topics vary from term to term, but all consider some specific aspect of organic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3380 - ORGANIC GROUP MEETING
Minimum Credits: 1
Maximum Credits: 1
A weekly meeting to discuss the most recent advances in organic chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3390 - SYNTHETIC ORGANIC COLLOQUIUM
Minimum Credits: 1
Maximum Credits: 1
A weekly workshop on current synthetic organic chemistry literature and state of the art research.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad LG/SNC Basis

CHEM 3400 - ADVANCED TOPICS PHYSICAL CHEM 1
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all focus on some specific aspect of physical chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3410 - ADVANCED TOPICS PHYSICAL CHEM 2
Minimum Credits: 2
Maximum Credits: 2
Minicourse. Topics vary from term to term but all consider some specific aspect of physical chemistry.
Academic Career: GRAD
**CHEM 3420 - ADVANCED TOPICS PHYSICAL CHEM 3**

Minimum Credits: 1  
Maximum Credits: 1  
Minicourse. Topics vary from term to term but all consider some specific aspect of physical chemistry.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CHEM 3430 - INTRO MODERN COMPUTATIONAL CHEM**

Minimum Credits: 3  
Maximum Credits: 3  
This advanced quantum mechanics course will cover the treatment of angular momentum in electronic stages, scattering and spectroscopy. The use of Clebsch-Gordon and Wigner coefficients to analyze angular momentum coupling and recoupling will be discussed, as well as methods to create and measure polarization and alignment in molecules.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CHEM 3440 - TIME DEPENDENT QUANTUM DYNAMICS**

Minimum Credits: 3  
Maximum Credits: 3  
This advanced quantum dynamics course covers scattering theory, interaction of light and matter (spectroscopy), motion of quantum systems coupled to condensed phase environments, and numerical wavepacket dynamics algorithms.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CHEM 3450 - MOLECULAR MODELING & GRAPHICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce the student to computational methods to determine molecular structures and stabilities, Monte Carlo and Molecular Dynamics Simulation Methods, and the use of graphics for displaying structures, charge densities, and other properties. Use will be made of both microcomputers and the Cray XMP at the Pittsburgh Super Computing Center.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CHEM 3460 - INTRO MODERN COMPUTATIONAL SCI**

Minimum Credits: 3  
Maximum Credits: 3  
This course will emphasize the application of microcomputers and numerical methods for solving problems of importance in chemistry. Methods to be studied include solving systems of linear and differential equations, least squares fitting, eigenvalue problems, solution of nonlinear equations.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**CHEM 3470 - STATISTICAL MECHANICS**

Minimum Credits: 3  
Maximum Credits: 3  
The first part (2/3) of this course will be an exposition of equilibrium statistical mechanics. Topics covered will be ensembles, partition functions for various degrees of freedom, quantum statistics, and integral equations for liquids. The second part (1/3) of the course will explore nonequilibrium statistical mechanics. Topics discussed will be the Boltzmann Equation, time correlation functions and linear response theory, and generalized hydrodynamics.  
Academic Career: GRAD
CHEM 3480 - KINETICS & MOTION IN CHEM RXNS
Minimum Credits: 3
Maximum Credits: 3
A general treatment of the rates of gas phase reactions with emphasis on theories and experimental measurements of elementary rate processes. Principle topics include data handling, mechanisms, and transport effects; two-body unimolecular, and recombination reactions; and special topics such as explosions, flames, shock tube kinetics, excited states, and energy transfer.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3490 - MOLECULAR COLLISION DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
Elastic, inelastic and reactive collisions between molecules are described using classical, semiclassical and quantum mechanical theories. Experimental techniques for the study of single collisions are discussed and illustrated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3520 - FRONTRS SURFC SCI - A SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Minicourse. Topics vary from term to term but all focus on some specific aspect of physical chemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3530 - ADV TOPICS IN REACTN DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CHEM 3540 - PARLEL PRGG PROB IN SCI & ENGR
Minimum Credits: 2
Maximum Credits: 2
This course will cover the theory and practice of parallel programming. Students will learn to write parallel programs to solve basic computational problems using the Message Passing Interface (MPI) and time permitting, Parallel Virtual Machine (PVM). Weekly programming exercises will be given. Students will have access to three parallel computer architectures.

**Maximum Credits:** 1  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

**CHEM 3800 - ADV TOPICS BIOLOGICAL CHEM 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Minicourse. Topics vary from term to term but all consider some specific aspect of biological chemistry.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CHEM 3902 - DIRECTED STUDY**  
**Minimum Credits:** 1  
**Maximum Credits:** 12  
Directed study in a specific area of chemistry to enhance preparation for graduate research.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**Chinese**

**CHIN 2000 - RESEARCH AND THESIS MA DEGREE**  
**Minimum Credits:** 1  
**Maximum Credits:** 6  
This course recognizes work performed in the course of preparing the thesis.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**CHIN 2025 - ASPECTS OF THE CHINESE LANG**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Aspects of the chinese language will offer a linguistic introduction to Chinese. No prior knowledge of linguistics is assumed although familiarity with linguistic analysis is a plus. The Chinese language is substantially different from English or other Indo-European languages. It is also distinct from some other East Asian languages. For instance, it has a logographic writing system and is a tonal language. Its word order is more flexible than English and is a topic-prominent language. It does not have rich grammatical inflections but has a limited number of aspectual markers. The course serves the following purposes: (1) introduce the basic facts of the Chinese language including its development, the phonology, morphology, the semantic and syntactic aspects of Mandarin Chinese, and the interactions of the language with Chinese culture and the society; (2) introduce elementary linguistic concepts relevant to Chinese to enable students to use the right tool to describe and critically analyze the features of a language;
(3) encourage students to reflect on their language learning experience or knowledge of other languages to conduct reasoning, such as analyzing the sources of difficulty in their studying of Chinese; (4) to inspire interest in a range of topics including differences in modern and classical Chinese, philosophical belief embodied in the language, Chinese culture manifested in the language (such as the notion of politeness, face, etc.), and to lay a foundation for further studies in linguistics as well as in those relevant topics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CHIN 2043 - HISTORICAL AND PHILPHCL TEXTS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A study of selected texts from such major works as the historical records, the Izu-Chih T'ung-Chien, Motze, and Han-Fei-Tzu.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CHIN 2047 - CHINESE AND WESTERN POETRY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds: China and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.  
**Academic Career:** GRAD

**CHIN 2059 - ADAPTD FOR SCRN: CHIN LIT &FLM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**CHIN 2065 - SOURCES ON EAST ASIA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course identifies and examines reference materials necessary for writing term papers or for conducting research projects on twentieth century China.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**CHIN 2071 - SAINTS EAST AND WEST**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course looks at examples of "sainthood" in four traditions; confucianism, Buddhism, Islam, and Roman Catholicism. The student will see "sainthood" as a concept that transcends Western religious tradition and how changes in dominant cultural values can change notions of who is and who is not a "saint".  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CHIN 2072 - LAW AND LITERATURE IN CHINA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course will study interaction of law and literature in late imperial and modern China, starting in the fifteenth century when Chinese law codes reached a stable maturity that would keep them relatively unchanged until the 20th century. Topics: relationship between law in the human realm and legal judgements meted out to the dead in the ten courts of hell; penalties of the Ming and Qing codes; fantastic tortures of fiction and drama; huge
cultural efforts in establishing modern and civil codes; marriage laws in the 20th century.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**CHIN 2082 - 20TH CENTURY CHINESE ART**
**Minimum Credits:** 3
**Maximum Credits:** 3
The 20th century in China was a period of tremendous change. Artists and the society in which they lived crashed into the modern world to struggle with the weight of tradition as well as the draw of the new. We will consider this period and artistic visions of it by looking at arts including printmaking, painting, film, installation and other synthetic and combined forms. All artistic production will be contextualized within the political and cultural history of the period.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**CHIN 2083 - MASTERPIECES OF CHINESE LIT**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course is devoted to the study of Chinese literature from ancient times to the end of the 19th century. Lectures and readings include prose (historical, philosophical and literary texts, legends and myths of the remote past, anecdotes, short stories and fantastic tales of ghosts and love) and poetry (from the book of songs to the poetry of the T'ang and Sung periods).

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**CHIN 2084 - MASTERPIECES OF CHIN LIT FILM**
**Minimum Credits:** 3
**Maximum Credits:** 3
A critical analysis of some of the most representative literary works in modern China from a literary and socio-political perspective. Film is used as a means of enhancing the student's appreciation of the works under consideration.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**CHIN 2085 - INT TO EAST ASIAN CINEMA**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**CHIN 2086 - LOVE IN CHIN AND WESTERN LIT**
**Minimum Credits:** 3
**Maximum Credits:** 3
The course will explore and compare expressions of love in Chinese and Western literature. The course will examine a succession of theories and ideas of love such as platonic, religious, courtly, romantic and post-romantic from the Western tradition; love in Confucianism, Mohism, Taoism, and Buddhism.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

**CHIN 2087 - INTRODUCTION TO CHIN NARRATIVE**
**Minimum Credits:** 3
**Maximum Credits:** 3
The student is introduced to the major forms and important periods of Chinese narrative by reading and discussing a variety of Chinese narratives from the beginning of Chinese literature to the modern period. Texts include philosophical fables, historical records, mythical tales, stories of the supernatural, vernacular stories and novels.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CHIN 2088 - NEW CHINESE CINEMA

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CHIN 2089 - THE WORLD OF CHINA

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Various topics are covered.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CHIN 2090 - GREAT MINDS OF CHINA

**Minimum Credits:** 3  
**Maximum Credits:** 3  
First segment on Confucianism, including the Analects and Mencius, will be studied with relevant commentaries, stressing implications for Chinese culture, especially in ethical and socio-political dimensions. Second segment on Taoism, Lao Tzu and Chuang Tzu, will be studied with emphasis on impact on the arts and literature. Final segment on Buddhism will concentrate on representative sutras of the tradition, diamond sutra and texts from the Chan (Zen) master's.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CHIN 2091 - ENCOUNTERING MODERN CHINA

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Deals with chronological set of writings on China's burdened entry into modern era. Includes 6 segments covering major historical phases of China's modern era since 1840. Using a core of literary texts that reflect social progress amidst upheavals, readings also broaden the students' horizon by means of selected writings from history, anthropology, art, music, sociology, etc. Course provides students with wide spectrum of Chinese society transitioning thru dynastic changes, social upheavals, political traumas, open-door reforms up till present, reflecting the prospects and problems in its march to the modern. No previous knowledge of Chinese is necessary.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CHIN 2562 - CONFUCIANISM: BASIC TEXTS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The eighth through second centuries BCE were an era of extraordinary creativity worldwide (axial age). In China, the Analects of Confucius, the Mencius, & the writings of Hsun Tzu & Lao Tzu played the formative role that the Greek philo classics played in Western society. Over the next two millennia, these texts would play an influential role throughout East Asia. We will study a number of these texts in their entirety, supplementing them with relevant works of scholarship. Also seek to understand the foundational role of these texts by analyzing their assumptions and strategies.

**Academic Career:** GRAD  
**Course Component:** Lecture

CHIN 2902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
Tutorial for advanced graduate study.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Civil & Environmental Engineering

CEE 2054 - STRUCTURES SEMINAR
Minimum Credits: 1
Maximum Credits: 1
A research seminar course required of all full-time graduate students pursuing advanced degrees in structural engineering and mechanics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2085 - GRADUATE DEPARTMENTAL SEMINAR
Minimum Credits: 0
Maximum Credits: 0
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2100 - NUMERICAL METHODS
Minimum Credits: 3
Maximum Credits: 3
Finite difference methods and finite element methods for parabolic, elliptic and hyperbolic differential equations. Also included are numerical methods for structure analysis and dynamics of vibration.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2105 - ADV CIVIL ENGRNG MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Advanced topics in material behavior - fatigue, creep, fracture, etc. - As applied to high performance civil engineering materials; high strength low alloy steel, high strength concrete, composite materials, laminated timbers, etc., With special emphasis upon infrastructure rehabilitation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2112 - DECISION ANLYSIS IN CIVL ENGRG
Minimum Credits: 3
Maximum Credits: 3
Applications of decision theory and risk and reliability analysis in design, planning and management of civil engineering systems. Basic analytical tools used are statistics, probability theory, stochastic processes, and Bayesian decision theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering
CEE 2200 - CONSTRUCT MGMT FOR NON-CEE'S
Minimum Credits: 3
Maximum Credits: 3
This course is intended for engineers with a background in disciplines other than civil and environmental engineering. The course covers construction management processes, organization, law, finance, and basic time and cost methodologies for planning, scheduling, and controlling construction projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2201 - CONSTRUCTION COST ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
This course teaches the methodology for estimating construction costs. The course covers all types of costs and all types of construction. The student is introduced to standard reference materials and to computerized estimating systems. The course teaches methods and procedures for developing accurate estimates and the basis for follow-on cost control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2202 - CONSTRUCTION SCHEDULING
Minimum Credits: 3
Maximum Credits: 3
This course teaches the student the theory and practice of planning, scheduling, and controlling the time and cost of construction projects. The course covers various advanced techniques such as cost duration analysis, critical resource analysis, stochastic modeling, and cost control. The course teaches the use of contemporary computerized software systems with hands-on application.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2203 - CONSTRUCT METHODS AND EQUIPMENT
Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, organize, and execute construction operations. The course includes typical operations in both building construction and engineering construction. The course describes how to properly construct in order to achieve quality and productivity objectives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2204 - CONSTRUCTION LAW & RISK MGMNT
Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the legal and risk management issues in construction. The course covers the principles of contract law and various legal areas affecting construction such as environmental regulations, insurance, bonds, tort liability, dispute resolution, and professional services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2205 - CONSTRCT FINANCE & COST CONTRL
Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the company level financial and accounting systems which are used in the construction industry, and to project
control systems which are used to manage cost and time. The course includes such topics as financial accounting, cost accounting, financial statements, and variance analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY
Minimum Credits: 3
Maximum Credits: 3
This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2207 - CONSTRCT & CST OF MECHL SYSTMS
Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2208 - ENVRNMNTL MGMNT FOR CONSTRUCTN
Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, design, and construct projects in an environmentally sound manner. The course covers environmental policies, laws, and regulations. Various environmental impacts and assessment processes are presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2209 - LIFE CYCLE ASSMNT METH & TOOLS
Minimum Credits: 3
Maximum Credits: 3
This class will introduce students to life cycle thinking and provide engineers with tools to assess the sustainability and environmental impact of a product, process, or activity. Life Cycle Assessment (LCA) principles, methods, tools, and challenges will be explored throughout the course. Topics include material and energy flow analysis, environmental indicators and metrics for sustainability, case studies of LCA applications, and impact assessment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2210 - ENGR & SUSTAINABLE DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2211 - RESORC USE ENV QUALT CONSTRCT**
Minimum Credits: 3
Maximum Credits: 3
Green building construction class that addresses issues of quantifying and estimating mass and energy flows during the life cycle of buildings, including tools and methods for calculation and analysis of the resource (mass and energy) flows in constructing, operating, and maintaining the built environment. The course will include an introduction to sustainability, green materials and processes, calculation of resource flows, and software tools for modeling resource flows.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2215 - MECHL ELEC SYMS GREEN CONSRCT**
Minimum Credits: 3
Maximum Credits: 3
Mechanical and electrical systems for green construction this course covers design and construction aspects of passive and heating, ventilating, and conditioning, water and waste systems, and electrical systems for building.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2216 - SOLAR DESIGN AND FABRICATION**
Minimum Credits: 3
Maximum Credits: 3
A technical elective course covering residential solar design and fabrication. Students in this course will work on a team to design and construct an off-grid home whose heating, cooling, and lighting systems are primarily solar powered. The course will involve research, design, and hands-on application of innovative building systems. The end product of the team's work in this course is a functional home.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2217 - GREEN BUILDING DSGN & CONSTRCT**
Minimum Credits: 3
Maximum Credits: 3
Understanding the design and construction of green buildings are key elements in green and sustainable engineering. This course teaches all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The United States green building council’s leadership in energy and environmental design green building rating system is used to demonstrate one possible green building rating system. Life cycle thinking will be discussed to expand the focus from not only design and construction, but also use, operations, and decommissioning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2218 - DESIGN FOR THE ENVIRONMENT**
Minimum Credits: 3
Maximum Credits: 3
Design for the environment (DFE) is a specific set of design practices aimed at creating eco-efficient products and processes. Incorporating sustainability into product and process design as a design constraint is clearly a necessity, as all engineers must understand the limits on natural resources. Students will be introduced to the DFE toolbox which includes design for demanufacture, life cycle assessment, and ecofriendly materials selection. Students will also be exposed to real world industry sustainability challenges and hands on lab experiences designed in conjunction with local industry and organization partners. The course is also intended to be inter-disciplinary between engineering and business students to foster a balance between sustainability design efforts and business plans and strategies. Students can expect that labs will consist of a mix of field trips to partner companies and labs at the university. A major aspect to the course will involve student partnerships with local companies; students will be
challenged to apply their DFE skills to projects that address sustainability challenges. Additionally, students will have the opportunity to participate in a summer residency to implement their project with their sponsor company at the end of the course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2219 - ADV PROF DVLP IN CONSTRCT MGMT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course assists in developing the student's communication skills, ethical understanding, and professionalism in construction management. The course is a topical course that includes several key speakers from industry to assist in developing the student's professional career.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2220 - ENERGY TECHNOLOGIES ENVR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the basic principles and concepts underlying energy production, use, and environmental impacts with a focus on selected traditional fossil fuel based technologies and low carbon advanced energy technologies. Topics covered include world's energy resources, principles and processes behind natural resource extraction, energy generation technologies, laws of thermodynamics, current and anticipated world energy use, resource constraints, and environmental sustainability issues of present and future energy technologies. Special emphasis is placed on the life cycle environmental impacts of different energy technologies and challenges and opportunities for sustainable development of emerging energy technologies.  
**Academic Career:** GRAD

**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2230 - BUILDING INFORMATION MODELING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The goal of this course is to introduce the students to building information modeling (BIM) and other new and evolving technologies which are revolutionizing the building and horizontal infrastructure construction industry. Students will learn how BIM and other innovative technologies are being adopted currently by progressive builders to streamline the construction process through enhanced coordination, visualization, logistical planning, cost estimation and analysis. They will also learn how these new tools are enabling (and in some instances requiring) new highly integrated processes that are redefining architecture, engineering, construction and operations (AECO) business relationships and delivery contracts.  
**Academic Career:** GRAD

**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2245 - ADVANCED STATISTICAL METHODS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduces students to the statistical techniques often encountered and employed in industrial and research settings. Topics include probability distributions, point estimates, hypothesis testing, confidence intervals, simple and multiple linear regression models, design of experiments, principal component analysis, discrete data analysis. Special emphasis will be given to industrial and research experimental design with an aim towards reducing the number of experiments, interpreting final results, and ensuring against factors. Uncertainty analysis including methods based on Monte Carlo analysis. With each technique students would be able to manipulate data, present graphical and numerical summaries and carry out statistical analyses. This course uses statistical packages on the Windows platform.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**CEE 2285 - CONSTRUCTION MANAGEMENT SEM**
Seminar for construction management graduate students. Students are required to prepare a presentation of their research and present at least once per semester.

**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2320 - ADVANCED MECHANICS OF MATERIALS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The fundamentals of elasticity are introduced and related to various problems such as beams and bars on elastic foundations, unsymmetrical bending, torsion of thin walled members, curved bars, failure theories, and stability.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2321 - ELASTICITY, PLASTICITY, AND FRACTURE MECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides first-year graduate students with the fundamentals regarding mathematical derivations, mechanical models and numerical analyses in elasticity, plasticity and fracture mechanics. It is aimed at laying the foundations for the students for their future study and research in advanced mechanical problems. The main topics of this course includes: 1) equilibrium and compatibility in elastic domains; 2) complex potential method for elasticity problems; 3) plasticity fundamentals; 4) linear elastic fracture mechanics; 5) stress intensity factors; 6) cohesive crack model and crack band model; 7) size effect and scaling; 8) probabilistic fracture mechanics; and 9) micromechanics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: CEE 2330; PLAN: Swanson School of Engineering (PENGR)

### CEE 2324 - COMPUTATIONAL NANOMECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2330 - ADVANCED STRUCTURAL ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering
CEE 2340 - CONCRETE STRUCTURES 2
Minimum Credits: 3
Maximum Credits: 3
Advanced behavior, strength and design of reinforced concrete structures, including column and frame stability effects, two-way slabs, and serviceability criteria. Introduction to earthquake design concepts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2341 - STEEL STRUCTURES 2
Minimum Credits: 3
Maximum Credits: 3
Advanced design criteria for steel structures, including composite beams, columns, and frames; member and system stability; first- and second-order analysis of frames; and serviceability criteria.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2343 - PRESTRESSED CONCRETE
Minimum Credits: 3
Maximum Credits: 3
Design of prestressed concrete beams and slabs, including shear and torsion effects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students

CEE 2344 - DESIGN OF MASONRY STRUCTURES
Minimum Credits: 3
Maximum Credits: 3
Behavior, analysis, and design of clay and concrete masonry structural systems. Working stress and strength design methods will be utilized for rational design of reinforced and unreinforced masonry walls, pilasters, columns, and shear walls. The ACI 530 building code and the uniform building code requirements will be utilized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students

CEE 2346 - REPAIR AND RETROFIT OF STRUCT
Minimum Credits: 3
Maximum Credits: 3
Introduction and use of performance-based design concepts. Analysis and modeling techniques for existing and repaired structures. Gravity and lateral load retrofit procedures. Selection, modeling and design of repair and/or retrofit measures for a variety of structures and building materials. Retrofit for blast loads.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2347 - BRIDGE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Introduce concepts of bridge engineering by providing the students with the necessary knowledge and skills to apply the AASHTO IRFD specifications for the analysis and design of highway bridge superstructure components.
Academic Career: GRAD
Course Component: Lecture
CEE 2360 - DYNAMICS OF STRUCTURES
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of free and forced vibration of one and multi degree of freedom structures, including damping. Matrix formulation of multi-degree of freedom structures. Analytical and numerical methods for determining response; deflection and stress evaluation including damping effects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2370 - INTRO NDE & STRUCL HLS MONTRG
Minimum Credits: 3
Maximum Credits: 3
The course aims at providing an overview of the different techniques for the nondestructive evaluation (NDE) and the structural health monitoring (SHM) of civil and aerospace structures. Techniques such as electrical resistance strain gauges, fiber optic sensing and ultrasonics will be described within the framework of the NDE. Applications to materials characterization and defect detection will be discussed with emphasis on steel and composite structures. Global and local methods for SHM will be introduced with emphasis on vibration and ultrasonic methods, respectively. The course will also provide the essential tools necessary for the digital signal processing of ultrasonic data. Mat lab and laboratory exercises on recent researches will be investigated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2400 - HYDRAULIC ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Review of basic fluid mechanics and hydraulics. Hydraulics of flow in pipes and open channels; pumps; groundwater hydraulics; hydraulic structures; dimensional analysis; similitude theory; and model studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2401 - OPEN CHANNEL HYDRAULICS
Minimum Credits: 3
Maximum Credits: 3
Basic theories and principles of open channel flows (including flows in rivers and streams). Methods of calculating uniform flow, gradually varied flow, rapidly varied flow, and unsteady flow. Design of open channels.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students

CEE 2402 - HYDRAULIC TRANSPORT PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Hydraulic transport of liquids and solids in pipes and open channels; fluvial hydraulics; sediment transport in natural waters; hydraulic design of slurry pipelines.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Graduate Engineering Students

CEE 2403 - HYDRAULIC ANALYSIS AND MODELING
Methods used in flow analysis and modeling are empirical method, dimensional analysis, differential equations, statistical, probabilistic, and stochastic methods, and estimation theory using Kalman Filter.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students

**CEE 2404 - SURFACE HYDROLOGY**
Minimum Credits: 3
Maximum Credits: 3
The hydrologic cycle as deterministic and stochastic system; rainfall-runoff analysis and instantaneous unit hydrograph theory; risk, frequency analysis, and probability models; regionalization of hydrologic information; reservoirs; spillway hydrograph synthesis; hydrologic design of minor and large structures; simulation models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2405 - GROUNDWATER HYDROLOGY**
Minimum Credits: 3
Maximum Credits: 3
Mechanics of flow through porous media; Darcy's Law; Potential Flow Theory; steady and unsteady flow to wells; boundary effects and the method of images; practical aspects of well design, drilling and testing; numerical methods; leaky aquifer theory; analytical solutions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2407 - EARTHQUAKE & COASTAL HYDRODYNAMIC**
Minimum Credits: 3
Maximum Credits: 3
Oscillatory waves, solitary waves, refraction and reflection waves, wave diffraction, wave force, hydrodynamic pressure on dams, sediment effects on dams during earthquakes, dynamic interaction of dam, water, sediment and foundation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2410 - WATER RESOURCES ENGINEERING**
Minimum Credits: 3
Maximum Credits: 3
This course addresses fundamental and practical issues of water resources engineering. The increasing demand for sufficient water quantity and quality that is distributed in time and space forces engineers and policy makers to develop more comprehensive, complex, and ambitious plans for environmental and water systems. This course emphasizes understanding, formulating, and approaches of solving problems of water resources engineering. Quantitative overview of the water resources development, water resources problems, impacts of climate variability and global warming on water resources, and the fundamental principles and basic tools to solve these problems will be covered. Topics to be discussed also include introduction to basic concepts of hydrology, GIS (Geographic Information Systems) applications, theory of unit hydrograph, frequency analysis, flood routing through reservoirs and rivers, introduction to rainfall-runoff analyses, and watershed modeling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students

**CEE 2414 - ADVANCED HYDROLOGY**
Minimum Credits: 3
Maximum Credits: 3
Linear hydrologic systems. Nonlinear models of catchment behavior. Queuing theory and water storage. Stochastic analysis and modeling of
hydrologic processes. Simulation methods in surface water and water quality hydrology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2415 - NUMRC METH IN GRNWTR & POLUTN**
Minimum Credits: 3
Maximum Credits: 3

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**CEE 2416 - SEDIMENT TRANSPORT**
Minimum Credits: 3
Maximum Credits: 3
This course describes the interaction of fluid and sediment transport processes. This interaction causes morphodynamic changes in open channel flows. This course covers topics such as boundary layer flow and distribution of flow velocities and shear stresses in open channel flows; physical properties of sediments; types of sediment transport (bed-load and suspended-load) for uniform and mixture, dynamics of bed forms, modulation of bedforms into hydrodynamics and morphodynamics, review of the state-of-the-art in sediment transport research, review of the importance of sediment transport processes into engineering projects. This course serves contains computational, analytical and some experimental projects.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**CEE 2420 - HYDROLOGIC MODELING**
Minimum Credits: 3
Maximum Credits: 3
This course covers a wide range of topics related to hydrologic modeling, such as processes of water in the atmosphere, over land surface, and within soil. Advanced treatments for infiltration and evapotranspiration processes; energy budgets at the land surface; snow and snowmelt processes; applications of remote sensing (e.g., Satellites and radar); flood and drought, and issues related to advanced hydrologic modeling will be discussed. An operational hydrologic forecasting model will be used as an example for illustration. Students should be able to apply knowledge learned in class to solve practical problems, and to build hydrologic models of their own.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate Engineering Students

**CEE 2500 - ENVRMNNTL ENGRG MICROBIOL**
Minimum Credits: 3
Maximum Credits: 3
Biological fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2501 - ENVIRONMENTAL ENGRNG CHEMISTRY**
Minimum Credits: 3
Maximum Credits: 3
Chemical fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering
CEE 2502 - PHYSCL-CHMCL PRIN IN ENV ENGRG
Minimum Credits: 3
Maximum Credits: 3
Basic principles and applications of thermodynamics, reaction kinetics, equilibria, diffusion, and mass transfer.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2505 - WATR TRETmnt & DISTB SYS DSGN
Minimum Credits: 3
Maximum Credits: 3
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for water treatment, storage and distribution systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2506 - SOLID WASTE MGMT
Minimum Credits: 3
Maximum Credits: 3
Analysis of problems of municipal, agricultural and industrial solid wastes with emphasis on waste minimization and characterization, collection, treatment, disposal, and resource recovery.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2507 - INDUSTRIAL WASTE MGMT
Minimum Credits: 3
Maximum Credits: 3
Problems and approaches to industrial waste treatment and disposal, pollution prevention and sustainability, waste minimization, process selection, control, and resource recovery.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2508 - ATMOSPHERIC POLLUTION CNTL
Minimum Credits: 3
Maximum Credits: 3
Industrial sources of air pollutants. Methods of sampling and measurement, control techniques. Dispersion models. Local and federal air pollution regulations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

CEE 2510 - ENVRMNTRL CONFLICT RESOLUTION
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to the sources and dynamics of conflict that can arise during the course of managing environmental resources. Students will learn about a range of possible tools and interventions that can be used to address and resolve these conflicts. We will examine a variety of processes typically applied to resolve environmental disputes and analyze the differences in these methods related to process and outcome. Particular emphasis will be given to collaborative problem-solving processes that are increasingly used as an alternative to traditional regulation and litigation methods. Concepts will be developed through a mix of readings, case-studies, discussion, negotiation simulation exercises (role plays), lecture, and guest speakers. We will examine these concepts in the context of real-life situations as we explore specific local, national
and international cases of environmental disputes and the steps taken to resolve them.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2511 - ENV ENGINEERING PROCESS LAB
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Chemical and biological laboratory procedures and techniques for instrumental analysis applied to evaluation of liquids and gases for environmental assessment and operation and control of environmental quality control systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMNT
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2515 - WASWTR COLLC & TRMNT PLNT DSGN
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for wastewater collection and treatment systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2585 - ENVIRONMENTAL ENGNRNG SEMINAR
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Student and guest presentations; environmental science and engineering topics.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2600 - EVALUATN OF URBN ENGRNG SYSTMS
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Public project evaluation and decision-making strategies using a system analysis framework. Economic evaluation; trade-off and cost-effectiveness analysis; environmental impact assessment; implementation and public participation.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 2602 - GIS FOR CIVIL & ENVRL ENGRS
**Minimum Credits:** 3  
**Maximum Credits:** 3
The theory and application of Geographic Information Systems (GIS) to projects in civil and environmental engineering.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2609 - LIFE CYCL ASSMNT METHODS TOOLS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**CEE 2610 - ENGR SUSTAINABLE DEVELOPMENT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**CEE 2700 - TRAFFIC MGMNT AND OPERATIONS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2701 - TRAFFIC FLOW THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Traffic flow models; fluid flow and other physical analogies, car-following theory; stochastic models; Markovian Approaches; multi-lane models.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 2702 - COMPUTR METH IN TRAFFIC ENGRNG**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Applications of contemporary traffic software. Theoretical foundations of the underlying models.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: CEE 2700; PROG: Swanson School of Engineering

**CEE 2710 - TRANSPORTATION SYSTEMS ANAL 1**
Minimum Credits: 3
Maximum Credits: 3
A range of traffic control systems including the analysis and design of traffic signals are discussed along with traffic signal systems and freeway control systems. Other topics covered include data collection for traffic control systems, optimization software and models; traffic signal hardware design; high occupancy vehicle lanes and systems selection and design and implementation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

**CEE 2711 - ITS OPERATIONS AND DESIGN**

Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to the operation and design of intelligent transportation systems (ITS). The course begins by offering a review of traffic signal operations in isolation and in coordinated systems. Additional intelligent transportation design elements associated with detection, communication, and information dispersal will be introduced and discussed. Other traffic management applications such as route guidance, incident detection, emergency management, safety enhancement, tolling facilities, and rural ITS applications will also be introduced and discussed. Other fields of its such as commercial vehicle systems and fleet operations as well as intelligent vehicle development and system wide deployment will also be discussed. The course concludes with a discussion of the nation its architecture and standards as well as system deployment, planning, and evaluation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**CEE 2714 - PAVEMENT DESIGN AND ANALYSIS**

Minimum Credits: 3
Maximum Credits: 3
Concepts and principles in the structural design of pavements for highways and airfields including: traffic loads, climatic factors, soil and material characterization. Application of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2715 - PAVEMENT MAINTENANCE AND REHAB**

Minimum Credits: 3
Maximum Credits: 3
Engineering concepts and information needed to maintain and rehabilitate pavements. Project evaluation, testing and analysis. Design of rigid and flexible overlays, and other methods of rehabilitation. Selection of rehabilitation alternatives. Analysis of the effects of maintenance activities on pavement performance. Initial and life cycle cost analysis of various rehabilitation alternatives.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2717 - CMPNTS, PROPRTS & DSGN OF PCC**

Minimum Credits: 3
Maximum Credits: 3
Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

**CEE 2718 - ADV CONSTRUCTION & BITUM MATLS**
Minimum Credits: 3
Maximum Credits: 3
Soils, soil stabilization, aggregates, bituminous materials and mixtures. Advanced topics in selection and design of bituminous materials. Asphalt cement, rheology, emulsions, chip seals, hot-mix asphalt design, visco-elasticity characterization.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2720 - URBAN TRANSPORTATION PLANNING
Minimum Credits: 3
Maximum Credits: 3
All aspects of the transportation planning process including transportation planning and decision making, transportation modeling, demand and supply analysis, transportation studies, environmental issues and project implementation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering

CEE 2721 - TRAVEL DEMAND ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
The analysis of travel demand. Aggregate and disaggregate models. Activity and time budgets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2722 - COMPUTR METHD IN TRANSPRTN PLN
Minimum Credits: 3
Maximum Credits: 3
Students are introduced to some of the available software packages and their applications in transportation planning. The main focus of the course will be to learn available transportation planning software and have a hands-on experience with its implementation in a number of planning projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CEE 2720; PROG: Swanson School of Engineering

CEE 2725 - PUBLIC TRANSPORTATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to give seniors and graduate students a basic background in the planning, operations and development of public transportation systems within the context of the overall transportation system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering (PENGR)

CEE 2730 - HIGHWAY ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Highway administration, classification, planning and programming. Geometric design of highways. Traffic characteristics and capacity analyses. Traffic operations and control. Highway design project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering
CEE 2750 - PROJECT DVLP AND IMPLEMENTATION
Minimum Credits: 3
Maximum Credits: 3
Project development and implementation - 3 credits: this course provides overview of the process used in project programming and planning, design, construction and operation. The course will emphasize the process used for implementation of major projects with emphasis on construction management and how that task interfaces with other aspects of project development. Students will be involved in a team effort to conceptualize the project, plan alternatives, determine the environmental impact, examine design alternatives, prepare the project for construction documents, recommend award of the contract, manage the contract during construction and determine operational needs of the project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 2800 - ENGINEERING GEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Review of basic geologic principles with emphasis on the importance and influence of geology and geologic processes on engineering projects such as dam sites, foundations, tunnels, mine subsidence, landslides, highways, groundwater problems, and seismic studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2801 - ADVANCED SOIL MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Mathematical and graphical operations on stress and strain, seepage analysis and flow net, consolidation theory, upper and lower bound analysis, earth pressure theory, bearing capacity, and plasticity based soil models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2802 - GEOTECHNICAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2803 - EXPERIMENTAL SOIL MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Laboratory investigation of soils; specific gravity, grain size distribution, plasticity, shrinkage, permeability, compaction, compressibility and shear strength characteristics; interpretation and use of test results in soil engineering. Report writing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CEE 2801; PROG: Swanson School of Engineering

CEE 2805 - EARTHQUAKE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Earthquake hazard assessment, time domain and frequency domain analysis of multi-degrees of freedom systems, response spectrum, material nonlinearity, stochastic response and failure assessment, soil-structure interaction.
CEE 2809 - HYDRAULIC FRACTURING MECHANICS
Minimum Credits: 3
Maximum Credits: 3
This class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.

CEE 2814 - SLOPES & ERTH RETAINING STRUCT
Minimum Credits: 3
Maximum Credits: 3
Conventional methods and recent advances in slope stability analyses; classical and modern earth pressure theories; design of rigid and flexible retaining structures; earth dams, their design and stability.

CEE 2815 - PAVEMENT DESIGN
Minimum Credits: 3
Maximum Credits: 3
Review of soil classification, compaction, soil stabilization, frost action, and subsurface drainage. Flexible and rigid highway and airport pavement design procedures and construction methods.

CEE 2818 - ADVANCED FOUNDATION ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Subsurface exploration and control of groundwater; current procedures for the analysis, design, and construction of waterfront structures and shallow and deep foundations.

CEE 2885 - SOIL MECHANICS SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Discussion and reports on selected topics which may change from year to year. General areas of discussion include physical and chemical properties of soils, shear strength of clay shales, consolidation of active clays and organic soils.
CEE 2996 - SPEC INVSTGTN FOR M.S. STUDNTS
Minimum Credits: 1
Maximum Credits: 9
A special project course in which students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

CEE 2997 - RESEARCH, M.S.
Minimum Credits: 1
Maximum Credits: 15
Non-thesis option research project for the MS Degree under the guidance of a civil engineering faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

CEE 2999 - M.S. THESIS
Minimum Credits: 1
Maximum Credits: 15
Scheduled discussion periods with the student's advisor. Literature survey, selection of thesis topic, development of research methods and procedures, and preparation of thesis under the guidance of a civil engineering faculty member.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CEE 3201 - LIFE CYCLE IMPACT ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
This course will cover life cycle impact assessment (LCIA) methodology including the structure and purpose of LCIA and an in-depth examination of the models used to calculate LCIA equivalence factors.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 3209 - ADV TOPICS LIFE CYCLE ASSMNT
Minimum Credits: 3
Maximum Credits: 3
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: PENGR

CEE 3270 - RES MTHS SUSTNBLY GREEN DSGN
Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to provide students conducting thesis projects with an introduction to research development and many different types of qualitative and quantitative research methods. This course will be taught in collaboration with Clemson University and Virginia Tech in a distance learning setting. This is an active learning course, meaning that students will learn quantitative research methods by practicing the set of procedures. Students are expected to incorporate their research topics as examples throughout the class. Students should take this course twice during their graduate studies. Students in their second semester of research methods will take an active role in mentoring and teaching. Topics in research methods include: defining research problems, conducting a literature review, primary and secondary data analysis, developing experimental designs,
survey design, visual presentation of results, research ethics, and the process of writing a peer-reviewed journal article.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 3271 - RESEARCH METHODS IN CEE
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 3323 - PLASTIC DESIGN OF STEEL STRUCT
Minimum Credits: 3
Maximum Credits: 3
Concepts from plastic analysis and design of single and multi-story steel structures will be the focus of this course. Beams, columns, beam-columns, and plates will be studied within the context of rigid-plastic, elastic plastic, and second-order plastic analyses. The phenomenon of shakedown will be considered as well as aspects of structural optimization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 3330 - STRUCTURAL STABILITY
Minimum Credits: 3
Maximum Credits: 3
An upper level graduate course focusing on classical solutions for column and frame buckling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering (PENGR)

CEE 3331 - PLATE AND SHELL STRUCTURES
Minimum Credits: 3
Maximum Credits: 3
Basic formulation and techniques of solution for rectangular and circular plates, cylindrical shells and shells of revolution. Variational and numerical solution methods. Anisotropic and sandwich plates, in-plane forces, large deflection theory, use of curvilinear coordinates.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CEE 2320; PROG: Swanson School of Engineering

CEE 3333 - ADVANCED FINITE ELEMENT METHODS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Civil & Environmental Engineer (PHD)

CEE 3334 - NONLINEAR STRUCTURAL BEHAVIOR
Minimum Credits: 3
Maximum Credits: 3
The behavior of structural members and frames will be treated within the framework of nonlinear elastic analysis as well as nonlinear plastic analysis. Non-uniform torsion in thin-walled open and closed sections, both statically determinate and indeterminate, will also be covered. In addition, a discussion of the response of curved girder bridges will be included in this course.
CEE 3350 - STRUCTURAL SAFETY
Minimum Credits: 3
Maximum Credits: 3
Determination of load and material variability as a measure of safety. Use of probabilistic methods to evaluate failure probability as compared to the safety factor approach of deterministic design. Risk assessment. Reliability principles and indices. Current design code examples.

CEE 3361 - STRUCTURAL WIND & EARTHQ ENG NRNG
Minimum Credits: 3
Maximum Credits: 3
Introduction to nature of wind, aerodynamic wind loading and design. Investigation of the response of structures to dynamic and pseudo-dynamic wind, earthquake, shock waves, and other deterministic and random loading. Design criteria for buildings and nuclear power stations, special topics in lifeline, computer applications.

CEE 3385 - STRUCTURES SEMINAR
Minimum Credits: 1
Maximum Credits: 1
A research seminar course required of all full-time graduate students pursuing advanced degrees in structural engineering and mechanics.

CEE 3408 - ADVANCED ENVIRONMENTAL FLUID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
This course describes the theory behind fluid mechanics processes for environmental flows. Topics to be covered are: a review of boundary layer flow and distribution of flow velocities and shear stresses in open channel flows; turbulence in open channel flows, shear layer flows, hydrodynamics of lakes and reservoirs, stratified flows, geophysical flows. This course contains computational, analytical and some experimental homework and projects.

CEE 3414 - ADVANCED HYDROLOGY
Minimum Credits: 3
Maximum Credits: 3
Fundamental and advanced theories and processes of hydrology. Topics to cover include processes of water in the atmosphere, over land surface, and within soil; advanced representation of infiltration and evapotranspiration processes; partitions of water and energy budgets at the land surface; snow and snowmelt processes; applications of remote sensing (e.g., Satellite and radar), and flood and drought analysis.
CEE 3416 - RIVER MECHANCS & MORPHODYNAMICS
Minimum Credits: 3
Maximum Credits: 3
This course describes morphodynamic changes in alluvial systems as a consequence of fluid and sediment transport interaction. This course covers a review of fluid mechanics and sediment transport topics. This course will cover different types of rivers (straight, meandering, braided, anastomosing, and anabranching). The theory behind their evolution will be presented. Details of the hydrodynamics and morphodynamics of these systems will be covered in class. Interaction of main channel and its floodplain is also included. Morphodynamics of alluvial fans and deltas will be studied, and students may have a laboratory to perform some preliminary measurements and compare them to mathematical models. Application projects will be discussed and presented in class such as river restoration cases, streambank protection, dam removal, among others. Review of the state-of-the-art research in river mechanics and morphodynamics will be presented, especially in areas where the application of computational fluid dynamics (CFD) models are used to simulate and to predict the flow field and the morphodynamics of river systems. This course will contain computational, analytical and some experimental projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 3501 - ENVIRONMENTAL ENGINEERING PROCESSES 1
Minimum Credits: 3
Maximum Credits: 3
Theory and applications of physical and chemical principles to water and wastewater treatment and disposal. Mixing, equalization, coagulation, sedimentation, filtration, disinfection, and solids handling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 3502 - ENVIRONMENTAL ENGINEERING PROCESSES 2
Minimum Credits: 3
Maximum Credits: 3
Theory and applications of aerobic, anoxic, and anaerobic biological processes in environmental quality control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering or (PREQ: CEE 1503 or CET 1141; PROG: Undergraduate School of Engineering)

CEE 3503 - ENVIRONMENTAL ENGINEERING PROCESS LAB
Minimum Credits: 4
Maximum Credits: 4
Laboratory simulations for developing design and control parameters for unit operations and processes applicable to environmental quality control systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CEE 3501 and 3502; PROG: Swanson School of Engineering

CEE 3504 - ADVANCED ENVIRONMENTAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Advanced techniques for instrumental analysis applied to evaluation of liquids and gases.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 3516 - HAZARDOUS WASTE MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Characterization, treatment, and disposal of toxic and hazardous wastes from the domestic, commercial, agricultural, and industrial sectors.
CEE 3585 - ADV ENVIRONMENTAL ENGINEERING SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Literature reviews and guest lectures on current advances in environmental science and engineering.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CEE 3501 or 3502; PROG: Swanson School of Engineering

CEE 3609 - ADVANCED TOPICS IN LIFE CYCLE ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CEE 3714 - ADVANCED PAVEMENT DESIGN & ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Theoretical models for analysis of pavement systems. Design and analysis of pavements through the use of transfer functions relating pavement response to pavement performance. Evaluation of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 3716 - ADVANCED PAVEMENT TOPICS
Minimum Credits: 3
Maximum Credits: 3
Special topics in pavement.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 3804 - DYNAMICS OF SOIL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Sources and types of dynamic loading, wave propagation, and attenuation; methods of determining dynamic soil properties; design of foundations-soil systems, subject to vibratory motions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 3805 - ROCK MECHANICS

1592
Minimum Credits: 3
Maximum Credits: 3
Behavior and properties of rock as an engineering material; failure of rock; design and construction of underground structures and slopes in rock; design of rock abutments for dams.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 3808 - GEOTECHNICAL EARTHQUAKE ENGRNG
Minimum Credits: 3
Maximum Credits: 3
Seismology and earthquakes, modeling earthquake ground motions, probabilistic seismic hazard analysis; modeling the dynamic properties of soils; equivalent linear and nonlinear ground response analysis; selection of design ground motion; liquefaction and post-failure analysis; seismic analysis of embankment dams.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREF: CEE 2801; PROG: Swanson School of Engineering

CEE 3996 - SPEC INVSTGTN FOR PH.D. STDNT
Minimum Credits: 1
Maximum Credits: 6
A special project course in which advanced students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

CEE 3997 - RESEARCH, PH.D
Minimum Credits: 1
Maximum Credits: 15
Directed research and study for the preparation of the Ph.D. Dissertation proposal.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CEE 3999 - PH.D. DISSERTATION
Minimum Credits: 1
Maximum Credits: 15
Scheduled discussion periods with the student's advisor. Literature survey, selection of dissertation topic, development of research methods and procedures, and preparation of the dissertation, under the guidance of a civil engineering graduate faculty member.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Classics

CLASS 2010 - INTRODCTN TO CLASS STUDIES 1
Minimum Credits: 1
Maximum Credits: 1
First half of a survey of bibliography and methods in the various areas of classical studies.

Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad LG/SNC Basis

CLASS 2012 - INTRODCTN TO CLASS STUDIES 2
Minimum Credits: 1
Maximum Credits: 1
Second half of a survey of bibliography and methods in the various areas of classical studies.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad LG/SNC Basis

CLASS 2090 - TOPICS IN CLASSICS
Minimum Credits: 3
Maximum Credits: 3
Close study of selected topics in classical studies. Course may be repeated for credit provided material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2210 - SOCIAL HISTORY OF ANCINT WORLD
Minimum Credits: 3
Maximum Credits: 3
A survey of the principal topics, particularly those of current interest, of ancient Mediterranean social history. Heavy emphasis is placed on questions of theory and methodology. No knowledge of the ancient languages is required.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2300 - STUDIES IN ANCIENT PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected topics and texts in ancient philosophy (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2301 - ANCIENT PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2312 - STUDIES IN PLATO
Minimum Credits: 3
Maximum Credits: 3
Study of selected platonic texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2313 - PLATO
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in the philosophy of Plato, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
CLASS 2314 - STUDIES IN ARISTOTLE
Minimum Credits: 3
Maximum Credits: 3
Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2316 - STUDIES IN HELLENISTIC PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected texts and topics in Hellenistic philosophy (readings in Greek). Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2317 - HELLENISTIC PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in Hellenistic philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2318 - INTRODUCTION TEXTUAL CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This course intended for graduate students, is an introduction to the theory and practice of textual criticism from Greco-Roman antiquity into the age of the printed book.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2371 - MEDIEVAL PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in medieval philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2390 - TOPICS IN ANCIENT PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLASS 2391 - ARISTOTELIAN/TRACTARTN PHIL SCI
Minimum Credits: 3
Maximum Credits: 3
A study of Aristotle's program for understanding causality and laws of nature as grounded in the powers and capacities of natural objects and the diametrically opposed program of Wittgenstein's Tractatus which tries to explain science in terms of logical relations between expressions instead of
causal relations between things and linguistically based scientific laws in place of laws of nature.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2392 - ARISTOTLE'S CONCP NATURAL SCI
Minimum Credits: 3
Maximum Credits: 3
Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims, methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2547 - ARISTOTLE'S PHILOSOPHY OF SCI
Minimum Credits: 3
Maximum Credits: 3
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLASS 2902 - DIRCTED STUDY FOR M.A. STUDNTS
Minimum Credits: 1
Maximum Credits: 9
Directed study on classical topics for students in the MA Program.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CLASS 2970 - TEACHING OF GREEK
Minimum Credits: 3
Maximum Credits: 3
Practical experience in the teaching of ancient Greek.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

CLASS 2971 - TEACHING OF LATIN
Minimum Credits: 3
Maximum Credits: 3
Practical experience in the teaching of Latin.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

CLASS 2972 - TEACHING OF CLASSICAL CIVILZTN
Minimum Credits: 3
Maximum Credits: 3
Practical experience in the teaching of courses in classical civilization.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

CLASS 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
Independent study on classical topics for graduate students.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

CLASS 2992 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
Directed study on classical topics for students in the graduate program.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CLASS 2995 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
Directed study on classics topics for students in the graduate program.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

CLASS 3000 - DISSERTATN RESEARCH FOR PH.D.
Minimum Credits: 1
Maximum Credits: 9
Research for and writing of the doctoral dissertation in classics.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CLASS 3902 - DIRCTED STUDY FOR PH.D STUDNTS
Minimum Credits: 1
Maximum Credits: 9
Directed study on classical topics for Ph.D. Students.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Clinical Nurse Specialist

NURCNS 2110 - MASTER'S THESIS
Minimum Credits: 1
Maximum Credits: 3
Individual instruction provides guidance in conducting a nursing research study. The thesis includes the review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

NURCNS 2161 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
NURCNS 2349 - PREVN & TREATMNT OF ADDICATIONS
Minimum Credits: 3
Maximum Credits: 3
Course is designed to provide information about prevention and treatment of addictions using current research and theoretical models. Content will focus on diagnostic criteria and characteristics associated with addiction, neurobiology of addiction and specific variations or manifestations of addiction including addiction to alcohol, other depressants, stimulants, opioids, hallucinogens, steroids, inhalants. Behavioral addictions, such as gambling, eating disorders, compulsive shopping, compulsive internet use, compulsive sexual activity, will also be examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURCNS 2350 - GROUP THERAPY THEORY
Minimum Credits: 2
Maximum Credits: 2
This course examines models of group interventions in psychiatric mental health nursing from a holistic perspective and incorporates theory and research from nursing and related sciences to develop a framework for guiding advanced nursing practice. Clinical therapeutics focus on the use of group interventions across the life cycle with different populations in altering human responses associated with mental and emotional problems. Various classifications of systems of nursing phenomena are considered in relation to advances in psychobiology and in relation to use of group interventions with specific client populations. Group management skills are explored within the context of a selected clinically-related management role and case management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2351

NURCNS 2351 - GROUP THERAPY PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This clinical practicum is taken concomitantly with NURCNS 2350 and includes practice and a weekly clinical conference. Clinical applications of theoretical knowledge focus on experiences in short-term group interventions and in the clinically related role of manager.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2350

NURCNS 2352 - FMLY THEORY/THERAPY TECHNQS
Minimum Credits: 2
Maximum Credits: 2
This course examines models of community mental health and mental health nursing from a holistic nursing perspective with a focus on family mental health and family functioning. Theories and research about family dynamics and processes are examined as the student develops a conceptual framework to guide clinical practice. Clinical therapeutics focus on the use of interventions for maintaining functional and altering dysfunctional patterns of responses with family systems and in a selected clinically related management role in community mental health services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.

NURCNS 2353 - FMLY THRPY ROLE SEM & CLN PRAC
Minimum Credits: 1
Maximum Credits: 1
This clinical practicum is taken concomitantly with NURCNS 2352 and includes clinical experiences as a family therapist. Experiential seminars are held. Knowledge gained from theory course is applied and synthesized into a conceptual framework for advanced nursing practice.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Nursing students only.
NURCNS 2354 - INDIVIDUAL PSYCHOTHERAPY THEORY
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the theory relevant to individual psychotherapy. The emphasis is on preparing the student to provide appropriate models of psychotherapy within the managed care and private practice environments.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2355

NURCNS 2355 - INDIVIDUAL PSYCHOTHERAPY PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
The goal of this practicum is to provide the student with an opportunity to gain skills in the practice of individual psychotherapy with patients across the life span and in different populations. The student will be expected to provide psychotherapy to patients through the beginning, middle, and end phases of treatment, utilizing concepts learned in NURCNS 2354 individual psychotherapy theory.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: CREQ: NURCNS 2354

NURCNS 2361 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
An in-depth study in a particular area of interest by arrangement with a designated faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

NURCNS 2850 - CNS ROLE IMPLEMENTATION
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a framework for clinical nurse specialist (CNS) practice that is organized around the three spheres of influence (patient, nursing personnel, organization/network) that encompass consumers of CNS services. Students are introduced to unique competencies in each sphere of influence as operationalized in acute care. Emphasis will be placed on acquisition of skills needed to develop population-based programs of care; facilitate systems that promote innovative, cost-effective and comprehensive care; develop and implement evidence-based practice initiatives; and collaborate with health team members to improve health care delivery and patient outcomes. Using model cases and problems derived from their practice, students examine how leadership, consultation and collaboration skills can be used to solve problems for patients/populations, health team members, and organizations/systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURCNS 2851 - CNS CLINICAL PRACTICUM 1
Minimum Credits: 4
Maximum Credits: 5
Practicum is the first of two clinical practica designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on enhancing competencies within the three spheres of influence of the CNS (patient, nursing personnel, organization/network) and developing characteristics essential to CNS practice.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: NUR 2850

NURCNS 2852 - CNS CLINICAL PRACTICUM 2
Minimum Credits: 1
Maximum Credits: 4
This practicum is designed to provide experience in role development for the clinical nurse specialist (CNS). Emphasis is placed on further refinement of characteristics essential to CNS practice and competencies
NURCNS 3039 - DNP-CNS ROLE PRACTICUM
Minimum Credits: 1
Maximum Credits: 5
This course is designed to provide a culminating practicum experience for the DNP clinical nurse specialist (CNS). Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies within the three spheres of influence of the CNS (patient, nursing personnel, and systems) and further development of characteristics essential to CNS practice at the doctoral level.

NURCNS 3239 - DNP CNS ROLE PRACTICUM
Minimum Credits: 1
Maximum Credits: 5
This course is designed to provide a culminating practicum experience for the DNP clinical nurse specialist (CNS). Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies within the three spheres of influence of the CNS (patient, nursing personnel, and systems) and further development of characteristics essential to CNS practice at the doctoral level.

Clinical Research

CLRES 2005 - CMPTR METH FOR CLIN RSRCH
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide a concentrated introduction in the use of computers in the analysis of data from patient-oriented research. Specifically, participants will learn: principles of database design, methods for data manipulation, transformation, merging and subletting, descriptive statistics and exploratory data analysis, and graphical display of data.

CLRES 2010 - CLINICAL RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
Clinical research methods provides an overview of the basic research strategies, methods, and goals of clinical research. Topics include study design, data analysis and interpretation, and determination of appropriate methodologies to answer different research questions. Bias and confounding in observational research, the clinical value of diagnostic tests, appropriate use of cross-sectional, case control and cohort study designs, and various statistical modeling used in clinical research will be presented.

CLRES 2014 - SPEAKING OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Students will learn strategies for giving presentations about science to both a scientific audience and a public audience. Topics covered will include (1) how to engage your audience, (2) the art of breaking down your message, (3) tips for how to make clear, interesting slides, and (4) pointers on
presentation style. All audiences want to learn interesting new scientific information and have it delivered as a good story in an understandable manner by a personable, easy to approach person. You want to emphasize your message, stay focused, and convey the importance of your message while being interesting, maintaining the attention of the audience and making the learning process enjoyable. Guest speakers will provide background information about various uses of scientific information in the public domain. Communication skills, including knowing your audience and why they are interested in the information you are speaking about, how to translate scientific jargon into understandable concepts for the public, and how to keep the audience engaged will be discussed. Pointers will be given on answering questions, being conversational, and conveying the 'big picture'. Students will give a number of presentations in this course and learn to receive and give feedback effectively.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2017 - CLINICAL RESEARCH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the emerging field of clinical research informatics (CRI). It involves informatics solutions in support of scientists who conduct clinical research, as well as those who translate evidence in biological, clinical, and epidemiological studies. CRI endeavors to improve clinical research information systems, recruitment of participants to clinical trials, mining of electronic health records for comparative effectiveness research, scientific collaboration, data sharing, re-analysis of extant data, patient registries, results databases, optimization of research workflows, semantic harmonization, and more.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2020 - BIOSTATISTICS
Minimum Credits: 4
Maximum Credits: 4
This course focuses on basic concepts and statistical methods and their application to problems in the health and biomedical sciences. Topics include data description and summarization, basic probability theory, estimation, and hypothesis testing with emphasis on one- and two-sample comparisons involving continuous and categorical data. Linear regression and analysis of variance will be introduced. Students will develop their analytic skills through the analysis and discussion of large clinical studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: MEDEDU 2005; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2021 - REGRESSION AND ANOVA
Minimum Credits: 1
Maximum Credits: 1
This course is designed for medical researchers with non biostatistics majors. The course will focus on the basic concepts of linear regressions, analysis of variance, analysis of covariance, and some useful experimental designs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2022 - LOGISTIC REGRESSION
Minimum Credits: 1
Maximum Credits: 1
This class is an introduction to logistic regression modeling designed for physicians in fellowship training programs or other researchers with modest statistical background. Basic statistical theory will be presented, but the primary emphasis will be on the application and interpretation of logistic regression models in the medical setting. Coursework will include weekly homework assignments and a data analysis project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)
CLRES 2023 - SURVIVAL ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: (CLRES 2005 and 2020 and 2021 and 2022) or (MEDEDU 2005 and 2020 and CLRES 2021 and 2022); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2024 - APPLD NON PARAMETRC STATISTICS
Minimum Credits: 1
Maximum Credits: 1
Introduces the student to specialized topics in biostatistics that are not covered in the formal curriculum.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: (CLRES 2005 and 2020) or (MEDEDU 2005 and 2020); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2025 - DSGN & ANAL BIOMARKER STUDIES
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to identify, describe and apply the statistical and epidemiological knowledge, tools and perspectives necessary for effectively designing, analyzing and interpreting biomarker studies. Only a brief introduction is provided on clinical and laboratory aspects of biomarker development as these issues are typically very specific to the individual's field of interest; instead, the course will focus on the study design and associated analysis issues given a particular biomarker, or panel of biomarkers, and a corresponding set of clinical outcomes in a manner that is generalizable to a wide range of research studies. Although applications and perspectives will somewhat focus on cancer research, the described methods are broadly applicable to a range of clinical and epidemiological settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: CLRES 2010 and CLRES 2020 and CLRES 2022; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2026 - ANALYSIS OF CORRELATED DATA
Minimum Credits: 1
Maximum Credits: 1
Analysis of correlated data course will provide information on statistical methods for analyzing data arising from multilevel or longitudinal studies. The first half of the course lectures will focus on models for continuous data including mixed effects models, fixed effects models, and generalized estimating equations. The second half of lectures will extend to analysis in the generalized linear model setting (binary outcomes, count data, etc.). Students will be shown how to investigate data graphically and descriptively before beginning statistical modeling. The student will be introduced to topics on missing data, group trajectory modeling, and sample size estimation. We will use homework assignments and articles from multilevel and longitudinal studies to facilitate learning of concepts discussed in class.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2020 and CLRES 2021 and CLRES 2022; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2030 - INTRODUCTION TO CLINICAL TRIALS
Minimum Credits: 2
Maximum Credits: 2
This course presents advantages and limitations of various study designs. Basic concepts of drug, device, diagnostic and clinical intervention regulatory processes will be reviewed. Principles for recruitment and retention of study participants will be presented along with techniques for randomization and stratification. Students will participate on a mock clinical study design team to design data collection forms, assess data validity and data management issues. Controversies in the design and analysis of clinical trials, including meta-analysis & Bayesian techniques are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
CLRES 2040 - MEASURMNT IN CLINICAL RESEARCH
Minimum Credits: 1
Maximum Credits: 1
This course focuses on the general properties of good measurement integral to the research process. The domain sampling model is presented as the major theory of measurement error with the parallel test model presented as a special case of domain sampling model. The construct, criterion and content validity of psychosocial instruments are explored and methods for evaluating each of these relative to specific instruments are presented. A variety of scaling methodologies will be discussed as well as the principles involved in the design and formatting of questionnaires.

Academic Career: GRAD

CLRES 2045 - SURVEY DESIGN & DATA ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
Survey design and data analysis will provide information on the skills and resources needed to design and conduct survey and techniques of analyzing survey data. The skills include identifying and developing specific survey objectives, designing survey studies, sampling respondents, developing reliable and valid self-administered questionnaires, and administering surveys. The techniques of analyzing survey data include both classic methods such as factor analysis and advanced methods such as item response theory. A majority of lectures will focus on survey research, constructing surveys, response set, survey administration methods, questionnaire construction and programming surveys, sampling and power calculation, maximizing response rates, data coding and entry, reliability and validity, survey data analysis, factor analysis and item response theory. The students will be introduced to the internet based survey and the computerized adaptive testing to broaden their scope of the current survey design and collection. I will use manuscripts of survey data and protocols of completed studies to facilitate learning of concepts discussed in class.

CLRES 2050 - ETHCS & RESPNSBL CONDCT RES
Minimum Credits: 1
Maximum Credits: 1
This course presents an in-depth examination of ethical issues in the conduct of clinical research. Topics include issues related to privacy, confidentiality, protection of human and animal subjects, informed consent and the role of the IRB in ensuring the responsible conduct of research. Special consideration will be given to regulatory issues (from OMB, NIH, IRB, and others) pertaining to the conduct of clinical trials and health service research.

CLRES 2060 - GRANTSMANSHIP & BIOMEDCL WRTNG
Minimum Credits: 1.5
Maximum Credits: 1.5
This course provides an overview of grantsmanship and information dissemination. Topics include opportunities for external research funding. The development and submission of applications for research funding and the peer review process. We will enhance research communication and information management skills, including the development and preparation of scientific manuscripts, the use of computerized information management systems, effective writing of abstracts, competence to serve as an editorial reviewer, and development of oral communication skills.

**CLRES 2073 - INT CLN TRANSLATIONAL RES SEM**

**Minimum Credits:** 0  
**Maximum Credits:** 0

The introduction to clinical and translational research seminar (CLRES 2073) is a mandatory monthly seminar series for first-year students in the clinical scientist training program and the Doris Duke clinical research fellowship. The objective of the seminar is to introduce students to some fundamental concepts, such as how to establish and nurture the mentor-mentee relationship, to responsibly search the medical literature, to recognize and comply with regulations governing the conduct of human subjects research, to navigate the university of Pittsburgh institutional review board (irb), and to appreciate the broad scope of clinical research and clinical research careers. The seminar is not intended to provide formal didactic instruction in clinical research methods; these objectives will be met through the clinical research coursework you will complete toward a certificate or master of science in clinical research.

CLRES 2076 - INTRODUCTION TO GRANT WRITING
Minimum Credits: 1
Maximum Credits: 1
Obtaining peer-reviewed grant support is one of the most critical determinants to academic and career success, yet the process is highly challenging. Through select readings and podcasts, the writing of a draft grant application to request funds from one of the many seed programs available to Pitt students and faculty, and class discussions led by an long-time NIH-funded clinical investigator, introduction to grant writing CLRES 2076 will provide trainees, clinical fellows, post-doctoral students, and junior faculty without any prior grant writing experience with useful knowledge, insights, and skills in the grant writing process to improve their chances of later funding and subsequent career success.

CLRES 2077 - MGNG CARR CLN & TRANLTNL SCI
Minimum Credits: 0
Maximum Credits: 1

CLRES 2080 - MASTERS THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 6
A directed research project which results in a thesis for a master's degree.

CLRES 2085 - DIR RES/IND STDY CLINICAL RES
Minimum Credits: 1
Maximum Credits: 3
An independent study project is designed by the student to pursue an area of study within clinical research that is not covered by the established curriculum. It cannot be used to replace required or core courses. The project is designed by the student and requires that an ICRE faculty member supervise the project.

CLRES 2086 - CLNCL RSRCH TEACHING PRACTICUM
Minimum Credits: 0
Maximum Credits: 3
The objective of this teaching practicum is to provide students the opportunity to design and/or implement a curriculum. This practicum involves curriculum development and implementation (i.e instruction). Each year the course directors will assess whether substantive curriculum development/refinement is necessary prior to instruction.
CLRES 2090 - CMP ASISTD EPDM LGC DATA ANALYS
Minimum Credits: 1
Maximum Credits: 1
The purpose of this class is to become familiar and facile with study design options and the analytic techniques that are paired with them. Further goals are to learn to outline an analysis for a research project, select the appropriate statistical procedures to test the desired hypotheses, carry out all phases of the analysis using SPSS software and using data sets from the momi database, and display the findings in appropriate tables and graphs. Last goal is to write a manuscript describing analytic methods and drawing conclusions from the findings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2095 - INTRO TO PHARMACOEPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course is an introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population. In addition to formal lectures, students will be given the opportunity to examine and critique the literature in this area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CLRES 2100 - OUTCOMES & EFFCTN RSRCH METHDS
Minimum Credits: 2
Maximum Credits: 2
This course will provide a survey of effectiveness research. The curriculum will deal with conceptualization, design, sampling, modeling, data collection and analysis used in outcomes and effectiveness studies. The emphasis of the course will be largely on research methodology study design. The course will be interactive and will extensively use studies published in the literature as a teaching tool.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: (CLRES 2005 and CLRES 2010 and CLRES 2020) or (MEDEDU 2005 and MEDEDU 2010 and MEDEDU 2020); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2107 - COMPARATIVE EFFECTIVENESS RES
Minimum Credits: 2
Maximum Credits: 2
This course will define CER and highlight the history and current national efforts in promoting CER for drugs, devices and other interventions. The curriculum will deal with conceptualization, design, sampling, modeling, data collection and analysis used in CER studies. The course provides an examination of many of the important issues in CER. The curriculum was developed so the students learn research methodology, become familiar with problems and controversies and develop an appreciation of the complexity of designing CER studies. The discussion of the topics will be interactive and many sessions will be led by the students. Students are expected to review 1-2 pertinent papers at each session, lead discussion of assigned topics, participate in debates, form small groups for discussions, critique other students' work and actively participate in the class.

CLRES 2108 - PATNT REGSTRIS ELCTR HLTH RECD
Minimum Credits: 1
Maximum Credits: 1
This course explores the role of research registries that include electronic health record data in comparative effectiveness research. Students will gain an understanding of different registry models, including establishing a registry, evaluating a registry, using registry data and the strengths and weaknesses of different registry models. We will discuss the use of registries with both identifiable and de-identified data. Ethical issues surrounding the use of these data sources for research will be discussed. We will use case studies to facilitate the learning of concepts discussed in class.
Academic Career: GRAD

CLRES 2109 - DESIGN OF CER STUDIES
Minimum Credits: 1
Maximum Credits: 1
The general motivation for this course is to have a culminating class on comparative effectiveness research (CER) which brings together all main concepts in CER. The course is organized as a project-based team-learning class where trainees will apply their knowledge about fundamental cer concepts to an actual problem, using existing systematic reviews and selected public data sets on real cer studies as the focus of material. Trainees will have to design an actual cer study and describe how different components of cer contribute to the topic, as well as critique work of other trainees who focus on different topic areas and methodological problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (ACM or MS) or Clinical Research (ACM or MS) or Clinical and Translational Sci

CLRES 2110 - QUALITY IMPROVEMENT HEALTH CRE
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide an introduction to the concepts and techniques used to measure and improve the quality of health care. The causes of the apparent prominence of health care quality in the current debate about HMOs and managed care will be developed, and an understanding of the methodologies that can be applied to the process of health care delivery to improve the quality of care will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2120 - COST EFFCTVNS ANAL HLTH CARE
Minimum Credits: 1
Maximum Credits: 1
Provides an introduction to and develops technical skills in the economic evaluation of health care programs. A brief intro to the economic foundation of cost effectiveness and cost benefit analysis is followed by an examination of the methodologies involved in performing cost effectiveness analyses. Topics include: definitions of cost and benefits, effect of the perspective of the analysis, calculation of cost-effectiveness ratios, performance of sensitivity analysis, discounting of costs and benefits, and discussions of current controversies in conduct of cost-effectiveness analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2121 - CLINICAL DECISION ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to the use of decision sciences in health care. In addition to developing a conceptual understanding of medical decision-making, the course will develop technical skills in decision analysis including the creation/evaluation of decision trees, the use of sensitivity analysis, and the incorporation of specific patient preferences through the use of utility analysis. The advantages and disadvantages of formal mathematical models for the analysis of clinical conditions will be presented. Examples from current medical literature will be discussed.
Academic Career: GRAD

CLRES 2141 - MEDCL WRIT & PRESNTATION SKILS
Minimum Credits: 1
Maximum Credits: 1
Medical educators and researchers must be able to present their work clearly and effectively. However, important educational material and research data are sometimes obscured by poorly delivered presentations or poorly written papers. The main objective of this course is to help students develop excellent medical writing and presentation skills. This objective will be achieved through a combination of lectures, readings, and individual and small-group projects in which students will practice specific skills. Students will have the opportunity to be videotaped while they present a talk and
will receive anonymous written feedback.

**CLRES 2170 - MAKING THE MOST OF MENTORING**

- **Minimum Credits:** 1
- **Maximum Credits:** 1

We strongly believe that effective mentoring is the cornerstone of a successful academic career; whether it be in education, research, or clinical work. Good mentors are able to guide mentees as they attempt to navigate through the course of their careers. This course is designed to provide a basis for understanding the mentor-mentee relationship and provide strategies for making the most out of the experience, topics will include: communication and negotiation, the use of mentoring contracts, providing and accepting feedback, evaluating the mentoring relationship, and solving problems and meeting challenges. Fellows, post-docs, other ICRE trainees as well as junior faculty will discover useful ways to enhance the mentoring relationship and make it a rewarding experience for both mentees and mentors.

**CLRES 2200 - INT TO RESEARCH DISPARITIES HC**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

This course will provide knowledge and skills to understand and apply the basic principles of healthcare disparities research. Students will be introduced to a variety of healthcare disparities that have been identified in the literature. They will learn about a 3-phase conceptual framework for advancing disparities research that involves detecting (phase 1), understanding (phase 2), and reducing/eliminating (phase 3) disparities. They will become familiar with methodological and conceptual issues that pertain to research designed to detect healthcare disparities, understand multi-level factors that contribute to disparities, and reduce or eliminate healthcare disparities. Students will use their knowledge and skills from the course to develop and present a research proposal focused on a healthcare disparities topic of their choice. The course will consist of didactic lectures, interactive discussions, and homework assignments to establish basic knowledge of research on disparities in health care. It will also include guest presentations by faculty with experience conducting research focused on disparities in health care.

Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (CLRES 2005 or MEDEDU 2005 ) and (CLRES 2020 or MEDEDU 2020); PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2310 - CONDC SYSTMTC REV & META-ANAL
Minimum Credits: 2
Maximum Credits: 2
Systematic reviews and meta-analyses are considered by many investigators to be the highest level of evidence for answering clinical questions. Well-conducted, methodologically rigorous systematic reviews can resolve uncertainties about therapeutic or diagnostic interventions and be helpful for the practicing physician. Despite this, researchers, intimidated by the numerous steps and the complex statistics involved in conducting a systematic review and meta-analysis, may be reluctant to undertake this type of study. In this course, we aim to help investigators perform a comprehensive systematic review and meta-analysis by providing: 1) assistance in the formulation of the research protocol; 2) access to research librarians and other resources essential for conducting a comprehensive literature search; 3) collaboration with statisticians experienced in meta-analysis; 4) assistance in interpretation of results and manuscript development; and 5) mentoring from a team of physicians and research scientists experienced in systematic reviews and meta-analysis. Participants in this course will perform a systematic review and meta-analysis in their area of interest, with the goal of publishing a manuscript in a timely fashion.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

CLRES 2320 - CLINICAL TRIALS PRACTICUM
Minimum Credits: 2
Maximum Credits: 3
The purpose of the clinical trials practicum is for the trainees (fellows and junior faculty) to work with investigators who are actually doing clinical trials. They can become part of the research team and learn how trials are actually designed, implemented, managed and analyzed. Trainees can contribute by taking a specific question and analyzing a data-set from the trial. They can write up their findings for possible publication under the supervision of the investigators.

CLRES 2410 - TRANSLATING RES INTO PRACTICE
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide an introduction to implementation research and evaluation and an overview of health services strategies. This course will provide participants with a broad overview of the theory, methods, structures and processes to translate research findings into evidence based quality and outcome improvement efforts through the application of effective implementation strategies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

CLRES 2415 - TRANSLATING SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Students will work in creative teams of 2-3 students/team to develop creative new outreach tools for communication of science to the public (new lectures, laboratories, videos, films, activities). At the beginning of the semester, didactic lectures will cover background information about how to effectively communicate scientific information, how to break down a message, production of effective, engaging slides, animations and videos, and the use of hands-on activities to engage the audience. Course instructors with expertise in film, video, educational games, and use of museum exhibits will be included. Students will then choose a topic area they wish to create an outreach lecture/video/etc. In, and with the assistance of Dr. Cameron you will choose a scientific advisor with specific expertise on the topic you will develop an outreach tool for. Students will do background reading for the development of their outreach tool and have discussions with their advisor. If developing a lecture, students will develop a set of powerpoint slides for the lecture, the lecture text with background references, and hands-on activities to complement the lecture for both a junior high and a high school version of the lecture. They will present the lecture at one of the grade levels it was designed for. For other activities, the activity will be developed along with background information regarding the use of the activity. The activity will be presented to a public group.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CLRES 2420 - MATH MODELING TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
This course will provide a survey of mathematical methods used to model complex biological systems. It is organized into three sections that cover 1) continuous and deterministic state of approaches using differential equations, basic feedback models and compartmental models, 2) discrete and stochastic approaches using Markov, Monte, Carlo and discrete event simulation techniques and 3) agent-based models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2430 - INTRODUCTION TO CBPR
Minimum Credits: 1
Maximum Credits: 1
This course is organized around themes central to the conceptualization and implementation of community-based participatory research and practice (CBPRP). The goal of this course is to familiarize students with community-based participatory research and practice. Students will become conversant in seminal community-based participatory research and practice literature. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of cbpr and the associated strengths and limitations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education(ACM) or Medical Education(MS) or Clinical Research(ACM) or Clinical Research(MS) or Clinical and Translational Sci(PHD)
CLRES 2431 - TRANSLATING RESEARCH FOR POLIC
Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to concepts and skills in knowledge translation (a coordinated, collaborative approach to ensure that research findings are utilized by key stakeholders) and to the role of research in changing policy and practice at local, regional, and national levels. This module will build on concepts in community-partnered research introduced in module a of this three-part sequence in community based participatory research. This skills-based module will introduce learners to theoretical concepts in knowledge translation (KT), dissemination and implementation science, and apply these concepts to practical exercises to translate research findings for relevance to other key stakeholders, including community partners, program developers, and policy makers. One session will be devoted specifically to skills building in legislative and media advocacy. The goal of this course is to familiarize learners with the critically important steps involved in transLating research findings for relevance to stakeholders beyond academia. Discussion, interactive learning exercises, and examples of research dissemination and implementation science will be used to provide a foundation in KT as an aspect of community-partnered research.
Academic Career: GRAD

CLRES 2432 - CONCEPT MAPPING
Minimum Credits: 1
Maximum Credits: 1
This course provides hand-on training in the participatory research method known as concept mapping (CM). CM gives community members and other stakeholders a unique chance to have their own words communicate ideas and concepts. Research participants contribute directly in the processing of this information as it directly relates to their community and intervention needs. The goal of the course is to familiarize students with example applications of the research method and to provide training related to concept mapping data collection and analysis. Discussion, interactive learning exercises, and examples of current research will be used to provide an understanding of CBPR and the associated strengths and limitations.
Academic Career: GRAD

CLRES 2500 - INTRO PATIENT ORIEN RES AGING
Minimum Credits: 2
Maximum Credits: 2
Provides an overview of conceptual and pragmatic issues in the design and implementation of patient-oriented research involving older adults. A brief summary of the current status of older adult health, disease, living situations, and health care in the United States will be followed by a systematic study of the effects of aging and chronic disease on research issues related to sampling, recruitment, consent, measurement, censoring, intervention, analysis, and research in special settings. Students are expected to demonstrate integration of information provided over the course of the semester by creating an original grant proposal for a research project involving aging adults. Alternatively, students who have previously completed a research proposal for another purpose can critique and revise their proposal using the content of this course. CRTP trainees who are working toward the master's degree may use their final grant proposal as the basis for the thesis or substantive research project required for completion of the area of concentration in aging and chronic disease.

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

CLRES 2510 - AGING RESEARCH
Minimum Credits: 1
Maximum Credits: 1
This one credit course addresses methods and challenges of aging research in special settings, such as long term care, life care, senior housing, rehabilitation, day care, hospice, emergency room, hospital and intensive care. Older adults are frequent users of unique health and community settings. They often have associated health and psychosocial characteristics that influence research design and implementation. Students will develop an awareness of factors to be addressed when conducting research in these settings. The course will involve lectures, panel discussions and site visits. Lectures and classroom discussions will be supplemented with readings focused on aging research performed in special settings. Real-world application of knowledge will be facilitated through visits to two different setting specific to older adults. Student will integrate information provided over the course of the semester in writing a final paper. This course is required for completion of the aging concentration in the clinical research training program.
CLRES 2520 - CLIN TRIALS OLDER POPULATIONS
Minimum Credits: 1
Maximum Credits: 1
This one credit course explores the special challenges inherent in the design, implementation and evaluation of intervention studies in older adults. Common challenges faced by investigators working with older adults include population heterogeneity, reduced tolerance to demand, family protectiveness, and competing events. Sessions will examine the theoretical and practical issues confronting the investigator who must tailor the study population, setting, interventions, comparison arm, duration of follow-up, and outcome measures to fit together to achieve internally valid results while maintaining feasibility and generalizability. Students are expected to demonstrate integration of information provided over the course of the semester by critiquing a set of published clinical trials on an aging related topic of their choice. This course is required for the completion of the aging concentration in the Clinical Research Training Program.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2500

CLRES 2530 - TECHNIQUES IN AGING RESEARCH
Minimum Credits: 1
Maximum Credits: 1
Researchers will describe the novel and emerging techniques that they are currently using locally in research on aging. Students will explore opportunities to engage in "bedside to bench" research that can link clinical and technology-related research questions. Students will be provided with knowledge that will be useful both in analyzing aging literature that involves these techniques and in identifying appropriate techniques to enhance their own studies in the future.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2601 - PALLIATIVE CARE PART 1
Minimum Credits: 1
Maximum Credits: 1
The broad objectives of this course are to provide trainees with an overview of the basic and clinical sciences underlying the professional care of dying patients, and to introduce them to the primary reference sources in the field of palliative medicine. The course will be taught in a small-group, discussion format, with faculty drawn from content-experts throughout the medical center. Discussions will combine analysis of the evidence base for a wide range of palliative care interventions with clinical case discussions. Cases will be drawn from the literature, faculty experience, and current clinical activities of the trainees themselves.

CLRES 2610 - RES METHODS IN PALLATIVE CARE
Minimum Credits: 1
Maximum Credits: 1
This special methods course will provide the critical bridge between the more general research skills and the particular challenges of doing patient-oriented research in palliative care. It consists of the following components: discussion of the use of specific research methods and their strengths and limitations in palliative care and review of landmark research articles in palliative care and a critical appraisal of the methodologies. The course is taught in a graduate seminar fashion with an emphasis on discussion and critical analysis. Sessions are often co-moderated by a palliative care physician and a researcher with the particular methodological expertise under discussion.

CLRES 2705 - MAXIM RESORCS BENCHTOP WWW
Minimum Credits: 1
Maximum Credits: 1
The University of Pittsburgh CTSI has over fifteen core facilities with an array of tools designed to facilitate cutting edge research. This course will introduce trainees to the resources available through the core facilities at the university of Pittsburgh and require students to develop a protocol applying one of the core facilities in their research project. In addition to local resources, the course will focus on expanding knowledge through nationally available tools at NIH core facilities and the www. The resources available at the health sciences library at the university of Pittsburgh have been cited by science magazine for the innovated and complete listing of databases and links to these resources as well as tools on how to use them. Dr. Chattopadhyay has extensive experience as a molecular biologist and protein scientist having worked both at the bench and with industry.

Grade Component: Grad LG/SNC Basis

CLRES 2707 - BIOINF RESORCS DATA MINING
Minimum Credits: 1
Maximum Credits: 1
Over the past decade, the emergence and rapid advance of genomic and proteomic technologies have generated copious amounts of data and web-based bioinformatics resources. Use of bioinformatics databases and software tools are the key for success in both basic science and translational research, as they guide researchers in formulating a new hypothesis, designing studies to test their hypothesis, and interpreting and validating their experimental results. This course will introduce students to real-life examples of the use of bioinformatics tools in research. It will teach efficient identification of appropriate bioinformatics databases and software ADN the effective application of these resources to solve scientific questions. This course is offered in a computer classroom, thereby providing hands-on training for solving bioinformatics queries using web-based tools. Homework will be assigned to reinforce the concepts presented during each class. A final project will promote integration of the bioinformatics resources introduced throughout the course.

