Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2629 - DIETARY SUPPLEMENTS HLTH PERF
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2630 - DIETARY ASSESSMENT METHODS
Minimum Credits: 1
Maximum Credits: 3
Survey of dietary assessment methods and their application.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

HRS 2631 - NUTRITION ASSESSMENT 2
Minimum Credits: 3
Maximum Credits: 3
Introduction to professional knowledge and skills in nutrition focused physical examination. The course is based on the knowledge/application of the NCP and Model in professional practice. Learning experiences will include formal class presentations, class discussions, case-based problem solving and simulation laboratory sessions. Knowledge based learning leading to examination technique simulations for anthropometric measurements for body composition, nutrition focused physical examination for malnutrition diagnosing and examination techniques, e.g., vital signs, head and neck exam, intra and extra-oral exams, heart and lung auscultation, as well as, abdominal auscultation and palpation are included. At the completion of the course competency in application of nutrition focused physical examination techniques will be assessed on an individual basis.

HRS 2646 - INTRO TO FUNCTIONAL NUTRITION
Minimum Credits: 3
Maximum Credits: 3
This introductory course to functional nutrition is based on a food first approach to promotion of optimal health. Lectures and class activities will explore the scientific basis of medicinal foods and herbs used in cooking. Students will demonstrate practical application by incorporating 'health promoting foods and herbs' into meal planning and preparation with the goal of optimizing health for the prevention and treatment of diet and lifestyle related diseases.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Cord Mster in Nutr and Dietics (CMD-MS) or Wellness and Human Performance (MSNUTR-SP)

HRS 2650 - EXERCISE PHYSIOLOGY
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide graduate students, within the field of rehabilitation science, the knowledge of theoretical and applied aspects of exercise physiology. An in-depth understanding of how the body responds when exposed to acute and chronic bouts of exercise will be provided through lectures and laboratories. Topics discussed will include physiological responses and adaptations of the cardiovascular, respiratory, metabolic, and neuromuscular systems to exercise; assessing cardiorespiratory fitness, body composition, anaerobic performance and muscular fitness; designing exercise programs for health and wellness and special populations; sport performance; environmental considerations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2660 - ADVANCED HUMAN PERFORMANCE AND TESTING
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with advanced knowledge in the field of human performance training and evaluation through classroom lectures and laboratory/filed experiences. Topics include developing and testing strength, speed, power, agility, endurance, stability, and flexibility.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter Grade

HRS 2700 - ASSTV TECHNOLOGY RESEARCH SEM
Minimum Credits: 1
Maximum Credits: 1
Purpose is to expose graduate students to various research and clinical projects as well as areas of interest to assistive technologists. Graduate students, faculty and visiting scholars will meet weekly for presentations and discussion of research and clinical activities under way in the
department and at other institutes.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2701 - PRESSURE MANAGEMENT
Minimum Credits: 1
Maximum Credits: 1
Discuss seating pressure and related factors contributing to pressure ulcers. Examples of current low and high technology clinical methods for pressure measurement and pressure management will be discussed and demonstrated. Examples of research technologies for pressure measurement and pressure management will be discussed and demonstrated. Students will use advanced clinical measurement techniques to investigate the effects of postural and body segment support systems on seating pressure.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2702 - INSTRUMNTN & COMPUTNG INTRFCNG
Minimum Credits: 3
Maximum Credits: 3
Introduction to sensors, instrumentation, computer interfacing, electrical safety and personal computer hardware and software. Emphasis on applications to health care. Assistive technology and biomedical engineering research. Topics include electronic circuits and signal conditioning, principles of measuring biological signals, transducer technology and data acquisition and analysis. Lab experiences include instrumentation design and instruction using computer applications for data acquisition and analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2703 - REHABILITATION ENGINR NG DSGN
Minimum Credits: 3
Maximum Credits: 3
Rehabilitation engineering design will be taught through the development of a product. The product must incorporate concepts of universal design. The process of designing a product on time, under budget with proper documentation will be emphasized.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2704 - FUNDMS REHAB ENGR AND TECHN 1
Minimum Credits: 3
Maximum Credits: 3
Introduction to fundamental principles and practices related to multiple areas of assistive technology. The technology area includes: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomic, and man/machine modeling. In addition, common terminology, disability, ethics, and models of service delivery related to assistive technology are discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN:Prosthetics and Orthotics (MS) or Health and Rehabilitation Scs (MS) or SBPLAN: Rehabilitation Sci & Tech (Health and Rehabilitation Scs-MS)

HRS 2705 - PRACT REHAB ENGR & ASSTV TECHN
Minimum Credits: 3
Maximum Credits: 3
Develop the clinical skills needed to apply at re solutions to help persons with disabilities achieve their goals in the area of productivity, education, employment, communication, and environmental access. Students will match knowledge of at products gained in HRS 2704 to the needs of individuals. Taught using a model for assessing the individual, the context, the technology-user interface and an interdisciplinary team approach. A
3 hour a week commitment to serving learning & a journal is integrated with lectures, guide learning and semester case-based learning project.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2706 - INTRO REHAB ENGR DESIGNS**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
Material at introductory graduate level. Fundamentals of biomechanics with specific application to rehabilitation. Basic mechanics (Newton's laws, statics, and dynamics) and vector algebra (forces, moments, and equilibrium) will form the first part of the course. The middle section focuses on kinematics and kinetics applied to biomechanics. The final section examines work/energy methods and stress/strain problems. Sets are assigned regularly and there are lab exercises/demonstrations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2707 - ANAL ADAPTN SENS & COM IMPAIR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the underlying functional anatomy, neurophysiology and biophysics of normal sensation and speech, and the pathologies and functional impairments that affect individuals who are blind, deaf, or mute through developmental, traumatic, or progressive neurological disabilities. Course takes an engineering systems approach to analyzing various technological adaptations used by people with these disabilities.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2708 - INDIV, SCL&CLTL EXPRN OF DISAB**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course investigates psychological and sociological issues of impairment with regard to viewing disability not as solely located within the individual, but instead as the outcome of interaction between the impaired individual and society. Course focuses on the experience of being disabled, with emphasis on both adjustment to disability and relationship to community. Foundations of stigmatization and discrimination towards people with disabilities and their pervasive ness and effect throughout all domains of life will be examined.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2709 - WHEELCHAIRS 1**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Covers the basic nomenclature used to describe and order wheelchairs. Wheelchair adjustment, assembly, training and operation will be covered. Students will be introduced to wheelchair standards and government controls. The focus on manual wheelchairs. Various types of manual wheelchairs will be used during the course. Students will participate in lectures and laboratory experiences.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2710 - FUNCT NEUROMUSCULR STIMULATION**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Course will expand on material presented in analysis of adaptations courses and present an in depth analysis of functional stimulation.

**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2711 - COMPUTER ACCESS
Minimum Credits: 3
Maximum Credits: 3
This course surveys the hardware and software that can make personal computers accessible to persons with mobility and sensory disabilities. Topics include keyboard modifications, expanded and mini keyboards, key set redefinitions, virtual keyboards, direct selection and scanning strategies, mouse emulation and an intro to the use of augmentative communication aids for computer access. Both Macintosh and intel computers will be addressed. Course time will be equally divided between lecture/theory and hands-on set up of actual computer systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2712 - DSGNG ACSBLE SOFTWR WEB PAGES
Minimum Credits: 2
Maximum Credits: 2
Rather than focusing on how clinicians retroactively provide access to inaccessible software and websites, the course will focus on how to design accessible software and websites in the first place. Course content will include existing regulations, design guidelines and existing tools for analyzing web sites.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2713 - COMPUTR ACCESS & AAC TECHN LAB
Minimum Credits: 1
Maximum Credits: 1
This will be a lab course providing a hands-on introduction to existing computer access and augmentative communication hardware and software. Course content will be expanded to include AAC technology in part to make the course more attractive to students in the departments of communication science and disorders and occupational therapy.
Academic Career: GRAD

**HRS 2723 - HOME & WORK MODIFCTNS EMPLYMN**
Minimum Credits: 3
Maximum Credits: 3
Method material and resources for maximizing vocational abilities using various rehabilitation technologies and job site accommodations for individuals affected by functional limitations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2724 - ASSISTV TECHN FUNDING & POLICY**
Minimum Credits: 3
Maximum Credits: 3
Course for students to develop knowledge and skill in the process and strategies to find and acquire assistive technology devices and services for people with disabilities as well as understand the underlying policies that govern funding. Course focus on funding sources, legislative policy, clinical assessment, documentation procedures, use of evidence, strategies for preparing letters of necessity and advocacy efforts.
Academic Career: GRAD
Course Component: Seminar
**HRS 2725 - ACCESS TRANSPORTATION WC USERS**

Minimum Credits: 1  
Maximum Credits: 1  
Basic principles and current knowledge in providing appropriate and safe access to motor vehicles for persons using wheelchairs and wheelchair seating devices. Specific topics addressed include: basic wheelchair securement and occupant restraint principles. Current applicable laws and standards, wheelchair-seated driver training and evaluation, wheelchair and seating considerations for the wheelchair seated driver and passenger, current research, historical development of accessible public transportation, and basic principles in crash dynamics.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2726 - HOME WORKPLACE ACCOMMODATIONS**

Minimum Credits: 2  
Maximum Credits: 2  
This course will familiarize students with the major concepts related to successful implementation of environmental control systems for individuals with disabilities. The topics will include: environmental control systems introduction; use of environmental control systems; overview of technologies; hands-on laboratory experiences; access methods; voice; eye position; body segment position; contact switching access strategies; scanning techniques; multiple switch techniques; integration issues; use of systems from wheelchairs, home bus interfacing.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 2731 - FDS OF REHAB & MNTL HLTH CNSLG**

Minimum Credits: 3  
Maximum Credits: 3  
Basic principles and practices of rehabilitation of children and adults with disabilities. Historical, philosophical and psychological aspects of rehabilitation. Legislative, legal, financial, and administrative basis for rehabilitation programming, history and principles of the public vocational rehabilitation process development of the team concept and the relationships of the various professionals and community resources involved in the rehabilitation process.

Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

**HRS 2734 - COUNSLNG THEORIES & TECHNQS 2**
Minimum Credits: 3  
Maximum Credits: 3  
Practical coursework devoted to delivery of specialized counseling services including behavior and cognitive behavior strategies, cultural issues in counseling, and work with families and significant others. Actual counseling interviews required.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

**HRS 2735 - CAREER & VOCATIONAL COUNSELING**

Minimum Credits: 3  
Maximum Credits: 3  
Development of skills, overview of theories of career development and current research, vocational decision making and career counseling with persons with disabilities, incentives and disincentives, self-awareness.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

**HRS 2736 - CRISIS COUNSELING**

Minimum Credits: 2  
Maximum Credits: 2  
Development of skills for placement of persons with disability into a variety of settings including competitive employment, supported employment, self-employment, etc. Philosophy of job placement, pre-placement analysis, client readiness techniques, job development, job engineering, and dealing with employer attitudes, business rehab, and social security disability are addressed. Occupational information and its use in the placement process, labor market analysis and procedures for analyzing transferable work skills.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2737 - CLN DIAG & FUNCT ASMNT CNSLG**

Minimum Credits: 3  
Maximum Credits: 3  
Survey course involving various assessment procedures used in rehabilitation counseling including psychometrics, functional assessment, vocational testing and vocational evaluation, and interviewing.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

**HRS 2738 - DIAG & REHAB COG BHVR & MNTL DISAB**

Minimum Credits: 3  
Maximum Credits: 3  
Addresses information on the diagnosis and functional impairments associated with cognitive and psychiatric disabilities, (including anxiety disorders, mood disorders, psychiatric disorders, brain injury, developmental disorders, and other neurologically based disabilities that impact cognitive functioning). Students are provided with an introduction to diagnostic formulation, functional assessment, and techniques for clinical interventions. Specific rehabilitation techniques that are used in vocational, academic, and independent living applications are taught.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Scs-MS)

**HRS 2739 - GROUP COUNSELING**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers theory and techniques for group and family intervention, with an emphasis on group formats most typically used to support individuals with disability and their families (support groups, psychoeducational group, etc.). Impact of disability on family dynamics and interventions appropriate for families are also covered. Students will acquire practical experience both as a group member and a group leader and
attend a support group in the community.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Clin Rehab and Mntl Hlth Cnsln or SBPLAN: Rehabilitation Counseling (Health and Rehabilitation Ses-MS)

HRS 2740 - CLN APPLICATION IN COUNSELING
Minimum Credits: 3
Maximum Credits: 3
The clinical applications in counseling course is divided into three modules designed to provide students with basic skills needed for 1) interviewing for intake and assessment purposes and engaging clients in a therapeutic relationship, interviewing clients, and 2) application of evidence-based counseling using Cognitive Behavioral Therapy and 3) application of evidence-based counseling using solution focused brief therapy. The course will employ brief didactic presentations, discussion of readings, role-play, observing videos, class exercises in which students will develop a plan of intervention and then be videotaped while applying clinical interviewing skills and interventions. Evaluation by self-, peer- and instructor will occur. Student performance will be evaluated to determine competency for entry-level practice and provide specific detail for student remediation if needed.

Academic Career: GRAD

HRS 2746 - COUNSELING PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
This practicum requires at least 120 hours of supervised counseling experience in a rehabilitation counseling environment. It is designed to provide direct, face-to-face counseling experiences with clients to develop student's basic communication, counseling and documentation competencies.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2747 - JOB PLACEMENT PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
Practicum involves a minimum of 100 clock hours of supervised rehabilitation counseling vocational interventions, with specific involvement in placement of rehab consumers in employment. Practicum designed to provide specific experience and supervision in job development and placement and work adjustment activities.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2748 - ASSISTIVE TECHNOLOGY PRACTICUM
Minimum Credits: 1
Maximum Credits: 6
Practicum involves a minimum of 100 clock hours of supervised assistive technology experience including assessment, development, training, evaluation and follow-up regarding rehab technology. Practicum designed to provide specific experience and supervision in the provision of assistive technology to rehab consumers.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2749 - REHAB COUNSELING INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
Supervised rehabilitation counseling internship that includes a minimum of 600 clock hours of internship experience in a rehab setting. Students participate in individual, group, and family counseling experiences under the supervision of a CRC. Students are exposed to programmatic and administrative components of the rehab setting, policies and procedures; introduction to staff and their role and function, confidentiality procedures, and code of ethics for rehab counselors. In addition to on-site supervision, students receive weekly supervision under program faculty.

Academic Career: GRAD

Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HRS 2751 - CLINICAL CAPSTONE EXAM
Minimum Credits: 1
Maximum Credits: 3
The clinical capstone exam focuses on student demonstration of knowledge and skills that reflect the competencies of the rehabilitation and mental health counselor. Students will be assessed on their knowledge and skills accumulated through coursework and clinical experiences. The course requires students to synthesize and apply advanced concepts into clinical practice. The course implements a case study approach. Students are provided real and/or simulated clients to demonstrate their knowledge and skills. Students are expected to analyze and synthesize case materials for case conceptualization and then develop appropriate and realistic intervention plans. Students are expected to apply appropriate counseling techniques included in their intervention plan via role-play simulations. Successful completion is needed for the student to demonstrate mastery of graduate study.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis
HRS 2771 - FUNCTIONAL ANATOMY KINESIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is the study of the structure and function of the human body, with special emphasis on the musculoskeletal and peripheral nervous systems. Cadavers and anatomical models will be utilized. Palpation of anatomical landmarks, actions of individual muscles and muscle groups, and normal joint motions will be studied using the students' own surface anatomy. The concepts of measuring muscle strength and length, measurement of joint range of motion, and identification of postural or structural deviations will be introduced. The roles of muscles and types of muscle contraction during movement and exercise will be discussed. The basics of normal gait will be studied, and some common pathological gaits will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2772 - PATHOLOGY ORTHOTICS /PROSTHTCS
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide a general overview of the pre-disposing factors and direct causes of disease, as well as their effects on the human body. It will also include a systemic approach to the basic disease processes, in terms of etiology, symptomatology, general pathological changes, diagnostic procedures, and types of treatment. Universal precautions to be used in patient care will also be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2773 - INTRO MATERIALS EQUIPMENT
Minimum Credits: 2
Maximum Credits: 2
This course will introduce the student to the concepts of general material properties, the common materials used in orthotics and prosthetics, and the specific properties of these materials. The student will be introduced to equipment and fabrication techniques as well as safety precautions for handling and using materials and equipment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2774 - REHABILITATION BIOMECHANICS
Minimum Credits: 3
Maximum Credits: 3
This course is a basic introduction to biomechanics of human motion for individuals in the health and rehabilitation fields. It is designed for individuals with a non-technical background, but a basic knowledge of mathematics, physics, and kinesiology is expected and will be utilized. Topics covered include statics, dynamics, anthropometry, motion analysis, electromyography, and soft-tissue biomechanics. Applications to rehabilitation will be emphasized.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS) or Health and Rehabilitation Scs (MS) or SBPLAN: Rehabilitation Sci & Tech (Health and Rehabilitation Scs-MS)

HRS 2775 - INTRO EVIDENCE BASED PRA O & P
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2776 - PROFESSIONAL ISSUES IN P & O
Minimum Credits: 1
Maximum Credits: 1
Issues and organizations relevant to the practice of orthotics and prosthetics will be presented and discussed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2777 - PRACTICE MANAGEMENT IN P & O
Minimum Credits: 2
Maximum Credits: 2
This course will provide knowledge of all the facets of running or managing the business end of an orthotics and prosthetics department or company.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2778 - RESEARCH SEMINAR P & O
Minimum Credits: 1
Maximum Credits: 1
This course includes reading and discussion of research related to the practice of orthotics and prosthetics. Case studies, along with the evidence for the chosen or alternative orthotic or prosthetic treatments, will be presented by students and faculty. Students will formulate a research or scholarly paper topic related to orthotics and prosthetics, identify a mentor, and begin research on the topic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2779 - PATNT MGMT ORTHOTICS & PROSTC
Minimum Credits: 1
Maximum Credits: 1
Study of new concepts, devices, and manufacturing techniques in orthotics and prosthetics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2781 - UPPER EXTREMIT Y ORTHOTICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2783 - SPINAL ORTHOTICS
Minimum Credits: 3
Maximum Credits: 3
Topics to be covered include: conditions and symptoms indicating treatment with spinal orthotics; evidence for effectiveness of treatment; patient evaluation for prescription and design of spinal orthoses; fabrication of spinal orthoses, including techniques for taking measurements and impressions; filling, evaluation of effectiveness, and modification of spinal orthoses.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs
HRS 2785 - LOWER EXTREMITY ORTHOTICS 1
Minimum Credits: 5
Maximum Credits: 5
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Prosthetics and Orthotics (MS)

HRS 2786 - LOWER EXTREMITY ORTHOTICS 2
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2791 - UPPER EXTREMITY PROSTHETICS
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2793 - TRANS - TIBIAL PROSTHETICS
Minimum Credits: 6
Maximum Credits: 6
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2795 - TRANS - FEMORAL PROSTHETICS
Minimum Credits: 4
Maximum Credits: 4
Review of conditions and symptoms indicating treatment with prosthetic devices which include knee joints. Review of evidence for effectiveness of treatment. Patient evaluation for prescription and design of these prostheses. Fabrication of prostheses, including techniques for taking measurements and impressions. Fitting, evaluation of effectiveness, and modification of prosthetic devices which include knee joints.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2828 - ST ABR PROG PROSTCS & ORTHOTCS
Minimum Credits: 1
Maximum Credits: 1
The objectives of the course are to let the students to observe and practice prosthetics and orthotics techniques of fabrication and clinical assessment in the treatment of patients with limited sources in Ecuador. Review of conditions and symptoms indicating treatment with lower extremity prosthetics below and above the knee as well as upper extremity prosthetics below and above the elbow, lower extremity orthotics for the foot, ankle, knee and hip as well as spinal orthoses. Review of evidence for effectiveness of treatment. Patient evaluation for prescription and design of spinal
orthoses, upper and lower extremity prostheses and orthoses. Impressions, measurements and fabrication of the prosthetic and orthotic devices. Fitting, delivery and evaluation of effectiveness. A local prosthetics and orthotics company in that country will provide the logistic support of equipment and tools during the program. This experience will reinforce the concepts and knowledge acquired during the past terms in prosthetics and orthotics, and also prepares those who decide to take advantage of this opportunity with better tools of experience before their residence.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**HRS 2866 - PSYCHOLOGY OF SPORT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2867 - PATHOKIN ORTHOPADC/ATHLTC**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course will provide a detailed and sequential approach to the assessment and treatment procedures utilized for management of orthopedic related athletic injuries. Course is divided into regional techniques appropriate for management of specific athletic injuries. Course will present techniques which should be utilized to functionally assess the athlete's readiness to return to preinjury activities following rehab of the orthopaedic injury.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** SUBPLAN: Sports Medicine

**HRS 2868 - SEMINAR IN SPORTS MEDICINE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course designed to address a variety of current issues and technical advancements in sports medicine. Course divided into three units including a medical, legal, and ethical issues in sports medicine unit. The second unit will focus on the unique and newly developed technical advances in the field supported by the current research. Final unit will address the research and clinical application of isokinetic testing devices.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 2869 - ANATOMCL BASIS SPORTS MEDICINE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course will include dissection of the human cadaver and will emphasize the musculoskeletal, articular, nervous, and vascular systems. Dissection experiences will be supplemented with classroom lectures. The role of anatomical structures as they relate to athletic injury mechanism, evaluation, and rehabilitation will be emphasized.  
**Academic Career:** GRAD

HRS 2901 - INTRO TO RESEARCH METHODOLOGY
Designed to introduce research concepts to the HRS student. Content emphasis is placed on the basic concepts and terminology associated with research methodology. Through the readings and discussion it is hoped that the student will develop an idea of the role of research design, measurement and statistics in the research process and thus gain the ability to interpret and evaluate published research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2902 - TOPICS IN HEALTH CARE
The purpose of this course will be to present to all graduate students in SHRS a thorough review of the most current and pertinent issues confronting the health-care industry today. Discussion and assignments will be designed to require students to investigate critical issues which affect health-care delivery, quality of service, cost of health care, manpower utilization, and the effects of various federal and state legislation on health-care delivery.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2903 - ISSUES IN THE HEALTH SYSTEM
This course will present current and predicted future issues faced by America in the maintenance of the good health of its citizens. Options for resolution of the issues will be identified and pros and cons investigated and discussed both from the standpoint of the lay public and from that of the health professional. The course is required for all advanced degrees, and the enrollment will be composed of students from all professions represented in SHRS.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Health and Rehabilitation Sciences