CLRES 2708 - BIOINF RESORCS DATA ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
Over the past decade, the emergence and rapid advances in molecular technologies such as genome sequencing, microarray platforms and high-throughput put methodologies have generated a copious amount of scientific data. In response to this data overload, bioinformatics software and databases utilizing computer science and statistical methods have rapidly been evolving. Proficiency in the use of bioinformatics tools is the key for success in today's molecular life sciences research as they guide students in formulating new hypotheses, designing studies to test these hypotheses, then analyzing, interpreting and validating experimental results. Using hands-on training in a computer classroom, this one-credit hour course will introduce students to bioinformatics software tools covering a variety of topics, including nucleotide and protein sequence manipulation, protein structure, microarray and biological pathway analysis. Homework will be assigned to reinforce the concepts presented during each class. Students may use their own gene of interest, or an instructor-assigned gene if needed, to write a research report highlighting a testable hypothesis developed by using bioinformatics tools covered in the class. Upon successful completion of this course, students will have received adequate training to identify appropriate bioinformatics databases/software and efficiently apply these tools in solving real life research questions.

CLRES 2710 - TRANSLATIONAL RESEARCH TOOLS
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide an introduction to the general concepts and approaches used in translational research. While each translational research project is necessarily focused on specific hypotheses, diseases and preclinical models, the topics presented in this course represent common themes that are broadly relevant to carrying out translational research. This course will provide an introduction to eight general fields to familiarize students with these areas and how they may be applied to translational research.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CLRES 2715 - UNDERSTANDING & APPLYING OMICS
Minimum Credits: 1
Maximum Credits: 1
This required course for the translational research track will provide information on resources available at university of Pittsburgh to facilitate high throughput research techniques and will involve in-depth discussions of definitions and applications of genomics, proteomics and glycomics. Issues important to tissue processing, sample collection, limitations of techniques and special ethical issues related to storage of samples will be covered. Translational researchers will present 'real-life' examples of application of these technologies and students will be required to develop an 'omics' approach to a relevant translational research question pertinent to their own field of study.

CLRES 2720 - TRANSLATIONAL RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
A seminar will be held each month to present translational research topics with an emphasis on broadly applicable methodologies and principles, with an emphasis on specific examples of collaborations between bench scientists and clinicians that has resulted in tangible translational studies. The seminars will be presented by physician-scientists who are based in both the laboratory and the clinic and by teams of basic researchers and clinicians who partner to carry out translational research. The student must attend 16 seminars to earn credit/grade for this course.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CLRES 2725 - TRANSLATIONAL RES PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
The purpose of the translational research practicum is for trainees to develop a particular skill set not offered in the usual curriculum for credit towards the translational research track Master's degree. Laboratory rotations are critical for t1 training and specialty skill development and are done in most graduate science programs. This practical format will emphasize t1 research activities and allow students to earn 1-3 credits of subspecialty elective credit by attending an intensive mini-course, lab rotation in a Pitt lab other than their primary mentor, or by doing a rotation at another institution to learn a new technique. Each trainee is required to work with an experienced investigator who formally agrees to provide the trainee mentorship. Prior to approval of the elective, trainees are expected to provide an outline of readings relevant for the practicum objectives and at the
end of the practicum provide summaries of their experiences and reading materials. They can write up their findings for possible publication under the supervision of the investigators and are expected to provide a written summary of their involvement that is validated by their mentors at the end of the experience.

**CLRES 2730 - FROM BENCHTOP TO BEDSIDE**

**Minimum Credits:** 3
**Maximum Credits:** 3

This 10-week course is designed to teach research scientists how to navigate the path necessary to bring a basic science discovery out of the university and into the clinic. Participants will learn the criteria used by the private sector to assess the potential of discoveries that have therapeutic or diagnostic applications. They will understand how proof-of-concept and validation experiments define the application, increase value, and reduce risk. The course will focus on the importance of intellectual property protection as the engine that creates a barrier to entry for competition and also enables investment from the private sector to fund the climb over regulatory and reimbursement hurdles to reach patients. This course is open to all scientific researchers and those interested in gaining knowledge of the commercial development process. The core faculty for the course will include OED staff members, and numerous guest speakers and panelists from the scientific and entrepreneurial community.

**CLRES 2800 - FUNDAMENTALS CLINICAL TRIALS**

**Minimum Credits:** 1
**Maximum Credits:** 1

Fundamentals in clinical trials course will provide information on the first three phases (phase's i-iii) of drug development and fundamental components of randomized clinical trials. A majority of lectures will focus on aspects of phase iii parallel group designs with discussions on topics including developing research questions and defining endpoints, recruitment, randomization, blinding, data management and quality, monitoring, study closeout, and presentation/interpretation of results. The student will be introduced to the good clinical practice guidelines and the principles of planning and implementing clinical research protocols including: ethical issues and regulatory imperatives designed to protect human subjects in clinical research, adverse event reporting, protocol/proposal development, and publications. We will use manuscripts on clinical trials and protocols of completed studies to facilitate learning of concepts discussed in class. It is highly recommended that you have taken ANOVA and logistic regression courses before taking this course.

**Academic Career:** GRAD
CLRES 2810 - STATCL METHS & ISS CLIN TRIALS
Minimum Credits: 1
Maximum Credits: 1
Statistical methods and issues in clinical trials course will provide in depth information conducting randomization, sample size planning, analysis of clinical trials including phase i, ii, and iii designs, and reporting/interpreting results of studies. We will use manuscripts on clinical trials and protocols of completed studies to facilitate learning of concepts discussed in class. It is highly recommended that you have taken ANOVA and logistic regression courses before taking this course.

### CSD 2037 - AUDOLGY SPCH-LANG PATHOLOGISTS

**Minimum Credits:** 1  
**Maximum Credits:** 4

This course will introduce speech-language pathology master's students to fundamental phenomena and principles in audiology.

**Academic Career:** GRAD  
**Course Component:** Credit Laboratory  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### CSD 2038 - PHYSLGCL & PSYCHLGCL ACOUSTCS

**Minimum Credits:** 3  
**Maximum Credits:** 3

Clinical diagnostic tests and our general understanding of how the auditory system works find their bases in physiological and psychological
acoustics. The former includes the functional anatomical, neurophysiological, and electrophysiological parameters/measures of auditory function, and
the latter embraces the sensory psychology and psychophysics of audition and auditory capabilities. While touched upon briefly in other courses, this
course provides concentrated treatments of these areas with the goal of helping the student to better understand test methods.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2039 - MOTOR SPEECH DISORDERS
Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with an understanding of the nature of dysarthria and apraxia of speech. Material will include anatomy and
pathophysiology, common neurologic diseases, structure and function of the speech production mechanism, instrumental assessment, diagnosis and
prognosis, and development of treatment goals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2040 - AUDIOLOGICAL ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Basic orientation to audiology for speech pathology majors. Introduction to audiological concepts and audiometry including pure-tone audiometry,
speech audiometry, impedance and hearing screening.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2041 - MANAGEMENT OF ADLT HEARING LOSS
Minimum Credits: 3
Maximum Credits: 3
Professionals in the field of communicative disorders are often called upon to provide therapeutic, consultative, and referral services for hearing-
impaired patients. It is the purpose of this course to allow the student to become familiar with the bases for providing these services. Specifically, the
areas of assistive communication technology, and counseling will be covered relating to hearing-impaired adults.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2042 - AUDIOLOGICAL ASSESSMENT LAB
Minimum Credits: 1
Maximum Credits: 1
Lab for Audiological Assessment.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2043 - DIAGNOSTIC AUDIOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
Basic orientation to audiology for audiology majors. Introduction to audiometric environment and equipment, calibration, aural pathologies, the
audiologic case history, and elements of the basic audiometric battery.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2044 - DIFFERENTIAL DIAGNOSIS
Minimum Credits: 4
Maximum Credits: 4
Introduction to immittance audiometry, traditional special tests for diagnosing cochlear and retrocochlear site of lesion, non-organic hearing loss, and evaluation of central auditory disorders.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2045 - PHYSIOLOGICAL ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Study of auditory evoked potentials with emphasis on the auditory brainstem responses (ABR). Use of ABR in audio logic and neurologic diagnosis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2046 - PEDIATRIC EVALUATION
Minimum Credits: 3
Maximum Credits: 3
The mission of this course is to familiarize students with factors associated with heavy loss in infants and children as well as the application of audiology diagnostic procedures with this population.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2047 - AMPLIFICATION 1
Minimum Credits: 3
Maximum Credits: 3
This course provides an initial look at hearing aid evaluation, selection, validation, and orientation. Students will discuss historic as well as current topics in hearing aid selection and validation techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2048 - SOUND & VIBRATION: MSRMT & MGT
Minimum Credits: 3
Maximum Credits: 3
This course presents basic principles in the operation and configuration of instrumentation and related concepts of signal production and analysis. For sound and vibration measurements, a special focus of interest will be the measurement and management of noise and its adverse auditory and nonauditory effects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2049 - AGING AUDITORY SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
The development of the auditory system across the lifespan will be investigated. Changes due to aging will be discussed in terms of their impact on diagnostic and rehabilitative audiology. This course takes a seminar format.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2050 - LAB IN HEARING AIDS
Minimum Credits: 0
Maximum Credits: 0
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2051 - CLINICAL PROCEDURES LAB 1-2
Minimum Credits: 1
Maximum Credits: 1
Laboratory experience covering clinical procedures addressed in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

CSD 2052 - CLINICAL PROCEDURES LAB 2-3
Minimum Credits: 1
Maximum Credits: 1
Laboratory experience covering clinical procedures addressed in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

CSD 2053 - CLINICAL PROCEDURES LAB 2-1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

CSD 2054 - IMPLANTABLE HEARING DEVICES
Minimum Credits: 3
Maximum Credits: 3
This course will explore non-traditional amplification solutions that are emerging or established technologies for implantable hearing devices. Topics will include such devices as cochlear implants to newer implantable bone conduction devices. Theoretical and practical considerations of these communication solutions will be discussed. Students will leave the course with a working knowledge of the development and current status of these devices, patient candidacy, and clinical considerations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CSD 2055 - PEDIATRIC AUDIOLOGIC REHAB
Minimum Credits: 3
Maximum Credits: 3
This course is for students interested in the treatment of infants and children with hearing loss. The course focuses on the speech, language, and auditory characteristics of infants and children with hearing loss, their rehabilitative needs, and the effectiveness of various types of treatment approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2056 - AUDIOLOGY PRAC NETWORK - AUD
Minimum Credits: 1
Maximum Credits: 6
University supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience will be obtained within the speech and hearing clinic network of the department of communication disorders.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2057 - AUDIOLOGY PRACTICUM OUTPLACEMENT
Minimum Credits: 1
Maximum Credits: 6
Supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience may be obtained within the university speech and hearing clinic network or in community clinic facilities associated with the department.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2058 - CLINICAL PROCEDURES LAB
Minimum Credits: 1
Maximum Credits: 1
Laboratory experience covering clinical procedures covered in concurrent academic classes. Students will be given the opportunity for hands-on practice across the breadth of clinical audiology procedures.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2059 - AUDIOLOGY PRAC NETWORK - SLP
Minimum Credits: 1
Maximum Credits: 6
University supervised observational and clinical practicum experience in diagnostic and rehabilitative aspects of audiology. Experience will be obtained within the speech and hearing clinic network of the department of communication disorders.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

CSD 2060 - PROSEMINAR - MA
Minimum Credits: 0
Maximum Credits: 0
Variable content. Speakers from the communication department, other areas of the university and the general professional community present issues of concern to speech pathologists and audiologists.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2061 - CLINICAL INTERVIEWING
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce the graduate student in communication disorders to the theory and practice of clinical interviewing and counseling.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2062 - INTRO CLINCN-CLIENT COMNCTNS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Audiology (AUD) or Speech-Language Pathology (CSD) or SBPLAN: Audiology (Comm Science and Disorders-MA, or MS) or Speech-Language Pathology (Comm Science and Disorders-MA or MS)

CSD 2063 - DVLPNG CLINCN-CLIENT COMNCTNS
Minimum Credits: 1
Maximum Credits: 1
This course builds upon CSD 2062 and is designed to develop the graduate student's knowledge and skills in clinician-client communications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CSD 2064 - INTRO CLINICAL DECISION-MAKING
Minimum Credits: 3
Maximum Credits: 3
This course prepares students for their first clinical practicum, by orienting them to the principles and procedures underlying assessment, remediation and documentation activities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2065 - SPEECH PRACTICUM NETWORK
Minimum Credits: 1
Maximum Credits: 3
Student clinicians assess clients presented with various communication disorders, under supervision of certified speech-language pathologists in the university speech and hearing clinic.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2066 - SPEECH PRACTICUM OUTPLACEMENT
Minimum Credits: 1
Maximum Credits: 9
Student clinicians provide intervention to communicatively impaired clients, under supervision of certified speech language pathologists, in the university speech and hearing clinic.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2067 - CLINIC PRACTICE IN SCHOOLS
Minimum Credits: 1
Maximum Credits: 6
Student clinicians provide clinical services to communicatively impaired children in school settings, under super vision of certified speech-language pathologists.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)
CSD 2068 - SPEECH PRACTICUM NETWORK - AUD
Minimum Credits: 1
Maximum Credits: 3
Student clinicians assess clients presented with various communication disorders, under supervision of certified speech-language pathologists in the University speech and hearing clinic.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

CSD 2069 - SLP MASTERS COMPREHENSIVE
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2070 - ARTICLTN & PHONOLOGCAL DISORDR
Minimum Credits: 3
Maximum Credits: 3
Students learn the principles and procedures needed to identify, evaluate and remediate articulation and phonological disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2071 - CHILD LANGUAGE DISORDERS
Minimum Credits: 3
Maximum Credits: 3
This course will advance students' knowledge of models of normal and impaired language development. Students will learn to evaluate the underlying bases, the merits, the limitations of, and the empirical support for various approaches to the evaluation and management of childhood language disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2072 - FLUENCY DISORDERS
Minimum Credits: 3
Maximum Credits: 3
An introduction survey of basic information about stuttering. It includes theories of causation, diagnostic procedures, measurement procedures, dynamics and correlates to stuttering as clinical management procedures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2073 - VOICE DISORDERS
Minimum Credits: 3
Maximum Credits: 3
This course covers information regarding the nature and causes of common pathologies affecting voice, voice measurement, and treatment approaches for voice disorders. Traditional as well as non-traditional approaches are emphasized. The course uses a problem-based learning methodology, in which students are required to adopt critical thinking in solving clinical problems based on material covered in the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2074 - CLEFT PALATE
Minimum Credits: 3
Maximum Credits: 3
An overview of communication problems associated with palatal clefting and interdisciplinary treatment including embryology, anatomy, classification, neonatal problems, hearing, surgery, speech, and social, mental, and emotional development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2075 - APHASIA
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the nature, appraisal, differential diagnosis, and management of aphasia, a neurologically-based communication disorder.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2076 - DYSPHAGIA
Minimum Credits: 3
Maximum Credits: 3
Principles and practices necessary to provide counseling, evaluation and treatment to clients with alaryngeal speech and/or swallowing disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2077 - AUGMENTATIVE COMMUNICATION
Minimum Credits: 3
Maximum Credits: 3
Serving the needs of nonspeaking individuals by augmenting their residual communication skills or by providing alternate systems of communication is the focus of this course. Considered in the course are the history of augmentative communication, the evaluation and assessment of nonspeakers, the fitting of nonspeakers with augmentative communication devices, the training of nonspeakers who have been fitted with devices, and the team approach to meeting the needs of nonspeakers. Implementation is by lecture, discussion, and demonstration.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2081 - RESEARCH STRATEGIES & TACTICS
Minimum Credits: 3
Maximum Credits: 3
This course will advance students' knowledge of scientific approaches to the study of communicative processes and disorders. Students will learn a variety of strategies that guide scientific inquiry, and will examine tactics for implementing those strategies. This course will teach students skills needed to be wise consumers and potential producers of research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2082 - PROFESSIONAL ISSUES
Minimum Credits: 2
Maximum Credits: 2
Students address practical and current issues necessary for ethical and informed professional services in the field of speech-language pathology and audiology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2089 - GRADUATE SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 4
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

CSD 2109 - NEUROBEHAVIORAL SCIENCE
Minimum Credits: 4
Maximum Credits: 4
Concepts of normal sensorimotor integration, including the influence of neural centers on postural control and functional movement are considered and the clinical manifestation of dysfunction of major neural elements are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2110 - NEUROSCIENCE OF COMMUNICATION
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2250 - CHILD LANGUAGE DISORDERS 2
Minimum Credits: 3
Maximum Credits: 3
This course concerns advanced topics in the etiology, diagnosis, and remediation of developmental and acquired language disorders in children.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2251 - VESTIBULAR ASSESSMENT & REHAB
Minimum Credits: 3
Maximum Credits: 3
Evaluation of the functioning of the vestibular system and its associated neural pathways. Special attention is given to differentiation of peripheral and central vestibular disorders.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2252 - ADV PHYSIOLOGICAL ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Lectures and discussions on advanced topics in auditory evoked potentials including auditory brainstem response, middle latency and late evoked potentials.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2271 - SEM IN CHLD LANGUAGE DISORDERS
Minimum Credits: 3
Maximum Credits: 3
Various topics designed to advance students' knowledge of models and techniques for evaluating and managing child language disorders may be included.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2275 - COGNITV COMMUNICATIVE DISORDRS
Minimum Credits: 3
Maximum Credits: 3
This course will address the nature, assessment, and management of cognitive and communicative disorders in three populations: adults with right hemisphere brain damage, traumatic brain injury, and dementing conditions. In the first portion of the class, students will become familiar with current concepts, models, and measures of cognitive functions that are associated with, or potentially underlie, the neurologic communication disorders in these three populations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2450 - TOPICS IN AUDIOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
This course will offer a series of short courses in current topics in audiology. Content and instructors will be announced.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2451 - AUDIOLOGY MASTERS COMPREHENSIVE
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: SNC

CSD 2454 - AMPLIFICATION 2
Minimum Credits: 3
Maximum Credits: 3
This course allows for in depth discussion of topics related to hearing aid evaluation, fitting, and selection and signal processing. This course takes a seminar format.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2455 - SEMINAR IN ADVANCED AUDIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Seminar for advanced audiology students. Variable course content.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2456 - DEVELOPMENTAL SPEECH PERCEPTION
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on the development of speech perception in infants and young children, and how speech perception impacts the development of speech production, language, auditory function, and literacy in typically developing children with hearing loss.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2478 - SEM IN SPEECH-LANGUAGE SCIENCE
Minimum Credits: 2
Maximum Credits: 3
A seminar of variable content applicable to any area of the production and perception of speech and language. The nature of the course to be defined at the time of offering.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Speech-Language Pathology (CSD) or; SBPLAN: Audiology (Comm Science and Disorders-MA, MS) or Speech-Language Pathology (Comm Science and Disorders-MA, MS)

CSD 2479 - SEM IN SPEECH-LANG PATHOLOGY
Minimum Credits: 1
Maximum Credits: 3
Content varies across the spectrum of speech and language disorders. Each term has a special and specific focus. Students view the literature and present and discuss specific topics of interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Speech-Language Pathology (CSD) or SBPLAN: Speech-Language Pathology (Comm Science and Disorders-MA) or Speech-Language Pathology (Comm Science and Disorders-MS)

CSD 2500 - MEDICAL SPEECH PATHOLOGY
Minimum Credits: 1
Maximum Credits: 3
The course is designed to enhance the skill and knowledge base of medical speech language pathology. Topics include, but are not limited to, pathophysiology of neurogenic communication and swallowing disorders, tracheotomy management, neurological assessment and advanced applied neuroscience, pediatric feeding assessment and management, structure and function of respiratory and digestive systems, and medical ethics. Active participant learning is essential and performance is judged based on regular participation.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2501 - SP TOPC COM DISORDRS PROFSSNL
Minimum Credits: 1
Maximum Credits: 4
Course to provide continuing educ and skill development for professionals in communication disorders. Designed to address continuing education needs, and/or mandates of respective licensing & professional certification bodies. Topic areas may include, but not limited, augmentative communication, autism, literacy & language development, motor speech disorders, neurogenic speech/language disorders, dysphagia, audiology & aural rehab, in a variety of clinical populations across the life span. Emphasis placed on current clinical research in the content areas presented.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Speech-Language Pathology (CSD) or SBPLAN: Speech-Language Pathology (Comm Science and Disorders-MA) or Speech-Language Pathology (Comm Science and Disorders-MS)

CSD 2502 - PROBLEM BASED LEARNING 2
A problem based learning format will be used to explore situations encountered in medical speech-language pathology. Problems relevant to an array of theoretical, diagnostic and management issues will be presented in a format whereby students will assume complete responsibility for collecting, analyzing, interpreting and summarizing findings with class members.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Comm Science and Disorders (MA, MS) or Speech-Language Pathology (CSD)

**CSD 2503 - APLD AERODIGESTIVE PHYSLGY 1**  
Minimum Credits: 3  
Maximum Credits: 3  
These courses are designed to provide advanced study of the physiological processes involved in speech production and swallowing. Clinical methods used to measure speech production and swallowing physiology will be addressed. Instrumentation will be used to give students hands-on experience in the acquisition, measurement and interpretation of acoustic and physiologic data.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD)

**CSD 2504 - APLD AERODIGESTIVE PHYSLGY 2**  
Minimum Credits: 2  
Maximum Credits: 2  
These courses are designed to provide advanced study of the physiological processes involved in speech production and swallowing. Clinical methods used to measure speech production and swallowing physiology will be addressed. Instrumentation will be used to give students hands-on experience in the acquisition, measurement and interpretation of acoustic and physiologic data.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD)

**CSD 2505 - PROFESSIONAL WRITING 1**  
Minimum Credits: 1  
Maximum Credits: 1  
This course will be composed of two 1-credit didactic classes on the art of succinct professional writing. The nature of "the readership" will be examined and how writing style must be modified to suit a specific audience. Assessment will be based on the production of several items including a scientific abstract for conference peer review, an administrative work such as an evidence based business plan for specific service development, and an information leaflet for careers (lay language use). Some of these may require submission to an outside body if appropriate. The third credit in this series will be a scholarly work in which the student will be mentored by a departmental faculty member on the development of a specific project. It is a requirement that this scholarly component be submitted to an outside institution for peer review. Class waivers will be considered on an individual basis, provided the student can demonstrate writing skills consistent with the outcomes of this course.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Comm Science and Disorders (MA, MS) or Speech-Language Pathology (CSD)

**CSD 2506 - PROFESSIONAL WRITING 2**  
Minimum Credits: 1  
Maximum Credits: 1  
This course will be composed of two 1-credit didactic classes on the art of succinct professional writing. Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2508 - RESEARCH AND CLINICAL FORUM
Minimum Credits: 0
Maximum Credits: 0
This component encourages residents (and clinical fellows) to attend clinical and research meetings offered by CSD/Pitt/UPMC/VA etc. to gain experience of the various aspects of clinical and research fields relevant to the discipline of communication science and disorders. (Residents and clinical fellows) will attend 4 documented events per semester from the full range of activities available throughout the university of Pittsburgh and its associated medical center's extensive network of institutional and regional clinical, research, and scientific educational offerings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2509 - HEAD AND NECK ANATOMY
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2510 - COMPLEX DECISIONS
Minimum Credits: 3
Maximum Credits: 3
A problem based learning format will be used to explore situations encountered in medical speech-language pathology. Problems relevant to an array of theoretical, diagnostic and management issues will be presented in a format whereby students will assume complete responsibility for collecting, analyzing, interpreting and summarizing findings with class members.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2511 - ORAL DISSEMINATION SKILLS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2512 - HEAD AND NECK ANATOMY LAB SLP
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Laboratory
Grade Component: Grad SN Basis

CSD 2513 - MEDICAL CLINICAL ROTATIONS
Minimum Credits: 1
Maximum Credits: 7
This course provides the CSC.D student with the opportunity to develop theoretical and clinical knowledge and skills through observation, discussion, and participation with other health professionals via the completion of three 10-week half-time clinical rotations. These experiences may include such disciplines as physical medicine and rehabilitation, neurology, and other related clinical services.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2514 - SCHOOL BASED SERVICE DELIVERY
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

CSD 2515 - HUMAN PHYSIOLOGY MED SLP
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CSD 2520 - MENTORED CLINICAL INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
The focus of these internship assignments is to further develop, refine and enhance the CSC.D student's knowledge, skills and abilities as they pertain to the assessment and management of communication and swallowing disorders in the context of their weekly caseload. Mentoring will be facilitated through weekly interactions with designated faculty members.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad SN Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2521 - CLINICAL EDUCATION 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2522 - CLINICAL EDUCATION 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2523 - CLINICAL EDUCATION 3
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2572 - COMPREHENSIVE EXAMS
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2579 - SEM ADV MEDICAL SPCH-LANG PATH
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders(MA, MS) or Speech-Language Pathology (CSD)

CSD 2600 - INTER-PROFESSIONAL ROTATION
Minimum Credits: 1
Maximum Credits: 1
This course includes a clinical rotation where students accompany physicians engaged in clinical examination, diagnosis, and treatment of otology/vestibular patients. Students meet with medical residents in otology conferences and grand rounds. This course exposes students to basic ear anatomy and surgical procedures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2601 - SUPERVISION
Minimum Credits: 1
Maximum Credits: 1
Students will explore activities associated with supervising students through readings and examples presented in class. This course provides future professionals with tools to be effective audiology supervisors. Material is presented in a manner to convince students that supervising future practitioners is a professional responsibility.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2602 - EDUCATIONAL AUDIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course takes a lifespan approach to educational audiology. Laws, working within the educational environment and with other educators, developmental needs, room acoustics, and technology will be explored in this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
CSD 2603 - HUMN GENETICS HRNG SPCH DISRDS
Minimum Credits: 2  
Maximum Credits: 2  
An examination of the mechanisms involved in producing genetic variation in humans and the medical/clinical aspects of genetic variation and disease. Students will learn genetics terminology, patterns of inheritance, DNA/RNA structure and transcription and translation, characteristics of major human syndromic and non-syndromic hearing loss and communication disorders. We will discuss the ethical, legal and social issues associated with our growing knowledge of human genetics and the potential for misuse.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

CSD 2651 - MEDICAL AUDIOLOGY
Minimum Credits: 2  
Maximum Credits: 2  
This course covers medical conditions, diagnoses, and treatments in which audiologists might be involved. The course addresses relevant medical terminology and abbreviations, universal precautions, and ENT related diagnoses and interventions.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2652 - ADVANCED CLINICAL SEMINAR 3-1
Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad HSU Basis

CSD 2653 - ADVANCED CLINICAL SEMINAR
Minimum Credits: 1  
Maximum Credits: 1  
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning. Participants may access the course via the internet in the case of students and supervisors located out of the local region.
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad HSU Basis  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2654 - PRACTICE MANAGEMENT
Minimum Credits: 3  
Maximum Credits: 3  
Students will investigate the professional, legal, and ethical issues related to practice management. In-depth exposure and critical discussion will be focused on professional issues that impact licensure, occupational codes, and reimbursement. Students will understand CMS and other government agencies that impact how they manage their audiology practices. Billing as it relates to CPT codes, ICD-9 CM codes, third party payment, etc. will be discussed.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Audiology (AUDIO-AUD; MACAUD-SP; MSCAUD-SP) or Comm Science and Disorders (PHD)

CSD 2655 - ADVANCED CLINICAL SEMINAR 4-1
Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad HSU Basis
CSD 2656 - ADV AUDLGY CLN PRACTICE-NTWRK
Minimum Credits: 1
Maximum Credits: 4
Third year audiology students engage in advanced clinical practicum under the supervision of university faculty. Practicum activities target the development of independence in higher level clinical skills such as clinical decision making, diagnostic and treatment planning, case management, and professional oral and written communication skills.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2657 - ADVANCED CLINICAL SEMINAR 3-3
Minimum Credits: 1
Maximum Credits: 1
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis

CSD 2658 - ADVANCED CLINICAL SEMINAR 4-3
Minimum Credits: 1
Maximum Credits: 1
This course provides advanced students with a forum for discussion of advanced clinical topics through case-based learning. Participants will access the course via the chat function on course web.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis

CSD 2659 - AUDIOLOGY EXTERNSHIP
Minimum Credits: 1
Maximum Credits: 9
Consists of full-time supervised work at sites offering diagnostic and rehabilitative audiology within and outside the Pittsburgh region. Students are expected to gain at least 2000 hours of clinical activity through the internship.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 2660 - ADVANCED CLINICAL SEMINAR 4-2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

CSD 2661 - ADVANCED CLINICAL SEMINAR 3-2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

CSD 2902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
Under the direct supervision of a faculty member, the student carries out specific research (library or experimental) pertinent to the student's and/or faculty member's interests.
CSD 2907 - CLINICAL INVESTIGATION
Minimum Credits: 3
Maximum Credits: 3
This course will examine basic research process and investigate strategies by reviewing existing applied clinical literature. The concept of a clinical database will be covered including group decisions that are necessary for operationally defining clinically relative fields relating to treatment intervention and outcome. Student will know how to query a database and answer questions about their everyday practice as well as have the necessary information to prepare peer review. Published manuscripts based on multiple cases or experimental research.

CSD 2970 - TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
Student is supervised in gaining experience in various aspects of university classroom instruction, including preparation of materials, lecturing and discussion, test construction and evaluation and student evaluation.

CSD 2971 - RESEARCH PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This variable credit experience provides opportunities for students to be involved in research studies under the supervision of faculty members.

CSD 2972 - EXAMINATION
Minimum Credits: 1
Maximum Credits: 3
Examination credit registration gives official registration status to a student who will be taking an examination but who may not be registered for any other courses.

CSD 2973 - PRACTICUM IN CLINIC SUPERVISION
Minimum Credits: 1
Maximum Credits: 3
This course provides advanced graduate students with the opportunity to obtain experience supervising first year masters students. The advanced students, in turn, will work in consultation with the director or the assistant director of the university speech-language and hearing clinic.

CSD 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
Independent study credits are taken without supervision by students who propose projects that complement their academic goals, and projects whose substance is not covered in the division's regular course offerings.
CSD 3000 - DISSERTATION RESEARCH PHD DEGR
Minimum Credits: 1
Maximum Credits: 9
Students will formulate, design, propose, carry out, analyze, interpret, and write up an approved research project, under the direction of a dissertation committee, and in particular the chairperson.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CSD 3048 - PHD SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on professional concerns such as the scientific method, research design and evaluation, effective scientific writing and presentation, funding sources, and the grant writing process. Among the options for a final product are a research proposal, or a publishable paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 3049 - PH.D. SEMINAR IN AUDIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Audiology Ph.D. students will participate in this seminar series.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 3060 - PHD PROSEMINAR
Minimum Credits: 0
Maximum Credits: 0
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Speech-Language Pathology (CSD) or Audiology (AUD)

CSD 3089 - DOCTORATE SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 4
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

CSD 3478 - RES SEM IN SPEECH-LANGUAGE SCI
Minimum Credits: 3
Maximum Credits: 3
A seminar of variable content applicable to any research area in the production and perception of speech and language. Each term has a special and specific focus. Students review research literature and present and discuss specific topics of interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

CSD 3479 - RES SEM IN SPEECH-LANG PATH
Minimum Credits: 3
Maximum Credits: 3
Content varies across the spectrum of research issues in speech and language disorders. Each term has a special and specific focus. Students will review research literature and present and discuss specific topics of interest.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

### CSD 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9
Students will explore theoretical or applied questions related to their area of interest by analyzing relevant literature under the direction of an appropriate faculty advisor.

**Academic Career:** GRAD

**Course Component:** Directed Studies

**Grade Component:** Grad SN Basis

**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

### CSD 3971 - RES PRACTICUM FOR PHD STUDENTS

Minimum Credits: 1
Maximum Credits: 9
A prerequisite to CSD 3000; doctoral students are involved in research projects under the supervision of faculty members.

**Academic Career:** GRAD

**Course Component:** Practicum

**Grade Component:** Grad SN Basis

**Course Requirements:** PLAN: Comm Science and Disorders (PHD) or Audiology (AUD) or Speech-Language Pathology (CSD)

### Communication: Rhet & Comm

### COMMRC 2000 - THESIS FOR MASTERS DEGREE

Minimum Credits: 1
Maximum Credits: 6
After successful completion of the master's level comprehensive examinations, students may elect to write a master's thesis.

**Academic Career:** GRAD

**Course Component:** Thesis Research

**Grade Component:** Grad SN Basis

### COMMRC 2014 - ARGUMENTATION

Minimum Credits: 3
Maximum Credits: 3
This course interrogates argument as a product, process, and method of inquiry, using a variety of theoretical approaches as points of departure, including pragma-dialectics, speech act theory, controversy studies, informal logic, visual communication, and forensics, as well as critical perspectives such as invitational rhetoric and feminist argumentation theory.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis

### COMMRC 2035 - SEM AUDIENCE & RECEPTION HIST

Minimum Credits: 3
Maximum Credits: 3
Introduces approaches to reconstructing historical audiences for various media productions. Exercises and case studies will be drawn from the mid-19th-century U.S., and will emphasize visual and typographic aspects of books, periodicals, and ephemera. Assigned readings may encompass other media forms and time periods. Attention will be paid to gender, class, ethnicity, race, and religion in discerning who read what, when and where, and what it meant to them.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad LG/SNC Basis
COMMRC 2036 - HIST OF AMER ENVIRONMNTL RHET
Minimum Credits: 3
Maximum Credits: 3
This course investigates the history of American rhetorics of nature and the environment from pre-European native American conceptions through puritan notions of "wilderness," through civic humanist and manifest destination conceptualizations, to contemporary environmental rhetoric, the deep ecology dispute, and ecofeminism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2037 - INTERDISCIPLINARY COM THEORY
Minimum Credits: 3
Maximum Credits: 3
By its very nature, the discipline of communication makes extensive use of theories from outside the communication field and intersects with other scholarly traditions. Our research draws on work in philosophy, sociology, ethnic and gender studies, and many other fields. The purpose of this course is for us to become familiar with a few theorists who have had widespread influence in the field of communication. We will read extensively in primary source texts such as Michel Foucault's power/knowledge, his history of sexuality, and a later work, such as the hermeneutics of the human subject. We will also read in Pierre Bourdieu and Loic Wacquant's invitation to reflexive sociology and in Bourdieu's language and symbolic power. Bourdieu is interested in applied research on social practices, and he emphasizes the importance of the formation of intellectual habits and the processes of socialization. His work has been an important resource for communication researchers who study the socialization and normalization processes that shape perception and experience. The third theorist we will read is Edward said. Said is a literary analyst whose groundbreaking book, orientalism, considered representations of the oriental 'other' as they appeared in news coverage, novels, and other mediated forms during the nineteenth and twentieth centuries. This work was a significant instigating force in post colonialism which in turn had strong influences in the field of communication. We will find that all three of these theorists were reacting to earlier literary and philosophical European influences such as structuralism and phenomenology, and we will discuss those as well. For the course project, each student will be encouraged to trace the influences of these theorists on his or her own research and/or topic, and to develop a final paper tracing the use of one or more of these theorists in the relevant research literatures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2040 - VOICES OF REMEMBRANCE
Minimum Credits: 3
Maximum Credits: 3
Oral history provides an opportunity for voices of socially-oppressed peoples to augment and often challenge the official, published archive that shapes how the past is remembered, what about it is remembered, and who is allowed to remember it and on what terms. Oral history, in this sense, offers an affirmative answer to Gayathri Chakravorty Spivak's question, "Can the subaltern speak?" By providing a forum for the otherwise silenced to be heard and have what they say be recorded, engaged by informed interviewers/listeners, and, ultimately, made available as a public resource for reimagining and rethinking the past. With an eye to race, class, ethnicity, sexuality, and gender, this course aims to introduce methods of, theories about, and interpretative strategies for capturing voices of remembrance to students wishing to develop an oral history component in their research. Models for discussion will be drawn primarily from a range of sources originating from Twentieth-Century us history, from WPA narratives of former slaves to more recent testimony of striking Chicana garment workers and of San Francisco nurses first confronting the aids epidemic. However, readings will also include research from investigators around the world. Issues related to IRB oversight, exemption, or exclusion will be discussed, as will the ethics surrounding conducting interviews, interpreting them, and presenting them to the public. Students will devise an oral history project in which they will conduct interviews, transcribe and analyze them, and interpret them in a journal-length research paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2201 - RHETORICAL CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This course is focused on the history and practice of rhetorical criticism in America during the twentieth century. The student writes several in-depth criticisms of a significant message designed to influence belief and action.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2202 - HISTORICAL METHODS IN RHETORIC

Minimum Credits: 3
Maximum Credits: 3
This course explores the various rhetorical functions that traditional histories of rhetoric serve and introduces students to recent theories of historiography and the rhetorics of historiography.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2203 - SEMINAR IN PHILOSOPHY & RHETORIC
Minimum Credits: 3
Maximum Credits: 3
This seminar concerns itself with the conflict between philosophy and rhetoric. The conflict will be considered both historically and critically. We will ask: how did the conflict come about? What important changes did it undergo in subsequent centuries? How does it exist today?
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2204 - MYTH, IDEOLOGY AND SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course examines the transition from structuralism to post-structuralism and the relation to post-modernism. In this context we explore three cultural forms - myth, ideology and science - in terms of their rhetorical structures and the social conditions which gave rise to them.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2205 - NEO-ARISTOTELIAN RHETORIC
Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introduction to the history of rhetorical theory from roman times to the 20th century. This survey course begins with rhetoric in the middle ages and then proceeds through the renaissance, the 18th century and 19th century, concluding with the foundation of modern speech departments.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2212 - VISUAL RHETORIC
Minimum Credits: 3
Maximum Credits: 3
This seminar concentrates on scholarship concerning visual rhetoric and its various synonyms, primarily produced in the United States during the last few decades. Through classroom exercises, readings, and writings, graduate students will become familiar with various practices of message analysis and evaluation pertaining to pictorial persuasion. Seminar participants prepare and present original research concerning visual rhetoric, including the formulation of research questions, developing an appropriate literature review, and, ultimately, inventing sustained argumentation for a thesis concerning the rhetoric of pictorial works.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2213 - AMERICAN PUBLIC ADDRESS
Minimum Credits: 3
Maximum Credits: 3
Studies in the history and criticism of public discourse in the United States.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2214 - CONTEMPORARY PUBLIC ARGUMENT
Minimum Credits: 3  
Maximum Credits: 3  
Studies in the history and criticism of contemporary public argument through the examination of its rhetorical and cultural foundations.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**COMMRC 2215 - RHETORIC AND HUMAN RIGHTS**  
Minimum Credits: 3  
Maximum Credits: 3  
This graduate course focuses on key concepts which are useful for describing, analyzing, and interpreting significant public texts and symbols concerning human rights controversies domestically and internationally. The central objective is to strengthen the seminar participants' awareness of qualitative techniques for interpretive and critical studies of public advocacy about human rights. It concentrates on 20th-century controversies within the US concerning "hate" or bias crimes. Considerations of race, sexuality, gender, sex, and economic class will be interwoven throughout the materials and discussions.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**COMMRC 2216 - AMERICAN RHETORICAL IDIOMS**  
Minimum Credits: 3  
Maximum Credits: 3  
This course examines various seminal American political and cultural vocabularies or "idioms" including, puritan millennialism, civic humanist republicanism, federalism, liberalism, imperialism, socialism, etc. Several primary and secondary sources are examined in detail.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**COMMRC 2217 - MODERN THEORIES OF RHETORIC**  
Minimum Credits: 3  
Maximum Credits: 3  
Examination of modern rhetorical theories with emphasis on the contributions of such contemporary theorists as: Kenneth Burke, Henry Johnstone, Maurice Natanson, Chaim Perelman, I.A. Richards, Richard Weaver, Ernesto Grassi, Walter Ong, and such continentals as Foucault, Derrida, and Ricoeur.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**COMMRC 2218 - CONTEMPORARY RHETORICAL THEORY**  
Minimum Credits: 3  
Maximum Credits: 3  
Study of selected theorists from roughly the last fifty years who explicitly thematize rhetoric or whose work helps to shape the intellectual landscape for thinking about rhetoric. Key theorists would include Kenneth Burke, Chaim Perelman, Michael McGee, Celeste Condit, Michel Foucault, Martha Nussbaum, Michael Billig, Richard Weaver, Jeanne Fahnestock, Thomas Farrell, Lloyd Bitzer, and Stephen Toulmin. Specific content will vary. Short response papers and one longer research paper required.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**COMMRC 2219 - RHET OF PRESIDENTIAL ELECTIONS**  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar is devoted to a critical study of the nature and practice of contemporary campaign rhetoric in pursuit of the presidency. Every four years in a presidential election year, the seminar traces the rhetoric used by candidates for the presidency that year. Topics may vary.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis
COMMRC 2220 - READINGS IN CRITICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/knowledge, desire and the subject. Each year a different area or topic is chosen.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2226 - MEDIA AND CULTURAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course traces the history and development of british cultural studies and the role it has played in redefining the study of media in Britain, the US, and Australia. The course examines cultural studies as both a methodology and a political stance by studying its theoretical struggles with Marxism, structuralism, semiotics, social science research, and ethnographic techniques.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2227 - MEDIA THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will provide an in-depth study of current theoretical and methodological approaches in media studies. This is a core course designed to introduce students to media theory. Topics may vary.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2229 - MEDIA AND GLOBAL CULTURES
Minimum Credits: 3
Maximum Credits: 3
This course examines the debates involving media as international and internationalizing. Topics include the current debate about the concepts and institutions of "national culture" and the national-state; the international nature of media industries; narratives of exploration, discovery, imperialism, and cultures; representation and "consumption" of other cultures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2230 - COMMUNICATION RESEARCH 1
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce rhetoric and communication students to empirical research methods. Examined will be historical and philosophical contexts, observation, hypothesis formulation, hypothesis testing (research methods), and the rationales underlying statistical tests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2233 - THEORIES & MODELS OF COMMNCTN
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to develop an understanding of the nature of theory and theoretical commitment. By examining the major theoretical positions current in communication study, students will examine the assumptions which are the foundation of each perspective. Discussion will focus on the conceptualization of communication each perspective embodies and on the nature of the research questions which are derived from each perspective. Strengths and weaknesses of each theoretical school will be explored.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
COMMRC 2245 - SEMINAR IN CLASSICAL RHETORIC
Minimum Credits: 3
Maximum Credits: 3
This seminar concerns itself with the origin and early development of rhetoric. The focus is on the traditions of the Greek and Roman cultures. Particular attention goes to the Sophistical, Platonic, Isocratean, Aristotelian and Ciceronian traditions. Consideration is given to the cultural context from which these traditions emerged.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2285 - SCIENCE AND ITS RHETORIC
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the following questions: what role, if any, do rhetorical interpretations play in the discourse of science? Can the acceptance of scientific ideas be exhaustively explained in terms of epistemic criteria alone, or is there always necessarily recourse to rhetorical tropes? What role does rhetoric play in the internal dialogues of science, and how is rhetoric mobilized when science addresses its lay audience? These questions will be explored through exemplary cases chosen from both the natural and the human sciences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2296 - PROSEMINAR
Minimum Credits: 3
Maximum Credits: 3
Introduction to graduate study in communication. Required for all new graduate students.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2298 - RESEARCH COLLOQUIUM
Minimum Credits: 0
Maximum Credits: 0
The research colloquium provides a forum in which graduate students, faculty, and invited lecturers present research in progress.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: No Grade Required

COMMRC 2460 - FILM AND LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course examines the historic and theoretical relationship between film and literature. Among the topics to be considered are: (1) narrative structure in film versus literature; (2) parallels between filmic and literary genres; (3) adaptation from literature into film; (4) the case of the writer/director; (5) the influence of cinema on writing; (6) the politics of high versus low culture distinctions; (7) a comparison of film and literary criticism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2462 - FILM COMEDY: THRY, CULT, STYL
Minimum Credits: 3
Maximum Credits: 3
Since the earliest days of the cinema, film comedy has been one of the most profitable, prevalent and persistent genres—ranging from the primitive burlesques of Edison or Lumiere to the popular features of today. While comedy appeals to a viewer's sense of pleasure, it also addresses her intellect, for as Ousmane Sembene once said, comedy "makes people laugh but it also makes them think." That is precisely what we will do in this course: think through comedy. Here, it is interesting to note that, in 2010, the academic journal comic studies began publication. Drawing on texts from cinema, television and the web—class sessions will represent a variety of perspectives. In certain sessions we will take a cultural studies approach, examining: (1) comedy's ties to its socio-historical moment; (2) the role of Nation or Ethnicity in comic style and reception; (3) the conflict between comedy and "political correctness"; (4) the role of gender and the body in comic discourse and (5) comedy's focus on the machine. In other classes we will analyze comic theory, for instance (1) theories developed about other arts (e.g. By Freud, Frye, Bergson, Bakhtin, Hutcheon,
Pirandello, etc.; (2) Theories devised for the cinema (e.g. Agee, Cavell, Durgnat, Carroll, Paul, Shaviro, Fischer, Deleuze, King, Krutnick and Neale, Rowe, Seidman, Harries, Winokaur; (3) the relation of comedy to tragedy and melodrama; and (4) the role of laughter in comedy and society. In still other sessions, we will confront questions of comic authorship and style, as screen comedies have come to be identified with specific directors/performers and only "work" when presented in precise audio-visual configurations (involving shot distance, composition, editing, and deployment of sound). Finally, we will examine diverse comic modes (animation and live-action); genres (e.g. Satire, slapstick, tragic-comic, romantic, screwball, "gross-out," farce, sitcom) and tropes (e.g. The chase and gender confusion).

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2466 - FILM, MODERNITY AND MODERNISM
Minimum Credits: 3
Maximum Credits: 3
This course will explore the broad relationship between the cinema and the modernist cultural movement. It will present an overview of the term, "modernism", and investigate the formal experimentation associated with the movement in film. It will then explore such major themes associated with modernism as: urbanization, primitivism, mechanization, propaganda and commodification, language, and nationalism.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2471 - CINEMA AND PSYCHE
Minimum Credits: 3
Maximum Credits: 3
From the earliest years of film theory, writers have likened the discourse of cinema to the workings of the human mind. In 1916, for instance, Hugo Munsterberg (in "the photoplay") drew parallels between film language and recollection, attention, and anticipation. This course (through readings and film screenings) will pursue such comparisons between cinema and the mind, investigating such topics as dream, memory, fantasy, nostalgia, perception, cognition, affect, etc.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2475 - THE BODY IN THE CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course will explore the status of the human body as represented in film, a cultural medium identified with various modes of spectacle. We will begin by a consideration of the body in early precursors to the cinema for instance eadweard muybridge's photographic 'motion studies' or primitive x-ray photography--and work our way up to the contemporary scene (in which digitally created characters (and actors) complicate the corporeal universe). In our engagement of the topic, many class sessions will consider how the body is figured in various film genres (e.g. the musical [in which the body is graceful and choreographed], the melodrama [in which the bodily expression transcends dialogue], the horror film [in which the abject body perversely transforms], the martial arts film [in which the body is a violent weapon], the romance [in which the beautiful body must attract], the sports film [in which the athletic body shows strength and endurance], the war film [in which the body suffers], the science fiction film [in which the body is a cyborg], the crime film [in which the body leaves clues], and/or the pornographic film [in which the body sexually stimulates the viewer]). Beyond genre, our discussions will also consider such broad theoretical topics as: the gendered body, the aging body, the racial body, the 'national' body, and the manner in which film style 'transforms' the body (e.g. Fragmentation through close-up). Readings on the topic will be drawn not only from film studies (e.g. Linda Williams, Lisa Cartwright, Peter Lehman, Steven Shaviro) but from broader cultural studies (e.g. Thomas Laquer, Susan Bordo, Elaine Scarry or Helena Michie). Requirements will include a seminar paper and class presentation.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2492 - TELEVISION STUDIES
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar will acquaint students with the sub-field of television studies as it has emerged from film studies since the 1980s. Beginning with seminal early works by Raymond Williams and Lynn Spigel, we will survey the best of the work that has been done since then, including work on the sitcom and the soap opera, and the television programs that scholars have studied, some British but primarily American. The course will then concentrate on the topic of serialized television drama with texts to include the singing detective, hill street blues, the sopranos, and in treatment, among others. There will be in-class viewings. The course will cover both theory and critical work on television programs. This course is given about every five years.

Academic Career: GRAD
COMMRC 2658 - PHILOSOPHY OF MEDICINE
Minimum Credits: 3
Maximum Credits: 3
The seminar examines philosophical issues that arise in conceptualizing the aims and practices of medicine and medical science and their relationship to broader frames of reference, both cultural and scientific. It interrogates such fundamental concepts as health, illness, disease, pain, and care; examines relevant modes of reasoning and paradigms of knowledge; explores the role of narrativity, argument, and image systems in the internal and external understandings of medicine; considers ways that medical knowledge and understanding relate to other domains of knowledge and culture; and attempts to understand the tensions that arise in seeing medicine both as patient care and a field of research, as having both individual and social responsibilities, and as ministering to both body and mind.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 2902 - DIRECTED STUDY FOR MA STUDENTS
Minimum Credits: 3
Maximum Credits: 3
This course, for individual instruction under a research faculty member, must be within an identifiable area of study in the fields of rhetoric and/or communication. Topics vary. May be taken only once. Open only to students yet to take ma comprehensive examinations.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

COMMRC 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
Independent study is taken without supervision by students who propose projects that complement their academic goals, and projects whose substance is not covered in the division's regular course offerings. Topics vary.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

COMMRC 3000 - DISSERTATION RESEARCH PHD DEGR
Minimum Credits: 1
Maximum Credits: 12
The student will propose and design a research project and then carry out that project through research and writing. The project must be approved by a dissertation committee and executed under the direction of the chair of the committee.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

COMMRC 3001 - PROSPECTUS RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Under individual guidance of a designated research faculty member, students design, propose, and execute a research and writing project related to their prospective dissertation topic. May be used for prospectus preparation.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

COMMRC 3002 - PROFESSIONAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Under individual guidance of a designated research faculty member, students design, propose, and execute a major professional development activity (e.g., Article, conference paper, or grant proposal) or related set of them, not necessarily related to their dissertation topic.
Academic Career: GRAD
COMMERC 3164 - THE HOLLYWOOD STUDIO SYSTEM
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the history and practices of the so-called Hollywood studio system which reigned in American film production from around 1920-1960. As part of this investigation, we will examine the studio's organization (e.g. Departments), its economic structure, its reliance on genre pictures, its ranking of films in terms of perceived quality and expense, and its dependence on a stable of contracted personnel (e.g. Directors, writers, actors, art directors, etc.).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

COMMERC 3302 - SEMINAR IN RHETORICAL CRITCSM
Minimum Credits: 3
Maximum Credits: 3
This is an advanced course with varying topics. Usually, the course examines issues raised by rhetorical critics on a given topic, and assesses their work by studying the theoretical assumptions they bring to their critical enterprise.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMERC 3306 - SEM IN RHETORIC AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
This course examines the role rhetoric plays in the formation of culture, reading some interdisciplinary texts (rhetorical, philosophical, historical, literary) which represent the intellectual elite of a specific time period. These texts will furnish us with an occasion to inquire into the ways in which intellectuals mobilize rhetoric to perpetuate or transform existing socio-political formations: the kinds of cultural self-understanding shaping their discourse and the kinds of spaces their discourse opens to their audiences. Topics vary.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMERC 3314 - SEMINAR IN PUBLIC ARGUMENT
Minimum Credits: 3
Maximum Credits: 3
This is an advanced course dealing with specialized topics in the employment of argument in the public sphere. Textual analysis will serve as the primary mode of analysis for discussing the way policy issues are considered in the public realm.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMERC 3315 - SEM DELIBRBTN & DECISION-MAKING
Minimum Credits: 3
Maximum Credits: 3
Explores the role of deliberation in the formation of major public policy decisions by means of extended case studies. It attempts to assess the degree to which decision making proceeds by the careful weighing of arguments, and the degree to which institutional constraints, pressure groups, and ideological factors cause the decision process to fall away from the deliberative model.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMERC 3316 - SEM ON RHET OF SCL MOVEMENTS
Minimum Credits: 3
Maximum Credits: 3
Social movements have been perennial subjects of rhetorical inquiry. What are social movements? How and why do movements form, grow, and dissipate? Can approaches to rhetorical inquiry traditionally reserved for the analysis of lone speakers and single texts shed useful light on the process
through which movements attempt to persuade various audiences? This seminar considers the manner in which early social movement scholars in the field of rhetoric grappled with these and other controversial questions. After developing working knowledge of the rhetorical tradition of social movement scholarship, students will engage other theoretical viewpoints from fields such as sociology and political science to illuminate aspects of movement activity that may be less apparent from within the rhetorical horizon. Consideration of specific case studies will anchor such explorations, and the pedagogical approach guiding such study will privilege direct engagement with movement actors. The goals of the course are to provide students with a grasp on the tradition of social movement inquiry in the field of rhetoric, familiarize them with fruitful interdisciplinary perspectives on movement study, and stimulate reflexive awareness of their own status as agents in the field of social action.

**COMMRC 3326 - SEMINAR IN MEDIA STUDIES**  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar is designed to familiarize students with some of the core issues being debated within contemporary media studies. A number of theoretical perspectives will be incorporated, and topics will vary.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**COMMRC 3333 - CONTEMPORARY VIEWPOINTS IN COMMUNICATION THEORY**  
Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to provide a state-of-the-art report on contemporary communication theory. The scope of the course may vary with each offering. The focus during one term, for example, may be on interpersonal theory; while in another, it may widen to cover theories that range from intrapersonal communication through communication in mass media channels.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**COMMRC 3336 - SPECIAL TOPICS IN COMMUNICATION**
COMMRC 3340 - RHETRC & COMMNCTN IN SCI POLCY
Minimum Credits: 3
Maximum Credits: 3
This course will go beyond stereotypes of science as rational" and "autonomous" inquiry that have so far inhibited democratic approaches to science policy. We attempt to recover politics in science by examining science's multiple rhetorical functions, namely, different settings in which scientific knowledge claims are negotiated. After canvassing the sociological and communication literatures in this area, we will consider the role of experts and non experts in science policy, and strategies for integrating science policy into larger public policy concerns."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

COMMRC 3343 - RHETRC IN THE SOCIAL SCIENCES
Minimum Credits: 3
Maximum Credits: 3
This course will trace the implications of the shift from a rhetorical" to a "scientific" model for the study of social relations generally and human communication specifically. It will: evaluate some recent contributions to rhetorical theory by social scientists; examine some critical instances of "rhetorical" situations in science and social science; and examine the contention that the "rhetorical" component cannot, in principle, be removed from the social sciences."
Academic Career: GRAD
Course Component: Seminar

Community Dentistry

CDENT 2110 - CLINICAL EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
The objective of this course is to familiarize students with the concepts and methods of epidemiological research. Special emphasis will be given to the area of clinical epidemiology so that students will be able to understand how clinical research becomes the foundation for clinical practice. In addition to lectures, students will be expected to search the dental literature for relevant papers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 2112 - DENTAL RESEARCH DESIGN & METHLGY
Minimum Credits: 2
Maximum Credits: 2
Students will be introduced to the concepts of research design and epidemiological research. Emphasis will be given to the area of clinical epidemiology so that students will understand how clinical research becomes the foundation for clinical practice. Various systems employed for classifying types of research will be presented including both biological and behavioral sciences approaches. Particular emphasis will be placed on the proper design of clinical trials, research paradigms and various methods that can be employed to control for sources of extraneous variance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 2113 - DENTAL RESEARCH METHODOLOGY 1
Minimum Credits: 2
Maximum Credits: 2
The focus of this course will be applied and, as such, students will be required to employ statistical software packages for the analysis of dentally relevant data files. Students will be encouraged to develop, collect, encode and analyze their own data sets. Particular emphasis will be placed on analysis of variance techniques involving repeated measures and factorial designs. The interpretation of computer printouts will be paramount. A very brief introduction to the concept of multivariate analysis will also be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 2114 - DENTAL RESEARCH METHODOLOGY 2
Minimum Credits: 2
Maximum Credits: 2
Course familiarizes students with concepts and methods of research design and measurement in dental medicine. Various systems employed for classifying types of research are presented, including biological and behavioral science approaches. Particular emphasis will be placed on proper design of clinical trials, research paradigms, scientific writing, and methods that can be employed to control for sources of extraneous variance. As a result, students will understand how clinical research becomes a foundation for clinical practice, be able to critically review dental research literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 2183 - SCIENTIFIC WRITING
Minimum Credits: 1
Maximum Credits: 1
The component parts of the research paper will be presented and the differences between writing for the thesis or dissertation and a journal manuscript will be presented.

CDENT 5213 - CARIOLOGY
Minimum Credits: 1
Maximum Credits: 1
Goal is to introduce concepts related to etiology, diagnosis, treatment and prevention of dental caries. Those include: (1) understanding specific microbial components present in dental plaque are responsible for development of dental decay; (2) use of microbiological and salivary parameters as
diagnostic tools to determine the risk for developing dental caries; (3) identification of parameters of host susceptibility to dental caries and of caries-conductive dietary practices; (4) knowledge of mechanical/antimicrobial/dietary treatment and preventative strategies to control developing dental caries.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 5280 - CARIOLOGY & MGMT OF CARIES
Minimum Credits: 2
Maximum Credits: 2
This course will present instruction in the management of caries. Topics covered include remineralization, provisional resin restorations and fluoride treatment. The design of cavity preparations for root caries will be discussed.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

CDENT 5281 - SCOPE 1
Minimum Credits: 3
Maximum Credits: 3
The scope program is aimed at developing cultural competence and instilling a sense of community service. All students complete or attend five days of non-dental community service activities; four sessions of the journal club for health care to disadvantage and vulnerable populations given by the school of medicine and two seminars given by the school of dental medicine's department of dental public health.

Academic Career: DMED
Course Component: Seminar
Grade Component: Grad HSU Basis

CDENT 5282 - CLN APPLC OF PROB-SOLV SKILLS
Minimum Credits: 1
Maximum Credits: 1

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 5313 - INTRO TO DENTAL PUBLIC HEALTH
Minimum Credits: 1
Maximum Credits: 1
The course will introduce students to the concept of the community as a patient". The focus of the course is on organized efforts to address disease causes and cures on a population level. Students will be introduced to the concepts of epidemiology, research design, dental disease measurement and classification and distribution in society. Material will be presented on the social and economic barriers to dental care, determinants of utilization of dental services and demographic factors of importance in dentistry."

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 5342 - INTRO TO BEHAVIORAL DENTISTRY
Minimum Credits: 1
Maximum Credits: 1
Introduction to behavioral dentistry is designed to guide students in increasing awareness of the behavioral component of oral health care, increasing commitment to the biopsychosocial model, and strengthening the behavioral skills necessary to provide oral health care.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

CDENT 5343 - INTRO TO DENTAL PUBLIC HEALTH
Minimum Credits: 1
Maximum Credits: 1
The course will introduce students to the concept of the community as a patient". The focus of the course is on organized efforts to address disease causes and cures on a population level. Students will be introduced to the concepts of epidemiology, research design, dental disease measurement and
classification and distribution in society. Material will be presented on the social and economic barriers to dental care, determinants of utilization of
dental services and demographic factors of importance in dentistry."

**SWCOSA 2068 - FUNDRAISING IN HUMAN SERVICES**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2

This offering is an elective course in the social administration concentration. The seminar will treat a range of scholarly and applied literature and, through simulation, will engage the student in a variety of fundraising demonstrations and exercises.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWCOSA 2073 - NEIGHBORHOOD & COMMUNITY DVLP**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course applies the processes of planning and policy analysis to a real world project. While the exercise focuses on the development of an urban site, the process is applicable to non-urban projects or non-physical programs. Other course objectives stress report writing, graphic skills, presentation techniques, and task oriented group works such as project feasibility analysis.

**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Social Work students only.

**SWCOSA 2075 - COMMUNITY PARTCPTN & DCNTRLZTN**
Minimum Credits: 3
Maximum Credits: 3

This course focuses on citizen participation in public affairs. It contrasts classical theory of participative democracy with contemporary theory of representative democracy. Among the central themes are diffusion of power and human development vs. efficiency.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

**SWCOSA 2083 - COSA 1**
Minimum Credits: 3
Maximum Credits: 3

New course which replaces introduction to community organization and introduction to social administration. Completion of this course is required of all COSA students, as the initial course in the community practice concentration. This course integrates essential community organization and administration concepts, practice, and research. Centered around an intensive class-community interface, it is intended to give students a "phased-in" view and understanding of community practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

**SWCOSA 2084 - SOCIAL ADMINISTRATION**
Minimum Credits: 3
Maximum Credits: 3

This course seeks to train professionals to develop, manage and lead community service organizations that address human service needs and revitalize communities. This course will address the social work leadership and management competencies as defined by the national association for social work managers, which include: 1) contemporary social and public policies; 2) advocacy; 3) public/community relations and marketing; 4) governance; 5) planning; 6) program development and management; 7) financial development; 8) evaluation; 9) human resource management; 10) staff development. This social administration course will provide an overview of the context, knowledge and skills for human service leadership and management roles, as well as a macro framework for systems and organizational theories key to social administration and organizational management and leadership as they apply in both nonprofit and for-profit settings. Social work values will provide a critical framework for leadership and mission in human service organizations and will guide the social work code of ethics as it guides macro systems and organizations. This course will mainly focus on leadership of human service organizations and will present an overview of leadership roles and issues in personal, professional and organizational contexts. Students will also examine the following topics and issues as important to this social administration: human service systems, regulations and funding; communications and facilitation skills; starting and running a nonprofit organization; alliance, partnerships and collaborations; risk assessment and management; evidence-based practice, outcomes and benchmarking; external environmental issues shaping the human service sector. Students will produce an organizational assessment, analysis, and strategic planning field project to demonstrate their understanding and application of competencies in social administration.

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course seeks to train professionals to develop, manage and lead community service organizations that address human service needs and revitalize communities. This course will provide a framework of systems, power, and inter-organizational network theories, and will define communities in terms of issues, identity and place. Social work values of social and economic justice, participation, democratic practices, social inclusion, empowerment and capacity building will serve as a foundation for this course. This course will explore models of community organizing, including: locality development, social planning and social action, as well as transformative, participatory, feminist, community building and power-based models. Students will examine consensus, campaign, and contests strategies and tactics relative to these models and the techniques for recruiting and mobilizing citizens and constituencies to address social issues and build on local assets. In addition, students will learn: 1) frameworks and tools for assessment, analysis and planning; 2) development of human, social, and economic capital; 3) community capacity building for leadership, organizational, and partnership development; 4) settings of community practice, including unions, environmental, community and faith-based organizations, community development corporations, collaborations and coalitions, enabling and intermediary organizations, and policy and social action groups; 5) roles and skills in community organizing; 6) concepts and issues related to urban communities, including racism, poverty, neighborhood/commercial revitalization, workforce development, housing, and crime. Students will produce a major field project to demonstrate community assessment, analysis and action planning competencies and frameworks learned in class.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081; CREQ: SWRES 2021; SBPLAN: COSA (Social Work-MS)

**SWCOSA 2089 - COSA 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course concentrates on the student application of theories into practice.

**Academic Career:** GRAD  
**Course Component:** Lecture

**Course Requirements:** School of Social Work students only.

**SWCOSA 2090 - WRKNG W/GROUP & INTERGRP RLTNS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Organizers and administrators must be able to work with a range of group processes and interpersonal relationships in community and organizational practice. This course focuses on enhancing student knowledge and skills of group dynamics and processes, as well as the individual relationship management that can be challenging for macro practice. It will also provide a social work values and ethical context for practicing these skills. Three over-arching skill areas will comprise the knowledge and practice base of this modular course: 1) facilitation of task group processes of all types and sizes, 2) negotiating and bargaining, 3) mediation, including conflict mediation and resolution.

**Academic Career:** GRAD
SWCOSA 2091 - COMNY ORGZTN STRATGY & TACTIC
Minimum Credits: 3
Maximum Credits: 3
This course analyzes the role of organizing in advancing social welfare and presents a range of organizing skills, including recruitment, developing leadership, coalition building, planning and running meetings, public relations and communications, fund raising, using research for organizing, generating and developing political influence. To build their skills, students plan and organize a real-life, small conference around a topic of their own choosing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWCOSA 2084 or SWCOSA 2088 (MIN GRADE 'B-' for Listed Courses)

SWCOSA 2092 - ORGANIZING COMMUNITY CHANGE
Minimum Credits: 3
Maximum Credits: 3
This course will prepare students for community organizing strategies and tactics that support social change and advocacy across timely social and economic justice issues; promote labor and union organizing; or empower political action and political office.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWCOSA 2084 or SWCOSA 2088 (MIN GRADE 'B-' for Listed Courses)

SWCOSA 2093 - COSA 3
Minimum Credits: 3
Maximum Credits: 3
This course stresses the opportunities for advanced demonstrations of theory and practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 2094 - HUMAN SERVICES ORGANIZING
Minimum Credits: 3
Maximum Credits: 3
Provides an understanding of how and why human services are organized in our community and how these services might be more effectively developed and implemented in the community using strategies of cooperation, coordination, collaboration and coalition-building. Community needs and advocacy issues will be focus of study, as well as involving the service community in these strategies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 2095 - POLCY NON-PROFT SOCL AGENCIES
Minimum Credits: 2
Maximum Credits: 2
This course will be a seminar on the strengths and vagaries of public and private policies that are carried out in the field of social welfare, with emphasis on five local social agencies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 2096 - COMMUNITY PLANNING & DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the student to a community participation approach to local economic development carried out by a nonprofit organization. It would focus on the practical steps for putting together nonprofit housing developments and commercial and industrial business enterprises under participation conditions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWCOSA 2084 or SWCOSA 2088 (MIN GRADE 'B-' for Listed Courses)

SWCOSA 2097 - DIRECTED STUDY - COSA
Minimum Credits: 1
Maximum Credits: 3
This course is designed for those students who are interested in exploring a specific administration and/or policy issue of their choice. The course is appropriate for students with a new and developing interest area or for the student prepared to do advanced work. The course assumes the student's capacity for independent work under the guidance of a faculty member with extensive knowledge and experience in the subject area.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWCOSA 2098 - ADV COMMNTY ECON DVLP ORGANZNG
Minimum Credits: 3
Maximum Credits: 3
Second level course fusing the special bundle of skills needed for economic development at the small community level. Content includes both community and participation knowledge and skills, and in-depth technical knowledge and skills related to housing development, enterprise expansion and start-up, industrial development, workforce training and education. Each student will be involved in a sophisticated field project requiring some mastery of technical skills.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 2099 - FIELD WORK
Minimum Credits: 1
Maximum Credits: 8
The field practicum emphasizes the integration and application of social work values, knowledge and skills in practice settings. Placements are in community service delivery systems and are individualized to combine the student's choice of concentration area, certification program and specialized skill interest.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PREQ: SWGEN 2099; SBPLAN: COSA (Social Work-MSW)

SWCOSA 3047 - SEM SOCL SCIENCE ADMINV PRACTC
Minimum Credits: 3
Maximum Credits: 3
Advanced study of the application of social science to administrative practice in social work and social welfare organizations. Heuristic and analytic approaches to synthesizing elements of structural-functional, dramaturgical, psychoanalytic and small group approaches are explored. Direct applications of theory to administrative practice are emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWCOSA 3054 - ADV SEM: EXECUTIVE LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
This is a reading seminar for students who are well into the completion of their concentration in administration. This course will involve intensive reading, class presentations, and interactions with non-profit executives who will make visiting presentations to the class.
Computational Biology

CMPBIO 2010 - SEMINAR COMPUTATIONAL BIOLOGY
Minimum Credits: 1
Maximum Credits: 1
Seminar series of the joint Pitt-CMU Ph.D. program in computational biology. Nationally and internationally recognized researchers in the field of computational biology present scientific findings. Students meet informally with each speaker to discuss key areas of computational biology, including: computational structural biology, computational genomics, cellular and systems modeling, bio image informatics, and computational neurobiology.

 CMPBIO 2020 - GENE EXPRSN REGLN DATA ALGRTHM
Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level course designed primarily for those students who want to learn about the computational methods and tools that are used in the analysis of promoter regions and transcription regulation data. Students with a biological background and knowledge of introductory level statistics can participate as well as students of quantitative background. The course will primarily focus on the methods that are used for the identification of transcription factor binding sites in the promoter regions of the genes. Both sequence-based and structure-based methods will be discussed. Various technologies for data collection will also be presented, including DNA arrays, SELEX, CHIP, and their derivatives.

CMPBIO 2025 - INTRO TO BIOINFS PRGMG PYTHON
Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills. The course is designed for first-year graduate students in the corresponding fields of study. There will be a 1-hour lecture a week with time allocated for two 1-hour recitations. Both the lecture and recitations need to be scheduled in a computer lab (such as our classroom).

CMPBIO 2030 - INTRO TO CMPTL STRUCL BIOLOGY
Minimum Credits: 4
Maximum Credits: 4
This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.

CMPBIO 2035 - COMPUTTNL STRUCTURAL BIOLOGY 2
The aim of computational structural biology is to understand the function of biological macromolecules such as proteins and nucleic acids in terms of fundamental physical forces. An important goal, for example, is to predict the 3D structure of proteins based on sequence data, to predict the structural organization of protein-protein and protein-DNA clusters, and to study the role of dynamics in molecular function (e.g., in enzymatic reactions). These studies are important in rational drug design. A great deal of progress has been made in the last 30 years, where sophisticated models and techniques have been developed consisting of quantum and statistical mechanics, simulation theory, electrostatics, etc. However, the challenges are still enormous. The objective of this course is to provide the student with a deeper understanding of the above disciplines as related to biological systems, which will enable him/her to participate in a state-of-the-art research. The course will cover some topics in irreversible thermodynamics (e.g., the fluctuation-dissipation theorem, Onsager relations), complementary material in statistical mechanics (phase transitions), simulation theory as applied to polymer chains and proteins (Rosenblatt, dimerization, scanning, multicanonical and its derivatives), free energy and potential of mean force (e.g., Jarzynski), continuum electrostatics (Laplace, poison, and poisson-boltzmann equations, Born formula, generalized Born treatments), kinetics, and quantum mechanics. Most of the material will be presented in lectures by the course instructor, with the balance being presented by expert guest lecturers.

**CMPBIO 2040 - CELLULAR AND SYSTEMS MODELING**

Minimum Credits: 3
Maximum Credits: 3

A graduate-level introduction into mathematical modeling and analysis of biological systems on the cellular and other levels. This condensed and broad course conveys the unity of the modeling methodology in biology. It spans a range of perspectives derived from the different disciplines from which this new area of research originated: biology, mathematics, engineering, and computer science. The systems covered include quantitative physiology, quantitative cell biology, biological networks, dynamic systems, cell mechanics, and systems modeling of critical illness. The quantitative physiology topics to be covered include hemodynamics, musculoskeletal systems, endocrinology, neuroendocrinology, gastrointestinal/renal, transport phenomena, and pathophysiological conditions. Quantitative cell biology topics surveyed are mathematical models of the cytoskeleton dynamics, intracellular transport, cell locomotion, spatially-distributed models of cell signaling, approaches to whole-cell modeling, and role of modeling in cell-biological research. Models of cellular mechanics will also be addressed. Mathematics of dynamic systems is presented in application to enzyme reactions, bistability in cellular signaling, programmed cell death, and the mechanisms behind the circadian and cell-division rhythms. Biological network theory is presented as it applies to metabolism, protein interactions, regulation of gene expression, and reverse engineering of the biological systems. Theoretical aspects of application of systems modeling to clinical research are also presented on an example of quantitative systems approach to inflammation, sepsis, and trauma. In addition, the course will survey computational methods and models that are broadly useful across the various system types examined. These will include random walk models, master equations, and continuous and discrete models of chemistry within the cell. Finally, the course will include a presentation of general discrete and continuous models broadly useful in cell and systems modeling as well as computational methods for optimization and parameter tuning on such models. Across the entire range of topics, the universality of the systems modeling methodology and its role in biomedical research are emphasized.

Academic Career: GRAD

Grade Component: Grad LG/SNC Basis

**CMPBIO 2050 - LAB METHODS COMPUTATNL BIOL**

Minimum Credits: 2
Maximum Credits: 2

Computational biologists frequently focus on analyzing and modeling large amounts of biological data, often from high-throughput assays or diverse sources. It is therefore critical that students training in computational biology be familiar with the paradigms and methods of experimentation and measurement that lead to the production of these data. This one-semester laboratory course gives students a deeper appreciation of the principles and challenges of biological experimentation. Students learn a range of topics, including experimental design, structural biology, next-generation sequencing, genomics, proteomics, bio imaging, and high-content screening. Class sessions are primarily devoted to designing and performing experiments in the lab using the above techniques. Students are required to keep a detailed laboratory notebook of their experiments and summarize
their resulting data in written abstracts and oral presentations given in class-hosted lab meetings. With an emphasis on the basics of experimentation and broad views of multiple cutting-edge and high-throughput techniques, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have and are looking for introductory training in more advanced approaches. Touches upon a range of topics, including structural biology, genomics, proteomics, and bio imaging a different laboratory method is covered each week, in the lab of a host faculty member who uses that method. The theory and practical aspects of each method are covered during a lecture session prior to each lab session. Students are required to submit a short lab report each week, summarizing the goals of the experiment, the critical steps and sources of error, and the analysis of the resulting data. With an emphasis on instrumentation and high-throughput data collection, this course is appropriate for students who have never taken a traditional undergraduate biology lab course, as well as those who have.

CMPBIO 2055 - QUAN ELEMN CELL FORM MOVMNT
Minimum Credits: 2
Maximum Credits: 2
This course covers the basic as well as certain selected topics pertaining to the Physico-chemical origins of architecture and motility of biological cells. It is aimed at graduate students pursuing degrees in various fields of biology (and also in mathematics, physics, chemistry, or engineering), who have taken university-level courses in mathematics, physics, and chemistry. This course material draws upon the variety of quantitative disciplines but maintains a biological perspective. Physical properties and chemical kinetics that determine the structure and function of the cytoskeleton (the assembly of non-covalent polymers at the base of the cellular architecture) will be covered, as will the Physico-chemical mechanisms of motility driven by biological force-generating macromolecules. The didactic material will be presented from the perspective of a practical researcher, and the problem sets will emphasize developing a sense of what makes for a good research strategy.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2060 - CUR TOPCS COMPUTATIONAL BIOL
Minimum Credits: 1
Maximum Credits: 1
This course will offer an overview of faculty research in computational biology, a field of tremendous growth and excitement. It will also offer a sampling of current literature in this field, as well as an opportunity for students to develop and practice their presentation skills. The course will meet once a week, and will follow a seminar-style format, with a PowerPoint presentation, followed by a question-and-answer session. To familiarize students with alternative presentation formats, and to allow for more flexibility, the course may also include one or more webinar/teleconference sessions. Throughout the semester, students will take turns serving as introducer, presenter, and moderator of question-and-answer sessions. The topics covered in this course will be in line with the five specialization areas of the joint CMU-Pitt Ph.D. program in computational biology: computational genomics, computational structural biology, cellular and systems modeling, bio image informatics, and computational neurobiology. The initial meeting will feature an icebreaker exercise and a refresher on professional presentation skills.

CMPBIO 2070 - COMPUTATIONAL GENOMICS
Minimum Credits: 3
Maximum Credits: 3
Dramatic advances in experimental technology and computational analysis are fundamentally transforming the basic nature and goal of biological research. The emergence of new frontiers in biology, such as evolutionary genomics and systems biology is demanding new methodologies that can confront quantitative issues of substantial computational and mathematical sophistication. In this course we will discuss classical approaches and latest methodological advances in the context of the following biological problems: 1) computational genomics, focusing on gene finding, motifs detection and sequence evolution. 2) Medical and populational genetics, focusing on polymorphism analysis, linkage analysis, pedigree and genetic demography, 3) analysis of high throughput biological data, such as gene expression data, focusing on issues ranging from data acquisition to pattern recognition and classification. 4) Molecular and regulatory evolution, focusing on phylogenetic inference and regulatory network evolution, and 5) systems biology, concerning how to combine sequence, expression and other biological data sources to infer the structure and function of different systems in the cell. From the computational side this course focuses on modern machine learning methodologies for computational problems in molecular biology and genetics, including probabilistic modeling, inference and learning algorithms, pattern recognition, data integration, time series analysis, active learning, etc.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CMPBIO 2075 - MOLECULAR EVOLUTION
Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.

Dramatic advances in experimental technology and computational analysis are fundamentally transforming the basic nature and goal of biological research. The emergence of new frontiers in biology, such as evolutionary genomics and systems biology is demanding new methodologies that can confront quantitative issues of substantial computational and mathematical sophistication. In this course we will discuss classical approaches and latest methodological advances in the context of the following biological problems: 1) computational genomics, focusing on gene finding, motifs detection and sequence evolution. 2) Medical and populational genetics, focusing on polymorphism analysis, linkage analysis, pedigree and genetic demography, 3) analysis of high throughput biological data, such as gene expression data, focusing on issues ranging from data acquisition to pattern recognition and classification. 4) Molecular and regulatory evolution, focusing on phylogenetic inference and regulatory network evolution, and 5) systems biology, concerning how to combine sequence, expression and other biological data sources to infer the structure and function of different systems in the cell. From the computational side this course focuses on modern machine learning methodologies for computational problems in molecular biology and genetics, including probabilistic modeling, inference and learning algorithms, pattern recognition, data integration, time series analysis, active learning, etc.

MSCBIO 2075 - MOLECULAR EVOLUTION
Minimum Credits: 3
Maximum Credits: 3
Sequencing technology is continually progressing, and genome sequences from different species and populations continue to become available in increasing numbers. Such data allows questions about molecular evolution to be addressed in new and exciting ways. This course introduces students to the evolutionary analysis of DNA and amino acid sequences. Lectures on theory will be accompanied by practical instruction in the use of contemporary computational methods and software. Topics include: population genetics of selection and mutation, models of sequence evolution, phylogenetic models, analysis of multiple sequence alignments for rates and patterns of divergence, inference of natural selection, and co-evolution between proteins. Emphasis is placed on quantitative modeling and the biological principles underlying observed patterns of molecular evolution. Interested students should have a basic grasp of molecular biology and calculus.
Academic Career: GRAD
Course Component: Lecture

Master's thesis research.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

CS 2001 - RSRCH TOPICS/COMPUTR SCIENCE  
Minimum Credits: 3  
Maximum Credits: 3  
This course introduces the students to the research being conducted in the computer science department. Active, state-of-the-art research topics will be covered.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

CS 2002 - RESEARCH EXPERNC/COMPUTR SCI  
Minimum Credits: 3  
Maximum Credits: 3  
In this course, each student will perform exploratory research topics covered in CS 2001. The research will be supervised and directed by faculty members working in the area of the topic chosen by the student.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: CS 2001

CS 2003 - COMPUTER SCIENCE COLLOQUIUM
Minimum Credits: 1  
Maximum Credits: 1  
The computer science colloquium is offered as a one unit graduate class, with a satisfactory/no credit (S/NC) grading option. The aim of this weekly meeting is to discuss the most recent advances in computer science.  
**Academic Career:** GRAD  
**Course Component:** Colloquium  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PREQ: CS 2001 and CS 2002; PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS)

**CS 2012 - ALGORITHM DESIGN**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

**CS 2040 - CONCEPTS OF SCIENTIFIC COMPUTING**  
Minimum Credits: 3  
Maximum Credits: 3  
The objective of this course is to study the fundamental areas of computer science and develop the ability to write well-structured modular and documented programs. These programs should effectively use stacks, queues, trees, and list structures. In addition, the following fundamental areas of computer science will be discussed: operating systems, instruction sets, elementary architecture, input or output programming, real-time data acquisition, and storage devices and their properties.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CS 2045 - INTRO HIGH PERF COMPUTING SYSTEMS**  
Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to the architecture of and software techniques for parallel and high performance computing systems. The content includes fundamental aspects of vector processing, shared-memory and distributed-memory systems. Students will be expected to complete a number of projects demonstrating specific applications in parallel processing paradigms.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CS 2053 - APPLIED CRYPTOGRAPHY NETWORK SECURITY**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will provide the necessary conceptual background and hands-on experience to understand the most common cryptographic algorithms and protocols and how to use them to secure computers, networks, and distributed applications. Topics include: cryptographic algorithms for data confidentiality, authentication, and integrity, user authentication methods (secure tokens and biometrics), internet security protocols, security in local area networks, firewalls, and intrusion detection systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**CS 2055 - DATABASE MANAGEMENT SYSTEMS**  
Minimum Credits: 3  
Maximum Credits: 3  
The objective of this course is to provide an in-depth knowledge of database systems design. Thus, the emphasis is on how to model one's own data and how to use available database management systems effectively. Towards this end, the relational and the object-relational models are discussed in great detail and object-oriented and other data models are also presented. Commercial database management systems are examined and students get
practical experience through the use of such systems."

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2110 - THEORY OF COMPUTATION
Minimum Credits: 3
Maximum Credits: 3
This course deals with computability theory, automata theory and formal languages. Various models of computation will be examined, their relations to each other and their properties will be studied. Topics include models for computable functions and church's thesis, models for recognizers and their relation to formal grammars, algorithmically solvable and unsolvable problems, and the complexity of computations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2150 - DESIGN & ANALYSIS OF ALGORITHMS
Minimum Credits: 3
Maximum Credits: 3
This course deals with the analysis of algorithms and the relevance of such analysis to the design of efficient algorithms. The derivation of results that are primarily of theoretical significance shares importance with the practical task of designing efficient algorithms. Topics covered: searching and sorting, graph algorithms, arithmetic, np-completeness, and lower bound techniques.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2210 - COMPILER DESIGN
Minimum Credits: 3
Maximum Credits: 3
The design and implementation of current high level languages. Emphasis is placed on the structure of compilers. Lexical, syntax and semantic analysis as well as target code generation and register allocation. Storage management techniques for recursive and retentive control structures. Formal specification techniques.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2310 - SOFTWARE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
This course will examine the software engineering process in general, the considerations for large software projects in particular, and then will focus on the conversion of software specifications into production code. Topics will include modern design methods, safety-critical software, verification and validation, testing theory and methods, reengineering of legacy software.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

CS 2410 - COMPUTER ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
A study of the hardware structure of computer systems and subsystems. Topics include: processor architecture, parallelism and pipelining, cache and
main memory organization, i/o controllers and i/o processors, and interconnection structures.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2450 - PARALLEL COMPUTING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The fundamental principles of parallel computing systems are studied at the architecture level, the algorithmic level and the application level. Topics of specific interest include: interconnection networks for multiprocessors and massively parallel systems, a survey of prototype and commercially available parallel machines, cache coherence issues, parallel programming constructs and paradigms, design and analysis of parallel algorithms, load balancing techniques, and the application of parallel systems to solve real problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**CS 2510 - COMPUTER OPERATING SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An in-depth study of the control abstractions in modern operating systems and the issues involved in efficient implementation of those abstractions. Topics will include concurrency and its control, memory management, resource management, and structure of distributed and parallel operating systems. These topics will be developed through the lectures, assigned readings from the literature, and an examination of actual operating systems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2520 - WIDE AREA NETWORKS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course provides an understanding of the basic principles of broadband networks. It will introduce protocols suitable for broadband networks, with emphasis on atm. Other technologies, such as frame relay and smds, will be discussed. The course will also address important design issues for high speed networks including characterizations of (a) network traffic and its implications on network design, and (b) application performance objectives, traffic policing, and congestion control algorithms that can meet those diverse objectives.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2530 - COMPUTER AND NETWORK SECURITY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The goal of the proposed course is to provide our graduate students the necessary background and hands on experience to do well in systems research or advanced development with an emphasis on security. The instructor will lecture on cryptographic algorithms for data confidentiality, authentication, and integrity, security protocols for the internet and local area networks, firewalls, intrusion detection systems, defense against denial of service attacks, user authentication methods, cryptographic file systems, secure email stenography and usable security.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**CS 2550 - PRINCIPLES OF DATABASE SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The main objective of this course is to provide an in-depth knowledge of database management systems design. Topics covered at length are concurrency control including concurrency on structured data, recovery and query optimization. Some important aspects of distributed databases are
discussed, including distributed concurrency control and fault tolerance.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2610 - INTERFACE DESIGN & EVALUATION**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course covers methodology for the modeling, specification, design, measurement, and evaluation of Human-Computer Interfaces (HCI). Included topics are: interaction models and modes, conceptual/logical/physical interface structures, objectively measurable interface patterns, and criteria for interface evaluation. HCI relationships to software engineering and artificial intelligence are highlighted.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2620 - INTIDIS MODELING & VISLZTN**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course discusses computer graphics, modeling and visualization techniques used to solve scientific problems. Focus falls on identifying scientific problems, proposing solutions involving graphical modeling and visualization, and designing, implementing, and evaluating the solutions. Examples include interactive software systems, quantitative analysis tools, or new applications of existing visualizations methods.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2650 - DISTBD MULTI-MEDIA SYSTEMS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

The emphasis of this course is on modeling and design of distributed multimedia systems. A framework is presented for data management, multimedia information management, knowledge management, communications management, activities management, interface management and applications to distributed systems, real-time systems, multi-media systems and information retrieval systems design.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2710 - FOUNDTNS OF ARTIFICIL INTELLGNC**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course covers the foundational techniques in artificial intelligence, including: problem definition and analysis, heuristic search, adversarial search, knowledge representation, planning and constraint satisfaction, and methods for reasoning under uncertainty. Attention will be given to the roles of these techniques in the design of intelligent agents.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

---

**CS 2731 - INTRO NATURAL LANG PROCSSNG**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course provides an introduction to the field of Natural Language Processing (NLP) - the creation of computer programs that can understand,
generate, and learn natural language. Natural language understanding will be used as a vehicle to introduce the three major subfields of NLP: syntax, semantics, and pragmatics. The course will introduce both knowledge-based and statistical methods for NLP, and will illustrate the use of such methods in a variety of application areas.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

### CS 2740 - KNOWLEDGE REPRESENTATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course will presuppose familiarity with ai programming techniques and research methods. Specific topics include: logic-based representations, semantic networks, frame-based representations, rule-based methods, object-oriented methods, conceptual dependency networks, no monotonic reasoning, and specific issues in the representation of casual, temporal, and spatial relations.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### CS 2750 - MACHINE LEARNING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will give an overview of many techniques and algorithms in machine learning, beginning with topics such as linear and logistic regression, multi-layer neural networks and ending up with more recent topics such as boosting and support vector machines. The basic ideas and intuition behind modern machine learning methods, as well as, a more formal understanding of how and why they work will be covered. Students will have an opportunity to experiment with various machine learning techniques or apply them to a selected problem or domain in the context of a term project.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Computer Science (CS-PHD; CS-MS; CSMSBS-MS) or Computer Engineering (COEAS-PHD; COEAS-MS; COEENG-PHD; COEENG-MCO)

### CS 2900 - GRADUATE INTERNSHIP

**Minimum Credits:** 1  
**Maximum Credits:** 1  
A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.  
**Academic Career:** GRAD  
**Course Component:** Internship  
**Grade Component:** Grad SN Basis

### CS 2910 - MS PROJECT

**Minimum Credits:** 1  
**Maximum Credits:** 3  
A project under the supervision of a faculty member or a group of faculty members.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

### CS 2990 - INDEPENDENT STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course involves study which is approved by the faculty adviser but carried out independently by student.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis
CS 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 9
Any adjunct or full member of the graduate faculty of the department may direct doctoral dissertations.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

CS 3001 - RESEARCH METHODS IN COMPUTR SCI
Minimum Credits: 3
Maximum Credits: 3
The course will give students a framework and skills for conducting independent research in cs. The essential steps in defining and conducting research will be discussed, with emphasis on writing research proposals and papers. Both empirical and theoretical research will be discussed, with special attention paid to the nature of empirical and theoretical demonstrations in support of thesis statement. Topics include defining a research topic, writing a research proposal, testing hypotheses, writing and reviewing research papers, presenting ideas, & the ethical conduct of research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3110 - ADV TOPICS THEORY OF COMPUTATN
Minimum Credits: 3
Maximum Credits: 3
A continuation of the study of the theoretical issues of computer science. Topics include computational complexity, determinism versus non-determinism, the p=np question, for mal languages, and inductive inference.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2110

CS 3120 - THEORY OF LEARNING ALGORITHMS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to present fundamental results regarding the learning capabilities of computer programs. Basic results from computation theory, formal languages, automata theory and logic are first presented. These are then used to show the limitations and the capabilities of algorithmic strategies for various learning environments including program synthesis, language acquisition and identification of finite state machines.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2110

CS 3130 - CRYPTOGRPHY: THEORY TO PRACTC
Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to understand and apply various techniques in cryptography to problems in many aspects of computing. Some examples are: login, email, sharing/splitting secrets, digital signatures, and micro-cash. Starting from basic mathematical foundation, such as hardness of some number theoretic problems, the course will cover cryptographic protocols, cryptographic techniques and cryptographic algorithms.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3150 - ADV TOPCS DSGN & ANAL ALGORTHM
Minimum Credits: 3
Maximum Credits: 3
This course covers recent results in the design and analysis of algorithms. The contents change from term to term.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2150
CS 3210 - ADV TOPICS PROGRAMMING LANGS
Minimum Credits: 3
Maximum Credits: 3
Advanced program representations & program analysis techniques for compilers, optimizers, software tools & parallel systems. Analysis techniques include advanced register allocation algorithms, data flow frameworks & techniques, optimizing algorithms & slicing techniques. Program representations include various types of dependence graphs & static single assignment. Analyses & code improving transformations for various types of parallel architectures including VLIW, superscalar, shared memory & distributed memory machines. Current research topics in prog languages.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2210

CS 3220 - COMPILING TECHNQS/PARLEL SYMS
Minimum Credits: 3
Maximum Credits: 3
This course will study techniques used in the design of parallelizing compilers. Techniques for computing dependencies and program representations suitable for parallelizing software will be presented. Topics will include detection of fine and coarse parallelism, program transformations and scheduling techniques to exploit parallelism, on shared and distributed memory architectures, and techniques for debugging parallel software.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2210

CS 3230 - ADVANCED COMPILER TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
Continuation of compiler construction techniques including efficient code generation, register allocation, data flow analysis, and code optimization. Advanced data flow analysis techniques for programming environments and software tools. Current topics in compiler research such as program representations and array analysis techniques for high-performance architectures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2210

CS 3310 - ADV TOPICS/SOFTWARE ENGINRING
Minimum Credits: 3
Maximum Credits: 3
This course will deal with the conversion of software specifications into software products, under particular consideration of testing, quantitative approaches to software quality, and transformational development of software.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2310

CS 3320 - SPECIFCTN & DSGN OF SFTWR SYMS
Minimum Credits: 3
Maximum Credits: 3
Principles of specification, components of a software system; specification and life-cycle models; specification methodologies for programming in the small, specification methodologies for information systems and control systems; the process of specification; validation methodologies; research topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2310

CS 3350 - MODELING AND SIMULATION
Minimum Credits: 3
Maximum Credits: 3
The background justification, definitions, and uses of modeling and simulation are detailed. Topics range from system conceptualization, purposeful representation, and modeling to implementation, validation, and processing of the simulation model. Primary attention is paid to dynamic discrete systems, although continuous systems are also covered. Examples are drawn from a variety of application fields. Methodological approaches are emphasized. Students are required to implement and test a substantial simulation model.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3410 - ADV TOPICS COMPUTER ARCHITECT
Minimum Credits: 3
Maximum Credits: 3
This course will survey current topics in computer architecture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2410

CS 3420 - FAULT TOLERANT PARLEL DISTBD
Minimum Credits: 3
Maximum Credits: 3
This course deals with the study of the principles of fault tolerant computing. Topics include: error detecting and correcting codes, hardware, software and time redundancy techniques, fault tolerant multiprocessors, system diagnosis and fault tolerance software, fault tolerance in distributed and real-time systems and performance and reliability evaluation techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3510 - ADV TOPICS IN OPRATING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
An in-depth study of specific topics of modern operative systems, the theory behind them, and their implementation. Topics may include advanced concepts in distributed systems, multimedia systems, file systems, resource management, distributed shared memory, among others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2510

CS 3520 - ADV TOPICS IN COMPUTR NETWORKS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on advanced topics in high speed, integrated networks. Topics include service and traffic types, traffic characterization, access control and traffic policing, switching, traffic bounds and effective capacity, congestion control strategies, and performance analysis of high-speed integrated networks.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3521 - ADV TOPCS SENSNG/UBIQUIT TEC
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the fundamental issues related to designing and analyzing sensor networks and applications. Topics include but are not limited to: driving applications for sensor nets; wireless networking issues; directed diffusion, aggregation, and data dissemination; power aware routing computing and communication; hardware and software platform and tools.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2520 or TELCOM 2321
CS 3525 - ADVNCD TOPCS SECURTY & PRIVACY
Minimum Credits: 3
Maximum Credits: 3
This course covers current research topics in computer security and privacy. The topics covered will change from term to term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3530 - ADV TOPCS DISTBD REAL-TIME SYS
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the students to the foundations of real-time systems. The emphasis is on understanding predictability and resource management, at the level of the processor, network, memory, disks, i/o devices, etc. Fault tolerance is another main emphasis of the course, since it is a requirement for real-time behavior. Specific real-time fault-tolerant schemes will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3540 - ADV TOPCS CONCUR DISTBD CMPTNG
Minimum Credits: 3
Maximum Credits: 3
Topics will include algorithms and impossibility results concerning mutual exclusion, barrier synchronization, lock free synchronization, fault-tolerance, self-stabilization, and verification of concurrent programs. Other topics to be determined according to the interests of the students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3550 - ADV TOPICS IN MGMNT OF DATA
Minimum Credits: 3
Maximum Credits: 3
The course is devoted to a reevaluation of traditional database techniques and the examination of emerging approaches for the reliable and efficient data management in large distributed systems. Examples of such systems include multi databases, mobile and multimedia databases, and advanced OS and AI. Topics include object management, workflows and extended transactions, semantics-based concurrency control and recovery, active and real-time database techniques. The concepts will be examined within the context of a state-of-the-art system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3551 - ADV TOPICS IN DISTBD INFOR SYS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on emerging technologies for large scale, distributed information systems. Topics to be examined include data and information modeling, heterogeneous data integration, data distribution, caching and replication, web databases, distributed query processing and searching, multimodal access, quality of data, content networks, and pervasive data management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2510 and 2550

CS 3555 - ADV TOPICS IN WEB TECHNOLOGIES
Minimum Credits: 3
Maximum Credits: 3
This course takes a retrospective look on technologies that are used on the web today, with particular emphasis on web data management and emerging technologies. Topics to be examined include information retrieval, information extraction, data integration over the web, quality of data and quality of service, web services, and the mobile web.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
CS 3560 - VISL LANG & VISL PROGRMMING
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of formal language theory, iconic and symbolic representations, formal theory of iconic systems, icon operators, icon semantics, icon-oriented system compiler for visual interface design, computer graphics and visual programming, issues in the design of visual programming systems, visual programming in the future.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3570 - ADV TOPICS IN USER INTERFACE
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3580 - SEM: ADV TOPC PARLEL COMPUTNG
Minimum Credits: 3
Maximum Credits: 3
Different topics related to parallel and systolic computations will be covered at various levels of details. Example of such topics are: architectures of parallel processors and VISI computational networks, languages and programming environments for parallel systems, the design and analysis of parallel and systolic algorithms, reconfigurable and data driven processor arrays, complexity measures of VISI computations, and the application of parallel processors to supercomputing.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

CS 3610 - ADVANCED TOPICS GRAPHICS
Minimum Credits: 3
Maximum Credits: 3
This class covers current topics in computer graphics with an emphasis on interdisciplinary visualization. This course includes reading and discussing current research papers and a final project done in small groups.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: (PROG: Graduate Schools of Arts and Sciences or Engineering) or (PREQ: CS 1566; PROG: Undergraduate Schools of Arts and Sciences or Engineering)

CS 3650 - VISUAL LANGUAGES & PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
This course covers the fundamentals of visual language theory, iconic and symbolic representations, parsing techniques, semantics and pragmatics of visual languages, visual programming systems, visual querying systems, visual information systems and knowledge-based visualization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

CS 3710 - ADV TOPICS ARTIFICIL INTELLGNCE
Minimum Credits: 3
Maximum Credits: 3
This course will survey current topics in artificial intelligence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2710
CS 3720 - ADVANCED TOPICS IN EXPERT SYMS
Minimum Credits: 3
Maximum Credits: 3
A practical course in expert systems involving discussions of fundamentals of building expert systems, discussion of open problems, and designing
and building a prototype expert system.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2710

CS 3730 - ADV TOPCS NATRL LANG PROCSSNG
Minimum Credits: 3
Maximum Credits: 3
Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this
course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more
deply, and to discuss recent advances in (NLP).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2731

CS 3740 - KNOWLEDGE REPRESENTATION
Minimum Credits: 3
Maximum Credits: 3
The course will presuppose familiarity with AI programming techniques and research methods. Specific topics include: logic-based representations,
semantic networks, frame-based representations, rule-based methods, object-oriented methods, conceptual dependency networks, nonmonotonic
reasoning, and specific issues in the representation of casual, temporal, and spatial relations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2710

CS 3750 - ADV TOPICS IN MACHINE LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2750

CS 3790 - PATTERN RECOGNITION
Minimum Credits: 3
Maximum Credits: 3
Emphasis on machine pattern analysis and recognition; decision-theoretic and discriminant approach; parameter estimation and supervised learning;
non-parametric methods; unsupervised learning; clustering; image processing; scene analysis, heuristic and syntactic approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

CS 3900 - PHD DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
The course may involve a project under the supervision of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Critical Care Medicine

CCM 5430 - CRITICAL CARE MEDICINE
Minimum Credits: 0
Maximum Credits: 0
The goal of this elective is to provide a multi-disciplinary experience in care of the critically ill. Rounds conducted each morning result in a plan of treatment for each day. The medical student will participate in all aspects of care of the patients in ICU. Emphasis is placed on bedside titration of care. Recognition and appropriate treatment of respiratory failure, arrhythmias, and hyperalimentation are emphasized. The student participates in cardiopulmonary resuscitations. Students participate in night call.
Academic Career: MEDS
Course Component: Clinical
Grade Component: Grad LG/SU5

CCM 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

CCM 5840 - CRITICAL CRE MEDICINE RESEARCH
Minimum Credits: 0
Maximum Credits: 0
These electives provide opportunities to learn basic research methodology, including approach to experimental design, protocol development, data analysis and evaluation of results. Student participates in ongoing research in the lab and on patients. Opportunities for research in resuscitation high frequency jet ventilation, patient monitoring, hemorheology, brain pathophysiology, and pharmacology of anesthesia-related drugs are available. Many other topics are also possible.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

CCM 5899 - INDEPENDENT STUDY CC MED
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

CCM 5900 - EXTRAMURAL CRITICAL CARE MED
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in critical care medicine may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM catalog with all appropriate approvals to be received before the course may be added to the student's schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Cultural Studies

CLST 2006 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course entails the exploration of a special topic chosen by the instructor.
CLST 2007 - SPECIAL TOPICS IN HUMANITIES
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

CLST 2008 - SPEC TOPICS CULTURAL STUDIES
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD

Dental Anesthesiology

DSANE 2010 - MEDICAL EMERGENCIES
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2020 - INHALATION AND IV SEDATIVES
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
DSANE 2030 - INHALATION AND IV SEDATION 4
Minimum Credits: 1
Maximum Credits: 1
This is the final course in a series of three didactic courses dealing with the philosophy and methods of pain and anxiety control in dentistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2040 - PARENTERAL SEDATION
Minimum Credits: 2
Maximum Credits: 2
This course is the clinical application of DSANE 2020. Participation in this course requires successful completion of the didactic course DSANE 2020. Under the supervision of the anesthesia faculty, students will select and administer the various pain and anxiety control techniques learned in the classroom.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

DSANE 2114 - PATH & MGT OF MEDICAL EMERGNCY
Minimum Credits: 2
Maximum Credits: 2
This course covers the prevention, recognition, and treatment of medical emergencies that can occur in the dental setting. Differential diagnosis is presented according to the presenting signs and symptomatology. Emphasis is placed on the proper office protocol during an emergency, including the assembly of an emergency drug kit. Experience with IV and IM techniques is included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2242 - PRINCIPLES OF ANESTHESIA
Minimum Credits: 2
Maximum Credits: 2
This is the second course in a series of three didactic courses dealing with the philosophy and methods of pain and anxiety control in dentistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 2243 - POSDC MODERATE SEDATION CLINIC
Minimum Credits: 2
Maximum Credits: 2
This course is designed to integrate with the didactic course series dealing with the philosophy and methods of pain and anxiety control in dentistry. In this clinical course, under the supervision of the anesthesia faculty, students will select and administer the various pain and anxiety control techniques learned in the classroom.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

DSANE 2250 - INTRO POSDC MODERATE SEDATION
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide the information needed by the graduate resident to enter the clinical setting to administer intravenous sedation. Basic anesthetic information will be presented including pharmacology, physiology, venopuncture, airway management, and monitoring. The residents will have fundamental knowledge of the concepts of intravenous sedation that will carry them in to the clinic in the following courses.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
DSANE 2260 - POSDC MODERATE SEDATION 1
Minimum Credits: 2
Maximum Credits: 2
The course will foster an appreciation for the important role of pain and anxiety control in dentistry. The resident will demonstrate proficiency in technical aspects of nitrous oxide anxiolysis, conscious sedation, patient management, and the pharmacologic use of medications. All aspects of anesthesia will be undertaken in the clinic. The resident will experience hands-on management of intravenous sedation from pre-operative evaluation to discharge.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

DSANE 2270 - POSDC MODERATE SEDATION 2
Minimum Credits: 2
Maximum Credits: 2
The course will foster an appreciation for the important role of pain and anxiety control in dentistry. The resident will demonstrate proficiency in technical aspects of nitrous oxide anxiolysis, conscious sedation, patient management, and the pharmacologic use of medications. All aspects of anesthesia will be undertaken in the clinic. The resident will experience hands-on management of intravenous sedation from pre-operative evaluation to discharge.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

DSANE 2400 - INTRO ADV ANESTHESIOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
This course introduces advanced techniques in anesthesiology that apply to the dental anesthesiology resident/student entering the initial segment of advanced, post-doctoral training. This didactic instruction is to provide preliminary instruction concerning hospital and out-patient based anesthesiology that will prepare the student/resident for advanced anesthesiology beyond the pre-doctoral level.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

DSANE 2500 - INTRO DENTAL ANESTHESIOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

DSANE 5010 - CLINICAL ANESTHESIOLOGY
Minimum Credits: 0
Maximum Credits: 0
This is a one year under-graduate dental course dealing with the philosophy and methods of pain and anxiety control in dentistry. Concepts of pain and anxiety, as well as, the principles of their psychologic and pharmacologic modifications are explored. Modalities ranging from non-drug and regional analgesic to enteral and parenteral sedative medication techniques are administered by the student under the supervision of the anesthesia faculty. The advantages, disadvantages, and complications associated with these techniques are compared.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

DSANE 5211 - ANESTHESIA 1: LOCAL ANESTHESIA
Minimum Credits: 2
Maximum Credits: 2
A comprehensive course on local anesthesia. Topics include theories of pain, medicolegal considerations, pharmacology of local anesthetics and vasoconstrictors; techniques of local anesthetic administration, armamentarium, complications, and alternative anesthetic techniques.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade
DSANE 5241 - ANESTHESIA 1: LOCAL ANESTHESIA
Minimum Credits: 2
Maximum Credits: 2
A comprehensive course on local anesthesia. Topics include theories of pain, medicolegal considerations, pharmacology of local anesthetics and vasoconstrictors; techniques of local anesthetic administration, armamentarium, complications, and alternative techniques.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 5245 - LOCAL ANESTHESIA TECHNQ LAB
Minimum Credits: 0
Maximum Credits: 0
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5247 - ADV LOCL ANESTHESIA TECHNQ LAB
Minimum Credits: 0
Maximum Credits: 0
This course will foster an appreciation for the important role of local anesthesia in dentistry. The student will demonstrate proficiency in the technical aspects of local anesthetic administration, with particular attention to advanced techniques of local anesthetic administration.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

DSANE 5272 - ANESTHESIA 2: MEDL EMERGENCIES
Minimum Credits: 1
Maximum Credits: 1
This course will familiarize the student with methods of anxiety control and stress reduction techniques. It will provide basic knowledge of pharmacologic sedation regimens and techniques available to the general dentist. A review of prescription writing and analgesic protocol is included.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 5275 - MEDICAL EMERGENCIES LAB
Minimum Credits: 0
Maximum Credits: 0
Academic Career: DMED
Course Component: Practicum
Grade Component: Grad HSU Basis

DSANE 5311 - PATIENT MGT: ENTERAL SEDATION
Minimum Credits: 1
Maximum Credits: 1
This graduate course in clinical medicine is directed to first professional dental students. Utilizing a combination of dental and medical faculty, the course will provide a better understanding of some common medical conditions and their current treatment, preparing graduates with the basis to provide dental care to the growing population of aging patients with complex medical conditions in conjunction with their physician colleagues.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 5312 - ANESTHESIA 2
Minimum Credits: 1
Maximum Credits: 1
This course will familiarize the student with methods of anxiety control and stress reduction techniques. It will provide basic knowledge of pharmacologic sedation regimens and techniques available to the general dentist. A review of prescription writing and analgesic protocol is included.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DSANE 5313 - ANES 3: PAIN & ANXIETY CONTROL
Minimum Credits: 1
Maximum Credits: 1
The course material is designed to familiarize the student with methods of pharmacologic management of pain and anxiety. Prescription writing and regulations are presented along with appropriate analgesic prescribing guidelines. The pharmacological management of anxiety includes the clinical application of nitrous oxide sedation, drugs routinely prescribed, and exposure to intravenous conscious sedation. Appropriate patient management with respect to pain anxiety control is stressed.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

## Dental Biochemistry

### DSBIOC 5110 - DENTAL BIOCHEMISTRY
- **Minimum Credits:** 5  
- **Maximum Credits:** 5  

The objectives of this course are to familiarize the student with normal biochemical processes and their roles in the maintenance of homeostasis. The first part of the course deals with the chemical structures and composition of the building blocks of important body constituents. The second part will focus on the mechanisms of reactions and regulations of metabolic pathways. The consequences of deviation from normal metabolic processes will also be discussed. Emphasis is placed on processes occurring in the oral cavity.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

### DSBIOC 5117 - PRECLINICAL PBL
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

The overall goal of the PBL seminar is to discuss clinical dental conditions which utilize and build on the concepts and principles that are being studied in the base basic science course. These discussions will emphasize how basic science concepts can be used in solving clinical problems; promote active learning and development of problem-solving skills; and enhance the communication and interpersonal skills of the students.

**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

## Dental Microbiology

### DSMIC 2010 - MASTER'S RESEARCH AND THESIS
- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

The objectives of this course are to familiarize students with research techniques, problem solving and hypothesis proving approaches, and the write-up of a ms thesis. The students will carry out a research project under the supervision of a faculty advisor. At the conclusion of the research, the students will write-up a master's degree thesis under the guidance of the advisor. Upon completion of the writing, the students must successfully
defend the thesis in a thesis committee meeting.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

DSMIC 2030 - MICROBIOLOGY SEMINAR
Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to familiarize students with current developments and findings in various fields of microbiology. The students will also learn to present and defend a finding reported by other workers.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

DSMIC 2040 - ADVANCED MICROBIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course discusses medical microbiology topics which are of special concern to practicing dentists, including the control of microbial growth, sterilization procedures and infection control procedures for dental offices, antimicrobial drugs, mechanisms of antibiotic resistance, the microbial etiology and role of the host response in the pathogenesis of caries, periodontal diseases and pulpal and periapical infections. The role of diet and nutrition in dental diseases is also discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSMIC 2240 - ADV BIOCHEM MICRO & IMMUNOLOGY
Minimum Credits: 2
Maximum Credits: 2
The course will deal with advanced topics in biochemistry, molecular biology, microbiology, immunology, and nutrition as related to oral health.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSMIC 2281 - PATHOBIOLOGY 1
Minimum Credits: 2
Maximum Credits: 2
This course explores topics in basic cell biology, immunology and biochemistry as they relate to oral diseases and health. The contents address current issues related to different specialties of dentistry to provide: (1) relevance of cell sciences in understanding of the oral and systemic disease processes, (2) the ability to comprehend current and future issues pertaining to oral diseases in the literature, and (3) background knowledge required for specialty boards. The course will consist of two hours of lectures and one hour of discussion session every week.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DSMIC 3010 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 3
The students will carry out a research project under the supervision of his or her major advisor. The findings will be used by the student to write-up his or her Ph.D. thesis. Periodic meetings of the student and his or her thesis committee will be held to monitor the progress in research and resolve the difficulty encountered. At the conclusion of the research, the student must write-up a Ph.D. thesis and successfully defend his or her thesis in a thesis committee meeting.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

DSMIC 3061 - SPECIAL WORK 1
Minimum Credits: 1
Maximum Credits: 3
The student will carry out a research project under the supervision of a faculty advisor. The findings obtained can be used to write-up his or her thesis for advanced degree.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade

**DSMIC 3062 - SPECIAL WORK 2**  
Minimum Credits: 1  
Maximum Credits: 3  
The student will carry out a research project under the supervision of a faculty advisor. The findings obtained can be used to write-up his or her thesis for advanced degree.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade

**DSMIC 3063 - SPECIAL WORK 3**  
Minimum Credits: 1  
Maximum Credits: 3  
The student will carry out a research project under the supervision of a faculty advisor. The findings obtained can be used to write-up his or her thesis for advanced degree.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis

**DSMIC 5040 - IMMUNOLOGY ORAL FACIAL COMPLEX**  
Minimum Credits: 0  
Maximum Credits: 0  
This course uses literature reviews, student presentations, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections. Microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies, autoimmune diseases and immunodeficiency disorders will also be discussed.  
**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**DSMIC 5212 - DENTAL MICROBIOLOGY**  
Minimum Credits: 5  
Maximum Credits: 5  
This course is designed to familiarize dental students with infectious disease processes in man and the effect of microorganisms on the oral cavity. The principles of bacteriology, medical microbiology, and immunology serve as the basis upon which the student will build his or her understanding.  
**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DSMIC 5226 - DENTAL MICROBIOLOGY LABORATORY**  
Minimum Credits: 0  
Maximum Credits: 0  
Content is devoted to the development of basic laboratory skills and application of microbiological methods with emphasis on performance, scientific investigation and safety.  
**Academic Career:** DMED  
**Course Component:** Practicum  
**Grade Component:** No Grade Required

**DSMIC 5240 - NUTRITION**  
Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to give the second year dental student a practical approach to contemporary nutrition. Both the dietary and biochemical aspects of nutrition will be emphasized. The course will provide the basic principles of good nutrition and how chronic and, in some cases, acute
violation of these principles will contribute to the etiology and progression of oral disease.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DSMIC 5817 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

DSMIC 5847 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.
Academic Career: DMED
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

DSMIC 5900 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
This course is designed to provide the student with an opportunity to conduct in-depth study in a particular subject area of their choice.
Academic Career: DMED
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

DSMIC 5911 - IMMUNOLOGY ORAL FACIAL COMPLEX
Minimum Credits: 1
Maximum Credits: 1
This course uses literature reviews, student presentations, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections. Microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies, autoimmune diseases and immunodeficiency disorders will also be discussed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

DSMIC 5940 - IMMUNOLOGY ORAL FACIAL COMPLEX
Minimum Credits: 0
Maximum Credits: 0
This course uses literature reviews, student presentations, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections. Microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies, autoimmune diseases and immunodeficiency disorders will also be discussed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

DSMIC 5941 - IMMUNOLOGY ORAL FACIAL COMPLEX
Minimum Credits: 1
Maximum Credits: 1
This course uses literature reviews, student presentation, discussions and demonstrations to review the role of microorganisms and host immune responses in the pathogenesis of caries, periodontal diseases and periapical infections. Microbial and immunological factors affecting bone formation, tooth transplantation, bone implants, and the dental management of patients with allergies, autoimmune diseases and immunodeficiency disorders will also be discussed.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**Dental Physiology**

**DSPHL 2050 - PHYSIOLOGICAL PHARMACOLOGY 2**
Minimum Credits: 2
Maximum Credits: 2
The basis for dental therapeutics is presented in this graduate course. The course emphasizes the elements of controlled trials by critiquing published articles relevant to dental therapeutics. Pharmacologic agents of interest include local anesthetics, nonsteroidal anti-inflammatory analgesic drugs, opioid analgesics, sedatives and hypnotics and antibiotics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**DSPHL 2100 - GRADUATE PHARMACOLOGY**
Minimum Credits: 3
Maximum Credits: 3
This course is designed primarily for graduate students in the health sciences who require an appreciation of pharmacology in their careers. The one term course defines basic principles of drug action, drug disposition and pharmacokinetics. Specific areas of discussion include central nervous system, cardiovascular, respiratory, gastrointestinal and endocrine pharmacology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**DSPHL 2140 - PHYSIOLOGICAL PHARMACOLOGY 1**
Minimum Credits: 2
Maximum Credits: 2
This course is primarily for specialty residents in the various dental specialty programs. It provides an opportunity to become more knowledgeable about physiological principles and pharmacological effects on the functional systems of the body. This will provide the students with a better understanding of the clinical use of drugs not only in conjunction with dental treatment but also as being used by other health professionals in comprehensive health care.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**DSPHL 2214 - ORAL BIO CLIN DENT RES SEM 1**
Minimum Credits: 0.5
Maximum Credits: 0.5
This seminar series presents current research topics in dentistry. Topics focus on oral diseases and therapies. Research design and data management problems are emphasized. Active national dentist-scientist are invited to present in their areas of expertise.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

**DSPHL 2224 - GRADUATE PHYS PHARM**
Minimum Credits: 1
Maximum Credits: 1
This course is primarily for specialty residents in the various dental specialty programs. It provides an opportunity to become more knowledgeable about physiological principles and pharmacological effects on the functional systems of the body. This will provide students with a better understanding of the clinical use of drugs not only in conjunction with dental treatment but also as being used by other health professionals in comprehensive health care.
comprehensive health care.

**DSPHL 2243 - SCI BASIS FOR CLIN THERPUTCS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The basis for dental therapeutics is presented in this graduate course. The course emphasizes the elements of controlled trials by critiquing published articles relevant to dental therapeutics. Pharmacologic agents of interest include local anesthetics, nonsteroidal anti-inflammatory analgesic drugs, opioid analgesics, sedatives/hypnotics and antibiotics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DSPHL 2244 - ORAL BIO CLIN DENT RES SEM 2**  
**Minimum Credits:** 0.5  
**Maximum Credits:** 0.5  
This is a continuation of oral biology/clinical dentistry research seminar 1.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**DSPHL 5140 - DRUG INTERACTION**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective course presents and evaluates drug vs drug, drug vs patient and drug vs treatment interactions relevant to dental therapy. The course structure requires students to evaluate specific cases and plan appropriate pharmacologic management.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**DSPHL 5180 - HUMAN PHYSIOLOGY**  
**Minimum Credits:** 5  
**Maximum Credits:** 5  
Course lectures are organized by organ systems. Topics include the following systems: nervous, skeletal, cardiovascular, respiratory, renal, gastrointestinal and endocrine.

**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DSPHL 5187 - HUMAN PHYSIOLOGY PBL SEMINAR**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The overall goal of the PBL seminar is to discuss clinical dental conditions which utilize and build on the concepts and principles that are being studied in the base basic science course. These discussions will emphasize how basic science concepts can be used in solving clinical problems; promote active learning and development of problem-solving skills; and enhance the communication and interpersonal skills of the student.

**Academic Career:** DMED  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**DSPHL 5214 - PHARMACOLOGY AND THERAPEUTICS**  
**Minimum Credits:** 5  
**Maximum Credits:** 5  
Topics include analgesics, antibiotics, antihistamines, autonomic drugs, CNS drugs, cardiovascular drugs, digestive pharmacology, drug abuse, drug laws, hypoglycemic, principles of drug action and reproductive pharmacology.

**Academic Career:** DMED
**DSPHL 5911 - DRUG INTERACTIONS**
Minimum Credits: 1
Maximum Credits: 1
This elective course presents and evaluates drug vs drug, drug vs patient and drug vs treatment interactions relevant to dental therapy. The course structure requires students to evaluate specific cases and to plan appropriate pharmacologic management.
**Academic Career:** DMED
**Course Component:** Directed Studies
**Grade Component:** Grad LG/SU3 Basis

**DSPHL 5940 - DRUG INTERACTION**
Minimum Credits: 0
Maximum Credits: 0
This elective course presents and evaluates drug vs drug, drug vs patient and drug vs treatment interactions relevant to dental therapy. The course structure requires students to evaluate specific cases and plan appropriate pharmacologic management.
**Academic Career:** DMED
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

**Dentistry**

**DENT 2000 - RESEARCH & THESIS: MDS DEGREE**
Minimum Credits: 1
Maximum Credits: 3
This is a research offering provided for students in graduate programs at the school of dental medicine pursuing a masters in dental science degree. These credits are provided for thesis research supervised by the chair of the students' MDS thesis committee.
**Academic Career:** GRAD
**Course Component:** Thesis Research
**Grade Component:** Grad SN Basis

**DENT 2001 - FULL-TIME GRAD DENT MED STUDY**
Minimum Credits: 0
Maximum Credits: 0
Students who are working full-time in a school of dental medicine graduate program may register for this course.
**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad HSU Basis

**DENT 2019 - GRADUATE PATIENT CARE**
Minimum Credits: 0
Maximum Credits: 0
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
**Academic Career:** GRAD
**Course Component:** Clinical
**Grade Component:** Grad HSU Basis

**DENT 2049 - GRADUATE PATIENT CARE**
Minimum Credits: 0
Maximum Credits: 0
This course will provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of dentistry.
**Academic Career:** GRAD
**Course Component:** Clinical
**Grade Component:** Grad LG/SNC Basis
DENT 2100 - RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to introduce the student to the principles of research methodology, as they apply to dentistry. Major emphasis is placed upon research design, the selection of appropriate statistical procedures for data analysis and the interpretation of the results of inferential statistical tests. Students critically analyze the published literature on the basis of the design and statistical procedures employed and develop a research protocol suitable for expansion into a master's thesis proposal.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 2110 - DENTAL STATISTICS
Minimum Credits: 2
Maximum Credits: 2
The focus of this course will be applied and, as such, students will be required to employ statistical software packages for the analysis of dentally relevant data files. Students will be encouraged to develop, collect, encode and analyze their own data sets. Particular emphasis will be placed on analysis of variance techniques involving repeated measures and factorial designs. The interpretation of computer printouts will be paramount. A very brief introduction to the concept of multivariate analysis will also be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 2111 - GERONTOLGY - PERSPECTV IN AGING
Minimum Credits: 3
Maximum Credits: 3
This course will examine aging phenomena by focusing on six themes: life span development, person-environment interaction, optimal quality of life, cross-cultural considerations, how aging is studied, and access to resources in a new age.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

DENT 2112 - DENTAL RESEARCH DESIGN & METHD
Minimum Credits: 2
Maximum Credits: 2
Students will be introduced to the concepts of research design and epidemiological research. Emphasis will be given to the area of clinical epidemiology so that students will understand how clinical research becomes the foundation for clinical practice. Various systems employed for classifying types of research will be presented including both biological and behavioral sciences approaches. Particular emphasis will be placed on the proper design of clinical trials, research paradigms and various methods that can be employed to control for sources of extraneous variance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 2119 - GRADUATE PROSTH PATIENT CARE
Minimum Credits: 0
Maximum Credits: 0
This course serves to provide patient care opportunities in a clinical setting under direct faculty supervision. Treatment procedures will include all aspects of prosthodontics.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 2130 - APPLIED HEAD AND NECK ANATOMY
Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce graduate students in clinical specialties to applied (surgical) head and neck anatomy. The course is comprised of didactic and dissection components, in addition to required readings. The dissection portion is planned to meet the specific needs of the various clinical specialties.
Academic Career: GRAD
DENT 2131 - HOSPITAL PROTOCOL/PHYSICAL DIAGNOSIS
Minimum Credits: 1
Maximum Credits: 1
This course is designed to familiarize graduate students with hospital protocols, admission procedures, and operating room procedures. In addition, physical diagnostic procedures will be detained.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

DENT 2140 - CRITICAL REVIEW OF LITERATURE
Minimum Credits: 1
Maximum Credits: 1
Sources of dental research information will be presented. Students will be able to skillfully perform a search of literature. Based on an integration of a graduate level of knowledge of dental medicine and research methodology, objective appraisal standards and techniques will be presented to enable the student to conduct critical reviews. Students will prepare and present written abstracts and critiques of published reports. Students will be able to employ research evaluation instruments including the research report evaluation scale.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 2183 - SCIENTIFIC WRITING
Minimum Credits: 1
Maximum Credits: 1
The component parts of the research paper will be presented and the differences between writing for the thesis or dissertation and a journal manuscript will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 2192 - CHEMICAL DEPENDENCY
Minimum Credits: 0.5
Maximum Credits: 0.5
The purpose of this course is to inform graduate students about substance abuse/chemical dependency; its impact on dental care and the lives of chemically dependent dentists, dental students and their families; make students aware of laws regulating use of drugs, of risk factors and abuse potential of drugs prescribed in practice; present current concepts of the etiology of the disease and provide the knowledge and skills to recognize and manage the chemically dependent patient; inform the dentist of the state and local assistance programs for the chemically dependent dentist.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 2194 - INTRODUCTION TO COMPUTING
Minimum Credits: 1
Maximum Credits: 1
This course will introduce students to both mainframe and micro computing. Students will be instructed in the use of PITTCat and grateful med as well as the university's electronic mail system. P software instruction will be given in word processing, spreadsheet, and database application programs. Additionally, students will be introduced to specialized dental/medical applications such as digitizing radiographs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

DENT 2201 - MASTERS RESEARCH 1
Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of
research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2202 - MASTERS RESEARCH 2
Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2203 - MASTERS RESEARCH 3
Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

DENT 2204 - MASTERS RESEARCH 4
Minimum Credits: 1
Maximum Credits: 3
The master's research course series is designed to provide guidance, structure and support to the graduate student in the advanced education programs at the SDM in their course of study toward fulfilling the research requirement for a master of dental science degree. The school's associate dean of research, the student's research mentor and the student will identify a research topic, form a research committee, complete a literature review and research proposal, gain SRC and IRB approval, complete data collection, analyze data and submit a final thesis and scientific paper for peer review.

DENT 2910 - INTRO TRANSLATIONAL RESEARCH
Minimum Credits: 2
Maximum Credits: 2
This course will provide students with a comprehensive survey of the processes involved in transLating research discoveries into practices that promote health and prevent disease. The specific topics to be covered are listed in the lecture schedule (attached) and include the implementation of new therapies as standards of care and the application of innovative preventative services. Various research methodologies, including those encompassed in the drug development process, will be discussed. The course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

### DENT 5173 - HLTH PROMOTION DS PREVENTION 3
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is the third of a three course series which collectively helps to prepare the student for clinical dental practice by introducing important concepts and developing skills required for the provision of effective dental care. Students explore concepts in health promotion and disease prevention, ethical and behavioral principles related to clinical practice and are also provided with a foundation in evidence-based dentistry. Students continue to examine the nature of oral health and disease. All of these concepts are developed and reinforced through the use of readings, pre-clinical and clinical assignments and case presentations that require integration of the concepts and effective demonstration of the skills as they apply to patient care.  
**Academic Career:** DMED
DENT 5178 - QUALITIES OF A GEN DENTIST 3
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

This course will prepare the student to apply diagnostic concepts to treatment planning. It will instruct the student in methodology, leading from the patient's history, and examination findings, to development of an appropriately, sequenced, comprehensive treatment plan, encompassing ideal, as well as reasonable options.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5211 - DIAGNOSIS & TREATMENT PLANNING 1
Minimum Credits: 1
Maximum Credits: 1
This course will prepare the student to apply diagnostic concepts to treatment planning. It will instruct the student in methodology, leading from the patient's history, and examination findings, to development of an appropriately, sequenced, comprehensive treatment plan, encompassing ideal, as well as reasonable options.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

DENT 5218 - QUALITIES OF A GEN DENTIST 4
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5241 - OCCLUSAL 2 - DEVELOPMENT OF DENTITION
Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to provide students with the ability to recognize and describe the normal pattern of growth and development of the dentition of a child from birth through the primary dentition and into the early permanent dentition. Treatment modalities for abnormal development at the various dental stages are discussed.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 5242 - DIAGNOSIS & TREATMENT PLANNING 2
Minimum Credits: 1
Maximum Credits: 1
This course will provide the second year dental student with the ability to successfully perform in the primary care clinic. Specifically, the student will become competent in addressing the patient's chief complaint with consideration to the following: medical history/physical status determination, soft tissue examination, radiologic interpretation and appropriate treatment planning.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DENT 5248 - QUALITIES OF A GEN DENTIST 5
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

DENT 5278 - QUALITIES OF A GEN DENTIST 6
Minimum Credits: 1
Maximum Credits: 1
DENT 5283 - DIAGNOSIS TREATMENT PLANNING 3
Minimum Credits: 2
Maximum Credits: 2
This course provides an opportunity for the second year student to apply foundational knowledge in diagnosis and treatment planning to a patient case. The student will work as part of a group to assess, diagnose, treatment plan and present a case to faculty and peers. In addition, the student will practice presenting a treatment plan to a patient through the use of a standardized patient experience.

DENT 5310 - SPECIAL NEEDS DENTISTRY
Minimum Credits: 1
Maximum Credits: 1
The goals of this course are to introduce the dental/dental hygiene student to common developmental and acquired disabling conditions and issues related to the dental care of patients with special needs. The material presented will aid the student in assessing, planning, implementing and monitoring treatment for the patient with special needs.

DENT 5313 - ONGOING PERFORMANCE EVALUATION 1
Minimum Credits: 2
Maximum Credits: 2
As first- and second-year students, the Global Assessment (GA) program at the University of Pittsburgh School of Dental Medicine (SDM) helps provide guidance and learning opportunities for predoctoral students to grow and develop the knowledge, skills and values related to professional and ethical decision-making. The GA program utilizes a two-pronged approach: 1) The Qualities of a General Dentist (QGD) course series tracks the students ability to meet the professional and ethical expectations of developing health professionals as they progress through all terms of the four-year curriculum. 2) The Ongoing Performance Evaluation (OPE) course series tracks third- and fourth-year students ability to meet the expected clinical quality care standards, in addition to monitoring their clinical productivity as they provide services to their assigned patients outside rotations. The primary goal of the Ongoing Performance Evaluation (OPE) course series is to follow and assess student clinical progression each term in the third and fourth years of the predoctoral program. The foundation of this course recognizes that the primary goal of the predoctoral dental program is to provide a teaching and learning platform that allows the student to gain the knowledge, skills and values to competently perform as an entry-level general dentist. In doing so, the student is expected to gain clinical experience and advance through the clinical curriculum as s/he provides dental services to SDM patients. It is an expectation of the school that each student will work beyond minimal requirements and subsequent departmental competencies continuing to gain experience and knowledge each semester until graduation, thereby allowing his/her skills to improve.

DENT 5318 - QUALITIES OF A GEN DENTIST 7
Minimum Credits: 1
Maximum Credits: 1

DENT 5321 - CLN ORL DIAG & TRMNT PLANNG 1
Minimum Credits: 2
Maximum Credits: 2
This course will prepare the student to conduct comprehensive patient evaluations. This will include obtaining and interpreting medical, dental and medication histories, assessment of the patient's health status; and identifying indications for modifying dental treatment. Emphasis will be placed on obtaining historical information from patients, diagnostic testing and radiologic examination in the development of a differential diagnosis and a prioritized treatment plan.
DENT 5344 - SPECIAL NEEDS CLN DENTISTRY 1
Minimum Credits: 2
Maximum Credits: 2
Special needs clinical dentistry 3
Academic Career: DMED
Course Component: Clinical

Grade Component: Grad HSU Basis

DENT 5383 - CLN ORL DIAG & TRMNT PLANNG 1
Minimum Credits: 2
Maximum Credits: 2
This course will prepare the student to conduct comprehensive patient evaluations. This will include obtaining and interpreting medical, dental and medication histories; assessment of the patient's health status; and identifying indications for modifying dental treatment. Emphasis will be placed on obtaining historical information from patients, diagnostic testing and radiologic examination in the development of a differential diagnosis and a prioritized treatment plan.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Grad Letter Grade

**DENT 5388 - CLINICAL SPECIAL NEEDS DENTISTRY 1**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed to provide clinical experiences in the area of special needs dentistry for pre-doctoral dental students. By the end of the third year of the curriculum, students will be able to demonstrate competence in assessing the needs of and in providing care to dental patients with special needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with special needs.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Letter GRD

**DENT 5393 - ONGOING PERFORMNC EVALUATION 3**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
As first- and second-year students, the Global Assessment (GA) program at the University of Pittsburgh School of Dental Medicine (SDM) helps provide guidance and learning opportunities for predoctoral students to grow and develop the knowledge, skills and values related to professional and ethical decision-making. The GA program utilizes a two-pronged approach: 1) The Qualities of a General Dentist (QGD) course series tracks the students ability to meet the professional and ethical expectations of developing health professionals as they progress through all terms of the four-year curriculum. 2) The Ongoing Performance Evaluation (OPE) course series tracks third- and fourth-year students ability to meet the expected clinical quality care standards, in addition to monitoring their clinical productivity as they provide services to their assigned patients outside rotations. The primary goal of the Ongoing Performance Evaluation (OPE) course series is to follow and assess student clinical progression each term in the third and fourth years of the predoctoral program. The foundation of this course recognizes that the primary goal of the predoctoral dental program is to provide a teaching and learning platform that allows the student to gain the knowledge, skills and values to competently perform as an entry-level general dentist. In doing so, the student is expected to gain clinical experience and advance through the clinical curriculum as s/he provides dental services to SDM patients. It is an expectation of the school that each student will work beyond minimal requirements and subsequent departmental competencies, continuing to gain experience and knowledge each semester until graduation, thereby allowing his/her skills to improve.

**Academic Career:** DMED  
**Course Component:** Clinical  
**Grade Component:** Letter GRD

**DENT 5413 - ONGOING PERFORMANCE EVALUATION 4**  
**Minimum Credits:** 2  
**Maximum Credits:** 2

Dermatology

DERM 5380 - DERMATOLOGY CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
This elective emphasizes clinical dermatology. The student will participate in the outpatient clinics at Flak Clinic, Children's Hospital and the VA Hospital. These activities will be complemented by grand rounds, kodachrome conference, dermatopathy conference, and journal club conference. There are lectures in the basic sciences.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

DERM 5420 - BASIC DERMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
This elective emphasizes clinical dermatology. The student will participate in our outpatient clinics at Falk Clinic, Children's Hosp, and the VA Hosp. In addition, the student may participate with hospital consultations, clinical therapeutic trials, the pigmented lesion and melanoma program, the cutaneous ulceration and rehabilitation, and the technique of Mohm's microscopic-controlled excision of skin cancer. These activities will be complemented by weekly grand rounds, Kodachrome conf, dermatopath conf, and journal club conf. There are weekly lectures in basic sciences.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

DERM 5425 - ADVANCED DERMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
Students are expected to develop skills necessary to independently complete a history and physical examination, identify required laboratory studies, develop a rationale differential diagnosis, and articulate and defend an appropriate treatment plan. The didactic portion will include regular participation in all dermatology department conferences and didactic sessions, and a weekly lecture and q and a session with the course director. Students are expected to formally present one patient at grand rounds and are encouraged to write a case report for publication. Evaluation is based on an exam given on the last day of the elective as well as clinical performance.
Academic Career: MEDS
Course Component: Clinical
Grade Component: Grad LG/SU5

DERM 5430 - DERMATOLOGIC & PLASTIC SURGERY
Minimum Credits: 0
Maximum Credits: 0
This elective will split time with plastic surgery and dermatology. Such an exposure will provide the optimal learning experience in cutaneous surgery.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U
DERM 5440 - DERMATOPATHOLOGY
Minimum Credits: 0
Maximum Credits: 0
Interact with dermatology and pathology residents as well as dermatopathology fellows and participate in lectures and weekly grand rounds. Participation in case review and sign out sessions. Additional slides available for optional independent study. Independently study at microscope available. Students attempt diagnosis of cases & present them to faculty. Students gain understanding of skin as a separate organ having unique pathobiologic responses. Acquire adequate diagnostic proficiency with response processes seen in dermatopathology. Final evaluation on overall performance.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

DERM 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of dermatology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

DERM 5810 - DERMATOLOGY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Research projects in dermatology are available to interested and motivated students. Project areas include 1) various aspects of wound healing; 2) skin microbiology; 3) biological behavior and causes of skin cancer; 4) dermal biochemistry; 5) epidermal cell biology; 6) clinical studies; 7) mycosis fun guides and immune modulation; 8) scleroderma fibroblast study; 9) pigmented lesions and cutaneous immunology. These activities will be complemented by departmental conferences. At the end of the project, the student will present a seminar on his/her results.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

DERM 5899 - INDEPENDENT STUDY DERMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

DERM 5900 - EXTRAMURAL DERMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in dermatology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Diagnostic Sciences

DIASC1 2110 - ADVANCED ORAL PATHOLOGY 1
The purpose of this course in oral pathology is to provide the student a logical approach to the differential diagnosis of oral lesions. The definitive information necessary for the establishment of a final diagnosis is then provided. The course consists of a series of lectures augmented by laboratory sessions and clinical pathologic conferences.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**DIASCI 2140 - ADVANCED IMAGING**  
Minimum Credits: 1  
Maximum Credits: 1  
The course on advanced imaging reinforces the importance of right way of using technology and understanding the usage of advanced techniques like CT, MRI and ultrasound in dentistry. It also helps them to understand the digital radiography and its advantages and disadvantages over the film based technique. It helps them to choose appropriate imaging modality for treatment planning for procedures like implants. The diagnostic part of the course should help residents in describing, interpreting and developing most relevant differential diagnosis for the systemic and bone pathology that is seen on the radiographs. Literature component of the course will help them in knowing the latest research in the field and promotes ideas to develop research integrating imaging.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DIASCI 2142 - ADVANCED ORAL PATHOLOGY 2**  
Minimum Credits: 1  
Maximum Credits: 1  
This conference provides the essential information for histologic diagnosis of oral pathologies. This individualized program provides concentrated instruction in the microscopic aspects of those oral diseases related to the specific clinical specialty in which the resident is enrolled.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**DIASCI 2191 - PATHOBIOLOGY 1**  
Minimum Credits: 2  
Maximum Credits: 2  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DIASCI 2282 - PATHOBIOLOGY 2**  
Minimum Credits: 2  
Maximum Credits: 2  
Applied pathobiology provides the venue wherein residents apply pathobiology to their field of specialization. Utilizing an investigative approach, residents identify a topic of interest and demonstrate by means of a powerpoint presentation pathobiological concepts as they apply to patient care.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**DIASCI 5170 - GENERAL & SYSTEMIC PATHOLOGY**  
Minimum Credits: 5  
Maximum Credits: 5  
This course is organized to present the pathologic processes which underlie a variety of human disease states. Topics in general pathology include cell injury and cell death, inflammation and repair, hemodynamic disorders, neoplasia, and autoimmune, environmental, genetic, and pediatric diseases. Topics in systemic pathology include disease of vasculature, heart, kidneys, lungs, and blood. Oral implications of systemic disease are introduced.  
**Academic Career:** DMED  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
DIASCI 5211 - INT RAD PHYSICS & BASIC INTPT
Minimum Credits: 1
Maximum Credits: 1
This course provides the student with the theoretical knowledge required to achieve a working knowledge of the radiologic sciences as they apply to dentistry. Also included will be concepts of radiation safety and radiation biology. An introduction to normal radiographic anatomy and the radiographic aspects of dental pathology will be included.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

DIASCI 5212 - ORAL & MAXILLOFACIAL PATHOLOGY
Minimum Credits: 4
Maximum Credits: 4
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DIASCI 5240 - ORAL & MAXILLOFACIAL PATHOLOGY
Minimum Credits: 4
Maximum Credits: 4
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DIASCI 5241 - RADOLOGY, IMAGING & INTRPRTN 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

DIASCI 5243 - RADOLOGY 1
Minimum Credits: 2
Maximum Credits: 2
This course provides the student with the theoretical knowledge required to achieve a working knowledge of the radiologic sciences as they apply to dentistry. Also included will be concepts of radiation safety and radiation biology. An introduction to normal radiographic anatomy and the radiographic aspects of dental pathology will be included.
Academic Career: DMED
Course Component: Lecture
Grade Component: Grad HSU Basis

DIASCI 5319 - CLINICAL RADOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
This course is designed to allow the student to acquire the skills for performing intraoral and panoramic dental radiographic examinations. The student will demonstrate these skills first on mannequins and develop them doing radiographic examinations on patients. The student will also be taught to recognize and correct common imaging and processing errors encountered in dental radiography. The student will also be introduced to other maxillofacial imaging techniques as patient needs permit.
Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

DIASCI 5320 - MGMNT OF DENTAL EMERGENCIES
Minimum Credits: 1
Maximum Credits: 1
The goal of this course is to introduce the third year student to the principles and concepts of the management of dental emergencies. This course will focus on the modifications for examination, diagnosis and treatment of the dental emergency patient.
DIASCI 5329 - EMERGENCY CLINIC ROTATION 1
Minimum Credits: 1
Maximum Credits: 1
This course will provide the third year dental student with the opportunities to evaluate, diagnose, and manage patients requiring immediate intervention.

DIASCI 5341 - SEMS IN ORL PATH & ORAL MEDICN
Minimum Credits: 1
Maximum Credits: 1
This course will help students develop diagnostic and management skills as they pertain to oral and maxillofacial pathology by building on the basic knowledge acquired in systemic and oral pathology. This course will focus on the recognition, description and management of clinical and radiographic entities which is encountered by general dentists. The course format will be clinical-pathologic correlations (CPCS) seminars. The students will be provided with cases to review.

DIASCI 5342 - PRACTICE ADMINISTRATION
Minimum Credits: 2
Maximum Credits: 2

DIASCI 5359 - CLINICAL RADIOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
This course is designed to allow the student to acquire the skills for performing intraoral and panoramic dental radiographic examinations. The student will demonstrate these skills first on mannequins and develop them doing radiographic examinations on patients. The student will also be taught to recognize and correct common imaging and processing errors encountered in dental radiography. The student will also be introduced to other maxillofacial imaging techniques as patient needs permit.

DIASCI 5369 - EMERGENCY CLINIC ROTATION 2
Minimum Credits: 1
Maximum Credits: 1
This course will provide the students the opportunity to evaluate, diagnose, treat or manage patients requiring immediate intervention.

DIASCI 5373 - ORAL RADIOLOGY
Minimum Credits: 1
Maximum Credits: 1
The series of topics on radiographic diagnosis and case presentations are designed to reinforce the concept that radiographic data assists in the assignment of patient abnormalities into general categories of conditions: developmental, trauma, inflammation, and neoplasia. The course aims at teaching students to recognize normal anatomy from pathology on radiographs when conditions other than caries and periodontitis are present. Students will develop the skill to recognize and describe the radiographic abnormalities in a precise way and the critical thinking necessary analyze findings and develop a short and relevant differential diagnosis. The students should also be able to defend their radiographic diagnosis using
evidence-based scientific knowledge. This type of presentation is meant to simulate a private practice setting, where a dentist may encounter a variety of pathology on radiographs and must be able to formulate a relevant diagnosis in order to manage the patient appropriately. The pathology component of the case presentations will help in understanding the disease process and will help students correlate with radiographic findings.

Academic Career: DMED
Course Component: Lecture
Grade Component: Grad Letter Grade

**DIASCI 5388 - CLINICAL RADIOLOGY 3**
- Minimum Credits: 1
- Maximum Credits: 1
The oral and maxillofacial radiology clinical rotation provides the clinical environment for students to become competent in the technical and clinical aspects of radiographic procedures. Acquisition of radiographs and critiquing will constitute the bulk of this course. In addition, students will be required to acquire at least 5 panoramic or other extra-oral radiographs by the end of the term.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

**DIASCI 5389 - CLINICAL EMERGENCY ROTATION 1**
- Minimum Credits: 2
- Maximum Credits: 2

**DIASCI 5419 - EMERGENCY CLINIC ROTATION 4**
- Minimum Credits: 1
- Maximum Credits: 1
This course will provide the fourth year dental student with additional opportunities to evaluate, diagnose, and manage patients requiring immediate intervention in a more self-guided environment.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

**DIASCI 5459 - CLINICAL RADIOLOGY**
- Minimum Credits: 3
- Maximum Credits: 3

**DIASCI 5469 - EMERGENCY CLINIC ROTATION 5**
- Minimum Credits: 0
- Maximum Credits: 0
This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring immediate intervention.

Academic Career: DMED
Course Component: Clinical
Grade Component: Grad HSU Basis

**DIASCI 5877 - DIRECTED STUDY**
- Minimum Credits: 1
- Maximum Credits: 3

**DIASCI 5900 - INDEPENDENT STUDY**
This course provides the student with the opportunity to independently originate, organize and complete a scientific investigation on a topic in dentistry.

**Academic Career:** DMED

East Asian Languages & Literature

EAS 2000 - RESEARCH AND THESIS MA DEGREE
Minimum Credits: 1
Maximum Credits: 6
Preparation of thesis.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

EAS 2005 - SOURCES AND METHODS IN EAS
Minimum Credits: 3
Maximum Credits: 3
This course will center on how to use library materials for research on China and Japan. Students will be trained in bibliography, library techniques, and the use of text and reference works for East Asian studies. Students will also be encouraged to familiarize themselves with the range of new technologies available for advanced level research, including library databases and internet resources.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

EAS 2024 - TEACHING JPNSE AS 2ND LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
An introduction to approaches and techniques of teaching Japanese to speakers of English. Included will be some historical background, learning and teaching strategies, Romanization, testing, and other relevant topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

EAS 2701 - READING JAPANESE 1
Minimum Credits: 3
Maximum Credits: 3
This course represents the first part of a two-course sequence (with EAS 2702) designed specifically to deepen the student's understanding and skills in reading written Japanese. Students must have a knowledge of the characters used in Japanese to at least the 4th year level in the departmental sequence. The course will be taught in English.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

EAS 2702 - READING JAPANESE 2
Minimum Credits: 3
Maximum Credits: 3
A continuation of EAS 2701. Students will continue to develop reading skills by reading a variety of literature relevant to their fields of research.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**EAS 2801 - PRACTICUM IN TEACHING JAPANESE**
Minimum Credits: 1
Maximum Credits: 1
Course offers the rudiments of theory of L2 pedagogy and teaching Japanese as a foreign language and provides opportunities for practical experience in teaching Japanese. One foci is making well-reasoned instructional decisions in such areas as program and course design, pacing, evaluation, pedagogical techniques, classroom management, and materials development. Students will have the opportunity to practice by teaching drill classes for the department's Japanese lang prog. Course particularly suitable to any grad student who is currently drill instructor or aspires to become one.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

**EAS 2902 - DIRECTED STUDY**
Minimum Credits: 1
Maximum Credits: 6
The student undertakes a course of study under the direct supervision of a department faculty member.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

**EAS 2990 - INDEPENDENT STUDY**
Minimum Credits: 3
Maximum Credits: 3
Individual study under the guidance of a department faculty member.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

**Economics**

**ECON 2000 - THESIS AND RESEARCH MA DEGREE**
Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research independently with minimal supervision by faculty.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

**ECON 2001 - INTRO TO MATHEMATICAL METHODS**
Minimum Credits: 3
Maximum Credits: 3
Intensive mathematics preparation for first year Ph.D. students.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Economics (PHD)

**ECON 2010 - MATHEMATICAL METH ECON ANLYSIS**
Minimum Credits: 3
Maximum Credits: 3
A survey of differential and integral calculus with application to economic analysis.

Academic Career: GRAD
Course Component: Lecture
ECON 2020 - INTRO TO ECONOMETRIC THEORY
Minimum Credits: 3
Maximum Credits: 3
This course covers elements of inferential statistics necessary for the study of econometric theory. It emphasizes estimation theory and its applications. Illustrations are drawn from several areas of economics. Students are expected to understand the theory of statistical inference mathematically as well as intuitively when applied to economic problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: ECON 2001; PLAN: Economics (PhD)

ECON 2070 - HISTORY OF ECONOMIC THOUGHT 1
Minimum Credits: 3
Maximum Credits: 3
Course covers development of economics until Marginalist revolution”. Course will principally be divided as follows: (1) the scholastic tradition, (2) mercantilitism & development of national income accounts, (3) Thomas Hobbes & his successors, (4) Adam Smith, his physiocratic forbearers, & reorientation from philosophic understanding towards policy formation, (5) controversies about balancing growth in manufacturing with maintenance of the population "on the land", & (6) later classical economists (senior, Thornton, J.S.. Mill, and Marx).”
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2080 - HISTORY OF ECONOMIC THOUGHT 2
Minimum Credits: 3
Maximum Credits: 3
This course focuses on four strands of thought in the last century: (1) marginalist tradition and its critics (2) neoclassical traditions and their critics (3) efforts at formulating a dynamic general equilibrium analysis and (4) several efforts at formulating a systematic empirical economics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2100 - ADVANCED MICROECONOMIC THEORY 1
Minimum Credits: 3
Maximum Credits: 3
Theories of consumer behavior, producer behavior, market equilibrium, industry structure.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: CREQ: ECON 2001; PLAN: Economics (PhD)

ECON 2110 - ADVANCED MACROECONOMIC THEORY 1
Minimum Credits: 3
Maximum Credits: 3
The course covers the comparative static approach to macroeconomics. The objectives include both an understanding of past and recent literature on theory and empirical evidence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: ECON 2001; PLAN: Economics (PhD)

ECON 2120 - ADVANCED MICROECONOMIC THEORY 2
Minimum Credits: 3
Maximum Credits: 3
This course will present the Arrow-Debreu-McKenzie Theory of competitive equilibrium, the theory of imperfect competition, and economics of uncertainty. The presentation will be self-contained, including a discussion of the mathematical techniques used. As time permits, special topics will

1718
be discussed.

**ECON 2130 - ADVANCED MACROECONOMIC THEORY 2**

Minimum Credits: 3  
Maximum Credits: 3  
The first part of the course will be devoted to studying models of economic growth and the role money plays in the growth process. The second part of the course will consist of an introduction to the macro-economic rational expectations literature. Both theoretical as well as empirical contributions will be surveyed and discussed in this area.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2140 - MARXIST ECONOMIC THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
Development of Marxist economic theory as a method of analyzing modern capitalist economies. Examines Marx's method and concepts, the transition from feudalism to capitalism, the labor theory of value, accumulation and crisis.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2150 - GENERAL ECONOMETRICS**

Minimum Credits: 3  
Maximum Credits: 3  
Surveys standard econometric models, their estimation, hypothesis testing and other inferential problems of, among others, (1) classical linear regression, (2) generalized linear regression models, including sure and pooled regression models, (3) dynamic models with spherical and nonspherical errors, (4) qualitative and limited dependent variable models, (5) simultaneous equations models--static and dynamic, (6) use and analysis of econometric models.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2160 - EMPIRICAL METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover empirical methods typically used in applied microeconomic research and it is designed to help you apply the techniques learned in the econometrics sequence. We will focus on techniques used in applied microeconomics to identify causal estimates. The course will cover data issues and distributional estimators in some detail along with matching and propensity scores, local regressions, instrumental variables, regression discontinuity designs, and inference issues. Many examples will come from development, health, labor, public economics, and political economy, but the material will be useful to any applied researcher. The course will focus also on the implementation of econometric techniques learning the basic tools of programming and coding. The goal of this class is to provide students with the tools needed to become critical readers of empirical work and teach them techniques that they can apply to their own original research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ECON 2180 - DYNAMIC ECONOMICS 1**

Minimum Credits: 3  
Maximum Credits: 3  
Lectures in the first part of the course will be devoted to deterministic theory and those in the second part will be devoted to stochastic theory and current research topics. Topics include: (a) basic maximum problems - calculus of variations, control theory, dynamic programming; (b) basic dynamic equations - Euler-Lagrange, Hamiltonian equations, Bellman-Hamilton-Jacobi equations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
ECON 2200 - INTRODUCTION TO GAME THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This course is meant to lay groundwork in game theory. Topics include: 1) social choice; 2) cooperative models: a) exchange economies, b) characteristic function models (TU and NTU), c) the core, d) the shapely value; 3) introduction to strategic models: a) extensive and strategic form models, b) Nash equilibrium and refinements; 4) utility theory; 5) bargaining; 6) incomplete information.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2210 - INTRODUCTION TO GAME THEORY 2
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate level course in game theory. It will deal with a broad range of topics, some drawn from recent papers, chosen to prepare students to tackle the literature on their own. This course is a sequel to economics 2200 and is offered in alternate years to economics 2740 topics in microeconomic theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2220 - TOPICS IN EXPERIMENTAL ECONMCS
Minimum Credits: 3
Maximum Credits: 3
The course is designed to familiarize the student with experimental methodology and the range of application of experimental methods in economics. Students will devise and execute (in consultation with the instructor) a pilot experiment in a substantive area of interest. This can be done in small groups of 2 or 3 or be a solo project. The object is to provide hands-on experience in conducting an economics experiment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 2230 - PUBLIC ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This is a survey course of topics in public finance. The purpose is to acquaint students with a broad range of classical and contemporary issues in public finance. The course will be divided into several topic areas; taxation; expenditure analysis; economics of political processes; control of externalities; regulation; and fiscal federalism.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2250 - INDIVIDUAL RESEARCH
Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research independently with minimal supervision by faculty.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

ECON 2260 - ADVANCED ECONOMETRICS 1
Minimum Credits: 3
Maximum Credits: 3
Covers, with rigor commensurable to the current professional standard, the basis results of statistical inference in the classical linear regression model and their extension; asymptotic theory and its application to extremum estimators including the least squares estimator and the maximum likelihood estimator; asymptotic tests and related topics; generalized least squares theory; and linear and nonlinear simultaneous equation models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
ECON 2270 - ADVANCED ECONOMETRICS 2  
Minimum Credits: 3  
Maximum Credits: 3  
Covers qualitative choice models, censored and truncated models, duration models, time series models - univariate and multivariate, causality analysis, dynamic models, cointegration, time series macroeconometrics.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2280 - MONETARY ECONOMICS 1  
Minimum Credits: 3  
Maximum Credits: 3  
The course will present a systematic treatment of modern monetary theory, emphasizing the role of money in a general equilibrium theory of the economy. Topics include the micro-foundations of monetary economics, general equilibrium, dynamic models, theory of interest rates, the price level, credit markets, stabilization policy.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2290 - MONETARY ECONOMICS 2  
Minimum Credits: 3  
Maximum Credits: 3  
This course covers the theory and practice of monetary policy-making.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2300 - REGIONAL ECONOMICS  
Minimum Credits: 3  
Maximum Credits: 3  
The focus of this course is on spatial economics. The theoretical basis for our understanding of the distribution of economic activity over space is developed. Within that framework, it is possible to address questions of regional growth and decline and to understand the value and limitations of empirical research concerning related issues.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2320 - TOPICS IN URBAN & ENVRN ECONS  
Minimum Credits: 3  
Maximum Credits: 3  
The first portion of the course is devoted to examining the allocation of resources within and between urban areas. The second portion of the course examines the relationship between this resource allocation and various urban problems including poverty, discrimination, housing, transportation, and urban public finance.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

ECON 2360 - BASES OF ECON QUANTIT DATA  
Minimum Credits: 3  
Maximum Credits: 3  
The object of this course is to offer students a comprehensive discussion of and opportunity to develop under professorial supervision an understanding of the spectrum of quantitative and episodic empirical sources of contemporary American statistical data. This data will be examined from descriptive, historical, and analytical standpoints.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
ECON 2400 - LABOR MARKET ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
This course covers topics in areas of labor economics such as: labor supply; household production and labor force participation; labor demand; minimum wages; schooling and earnings; human capital externalities; wage inequality, and skilled biased technological change. The purpose of the sequence (this course and econ 2410) is to familiarize students with the economic models and empirical strategies used in the labor economics literature, and teach them to critically analyze empirical research in preparation of doing their own applied work. By the end of the course, students should have the background necessary to start developing their own independent research interests in the field.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2410 - LABOR MARKET ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This course covers topics in areas of labor economics such as: immigration; labor market discrimination; compensating wage differentials; incentives, effort and monitoring; efficiency wages; and the economics of marriage and childbearing. The purpose of the sequence (econ 2400 and this course) is to familiarize students with the economic models and empirical strategies used in the labor economics literature, and teach them to critically analyze empirical research in preparation of doing their own applied work. By the end of the course, students should have the background necessary to start developing their own independent research interests in the field.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2440 - ECON HIST OF RUSSA/EASTRN EURP
Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to explore the strategic factors of this complex region's economic development, broadly conceived, and in doing so to enhance our understanding of the origins, nature, and socio-political consequences of its relative backwardness. With these goals in mind, we will consider the salient features of the dynamics of these economies in the West-European mirror, and discuss governmental attempts to induce modern economic growth in the 19th and 20th centuries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 2450 - ECONOMIC HISTORY
Minimum Credits: 3
Maximum Credits: 3
This course explores the economic history of the United States from European settlement up to the recent past. Topics covered will include: the origins of American industrial growth; the political economy of the constitution and constitutional ratification; economic and environmental change; the welfare effects of industrialization; the industrial organization of the great trusts, such as standard oil and American tobacco; the sources and consequences of regulatory change; and the great depression and the new deal. The course will train students in the tools and methods of the economic historian. In this way, the course will consider a wide body of theory and empirical tools that can be applied to the study history and historical change. The course readings will be mix of old classic articles and more recent work.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECON 2470 - THEORY INDUSTRIAL ORGANIZATION
Minimum Credits: 3
Maximum Credits: 3
The purpose of the course is to provide a comprehensive introduction to modern industrial organization theory. A partial list of topics includes competitive industries, concentrated industries, cooperative and non-cooperative rivalry, product differentiation, discriminatory pricing, the relationships between market structure and technological change, barriers to entry, contestable markets, and other topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2500 - INTERNATIONAL TRADE
This course is a rigorous introduction to the pure theory of international trade. The material requires a background in microeconomic theory.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**ECON 2510 - INTERNATIONAL FINANCE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A rigorous survey of the theory of international finance, the applications to international economic policy. Assumes thorough knowledge of micro and macroeconomic theory at the graduate level, and some acquaintance with mathematical techniques. Topics covered include: balance-of-payments adjustment under various change-rate regimes; theory of economic policy in an open economy; international capital movements; the monetary approach to the balance of payments; and empirical evidence on many of the above topics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**ECON 2520 - COMPARATIVE ECONOMIC SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course examines theoretical and empirical aspects of performance of different economic systems. The main systems covered include central planning, decentralized (indicative) planning, labor-management and codetermination, and a Western-type market system. Assumptions underlying each system will be identified and economic performance in terms of resource allocation, productive efficiency and income distribution will be analyzed. Relevant institutional factors will also be examined.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**ECON 2530 - ECONOMIC DEVELOPMENT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A comprehensive survey of the major analytical literature of development economics. Covers approaches to and theories of development; dualistic models of the development process; the impact of the international economy; and development planning. Both major theoretical literature and empirical findings in each area are covered. Primary focus will be on the analytical techniques and literature, though some time will be spent on discussion of researchable topics in the area.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**ECON 2540 - GROWTH & POLICY MODELS OF ECON**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
For students interested in the more formal mathematical approaches to economic development and to related quantitative methods for planning and decision making. Topics will include applications of growth theory, input-output analysis, linear programming, computable general equilibrium, and project analysis in a development context. Problem exercises will be assigned.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**ECON 2560 - WORLD FOOD ECONOMY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to the dynamics of world production & trade in foodstuffs & agricultural produce. Emphasis will be placed on using the tools of economic analysis to examine the evolution of agricultural sector with economic development, including the issues of agricultural self-sufficiency, & environmental degradation, the role of technical change in agricultural production, food security, famines, & food aid, the impact of economic policies on agricultural growth and performance, the institutions and mechanisms involved in international trade in agricultural products.