HRS 2905 - ETHICAL ISSUES IN HEALTH CARE
This course examines a variety of complex ethical issues which confront health-care practitioners and researchers as they work with clients and colleagues within the health-care system and society. By analyzing actual cases, health-care workers are enabled to make informed choices when faced with these issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
HRS 2906 - HIST MED AND HEALTH CARE
Minimum Credits: 3
Maximum Credits: 3
This course examines the origins and evolution of both traditional medical systems and alternative health-care patterns in West civilization from the earliest society to the present. Particular attention is placed on the impact of religion, warfare, and other societal factors on the development of medicine. Special sessions cover the role of the physician in defining society's treatment of women, minorities, and the mentally retarded.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2907 - CLINICAL INVESTIGATIONS
Minimum Credits: 2
Maximum Credits: 2
This course will focus on all aspects of clinical investigation, including developing and populating a clinical data base for the purposes of quality improvement, clinical description and clinical research. Interviewing skills, diagnosis, management, outcome and keeping up to date will be covered in depth with a particular focus on evidence-based practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SBPLAN: Musculoskeletal Phys Therapy (Health and Rehabilitation Scs-MS) or Neuromuscular Physical Therapy (Health and Rehabilitation Scs-MS)

HRS 2908 - MUSCULSK ASSMNT INJURY PREVN
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: SUBPLAN:Sports Medicine

HRS 2910 - STATSTCL APPLCS/HEALTH & REHAB
Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to statistical concepts, methods and applications useful for health care and rehabilitation professionals. Emphasis on application of statistical tools to support clinical and managerial decision making and identifying statistical tests and methods appropriate for the data and research design. Use of a computer-based statistical package will be required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2915 - TELEMED, TELEREHAB, & E-HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course provides a combination of didactic survey and applied skill development/experiential case-based learning. The curriculum includes: history of telemedicine, telehealth and tele rehabilitation; survey of research findings related to tele rehabilitation; guidelines for implementation of rehabilitation services using tele rehabilitation technology; review of policy related to tele rehabilitation; funding and reimbursement issues and strategies; privacy and security of tele rehabilitation; standards for tele rehabilitation; review and experience with tele rehabilitation technologies including but not limited to tele video ((pots, high bandwidth ISDN, IP conferencing) web-based resources (e.g., Email, discussion boards, instant messaging, listserv), data logging and body media, pdas and other devices (e.g., GPS), etc., And a case-based tele rehabilitation trial experience.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2920 - ADMINISTRATIVE INTERNSHIP

1991
Minimum Credits: 1
Maximum Credits: 6
Supervised practical experience providing an opportunity to learn new skills in administration of a service or facility and permitting the application of previously learned skills and theories.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad HSU Basis

HRS 2921 - CLINICAL INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
Supervised practical experience, usually in a clinical facility or agency, permitting the student to observe and participate in existing specialized programs and to develop, apply, and evaluate new clinical procedures.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

HRS 2922 - TEACHING INTERNSHIP
Minimum Credits: 1
Maximum Credits: 6
Supervised experience in a health-related educational program permitting the student to develop and present instructional materials, to experiment with innovative methods of instruction, and to evaluate the effectiveness of the presentations.
Academic Career: GRAD
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis

HRS 2924 - GRADUATE RESEARCH PROPOSAL
Minimum Credits: 1
Maximum Credits: 6
Graduate student writes thesis proposal, receives committee approval and institutional review board (IRB) approval for thesis study.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

HRS 2925 - GRADUATE RESEARCH
Minimum Credits: 1
Maximum Credits: 6
An original in-depth investigative study of a selected area of professional interest. A research report suitable in format and content for publication is required.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

HRS 2926 - SCHOLARLY PAPER
Minimum Credits: 1
Maximum Credits: 6
A research oriented paper based on work the student has done in his or her area of study. Students will be encouraged to submit honors papers for publication or presentation at a national or state professional meeting. The adviser and an appropriate faculty reader will supervise the student's work on the scholarly paper.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

HRS 2927 - STATCL METHS HLTH SCI RES 1
Minimum Credits: 3
Maximum Credits: 3
Statistical methods for health science research i. This is the first of a two-course series in statistical methods. Topics covered include measurement, frequency distributions, histograms, bar graphs, stem-and-leaf displays, boxplots, scatterplots, measures of central tendency, measures of variability,
point estimation, interval estimation, sampling distributions, one and two-sample tests of hypotheses for means and an introduction to non-parametric tests.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: CSD-PHD (Comm Science and Disorders), or REHSCI-PHD (Rehabilitation Science), or AUDIO-AUD (Audiology), or SLPATH-CSD (Speech-Language Pathology), or PT-DP (Physical Therapy), or OT-CSD (Occupational Therapy) or MACAUD-SP (Audiology)

HRS 2928 - STATCL MTHS FOR HLTH SCI RES 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of a two-course series in statistical methods. Topics covered include one and two way analysis of variance, multiple comparisons for main effects and interactions, analysis of co-variance, multiple comparisons for adjusted means, correlation, simple linear regression, multiple regression, and meta-analytic methods.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: CSD-PHD (Comm Science and Disorders), or REHSCI-PHD (Rehabilitation Science), or AUDIO-AUD (Audiology), or SLPATH-CSD (Speech-Language Pathology), or PT-DP (Physical Therapy), or OT-CSD (Occupational Therapy) or MACAUD-SP (Audiology)

HRS 2999 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

HRS 3000 - DOCTORAL SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Faculty and students in the rehabilitation doctoral program will participate in this seminar series. Research will be presented and critiqued by faculty and students. Topics related to grantmanship, ethics in research, and issues related to survival in an academic/research environment will be addressed in this seminar series. Doctoral students must present their research for critique by faculty prior to their dissertation defense.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3001 - DISSERTATION RES PHD DEGREE
Minimum Credits: 1
Maximum Credits: 12
Students will formulate, design, propose, carry out, analyze, interpret, and write up an approved research project, under the direction of a dissertation committee, and in particular the chairperson.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

HRS 3002 - METHODS OF INQUIRY I
Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: (REHSCI-PHD) or (CSD-PHD) or; SUBPLAN: (PHDHIM-TR) or (PHDOT-TR) or (PHDPT-TR) or (PHDRST-TR) or (PHDSMN-TR)
HRS 3003 - CORE CONCEPTS I
Minimum Credits: 1
Maximum Credits: 1
This course is the first course in a two-course sequence examining core knowledge in disability and rehabilitation sciences. In this first course, we will review models of disability and rehabilitation. We will focus on aspects of concepts of functioning and disability, including body structures, body functions, activities and participation. We will examine how these concepts are applied in ongoing research within field of rehabilitation sciences. Students will learn through faculty presentations (from among the various research programs throughout the school of health and rehabilitation sciences), facilitated discussion, assigned readings, short written papers, short oral presentations, and peer-review of written products.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: (REHSCI-PHD) or (CSD-PHD) or; SUBPLAN: (PHDHIM-TR) or (PHDOT-TR) or (PHDPT-TR) or (PHDRST-TR) or (PHDSMN-TR)

HRS 3004 - METHODS OF INQUIRY II
Minimum Credits: 1
Maximum Credits: 1
Course focuses on foundational knowledge regarding methods of inquiry for rehabilitation science. The first segment emphasizes outcome measures and the second segment emphasizes prognostic studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 3002 (MIN GRADE "B"); PLAN: Rehabilitation Science(PHD) or Comm Science and Disorders(PHD); SUB: PHDHIM-TR or PHDOT-TR or PHDPT-TR or PHDRST-TR or PHDSMN-TR

HRS 3005 - CORE CONCEPTS 2
Minimum Credits: 1
Maximum Credits: 1
This course is the second course in a two-course sequence examining core knowledge in disability and rehabilitation sciences. In this second course, we will focus on individual and contextual factors that influence disability and rehabilitation, and implications for research. We will examine how these concepts are applied in ongoing research within field of rehabilitation sciences. We will also synthesize concepts and principles and discuss their application in individual student research programs. Students will learn through faculty presentations (from among the various research programs throughout the school of health and rehabilitation sciences), facilitated discussion, assigned readings, short written papers, short oral presentations, and peer-review of written products.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 3003 (MIN GRADE "B"); PLAN: Rehabilitation Science(PHD) or Comm Science and Disorders(PHD); SUB: PHDHIM-TR or PHDOT-TR or PHDPT-TR or PHDRST-TR or PHDSMN-TR

HRS 3140 - INTRO TO TRANSTAL RES HLTH SCI
Minimum Credits: 2
Maximum Credits: 2
Course will provide students with a comprehensive survey of the processes involved in transLating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3410 - DIR RDG CLN SCI & EPID DSBLTY
Minimum Credits: 1
Maximum Credits: 3
In-depth study and readings in the subject content area with faculty mentoring.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad Letter Grade

**HRS 3411 - DIR RDG ORG NL POLCY HLTH/REHAB**
Minimum Credits: 1
Maximum Credits: 3
In-depth study, readings, and critical discussion in the subject content area with student presentations and faculty mentoring.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad Letter Grade

**HRS 3412 - DIR RDG PSY SOC SOCL/CLTL ASPCT**
Minimum Credits: 1
Maximum Credits: 3
In-depth study and readings in the subject content area with faculty mentoring.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad Letter Grade

**HRS 3413 - DIR RDG HLTH INF SYMS/INFO TEC**
Minimum Credits: 1
Maximum Credits: 3
In-depth study and readings in the subject content area with faculty mentoring.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad Letter Grade

**HRS 3701 - WC SETG PRSN NROMTR CTRL DYSFU**
Minimum Credits: 1
Maximum Credits: 1
This is an advanced level course that addresses the posture and seating needs of persons with neuromotor disorders. A problem based learning approach will focus on problem solving issues in seating for persons with neuromotor dysfunction such as cerebral palsy, closed head injury, post drowning and so forth. The total process of evaluation and intervention will be incorporated into the project as well as appropriate readings, demonstrations, use of evaluation tools and discussion about equipment properties.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SU3 Basis

**HRS 3702 - SOFT TISSUE BIOMECHANICS**
Minimum Credits: 3
Maximum Credits: 3
Soft tissue responses to external mechanical loading are of interest in the prevention and treatment of pressure-related tissue injuries. These injuries include ulcers occurring on the plantar surface of diabetic feet, wounds at the inter face between a PROSThesis and a residual limb and pressure ulcers over the bony prominences of immobile individuals with neuromuscular impairments.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 3703 - ARCHITECTURAL ACCESSIBILITY**
Minimum Credits: 2
Maximum Credits: 2
Provides a basic working knowledge of architectural design and construction systems, procedures and terminology related to accessibility and universal design. Topics include: understanding architectural drawings, planning phases of the construction process, translating human needs into construction terms, building codes and ADA accessibility standards. Student project will involve measuring for and designing a home or workplace...
modification. Access to architectural graphic standards by the American institute of architects is recommended.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3704 - INJRY PREVN WHEELCHR TRANSPRNT
Minimum Credits: 3
Maximum Credits: 3
Course focus on crash safety principles as applied to wheelchair transportation. Crash dynamics of the occupant and wheelchair will be studied with an emphasis on evaluating factors which influence crash safety. Computer crash simulation will be used as an investigative tool for this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3705 - WHEELCHAIR BIOMECHANICS
Minimum Credits: 1
Maximum Credits: 1
Discuss all areas of wheelchair biomechanics including stability of wheelchairs and propulsion biomechanics. Students will use kinetic and kinematic analysis to determine the forces and moments occurring in upper extremity joints during the propulsive stroke. Clinical correlates to the biomechanical studies will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3706 - WHLCHR SEATING ELDERLY PERSONS
Minimum Credits: 1
Maximum Credits: 1
Many seniors age without disability. Course will address the component of the elderly population who are sufficiently impaired that they require the use of a wheelchair for seating and mobility for a substantial part of the day. Concerns specific to the population related to posture, skin integrity, mobility, ease of care, self-image and social integration will be presented. A case based project will be a component of this advanced course on seating and mobility.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3707 - POWER WHEELCHAIRS
Minimum Credits: 2
Maximum Credits: 2
Power wheelchairs are an important form of mobility both from a clinical and engineering perspective. Students will learn about power wheelchair controllers, access devices, standards, safety and adjustments. Various components (e.g., batteries, controllers, access device) will be examined in closer detail. Students will perform computer analysis and work with a variety of power wheelchairs. Current issues concerning power wheelchair design and use will be covered. Course will include lectures, demonstrations and laboratory exercises.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: HRS 3710; PLAN: Rehabilitation Science (PHD)

HRS 3708 - INTEGRATED AND SHARED CONTROL
Minimum Credits: 1
Maximum Credits: 1
Students who wish to work in a clinical environment will learn the principles and practices of integrating various technologies. Client needs and priorities will be reviewed. Actual technologies that can be integrated to provide clients with independence will be presented as well as the actual technical information necessary to determine the hardware and software issues to consider with each device.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3709 - INTRO REHABILITATION ROBOTICS
Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introduction to topics related to rehabilitation robotics. The course will cover areas including intelligent mobility aids, robotic manipulation aids, and therapeutic robots. Clinical applications of these technologies are also discussed. The course will be a mix of lectures and projects where students can engage in hands-on learning skills relevant to the design and evaluation of rehabilitation robotics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3710 - CLINICAL APPLICATIONS & SEATING
Minimum Credits: 4
Maximum Credits: 4
Course will cover the clinical aspects of seating and mobility intervention for four diverse populations. First, the special needs of children will be addressed. Include various disability specific goals of intervention. Second are people with acquired spinal cord lesions. Seating and mobility intervention from the time onset - through rehab to independent living. The final two populations are people with musculoskeletal disorders and the elderly.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HRS 2704 and 2705; PROG: Sch Hlth & Rehabilitation Scs

HRS 3711 - QUALT LIFE TEC ETHNOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
Implementing new technology, especially quality of life technologies, requires an understanding of the complete context in which the technology will be deployed. This immersive course teaches and demonstrates ethnographic methodology as applied to understanding context in the lives of individuals with disabilities and older adults. Students will be assigned readings both on ethnographic analysis and background readings in areas as diverse as demographics, health care trends, assisted living analyses, etc. The class will also examine related technology insertion cases studies. Students will work in teams to evaluate actual conditions at local facilities, and will complete a term project in which they characterize specific opportunities for technological intervention.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3712 - HUMAN-MACHINE INTERFACES
Minimum Credits: 2
Maximum Credits: 2
Covers methodology for the modeling, specification, design, measurement, and evaluation of human-machine interfaces (HMI), with an emphasis on technologies for people with disabilities. Topics universal design, physical, perceptual and cognitive capabilities of able-bodied and disabled users and computers, interaction characteristics and options, HMI representation models and method design tools and techniques, and structured, cause-and-effect approaches to designing and evaluating interfaces.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3713 - REHABILITATION ENGR DESIGN
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

1997
HRS 3714 - MACH PERCPTN/MODLNG HUMAN BHVR
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3895 - RDG NEUROMUS ASPCT SPRT INJRY
Minimum Credits: 3
Maximum Credits: 3
The course contains in depth study, readings, and critical discussion related to the role of the sensorimotor system in providing joint stability and how these sensorimotor mechanism are altered with orthopedic sport injury.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

HRS 3896 - RESEARCH SEMINAR SPORTS MEDICN
Minimum Credits: 3
Maximum Credits: 3
Course is designed to introduce student to critical review of research in sports medicine. Students will critique research problems, methodology, analysis and clinical application of published manuscripts. Course will provide student with an opportunity to present and discuss paradigms and specific research proposals that are being developed for completion of thesis and dissertation requirements.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3897 - LAB TECHNIQUES SPORTS MEDICN 2
Minimum Credits: 3
Maximum Credits: 3
Advance graduate level course into the mechanical, neuromuscular and anatomical bases of human movement. Course is to expand the prerequisite knowledge in basic biomechanics as applied to sports medicine. Students will learn quantitative techniques in kinematics, inverse dynamics, and energetic of human movement. Students will also expand on their basic knowledge of programming so as to be able to process data in an autonomous manner.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 3898 - LAB TECHNIQUES SPORTS MEDICN 1
Minimum Credits: 3
Maximum Credits: 3
Course is designed to provide an overview of clinical research paradigms within sports medicine. Student will be introduced to lab testing techniques related to neuromuscular mechanisms associated with sport and orthopedic injuries and develop lab proficiency with components on neuromuscular profiling. Will provide student with acquire data management and analysis techniques and develop research related writing skills necessary to complete thesis and dissertation requirements as well as provide a basis for future scholarly activities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 3999 - DOCTORAL INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.
Academic Career: GRAD
Health Policy and Management

HPM 2000 - INTRO HLTH SERVICES ADMINSTRTN
Minimum Credits: 1.5
Maximum Credits: 1.5
An introduction to present day personal and public health care systems primarily in the United States. The course begins with a historical perspective. It reviews the influence of social, behavioral, political, economic and legal aspects of health care services and how health care organizations can provide a framework for the management of health care and disease prevention programs. Health and human development focuses on the beginning of life, through adolescence, and adulthood, including the problems of aging.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HPM 2001 - HLTH POLC & MGT IN PUBLC HLTH
Minimum Credits: 3
Maximum Credits: 3
The core course is designed to give students an overview of the disciplines and competencies associated with the field of health policy and health care management. Understanding the role of leadership in a public health environment is a unifying theme in this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2002 - LAW AND THE PUBLIC'S HEALTH
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide graduate students with an understanding of the legal structures that define, support, and limit government's authority and responsibility in the interest of public health. The course consists of both didactic and case-related materials selected from primary legal sources as well as from scholarly analyses in public health research and policy. Students will analyze case studies of contemporary public health issues in light of both the law and the practical aims of government's public health functions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HPM 2003 - POLC DEC MKG PH EMRGY/BIOTERSM
Minimum Credits: 3
Maximum Credits: 3
This three-credit graduate course focuses on public health emergencies and bioterrorism at the phases of preparedness, mitigation, and response. The course emphasizes not only biological agents but also all hazards with public health consequences. It addresses the interfaces of policies and laws in the context of federalism, which requires interaction among the federal, state, and local levels of government. The course considers the critical role of private-sector health care providers in addition to governmental decision makers. Students explore past emergencies through history and case studies, conduct directed research on a chosen policy issue, and experience decision-making in the context of a simulated emergency by playing a chosen and previously researched official role. Teaching methods include lectures, case studies, policy research and writing, interdisciplinary classroom discussion, and simulated decision-making.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2010 - ORG STDTS:THRY/APPLCS HLTH CRE
Minimum Credits: 3
Maximum Credits: 3
Focus on the understanding and application of fundamental concepts, principles and models associated with organization theory within healthcare, rehabilitation, and long-term care. Content will encompass the traditional foci of organization theory, e.g. Structure and functions, authority relationships, coordination and control processes, as well as constructs associated with related disciplines of organization behavior e.g motivation theory, leadership, etc. Emphasis on real-world applications. Organization design discussed in contemporary organization structures and processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2012 - FINCL MGT FDS HEALTH CARE & PH
Minimum Credits: 3
Maximum Credits: 3
Introduction to selected finance and accounting topics of health care professional, supervisor and department head. No previous knowledge of accounting or financial management required. First half emphasis on basic financial accounting concepts to provide organization-level understanding language, concepts, processes and functions of financial management. Second half emphasizes managerial accounting principles and techniques including cost accounting and budgeting. Focus shifts to departmental level financial management and role of supervisor process including budget development and control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2013 - FINANCL MGT HLTH CRE ORGNIZTN
Minimum Credits: 2
Maximum Credits: 2
Teaches principles and techniques of financial management as applied to health care organizations; considers financial information and its use in making health care industry decisions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2014 - APPLCS/ISS FINCL MGT HC INSTN
Minimum Credits: 3
Maximum Credits: 3
This curriculum is designed to expand on the concepts presented in the financial management foundations for health care and public health course (HPM 2012). The focus of the instruction will be less book-learning and, instead, primarily be comprised of real-life, practical situations faced in today's healthcare industry. Teachings will be a mix of guest speakers from the local area's leaders and the instructor's experiences. The first part of the semester will revolve around understanding what's behind the data contained in an organization's financial statements. The course will also cover alternative revenue opportunities, such as philanthropic initiatives and investment earnings. Once these concepts have been presented, the instruction will change its focus to managing within a healthcare organization concentrating on budgeting, determining how/what programs to invest in or implement, and balance sheet management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2016 - FEDERAL HEALTH ESTABLISHMENT
Minimum Credits: 1
Maximum Credits: 1
Provides an introduction to the federal legislative, administrative, and budget systems and an analysis of current federal health policies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HPM 2017 - QUAN MTH-DEC TEC/OPRTNS MGT HC
Minimum Credits: 3
Maximum Credits: 3
This course gives an introduction to decision technologies and to the art of successfully using them in practice. Part i: focus on methodologies for optimizing and for predicting the consequences of decisions. Health care applications are considered: resource allocation, scheduling, project management. Part ii: focus on operations management issues in health care. Topics include: forecasting, inventory management and quality control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy & Management (MHA or MPH or LAW) or Health Services Res and Policy (PHD)

HPM 2024 - INVESTMENT & FINANCING DECISNS

2000
Minimum Credits: 2
Maximum Credits: 2
Development of long-range financial planning process in health care organizations. The capital investment decision includes: organization of decision process; development of decision criteria; and techniques for investment appraisal. The financing decision includes: sources and types of long term financing; evaluating the lease-purchase decisions; evaluating alternative financing arrangements; impact of external review of investment financing decisions from perspective of regulatory and creditor bodies. Financing current operating activities/monitoring finance performance.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2025 - HPM PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
The student may register for the HPM practicum upon approval of the faculty of the department of health policy and management. The HPM practicum is designed to provide the student already employed in a healthcare organization with exposure to executive management, leadership, and policy- making processes and activities. Typically, the student will complete the practicum at their employing organization.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

HPM 2028 - MICROECONOMICS APPLD TO HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to microeconomics, the study of resource allocation with particular emphasis on the role of markets. The course focuses on the competitive model. Examples of the use of economic concepts are drawn primarily from the health and medical care delivery systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2029 - HEALTH MGT INFORMATION SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide future health care managers and policy-makers a conceptual framework for understanding and managing an integrated health management information system (HMIS). Primary attention will be given to the overall architecture of HMIS and issues related to health information management. The course focuses on the health care manager's role in the design, implementation and control of an effective HMIS. Instructional methods include lectures by regular faculty and guest resources, class discussion, case analyses and an applied field site study.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2031 - HLTH INFO SYMS LARGE DATABASES
Minimum Credits: 2
Maximum Credits: 2
The course is targeted to future health care administrators. The course covers practical issues facing administrators in the area of information processing. Technology based information systems are discussed as well as the process and resources appropriate for determining and addressing health information needs.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2037 - ESSAY-HA
Minimum Credits: 1
Maximum Credits: 3
The essay is designed to provide the student with an opportunity to integrate the major components of the health administration learning experience. The student is expected to demonstrate analytical ability and technical proficiency in expository writing.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
HPM 2040 - BUDGT/FINANC HLTH CRE ORGNIZTN
Minimum Credits: 2
Maximum Credits: 2
Emphasis is on budgeting and control decision making in the health care industry. Planning and organization of the budget process; budget types and preparation techniques; cost analysis and reporting systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2043 - HOSPITAL ACCONTNG & CONTRL SYS
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2049 - HUMN RESORC MGT HC & PH PROF
Minimum Credits: 2
Maximum Credits: 2
This course encompasses both personnel administration and labor relations concepts, processes and issues presented within a broad human resource management perspective. The emphasis of the course is on behavioral implications of legal-regulatory, economic, cultural, and technical forces affecting the management of people in health care organizations viewed as an open system. Perspectives of organization theory and behavior, personnel and labor law will be applied to the analysis of human resource/labor relations problems and effective management and supervisory practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2050 - HEALTH SYMS ENGINEERING SEMINR
Minimum Credits: 0
Maximum Credits: 0
The seminar supplements the education provided by health policy and management and industrial engineering departments by creating a forum for exposure and discussion of healthcare systems engineering issues. Students become aware and are exposed to the role of vendors/consultants that bring solutions for healthcare delivery processes. The standards for professional leadership required for health management are reinforced.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

HPM 2055 - MGNG HLTH PROGS & PROJECTS
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to prepare students to effectively manage health programs and projects. The course is lecture/discussion based, but with ample analytical and written assignments. Extensive use is made of internet resources. A conceptual model of core (strategizing, designing, and leading) and facilitative (communicating, managing quality, marketing, and decision-making) management activities is used to structure the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy & Management (MPH)

HPM 2061 - HEALTH POLICY PROCESS
Minimum Credits: 3
Maximum Credits: 3
A close examination of recent major federal health policy changes and directions. Health planning, hospital cost containment, national health insurance, HMO's and competition policies are covered. Students present a major policy analysis paper.
Academic Career: GRAD
HPM 2063 - THE POLITICS OF HEALTH POLICY
Minimum Credits: 2
Maximum Credits: 2
This course provides practical knowledge to help students understand and operate in the political system in which health policy is formulated and implemented. It is designed to build on other courses that teach students policy analysis by offering instruction in: recognizing the importance of political issues such as agenda setting, interest groups, ideology, and political parties in health; analyzing the political environment for different health policies; and developing political strategies to achieve change in those policy areas. Weekly class meetings are a mixture of lecture and discussion. Further, students will practice skills in political analysis through case studies of political strategies in health policy. The focus of the course is on U.S. Health policy, but the skills acquired are relevant to international settings as well.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2064 - HEALTH POLICY ANALYSIS
Minimum Credits: 2
Maximum Credits: 2
The aims of this course are to provide students with 1) an overview of the U.S. Health care delivery system and current policy challenges, and 2) an introduction to policy analysis tools useful for defining policy problems, assessing alternative solutions and examining effects of health policies. The framework used for achieving these aims will be to consider health policy from the perspective of the main stakeholders in the system: patients, providers, health plans, suppliers (e.g. Pharmaceutical and manufacturing industry), and payers. Course materials include a policy analysis text book, peer-reviewed articles, and case studies of contemporary health policy issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2065 - HEALTH POLICY AND DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course will cover six thematic areas: 1) the linkages between health and development. 2) Overview of the global burden of disease. 3) Child, women and environmental health. 4) Global health issues (e.g., Patent protection for HIV/AIDS drugs, incentives for development TB/malaria treatment. 5) Healthcare reform and financing. 6) Familiarity with health data sources for developing countries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2070 - SEMINAR HEALTH POLICY & MGMNT
Minimum Credits: 0.5
Maximum Credits: 0.5
Seminar permits the HA program faculty and program students to interact about topics presented in the health policy institute's lecture series in health policy and management. Purposes--increase students' knowledge and understanding of contemporary health policy and management issues and the context in which they exist; give students opportunities to observe and consider how the theoretical and didactic content of their curriculum applies in the world of practice; and increase students' sense of connection to the world of practice by exposing them to excellent practitioners in discussions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

HPM 2072 - HLTH REFRM US: PAST PRES FUTR
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to survey the history of health reform in the U.S. And analyze the new 2010 patient protection and affordable care act and its potential impact on the health care system. The course will examine the development of the 2010 federal reforms and how the new law intends to address healthcare delivery, cost containment and access to care. The course will help students and practitioners understand the current regulatory environment and prepare them to analyze future health reform. Teaching methods include lectures, including guest lectures by principals involved in past and current reforms, case studies and interdisciplinary classroom discussion.
Academic Career: GRAD
HPM 2080 - INTRODUCTION TO PATIENT SAFETY
Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introduction to patient safety in the U.S. Healthcare system. No previous knowledge of safety is required. Emphasis early in the course will be placed on understanding the healthcare system and errors that exist. Then the course will emphasize regulations in different healthcare settings related to patient safety. Finally, specific tools that are used in patient safety settings will be described.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2081 - PUBLIC HEALTH AGENCY MGMNT
Minimum Credits: 3
Maximum Credits: 3
The course public health agency management focuses on the areas of knowledge and skills necessary to manage public health agencies. The course covers topics such as core functions and public health practice, legal basis for public health, public health interventions, configuring health departments, fundamentals of management theory and application, agency budgeting and public health constituencies. Classes include a lecture and class discussion of a case study or related question. The class ends with a final group report and group presentation of a class project relative to the development of a county health department.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HPM 2105 - INTRO TO US HC DELIVERY SYST 1
Minimum Credits: 1
Maximum Credits: 1
Introduction to the US Healthcare Delivery System 1 is a required course for first year HPM MHA and MPH students. This course is the first of a two part sequence that will: provide an historic and current overview of basic elements of the US healthcare delivery system, review HPM practical experiences in the context of professional and leadership competencies, and include current perspectives provided by selected guest healthcare executives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy and Management (HPM-MHA or HPM-MPH or HPMLAW-MPH) or Healthcare Systems Engineering (HSEPH-ACM)

HPM 2106 - HLTH SYSM LDRS & PROF DVLP 2
Minimum Credits: 1
Maximum Credits: 1
This is a required spring course for the first year MHA that covers additional elements of us healthcare system. Review in great depth of the management residency process, expectations and opportunities continues in this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Policy and Management (MHA or MPH) or Law (LAWMPH-JD)

HPM 2108 - LDRS, PROFISM AND CAREER DVLP
Minimum Credits: 1
Maximum Credits: 1
This is a required course for MPH and MHA students related to the fundamentals of three areas: leadership, which focuses on teamwork, managing and leading people, and communication best practices. The second, professionalism, focuses primarily on principles of etiquette, professional dress, communication best practices and setting oneself apart in the professional setting. Finally, career development principles are covered and this touches on career paths, decision making for career success, and optimizing various work and professional organization experiences for professional growth. The course is primarily interactive in lectures and also requires the students to keep a journal for self-reflection on the topics. A dinner etiquette consultant joins the class as well as an executive from the field to give their perspectives on the three main principles. Accountability, communication, leadership, self-development, and professionalism are the competencies covered in the course.
Academic Career: GRAD
HPM 2110 - MANGNG PROFESSIONAL ORGANIZTNS
Minimum Credits: 3
Maximum Credits: 3
Focuses on structure and functioning of hospitals, corporate systems, health maintenance organizations, and preferred provider organizations. Considers key aspects of governance, medical staff organization, and the chief executive officer's role.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2115 - HPM MANAGEMENT RESIDENCY
Minimum Credits: 1
Maximum Credits: 1
The course is designed to provide the student with an educational experience in the student's field of interest. It is a field experience performed under the supervision of a preceptor (i.e., A respected professional manager in the health field). Potential sites include a broad range of organizations such as hospitals, multi-unit systems, HMO's, consulting firms, insurance organizations, health policy and planning agencies, and health divisions of corporations.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

HPM 2120 - HEALTH ACCOUNTING AND FINANCE
Minimum Credits: 3
Maximum Credits: 3
Emphasis is on budgeting and control decision making in the health industry and upon principles and techniques of financial management as applied to health care organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2125 - HEALTH ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
Examines the market for medical services, with the view that the special nature of the market demands careful economic analysis rather than the abandonment of economic principles. Topics include the demand for health and the derived demand for health/medical care and insurance, the supply of medical services (physician and hospital in particular), the roles of uncertainty and information, and the problems of pricing, production, and distribution of health and medical services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HPM 2130 - HEALTH LAW AND ETHICS
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to the legal and ethical issues which impact the administration and delivery of health services. This course is designed to provide students with the practical knowledge needed to identify legal issues inherent in health care and public health administration and to understand the legal ramifications of administrative and management decisions. Through lecture and class discussion four main subject areas are presented: an introduction to the legal system, legal issues in managing health care organizations, regulating quality of care and public health legal authority. Specific course topics include: sources of law, the court system and legal procedures, professional and institutional liability, governmental regulatory methods, antitrust law, corporate compliance programs, emergency care, and issues concerning informed consent, credentialing of medical professionals, confidentiality of health information, and termination of care, family planning, and public health law.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2131 - PUBLIC HEALTH LAW AND ETHICS
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to public health law and policy and the legal environment in which public health is practiced. The course is designed to familiarize students with the process by which laws are created, interpreted and enforced, and to introduce them to the substantive areas of law most relevant to the field of public health. Through lecture, case analysis, class discussion and student presentations, five main content areas will be presented. 1) The legal basis for public health practice; 2) the law and core public health functions; 3) the law and controlling and preventing diseases, injuries, and disabilities; 4) public health emergency law; and 5) the ethical issues impacting public health practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2132 - EMERGENCY PREPRDNS LAW ETHICS
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to introduce students to emergency preparedness law. The course is designed to familiarize students with the process by which laws are created, interpreted and enforced, and to introduce them to the substantive areas of law most relevant to the field of emergency preparedness. Through web based modules, class lecture, case analysis, class discussion, class exercises and student papers, six main content areas will be presented. 1) The legal framework for preparedness and response; 2) legal duties under the national response framework; 3) public health emergency law; 4) the constitutional constraints on preparedness law; 5) employer/employee emergency preparedness issues; and 6) liability and legal preparedness. This course is approved as an elective for the certificate in public health preparedness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2133 - LAW IN PUBLIC HEALTH PRACTICE
Minimum Credits: 2
Maximum Credits: 2
Local health departments play increasingly pivotal roles in the provision of community public health services; however, they also are experiencing diminished funding and reduced workforces. This course is the first of its kind offered at the University of Pittsburgh: a practice-based, collaborative learning experience for public health and law students. Together, students will develop interventions to address an issue identified by the Allegheny county health department as requiring the expertise of both cohorts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2134 - INTRO TO HC COMPLIANCE
Minimum Credits: 2
Maximum Credits: 2
This course will provide an overview of the legal landscape regarding health care compliance and demonstrate the importance of compliance for health care organizations. As one of the most highly regulated industries in the United States, health care entities are required to comply with numerous statutes and regulations at the federal and state level, with harsh penalties for non-compliance. Thus, individuals involved in the administration and delivery of health care must be well-versed in these laws and regulations, as well as the strategies health care entities employ to address particular compliance concerns. Specific topics include fraud and abuse; data privacy and security; the elements of effective compliance programs; audits, investigations, and self-disclosures; and significant compliance risk areas for various health care entities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2135 - HEALTH POLICY
Minimum Credits: 2
Maximum Credits: 2
An introduction to federal and state legislative, administrative, and budget systems as they affect health services. The course focuses on the study of selected health policies, considering them in their historical perspective, present status, and future direction within their social, economic, and political contexts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
HPM 2140 - CAPITL FORMATION HEALTH SECTOR
Minimum Credits: 1.5
Maximum Credits: 1.5
Examines relationship between the strategic planning process and the capital investment and capital financing decisions. Considers organization of the decision process, development of decision criteria, and techniques for evaluating alternative investment and financing proposals in the health sector.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2141 - MANAGERIAL EPIDEMIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Epidemiology is concerned with the measurement of the health of populations and understanding the determinants of that health. It is one of the fundamental disciplines of public health, and provides the basis for much of what we know about health and disease. As a required MHA course, managerial epidemiology takes a broad view of the definition of population, and will include the study of multiple populations of interest, such as the population: cared for in the service area of a hospital, covered by a particular insurance carrier, and larger populations such as a state, nation and the world. The course provides students with the knowledge and skills required to analyze, understand and interpret the data produced by health care organizations and identify the managerial implications of the data by summarizing data appropriately, understand the characteristics of mechanisms (methodologies) that created the data, and know when data observed is a common/expected or rare occurrence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2142 - MANAGING HEALTH OF POPULATIONS
Minimum Credits: 3
Maximum Credits: 3
This course provides students with skills and experience applying analytic techniques to the management of the health of populations. Content includes health assessment, evaluating health improvement programs, and assuring the quality of health care services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2110 and BOST 2011; PLAN: Health Policy and Management (MHA or MPH or HPMLAW) or Health Services Res and Policy (PHD)

HPM 2143 - PH SYMS:LGL,ECON&OPRATNL FDS
Minimum Credits: 2
Maximum Credits: 2
This is a required course for the mph degree in health policy & management. The U.S. public health system is comprised of both public-sector and private-sector entities whose interdependencies and competing interests must be understood by those responsible for decision making and problem solving. This course orients students to the governmental and organizational systems that support population health in the United States and, for purposes of comparison and global operations, in other countries as well. The course examines critical public health system problems with emphasis on health disparities and vulnerable populations. Students will hear lectures, engage in case study discussions, and conduct problem-based learning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2145 - MKTG HLTH SVCS STRAT BUS PLANS
Minimum Credits: 3
Maximum Credits: 3
Analysis of concepts vital to the creation of superior competitive marketing planning strategies for health services providers. Emphasis, using principles of epidemiology, on effective measurement of need in service area.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2148 - HEALTH POLICY
Minimum Credits: 3
Maximum Credits: 3
This course examines several of the central issues in health care policy. The main focus is on the United States, although there is a comparative focus with other developed nations and a concern with the obligations of the developed world to poorer nations. Students are welcome to examine issues in other countries in their papers. A persistent question is whether the care we provide is "worthwhile." Deciding what kind of care is "worthwhile" is, of course, fraught with difficulties—analytical, ethical, economic, and political. An important component of this course is trying to understand the uses and limits of economic analysis in allocating resources for health. The focus is on the impact of medical care on health status, although other benefits of health care will be reviewed as well.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2150 - STRATGC MGT HLTH SERVC ORGNS
Minimum Credits: 3
Maximum Credits: 3
This capstone* course for the program stresses the application and integration of knowledge and techniques learned in the context of specific functions and disciplines focuses on identifying strategic issues in complex environments, and formulating realistic responses. The emphasis throughout is on understanding how to improve the major patterns of resource allocation within the organization in order to create lasting value.*
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2203 - FINANCING & REGULATING LTC SERVICES
Minimum Credits: 1.5
Maximum Credits: 1.5
This course is designed to provide the student with an overview of the financing and regulation of long term care services. Students will understand the interrelationship between the methods chosen to finance health care services, state regulations about quality and quantity and the structure of LTC that has evolved. Students will understand the role of demonstrations as a method to inform policy makers on how to change LTC policy. Students examine the traditional role of insurance and characteristics of the markets that inhibit growth of insurance programs for LTC.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2204 - MEDICAL PRACTICE MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
The course will provide students with the fundamental practical information and managerial tools that are requisite in the successful operation of medical practices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2205 - INDEPENDENT STUDY-HA
Minimum Credits: 1
Maximum Credits: 3
Students with major interests in specialized areas participate in individual study, research activities, or advanced readings with a specified faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

HPM 2206 - CONTINUOUS QUALITY IMPROVEMENT
Minimum Credits: 2
Maximum Credits: 2
Examine the evolution of TQM into the healthcare field; define quality in this setting; discuss the management paradigm shift necessary for CQI implementation. Topics include management culture, nature of quality, cost of quality, problem solving/quality improvement, customer supplier chain, measurement, tools of CQI, role of physician in CQI, benchmarking, implementation planning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
HPM 2207 - QUALITY ASSMNT PATIENT SAFETY
Minimum Credits: 3
Maximum Credits: 3
Examines the definition of quality in healthcare from the perspectives of providers, health plans and consumers. Healthcare standards of JCAHO, NCQA, and HEDIS are reviewed. The role of clinical pathways, outcome measures, technology and the internet are explored as they impact the quality of healthcare.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2208 - MANAGED CRE: PRACT REV HOW WRK
Minimum Credits: 1.5
Maximum Credits: 1.5
The course will present and analyze the key elements of a successful managed care organization, and will focus on both HMOS and PPOS. The tools and organizational structure of managed care will be described; the departmental functions will be analyzed and an on-site health center and headquarters field tour is included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2209 - SELECTED HLTHCRE LEGAL ISSUES
Minimum Credits: 2
Maximum Credits: 2
Intensive consideration of specific subjects of major concern to hospital administration; governing board, medical staff, managed care, contracting, emergency services and research with human subjects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2210 - MANAG IN REAL WORLD PUBLC HLTH
Minimum Credits: 3
Maximum Credits: 3
This class is intended to give an introduction to real skills needed for the art and science of management, letting students take home some of the crucial competencies needed to successfully lead public health programs. Topics include: financial management, budgeting, grant writing, plan, law, report writing, staff management, communication, and working in the community and organizations. Students can interact with public health practitioners who manage a variety of programs. Instructors use authentic case examples to show how work is done in the real world, with limits of time, resources, bureaucracies, working with people.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2212 - HOSPITAL RISK MANAGEMENT
Minimum Credits: 2
Maximum Credits: 2
Covers all facets of hospital risk management; including risk financing, loss prevention, and loss control. As a result of this course, the student should be prepared to assume the duties of associate director for risk management of a hospital.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2214 - FUNDAMNTLS OF HEALTHCRE GVRNC
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide students with a sense of the responsibilities of governing boards of voluntary hospitals and to enable them to interrelate with their boards appropriately and constructively. The substance of interrelationships between governing boards and managements is as varied as are the forms of the organizations to which they relate and the personalities of the individuals involved. Subjective perceptions are often more important than formal rules and effective governance is more art than science. The course provides guidelines to this art.
Academic Career: GRAD
HPM 2215 - CMP MTHS DEC CST-EFFCTN ANAL
Minimum Credits: 1
Maximum Credits: 1
This course expands on topics introduced in cost-effectiveness analysis in health care and in clinical decision analysis and provides additional
guidelines for using decision sciences in larger, more complex applications. Topics include modeling clinical processes and systems; discrete event
simulation; advanced sensitivity analysis and confidence limits; controversies surrounding the use of cost-effectiveness analyses; and multi attribute
utility theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2216 - HLTH INSURANCE: FINC. HLTH CRE
Minimum Credits: 3
Maximum Credits: 3
Course examines the concerns and practices of private health insurance; the relationships and activities established by the insurance contracts among
the insurer, insured, and providers; the insuring process of marketing, underwriting and pricing; the interrelationships of private and public insurance
programs; and the varied government activities related to insurance. The objective of this course is to increase understanding of the access, funding,
and insuring issues surrounding health care and to explore the alternate strategies being pursued in response to environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2217 - CLINICAL DECISION ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
This course provides an introduction to the use of decision sciences in health care. In addition to developing a conceptual understanding of medical
decision-making, the course will develop technical skills in decision analysis including the creation/evaluation of decision trees, the use of sensitivity
analysis, and the incorporation of specific patient preferences through the use of utility analysis. The advantages and disadvantages of formal
mathematical models for the analysis of clinical conditions will be presented. Examples from current medical literature will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2218 - INTEGRATED DELIVERY SYST NETWORK
Minimum Credits: 1.5
Maximum Credits: 1.5
Course will explore three aspects of integrated delivery systems: 1) efforts to develop vertically integrated services 2) integration of physician and
hospital services, and 3) integration of payer and providers. Students enrolled in the course will complete an in-depth analysis of a successfully
operating integrated system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2219 - REENGINEERING OPERATIONS HEALTH
Minimum Credits: 1.5
Maximum Credits: 1.5
Reengineering operations in healthcare will provide students with an understanding of a critical component of healthcare reform—one which leads to
improved quality and dramatic cost reduction. Students will be lead through the various components of a reengineering report by industry experts
and, through lecture and by sharing actual experiences, will be taught the key elements of a successful reengineering project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 2220 - COST EFFCTVNS ANAL HLTH CARE
Minimum Credits: 1
Maximum Credits: 1
Provides an introduction to and develops technical skills in the economic evaluation of health care programs. A brief introduction to the economic foundation of cost effectiveness and cost benefit analysis is followed by an examination of the methodologies involved in performing cost effectiveness analyses. Topics include: definitions of cost and benefits, effect of the perspective of the analysis, calculation of cost-effectiveness ratios, performance of sensitivity analysis, discounting of costs and benefits, and discussions of current controversies in conduct of cost-effectiveness analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2221 - INTRO TO MEDICAL INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities in medical information processing.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2222 - KNOWL REPRESNTN CLN DEC SUPPRT
Minimum Credits: 3
Maximum Credits: 3
This course is an in-depth review of clinical information systems (e.g., Electronic medical records). We will review systems of historical interest and representative current systems. Topics will include functional requirements, standards, security, and technology.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2223 - EVAL METHODS MEDICAL INFORMTCS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to expose students to the wide range of empirical evaluation and research methods used in medical informatics, to immerse students in the empirical literature of the field, and to prepare students to design and conduct studies appropriate to problems in the field.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2224 - INTRO CLN MULTIMEDIA & INTRNET
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to the core technologies and applications related to clinical multimedia and medical applications of the internet. The subject introduced will include medical imaging modalities, medical imaging standards, image databases, image compression and multimedia technologies. The internet applications section of the course will review internet technologies and applications in clinical medicine and education.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPM 2225 - KNOWL REPRESNTN CLN DEC SUPPRT
Minimum Credits: 3
Maximum Credits: 3
This course is an in-depth treatment of knowledge representation formalisms used in the field of medical informatics. Topics will include the following formalisms: logic, rules, tables, transition networks, semantic networks, probabilities, Bayesian belief networks, influence diagrams and decision trees.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
HPM 2240 - CSE STDY ANAL & PRSNTN HC MGT
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to foster crucial skills for healthcare leaders including persuasive public speaking, assessment and analysis skills of case studies, as well as the ability to work in teams to solve problems. This course focuses not only on the ability to increase skill in these areas but also develop professionally by presenting in front of healthcare executives and conveying messages effectively and creating buy-in on their proposed solutions to problems. The course is a prep course for the students to also attend the University of Alabama at Birmingham case competition in the winter, a prestigious competition of most mha programs in the country. The course will include three cases, analyzed and prepared by students broken into teams, where after preparation and analysis will present to executives in the community for scoring and judging. The team will be selected based on student performance from the course.
Academic Career: GRAD