**Academic Career:** GRAD
ECON 2570 - INTERNATIONAL TRADE POLICY
Minimum Credits: 3
Maximum Credits: 3
The course will consist of theoretical and empirical examination of trade policies of developed and developing countries. Theoretical models will include recent models of bargaining, public choice, interest group politics, and optimum intervention in the presence of perfect and imperfect competition.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2600 - COMPUTATIONAL METHODS ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This class is intended to familiarize Ph.D. students with numerical methods to solve economic models. Topics covered depend on instructor. Example topics include approximation methods, fixed point problems, solving functional equations like dynamic programming, Monte Carlo methods. Such methods are used in differentiated product models in industrial organization, political economy models in macroeconomics, and dynamic private information models. Heavy use is made of the computer.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2605 - AUCTION THEORY & MECH DESIGN 1
Minimum Credits: 3
Maximum Credits: 3
Introduces ideas and results in auction theory. The main focus is on environments in which a single object is for sale and each buyer's private information is single-dimensional. Bayesian equilibria of standard auctions will be characterized and the design of optimal auction rules will be addressed. Course covers standard auctions with IPY, equilibria in first-price auctions, auctions with entry and resale, the revenue equivalence theorem, revelation principle for Bayesian games, optimal auction design, and a variety of related topics as time permits.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2610 - AUCTION THEORY & MECH DESIGN 2
Minimum Credits: 3
Maximum Credits: 3
This course covers advanced topics in auction theory and mechanism design. The main focus is on auctions of multiple units & mechanism design with multi-dimensional types. Concerning multi-unit auctions, course will cover: equilibrium and efficiency with private values, revenue considerations, sequential sales, non-identical objects, multiple objects and interdependent values. Interlaced with these topics, course will cover mechanism design with multi-dimensional types, part of course will focus on recent topics such as combinatorial auctions, bidding languages, market design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2620 - MATCHING MARKET DESIGN 1
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECON 2650 - CONTESTS, TOURNAMENTS, APPLCS
Minimum Credits: 3
Maximum Credits: 3
Many important economic problems can be modeled as a contest. (Elimination) tournaments can have several stages, where each stage is a contest.
Examples of contests and tournaments include rent-seeking, elections, lobbying, r & d, arm racing, lotteries, different sport events and many others. In this course, a theory of contests will be considered first. Then a theory of tournaments will be analyzed. Different economic applications will be discussed. The following concepts will be used in the course: asymmetric information, incentives, optimal prize scheme, winner-take-all prize scheme, fixed resources, all-pay auctions, lotteries, sabotage and so on.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECON 2660 - CONTESTS AND LOTTERIES
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECON 2670 - POLITICAL ECONOMY
Minimum Credits: 3
Maximum Credits: 3
In this course, we will take a formal look at various environments where a group of individuals (committee, society, congress, etc) takes a binding decision through some institutional mechanism (consensus, elections, jury deliberations, legislative bargaining etc). The course will have a strong formal, positive focus on how the varied political, social and legal institutions that define the 'rules' of collective decision-making determine the nature of collective outcomes. On the normative side, the course would focus on certain 'desirable properties' (e.g. Respecting minority preference) of collective decision-making and analyze whether and to what extent the existing institutional arrangements satisfy such properties. While we shall start out using concepts of co-operative game theory, for most part of the course we will be in the realm of non-cooperative game theory. This course will provide a starting point for research in formal political theory and political economy. As such, it might be of interest to students of both economics and political science.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECON 2700 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Current topics of particular interest to economics graduate students are discussed and analyzed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2713 - TOPICS IN MACROECONOMICS
Minimum Credits: 3
Maximum Credits: 3
A field course designed to initiate original research projects in areas categorized under the broad heading of macroeconomics. Students select an area in which to specialize (asset pricing theory, growth theory, business cycle theory, etc.), And present one to three lectures summarizing the literature in the area. A short reading list of seminal papers in the area would be provided for the class to follow. Students begin an original research project to be presented at the end of the term, and to be summarized in a paper.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2720 - RESEARCH METHODS IN ECONOMICS
Minimum Credits: 1
Maximum Credits: 1
This is a mandatory course for second-year PhD students. The course will introduce students to strategies for identifying interesting research ideas, to determine whether the idea is worth pursuing, to effectively review the literature, and to plan how to conduct the research. Insights into how these strategies change across fields within economics will be provided by relevant faculty guests. Other topics discussed in the course will include the typical difficulties involved in conducting research and how to address them; how to deal with advisors; academic etiquette; techniques for presenting work in progress at seminars; and how to write and submit academic papers. Requirements will include the drafting of the second-year paper proposal (PhD Comprehensive Research Paper) and the selection of two faculty readers.
Academic Career: GRAD
ECON 2730 - SEMINAR EXPERIMENTAL ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
There is a small, but rapidly growing literature in which behavioral experiments are used to test central propositions of various economic theories. This course will review the experimental literature that exists in several areas of economics, including industrial organization, social choice and preference revelation, behavior of decentralized markets and bargaining. A number of experiments will be replicated. Students will be expected to design their own experiments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2740 - TEACHING ECONOMICS
Minimum Credits: 1
Maximum Credits: 3
A required course for newly appointed ta/tfs in economics. The object is to develop teaching skills that are essential for effective communication between instructor and college students in economics. Theory and pedagogy, as well as practicum and demonstrations are part of this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

ECON 2750 - TOPICS IN MACROECONOMICS
Minimum Credits: 3
Maximum Credits: 3
A field course designed to initiate original research projects in areas categorized under the broad heading of macroeconomics. Students select an area in which to specialize (asset pricing theory, growth theory, business cycle theory, etc.), And present one to three lectures summarizing the literature in the area. A short reading list of seminal papers in the area would be provided for the class to follow. Students begin an original research project to be presented at the end of the term, and to be summarized in a paper.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2760 - TOPICS IN MICROECONOMIC THEORY
Minimum Credits: 3
Maximum Credits: 3
This is an advanced level course in microeconomic theory. It deals with a broad range of topics, some drawn from recent papers, chosen to prepare students to tackle the literature on their own. Offered in alternate years to economics 2210 introduction to game theory 2.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 2770 - COMPREHENSIVE PREPARATION
Minimum Credits: 1
Maximum Credits: 12
Graduate students pursue study independently to prepare for comprehensive examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

ECON 2780 - TOPICS IN MONETARY THEORY
Minimum Credits: 3
Maximum Credits: 3
In this class we will study theoretical models of monetary trade under decentralized markets. Topics will include: background and history of thought, commodity money-medium of exchange models, search-theoretic models, bargaining, endogenous matching, related private information models, coexistence of monetary and non-monetary trades, technical contributions, distributional models, and private money and banking.
Academic Career: GRAD
ECON 2900 - ADVANCED TOPICS IN ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This will be a graduate seminar to cover special topics. Study and research will be directed by faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

ECON 2900 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research independently with minimal supervision by faculty.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

ECON 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 12
Graduate students pursue study or research under the supervision of faculty.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ECON 3100 - SEMINAR IN MICROECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This is a seminar in microeconomic theory and analysis. Special topics are selected each time the seminar is offered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 3110 - SEMINAR IN MACROECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This is a seminar in modern macroeconomic theory and analysis. Special topics are selected each time the seminar is offered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 3150 - SPECIAL TOPICS IN ECONOMETRICS
Minimum Credits: 3
Maximum Credits: 3
Studies special topics in theoretical or applied econometrics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ECON 3160 - ECONOMETRICS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
Advanced topics in econometrics not covered in econ 2150 and 2160 shall be studied. Each student is assigned a special topic and is asked to present research results.
Academic Career: GRAD
ECON 3400 - APPLIED MICROECONOMIC SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The primary aim of this course is to introduce Ph.D. Students to a sampling of the current professional research in various applied microeconomics fields such as labor economics, health economics, public finance, industrial organization, development economics or political economy. Students learn and critically analyze the range of empirical approaches used to study topics within these areas, in preparation of doing their own applied work. This course requires attendance to the joint CMU/Pitt applied microeconomics workshop, where renowned guest speakers will be presenting their current working papers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 3500 - INTERNATIONAL ECONOMICS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The seminar will be used to promote student and faculty research, especially doctoral dissertations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ECON 3520 - COMPARATIVE & DEVELOPMENT ECONOMICS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on the most recent theoretical and empirical studies that are being carried out by specialists in these areas. It will consist of presentations both by the university of Pittsburgh and outside faculty.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

ECON 3610 - PROF WORKSHOP IN ECONOMICS
Minimum Credits: 1
Maximum Credits: 3
The course is designed to prepare Ph.D. Candidates in the final stages of dissertation work for entry onto the job market. Emphasis will be placed on interview and presentation skills and the development of future research plans.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

ECON 3902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
Students pursue study or research under the direct supervision of a faculty member.
Academic Career: GRAD
Course Component: Directed Studies

Education

EDUC 2000 - PSYCH OF LEARNING & DEVELOPMENT FOR EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on those areas of development and learning which have relevance for educators. The course covers preschool through old age. For each age range, typical behaviors and competencies that are learned or developed are considered from a number of domains (cognitive, affective, psychomotor, social). Attention is also given to appropriate research methods. An interactionist perspective is utilized; the course may be team
EDUC 2001 - EDUCATNL PSYCH FOR INSTRUCTION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the main ideas, research findings, and instructional implications of cognitive psychology for major topics in educational psychology (development, learning, curriculum, measurement, and classroom and group processes). Both child and adult learners are studied. A premise of the course is that instructional procedures should be related to cognitive processes and to knowledge already attained by the learner.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2002 - SURVEY OF DEVELOPMENTAL PSYCH
Minimum Credits: 3
Maximum Credits: 3
This course prepares students to understand individuals from a developmental perspective. The course covers development from the time of conception until the end of life. Physical, cognitive, emotional, and psychosocial processes are considered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

EDUC 2003 - ADULT LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course presents psychological theory, research and analytical methods applicable to the variety of settings in which adults learn and to the variety of objectives adults have for learning. The roles of memory, prior knowledge and self-regulated learning in these and other task domains are considered. Students should emerge with an understanding of how to analyze what is involved in selected domains of learning and how to identify the more important questions for research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

EDUC 2005 - PSYCH OF CROS-CLTL DEVELOP/LRNG
Minimum Credits: 3
Maximum Credits: 3
This course teaches concepts of human development and learning and the effects of culture on these variables. Cross-cultural research literature is used to describe the roles that culture plays in cognitive development, communication, learning and individual differences in ability, achievement, and social skills. Laboratory experiences utilize cultural experiences to explain cross-national and micro-cultural differences in development and learning. The course is designed for international students and U.S. Students whose future careers involve other cultures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2006 - PSYCHOMOTOR DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This class covers factors that influence children's motor skill performance. In addition to developing a research project on some aspect of motor skill development, topics include: factors that influence motor performance, growth and maturation, physiological development, fundamental motor pattern development, and information processing in motor skill acquisition.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2007 - HUMAN LEARNING
Minimum Credits: 3  
Maximum Credits: 3  
Presents an overview of theories and of kinds of learning that educational professionals should know. Also considered are recent developments in cognitive psychology, such as information processing and knowledge-based approaches in transition from novice to expert, and from poorly to well adjusted states.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2008 - CONCEPTION TO EARLY CHLHD**  
Minimum Credits: 3  
Maximum Credits: 3  
Focuses on developmental pathways from conception through early childhood within contexts of family, daycare/school, community and culture. Pathways are considered with regard to developmental changes in transactions between individuals and social life conditions, with focus on patterns of change in participation in social-cultural practices. Besides a review of current literature, students will be engaged in qualitative investigations of the social lives of young children.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**EDUC 2009 - DVLP: MIDDLE CHLHD/ADOLESCENCE**  
Minimum Credits: 3  
Maximum Credits: 3  
Course focuses on developmental pathways from middle childhood through adolescence (ages 7-18) within the contexts of family, school, community and culture. Pathways are considered in regard to developmental changes in transactions between individuals and social life conditions, with regard to patterns of change in participation in social cultural practices. Students will be engaged in qualitative investigations of the social lives of children and adolescents.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2010 - PSYCHLGCL DVLP MATUR & OLD AGE**  
Minimum Credits: 3  
Maximum Credits: 3  
Studies age-related physical, psychomotor, cognitive, and affective changes in maturity and old age from a life span development perspective. Recent research findings and issues related to studying aging are stressed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2011 - CULTURALLY RESPONSIVE PEDAGOGY**  
Minimum Credits: 3  
Maximum Credits: 3  
The course, culturally responsive pedagogy, introduces students to theory, research, and especially practice related to developing and enacting curriculum and instructional practices that respond to the social context in which they (will) work. The course covers general principles and approaches to culturally responsive teaching such as how teachers develop meaningful relationships with students, how teachers learn from and about a school and local community, how teachers develop and implement culturally responsive classroom management, and how teachers develop expectations for students that maximize their capacity. In addition, the course will assist students in learning about and developing culturally responsive curriculum and pedagogy in their different content/subject matter areas (such as mathematics, science, art, language arts, and social studies). A recurrent and central question of the course is: how do teachers develop culturally responsive instructional practices in their particular disciplinary domain to maximize students' learning opportunities?  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**EDUC 2088 - URBAN EDUCATION REFORM**  
Minimum Credits: 3  
Maximum Credits: 3  
The course is designed to provide both a background understanding of urban education, as well as expose students to particular urban education
reforms. Students will examine selected historic and contemporary reform efforts in education, in particular studying the theories of change, implementation challenges and critiques associated with these different reforms as they apply to urban districts and schools. We will look at the theoretical underpinnings of particular reforms, as well as why education policies have succeeded or failed, and the consequences of these outcomes.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2089 - SPECIAL TOPICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 12  
An experimental course with a flexible curriculum oriented to special research topics or current issues of concern to educators. Topics vary.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2100 - EDUCATION AND SOCIETY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course focuses on the interaction between educational institutions and their social context. Situated in the field of study known as social foundations of education, the content reflects disciplinary methods in the examination of such policy issues as the role of the schools in social change, the influence and consequences of formal and non-formal educational forces, and the economics and politics of school reform efforts. Students are challenged to consider the relationships between culture and power and the value-laden character of all educational endeavors. Thus the role of schooling is considered in cultivating the habits necessary for democratic citizenship which include ongoing efforts to secure equitable and just social relations, and to advance the common good.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2102 - HISTORY OF EDUCATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Both a chronological order and a thematic/conceptual investigation will constitute the structure of this course by juxtaposing past and contemporary historical developments. Emphasis will be placed on the ideas that prevailed in different time periods. Conflicting organizational arrangements, competing theories, and growing external pressures in different eras will be traced and analyzed in order to develop an educational historiography.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2103 - RACE & RACISM IN EDUC & SOCIETY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on issues of equity in education based upon the divisions of American society by social constructs of race”. The course is designed to expose students to conceptual frameworks of culture, society, race, class and gender from the social sciences and humanities for understanding the experiences of subordinated minority groups in school and society. The practical problems of social and school reform in American communities and schools will be addressed.”  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 2104 - LEADERSHIP IN SERVICE LEARNING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar examines the conditions under which social and ethnic movements have created non-formal educational programs; assesses pedagogical aspects of movement education; and evaluates movement education outcomes regarding movement goals and relations with the larger society.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
EDUC 2105 - SOCIOLOGY OF EDUCATION
Minimum Credits: 3  
Maximum Credits: 3  
An analysis of the development of modern social institutions with special reference to the sociology of the schools. The school is studied as a social  
system and in the context of broad social organization.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2106 - EDUCATION AND CULTURE
Minimum Credits: 3  
Maximum Credits: 3  
The active experiences in the course are intended to challenge students to investigate and analyze the dynamic relationship between schooling,  
education, popular culture and society by addressing the normalizing effects of cultural narratives and images that influence our taken-for-granted  
assumptions, beliefs and actions. Class activities involve considering the moral, social and political dimensions of our educational practice by  
expanding our sense of what happens outside of schools and classrooms that contribute to shaping our worldviews. We work to better understand the  
dynamics of culture and the relationships among culture, history, power, language and knowledge. Thus we are challenged to become informed and  
invigorated professionals that can help reverse the patterns of dehumanization and social control that are often overlooked in the everyday world of  
practice.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2107 - EVIDNC BASED HEALTH PROGM PLN  
Minimum Credits: 3  
Maximum Credits: 3  
The course focuses on the roles of schools in responding to the health needs of children in collaboration with the family and community. Examined is  
how schools and communities compliment and support health and social services needed to overcome the conditions that put a young person at  
educational risk.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2108 - STATE/NATNAL POLITICS OF EDUC
Minimum Credits: 3  
Maximum Credits: 3  
Analyzes broad national and international political issues as they relate to schools. Political issues are viewed from a contemporary political  
perspective and are compared to other social science interpretations. An examination is made of the dialectical relationship between the state and the  
school in an effort to determine how social, economic, and cultural reproduction occurs.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2109 - GENDER IN EDUCATION
Minimum Credits: 3  
Maximum Credits: 3  
This introductory course provides an overview of anthropological approaches to the study of education. Ethnographic cases drawn from many  
cultures, knowledge systems, and time periods help to provide a broad, holistic view of education in diverse community and institutional contexts.  
Modules may include: nurturing a sense of place; comparing folk, popular, and elite cultures; understanding cultural continuity and change;  
celebrating rituals and holidays; fostering cultural resilience and responsive reform policies; framing multicultural education; and appreciating the  
sociolinguistics of schools and home. Student's have opportunities to participate in authentic schooling activities, to draft public advocacy pieces, to  
create team presentations, and to refine a personalized synthesis of a topic of interest. Anthropological field research methods are discussed as a  
means to craft compelling analytical accounts, but research training is not part of this course  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2110 - GENDER AND EDUCATION
This seminar examines the role that gender plays in the lives as students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in K-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment; gender and the educational professions; feminist and antibias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2111 - CONTEMPORARY PHILOSOPHY OF ED
Minimum Credits: 3
Maximum Credits: 3
Examines how philosophies of education can contribute to one's vision of educative experience. Central educational concepts (e.g., Knowing, learning, thinking, valuing, and being) are analyzed in alternative ways.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2112 - POLITICS & HISTORY HIGHER ED
Minimum Credits: 3
Maximum Credits: 3
This course surveys the perennial forces which have shaped the character of America's colleges and universities. Institutional control and governance, curricular goals and organization, and faculty and student life are examined against the background of political, economic, religious, social, and intellectual developments in American culture.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2200 - DISCIPLINED INQUIRY
Minimum Credits: 3
Maximum Credits: 3
This course deals both with methods used in educational research and with the underlying theories, assumptions, and limitations. Students will do various inquiry activities, including sampling, observation and other data collection activities, as well as critical analysis of literature relevant to an important educational problem. These inquiry activities and study provide a foundation for further study of epistemological issues on which educational research and theory are based.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 2201 - INTRO TO RESEARCH METHODOLOGY
Minimum Credits: 3
Maximum Credits: 3
Introduces basic language and concepts of empirical research with emphasis on the applicability of research methodology (statistics, measurement, design, and evaluation) for improvement of professional practice in education.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

EDUC 2202 - EDUCATNL/PSYCHLGCL MEASUREMENT
Minimum Credits: 3
Maximum Credits: 3
Introduction to basic principles of measurement and a survey of educational and psychological testing. Topics include validity, reliability, item selection, and referencing (both norm and criterion); interpreting factor analysis of test scores; using tests in decisions; social and ethical issues in testing; theories of intelligence and their relation to intelligence testing; and tests of personality. Students participate in a laboratory section where they analyze data and evaluate tests.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
EDUC 2203 - ANTHROPOLOGY OF EDUCATION  
Minimum Credits: 3  
Maximum Credits: 3  
Cultural anthropology is presented as an interpretive social science for disciplined inquiry into social institutions and processes, including education. Education is viewed as cultural transmission in the context of contemporary communities and society. The course includes an introduction to culture theory, anthropological field work, and ethnographic analysis.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2204 - QUALTV METHODS OF RSRCH ASESMNT  
Minimum Credits: 3  
Maximum Credits: 3  
Qualitative methods will be studied as they provide a continuum of application from clinical assessment to formal research. Emphasis is placed on value of qualitative approach to professionals who wish to personally understand, engage and collaborate with the individuals and groups they work with, including children, youth, and family members with differing social, ethnic and personal backgrounds.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 2205 - FIELD METHODS  
Minimum Credits: 3  
Maximum Credits: 3  
Designed to acquaint students with basic ethnographic field work techniques. Topics addressed include taking and managing field notes on participant-observation and use of archival materials. There will also be some discussion of the relationship among research design, data collection, and data analysis.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

EDUC 2496 - INTERNSHIP ABROAD  
Minimum Credits: 3  
Maximum Credits: 12  
This internship links scholarship and community engagement in a foreign country via structured activities arranged through the study abroad office. Interns explore career fields and networks for future research and employment.  
Academic Career: GRAD  
Course Component: Internship  
Grade Component: Grad SN Basis

EDUC 2595 - SPECIAL TOPICS - LSAP  
Minimum Credits: 3  
Maximum Credits: 3  
This master's level course covers a specially selected learning science and policy topic. Topics vary from section to section and from term to term.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

EDUC 3001 - PRACTITIONER INQUIRY 1  
Minimum Credits: 3  
Maximum Credits: 3  
This initial course in the research sequence introduces students to disciplined inquiry of problems of practice through a variety of perspectives, approaches, and methods of planning and conducting educational research. This course provides a foundation for further study of research topics and the enactment of educational research.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade
EDUC 3002 - FOUNDATIONS 1:
Minimum Credits: 3
Maximum Credits: 3
This course introduces the notion of a conceptual framework and engages students in critical analysis of exemplars that demonstrate how conceptual frameworks drive the intellectual work of educational research and practice. Students identify a topic of interest and begin to survey the professional literature related to that topic in order to identify a problem of practice and how that problem has been framed and investigated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 3003 - FOUNDATIONS 2: LEDRSHIP GRP & ORGS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the leadership of pre-20 institutions, and other educationally-related entities in an environment characterized by socioeconomic, political, technological, and demographic change. It will examine the breadth of leadership theories and styles in education, including traditional, entrepreneurial, behavioral, and relationship-based models. Course participants will learn how to lead system- and institutional-level changes, drawing upon strategic, human resources, financial management, and quality assurance skills. Emphasis is given to leadership models that focus on student-centric solutions, sustainable excellence, equity and social justice within education institutions at all levels.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EDUC 3004 - FOUNDATIONS 3: CONTEXTS OF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the leadership of pre-20 institutions, and other educationally-related entities in an environment characterized by socioeconomic, political, technological, and demographic change. It will examine the breadth of leadership theories and styles in education, including traditional, entrepreneurial, behavioral, and relationship-based models. Course participants will learn how to lead system- and institutional-level changes, drawing upon strategic, human resources, financial management, and quality assurance skills. Emphasis is given to leadership models that focus on student-centric solutions, sustainable excellence, equity, and social justice within education institutions at all levels.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EDUC 3005 - FOUNDATIONS 4: POLC LEVR CHNG
Minimum Credits: 3
Maximum Credits: 3
Students in this core course will learn the principles of policy development; experience the views of decision-makers about how public policies are created; highlight notable examples of both effective and ineffective policies in education, human services, and healthcare; critically examine policies which are evident in local, national, and international realms for critical examination; and respond to problem-based learning (PBL) scenarios to form and modify real-world examples of policies and regulations in education and related settings; and understand the links among effective policy, leadership, advocacy for children and families, and systems reform.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EDUC 3006 - PRACTITIONER INQUIRY 2
Minimum Credits: 3
Maximum Credits: 3
The course will introduce concepts, tools and methods of quantitative analysis commonly used in research. The course will emphasize real world applications, including data preparation and analysis. Some concepts include: variables and their measurement; measures of central tendency and variability; sampling; tests of statistical significance; causal inference and research design; data reduction; bivariate relationships: correlation and cross-tabulation; multivariate relationships: inference using regression analysis
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 3007 - PRACTITIONER INQUIRY 3
The course will introduce approaches, strategies, and practices commonly used in qualitative research. The course will emphasize real world contexts and phenomena. Key areas of study include: researcher perspective, stance and voice. Making use of observations, survey, interviews, focus groups, artifact analysis, and other forms of gathering and using ‘data’. Applying various research and analytic strategies such as case study, action research, grounded theory, and thematic analysis. Considering emergent genre of research including narrative study, arts-based research and others.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EDUC 3008 - INQUIRY PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
This final course in the research series provides students the opportunity to engage in practice-based research with real-world issues and problems of practice. The seminar will begin with the opportunity to review a number of studies representing quantitative, qualitative, and mixed approaches. Students will then collaborate with colleagues pursuing the same and/or similar research methods and approaches through small workgroups. Each small group will be organized to support students in conducting pilot work in the methods/approaches they plan to use for their practice-based dissertation. Student groups will work with advanced Ph.D. students who have expertise in the methods and who will act as a consultant. Students will be expected to finalize their dissertation overview proposal through this course (in conjunction with their ARCO advisor and faculty).

Academic Career: GRAD
Course Component: Lecture

EDUC 3009 - SUPV PRACTITIONER INQUIRY
Minimum Credits: 3
Maximum Credits: 3
Ed.D Research Seminar is a faculty-led inquiry group focused on developing deep knowledge in an area of interest.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

EDUC 3011 - CULTURALLY RESPONSIVE PEDAGOGY
Minimum Credits: 3
Maximum Credits: 3
The course, culturally responsive pedagogy, introduces students to theory, research, and especially practice related to developing and enacting curriculum and instructional practices that respond to the social context in which they (will) work. The course covers general principles and approaches to culturally responsive teaching such as how teachers develop meaningful relationships with students, how teachers learn from and about a school and local community, how teachers develop and implement culturally responsive classroom management, and how teachers develop expectations for students that maximize their capacity. In addition, the course will assist students in learning about and developing culturally responsive curriculum and pedagogy in their different content/subject matter areas (such as mathematics, science, art, language arts, and social studies). A recurrent and central question of the course is: how do teachers develop culturally responsive instructional practices in their particular disciplinary domain to maximize students’ learning opportunities?

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

EDUC 3045 - CRITICAL RACE THEORY EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on foundational scholarship, theories and germinal texts that inform critical race theory. By introducing central tenets, principles and tensions, we will provide an historical overview of critical race theory and consider the following interrelated questions: how are racial inequities produced, reproduced, and maintained in education and society? In what ways is critical race theory used as an analytic tool to explain policy, reform, practice and other phenomena? In what ways is critical race theory used as a framework to conceptualize research? Students interested in the intersections of race, racism, equity, justice and education should find the course useful in helping them conceptualize and develop research projects.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

EDUC 3088 - URBAN EDUCATION REFORM
The course is designed to provide both a background understanding of urban education, as well as expose students to particular urban education reforms. Students will examine selected historic and contemporary reform efforts in education, in particular studying the theories of change, implementation challenges and critiques associated with these different reforms as they apply to urban districts and schools. We will look at the theoretical underpinnings of particular reforms, as well as why education policies have succeeded or failed, and the consequences of these outcomes.

**Grade Component:** Grad Letter Grade

**EDUC 3099 - GUIDANCE IN DOCTORAL DEGREE**  
**Minimum Credits:** 1  
**Maximum Credits:** 15  
Students will enact an applied inquiry plan and write a report of the enactment under the supervision of a research advisor. The report becomes the basis for a culminating demonstrations of excellence for the doctor of education degree.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**EDUC 3100 - INTRODUCTION TO QUAN METHODS:**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar prepares students to conduct descriptive and inferential statistics about a population using data collected under complex survey design. The emphasis throughout the course is on real world data preparation and analysis using the SPSS/STRATA/SAS statistical software package.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**EDUC 3102 - FIRST YEAR SEMINAR 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This seminar addresses professional issues germane to doctoral skills and competencies. Topics addressed in the seminar include guidelines for constructing a literature review, IRB requirements, ethical and legal issues pertaining to conducting research, preparing professional presentations and research proposals.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**EDUC 3103 - QUANTITATIVE METHODS 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar provides students with the basic research skills expected from quantitative researchers in educational research and policy circles. Methods to be covered include ordinary least squares, binomial probit/logit, multinomial probit/logit, ordered probit/logit, fixed effects, and program evaluation. Students will apply the method to a dataset using the SPSS/STRATA/SAS statistical software package.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EDUC 3104 - INTRODUCTION TO QUALTV METHODS**
This seminar introduces students to the inquiry traditions (e.g. empirical, interpretive, critical) and modes of research (e.g. narrative, ethnographic, historical, rhetorical, linguistic) associated with qualitative research in the social sciences. Students will gain experience with various elements in the research process (formulation of questions; research design; data organization and reduction; data analysis; validity and reliability issues) and with research methods characteristic of qualitative research. This course should be completed by the end of the students' second year.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**EDUC 3105 - FIRST YEAR SEMINAR 2**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This seminar for beginning Ph.D. students addresses professional issues germane to doctoral skills and competencies. Topics addressed in this seminar include guidelines for constructing a literature review, IRB requirements, preparing professional presentations, and research proposals.  
**Academic Career:** GRAD  
**Course Component:** Seminar

**Electrical and Computer Engineering**

**ECE 2120 - HARDWARE DESIGN METHOLGIES 1**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course teaches hardware design processes through use of industry tools. Students use graphical tools to design, simulate and synthesize designs using hardware description languages (e.g. VHDL/Verilog). High-level design and problem decomposition are also taught. Optimization, simulation and synthesis of combinatorial functions, data paths, and finite state machines are covered in depth. Architecture encapsulation and reuse through 'Intellectual Property' (IP) modules is described and covered in detail. Students will work individually and as a part of a team to create, simulate, model, document, and test IP models.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate School of Engineering

**ECE 2121 - HARDWARE DESIGN METHOLGIES 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course teaches students how to integrate multiple Intellectual Property" (IP) modules to create a larger, more complex architecture. Organized as a full-semester project, emphasis is on architectural exploration of digital systems that can be manufactured as a single chip. Students form groups to design and implement different IP-based projects. These are synthesized, prototyped and tested using Field-Programmable Gate Array (FPGA) technology. Application-Specific Integrated Circuit (ASIC) technologies are explored to determine the design characteristics of the final product."
ECE 2130 - TOPICS IN VLSI CAD
Minimum Credits: 3
Maximum Credits: 3
The course introduces state-of-the-art computer-aided design algorithms with application to VLSI. The course starts with a review of fundamental algorithms, from graph theory, sorting, searching and hashing, and then proceeds to focus on major CAD application areas in architectural, logical, and physical design. Major topics discussed are multiple level combinational logic synthesis and optimization, sequential logic optimization (retiming, clock scheduling), convex optimization and its applications, testing test pattern generation and design for testability, placement and routing, simulated annealing. Hot current research topics will be surveyed briefly.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2120; PROG: Swanson School of Engineering

ECE 2140 - SYSTEMS-ON-A-CHIP DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course is a full semester project involving the entire class in one System on a Chip design experience. This includes requirements definition, high-level design, system specification, algorithm modeling, decomposition, IP selection and/or IP creation for re-use, synthesis simulation and testing. The system will be a true SoC with at least one processor core with associated system and application software. Lectures will be the philosophy of SoC as well as the practical issues involved in the SoC design methodology. State of the art CAD software will be used for design and co-simulation of the hardware/software platform.

Academic Career: GRAD

Course Requirements: PREQ: ECE 2120; PROG: Swanson School of Engineering

ECE 2141 - VALDTN VERFCTN TECHNQ DIG SYS
Minimum Credits: 3
Maximum Credits: 3
This course presents state of the art methodologies and tools for simulation based validation and formal verification of complex digital systems implemented as systems on a chip. Topics include testing strategies, test bench design, coverage, and model checking.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2121 or 2140; PROG: Swanson School of Engineering

ECE 2159 - AUTOMATA THEORY
Minimum Credits: 3
Maximum Credits: 3
Finite automata and sequential machines, representation, decomposition, measurement, control and identification, regular expressions and machine specifications, linear sequential machines, Turing machines, and formal languages.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2160 - EMBEDDED COMPUTER SYS DESIGN
Minimum Credits: 3
Maximum Credits: 3
Design and implementation of embedded microprocessor systems. Topics include 'C' language, top down iteration for assembly language programming, data structures, co-routines, I/O software structures and real time operating systems.

Academic Career: GRAD
Course Component: Lecture
**ECE 2161 - EMBED COMPUTER SYS DESIGN 2**

Grade Component: Grad Letter Grade  
Course Requirements: PROG: Graduate School of Engineering

Minimum Credits: 3  
Maximum Credits: 3  
Organized as a full term project carried out by student design groups. A complex embedded system will be designed, implemented and tested using Altera and other cad tools. Grade will be based on project reviews and the final project report. Proper design process will be emphasized.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PREQ: ECE 2160; PROG: Swanson School of Engineering

**ECE 2162 - COMPUTER ARCHITECTURE 1**

Minimum Credits: 3  
Maximum Credits: 3  
Review of basic architecture concepts, data representation, microprocessor and minicomputer architectures, memory and i/o subsystems, stack computers, parallel and pipelined computers.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Graduate School of Engineering

**ECE 2164 - DYNAMIC COMPUTER ARCHITECTURE**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers the dynamic interaction of elements making up a microprocessor or microcontroller including CPU, memory, cache, etc. Hardware and instruction set architectures will be analyzed dynamically using finite state Markov processes. Legacy architectures will be analyzed with relatively simple benchmarks to increase performance.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**ECE 2170 - EMERGING MEMORY TECHN & SYMS**

Minimum Credits: 3  
Maximum Credits: 3  
Emerging memory and technology systems discussions on the modern computer system designs and simulations. Topics cover multi-core architecture, CPU, 3D integration, emerging memory hierarchy, solid state data storage, etc. Students are required to read the latest technical references, give seminars, learn how to use simulators and do the self-proposed research projects.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**ECE 2192 - INTRODUCTION TO VLSI DESIGN**

Minimum Credits: 4  
Maximum Credits: 4  
Introduction to the concepts and techniques of modern integrated circuit design. Use of computer aided design (cad) tools for circuit design and simulation.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Graduate School of Engineering

**ECE 2193 - ADVANCED VLSI DESIGN**

Minimum Credits: 3  
Maximum Credits: 3  
This course is organized as a full semester project in conjunction with a small amount of lecture material on advanced CMOS and bicmos digital
design techniques, as well as the group design process itself. Students form groups that design and implement different VISI projects which are then fabricated by NSF Mosis facility and returned for testing. Focus is on group projects with written and oral/reviews and reports.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PREQ: ECE 2192; PROG: Swanson School of Engineering

**ECE 2195 - SPECIAL TOPICS: COMPUTERS**
- Minimum Credits: 3
- Maximum Credits: 3
An MS level course in special topics of current interest in computer engineering.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PROG: Swanson School of Engineering

**ECE 2231 - FUNDAMENTAL SEMICONDUCTOR QUANTUM ELECTRONICS**
- Minimum Credits: 3
- Maximum Credits: 3
Fundamental quantum theory, electron in potential well, harmonic oscillator, band theory of solids, Kronig-Penny Model.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PROG: Graduate School of Engineering

**ECE 2232 - INTRODUCTION TO LASERS AND OPTICAL ELECTRONICS**
- Minimum Credits: 3
- Maximum Credits: 3
Introduction to and applications of basic laser and optical electronic principles; optical modulation and detection systems.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PROG: Swanson School of Engineering

**ECE 2235 - MONOLITHIC INTEGRATED CIRCUITS**
- Minimum Credits: 3
- Maximum Credits: 3
Fabrication of integrated silicon monolithic circuits, thermal oxidation, solid state diffusion, epitaxial growth, ion implantation, photo and electron lithography, design considerations, active and passive elements in monolithic blocks, surface effects.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PROG: Graduate School of Engineering

**ECE 2236 - ELECTRONIC DESIGN INTEGRATED CIRCUITS**
- Minimum Credits: 3
- Maximum Credits: 3
Basic concepts of integrated circuit design; designing with off-the-shelf linear and digital integrated circuits.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PROG: Graduate School of Engineering

**ECE 2238 - DIGITAL ELECTRONICS**
- Minimum Credits: 3
- Maximum Credits: 3
Switching behavior of semiconductor devices, logic circuit families; dtl, TTL, Schottky, ECL, CMOS, i2l, regenerative logic circuits, semiconductor memories, spice circuit simulation.
ECE 2240 - NANO-OPTICS
Minimum Credits: 3
Maximum Credits: 3
A graduate level course designed for students who want to understand the mechanisms of interaction of light and matter at the nanometer scale, and become acquainted with nano-optics-based technologies. Topics include: electromagnetic theory of optical interaction with matter, optical waves in periodic media, photonic bandgap structures, surface plasmons, optical interaction with metal nanostructures (metal nanoapertures and arrays, and metal nanoparticles), surface plasmon resonance spectroscopy, plasmon coupling and concentration/funneling of electromagnetic energy, surface-enhanced raman scattering, near-field imaging and microscopy, and negative refraction. Prerequisite: junior or senior level em theory course.

ECE 2250 - POWER ELECTRONICS
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to cover the fundamental concepts in the field in sufficient depth to allow students to analyze and design power electronics circuits. The course covers dc-dc converters and dc-ac converters.

ECE 2260 - SCANNING PROBE MICROSCOPY
Minimum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

ECE 2270 - FUNDAMENTALS OF PHOTOVOLTAICS
Minimum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2295 - SPECIAL TOPICS: ELECTRONICS
Minimum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2372 - PATTERN RECOGNITION
Minimum Credits: 3
Maximum Credits: 3
Emphasis on machine pattern recognition and learning; Bayes decision theory, parameter estimation, Bayesian belief networks, discriminant functions, supervised learning, nonparametric techniques, feature extraction, principal component analysis, hidden Markov models, expectation-maximization, support vector machines, artificial neural networks, unsupervised learning, clustering, and syntactic pattern recognition.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2373 - ARTIFICIAL NEURAL NETWORKS
Minimum Credits: 3
Maximum Credits: 3
This course discusses models and theories of artificial neural networks as applied to neural computing and adaptive systems. Topics cover modeling of artificial neurons and their interconnections, various learning and self-organizing processes. These include multi-layered feedforward networks, back propagation training, radial basis function networks, recurrent neural networks, associative memory and Hopfield networks, self-organizing, feature mapping, reinforcement learning and competitive learning, global search methods in artificial neural networks.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2390 - IMAGE PROCNG & COMPUTER VISION
Minimum Credits: 3
Maximum Credits: 3
This first level graduate course covers essential elements of image processing for computer vision and introductory subjects in computer vision; image segmentation: region-based, edge detection, scale space, active contours; shape description, deformable templates; textures; perspective camera model and its parameters; geometry of multiple (2) views, fundamental matrix; scene planes and homographies; consistent labeling; locating objects in 3-d space; motion analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2391 - PROJECTS IN COMPUTER VISION
Minimum Credits: 3
Maximum Credits: 3
A set of full-term projects attacking problems in image processing and computer vision. Projects will typically involve the development of problem solutions on computer vision workstations in the c programming language.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2395 - SP TOPCS IMAGE PROC/COMPTR VIS
Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in image processing/computer vision.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2410 - FOUNDS OF WIRELESS COMMUNICTNS
Minimum Credits: 3
Maximum Credits: 3
Concept related to wireless communication at the lower layers of the DSI stack and some architectural issues. Broad overviews of network topologies, the cellular concept and architecture, rudimentary concepts of radio propagation and multipath fading, antennas, introduction to digital modulation, error control, coding in wireless systems, multiple-access schemes and spectrum issues. Topics treated with existing systems as

1743
examples rather than abstractions. Both mathematical and qualitative.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2210; PROG: Swanson School of Engineering

ECE 2422 - INTRO TO INFORMATION THEORY
Minimum Credits: 3
Maximum Credits: 3
Introduction to information theory topics of entropy, mutual information, data compression, channel capacity, rate distortion theorem and channel coding theorem are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: TELCOM 2210; PROG: Swanson School of Engineering

ECE 2429 - DIGITAL COMMUNICATIONS
Minimum Credits: 3
Maximum Credits: 3
Concepts in digital modulation and coding theory with emphasis on techniques employed in a variety of communication systems, including equalization, detection of signals in noise, spread spectrum communications, modulation and coding, and frequency hopping.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: TELCOM 2210 and ECE 2410; PROG: Swanson School of Engineering

ECE 2430 - QUEUING THEORY
Minimum Credits: 3
Maximum Credits: 3
Development and application of the mathematical techniques used for analyzing the performance of communications networks. Topics include: Markovian queues, nonMarkovian queues, products form networks, approximation techniques, nonstationary queues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2120 and 2310; PROG: Swanson School of Engineering

ECE 2521 - ANALYSIS STOCHASTIC PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Probability theory, random variables, sums and limits of random variable sequences, time and frequency domain, modeling of continuous and discrete random signals, least square estimation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2523 - DIGITAL SIGNAL PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Discrete time-signal processing, discrete fourier transform and fft implementation, design and stability considerations of fir and iir filters, filter implementation and finite register effects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ECE 2525 - DETECTION & ESTIMATION THEORY
A study of optimal techniques for extracting information from the observation of random variables or random signals. This includes hypothesis testing, estimation theory, optimal receiver design, wiener and Kalman-Bucy filtering, and applications such as digital communications and medical imaging.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ECE 2580 - BIOMD APPLC SIGNAL PROCESSING

Minimum Credits: 3  
Maximum Credits: 3  
The nature of biological signals and noise, including appropriate physiological background; digital filtering; spectral analysis; automated interpretation of signals. Examples drawn from current problems in clinical medicine and research.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ECE 2595 - SPEC TOPCS: SIGNL PROCSSNG/COM

Minimum Credits: 3  
Maximum Credits: 3  
An MS level course in special topics of current interest in signal processing/communications.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ECE 2636 - FUZZY LOGIC & INTELLG CONTROL

Minimum Credits: 3  
Maximum Credits: 3  
Fuzzy logic is a design method that can be effectively applied to problems that, because of complex, nonlinear, or ambiguous system models, cannot be easily solved using traditional analytical control techniques. This course discusses these problems and introduces basic concepts of fuzzy set theory, fuzzy logic operations, fuzzification and de-fuzzification. Fuzzy controllers, including rule-based, pi-type, supervisory, and adaptive controllers are discussed. Implementation issues and the role of fuzzy logic in intelligent control are considered.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate School of Engineering

### ECE 2646 - LINEAR SYSTEM THEORY

Minimum Credits: 3  
Maximum Credits: 3  
Linear spaces and operators, mathematical descriptions of linear systems, controllability and observability, irreducible realization of rational transfer-function matrices, canonical forms, state feedback, and state estimators, stability.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### ECE 2647 - INTRO TO NONLINEAR CTRL DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering
ECE 2654 - DIGITAL CONTROL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Transform domain approach to analysis and design of digital computer control systems, linear discrete dynamic systems analysis and the z-transform, discrete equivalents to continuous transfer functions, sampled data systems, design of digital control systems using transform techniques, quantization effects, and sample rate selection.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Graduate School of Engineering

ECE 2671 - OPTIMIZATION METHODS
Minimum Credits: 3
Maximum Credits: 3
Analytical and computational aspects of finite dimensional optimization, unconstrained and equality constrained problems, basic descent methods, conjugate direction methods, nonlinear programming and the Kuhn-Tucker Theorem, linear programming, dynamic programming, multicriteria optimization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2680 - ADAPTIVE CONTROL
Minimum Credits: 3
Maximum Credits: 3
Adaptation and learning play an essential role in biological systems, and these characteristics have been widely incorporated in modern control systems. This course introduces the general principles of adaptive control and learning. Topics to be covered include: real-time parameter estimation, self-tuning regulators, model-reference adaptive systems, adaptive control of nonlinear systems, practical aspects and implementation of adaptive control systems, introduction to computational learning theory and learning in neural systems, and an example of adaptive control by the cerebellum.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2695 - SPECIAL TOPICS: ADAPTIVE CTRL
Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2769 - POWER SYSTEM ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
An introduction to modern power systems and methods of analysis. Transmission lines, network representations, network solutions, balanced and unbalanced faults, real and reactive load flow study techniques, and basic concepts in stability and economic dispatch.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2774 - POWER SYSTEMS ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
Steady state phenomena, matrix transformations, system parameters, system unbalances, digital methods, and numerical analysis techniques applied to load flow, state estimators, and fault studies in the large power systems.
ECE 2777 - POWER SYSTEMS TRANSIENTS 1
Minimum Credits: 3
Maximum Credits: 3
Lumped parameter analysis, switching transients in ac/de systems, arcing modeling, damping, current suppression, traveling wave phenomena, line discontinuities, Ferro resonance, transient recovery voltage.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

ECE 2778 - FACTS AND HVDC TECHNOLOGIES
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2780 - RENEWABLE AND ALTERNATIVE ENGE
Minimum Credits: 3
Maximum Credits: 3
Including wind, solar, biomass, thermal, wave, hydro, and other sources and systems. Investigation of applications, integration, markets, policy, and other aspects of renewable development will be studied. Supporting technologies, such as energy storage, power electronics, and controls as applied to renewable and alternative energy applications are also explored.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2781 - SMART GRID TECHN & APPLCS
Minimum Credits: 3
Maximum Credits: 3
This is a comprehensive course designed to introduce students to new technologies dedicated to reliably, efficiently and safely managing electric power across utility, commercial, industrial, and residential networks. The course will cover the application of smart grid technologies from power generation through power consumption including grid automation, smart meters, demand response, communication, electric vehicle integration, grid connectivity, renewable energy, cyber security, microgrids and the business processes. Students will gain an understanding of the how the broad spectrum of smart grid technologies is integrated into the electrical energy industry, with an emphasis on distribution systems within homes, buildings, factories, transportation systems, and the utilities serving them.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 2795 - SPECIAL TOPICS POWER
Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in power.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 2990 - MBA/MS GRADUATE PROJECTS
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

ECE 2997 - RESEARCH, MS
Minimum Credits: 1
Maximum Credits: 12
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Electrical Engineering(MEE) or Computer Engineering(MCO)

ECE 2998 - GRADUATE PROJECTS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Electrical Engineering(MEE) or Computer Engineering(MCO)

ECE 2999 - MS THESIS
Minimum Credits: 1
Maximum Credits: 12
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Electrical Engineering(MEE) or Computer Engineering(MCO)

ECE 3000 - PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
For full-time graduate students interested in industrial internships as a means of gaining practical experience in their areas of research. Students are responsible for arranging practicum with industry. See practicum guidelines and application. Requires permission of graduate coordinator.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

ECE 3162 - ADV COMPUTER MICROARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
This is an advanced level computer architecture course that covers the state-of-the-art microprocessor designs and techniques. Topics include chip multiprocessor (CMP) design issues such as cache management, interconnection networks (A.K.A. NOC), power and thermal management; three-dimensional chip design issues such as 3d circuits, 3d new memory technologies, 3d NOC, etc.; Technology challenges in nanoscale integrated circuit such as process variation, reliability and leakage reduction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3163 - COMPUTER ARCHITECTURE 2
Minimum Credits: 3
Maximum Credits: 3
Architectural considerations of computers from microprocessors through super computers, Von Neuman-Harvard, advantages and limitations, pipelining, chaining and multiple processors, memory and processor configurations, performance evaluation, stochastic models, software and technology considerations; operating systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2162; PROG: Swanson School of Engineering

1748
ECE 3167 - COMPUTER NETWORKS
Minimum Credits: 3
Maximum Credits: 3
This course covers the design and implementation of network components (systems), software and the networks themselves. The course will follow a lecture, project and homework format with an individual and a group project designed to demonstrate research and development within standards and potential standard improvements.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ECE 2162; PROG: Swanson School of Engineering

ECE 3195 - ADVANCED TOPICS-COMPUTERS
Minimum Credits: 3
Maximum Credits: 3
A Ph.D. level course in advanced topics of current interest in the area of computer engineering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3232 - QUANTUM ELECTRONICS
Minimum Credits: 3
Maximum Credits: 3
Quantum theory of the interaction of electromagnetic radiation with matter, optical absorption and emission, lasers. Selected topics from the areas of dielectric and magnetic properties of materials.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ECE 2231; PROG: Swanson School of Engineering

ECE 3233 - SEMICONDUCTOR DEVICE MODELING
Minimum Credits: 3
Maximum Credits: 3
Topics of current interest in the field of solid-state electronic devices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3235 - SEMICONDUCTOR LASERS
Minimum Credits: 3
Maximum Credits: 3
Properties of heterojunctions, stimulated emission in semiconductors, carrier and optical confinement, fabrication and operating characteristics of semiconductor lasers including double-heterostructure lasers, quantum well lasers, distributed feedback lasers, surface emitting lasers, various modulation techniques of semiconductor lasers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2231; PROG: Swanson School of Engineering

ECE 3236 - SEMICONDUCTOR OPTICS & DEVICES
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of semiconductor optics and devices, band structures, optical absorption, excitons, nonlinear optical properties of semiconductors. Optoelectronic devices including nonlinear fabry-perotetalons, nonlinear directional couplers, and self electro-optic effect devices (seel).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2231; PROG: Swanson School of Engineering

ECE 3239 - HIGH SPEED ELECTRONIC DEVICES
Minimum Credits: 3
Maximum Credits: 3
Compound semiconductors. Heterojunctions and superlattices and their application to electronic and opto-electronic devices such as HBTS, modfets, resonant tunnel transistors, injection lasers, detectors and modulators.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2231; PROG: Swanson School of Engineering

ECE 3295 - ADVANCED TOPICS - ELECTRONICS
Minimum Credits: 3
Maximum Credits: 3
A Ph.D. level course in advanced topics of current interest in the area of electronics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3374 - APPLCTNS OF WAVELET TRANSFORMS
Minimum Credits: 3
Maximum Credits: 3
This course presents applications of wavelet transforms to multiresolution signal/image processing and pattern recognition. Topics include basic notions of basis functions with compact support, localization property, multiresolution analysis, continuous wavelet transform, discrete wavelet transform, wavelet packets, image compression, signal/image demising, edge localization, texture feature extraction, and multiresolution data fusion.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2390 or ECE 2523; PROG: Swanson School of Engineering

ECE 3395 - ADV TOPCS: IMAG PROCS CMPTR VIS
Minimum Credits: 3
Maximum Credits: 3
A Ph.D. level course in advanced topics of current interest in the area of image processing/computer vision.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3422 - INFORMATION THEORY
Minimum Credits: 3
Maximum Credits: 3
Markov source statistics, the theory of information, channel capacity for noise-free and noisy channels, Huffman codes and other source coding techniques, introduction to error correcting channel codes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2521; PROG: Swanson School of Engineering

ECE 3431 - CHANNEL CODING THEORY & PRACT
Minimum Credits: 3
Maximum Credits: 3
Introduction to algebraic codes and advanced error correction techniques: linear block codes, cyclic codes, BHC codes, Reed-Solomon codes, low density parity check codes, convolutional codes, and turbo codes.
Academic Career: GRAD
ECE 3524 - DIGITAL SPEECH PROCESSING
Minimum Credits: 3
Maximum Credits: 3
The application of digital signal processing techniques in the representation, analysis, and synthesis of speech signals. Topics include digital modeling of speech signals, waveform coders, time and frequency methods in speech processing, linear predictive coding of speech, and discussion of speech processing systems in the area of human-machine communication by voice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2521 and 2523; PROG: Swanson School of Engineering

ECE 3526 - MODERN SPECTRAL ESTIMATION
Minimum Credits: 3
Maximum Credits: 3
An overview of concepts of modern spectral analysis covering traditional approaches and modern estimation methods. The properties, advantages and disadvantages of each estimator will be covered in detail and demonstrated using computer experiments. Also covered are applications of spectral estimation to signal detection and beam forming.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2521; PROG: Swanson School of Engineering

ECE 3528 - TIME-FREQUENCY SIGNAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course covers the theory and application of time-varying spectral analysis. Topics include why spectra change, the AM/FM model of signals, instantaneous frequency and bandwidth, signal density functions, the short-time Fourier transform, the Wigner distribution, Cohen's class of time frequency distributions, signal dependent distributions and the evolutionary spectrum.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ECE 2521; PROG: Swanson School of Engineering

ECE 3530 - DIGITAL COMMUNICATIONS 2
Minimum Credits: 3
Maximum Credits: 3
Binary and m-ary computer based communications. Representation theory and the geometric interpretation of the communication channel, maximum like hood decisions, multicarrier modulation, spread spectrum techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2521; PROG: Swanson School of Engineering

ECE 3557 - STATISTICAL SIGNAL PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2521 and 2523 and 2646; PROG: Swanson School of Engineering
ECE 3595 - ADV TOPICS-SIGNAL PROCESSING/COMM
Minimum Credits: 3
Maximum Credits: 3
A Ph.D. level course in advanced topics of current interest in the area of signal processing/communications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3648 - NON-LINEAR SYSTEM THEORY
Minimum Credits: 3
Maximum Credits: 3
An introduction to the (differential) geometric approach to nonlinear control (including feedback linearization, non linear observers with linear error dynamics and disturbance decoupling), Lyapunov theory and variable structure control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2646; PROG: Swanson School of Engineering

ECE 3650 - OPTIMAL CONTROL
Minimum Credits: 3
Maximum Credits: 3
Variation calculus and optimality conditions, linear quadratic problems, the Riccati equation, Pontryagin maximum principle, time optimal control, dynamic programming and the Hamilton-Jacobi equation, numerical methods, decentralized control, multicontroller-multiobjective systems, differential games.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2646; PROG: Swanson School of Engineering

ECE 3695 - ADVANCED TOPICS CONTROL
Minimum Credits: 3
Maximum Credits: 3
A Ph.D. level course in advanced topics of current interest in the area of control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3775 - POWER SYS STEADY STATE CONTROL
Minimum Credits: 3
Maximum Credits: 3
Power system component modeling, automatic generation control, area and multiarea control, economic dispatch, optimal real and reactive powerflow, hydrothermal coordination, unit commitment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2774; PROG: Swanson School of Engineering

ECE 3776 - POWER SYS CONTROL & STABILITY
Minimum Credits: 3
Maximum Credits: 3
The power system model for stability studies, response to disturbances, the behavior of machines, the effect of excitation, and mathematical techniques for stability studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
ECE 3778 - POWER SYSTEMS TRANSIENTS 2
Minimum Credits: 3
Maximum Credits: 3
Project-based course in simulation and modeling techniques for power system electromagnetic transients. Frequency-dependent and non-linear component models, with applications to transmission, distribution, power electronic and measurement systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: ECE 2777; PROG: Swanson School of Engineering

ECE 3795 - ADVANCED TOPICS POWER
Minimum Credits: 3
Maximum Credits: 3
A Ph.D. level course in advanced topics of current interest in power.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ECE 3893 - GRADUATE SEMINAR
Minimum Credits: 1
Maximum Credits: 1
A weekly series of presentations by engineers and scientists, visiting researchers, faculty, and graduate students.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
Course Requirements: PROG: Swanson School of Engineering

ECE 3894 - GRAD STUDENT SURVIVAL SKILLS
Minimum Credits: 1
Maximum Credits: 3
Seminar addressing skills in teaching, planning and conducting research, writing papers and proposals, and giving presentations. Students' writing and presentation skills will be evaluated and critiqued.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ECE 3995 - RES TOPC ELCRCL & COMPUTR ENGR
Minimum Credits: 3
Maximum Credits: 3
A research course that focuses on specific skills required by students to conduct original research in a particular area of EECE. Students will complete a project, such as a full journal paper, a proposal for research funding, or a complete patent application, as specified by the faculty teaching the course. The project should be beyond material to be included in the student's dissertation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ECE 3997 - RESEARCH, PHD
Minimum Credits: 1
Maximum Credits: 12
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Electrical Engineering(PHD) or Computer Engineering(PHD)

ECE 3998 - PHD INDEPENDENT STUDY
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: GRAD  
Course Component: Independent Study  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PLAN: Electrical Engineering(PHD) or Computer Engineering(PHD)

ECE 3999 - PHD DISSERTATION  
Minimum Credits: 1  
Maximum Credits: 12  
Academic Career: GRAD  
Course Component: Thesis Research  
Grade Component: Grad SN Basis

Emergency Medicine

EMED 5376 - SPECIALTY CARE CLERKSHIP  
Minimum Credits: 0  
Maximum Credits: 0  
The specialty care clerkship is a four (4) week rotation that includes a combination of one week experiences in the disciplines of ENT, ophthalmology, adult emergency medicine and pediatric emergency medicine. In addition to four weeks of clinical time, students will attend weekly lectures, workshops and lab activities. This required clerkship begins with orientation and a suturing and splinting session followed by a simulation-based session in phone communication (how to best communicate medical information over the telephone to patients). One morning each week there will be an ophthalmology lecture and an ENT lecture. Additional morning workshops include dermatology, EKG cases, dizziness and audiology, musculoskeletal exam and rehab and musculoskeletal radiology. The lecture will be followed by clinical responsibilities. Students are evaluated by each specialty area based on clinical performance and will take an on-line proctored examination. One grade will be assigned for the entire four week rotation.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

EMED 5380 - FUNDAMENTALS OF EMERGENCY MED  
Minimum Credits: 0  
Maximum Credits: 0  
This four week clinical elective is designed for the student seeking exposure to acute care medicine, with an emphasis on the initial approach and decision-making. The clinical experience will consist of supervised evaluation of undifferentiated patients presenting to the emergency department. Basic clinical skills such as the directed history and physical examination and clear, concise documentation will be stressed, while evaluating the diverse illnesses encountered in the emergency department. Students will experience a variety of shifts in the emergency department that may include days, evenings, overnights, weekdays and weekends. Development of medical decision-making skills will be encouraged by working closely with the attending staff and emergency medicine residents. The course curriculum includes an orientation to emergency medicine and a laboratory experience in suturing and wound care basics, acute care oriented orthopedic evaluation and splinting techniques. Students will also have the opportunity to participate in the emergency medicine grand rounds and other conferences.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

EMED 5390 - EMERGENCY MEDICINE  
Minimum Credits: 0  
Maximum Credits: 0  
This elective is offered to third year medical students who will be integrated into the health care team at the emergency room of a hospital. The student will learn the basics of evaluating, both serious and acute, patients under the direct supervision of an attending or senior resident. Directed history, physical exam and lab evaluation will be taught. Directed didactic sessions, in addition to bedside teaching, will reinforce concepts and facts as well as introduce the learner to topics relevant to the field of emergency medicine.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

EMED 5450 - EMERGENCY MEDICINE
EMED 5455 - EMERGENCY/COMMUNITY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
4 week elective will incorporate emergency department's larger community role with its disproportionate share of care to the poor, uninsured and disadvantaged. Assess and manage patients with special needs at high-risk by history of substance abuse, homelessness, mental illness, or interpersonal violence. Patients tracked via home, shelter or drop in clinic visits under faculty supervision. Work 32 clinical hrs./wk. including daylight, evening and overnight shifts. In addition to didactic lectures, students spend one-half day to follow up tracking and care of high-risk patients.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

EMED 5460 - MEDICAL TOXICOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four week clinical elective will provide students with experience in the assessment and treatment of toxicology patients. Students will spend time with toxicology faculty in consultation, examination, treatment, and follow-up of patients in the emergency, inpatient and outpatient settings. The clinical experience will include daily clinical rounds on inpatients, outpatient consults, and Pittsburgh poison center case review. Students will be on-call daily with the rotating residents and medical toxicology staff member and will be expected to join the resident and attending on cases presenting to UPMC Presbyterian and Children's Hospital of Pittsburgh. A portion of the rotation will be at the Pittsburgh poison center, where students will learn from current patient cases and summary case reviews. Daily teaching sessions will be provided by members of the medical toxicology service on the spectrum of toxicology subjects. Sample topics include: initial approach to the toxicology patient, decontamination, acetaminophen, salicylates, toxic alcohols, antidepressants, iron and digoxin. Students will also attend the medical toxicology service lectures. Additionally, the student will be encouraged to participate in ongoing research projects if available (e.g. chart review). Students will also be encouraged to prepare interesting cases for scientific presentation and publication. The overall curriculum will help students develop their knowledge base in medical toxicology, and improve their ability to diagnose and treat a poisoned patient.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

EMED 5465 - POINT OF CARE ULTRASONOGRAPHY
Minimum Credits: 0
Maximum Credits: 0
This elective serves as an introduction to the use of point of care ultrasonography (POCUS) over the course of four weeks. The course will expose students to the use of focused, point of care ultrasonography to make bedside clinical decisions for the care of acutely ill patients. POCUS as serve as an extension of the physical exam to aid physicians narrow their differential diagnosis, provide direct visualization of pathophysiology as well as tracking changes to medical interventions, improve accuracy and safety in procedural skills and obtain direct visualization of pathology without the need for transportation to specialized suites or the use of radiation. These skills are essential in the present medical climate where pocus can aid in improved safety, cost-savings and even patient satisfaction. As the use of this technology expands, it is crucial for medical trainees to have exposure.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

EMED 5470 - QUALITY AND PATIENT SAFETY
Minimum Credits: 0
Maximum Credits: 0
The quality and patient safety elective is designed for the motivated learner with self-study modules and learning activities facilitated by preceptors remotely. The course complements busy months of interviewing and travel through the use of on-line media, case reviews, videos, podcasts and blog discussions. Instead of in-person meetings, course directors employ on-line meetings and electronic touch points to ensure progress throughout the
Learning in this course is asynchronous, so timing is at the convenience of the individual learner. Participants will spend at least 2 hours per day completing required online learning modules. In addition, students will work independently to research, understand and create a root cause analysis and a rapid process improvement plan. Students will review the RCA and QI plans of their peers, provide feedback and participate in discussion of their work.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**EMED 5650 - INDIVIDUALIZED CLINICAL COURSE**

- Minimum Credits: 0  
- Maximum Credits: 0  
An individualized course of study may be arranged with the department of ophthalmology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**EMED 5735 - SCIENCE OF RESUSCITATION (ILS)**

- Minimum Credits: 0  
- Maximum Credits: 0  
This 4-week elective will satisfy requirement for integrated life science course of senior year. Course objectives: 1) identify major physiological influences affecting resuscitation and trace their implementation into clinical guidelines; 2) critique clinical study of resuscitation; 3) become confident conducting medical resuscitation, including use of relevant equipment; 4) appreciate practical/ethical issues surrounding research on emergency interventions. Small group sessions, live animal/simulator sessions and written research critique is required.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**EMED 5740 - EXERCISE IS MEDICINE**

- Minimum Credits: 0  
- Maximum Credits: 0  
This is a four week selective that meets the requirement of an integrated life science course. The principles of the exercise is medicine program are shared by the American medical association (AMA) and the American college of sports medicine (ACSM) and they are the focus of this course. At the end of this course, the student will have an understanding of the evidence for the role of exercise in the treatment and prevention of chronic disease and how to apply the evidence to their practice. There are multiple learning modes in this course, including didactic, laboratory, and independent study. The didactic portion will be an active participation exercise in a journal-club format. The goal of the didactic portion will be to critically evaluate the evidence for the role of exercise in chronic disease providing the foundation for understanding, creating, and employing comparative effectiveness research (CER). Through these reviews, the student will evaluate the AXSM/aha exercise recommendations. Laboratory experiences in exercise science will provide insight into the acute response to exercise and exercise stress testing reinforcing principles of physiology learned in the first two years of the curriculum. Students will participate in the labs, wear activity monitors and pedometers at various times during the course to track daily activity to appreciate how these devices can be used to motivate and modify patient lifestyle. Finally, each student will complete an independent study on an aspect of exercise and chronic disease treatment or prevention.

**Academic Career:** MEDS  
**Course Component:** Workshop  
**Grade Component:** H/HS/S/LS/U

**EMED 5898 - INDIVIDUAL STUDY OR RESEARCH**

- Minimum Credits: 0  
- Maximum Credits: 0  
This is a senior-level elective offering. This is a four week elective for the student interested in participating in clinical or basic science research in emergency medicine. The student will be offered the opportunity to choose a research project which interests him or her. The student will work closely with the emergency department attending staff as well as the clinical research coordinator for the department of emergency medicine. The coordinator will meet weekly with the student to provide guidance as well as education materials.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U
EMED 5899 - INDEP STUDY IN EMERGENCY MED
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

EMED 5900 - EXTRAMURAL EMERGENCY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in emergency medicine may be arranged at an institution other than the University of Pittsburgh school of medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS

Minimum Credits: 1
Maximum Credits: 1
This course will detail various types of dental trauma; the methods of treatment and possible long-term effects trauma have on oral structures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2821 - SPECIAL LECTURES SERIES
Minimum Credits: 2
Maximum Credits: 2
This course will include an array of lectures that will be presented by experts in various fields, exposing the students to a wide variety of topics and ideas including practice management, dental jurisprudence, and teach methodology

Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad Letter Grade

ENDOD 2921 - ENDODONTIC SURGERY
Minimum Credits: 2
Maximum Credits: 2
This course will provide the surgical aspect of endodontic treatment. Proficiency in the treatment planning of endodontic surgery, as well as evidence based foundation for all aspects of surgical treatment will be explored. 1) Develop the skills for proper case selection and treatment planning of surgical cases. 2) Understand soft tissue management, and flap design as it pertains to endodontic surgery. 3) Demonstrate knowledge of guided tissue techniques and materials. 4) Demonstrate an understanding of wound healing of both soft and mineralized tissues as they pertain to endodontic surgery. 5) Discuss methods of hemostasis and crypt control during periapical surgery. 6) Understand the possible postoperative complications associated with endodontic surgery and how to manage these situations. 7) Have a strong knowledge of the head and neck anatomy. 8) Understand possible periodontal considerations with the various flap designs. 9) Discuss various suture techniques for specific for the conditions that present themselves.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ENDOD 2999 - RESEARCH PROJECT
Minimum Credits: 1
Maximum Credits: 1
This course involves independent or joint research in the field of endodontics. The completion of this class, oral presentation and written paper must be submitted.

Energy Resources

ENRES 2010 - ENERGY TECHNOLOGIES
Minimum Credits: 3
Maximum Credits: 3
Overview of reserves and technologies of energy resources, including fossil, nuclear, and renewable sources such as solar, biomass, wind, geothermal, and hydropower. Environmental problems, such as acid rain and greenhouse effect, associated with these technologies. World energy consumption and supply.
ENRES 2011 - SOLAR TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2012 - GEOLOGY OF ENERGY RESOURCES
Minimum Credits: 3
Maximum Credits: 3
Introduction to common rocks and minerals and the fundamental principles of geological occurrences and processes. Interpretation of geologic maps and three dimensional representations of underground deposits. Description of energy resources including the geologic settings, origins, and characteristics of petroleum, natural gas, coal, uranium, and geothermal resources.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2013 - PETROLEUM TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
Overview of the oil and gas industry. Petroleum geology. Exploration methods. Drilling and well completion. Production methods. Oil and gas reservoir recovery.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2014 - COAL TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
Chemical and physical properties and extraction and utilization of coal. Specific topics include coal chemistry, mining technology, preparation, pyrolysis, combustion, gasification, and liquefaction. Economic and environmental aspects.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2016 - ELECT POWER GENERATION & DISTB
Minimum Credits: 3
Maximum Credits: 3
Overview of the electric utility industry. Principles and problems of electric power generation, transmission and distribution. Overall system operating techniques, including economics, rate schedules, siting problems, and societal interaction. Survey of alternate energy sources.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2018 - ENERGY SYSTEM ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Definition of energy system, potential of energy conservation, thermodynamic theory, waste heat recovery, analyses of boilers and furnaces, HVAC systems, electric lighting systems, insulation, and economic analyses of capital projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2019 - NUCLEAR ENERGY TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of nuclear physics and nuclear reactors theory. Description and discussion of nuclear power reactors and major design aspects. Fundamentals of nuclear radiation characteristics and effects. Interrelation between nuclear power and society. Radiation and health physics; safety and licensing, waste disposal, environmental effects, and resources and economics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2020 - ENERGY DEM& ANAL & PROJECTION
Minimum Credits: 3
Maximum Credits: 3
Overview of energy supplies and demands in a society. Energy demands in different economic sectors. Energy demands of both industrialized countries, and developing countries, their similarities and differences. Forecasting methods. Models used in energy demand analysis and projections.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2022 - ENERGY AND THE ENVIRONMENT
Minimum Credits: 3
Maximum Credits: 3
Toxicological, epidemiological, and environmental health aspects of energy, primarily of coal combustion and nuclear fission. Energy-related sources of pollution/environmental contamination, its effects on human biology, and its evaluation and control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2051 - ADV SOLR RENEWABLE ENRGY TECH
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of solar technology including selected topics in heat transfer and fluid mechanics; radiation calculations; theory and performance of flat plates, photovoltaic, and concentrating devices; system and component engineering, analysis, and economics; and computer applications for solar engineering and economics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2054 - ADVANCED COAL TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
Chemical and physical analysis of coal; coal mining and preparation; thermodynamics of steam generation from coal; kinetics and design of processes for coal gasification and liquefaction (direct and indirect).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2056 - ADVANCED ELECTRIC TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
A quantitative overview of power generation systems, including plant siting, economics, scheduling, power flows, transmission, safety, and use of power.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ENRES 2059 - ADVANCED NUCLEAR TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
A technical introduction to nuclear energy as an electric power generation source. Fundamentals of nuclear reactor design, with emphasis on core design and safety aspects. Related economic and sociopolitical issues will also be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Engineering

ENGR 2010 - THE CULTL & POLCY DIMN OF TECH
Minimum Credits: 3
Maximum Credits: 3
While the fundamentals of science are culture independent, the implementation and practice of technology is highly culture dependent. This course will focus on how culture, including religion, values, language, and traditions, as well as governmental policy affect technological business and industry. The course will consist of a series of lectures by specialists, readings, group discussions, a term project, and presentations. The term project will be carried out in teams consisting of both engineering & business students as well as ones from other university units.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2050 - TECHNICAL WRITING
Minimum Credits: 3
Maximum Credits: 3
This course is designed for non-native English speaking advanced graduate students preparing to write thesis or dissertation proposals in engineering. Topics covered include: format and content of reports needed in technical writing, abstracts and summaries, project proposals and research reports; correcting language problems encountered by non-native English writers and technical writers in particular.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

ENGR 2051 - PRODUCT REALIZATION
Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course considers diverse aspects of product realization process. Aspects include defining user requirements, creation of computer based model and designs of a product from an existing product, rapid prototyping techniques and development of a manufacturing plan. Teams of 3-4 students from engineering and business will take a product with a microsystem or mems technology feature from concept to working prototype. In doing this students will address issues of market analysis, design, manufacturing design and product planning.

**ENGR 2060 - SOCL ENTREP-ENGRG FOR HUMANITY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course will explore the concepts of social entrepreneurship through the three tenets of sustainability: environment, economy, and equity in the context of complex or ‘wicked’ problems. An introduction will provide a foundation in sustainability and social entrepreneurship while exploring the impact of innovative business models, such as disruptive innovation and Prahalad and Hart's fortune at the bottom of the pyramid. Additional class time will explore different examples and challenges in the developed and developing worlds. Through weekly readings, the course will focus on classroom discussions about the tenets of sustainability and the relevance of engineering in crafting ‘solutions’. The course project will provide students with an opportunity to work with a multi-disciplinary team to design an engineering-based business plan targeting a specific challenge either locally or in the developing world.

**ENGR 2101 - NUCLEAR CORE DYNAMICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course reviews the mathematics of nuclear reactor kinetics. Linear systems of ordinary differential equations are solved by state vector
techniques, Laplace transform techniques, or finite difference techniques including the treatment of discretization errors resulting from various finite differencing approximations. A review of the physics of nuclear kinetics is followed by treatments of the kinetics equation including the effect of uncertainties, approximate solutions, and the interpretation of experiments to measure kinetics parameters. Representations and the physical basis of reactivity feedback mechanisms are treated. Lumped and distributed parameter models of fuel, coolant, fission products, and selected plant components are derived and applied to develop quantitative static relationships and qualitative dynamic results for transient conditions. The course provides an introduction to reactor protection and safety analysis.

**ENGR 2102 - NUCLEAR PLANT DYNAMICS & CTRL**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides an integrated engineering examination of a nuclear power plant from the perspective of instrumentation and control systems used to infer the condition of the nuclear plants and its systems, control its normal operation, and provide protection during transient situations as well as assess core damage during severe accident situations. Students will apply previous knowledge of analog, digital, and microprocessor electronics techniques to nuclear power plant design and operation and reactor protection and safety considerations that influence the design of the reactor plant. A major outcome of this course will be an integrated understanding of the interaction between the physics of nuclear plant control (reactivity and heat balance) and the control and protection systems. This integrated plant understanding will be essential for the successful completion of the integrated nuclear power plant operations course.

**Academic Career:** GRAD

**Course Requirements:** PROG: Swanson School of Engineering

**ENGR 2103 - INTGRTN OF NUCLR PLANT SYMS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines design bases for major systems and components in a nuclear plant and evaluates how the systems function in an integrated fashion. The student will examine a typical nuclear power plant and those components and systems of the nuclear plant complex that have the potential for affecting core power, and whose failure could be an initiating event for a plant transient. Dynamic relationships for the systems developed in the companion nuclear courses will be transformed into stable, numerical algorithms for computer solutions and system interactions will be illustrated using a major industry transient analysis code. Emphasis is on how operations of and faults in systems and components can influence reactivity and core behavior. Through classroom discussions the students will assess engineering problems and operational problems that have been experienced in historical nuclear plant operations. The intended outcome is an aptitude for predicting complex transient behavior of the integrated nuclear plant considering factors that are important for safe and efficient operation: reactivity management and control, coolant inventory control, and core heat removal.

**Academic Career:** GRAD

**ENGR 2104 - NUCLEAR OPERATIONS AND SAFETY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course reviews the development of reactor safety concepts, the emergence of safety strategies and culture, and the perspectives of severe accidents and how they can be mitigated. Risk-influenced regulatory practices will be introduced and quantitative use of probabilistic risk assessment will be described in terms of its use as a guide to intelligent decision-making. The characteristics of accident progression in the reactor vessel and containment in the unlikely event of core melting and relocation of fuel material will be explained. Offsite impacts of such severe accidents will be introduced. Source terms, dispersion of radionuclides, and dose projections will be developed for both conservative and realistic evolutions. Protective actions and emergency preparedness will be introduced. This course will cover the regulatory aspects of nuclear operations and the roles that the NRC, INPO, WANO and the IAEA play and what impact each has on plant operations. An introduction into regulatory requirements, the safety analysis report, nuclear safety and licensing, and whistle-blower rules will be provided.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**ENGR 2105 - INTGD NUCLR POWER PLANT OPRTNS**
Minimum Credits: 3
Maximum Credits: 3
This course promotes understanding of how the integrated nuclear plant works and what challenges the operator faces, and helps an engineer 'speak operations' with interfacing groups. Use of the replica simulator is an effective way for students to understand accident control, emergency operating procedures, and how the control room interfaces with the rest of the plant. Emphasis is placed on understanding plant characteristics and controls, rather than on developing control manipulation skills. Intended outcomes are an aptitude for predicting transient behavior of the integrated plant and a command of reactivity management and control that is important for efficient operation of a nuclear plant complex. The course presumes knowledge of the major systems in a nuclear power plant and will emphasize how operations of and faults in those systems and components can affect reactivity and core transient behavior.

ENGR 2106 - NUCLEAR QUALITY ASSURANCE MGMT
Minimum Credits: 3
Maximum Credits: 3
An introduction to the basic concepts of nuclear quality assurance through a series of case studies of the 18 criteria of NQA-1, 10CFR50 appendix B and other applicable standards that govern work in the construction, service and the supply of safety related items to support the nuclear industry. There will be a concentration of pragmatic examples of what to expect as engineers in support of nuclear power plants. These lectures will highlight such topics as the following: small modular reactors, new passive system designed in the new generations of nuclear power plants, relationships with the NRC, authorized nuclear inspectors, and the nation board, what to expect with respect to acquiring patents and your registered professional engineer qualifications, what is critical to know about non-destructive examinations, software control and validation and verification requirements, an introduction to auditing, welding and other special processes.

ENGR 2107 - HI PERF CMPTNG ALGRTHM & MTHS
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to solve complex physical problems using algorithms developed for supercomputing platforms. The course will introduce key concepts in the field of high performance computing, including how to design algorithms. The theoretical concepts will be tied directly to practical applications in the field of science and engineering such as radiation transport, heat transfer, and acoustics. Particular attention will be devoted to hardware selection for supercomputing applications, and will cover the concept and utilization of "open source" libraries, a key component for rapid algorithm development in today's scientific environment.

Academic Career: GRAD

ENGR 2110 - NUCLEAR MATERIALS
Minimum Credits: 3
Maximum Credits: 3
This course presumes that students have the knowledge base needed to understand materials issues associated with the design and operation of nuclear power plants, such as basic concepts of physical metallurgy, a mechanistic and microstructural-based view of material properties, and basic metallurgical principles. This course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well the effects of irradiation on corrosion performance, as well as the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

Academic Career: GRAD

ENGR 2112 - NUCLR CHEM AND RADIOCHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
Nuclear and radiochemistry are subdisciplines of nuclear science that focus on the study of radioactive materials and their applications. The course will provide students with knowledge of fundamental nuclear science concepts that are key to the understanding of nuclear power plant safety, spent fuel and nuclear waste management, nuclear fuel reprocessing, environmental radioactivity, nuclear forensics, radionuclide production, medical imaging, nuclear pharmacy, and medical and health physics. The proposed course will consist of lectures on nuclear science fundamentals that include: atomic structure, nuclear models and properties, phenomenon of radioactive growth and decay, radiation emissions, nuclear reactions, radiation interactions with matter, radiation detection and measurement, radiation dosimetry and biological effects, and applications of nuclear and radiochemistry in science, engineering, and medicine.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ENGR 2113 - RADIATION DETECTION & MSRMT
Minimum Credits: 3
Maximum Credits: 3
This combined lecture and laboratory course will provide students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical basis of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.

ENGR 2115 - HEAT TRNSF FLUD FLOW NUCLRPLNT
Minimum Credits: 3
Maximum Credits: 3
This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer, and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole. Principles are applied through the application of major industry codes to specific cases.

ENGR 2118 - COMPUTATIONAL RADIATN TRANSPRT
Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth review of modern computational techniques used for solving the linear boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern radiation transport through materials, monte carlo methods for the simulation of radiation transport, a first-principles derivation of the boltzmann
radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in Legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the Boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also place a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

Academic Career: GRAD

ENGR 2120 - MATHMTL MODELING NUCLR PLANTS
Minimum Credits: 3
Maximum Credits: 3
Graduate students will develop the graphics/simulation framework and the underlying mathematical models for simulating nuclear power plants in ME/ENGR 2120 mathematical modeling of nuclear plants. Models will be developed in Matlab/Simulink™ and configured to run on a PC so that students can both examine the mathematical models on which the simulation is based and use the simulation program in laboratory-like sessions to study the effect of design changes on plant behavior. The simulation model fidelity developed is suitable for educational purposes and provides students with a desktop tool to realistically model and better understand reactor performance under various conditions. While it would not be intended to replace or duplicate the high-fidelity dynamic simulation used in major accident analysis codes such as Relap, Trac, and Trace, the course will provide the student with an introduction and a working knowledge what is embodied in these industry standard codes.

Academic Career: GRAD
Course Component: Lecture

ENGR 2125 - CASE STDS NUCLR CODE STANDRDS
Minimum Credits: 3
Maximum Credits: 3
Presentation of major issues associated with systems and component engineering relative to the nuclear power industry and the industry's consensus codes and standards. The course provides an explanation of the necessity of consensus codes and standards, a high-level view of codes and standards organizations, and shows how codes and standards promote the safe operation of nuclear power plants. The course discusses how the NRC adopts and makes use of consensus codes and standards. It covers codes and standards for current, advanced and next generation, and high-temperature reactors, including global conformity assessment requirements. Relevant codes and standards from other communities, including nuclear quality assurance, are also summarized.

**ENGR 2210 - UNDST BRAZIL-PREP RES & STUDY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This seminar is specifically designed for students who will be doing research and/or studying in Brazil. It introduces the economic, political, social, and cultural aspects of Latin America in general and brazil in particular. The seminar is organized and conducted by the center for Latin American studies, and features guest lectures from on brazil, readings from current popular literature and news sources (available from the Eduardo Lozano Latin American collection, a library resource of over 340,000 volumes spanning 30 years), and contemporary films (such as decade of destruction: killing for land and Brazilian populations: stories and myths). The first half of the course will introduce students to day-to-day life in brazil, as well as its current socio-economic situation, the influence of politics and ethnic relations, and the many aspects of Brazilian culture. The second half will focus on disciplinary perspectives that allow students to explore regional issues from a variety of viewpoints. The final seminars in the semester will be used for the presentation of individual student reports on a topic related to Brazilian life, such as the governmental structure, university system, or integration of technology with indigenous lifestyles and traditions. This course is required for all Igert fellows.

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This third semester of Brazilian Portuguese is specifically designed for engineering students who will be doing research and/or studying in brazil. The course covers technical and educational terminology through examination of Brazilian sustainable engineering case studies while further advancing the students' knowledge and ability in Brazilian Portuguese. The course will further enhance the cognitive skills of engineering students, and give them an appreciation of the interrelation of career paths, language skills, and cultural awareness. This course is required for all fellows.

**ENGR 2256 - ENGR IN THE AMERICAS PERU**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad Letter Grade
ENGR 2256IS - ENGR IN THE AMERICAS PERU- IS
Minimum Credits: 0
Maximum Credits: 0
Non-graded course for in-state tuition.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: No Grade Required

ENGR 2256OS - ENGR IN THE AMERICAS PERU- OS
Minimum Credits: 0
Maximum Credits: 0
Non-graded course for out-of-state tuition.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: No Grade Required

ENGR 2400 - PRACTICAL INTO COMPTL SCIENCE
Minimum Credits: 1
Maximum Credits: 1
The course will introduce class participants to the basic methods of computational science, as used by students engaged in research in the natural sciences and engineering. The aim of the class is to make students, with little or no experience, comfortable working in a high performance computing (HPC) environment. Among the topics covered in class will be an introduction to working with the Linux operating system, compiling scientific/engineering software packages, an introduction to scientific programming in Fortran, optimizing and debugging programs, and running calculations in a HPC environment. No previous experience in programming is required to participate in the class. The center for molecular and materials simulations (CMMS) facilities will be made available for use by class participants as an example of a HPC environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 2401 - INTRO TO PARALLEL COMPUTING
Minimum Credits: 1
Maximum Credits: 1
This course will provide hands-on experience with code development within shared and distributed memory architectures, particularly within the open MP and MPI parallelization models. While the content and style of the course will appeal to scientists and engineers with interests in molecular modeling, students from other disciplines will benefit from the interactive problem solving aspect. Simulation techniques from molecular dynamics (MD) and Monte Carlo (MC) methods will be used to illustrate many of the computation issues encountered in the physical sciences. The student should already be comfortable navigating within a unix/linux environment and understand the procedures for compiling source code. Prior programming experience will be advantageous but not required. However, a willingness to actively participate within the class discussion will go a long way. By the end of the course, students will have a set of MD and MC codes at their disposal, some experience for extending these codes to other systems and references for seeking out additional resources in parallel computing.

Course Requirements: PROG: Swanson School of Engineering

ENGR 2402 - INTRO COLLABRTV SCNTFC PRGMG
Minimum Credits: 3
Maximum Credits: 3
This class aims to provide students with the skills necessary to utilize high performance computing (HPC) in their research. A rigorous treatment of C/C++ language with relevance to scientific programming is complemented by practical introduction to using Linux command-line and development tools. As the next generation scientific software become more and more complex, being able to build upon existing code-base and the ability to work as a team for concurrent code development is a must. The course work and assignments are designed for a unique, practical experience in these aspects by requiring the students to utilize high-performance software libraries and collaborative code development tools. The class lectures are held in a computer laboratory and include interactive demonstrations. Students will be provided accounts on a supercomputing cluster. Simulation techniques from molecular dynamics (MD), Monte Carlo (MC), electronic structure methods, and computational transport phenomena (via pdes) are used to illustrate many of the computational issues encountered in the physical sciences and engineering. A practical introduction to parallel programming using OpenMP and MPI is given towards the end.
Academic Career: GRAD
ENGR 2403 - INTRODUCTION TO LINUX
Minimum Credits: 1
Maximum Credits: 1
In this class students will learn to utilize a modern gnu/Linux environment. Students will be provided the opportunity to use Linux on their own laptop desktop. Through administering their personal system, students will gain practical experience with navigating within the Linux environment. Topics will include the Linux command line, creating and editing text files on the terminal, file manipulation, connecting to other remote machines and basic shell scripting.

ENGR 2404 - SCNTFC COMPUTING USING PYTHON
Minimum Credits: 2
Maximum Credits: 2
The introduction to Linux class will be followed by an introductory and intermediate level programming principles and techniques with examples in Python. Scientific libraries and utilities will be emphasized in a manner that will be ultimately useful across disciplines. The class lectures are held in a computer laboratory and include interactive demonstrations. Students will be provided accounts on a computing cluster where they will be given weekly programming tasks and gain hands on experience. The material will be complemented by an introductory coverage of parallel tools in Python for distributed, shared memory, and GPU programming.

ENGR 2450 - ENGINEERING- THE GERMAN WAY
Minimum Credits: 1
Maximum Credits: 18
This course highlights the German approach to engineering from various perspectives. It is designed as mixture of in-class lectures and industrial experience in the form of factory tours. Four broad topics are addressed from the German perspective: (1) R&D management, (2) production and manufacturing systems, (3) digital factory layout and factory simulation, and (4) product-ergonomics and ergonomic aspects in manufacturing. In addition students select one of two additional options dealing with unique aspects of the German business economy: (1) the nature of cooperation between trade unions and employers or (2) the impact on technology law and harmonization on engineering in Europe.

**ENGR 2600 - GLOBAL ENGINEERING TECHNOLOGY**
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Globalization and innovation will be studied with a particular emphasis on China in conjunction with the Innovate 2011 conference. As such the course provides both the preparation for the conference and the post-conference synthesis of what was learned during the conference. The course will be jointly taught by University of Pittsburgh and Rice University faculty exclusively for those students who will be delegates to the Innovate conference. Guest lecturers will be invited from the two participating universities who will discuss the history, government, religion, business climate and culture of China. This course requires participation in the Innovate 2011 symposium that will visit Beijing, Suzhou, Hangzhou and Shanghai China from March 3 - 13.