Grade Component: Grad Letter Grade

HPM 2275 - HPM SPECIAL STUDIES
Minimum Credits: 1
Maximum Credits: 3
Properly qualified students may undertake advanced study under the guidance of an HPM faculty member(s).
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

HPM 2300 - HEALTH LAW FIELD EXPERIENCE
Minimum Credits: 3
Maximum Credits: 3
Required placement in a law firm or in a house counsel office in a health organization or system, a public health agency, or a health policy agency.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

HPM 2700 - SEMINAR IN HLTH SYMS LDRS
Minimum Credits: 2
Maximum Credits: 2
This course will consist of a series of cased-based examinations of specific managerial and leadership problems and decisions that have faced local health systems leaders in Western Pennsylvania. Health care reimbursement, licensing and accreditation, and measuring health care quality has become both more complicated and more important as pressures to reduce expenses and improve quality increase. Simultaneously, there has been a steady increase in the number of clinicians who have assumed managerial positions, such as medical directors of clinical units, directors of quality measurement and improvement programs, utilization review and many others, as well as the appearance of clinicians in the "c-suite" of many hospitals and health care organizations. Utilizing adjunct faculty who are currently (or very recently have been) executive leaders in health systems, this course will examine a series of collaborations, problems, conflicts and solutions that developed between health system administrators and clinical leadership in health care organizations in the Western pa area. The mechanics of the course will be a series of cases, based on an actual recent issue in health care management in which the senior adjunct faculty member was involved. Students (individually or in groups) will evaluate the case, prepare a response, and make a short presentation of their 'solution' to the problem to the health system executive and clinical leader involved in that case. An interactive discussion will follow. This is a required course for students in the certificate in health systems leadership and management program, and can be used as an elective course by other students with permission of the instructor.

Grade Component: Grad Letter Grade

HPM 2821 - CURRENT TOPICS HLTH ECONOMICS
Minimum Credits: 2
Maximum Credits: 2
The purpose of the course is to provide students with exposure to current topics in the field of health economics from the perspective of active researchers. A series of health economists will be invited to deliver seminars on a current research project of their own, addressing the theoretical background, methodology and practical implications of their findings. Students will gain a broad perspective on their field of health economics and the range of topics and methodologies used by researchers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis
HPM 2905 - QUASI-EXPRML DSGN HSR
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students with the research design skills drawn from the social science tradition as applied to the delivery of health services. This course provides a survey of research design, selection and development of research questions, conceptualization, measurement, and data collection/acquisition. The focus is on the application of quasi-experimental and observational approaches to research in applied health care settings.

Course Component: Lecture
Grade Component: Grad Letter Grade

HPM 3010 - SEM ORGNL STDS:HC ORGS/ENVRNS
Minimum Credits: 3
Maximum Credits: 3
This seminar is intended to facilitate the mastery of conceptual approaches to health care organizations. Through a combination of in-class discussions, self-directed research, written analyses, and oral presentations, students will clarify complex issues and evaluate innovative ideas. The course content will include such topics as organizational design, organizational behavior, and organizational environments. The primary approach to analyzing organizational phenomena will be the theoretical basis of causality, and the level(s) of analysis addressed by the theory.

Course Component: Seminar
Grade Component: Grad Letter Grade

HPM 3064 - HEALTH POLICY ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course is the doctoral version of HPM 2064. Doctoral students have supplemental reading and writing requirements for this course. The aims of this course are to provide students with 1) an overview of the U.S. Health care delivery system and current policy challenges, and 2) an introduction to policy analysis tools useful for defining policy problems, assessing alternative solutions and examining effects of health policies. The framework used for achieving these aims will be to consider health policy from the perspective of the main stakeholders in the system: patients, providers, health plans, suppliers (e.g. Pharmaceutical and manufacturing industry), and payers. Course materials include a policy analysis text book, peer-reviewed articles, and case studies of contemporary health policy issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Health Services Res and Policy

HPM 3065 - ADV HEALTH POLICY ANALYSIS
Minimum Credits: 2
Maximum Credits: 2
This course is designed to build on the principles learned in HPM 3064: health policy analysis. It is an advanced course for doctoral students in health policy and other disciplines with a focus on policy evaluation, translating the results of policy research for policy makers, and challenges to implementing health policies. Students will be expected to examine four current health policy topics in depth by examining the challenges to policy implementation, critiquing large-scale evaluations of health policies, and tracking the influence of research evidence on the policymaking process. The perspectives of policy analysts, practitioners implementing (or responding to) policies, and policy makers will be examined for each of four topics. The course format will include a combination of student-led discussions and formal presentations, lectures by the instructor, and guest lectures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPM 3073 - CMPTL MODLNG INFECT DISEASES
Minimum Credits: 3
Maximum Credits: 3
This seminar course is intended to understand and master the concepts of computational modeling of infectious diseases. Through a combination of in-class discussions, self-directed research and oral presentations, students will identify current research topics and innovative approaches in modeling methods including agent-based modeling, mathematical modeling, methods to perform probabilistic sensitivity analysis, expected value of perfect information, and advances in cost-effectiveness analysis.
Academic Career: GRAD
HPM 3125 - INTERMEDIATE HEALTH ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to expand on intermediate microeconomic principles and apply these more sophisticated dynamics to the health care market, both domestic and international. Familiarity with introductory economics and calculus is assumed. Course time will be spent on a combination of lectures and discussions of seminal papers to explore theoretical frameworks and their empirical applications.
Academic Career: GRAD

**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
HIST 2025 - TEACHING WORLD HISTORY
Minimum Credits: 3
Maximum Credits: 3
This course provides training for teaching world history surveys. Students will engage with the content of an existing world history survey and learn about available resources for the teaching of world history. Simultaneously, an ongoing dialogue between the existing survey, the analysis of the teaching resources, and the student's own ideas will result in the formulation of new world history surveys by each student based on their evolving understanding of the field, strengths, and preferences. History and education students are warmly welcome to join this workshop.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2030 - MULTMED PRESENTN OF RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This seminar will train graduate students to use a variety of multimedia software tools to create engaging presentations of their graduate-level research and new instructional materials to employ in their undergraduate teaching. Students will design and build a variety of multimedia vehicles to present their specialized research, including: advanced PowerPoint presentations, websites, digital videos, and interactive software applications delivered on CD-ROM or over the internet. The course will also involve discussion of issues related to research presentation before different types of audiences and an exploration of the values and limitations of different presentation methods for the communication of knowledge.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2035 - SEM AUDIENCE & RECEPTION HIST
Minimum Credits: 3
Maximum Credits: 3
Introduces approaches to reconstructing historical audiences for various media productions. Exercises and case studies will be drawn from the mid-19th-century U.S., and will emphasize visual and typographic aspects of books, periodicals, and ephemera. Assigned readings may encompass other media forms and time periods. Attention will be paid to gender, class, ethnicity, race, and region in discerning who read what when and where, and what it meant to them.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2042 - SOCIOLOGY OF REVOLUTION
Minimum Credits: 3
Maximum Credits: 3
Through readings and discussion of (usually) recent studies, this course will survey a variety of questions concerning the causes, unfolding and consequences of revolution. Some of the topics to be treated: the causes of rural revolts; political crises of old regimes; the rise and significance of revolutionary parties; the institutionalization of new regimes; reigns of terror; the molding of new men and women.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2043 - SOCIAL MOVEMENTS
Minimum Credits: 3
Maximum Credits: 3
Various theories and models to study social movements are examined. Emphasis is placed on structural conditions that contributed to the emergency of the movements. Their development over time and what changes, if any, are brought about to the social system in which the movements occurred.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2045 - MEMORY POLITICS
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the study of memory. We will be reading classic works on collective memory, including Maurice Halbwachs, Pierre Nora and Jan Assmann. We will explore how societies remember and how they decide what is included in official history books. Our
discussions will focus on how the politics of memory are shaped by actors such as the state, the media, lobbying groups as well as different political agendas. We will read case studies concentrating on modern Europe with additional readings from classical antiquity, the medieval world, Asia and the Americas for comparative perspectives.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2049 - COMPARATIVE WELFARE STATES
Minimum Credits: 3
Maximum Credits: 3
Starting from the mid-nineteenth century the seminar is a historical and political critique of the main theories of contemporary welfare state. Attention is roughly divided equally between the diverse origins of the British, French, Swedish and German welfare states in the nineteenth century; the impact of new social theories and social thought on the design of welfare states early in the century and between the wars; and how the organization and structure of welfare states following the war was influenced by this experience.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2050 - POL PRA/RESN EURPN SOCL THGHT
Minimum Credits: 3
Maximum Credits: 3
A survey of the development of European social thought and social science from the late nineteenth century to the present focusing on the revisions of positivist thinking. Various questions raised by the post-empiricists will be discussed; subjective knowledge, the limits of language, intentionality and historical explanation. Special attention will be given to the historical and social context of social explanation as it relates to the British idealists Durkheim, Weber and the Frankfurt school.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2051 - MODERNZATN IN THE OTHER EURP"
Minimum Credits: 3
Maximum Credits: 3
This course seeks to problematize the view of Europe as composed of a modern, mainly Western European center and backward areas on its margins. We will deal with the impact and style of modernization during the 19th and 20th centuries and analyze the political, social, and cultural forms that these took in the allegedly backward parts of Europe.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2055 - ATLANTIC LABOR HISTORY
Minimum Credits: 3
Maximum Credits: 3
This graduate seminar provides students with the opportunity to examine either a specific historical period or historical process as it unfolded in three different countries- America, Great Britain, and Russia/Soviet Union. The course is a reading seminar in which the stress is on aspects of Atlantic labor history.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2069 - GENDER IN GLOBAL PERSPECTIVE
Minimum Credits: 3
Maximum Credits: 3
Graduate reading course introducing recent historical writing on women and men, the body, and sexuality in different areas of the world and from different theoretical perspectives. Students will have the opportunity to pursue their own particular thematic, chronological, and geographical interests.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HIST 2070 - ERLY EUROPEAN HISTORY-READINGS
Minimum Credits: 3
Maximum Credits: 3
History 2070 introduces major themes in transEuropean history from the early middle ages to the seventeenth century. The work of the seminar is reading and oral and written discussion of major scholarly syntheses with broad implications for understanding premodern European societies, institutions, and cultures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2071 - MODERN EURPAN HISTORY-READINGS
Minimum Credits: 3
Maximum Credits: 3
Examines major themes in transEuropean history from the eighteenth century to the present via a series of significant monographs and overviews on various places, times, and topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2075 - EURPN ORIENTALISMS: 1750-1950
Minimum Credits: 3
Maximum Credits: 3
This course investigates European orientalisms, i.e. The ways Europeans conceived of peoples and cultures allegedly different from themselves and at least potentially suitable to be turned into their colonial subjects. Dealing with the entire period from the 18th century enlightenment to the time after World War II, a number of different orientalisms will be examined and compared with each other. In particular, the course will look at British, French, Italian, German and Russian forms of orientalism and related colonial projects in the Americas, in Asia, Africa, the pacific, the Mediterranean, Eastern Europe and Siberia.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2080 - PROBLEMS OF EURPAN HIST - RDGS
Minimum Credits: 3
Maximum Credits: 3
This reading seminar will examine aspects both Western and Eastern European from a comparative perspective. Topics include modernization, class formation, nation building, ideology and culture.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2081 - PROBLEMS OF EURPAN HIST-RSRCH
Minimum Credits: 3
Maximum Credits: 3
This research seminar is a sequel to HIST 2080. Students will conduct primary research on some aspects of European history.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2082 - COMPARATIVE NATIONALISM RDGS
Minimum Credits: 3
Maximum Credits: 3
This reading seminar will examine nationalism in a comparative context. The readings will include theories of nationalism and analyses of nationalist symbols.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HIST 2083 - COMPARATV NATIONALISMS - RSRCH
Minimum Credits: 3
Maximum Credits: 3
A continuation of History/Cultural Studies 2082, this seminar will provide the context within which students who enrolled in the reading seminar will develop research proposals, conduct research, and present their research findings to the seminar. Each student, in consultation with his major advisor, will be expected to produce a research paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2085 - COMPARATIVE COMMON LAW
Minimum Credits: 3
Maximum Credits: 3
A readings seminar, followed by a research term, comparing property, contract, tort, criminal and constitutional law in British commonwealth and the U.S.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2087 - COMPARATIVE MILITARY SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
A reading seminar, designed to help the student to identify a research topic. Topics include: the general relationship between the military and society; civil-military relations; coups; mutinies; recruitment and social origins of military personnel; training and value-inculcation; military ideology; combat motivation and morale; war crimes; veterans; the military as "nation-builder"; and the consequences of military service. The readings are "comparative", with selections in each topic from a variety of nations and chronological eras.

HIST 2100 - READINGS IN EUROPEAN HISTORY
Minimum Credits: 3
Maximum Credits: 3
In this seminar, graduate students will be introduced to a wide variety of readings in the history of Western Europe.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2101 - EUROPEAN READINGS, 1500-1850
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the political, social, economic, and cultural history of Europe from the early modern period to the mid-nineteenth century. Students will read and prepare circa 15 major books and introduce and lead seminar discussion. The course serves as preparation for comprehensive exams in European history. Students of other regions, periods, or disciplines will gain a broad understanding of themes and approaches in the historiography of early modern Europe.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HIST 2102 - EUROPEAN READINGS 1850-PRESENT
Minimum Credits: 3
Maximum Credits: 3
This course provides a forum for the discussion of major trends of European history from the mid-19th century to the present, and their reflection in
historiography. While the course content reflects the history department's current European reading list for the comprehensive Ph.D. examination,
thus introducing a thematically and methodologically wide range of historiographical literature, an effort has been made to structure the course along
coherent chronological and thematic lines.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2110 - RELIGION COMMUNICATION CULTURE
Minimum Credits: 3
Maximum Credits: 3
We consider religious phenomena as expressions of human communication and therefore view the study of religion as the interpretation of particular
forms of communication; metaphor, symbol, paradox, myth and ritual.
Academic Career: GRAD
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

HIST 2118 - EARLY MODERN EUROPE
Minimum Credits: 3
Maximum Credits: 3
A reading course which considers some of the most prominent and controversial historians of a period that has been fruitful for the development of
the social sciences generally.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2119 - KINGS AND COMMUNITIES
Minimum Credits: 3
Maximum Credits: 3
In this readings seminar we will examine the growth of the state," the relationship between kings and communities, and the theories of legitimacy
advanced on behalf of each (including theories of resistance and obedience). Specific geographic areas covered include Iceland, England, Spain,
France, and Russia."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2120 - REPBCLN THOUGHT 17THC ENGLAND
Minimum Credits: 3
Maximum Credits: 3
This course focuses upon the major antimonarchical writings of the English Revolution. Authors examined include John Milton, Marchamont
Nedham, James Harrington, and Algernon Sidney. These works will be read in their contemporary intellectual and political contexts. This will enable
us to take a view of the competing interpretations of modern scholars including John Pocock, Paul Rahe, Quentin Skinner and Blair Worden.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2121 - ANGLO-DUTCH ACHEVMNT 1550-1750
Minimum Credits: 3
Maximum Credits: 3
This course examines many aspects of Early Modern Anglo Dutch interaction: economic, religious, political, intellectual, geographic. It sets these in
local, regional, and global contexts in order to assess the contribution made by this supra-national association to a larger process of global
modernization.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HIST 2125 - REFORM, REBELLION & REVOLUTION
Minimum Credits: 3
Maximum Credits: 3
This course examines a critical feature of the history of political thought, namely, the theories put forward to justify attacks on established authority in both church and state in medieval and early modern Europe, with attention also given to the conduits by which these ideas traveled to and played out in the North American colonies and parts of Latin America. In particular, we will study how people-male and female; lay and clerical; rich, middling, and poor-got the nerve first to question and then to assail the authorities under which they, their ancestors, and their conquerors had lived for generations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2130 - GENDER IN MODERN EUROPE
Minimum Credits: 3
Maximum Credits: 3
The seminar will examine modern European history through the lens of gender, analyzing how gender roles and expectations and the social, economic and political participation of men and women evolved over the course of the 18th to the 20th centuries. We will look at a wide variety of political trends 'nationalism, feminism the welfare state, liberalism, communism and fascism, and at the impact of powerful events such as revolutions and wars on the development of gender roles. The course format is guided discussion of assigned literature. Evaluation based on discussion, presentations and essays.

Grade Component: Grad LG/SNC Basis

HIST 2148 - WEBER'S SOCIOLOGY OF RELIGION
Minimum Credits: 3
Maximum Credits: 3
A reading and writing seminar on Max Weber's sociology of religion, from the Protestant Ethic" to "Ancient Judaism" and his overview in "economy and society". Participants in the course will offer oral reports and criticisms to help launch class discussions."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2149 - THE INTERPRETATION OF MARX
Minimum Credits: 3
Maximum Credits: 3
A close reading of major works and selections by/from Karl Marx and by some of his Marxist interpreters. What happened when the Hegelian language of the early Marx was transposed into post-Hegelian formulations?
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2150 - MODERN GERMAN SOCIAL THOUGHT
Minimum Credits: 3
Maximum Credits: 3
Close reading of major texts (and occasional secondary sources) in German social thought since 1800, and in its social context. Special emphasis upon the emergence of German classical sociology from Tonnies and Simmel to Weber and Mannheim. Specific readings change from year to year.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2151 - EUROPEAN CLASSICAL SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Close reading and discussion of selections from the classics" of European sociology from Durkheim, Tonnies and Simmel to Weber and Mannheim, intended for students in history, history and philosophy of science, cultural studies, and sociology. Occasional briefings by the instructor will help to specify the historical/intellectual context; but the emphasis in class discussions will be upon the selected texts themselves."
Academic Career: GRAD

2022
HIST 2152 - MODERN EUROPEAN SOCIAL THOUGHT
Minimum Credits: 3
Maximum Credits: 3
Brief introductory readings and presentations by the instructor serve as a prelude to a variety of guided student research projects and papers on aspects of European Social Thought Since 1800, and on its historical, intellectual, and social/institutional (educational) context. Special emphasis on the emergence of classical sociology and of related disciplines.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2153 - MAX WEBER
Minimum Credits: 3
Maximum Credits: 3
A reading or research seminar devoted to various aspects of the work of German social theorist Max Weber ca. 1880-1920. Specific topics will change from year to year, starting with Weber's critique of Wilhelmian Germany, and moving on to his comparative analysis of economy and society, his sociology of religion and his portrait of modernity and of rationalization. The instructor will offer a few informal lectures mainly on untranslated essays, and on Weber's intellectual context.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2154 - MAX WEBER'S COMPARATIVE HISTORY
Minimum Credits: 3
Maximum Credits: 3
A reading or research seminar devoted to aspects of the work of German social theorist Max Weber ca. 1880-1920. The emphasis will be on Weber's comparative economic, social and political history. Attention will be given also to his critique of Wilhelmian politics and early views of the prospects for the Weimar republic.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2156 - BRITISH LABOR
Minimum Credits: 3
Maximum Credits: 3
This course is an intensive readings seminar on main problems in British labor history. Among the topics examined are the origins of the British working class, 1780-1832, chartism and its decline, the aristocracy of labor" debate, the origins of the labor party, the "great unvest" of 1910-26, labor and the welfare state, and the electoral collapse of the labor party in recent times."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2160 - EUROPEAN IMPERIAL RIVALRY
Minimum Credits: 3
Maximum Credits: 3
This course explores connections between the development, theory and practice of political economy and European empires. Adopting a transnational approach, it focuses on the period straddling the commercial systems grouped under the terms 'mercantilism' and 'liberalism'. The course opens with the Dutch commercial success in the late-sixteenth century, and then explores how England and France endeavored to emulate the Dutch in their construction of empire. It also 'provincializes' Europe to examine how creoles in the colonies participated in the conversation on government and economy. It concludes with nineteenth-century European liberal imperialisms.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2211 - GRADUATE READINGS IN EAST EURP
A seminar in Eastern European history based upon readings and class discussion. Major works will be assigned concerning the national histories of most states in the region. Both traditional and recent periods will be considered.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2212 - IDEA OF EUROPE**  
Minimum Credits: 3  
Maximum Credits: 3  
What is Europe, where is Europe? This seminar examines changing ideas of Europe from late antiquity to the European Union and "Euroland", including questions like "Europe how far"? (Or who belongs, who doesn't, when and why, and does it matter?).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2245 - ECON HIST OF RUSSA/EASTRN EURP**  
Minimum Credits: 3  
Maximum Credits: 3  
The aim of this course is to explore the strategic factors of this complex region's economic development, broadly conceived, and in doing so to enhance our understanding of the origins, nature, and socio-political consequences of its relative backwardness. With these goals in mind, we will consider the salient features of the dynamics of these economies in the West-European mirror, and discuss governmental attempts to induce modern economic growth in the 19th and 20th centuries.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2311 - GRAD RDGS IN RUSSIA TO 1917**  
Minimum Credits: 3  
Maximum Credits: 3  
This course introduces students to a critique and analysis of major monographs on various periods of pre-Revolutionary Russian history.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2313 - READINGS SOVIET UNION**  
Minimum Credits: 3  
Maximum Credits: 3  
This course provides graduate students with the opportunity to read extensively on Western historiography of the USSR.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2314 - RESEARCH IN SOVIET HISTORY**  
Minimum Credits: 3  
Maximum Credits: 3  
This course allows graduate students to conduct primary research into a topic of interest in Soviet History.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2401 - EAST ASIA READINGS**  
Minimum Credits: 3  
Maximum Credits: 3  
This is a seminar primarily designed for graduate students and/or seniors who are interested in Eastern Asian Studies, especially Chinese Studies. The students are expected to read certain books and articles which are related to either their own research interest or relevant to the preparation for comprehensive examinations.
HIST 2402 - SOURCES & METHODS IN EAST ASIA
Minimum Credits: 3
Maximum Credits: 3
This course is designed to train students in research using original source material. It is part of the graduate studies training in Chinese history.

HIST 2403 - CHINESE STUDIES SINCE 1950
Minimum Credits: 3
Maximum Credits: 3
A graduate reading seminar surveying the paradigms dominating Chinese studies in the postwar period.

HIST 2404 - CHINESE EPIGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This seminar introduces the use of inscriptional materials from Ancient China as a historical source. One term the seminar might focus on inscriptions from the Shang and Western Zhou periods. Students will learn to use standard reference works to transcribe and interpret short texts. Reading knowledge of modern and classical Chinese required. Reading ability in Modern Japanese helpful.

HIST 2405 - HISTOGRAPHY CHINESE ARCHAEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Course involves readings in the history of Chinese archaeology, focusing on changes in organizational structure, methodology, and theoretical paradigms. We first survey antiquarianism in China, then review imperialist, nationalist, regionalist, and international paradigms in archaeology. We will read both primary and secondary materials. No foreign language ability is required, but students with skills in French, German, Russian, Japanese, and Chinese are strongly encouraged to enroll.

HIST 2432 - READINGS IN EARLY MODERN JAPAN
Minimum Credits: 3
Maximum Credits: 3
Readings in Early Modern Japan. Students will read important literature on Japan (1500 to 1850).

HIST 2433 - READINGS ON MODERN JAPAN
Minimum Credits: 3
Maximum Credits: 3
This course is a graduate reading course on Japanese history, 1800 to the present. The course will stress readings on Japan's early modern preconditions to modernization, the process of modernization and industrialization, the events that led to World War II, and Japan's subsequent recovery.
HIST 2434 - WORLD WAR II IN ASIA - READNGS
Minimum Credits: 3
Maximum Credits: 3
This readings seminar will examine the origins of WWII, the nature of its prosecution (but not its battles) and the post-war economic, political and social consequences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2500 - LATIN AMERICAN READING
Minimum Credits: 3
Maximum Credits: 3
Readings in Latin American historiography.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2501 - LATIN AMERICA RESEARCH
Minimum Credits: 3
Maximum Credits: 3
Primary sources will be used to produce one or more papers. Usually follows the readings seminar.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2502 - LATIN AMERICAN READINGS 2
Minimum Credits: 3
Maximum Credits: 3
A readings seminar that continues the list used in 2500. We will cover the post-independence era, reading major books to the present. The seminar serves two audiences: those who wish a general introduction to major works on 19th and 20th century Latin America, and history students who are preparing for Ph.D. comps. The reading list is our official" list for comp prep."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2503 - STATE & SOCIETY LATIN AMERICA
Minimum Credits: 3
Maximum Credits: 3
Selected readings on the relationship between state and society in Latin America, from the colonial period to the present.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2504 - LAT AMER STDS IN US 1945-1990
Minimum Credits: 3
Maximum Credits: 3
This course explores United States academic research and writing on Latin America since World War II. Focus is on the issues of development, modernization, democracy, and identity. Special attention is given to the dialogue between the U.S. and Latin American scholars. Interdisciplinary work will be stressed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2506 - AFRO-LATIN AMERICA
Minimum Credits: 3
Maximum Credits: 3
A graduate reading seminar on the history of people of African descent in Spanish and Portuguese America, from 1500 to the present.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**HIST 2507 - NINETEENTH CENTURY LATIN AMERICA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Reading seminar on Nineteenth Century Latin America. Principal themes will be state formation, nationalism, and citizenship after independence within the context of class relations.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2508 - THE CARIBBEAN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This readings seminar explores the history of the Caribbean region from the beginnings of European conquest to the present day. Key topics include the impact of imperial rivalries; the growth of the African slave trade and creation of plantation systems; challenges to authority in the age of revolution; abolition; post-emancipation struggles over land and labor; intra- and extra-regional migration; U.S. Political and economic hegemony in the 20th century; the evolution of kinship practice and gender roles; debates over cultural pluralism and creolization; decolonization; and the international impact of Caribbean intellectuals.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**HIST 2510 - BRAZIL**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A reading seminar, covering historical and social scientific literature on Brazil.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2515 - VIO & POLIT OF MRMRY IN LAT AM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Focusing on a variety of Latin American countries, this graduate seminar will consider a range of readings on dictatorship, democracy, violence, and memory. Topics include the experience of specific sectors of society under authoritarian rule, sources of support for dictatorship, forms of resistance to authoritarianism, memories of terror and resistance, and efforts to forge peace and justice in the aftermath of extreme violence.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2520 - RACE IN LATIN AMERICA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar examines the history of a race as a social, cultural, and political category in Latin American societies. It covers recent literature on indigenous peoples, afro-Latin Americans, race mixture, and the historical evolution of racial identities in the region.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2530 - TRANSNATIONAL LABOR AMERICAS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar explores the transnational history of labor in North America, Latin America, and the Caribbean across the 19th and 20th centuries. How have geopolitical shifts and international capital flows remade local communities and regional economies? How have the actions of workers and
potential workers shaped investors' possibilities? What role have ideologies of race and gender played in labor control -or struggle? To what extent have different states been able to impact outcomes within this supranational system? How different is the "globalized" present from this past?

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**HIST 2600 - UNITED STATES TO 1877 READING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is a graduate level, general field seminar, in which students complete directed readings in the history of the United States between the 1400s and the 1880s.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2601 - U.S. GENERAL FIELD 2**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course introduces graduate students to major interpretive controversies in Modern American history.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2602 - U.S. RESEARCH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The American history faculty created this seminar to provide graduate students (at all levels of the graduate program including dissertation-in-process) a venue for discussing research and writing problems.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2603 - AMERICA/ATLANTIC/WORLD**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course concerns the major issues of interpretation in American history, with an emphasis on Atlantic and global contexts, connections, and comparisons. Major themes in the course will be the development, practice, and politics of the historical profession in the United States and the historiographies of big topics such as the American revolution, the Civil War, slavery, and industrialization, all in Atlantic and world historical perspective. Special attention will be given to the study of schools of thought and recent debates in American history.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2605 - US AND THE ATLANTIC TILL 1914**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is a graduate readings seminar. Students will read materials dealing with the history of the Atlantic and the United States from the 15th century through 1900. Students will complete common core readings each week and will prepare either a written or oral report on a book of their choice every week. The final grade will depend on participation in the seminar and the quality of their weekly reports.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**HIST 2606 - SPRT, RACE & IDEN TRANAT CNTXT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will plumb the meaning and roles that sport plays in different cultures, especially in creating collective identities, and consider how and why these roles have changed over time. The course will focus on settings where sport has acquired social, cultural, or political significance that goes
beyond the playing field. The larger context is how these roles have evolved against a backdrop of Westernization and global capitalism's penetration of sport. Special attention will be focused on how people fashion collective identities from sport based on notions of race, gender, ethnicity, and citizenship. The course should interest those intending to research or teach the history of sport.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

---

### HIST 2610 - VISUAL CULTURE IN U.S. HISTORY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Visual culture (ads, cartoons, films, newspaper images, paintings, photos, posters, and public sculpture, among others) informs our understanding of U.S. History. This course will examine the institutional, economic, political, social, and market factors shaping the production and reception of visual culture. We will ask how visual media have been used to interpret revolution and war; inequality based on class, race, and gender; nationalism; consumerism; social reform; and state power. Studies from the arts, humanities, and social sciences will help us discern the special insights and problems in using visual evidence to interpret the past.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

### HIST 2626 - U.S. IN THE WORLD

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of the course is to look at American foreign policy in the sense of its now-expanded conception (cultural, social, and political). It will examine both governmental and non-governmental influences on the role of the U.S. in the world and also examine how those in the world perceived the U.S. and its efforts. It should prepare students to have a sense of the trajectory of scholarship (Williams to Gaddis to more recent works) while also examining more contemporary discourses on how to assess American interventions.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

### HIST 2630 - PITTSBURGH IN THE WORLD

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Emblematic of the rise of industrial cities in the 19th century, Pittsburgh's subsequent deindustrialization distinguishes it from today's global cities. This course will examine themes that link the histories of Pittsburgh, the nation, the Atlantic and the world, and introduce students to archival research on national and global topics that can be done here in Pittsburgh.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

### HIST 2650 - SOCIAL/POLITICAL HISTORY US

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A reading seminar for graduate students in the history of American society and politics since the Civil War. Introduction to topics dealing with the social, economic, and political changes in American society during those years as reflected in recent historical writings. Preparation for doctoral comprehensives.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

### HIST 2651 - AMERICAN SOCIAL & POLITICAL HIST

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A research seminar for graduate students in American society and politics since the Civil War. Each student will undertake a research paper using primary research materials. Class sessions will include topics on research design, methods and sources of evidence.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
HIST 2652 - US POLITICS & POLITCL THEORY 1
Minimum Credits: 3
Maximum Credits: 3
This is a graduate readings course that deals with aspects of American politics to the Twentieth Century. We will read some of the so-called great books" that shaped political discussion with a particular emphasis on such matters as the meanings of citizenship, state action, and the transformations of liberalism. We will also cover secondary works that will help us understand how citizens understood these issues.”
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2653 - US POLITICS & POLITCL THEORY 2
Minimum Credits: 3
Maximum Credits: 3
In this course, students will write research papers on some aspects of American politics and political thought. Students will have developed their subjects and questions in the earlier semester's readings course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2657 - THEORY & METHOD IN SOCIAL HIST
Minimum Credits: 3
Maximum Credits: 3
This course offers intensive study of the theories, methods, and landmark works that have guided the development of social history over the past twenty-five years.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2661 - COMPARATIVE WOMEN
Minimum Credits: 3
Maximum Credits: 3
This course compares American women's experiences as mothers, wage earners, and citizens with those of women in other countries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2665 - READINGS HISTORY AMERICAN CITY
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore through readings a variety of issues concerning the history of American cities between the late nineteenth century and the middle twentieth centuries. Wherever possible readings on the national urban experience will be juxtaposed to writing on Pittsburgh's history. Topics will include, but not be limited to, neighborhood and community development, race, redevelopment and renewal, suburbanization, housing, planning, infrastructure, and work and the workplace.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2668 - US URBAN SOCIAL STRUCTURE 1
Minimum Credits: 3
Maximum Credits: 3
Students will survey secondary literature on selected topics in the history of U.S. Urban social structure, receive training in social science research methods, define individual research topics, and begin research on those topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HIST 2669 - US URBAN SOCIAL STRUCTURE 2
Minimum Credits: 3
Maximum Credits: 3
Continuation of HIST 2668. Students will complete the research projects they began the previous semester.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2700 - RACE & CLASS IN U.S. POLITICS
Minimum Credits: 3
Maximum Credits: 3
This seminar seeks to explore the origins and reproduction of the undemocratic aspects of the American polity. Our working hypothesis will be that the overlapping of race and class conflicts explains distinctive aspects of American political development. We will consider both conventional, political activities--parties, elections, public policy--and other forms of politics, such as social movements.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2701 - WATER
Minimum Credits: 3
Maximum Credits: 3
This course explores the history of water. It addresses a wide range of topics, including the demographic consequences of water purification, the politics and law of distributing and acquiring water, the role of public and private enterprises in shaping water use and access, and the evolution of water pollution over the past three centuries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2703 - WORLD HISTORY OF THE LEFT
Minimum Credits: 3
Maximum Credits: 3
This course examines left-wing ideas, movements, and activities in all parts of the world from the mid-nineteenth century to the present. We will study the sources and inspirations of the left, follow the transnational flow of ideas and political practices, and analyze the varying cultural and political influence of the left across time and space.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2704 - APPROACHES TO GLOBAL HISTORY
Minimum Credits: 3
Maximum Credits: 3
World history has a history. While universal history and world history lost ground to national histories in the nineteenth centuries, historians in the past half century are again experimenting with global", "international", and "transnational" histories. This seminar reads some of the key texts in a long historiography."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2710 - SOCIAL HISTORY OF ANCNT WORLD
Minimum Credits: 3
Maximum Credits: 3
A survey of the principal topics, particularly those of current interest, of ancient Mediterranean social history. Heavy emphasis is placed on questions of theory and methodology. No knowledge of the ancient languages is required.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HIST 2711 - TEXTS AND CONTEXTS
Minimum Credits: 3
Maximum Credits: 3
Texts and contexts links aspects of the history of ideas (historical, political, religious, scientific, legal and cultural) to the modes of their transmission (objects, concepts, languages; spoken, manuscript and printed texts). This course relates a wide variety of texts to the cultural as well as historical circumstances of their generation, while also introducing methodological issues of more general importance to history as a discipline.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2712 - RACE, ETHNICITY, AND GENDER
Minimum Credits: 3
Maximum Credits: 3
An introduction to theory and practice of the history of race, ethnicity, and gender around the globe, with emphasis on recent interdisciplinary scholarship.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2713 - COMP POL CULTURE: CORE SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This is the core reading seminar for the comparative political cultures theme. Covering broad swaths of time and diverse geographic regions, it examines the systems that enable and structure governance, power, economic exchange and exploitation as well as the ideologies and processes that generate, maintain or undermine these systems. Among the types of questions that the seminar will explore are: why do complex political systems form and fail? What are the dynamics between formal power and resistance? What are the links between geography, ethnicity, and state building? Why do societies create systems of integration that extend beyond traditional political and spatial boundaries? We will examine these questions in discrete historical contexts, such as pre-state political formations, state-sponsored ideologies, bureaucratic systems, and urban design.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2714 - CAPITALISM AND EMPIRE
Minimum Credits: 3
Maximum Credits: 3
What is capitalism, debates concerning the historical linkage between capitalism and empire, and the impact of capitalist development on different societies around the world will be topics for reading and discussion in this core seminar. Beginning with ancient empires and concluding with current scholarship on the nature and impact of globalization, the seminar aims to present students with historical models from neo-classical economists and Marxists and Marxist historians that have influenced interpretations of world and regional history.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2715 - GENDER AND NATIONALISM
Minimum Credits: 3
Maximum Credits: 3
Nationalism is one of the defining features of the modern world. It led to the break-up of multi-national empires and to the formation of the modern nation-state which in turn has used nationalism to enhance the power of the state. In addition, nationalist rhetoric has informed movements for self-determination and independence and has accompanied modern wars. This course will engage students in an examination of how gender differences and sexuality have affected, and how they have themselves been represented in and shaped by nationalist discourse and action in Europe and the east.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2716 - EMPIRES IN WORLD HISTORY
Minimum Credits: 3
Maximum Credits: 3
This seminar analyzes empires and their dynamics broadly over space and time, including their formation, maintenance, and dissolution. It treats empires as large-scale structures, exploring the relationships of homeland and hinterland, metropole and colony. It focuses on the interaction of
empires with each other and with smaller states and non-state polities. Within the empire, the seminar addresses ideology, inclusion and exclusion, labor and resource mobilization.

Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2717 - BEYOND BORDERS
Minimum Credits: 3
Maximum Credits: 3
This readings seminar explores some of the global phenomena and themes that forged the modern world. We will investigate how they operated, paying particular attention to global networks, the changing role of identity, and the exchange of ideas. By stepping outside a nation-state perspective, this course looks to examine a variety of issues from a fresh, and perhaps more natural, setting. Possible topics include global communities, piracy, slavery, trade networks, science, political ideas, and the environment.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2718 - WORLD HISTORY: CORE SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This core seminar inaugurates the Pitt graduate theme in world history. It is an overview of the literature, debates, resources and directions of world-historical studies. It addresses a wide range of time, space, and topics, plus the interactions of world history with other fields of study. Readings include major recent contributions to the literature, some earlier works, and a world-historical synthesis in preparation by the instructor. The seminar is organized both chronologically and topically, and includes introduction to major research resources in world history, including cross-disciplinary links.

HIST 2719 - THEORETICAL ISS SOCAL MOVMS RES
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2720 - THEORY METHOD ATLANTIC HIST
Minimum Credits: 3
Maximum Credits: 3
An intensive readings course with a dual focus: classics in Early American history, such as Edmunds. Morgan's American Slavery, American Freedom and Gary B. Nash's Urban Crucible, and newer scholarship that locates Early American history in its Atlantic context, such as Jack P. Greene's Pursuits of Happiness and Robin Blackburn's, The Making of New World Slavery.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2721 - ATLANTIC HISTORY TO 1800: RDGS
Minimum Credits: 3
Maximum Credits: 3
This readings seminar will introduce students to work in Atlantic History. The focus will be on popular and laboring classes, gender, race and ethnicity.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2722 - ATLANTIC HISTRY 1800-2000: RDGS
Minimum Credits: 3
Maximum Credits: 3
This readings seminar focuses on the transformation of the Atlantic World as the rise of American nationalisms and Pacific Rim trade, pan-Americanism, and the emergence of the U.S. as a world power challenged older Atlantic circuits of labor, capital, diplomacy, and cultural exchange.

HIST 2723 - ATLANTIC HISTORY - RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This research seminar is a sequel to HIST 2721 and 2722. Students will conduct primary research in Atlantic History.

HIST 2724 - RETHINKING THE BLACK ATLANTIC
Minimum Credits: 3
Maximum Credits: 3
How has the African diaspora shaped the modern world? What role did afro-diasporic intellectuals and social movements play in the post-emancipation Atlantic world? Recent scholarship in multiple disciplines has traced how men and women from the Caribbean, North America, Brazil, West Africa, and beyond remade 20th c. Politics and culture on an international as well as national level. Exploring performance, ritual, literature, social movements, and everyday life, we trace evolving ideas of race and nation, ancestry and authenticity, belonging and rights.

HIST 2725 - ATLANTIC LABOR MIGRATIONS
Minimum Credits: 3
Maximum Credits: 3
The course will compare the major migrations of the 19th and 20th century Atlantic, examining the changing origins of workers; the recruitment of labor within and across national borders during the transition from slave to free labor; and the mobilization of immigrant and minority workers by national labor movements.

HIST 2726 - SPIRITUAL CROSSINGS ATLANTIC
Minimum Credits: 3
Maximum Credits: 3
This course examines the translation and recreation of religious belief and practice in the cultural crucible of the Atlantic system with an emphasis on the Iberian Americas and Western Africa from 1500 to 1900. Students will examine recent scholarship that shows the multi-directional flow of spiritual ideas and traditions among populations in the Americas, Africa and Europe. Particular emphasis will be placed on the transformations of Catholicism and Islam in various Latin American and West African contexts.