ENGR 2631 - INTRO TO MINING ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
The course introduces students to: 1) the history and importance of mining, 2) the exploration and development of surface and underground mines, 3) modern mining methods and operations, 4) common mining equipment, 5) fundamentals of mine ground control and ventilation, 6) elements of coal preparation and mineral processing plants, and 7) mine health and safety management. It is designed to provide students with basic understanding of the primary elements of a mining operation and the engineering issues associated with operating a mine in a safe, effective, and sustainable manner. The mining industry is replete with technical jargon and specialized processes and machinery that require mastery by students prior to exploration of more technically complex engineering coursework. Introductory lectures and field trips help to prepare students for the rigors of studying the other mining engineering courses offered within the Swanson School of Engineering. ENGR 2634 - ENVIRONMENTAL CONTROLS MINING
Minimum Credits: 3
Maximum Credits: 3
The course is designed to study the environmental impact of coal, stone, and other mining operation and examine the engineering controls used to mitigate these impacts. The examination begins with the exploration and permitting of the mine site, emphasizing important environmental issues. Next, the impacts of active mining on land and water use are outlined. Most of these issues are related to subsidence impacting surface structures and water movement both at the surface and underground. To complete the mine's life cycle, closure and remediation issues are investigated. Lastly, a detailed examination of the issues associated with abandoned mined-lands, i.e. Acid-mine drainage, mass-wasting, fires, etc., Are studied. Throughout the course, engineering controls that focus on mitigating the environmental impacts of mining are acknowledged and assessed.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2450 - PROSEMINAR FILM MEDIA STUDIES
Minimum Credits: 1
Maximum Credits: 1
All students in the Ph.D. Film studies program are required to complete a one credit proseminar in film and media studies prior to taking their comprehensive examinations. Enrolled students attend a designated lecture by invited scholars, as well as an associated ninety-minute seminar conducted by a film studies faculty member concerning the work of the speaker or the topic addressed. The faculty member conducting the seminar will typically choose pertinent readings to be completed prior to the lecture and seminar. The proseminar is usually offered twice a year: once during the fall term and once during the spring, with a lecture and its associated seminar scheduled each term. Invited scholars may or may not participate in the seminar meetings. Dates and times of visiting speakers and the associated seminars will be announced well in advance so that students may plan their schedules accordingly. A student in the program may repeat the proseminar for up to three credits. The proseminar in film and media studies seeks to expand and enhance our graduate students' experience of the critical exchange of ideas, by involving them more fully in the contemporary research being conducted by film and media scholars from around the world.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

ENGFLM 2451 - FILM HISTORY/THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will explore issues relating to film theory, history and research methodology. We will discuss dominant modes of film criticism and explore the creation of cinema history. We will examine different formulations of this history, tracing how certain explanations of events in cinema have come to prevail, and how certain methods of writing about film have become institutionalized.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2452 - FILM HISTORY/THEORY 2
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the history and theory of cinema from 1960 to the present. While individual theorists and historians will be discussed (e.g. Cavell, Deleuze, Frampton, Kluge, Gunning, Mulvey), there will be special attention paid to historical and theoretical arguments within film studies, such as: psychoanalysis and theories of spectatorship; apparatus theory; historicism and archival research; film and philosophy; theories of genre, adaptation, and performance; neo-formalism and cognitive theory; and the rise of new media, from television to digital cinema and from Imax to video games. These arguments will be explored through major film movements and film-makers, taking up topics such as international art cinema, the changing Hollywood studio system, the role of political cinema, and the growing importance of documentaries.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2455 - FILM HISTORIOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This course will look into theories of film history exploring philosophies behind their social, political, economic, technological, and textual stakes. We will analyze how various forms of film history, intellectual and popular, assert their truth and credibility, and discuss how these kinds of claims might be supported and contested. We will explore the problems of writing film history, particularly in eras where little material survives for any kind of study or where language becomes a major barrier.

ENGFLM 2457 - FILM AND ETHNOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This course will engage the visual and narrative strategies of the "ethnographic imagination" addressing issues of cultural representation, truth, visuality, and epistemological implications of how anthropologists and documentary filmmakers construct other cultures. We will start with the history of ethnographic cinema so as to stage a broader inquiry into forms of popular and everyday ethnography that have accompanied anthropological practice since its inception. In addition to problematizing distinctions such as science and entertainment, authenticity and hybridity, non-fiction and fiction, and self and other.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2458 - ESSAY FILM/DOCUMENTARY FILM
Minimum Credits: 3
Maximum Credits: 3
This course will explore documentary from critical and creative vantage points. Key theoretical texts from the interdisciplinary field of documentary studies will address the pertinent ethical, formal and thematic concerns.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2460 - FILM AND LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course examines the historic and theoretical relationship between film and literature. Among the topics to be considered are: (1) narrative structure in film vs. literature; (2) parallels between filmic and literature genres; (3) adaptation from literature into film; (4) the case of the writer/director; (5) the influence of cinema on writing; (6) the politics of high vs. low culture distinctions; (7) a comparison of film and literature criticism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2462 - FILM COMEDY
Minimum Credits: 3
Maximum Credits: 3
Since the earliest days of the cinema, film comedy has been one of the most profitable, prevalent and persistent genres-ranging from the primitive burlesques of Edison or Lumiere to the popular features of today. While comedy appeals to a viewer's sense of pleasure, it also addresses her intellect, for as Ousmane Sembene once said, comedy "makes people laugh but it also makes them think." That is precisely what we will do in this course: think through comedy. Here, it is interesting to note that, in 2010, the academic journal comic studies began publication.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2465 - FILM AND AESTHETICS
Minimum Credits: 3
Maximum Credits: 3
This course explores the intersection of cinema and philosophical aesthetics. Although these disciplines have historically had little to do with one another, the resources of aesthetics’ focusing on topics such as the sensuous quality of images, and the complexity of viewers' experience of them; the centrality of a viewer's (aesthetic) judgement in grasping the connections films make between events and ideas; the way this judgement ties the individual viewer to a broader viewing public; and the relation between nature and are’s can help illuminate important aspects of cinema. Consequently, the first half of the course will introduce a tradition of philosophical aesthetics, reading thinkers such as Hume, Kandt, Diderot, Schiller, Hegel, Nietzsche, Adorno, Cavell, Danto, Mothersill, Bernstein, and Scarry. The second half will look in detail at a particular feature of cinema, working through the history of its use in light of this background of aesthetics.
ENGFLM 2466 - FILM AND MODERNISM
Minimum Credits: 3
Maximum Credits: 3
This course will explore the broad relationship between the cinema and the modernist cultural movement. It will present an overview of the term, "modernism", and investigate the formal experimentation associated with the movement in film. It will then explore such major themes associated with modernism as: urbanization, primitivism, mechanization, propaganda and commodification, language, and nationalism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2467 - CINEMA AND TRAUMA
Minimum Credits: 3
Maximum Credits: 3
Trauma studies now stands at the forefront of contemporary cultural theory, straddling such disciplines as history, psychology, philosophy, and literary criticism. This seminar encourages graduate students to examine and contribute to the rapidly emerging sub-field of cinema/trauma studies. We will focus on the two mid-twentieth century events that continue to anchor many definitions of historical trauma: the Holocaust and Hiroshima. What do films that address these events teach us about the politics and ethics of representing experiences often referred to as unrepresentable? How does cinema force us to refigure debates about the "limits of representation" and the nature of "the event" itself? Is cinema an agent of memory or memory's eraser? A broad range of films will inform our discussion of such questions - documentary and fiction, tragedy and comedy, mass cultural successes and lesser-known art films or genre films, films from the past and present.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2468 - OPTICS OF EUROPEAN HORROR
Minimum Credits: 3
Maximum Credits: 3
European art cinema has a celebrated history as Hollywood's "other," with its own distinctive aesthetics. But what of the lesser-known yet equally vibrant traditions of European horror? Do these films, with their optics of spectacle, excess, violence, and bodily violation, constitute a cinematic poetics of their own? Can we detect within them an alternative history and philosophy of European cinema? We will study films by Carl Dreyer, Dario Argento, Neil Jordan, and others; and consult theorists such as Julia Kristeva, Gilles Deleuze and others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2469 - CINEMA AND DESIRE
Minimum Credits: 3
Maximum Credits: 3
This course will consider recent theoretical work on the notion of desire as a driving force in the construction of narrative and cultural discourse. The class will focus on film and television and will utilize texts to consider issues like: spectatorial desire, sexual/romantic desire, desire interruptus", the desire for the racial "other", the desire to be the "other", commodity desire, gustatory desire, the desire for identification, narcissism, masochism, thanatos.

Grade Component: Grad LG/SNC Basis

ENGFLM 2471 - CINEMA AND PSYCHE
Minimum Credits: 3
Maximum Credits: 3
From the earliest years of film theory, writers have likened the discourse of cinema to the workings of the human mind. In 1916, for instance, Hugo Munsterberg (in "the photoplay") drew parallels between film language and recollection, attention, and anticipation. This course (through readings and film screenings) will pursue such comparisons between cinema and the mind, investigating such topics as dream, memory, fantasy, nostalgia, perception, cognition, affect, etc.
Academic Career: GRAD
ENGLFLM 2472 - CINEMA AND THE POSTHUMAN
Minimum Credits: 3
Maximum Credits: 3
An important discourse linked to the age of new media is that of the "post-human": a set of views that interpret humankind's increasingly embedded relationship with machines as having reached a point where, in n. Katherine Hayle's influential formulation, "there are no essential differences or absolute demarcations between bodily existence and computer simulation." This course explores the shadow of the animal in the post-human through cinema, that paradoxical medium that stands between "new" & "old" media; body & technology; animal, human & post-human.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLFLM 2473 - CINEMA AND COUNTER-HISTORY
Minimum Credits: 3
Maximum Credits: 3
This graduate course focuses on visual media's connection to historicizing. It is concerned with theoretical writings that can be understood as offering versions of the past that run counter to received perceptions about historical forms through visual media. The readings and the films pay specific attention to various, often conflicting, theories, forms, and styles to identify the philosophic, aesthetic, and political stakes in activating the past. Among the texts to be studied that are related to philosophies of history are those of Walter Benjamin, Michel Foucault, Gilles Deleuze, Jacques Rancière, Hayden White, Carlo Ginzburg, and Fredric Jameson as well texts on André Bazin, Jean-Luc Godard, Philip Rosen, Mary Ann Doane, Robert Rosenstone, and Vivian Sobchack. The films proposed for screening are Cabiria, Abel Gance's Napoleon, Scipione Africanus, Roberto Rossellini's the Rise to Power of Louis XIV, Pasolini's Mamma Roma, Kubrick's Paths of Glory, Carry on up the Khyber, Monty Python and the Holy Grail, The Camp at Thiaroye, Hyenas, Morfia, a History of Violence, the White Ribbon, and Il Divo.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLFLM 2475 - THE BODY IN THE CINEMA
Minimum Credits: 3
Maximum Credits: 3
In recent years the status of the human body in art and culture has proposed itself as a crucial area of study. This course will explore the theoretical writing which has developed on this topic in a variety of such fields as literature, fine arts, cinema and psychology.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLFLM 2476 - ADVANCED GRADUATE FILM TOPICS
Minimum Credits: 3
Maximum Credits: 3
Designed for Ph.D. Candidates. This course will have variable topics concerning the cinema as they arise as significant theoretical or historical issues in the discipline.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLFLM 2478 - THE HOLLYWOOD STUDIO SYSTEM
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the history and practices of the so-called Hollywood studio system which reigned in American film production from around 1920-1960. As part of this investigation, we will examine the studio's organization (e.g. Departments), its economic structure, its reliance on genre pictures, its ranking of films in terms of perceived quality and expense, and its dependence on a stable of contracted personnel (e.g. directors, writers, actors, art directors, etc.).

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGFLM 2480 - WAR AND CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course theorizes the convergence of military and cinematic technologies, focusing on the logistics of perception, bio-politics, and the relation of cinematic/military technologies to the body. Topics include the military, medical, and cinematic uses of the scope and the screen, theories of human vision and ocularcentrism, new conceptions of space and time, the temporal convergence of production and exhibition (speed and acceleration), new media technologies, and the blurred boundaries of war and entertainment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2481 - CINEMA AND SPECTATORSHIP
Minimum Credits: 3
Maximum Credits: 3
Laura Mulvey's seminal essay "visual pleasure and narrative cinema" remains a landmark in film studies for the ways it energized films. Feminism, psychoanalysis, cognitivism, phenomenology, sociology, history-these are cinematic spectatorship in Mulvey's wake. But where are we now? What has been gained and/or lost? How does film studies answer the fundamental question of "what does it mean to watch a film?" This seminar engages the theoretical, aesthetic, and political ramifications produced by the conjuncture of cinema and spectatorship from 1975 to the present. We will devote particular attention to how arguments concerning spectatorship take shape when we watch films belonging to different modes or genres, especially forms such as horror and melodrama that depend on strong "embodied" responses from viewers. Previous exposure to film studies is welcome, but seminar participants will not be expected to have had any previous training in film studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2482 - AUTHORSHIP IN CINEMA
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar deals with the history of the question of authorship in film. It considers the auteur theory as it developed in France and the U.S. In the 1950s and beyond, differences in the idea of authorship between film and the other arts (especially the literary author), notions of collective and corporate authorship, the role of the director in the Hollywood studio system vs the European writer author, and problems involved in analyzing films of a particular director. Case studies involving particular directors will vary.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2483 - SURREALISM AND CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course engages the aesthetic and political issues produced by the conjuncture of surrealism and cinema issues first given shape by such major philosophers as Breton, Bataille, and Benjamin, but still vital to present day debates concerning culture and representation, and to institutions as varied as the modern art museum and MTV.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2484 - GENRE AND TRANSNATIONAL CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course will explore the ongoing and shifting transnational and international treatments of genre production from its inception to the present time, instead of concentrating exclusively on the national aspects of genre. The screenings and the readings will focus on the economic, political, and cultural interconnections of literature, cinema, popular magazines, comics, and television production. The readings will focus on genre concepts and provide theoretical, historical, technological, and formal analyses of changing genre forms. The screenings selected for examination are from different parts of the world and different moments in media history.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2485 - GENRE AND FILM MELODRAMA
Course will interrogate the cultural impact of melodrama through the media. We will explore the various expressions of melodrama in gothic narratives, the woman's film*, historical films, "tragic" melodramas, family melodramas, and TV docudramas. Topics addressed include questions about common sense/folklore and the nature of mass and popular cultural representation, the problematic nature of genre, the relation between melodrama, history, and the construction of narratives of national identity in relation to race, gender and sexuality.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2486 - GILLES DELEUZE AND CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course explores the wide-ranging dimensions of Deleuze's writings and their implications for rethinking intellectual work. In addition to Deleuze's conceptions of philosophy and his relation to other philosophers, this course will be particularly focused on his important writings on cinema and the films that are central to this work.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2487 - FILM DIRECTOR: ROSSELLINI
Minimum Credits: 3
Maximum Credits: 3
Course is prefixed with the designation film directors", and though Roberto Rossellini is designated as such, the course will not confine itself to films and critical writings on Rossellini but will focus on his work as it related to conceptions of European history and culture. We will be examining relations between Italian cinema and politics, theories of cinema and television, philosophic writings that are Germane to conceptions of history, geography, nation formation, fascism, popular culture, authorship, and sexual politics.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2488 - FILM DIRECTORS: PASOLINI
Minimum Credits: 3
Maximum Credits: 3
This course will not confine its work exclusively to pier Paolo gasoline's filmmaking. We will examine his writings journalistic, poetic, novelistic, and theoretical - and screen certain of his films in order to evaluate his endeavors in all of these literary, cinematic, political and cultural forms. In particular, we will situate his work in the context of Italian history and culture of the 20th century and also in terms of his relevance for an understanding of international events, particularly fascism.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2489 - CLINT EASTWOOD:AMERICAN ARTIST
Minimum Credits: 3
Maximum Credits: 3
This course examines the whole range of Eastwood's work from the television series rawhide to this year's the changeling. The focus is always on America and what it means to be an American artist.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2491 - FILM SOUND: HIST, THRY AESTHTC
Minimum Credits: 3
Maximum Credits: 3
Questions framing the course include the relation of sound and image, aural and visual pleasures, soundscapes and theories of shock and modernity, the relation of voice and body to subject formation, sound in silent cinema, the aesthetics of analog and digital sound in cinema, sound technologies and imperialism, theories of non-cinematic audio technology such as radio and gramophone, debates over the ontological status of recorded sound, film sound and space, sound in documentary cinema, and culturally specific theories of sound.

Academic Career: GRAD
ENGFLM 2492 - TELEVISION STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course will examine the emergence of television studies out of film studies during the 1980s and beyond. We will read key texts and examine approaches that have characterized this new orientation to the study of television: theories of television spectatorship, program and audience history, genre studies, and others. There will be screenings of key texts that have been considered crucial to the development of these ideas. The main emphasis will be to distinguish the televisual from the cinematic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2495 - THEORY/TECHNOLOGY/MEDIA
Minimum Credits: 3
Maximum Credits: 3
This course will examine a number of key theoretical debates in the history of visual and verbal media, beginning with the technology of writing itself and moving into the invention of the codex, the printing press, and 19th and 20th century forms of imagistic production. Of particular concern will be modes of competition and symbiosis among various technologies of representation at particular historical moments, such as the relations between speech and print, poetry and theater, painting and photography, and cinema and digital media. Although case studies will be drawn from a number of historical periods, special attention will be paid to the Renaissance and to recent decades, when media of all kinds have come under increasing technological and theoretical pressure. Students will have the opportunity to extend the seminar's concerns to their own areas of research.

ENGFLM 2500 - WOMEN DIRECTORS IN FILM AND TV
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2660 - SEXUAL REPRESENTATION & CINEMA
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2661 - QUEER THEORY, QUEER CINEMA
Minimum Credits: 3
Maximum Credits: 3
This seminar explores film (also TV and theater) textuality and reception from a "queer" perspective. What is the relationship among queer authors, queer textuality and the subcultures that consume these texts? What place does non-heteronormative sexuality occupy within the production and reception of mass culture? The course will cover: foundational works in the history of sexuality; camp and gay subcultural reception; gay and lesbian authorship of both Hollywood and avant-garde films; the rise of queer television drama; and queer critical practices.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2695 - HORROR FILM
Minimum Credits: 3
Maximum Credits: 3
This seminar will investigate the key films and critical discussions surrounding the genre from its beginnings to the present, but not merely to perform a genre survey- instead we will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film studies in profound ways.
ENGFLM 2700 - ANIMATION THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will approach animation as a method, a way to rethink film theory beyond the assumption of an essentially photographic medium, and to unearth and explore the previously underdeveloped territories in theorizing and making sense of moving images.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGFLM 2901 - AFI CATALOG INTERNSHIP
Minimum Credits: 1
Maximum Credits: 1
Students will write parts of entries (critical notes and plot summaries) for the prestigious AFI catalog of American film" starting with the films from the 1970s through the present. Students will receive credit (attribution) for the entries they write within the catalog, and will participate in the AFI academic network. Materials (DVD, notes) will be provided by the AFI for each film for which the student prepares entries. Opportunities may exist for video-conferencing with other AFI participants in catalog writing.

English Literature

ENGLIT 2000 - HISTORY OF CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to important aspects of critical thought, especially though not exclusively before the twentieth century. Readings for this course are offered as constellations of texts that intersect with a particular problem or issue. Each constellation will have three goals: to assemble texts that have present significant and important modes of practicing criticism; to include different types of texts where critical thought emerges; to familiarize students with methods of research central to humanistic study.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Excludes English MFA majors

ENGLIT 2001 - STUDIES IN THE HUMANITIES
Minimum Credits: 1
Maximum Credits: 1
In this course, graduate students read and discuss new scholarship in an area of the humanities that will be the subject of a one-week seminar sponsored by the humanities center.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

ENGLIT 2002 - INTDIS METHODS IN HUMANITIES
Minimum Credits: 3
Maximum Credits: 3
This course will theorize and practice interdisciplinary research methods. A central focus of inquiry is how interdisciplinary research might shift the content and scope of our scholarship. How might it shift our disciplines? What are the gains, losses, and syntheses entailed in that shift? (For example, how might fieldwork benefit literary critical projects?) Readings will address debates in anthropology on fieldwork; oral history methods; and the applicability to the humanities of qualitative research methods from the social sciences. Students will write a final paper in which they launch or develop an interdisciplinary research project that fits their research interests. The paper could be a step towards their manuscripts or dissertations or a more contained project.

Academic Career: GRAD
ENGLIT 2003 - LITERARY STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course examines topics in literary studies in relation to current developments in the field of literary studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2005 - CONTEMPORARY CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This seminar studies the most important recent developments in the fields of literary and cultural criticism. It both introduces students to a range of topics, methods, and theories and explores deeply the historical, conceptual, and societal significance presented by all these. The course introduces students to, and helps them learn to evaluate, the most important contemporary work in English studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2006 - CLOSE AND DISTANT READING
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2007 - BOOK/TEXT/AUTHOR
Minimum Credits: 3
Maximum Credits: 3
This class explores the relationship between the author and the text, the text and its physical iteration(s), and the reader and the author in the age of the printed book. How did changes in the status of authorship change the relationship between texts and their readers? How do readers construct the idea of the author? This course looks at the moment in critical and media theory where these questions were specifically articulated and at some literary texts produced at the same time. We will then move back to the eighteenth century to see how literary authorship was consolidated both ideologically and legally.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2010 - INTRO MODERN CRITICAL PRACTICE
Minimum Credits: 3
Maximum Credits: 3
This course examines varieties of modern criticism and studies the methods, justifications, and goals of alternative critical theories. It seeks to situate critical practices in relation to social, cultural and institutional interests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2011 - ISSUES IN CULTURAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the history, the scope, and the primary aims of cultural studies. Major works of cultural theory are read, and the seminar identifies some of the questions which have driven the most significant research of recent years. Texts representing different kinds of cultural production are examined in order to work through some of the major issues in the theory and practice of cultural criticisms. The cultural materials provide general models of analysis for students working in different areas of specialization.
Academic Career: GRAD
ENGLIT 2012 - INTRO TO CRITICL/CULTRL STUDY
Minimum Credits: 3
Maximum Credits: 3
Rather than offering a single model of such an introduction, this course, which will be taught by different faculty in different terms, will offer, in each term it is given, a focused engagement with a particular key issue. Examples might include: the novel as a genre in history; intellectuals and the media; the cultures and politics of nationalism; emergent subjectivities.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2013 - CRITICISM IN SOCIETY
Minimum Credits: 3
Maximum Credits: 3
Examines the relationship of criticism to society and how it has conceptualized the social role of the critical intellectual. Investigates the role of ideology in critical activity and criticism's mediation in institutions and discourse; and the theory of the intellectual in modern and postmodern society.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2017 - READER RESPONSE CRITICISM
Minimum Credits: 3
Maximum Credits: 3
This course studies the theory and practice of reading and responding to texts, both literary" and "non literary".
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2018 - RECEPTION THEORIES
Minimum Credits: 3
Maximum Credits: 3
This course will survey approaches to the reception of texts by readers for both literature and mass culture. Approaches to be studied may include: the Germans Jauss and Iser (phenomenological/historical approaches); Stanley Fish (pragmatics); Norman Holland (psychoanalysis); feminist reader response criticism; Janice roadway (ethnographic approaches to popular literature); David Morley's two very different approaches to TV audiences (the nationwide audience and family television); Tony Bennett's work on James Bond (marxist reception theories); studies of subcultural reception.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2019 - INTELLECTUALS
Minimum Credits: 3
Maximum Credits: 3
This course develops a theory of the modern intellectuals at work within the human sciences" and seeks to enable students' critical practice by focusing their doctoral research with the help of this problematic."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2020 - IDEOLOGY AND CRITICISM
Minimum Credits: 3
Maximum Credits: 3
A consideration of literature as an ideological practice. Readings in general theories of ideology and in theories of specific literary ideologies.
Academic Career: GRAD

1793
ENGLIT 2021 - HISTORY AND SPECTACLE
Minimum Credits: 3
Maximum Credits: 3
History and spectacle examines differing political constructions of history in the cinema. The readings focus specifically on theories of history, realism, genre, and spectatorship. The films selected for screening include historical reconstructions, costume dramas, biographical films, documentaries, and third world films.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2022 - POST STRUCTURALISM
Minimum Credits: 3
Maximum Credits: 3
This course considers theories of power and subjectivity developed primarily in Paris as a critique of traditional politics, social theory, philosophy and literary criticism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2023 - MICHEL FOUCAULT
Minimum Credits: 3
Maximum Credits: 3
This course will examine some of the major works and ideas of French philosopher Michel Foucault, who has had a powerful influence on humanistic studies in the past thirty years. The course will take up readings from different phases of Foucault's thought and relate them to his historical context as well as to our own.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2024 - EDWARD W. SAID
Minimum Credits: 3
Maximum Credits: 3
This seminar will carefully study the works and context of Edward W. Said. We shall read the major books and articles, place them within their intellectual and social context, and investigate the value of Said's critical theory and historical scholarship.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2025 - GODARD: IMAGES, SOUND, WORK & LOVE
Minimum Credits: 3
Maximum Credits: 3
The course will consider Godard under four main aspects: Bazin and Cahiers Du Cinema, the Nouvelle Vague, Paris 68, Anne-Marie Mieville.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2026 - HENRY JAMES
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on James as a major figure in the history of the novel and of thinking about the novel, reading several of his major works in the context of fictional traditions of the U.S., Britain, and France.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2027 - ROLAND BARTHES & CULTURAL CRIT
Minimum Credits: 3
Maximum Credits: 3
An in-depth study of one of the century's most important and influential thinkers. We will look at the range of Barthes' writings and study their primary themes; the specificity of literary experimentation, the politics of cultural engagement, the representation of desire and its ties to the body, etc. We will also look at the social and political contexts for the semiotics and structuralism that Barthes comes out of. For each work by Barthes we will emphasize its fit or not with other work on similar issues in today's cultural studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2028 - HIST & PHILOSOPHY OF ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
This course examines aspects of the roles that economics forces and factors play in history, and/or the conceptual and theoretical structures by which various people have attempted to understand, explain, or model such factors and forces.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2029 - READINGS IN CRITICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/ knowledge, desire and the subject. Each year a different area or topic is chosen.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2030 - CHESTER HIMES
Minimum Credits: 3
Maximum Credits: 3
This seminar will be a careful and thorough study of Chester Himes from his earliest short stories and novels to his celebrated detective novels and critical interviews. Himes's writings will be critically engaged with regard to the ways they exhibit types of social beings circulating in the U.S. During the period from roughly 1936 to 1975, with particular focus on his depiction of violence, how that depiction and theory reflect his account of the American system, and the influence of his work on other novelists and intellectuals internationally.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2031 - WALTER BENJAMIN
Minimum Credits: 3
Maximum Credits: 3
This seminar examines the major writings of Walter Benjamin and traces his intellectual and literary influence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2032 - GENDER AND DISCOURSE
Minimum Credits: 3
Maximum Credits: 3
This course will examine the discourse of gender in literary, prescriptive and polemical works. 19Th century novels such as Jane Eyre will be read together with writings from the Victorian debate on the woman question; 20th century writers will be read against texts from 20th century women's history. We will examine the contrasting verbal strategies of different strands of feminism and look for continuuity as well as change between 19th and 20th century writings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2033 - FEMINIST THEORY
Minimum Credits: 3
Maximum Credits: 3
This class scrutinizes from a feminist viewpoint a variety of contemporary theories of embodied subjectivity. We will survey Anglo-American feminist, French feminist, British Marxist-feminist, third world feminist schools, their traditions and critics. As well as meta-theoretical perspectives, we will examine the usefulness of such theories to specific historical and cultural instances.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2034 - BAKHTIN SCHOOL RHETORIC/POETICS
Minimum Credits: 3
Maximum Credits: 3
This seminar will work with key texts of the Bakhtin school in order to discover and elaborate fruitful models for inquiries into rhetoric and poetics understood as parts of a general account of discourse. We will examine recent works in composition studies, rhetoric, literary theory, and literary criticism informed by the Bakhtin school to critique and to advance their initiatives and to situate the inquiries we develop in relation to them.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2035 - BLCK LITERARY CRITICISM & THRY
Minimum Credits: 3
Maximum Credits: 3
A survey of significant issues within the black literary critical tradition from the 1920s-1990s, beginning with early literary (and cultural) critics such as Alani Locke, Langston Hughes, and W.E.B. DuBois. We will consider black writers' and critics' strategies for gaining control of and shaping the black artistic image; the nationalist concerns of the black arts movement; responses to black women writers' Renaissance of the 1970s and 80s; and the politics of current black high" theory."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2040 - INSTITUTIONS OF LITERATURE
Minimum Credits: 3
Maximum Credits: 3
Course situates literature and literary study in relation to a range of long-durational processes and macro-political, social and cultural structures. Its focus is on institutions that both produce and are produced by practices of reading, writing, and theorizing the literary, including such topics as generic structures and expectations, construction of authorship, changing reading formations and audiences, problems of literary history (especially periodization & canon formation), practices of textual production & circulation, critical theory, & the situation of the critic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2045 - PHIL OF SCI IN THE HUMANITIES
Minimum Credits: 3
Maximum Credits: 3
The course will examine forms of explanation in the humanities. The course will address two questions: (1) how far are these forms of explanation dependent on forms derived from the natural sciences? (2) How far can the varied tradition of the philosophy of science further more adequate forms of explanation in the humanities?
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2052 - DEFOE AND SWIFT
Minimum Credits: 3
Maximum Credits: 3
This course will study works of these writers in the context of their responses to the development of the political economy in the late 17th and early 18th centuries. We will read both fictional and explicitly discursive texts. We will consider their responses to the transformation of the conditions for the production of literature in the development of the publishing industry. We will consider some texts by other writers to provide context and context.
ENGLIT 2053 - METAPHOR AND CRITICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This course explores the preoccupation of recent critical theory--particularly in literary and rhetorical studies-with the nature and function of metaphor. Various conceptions of metaphor are examined, along with the metaphors by which these conceptions are articulated. In addition, then, to investigating approaches to metaphor within critical theory, this course asks students to critique the metaphors with which various critical theories structure both the possibilities and the limits of their discourse.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2055 - WORD AND IMAGE
Minimum Credits: 3
Maximum Credits: 3
The distinction between these two forms has lent itself to a paradigm in which they are sometimes structurally antagonistic and sometimes supplemental but rarely significantly intertwined and mutually defining. This course will examine the history of the relationship between word and image and explore the possibilities for redefining, reestablishing, and perhaps synthesizing their connections and distinctions. Our explorations will be framed by an engagement with a range of important thinkers; including Plato, Sydney, Jonson, Locke, Hagstrum, Barthes, Panofsky, Gombrich, Mitchell, Burke, Benjamin, and Buck-Moors. Texts/images/painters/writers will be historically eclectic (this is not a survey) and will include: illuminated manuscripts, the biblia pauperum, Ripa's iconology, a wide range of poetry with a focus on the development of the sonnet, Hogarth, Blake and Bladerunner, Turner and Constable, photographs, novel adaptations (Tristram Shandy: a Cock and Bull Story), the pictorial uses of Austen, Hardy's landscapes, and stops along the way in the history of the cartoon.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2056 - GRAMSCI, MODERNITY & CRITICISM
Minimum Credits: 3
Maximum Credits: 3
The focus of study in this course will be Antonio Gramsci's analysis of the American power configuration emerging in the Twentieth-Century as found in his prison notebooks. That analysis will be considered in relation to Gramsci's account of the material history of criticism in modernity, also found in his prison notebooks.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2060 - CRITIQUE OF HUMANISM
Minimum Credits: 3
Maximum Credits: 3
A study of the recent European tendency questioning the movement called "humanism".

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2061 - THEORIES OF RECEPTION
Minimum Credits: 3
Maximum Credits: 3
This advanced level course will ask: what are the virtues and limitations of different approaches to the study of the reception of texts (both literary and mass cultural) by audiences? Approaches to be studied may include: the Germans Jauss and Iser (phenomenological/historical approaches); Stanley Fish (pragmatics); feminist reader-response criticism; film theory (psychoanalysis); ethnographic approaches; mass communication approaches; Marxist reception theories; studies of subcultural reception. Students will be encouraged to work towards their own projects or dissertations.

Academic Career: GRAD
ENGLIT 2062 - DISCOURSE OF PRIMITIVISM
Minimum Credits: 3
Maximum Credits: 3
An examination of texts dealing with the primitive", ranging from literary and artistic works, to important theoretical statements from related disciplines, to the critical tradition which has defined this material as a topic of study."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2063 - HISTORICAL DISCRSES OF GENDER
Minimum Credits: 3
Maximum Credits: 3
This Ph.D. level course will examine the representation of gender in controversial, medical, and conduct-book writings about women, as well as in plays, poems, fiction, and autobiographical writings by women as well as men.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2065 - THEORY AND EMERGENT SUBJECTS
Minimum Credits: 3
Maximum Credits: 3
This course examines the complex cultural interactions between the advanced theories of Western Europe and the cultural productions of what the West labels emergent subjects". The course treats questions of eurocentrism, colonialism, and the Europeanization of the disciplines. At stake also is some consideration of the university, of elite classes, and the discourse of globality."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2066 - INTERROGATING CANONICITY
Minimum Credits: 3
Maximum Credits: 3
Case studies of canon-formation, in context of recent historical and theoretical challenges.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2070 - INTRO TO ISLAMIC THINKING 1
Minimum Credits: 3
Maximum Credits: 3
This seminar will offer a brief historical survey of the socio-economic circumstances prior to and during the revelation of the Qur'an to Muhammad at mecca and medina. This seminar functions as the first half of a yearlong study, the second part to be held in the spring semester. Accordingly, the consideration of Qur'an and Muhammad an Sunna will be introductory and appear to be a teleological-historical account.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2071 - INTRO TO ISLAMICATE THINKING 2
Minimum Credits: 3
Maximum Credits: 3
This seminar will study the historical relationship between power formations and the legitimation of knowledge in the Islamic world. Our focus will be on how specific moments in the institution of knowledge afford a glance at the dialectic between the state and what might be designated as civil society. Some texts to be included in the course reading for the semester are: Muhammad Taha, the second message of Islam, Sayyad Qu tub, social justice in Islam, and Fazlur Rahman, Islam and modernity.
Academic Career: GRAD
ENGLIT 2100 - ADVANCED THEORY AND METHODOLOGY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2104 - MEDIEVAL BOOK OF WEIRD
Minimum Credits: 3
Maximum Credits: 3
Locked away in a dusty cabinet, a saint's finger bone lies encased in velvet and glass, its former powers diminished by the combined forces of religious schism and modern skepticism. At a museum exhibit far away, visitors stare quizzically at a collection of medieval tally sticks, the small slivers of wood that tracked debts and repayments in a culture where the measure of literacy was sometimes a series of carved notches rather than words. From the celibate monk who venerates a feminized christ, to the anchoress remade as a 'man' in the sight of god, a scholar asks how medieval categories made room for understandings of experience that often appear to befuddle modern notions of sexual identity and gender. In the lecture hall and the private study, from the halls of academic to the broader world of popular publishing, the medieval period is associated with such conundrums of significant cultural difference that challenge our epistemological models for interpreting evidence and explaining other cultures. This course will examine a number of such discrete historical problematics, from the realm of medieval visionary experience, where toads and demons startle an ascetic from her contemplations, to the uncertain boundary line between the oral and written cultures that shaped political protest in the era of langland and chaucer. Our view will be broad, and broadly theoretical: Foucault, Bourdieu, and Butler are examples of modern thinkers who will offer signposts along the road. For the rest, we will have to use our critical imaginations and the suggestive 'book of weird' as a conceptual key to find new ways to think longstanding problems of historicism, scholarship, and knowledge.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2105 - DRAMA VERNACULAR MATR Presence
Minimum Credits: 3
Maximum Credits: 3
Well before the reformation, European culture embraced the vernacular. This phenomenon went beyond language, as the established church often encouraged expressions of faith for and by the laity. Lay devotion and theology not only called on vernacular language, but also forms of rhetoric and popular culture that can be considered vernacular, in contradistinction to official clerical culture. Foremost among these forms was religious drama composed and performed in the vernacular language through a collaboration between clergy and lay people.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2106 - MEDIEVAL LITERATURE & CULTURE
Minimum Credits: 3
Maximum Credits: 3
Readings in major literary and cultural texts of the medieval period, primarily but not exclusively from the British isles.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2107 - SOCTY & DISSENT: ERLY ENG LIT
Minimum Credits: 3
Maximum Credits: 3
This course takes medieval and early modern texts as a starting point from which to discuss post-modern theories of culture. If the project of literary history is recognized to be a dialogic one, pre-modern culture and its oppositional strategies can both challenge and further current discussions about the place of the individual in society. The seminar focuses on the relation of texts to everyday practices across a wide range of fields (including issues of labor, language, theories of the body, and the construction of the autobiographical subject).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2109 - EPIC BACKGROUND
Minimum Credits: 3
Maximum Credits: 3
This course explores aspects of the epic tradition before Milton, focusing upon some representative works in that tradition, particularly the Iliad, Odyssey, Aeneid, and Faerie Queene.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2110 - HISTORY AND REPRESENTATION
Minimum Credits: 3
Maximum Credits: 3
Examines late medieval texts from a cultural history period and asks what are the resources for the formation of communities and subjectivities? We will be particularly interested in the field of religious texts and will look at mad" medieval people and their texts such as Hoeckeve and Margery Kempe, hagiographical texts as they were used both in individual and group contexts, (monastery, guild, etc.), Texts which have no critical vocabulary surrounding them- like the letter collections of the pastors, as well as some of the recent debates around Chaucerian subjectivity.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2115 - CHAUCER
Minimum Credits: 3
Maximum Credits: 3
Studies Chaucer's poetry (read in middle English) within its literary and intellectual context with attention to poetic and critical theory of Chaucer's own time as well as to contemporary criticism and scholarship.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2118 - ALLEGORY AND ICONOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to medieval and Renaissance allegorical and iconographic traditions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2120 - EARLY MODERN LONDON
Minimum Credits: 3
Maximum Credits: 3
This course examines the emergence of an early metropolitan center and its associated culture.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2121 - MEDIEVAL TO EARLY MODERN
Minimum Credits: 3
Maximum Credits: 3
This class will examine literary and historical texts from the period 1350 to 1600, asking how such texts represent their own modernity in relation to the recent past. We will also look at nineteenth- and twentieth-century critical writings that attempt to categorize this period as one of the radical epistemological shifts on many cultural fronts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2123 - GENEALOGIES OF MODERNITY
Minimum Credits: 3
Maximum Credits: 3
When and how did we become modern? Many twentieth- and twenty-first century thinkers have identified the late middle ages as a watershed in Western history. This course will test some of these hypotheses on late-medieval English literature. We will track three interlocking kinds of genealogy, examining late-medieval developments of subjectivity, secularization, and representation. What does it mean to be a self? How do religious and secular culture relate? And how does literature represent the world? We'll track changing answers to these big questions as we read Medieval English lyrics, drama, and narrative poetry.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2126 - SHAKESPEARE
Minimum Credits: 3
Maximum Credits: 3
Considers a range of plays from all genres of Shakespeare's work in terms of their symbolic action, structure, imagery and language, as well as in relationship to their socio historical context and theatrical traditions.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2127 - SHAKESPEARE, CINEMA & SOCIETY
Minimum Credits: 3
Maximum Credits: 3
Shakespearean, Elizabethan, and American myths analyzed through contemporary cinema, criticism, and historiography.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2128 - RENAISSANCE DISCORSES OF GENDER
Minimum Credits: 3
Maximum Credits: 3
This course will examine the representation of gender in controversial, medical, and conduct-book writings about women, as well as in plays, poems, fiction, and autobiographical writings by women as well as men.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2129 - SHAKESPEARE AND ADAPTATION
Minimum Credits: 3
Maximum Credits: 3
This course examines modern film, stage, poetic and novelistic adaptations of Shakespeare's plays in light of Shakespeare's own borrowings from materials as diverse as scripture, chronicle history, and prose romance. We will consider five Shakespeare plays: 'The Tempest, Taming of the Shrew, King Lear, Othello, and Macbeth' along with several key sources for and adaptations of each one.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2130 - GENDER/BODY ON ERLY MOD STAGE
Minimum Credits: 3
Maximum Credits: 3
This course will investigate contemporary and early modern theories of gender, embodiment, and performance. We will consider ways to historicize these categories and ways in which they become cross-mapped with other key social markers, such as class, race, and religion. Our primary focus will be the drama of seventeenth-century England, including plays by writers such as Elizabeth Cary, Thomas Middleton, Ben Jonson, William Shakespeare, John Dryden and Aphra Behn.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2131 - SHAKESPEARE, GENDER SEXUALITY
Minimum Credits: 3
Maximum Credits: 3
This course will read some of Shakespeare's plays, emphasizing criticism and theory dealing with gender and sexuality. It will also consider historical difference and related controversies, through such means as reading other early modern texts and history, studying the influence of both dominant and dissident perspectives in later interpretations of his works, or analyzing how recent productions in film and other media deal with gender and sexuality in his plays.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2132 - ELIZABEATHAN & JACOBEAN DRAMA
Minimum Credits: 3
Maximum Credits: 3
A representative sample of Elizabethan and Jacobean plays is considered against the social and political background of the times.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2133 - 17TH-CENTURY POETRY
Minimum Credits: 3
Maximum Credits: 3
Studies several poets of the 17th century in relationship to the poetics and criticism both of their own time and of later readers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2134 - TOPICS IN 17TH CENTURY CULTURE
Minimum Credits: 3
Maximum Credits: 3
This course explores the issues that dominated 17th century British culture and influenced the literature it produced. Religious conflicts and changing gender attitudes inform much of that literature. The period continues to produce scholarly and critical controversy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2135 - KEYWORDS
Minimum Credits: 3
Maximum Credits: 3
Keywords: a vocabulary of culture and society by Raymond William (1976, 2nd ed., 1983) is one of the most important works by one of the founders of cultural studies. Keywords is made up of short essays that take crucial terms in contemporary social and political debate and use their philological history as a means of engaging with their contradictory current issues and meanings. Its combination of scholarship with relevance has proved inspiring and offers a model of how academic work can prove socially significant. A group of scholars from Pitt with colleagues from other universities is working to update Williams's work. See the website: this course aims to introduce students both to methodological and substantive issues that formed Williams's work and the uses to which it may be put.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2140 - MILTON
Minimum Credits: 3
Maximum Credits: 3
A thorough investigation of Milton's work in relation to the historical conditions of his period.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2149 - THE 18TH-CNTUR DISCIPLINARITY
Minimum Credits: 3
Maximum Credits: 3
What is a discipline? What does it mean for an academic to ask this question in a time of increased interdisciplinarity? What does it mean for a humanist to ask it in the wake of the information age? This course considers the roots of disciplinarity in the eighteenth century, a time when the arts and sciences were ordered, when the seeds of professionalism were sewn, when prisons were birthed. The course will consider some of the cultural, epistemic, technological and ideological shifts of the eighteenth century in order to explore answers to contemporary theoretical questions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2150 - RESTORATION AND 18TH CENTURY
Minimum Credits: 3
Maximum Credits: 3
Concentrating on works written between 1660 and 1790, the course emphasizes the representative nature of the works, their relationship to the historical contexts, and changing methods of literary production.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2151 - 18THC BRITISH SOCIAL THEORY
Minimum Credits: 3
Maximum Credits: 3
The invention of modern social theory arose in the context of radical transformations of moral philosophy. Skeptical language theory turned philosophy towards history, psychology, politics and economics. Readings in Hobbes, Locke, Swift, Hume, Johnson and Smith will reveal the interaction of argument and form in a culture of once literary and philosophical.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2152 - THE LONG EIGHTEENTH CENTURY
Minimum Credits: 3
Maximum Credits: 3
The long" version of the eighteenth century extends into the seventeenth and nineteenth centuries so that scholars can get a better view of some of the important transformations that occur in this century. Course examines a number of linked topics the effects of increased literacy and new reading formations, contests about the locations of culture, cultural exchanges between metropolitan London and its colonial and provincial peripheries to reflect on the uses and conditions of literary historical study."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2153 - DEFOE AND SWIFT
Minimum Credits: 3
Maximum Credits: 3
Seminar participants will read most of the major novels, poems, and prose of Defoe and swift with an eye toward understanding how each contributed towards a sexed discourse of imagination during the emergence of modern capitalism. We will also read a broad range of modern critical commentators on this first truly modern period, including Bourdieu, Butler, Foucault, Grosz, and Habermas.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2154 - SOCIAL THEORY 18C NOVEL
Minimum Credits: 3
Maximum Credits: 3
This course would aim not merely to cover" major 18th century novelists, but to test the large hypotheses about the social/political context of the novel and continuing in the new books on the subject by McKeon (Jamesonian Marxian totality). A collection of deconstructive interpretations of Clarissa will especially allow an opportunity for participants to assess the relationship of deconstruction to large historical frameworks."
Academic Career: GRAD
ENGLIT 2155 - SENSIBILITY
Minimum Credits: 3
Maximum Credits: 3
Sensibility® is a key term in a major cultural reorientation which involves the positive revaluation of emotions, passions, feelings. This course follows the complex effects of the diffusion of this new understanding of human motives. Readings include fiction, poetry, philosophy (including feminist philosophy) from mid-18th century to mid-19th century in Britain. Concepts of gender will be a central topic."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2156 - THE CULTURE OF ADVICE
Minimum Credits: 3
Maximum Credits: 3
Course compares 18th century English media during the emergence of what Habermas calls the public sphere" with parallel phenomena in 20th century America. We will test these of Habermas and his followers in literary, composition, and media studies by investigating discursive practices of advice. Topics include political counsel, petition, and pressure groups; advice books, advice columns, and longer narrative forms like the novel; the commercialization of advice; the gender and generational relations of advice; the co-implication of pedagogy and advice."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2157 - LITERACY & LIT IN 18TH CENTURY
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine the interaction across the long eighteenth century between emerging literary practices and new or newly consolidated literacy materials-dictionaries, vernacular grammars, elocutionary treatises and readers, theories of language, and notions of belle lettres. We will focus, in part, on the ways in which vernacular writers were taken up in these literacy materials as examples of usage, sometimes incorrect and sometimes authoritative, as illustrations of tropes and figures and emotional states, as commonplaces or cultural topos, and as an emerging literary tradition or canon. But we will also attend to the ways newly standardized or methodized linguistic usages came into literary works, both as forms of appropriate usage and as the unmarked horizon of expectation against which regional or class dialects gained new prominence, and audiences defined partly by literacy skills, especially children, made possible new literary forms and practices. Much of the course reading will be British texts, mainly written from 1750 to 1830, but we will trace as well how these materials migrated to the American colonies and were re-appropriated in the early years of the United States.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2160 - BLAKE
Minimum Credits: 3
Maximum Credits: 3
An intensive study of Blake's writings and graphic works, with special attention given to issues of media, verbal visual relations, and the material production of art.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2170 - BRITISH ROMANTICS
Minimum Credits: 3
Maximum Credits: 3
A reading of several canonical texts of British high romanticism in relation to changing conceptions of art, culture and society.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2171 - TOPICS IN 19TH CENTURY CULTURE
This course provides a framework for seminars in specific topics in nineteenth-century British, American, and/or European culture. It is designed to accommodate investigations of literary and/or other types of discourse, with emphasis on the intersections between historical and theoretical work in cultural studies.

Academic Career: GRAD

ENGLIT 2174 - VICTORIANS DRESSED & UNDRESSED
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2175 - VICTORIAN WOMEN NOVELISTS
Minimum Credits: 3
Maximum Credits: 3
In this course we will read novelists such as the Bronzes, George Eliot, Elizabeth Gaskell, Mary Braddon, Geraldine Jewsbury, and Rhoda Broughton. We will look in particular at novels of self-construction that can be considered as fictional autobiographies. We will put special emphasis on seeing that the novels in relation to different varieties of feminist criticism; we will also consider issues such as race, imperialism, class, structure, publishing and reading practices, and other dimensions of writers' relations to traditions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2176 - 19TH CENTURY BRITISH NOVEL
Minimum Credits: 3
Maximum Credits: 3
Examines the relationship of the novel to changing historical circumstances in the 19th century.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2177 - DICKENS
Minimum Credits: 3
Maximum Credits: 3
Seeks to place Dicken's work within its milieu. It explores the economic history of the time for its influence on the novels dickens wrote and examines the novels as reflections of 19th century British culture and concerns.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2178 - THE VICTORIAN SAGE AND AFTER
Minimum Credits: 3
Maximum Credits: 3
Critical inquiry suggests that the 19th century developed, out of necessity, a new art form. Pressures in the 20th century continued to stimulate the production of works that defy conventional definitions of art forms yet are not simply descriptive or expository. Walter Pater's late 19th century essay, style", recognized the new form and suggested some grounds to evaluate it. 20th century, critics have sought to expand and amplify Pater. Students will expand this theoretical basis to study and analyze art of 20th century writers."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2179 - GEORGE ELIOT
Minimum Credits: 3
Maximum Credits: 3
This course will examine all of the novels and much of the criticism written by George Eliot, one of the most preeminent of Victorian novelists. Her writing will be understood in relation to the social and cultural debates shaping Victorian England, as well as the philosophical and critical traditions with which she engaged.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2180 - GEORGE ELIOT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will examine all of the novels and much of the criticism written by George Eliot, one of the most preeminent of Victorian novelists. Her writing will be understood in relation to the social and cultural debates shaping Victorian England, as well as the philosophical and critical traditions with which she engaged.  
**Academic Career:** GRAD

**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2190 - 1890'S REPRESENT FIN DE SIECLE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar considers British literary works from the 1890's in relation to end-of-century literary and social theories of both progress and degeneration. Topics related to readings include the aesthetic movement, feminism, and decadence.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2191 - YOUNG BRITN:CLASS/NATION/YOUTH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar will examine discourses on class, nation and youth in 19th and 20th century Britain. As the best scholarship has begun to demonstrate British imperialism, no less than post-war examinations of British national identity, is bound up with conceptions of class difference; less commonly studied is the centrality of youth culture to both imperialist and cultural studies discourses.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2192 - OSCAR WILDE AND THE 1890S**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This graduate course presents the major works of Oscar Wilde in the context of other texts from European and Anglophone writers at the end of the nineteenth century. Wilde's writing is considered in the contexts of literary and theoretical movements such as aestheticism and realism as well as in relation to philosophical and scientific dis courses.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2200 - LITERATURE AND HISTORY**
ENGLIT 2201 - AFFECT STUDIES & AMERICAN CULT
Minimum Credits: 3
Maximum Credits: 3
Affect studies takes up dimensions of embodiment that have aesthetic, ethical, and political significance and that resist divisions between self and other, private and public, body and mind, and cause and effect. Feelings and emotions are part of this terrain, but the study of affect is pitted against some of the ways in which we customarily understand them. This course will ask how attention to affect can enter into our reading of print texts and other cultural texts (and our writing about them). Although we will draw on a range of theoretical, historical, and critical resources, the focus of our work together will be 19th- and 20th-century texts in the United States: either texts that count as 'American,' by the ordinary conventions, or texts that had an important life in the U.S. Focal topics are likely to be effects of identity (drawing on the affective contributions of feminist, queer, and critical race theory, especially in relation to shame), the affective repertoires of key genres, the relationship between affect and aesthetics, and the political and ethical stakes of affect studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2202 - CONCEPTUALIZING TRADITIONS
Minimum Credits: 3
Maximum Credits: 3
Case studies in literary history, over spans of several centuries or more, in relation to current historical and theoretical debates.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2203 - AMERICAN LITERATURE 1
Minimum Credits: 3
Maximum Credits: 3
This seminar examines the complex nature of the American literary tradition by dealing with books such as Moby Dick that are central to forming the canon of us literature but do not rest easily within the mainstream of us cultural life. This seminar will read approximately four such canonical works to grasp their views of American and their value for continuing the development of us culture and intellectual, literary life. Although this course will be followed by part 2, it stands entirely alone and can be taken without taking part 2.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2204 - AMERICAN LITERATURE 2
Minimum Credits: 3
Maximum Credits: 3
This seminar examines the complex nature of the American literary tradition by dealing with books such as the education of henry Adams that are central to forming the canon of us literature but do not rest easily within the mainstream of us cultural life. This seminar will read approximately four such canonical works to grasp their views of American and their value for continuing the development of us culture and intellectual, literary life. Although this course can be preceded by part 1, it stands entirely alone and can be taken without taking part 1.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2205 - RECONSTRUCTING AMERICAN LIT
Minimum Credits: 3
Maximum Credits: 3
This course examines how the field of American literature has been constituted differently over time, under pressure of cultural and intellectual change.
Academic Career: GRAD
ENGLIT 2206 - THE ENLIGHTENMENT AND US LIT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the emergence of U.S. literature and literary culture in relation to European and North American writings associated with the enlightenment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2207 - HENRY ADAMS
Minimum Credits: 3
Maximum Credits: 3
This course will closely examine Henry Adams' work in order to investigate both the role of the literary intellectual in the U.S. After the Civil War and to look at some of the changes that take place in U.S. Domestic culture upon the fact of the U.S. Becoming an imperial power in the world. Special attention will be given to his historical and critical writings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2208 - CULTURES OF AMERICAN LITERACY
Minimum Credits: 3
Maximum Credits: 3
This course investigates the historical construction of different kinds of literacy and literacy instruction in the United States. Students will investigate the documentary evidence of how literacy has been defined, taught, and evaluated both in schools and in a variety of other cultural sites.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2209 - IMAGINING U.S. CITIZENSHIP
Minimum Credits: 3
Maximum Credits: 3
This course will consider literary and theoretical representation of U.S. Citizenship, focusing primarily on its origins in the early American "infant republic." Reading works by novelists, educators, political theorists and slaves, we will collect and draw upon the period's nuanced vocabulary of rights, autonomy, patriarchy, property, sentiment, nature, childhood and intimacy in order to understand citizenship's imagined origins, narratives, icons and apparatuses.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2210 - LANGUAGE IN AMERICAN LIT
Minimum Credits: 3
Maximum Credits: 3
Ranging from colonization to the present, this course will draw on history, linguistics, and philology to develop case studies that show the ambitions, accomplishments, and problems involved in creating the literature of a nation, or empire, of immigrants and others in a world of many languages.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ENGLIT 2211 - SCRIBLNG WOMEN/CLASSIC AUTHR
Minimum Credits: 3
Maximum Credits: 3
Explores the gendered battle over the construction of 19th century American literature and letters.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2213 - AMER TRANSCENDENT THRY OF LANG  
Minimum Credits: 3  
Maximum Credits: 3  
Explores connections between philosophy of language in the romantic age, the cultural uses to which it was put in American school textbooks, and the distinctive thought and style of two transcendentalists.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGLIT 2214 - THE LONG POEM  
Minimum Credits: 3  
Maximum Credits: 3  
This course will examine carefully one of the most important elements of the unique U.S. Literary tradition, that is, the American long poem", as a unique national form, produced first by Walt Whitman and developed by the major U.S. Poets of the last 150 years. The course will read carefully the major examples of this genre and study closely their technique and vision."  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGLIT 2215 - LITERATURE & CULTURE OF SOUTH  
Minimum Credits: 3  
Maximum Credits: 3  
This course will examine literary texts and other cultural products from or about the American south. Its purpose is to understand how a regional culture functions in itself and in coordination or counterpoint with the national culture, and specifically to come to terms with the special history of the South both before and after the Civil War. Race relations and the south's special relation to agrarianism, both as an economic organization and a symbolic identity, will be important concerns of the course.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGLIT 2216 - THE NEGRO QUESTION  
Minimum Credits: 3  
Maximum Credits: 3  
The course of study undertaken in this course challenges the prevalent conception of race as an ontological category. More specifically, we will work to provide an account of the problematic of thought presented by the historical predicament of the negro, in particular.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGLIT 2223 - LITERATURE AND HEGEMONY  
Minimum Credits: 3  
Maximum Credits: 3  
During the late 19th century, well-publicized struggles over the economic and personal rights of various social groups compelled many U.S. Writers to conceive of private and public life in conflictual terms. This course will examine works of U.S. Fiction, social science, and social commentary written between 1890 and 1910 that represent or imagine relations of domination and resistance among populations in this era. To provide an intellectual framework for our discussions, we will also read works of cultural anthropology, historical materialism, and the new historicism.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

ENGLIT 2230 - ANGLO-AMERICAN CULTURAL EXCHNG  
Minimum Credits: 3  
Maximum Credits: 3  
Many studies of nineteenth-century theatricality begin with Jane Austen's Mansfield Park (1814) and keep the focus squarely on Victorian novels that thematize performance: Jane Eyre (1847), Vanity Fair (1847-8), Daniel Deronda (1876), and so on. In this course, we will take a more capacious approach to this topic, not only by considering American texts alongside British ones, but also by studying actual dramas and children's literature alongside novels. Authors we will likely read include Austen, Harriet Mozley, Harriet Beecher Stowe, Louisa May Alcott, Oscar Wilde, J. M. Barrie, and Frances Hodgson Burnett. Supplemental critical readings on theatricality, performance studies, and theatre history will also be discussed.
ENGLIT 2231 - BLOOD, CLASS AND NOSTALGIA
Minimum Credits: 3
Maximum Credits: 3
This course explores the intersection of class ethnicity and memory in Anglo American literature and culture.

ENGLIT 2232 - COSMOPOLITANISM
Minimum Credits: 3
Maximum Credits: 3
Course examines cosmopolitanism both as a sensibility in important literary and filmic texts and as a scholarly practice in the humanities. We will seek to understand the logic, aesthetics, and ethics of cosmopolitan attachments in historical and contemporary circumstances. We will consider a range of texts and critiques that provide opportunities for thinking self-critically about topics in cultural politics.

ENGLIT 2234 - THE WORLDING OF US LITERATURE
Minimum Credits: 1
Maximum Credits: 3
This course is designed to allow graduate students to read, discuss, and evaluate very recent work about transnational dimensions of American literary studies: the circulation of U.S. Writings from the rest of the world in the U.S.; And a range of in which U.S. Writers and readers have been connected to other national cultures as well as regional and cosmopolitan international literary cultures.

ENGLIT 2235 - PERIODICALS AND THE PUBLIC
Minimum Credits: 3
Maximum Credits: 3
This course examines the connection between public documents such as newspapers and magazines and the public" as both a conception and a set of individual agents. The course works with both primary materials and various conceptual frame works for understanding the production, function, and influences of "public" discourses as represented in periodicals of various kinds during various historical eras. Readings and discussions will address how periodicals shape public understandings and policies involving education, literature, high culture, and the role of intellectuals."

ENGLIT 2240 - RACE, VISUALITY, LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course explores the intersection of race and visual technologies and techniques (photography, film, daugerreotypy, etc.) as they relate to key questions in literary studies. We will pay particular attention to the terse interplay between images, visual practices, and their role in the documentation and production of the racialized body. We will begin our study in the 1850s and conclude with a consideration of more recent visual productions and practices. In so doing, this course will attend to varied strategies (sonic, haptic, affective) deployed by visual theorists, artists, and intellectuals who attempt to negotiate and exit the violent relationship between the visual and race.

ENGLIT 2242 - LITERATURE OF SLAVERY
Minimum Credits: 3
Maximum Credits: 3
Explores in the writings about slavery in America from the beginning to the present: documentary, historical, and polemical, both fictional and nonfictional. Emphasis on 19th century materials and 20th century interpretations. Requires substantial research, critical, or bibliographical writing project by students.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2243 - NEW WORLD SLAVE NARRATIVE**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will study the new world slave narrative as both a theoretical critique of modernity and a political act of resistance to a specific mode of alienation. Students will read a selection of new world English language slave narratives, in conjunction with a selection of key philosophical, legal, and economic writings of Western modernity.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2245 - BLACK LITERATURE**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Explores the interplay of social history and literary texts in the emergence of modern black literature. Readings range from slave narratives to modern novels.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2246 - MODRNSM AFRICAN-AMER POETRY**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will chart the development of a modernist poetics among African American writers from 1915 to 1950. We'll read and discuss a series of influential poets from this period, including Jean Toomer, Claude McKay, Countee Cullen, Langston Hughes, Sterling Brown, Margaret Walker, and Gwendolyn Brooks.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2247 - AFRICAN AMERICAN AUTOBIOGRAPHY**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course examines the development and history of autobiography writings from the African diaspora.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2248 - ABOLITIONIST DISCOURSE**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will investigate the rise of abolitionist in the West--that is, the evolution of the terms of the debates surrounding slavery from the latter part of the 18th century to the late 19th century, including some attention to the philosophical discourse of natural rights and its dissemination. Some comparisons with the emergent gender discourse of the period will also be discussed.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2249 - W.E.B. DUBOIS**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will examine some of the major writings of W.E.B. Dubois, the turn-of-the-century African-American intellectual whose sociological
and philosophical writings helped to inaugurate African-American studies. The course will examine DuBois's writings in their historical contexts and will also examine work by contemporary interpreters of DuBois.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2250 - 20TH CENTURY AMERICAN LITERATURE**

*Minimum Credits:* 3  
*Maximum Credits:* 3  
The course examines works written in this century within the main currents of 20th century American and European intellectual history. It also explores notions of modernism, American literature and the cultural and institutional sites of the literary.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2251 - U.S. CULTURE 1929-73**

*Minimum Credits:* 3  
*Maximum Credits:* 3  
The mid-20th century--encompassing the depression, World War II, and the cold war--saw a great variety of cultural products and practices, many of which are still vital today. Not a survey, this course will focus on specific topics and issues, while allowing students scope to write their essays on concerns of their choice from the period.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2252 - MADE-USA: AM-FR CULT, 1945-68**

*Minimum Credits:* 3  
*Maximum Credits:* 3  
This course will look at the impact of America on Europe in the post-war period. The specific focus will be France and England, and the most important medium considered will be film.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2253 - INNOVATIVE POSTWAR US POETRY**

*Minimum Credits:* 3  
*Maximum Credits:* 3  
This class will examine the flourishing (and floundering) of key movements in poetry and poetics since WWII, with significant attention paid to the poems and manifestoes of black mountain poets, the beats, the black arts movement, the San Francisco renaissance, the New York school, and language writing.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2254 - REVOLUTIONARY POETRY US LEFT**

*Minimum Credits:* 3  
*Maximum Credits:* 3  
This seminar will examine a number of ways in which U.S. poets have grappled with the question of their own political engagement as poets. Focusing on the different forms and modes in which they have conceived the relation between their aesthetic principles and radical political concerns, we will also consider the commonalities that they share over time and in various socio-political contexts. Over the last seventy years, it has become a commonplace of mainstream literary critics and cultural historians to assume that the U.S. left is incapable of producing a consistently complex'that is, an intellectually and artistically nuanced body of poetic writing. However, as we will see, this judgment is often based on only a cursory familiarity with leftist political poetry in the U.S., while the bulk of the seminar will focus on readings of politically radical poets from the 1920s and 1940s including authors who were, in various degrees, affiliated with the iww and communist party, such as Arturo Giovannitti, Langston Hughes, Muriel Rukeyser, Kenneth Fearing, Genevieve Taggard, Michael Gold, Margaret Walker, Alfred Kreymborg, Edwin Rolfe, and Tillie Olsen. We will also spend time towards the end of the semester considering a number of contemporary political poets such as (potentially, but not limited to) Juliana Spahr, Sparrow, Eileen Myles, Mark Nowak, Peter Lamborn Wilson, Anne Waldman, and Ariana Reines.  
**Academic Career:** GRAD
ENGLIT 2255 - AMERICAN DRAMA
Minimum Credits: 3
Maximum Credits: 3
Examines American drama from O'Neill to the present and its relation to various social and cultural constructions of America.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2256 - DRAMATIZING AMERICAN WOMEN
Minimum Credits: 3
Maximum Credits: 3
Dramatizing American women will focus primarily on modern plays by American women playwrights but will also include plays by men. Problems to be explored include: American essentialism, presentations of the body, cross-dressing, dramaturgical strategies such as foregrounding or displacing or deforming women, refashioning cultural myths, collective writing, resistance to linear, Aristotelian structure. Secondary texts will include critical theories of feminist theatre, historic documents, photographic images, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2257 - DISCIPLINING AMERICAN DRAMA
Minimum Credits: 3
Maximum Credits: 3
Investigates the history of the construction of academic disciplines in American colleges and universities from about 1895, to the present paying attention to the construction of English literary studies, and, in particular, to the Hege Monic domination of poetry and prose at the expense of American, but not English, dramatic literature. We will examine the relationship between dramatic literature and other genres as well as the institutionalizing of drama in education.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2258 - DRAMATIZING AMERICAN HISTORY
Minimum Credits: 3
Maximum Credits: 3
The point of departure will be Herbert linden Berger's contention that historical plays provide a special opportunity to examine the transactions between imaginative literature and the external world, which the drama variously attempts to imitate, to attack, to influence, and to transcend: for historical writings make a greater pretense at engaging with reality than do overtly fictive writings. We will consider the historical materials on which the plays are based and ways in which historical narratives have been imaginatively tested.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2279 - STUDIES IN U. S. FICTION
Minimum Credits: 3
Maximum Credits: 3
This course will explore works of United States fiction that have cultural, literary, and/or historical significance.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2282 - HISTORY OF AMERICAN FILM 1
Minimum Credits: 3
Maximum Credits: 3
Although intended especially for graduate students interested in continuing on in film study, this introductory course is open to all graduate students. It offers a full history of American film in its institutional, ideological, aesthetic, and technological aspects from the end of the 19th century to the present.
ENGLIT 2285 - RACE & GENDER IN 20THC POETRY
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the aesthetic and institutional constructions of poetry in the twentieth century in the United States, paying particular attention to how issues of race and gender have marked changes in what counts as poetry and how poetry is read.

ENGLIT 2286 - AMERICAN LITERATURE 1890-1900
Minimum Credits: 3
Maximum Credits: 3
American at century's end, 1890-1900 will consider canonical American literature in a wide cultural context paying particular attention to the work done in periodicals on such contested issues as the burgeoning middle class. The institutionalization of professions, American nationalism, and developing consumer culture. Students also will examine recent critical evaluations and formulations about the decade and be encouraged to undertake an original research project.

ENGLIT 2287 - TRANSATLANTIC LITERATURE
Minimum Credits: 3
Maximum Credits: 3
One of the legacies of the modern nation has been the creation of separate literary traditions based on geographical borders, as well as a form of literary nationalism that sees "national literature" as the key sign of a nation's independence. Yet, these national traditions were initially formed within a period of transoceanic exploration, migration, and circulation. This course considers what critical advances become possible when we think about eighteenth and nineteenth-century England and the Americas as a single historical field and read their literary productions in a Transatlantic context. We will read texts that were popular on both sides of the Atlantic, as well as critics that deal with the history and theory of thinking Transatlantically.

ENGLIT 2322 - GLOBAL REALISMS
Minimum Credits: 3
Maximum Credits: 3

ENGLIT 2323 - MODERNISM AS REALISM
Minimum Credits: 3
Maximum Credits: 3
This course will look at writers like joyce and woolf and critics like auerbach and bazin to argue that modernism is best understood as a transformation rather than a simple rejection of nineteenth century realism. The course will consider realism from the point of view of philosophy, literature, and film.

ENGLIT 2324 - TRANSLATION
Minimum Credits: 3
Maximum Credits: 3
This course will explore theories, practices, methodologies, and creative approaches to translation, primarily in the twentieth century. Topics covered
will range from ethics and ideologies to linguistic change and world literature. No extensive knowledge of languages other than English is required.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**ENGLIT 2325 - MODERNISM**

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the historical and theoretical basis of modernism in a European context. It's primarily focused on literature in England, but the course will also attend to the other arts.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**ENGLIT 2326 - MODERN POETRY**

Minimum Credits: 3  
Maximum Credits: 3  
Through a close reading of major 20th century poets, the course explores the relation between modernist literature and contemporary thought.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**ENGLIT 2327 - AESTHETICS AND POLITICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will take up the relationship between the aspects of imaginative, literary writing that have traditionally been emphasized by writers themselves (aesthetics, imaginative freedom, relative independence from market imperatives) and the aspects emphasized by academic critics shaped by the cultural studies tradition (the shaping effects of ideology, the critique of traditional authorship, and the implication of all cultural products in market conditions).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**ENGLIT 2328 - THEORIES OF MODERN DRAMA**

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine theories of modern drama from naturalism to postmodernism. Of particular interest will be the movement of Western drama of the early twentieth century away from restrictive realism and naturalism toward a symbolically charged, ritualistic, and metaphysical drama.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**ENGLIT 2329 - CONTEMPORARY NOVEL**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will concentrate on ten to twelve novels published during the period from the end of WWII to the 1980s. The works to be analyzed will be for the most part American or British; there will be a few from other cultural contexts. We will be particularly interested in the manner in which individual writers dramatize major political, social, and historical issues of the period, and in some ways in which the novel may or may not maintain its traditional dynamic cultural position.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**ENGLIT 2330 - SAMUEL BECKETT**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar studies the major work of the Nobel prize winning author, Samuel Beckett. It examines his major works in theater and fiction in the context of not only his non-literary writings but his contemporaries' work in literature. It treats Beckett with an eye to his place in the international
movements of literary high modernism and as a transitional figure to the newer style of late modernism and postmodernism.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2331 - THEATRE AND ANTI-THEATRE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will explore the development of the theatre in early modern England in relation to anti-theatrical discourses and practices.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2333 - POETRY AS UTTERANCE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will examine the theoretical implications and pedagogical advantages of treating poems as imitations of utterances. We will elaborate this model of poetry from a variety of theoretical sources from Plato to the present, distinguish it from other models, especially the residual new criticism that still informs much of our teaching of 'close reading,' and test it through reading of poems from a wide range of periods and genres of poetry in English. Both lyric and narrative poetry will be considered as will the extension of this model to reading artistic narrative prose. The model we will be using, developed mainly from the work of Bakhtin school, underwrites a version of English 0500, 'Introduction to Critical Reading,' that has proved effective in overcoming students' 'poetry anxiety' and developing their confidence and skill in pleasurably and responsibly reading demanding poems. Graduate students anticipating teaching this course or 'Reading Poetry' (and those with unresolved poetry anxiety of their own) are especially encouraged to enroll, as are poets with their own ideas about how they would like to be read. The course would also be appropriate for mat students in English who anticipate teaching the reading of poetry in the schools.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2350 - POST MODERNISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will attempt to characterize post-modernism both in historical and theoretical terms, considering not only literature, film and television but architecture and music as well.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2351 - NARRATIVE IN POSTMODERNITY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Postmodernism has sometimes been sweepingly identified with the breakdown of narrative (or of traditional narrative, whatever that is), but fiction written in this era of post modernity still narrates, even if it narrates in some new ways. This course will examine how narrative operates in a range of recent fictional writings, all of which have been written in the era of postmodernity but not all of which might be postmodernist in style. The course aims to bring together narratology and postmodern cultural theory as frames for the discussion of recent novels & short fiction.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2352 - POSTCOLONIAL GLOBALITY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course will investigate the future agendas for postcolonial studies, exploring the encounter between discourses of postcoloniality and globalism. It will study arguments for and practices of the comparative study of discrepant postcolonial histories and experiences, in particular taking up debates over the place of area studies in postcolonial studies.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
ENGLIT 2382 - IRISH LITERARY REVIVAL
Minimum Credits: 3
Maximum Credits: 3
Readings in the major writers of the Irish Renaissance as well as in figures whose importance to an understanding of the period is primarily historical. The course examines the relationship between international modernism and the cultural regionalism and naturalism of Irish literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2385 - POST CLNL DISCRM & CULTL CRITQ
Minimum Credits: 3
Maximum Credits: 3
This course will provide a historicized introduction to key debates in the field of post-colonial studies, as well as reflect upon the institutionalization of that field. We will pay particular attention to the problematics of race and gender in relation to the post-colonial nation-state in a new-colonial global economy. We will investigate various sites of cultural negotiation including Caribbean carnival, and texts by Marx, Fanon, Césaire, Said, Glissant, Spivak, Bhabha, Mohanty, Ahmad, Carpentier, Lovelace, Marlene Nourbese, Rushdie, and Mahasweta Devi.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2386 - GLOBAL LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This seminar explores the conditions involved in the growth of literary expression in global English. It touches on theories of the psychological and physiological conditions of language or the origins of language in the structures of the human mind, as well as some concerns of socio-linguistics. Its central focus is not with these matters, however. That focus is on attempting to say something meaningful about the social, political, and psychological realities being fostered at this time under the banner global".
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2387 - IMPERIALISM AND MODERNITY
Minimum Credits: 3
Maximum Credits: 3
This course examines the epistemological and material results of the imperialist enterprise in Africa, Asia and Latin America. Focusing on the dialectic of tradition and modernity, we will read how these discourses stand for in Digenous vs Colonial legacies, for past vs present and for natural vs imposed systems of knowledge. Some attention will also be given to the category of the postmodern, and to the question of whether the third world has entered postmodernity.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2388 - THIRD WORLD FEMINISMS
Minimum Credits: 3
Maximum Credits: 3
Course will stage conversations and confrontations between first and third world feminisms, and amongst different third world feminisms. As it explores the production of the third world female subaltern subject by the fields of anthropology & psychoanalysis, as well as by popular/mass cultural texts. It will pay particular attention to the tensions and articulations between nationalist, statist, and feminist politics, historicizing our exploration of these issues by addressing the politics of the practice of veiling in different middle eastern and African nationalist/statist contexts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2389 - THIRD WORLD LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This seminar will study colonial and post-colonial literature by major writers from the English-speaking Caribbean and Africa. It will focus upon thematic construction. Vegetative and landscape imagery, the incorporation of myths and folklore within the narrative, characterization vs. Political
stances, the dramatization of conflict, and the alienated hero/heroine. In both literatures the selected writers embark upon a quest for cultural self-discovery among traditional and Western-oriented societal values and philosophies.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2390 - ANGLOPHONE SOUTH ASIAN NOVELS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course surveys novels from greater India (Pakistan, India, Bangladesh and Sri Lanka) from 1945 until the present. We will begin the term by reading 'midnight's children.' The rest of the course will be given to exploring thematic concerns and formal changes in Anglophone writing from the creation for the 2 major states. Readings will include authors who published before Rushdie, such as Desani, Narayan, Markandaya, Desai, and the many who are contemporary and younger, including Ghosh, Mistry, Ondaatje, Sivanandan, Chaudhuri, a. Roy, v. Seth, and v. Chandra

**Academic Career:** GRAD

**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2394 - DIASPORA & (TRANS) NATNL IDEN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
How does diaspora require us to rethink existing territorial models of the nation-state, and what models of community does it offer? What historical connections can we trace between diaspora, nationalist struggles, and emergent supra- or trans-national identities? Focusing on Caribbean diasporas to both metropolitan centers and other Caribbean islands, we will explore potential differences between immigrant and diasporic cultures, diasporic mythographies of the homeland", and transformations of and negotiations over national identity by “returnee”.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2395 - CARIBBEAN LITERATURE**
This seminar studies Caribbean literature in relation to central debates about aesthetics & cultural resistance in post-colonial theory. It explores how the relationship of Caribbean (sub) cultures to imperial, ancestral, & national cultures was worked out in debates over the politics of form. Topics covered may include the relationship of Caribbean and European literary traditions; the hybrid poetics of Creolization and Mestizaje; and the shifting functions in post-nationalist, migrant", and feminist literature of current literary representations of popular culture.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ENGLIT 2396 - GLOBAL SOUTH

Minimum Credits: 3  
Maximum Credits: 3  
At a moment which is witnessing the resurgence of mass anti-globalization and leftist movements in Latin America and elsewhere in the "third world", this seminar examines possible collaborations amongst art, theory, and activism in the interests of contributing to/developing a south-South dialogue. For example, what roles have arts played in America? How have they memorialized, critiqued and participated in radical politics (e.g., Haiti, Cuba, and Grenada)? We will draw on postcolonial theory and arts, performance theory, and feminist theories of the body for answers.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ENGLIT 2397 - POST COLONIAL FICTIONS

Minimum Credits: 3  
Maximum Credits: 3  
This seminar will take up key theoretical debates in post-colonial literary studies in conjunction with literary illuminations of those debates. It will dwell particularly on those instances where literary texts point up the limitations of the organizing theoretical fictions of post-colonial studies. We will investigate the forms of political dissent practiced by several genres and narrative modes, from the novel and memoir to romance and magical realism, testimonial and literature of witnessing.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ENGLIT 2398 - LITERATURE AND REVOLUTION

Minimum Credits: 3  
Maximum Credits: 3  
This seminar begins with questions posed by David Scott: what is the relevance of the modern concept of revolution to our present moment? How do we need to modify or translate the great modern theorists of revolution to speak to the considerably changed political landscape we inhabit today? This course takes the eve of the 50th anniversary of the Cuban revolution and the 30th anniversary of the Grenadian revolution as an occasion to investigate complex legacies of revolutionary politics in a 'post-socialist' moment.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ENGLIT 2440 - NATIONALISM & SEXUAL POLITICS

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the relationship between nationalism, national identity and the emergence of nation-states. Nationalism has also come under fire by feminists for its exclusion of women's issues as well as for its unspoken dependence on the category of gender for much of its vigor. Does this critique therefore mean that nationalism is ineffectual, useless to those who might be interested in "third world" and feminists issues?

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ENGLIT 2445 - POLITICS AND THE NOVEL

Minimum Credits: 3  
Maximum Credits: 3  
This course takes its title from Irving Howe's classic work of that name, but it will also have as influence Said's culture and imperialism and Jonah Raskin's newly reprinted the mythology of imperialism. What, if any, relation is there between politics and the novel, between our responses as readers and the power differentials or stakes of action represented? Literary readings might include: Conrad, James, Kipling, Forster, Zola, Mistry,
ENGLIT 2457 - FILM AND ETHNOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
In the context of a history of ethnographic cinema, this course will introduce students to a broader scope of theoretical inquiry that problematizes distinctions of science and entertainment, authenticity and hybridity, self and other, and non-fiction and fiction. Readings and film will also consider the relation between anthropologist and subject; ethnographic film spectatorship; identity tourism, salvage ethnography; colonial and anthropological knowledge, auto-ethnography; and imperialist nostalgia.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2460 - FILM AND LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course examines the historic and theoretical relationship between film and literature. Among the topics to be considered are: (1) narrative structure in film vs. Literature; (2) parallels between filmic and literary genres; (3) adaptation from literature into film; (4) the case of the writer/director; (5) the influence of cinema on writing; (6) the politics of high vs. Low culture distinctions; (7) a comparison of film and literature criticism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2461 - GENRE AND FILM
Minimum Credits: 3
Maximum Credits: 3
This seminar will consider genre studies as a means of categorizing films and identifying their cultural significance. We will begin with an overview of the theory of genres in literary studies, considering both traditional (Aristotle, Northrop Frye) and contemporary (structuralism and post structuralism) approaches. The course will focus on a few specific American film genres as illustrations of film genre theory. At the end of the course, we will consider the application of genre studies to other forms of mass culture.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2463 - CINEMA AND NATION
Minimum Credits: 3
Maximum Credits: 3
This course will examine questions of national cinema in relation to theories of nation formation and nationalism. We will read texts that explore conceptions of the nation and texts that critically confront the problematic designation of a national cinema. We will screen film texts dealing with the state, citizenship, ethnicity, race, sexuality and gender issues that are intrinsic to representations of nationhood.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2464 - MASCULINITY IN CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course examines recent theories of masculinity with close attention to particular films and TV programs.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2465 - CINEMA, COMEDY AND SOCIETY
Minimum Credits: 3
Maximum Credits: 3
An examination of theories of comedy and satire as they relate to the cinema. Films will be analyzed for their comic style and placed within a social/historical context. Readings will entail works in comic and film theory.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2467 - CINEMA AND TRAUMA
Minimum Credits: 3
Maximum Credits: 3
Trauma studies now stands at the forefront of contemporary cultural theory, straddling such disciplines as history, psychology, philosophy, and literary criticism. This course examines conjunction of trauma studies and cinema studies by analyzing representations of the Holocaust and Hiroshima in film, along with the intellectual debates they invoke concerning the limits of representation. Course may also address cinematic renderings of more recent traumatic events such as the Vietnam war and the aids pandemic.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2470 - WOMEN AND FILM
Minimum Credits: 3
Maximum Credits: 3
This course questions the roles of women in international cinema, surveying theoretical issues about the representation of women as well as the work of various women film makers.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2477 - CLASSICAL HOLLYWOOD CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course will examine both classical Hollywood cinema and the so-called studio system in which such cinema was produced. Focus will be on the classical Hollywood cinema as mass culture and the studio system as mode of industrial production; thus, primary emphasis will be on using these topics as models for examining textual production in historical, social, and especially industrial-economic contexts.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ENGLIT 2479 - GRADUATE FILM TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course will have variable topics concerning the cinema as they arise as significant theoretical or historical issues in the discipline.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2480 - FILM DIRECTORS
Minimum Credits: 3
Maximum Credits: 3
This course deals with a particular film director (to vary with the term) and considers: the role of authorship in filmmaking (a collective art) and its relation to the auteur theory; the thematic tropes of, stylistic patterns in, and the generic range of the director's work; the relation between the director's work and the social/historical context in which he or she operated; and the relation between the director's work and the national cinema(s) in which that work was produced.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2481 - DAVID CRONENBERG: GENRE/ART
This course will look into the films of David Cronenberg one of the world's foremost film directors. This seminar uses Cronenberg's controversial oeuvre as a test case for several key questions in film studies. How do we distinguish genre cinema from art cinema? How do we define or resist defining a national cinema between the poles of genre and art? Is the author killed or resurrected by working within or between genre film and art film?

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2490 - CINEMA/PHOTOGRAPHY/NEW MEDIA
Minimum Credits: 3
Maximum Credits: 3
This course engages questions of cinematic image by studying cinema in intermediated contexts (that is, between different media forms), a task that has become increasingly urgent in recent years as the cinematic image has undergone fundamental transformations in terms of production, distribution, and consumption. We will consult philosophers and film theorists (Sartre, Bazin, Barthes, Benjamin, Kracauer, Bergson, Deleuze, Manovich), along with filmmakers (Hitchcock, Antonioni, Bergman, Truffaut, Vertov, Egoyan, Cronenberg and Kiyoshi Kurosawa).

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2500 - SEMINAR IN PEDAGOGY
Minimum Credits: 3
Maximum Credits: 3
This course provides the opportunity for first-year teaching assistants and teaching fellows to develop strategies for teaching, to reflect on those strategies, and to consider the larger social, historical and institutional contexts that shape their teaching. The seminar will place students' work in the course they are teaching into dialogue with texts that focus on current critical questions and pedagogical theory and practice across English studies curricula.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2501 - TOPICS IN LITERACY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the teaching and learning of writing in non-academic settings, such as after-school programs, arts institutes, seniors centers, churches, libraries, shelters, health agencies, prisons, etc. The course will have three distinct and interwoven strands: theory and practice of pedagogy for creative writing, study of the uses of literacy in diverse settings, critical reflection on the processes of "mentoring", "service learning", "outreach", and collaboration.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2502 - LITERACY AND PEDAGOGY
Minimum Credits: 3
Maximum Credits: 3
This course will investigate the historical, cultural, and political constitution of pedagogy and the relation of its various historical and social practices to changing views of "literacy".

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2503 - FEMINST RHETORICS & PEDAGOGIES
Minimum Credits: 3
Maximum Credits: 3
We will examine historical and present-day iterations of feminist rhetoric in the United States. Beginning in the 19th century, we will analyze the rhetorical achievements of figures such as Elizabeth Cady Stanton and Sojourner Truth. We will trace the ways in which women from various ethnic, racial, and classed backgrounds have articulated concerns for and about women throughout the 19th, 20th and 21st century. We will consider how various rhetorical theories and historiographic approaches might bring these women's rhetoric's into disciplinary discussions.
ENGLIT 2504 - MULTIMODAL CMPSTN AND PEDAGOGY
Minimum Credits: 3
Maximum Credits: 3
A seminar/workshop in writing, composition and teaching digital media
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2505 - FEMINIST PEDAGOGY
Minimum Credits: 3
Maximum Credits: 3
This course will investigate the projects and politics of feminist pedagogy-from its early revisionist activities in the 1960s, through its affiliation with diversity projects, to current interest (for example, sexuality, race, transnational and social movements, gender and development). Feminist pedagogy has long been concerned with interdisciplinary questions about women, gender, and sexuality and how such questions intervene in the curriculum, in academic work, and in teaching and learning. We will explore the history of feminist pedagogy as well as consider particular situated projects, including projects from students' particular disciplines, teaching traditions, or expertise. We will investigate questions such as the following: how does feminist pedagogy challenge the curriculum? The teaching canon? Modes of teaching and learning? Notions of expertise and knowledge? Notions of service? Relationships between theory and practice?
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

ENGLIT 2506 - WOMEN AND LITERACY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ENGLIT 2509 - ORDINARY LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
The purpose of the seminar will be to consider ordinary language theory and its bearing on composition and the teaching of writing. Readings will include an anthology of student essays, some standard work in composition (Mina Shaughnessy, Joe Williams, Jim Slevin, William Coles, Peter Elbow), and a selection of work in rhetoric and philosophy, with particular attention to IA Richards, Stanley Cavell, JJ Austin and Ludwig Wittgenstein.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2510 - SEMINAR IN TEACHING COMPOSITN
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the idea as well as the practice of teaching composition.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2511 - SEMINAR IN TEACHING ENGLISH
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of ENGLIT 2510. It will focus on issues involved in teaching literature, writing, and composition -- it will attempt to develop historical and critical awareness about the discipline of English", its ideologies and practices."
Academic Career: GRAD
ENGLIT 2516 - PROFESSIONALISM & THE AMERICAN UNIVERSITY
Minimum Credits: 3
Maximum Credits: 3
This course examines the 19th century emergence of professions, the conceptualization of professionalism, and the re-forming of American universities as institutions of professional certification and activity. The focus of the course is on the rhetoric which constituted a conception of professional as separate from public, personal, or amateur. The course also examines and problematizes the continuing rhetorical practices of professional discourses, especially as those rhetorical practices constitute authority, knowledge, representation, and relationships to self and others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2517 - ARCHIVES OF ENGLISH CURRICULUM
Minimum Credits: 3
Maximum Credits: 3
Working with institutional archives, this course investigates the emergence of diverse structures and practices of English (e.g., American literature, creative writing, black studies and women's studies, composition) in the American university, from the late nineteenth century to the present.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2518 - WPWP SUMMER INSTITUTE FOR TEACHERS
Minimum Credits: 6
Maximum Credits: 6
A seminar for administrators and supervisors who work with teachers of writing at all levels and in all subjects. Workshop topics include: what both research and experience tell us about the writing process; conditions needed for a writing-centered classroom; and connections between writing and learning across the curriculum.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

ENGLIT 2519 - WRITING & AGITATIONS OF POWER
Minimum Credits: 3
Maximum Credits: 3
Course will explore ways in which writing negotiates the systems of language and power in which it is written. What cultural, rhetorical, and creative strategies does it employ to inscribe a dissident or resistant voice when dealing with social and hegemonic constraints? From the visceral violence of Jacobean tragedy to the reflexive gymnastics of John Barth and Italo Calvino, writers have sought to rip the imagination away from its cultural constraints.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2520 - WRITING AS TEACHERS
Minimum Credits: 3
Maximum Credits: 3
The course has a double focus: on acts of inquiry into our work as teachers and on writing for professional purposes. The aim is to bring together graduate students interested in pedagogy and experienced teachers from the schools to work collaboratively on the following: reading and discussing samples of teacher-research as well as critical texts on the discourses of education; designing and conducting small-scale classroom research projects; writing these projects up in a professionally useful form, such as a conference paper or curriculum document.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2521 - CMPTN HIST/THRY/PRA: DIG THRY
Minimum Credits: 3
Maximum Credits: 3
This course provides a theoretical exploration of digital media, new media, computer-based communication, and digital writing. Considering computational dynamics, networked social modes, technics and embodiment, and machine composition practices prior to and subsequent to the arrival of computers and the world wide webs, the course will engage students in current issues such as: interaction and immersion; technotechno- utopianism and 'determinism; the 'new'-ness of media; affectivity; distribution, proliferation and control; networked sociality; etc.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2522 - LITERACY, RHETORIC, CMPTR CODE
Minimum Credits: 3
Maximum Credits: 3
1. This course takes up the recent turn toward computer code as an object of study in the humanities, as exemplified in the fields of digital humanities, digital media, software studies and critical code studies. This turn toward code in the humanities is driven by the recognition that computer code is slipping into domains once dominated by text. That is, much of our communication and information is now filtered through software running on our computers, phones and tablets. Code propels our modern literacy practices: reading PDFs and writing essays, watching and making videos, taking and editing photos. Looking at computer code through the lenses of literacy and rhetoric in this course, we will ask: what can writing mean and do now that it includes not just text, sound, image, and animation but also *code*? Helping us to explore this question will be theoretical work by Kittler, Chun, Bogost, Manovich, Kirschenbaum, Hayles, Knuth, Galloway and Marino, as well as hands-on practice with digital composition. No previous technical knowledge is required, but students will be expected to play games, blog, and code digital compositions of their own design. Both textual and computational compositions are welcome as final projects.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2523 - THE ART & IDEO OF TCH THE ESSY
Minimum Credits: 3
Maximum Credits: 3
What are we asking of students when we ask them to compose an essay? What knowledge are we hoping they will develop? Many claims have been made abut the cognitive, personal, and political benefits of essay writing, but such claims have been challenged by work in literacy studies that calls into question the privileging of "essay-text" writing, a privileging that has consequences not only for the classroom but also for larger, public policy debates about literacy and education. This course will explore the potentialities and limitations of the essay in classrooms and other venues.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2524 - RHETORICAL GESTURES
Minimum Credits: 3
Maximum Credits: 3
This course explores historical, theoretical, and methodological approaches to gesture as a component of rhetorical invention. Topics to be considered include affect, kinesthesia, sympathy, and other modes and manifestations of bodily suggestion.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2525 - COMPOSITION STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course will provide a general introduction to composition as an area of professional study. The purpose of the course is to introduce key texts (and forgotten texts) since the turn of the century, and to situate those texts in the development of English studies, the history of post-secondary education, and history of related work on writing. We will be looking at how the field has represented the subject as its own and at how the field has constituted itself as a discipline".

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2526 - POETRY AS UTTERNC: THRY/PEDAGY
Minimum Credits: 3
Maximum Credits: 3
This course will examine what it means to treat poems as imitations of utterance. We will elaborate this model of poetry from a variety of theoretical
sources from Plato to the present, distinguish it from other models, and test it through reading of poems from a wide range of periods and genres of poetry in English. Our readings of poems will both test our model and consider its potential fruitfulness as a guide to teaching the reading of poetry from the elementary to the college level.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2527 - COMPOSITION THRY 21ST CNTUR
Minimum Credits: 3
Maximum Credits: 3
In this course, we will survey major composition theories emerging at the present moment by reading materials from major journals in the field as well as recently published monographs.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2528 - FOUR RHETORICAL THEORISTS
Minimum Credits: 3
Maximum Credits: 3
The seminar will read key texts of four major theorists whose work has been and continues to be fruitful for composition, literature, and criticism and will sample some recent inquiries and arguments informed by their work. These thinkers cross our current disciplinary boundaries in ways that would interest students of composition, literature, criticism, and writing, and student inquiries engaging them in those fields would be all welcome course projects.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2529 - DSGNG FICTN FOR TEACHNG CMPSTN
Minimum Credits: 3
Maximum Credits: 3
A seminar that will enable its participants to experiment with creating fiction that can help students in composition courses become more proficient as readers and writers. The course will begin with some readings relevant to understanding the pedagogical power of various forms of story, but will have mainly a workshop focus on material generated by the seminar participants. Seminar members will be encouraged either to experiment with designing fiction for use in their own composition courses or to write a critical essay on some aspect of story as a pedagogical mode.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

ENGLIT 2530 - (F)ACTS OF INTERPRETATION
Minimum Credits: 3
Maximum Credits: 3
This course invites reflection on the differences between old hermeneutics" and "new hermeneutics". The course will focus on the shift in concern from the author and the work to the text and the reader, and on what this entails for readers' and writers' reception and production of meaning."

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2531 - SEQUENCING
Minimum Credits: 3
Maximum Credits: 3
An investigation of sequencing, a way of organically integrating and developmentally structuring all the elements of a writing course, in relation to different teaching styles and commitments. The course will concentrate first on readings relevant to sequencing as a pedagogy, its origins and variant forms, and conclude with a workshop focus encouraging seminar members to experiment with sequence designs of their own or to write a critical essay on some aspect of sequencing.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
ENGLIT 2532 - HISTORY OF RHETORIC
Minimum Credits: 3
Maximum Credits: 3
Figurative language has had, from the outset, a vexed status in Western philosophical/rhetorical systems, conceived by some as an aberrant form of representational discourse, by others as the most foundational unit of meaning. This course will examine three specific historical moments, each of which handles the conundrum of metaphor in a different manner: the classical period (Plato, Aristotle, Longinus, Quintilian); the romantic period (Coleridge, Shelley, Emerson, Whitman) and the modern period (T. S. Eliot, Wallace Stevens, I. A. Richards and Cleanth Brooks).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2533 - ADVANCED RESEARCH IN COMPOSITION
Minimum Credits: 3
Maximum Credits: 3
Course provides perspective on current basic and applied research on written composition and understanding of the methods, procedures, techniques, and metrics used in composition research; students read and critically analyze published research and propose and critically analyze their own research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2534 - COMPOSITION: HISTORY, THEORY, PRACTICE
Minimum Credits: 3
Maximum Credits: 3
Advanced seminar has two aims: first, to offer students a broad sense of the history of composition as both a teaching subject in American colleges and a field of intellectual inquiry with close connections to work in English studies, rhetoric, communications, cultural studies, and education. Second, to examine how composition has established itself as a discipline in the academy through a critical survey of the journals, presses, conferences, and graduate and undergraduate programs that make up the field.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2535 - FORMATIVE/SUMMATIVE EVALUATION OF WRITING
Minimum Credits: 3
Maximum Credits: 3
In this course, students will enhance their knowledge and understanding of the theories and the research on both formative and summative evaluation of student writing and will learn and practice the methods and techniques relevant to both types of evaluation, including relevant statistical methods for analyzing and interpreting the data.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2536 - WORKING THE FIELD: REPRESENTING OTHERS
Minimum Credits: 3
Maximum Credits: 3
This course examines how feminist and postmodern approaches to qualitative research--ethnography, case study, process tracing, teacher research, and literacy narrative--can be used to build theory and understanding literacy in academic and non-academic settings. Students will explore the ethical and political responsibilities researchers face in representing others in their writing as well as practical ways to adapt these methods to their own research and writing projects.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2537 - RHETORICAL EDUCATION: PAST, PRESENT, FUTURE
Minimum Credits: 3
Maximum Credits: 3
We will investigate the teaching tradition inside the historical and present-day study of rhetoric. Throughout the semester, we will consider how figures from Socrates and Quintilian to Gertrude Buck and James Berlin have designed and implemented different forms of rhetorical education for different types of students. The goals of the course will be both to examine how the form and function of rhetorical education has changed over time...
and circumstances and to imagine what rhetorical education should be today for students in the 21st century.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2538 - LITERATURE AND INSTRUCTION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A historical and theoretical investigation of the interaction between literature and instruction that examines various influential accounts of both literature and pedagogy, diverse examples of literature as an instructional practice, and key episodes in institutional history of literature as an object of instruction.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2539 - BROKEN ENGLISH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The first half of the course will follow the history of the interrelationship of English as language, as literature and as academic discipline from the Shepheardes Calendar to Ice Cube, taking various snapshots of the development of this interrelationship. The second half will follow the development of English as a university discipline in the 20th century and try to understand how the study of literature now relates to the study of the new media and how national literature of England relates to new forms—both linguistic and aesthetic—of English as a global language.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2540 - WRITING AND DIFFERENCE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar looks at the ways reading and writing are shaped by differences in race, gender, and class, as well as at various teaching practices that have been formed in response to these differences. We read studies of how the uses of literacy are shaped by their social contexts, along with social and political analyses of the effects of schooling on non-mainstream or remedial" groups. Students are asked to write several brief responses to readings and a longer semester project on an issue they define.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2541 - WPWP ADVANCED INSTITUTE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The advanced institute of the Western Pennsylvania writing project brings together a group of experienced teachers of writing interested in conducting small-scale classroom-based research projects. We work together on the design of our own projects. We take as our framework for reflection on classroom practices the Pennsylvania department of education's PCRP document, literacy and learning: reading, writing, and talking across the curriculum.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2545 - RHETORICAL BODIES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will explore the rhetorical nature of the material world.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2546 - DELIVERING AND RECEIVING WORDS**
ENGLIT 2550 - THEORIES AND ARTS OF DISCOURSE
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine how the theories and arts of discourse have been distinguished from one another. The emphasis will be on classical distinctions among rhetoric, poetics, and dialectic, as well as modern redistributions of the verbal arts. The primary goal of this course is to enrich the interchange among the contemporary disciplines of rhetoric, composition, and literary studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2554 - THE SCHOLARSHIP OF TEACHING
Minimum Credits: 3
Maximum Credits: 3
This course will examine current intellectual and institutional relationships between teaching and research, the two primary modes of work in the university. The course will provide a frame for considering in detail several of the various forms of research-toward-publication that include or derive from the classroom.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2555 - THEORIES OF TEACHINGWRITING
Minimum Credits: 3
Maximum Credits: 3
In this course we will examine intersections between teaching and writing theories in a number of ways. We will look at key transitional moments in the history of teaching/writing theory in the 20th century. In each case we will consider scholarly texts, companionable textbooks, and cultural constructs within which the teaching of writing gets framed. We will also look closely at a diverse array of contemporary textbooks, focusing specifically on the ways they pre-construct not only what good writing is and is for, but what a good student and a good teacher are supposed to do and believe to best promote it.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2560 - NARRATIVES OF TEACHING
Minimum Credits: 3
Maximum Credits: 3
This course will explore a wide range of narrative strategies, representing teaching and learning both in pedagogical scholarship and literary texts. We will study how scholars and writers portray their own teaching and that of others, paying special attention to how teachers characterize their students' learning. The basic premise of the course is that representations of teaching and learning are inevitably problematic, because of all they omit from their narratives. Students will develop research projects, represent moments in teaching and learning.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2565 - PRODUCING BOOKS,PRODUCING SUBJ
Minimum Credits: 3
Maximum Credits: 3
This graduate course investigates the cultural production of subjects (both the valorized topics of cultural scrutiny and the persons who operate within such fields). It focuses on how such subjects construct and are constructed through the production of books in specific areas of contention; in, for
example, women's studies, African-American literature, American Literary History, and popular culture.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ENGLIT 2566 - FIGURING WRITING**
Minimum Credits: 3
Maximum Credits: 3
This course investigates attempts to understand writing as the production (rather than the reception) of texts. Students will work with a variety of sources, including novels about writers and writing, studies of writers and the drafting of texts, educational materials (rhetoric's and grammars), ethnographies and scientific studies of writing and writers, work in literary theory and criticism, studies of literacy and culture, interviews, biographies and auto biographies.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ENGLIT 2567 - PRACTICES AND TEXTS**
Minimum Credits: 3
Maximum Credits: 3
This course is cross-programmatic in nature, emphasizing close reading of the kinds of writing that emerge from various sites of English studies. These might include, among other things, a canonical literary text, a marginal literary text, poems written by the class, student composition papers, a film or a television program. We encourage team-teaching of this course by faculty from different programs within the department.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ENGLIT 2568 - STYLISTICS: COMPOSING SENTENCES**
Minimum Credits: 3
Maximum Credits: 3
Focus is on issues connected to composing sentences. Considers ways attention to sentences has formed a part of instruction in rhetoric, writing and literacy through history; ways attention has shifted over time to produce different standard forms & conventions; and ways such issues can be taught. Considers theories of language, cognition, literacy and composing processes in relation to current problems of correctness, editing, proofreading, and style as well as in relation to how language use forms a set of evolving measures of literacy & standards for written prose.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ENGLIT 2569 - HISTORY OF THE BOOK**
Minimum Credits: 3
Maximum Credits: 3
This seminar is designed to encourage reflection on the assumptions that underlie our own scholars by investigating modern and post-modern conceptions of writing history, and their use value for both literary and cultural studies.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ENGLIT 2570 - MATERIALITIES OF WRITING**
Minimum Credits: 3
Maximum Credits: 3
Materialities of writing

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**ENGLIT 2588 - ADV TOPICS IN ENGLISH STUDIES**
Minimum Credits: 3
Maximum Credits: 3
Designed for Ph.D. Candidates, the course emphasizes topics relevant to the modern study of the discipline of English.
ENGLIT 2589 - TOPICS IN ENGLISH STUDIES
Minimum Credits: 3
Maximum Credits: 3
Focuses on issues of immediate cultural relevance to modern studies in the discipline of English.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2590 - PROJECT RESEARCH SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This seminar provides Ph.D. Students with an opportunity to work on their project papers in the company of their colleagues. Readings and topics of discussion are oriented toward student projects and are determined collectively at the beginning of the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2591 - BRITISH CULTURAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the work of the Birmingham School of British Cultural Studies including work that influenced this group such as Hogart and work influenced by this group in Britain and the U.S.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2600 - WARRIOR CULTURE NARRATIVES
Minimum Credits: 3
Maximum Credits: 3
This seminar will consider narratives from tribal, warrior cultures, from ancient Greece to the highlands of new guinea. Many of these will be transcriptions/editions of oral narratives.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2601 - COMEDY
Minimum Credits: 3
Maximum Credits: 3
Explores the nature of comedy through a careful consideration of literary criticism and comic texts. It seeks to establish models for comedy that can then be used within educational and/or critical contexts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2602 - TRAGEDY
Minimum Credits: 3
Maximum Credits: 3
A study of the genre of tragedy in a historical and theoretical perspective.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2603 - SATIRE
ENGLIT 2604 - FROM HEROIC TO MOCK HEROIC
Minimum Credits: 3
Maximum Credits: 3
A survey of the Western epic tradition and its permutation in mock epics and novels. Is courage in war always home base for the concept of heroism? Can a woman exhibit heroic virtue if the very concept of virtue is cognate with virile? Such questions are raised by Gilgamesh, Homer, Virgil, Beowulf, medieval sagas and romances, Ariosto, Tasso, Spenser, Cervantes, Shakespeare, Milton, Dryden, Pope, Fielding, Scott, George Eliot, Whitman, Tolstoy, Crane and Eisenstein's Alexander Nevsky.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2605 - NOVELS AND NOVEL-READERS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on novels written in England and America, from the 18th century through the present, and on social practices of reading and valuing fictions. Students will read a diverse selection of novels, criticism, and historical debates about the uses (and abuses) of fiction, and will consider the relationship between the novel and other representational forms (e.g., History, letters, diaries).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2606 - UTOPIAN & DYSTOPIAN LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This seminar juxtaposes readings from past and present traditions of utopian and dystopian literature. Readings will include a sampling of texts from early modern, 19th-century and 20th-century writing in several genres. Students will have the opportunity to bring their study of utopian literary traditions to bear on the analysis of recent work, including fiction by contemporary writers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2607 - ECOCRITICISM
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ENGLIT 2609 - MELODRAMA
Minimum Credits: 3
Maximum Credits: 3
Examines melodrama as an ideology and as artistic representation. It assesses the character and strategies of melodrama emphasizing the relationship between artistic representation and social history.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2610 - THE NOVEL: TEXTS AND THEORY
Minimum Credits: 3  
Maximum Credits: 3  
A dialogue among novels (perhaps Don Quixote, Madame Bovary, the golden notebook) and the artists of narrative and the novel (perhaps James, Lawrence, Woolf, Lukas, Bakhtin, Auerbach, Genette, Barthes, de Lauretis, Miyoshi).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2611 - THE SELF AS CHILD**  
Minimum Credits: 3  
Maximum Credits: 3  
In the nineteenth century childhood became an increasingly important conceptual category as insights in science and medicine provided ways of thinking which linked infancy to a newly developing sense of selfhood which continues into our own period. This course will investigate this figuration through readings of fictions written for adults and children, as well as critical and theoretical writings from history, psychology and social theory, including works by Freud, Carolyn Steedman, Hugh Cunningham, Juliet Dusinberre, Gillian Beer and others.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2612 - FASCISM AND EURO-AMERICAN LIT**  
Minimum Credits: 3  
Maximum Credits: 3  
This course examines the interrelations between euro-American writing of the first half of the 20th century and some of the political forces that go under the same fascism. The course looks at literary and nonliterary terms and reads the literature.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2613 - THE GLOBAL NOVEL**  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar will survey novels from various parts of Africa, the Caribbean, India and Latin America written from the 1950s to the early part of this century. Our working premise is that post-colonial novels have been read for the ways they speak to resistance or cultural nationalism. Without ignoring these important themes, we will focus on form or narrative mode, beginning with the assumption that the most explicitly anticolonial novels are realist, and that less obviously realist novels are naturally engaged in a critique of cultural nationalism.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2614 - AMER STUDIES TRANSNTNLM**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will address issues related to the study of national cultures by taking the recent transnational turn within the field of American studies as its point of departure.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2615 - IMPERIALISM AND CHILDHOOD**  
Minimum Credits: 3  
Maximum Credits: 3  
Concerned within the project of postcolonial studies, this course connects British imperial history since the early 19th century with the emergence and definition of the category of childhood. Readings are drawn from a range of genres and disciplinary frameworks: anthropology; evolutionary biology; political theory; children's literature; the bildungsroman; travel and discovery narratives; the historiography of childhood and the family.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

1833
ENGLIT 2621 - SEMINAR: SHAW
Minimum Credits: 3
Maximum Credits: 3
Examines representative plays from all stages in Shaw's dramatic career as well as his non-dramatic writing. It explores the connection between the writing and the culture it reflects.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2641 - MEMORY, NARRATIVE, NOSTALGIA
Minimum Credits: 3
Maximum Credits: 3
The long" 19thc has been characterized as one in which the West experienced a crisis in memory. Asking questions about the relation of collective & individual memory to the archival power of the text, commemoration and the "invention" of traditions, we will try to interpret the contemporary drive to conserve the past's material remains as we seek to understand the relation of memory to nostalgia. We will read classical texts on memory, which may include works by Freud and Halbwachs, as well as contemporary writings on memory, nostalgia and "heritage" from sources as Terdiman & Jameson.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2647 - ADOPTION AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
This course will read memoirs from a range of economic perspectives together with ethnographic, theoretical and historical analyses and a few of the many fictional works that portray adoption.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2648 - MISRECOGNITION OF INNOCENCE
Minimum Credits: 3
Maximum Credits: 3
This course interrogates the contradictions inherent in the construction of a literature for children. How does it respond to increasing social surveillance, & how might it indicate the child's subjection to adult disavowal & scrutiny? How can we understand the adult's relation to the child & childhood, & the relation of the children's book to its readers? In interpreting the elision enabling a book for" a child to become the child's possession (a "children's book") this course investigates the cultural, psychological & institutional dynamics that promote & produce such works.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2649 - LITERATURE OF ADOPTION
Minimum Credits: 3
Maximum Credits: 3
Recent and past novelists often use plots involving characters who adopt, were adopted, or gave up children to be adopted. These plots may involve searches for identity, racial, cultural, and/or national difference, interrogations of the meaning of family, critiques of secrecy, social inequalities and child-rearing practices, and many other themes. This course will study adoption memoirs and films as well as novels from the nineteenth to the twenty-first centuries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2650 - LIT, LANDSCAPE, ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
This course is interdisciplinary in nature, investigating texts from literature, the fine arts, architecture, and media. It explores the interrelationships among these areas historically and aesthetically, with an emphasis on the histories of perception, depiction, property, and public space.
Academic Career: GRAD
ENGLIT 2651 - ETHICS, POLITICS, LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course will take up a number of readings in social theory, philosophy, and literary theory in order to work through the distinction and relationship between ethics and politics and some important conceptions of how ethics and politics enter into literary and cultural texts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2652 - ETHICS/HIST IN POST-HOLOCAUST
Minimum Credits: 3
Maximum Credits: 3
How do certain episodes in history become sites of ethical as well as historiographical negotiation? Why are some events more potent as objects of memory than others? A major goal of this course will be to examine how particular histories become figured as 'limit cases' and emerge as nodes of cultural debate, at once emotionally charged and resistant to satisfactory interpretation. Examples will include some recent debates about medieval Jewish-Christian relations, arguments about conceptualizing questions of responsibility after the holocaust, and controversies over the representation of nationalism and national pasts in a global marketplace of competing interpretations. Selected texts range from medieval chronicles to memoirs of holocaust survival to hournalistic debates about terrorism. Along the way, we will examine Giorgio Agamben's arguments about the representative status of Auschwitz for modernity, discuss the relevance of Emmanuel Levinas' 'passivity beyond passivity' for post-holocaust politics as well as ethics, and ruminate over Philosopher Gillian rose's evocation of Primo Levi in the service of an 'ethics of implication.'
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2653 - ETHICS AND LITERATURE
Minimum Credits: 3
Maximum Credits: 3
P.B. Shelley's assertion that 'the greatest instrument of moral good is the imagination,' lacks the twentieth century pessimism of his inheritor, W.H. Auden, who famously wrote that 'poetry makes nothing happen.' Beginning from this disagreement about the influence of creative work on social and material relations, this course will examine the ethical effects of aesthetic production. From the enlightenment through the twenty-first century we will examine theories that link social and moral transformations with the production and consumption of literary and cultural works. Such readings will examine how, as wittgenstein puts it 'words are also deeds.' In addition, we will consider several literary works that explore this relationship between the ethical and the literary, and we will explore how the parameters of such debates necessarily shift when applied to writing by those who are usually the targets of ethical feeling.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 2660 - SEXUALITY AND REPRESENTATION
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce graduate students to current issues, texts, and methodologies relating to sexuality and representation. A core component of the course will be the field variously called lesbian and gay studies, queer theory, and the history of sexuality. Our concerns will cross disciplines in the humanities and the social sciences, and will thus involve examining issues in political philosophy, social theory, history, literature, film, and cultural criticism more generally. Each year the focus will accommodate different disciplinary formations and concerns.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ENGLIT 2700 - SEMINAR IN RHETORIC & LITERACY
Minimum Credits: 3
Maximum Credits: 3
While different versions of this course will focus on particular theoretical and historical issues in the study of writing, students should expect to gain a historically informed sense of discussions about rhetoric and literacy, to become familiar with key texts and figures in the study of writing, and to acquire skills for investigating how texts are produced and received. These issues will be considered both as they shape current research in composition studies and as they connect with work in other areas of English and cultural studies.
ENGLIT 2701 - RHETORICAL CRITICISM OF LIT
Minimum Credits: 3
Maximum Credits: 3
We will examine the theoretical bases of rhetorical criticism, read examples of rhetorical criticism of literary works in several genres (including poetic, novelistic, and creative non-fictional), and write rhetorical criticism of a variety of literary works. We'll also consider how the shifting definitions of literature and the shifting boundaries of the province of rhetoric have enabled or prohibited rhetorical criticism in the history of criticism.

ENGLIT 2728 - WRITING/CLASS
Minimum Credits: 3
Maximum Credits: 3
This class will explore the workings of class in and through the practices of writing. Class here will be treated as social-historical process and experience, legible in the varied sites of literary production, literacy education and composition pedagogy. We will also investigate the intersections of class with race, gender, sexuality and other markers of power and difference. This course meets one of the requirements for the certificate in composition: literacy, pedagogy and rhetoric.

ENGLIT 2800 - CHILDREN'S LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the critical study of children's literature at the graduate level. Sometimes the syllabus will be centered on a particular historical period or genre; other times, around a specific theme or critical controversy. But the course will inevitably engage with theoretical issues raised by a genre whose practitioners inhabit a different subject position than its intended readers, as well as focusing on literary, philosophical, and cultural constructions of childhood.

ENGLIT 2801 - CHILDREN, MEDIA & TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3

ENGLIT 2850 - COMPUTATIONAL MEDIA
Minimum Credits: 3
Maximum Credits: 3
In this course, we will: interact with videogames, electronic literature, online journalism and other computational artifacts; read Bogost, Galloway, Chun, Brunton, Losh, C. Crawford, and J. Brown; and, via texts that we explore and create, consider the affordances, processes, protocols and potential of computational media.

ENGLIT 2900 - MUSM INTRNSHIP - FILM VIDEO 1
Minimum Credits: 3
Maximum Credits: 3
Students will work under the supervision of the curator of film and video at the Carnegie Museum of Art. It is the 1st of a two-part sequence (the 2nd
given in the spring term). Working in conjunction with the museum staff, students will conceive, propose and organize a film series. Students will also be expected to defend the historical & aesthetic rationale of the series. The fall term will involve conceiving, researching, presenting a proposal (including formulating audience and budget); writing promotional materials and program notes; identifying, locating & ordering prints.

**Academic Career:** GRAD
**Course Component:** Internship
**Grade Component:** Grad SN Basis

**ENGLIT 2901 - MUSM INTRNSHIP - FILM VIDEO 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will work under the supervision of the curator of film and video at the Carnegie Museum of Art. It is the 2nd of a 2-part sequence (the 1st given in the fall term). Working in conjunction with the museum staff, students will conceive, propose, & help organize a film series. Students will also be expected to defend the historical and aesthetic rationale of the series. The spring term will involve implementing promotion for the series (planning details, distributing flyers, contacting groups); managing the series (budgeting, shipping, invoicing, evaluating, wrapping up).

**Academic Career:** GRAD
**Course Component:** Internship
**Grade Component:** Grad SN Basis

**ENGLIT 2902 - DIRECTED STUDY/MA-MFA STUDENT**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
In exceptional circumstances a student who wishes to pursue a topic for which no course is available can arrange for directed study.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 2907 - LITERATURE INTERNSHIP**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 2960 - ENGLISH GSA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides credits for English department graduate students who have been appointed as a graduate student assistant.

**Academic Career:** GRAD
**Course Component:** Internship
**Grade Component:** Grad SN Basis

**ENGLIT 2970 - TEACHING OF ENGLISH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is teaching credit for teaching assistants/ fellows as a supplement to their academic schedules.

**Academic Career:** GRAD
**Course Component:** Practicum
**Grade Component:** Grad SN Basis

**ENGLIT 2990 - INDEPENDENT STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
In order to register for this course a student must work with a faculty member under one of the following circumstances: a) faculty-graduate student shared research project; b) special study in relation to pedagogical problems; c) defined areas of study in relation to comprehensive examinations.

**Academic Career:** GRAD
**Course Component:** Independent Study
**Grade Component:** Grad SN Basis
ENGLIT 2991 - PUBLISHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This workshop will help English graduate students to prepare previously-drafted seminar papers for journal publication. Students will read and workshop each other's manuscripts and discuss journals in relevant fields, the politics of publishing, the submission and publication process, and other relevant topics.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

ENGLIT 2992 - DIGITAL PEDAGOGY PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This collaborative workshop for experienced teaching fellows focuses on developing assignments with digital production components. Participants will present and discuss detailed unit plans and assignments. Attention will be paid to crafting rationales to help pedagogical initiatives gain institutional support. Each participant will produce several documents for inclusion in a teaching portfolio.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad SN Basis

ENGLIT 2993 - INTRO TO GRADUATE STUDIES
Minimum Credits: 1
Maximum Credits: 1
This course will introduce MA and Ph.D. students to important practices and genres of graduate studies and to department programs and resources.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

ENGLIT 3000 - DISSER RES FOR THE PH.D. DEGR
Minimum Credits: 1
Maximum Credits: 12
For advanced doctoral students who have completed or nearly completed their formal course work and are pursuing independent research leading to the dissertation.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ENGLIT 3010 - DISSERTATION WORKSHOP
Minimum Credits: 3
Maximum Credits: 3
Designed to foster the intellectual and professional development of doctoral students writing dissertations. Limited to students who have achieved candidacy or who will have by the first weeks of the term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 3150 - LITERACY AND PEDAGOGY
Minimum Credits: 3
Maximum Credits: 3
This course will investigate the historical, cultural, and political constitution of pedagogy and the relation of its various historical and social practices to changing views of "literacy."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGLIT 3902 - DIRCTED STUDY FOR PH.D. STUDNT
In exceptional circumstances a student who wishes to pursue a topic for which no course is available can arrange for directed study.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**ENGLIT 3910 - COMPREHENSIVE EXAM**  
**Minimum Credits:** 1  
**Maximum Credits:** 12  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**English Writing**

**ENGWRT 2010 - FICTION WORKSHOP**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course enables students to master the particular prose fiction forms they are working in. It helps them focus on their manuscript--either a short story collection or a novel--and to work seriously on it. Close examination of student writing and revision of submitted work are essential parts of the course.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: English (ENG-MFA)

**ENGWRT 2080 - GRADUATE PLAYWRITING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces students to the unique challenges and opportunities of writing for the theatre. Class time will be spent on reviewing student work and studying selected examples of published new plays, and students will investigate character, speech, situation, action, structure, and the use of actors on the stage.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SNC Basis

**ENGWRT 2092 - WRITER'S JOURNALS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course studies the journal as an art form. It also questions the purpose and value of journal keeping for a writer.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGWRT 2094 - READINGS IN CNTMPRY FICTION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course acquaints students with a variety of contemporary writers. This study helps students raise questions about their own developing esthetics as they are reflected in form and take into account their dual roles as creative writers and critics. It also helps students access their relationship to reviewing and criticism, including its benefits to a creative writer developing a career, and to discover techniques of reviewing and criticism which aid and do not transgress upon their esthetics and its expression.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ENGWRT 2095 - TOPICS IN FICTION**
Minimum Credits: 3
Maximum Credits: 3
This course concerns itself with matters of interest in fiction writing; form and technique, contemporary production, and the relation of the fiction writer to his/her society.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGWRT 2210 - POETRY WORKSHOP
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar emphasizes an intensive consideration of student poems, both first drafts and revisions, in an informal workshop setting.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: English (ENG-MFA)

ENGWRT 2290 - READINGS IN CNTMPRY POETRY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on American poets who have come to prominence since 1963. We will read widely in the poetry of this period to understand its unique contribution to the development of poetic form and its relationship to the culture that produced it.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGWRT 2293 - TOPICS IN POETRY
Minimum Credits: 3
Maximum Credits: 3
This course concerns itself with matters of interest in poetry writing; form and technique, contemporary production, and the relation of the poet to his/her society.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGWRT 2310 - NON-FICTION WORKSHOP
Minimum Credits: 3
Maximum Credits: 3
A workshop in non-fiction reporting for magazine publication. Students will research, write, revise and re-write articles. Emphasis will be placed on style, fluidity, organization, suitability for market, and ultimately, on publication.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: English (ENG-MFA)

ENGWRT 2390 - READINGS IN CNTMPRY NON-FICTN
Minimum Credits: 3
Maximum Credits: 3
This course familiarizes students with a number of different forms of and approaches to contemporary non-fiction writing.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGWRT 2392 - DOCUMENTARY FILM WRITING
Minimum Credits: 3
Maximum Credits: 3
This course traces the evolution of documentary films and uses them to demonstrate how documentaries are put together. The course emphasizes choosing good subjects, seeing how best to present them and assembling video and audio segments to form the documentary.

1840
ENGWRT 2400 - TOPICS NON-FICTION: MAGAZINE
Minimum Credits: 3
Maximum Credits: 3
This course concerns itself with matters of interest to the general feature journalist; form and technique, the history of magazines, contemporary production, and the general relation of the magazine journalist to his/her society.

ENGWRT 2401 - TOPC NON-FCTN:ELECTRNC MEDIA
Minimum Credits: 3
Maximum Credits: 3
This course concerns itself with the varieties of writing for the electronic media, and with related matters of interest; form and technique, contemporary production, ethical and legal matters, and the general relation of the writer in this field to his/her society.

ENGWRT 2402 - TOPICS IN NON-FICTN: NEWSPAPER
Minimum Credits: 3
Maximum Credits: 3
This course will examine the pamphlet and polemical press of America, since the pre-1776 period to the present day, and will explore the ways in which journalism has fulfilled the often-absent role of a political opposition party.

ENGWRT 2403 - STRUCTURES & TECHNIQUES IN NF
Minimum Credits: 3
Maximum Credits: 3
This is a grad level course required for NF MFAs. The course is designed to examine and develop advanced research skills for the nonfiction writer, and to explore and practice story structure through required readings and creative exercises. Students will design and participate in immersion research projects, produce one long-form narrative or research-based essay using field research, interview and textual sources. The classwide project will be produced in digital form.

ENGWRT 2405 - PUBLISHING PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
This practicum is for nonfiction M.F.A.S in their third year of study. We will survey current trends in book, magazine, journal, and online publishing, as we design a trip to New York City to meet editors and agents. Students must have manuscripts and/or other completed work ready for publication in order to be accepted into the class, which is offered by special permission only.

ENGWRT 2501 - TOPICS IN CREATIVE WRITING
Minimum Credits: 3
Maximum Credits: 3
This course concerns itself with matters of interest in creative writing: form and technique, contemporary production, issues in teaching and pedagogy, and/or the relation of the creative writer to society.
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ENGWRT 2900 - MANUSCRIPT WRITING FOR THE MFA
Minimum Credits: 1
Maximum Credits: 9
For advanced MFA students who have completed or nearly completed their coursework and are completing the MFA manuscript. Can be taken only once toward the 36 credits required for the degree, only in the last year of study, and counts as elective credits.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

ENGWRT 2960 - ENGLISH GSA
Minimum Credits: 3
Maximum Credits: 3
This course provides credits for English department graduate students who have been appointed as a graduate student assistant.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad SN Basis

ENGWRT 2970 - TEACHING OF ENGLISH
Minimum Credits: 3
Maximum Credits: 3
This course is teaching credit for teaching assistants/fellows as a supplement to their academic schedules.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

ENGWRT 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
In order to register for this course a student must work with a faculty member under one of the following circumstances; a) faculty-graduate student shared research project; b) special study in relation to pedagogical problems; c) defined areas of study in relation to comprehensive examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

ENGWRT 3009 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 6
In exceptional circumstances a student who wishes to pursue a topic for which no course is available can arrange for directed study with a member of the graduate faculty willing to supervise the work.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Environmental & Occupational Health

EOH 2013 - ENVIRONMENTAL HEALTH & DISEASE
Minimum Credits: 3
Maximum Credits: 3
This is the graduate school of public health core curriculum course in environmental and occupational health. The world health organization defines environmental health as "those aspects of human health, including qualities of life that are determined by physical, biological, social, and psychosocial factors in the environment." The discipline of environmental and occupation health refers to the "theory and practice of assessing, correcting, controlling, and preventing those factors in the environment that can adversely affect the health of present and future generations." This course will familiarize the students with current issues and practice in environmental and occupational health, as well as assessment of the risk of environmental exposures. It is designed to introduce the students to knowledge basic to public health focusing on chemical and physical

1842
environmental factors affecting the health of the community.

**EOH 2021 - SPECIAL STUDIES**
- Minimum Credits: 1
- Maximum Credits: 15
- Properly qualified students may undertake advanced study under the guidance of a faculty member.

**EOH 2022 - SPECIAL TOPICS**
- Minimum Credits: 1
- Maximum Credits: 3
- Properly qualified students may undertake advanced study under the guidance of a member of the faculty.

**EOH 2101 - INTRO TO RESEARCH METHODS 1**
- Minimum Credits: 1
- Maximum Credits: 1
- This two-series course will introduce the basic skills required to conduct independent research in the health sciences. During the first series, emphasis will be placed on: critical review of literature, notebook keeping, exploratory data analysis, and use of the university library and database resources.

**EOH 2102 - INTRO TO RESEARCH METHODS 2**
- Minimum Credits: 1
- Maximum Credits: 1
- This two-series course will introduce the basic skills required to conduct independent research in the health sciences. During the second series, emphasis will be placed on written and oral communication skills and development of research projects.

**EOH 2104 - INTRO ENVRL & OCCUP HLTH LAW**
- Minimum Credits: 3
- Maximum Credits: 3
- This course is designed to introduce students to law as it relates to environmental disputes, including relevant occupational law. General overview of the structure and operation of the legal system, i.e. Litigation. Majority of course will cover major federal and state statutes designed to protect the environment. Our study of these statutes will focus on the various approaches, strategies, standards and enforcement mechanisms.

**EOH 2106 - ENVIRON & OCCUPTNL HEALTH LAW**
- Minimum Credits: 2
- Maximum Credits: 2
- Designed to familiarize students with the legal aspects that govern environmental and occupational health at federal and state levels. Interpretation of the acts and laws by the courts is discussed by reference to specific cases.
EOH 2107 - ENVRL & OCCUP HLTH COLLOQUIUM
Minimum Credits: 0
Maximum Credits: 0
Presentations and discussions of topics of current interest in the field of industrial environmental health sciences are covered, with participation by faculty, students, and invited guest speakers.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis

EOH 2108 - ENVIRON & OCUPNL HEALTH PRAC
Minimum Credits: 2
Maximum Credits: 2
This practicum provides an opportunity for EOH MPh students to demonstrate integration and application of knowledge in the area of environmental and occupational health, through a culminating experience. This is a faculty supervised applied research or problem solving project in consultation with a health environment related agency or organization. Student participates after completion of course work. The practicum includes preparation, contribution to field work, and a final written report which may be the basis for a master's essay.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

EOH 2109 - MOLECLR TOXICOLOGY JOURN CLUB
Minimum Credits: 1
Maximum Credits: 1
This course is for students to gain experience in the presentation and discussion of topics of current interest in the fields of industrial and environmental health sciences and toxicology. The format is journal club presented by the students. Our goals are to expose students to the most exciting research in our field of interest. Secondly, to provide a forum to hone skills in organizing and presenting scientific data, as well as critically discussing published work.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad LG/SU3 Basis

EOH 2110 - ROTATION/PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
This course is designed to be a practical research experience for Ph.D. students, goals of which are for students to gain research experience within laboratories of faculty within the molecular toxicology training program. Each laboratory rotation will be eight (8) weeks in duration with 2 rotations. Students will be required to write a report on their research project upon completion of the laboratory component.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

EOH 2111 - ENVRL OCCUP PROG PRACT PROC
Minimum Credits: 2
Maximum Credits: 2
The major aim of this course is to acquaint students with current environmental and occupational health programs and environmental and industrial practices and processes through lectures and field trips to selected industrial and governmental facilities and operations. Lectures and reviews are given before and after the field visits and emphasize operational, prevention and control strategies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 2122 - TRANSPRT & FATE ENVIRON AGENTS
Minimum Credits: 3
Maximum Credits: 3
This course presents in a quantitative fashion the movement, transformation, bioaccumulation, and fate of various physical, biological, and chemical
agents through the environment, home, and occupational settings. Chemical degradation, atmospheric transport, surface and groundwater transport, deposition on terrestrial surfaces and in sediments, and concentration by biological systems are described, including movement through food chains; also indoor transport and ventilation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EOH 2175 - PRINCIPLES OF TOXICOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to the principles governing the interaction of chemicals within the human body. Major organ systems will be described with regard to anatomy, physiology and effects from interactions with chemicals.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EOH 2176 - PRINCIPLES OF TOXICOLOGY CONFR**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is a 2 credit course designed as an in-depth exploration of some of the fundamental principles of toxicology. It is meant to accompany the material contained in the more didactic EOH 2175. It will also be of interest to any student interested in cellular and molecular aspects of toxicology. Its intent is to further explore a number of the concepts introduced in EOH 2175 at the molecular level and provide information critical to the practice of toxicology.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** CREQ: EOH 2175; PLAN: Behavioral & Community Hlth Sc (DPH), Biostatistics(PHD), Epidemiology(DPH), Infct Disease & Microbiology(PHD, DPH, SCD), Environmtal & Occupatnal Hlth(PHD), Human Genetics(PHD, SCD)

**EOH 2180 - INTRODUCTION TO RISK SCIENCES**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Course will explore issues surrounding environmental and occupational risks with focus on adverse human health effects. Will provide overview of risk sciences including: risk assessment, risk perception, risk communication and risk management. Detailed attention to methods for qualitative and quantitative characterization of risks to human health. Qualitative and quantitative approaches for risk assessment will consider methods for assessment of cancer and non-cancer health risks using four step paradigm by national academy of sciences  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: EOH 2180; PROG: Graduate Sch of Public Health (PPBHL)

**EOH 2181 - RISK ASSESSMENT PRACTICUM**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Practicum will provide the student opportunity to conduct a quantitative risk assessment for human health endpoint (either cancer or non-cancer) from an environmental or occupational exposure. Students will learn to identify human health hazards, characterize dose response relationships and site and mechanisms of action, conduct an exposure characterization dose response relationships and site and mechanisms of action, conduct an exposure characterization and use that data to characterize risks to human health.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** CREQ: EOH 2180; PROG: Graduate Sch of Public Health (PPBHL)

**EOH 2211 - RADIATION PHYSICS**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
Concerns atomic and nuclear structure, interactions of the various radiations with matter, the characteristics of natural and artificial radioactivity, radiation measurement units, and the fundamental principles of instrumentation.  
**Academic Career:** GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2223 - RADIOBIOLOGY 1
Minimum Credits: 1
Maximum Credits: 1
The physical and chemical interactions between radiation and organic matter are considered on a molecular level. Effects of radiation on the biochemical and cellular levels are analyzed in detail.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2232 - RADIATION CHEM & METHODOLOGY 1
Minimum Credits: 2
Maximum Credits: 2
Lecture topics - radiochemical handling techniques, radio chemical separation, preparation of sample for radioassays, preparation of standards, determination of recovery efficiencies, quantitative measures of radioactivity. Laboratory topics - radiochemical handling techniques and precautions; Geiger-Mueller, proportional, crystal, and liquid scintillation counting techniques; isotopic dilution, co precipitation, ion exchange, solvent extraction techniques; absolute counting and determination of unknown radio nuclides.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2234 - HEALTH PHYSICS
Minimum Credits: 4
Maximum Credits: 4
Lecture topics - radiation protection standards and guides, principles of radiation, area and personnel monitoring, portable exposure rate survey instruments, integrating dosimeters, contamination surveys and instruments, evaluation of dose from external sources of x-rays, gamma rays, and neutrons; internal dosimetry and protection; air sampling; radon; fission and criticality; leak testing of sealed sources. Lab topics - portable survey meter operation and calibration; lab contamination surveys; process, calibrate film badges and dosimeters; primary shielding and scattered radiation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2236 - NON-IONIZING RADIATION
Minimum Credits: 1
Maximum Credits: 1
Topics include the electromagnetic spectrum, transmission and absorption, biological effects, units of exposure, protection standards, measurement and control of UV, ir, microwaves, lasers, masers, and ultrasound. Occasional laboratory demonstrations will be scheduled on an ad hoc basis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2237 - RADIOBIOLOGY 2
Minimum Credits: 2
Maximum Credits: 2
Radiation-induced alterations in the physiology of various mammalian organs and systems are examined, including immediate and long-term responses of living mammalian organisms, and of humans in particular.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2242 - RADIATION CHEM & METHODOLOGY 2
Minimum Credits: 1
Maximum Credits: 1
Lecture topics - advanced radiochemical preparation, handling and separation techniques. Laboratory topics include: bioassay, environmental, radioanalytical chemistry techniques for assay of low-level radiation, neutron activation analysis, and environmental analysis methods.
Academic Career: GRAD
EOH 2247 - INTRODCTN RADIATION MEDICINE
Minimum Credits: 2
Maximum Credits: 2
The potential for accidental or other unnecessary radiation exposure in nuclear industry and in diagnostic and therapeutic usage of medical radiation is considered. Methods for recognition and management of acute and chronic clinical external radiation injury and internal radionuclide contamination are discussed in detail as are late consequences of such exposures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2250 - REACTOR HAZARD EVALUATION
Minimum Credits: 1
Maximum Credits: 1
Structure, operation and control of various types of nuclear reactors are presented, emphasizing safety aspects. Problems of actual reactor safety analysis reports are reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2254 - MEDICAL PHYSICS
Minimum Credits: 2
Maximum Credits: 2
The principles and practices of radiological physics as applied to diagnostic radiology, radiotherapy and nuclear medicine are developed in detail.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2255 - ENVIRONMENTAL RADIATION
Minimum Credits: 1
Maximum Credits: 1
Lecture topics include: natural radioactivity, sources and relative dose contributions, methods of evaluation, technologically enhanced exposures to natural radiation; human made radioactivity, sources and nuclides of importance, environmental transport and dispersion, meteorology and hydrology; reanclusion mechanisms, critical pathways and organisms, indicator organisms; methods of sampling and analysis, population doses, environmental impact statements.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2301 - ANALYTCAL METH MOLEC DOSIMETRY
Minimum Credits: 3
Maximum Credits: 3
Principles and application of concentration, analysis and identification of xenobiotics, their metabolites and macromolecular adducts at ultratrace level from biological matrix. Emphasis on methods which lead to identifying chemicals at molecular level, including gas, liquid, and affinity chromatographies and various types mass spectrometry. Use of vibronic/electronic techniques such as raman and fluorescence spectroscopies, also discussed. Relates methodology in literature which is current with each offering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 2302 - MOLECULAR APPRCHES TOXICOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course is designed to introduce students to recent advances in field molecular toxicology. A basic foundation in genetics and tools of biotechnology will first be developed. Recent examples of innovative approaches used to study toxic agents at molecular level will then be described. Progress in the research of DNA/protein adducts, xenobiotic metabolism and characterization of oncogenes will also be discussed.
EOH 2303 - APPLC MOL BIOL METH TO TOXCLGY
Minimum Credits: 2
Maximum Credits: 2
This course is designed to introduce students to the techniques frequently used in a molecular biology laboratory and to analyze and interpret data of experiments. This course will be taught as a series of lab training, experiments and discussions.

EOH 2304 - BIOMARKERS AND MOLECULAR EPID
Minimum Credits: 2
Maximum Credits: 2
Elective course summarizes the concepts and biological principles underlying bases molecular biomarkers; provide students with understanding methodological principles of use; biomarkers epidemiologic research relevant to study of chronic human disease and public health application; summarize present use specific biomarkers in epidemiologic and clinical research with examples in human cancer, cardiovascular, immunological, and neurological diseases.

EOH 2305 - MECHANMS DNA METAB DMG REPAIR
Minimum Credits: 3
Maximum Credits: 3
Mechanisms and consequences of somatic and hereditary genetic damage, including methods to detect, characterize and quantitate genetic lesions. Provides molecular and theoretical basis for evaluation of genotoxicological data on exposure to mutagenetic/carcinogenic agents and on genetic predisposition or susceptibility to disease.

EOH 2306 - BIOCHEM TECH IN MOLEC TOXICLGY
Minimum Credits: 2
Maximum Credits: 2
The objectives of the course are to introduce EOH students to major instrumental biochemical laboratory techniques and to provide a foundation for understanding how specific problems in molecular toxicology can be experimentally addressed using biochemical methods. The course will be taught as a series of sessions including theoretical introduction, lab experiments and discussions.

EOH 2308 - MODELS SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
This course integrates basic principles in cell and molecular toxicology in a way that enhances the transition of students into a laboratory setting. Students will gain an understanding of state-of-the-art approaches that can be applied to reveal mechanisms by which environmental agents exert their toxic action at the cellular and organismal level.

EOH 2309 - ENVIRONMNTL HLTH CHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
The organic, inorganic and mechanistic biochemical details of interactions of toxins and biological systems will be presented. Emphasis on chemical understanding of potential toxicological sequelae of such interactions. Students present one lecture on bioorganic toxicological topic synthesized from recent scientific literature.

**EOH 2310 - MOLECULAR FUNDAMENTALS**
- Minimum Credits: 3
- Maximum Credits: 3

Course is designed to be a review of the fundamentals of biochemistry, molecular biology, and cell biology. There is significant time devoted to techniques, with the goal of providing background for Ph.D. students beginning their research careers, and a perspective for mph students on the availability and utility of modern biological research methods.

**EOH 2311 - MOLECULAR FUNDAMENTALS CONFR**
- Minimum Credits: 2
- Maximum Credits: 2

This course will consist of reviewing papers from top quality journals. Each paper has been selected to illustrate topics covered in the lecture of the week. In addition to enhancing the understanding of material, the conference will teach students how to read and evaluate papers. Each student will be responsible for explaining all of the figures in the paper.

**EOH 2312 - CELLULAR MECH IN ENVRL TOXCLGY**
- Minimum Credits: 2
- Maximum Credits: 2

This course is designed to introduce the concepts and basic principles of toxicant actions as they relate to activation of cell signaling mechanisms related to the development of human disease. The course is structured to provide didactic lectures on current understanding of mechanisms for responses to environmental toxicants and infectious agents, as well as discussion of cutting edge research discoveries. Lectures will be based on current literature reviews and research articles will be provided.

**EOH 2313 - BIOINORGANIC CHEM TOXICOLOGIST**
- Minimum Credits: 2
- Maximum Credits: 2

This course will cover the essential inorganic chemistry underlying oxidative stress in considerable depth. It will introduce key concepts and terminology. It will provide students with illustrative examples of how this chemistry impinges on cellular processes. The student will learn to think of these things in terms of properly balanced chemical equations, stressing the interdependency of many competing reactions.

**EOH 2314 - PULMONARY/ORGAN SYS TOXICOLOGY**
- Minimum Credits: 2
- Maximum Credits: 2

This course is designed to be an overview of the fundamentals of organ systems toxicology of the lung. A significant amount of time will be devoted to the cellular and biochemical aspects of tissue damage resulting from toxicant exposure. Students will gain skills in the areas of data analysis and presentation through submission of three (3) written assignments and an r01 style grant application.
EOH 2371 - CELLULAR & MOLECULAR TOXICOLOGY
Minimum Credits: 2
Maximum Credits: 2
The course is an introduction to cellular and molecular mechanisms in toxicology, designed to provide a foundation in chemical and macromolecular level events in cells exposed to chemical and physical agents. The cell's response to these insults is examined from a mechanistic approach including mechanisms of recovery, repair and biochemical defenses. New techniques of molecular biology will be used to examine toxicological mechanisms.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 2379 - IMMUNOTOXICOLOGY
Minimum Credits: 2
Maximum Credits: 2
Presents effects of environmental and industrial chemicals on the immune system. Emphasis is placed on immunologic diseases resulting from inhalation or dermal exposures as would occur in the environment or in industries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2504 - PRIN OF ENVIRONMENTAL EXPOSURE
Minimum Credits: 3
Maximum Credits: 3
This course introduces concepts inherent in recognition of sources, contaminant generation, transport and uptake of chemical, biological and physical stresses in the context of potential environmental exposures related to human health. This course prepares students to understand exposure assessment in anticipation, recognition, evaluation and intervention as utilized in risk assessment and composition of matter, exposure pathways, pathway assessment methods including measurement, analogy and exposure modeling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2505 - INTRO TO OCCUP & ENVIRON HLTH
Minimum Credits: 3
Maximum Credits: 3
Provides an introduction and overview of occupational and environmental health. Industrial and environmental exposures are introduced with a brief discussion of their physical/chemical characteristics, followed by a discussion of mechanisms of exposures, monitoring and sampling techniques, major health and safety implications and mechanisms of control. The course consists of didactic presentations, laboratory exercises, field trips and discussions of case studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2509 - NOISE ASSESSMENT & REDUCTION
Minimum Credits: 2
Maximum Credits: 2
The basic physical principles of noise measurement and reduction are systematically developed. Topics include noise regulations, damage risk criteria, design of resistive and reactive mufflers, transmission through structures, architectural acoustics, and vibration isolation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EOH 2510 - INTRO TO OCCUPATIONAL MEDICINE
Minimum Credits: 3
Maximum Credits: 3
Designed primarily for physicians to provide an overview of the practice of occupational medicine, including the principles of prevention, and a system by system review and case study approach of occupational illnesses and disorders, specifically their recognition and control. As a prerequisite, the physicians should be familiar with the basic concepts of toxicology and industrial hygiene as well as current applicable regulations. This course will provide the frame work for more specific and advanced occupational health graduate courses leading to an M.P.H., D.P.H. Or Ph.D. Degree.
EOH 2512 - ISSS IN OCCUPATIONAL MEDICINE
Minimum Credits: 3
Maximum Credits: 3
Designed primarily for physicians, this course will provide a population-based approach to the prevention and management of illness, injury and disability in the workplace.

EOH 2513 - POLC DEC MKG PH EMRGY/BIOTERSM
Minimum Credits: 3
Maximum Credits: 3
This three-credit graduate course focuses on public health emergencies and bioterrorism at the phases of preparedness, mitigation, and response. The course emphasizes not only biological agents but also all hazards with public health consequences. It addresses the interfaces of policies and laws in the context of federalism, which requires interaction among the federal, state, and local levels of government. The course considers the critical role of private-sector health care providers in addition to governmental decision makers. Students explore past emergencies through history and case studies, conduct directed research on a chosen policy issue, and experience decision-making in the context of a simulated emergency by playing a chosen and previously researched official role. Teaching methods include lectures, case studies, policy research and writing, interdisciplinary classroom discussion, and simulated decision-making.

EOH 2515 - EOH PREPAREDNESS
Minimum Credits: 2
Maximum Credits: 2
This course will be a graduate level course focusing on environmental health hazards with respect to disaster preparation, didactic and experimental aspects of course will include core principles of environmental health safety. Students will examine challenges with respect to natural and man-made disasters to allow students to prepare programs to handle environmental health emergencies.

EOH 2563 - ERGONOMICS & OCUPTNL BIOMECHNC
Minimum Credits: 3
Maximum Credits: 3
The framework for understanding the anatomical and physiological demands placed on industrial workers is developed. Intervention strategies are discussed so that the risk to health and safety can be minimized while enhancing productivity.

EOH 2716 - REGLTN HLTH, SAFTY & ENV RISKS
Minimum Credits: 3
Maximum Credits: 3
Teaches students some of the skills needed to understand and appraise public policies for regulating health and safety risks. Focus is on OSHA, EPA, and other federal safety and health regulatory agencies.

EOH 2720 - APPLIED COMPUTTNL TOXICOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
The course will introduce the principles and techniques of biomolecular modeling, including pharmacological and toxicological applications. Lectures will discuss pertinent aspects of chemistry, structural biology and statistical thermodynamics. The emphasis will be on structural study of proteins and their ligands based on chemistry and physics; however, statistical modeling (QSAR, quantitative structure activity relationships) will also be reviewed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIOST 2041

**EOH 2725 - APPLD COMPUTATNL TOXICOLOGY 2**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Advanced modeling models such as expert systems, artificial neural networks, genetic algorithms and their application to toxicological quantitative structure activity relationships (QSAR) will be discussed. Advanced techniques in three-dimensional molecular modeling of small molecules, proteins, and DNA will also be discussed. A series of lectures by recognized experts in each of the fields will be presented during the course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EOH 2720

**EOH 2727 - CMPTL MODLNG TOXICOLOGICAL RES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students are presented with the rationale and theory behind each of the model-building processes and are given out-of-class assignments to learn operational aspects. A project using data of the student's choice contributes to the final grade.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: BIOST 2042 and 2049 and EOH 2725

**EOH 2753 - INDUSTRL ENVIRMNTL HLTH BIOL**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The major aim of this course is to acquaint students with fundamentals of environmental biological analysis, with emphasis on human health. The major topics covered include: aquatic biology, parasitology, and medical entomology.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**EOH 2778 - RESPIRATORY PHYSIOLOGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Deals with control mechanisms of respiration, mechanical properties of the lung, distribution of ventilation and transport. The modification of basic physiological mechanisms as a result of exposure to industrial contaminants and loss of lung function will be included.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**EOH 2780 - DEALING WITH HAZARDOUS SITUATS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**EOH 3010 - RESEARCH AND DISSERTATION PHD**  
**Minimum Credits:** 1  
**Maximum Credits:** 15
Includes doctoral study under the various programs within the department.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

EOH 3210 - PATHOPHYSIOLOGY ENVRL DISEASE
Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on the etiology and pathogenesis of human disease and how the disease process affects normal physiologic function. The course will include a didactic component covering the normal anatomy and function of the major organ systems and a series of student-led presentations and discussions of the nature and cause of commonly encountered diseases and or injuries. Students will be expected to apply basic mechanistic physiologic principles of each organ system in current public health and environmentally relevant topics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EOH 3305 - GENOME INSTABILITY & HUMAN DS
Minimum Credits: 3
Maximum Credits: 3
Responses to DNA damage are essential for the study of cell division, DNA metabolism, evolution, cell cycle control, signal transduction and genetics. About 40 human genetic syndromes are known with altered DNA repair or DNA damage responses, presenting with defects in development, predisposition to cancer, sensitivity to radiation, and premature aging. This course will emphasize the biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes such as DNA replication, transcription and signaling. Sources of DNA damage, both environmental and endogenous will be discussed, as well as the importance of DNA repair mechanisms during development and to prevent cancer and aging. The course consists of lectures and discussions sessions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Envrl Influence Management

BENV 2001 - PUBLIC AFFRS AND SOCIAL POLICY
Minimum Credits: 3
Maximum Credits: 3
Social, political, governmental, and ethical factors that affect business. Topics include corporate social responsibility and responsiveness, government regulation of business, public affairs management, business ethics and values, the environment of the multinational corporation, the individual in the large corporation, and business role in formulating social and public policy. Both managerial and philosophical perspectives are employed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2011 - ETHICS IN CORP DECISN MAKING 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This course examines ethical issues and problems that occur as corporate managers make decisions and formulate policies for their companies. It describes how ethics is related to such functional areas as accounting, finance, human resources, marketing, management information systems, government relations, and multinational operations. An analytical, problem-solving, managerial approach is taken.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2012 - ETHICS IN CORP DECISN MAKING 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of ethics in corporate decision making 1.
Academic Career: GRAD
BENV 2013 - GOVERNMENT REGULATION 1
Minimum Credits: 1.5
Maximum Credits: 1.5
The management of regulation, particularly the theory of the regulatory process and business participation in that process. Topics include: theories of regulatory behavior, aspects of participants in the regulatory process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2014 - GOVERNMENT REGULATION 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of Government Regulation 1."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2015 - LEGAL ENVIRONMENT OF BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Designed to provide students with the pervasive dimensions of commercial law in society. Through the pragmatic vehicles of the uniform commercial code and the antitrust laws, the course will examine the operations and interactions of the judicial, legislative, administrative, executive processes as reactions to commercial society and as causative factors in commercial society. Heavy emphasis will be placed on preventive law through business planning in the context of commercial law.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2019 - VALUES & ETHICAL REASONING IN BUS
Minimum Credits: 3
Maximum Credits: 3
Examines the philosophical, behavioral, and organizational bases of ethical decision making in business; the influence of social values on managerial decision making; strategies for implementing ethical policies and practices in business firms. Explores major theories of ethics derived from Western philosophic thought, and theoretic contributions of social science concerning values, valuation, and value formation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2021 - GLOBAL/US COMPETITION & TECH MGT
Minimum Credits: 3
Maximum Credits: 3
The purpose of the seminar is to analyze global competition and industrial competitiveness from the standpoint of the U.S. Economy as a whole, specific industries, and individual companies. The course is designed to provide an understanding of the role of the U.S. In the world economy, the competitive pressures facing individual companies and their industries, the role of innovation and product development in supporting a company's and a nation's competitiveness, and the alternatives available to government to stimulate or redirect its industries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BENV 2031 - ETHICS IN CORP DECISION MAKING
Minimum Credits: 3
Maximum Credits: 3
This course examines ethical issues and problems that occur as corporate managers make decisions and formulate policies for their companies. It describes how ethics is related to such functional areas as accounting, finance, human resources, marketing, management information systems, government relations, and multinational operations. An analytical, problem-solving, managerial approach is taken.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2033 - MANAGING THE NATURAL ENVIRONMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course focuses on the management of strategic and compliance issues related to the natural environment of the business firm. Particular attention is given to how public opinion influences public policy. The course will employ numerous case examples and lectures will be augmented with visits by corporate environmental consultants and environmental affairs officers from the Pittsburgh community. Issues related to the ethics of environmental management activities will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2050 - ENVIRONMENTAL PROJECT COURSE
Minimum Credits: 3
Maximum Credits: 3
Students in this course, working in teams, will design and implement a management project for a community service agency that deals with problems of poverty and homelessness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2060 - INDEPENDENT STUDY PUBLIC AFFAIRS/POLICY
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2115 - MARKET MANIPULATIONS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2301 - PUBLIC AFFAIRS AND SOCIAL POLICY
Minimum Credits: 3
Maximum Credits: 3
Social, political, governmental, and ethical factors that affect business. Topics include corporate social responsibility and responsiveness, government regulation of business, public affairs management, business ethics and values, the environment of the multinational corporation, the individual in the large corporation, and business' role in formulating social and public policy. Both managerial and philosophical perspectives are employed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BENV 2326 - LEGAL ENVIRONMENT OF BUSINESS
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide students with the pervasive dimensions of commercial law in society. Through the pragmatic vehicles of the uniform commercial code and the antitrust laws, the course will examine the operations and interactions of the judicial, legislative, administrative and executive processes as reactions to commercial society and as causative factors in commercial society. Heavy emphasis will be placed on preventative law through business planning in the context of commercial law.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BENV 2327 - LEGAL ENVIRONMENT OF BUSINESS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students with the pervasive dimensions of commercial law in society. Through the pragmatic vehicles of the uniform commercial code and the antitrust laws, the course will examine the operations and interactions of the judicial, legislative, administrative and executive processes as reactions to commercial society and as causative factors in commercial society. Heavy emphasis will be placed on preventative law through business planning in the context of commercial law.

BENV 3010 - IND STUDY BUS ENVRN PBLC POLCY
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis

BENV 3011 - BUS ENVIRONMENT/PUBLIC POLICY
Minimum Credits: 3
Maximum Credits: 3
An in-depth study of the major literature of the business environment and public policy field, including attention to philosophical issues and the development of the field, including major works and scholars.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BENV 3012 - ADV THRY: VALUES & ETHICS
Minimum Credits: 3
Maximum Credits: 3
A continuation of bend 3011. The course examines in detail a major subfield of the business environment and public policy area. The current focus in the course is on values and ethics in organizations and society.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: Katz Grad School of Business students only.

BENV 3014 - ADV TOPC BUS ENVRN/PUBLIC POLCY
Minimum Credits: 3
Maximum Credits: 3
A number of seminars on advanced topics which vary from vary to year, representing advanced study of major topics of interest in the business environment and public policy field. Examples include courses focusing on managing environments” (theories of organization-environment relationships; strategic behavior in organization-environment relationships) and "government regulation" (theories of regulation, strategic use of regulation, design of regulation, processes in regulatory behavior and compliance)."
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

**BENV 3015 - TECHNLGY IMPCT VALUES & SOCTY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An advanced topic seminar focusing on the impacts of technology on values, perceptions of individual identity, and societal behavior.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

**BENV 3031 - GOVERNMENT REGULATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Covers public versus private, theories of regulation, strategic use of regulation, design of regulation, and processes in regulatory behavior and compliance.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

**BENV 3032 - MANAGING ENVIRONMENTS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Considers typologies/theory construction; theories of organization-environment relationships; and strategic behavior in organization-environment relationships.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

**BENV 3036 - CORPORATE SOCIAL PERFORMANCE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Seminar in business environment ethics and public policy to study current literature and research in corporate social performance.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BENV 3041 - CORPORATE GOVERNANCE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Open content elective, taught because of faculty member's specialty area.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** Katz Grad School of Business students only.

**BENV 3091 - READING BUS ENVRN/PUBLIC POLCY**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
Individual project administered under the supervision of a faculty member. Faculty approval is required.

Epidemiology

EPIDEM 2004 - PATHPHYLGY ACROSS LIFE SPAN
Minimum Credits: 4
Maximum Credits: 4
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human
physiologic function across the lifespan. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction alterations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**EPIDEM 2012 - NEUROEPIDEMIOLOGY**
Minimum Credits: 2
Maximum Credits: 2
This course addresses the application of methods of epidemiology to the problems of clinical neurology. It focuses on risk factors, natural history, frequency, outcomes, and effective treatment strategies. Emphasis is placed on three aspects: 1. Descriptive epidemiology methods; 2. Etiologic factors that influence the onset, progression and response to treatment of neurological diseases across the lifespan; 3. Cutting-edge multimodal methodologies to assess abnormalities of the central nervous system (CNS). Topics will include stroke and vascular diseases, Parkinson’s disease, Alzheimer’s disease, multiple sclerosis, amyotrophic lateral sclerosis, developmental neurological disorders (e.g. ADHD, autism), myasthenia gravis, traumatic brain injury, tumors, and infectious diseases of the central nervous system. Geographic variations will be considered. The course will involve both lectures and small discussion groups. It is elective for epidemiology students and other GSPH students but required for specialization in neuroepidemiology. This course will prepare students to design neuroepidemiological studies by providing background on epidemiological approaches, clinical definitions, and cutting-edge multimodal methodologies to assess CNS abnormalities. Additionally, this course will provide guided and critical knowledge of existing neuroepidemiological studies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**EPIDEM 2017 - POPULATION NEUROSCIENCE SEM**
Minimum Credits: 1
Maximum Credits: 1
This seminar focuses on the methods and current literature in population neuroscience. Population neuroscience draws from multiple fields, including epidemiology, neuroimaging, and cognitive psychology, to understand the intrinsic (e.g. genetic) and extrinsic (e.g. environmental) factors that contribute to brain structure and function in various populations (healthy, aging, and diseased).

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU

**EPIDEM 2023 - PARTCPRTRY MODLNG & SIMUL IN PH**
Minimum Credits: 3
Maximum Credits: 3
Computational modeling and simulation has become central to public health policy design and decision-making at all levels, from local to international. Overwhelmingly, model-building has become an interdisciplinary team effort, in which domain experts (e.g., Physicians, public health professionals, epidemiologists, infectious disease modelers, policy makers, and computer programmers) all participate in constructing models. Unlike courses in modeling proper—where mathematical or programming techniques are taught—this course equips students to be "participatory" modelers (working with programmers and other modelers), and offers hands-on experience in working with programmers, and in evaluating one's collaborative model, through sensitivity analyses and appropriate visualization. Other topics will include how to present model results, how to consume them, and how to match the technique to the problem in public health.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: BIOST 2041; PLAN: Epidemiology (PHD, DPH, MPH, MS)

**EPIDEM 2110 - PRINCIPLES OF EPIDEMIOLOGY**
Minimum Credits: 3
Maximum Credits: 3
Reviews the basic concepts of epidemiology including community diagnosis, analytical techniques and evaluation of preventive methods. Examples of both acute and chronic diseases will be covered. Course includes lectures, readings, homework assignments, and several multiple choice examinations. Courseweb is utilized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**EPIDEM 2141 - LIFESTYLE INTERVENTION: THEORY**

1859
Translating the findings of clinical trials in disease prevention to community settings is increasingly important in public health. It is thus imperative that individuals being trained in public health understand the basics of chronic disease prevention and specifically that of behavioral lifestyle intervention efforts. The purpose of this course is to provide the conceptual foundation needed for such public health initiatives. By attending this course, students will receive behavioral lifestyle intervention training based upon a modified version of the diabetes prevention program intervention protocol, called the group lifestyle balance (GLB) program. The background and rationale for behavioral lifestyle intervention will be covered in this course, as well as the relationship of lifestyle behaviors to chronic disease, with a focus on diabetes and cardiovascular disease. The course will be completed partially online and students will be expected to attend a two-day in-person training workshop in Oakland. The GLB program and materials will be reviewed in their entirety, with an emphasis on integrating the lifestyle intervention program within diverse populations.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate Sch of Public Health

EPIDEM 2142 - LIFESTYLE INTERVENTION PRACTCM
Minimum Credits: 3
Maximum Credits: 3
This course follows the lifestyle intervention training theory course. The foundation for this practicum is the group lifestyle balance (GLB) program, a behavioral lifestyle intervention training based upon a modified version of the diabetes prevention program intervention protocol. The GLB has already been developed and evaluated by the course instructors. The lifestyle intervention training practicum will provide students with the opportunity to utilize their theoretical knowledge for behavioral lifestyle intervention with hands-on application in the field. This course will be a key component in the new prevention/lifestyle intervention area of concentration within the department of epidemiology, providing the practical experience needed to deliver the group lifestyle balance program independently.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PREQ: EPIDEM 2141

EPIDEM 2143 - SOCIAL EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course provides a broad exposure to the field of social epidemiology and allows students an opportunity for a targeted study of a particular problem from a social epidemiological framework. Social epidemiology reveals how social processes are intrinsically linked to the health of populations and individuals. Social epidemiology takes into account the social, psychological, biological, and medical determinants of disease and health and uses a multidisciplinary approach to analyzing and solving complex contemporary social issues. In this course, students will read major papers in the field and discuss their relevance to today's health research. Students will also learn about approaches for incorporating social epidemiology into their research. In particular, students will discuss the differences and similarities of social determinants and individual determinants of health. The final project will be a draft manuscript, which teams of students will work on together. This will include an introduction, methods and results section. Teaching methods include lectures, readings, class discussions, and written assignments. The written assignments will be pieces of a final project that will culminate into a draft manuscript using social epidemiology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041); PROG: Graduate Sch of Public Health

EPIDEM 2150 - EPID CARDIOVASCULAR DISEASES
Minimum Credits: 2
Maximum Credits: 2
This course will review current concepts of the etiology of cardiovascular diseases, including heart disease, stroke, and peripheral vascular diseases. The emphasis is on the interrelationship between epidemiology and current concepts of pathophysiology. Critiquing of articles will be included in most sessions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or BIOST 2041)

EPIDEM 2151 - PHYSICAL ACTIVITY EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
The importance of physical activity as a key, modifiable risk factor for many chronic diseases culminated in the release of physical activity and health: a report of the surgeon general (1996). This course will provide an up-to-date overview of the area of physical activity epidemiology, from the evidence of the relationships between physical activity and/or sedentary behavior and various chronic diseases, to methodological issues pertaining to the assessment of physical activity and/or sedentary behavior, to lifestyle efforts that includes physical activity in population studies, all of which will have a special emphasis on minority groups.

**Academic Career:** GRAD  
**Course Component:** Lecture

**EPIDEM 2152 - STDNT WRKSHP CARDIO DS EPID**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed to be a supplement to the standard epidemiology coursework. It is a "hands on" workshop that will provide the opportunity for students to practice many of the concepts that they learn in class in the context of CVD epidemiology. It will also cover some areas which are not covered by the current curriculum including an introduction to subclinical CVD, professional development, reliability analyses and formal presentations of analysis results.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

**EPIDEM 2160 - EPIDEMIOLOGY INFECTIOUS DISEASES**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Presents the principles, concepts, methods for epidemiologic investigation, and measures for prevention and control of selected current infectious disease problems. Epi info, a microcomputer program developed by the centers for disease control, is utilized by the students for the write-up of at least one epidemic investigation. Course includes lectures, readings and discussions.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110

**EPIDEM 2161 - METHODS INFECTIOUS DISEASES EPID**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Covers important topics in infectious diseases epidemiology, including public health surveillance, emerging infectious diseases, the role of infectious diseases in the etiology of chronic diseases, and epidemiologic study designs and laboratory methods used in infectious diseases epidemiology. Course includes lectures, readings, and mid-term (take home) and final examinations.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110 and 2160

**EPIDEM 2163 - GLBL EPID OF VACCINES & VCCNTN**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will provide students with knowledge and skills related to the study of vaccines and vaccination programs in the US/EU and in low- and middle income countries. This course will prepare students for entry-level positions in vaccine research or programs for academic, government, or private sector institutions. This course will provide a broad introduction to a wide range of vaccine related topics ranging from biological mechanisms of vaccines to vaccine financing. Within this range of topics, the course will focus heavily on the epidemiological study of vaccine efficacy, safety, effectiveness, and impact. The course is organized around four themes: 1) introduction; 2) types of vaccines; 3) vaccine research and development; and 3) vaccination programs. Throughout the course, students will complete a written assignment.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EPIDEM 2110; PROG: Graduate Sch of Public Health

**EPIDEM 2166 - GLBL CTRL OF AIDS/HIV & TB**
Minimum Credits: 1
Maximum Credits: 1
This course will deal with the epidemiology of infection with human immunodeficiency virus (HIV) and tuberculosis (TB). Current knowledge of the natural history, biology, virology or microbiology, epidemiology and clinical aspects of AIDS as well as treatment and vaccine efforts against HIV and TB will be reviewed. Descriptive, analytic and experimental epidemiologic studies will be critically reviewed to provide a synthesis of our current understanding of the pathogenesis of these infectious diseases. An understanding of basic science concepts and biology will be assumed. Basic epidemiological principles and other quantitative skills will prove useful in understanding the distribution of the disease and in interpreting research findings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110

EPIDEM 2170 - CHRONIC DISEASE EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
The course will reinforce epidemiological concepts, research skills, and public health concepts in the context of the study of chronic diseases and associated risk factors. The course will provide an overview of the prevalence, incidence, and risk factors for major chronic diseases that face the U.S. Population and the populations around the world. Through the course, students will learn concepts and methodology used in chronic disease epidemiology research. Specific methodologies unique to certain chronic diseases will also be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or BOST 2041)

EPIDEM 2171 - CANCER EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
The course reviews basic cancer biology, reviews classic descriptive cancer epidemiology, considers the role for modern biomedical techniques in studies of cancer etiology, and reviews the active hypotheses regarding the etiology of common and uncommon human cancers. Specific topics include cancer biomarkers and intermediate endpoints, tobacco and alcohol associated cancer, viral associated cancer, endocrine related cancer, and nutrition related cancer.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

EPIDEM 2180 - EPIDEMIOLOGICAL METHODS 1
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the epidemiology methods used in research. The course is designed for students in the Graduate School of Public Health with a modest statistical and data management background. Students will use SAS, a statistical software package, to analyze data sets. This course will focus on the appropriate application of various study designs and statistical methods for answering research questions, as well as the proper interpretation of results derived from these methods. Students will be expected to participate in class discussions that extend and apply the topics covered in lectures and reading to epidemiology research articles and epidemiology in practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and BOST 2041; CREQ: BOST 2042; PROG: Graduate Sch of Public Health

EPIDEM 2181 - DESIGN/CONDUCT OF CLN TRIALS
Minimum Credits: 2
Maximum Credits: 2
The course surveys methods in the design and conduct of clinical trials. Clinical trials require successful collaboration of clinical, organizational and statistical skills. This course will focus on clinical and organizational issues, such as patient selection, recruitment, endpoint definition and protocol development. Throughout the semester, students develop a clinical trial proposal that emphasizes the application of the concepts learned. The course will complement courses in biostatistics on the statistical analysis of clinical trials.
Academic Career: GRAD
Course Component: Lecture
EPIDEM 2183 - RDNG ANLZNG INTRPTG MEDL LIT
Minimum Credits: 2
Maximum Credits: 2
This course provides the opportunity to analyze, interpret and critique original research articles. Assignments consist of oral and written reviews of recently published papers. A literature review paper on a topic chosen by the student is also required. Lecture topics include assessing study validity, subject selection, bias, confounding, laboratory methods, results presentation, quality control, statistical analyses, library searches, and bibliographic data base development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and EPIDEM 2180 and BIOST 2042

EPIDEM 2184 - SEM EPDMLGC & PBLC HLTH PRSNTN
Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to epidemiologic and public health presentation for scientific and lay audiences. Students have the opportunity to present research from their comprehensive examinations, dissertation defenses, and scientific meetings. Students may also develop community health lectures for the GSPH Community Health Speakers Bureau. Students will receive feedback from peers and faculty. Presentation is not required. All students will provide in-class presenter evaluation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

EPIDEM 2185 - INTRODUCTION TO SAS
Minimum Credits: 2
Maximum Credits: 2
This course is an introduction to SAS, a statistical software package commonly used to perform data preparation, statistical analysis, and graphical presentation of results. Students will learn to write basic SAS programs in order to perform data preparation, statistical analysis, and produce graphics. Students also will learn to make informed decisions regarding the appropriate SAS commands and options to use for these tasks. Students will use SAS for solving a set of simple specific research questions. At the end of the course students will feel comfortable using SAS as a tool for dealing with data manipulation, preparation of data for analysis and conducting simple statistical analysis with research data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Epidemiology (MS or MPH or PHD or DPH)

EPIDEM 2187 - EPIDEMIOLOGICAL METHODS 2
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to advanced epidemiology and statistical methods used in clinical and public health research. The focus is on the appropriate selection and application of statistical methods for answering research questions as well as the proper interpretation of results derived from these methods. Students will learn about the analysis of categorical data, survival data, and longitudinal data. The sample size and power issues involved when using these methods will also be covered. Students will be introduced to the causal inference framework, including the use of propensity scores and inverse probability weighting, and dynamic modeling. Students will gain experience with the statistical methods studied in this course by analyzing data sets with SAS.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2180 and BIOST 2041 and BIOST 2042

EPIDEM 2200 - EPIDEMIOLOGY & HEALTH SERVICES
Minimum Credits: 2
Maximum Credits: 2
The course surveys epidemiologic methods and approaches, as applied to the study of health services and medical technologies. The course places particular emphasis on measurement and design issues which impact on the validity of health services research studies. The course develops a systematic approach to the assessment of medical technologies and to the application of epidemiologic and other scientific information to the
formulation of health policy.