HIST 2727 - AFRICA AND THE ATLANTIC
Minimum Credits: 3
Maximum Credits: 3
This course explores the place of Africa in Atlantic history, focusing on the nature of West African societies, the slave trade, and the transit of peoples, cultures, and modes of resistance to the Americas. We will also give attention to East Africa and its relation to the Indian ocean and more broadly to Africa in the "age of revolution." We will study the main frameworks of interpretation of African, diasporic, and African-American history, ranging from the world-system analysis of Immanuel Wallenstein, to the global historical anthropology of Eric Wolf, to the Marxist dependency theory of Walter Rodney, to the cultural/intellectual history of the black Atlantic of Paul Gilroy, to the substantial literature built up by Africanist historians.
HIST 2728 - ROOTS
Minimum Credits: 3
Maximum Credits: 3
This seminar explores the historical background of African societies from which millions of people were forcibly relocated to the Americas during the transatlantic slave trade, with a view to better understanding elements of African cultural features in societies of the Western hemisphere. We will critically review some of the theoretical frameworks that scholars have used to analyze the creation of the African diaspora and seek to locate pre-colonial West and West-central African history in an Atlantic world context.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2730 - REL IN EURO-AMERICA 1700-1900
Minimum Credits: 3
Maximum Credits: 3
In this course we examine scholarly approaches and assessment of the nature of religion and its development in the age of reason and the age of industrialization.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2731 - FASHION AND SOCIETY SINCE 1500
Minimum Credits: 3
Maximum Credits: 3
Text is derived from the Latin verb "to weave." Weaving is an almost universal aspect of human society. Just as weaving forms a whole from different threads, clothing reflects the society that forms it. However, clothing and fashion are not synonymous. A dictionary search will give you a number of definitions for fashion, but in an academic sense it is studied as an outgrowth of mass production and disposable income. Fashion is a text for society that communicates about the individual, even if fashion constantly creates a tension between uniformity and individuality. It is a social construction of what is regarded as appropriate. As with any aspect of human behavior so fundamental, there are many ways to examine the phenomenon of human dress. In this course we will focus on the discourse in which social, economic, political, cultural ideas are expressed through the medium of clothing. We have selected two main factors to focus on. One is from the material culture/economic standpoint of technology. How did trade and technological development effect what people wore? The other is political: how did pressures from the top down effect clothing practices? How did response from the bottom up evoke change? These issues will be explored in a broad geographical context, to emphasize their universality on the one hand, and the interaction and impact of different areas of the world on the other. Case studies will include events in India, great Britain, Germany, Japan, china, and France among others.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2732 - POWER AND INEQUALITY CORE SEM
Minimum Credits: 3
Maximum Credits: 3
How are systematic patterns of inequality generated and sustained? What roles do cultural beliefs, social practice, political institutions, and macroeconomics play? How do different kinds of inequality, such as those around class, racism, ethnicity, and gender interact? How do differently scaled systems of inequality within the household, community, nation, and international system interrelate? We survey four decades of theoretical debate and empirical findings from history, sociology, anthropology, geography, and other disciplines regarding power and inequality.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2733 - ENVIRONMENT & HEALTH HISTORY
Minimum Credits: 3
Maximum Credits: 3
This course explores the interplay between the environment, health, and disease from a global perspective, with an emphasis on the reciprocal relationship between human environmental impacts and natural, biological processes. Important themes include the impacts of local environmental practices on global health, how global processes shape local patterns of disease, and the ways in which humans have responded to environmental and health crises. Readings are interdisciplinary, and draw from diverse fields including disease ecology, environmental studies, and the history of medicine.
Academic Career: GRAD
HIST 2735 - INTELLECTUAL & CULTURAL HIST
Minimum Credits: 3
Maximum Credits: 3
One of two core courses in the texts & contexts theme offered in history. Students from other units are welcome to take it. We will examine different approaches to intellectual and cultural history & their application to the study of historical cases that fit under the rubric of material culture, cartography, statistical practice, archives and memoirs, national identities & discourse, the evolution of academic disciplines, literature & censorship, etc. Readings & cases will range over different historical periods & spaces. Some sessions will feature invited guests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2739 - CITY AS TEXT
Minimum Credits: 3
Maximum Credits: 3
The 'city as text' seminar focuses on analyzing cities as readable realities that can be interpreted, so as to enable students to appreciate the ways in which cities (the built environment) can be understood as physical and symbolic manifestations of those forces (be they ideological, cultural, political, economic, social or technological) that shaped them and were, in turn, shaped by those forces. Following a series of readings on methodological and conceptual issues, the seminar focuses on case studies from various geographical areas and time periods, although the major focus is on 19th and 20th century cities.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2740 - PREMODERN RACE AND SLAVERY
Minimum Credits: 3
Maximum Credits: 3
This seminar will sample the literature on slavery and other forms of unfree labor in the premodern West and the Early Atlantic world, from antiquity to the seventeenth century. We look at the contradictory legacies of Rome, the natures and transformations of slavery in the Mediterranean, Europe, and Africa in medieval times, and the origins of the Modern Atlantic slave system. Readings will consider the workings and experience of slavery as well as ideological underpinning's of and debates about it.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2750 - READINGS IN WORLD HISTORY
Minimum Credits: 3
Maximum Credits: 3
This course will deal with major historiographical themes in so far as they are relevant to world history. E.G. Core periphery, moral economy, the rise of capitalism, the rise of nationalist movements, imperial expansion, the impact of religion on society.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2751 - COMPARATIVE LABOR HISTORY
Minimum Credits: 3
Maximum Credits: 3
Compares labor movements and working class life in different societies. Specific topics will vary.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HIST 2752 - HISTORGRPHY EURPAN IMPERIALSM 1
Minimum Credits: 3
Maximum Credits: 3
This graduate reading seminar will survey the expanding scholarship on European Imperialism from the non-European and European perspectives.
Topics to be treated include: studies of European technology; global trade diaspora; European discourse on race and religion; entrepot and settler enclaves; the development of mediator cultures; non-European writings about Europeans; changes in political systems, commodity and disease exchanges arising from European trade; and the transformation of imperialism at the beginning of the nineteenth century.

**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2753 - HISTORIOGRAPHY EURPN IMPRLSM 2**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A graduate seminar, which will focus on the historical treatments of imperialism from Hobson to the present. The seminar aims to put imperialism within the context of world history. Students will be graded on class participation and the creation of a course syllabus.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2766 - TOPICS - MEDITERRANEAN STUDIES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This seminar focuses on francophone Mediterranean culture and transitional studies

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**HIST 2770 - COMPARATV SLAVERY & ABOLITION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Examines the rise and fall of new world slave systems in comparative perspective, including demographic, economics, cultural, religious and political aspects of their development. Students are expected to undertake a research project involving comparative analysis.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2772 - RACE, CASTE, ETHNY WRLD PERSP**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A comparative study of the role of race, caste and ethnicity in East Asia (Japan, China), South Asia (India), Africa (South Africa), Latin America (Brazil, Cuba) and the United States.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2773 - SCIENTIFIC RACISM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This seminar studies how ideas of race, and particularly how scientific" ideas of race, were disseminated globally in the modern period. We study the formation of these ideas in the North Atlantic, their diffusion to various areas of the world, and how cultural and political elites adopted, challenged, or rejected these ideas in their respective nations."

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HIST 2775 - RELIGION AND HISTORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
We examine the impact that historical consciousness and modern historiography have had on religious thought and religious behavior.

**Academic Career:** GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HIST 2902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
M.A. Candidates wishing to do independent reading with a professor on a subject not dealt with in a seminar may take this course, as may M.A. Candidates who wish to do one of their papers independently, rather than in a seminar.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

HIST 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 12
Candidates with M.A. Degrees who are preparing for their Ph.D. Comprehensive examination may register for history 2990, a course of independent reading and study with one faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

HIST 3000 - RESEARCH AND DISSERTATION PHD
Minimum Credits: 1
Maximum Credits: 12
Ph.D. Candidates who have passed their comprehensive examination may register for history 3000 with their advisor as they undertake their research for the doctoral thesis.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

HIST 3649 - EVAL OF AMERCN SOCIAL WELFARE
Minimum Credits: 3
Maximum Credits: 3
A broadly conceived analysis of the relationship between social welfare institutions and American society and culture up to 1900.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HIST 3902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
History 3902 is a special course designed only for one type of student and one type of work. Candidates for the Ph.D. Degree who have entered this program with a M.A. From another institution register for history 3902 when they undertake individual study with a faculty advisor to complete the research paper required for them.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

History & Philosophy of Science

HPS 2497 - TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This is a survey course designed specifically for teaching assistants and fellows. The focus will be on practical teaching methods and techniques used in classroom recitations and lectures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

**HPS 2498 - DEPARTMENT PRO-SEMINAR**
Minimum Credits: 3
Maximum Credits: 3
Topics to be selected by director of graduate students.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2501 - PHILOSOPHY OF SCIENCE CORE SEM**
Minimum Credits: 3
Maximum Credits: 3
This seminar is an intensive and advanced introduction to some of the main themes and problems in philosophy of science including the nature of evidence, theory comparison, and the theory-observation distinction, the meaning of theoretical terms, scientific explanation and scientific change.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** PLAN: History and Philosophy of Science (MA, PHD) or Philosophy (PHD)

**HPS 2502 - HISTORY OF SCIENCE 1**
Minimum Credits: 3
Maximum Credits: 3
This is the first of two core seminars designed to survey the development of scientific thought in Western civilization. In this first seminar, Greek medicine, astronomy, mathematics, biology and physics, its disappearance in the West, its preservation and development in Islam and finally the emergence of modern science in the renaissance, are the main focus.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** PLAN: History and Philosophy of Science (MA, PHD)

**HPS 2503 - HISTORY OF SCIENCE 2**
Minimum Credits: 3
Maximum Credits: 3
This seminar will provide an overview of some of the major developments in the sciences from the second half of the seventeenth century to the first half of the Twentieth Century, considering the physical, chemical, biological, geological and social sciences. It will deal with the work of individuals, of general movements and their institutional and national settings.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis
**Course Requirements:** PLAN: History and Philosophy of Science (MA, PHD)

**HPS 2508 - J.J. GIBSON**
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus the development of the thought of the psychologist J.J. Gibson, and the influence he has had in many fields.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2509 - SPECIAL TOPICS IN HPS**
Minimum Credits: 3
Maximum Credits: 3
This course deals with selected special topics in the history of the philosophy of science. It is an intermediate to advanced graduate seminar, usually taken by students in the doctoral program. The exact contents of the course vary from one occasion to the next.

**Academic Career:** GRAD
HPS 2510 - RDG NEWTON'S PRINCIPIA" 18THC"
Minimum Credits: 3
Maximum Credits: 3
This course is devoted to exploring the advent of rational mechanics and its philosophical implications for our broader understanding of science.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2511 - GENESIS AND GEOLOGY
Minimum Credits: 3
Maximum Credits: 3
This seminar explores the development of changing views on fossils and their contribution to the understanding of the history of the earth from the Renaissance to the early Nineteenth century. Religious controversies on the age of the earth and natural-philosophical inquiry into the meaning of fossils contributed to the emergence of fundamental scientific notions, such as evolution, catastrophism, and uniformitarianism. Drawing on primary and secondary sources this seminar will shed light on the early history of geology and paleontology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2512 - ANCIENT SCIENTIFIC ASTRONOMY
Minimum Credits: 3
Maximum Credits: 3
In this course we examine Babylonian and Greek mathematical astronomy and the relationship to Greek and near eastern religions and cosmologies. Transmission to other cultures will be noted.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2513 - HISTORY THEORY OF EQUATIONS
Minimum Credits: 3
Maximum Credits: 3
The seminar explores ideas on the theory of equations from the early modern period until the nineteenth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPS 2514 - A HISTORY OF ATOMISM
Minimum Credits: 3
Maximum Credits: 3
The course will look at versions of atomism from Democritus up to Jean Perrin's experiments on Brownian motion. The focus will be on the kinds of cases that were made for atoms, attempting to distinguish philosophical cases from scientific ones. An attempt is made to pinpoint when and how the atom became a part of experimental science.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2515 - PERSPECTIVES IN HISTORY OF SCI
Minimum Credits: 3
Maximum Credits: 3
This seminar investigates perspectives of history of science by drawing on recent literature in the field. The emphasis and selection of topics will vary from year to year according to the instructor's selection.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2516 - INTELLCTL DEVELP AMRCN ARCHLGY
Minimum Credits: 3
Maximum Credits: 3
Examines the intellectual development of American archeology from the nineteenth century to the present day, focusing on the philosophical, theoretical, and methodological background of modern anthropological archeology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPS 2517 - THE MECHANICAL PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
A survey of the scientific tradition that arose in the 17th century. A thematic and chronological look at some ideas that shaped modern science and philosophy. Among topics to be considered: Kepler and the forces; Galileo, Copernicans and the new physics; Gassendi, Charleton and the atomists; Descartes and new foundations; Hobbes and the philosophy of motion; Boyle, Corpuscles and chemistry; Huygens and the laws of motion; Cartesian developments: Malebranche and friends; Newton and forces; Leibniz, science and metaphysics of nature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2518 - UNITY OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore conceptions of the unity underlying the sciences from the seventeenth century to the twentieth century.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2520 - NEWTON
Minimum Credits: 3
Maximum Credits: 3
This seminar will consider the establishment of dynamical astronomy with the publication of Newton's principia in 1687. The development and significance of Newton's early thought will be analyzed in relation to his mature system of the world." Some aspects of the work of Newton's principal predecessors--especially Descartes and Kepler--will also be considered."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2522 - SPEC TOPICS-HISTORY OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
A variety of archival resources are available for investigating the history of science, and the internet will continue to make more and more of these materials accessible on-line. In this seminar we will be exploring issues such a how to make intelligent use of resources and how to determine which questions they can help to answer. In particular, can such resources give us insight into the creative proves often referred to as scientific discovery? We will explore such questions in the context of archival collections, for example those related to Galileo and Darwin.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2524 -EXPRML HISTORY PHILOSOPHY SCI
Minimum Credits: 3
Maximum Credits: 3
In this seminar, we explore an innovative approach to HPS based on experiment. We engage both in theoretical discussion and in experiment design, implementation and interpretation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2525 - TWENTIETH CENTURY BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course covers topics in the history of biology since 1900. Topics will be chosen from genetics, population genetics, molecular biology, developmental biology, immunology, physiology, the neurosciences, and evolutionary theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2526 - HISTORY OF RELATIVITY THEORY
Minimum Credits: 3
Maximum Credits: 3
This course focuses on Einstein's 1905 discovery of special relativity and the earlier traditions of work in electro dynamics and critique of Newtonian space and time that preceded it.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2528 - GALILEO
Minimum Credits: 3
Maximum Credits: 3
A chronological examination of the major works of Galileo as seen in the context of the 17th century.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2530 - READING SEM HIST OF SCIENCE
Minimum Credits: 1
Maximum Credits: 6
This seminar is designed as an intensive reading of one or a small number of texts in the history of science. The text(s) is to be selected by the instructor. Ordinarily this will be a chance to do a directed reading of texts not studied in the department's regular course offerings.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

HPS 2531 - FREUD AND PSYCHOANALYSIS
Minimum Credits: 3
Maximum Credits: 3
An intense reading of the works of Freud and selected secondary works. Emphasis will be on psychoanalytic theory rather than therapy.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2532 - HISTORY OF OLD QUANTUM THEORY
Minimum Credits: 3
Maximum Credits: 3
This course surveys the development of the old quantum theory from its origins in Planck's work on black body radiation, through Bohr's atomic model to the emergence of modern quantum theory in the mid 1920's.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2533 - DESCARTES
Minimum Credits: 3
Maximum Credits: 3
An examination of some of the major works of Descartes. Also a look at his precursors, his culture and his influences.
HPS 2534 - GENRL RELATIVITY & GRAVITATION
Minimum Credits: 3
Maximum Credits: 3
This course treats the development of modern theories of gravitation with special emphasis on Einstein's gravitation theory of general relativity.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2535 - NATR & LAWS OF NATR RENASNC
Minimum Credits: 3
Maximum Credits: 3
Nature and natures, causes and substances are major concepts of the 16th and 17th century. The seminar will deal with these concepts as they apply to motion in the works of Galileo, Descartes, Huygens, wren, Wallis, Leibniz and Newton, and others.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2536 - LAWS OF NATURE, MDRN TREATMENT
Minimum Credits: 3
Maximum Credits: 3
An examination of recent accounts of the nature and function of laws of nature.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HPS 2537 - HISTORIOGRAPHY OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
We will examine the methodologies of history and the history of science. Among topics to be discussed are: the sociology of knowledge, the history of ideas, psychology in history, relations between the history of science and the philosophy of science, the methods of the social sciences, social constructionism, texts and the canons of interpretation, and theories of praxis.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2538 - EARLY MODERN PHIL OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
The aim of this seminar is to explore the ways in which philosophers reacted to perspectives arising from the new science of the 17th century, and the ways that philosophical analysis entered the self-consciousness of the scientific enterprise. Among the traditional topics affected were: mind/body, fact/value, causation, objectivity, god/nature, knowledge and cognition. We shall base the seminar on readings selected from Boyle, Descartes, Newton, Locke, Berkeley, Leibniz, and Kant. Special attention will be paid to the historical context within which modern philosophy and science interacted.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2540 - LOCKE AND LEIBNIZ
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
HPS 2542 - HOBBES & SPINOZA
Minimum Credits: 3
Maximum Credits: 3
An examination of Hobbes' influence on Spinoza through reading of selected texts of both.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2543 - THOMAS HOBBES
Minimum Credits: 3
Maximum Credits: 3
An intensive look at the range of Hobbes' work. Some influential secondary sources will be examined, e.g. Leviathan and the air pump, squaring the circle, etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2544 - UNDST ARISTOTLE'S TELEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Through a study of a wide range of Aristotelian texts, this course explores (i) the precise nature of Aristotle's commitment to the thesis that the development, structure, and functioning of living things in general and the action and productive activities of human beings in particular are goal-directed--and (ii) the ways in which this commitment shapes and is shaped by central aspects of his metaphysics, epistemology, science, and ethical theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2545 - ARISTOTLE'S BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This seminar is a study of the philosophical principles which motivate Aristotle's study of animals. These principles are explored through a study of selected texts in his biological and philosophical writings.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2546 - MODERN EUROPEAN SOCIAL THOUGHT
Minimum Credits: 3
Maximum Credits: 3
Brief introductory readings and presentations by the instructor serve as a prelude to a variety of guided student research projects and papers on aspects of European social thought since 1800, and on its historical, intellectual, and social/institutional (educational) context. Special emphasis on the emergence of classical sociology and of related disciplines.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2547 - ARISTOTLE'S PHILOSOPHY OF SCI
Minimum Credits: 3
Maximum Credits: 3
This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2549 - MODERN GERMAN SOCIAL THOUGHT
Minimum Credits: 3
Maximum Credits: 3
Close reading of major texts (and occasional secondary sources) in German social thought since 1800, and in its social context. Special emphasis upon the emergence of German classical sociology from Tonnies and Simmel to weber and Mannheim. Specific readings change from year to year.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2550 - EUROPEAN CLASSICAL SOCIOLOGY
Minimum Credits: 3
Maximum Credits: 3
Close reading and discussion of selections from the classics' of European sociology from Durkheim, Tonnies and Simmel to weber and Mannheim, intended for students in history, history & philosophy of science, cultural studies, and sociology. Occasional briefings by the instructor will help to specify the historical/intellectual context; but the emphasis in class discussions will be upon the selected texts themselves."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2552 - PHIL OF THE CULT & SOCL STDS
Minimum Credits: 3
Maximum Credits: 3
Close reading and discussion of classical texts in the philosophy of the human and social sciences from mill and Comte to Dilthey, Rickert and weber, and of selected contemporary writings on cultural interpretation and historical explanation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2553 - DARWIN'S ORIGIN
Minimum Credits: 3
Maximum Credits: 3
This seminar involves a study of Darwin's evolutionary theory and examines Darwin's early studies and research to understand that work's theoretical and empirical basis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2555 - ARISTOTLE'S CONCP NATURAL SCI
Minimum Credits: 3
Maximum Credits: 3
Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2556 - ARISTOTLE'S MATTER THEORY
Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on the matter' side of Aristotle's matter/form ontology. His account of matter is examined in such texts as metaphysics, physics, generation and corruption and the biological works."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2557 - MODERN EUROPEAN HISTORIOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
Reading and discussion of recent historical works, mainly in early modern and modern European history, that have been recognized as exemplary in their methods or in their theoretical frameworks, or that have been fruitfully controversial. Several essays on historical explanation and interpretation are covered as well.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2558 - MYTH, IDEOLOGY AND SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course examines the transition from structuralism to post-structuralism and the relation to post-modernism. In this context we explore three cultural forms - myth, ideology and science - in terms of their rhetorical structures and the social conditions which gave rise to them.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2559 - THERMDYNMC & STATISCAL MECHANC
Minimum Credits: 3
Maximum Credits: 3
This course will treat topics in the history and foundations of thermodynamics and statistical mechanics, such as the nature of entropy and irreversibility.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2560 - MOLECULAR REVOLUTION IN BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course examines the nature and course of the molecular revolution in Twentieth Century biology. It deals with the historical, philosophical and social dimensions of the transformation of modern biology from the 1950s to the 1980s.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2562 - PROBABILITY AND STATISTICS
Minimum Credits: 3
Maximum Credits: 3
We shall review the development of the notion that uncertainty and the chaos of chance may be tamed by the application of numbers. We trace its birth in the 17th century as a device for bloodlessly resolving gambling disputes; its growth through statistical theory into one on science's most important analytic tools; and its ascendance in the work of philosophically minded Bayesians as the framework of all belief.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2563 - HISTORY OF MEDICINE
Minimum Credits: 3
Maximum Credits: 3
This course explores recurring themes in the history of medicine from ancient Greece to the present. These themes include the nature of health and disease, the relation between science and medicine, the evolution of clinical medicine, and the development of medical institutions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2564 - CAUSLITY & EXPLAN: HISTL EPSD
Minimum Credits: 3
Maximum Credits: 3
In different historical periods, conceptions of cause and explanation have varied widely and been the source and context of much debate. Various historical periods, con texts, texts and ideas will be examined to explicate these crucial concepts.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2565 - THE GENE:TRANSFRM/FRGMNT CONCP
Minimum Credits: 3
Maximum Credits: 3
The course covers the period from Gregor Mendel to the molecular gene of the 1990s. We explore its status as a hypothetical construct, and as a spatial concept in terms of its localization in the cell. Discussion of its status as a fundamental unit in biology leads to consideration of its place in the theoretical biology, in speculations about the origin of life, and in debates over the levels at which natural selection acts.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2567 - WILLIAM HARVEY'S NATURAL PHIL
Minimum Credits: 3
Maximum Credits: 3
This seminar is a close study of William Harvery's two published works, de Motu Cordis et Sanguinis and de Generatione Animalium in their philosophical and medical context, with special attention to the nature and extent of Harvery's Aristotelianism.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2568 - THE INTERPRETATION OF MARX
Minimum Credits: 3
Maximum Credits: 3
A close reading of major works and selections by/from Karl Marx and by some of his Marxist interpreters. What happened when the Hegelian language of the early Marx was transposed into post-Hegelian formulations?

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2569 - MAX WEBER'S COMPARATV HISTORY
Minimum Credits: 3
Maximum Credits: 3
A reading or research seminar devoted to aspects of the work of German social theorist Max Weber ca. 1880-1920. The emphasis will be on weber's comparative economic, social and political history. Attention will be given also to his critique of Wilhelmian politics and early views of the prospects for the Weimar republic.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2570 - MAX WEBER
Minimum Credits: 3
Maximum Credits: 3
A reading or research seminar devoted to various aspects of the work of German social theorist Max Weber ca. 1880-1920. Specific topics will change from year to year, starting with weber's critique of Wilhelmian Germany, and moving on to his comparative analysis of economy and society, his sociology of religion and his portrait of modernity and of rationalization. The instructor will offer a few informal lectures mainly on untranslated essays, and on weber's intellectual context.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2571 - GOING MOLECULAR
Minimum Credits: 3
Maximum Credits: 3
The course is given to an examination of the impact of molecular biological methods and concepts upon the biomedical sciences. Has molecular biology become just a bag of tricks with which to carry on business as usual”? Have these sciences, perhaps, changed their outward appearance but not their hearts? Consider the neutral theory, the home box, jumping genes, or prions. We take examples like these and explore the nature of the concepts, the degree of discontinuity in their history, and the dependence of these changes on the molecular approach."

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**HPS 2572 - WEBER'S SOCIOLOGY OF RELIGION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A reading and writing seminar on Max Weber's sociology of religion, from the Protestant ethic” to "ancient Judaism" and his overview in "economy and society". Participants in the course will offer oral reports and criticisms to help launch class discussions."

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2578 - 20TH CENTURY SEARCH HUMAN NATURE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the clash between early 20th century instinct psychology" and the behaviorist movement in psychology, the rejection of "instinct psychology" by the founders of ethology and the construction of modern animal behavior studies in the period 1936-1950, the negotiation of theoretical compromises between the new ethology and the existing laboratory based tradition of comparative psychology. And finally the problematic period in the late 1960's and early 1970's in which sociobiology either displaces or absorbs or develops from ethology."

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**HPS 2579 - BEHAVIORISM: ORIGIN, EVOLT & CRTQ**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course examines the methodological and epistemological claims of behaviorism, using Laurence Smith's behaviorism and logical positivism, and Brian Mackenzie's behaviorism and the limits of scientific method. We follow the career of this science from its origins in the teens of this century to the cognitive revolution" circa 1960."  

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**HPS 2580 - MODERN COSMOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
In 1917 Einstein asked his new general theory of relativity how the universe might look on the largest scale. So was born the modern tradition in cosmology--rich in wild speculation, technical physics and controversy. We shall review its history and philosophy.  

**Academic Career:** GRAD  
**Course Component:** Seminar

**HPS 2585 - EVOLUTIONARY THEORY I**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will be an in-depth survey of the historical development of evolutionary thought, with emphasis on the alternatives to theories that became incorporated into the grand evolutionary synthesis and those alternatives that have emerged since. Students will read and annotate original works in comparative anatomy, embryology, paleontology, genetics and lead class discussion based on this literature.  

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

---

**HPS 2586 - BEING AND BECOMING HUMAN**
Minimum Credits: 3
Maximum Credits: 3
In this course we will read primary literature that is relevant to the study of human evolution, beginning with Tyson's description of an 'ourang outang' through the inquiries into 'humanness' of Burnett (Monboddo), Buffon, Linnaeus, and others, to the treatises of Blumenbach on 'race' and being 'homo sapiens,' Huxley and Darwin's arguments for 'man's place in nature' and the 'descent of man,' and the debates between Schaffhausen, Fuhlrott, Huxley, and King over the 'status' of the first publicly announced human fossil, the feldhofer grotto neanderthal. From there we will read in chronological order the publications on subsequent fossil discoveries and the recognition (or rejection) of extinct human relatives, as well as essays on the course of human evolution; included, for example, will be DuBois (on 'pithecanthropus erectus'), dart (on Australopithecus), broom (on 'plesianthropus' and paranthropus), Keith and Hrdlicka (overviews), the Leakey's (Louis and Mary's discoveries at Olduvai gorge, and Richard's at Koobi Fora), and Johanson (at Hadar) and some of the more recent finds. The thrust of the course will be to tease apart fact from assumption as they were cobbled together in promoting one's favorite scenario on human evolution. Students will be expected to hand in annotated bibliographies based on the reading and to take turns in leading discussion. Each student will also produce a term paper that will expand on a topic relevant to the course.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2587 - EVOLUTIONARY THEORY 2
Minimum Credits: 3
Maximum Credits: 3
In this half of the course we will read in the original alternatives to darwinism that provoked a hardening of the synthesis around darwinism and population genetics, the effect this had on squelching alternative ideas (including Waddington's epigenetic landscape and even punctuated equilibria), and the re-emergence of developmentally based models of evolutionary change (culminating in present-day 'evo-devo').

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2590 - EINSTEIN 1905
Minimum Credits: 3
Maximum Credits: 3
1905 was the year for Einstein the patent examiner. In papers in Annalen der Physik, he proposed the special theory of relativity, e=mc2, the molecular account of Brownian motion and that light energy came in quanta. In preparation for the centenary of 1905, we will study these papers which laid the foundations of modern physics.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2599 - HISTL PHILPHCL ISS BHVRL GNTCS
Minimum Credits: 3
Maximum Credits: 3
The history of behavioral genetics, and related philosophical issues, will be reviewed from its beginnings in 1960 to the present day. Reading materials will include original papers and secondary sources, as well as listening to oral history interviews with leaders in the field.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2604 - CLIN TRNG MEDICAL ETHICS - 1
Minimum Credits: 3
Maximum Credits: 3
The course consists of three components: (1) to help in learning basic medical terminology students will complete self-directed programmed texts; (2) to become acquainted with the complexity of clinical ethics issues will round with physicians in a variety of clinical settings, and will discuss observed cases and their philosophical implications; (3) to help students integrate philosophical and clinical training, students will be expected to attend a seminar in which the major ethical issues in clinical medicine are critically analyzed.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2606 - CLIN TRNG MEDICAL ETHICS - 2
Minimum Credits: 3
Maximum Credits: 3
In this course students will develop some depth in one area of clinical medicine--either psychiatry, surgery, medicine, pediatrics or intensive care. The student will: (1) round daily with the health care professionals in order to develop an appreciation of the ethical issues that arise and how they are handled; (2) read in medical sociology to develop a greater understanding of the structure and function of medical care; (3) analyze in-depth a particular ethical issue in their clinical; (4) attend the clinical case conference in which discussion of particular cases arise.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2621 - DISPOSITIONS AND CAUSAL POWERS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
It has been argued that modern science does away with notions of 'disposition' and 'potentiality', and fills in these place holders" with accounts of underlying matter and structure. In this seminar we will look at the competing views about the meaning, role and reality of disptotional properties and their relationship to theories of causation. We will read a series of philosophical articles on the subject as well as investigate a number of case studies in history of science and contemporary biology."  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2622 - RECNT TOPICS IN PHIL OF SCI**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this seminar we will read and discuss recent works in the philosophy of science. The choice of authors and topics will depend on who is doing the most interesting new work in the field.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2623 - PERSPECTIVES IN PHIL OF SCI**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar investigates perspectives of philosophy of science by drawing on recent literature in the field. The emphasis and selection of topics will vary from year to year according to the instructor's selection.  
**Academic Career:** GRAD
HPS 2624 - PHIL CLASSICAL & QUANTUM MECHC
Minimum Credits: 3
Maximum Credits: 3
The first part introduces some of the main philosophical topics about classical and quantum mechanics and also relativity theory. The second part will pursue some special topics in greater depth.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2625 - MATHEMATICS FOR FOUNDATIONS
Minimum Credits: 3
Maximum Credits: 3
This course is designed primarily for students training to do serious research in the foundations of mathematics (e.g. Set theory and category theory) and/or physics (e.g. Statistical mechanics, quantum mechanics and relativity).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2626 - TOPICS IN PHILOSOPHY OF PHYSICS
Minimum Credits: 3
Maximum Credits: 3
The course will examine some of the fascinating problems to which the modern physical theories of quantum mechanics and relativity have given rise. No previous formal training in physics or mathematics will be presupposed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2627 - PHILOSOPHY OF PHYSICS
Minimum Credits: 3
Maximum Credits: 3
This seminar investigates philosophical issues in the foundations of fundamental theories of physics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2628 - EVOLUTION AND COGNITION
Minimum Credits: 3
Maximum Credits: 3
Psychology has recently undergone a paradigm shift: evolutionary considerations are increasingly brought to bear on the study of cognition. This approach is supposed to offer new methods as well as new research questions. Philosophers of psychology and biology have paid considerable attention to this new line of research. This seminar is designed as a survey of the recent developments in this field. We will also examine the objections that have been mounted against this paradigm shift by philosophers and psychologists.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HPS 2629 - RACE: BIOLOGY, PSYCH, ETHICS
Minimum Credits: 3
Maximum Credits: 3
Race is a controversial and fascinating topic, at the intersection of various disciplines--particularly, evolutionary biology, genetics, psychology, medicine, history and ethics. This seminar explores the recent debates about races in biology, psychology and ethics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2630 - COGNITION AND KNOWLEDGE
Minimum Credits: 3
Maximum Credits: 3
Recent work in the cognitive sciences has made many new claims about the mechanisms, processes and stages of knowledge. Research in perception, memory and processing localization have concluded with quite specific claims about the nature, structures and procedures of human knowledge. This seminar will consider some of this recent cognitive literature and see how and to what extent it can be used or reconciled with more traditional philosophical issues in epistemology and the nature of representation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2631 - METH & INTPT COGV NEUROSCIENCE
Minimum Credits: 3
Maximum Credits: 3
We will consider how various types of evidence can be used to infer to cognitive architecture and construct theories in cognitive neuroscience. We include evidence from brain damaged subjects, from reaction time data, from EEG and evoked responses data and from brain images.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2632 - PHILOSOPHY & NEUROSCIENCE
Minimum Credits: 3
Maximum Credits: 3
The seminar will discuss issues concerning the nature of mechanisms, models of mechanisms, and the concepts of reduction and information in the neurosciences (and occasionally in molecular biology). Cases will be drawn from recent (well cited) work in cognitive neuroscience and neurobiology on memory (especially studies on working memory, procedural memory and implicit memory) and perception.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2633 - PHIL OF COGNITIVE SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This course will survey the main philosophical questions provoked by cognitive science. Students will acquire a comprehensive grasp of the main issues in this field. We will discuss questions such as: is the mind modular? Is the mind embodied and situated? Do we ascribe mental states by simulation or by means of a theory? What is consciousness?
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2634 - TOPCS PHIL COGNITIVE SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This class focuses on advanced topics that have been recently debated in the philosophy of cognitive science. Students will acquire an in-depth understanding of these debates.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2635 - CNTRL PROBS IN SYSTMS NEUROSCI
Minimum Credits: 3
Maximum Credits: 3
This course will examine the theoretical foundations of systems and behavioral neuroscience, asking what progress has been made towards a general account of neural processing and discussing obstacles to theoretical unification. Example seminar topics are; the neuron doctrine, information theory and the brain, the Bayesian brain, dynamic representation, understanding intrinsic activity.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2640 - CONSCIOUSNESS, EMOTION & NEUROSCI
Minimum Credits: 3
Maximum Credits: 3
An examination of recent literature in philosophy of science on the problem of consciousness and the function of emotions. The focus will be on what current work in neuroscience (and experimental psychology) can tell us about these topics that is of philosophical interest.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2641 - EXPERIMENTAL PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
The seminar will be a survey of recent work in experimental philosophy. We will look at experimental studies aimed at advancing debates in a number of areas of philosophy including metaphysics, semantics, epistemology, philosophy of science and ethics. This seminar will also give students the opportunity to explore ways in which experimental methods can be brought to bear on philosophical issues.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2642 - DETERMINISM
Minimum Credits: 3
Maximum Credits: 3
Deterministic physical theories are ones in which a full specification of the present state of the world fixes the future completely. That quantum theory proved to be indeterministic was a source of much concern in the 1920s. We now know that many of our physical theories, both classical and relativistic, are indeterministic and that determinism is the exception and not the rule.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2645 - TOPICS PHILOSOPHY OF PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
We will consider credible challenges to the orthodox view that the mind works by computing symbolic representations. They derive from research in connectionism, dynamical systems theory, embodied mind approaches and elsewhere and give promise as accounts of emotions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2647 - REPRSTN, PESPS AND PLURALISM
Minimum Credits: 3
Maximum Credits: 3
Seminar will investigate the relationships among differing scientific representations of phenomena and the implications for unity/pluralism in science.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2648 - SCI PHIL ARISTOTLES GENRT ANML
Minimum Credits: 3
Maximum Credits: 3
This seminar is a philosophically-oriented study of arguably one of the greatest treatises in the history of science. Our focus will be on generation of animals (GA) both as a scientific work systematically structured in line with Aristotle's general philosophy of science and as a source for our understanding of central elements of his metaphysics, theory of science, and philosophy of biology. We will follow Aristotle as he develops and argues for his theory of the male and female contributions to generation, and of the manner in which form (and soul, including intellect) is transmitted from one generation to the next; and we will briefly examine what might be called the epistemology of spontaneous generation. We will also examine, in greater depth, the respective roles of teleological and material-level explanation in GA's accounts of the conception and embryological development of an organism (in both sexual and spontaneous generations). Though the greater part of our attention will be a specialized treatise, our work will involve a close look at Aristotle's conceptions of substance and essence, of natures and potentials, of form and
matter, of teleology and necessity, of soul, and of the structure of a theoretical science, and will include readings from other works of Aristotle. For that reason, this course is suitable for those wanting an introduction to Aristotelian philosophy as well as for those who have already experienced the joys (and occasional frustrations) of a close study of this great philosopher-scientist. A full-length paper will be required at the end of the course. Short in-class presentations will be welcome (but not required). Those of us who have some Greek can meet occasionally outside of the seminar to translation choice passages from GA

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2649 - SCIENCE AND VALUES**
Minimum Credits: 3
Maximum Credits: 3
This course will examine values as they appear in scientific reasoning and practice. It will deal with issues such as the distinction between cognitive and social values, and how values enter into the selection of theories and research projects, and their subsequent applications. It will also take up the ethical assumptions and implications of scientific judgments and policy decisions.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2650 - PHILOSOPHY OF PSYCHIATRY**
Minimum Credits: 3
Maximum Credits: 3
This course examines conceptual, methodological, and some historical issues in psychiatry. General analyses of psychiatric disorders and classifications, and their reliability and validity, will lead to a consideration of the DSM and ICD. The function of etiological, reductive, and mechanical dimensions (including genetic and neuroimaging research) will be discussed. Historical topics include the contrast between and transition from psychoanalytical, narrative approaches to the rise of bio-chemical psychiatry. Extended consideration of schizophrenia and depressive disorder will be course themes. The seminar closes with a discussion of legal and ethical issues in psychiatry.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2651 - HIST & PHILOSOPHY OF ECONOMICS**
Minimum Credits: 3
Maximum Credits: 3
This course examines aspects of the roles that economics forces and factors play in history, and/or the conceptual and theoretical structures by which various people have attempted to understand, explain, or model such factors and forces.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2652 - RECNT TOPICS PHIL SOCL SCIS**
Minimum Credits: 3
Maximum Credits: 3
In this seminar we will read and discuss recent works in the philosophy of social sciences. The choice of authors and topics will depend on who is doing the most interesting new work in the field.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**HPS 2653 - MODELS AND MODELING IN SCIENCE**
Minimum Credits: 3
Maximum Credits: 3
There is increasing interest in representing scientific knowledge by means of models. Some (Suppes, Giere, Vanfraasssen) have argued for model theoretic rather than axiomatic formulations in defending a semantic account of theories. For others, models are understood in light of scientific practice, autonomous from theory, or mediating between theory and observation (Morrison, Morgan). This seminar will examine recent philosophical literature (cartwright and others) on related topics including, the relation of model to theory and to observation, the nature of abstraction, idealization, analogy and isomorphism in modeling, and different types of models including physical and scale models, mathematical models and computer simulations.

**Academic Career:** GRAD
HPS 2654 - 19THC PHILOSOPHY OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
The interactions in the 19th century between philosophical investigations of science (the nature of laws, causality, induction, evidence, theory, chance, design) and the practice of science, especially geology and biology will be examined.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2655 - ARISTOTELIAN/TRACTARN PHIL SCI
Minimum Credits: 3
Maximum Credits: 3
A study of Aristotle's program for understanding causality and laws of nature as grounded in the powers and capacities of natural objects and the diametrically opposed program of Wittgenstein's Tractatus which tries to explain science in terms of logical relations between expressions instead of causal relations between things and linguistically based scientific laws in place of laws of nature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2656 - ARISTOTLE ON METAPHYSICS
Minimum Credits: 3
Maximum Credits: 3
Aristotle's views on the nature, causes and modality of change and what it is for events to be necessary or contingent, actual or possible.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2657 - PHILOSOPHY OF BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This seminar will consider foundational conceptual issues in biology including the nature and structure of biological explanation, the possibility of laws in biology and the relationship of biology to other sciences, natural kinds and the classification of species, teleology and biological function. In addition we will explore cutting edge topics of robustness in complex biological systems and the challenges raised for causal inference, emergence and multi-level organization as well as the relationship between unity of science and pluralism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2658 - PHILOSOPHY OF MEDICINE
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to philosophical and yet practical issues in medical science. Students will examine the concepts of health", "normality", and "disease", and also some representative theories in clinical biochemistry, microbiology and physiology."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2659 - NEUROBIOLOGY, REDUCTION, EMERG
Minimum Credits: 3
Maximum Credits: 3
This is an introductory level graduate seminar on the relations of the mind and the brain. Recent developments in the neurosciences, in theoretical brain science, and in computer science suggest that powerful new perspectives on understanding the mind-brain" will be covered."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2660 - CAUSALITY
Minimum Credits: 3
Maximum Credits: 3
Consideration of various theories of causality and how the theories relate to questions of metaphysics, epistemology and explanation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2661 - THEORTCL FOUNDTNS MEDICL ETHCS
Minimum Credits: 3
Maximum Credits: 3
This course examines ethical theories and their relationship to medical ethics. Ethical theories studied may include utilitarian, duty-based theories, rights-based theories, contra-otarianism, and virtue ethics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2662 - GENES AND BEHAVIOR
Minimum Credits: 3
Maximum Credits: 3
The relations between genes and behaviors will be considered from both classical (heritability) as well as molecular perspectives. Examples will be drawn from Odel organism research (worm, fly, mouse) as well as human studies. The latter will consider the iq controversy, normal personality genetics, and analyses of schizophrenia and other mental disorders. The roles of the environment and intermediate phenotypes (endophenotypes) including brain imaging studies will be discussed. Philosophical approaches will include articles from the reductionist, interactionist, and emergentist literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2663 - PERCEPTION
Minimum Credits: 3
Maximum Credits: 3
An in-depth analysis of contemporary theoretical and experimental issues in perception.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2664 - BIOETHICS
Minimum Credits: 3
Maximum Credits: 3
This course is an advanced treatment of significant problems in medical ethics. Topics may include euthanasia, rights to health care, competency, allocation of resources, and other issues of medical ethics. Students are expected to have completed at least one introductory course in medical ethics as well as one general ethics course prior to enrollment.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2667 - PHILOSOPHY OF QUANTUM MECHANC
Minimum Credits: 3
Maximum Credits: 3
This seminar provides an introduction to philosophical problems of quantum theory including variously the EPR paper, bell's inequalities, the measurement problem and quantum logic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
HPS 2668 - TOPICS IN PHILOSOPHY OF BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
In this seminar we will read both philosophy and biology concerning issues that have led to the development of a new discipline 'systems biology.' Robustness is a system-level property of central significance for systems biology. Robustness can refer to the character of a theory or explanation, the evidence for a theory or explanation or a feature of phenomena themselves. In this course it is the latter ' robustness as a feature of complex phenomena ' that we will examine. Kitano (2002, science) suggests that robustness occurs in 'adaptation, which denotes the ability to cope with environmental changes; parameter insensitivity, which indicates a system's relative insensitivity to specific kinetic parameters; and graceful degradation, which reflects the characteristic slow degradation of a system's functions after damage, rather than catastrophic failure.' How does a system maintain robustness, how does robustness evolve? How does robustness analysis affect our understanding of causality in flexible networks, modularity, and feedback control, as well as the empirical access to this form of dynamic stability? We will explore a wide variety of examples from bacterial chemotaxis to brain reorganization. In addition to robustness, biological systems also display multi-level organization, and are subject to multi-level explanations. We will consider alternative views about the relationships among the levels, and how experimental and explanatory strategies manage the multiple levels. For example, we will investigate if system-level properties are emergent and whether causal mechanisms can be multi-level.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2669 - REALISM
Minimum Credits: 3
Maximum Credits: 3
What, if anything, makes scientific claims true or false? Is scientific language about anything? If it is, can we know which scientific claims are true, or can we arrange our beliefs to converge towards the truth? If not, what purpose can the enterprise of science serve? This seminar will examine these and related questions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2670 - TOPICS IN SOCIOLOGY KNOWLEDGE
Minimum Credits: 3
Maximum Credits: 3
This seminar will consider the classic views of Mannheim and weber. The strong program" of Bloor for the sociology of science and the social constructionism of Latour and Woolgar will be examined. The main focus is on social explanation and social ontologies."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2671 - MODELS OF SCIENTIFIC CHANGE
Minimum Credits: 3
Maximum Credits: 3
This course considers global" philosophies of science; Kuhn, Lakatos, Feyerabend and Laudan. What is scientific change? How is it related to progress? What must a theory of progress satisfy?"
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2672 - PHILOSOPHY OF BIOLOGY & MEDICINE
Minimum Credits: 3
Maximum Credits: 3
This course is an advanced introduction to a series of current problems in the philosophy of biology and medicine. The course will examine issues of problem-solving, scientific discovery, diagnostic logic, probabilistic explanation, theory structure, and causation in the biomedical sciences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2673 - STUDIES IN ARISTOTLE
Minimum Credits: 3
Maximum Credits: 3
Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2674 - ARTFCL INTELGNC & LOGC DISCV**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will survey some of the work done by computer scientists in the last two decades towards developing programs which can discover scientific generalizations. Inductive strategies employed in such work will be compared with philosophical work on induction, explanation, and theory evaluation.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Survey of the leading philosophical problems in the foundations of theories of space and time.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2676 - CARNAP AND REICHENBACH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A survey of the philosophies of Rudolf Carnap and Hans Reichenbach with special emphasis on the philosophy of science.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2677 - FDS OF QUANTUM FIELD THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Philosophers of physics have lavished attention on the quantum mechanics of systems with finitely many degrees of freedom (aka ordinary QM): a pair of spin' systems in the spin singlet state, say, or a bivalent object system coupled to a bivalent measuring apparatus. This course will focus on quantum theories of systems with infinitely many degrees of freedom (aka QM'): quantum field theory and the thermodynamic limit of quantum statistical mechanics. A provocative difference between theories of ordinary QM and theories of QM' is that the former, but not the latter, (almost) always have a unique Hilbert space representation. How then—that is, by what mathematical tools and according to what interpretive principles—are we to identify the content of theories of QM'? We will attempt to articulate and address this question in a variety of contexts. The articulation will employ the resources of rudimentary operator algebra theory, with which the student will not be presumed to be familiar (although she will be expected to be acquainted with the vector space formalism of ordinary QM). The contexts will include: the uniqueness theorems for the representation of the canonical commutation relations for ordinary QM and the breakdown of uniqueness for QM'; the Rindler effect and the status of particles in qft; Haag's theorem and the unitary implementability of qft dynamics; qft on curved space time; phase structure, symmetry breaking, and "macroscopic" observables in the thermodynamic limit of GSM.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2679 - PHILOSOPHY OF MATHEMATICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Historical perspectives in philosophy of mathematics, by historical study of philosophical views about mathematics or by philosophical analysis of episodes in the history of mathematics.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
HPS 2680 - READING SEM IN PHIL OF SCIENCE
Minimum Credits: 1
Maximum Credits: 6
Selected texts in the philosophy of science.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