**Academic Career:** GRAD  
**Course Component:** Lecture

**EPIDEM 2210 - SPECIAL STUDIES - ESSAY**  
**Minimum Credits:** 1  
**Maximum Credits:** 15  
Research credits for master's essay. Also applies to credits for doctoral research prior to passing the doctoral comprehensive exam.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**EPIDEM 2213 - INDEPENDENT STUDY**  
**Minimum Credits:** 1  
**Maximum Credits:** 12  
Properly qualified students may undertake special study or research which does not apply to the master's essay or doctoral dissertation. This study must be done with the permission of the specific faculty member who will supervise the work.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad HSU Basis

**EPIDEM 2214 - PUBLIC HEALTH INTERNSHIP**  
**Minimum Credits:** 1  
**Maximum Credits:** 4  
This internship provides an opportunity to gain valuable knowledge and experience that would not normally be available through coursework. Placements may be outside of the university of Pittsburgh (e.g., in health services organizations, clinics, health departments, community based organizations working with "at risk" populations) or within the university. Each specific placement is to be agreed upon by each student and his/her faculty advisor, based on the strengths, needs and career/academic goals of students. Internship sites should provide a minimum of 200 hours of public health oriented work (generally 20 hours/week for 10 weeks). Students are encouraged to pursue placements beyond the online list and to think creatively about the domestic and international possibilities. Students are encouraged, but not required, to develop their master's essay based on their internship experience.  
**Academic Career:** GRAD  
**Course Component:** Internship

**Course Requirements:** PREQ: EPIDEM 2110 and BIOST 2041 and PUBHLT 2014

**EPIDEM 2215 - TEACHING PRACTICUM**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed to provide doctoral students with opportunities to develop practical skills in teaching and mentoring students taking epidemiology courses. As teaching assistants, students may lecture, grade homework and exams, lead review sessions, hold office hours or maintain course blackboard sites. They may also help plan, update or expand course syllabi or teaching materials. Course goals include improvement in oral and written communication skills and exposure to the process of planning and implementing a course.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis

**EPIDEM 2220 - APLD SPATIAL/COMMUNITY EPIDEM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to provide a conceptual understanding of the field of environmental epidemiology and to provide the spatial statistical tools for geospatial analysis. Topics will include: study design and approaches in environmental epidemiology investigations, statistical issues in the analysis and interpretation of such studies, and hands on' training in software and tools for analysis of spatio-temporal variations in health and disease with respect to demographic, environmental, behavioral, socioeconomic, genetic, and infectious risk factors. The course will provide an overview of health effects of environmental exposures. This includes the investigation of cancer and other disease clusters, health effects of water and air pollution, radiation threats and exposures and proximity to toxic waste sites. Basic tutorials in Arc GIS (10.3) and Geoda freeware will be provided."

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or BOST 2041)

**EPIDEM 2271 - ADV TOPC CANCER EPID PREVN - 1**
Minimum Credits: 2
Maximum Credits: 2
The objectives of this course are to familiarize students with central topics in cancer epidemiology and prevention, including cancer biology, research methods, and applied cancer control; provide students with an opportunity to develop an in-depth understanding of an etiology-specific cancer process; provide students with hands-on experience in conducting cancer epidemiology and prevention research; familiarize students with various facets of funding, including grant writing and reviewing. Nutritional etiology is covered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PREQ: EPIDEM 2171 and EPIDEM 2180

**EPIDEM 2295 - BIOCHMCL EPIDMLGCL ASPCT NUTRN**
Students and teachers select published manuscripts to evaluate as a group. Topics have included, but have not been limited to, adipokines, antioxidants, arginine and nitric oxide, cytokines, fructose, metabolism, hormones, isoflavones, lipoprotein metabolism, polyunsaturated fatty acids and vitamins. Basic biochemical characteristics of each species are reviewed, nutritional aspects discussed and population implications assessed with respect to cardiovascular disease, diabetes, HIV infection, and obesity.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

**EPIDEM 2310 - PSYCHIATRIC EPIDEMIOLOGY**
Minimum Credits: 2
Maximum Credits: 2
Course reviews the classification system and methodological issues in psychiatric epidemiology, the distribution of specific psychiatric disorders, and the research methodologies used.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 2320 - PSYCHIATRIC EPIDEMIOLOGY 2**
Minimum Credits: 2
Maximum Credits: 2
Critically reviews literature on the role of familial, physical, and environmental factors in the distribution of psychiatric disorders in treated and untreated populations.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 2330 - ASSESSMENT TECHNIQUES IN PSYCHIATRIC EPIDEMIOLOGY**
Minimum Credits: 2
Maximum Credits: 2
Reviews different techniques for measuring psychological and social functioning in the community as well as research criteria for psychiatric diagnosis and their associated reliability and validity.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 2340 - PEDIATRIC EPIDEMIOLOGY**
Minimum Credits: 2
Maximum Credits: 2
This course will focus on epidemiologic approaches to the study of disorders that occur during childhood and will provide an overview of common physical and psychiatric childhood disorders. In addition to describing the epidemiology of the disorders, consideration will be given to the risk factors, research methods, and methodological issues in pediatric epidemiology.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 2350 - EPIDEMIOLOGY OF ALCOHOL USE & ABUSE**
Minimum Credits: 2
Maximum Credits: 2
Covers correlates and consequences of alcohol use using epidemiologic studies of general and clinical populations. Methods of study and measurement of alcohol use are discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
EPIDEM 2380 - RES SEM ALCHOL & PSYCHTRC EPID
Minimum Credits: 1
Maximum Credits: 1
This seminar focuses on areas of current research in psychiatric epidemiology and alcohol epidemiology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

EPIDEM 2400 - PSYCHOSOCIAL FACTRS IN DISEASE
Minimum Credits: 2
Maximum Credits: 2
This course includes 2 components. The first focuses on individual-level psychosocial and behavioral factors, such as socioeconomic status, stress, social support, and depression, that influence the development and course of physical diseases. The second part is on social epidemiology and focuses on community-level factors. Social epidemiology studies the social distribution and social determinants of health and the specific features and pathways by which societal conditions such as the social structure, physical environment, public policy and cultural norms affect health.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110; PROG: Graduate Sch of Public Health

EPIDEM 2525 - BIOCH,DIET&PHYSIO MTH EPID LAB
Minimum Credits: 2
Maximum Credits: 2
Students are introduced to analytical methods that support exercise and nutritional initiatives. Initially students will attend a laboratory safety course. Biochemical assays will include measurements of antioxidants, fatty acids, hormones and vitamins using elisa, gc-ms, hplc, ria, spectrophotometric and turbidimetric methods. Sub-clinical tests will involve evaluation of intima-media thickness and pulse-wave velocity. Dietary protocols will encompass behavioral and surgical approaches to weight loss and the maintenance and interpretation of food records. Physiological techniques will target exercise interventions, the determination of energy expenditure, and appraisals of fatigue, power and strength. Anthropometric methods will involve bodpod, bioelectric impedance, dxa, skinfolds and underwater weighing. Imaging studies will evaluate brain images in relation to dementia. Results will be discussed with respect to aging, cvd, diabetes, obesity and osteoporosis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

EPIDEM 2560 - NUTRITIONAL EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This interactive course, involving lectures and in-class learning activities, provides students with the skills and knowledge necessary to understand and critically evaluate the nutritional epidemiology literature and design studies in nutritional epidemiology. The course reviews current methods of assessing nutritional status, with a focus on dietary assessment, as well as biological markers, supplement use, anthropometry, and obesity. The course addresses the application of epidemiologic methods to studies of nutrition and disease, highlighting methodological issues and interpretation of findings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or BOST 2041)

EPIDEM 2600 - INTRO TO MOLECULAR EPDMLGY
Minimum Credits: 3
Maximum Credits: 3
To provide students with an introduction to the key concepts in genetics and molecular biology, and the diverse ways they are used to solve practical problems in the epidemiology of disease and risk identification. This course will deliver the working knowledge of genetics and molecular biology necessary for critical assessment of molecular epidemiological studies. It will provide suitable preparation for more advanced and specialized study in molecular epidemiology. The student will develop familiarity with the ways molecular epidemiology is used to determine susceptibility to disease and response to interventions. The main topics covered are: genetic susceptibility, the use of biomarkers, and molecular association studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110
EPIDEM 2601 - MOLECULAR EPDMLGY LABORTRY
Minimum Credits: 2
Maximum Credits: 2
This course is designed for students who have a basic understanding of human and molecular genetics, but no prior experience with molecular biology. In addition to gaining experience with the most commonly used laboratory methods, the students will process molecular data to evaluate associations and interactions between genetic/environmental risk factors for chronic disease.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

EPIDEM 2640 - INJURY PREVENTION AND CONTROL
Minimum Credits: 2
Maximum Credits: 2
The purpose of this introductory level course is to provide an overview of the basic principles and practice underlying injury and violence prevention and control. The course is based largely on lectures, supplemented with case studies and problem solving exercises to enhance understanding of approaches to injury and violence prevention. Course content will reinforce skills in descriptive epidemiology and discuss examples of interventions involving behavior change, environmental change, policy, and program evaluation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

EPIDEM 2670 - INJURY EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
Identifies existing data sources and surveillance systems for injuries and their uses and limitations. Students will acquire an introductory understanding of the descriptive factors behind injuries from motor vehicle accidents, violence, sports, and occupations. They will also develop skills in working with colleagues on identifying data and describing its importance.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110

EPIDEM 2710 - EPIDEMIOLOGY OF WOMEN'S HEALTH
Minimum Credits: 2
Maximum Credits: 2
This course presents an introduction to studies of the influences on health and disease among women. It discusses epidemiologic approaches to understanding the basic etiology and primary prevention of diseases unique to or more common among women. Course includes lectures, seminars, and discussion.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (EPIDEM 2712 or PUBHLT 2015)

EPIDEM 2720 - REPRODUCTIVE EPIDEMIOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course first presents a solid background of female and male anatomy and physiology, as well as fetal development. The course subsequently covers critical approaches and methodologic challenges unique to reproductive epidemiology. Specific topics include contraceptives, infertility, ectopic pregnancy, spontaneous abortion, gestational weight gain, preeclampsia, preterm birth, low birth weight, intrauterine growth restriction, infant mortality, and breastfeeding. Case studies of selected exposures and reproductive outcomes are discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or BIOST 2041)

EPIDEM 2721 - RSRCH SEM REPRDCTV EPIDEM
Minimum Credits: 1
Maximum Credits: 1
This seminar focuses on areas of current research in reproductive, perinatal, and pediatric epidemiology. Fellows in the reproductive, perinatal, and pediatric training program are required to take this course, although it is open to any interested students.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

---

**EPIDEM 2725 - REPRDCTV DVLP MODL ORGNSM HUMN**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: PUBHLT 2015 or EPIDEM 2004

---

**EPIDEM 2850 - INTRO TO PHARMACOEPIDEMIOLGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is an introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population. In addition to formal lectures, students will be given the opportunity to examine and critique the literature in this area.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

---

**EPIDEM 2900 - ADVANCED EPIDEMIOLOGY OF AGING**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is an advanced course targeted toward epidemiology Ph.D. students. The purpose of this course is to understand in depth the current epidemiologic research findings regarding common health conditions and geriatric syndromes in the aging population. The course will focus on the common age-related processes and chronic health conditions that contribute to disability and frailty and on enhancing successful aging and preventing disability. Advanced research methods will be reviewed as part of each class. The course project will involve a data analysis to address an original research question based on preliminary work in the epidemiology of aging methods course (EPIDEM 2981). Data from one of the faculty's research studies will be made available for the project. Students will prepare the findings as 1) a research abstract and 2) a formal oral presentation and 3) a research manuscript.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110 and EPIDEM 2981 and (BIOST 2011 or BOST 2041); PROG: Graduate Sch of Public Health

---

**EPIDEM 2920 - GRANT WRITING**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Students will develop a grant proposal on a research topic of their choice. The proposal will be written in the format of the national institutes of health (NIH) national research service award (NRSA) individual predoctoral fellowship (parent f31) grant application. The application will include specific aims and a research plan that includes significance, innovation, and approach. The proposal will also include a research training plan as required by the NIH. Students will also participate in a mock study section (grant review). Students are encouraged to use this opportunity to develop an application for submission to the NIH for support of their dissertation work.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: EPIDEM 2110 and EPIDEM 2180 and EPIDEM 2185 and EPIDEM 2183

---

**EPIDEM 2950 - EPIDEMIOLOGY OF AGING WORKSHOP**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed to be a supplement to the other epidemiology of aging courses. The workshop provides the opportunity for students to apply
concepts from the other courses to their in-progress research in the epidemiology of aging through active participation in presenting their research and critiquing of journal articles relevant to their research. Practical professional skills not covered in other courses include professional writing and career development topics. The content of the course rotates and will be driven by the research areas and interests of the students participating in the course each semester.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

**EPIDEM 2980 - BIOLOGY & PHYSIOLOGY OF AGING**

Minimum Credits: 1
Maximum Credits: 1
Course objective is to learn current concepts and theories of the biology and physiology of normal human aging, contrasted with disease and disability. Complements epidem 2900, advanced epidemiology of aging.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2004 or 2712

**EPIDEM 2981 - EPIDEMIOLOGY OF AGING-METHODS**

Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to the methodological aspects of epidemiological research in the field of aging and geriatrics. The course will focus on: demography, study design, sampling, recruitment, retention, measurement of key variables, and special populations. During this course, students will be asked to formulate a research question and develop an analysis plan. Students will write a critical review of a published article and comment on proposed future directions for epidemiologic studies addressing these questions in older populations. Part of the credit hours will include a field experience with one of the major studies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110

**EPIDEM 3100 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1
Maximum Credits: 15
Research and dissertation for the doctoral degree.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

**Faculty Development**

**FACDEV 2200 - PRACTCM ON UNIVERSITY TEACHING**

Minimum Credits: 1
Maximum Credits: 3
This course in university teaching is designed for people who are teaching independently for the first time, or who have the flexibility in a recitation to design course materials and teach subject matter. It features the application of instructional principles to course development and materials.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

**Family Medicine**

**FM 2790 - STATISTICAL METHODS 1**

Minimum Credits: 3
Maximum Credits: 3
This is the first semester of a year-long course in biostatistics for graduate students and physician researchers in the basic science departments of the school of medicine. The course emphasizes principles of experimental design and methods of analysis, with extensive hands-on computer experience. Topics covered include introductory probability, methods for comparing two or more groups, and simple linear regression.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

FM 2791 - STATISTICAL METHODS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second semester of a year-long course in biostatistics for graduate students and physician researchers in the basic science departments of the school of medicine. The course emphasizes principles of experimental design and methods of analysis, with extensive hands-on computer experience. Topics covered include multiple linear regression and more complicated analysis of variance designs such as repeated measures.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

FM 5316 - FAMILY MEDICINE CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
Family medicine clerkship is a four week experience in primary care discipline that deals with comprehensive care of individuals and families with special focus on preventive medicine, addressing psychological and social determinants and consequences of illness. Clerkship has five goals: 1) improve and evaluate student clinical skills; 2) provide students with fundamental knowledge of diagnosis and management of common problems; 3) provide rational and scientific approach to preventive medicine; 4) learn unique aspects of family medical care; 5) economic influences of health care delivery and care of patient.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5401 - FAMILY MEDICINE ACTING INTERN
Minimum Credits: 0
Maximum Credits: 0
Four week experience which fulfills the acting internship requirement in which students participate in a family practice teaching service at the level of a first year resident under direct supervision of senior residents and attending physicians. Students are responsible for initial patient evaluation and implementation of care, including writing orders and following up on evaluations. Students participate in night call and weekend coverage as well as all conferences. This is primarily an inpatient experience.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5406 - EXTRAMURAL ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Students will register for this course when participating in a family medicine acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5420 - INDIAN HEALTH SERVICE
Minimum Credits: 0
Maximum Credits: 0
This clerkship is offered at hospitals on the Navajo and other Indian reservations. Each student participates in a project, using clinical epidemiology or health survey techniques. Students may also have some clinical experience at hospitals or clinics; and opportunities to observe various aspects of the IHS field program. Students live in government quarters and work under the direct supervision of us public health service physicians. Overall coordination and research supervision is provided by clinical epidemiology and preventive medicine faculty.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

FM 5430 - FAMILY PRACTICE-MANAGED CARE
Clinical education course combining comprehensive clinical experience with an opportunity to learn about the organization and operation of a large group model HMO. Majority of time spent seeing outpatients under direct supervision of practicing physician, regular inpatient rounds and one or more extended hours sessions to participate in the care of urgently ill patients. Time scheduled each week to become familiar with health education, quality assurance, utilization, claims, marketing, and consumer affairs components of an HMO.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### FM 5431 - TOPICS IN FAMILY MEDICINE
**Minimum Credits:** 0  
**Maximum Credits:** 0  
4 week elective consisting of 2 two week rotations selected from the following three options: 1) healthcare for the homeless, 2) managed care-how an HMO works, 3) medical care for the chronically mentally ill. Each student will also concurrently participate in the following two subjects during the 4 weeks: 1) preventive medicine and 2) critical review of the medical literature. Course objectives are to 1) see how the homeless obtain health care, 2) see how HMO control costs, 3) improve skills in managing medical illness in psych pts, 4) learn role of prevention in primary care.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### FM 5440 - CLINICAL EPDMGY INTERNSHIP
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The student will design a sub-study related to one of the ongoing epidemiologic projects in the department, and participate in all aspects of the study from data collection to the analysis and presentation of the results. The student will work closely with the epidemiologists, clinicians, and biostatisticians involved in the project.

**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

### FM 5448 - FAMILY CENTERED MATERNITY CARE
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is intended to offer medical students the opportunity to develop a wide view of family centered maternity care on a community basis. Through a series of inpatient and outpatient clinical experiences, directed readings, and a "mini-project," students will extend their understanding of integrated, interdisciplinary family centered maternity care; barriers to prenatal care; creative programs for reducing low birth weight infants; use of doulas, midwives and others in prenatal and intrapartum care; the role of health insurers in augmenting systems of prenatal care; and the abuse of detrimental drugs in pregnancy, such as alcohol, tobacco, and cocaine. The student will be evaluated by various faculty members and the course director based on oral examination of the knowledge of the readings, the "mini-project," and engagement in the topic.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### FM 5450 - COMMUNITY FAMILY MEDICINE
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is intended to offer medical students opportunity to experience family medicine in a remote community setting which is realistic to how family physicians practice. The student will focus on developing the skills necessary to evaluate and treat patients in a community office setting. The student will participate in a SWPA AHEC community or practice project during the elective. The student will choose one SWPA AHEC family practice site for the duration of the elective. The SWPA AHEC preceptor will be responsible for clinical evaluation of the student.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### FM 5451 - RURAL FAMILY MEDICINE
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Elective is intended to offer medical students the opportunity to experience family medicine in a rural community setting. Student will focus on
developing skills necessary to evaluate and treat patients in a rural office setting. The use of technology to overcome distance and educational issues will be emphasized. Responsibilities will be determined by the knowledge and skills of the student, but in general will focus on both the inpatient and outpatient settings with a practicing family physician, a dentist, and a nurse practitioner.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5455 - PRIMARY CARE SPORTS MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This four-week elective is for the student who is interested in learning more about sports medicine. The musculoskeletal system, its exam and their treatment. Students will be exposed to a variety of sports/musculoskeletal injuries in a multi-provider outpatient sports medicine team approach. The course objectives are: to improve the student's musculoskeletal system exam skills; to assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; to develop an appreciation of the roles of surgeons.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5460 - FAMILY PRACTICE
Minimum Credits: 0
Maximum Credits: 0
Clinical experience, intensive exposure to comprehensive primary care. Multiple sites, general association with community hospitals, family practice residency program. 50-100% Clinical ambulatory, variable inpatient. Emphasis on development of problem-oriented interview and exam, formulation of cost-effective diagnostic approach, and establishment of comprehensive management plans. Knowledge of diagnostic and management strategy, presenting symptoms and chronic problems in office practice stressed.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5461 - EXTRAMURAL FAMILY PRACTICE
Minimum Credits: 0
Maximum Credits: 0
Clinical experience, intensive exposure to comprehensive primary care in primarily outpatient office settings. These family practice experiences will take place in community settings or medical schools away from the university of Pittsburgh but within the United States.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5462 - COMBINED FAMILY MED & PSYCT
Minimum Credits: 0
Maximum Credits: 0
This four-week elective focuses on psychiatric and general medical problems in a variety of patients. Student will work on the consultation/liaison service at St. Margaret's Hospital where the student will respond to requests from physicians for psychiatric evaluation of patients on inpatient units. The student conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patients family in the clinical problem, makes treatment recommendations and when appropriate does follow up during the patient's hospital stay. The multi disciplinary team on the service attempts to integrate the biological with the psychosocial perspective to achieve a comprehensive view of patient care. Students will participate in family medicine case conferences, attend outpatient experiences at primary care clinics, participate in palliative care interventions and work on the medical care of the psychiatry patient (MCP M) service at WPIC. Learning opportunities include: supervised clinical assessments; hospital rounds; case conferences and seminars. This elective can prepare a student for combined family medicine/psychiatry residency programs.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5465 - INTEGRATIVE MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This elective is designed to give students a broad exposure to complementary & alternative medicine (cam) modalities & a more in-depth exposure to somatic oriented approaches and pain management. Students will be exposed to practitioners and physicians in clinical settings covering disciplines including: acupuncture, chiropractic, osteopathic manipulative treatment, integrative medicine, integrative pain management and mind-body
approaches. Students are expected to pick one clinical problem and explore the evidence-basis for cam modalities that may offer benefit in treatment.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5470 - PRACTICE-BASED PHARMACOTHERAPY
Minimum Credits: 0
Maximum Credits: 0
This is a 4-week elective where students will participate in a variety of activities (direct patient care, group/individual case-based discussions, chart reviews, and projects to improve skills in prescribing and management of medications. Special emphasis will be placed on obtaining a thorough medication and history and using evidence-based drug information databases. The student will learn rational prescribing strategies based on cost, formulary guidelines, effectiveness and individual patient characteristics. Contact will be with clinical pharmacists and family physicians.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5485 - CULTURAL COMPETENCY
Minimum Credits: 0
Maximum Credits: 0
Course objectives: to create better understanding of different health beliefs in different culture, resulting in students with facility in operating in a multicultural environment; foster an understanding of the challenges to physicians and the health care system of varying cultural beliefs and practices; improve the recognition of health beliefs and practice as they present in the clinical setting. The medical student will be introduced to a variety of cultural issues as they relate to medical care. Directed readings will be assigned to expose students to major health beliefs, disparities, challenges and practices of members of a variety of culture groups, including native Americans, African Americans, Arab Americans, eastern European immigrants, Latino Americans, and Asian Americans. Students will spend time with UPMC medical translators, attending to inpatients and outpatients, both in clinics and on house calls, learning both from the medical reasons for the patient seeking care, and the background health belief. Students will also attend health education events as available in community settings, including steps to a healthy community ® programs, center for minority health programs, Jewish community center programs, and other opportunities. The student will be expected to do a complete family health belief study on a selected patient's family, including recommendations for improvement of the quality of their health experience. Students will have a weekly meeting with the course director to discuss suggested readings and how the content applied to the clinical experiences.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5500 - INTERNATIONAL FAMILY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This elective is intended to give some structure and guide lines for students wishing to experience medical care in other countries. Although the department has some contacts in other countries, students are strongly encouraged to pursue their own interests and contacts. Students should focus on the practice of medicine in other countries as well as the epidemiology and public health issues within the country.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

FM 5505 - FAMILY MEDICINE IN HONDURAS
Minimum Credits: 0
Maximum Credits: 0
This is a four week elective to expose the student to a global health experience in a community based project working with shoulder to shoulder San Jose in Honduras. It will consist of 2 weeks in Pittsburgh and 2 weeks in San Jose del Negrito, Honduras, under the direction of shoulder to shoulder Pittsburgh and the UPMC family medicine global health (GH) team. In select situations a student with fluency in Spanish and prior international travel experience may construct a four week rotation entirely in Honduras. Each student will have an opportunity to practice clinical medicine and preventative care in a low resource setting in rural Honduras. There will be structured educational objectives in public health, tropical medicine and community oriented primary care. The team traveling to San Jose will work with the local nurse and physician in the local clinic setting as well as the various community projects. Each student will be active not only in the clinic setting but in the wider community as the project focuses on community development and community health.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U
FM 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

FM 5812 - COMMUNITY-BASED PUBLIC HEALTH POLICY
Minimum Credits: 0
Maximum Credits: 0
This is a 4-week elective during which students will learn the basic principles of identifying health problems from a population perspective &
developing policies to help solve problems. Activities include required reading, working on existing projects with community based organizations,
using health databases to answer questions about the health of communities & preparing a written & oral report based on each person's own
assessment of a community, one particular problem within that community, & a rational approach to developing health policies to address it.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

FM 5815 - BIOETHICS CONFERENCE AND READINGS
Minimum Credits: 0
Maximum Credits: 0
The student will attend at his/her own expense, two (2) weeks of conference(s) in bioethics that is accredited (one week option can be discussed).
The rotation is offered for four (4) weeks of credit. Independent readings, writings and discussion with Dr. Zimmerman or other faculty of the
readings will be needed to complete the course. The student is encouraged to attend any lectures by the center for bioethics and health law.
Objectives: use various ethical theories to analyze bioethical issues related to family medicine; understand perspectives on bioethical issues at the
beginning of life and/or the end of life; interact with other professionals from a variety of backgrounds on bioethical issues; identify resources for
understanding bioethical issues.
Academic Career: MEDS
Course Component: Seminar
Grade Component: H/HS/S/LS/U

FM 5840 - RESEARCH IN FAMILY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may
include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research
in the lab and on patients.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

FM 5899 - INDEPENDENT STUDY FAMILY MED
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction
of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent
study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

FM 5900 - FAMILY MED INDEPENDENT STUDY
Minimum Credits: 0
Maximum Credits: 0
Students interested in pursuing a particular course of independent study and/or research may choose this elective. Topic to be determined by student
and preceptor.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
FM 5910 - LEADERSHIP/MGMT/ADMINISTRATION
Minimum Credits: 0
Maximum Credits: 0
This elective will offer the opportunity to develop a wide view of medical leadership and management. Through a series of directed readings, guided experiences, and a "mini-project," students will extend their understanding of clinical managerial sciences: quality management and improvement; utilization management; the US health care system; cost benefit analysis and the distribution of the health care dollar; medical staff administration and function; managed care systems, incentives and trends; measuring physician performance; and introductory accounting and financial management concepts. The student will be evaluated by various faculty members and the course director based on oral examination of the knowledge of the readings, the "mini-project," and engagement in the topic.
Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

Film Studies - Graduate Program

FILMG 2451 - FILM HISTORY/THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the history and theory of cinema up to 1960, taking up such topics as: the origins of cinema; the development of narrative; the rise of Hollywood and its global appeal; national and international cinemas; the relation between film and the other arts; the coming of sound; arguments between realist and modernist movements; the avant-garde; and the technological and social history of cinema. These topics will be addressed through consideration of major film movements and significant films. Students will also be introduced to key theorists from this time, including Kuleshov, Vertov, Eisenstein, Balázs, Münsterberg, Lindsay, Epstein, Kracauer, Benjamin, Arnhem, Bazin, and others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FILMG 2452 - FILM HISTORY/THEORY 2
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the history and theory of cinema from 1960 to the present. While individual theorists and historians will be discussed (e.g., Cavell, Deleuze, Frampton, Kluge, Gunning, Mulvey), there will be special attention paid to historical and theoretical arguments within film studies, such as: psychoanalysis and theories of spectatorship; apparatus theory; historicism and archival research; film and philosophy; theories of genre, adaptation, and performance; neo-formalism and cognitive theory; and the rise of new media, from television to digital cinema and from Imax to video games. These arguments will be explored through major film movements and film-makers, taking up topics such as international art cinema, the changing Hollywood studio system, the role of political cinema, and the growing importance of documentaries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FILMG 2902 - DIRECTED STUDY FOR THE MA
Minimum Credits: 1
Maximum Credits: 6
In exceptional circumstances, a student who wishes to pursue a topic for which no course is available can arrange for directed study with a faculty member.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

FILMG 2905 - PROSEMINAR FILM MEDIA STUDIES
Minimum Credits: 1
Maximum Credits: 1
All students in the Ph.D. Film studies program are required to complete a one credit proseminar in film and media studies prior to taking their comprehensive examinations. Enrolled students attend a designated lecture by invited scholars, as well as an associated ninety-minute seminar conducted by a film studies faculty member concerning the work of the speaker or the topic addressed. The faculty member conducting the seminar will typically choose pertinent readings to be completed prior to the lecture and seminar. The proseminar is usually offered twice a year: once during the fall term and once during the spring, with a lecture and its associated seminar scheduled each term. Invited scholars may or may not participate in the seminar meetings. Dates and times of visiting speakers and the associated seminars will be announced well in advance so that students may plan
their schedules accordingly. A student in the program may repeat the proseminar for up to three credits. The proseminar in film and media studies seeks to expand and enhance our graduate students' experience of the critical exchange of ideas, by involving them more fully in the contemporary research being conducted by film and media scholars from around the world.

BFAE 2538 - SHORT-TERM FINANCE
Minimum Credits: 1.5
Maximum Credits: 1.5
Focuses on short-term financial management. Major topics include cash management, investment in money market instruments, banking regulations, liquidity policy, financial statement forecasting, simulation credit policy, credit management, and working capital management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BFAE 2539 - INVESTMENT MANAGEMENT
Minimum Credits: 1.5
Maximum Credits: 1.5
This course is an advanced elective; the first in a sequence of two courses and aimed at familiarizing the student with operation of the capital market
and the pricing of various securities traded in the market. Topics include: portfolio selection, bond and stock valuation and the behavior of stock prices.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BFAE 2540 - CAPITAL MARKETS

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  

A continuation of investment management. Topics may include bond prices, convertible securities, options, future contracts, and portfolio performance measurement.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BFAE 2541 - FINANCIAL INSTITUTIONS MGMNT

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  

Examines the preconditions for the emergence of financial institutions in an economy, the fundamental nature of their activities and the basis for the development of a wide variety of institutions.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BFAE 2542 - FINANCIAL INTERMEDIATION

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  

Building on the basic theory of financial institutions, this course examines a wide variety of contemporary institutions emphasizing implications for managers of financial institutions. Includes pressures of competition, innovation, portfolio constraints and the impact of government regulation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BFAE 2546 - INTRODUCTION TO DERIVATIVES

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  

Organization of markets for put-and-call options on stocks, commodities, indices, and foreign exchange. Specific topics include arbitrage and hedging relationships, the valuation of options, and the implications of trading strategies in options.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### BFAE 2547 - TOPICS IN INVESTMENTS

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  

This course will include special topics in investment analysis, portfolio management, performance measurement and other topics of interest to the instructor and students.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

### BFAE 2548 - APPLIED CORPORATE FINANCE
During the past several years, dramatic changes have occurred in the corporate financial policies of large U.S. Firms. This course examines some of these changes, including the (a) proliferation of hostile takeovers, leveraged buyouts and leveraged recapitalization in the 1980's, (b) the substantial increase in bankruptcy filings and financial restructurings of distressed firms in recent years, (c) the controversy over executive compensation, and (d) issues related to insider training.

**BFAE 2549 - INTRST RATE & SPEC PURP DERV**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
Recent years have been a witness to a dramatic increase in the volatility of prices. Financial markets have responded to this increased price volatility by creating an array of complex financial instruments and strategies that can be used to manage exposure to financial risk. This course deals with the design, valuation and uses of these complex derivative securities with special focus on strategies for risk management.

**BFAE 2550 - FINANCIAL ENGINEERING**

Minimum Credits: 1.5  
Maximum Credits: 1.5  
A continuation of Financial Planning 1st year.

**BFAE 2801 - ECON ANAL FOR ANAL MGRL DCSN**

Minimum Credits: 3  
Maximum Credits: 3  
This course develops an understanding of how a market-based economic system reconciles the separate needs of consumers and producers and provides an economic framework for managerial decisions. Additionally, the course provides tools of analysis and concepts which are used in the MBA program's functional fields.

**BFAE 3001 - MICROECONOMICS**

Minimum Credits: 3  
Maximum Credits: 3  
This is a Ph.D. level course in microeconomics with special emphasis on business applications. We will use decision and game theoretic models to analyze the decision making process of business firms. Both the neoclassical and industrial organization theories of the firm will be analyzed. Special attention will be devoted to issues of incomplete information as they pertain to signaling in markets, to the internal organization of the firm and to models of regulation.

**French**

**FR 2073 - CULTURES OF LAW AND JUSTICE**
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to help the students understand the broadest philosophical and cultural principles on which the laws of a nation are built. In order to do so, there will be a comparison of the overall politico-legal structures of France (based on civil law) with its American counterpart (based on common law), as well as with the new institutions emerging within the European union, and the Swiss model of direct democracy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2100 - READINGS OLD & MIDDLE FRENCH
Minimum Credits: 3
Maximum Credits: 3
An introduction to earlier forms of French by way of texts ranging from the twelfth through the early seventeenth centuries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2101 - MEDIEVAL FRENCH LITERATURE
Minimum Credits: 3
Maximum Credits: 3
In this course we shall examine some outstanding works representing a variety of genres: the saint's life, the chanson de geste, the Romance, the theater, lyric poetry, the fable, etc. A sense of the evolution of literature in France over the course of five centuries and the rich variety this first flourishing of vernacular writing has to offer will be developed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2102 - MEDIEVAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course, limited in scope, will usually treat an author, but occasionally a movement or group of authors of the period will be treated.
Academic Career: GRAD

Grade Component: Grad LG/SNC Basis

FR 2403 - LES PHILOSOPHES
Minimum Credits: 3
Maximum Credits: 3
This course will study the works of the most famous philosophers (Montesquieu, Voltaire, Buffon, Condillac, Diderot, Rousseau, d'Holbach, Condorcet, etc.), With each time a focus on a specific problem. Less famous authors might also be brought in (Mably, Morelly, etc.), Depending on the topic. Topics and texts will vary. (E.G. Visions de l'histoire au temps des philosophes" or "noblesse et faiblesses de l'homme de letteres a l'epoque des philosophes")."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2406 - SEMINAR: ROUSSEAU
Minimum Credits: 3
Maximum Credits: 3
This seminar will attempt to understand the unity of Rousseau's writing and thinking. A close reading of his most famous works will uncover the
same obsessions and the same ideals beyond the diversity of genres and styles.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FR 2407 - DIDEROT & HIS POSTMDRN NEPHEWS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Postmodern theorists often define our age in opposition to the project of the enlightenment". In this course, we will study in detail Diderot's main works, and show that he, in fact, anticipated most of the criticisms addressed to the enlightenment of postmodern theorists. Brief excerpts from 18th century texts and from late 20thc thinkers will help us focus on issues such as the relativity of human knowledge, the groundlessness of human values, the impossibility of human freedom and the cultural stakes of free-market ideology. Hopefully, we will also smile at Diderot's wit."  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**FR 2408 - 18THC REPUBLIC LTRS (FR & ITAL)**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to study how writers and artists of the enlightenment were part of a supra-national community, an "international republic of letters". We will observe this phenomenon through the two examples of France and Italy, for the period going from the 1740s to the 1770s. We will focus on a series of themes to which the students will contribute with their own research: writers in an international public sphere; travels and correspondences across borders; projects and reality of cosmopolitanism, a supra-national theory of human rights; language."  
**Academic Career:** GRAD  
**Course Component:** Lecture

**FR 2702 - PROBLEMS IN LITERARY CRITICISM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course offers more advanced and specialized study of particular problems in modern literary than French 2701.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
FR 2703 - SEMINRS: TOPCS, GENRES, THEMES
Minimum Credits: 3
Maximum Credits: 3
These seminars are subject - rather than author - or century - specific. Examples might be Vichy France, Baroque religious poetry, or Don Juan in French literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2705 - FR INTELLCTLS PAST & PRESENT
Minimum Credits: 3
Maximum Credits: 3
In this course we will study the evolution of the definition and function of the intellectual in France throughout the ages. The broad scope of our survey will allow students to understand both the long tradition that has shaped the way we currently conceive of intellectuals and the specificity of our current historical situation. We will read works by the following authors, among others: Abelard, Montaigne, Descartes, Voltaire, Rousseau, de Stael, Hugo, Zola, Sartre and Foucault.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2710 - INTRO LITERARY & CULTL THEORY
Minimum Credits: 3
Maximum Credits: 3
In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all readings will be available in English.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2715 - TOPCS LITERARY & CULTL THEORY
Minimum Credits: 3
Maximum Credits: 3
In this course, students will examine a special topic in literary and cultural theory. The course may be organized around a given theoretician, a theoretical movement, or a problematic. Students are expected to have some background in literary and cultural theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2760 - LITERATURE OF THE ARTS
Minimum Credits: 3
Maximum Credits: 3
This survey of stylistic and compositional correspondences between literature and the arts concentrates on the visual arts (painting, engraving, architecture and sculpture), with some attention to music, dance and cinema. Different combinations of picture and text are analyzed to see how work in one medium inflects our understanding of work in the other. The course considers, among other things, illustration and its impact on reading; ecphrasis; emblems; figure poems; the titles of paintings; and architectural programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2764 - MAGHREBI LITERATRY CULTURE
Minimum Credits: 3
Maximum Credits: 3
This seminar offers a survey of North African novel and short story
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2765 - COMPARATIVE FRANCOPHONE CULT
Minimum Credits: 3
Maximum Credits: 3
This seminar examines 'Francophonie' through the juxtaposition of francophone cultural production and theory from different areas of the world
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2766 - TOPICS-MEDITERRANEAN STUDIES
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on francophone Mediterranean culture and transitional studies
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2768 - FRANOPHONE LIT AND PERFORMANCE
Minimum Credits: 3
Maximum Credits: 3
This seminar explores topics in orality and textuality through readings of novels and drama
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2801 - HISTORY OF FRENCH LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
This course is designed to show how the French language as we know it today has emerged, after two thousand years of change and reconstruction, from the language once known as Latin in the area once known as Gaul. Emphasis will be placed on the internal history of French, i.e., Its linguistic development (phonology morphology, syntax, etc.)
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2802 - INTRODUCTION TO OLD PROVENCAL
Minimum Credits: 3
Maximum Credits: 3
An introduction to the literature, civilization, and language of medieval southern France by way of texts ranging from the tenth to the end of the thirteenth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

FR 2902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
This course enables M.A. Candidates to do research under the direction of a faculty member, on a topic of mutual interest.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

FR 2905 - PROSEMINAR FILM MEDIA STUDIES
Minimum Credits: 1
Maximum Credits: 1
FR 2910 - COMPREHENSIVE EXAMINATION MA
Minimum Credits: 1
Maximum Credits: 3
This course is intended for MA candidates in their last term of study when they present themselves for the MA comprehensive examination.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

FR 2970 - TEACHING OF FRENCH
Minimum Credits: 3
Maximum Credits: 3
This course will review the theory and practice of French language teaching. This will include all aspects of language teaching and testing, cultural understanding, bilingual education, and the teaching of reading.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

FR 2971 - TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This course is designed for French TAS and TFS who have completed French 2970 but who have not satisfied all teaching requirements of the department. Students will review and discuss pedagogical theory, effective lesson planning, professional and curricular development, curricular collaboration, and classroom management.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

FR 2972 - FOREIGN LANG ED; THEORY & PRAC
Minimum Credits: 3
Maximum Credits: 3
This course presents a survey of the historical development in the fields of linguistics and psychology that resulted in a variety of foreign language teaching methodologies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

FR 2973 - ISSUES IN FOREIGN LANGUAGE ED
Minimum Credits: 3
Maximum Credits: 3
The course deals with current issues in foreign language teaching in terms of procedures and techniques. This course is a more practical approach to the theories of foreign language methodology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

FR 2975 - ADV TOPICS FRGN LANG LRNG TCH
Minimum Credits: 3
Maximum Credits: 3
In this course intended for experienced foreign language teachers, students will focus on pedagogical issues encountered in advanced-level teaching in the areas of language, literature, and culture.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
FR 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
This independent course is for MA students who have completed, or are completing in their last term of study, all course requirements for the MA degree.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

FR 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 15
Students register for this course while doing research for their Ph.D. Dissertations.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

FR 3900 - SPECIAL TOPICS FRENCH STUDIES
Minimum Credits: 1
Maximum Credits: 6
This course will focus on a defined topic in French or francophone studies.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

FR 3902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
This course enables Ph.D. Students to do research under the direction of a faculty member, on a topic of mutual interest.

Gender, Sexuality, and Women's Studies

GSWS 2058 - FEMINIST SOCIAL WORK
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

GSWS 2235 - LANGUAGE, GENDER AND SOCIETY
Minimum Credits: 3
Maximum Credits: 3
As a field of research, language and gender studies is interdisciplinary and relatively new. These studies seem to discover the nature of gender-related differences in language and their causes and effects. Gender here refers to social categories based on sex but encompassing behavior, roles and images that, although not biologically determined, are regarded by a society as appropriate to its male or female members. What is seen as appropriate to each gender thus differs in different societies and eras. Explanations for gender thus differ in different societies and eras. Explanations for almost all observed male/female language differences are to be found less in the biological constitution of the human body and more in the social and psychological formation of the human subject. These are the issues we will be concerned with in this course. Is women's language use in systematic ways different from that of men? If it is different, how is it different? Why is it different, what sorts of explanations are there? And maybe most important, does a difference of language use matter?

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GSWS 2240 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
This graduate course addresses a current topic in gender, sexuality, or women's studies. Topic varies by instructor.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
GSWS 2242 - FEMINIST THEORY
Minimum Credits: 3
Maximum Credits: 3
This course is an interdisciplinary introduction to feminist theory. It will examine a wide range of feminist theories and theories of gender, drawing from works in history, social sciences, philosophy, legal studies, and literary theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

GSWS 2252 - THEORIES OF GENDER & SEXUALITY
Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of important tendencies and controversies in gender and sexuality studies, emphasizing emerging directions in scholarship as well as foundational readings. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines (including anthropology, history, law, economics, philosophy, and literary studies) and sampling a range of methodologies, this course will work through some of the key movements and problems that have shaped and continue to shape contemporary thinking about gender and sexuality. Readings are likely to include works by Lila Abu-lughod, Judith Butler, Nancy Chodorow, Patricia Hill Collins, R. W. Connell, Michel Foucault, Nancy Fraser, Linda Gordon, Judith Halberstam, Chandra Mohanty, Uma Narayan, and Joan Scott.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

GSWS 2262 - GENDER, ETHICS, AND THE BODY
Minimum Credits: 3
Maximum Credits: 3
This seminar explores what it means to take a feminist approach to something, particularly ethics, and what it means to examine the gendered nature of something, particularly bodies, ethics, and even feminist approaches themselves.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GSWS 2270 - QUEER THEORY
Minimum Credits: 3
Maximum Credits: 3
Study of recent theories of sexuality, emphasizing work in lesbian, gay, transgender, and queer studies. Consideration of the development of 'queer' as critical category (including its limitations), and of the history of queer theory and LGBT studies.

Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GSWS 2475 - THE BODY IN THE CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course will explore the status of the human body as represented in film, a cultural medium identified with various modes of spectacle. We will begin by a consideration of the body in early precursors to the cinema-for instance Edward Muybridge's photographic "motion studies" or primitive x-ray photography--and work our way up to the contemporary scene (in which digitally created characters (and actors) complicate the corporeal universe). In our engagement of the topic, many class sessions will consider how the body is figured in various film genres (e.g. The musical [in which the body is graceful and choreographed], the melodrama [in which the bodily expression transcends dialogue], the horror film [in which the abject body perversely transforms], the martial arts film [in which the body is a violent weapon], the romance [in which the beautiful body must attract], the sports film [in which the athletic body shows strength and endurance], the war film [in which the body suffers], the science fiction film
[in which the body is a cyborg], the crime film [in which the body leaves clues], and/or the pornographic film [in which the body sexually stimulates the viewer]). Beyond genre, our discussions will also consider such broad theoretical topics as: the gendered body, the aging body, the racial body, the "national" body, and the manner in which film style "transforms" the body (e.g. Fragmentation through close-up). Readings on the topic will be drawn not only from film studies (e.g. Linda Williams, Lisa Cartwright, Peter Lehman, Steven Shaviro) but from broader cultural studies (e.g. Thomas Lacquer, Susan Bordo, Elaine Scarry or Helena Michie).

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SNC Basis

**GSWS 2621 - ETHNOMUSICOLOGY SEMINAR**

Minimum Credits: 3  
Maximum Credits: 3  
This seminar provides an introduction to issues of gender and sexuality in musicological research and examines representative writings on music that address issues of masculinity, femininity, transsexuality, gay and lesbian identities. Discussions are contextualized within analyses of various expressive genres such as traditional music, traditional world theatre, Western art music, and popular music. Attention will be paid to historical and theoretical examinations of gender and sexuality in musical performance, participation, and listening practices. This course aims to understand how social, economic, and political processes influence gender-related behavior and formulate differing understandings of gender and sexuality within a variety of musical contexts. It analyzes global music and media industries, cultural economies, and social institutions as pivotal sites for the maintenance, reproduction, and change regarding gender and sexuality in contemporary and historical perspective. This seminar will help students develop a deeper understanding of how their own musical experiences, views, choices and behavior have been shaped by the relationship between their own identities, the musical environments they inhabit, and the structure of opportunities they encounter through a variety of listening and musical performance practices. Class readings incorporate anthropological, psychoanalytic, Marxist, feminist, poststructuralist, and queer theories and draw on a variety of scholarly perspectives, including those of, but not limited to Judith Butler, Suzanne Cusick, George Chanuney, bell hooks, Lila Abu-Lughod, Susan McClary, Robert Walser, and others.

**Geology**

**GEOL 2000 - RESEARCH AND THESIS MS DEGREE**

Minimum Credits: 1  
Maximum Credits: 12  
This course is designed to permit graduate students the opportunity to accomplish research necessary for the completion of a master's degree in geology.

Academic Career: GRAD  
Course Component: Thesis Research  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Geology and Planetary Science (MS)

**GEOL 2001 - A GEOLOGIC ODYSSEY**
Minimum Credits: 2
Maximum Credits: 2
The geologic odyssey course is required for all new MS and Ph.D. students in geology and planetary science. It is designed to introduce students to the professors and science carried out in the department. Each week will be run by a different professor who will present their background, research, and conduct a "micro-class" on some aspect of this work.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Geology and Planetary Science(PhD or MS) or Geographical Information Sys(MS)

GEOL 2015 - GEOLOGY COLLOQUIUM
Minimum Credits: 1
Maximum Credits: 1
Geology colloquium is a required course for MS and PhD students in geology and planetary science each term. It is a formalization of the seminar series with weekly guest speakers from industry, academia, and government. Each seminar will focus on a different research topic in the earth sciences and describe active and on-going projects of immediate interest to students.

Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis

GEOL 2021 - ADVANCED PETROLOGY
Minimum Credits: 3
Maximum Credits: 3
The origin and characteristics of the common igneous rocks and minerals are studied in light of natural and synthetic rock systems. Main topics covered are equilibrium relations of the main silicate systems, petrogenesis of the principal igneous rock types and their relation to plate tectonic regimes, and generation and source of magma.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2022 - ADVANCED IGNEOUS PETROLOGY 2
Minimum Credits: 3
Maximum Credits: 3
The origin and characteristics of the common igneous rocks and minerals are studied in light of natural and synthetic rock systems. Main topics covered are equilibrium relations of the main silicate systems, petrotectonic regimes, and generation and source of magmas.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2023 - ADVANCED METAMORPHIC PETROLOGY
Minimum Credits: 3
Maximum Credits: 3
A comprehensive study of metamorphic paragenesis with emphasis on its relation to the geologic environment. Metamorphism is introduced as a field phenomenon, and a discussion of the progressive nature of metamorphism leads to the concept of facies. Thermodynamic and experimental evaluation of significant reactions are treated rigorously but simply.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2024 - PRECAMBRIAN GEOLOGY
Minimum Credits: 3
Maximum Credits: 3
The Precambrian evolution of continents, with particular emphasis on North America. Topics covered are: igneous and metamorphic rock associations; stratigraphy; geochronology; economic geology; plate tectonic regimes; and Precambrian provinces of North America, with discussions on development of primitive crustal segments, eugeosynclinal shelf deposits, orogenic and nonorogenic rock assemblages, Precambrian life, basaltic rift zones, continental stabilization, and relation of Precambrian to Phanerozoic structures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
GEOL 2049 - PALEOCLIMATOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course presents the different types of data used to study the earth's climatic history and long-term climatic variability. Particular emphasis is given to the climatic changes during the last Cenozoic -- the so called glacial ages. Topics of discussion include time scales of climatic change, types of paleoclimatic records and their limitations, numerical climate models, the causes of climatic change, and the importance of paleoclimatic research in forecasting the future.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2050 - CARBONATE PETROLOGY
Minimum Credits: 3
Maximum Credits: 3
Lecture will cover the major aspects of carbonate petrology including grain and matrix type, classification of carbonate rocks, depositional environments, lithification and diagenesis. Laboratory will involve thin section analysis of the major carbonate rock types.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2052 - SEDIMENTARY DEPOSITIONAL ENVIRONMENTS
Minimum Credits: 3
Maximum Credits: 3
An examination of the major sedimentary depositional environments. The environments to be considered are fluvial, lacustrine, littoral, shallow marine, and oceanic. Terrestrial and chemical sedimentation within these environments will be covered. Both recent and fossil examples of each environment will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2054 - SOILS: GEOBIOCHEMICAL LANDSCAPES
Minimum Credits: 4
Maximum Credits: 4
An overview of soils with a strong emphasis on landscape scale process. The course consists of lecture and laboratory/field work. The lecture will include description of physical and chemical soil properties and processes, discussion of major soil classifications and description of ramifications at the landscape scale.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2060 - GEOMORPHOLOGY
Minimum Credits: 4
Maximum Credits: 4
This course is a survey of the major landform features found on the earth's surface. Each landform type is first described qualitatively and then examined in terms of the processes, such as stream flow or glacial activity, which cause its development. The purpose of the course is to familiarize students with geomorphic principles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2100 - ADVANCED STRUCTURAL GEOLOGY
Minimum Credits: 4
Maximum Credits: 4
Primarily a field and seminar course with emphasis upon geologic mapping and structural analysis of areas within the Appalachians.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
GEOL 2110 - PLATE TECTONICS
Minimum Credits: 3
Maximum Credits: 3
The geometry and kinematics of plate tectonics are developed together with the geophysical evidence for plate motions in the first half of the course. The second half involves a geological examination of convergent, divergent, and transform-dominated terranes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2120 - BASIN ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
The integrated study of sedimentary basins as geodynamic entities, including tectonic environment, geologic history and associated strength of the lithosphere, rock weathering and erosion, and sediment transport. The class will give students a background in driving mechanisms for basin formation and subsidence, sedimentary record preservation and alteration, sedimentary geometry, facies and petrology and provide a basic understanding of the continuum mechanics equations that approximate basin formation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: GEOL 1100 and GEOL 1020; LVL: Graduate

GEOL 2151 - GROUNDWATER GEOLOGY
Minimum Credits: 4
Maximum Credits: 4
This course focuses on physical and chemical processes controlling water movement and composition in sub-surface environments. The lab focuses on practical field methods for the characterization of groundwater.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2202 - MICROPALeOLOGY
Minimum Credits: 3
Maximum Credits: 3
Stresses the nature, recognition and utility of various microfossil groups. Includes emphasis on bio stratigraphic significance of these groups. Lab provides experience in techniques of microfossil retrieval and identification.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2203 - PALEOECOLOGY
Minimum Credits: 3
Maximum Credits: 3
In-depth review of current issues and problems of Paleoceological analysis. Requires extensive reading of primary literature, largely journal articles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2220 - EVOLUTION & THE FOSSIL RECORD
Minimum Credits: 3
Maximum Credits: 3
Examines the contributions of the fossil record to evolutionary studies. Principles of evolution illustrated through reading from recent paleontological literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
GEOL 2221 - MORPHOLOGICAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Detailed study of methods of functional morphological analysis. Extensive reading from primary sources. Stresses both qualitative and quantitative
techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2300 - PRO-M.S. SEMINAR
Minimum Credits: 1
Maximum Credits: 1
This is an interactive seminar that concentrates on advanced topics in geographical information systems (GIS) and remote sensing (RS) for students
enrolled in the professional science M.S. degree program. Weekly meeting topics could include speakers from academia and industry, reviews of
software and current literature, or student presentations that focus on their recently completed internship program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

GEOL 2309 - PHYSICOCHEMICAL GEOLC LIMN
Minimum Credits: 3
Maximum Credits: 3
This course will explore the physicochemical and geological aspects of inland waters (lakes, rivers, springs, and wetlands). Specifically, the course
will examine the origin and evolution of lakes, the physical and chemical properties of fresh and saline waters, watershed hydrology, and the
biogeochemical cycling of major elements and nutrients.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2400 - PHYSICS OF EARTH'S INTERIOR 1
Minimum Credits: 3
Maximum Credits: 3
An advanced treatment of the physical principles applicable to models of the earth's surface and interior and methods of data interpretation relating to
such models. Topics include gravity, magnetics, and electromagnetics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2401 - PHYSICS OF EARTH'S INTERIOR 2
Minimum Credits: 3
Maximum Credits: 3
A continuation of 2400. Topics include seismology, the thermal regime of the earth, composition and state of the earth's interior, the state of stress in
the earth and its application to tectonics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2430 - GEOMAGNETISM & PALEOMAGNETISM
Minimum Credits: 3
Maximum Credits: 3
The mathematical description of earth's magnetic field will be developed along with a description of its temporal behavior. The study of the ancient
earth's magnetic field is the subject of paleomagnetism. We will study the theory and mechanics of carrying out paleomagnetic studies, along with
their applications to stratigraphy and geotectonics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
GEOL 2446 - ADV GEOGRAPHICAL INFORMATN
Minimum Credits: 3
Maximum Credits: 3
Using advanced geographical information systems technologies and geospatial analysis techniques students will extend their knowledge of geographical information systems to include raster, geostatistical, network, model, and 3d/4d based analysis completing complex analysis of real world data sets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: GEOL 2449

GEOL 2447 - GEOPHYSICAL WELL LOGGIN'
Minimum Credits: 3
Maximum Credits: 3
This course introduces the erisiarcview tool. Numerous computer workstation based assignments introduce the student to gis landbases and gis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2449 - GIS, GPS, AND COMPUTER METHODS
Minimum Credits: 3
Maximum Credits: 3
The goals of this course are to gain expertise in spatial analysis and geographical information systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2460 - APPLD REMOTE SENSNG & GPS TECQ
Minimum Credits: 3
Maximum Credits: 3
Designed as a follow on to the introduction to remote sensing course this advanced class emphasizes field-oriented problems, data collection, and validation. The ultimate goal is to explore the connection between re motely-gathered imagery and the real-world factors which influence those data. Students taking the course should have had at least 1 semester of high school or college physics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2461 - ADVANCE REMOTE SENSING
Minimum Credits: 3
Maximum Credits: 3
This course is offered in conjunction with the introduction to remote sensing (GEOL-1460) - this course provides a foundation in the theory and techniques of remote sensing and geospatial data visualization spanning the electromagnetic spectrum from the ultraviolet to microwave wavelength region. Topics will include light/matter interaction, optics and sensor design, image analysis using commercial software, as well as current applications of remote sensing to science and engineering problems. The course and integrated image-processing laboratory are designed to provide you with an appreciation of current remote sensing issues, the geologic and human processes that impact remotely-gathered data, and how those processes can be measured using remote sensing. Students taking this course will participate in an independent research project involving remote sensing theory/data analysis. Students with no prior remote sensing background will also be required to participate in the GEOL-1460 lecture and computer labs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2501 - ORGANIC GEOCHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
This is mainly a lecture course that will examine the carbon cycle and the life cycle of the organisms that are responsible for the eventual accumulation of organic materials in sediments. The processes involved in the simultaneous preservation and transformation of organic materials into coal, petroleum, natural gas, kerogen and other dispersed organics will be reviewed in light of modern concepts of thermal maturation processes. The
structures of naturally-occurring organic materials in sediments will be discussed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 2502 - ADV ANALYTICAL GEOCHEMISTRY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will focus on techniques used in the mineralogical, elemental, and isotopic analysis of geological and environmental samples, including inductively-coupled plasma atomic emission spectroscopy (ICP-AES) and isotopic ratio measurement by thermal ionization mass spectrometry (TIMS). Topics include the basics of instrument theory and operation, sample collection and preparation, and analysis and interpretation of data. Students will carry out a group research project, and present results in oral and written form.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 2515 - ENVIRONMENTAL GEOCHEMISTRY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course explores the complex interactions of earth's rock, water, air, and life systems that determine the chemical characteristics of our environment. We will examine the distribution, cycling, and transport of chemical compounds in the atmosphere, hydrosphere, and terrestrial environment on local and global scales. Topics will include water chemistry, organic and inorganic pollution and related toxicology, hazardous wastes, acid rain, acid mine drainage, photochemical smog, ozone depletion, and global climate change. A class project involves chemical analysis of student-supplied water samples.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2520 - RADIOGENIC ISOTP GEOL GEOCHRNO**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Introduction to isotope systematics (including mass dependent fractionation, radioactive decay, generation of cosmogenic nuclides, and nucleosynthesis), and application of isotope systems to problems in geochronology, geology, hydrology, oceanography, biology, and Cosmochemistry.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2521 - INTRO TO MASS SPECTROMETRY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
A basic, yet comprehensive, introduction to mass spectrometry is presented including a summary of instrumentation, spectral interpretation procedures, and data handling. Applications of mass spectrometry to geology, biochemistry, energy research and the environment are emphasized.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2522 - MASS SPECTROMETRY OF ORGANICS**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
Advanced topics in mass spectrometry will be discussed including tandem mass spectrometry, Fourier transform mass spectrometry, advanced interpretation of mass spectra of organic molecules and newer types of ion sources. Each student will be assisted in exploring a mass spectrometry topic of specific interest.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2525 - STABLE ISOTOPE GEOCHEMISTRY**
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a thorough introduction to the stable isotope systematics of light elements (hydrogen, carbon, nitrogen, oxygen, and sulfur). The course examines the fundamental concepts of isotope equilibrium and kinetics, physiochemical and biogenic mechanisms of isotope exchange, and the principles of mass spectrometry and stable isotope extraction techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: GEOL 2520

GEOL 2530 - GEOCHEMICAL & HYDROLOGICAL MODELING
Minimum Credits: 3
Maximum Credits: 3
Environmental concerns are often about potential impacts in the future. Thus, environmental policy making and practices heavily rely on models. This course will introduce students to the theories and applications of geochemical modeling. Students will have the opportunity to acquire hands-on experience of using popular geochemical codes such as minteqaz, phreeqc, and eq316. Applications to sedimentary, magmatic, and metamorphic processes will be included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2621 - COAL GEOLOGY
Minimum Credits: 3
Maximum Credits: 3
The progenitors of coal, the conditions essential for accumulation of the organic substance, the process of maturation under varying conditions, and the structure and composition of coal beds will all be considered in developing an understanding of the formation and distribution of coal beds. Local coal bed sequences will be studied and related to selected deposits from major basins of deposition of coal worldwide.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 2640 - ADV GEOHAZARDS & RISK MGMT
Minimum Credits: 3
Maximum Credits: 3
The geological and natural processes that affect the human environment in catastrophic ways are examined in this class in terms of science, prediction, mitigation, avoidance and the policy/safety issues involved. These problems commonly result from human activity modifying and impinging the natural geologic processes. Detailed topics covered include the four primary hazards that are common in the United States: earthquakes, hurricanes, wildfires, and flooding.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 2701 - GEOLOGY OF THE PLANETS
Minimum Credits: 3
Maximum Credits: 3
The principles of physics applied to the study of various bodies of the solar system, including orbits, interiors, surfaces and atmospheres; extensive use is made of results from planetary spacecraft missions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Geology and Planetary Science (PHD or MS) or Geographical Information Sys (MS) or Geology and Environmental Sci (PHD or MS)

GEOL 2702 - PLANETARY PHYSICS 2
Minimum Credits: 3
Maximum Credits: 3
The application of physical principles to the study of the planetary bodies of our solar system. Topics include planetary interiors, surfaces and atmospheres, the origin of the solar system and remote-sensing methods. Extensive use is made of spacecraft data.
Academic Career: GRAD
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 2720 - LUNAR GEOCHEMISTRY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Conducted at the advanced graduate level, involving literature research on lunar geochemistry and production of two research papers on topics in lunar geochemistry. Subject material covers results of geochemical studies of lunar samples such as age, determination, petrographic and petrologic studies, and major- and trace-element distributions, and interpretations based upon them. Comparisons are made between lunar and terrestrial igneous processes. Lunar surface-darkening processes are discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2740 - PLANETARY GEOCHEMISTRY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will cover the geochemical evolution of the solar system, including nucleosynthesis, planetary accretion and differentiation, formation of earth's moon, and continuing geochemical processes on the terrestrial planets. We will approach models for planetary geochemical evolution using the meteorite record, lunar sample chemistry, and data from planetary surface probes (e.g., Venus, Mars).  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**GEOL 2750 - VOLCANOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on a specific but different topic of volcanology each time it is offered. The course is offered dependent on student demand. Courses that have been offered in the past include: describing and interpreting pyroclastic rocks, exploring explosions and glaciovolcanism. All the courses include discussion in the classroom, especially of recent volcanological literature, study of hand samples and microscope study of thin-sections.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 2853 - WATERSHED HYDRG & BIOGEOGHEM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**GEOL 2990 - INDEPENDENT STUDY**  
**Minimum Credits:** 1  
**Maximum Credits:** 12  
This course permits graduate students to explore specific topics in the geological sciences. The course is designed in a more flexible format than a directed study, stressing a higher degree of independent library research.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**GEOL 3000 - RESEARCH AND DISSERTATION PHD**
Minimum Credits: 1  
Maximum Credits: 12  
This course is designed to permit graduate students the opportunity to accomplish research necessary for the completion of a Ph.D. degree in geology.

Academic Career: GRAD  
Course Component: Thesis Research  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Geology and Planetary Science (PHD)

**GEOL 3410 - EXPLORATION GEOPHYSICS**
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on exploration geophysics including reflection seismic, well log, gravity, electromagnetic, magnetic, electrical, and other methods.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**GEOL 3853 - WATERSHED HYDRG & BIOGEOGHEM**
Minimum Credits: 3  
Maximum Credits: 3  
Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

**GEOL 3900 - TOPICS IN GEOLOGY: COLLOQUIUM**
Minimum Credits: 1  
Maximum Credits: 1  
This is a course designed to permit the teaching of new and significant developments in the field of geology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: GRAD  
Course Component: Colloquium  
Grade Component: Grad LG/SNC Basis

**GEOL 3901 - TOPICS IN SEDIMENTOLOGY**
Minimum Credits: 3  
Maximum Credits: 3  
This is a course designed to permit the teaching of new and significant developments in the field of sedimentology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**GEOL 3902 - DIRECTED STUDY**
Minimum Credits: 1  
Maximum Credits: 12  
This is a course designed to permit graduate students an opportunity to explore facets of research possibly leading to project/thesis/dissertation topic.

Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis

**GEOL 3903 - TOPICS IN SEDIMENTOLOGY**
GEOL 3904 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
This is a course designed to permit graduate students an opportunity to explore facets of research possibly in the area of information science systems related to their project/thesis/dissertation topic.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GEOL 3906 - TOPICS IN GEOLOGY
Minimum Credits: 2
Maximum Credits: 2
This is a course designed to permit the teaching of new and significant developments in the field of geology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3908 - TPCS GEOL: FOLD THRUST BELTS
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of geology. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3909 - TOPICS IN GEOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit graduate students an opportunity to explore facets of research possibly in the area of information science systems related to their project/thesis/dissertation topic.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: GEOL 2049

GEOL 3913 - TOPICS IN GEOTECTONICS
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of geotectonic. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 3921 - TOPICS IN PALEOENVIRON ANLYSIS
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of paleo environmental analysis. It permits
maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3925 - TOPICS IN PALEOLIMNOLOGY
Minimum Credits: 3
Maximum Credits: 3
This graduate class will focus on the study lake sediments as archives of climatic change. Lake deposits form a significant part of the geologic record and contain high resolution records of past climatic and environmental changes in continental environments. Because lake deposits are the product of diverse geochemical experiments they provide a framework to discuss numerous problems which are of general interest in both chemical sedimentology and general sedimentology. Readings assigned from current journal articles.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GEOL 3930 - ANDEAN LAKES & ENVIRONMENTAL CHANGE
Minimum Credits: 3
Maximum Credits: 3
This class is aimed at upper level undergraduate and graduate students and assumes a strong background in geology. The focus of this class will be on Andean lakes and how past physical, chemical, and biological records are archived in lake deposits. Emphasis will be placed on recent Andean paleoclimate records and the climatic linkages between the northern and southern hemispheres. Readings assigned from current journal articles and include topics such as El Niño variability and insolation forcing.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3931 - TOPICS IN PALEOENVIRONMENTAL ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
This is a course designed to permit the teaching of new and significant developments in the field of paleo environmental analysis. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GEOL 3940 - TOPICS IN GEOPHYSICS
Minimum Credits: 1
Maximum Credits: 9
This is a course designed to permit the teaching of new and significant developments in the field of geophysics. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GEOL 3943 - TOPICS IN GEOPHYSICS
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of geophysics. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

GEOL 3945 - TOPICS IN GIS & REMOTE SENSING
Minimum Credits: 1
Maximum Credits: 9
This is a course designed to permit the teaching of new and significant developments in the integrated fields of GIS and remote sensing. The theory,
techniques and applications are emphasized as is the use of current data sets through a combination of lecture and laboratory exercises.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**GEOL 3946 - PYTHON SCRIPTING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The goal of this course is to gain expertise in programming methods using environmental systems research incorporated arcobjects and the visual studio .net programming environment of microsoft. Arcobjects is a software technology based on the com protocol and can be used within any com-compliant programming language. Our goal in this class is to gain fundamental skills in visual basic programming using the microsoft developers studio visual basic environment through applied examples and homeworks. After students have gained some programming expertise they will immediately begin programming the arcgis desktop using arcobjects technology.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: GEOL 2449

**GEOL 3947 - TOPICS IN GIS 1**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This is a course designed to permit the teaching of new and significant development in the field of GIS. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 3948 - TOPICS IN GIS 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This is a course designed to permit the teaching of new and significant development in the field of GIS. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: GEOL 2449

**GEOL 3950 - TOPICS IN GEOCHEMISTRY 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This specialized course provides students with an introduction to the fundamental operation of gas source mass spectrometers (vacuum and ion source systematics, cryogenics, etc.) And hands-on, technical training in the use of isotope ratio mass spectrometers and associated peripheral instruments.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: GEOL 2525

**GEOL 3951 - TOPICS IN GEOCHEMISTRY 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This is a course designed to permit the teaching of new and significant developments in the field of geochemistry. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**GEOL 3952 - TOPICS IN BIOGEOCHEM & GEOBIO**
Minimum Credits: 1
Maximum Credits: 2
This is a course designed to permit the teaching of new and significant developments in the field of geochemistry. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

GEOL 3953 - TOPICS IN GEOCHEMISTRY
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to permit the teaching of new and significant developments in the field of geochemistry. It permits maximum flexibility enabling presentation of subject matter not normally treated in formal geology courses.
Academic Career: GRAD
Course Component: Lecture

- **Maximum Credits:** 15  
- **Academic Career:** GRAD  
- **Course Component:** Thesis Research  
- **Grade Component:** Grad SN Basis

### GER 2110 - INTRO LITERARY & CULTL THEORY
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course offers selected readings in 20th century literary theory, with emphasis on the German tradition. We examine such schools of literary theory as psychoanalytic (Freud), Marxist (Lukacs, Benjamin, Brecht), and reception theory (Jauss, Iser). Each is discussed within its historical context; moreover, the implications of each is tested in relation to a selected work of literature. In addition, we study the critical reception of these schools of thought, as well as their relevance to contemporary debates.
- **Academic Career:** GRAD

GER 2140 - PROSEMINAR IN LITERARY HISTORY
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces students to major concepts, methods, and theories related to the historical situation of German literature and culture. Topics, which vary, may include history of the manuscript and book, reception, canon formation, genre tradition, periodization, cultural institutions, social and political contexts, and forms of historical representation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2142 - CULTURAL HIST TO THE 18TH CENT
Minimum Credits: 3
Maximum Credits: 3
This course discusses major expressions of German culture from the middle ages to the 18th century. The following areas are studied in the light of selected masterworks: the idea and reality of the holy Roman empire; courtly society and culture in the high middle ages; Luther's reformation; Renaissance art in Nuremberg; academies and the idea of a national culture; Leibniz and his time.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2144 - INTELCL HIST: LESSING TO FREUD
Minimum Credits: 3
Maximum Credits: 3
This course introduces the German intellectual tradition from the 18th until the early 20th century. A primary aim involves the interpretation of texts that offer a picture of the German search for order. Students examine such issues as individualism", "aufklaerung", "tradition", "history", "community", and "alienation". Readings cover different disciplines. Tests vary, but writers might include Leibniz, Lessing, Herder, Kant, Goethe, Schiller, Schelling, Kleist, Novalis, Fichte, Feuerbach, Hegel, Marx, Buechner, Schopenhauer, Wagner, Nietzsche, Mann, Freud, and Kafka."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2146 - THE PLOTTING OF HISTORY
Minimum Credits: 3
Maximum Credits: 3
Students examine the dominance of utopian philosophies of history from the 18th and 19th centuries. Representations of the historical continuum that privilege a redemption from history are studied as philosophical and literary emplottments". By claiming to explain the past and know the future, these interpretations implicate events in universalizing schemes of revelation. Yet they cannot conceal their own critical origins in the crisis of absolutism, nor deny a fundamental relationship between fictionalizing and historicizing."
GER 2148 - HISTORY, MEMORY, NARRATIVE
Minimum Credits: 3
Maximum Credits: 3
In recent years there has been a growing interest in historical narrative and the question of history as narrative. This course investigates this return to history, and the problems involved in such a critical move, across a number of disciplines and textual productions. This investigation is limited to the Twentieth Century, and the status of history within modernity. The materials include theoretical, literary, and filmic texts.

GER 2160 - IMAGE IN LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This seminar explores modes of imagination and invention in historical forms of expression, such as allegory, emblem, symbol, topos, and figure of speech. We will study both the hermeneutic and historical significance of literary, pictorial and theoretical sources ranging in scope from rhetorics and medieval interpretation to modern concepts of textual and cultural criticism.

GER 2170 - PROSEMINAR IN LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This foundation course introduces student to the structure, semantics, sociolinguistics, dialectology, and history of German. It provides a pragmatic overview for future language teachers and also enhances the language capabilities of students.

GER 2194 - MIDDLE HIGH GERMAN LANG & LIT
Minimum Credits: 3
Maximum Credits: 3
This course introduces medieval German philology and teaches students to read old literary and historical documents (from about 1100 to 1500 A.D.). Both linguists and students of literature benefit from this course, since it provides an introduction to German literature of the middle ages, as well as the middle high German language.

GER 2200 - LYRIC POETRY
Minimum Credits: 3
Maximum Credits: 3
This course defines thematic and formal elements of the lyric tradition from the 18th through the 20th centuries. Students develop techniques for analyzing a poem that consider both its internal structure and its possible reference to earlier poems. Theoretical pronouncements by some of the poets in question, as well as some secondary literature, is read. Special emphasis is placed on modern poetry. Among the poets treated are Klopstock, Goethe, Schiller, Hoelderlin, Novalis, Moerike, Meyer, George, Hofmannsthal, Rilke, Trakl, and Celan.

GER 2201 - GERMANY UNDER SPELL OF AMERICA
Minimum Credits: 3
Maximum Credits: 3
This course explores the ambivalent relationship of Germany with the U.S. Since the beginning of the 20th century. It focuses on the huge impact of
U.S. Culture in Germany after 1945 and the responses this influence has generated among German cultural elites. Analyzing literature, film, and other popular culture phenomena, it probes the ideological underpinnings of the claim that German culture is being Americanized in order to reconceptualize intercultural exchanges.

**GER 2510 - 17TH CENT LANGUAGE ACADEMIES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The emergence of new high German and the development of modern German literature are closely related to the role which language academies played in the regulation of German, the establishment of literary genre models, and in the promotion of the vernacular in all areas of culture. We will study literary, linguistic, religious, and educational aspects of the Fruchtbringende Gesellschaft and the Pegnitzschafer in the context of the early modern European academy movement. Texts include literary works, emblems, letters, grammars, dictionaries, and scientific writings.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
GER 2600 - AGE OF GOETHE
Minimum Credits: 3
Maximum Credits: 3
The production of a cultural canon during the latter part of the 18th and first part of the 19th centuries is examined as a problematic project. Literary and non-literary texts of the period acquaint students with the dominant images through which a German national culture began to identify itself. Such governing attitudes as Aufklärung, Autonomie, Genie, Humanitàet, Bildung, Natur, Kunst, and Klassik are explored in the works of Lessing, Goethe, Herder, Kant, Schiller, Kleist, Novalis, Hölderlin, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2605 - SPEC TOPICS IN AGE OF GOETHE
Minimum Credits: 3
Maximum Credits: 3
This course treats specialized topics in German literature and culture from the 1770's to the 1830's. As topics change, students may repeat this course for credit. The precise topics and course descriptions will appear in the pertinent course schedule and course description publications. Possible topics include aesthetics, the French revolution, the discourse of Bildung, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2607 - GERMAN ROMANTICISM
Minimum Credits: 3
Maximum Credits: 3
In a short period of time, a close-knit group of authors, philosophers, and scientists developed an intellectual project that defined the romantic movement in early 19th-century Germany and determined the direction of literary and philosophical theory for both the 19th and 20th centuries in Europe. This seminar will analyze literary, philosophical, and cultural moments of German romanticism. Readings will include texts by Fichte, Schlegel, Novalis, Wackenroder, Tieck, Hofmann, and Bonaventura, as well as current approaches to these.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

GER 2608 - ROMANTICISM
Minimum Credits: 3
Maximum Credits: 3
This course examines the principal literary achievements of the Romantic era (roughly 1790-1830), attempting always to integrate them into their larger cultural environment. Thus, for example, Heine's Lorelei is compared to folk legends, Eichendorff's poetry is read not only in its own light, but also as a component of Schumann art songs, Tieck's literary fairy tales are compared with those of folklore, and Friedrich Schlegel's essays on architecture are placed into the larger context of gothic revival.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2609 - SPECIAL TOPICS IN ROMANTICISM
Minimum Credits: 3
Maximum Credits: 3
This seminar offers a non-traditional approach to German Romanticism by treating either an aspect of Romanticism in detail or the period from perspectives not common to standard classifications of it. Areas of focus might include a single theme, an author or a small group of authors, contemporary figures not directly associated with the movement, philosophical and aesthetic theory, non-literary disciplines associated with Romanticism, and social and cultural phenomena of the period.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2610 - GOETHE
Minimum Credits: 3
Maximum Credits: 3
This seminar uses a broadly thematic approach to create a portrait of Goethe that highlights the underlying continuity of his major works. The topical...
emphases include self and world, nature, history and representation. These governing aspects of Goethe's thought and their literary articulations are treated chronologically in order to grasp their evolving character. Works of all genres are read.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 2611 - GOETHE'S DRAMAS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Goethe's major and minor works for stage considered formally and thematically to situate his dramatic project within European contexts. Addresses problems of cultural history in relation to philosophical and aesthetic concerns that arose in response to German belatedness at end of 18th century. Special attention to Goethe's contribution to institution of German literature. Investigates competing paradigms of representation, emplotting, and German self understanding. Refers to Benjamin, Bakhtin, Jakobson, Derrida, Foucault, etc.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 2612 - GOETHE'S FAUST**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines parts I and II of Goethe's Faust as a unified work. Brief consideration is given to the Faust legend and the play's compositional stages, but Goethe's final authoritative text is its chief concern. The seminar format encourages close textual analysis. In connection with a selective review of important secondary literature, students are urged to form a synthetic view of the drama. The class also explores such issues as the figurative basis of human aspiring and Goethe's non-mimetic techniques of dramatic representation.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 2665 - SP TOPCS LIT & CULT 1800-1848**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course treats specialized topics in German literature and culture of the early nineteenth century. As the topics change, students may repeat this course for credit. The precise topics and course descriptions will appear in the pertinent course-schedule and course-description publications. Possible topics include epochs (Biedermeier, Junges Deutschland, etc.), Authors (Brentano, Kleist, Büchner, Heine), and theoretical issues (violence, national identity, idealism and materialism).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 2700 - LITERATURE & CULTURE 1800-1900**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Secularism, nationalism, regionalism, industrialism, socialism, and emigration combined with other forces to give German literature between about 1830 and the end of the 19th century lasting vitality and social relevance. In this course we read one major novel, one major philosophical work, a dozen novellas, a few plays, a good selection of poetry, and a representative sampling of trivial literature. Authors include Stifter, Hebbel, Keller, Meyer, Grillparzer, Droste-Huelshoff, Storm, Nietzsche, and Fontane.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 2701 - 19TH CENTURY GERMAN REALISM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will analyze literary and cultural material from German realism under the thematic and theoretical perspective of text, place, and their interrelationship. We will discuss how texts construct and mark place, how they distinguish places from each other (interior and exterior, city from country), and the function that these places have in the text. The primary readings for the course will be prose from German realism (novels and novellas) and will include works from authors such as Keller, Stifter, Storm, Raabe, and Fontane.

**Academic Career:** GRAD
GER 2702 - DOUBLE OUTCASTS
Minimum Credits: 3
Maximum Credits: 3
Through an analysis of texts by Rahel Varnhagen, Rosa Luxemburg, Elsa Lasker-Schuler, Nelly Sachs, and others, the seminar explores diverse attempts to cope with fate of being double outcasts. Topics discussed include internalized prejudices, identity crisis, as well as changing social roles. The impact of the writers' double bind upon the development of feminist movements in German speaking countries, as well as upon German Jewish intellectual history, philosophy, and literature, are treated. Readings are in both English and German.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2703 - JEWISH CONTRIBUTIONS TO GER LIT
Minimum Credits: 3
Maximum Credits: 3
Through an analysis of texts by M. Mendelssohn, H. Heine, B. Pappenheim, M. Buber, G. Scholem, W. Benjamin, N. Sachs, R. Auslander, E. Canetti, J. Becker, et al, the seminar explores diverse visions of a German Jewish symbiosis and their ultimate failure. Topics include creative misreadings of German culture and Jewish traditions, reflections on the notion of identity in its relation to language, endeavors to cope with the fate of being outcasts and with internalized prejudices. The impact of Jewish thought on German intellectual history, philosophy and literature.

**GER 2820 - KAFKA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines Kafka's major works with explicit reference to the modernist tradition. Their consummate treatment of such issues as man's relationship to authority, his increasing alienation in a mass society, guilt and punishment in a world that has lost its gods, the discursive nature of truth, the threat of totalitarianism, and the place of art in a fallen world constitute the thematic core of the course. Competing theoretical perspectives on Kafka are also examined.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 2826 - BERTOLT BRECHT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar will explore the life and career of Bertolt Brecht, the most important German dramatist of the twentieth century and, arguably, the most influential playwright of the twentieth century worldwide. We will begin with Brecht's early work, such as his plays Baal and Trommeln in der Nacht, move on to Brecht's opera die Dreigroschenoper and Aufstieg und fall der Stadt Mahagonny, examine Brecht's Lehrstücke, and ultimately explore the 'classical' plays of Brecht's exile period: der Kaukasische Kreidekreis, der Gute Mensch von Sezuan, mutter courage und Ihre Kinder, and Leben des Galilei. Since Brecht was also an accomplished poet, we will read and discuss some of his most important poems. Brecht's theoretical conceptions of theater were also influential, and so we will, in addition, discuss these concepts. Readings for the course will be primarily in German; class discussion will be in both German and English, depending on the wishes of participants. Students will be required to participate actively in seminar discussions, complete a term paper on some aspect of Bertolt Brecht's work, and present their paper in one of the final two class meetings in the second half of April.  
**Academic Career:** GRAD

GER 2880 - GERMAN VISUAL CULTURE STUDIES
Minimum Credits: 3
Maximum Credits: 3
1895 in Berlin Max and Emil Skladanowsky projected the first film. The century that followed proved to contain many revolutions in German society and visual culture in general. These rapid changes generated a significant and controversial set of debates and theoretical texts. This seminar will study German visual culture across periods, movements, and representative figures. From the Weimar republic to the present we will consider debates around topics such as realism, dada, fascism, neo-avant-gardism or intermediality. We will also engage with the theory and aesthetics of figures such as: Adorno, Arnhem, Benjamin, Bürger, Druckrey, Flusser, Huyssen, Kittler, Kracauer, Kramer, Luhmann, Lukacs, Sontag, Weibel. Knowledge of German is helpful but not necessary.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 2882 - TOPICS IN GERMAN CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course will use the German cinema to examine the relationship between films, social change, and questions of national identity and to assess the emergence of certain artistic movements, film genres, and models of authorship along these lines. Depending on the semester in which it is taught, the course will address these issues through topics like the representation of the masses, gender anxieties, film and the other arts, the historical film, film auteurs, images of the other, or war and cinema.

Minimum Credits: 3
Maximum Credits: 3
This course addresses issues, movements, genres, and/or directors in contemporary German film, from post-war to the present.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

GER 2888 - NEW GERMAN CINEMA
Minimum Credits: 3
Maximum Credits: 3
Devastated after World War II, starting in the 1960s a number of German directors like Herzog, Fassbinder, Wenders, Kluge, and Sanders-Brahms managed to bring international attention back to German cinema. They competed against the film industry of Hollywood under difficult conditions of production, and in many instances made the difficult transition out of the art house and into the mainstream movie theater. Yet these names only represent a small portion of those directors active in the new German cinema. This class will examine the aesthetic and technical contributions of new German cinema as well as the historical and social context of its production. The technological, financial, and intellectual destruction caused by the experience of national socialism and World War II required creative responses that have led to a solid and symbolically rich body of work. In examining the themes and experimental forms of various filmmakers, students will gain insight into the issues that occupied the German public sphere from the 1960's onward.

GER 3142 - CULTURAL HIST TO THE 18TH CENT
Minimum Credits: 3
Maximum Credits: 3
This course discusses major expressions of German culture from the middle ages to the 18th century. The following areas are studied in the light of selected masterworks: the idea and reality of the holy Roman empire; courtly society and culture in the high middle ages; Luther's reformation; Renaissance art in Nuremberg; academies and the idea of a national culture; Leibniz and his time.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
GER 3144 - INTELCL HIST: LESSING TO FREUD
Minimum Credits: 3
Maximum Credits: 3
This course introduces the German intellectual tradition from the 18th until the early 20th century. A primary aim involves the interpretation of texts that offer a picture of the German search for order. Students examine such issues as individualism, "Aufklarung", "tradition", "history", "community", and "alienation". Readings cover different disciplines. Texts vary, but writers might include Leibniz, Lessing, Herder, Kant, Goethe, Schiller, Schelling, Kleist, Novalis, Fichte, Feuerbach, Hegel, Marx, Buechner, Schopenhauer, Wagner, Nietzsche, Mann, Freud, and Kafka.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

GER 3146 - THE PLOTTING OF HISTORY
Minimum Credits: 3
Maximum Credits: 3
Students examine the dominance of utopian philosophies of history from the 18th and 19th centuries. Representations of the historical continuum that privilege a redemption from history are studied as philosophical and literary emplotments. By claiming to explain the past and know the future, these interpretations implicate events in universalizing schemes of revelation. Yet they cannot conceal their own critical origins in the crisis of absolutism, nor deny a fundamental relationship between fictionalizing and historicizing.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3148 - HISTORY, MEMORY, NARRATIVE
Minimum Credits: 3
Maximum Credits: 3
In recent years there has been a growing interest in historical narrative and the question of history as narrative. This course investigates this return to history, and the problems involved in such a critical move, across a number of disciplines and textual productions. This investigation is limited to the Twentieth Century, and the status of history within modernity. The materials include theoretical, literary, and filmic texts.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3160 - IMAGE IN LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This seminar explores modes of imagination and invention in historical forms of expression, such as allegory, emblem, symbol, topos, and figure of speech. We will study both the hermeneutic and historical significance of literary, pictorial and theoretical sources ranging in scope from rhetorics and medieval interpretation to modern concepts of textual and cultural criticism.

GER 3194 - MIDDLE HIGH GERMAN LANG & LIT
Minimum Credits: 3
Maximum Credits: 3
This course introduces medieval German philology and teaches students to read old literary and historical documents (from about 1100 to 1500 A.D.). Both linguists and students of literature benefit from this course, since it provides an introduction to German literature of the middle ages, as well as the middle high German language.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3200 - LYRIC POETRY
Minimum Credits: 3
Maximum Credits: 3
This course defines thematic and formal elements of the lyric tradition from the 18th through the 20th centuries. Students develop techniques for analyzing a poem that consider both its internal structure and its possible reference to earlier poems. Theoretical pronouncements by some of the poets in question, as well as some secondary literature, is read. Special emphasis is placed on modern poetry. Among the poets treated are Klopstock, Goethe, Schiller, Hoelderlin, Novalis, Moerike, Meyer, George, Hofmannsthal, Rilke, Trakl, and Celan.
GER 3201 - GERMANY UNDER SPELL OF AMERICA
Minimum Credits: 3
Maximum Credits: 3
This course explores the ambivalent relationship of Germany with the U.S. Since the beginning of the 20th century. It focuses on the huge impact of U.S. Culture in Germany after 1945 and the responses this influence has generated among German cultural elites. Analyzing literature, film, and other popular culture phenomena, it probes the ideological underpinnings of the claim that German culture is being Americanized" in order to reconceptualize intercultural exchanges."

GER 3205 - MINORITY LIT & CULTURS GERMANY
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces students to key issues in minority studies as they pertain to the German situation. It explores problems of political and aesthetic presentation such as the socio-political position of minorities, the function of the cliché both in majority constructions of minorities and in the self-articulation of these minorities, theories of diversity and interculturality, as well as questions of ethno-national identity and canon formation. Special emphasis is given to the cultural production of labor immigrants and non-white minorities in Germany today.

GER 3212 - FOLKTALES
Minimum Credits: 3
Maximum Credits: 3
This seminar investigates the intellectual and cultural climate that gave rise to the collection and publication of the Grimms' folktale collections in the early 19th century. We also examine the larger context of oral folk narrative, comparing numerous German folktales with similar stories from different countries. Students taking this course can expect to gain a new appreciation for one of the most basic forms of literary expression and also to achieve new insights into the aesthetic, personal, and social values of the culture that created and used these stories.

GER 3300 - GERMAN HUMANISM & REFORMATION
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to major authors, genres, themes, and literary developments in the context of the cultural and social history of the 15th and 16th centuries. Topics, which vary, include academies and schools; Luther; Meistersang, humanism, and town culture; Latin vs. The vernacular; Faust; reformation dialogue; and emblems.

GER 3400 - 17TH CENTURY LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to major authors, genres, themes, and literary developments in the context of cultural and social history. Topics, which vary, include libraries and presses; academy movement; courts and towns as cultural centers; pedagogic reforms and utopian literature; poetology and linguistic theory; literature and music; and emblems.

GER 3510 - 17TH CENT LANGUAGE ACADEMIES
The emergence of new high German and the development of modern German literature are closely related to the role which language academies played in the regulation of German, the establishment of literary genre models, and in the promotion of the vernacular in all areas of culture. We will study literary, linguistic, religious, and educational aspects of the Fruchtb ringende Gesellschaft and the Pegnitzschafer in the context of the early modern European academy movement. Texts include literary works, emblems, letters, grammars, dictionaries, and scientific writings.

**GER 3607 - GERMAN ROMANTICISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

In a short period of time, a close-knit group of authors, philosophers, and scientists developed an intellectual project that defined the romantic movement in early 19th-century Germany and determined the direction of literary and philosophical theory for both the 19th and 20th centuries in Europe. This seminar will analyze literary, philosophical, and cultural moments of German romanticism. Readings will include texts by Fichte, Schlegel, Novalis, Wackenroder, Tieck, Hofmann, and Bonaventura, as well as current approaches to these.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

---

**GER 3608 - ROMANTICISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

This course examines the principal literary achievements of the Romantic era (roughly 1790-1830), attempting always to integrate them into their larger cultural environment. Thus, for example, Heine's Lorelei" is compared to folk legends, Eichendorff's poetry is read not only in its own light, but also as a component of Schumann art songs, Tieck's literary fairy tales are compared with those of folklore, and Friedrich Schlegel's essays on architecture are placed into the larger context of gothic revival.”

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**GER 3609 - SPECIAL TOPICS IN ROMANTICISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

This seminar offers a non-traditional approach to German Romanticism by treating either an aspect of Romanticism in detail or the period from perspectives not common to stand and classifications of it. Areas of focus might include a single theme, an author or a small group of authors, con temporary figures not directly associated with the movement, philosophical and aesthetic theory, non-literary disciplines associated with
Romanticism, and social and cultural phenomena of the period.

**GER 3610 - GOETHE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar uses a broadly thematic approach to create a portrait of Goethe that highlights the underlying continuity of his major works. The topical emphases include self and world, nature, history and representation. These governing aspects of Goethe's thought and their literary articulations are treated chronologically in order to grasp their evolving character. Works of all genres are read.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 3611 - GOETHE'S DRAMAS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Goethe's major and minor works for stage considered formally and thematically to situate his dramatic project within European contexts. Addresses problems of cultural history in relation to philosophical and aesthetic concerns that arose in response to German belatedness at end of 18th century. Special attention to Goethe's contribution to institution of German literature. Investigates competing paradigms of representation, emplotting, and German self understanding. Refers to Benjamin, Bakhtin, Jakobson, Derrida, Foucault, etc.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**GER 3612 - GOETHE'S FAUST**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines parts I and II of Goethe's Faust as a unified work. Brief consideration is given to the Faust legend and the play's compositional stages, but Goethe's final authoritative text is its chief concern. The seminar format encourages close textual analysis. In connection with a selective review of important secondary literature, students are urged to form a synthetic view of the drama. The class also explores such issues as the figurative basis of human aspiring and Goethe's non-mimetic techniques of dramatic representation.

**GER 3700 - LITERATURE & CULTURE 1800-1900**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Secularism, nationalism, regionalism, industrialism, socialism, and emigration combined with other forces to give German literature between about 1830 and the end of the 19th century lasting vitality and social relevance. In this course we read one major novel, one major philosophical work, a dozen novellas, a few plays, a good selection of poetry, and a representative sampling of trivial literature. Authors include Stifter, Hebbel, Keller, Meyer, Grillparzer, Droste-Huelshoff, Storm, Nietzsche, and Fontane.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
GER 3701 - 19TH CENTURY GERMAN REALISM
Minimum Credits: 3
Maximum Credits: 3
This course will analyze literary and cultural material from German realism under the thematic and theoretical perspective of text, place, and their interrelationship. We will discuss how texts construct and mark place, how they distinguish places from each other (interior and exterior, city from country), and the function that these places have in the text. The primary readings for the course will be prose from German realism (novels and novellas) and will include works from authors such as Keller, Stifter, Storm, Raabe, and Fontane.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3702 - DOUBLE OUTCASTS
Minimum Credits: 3
Maximum Credits: 3
Through an analysis of texts by Rahel Varnhagen, Rosa Luxemburg, Elsa Lasker-Schuler, Nelly Sachs, and others, the seminar explores diverse attempts to cope with fate of being double outcasts. Topics discussed include internalized prejudices, identity crisis, as well as changing social roles. The impact of the writers' double bind upon the development of feminist movements in German speaking countries, as well as upon German Jewish intellectual history, philosophy, and literature, are treated. Readings are in both English and German.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3703 - JEWISH CONTRIBUTNS TO GER LIT
Minimum Credits: 3
Maximum Credits: 3
Through an analysis of texts by M. Mendelssohn, H. Heine, B. Pappenheim, M. Buber, G. Scholem, W. Benjamin, N. Sachs, R. Auslander, E. Canetti, J. Becker, et al, the seminar explores diverse visions of a German Jewish symbiosis and their ultimate failure. Topics include creative misreadings of German culture and Jewish traditions, reflections on the notion of identity in its relation to language, endeavors to cope with the fate of being outcasts and with internalized prejudices. The impact of Jewish thought on German intellectual history, philosophy and literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3808 - EUROPE AT THE TURN OF CENTURY
Minimum Credits: 3
Maximum Credits: 3
This course analyzes the tension within the Janus-like weltanschauung at the turn of the 20th century and its expression through various writers whose works are pervaded by pessimism, an aestheticized view of nature, or a search for the absolute in religious terms. Significant sources of influence--including the French symbolists, Schopenhauer, Nietzsche, Strindberg, and Oscar Wilde--are an integral part of the course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3810 - WEIMAR CULTURE
Minimum Credits: 3
Maximum Credits: 3
The Weimar Republic is a particularly interesting period for studying the complex relationships between art and society, both on the level of theory and artistic production. Focusing on Berlin as a metaphor of modernity, this course examines Weimar culture from a variety of perspectives: the new developments in drama, theater and film; the crisis of narrative, especially in the novel; the notion of the Avant Garde as an aesthetic and political vanguard, etc.

**GER 3826 - BERTOLT BRECHT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar will explore the life and career of Bertolt Brecht, the most important German dramatist of the twentieth century and, arguably, the most influential playwright of the twentieth century worldwide. We will begin with Brecht's early work, such as his plays Baal and Trommeln in der Nacht, move on to Brecht's operas die Dreigroschenoper and Aufstieg und fall der Stadt Mahagonny, examine Brecht's Lehrstücke, and ultimately explore the 'classical' plays of Brecht's exile period: der Kaukasische Kreidekreis, der Gute Mensch von Sezuan, mutter courage und Liire kinder, and Leben des Galilei. Since Brecht was also an accomplished poet, we will read and discuss some of his most important poems. Brecht's theoretical conceptions of theater were also influential, and so we will, in addition, discuss these concepts. Readings for the course will be primarily in German; class discussion will be in both German and English, depending on the wishes of participants. Students will be required to participate actively in seminar discussions, complete a term paper on some aspect of Bertolt Brecht's work, and present their paper in one of the final two class meetings in the second half of April.

Minimum Credits: 3
Maximum Credits: 3
An introduction to Weimar Cinema, its most famous films and filmmakers, and the larger theoretical and historiographical problems raised by them. Topics include: film and expressionism, the cinema debate, representation of women, film and the left, the street film, cinema and the fantastic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GER 3886 - FILM IN THE THIRD REICH
Minimum Credits: 3
Maximum Credits: 3
This course offers both a historical overview of filmmaking in the Third Reich and close readings of representative films, including propaganda films and so-called apolitical entertainment films”. Special attention will be placed on the relationship between film and propaganda, narrative and
ideology, visual pleasure and fascist aesthetics."

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**GER 3887 - CONTEMPORARY GERMAN FILM**
Minimum Credits: 3
Maximum Credits: 3
This course addresses issues, movements, genres, and/or directors in contemporary German film, from post-war to the present.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**GER 3888 - NEW GERMAN CINEMA**
Minimum Credits: 3
Maximum Credits: 3
Devastated after World War II, starting in the 1960s a number of German directors like Herzog, Fassbinder, Wenders, Kluge, and Sanders-Brahms managed to bring international attention back to German cinema. They competed against the film industry of Hollywood under difficult conditions of production, and in many instances made the difficult transition out of the art house and into the mainstream movie theater. Yet these names only represent a small portion of those directors active in the new German cinema. This class will examine the aesthetic and technical contributions of new German cinema as well as the historical and social context of its production. The technological, financial, and intellectual destruction caused by the experience of national socialism and World War II required creative responses that have led to a solid and symbolically rich body of work. In examining the themes and experimental forms of various filmmakers, students will gain insight into the issues that occupied the German public sphere from the 1960s onward.
Academic Career: GRAD

GERON 2002 - PREVENTION AND HEALTHY AGING  
Minimum Credits: 3  
Maximum Credits: 3  
Prevention and healthy aging is an online course that provides the guidance and rationale for promoting health, prevention, and effective risk factor management in the adult population (50+) in respect to rising health care costs, decreasing benefits, and the aging of our population. This course offers a general overview of various aging issues (physical, cognitive, social, cultural, and economic) that impact the individual, community, and society. This course will prepare students to integrate optimal preventive practice into their professional context and translate evidence-based strategies into community outreach services that are designed to prevent or delay the common conditions of aging and ones that emphasize the importance of healthy behaviors throughout the lifespan.  
Academic Career: GRAD

Greek

GREEK 2100 - GREEK READING: EPIC
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek epic poets. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2102 - GREEK READING: TRAGEDY
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek tragedians. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2104 - GREEK READING: COMEDY
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek comedians. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
GREEK 2106 - GREEK READING: LYRIC
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek lyric poets. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2116 - GREEK READING: HISTORIANS
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek historians. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2118 - GREEK READING: ORATORS
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek orators. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2120 - GREEK READING: PHILOSOPHERS
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek philosophers. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2130 - GREEK READING: SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected Greek texts. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2200 - GREEK SEMINAR: EPIC
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek epic poetry. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2202 - GREEK SEMINAR: TRAGEDY
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek tragedy. The course may be repeated for credit provided the specific material
GREEK 2204 - GREEK SEMINAR: COMEDY
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek comedy. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2206 - GREEK SEMINAR: LYRIC
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek lyric poetry. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2216 - GREEK SEMINAR: HISTORIANS
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek historiography. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2218 - GREEK SEMINAR: ORATORS
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek oratory. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2220 - GREEK SEMINAR: PHILOSOPHERS
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study in the area of Greek philosophy. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2230 - GREEK SEMINAR: SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
In this course students undertake close study of a particular Greek work, author, or subject. The course may be repeated for credit provided the specific material covered is different.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
GREEK 2318 - ARISTOTLE'S MATTER THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on the 'matter' side of Aristotle's matter/form ontology. His account of matter is examined in such texts as metaphysics, physics, generation and corruption and the biological works.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

GREEK 2902 - DIRECTED STUDY FOR M.A. STUDENTS
Minimum Credits: 1
Maximum Credits: 9
Directed study on classical topics for students in the M.A. Program.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

GREEK 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes study in Greek in consultation with a member of the faculty.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

GREEK 2992 - PHD READING EXAMINATION
Minimum Credits: 0
Maximum Credits: 0
Permits graduate students from other departments to demonstrate competence in the reading of ancient Greek through examination.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

GREEK 2995 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
Directed study on Greek topics for students in the graduate program.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

Health and Physical Activity

HPA 2000 - ADAPTED PHYSICAL EDUCATION
Minimum Credits: 2
Maximum Credits: 2
Develops a general knowledge base of teaching methods, JEPS, curriculum development, laws and legislation, and types of handicapping conditions of special population children serviced in adapted physical education programs and those mainstreamed into the public school.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2001 - ADAPTED PHYSICAL EDUC PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
Through clinical experiences, the physical education student will gain experience in teaching adapted physical education.
HPA 2010 - ELEMENTARY PHYSICAL EDUCATION
Minimum Credits: 2
Maximum Credits: 2
Through class discussion, lectures, and homework, the physical education student will apply motor development research to teaching motor skills to young children. Major emphasis of this class is hierarchical analysis of motor skills with application to lesson planning.

HPA 2011 - ELEM PHYSICAL EDUC PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
Through clinical experiences, the physical education student will gain experience in teaching elementary physical education.

HPA 2020 - SECONDARY PHYSICAL EDUCATION
Minimum Credits: 2
Maximum Credits: 2
Required course in the professional year sequence for prospective teachers of health and physical education. Includes studies of curriculum, instruction and evaluation methods for teaching physical education in grades 7-12. Provides opportunities to develop lessons and units that accommodate individual differences and promote mastery learning. Explores alternative curriculum designs for sport, dance, and exercise programs at the secondary school level. Students are also required to participate in micro teaching labs.

HPA 2021 - SECON PHYSICAL EDUC PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
Through clinical experiences, the physical education student will gain experience in teaching secondary physical education.

HPA 2030 - HEALTH EDUCATION METHODS
Minimum Credits: 3
Maximum Credits: 3
Required in the professional year sequence for perspective teachers of health and physical education. Covers curriculum, instruction, and evaluation methods for teaching health education in grades K-12. Students develop lesson/unit plans based on theories of attitude formation, behavior change, and knowledge acquisition. Special emphasis is placed on the use of heuristic teaching styles. Along with the course, students are required to participate in micro teaching and clinical experiences.

HPA 2031 - SCHOOL HEALTH EDUC PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
Through clinical experiences, the student will gain experience in teaching health education at the elementary and secondary levels.
HPA 2040 - HLTH WLLNSS INFNT TODDLER CHLD
Minimum Credits: 3
Maximum Credits: 3
This class provides the future pre-k' grade 4 classroom teacher with a knowledge base in motor development, health and physical education curriculum planning, and appropriate selection of health knowledge and skills and physical activities for infants, toddlers, and young children. Included are labs and field experiences in the pre-k-grade 4 classroom setting.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2080 - INTERNSHIP-ELEM H&PE
Minimum Credits: 5
Maximum Credits: 5
The student spends the term teaching elementary and health and physical education in the schools under the direction of a mentor teacher.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

HPA 2081 - INTERNSHIP-SECONDARY H&PE
Minimum Credits: 5
Maximum Credits: 5
The student spends the term teaching secondary health and physical education in the schools under the direction of a mentor teacher.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

HPA 2097 - PROFESSIONAL SEMINAR IN HPA
Minimum Credits: 3
Maximum Credits: 3
This course will provide information critical to the development of the graduate student in the department of health and physical activity. This information will include research integrity, understanding scientific literature, electronic literature searches, basic research methodology, presentation skills, and current issues in health and physical activity.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 2098 - STUDENT TEACHING
Minimum Credits: 10
Maximum Credits: 10
This student is involved in teaching in the schools. Time is divided between elementary and secondary levels and health and physical education content.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HPA 2241 - ADV FITNSS ASSMNT & EXRCS LDRS
Minimum Credits: 3
Maximum Credits: 3
The primary purpose of this course is to provide students the opportunity to learn and develop the practical skills that are essential for careers in a health fitness setting, e.g. Personal training. Although lectures will be used, an integral component of this course will be the laboratory sessions. The secondary purpose of this course is to prepare students for the practical portion of the American college of sports medicine health fitness instructor certification, the gold standard of all personal training certifications.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
HPA 2267 - PHYSIO BASIS-FITN & SPRT CONDG
Minimum Credits: 3
Maximum Credits: 3
This course is aimed at developing an understanding of the physiological adaptations to fitness or long term physical training with emphasis on metabolic, strength and conditioning principles. Through the awareness of the body's responses to chronic and acute exercise. The student will be able to organize and design a physical training or fitness program for young adults, athletes and special populations. This course provides preparation for the American college of sports medicine health fitness instructor or national strength and conditioning exams.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 2268 - PHYSICAL ACTIVITY AND HEALTH
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to expose the student to the topics related to the role of physical activity in the prevention and treatment of chronic diseases and additional health-related outcomes according to the most current literature. Students will become aware of all aspects of physical activity epidemiology, including the different methods to measure physical activity, evaluating the strengths and weaknesses of each, and understanding the analysis of physical activity data and research. In addition, this class will cover the physiology and mechanisms through which physical activity and exercise may affect the primary and secondary prevention and/or treatment of various health conditions, and will examine the risks and benefits associated with physical activity participation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2269 - OBESITY PREVENTION & TREATMENT
Minimum Credits: 3
Maximum Credits: 3
This course will provide students opportunities to understand issues related to obesity. Topics may include prevalence rates, dietary considerations, exercise considerations and special population considerations. Behavioral strategies to enhance obesity treatment outcomes will also be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 2270 - PEDIATRIC EXERCISE PHYSIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide an overview of the unique physiological responses to physical activity and exercise in children. In addition this course will examine the role an active lifestyle plays in the overall health and well-being of children.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2320 - PSYCHOSOCIAL ASPECTS OF HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course will increase students' understanding of the diverse personal, socio-cultural, and institutional factors that influence health, physical activity, and nutrition-related behaviors, and ultimately intervention design and approach. The course will cover the social determinants of health and health disparities, theoretical models of health behavior change, and intervention/behavior change strategies and tools. Students coming away from this course will have a better understanding of how to apply health behavior change models to promote physical activity and healthy eating in diverse populations through tailored interventions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2321 - LIFESTYLE AND HEALTH
Minimum Credits: 3
Maximum Credits: 3
The focus of this course is the identification of behavioral and environmental factors that influence health and the effective management of lifestyle changes to promote and maintain optimal health. Five factors are studied in depth: nutrition, physical activity, weight control, stress, chemical abuse including alcohol and smoking. A variety of projects provide a broader perspective for these topics as well as an opportunity for in-depth specialization by the student.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2322 - EVIDNC BASED HEALTH PROGM PLN
Minimum Credits: 3
Maximum Credits: 3
Team based course designing health promotion programs at local large, medium and small organizations. The course presents students an opportunity to design a real health promotion program that has the potential to impact their career trajectory. Students are encouraged to seize the opportunity with enthusiasm. To maximize the opportunity students need to be flexible and demonstrate initiative to travel to the organizational site to meet according to staff schedules. The course is linked with the HPA 2990 course offered in the Spring.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2323 - HEALTH COUNSELING
Minimum Credits: 3
Maximum Credits: 3
Designed to provide students with a basic understanding of health counseling and development of helping relationships. Historical origins, basic assumptions, key concepts, and strategies are covered. Students will learn a problem-management and opportunity-development approach to helping individuals address health concerns and change health behaviors.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2371 - ADVANCED EXERCISE PHYSIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Theory experiences relating to the mechanisms by which the body adapts physiologically to selected conditions of muscular performance within the context of (1) physical education and sport, (2) work environments and (3) disease prevention and rehabilitation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2373 - INTRO TO EXERCISE ASSMNT PRGMG
Minimum Credits: 3
Maximum Credits: 3
This course examines exercise therapy for the cardiac patient and individuals with chd risk factors. Topics include functional capacity assessment (central and peripheral adaptations, graded exercise testing, electrocardiography), exercise prescription (dosage, format, energy cost, case studies), exercise supervision (phase 1, 2 and 3, practical leadership experiences, emergency procedures, nutritional counseling, psychological considerations) and factors that influence the exercise responses are presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2374 - EXRCS-TEST PRESCRPR SUPRVSN
Minimum Credits: 3
Maximum Credits: 3
An introductory lecture, laboratory course in cardiac rehabilitation. Topics presented include: the pathophysiology and epidemiology of coronary artery disease, coronary anatomy, basic and advanced electrocardiography, principles of graded exercise testing, exercise prescription and supervision, nuclear diagnostic techniques, current considerations in pharmacological treatment of coronary artery disease and cardiac rehabilitation in a clinical setting.
HPA 2375 - RES & EXPERMNTL DESIGN EP
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the development of experimental design and methodologies in exercise physiology research. The designs are explored within the context of ergogenic aids, training strategies, selected disease states, temperature regulation, and isokinetic strength and energy metabolism.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 2378 - GRADED EXERCISE TESTING
Minimum Credits: 1
Maximum Credits: 1
His course is intended to provide practical experiences that will aid the advanced graduate student in: 1) developing technical laboratory skills associated with the administration of graded exercise tests and 2) evaluating and interpreting clinical data and exercise test results for the formulation of an exercise prescription.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2379 - EXERCISE LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
Presents masters level theory and practice of supervising exercise for the high coronary risk adult and the coronary patient. Emphasis is given to the interpretation and implementation of an individual exercise prescription.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2390 - NUTRITION IN SPORT & EXERCISE
Minimum Credits: 3
Maximum Credits: 3
A lecture and laboratory class in which the principles of nutrition are applied to sports performance and exercise. Topics presented include energy release and substrate utilization, energy metabolism during exercise, fluid intake and athletic performance, body composition, ergogenic aids, vitamins and minerals, the pre-game meal, sports anemia, nutritional considerations for the diabetic individual, lipid metabolism and coronary heart disease.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2395 - EXERCISE AND AGING
Minimum Credits: 3
Maximum Credits: 3
The main focus of the course includes the demographics of aging; the biological, social, and psychological aspects of aging; the physiology of aging; disease/disuse; functional assessment; physiological assessment; exercise prescription; and exercise training and programming for the geriatric patient.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2401 - SPORT PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course examines psychological factors influencing the experience of sport, play, games, and movement. Topics covered include theoretical basis of play, competition, motivation, group dynamics, leadership personality and social facilitation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2402 - MOTOR LEARNING
Minimum Credits: 3
Maximum Credits: 3
Theoretical and research methodologies covering the learning and performance of motor skills are emphasized in this course. Through individual research projects and class labs the student will synthesize theoretical and empirical research and make application to teaching and coaching motor skills.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2403 - PSYCHOMOTOR DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This class covers factors that influence children's motor skill performance. In addition to developing a research project on some aspect of motor skill development, topics include: factors that influence motor performance, growth and maturation, physiological development, fundamental motor pattern development, and information processing in motor skill acquisition.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2410 - STATISTICS IN HPA RESEARCH
Minimum Credits: 3
Maximum Credits: 3
A general knowledge of computer hardware/software and its use in physical education research is the major focus of this class. Software packages are examined for word processing and statistical analysis. An introduction to basic programming is given.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS)

HPA 2414 - MODELS OF TEACHING
Minimum Credits: 3
Maximum Credits: 3
Basic graduate course on alternative models of teaching different subjects, grade levels, and learner populations; includes opportunities to observe, analyze, and practice selected models in classroom settings.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2420 - CHILD IN SPORT
Minimum Credits: 3
Maximum Credits: 3
An in-depth and critical look at youth sports in America and its effect on the developing child. The interdisciplinary focus draws from the social, behavioral and biological sciences to provide information for evaluation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2430 - PSYCHOMOTOR TESTING

1944
The course is divided into two sections. The first part covers theoretical concepts of measurement and evaluation. The second phase of the course reviews all currently published standardized tests that deal with the psychomotor, affective, cognitive, and fitness domains.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2431 - MOVEMENT EDUCATION
Minimum Credits: 3
Maximum Credits: 3
A theoretical rationale for movement education is implemented by observation and teaching of developmentally appropriate physical education to young children. Current movement education curriculums are reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2440 - MECHANSMS OF NEUROMOTOR CONTRL
Minimum Credits: 3
Maximum Credits: 3
This course provides the student background knowledge of the research and current theory on motor control. Topics include the concept of motor control, peripheral, central and combined control of skilled actions and box models, and theories of control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2461 - SPORT SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course examines the role of play, games and sport in society and explores how sport as an institution interacts with other institutions such as business, politics, education, family and media.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2470 - THERAPEUTIC AND SPORT MASSAGE
Minimum Credits: 3
Maximum Credits: 3
Course content includes the physiological and psychological effects of massage, anatomy and physiology, pathology of disease as it related to the use of massage as a therapeutic tool, contraindications, exercise, joint mobilization, and trigger point therapy. Students learn massage techniques of effleurage, petrissage, friction, vibration, tapotement and compression.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 2913 - EXERCISE AND SPORT SCIENCE 1
Minimum Credits: 3
Maximum Credits: 3
This course integrates the areas of developmental movement and sport studies and exercise physiology. Research from both areas are integrated to look at the total person”. Application of research is applied to the profession of physical education both in the public schools and at the university level.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 2990 - RESEARCH SEMINAR IN HPA
Minimum Credits: 3
Maximum Credits: 3
This course is required of all non-thesis master's degree candidates and includes the development and presentation of an original research paper. The student works in cooperation with a graduate advisor in their area of content specialization. The nature of acceptable projects includes the following: data based research; expanded literature review; development of software and/or hardware, development of instructional materials (i.e., Video tapes, slide series, films, etc.). Journal article.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

HPA 2993 - FIELD PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
The student teaches in the elementary schools and the special kinder kinetics program.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HPA 2995 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within either developmental movement and sport studies or exercise physiology.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

HPA 2996 - CLINICAL INTERNSHIP
Minimum Credits: 3
Maximum Credits: 3
Supervised clinical experience for the master's degree student. The student is placed in a clinical setting appropriate to his/her degree interests and career goals and must complete a minimum of 25 hours of clinical work per credit hour. Supervision is provided by the cooperating clinical supervisor and the university clinical advisor.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad Letter Grade

HPA 2997 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
The student registers for this when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

HPA 2998 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

HPA 2999 - MASTER'S THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 9
He student prepares a proposal for an original research project, has that project approved by an appropriate faculty thesis committee, completes proposed project, and defends the completed report in a thesis final oral examination.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

HPA 3113 - EXERCISE AND SPORT SCIENCE 2
Minimum Credits: 3
Maximum Credits: 3
A doctoral seminar that examines in depth the theoretical issues in exercise and sport performance. An interdisciplinary approach is used to identify similarities and differences in research topics within the program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3371 - SELCTD TOPC EXRCS PHYSLGY
Minimum Credits: 3
Maximum Credits: 3
Seminar in exercise physiology research including: cardiac exercise rehabilitation, aerobic and anaerobic performance limitations, exertional perception, ergogenic aids, exercise conditioning, exercise and selected clinical states and current trends in experimental design.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3374 - ADVANCED LAB TECHNIQUES
Minimum Credits: 3
Maximum Credits: 3
This course provides a framework that aids the advanced graduate student in acquiring knowledge and technical laboratory skills pertinent to exercise physiology research. Content includes: cardiac output, maximal oxygen uptake, isokinetic exercise testing, hydrostatic weighing, techniques for assessing core and skin temperature and plasma volume changes, combined arm and leg exercise and water immersion exercise.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (HPRED-MS)

HPA 3375 - PERCEIVED EXERTION
Minimum Credits: 3
Maximum Credits: 3
This course uses a seminar format and is intended for advanced doctoral students with an academic specialization in exercise physiology. The seminar examines both the theoretical and applied knowledge base underlying the perception of physical exertion. Specific attention is given to: (1) physiological factors that mediate the intensity of exertional perceptions and (2) the application of perceived exertion in sport and clinical settings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3377 - CHRONIC DISEASE CASE STUDIES
Minimum Credits: 3
Maximum Credits: 3
His course integrates selected elements of the knowledge base in the areas of exercise science, graded exercise testing electrocardiography, pharmacology and exercise prescription in order to develop an effective and realistic therapeutic plan for individuals who have coronary disease or are at risk for its development. The principal learning experiences for the course will center on the development, interpretation and presentation of cardiovascular case studies for intervention.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity (MS or PhD)

HPA 3378 - SKELETAL MUSCL BIOCHM-EXRCS
Minimum Credits: 3
Maximum Credits: 3
Advanced graduate seminar designed to examine the biochemical properties and mechanisms in exercising skeletal muscle. Specific topic areas
include control of gene expression and protein synthesis, contraction and its energetics, exercise induced fatigue, adaptation to training and the influence of human environmental factors on the adaptive process.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3379 - EXERCISE LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
Presents doctoral level practice of supervision of exercise for the high coronary risk adult and the coronary patient. Emphasis is given to the interpretation and implementation of an individualized exercise prescription.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3400 - ADV RES METH-MOVEMENT SCI
Minimum Credits: 1
Maximum Credits: 3
Provides the Ph.D. student with a team oriented process to develop, implement, present and publish experimental research in exercise physiology and health-fitness.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3402 - SEMINAR IN MOTOR LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course is designed for students to develop a knowledge base of human information processing in relation to motor skills.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3403 - SEMINAR IN MOTOR DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course is a doctoral level seminar that addresses theoretical issues in research on memory development and children's motor performance.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3404 - COLLEGE TEACHING PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
This course provides the Ph.D. student the opportunity to teach an undergraduate specialization course in this area of expertise while exploring appropriate teaching methodology and theory.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

HPA 3405 - GRANT WRITING IN HPA
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide guidance to doctoral level students on the process of developing a grant proposal for extramural funding. This course will be modeled from the NIH submission and review process.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
HPA 3406 - PROFESSIONAL WRITING IN HPA
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to expose the student to the process of developing professional abstracts and manuscripts that can be submitted for peer-review related to health and physical activity. This course will focus on developing empirically-based abstracts, manuscripts, the submission process, the peer-review process, and considerations for resubmission. The culminating experiences will include the submission of an abstract and manuscript for professional presentation and publication.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPA 3440 - SEMINAR IN MOTOR CONTROL
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide the student background knowledge of the research and current theory in the control and neurophysiological components of movement. Topics include peripheral, central and combined control of skilled actions; postural mechanisms important in voluntary movement; and motor impairments and their relationship to control of skilled movement.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3461 - PLAY AND SPORT
Minimum Credits: 3
Maximum Credits: 3
This course is designed as an interdisciplinary experience in the exploration of play and sport. Play is approached from a variety of disciplines; psychology, motor development, anthropology, cultural studies, sociology and philosophy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPA 3995 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within either developmental movement and sport studies or exercise physiology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Physical Activity

HPA 3996 - CLINICAL INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
Supervised clinical experience for Ph.D. Degree student. The student is placed in a clinical setting appropriate to his/her degree interests and career goals and must complete a minimum of 25 hours of clinical work per credit hour. Supervision is provided by both a co-operating clinical supervisor and the university clinical advisor.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

HPA 3997 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
The student registers for this when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
HPA 3998 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

HPA 3999 - DOCTORAL DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Health and Rehabilitation Scs

HRS 1020 - ANATOMY AND PHYSIOLOGY
Minimum Credits: 4
Maximum Credits: 4
Introduces the structure of human cells, tissues, organs and organ systems, and functions associated with them. Range of topics extends from gross anatomical features to considerations of chemical processes that serve as the basis for cellular controls, gene expression and energy metabolism. Emphasis on relationship of structure to function and on understanding how structural or functional disturbances can become the basis for disease processes.
Academic Career: UGRD
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2001 - HLTH POLC & MGT IN PUBLC HLTH
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2004 - PATHPHYLGY ACROSS LIFE SPAN
Minimum Credits: 4
Maximum Credits: 4
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2008 - ENTRPRNR SKILLS FOR NUTRN PROF
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: (Coordinated Mster in Dietetics); or SUBPLAN: (Clinical Dietetics & Nutrition) or (Wellness and Human Performance)

HRS 2017 - INJURY EPIDEMIOLOGY
This introductory course in injury epidemiology will address injury epidemiology, and concepts in basic epidemiology and biostatistics related to injury surveillance, prevention and control. The epidemiological perspective of injuries will address the concepts in the Haddon's matrix and classic epidemiologic triad; current injury epidemiology research needs and injury as a public health issue. Topics addressed will include epidemiology of injuries in developed and developing countries, and injuries in vulnerable populations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HRS 2022 - HUMAN ANATOMY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Musculoskeletal and peripheral nervous systems are studied in-depth and attention is also given to the cardiopulmonary system. Learning is facilitated through directed laboratory prospected cadavers, skeletal materials and models.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Occupational Therapy (MOT)

**HRS 2072 - HLTH REFRM US: PAST PRES FUTR**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The purpose of this course is survey the history of health reform in the U.S. And analyze the new 2010 patient protection and affordable care act and its potential impact on the health care system. The course will examine the development of the 2010 federal reforms and how the new law intends to address healthcare delivery, cost containment and access to care. The course will help students and practitioners understand the current regulatory environment and prepare them to analyze future health reform. Teaching methods include lectures, including guest lectures by principals involved in past and current reforms, case studies and interdisciplinary classroom discussion.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HRS 2079 - CHLDREN W/DISABILITIES: CLIN 1**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only

**HRS 2084 - SPEC TOPICS IN OSTEOARTHRITIS**  
**Minimum Credits:** 1  
**Maximum Credits:** 2  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**HRS 2089 - CHLDREN W/DISABILITIES: CLIN 2**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.  
**Academic Career:** GRAD

Grade Component: Grad LG/SU3 Basis

HRS 2090 - LDRS SEM MATRNL & CHILD HLTH 2
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

HRS 2200 - RESEARCH CLINICAL LAB SCIENCES
Minimum Credits: 2
Maximum Credits: 2
In depth analysis of selected manuscripts from the literature of clinical laboratory sciences for the purpose of evaluation and discussion of research, design, methodology and data analysis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2205 - ADVANCES CLINICAL LAB SCIENCES
Minimum Credits: 1
Maximum Credits: 1
Current development and application of clinical tests and instrumentation in the areas of clinical chemistry, hematology, immunology, microbiology or blood banking will be covered. Emphasis will be placed on practical experience, competency, and problem solving.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2207 - SEMINAR IN CLINICAL LAB SCIS
Minimum Credits: 1
Maximum Credits: 1
Seminars of topics of current interest in clinical laboratory sciences will be presented by invited guest speakers. Student presentation of a selected topic will be required.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2210 - TOPICS IN IMMUNOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course will provide students with an update on recent advances in immunology, especially the areas of immunoregulation, cell identification, and transplantation. The course will include recent advances in immunologic methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2220 - TOPICS IN HEMATOLOGY
Minimum Credits: 3
Maximum Credits: 3
Topics of interest and recent developments in hematology including Ferro kinetics, hematopathology (including leukemia and erythrocyte disorders), hemostasis, and instrumentation will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2265 - CLINICAL LAB MGT & SUPERVISION
Minimum Credits: 3
Maximum Credits: 3
This course is designed for medical technologists who will be supervisors or administrators in clinical laboratories. Topics covered include: laboratory planning, design, and safety; quality control programming; laboratory work load and work flow; personnel management and budget; laboratory test cost analysis; specimen transport and storage; evaluation of laboratory equipment and instruments; laboratory automation and computerization; and accreditation of clinical laboratories.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2270 - LABORATORY INSTRUMENTATION
Minimum Credits: 3
Maximum Credits: 3
This course will provide the students with a fundamental understanding of laboratory instruments by demonstrating how each instrument can be divided into functional subunits, and how that understanding can be used in troubleshooting. Fundamental aspects of electronics, sensors, and mechanics used in instrumentation will be included. No prior knowledge of electronics is required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2280 - CLINICAL LABORATORY COMPUTERS
Minimum Credits: 3
Maximum Credits: 3
This course will give the students an understanding of the role of computers in the production and management of information generated in the laboratory. It will cover the computers within instrumentation, the use of the personal computers in the laboratory, and complete laboratory information systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2300 - PT RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Reading, discussion, and critique of research articles related to the physical therapy profession.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2301 - SELECTED TOPICS IN ANATOMY
Minimum Credits: 1
Maximum Credits: 3
Provides opportunity for in-depth study of the anatomy of specific regions or segments of the human body through selected readings and instructor-guided, student-directed laboratory investigations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

HRS 2302 - ADV MUSCULOSKELETAL SCIENCES
Minimum Credits: 3
Maximum Credits: 3
In depth study of the development, organization, and function of the musculoskeletal system in health and disease. This information is correlated with principles of examination and treatment of patients with musculoskeletal dysfunctional problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2303 - ADV PATHOKIN & BIOMECHANICS**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
In depth study of the structure, biomechanics, and function of the musculoskeletal system and associated soft tissues as a basis for normal movement. The understanding of normal provides the basis for the recognition of abnormal movement dysfunction problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2304 - BIOMECHANICS OF GAIT**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This study of human gait from a biomechanical perspective with an emphasis on force and motion analysis of individual body segments and the total body. The course focuses on methods of quantitative data collection and analysis including computerized techniques with clinical and research applications.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2305 - ADVANCED NEUROSCIENCE**
- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
This course will provide the student with an in-depth study of neuroanatomical structures and functions. Brain anatomy, function, and interrelationships especially as they relate to movement dysfunction will be reviewed. The clinician will have an opportunity to revisit" how anatomy and movement are interrelated."  

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2306 - MOTR LRNG CTRL MOVM/HLTH PROMO**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Principles of motor learning and motor control will be discussed as they relate to persons with disability. Models of disability will be shared with ideas of how to incorporate some of the principles of motor learning/control into interventions. Health promotion and fitness for persons with neuromuscular disorders will be emphasized.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2307 - FALLS BALNC DYSFU: MGT INTRV**
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will provide students with the knowledge and skills to provide advanced assessment and management of persons with balance and vestibular disorders, including those at risk for falls. Students will discuss and practice using assessment tools. Lecture, laboratory practice, case studies, and discussion will be included. This course is offered on 4-5 weekends throughout the semester.

**Academic Career:** GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2308 - CLINICAL PRACTICE SEMINAR
Minimum Credits: 2
Maximum Credits: 2
This course will cover basic concepts of physical examination of the patient with neuromusculoskeletal dysfunction. Fundamental examination skills and knowledge will be covered, including issues related to screening, review of systems, history, physical examination and clinical decision making. An introduction to radiology and diagnostic imaging will be provided. Concepts related to pain and the inflammatory process, boney healing and remodeling, and how these concepts impact clinical practice will also be covered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2309 - ANAL NEURO SIGN/SYMP CLIN DEC
Minimum Credits: 3
Maximum Credits: 3
This course will focus on the analysis of the process and knowledge necessary for identifying the neuromuscular tissue or system representing the origin of disorders in patients. Signs and symptoms from history and physical examination will be the focus with appropriate ancillary testing necessary to confirm hypotheses regarding neuromusculoskeletal pathology. The intent is for clinicians to be able to differentiate clusters of signs and symptoms and to make appropriate clinical decisions regarding same.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2310 - ADV MUSCULSK DISSECTION ANAT
Minimum Credits: 2
Maximum Credits: 2
This course will provide students with an opportunity to study and dissect specified anatomical regions of the human musculoskeletal system and present their dissection to the class with particular emphasis given to clinical applications of that anatomy. Students will be given guidelines and basic instruction in the dissection process and will then work independently throughout the semester to complete their dissections. Through this experience students will gain a mastery of select regions of musculoskeletal anatomy and a greater understanding of the clinical applications of that anatomy.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

HRS 2311 - ADVANCED TOPICS IN NEUROANATOMY
Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with an in-depth study of neuroanatomical structures and functions. Brain anatomy, function, and interrelationships especially as they relate to movement dysfunction will be reviewed. The clinician will have an opportunity to revisit how anatomy and movement are interrelated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2312 - SEMINAR IN NEUROLOGIC PT
Minimum Credits: 2
Maximum Credits: 2
A series of papers will be presented with interactive discussion related to novel interventions. Students will be responsible for reviewing the paper and presenting the case to the class. Each student will "teach' the class once and lead the discussion. Topic areas will be assigned by the instructor.
HRS 2313 - PT SPECIAL TOPICS
Minimum Credits: 2
Maximum Credits: 2
This course is designed to foster discussion of current physical therapy clinical issues, such as prospective payment for medical rehabilitation, healthcare trends, reimbursement regulations, legislative policies, practice environments, strategies for maintaining continued competence, and emerging professional issues.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2314 - FUNDAMENTALS OF NEUROSCIENCEn
Minimum Credits: 4
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2356 - CONCP/PRIN SENSORY MOTR CTRL 1
Minimum Credits: 3
Maximum Credits: 3
Topical areas of the neurological sciences will be presented including introductory neuropathology, neuro-diagnostic techniques, and clinical manifestations of certain diseases of the nervous system. Topics will include: reflexes; the pain experience and pain management; somatosensory changes in peripheral and central nervous system diseases; motor dysfunction associated with peripheral and central nervous system diseases; articular neurology; sensorimotor learning principles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 2305 (MIN GRADE 'C'); SBPLAN: Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2357 - THEORIES MOVEMNT CONTRL:PART 1
Minimum Credits: 2
Maximum Credits: 2
Control of movement involves postures & movements controlled by central & peripheral centers also, activities of the mind & body responsible for orchestrating posture & movement. Disorders of the neuromuscular system change the mind & body; alterations of neural connections, altered capabilities, postures & movements produced as the brain compensates can result in undesired movement control & dysfunction. Will review theories & principles of movementcontrol & dis cuss rationale for existing & developing methods of assessment & intervention for disorders of the neuro system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2358 - THEORIES MOVEMNT CONTRL:PART 2
Minimum Credits: 2
Maximum Credits: 2
Continuation of HRS 2357. Will continue to focus upon the integration and application of the principles and theories associated with neuromuscular control to the clinical management of individuals with neuromuscular dysfunction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2359 - FACTRS EXTRINSIC NERVOS SYSTEM
Minimum Credits: 3  
Maximum Credits: 3  
The course will be an overview of how various systems impact performance in patients, cardiovascular dysfunction, pharmacology, joint mobilization, special seating for patients with disabilities, and various psychiatric/psychological disorders will be reviewed especially emphasizing the difference between impairments and disability. The course will have both a lecture and lab format. 
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2361 - EBP: CLINCL CONSD LS SPINE
Minimum Credits: 3  
Maximum Credits: 3  
Course content will include evaluation and treatment of the musculoskeletal conditions involving the lumbopelvic complex including the hip joint utilizing advanced orthopedic physical therapy skills. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will include lecture, laboratory, and clinical experiences. 
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2362 - EPB: CLINICAL CONSD LE  
Minimum Credits: 3  
Maximum Credits: 3  
Course content will include evaluation and treatment of musculoskeletal conditions involving the foot, ankle, and knee. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will include lecture, laboratory, and clinical experiences. 
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2364 - MEDL/ PT INTRV PRSN NEUMUSC DS  
Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on an evidence based comparison of newer vs. Older 'techniques' used in the field of neurologic rehabilitation. Students will be asked to explore the evidence basis that supports or refutes use of these various approaches and techniques currently in use. Newer approaches to neurological rehabilitation will also be discussed-these include: constraint induced movement therapy, virtual reality, robotics, and deweighting. Lab and clinic visits will be incorporated into this course so that students will be able to see some of the techniques 'in action'. 
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2365 - CASE STDYS PRSN W/NEUMUSC DISRD  
Minimum Credits: 3  
Maximum Credits: 3  
A series of cases will be presented with interactive discussion related to interventions that have been shown to demonstrate evidence and efficacy to address the person's functional limitations and impairments. Students will be responsible for preparing for the case prior to each session and will bring 'evidence' to support ideas for intervention. Innovative physical therapy and medical interventions will be discussed. Lecture and interactive discussion are the teaching methods of choice. Advanced clinicians will participate in the course to bring 'real life' cases to the course. 
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2368 - MUSCULO PT CLINIC DECISION MAKING
Minimum Credits: 1
Maximum Credits: 1
Many variables including personal, social, environmental, specific pathology, age and general health affect the patient with musculoskeletal pathology. The musculoskeletal physical therapist must work with the whole patient and a multi-disciplinary health care team in planning physical therapy interventions. This course provides an opportunity for clinical decision making on a case by case basis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2369 - READINGS/SEMINAR
Minimum Credits: 2
Maximum Credits: 2
The student will be assigned to choose a topic(s) from current literature related to practice. Each student will assign readings to their classmates from their search of the literature and come prepared to lead the discussion. There will be several topics of interest assigned and discussed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2371 - GERIATRIC PHYSICAL THERAPY 1
Minimum Credits: 3
Maximum Credits: 3
The content of the course will provide a working knowledge of age-related changes in bodily system function and some insights to distinguish between aging and lifestyle influences on performance of older adults. Evaluation tools and observational skills appropriate for recognizing adequate and inadequate function of selected body systems will be covered. The content is designed to assist students in adapting physical therapy interventions to meet the special needs of the well and not-so-well elderly.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2372 - ADV CLN PRA: THE LOWER QUARTER
Minimum Credits: 3
Maximum Credits: 3
This course will integrate advanced clinical applications of therapeutic technique and rationale for the assessment and treatment of the neuromuscular system. This course will synthesize clinical application of mobilization and manipulation techniques for the lumbopelvic spine and the lower extremities, the assessment and treatment of muscular and soft tissue imbalances, and the application of medical exercise training.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2373 - ADV MUSCULOSKELETAL CLINICAL PRACTICE
Minimum Credits: 3
Maximum Credits: 3
This course will integrate advanced clinical applications of therapeutic technique and rationale for the assessment and treatment of the neuromuscular system. This course will synthesize clinical application of mobilization and manipulation techniques for the cervicothoracic spine and the upper extremities, the assessment and treatment of muscular and soft tissue imbalances, and the application of medical exercise training.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)
HRS 2374 - CLINICAL ROUNDS/CASE PRESENTN
Minimum Credits: 1
Maximum Credits: 1
Weekly rounds will be presented by various speakers/clinicians/researchers in both the fall and spring terms. These presentations will consist of case presentations, relevant clinical and/or research updates pertaining to the clinical practice of physical therapy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2375 - CASE PRESENTATIONS
Minimum Credits: 2
Maximum Credits: 2
This course will require that the student systematically collect clinical information related to outcome and treatment in a series of patients with a common disorder and present the information in written format (case report) and oral format (clinical rounds). Requires that the student be a physical therapist unless other arrangements are made with the course coordinator. Requires that the student participate in several presentations throughout the term.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2378 - GERIAT PT CLINIC DECISION MAKING
Minimum Credits: 1
Maximum Credits: 1
Many variables including personal, social, environmental, specific pathology and general health affect the geriatric patient with movement dysfunction problems. The geriatric physical therapist must work with the whole patient and a multidisciplinary health care team in planning physical therapy interventions. This course provides an opportunity for clinical decision making on a case by case basis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2379 - GERIATRIC PHYSICAL THERAPY SEM
Minimum Credits: 1
Maximum Credits: 1
Designed to explore the literature, role responsibilities and research opportunities in geriatric physical therapy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2380 - CLIN CONSID CERVCL/THORC SPINE
Minimum Credits: 3
Maximum Credits: 3
This course will include evaluation and treatment of musculoskeletal conditions involving the cervical spine, the temporo mandibular joint, the thoracic spine and rib cage. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills into the plan of care for the patient. Classes will consist of lecture, laboratory, and clinical experiences.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2381 - EBP: CLIN CONSIDERATIONS UE
Minimum Credits: 3
Maximum Credits: 3
This course will include evaluation and treatment of the musculoskeletal conditions involving the shoulder, elbow, wrist and hand. Emphasis will be placed upon enhancing clinical decision making and integrating manual therapy skills within the overall plan of care for the patient. Classes will include lecture, laboratory, and clinical experiences.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2388 - SPORTS PT CLINC DECISN MAKING**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Many variables including personal, social, environmental, specific pathology, age and general health affect the patient with a sports injury. The sports physical therapist must work with the whole patient and a multidisciplinary health care team in planning physical therapy interventions. This course provides an opportunity for clinical decision making on a case by case basis.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2389 - SPORTS PT SEMINAR**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Seminar course related to sports physical therapy topics. Students will read and present research and/or review articles related to specific sport topics. Scholarly paper rough drafts will be required. Discussions and presentations will be included.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2391 - PT CLINICAL ROTATION 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This clinical opportunity will provide students the ability to observe and participate in assessment and management of various musculoskeletal disorders. Students will have an opportunity to work with an experienced clinician to learn more about advanced skills in the treatment of neuromuscular dysfunction in the out-patient setting.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PREQ: HRS 2305 (MIN GRADE 'C'); SBPLAN: Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

**HRS 2392 - PT CLINICAL ROTATION 3**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**HRS 2400 - (HSM & HIS) RESEARCH SEMINAR**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
An opportunity for students to meet with faculty and clinical experts to begin to investigate and formulate potential research topics. Students will be exposed to possible research ideas, discuss the technical requirements as well as identify the proper format for presenting research projects in writing and verbally. Review of SHRS graduate program requirements for a high quality research project will be undertaken.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.
HRS 2405 - ORGZTN STDS HLTH/REHAB PROFSSN
Minimum Credits: 3
Maximum Credits: 3
Application of concepts, models and research findings associated with organization theory of various environments in health professionals practice and serve as supervisor/manager. Traditional foci of organization theory, structure and design. Coordination and control process, authority relationship, area of organization behavior, communication and motivation theory, leadership, etc.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2407 - HUMAN COMMUNICATIONS
Minimum Credits: 3
Maximum Credits: 3
Focuses on the development of increased self-awareness, communication skills, enhanced leadership skills, and understanding of group process for both personal and professional needs. Because of the laboratory and experiential nature of the course, each participant will have a chance to be a learner as well as a resource to others. Due to the nature of the course a great deal of work will be done independently and with the instructor individually.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2415 - TEACHING-LEARNING PROCESS
Minimum Credits: 3
Maximum Credits: 3
Examination of the teaching-learning process, with emphasis on the development of instructional objectives. Teaching strategies, techniques of measuring learning, and methods for evaluating teaching. Major examples for course content are drawn from the teaching and learning of students in the health and rehabilitation sciences and their clients.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2416 - INTRO HEALTH INF & HEALTH CARE
Minimum Credits: 3
Maximum Credits: 3
An introduction to Health Information Management and the historical development of the health care field with emphasis on the organizational structure of health institutions, as well as federal, state, and local agencies and allied health associations. Student will be introduced to Health Information Management operations and key functions, with an overview of the American Health Information Management Association (AHIMA). Emphasis will be placed on the use of technology in health care, Electronic Health Record, and data quality. An in-depth look at privacy, confidentiality and security will occur. The laboratory experience provides students with hands-on opportunities to apply the theory and concepts of health information. The content, format, purpose, confidentiality, adherence to regulations/standards and technology applications for health information will be emphasized. Laboratory activities, group discussions, and case studies will supplement basic instructions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health and Rehabilitation Scs or SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS)

HRS 2418 - CLIN EDUC OF HLTH CRE STUDENTS
Minimum Credits: 3
Maximum Credits: 3
Examination of the role of clinical and field experiences in the education of health care students. Exploration of ways for the clinical health care practitioners to improve their skills in administering clinical education programs and supervising students in clinical and field experiences.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2420 - INTRO HEALTH INFORMATN SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Introduction to the basic concepts of the analysis, design, implementation, and evaluation of health information systems. The student will be provided opportunity to develop skills and ability in defining information needs, interpreting the capabilities of health information systems, setting forth the feasible alternatives, and guiding the appropriate diffusion of information science technology into the health care system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2421 - SECURITY PRIVACY LEGAL ISSUES
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2422 - COMPUTER PRGMR HLTH INFMRMTCS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce advanced computer programming technologies. The course will provide students with skills of solving real health informatics problems using computer programs. This course is not designed as first computer programming class. The instructor assumes that students have taken and are familiar with one or a few programming languages (such as BASIC, C/C++, JAVA, C#, PERL, PYTHON, RUBY) prior to taking this class. One or multiple programming languages may be used in this class to solve health informatics problems. This course is hands-on and project-oriented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2423 - CLOUD CMPTNG, HL7 & ANLYTCS HC
Minimum Credits: 3
Maximum Credits: 3
Information technology (IT) is in an era of change from local servers, rigid data structures, and centralized computing to a remote distributed cloud computing architecture. Health care IT likewise is following this pattern. To optimize health care strategies, the use of information technology is playing an ever increasing role. Modern medicine is driven by use of information and IT capabilities. This course will discuss HL7 and other common protocols for data exchange. Data analytics will also be covered with some data mining and OLAP (Online Analytic Processing) and data visualization. Understanding of the underlying principles of networks, data storage, data protection, big data, and the capabilities of modern computer architecture and software will be covered. This course has a primary focus of creative use of common IT tools and applying them in ways related to health care computing, information processing and management. Natural Language Processing, Precision Medicine and genomics will be discussed and applied to medical applications and data analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2424 - DATA BASE MANAGEMENT HLTH CARE
Minimum Credits: 3
Maximum Credits: 3
Objectives are to provide students with an in-depth knowledge of database design and provide skills on how to use available database management systems. First part emphasis on how to analyze a healthcare problem and model its data effectively using the entity-relationship model. Students learn to implement the model using relational DBMS. Commercial systems Access, RDB, Sybase, DBase IV systems are studied. Students gain practical experience by designing and implementing database projects in a healthcare setting.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2425 - DATA ANALYTICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2426 - EVAL OF CLASSIFICATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course aims to evaluate the reference terminologies that are currently used in health care settings (SNOMED-CT, LOINC) as well as applications of data capture technologies (such as natural language processing, voice recognition, document imaging). Further, the course intends to introduce the students to computer assisted coding technology applications and evaluate the use of health care terminologies, vocabularies and classification systems found both nationally and internationally.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2427 - INTRO CLIN MULTIMEDIA & INTRNET
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to the core technologies and applications related to clinical multimedia and medical applications of the internet. The subjects introduced will include medical imaging modalities, medical imaging standards, image databases, image compression and multimedia technologies. The internet applications section of the course will review internet technologies and applications in clinical medicine and education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2428 - CONC SOFTWR PROJ ENGR HLTH CRE
Minimum Credits: 3
Maximum Credits: 3
This course will examine how health care organizations manage the software development process. This course will study how technology, people and economics of software projects interact and the impact these elements have on managing software projects. Topics include: system life cycle models, requirements management, and system design and software quality assurance. The student will have the opportunity to learn about industry implementation data standards and the impact of regulations for planning and managing health information systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2429 - FDS CLIN & PH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2430 - CREATIVE THINKING
The purpose of this course will be to explore theoretically and practically the world of creative thinking. It is believed that people can be trained to be more creative. Through the use of creative thinking techniques, the intent of the course will do just that - train each individual to think more creatively.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2431 - EVAL METHS IN HLTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2432 - TELEMED, TELEREHAB, & E-HEALTH
Minimum Credits: 3
Maximum Credits: 3
Telemedicine uses telecommunications to deliver health care, often over great distances, especially for remote and rural areas. It is a multi-disciplinary undertaking requiring expertise from telecommunications, health care and information technology sectors. This course is designed to prepare students for a telemedicine project leadership role. This highly interactive course will provide the students with opportunities to discuss and analyze the key issues, principles and approaches, in telemedicine. You will study how technology, people, economics and policies of telemedicine & e-health interact and the impact these have on healthcare systems. This is a hybrid course; i.e., It has on-line modules as well as face-to-face classes. Case studies, telemedicine project and internet-based applications will be used to facilitate active learning. This course is open to graduate students and has no prerequisites
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2433 - CLASSFCTN SYSTEMS HEALTH CARE
Minimum Credits: 3
Maximum Credits: 3
An introduction to the principles of taxonomy, purposes of classifying diseases and operations. An in-depth study of ICD-10-CM, ICD-10-PCS and CPT-4 will be undertaken along with a summary review of ICD-9-CM. The interaction of Diagnosis Related Groups (DRG's) with classification systems will be emphasized. Data quality, the Uniform Hospital Discharge Data Set as well as coding/sequencing guidelines for both inpatient and outpatient coding will be examined. This laboratory will provide students with hands-on” experience in ICD-10-CM, ICD-10-PCS and ICD-9-CM Coding, proper application of UHDDS guidelines, DRG assignment and CPT-4 coding. Laboratory practice exercises will provide the principal method of instruction with great emphasis on learning ICD-10-PCS. The impact of coding accuracy and its relationship to reimbursement will be stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-SP)

HRS 2434 - BUS ISSS DATA ANALYTC HLTH CRE
Minimum Credits: 2
Maximum Credits: 2
Course focus on various principles and approaches related to business issues in health care management. Professional communications, negotiations, productivity tracking, and statistical analysis related to specific business topics presented and discussed in detail. A major focus of this course is the practical application of the aforementioned topics presented through the utilization of published case study readings, case study analyses, and exercises.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)
HRS 2435 - FINCL MGT FDS HEALTH CARE & PH
Minimum Credits: 3
Maximum Credits: 3
Introduction to selected finance and accounting topics of health care professional, supervisor and department head. No previous knowledge of accounting or financial management required. First half emphasis on basic financial accounting concepts to provide organization-level understanding language, concepts, processes and functions of financial management. Second half emphasizes managerial accounting principles and techniques including cost accounting and budgeting. Focus shifts to departmental level financial management and role of supervisor process include budget development and control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2436 - FINANCIAL ANALYSIS/HEALTH CARE
Minimum Credits: 3
Maximum Credits: 3
Financial analysis concepts and tools will be presented to support the middle manager and health care professional in decision making. Topics will include financial statement and operating analysis, asset management, cash flow analysis, financing and capital structure and budgeting. Case studies using electronic spread sheet will be required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2437 - IMPLG INFOR TEC HLTH CRE ENVRN
Minimum Credits: 2
Maximum Credits: 2
Designed for students to apply classroom theory to various health care & business practices. Projects constructed utilizing current industry standard hardware & software technology. Lab projects involve installation of memory, disk drives, net cards, modems & other peripherals, along with parallel installation of software to make devices function. Shift to operating systems & commercial application tools & software. Information storage with database construction & reporting, coupled with presentation of Infor. Construction & implementation of internet technology will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2438 - RES METH & CLIN DATA ANALYSIS
Minimum Credits: 2
Maximum Credits: 2
Focus on principles & approaches of conducting research in a health care setting. Formulating & testing a hypothesis, conducting appropriate literature review, develop specific aims, methodology & statistical analysis related to specific research topics presented & discussed in detail. Requirement of IRB & research integrity discussed in detail. Major focus on practical application of collecting & maintaining data in appropriate databases & ability to analyze data using statistical software packages. Required to develop a research proposal would potentially have real-world applet.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2439 - HLTH INFOR SYSTEMS INTERNSHIP
Minimum Credits: 3
Maximum Credits: 3
Supervised practical experience providing an opportunity for students to learn new skills and to apply previously learned skills and theories in the analysis, design, implementation, and evaluation of health information systems.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2440 - APPLC OF SUPERVISORY PRACTICE
Minimum Credits: 3
Maximum Credits: 3
Provides student with an awareness and understanding of the importance of management of human resources in health care organizations. Practical applications of management theory are emphasized through discussion, case studies, exercises, guest presentations and student materials.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2445 - HUMAN RESOURCE MGT/LABOR RELTN
Minimum Credits: 3
Maximum Credits: 3
Course encompasses supervisory management and labor relations concepts, processes, and issues presented within a broad human resource management perspective. Topics include human resource planning, employee recruitment and selection, performance appraisal, compensation management, collective bargaining, contract administration, and the legal/regulatory framework affecting human resource management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2450 - EVAL RES PROG EVAL HLTH/REHAB
Minimum Credits: 3
Maximum Credits: 3
Key concepts, methods and issues relevant to evaluation research will be presented. Comparing models of program/project/organization unit evaluation will be discussed. Emphasis will be given to realistic and user-focused evaluation design and methods. Students will be required to design (and if feasible) implement an evaluation study or project relevant to a real world setting in health care, rehabilitation or disability services. The social, cultural, political and ethical implications of program/project evaluation will be given due consideration.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2451 - MKTG HLTH CARE PROD/HLTH PROMO
Minimum Credits: 3
Maximum Credits: 3
This course is designed to promote a better understanding of both the theoretical and the practical application of marketing strategies among health care professionals. Specifically, this course will focus on: -defining target markets, -promotion, -advertising and publicity, -development of message content. Issues related to marketing in house wellness programs as well as health care products and services will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2453 - KNOWL REPRESENTN CLN DEC SUPPRT
Minimum Credits: 3
Maximum Credits: 3
This course is an in-depth treatment of knowledge representation formalisms used in the field of medical informatics. Topics will include the following formalisms: logic, rules, tables, transition networks, semantic network, probabilities, Bayesian belief networks, influence diagrams and decision trees.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2454 - 6 SIGMA & IMPROVMT METHDLG HC
Minimum Credits: 3  
Maximum Credits: 3  
This class will explore the concepts of process management and improvement methodologies including Six Sigma, Lean/Toyota production system/operational excellence, theory of constraints, PDCA, Baldrige and others and their application to healthcare management. The student should be prepared for the American Society for Quality (ASQ) lean six sigma green belt at the end of the class. The focus will be on practical applications in addition to the art, theory, principles, statistics and science of these concepts. The foundation of the class will be understanding the key contributions of each of these approaches.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  

HRS 2455 - ETHICS/DECSN MAKING HLTH REHAB  
Minimum Credits: 2  
Maximum Credits: 2  
The purpose of this course is to analyze decision-making as a process fundamental to organizational behavior, management and policy-making and implementation. The nature of, and constraints upon, decision-making at the individual, group & organization-wide level will be discussed. Various decision support and decision analysis models and methods will be presented as tools for more effective system management and policymaking in health care. Some emphasis will be given to the ethical dimension of decision-making and ethical issues and problems confronting health care professionals.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2456 - REIMBURSEMENT SEMINAR  
Minimum Credits: 1  
Maximum Credits: 1  
An introduction to topics relating to reimbursement in the health care environment. The course will build on topics covered in Classification Systems including the role of coding in reimbursement and minimizing health care fraud. Additional areas include payment methodologies, revenue, and payment cycle management, claims audits, compliance, value-based purchasing and outpatient prospective payment systems. Clinical Documentation Improvement Programs and the increased use of CAC programs will also be explored.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS)

HRS 2457 - QUALITY MANAGEMENT  
Minimum Credits: 2  
Maximum Credits: 2  
Focuses on principles and approaches to assessment of quality in health care and how this impacts the role of the health information manager. Theoretical and pragmatic issues related to quality management, utilization review, and risk management is addressed. Responsibilities of governing board, medical staff and other health care personnel in relation to quality management and improvement is examined. Requirements of accrediting and licensing agencies related to quality management is presented.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2460 - STRATEGIC MGT PLANNING/ANLYSIS  
Minimum Credits: 3  
Maximum Credits: 3  
Course will present student with an integrative strategic management model that incorporates strategic planning environmental analysis, marketing, information management/technology human resource and financial analysis, leadership and change management processes. Emphasis placed on developing strategic thinking as an essential managerial and professional competency strategy formulation and implementation presented as dynamic processes of organizational response to accelerating environmental change and complexity.

Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2465 - LEADERSHIP SKILL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Various areas related to a leader's personal development in the health-care environment will be explored. The course will include didactic and experiential work in the following topics: stress management, self-assessment, caring concepts, mentoring, creative problem solving, and personal styles of learning or teaching, leadership.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2474 - DIR STDY DISAB POLICY & SERVS
Minimum Credits: 3
Maximum Credits: 3
Course will explore conceptual foundations and legislative and regulatory bases for disability policy. Organization and implementation of disability services will also be discussed. Policy and service topics will be chosen from transportation, housing/residential placement, architectural access, health care (including veteran's services), education, employment and training, income assistance, personal assistance services, and respite care.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

HRS 2475 - DISAB RLTNS & SERVICES INTSHP
Minimum Credits: 1
Maximum Credits: 6
Supervised practical experience, usually in a clinical facility or agency, permitting the student to observe and participate in existing specialized programs and to develop, apply, and evaluate new clinical procedures.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2479 - INTRO MEDICAL INFORMATICS
Minimum Credits: 4
Maximum Credits: 4
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2480 - DIMENSNS OF AGING: CULT & HLTH
Minimum Credits: 2
Maximum Credits: 2
This course provides an overview of the aging experience from a cross-cultural and public health perspective. An understanding of the aging process and the different strategies that people use in the Western and non-Western societies to cope with this universal phenomenon will be the theme of the course. Within this framework, multiple facets of aging including the demographic, biological, environmental and socio-cultural aspects are identified and discussed. This course will provide core knowledge for professionals who will work with/on behalf of the aged.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2482 - LEGAL ASPECTS OF HEALTH CARE
Minimum Credits: 2
Maximum Credits: 2
Discusses principles of hospital law and aspects of handling confidential and health records information. Actual cases and statutes are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2484 - ISSUES LONG TERM CARE SERVICES
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce the student to the patterns and modes of health care delivery in the long term care setting. Services and delivery systems in nursing homes, home health care, hospices, ambulatory long term care, rehabilitation and mental health will be introduced and examined. The work of the accrediting, licensing, and certifying agencies will be examined in relation to financial reimbursement, legal and ethical issues, personnel administration, health information policies and quality of care.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2486 - FINANCIAL MANAGEMENT FOR HIM
Minimum Credits: 2
Maximum Credits: 2
Course designed as an introductory level course to the principles, concepts & issues of financial management in the health care organization. Focus is upon financial management as viewed from the perspective of the department/unit manager & supervisor. Institution-wide accounting & budgeting systems will be discussed primarily as a framework for understanding (1) how financial reporting, planning and control is linked to organizational effectiveness and (2) how financial management responsibilities of the departmental manager relate to organization-level financial goals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2488 - RESEARCH METHODS ON AGING
Minimum Credits: 2
Maximum Credits: 2
Course illustrates multidisciplinary methods for the conduct of research on aging populations. Students will be taught to formulate a research problem, assess which research method is appropriate, conduct the research, analyze the data and report the results in class.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HRS 2490 - ELECTRONIC HEALTH RECORDS
Minimum Credits: 3
Maximum Credits: 3
This course will provide the health and rehabilitation professional with the principles and approaches to electronic health record (EHR) technology. Theoretical and pragmatic issues related to electronic health record technology, such as design and development, standards and clinical terminologies, privacy and security issues, model EHR systems, evaluation of EHR software systems, outcomes research using the EHR, the legal EHR and the personal health record (PHR) will be addressed. The responsibilities of the health and rehabilitation professional (physical therapist, occupational therapist, speech/language pathologist, health information professional, social worker, emergency medicine professional etc.) In the development and use of the EHR will be examined. Requirements of accrediting and licensing agencies of EHR technology as well as the strategic initiatives of the office of the national center for health information technology will also be presented and discussed. The responsibilities and involvement of the health and rehabilitation professional in the development, use, evaluation, and dissemination of EHR technology will be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Health Information Systems (Health and Rehabilitation Scs-MS) or Healthcare Supervision Mgt (Health and Rehabilitation Scs-MS)

HRS 2500 - OT RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Course provides exposure to current research studies through presentations of faculty inside and outside the school of health and rehabilitative sciences. Students learn how established investigators develop a research agenda, and the methods they use to ensure the integrity of their data.
HRS 2501 - FUNCTIONAL ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
Course focuses on functional assessment from the perspective of body structures and functions, activity and participation as defined by the international classification of functioning, disability, and health of the world health organization. Students may focus on infants, children, adults, or older adults.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2502 - HUMAN PERFORMANCE: ANALYSIS
Minimum Credits: 4
Maximum Credits: 4
Course focuses on diagnostic decision-making using neuroscience concepts as an exemplar. Clinical reasoning is emphasized while developing knowledge and skills for the evaluation of individuals with neurological impairments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2503 - HUMAN PERFORMANCE: ADAPTATION
Minimum Credits: 3
Maximum Credits: 3
Course focuses on locating and synthesizing evidence supporting rehabilitation interventions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2504 - DIRECTED READINGS IN OT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on research design for evidence hierarchies in the context of occupation therapy research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2510 - FUNDAMENTALS EVIDNCD-BASED OT
Minimum Credits: 3
Maximum Credits: 3
Course focuses on the skills for asking occupational therapy clinical questions, searching for the best evidence to answer questions, and critically appraising the evidence. It emphasizes the research methodologies associated with hierarchies of evidence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)
HRS 2511 - HUMAN PERFORMANCE: RESTORATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the evidence supporting restorative occupational therapy interventions, including neurobehavioral, musculoskeletal, and motor learning approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2512 - HUMAN PERFORMANCE: PSYCHOEDUCATIONAL
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the evidence supporting psychoeducational interventions, including client/caregiver education, skills training, and behavioral rehabilitation approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2513 - CLINICAL INSTRUMENT DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the establishment of reliability and validity, particularly content validity, of clinical instruments devised by therapists and/or used in clinical settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2514 - HUMAN PERFORMANCE: COMPENSATION
Minimum Credits: 3
Maximum Credits: 3
Course examines the interface between functional impairment, activity, and societal participation. Emphasis is on person-task environment analysis and adaptation to compensate for dysfunction during self-care, home management, school/work, and play/leisure occupations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Sci-MS)

HRS 2521 - SCIENTIFIC WRITING
Minimum Credits: 3
Maximum Credits: 3
Course provides knowledge and skills associated with professional writing, such as format and style, authorship, journal requirements and the peer review process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2525 - SPECIAL TOPICS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
Course focuses on the principles and practices of therapeutic use of self, clinical reasoning, and evidence-based practice as they are applied in diverse practice environments (e.g., Hospital, school systems, community agencies).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS)

HRS 2579 - OT AND HEALTH POLICY
Minimum Credits: 2
Maximum Credits: 2
Course content focuses on healthcare trends, reimbursement regulations, legislative policies, practice environments, strategies for maintaining continued competence, and emerging professional issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS)

HRS 2580 - ANAL CLN DATA/EVID POLC FORMTN
Minimum Credits: 1
Maximum Credits: 6
Course focuses on secondary analysis of national data sets that were collected for health and disability policy studies and policy formation, such as the MDS, NHANES, LSOA, NMES and NHIS. Using SPSS, students will use the data to examine the evidence related to a clinical inquiry.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2581 - ANAL DATA: EVID POLC CMPLINC
Minimum Credits: 1
Maximum Credits: 6
Course focuses on how to develop and carry out a policy compliance audit. The office of the inspector general has suggested that health care facilities develop policy audit mechanisms to ensure compliance with CMS regulations. Students will learn how to translate policy regulations into audit tools and then conduct an audit.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2582 - ANAL CLN DATA/EVDNC FUNCT CHNG
Minimum Credits: 3
Maximum Credits: 3
Course focuses on how to design and carry out single-subject design studies and use quantitative methods of analysis (celeration line, 2 SD band, c-statistic) to document functional changes in client performance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Occupational Therapy (Health and Rehabilitation Scs-MS) or Occupational Therapy (Rehabilitation Science-PHD)

HRS 2583 - OT MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2590 - SPECLZD PRECEPTORSHIP: CLINICAL
Minimum Credits: 1
Maximum Credits: 6
Course provides experiential learning in a specialized area of occupational therapy practice (e.g., Pediatrics, assistive technology, home healthcare, hand therapy, case management) for the purpose of developing advanced skills related to a specialty practice area.
Academic Career: GRAD
HRS 2591 - SPECLZD PRECEPTSHIP: EDUCATION
Minimum Credits: 1
Maximum Credits: 6
Course provides experiential learning in the teaching-learning process applied to entry-level professional education, distance education, client/patient education, consumer education, or knowledge application to clinical settings.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SU3 Basis

HRS 2592 - SPECLZD PRECEPTSHIP: MGMNT
Minimum Credits: 1
Maximum Credits: 6
This course addresses the role of the occupational therapist as manager of occupational therapy services. The focus is on the principles and practices of administration and supervision as they are applied in diverse practice environments (e.g., Hospital, school systems, and community agencies).
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SU3 Basis

HRS 2593 - SPCLZD PRECPTSHIP:GRNTSMANSHIP
Minimum Credits: 1
Maximum Credits: 6
Course provides experiential learning in writing programmatic grants, including locating sources for grants to develop or expand clinical programs, responding to current agency priorities, developing evaluation strategies, and writing proposal components.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2594 - SPECLZD PRECEPTSHIP: RESEARCH
Minimum Credits: 1
Maximum Credits: 6
Course provides experiential learning in coordinating occupational therapy research, including obtaining irb approval, getting informed consent, participating in data collection, and managing data quality.
Academic Career: GRAD
Course Component: Credit Laboratory
Grade Component: Grad LG/SU3 Basis

HRS 2600 - NUTRITION RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 3
An opportunity for students to investigate and formulate potential research topics. Students will be exposed to possible research ideas, discuss technical requirements and identify proper format for presenting research projects, written and verbal.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2610 - FOOD TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
An in-depth study of the nutritional implication of various food processing and preservation methods including current concerns for the safety of the food supply.
Academic Career: GRAD
Course Component: Lecture
HRS 2621 - ADV SEMINAR CLINICAL DIETETICS
Minimum Credits: 3
Maximum Credits: 3
In-depth study of the nutritional management of hospitalized patients. Students will be required to research the appropriate literature, to survey current practices, and to make presentations at a seminar session.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2622 - DIR RDGS INTEGRATIVE NUTRITION
Minimum Credits: 1
Maximum Credits: 6
Students will examine appropriate professional literature to gain in depth knowledge of areas of interest of current relevance.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

HRS 2623 - ADV MEDICL NUTRITION THERAPY 1
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