HPS 2682 - THEORIES OF CONFIRMATION
Minimum Credits: 3
Maximum Credits: 3
Survey of accounts of the confirmation of scientific hypotheses, including both Bayesian and non-Bayesian approaches.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2683 - PHILOSOPHY OF SOCIAL SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Several problems discussed in recent literature on the philosophy of the social sciences will be treated. These include the existence of laws in the social sciences, relativist views of scientific knowledge, and the attacks of critical theorists on traditional social sciences. Other topics will be selected according to the interests of participants in the seminar.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2684 - PERCEPTUAL THEORY & EXPERIMENT
Minimum Credits: 3
Maximum Credits: 3
A review of classic and contemporary literature on experimental work in perception and cognition.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2685 - SCIENCE AND ITS RHETORIC
Minimum Credits: 3
Maximum Credits: 3
This seminar will explore the following questions: what role, if any, do rhetorical interpretations play in the discourse of science? Can the acceptance of scientific ideas be exhaustively explained in terms of epistemic criteria alone, or is there always necessarily recourse to rhetorical topoi? What role does rhetoric play in the internal dialogues of science, and how is rhetoric mobilized when science addresses its lay audience? These questions will be explored through exemplary cases chosen from both the natural and the human sciences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2686 - CAUSALITY IN THE SOCIAL SCIENCE
Minimum Credits: 3
Maximum Credits: 3
An analysis of various claims about the status of causal explanations in the social sciences, including alternative statistical analyses.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2687 - EPISODES OF EXPERIMENTAL PRACTICE
Minimum Credits: 3
Maximum Credits: 3
Observation and experimentation have long been taken as central to the legitimacy of scientific claims. This seminar examines the assumptions and
inferences involved in reasoning about experimental results.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2688 - SCIENTIFIC EXPLANATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is a graduate seminar in scientific explanation taken almost exclusively by students in the doctoral programs of philosophy and HPS usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2689 - EXPLANS, CAUSES AND MECHNMS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A study of theories of explanation and causality as they relate to the recent work on mechanisms. Cases will come from biology and neuroscience. The concept of information will also be considered.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2690 - HISTORY AND PHIL OF PSYCHOLOGY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Examination of historical and/or philosophical texts dealing with the nature of psychology and its theories, experiments and methodology.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2691 - PERSP IN HIST AND PHIL OF SCI**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This seminar investigates perspectives of history and philosophy of science by drawing on recent literature in the field. The emphasis and selection of topics will vary from year to year according to the instructor's selection.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2692 - TOPICS HIST RECNT PHIL OF SCI**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Instructor will select several topics of current interest in history of recent philosophy of science.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**HPS 2693 - PHIL OF SCI IN THE HUMANITIES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The course will examine forms of explanation in the humanities. The course will address two questions: (1) how far are these forms of explanation dependent on forms derived from the natural sciences? (2) How far can the varied tradition of the philosophy of science further more adequate forms of explanation in the humanities?

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis
HPS 2695 - HISTORY PHILOSOPHY ARCHAEOLOGY
Minimum Credits: 3
Maximum Credits: 3
Topics to be addressed include confirmation, explanation, laws, and theory-building in archaeology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2696 - PHIL PERSPECTIVES ON FEMINISM
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar in philosophical issues related to feminism, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2698 - TOPICS IN MEDICAL ETHICS
Minimum Credits: 3
Maximum Credits: 3
Provides a forum to consider special topics in clinical, medical and research ethics in a small group.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2699 - EXPERMNT & SCIENTIFIC PRACTICE
Minimum Credits: 3
Maximum Credits: 3
This will be a course on the epistemology of science. An honest way to do epistemology of science is to ask, given a theory and a set of evidence: to what extent does this evidence support this theory? In this course we will not investigate the topography of evidential warrant so directly. We will turn instead to some recent studies of the experimental practices through which particular pieces of evidence emerge as evidence.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2700 - SCIENCE AND RELIGION
Minimum Credits: 3
Maximum Credits: 3
This course will treat issues that can be grouped under two main questions: (1) is the understanding of the world furnished by science incomplete such that super naturalist religions (notably theism) can remedy this incompleteness, or, on the contrary, (2) is there a clash between contemporary science and theism? Instances of (1) and (2) respectively are appraisals of Dostoyevsky's thesis that if god does not exist, all things are (ethically) permissible" and of the claim that "miracles defy scientific explanation"."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2701 - PHILOSOPHY AND PSYCHOANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This is an intermediate to advanced graduate seminar on the topic of philosophy and psychoanalysis taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 2702 - PHILOSOPHY AND PSYCHOANALYSIS 2
This is the second part of philosophy and psychoanalysis taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents vary from one occasion to the next.

**HPS 2720 - PRAGMATISM**
- Minimum Credits: 3
- Maximum Credits: 3
- The course focuses on key pragmatic texts from C.S. Pearce to the present. But it will also give some consideration to the historical background of pragmatism and to later critical responses and reactions. Emphasis will be upon those pragmatic teachings especially in semantics, epistemology and philosophy of science that bear on currently controverted issues.

**HPS 2902 - PRE MA DIRECTED STUDY**
- Minimum Credits: 1
- Maximum Credits: 9
- This course provides credit for supervised research on an approved master's thesis topic.

**HPS 2904 - MA THESIS RESEARCH**
- Minimum Credits: 1
- Maximum Credits: 6
- This course is intended for students who are working on their ma thesis.

**HPS 2990 - INDEPENDENT STUDY**
- Minimum Credits: 1
- Maximum Credits: 9
- This is an opportunity for a student and instructor to determine a topic in history and/or philosophy of science which is of special interest. Reading assignments are established by individual instructors.

**HPS 2999 - PROSPECTUS RESEARCH**
- Minimum Credits: 1
- Maximum Credits: 6
- This course is intended for students who are preparing for their prospectus meeting.

**HPS 3000 - DISSERTATION RESEARCH**
- Minimum Credits: 1
- Maximum Credits: 12
- Students work on a dissertation topic guided by dissertation director.
HPS 3314 - SEMINAR IN PUBLIC ARGUMENT
Minimum Credits: 3
Maximum Credits: 3
This is an advanced course dealing with specialized topics in the employment of argument in the public sphere. Textual analysis will serve as the primary mode of analysis for discussing the way policy issues are considered in the public realm.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HPS 3902 - ADVANCED DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 12
Topics to be selected by students in consultation with faculty advisors.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

History of Art & Architecture

HAA 2000 - RESEARCH AND THESIS MA DEGREE
Minimum Credits: 1
Maximum Credits: 6
Independent research for m. A. Paper.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2005 - METHODS RESEARCH & SCHOLARSHIP
Minimum Credits: 3
Maximum Credits: 3
This is the introductory seminar for entering graduate students in the history of art and architecture. As such it has two goals: 1) to explore, through use, the bibliography of reference works central to the history of art; 2) to consider the intellectual history of the discipline, with the various approaches to the work of art revealed in art historical literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2006 - ART HISTORY WRITING PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
This graduate seminar will give students the opportunity to think critically about the process of art-historical writing and to get constructive, detailed feedback on their own written work.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2007 - HISTORIOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This class examines the history of analytic approaches to art objects, doing so with an eye to the department's array of research constellations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
HAA 2008 - CONSTELLATIONS OF ART HISTORY
Minimum Credits: 3
Maximum Credits: 3
This is a graduate reading course tied to HAA's constellations. Readings will address one of the constellations from multiple perspectives. In lieu of a research paper there will be a series of shorter response papers that vary in format and goals, from brief "blog" entries on a particular reading to longer essays that compare several readings to exploratory papers that apply readings to the interpretation of specific works of art.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HAA 2020 - MUSEUM STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course teaches museum practice through practical experience with the permanent collection and with special exhibitions. Students will help in all aspects of exhibitions, from writing labels and/or catalogue copy, deciding how to best display the works, participating in the actual installation of exhibitions and planning related events such as tours.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2025 - HIST AND ETHICS OF COLLECTING
Minimum Credits: 3
Maximum Credits: 3
This course will critically examine the history of public and private collecting practices, the cultural and scholarly rationales behind collecting, and the legal and ethical challenges that collections face. Case studies will include the British museum and the Louvre, Pittsburgh's private collectors Frick and Mellon, the fate of art in Europe during World War II, the antiquities trade, and ethnographic collections. Using these and other examples, we will evaluate the arguments for and against universal art museums, the repatriation of works to source nations or original owners, and the protection of cultural heritage during times of conflict.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2030 - SPECIAL TOPICS: MUSEUM STUDIES
Minimum Credits: 3
Maximum Credits: 3
This course will discuss specific subjects in museum studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2050 - THE CITY AS A WORK OF ART
Minimum Credits: 3
Maximum Credits: 3
This seminar examines theories of the city: its origins and development. Is the city something that is planned or merely tended? The seminar chooses different cities and periods for investigation each time it is given.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2100 - SPECIAL TOPICS-ANCIENT
Minimum Credits: 3
Maximum Credits: 3
Special topics in ancient art.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
HAA 2101 - SPECIAL TOPICS: ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
Course varies from term to term.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HAA 2102 - SPECIAL TOPICS-ANCIENT
Minimum Credits: 3
Maximum Credits: 3
Special topics in ancient art.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2105 - MEDIEVAL ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
Each time that it is offered, the seminar examines a different facet of medieval building history, typically Carolingian/Ottonian (8th-11th centuries), Romanesque (11th-12th centuries) or gothic (12th-16th centuries).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2106 - PRE-COLUMBIAN ART
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the art and culture of Pre-columbian peoples of MesoAmerica and Peru from the time of the earliest foraging societies to the conquest by Spain. The goal is to integrate artistic expression with the cultural structures which inspired it. Students will become aware of the achievements of Pre-columbian civilizations and develop appreciation for artistic traditions native to the Western hemisphere.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2110 - GENDERED SPACE IN THE GRK CITY
Minimum Credits: 3
Maximum Credits: 3
Although we are all conscious of the relationship between gender and the use of space within our own cultures, being aware of and understanding the interplay of gender and space in a culture not our own is much more difficult. The difficulty is magnified if the culture is an ancient one that cannot be visited or experienced directly. This course will explore the evidence available and the methods used to reconstruct the relationship between gender and in the Greek city - literature, ethnography, archaeology, and art historical analysis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2111 - GREEK ART
Minimum Credits: 3
Maximum Credits: 3
The study of Greek art begins ca. 3000 B.C. In the so-called "age of bronze" and traditionally ends in 30 B.C. With the completion of the roman conquest of the eastern Mediterranean. The course will trace the development of architecture, sculpture and painting in mainland Greece and to a lesser extent in the Greek colonies of Asia minor and Italy, emphasizing the changes in style and taste which took place over this period.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)
HAA 2130 - EARLY CHRISTIAN ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
This seminar examines that segment of late antique architecture that is particularly distinguished as the cradle of Christian architecture, from the third through eighth centuries A.D. It looks at the need especially for a Christian house of worship, the architecture of competing faiths, the great patrons, and regional variants.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2131 - ROMAN ART
Minimum Credits: 3
Maximum Credits: 3
Roman art served as the funnel through which the principles of Greek art passed into European culture, but the principles were transformed in the process of transmission. The course will trace the beginnings and subsequent development of the arts of painting, sculpture, and architecture in Italy from the period of the kings to the middle years of the empire (ca. 150 A.D.).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2160 - ROMAN ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The course will examine the development of roman architecture from its origins in Etruria and central Italy to the middle empire (ca. 150 Ad). Special attention will be given to the relationship of architectural forms, types and functions to changes in roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between roman architectural forms and local traditions in the provinces to create a roman imperial "koine" will be treated only in passing.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2200 - SPECIAL TOPICS-MEDIEVAL
Minimum Credits: 3
Maximum Credits: 3
Special topics in medieval art.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2201 - SPECIAL TOPICS - ROMANESQUE
Minimum Credits: 3
Maximum Credits: 3
Special topics in Romanesque art.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2202 - ENGLISH MEDIEVAL ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the specific problems concerning ecclesiastical architecture in England during the 11th and 12th centuries.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
HAA 2203 - SPECIAL TOPICS - GOTHIC
Minimum Credits: 3
Maximum Credits: 3
Special topics in gothic art.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2210 - MEDIEVAL ICONOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This course examines the major themes of the art of the middle ages, including subject matter from the old and new testaments, biblical commentary and exegesis, from the classical tradition, and from the vernacular literature of the period.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2215 - MEDVL MANUSCRPTS ILLUMINATIONS
Minimum Credits: 3
Maximum Credits: 3
A survey of the illuminated books of the middle ages from late antique times to the late 15thc. With particular emphasis on the art of Western Europe. Methodological approach includes fundamentals of codicology, palaeography and minor decoration, with the emphasis on chronological development of types of book, style and iconography. In addition to material presented in class using slides, extensive use will be made of originals in local collections and facsimiles.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2230 - MEDIEVL ILLUMINATED MANUSCRPTS
Minimum Credits: 3
Maximum Credits: 3
Study of illuminated manuscripts in Europe.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2231 - EARLY MEDIEVAL ART
Minimum Credits: 3
Maximum Credits: 3
This course examines the art of the early middle ages, paying particular attention to the slow disintegration of the roman empire, the rapid rise of Christianity, and the evolving identity of Europe and the Mediterranean in a period of migration, crisis, and transformation. Special attention will be paid to the roles played by emperors and kings in this period, including Constantine, Justinian, Clovis and Charlemagne, and the peculiar blend of Pagan and Christian cultures that defined early medieval art.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2240 - ROMANS AFTER ROME
Minimum Credits: 3
Maximum Credits: 3
Romanesque architecture, evolving from the building practices of about A.D. 800 In the Carolingian Empire, marks the coming of age of European culture in the post-Antique era. Most of what survives was ecclesiastical in purpose and consists predominantly of monastery churches and their claustral structures. This course will treat both formal and functional issues in the development of the Romanesque tradition and will emphasize the Mature period, 1050-1140.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
HAA 2250 - EARLY GOTHIC ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
A seminar focusing on problems in gothic architecture in France and/or England.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2255 - GOTHIC ART
Minimum Credits: 3
Maximum Credits: 3
The survey of the architecture, painting and sculpture of the period circa 1140 to 1500 with an emphasis on French art and its influence in the rest of Europe.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2260 - CATHEDRAL & CITY IN MIDDLE AGE
Minimum Credits: 3
Maximum Credits: 3
The cathedral and the city were two of the most powerful organizing forces in medieval society from late antiquity to the Renaissance (4th – 15th centuries). Taken separately, the building type and the urban setting were no more than incomplete halves without the complement of the other. This seminar studies the interaction of the architectural function and the symbol of the cathedral with the changing demographic and social currents of the medieval city around it. Different cities serve as paradigms for the exploration of this theme.

HAA 2303 - ITAL RENAISSANCE PORTRAITURE
Minimum Credits: 3
Maximum Credits: 3
Topics in Italian Renaissance portraiture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2305 - CONNOISSEURSHIP
Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on Italian 17th-century drawings, especially those by artists working in Bologna and Rome. A few original drawings will be shown.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2306 - HIGH RENAISSANCE ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The architecture of the high Renaissance and mannerism (from about 1500 to about 1580 in Rome and other centers of Italy) changed forever the face of architecture. This course focuses on the Roman projects of Bramante, Raphael, Michelangelo and Leonardo da Vinci. It then follows the mutation of high Renaissance ideals into mannerism and the spread of both styles in Northern Italy, particularly in town planning and in the villas and churches of Andrea Palladio around Venice.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2307 - PAINTING IN 17TH CENTURY HOLLAND
Minimum Credits: 3
Maximum Credits: 3
This course will focus on key figures such as Frans Hals, Rembrandt, Vermeer, and Jacob van Ruisdael, and will also examine the development of portraiture, landscape, and genre painting. Though the primary concern will be with painting, drawings and prints will also be introduced when relevant. The historical and social context for the "golden age" of Dutch art will also be discussed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2308 - EARLY RENAISSANCE ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The early Renaissance (1420-1500) marked a fundamental change in the way mankind saw and thought about the world. This course examines the buildings, cities, projects, and theories of that period through its major designers. It concentrates on the new acceptance of rationality and modular linkage in building, which prefigures the rationality and scientific method so characteristic of the modern world.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2310 - ART & POLITICS IN 17TH CENTURY ROME
Minimum Credits: 3
Maximum Credits: 3
This seminar will focus on the role of secular political issues on artistic patronage in 17th century Rome, using major commissions for papal and ecclesiastical patrons as topics for discussion. Artistic politics may also be considered - how artists found patrons, fund-raising for ambitious projects, and artistic rivalries.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2312 - 16TH CENTURY ITALIAN DRAWINGS
Minimum Credits: 3
Maximum Credits: 3
Study of Italian drawings of the 16th century.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2313 - 17TH CENTURY ITALIAN DRAWINGS
Minimum Credits: 3
Maximum Credits: 3
Drawings will be studied from multiple aspects: medium, function, documentary value, connoisseurship and collecting.

**Grade Component:** Grad Letter Grade

**HAA 2350 - RENAISSANCE ARCHITECTURE**
Minimum Credits: 3
Maximum Credits: 3
This seminar examines Renaissance architecture (15th - 16th centuries) or a portion thereof: its origins, its theoretical underpinnings, its relationship to painting and sculpture, its cultural background, its main design professionals, and its urban context.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**HAA 2370 - SEMINAR EARLY ITALIAN PAINTING**
Minimum Credits: 3
Maximum Credits: 3
This graduate level research seminar in late thirteenth - and early fourteenth ' century Tuscan painting is intended for scholars ' in ' training who wish to know more about this period and its art historical methodology. Our special focus will be a new type of painting, the private devotional trip-tych or diptych, which evolved in this period, in part as a result of St. Francis' new emphasis on private devotion. Our investigations will center on works by and in the ambience of Giotto and Duccio.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**HAA 2375 - DEVOTIONAL IMAGERY**
Minimum Credits: 3
Maximum Credits: 3
An examination of the iconography and types of devotional images created in Italy in the fourteenth and fifteenth centuries, with a special emphasis on the paintings and sculptures created for the domestic sphere.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad Letter Grade

**HAA 2380 - FLORENTINE RENAISSANCE SCULP**
Minimum Credits: 3
Maximum Credits: 3
This seminar for art history graduate students and honors undergraduate majors, will examine the lives and works of the major sculptors in Florence between 1390 and 1470 in order to attempt to answer the following questions: what were sculptors' workshops like? What kinds of things did sculptors make in addition to their well-known works in wood, marble, or bronze? What do documents tell us about the attitudes toward sculptors and their works? Who were sculptor's patrons?

**Academic Career:** GRAD

HAA 2402 - IN THE WARHOL MUSEUM
Minimum Credits: 3
Maximum Credits: 3
This seminar explores the life work and milieu of one of the most important cultural figures of the late 20th century. Working in cooperation with the staff of the Warhol Museum, students will use its unique archives and collections to produce original research on topics that can range from Warhol's own career to the many different facets of 20th century culture which he observed and helped to shape.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2403 - CONTEMPORANEITY: PICTURING PRESENT
Minimum Credits: 3
Maximum Credits: 3
What is it, these days, to imagine the present, to grasp the quick of contemporary life, to think contemporaneity, now? Why is the concept of "the contemporary" being so thoroughly interrogated, by so many, incessantly and so insistently? Whatever happened to postmodernity? Who remembers modernity? Why have so many pasts returned to haunt the present, and to stake a claim on tracts of the future? Perhaps contemporaneity has always been like this. Yet there is a dawning sense among many -- from innovative theorists in a variety of disciplines to certain influential public media columnists -- that these increasingly incompatible cotemporalities may be unprecedented, at least in degree, perhaps in kind. Their extraordinary, intense and often violent conjunction suggests something that is distinctive about these times.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2405 - 18TH CENTURY ART
Minimum Credits: 3
Maximum Credits: 3
The course surveys the painting, sculpture and decorative arts of Europe in the 18th century. Special attention will be given to trends in painting in France, from Watteau to David. In addition, major figures in prints such as Goya, Hogarth and Piranesi will be studied. The course will emphasize the social and philosophical writers of the enlightenment and suggest the ways art and ideas mingle.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2407 - ARCHITECTURE AND ENLIGHTENMENT
Minimum Credits: 3
Maximum Credits: 3
This course will examine architecture, city planning, interior design, and gardening in eighteenth-century Europe as the product of social, industrial, administrative, and intellectual transformations that began to radically challenge traditional spatial configurations and conventional approaches to building. In cosmopolitan centers like London and Paris, an unprecedented explosion of print media, rapid rises in literacy, and the development of a public sphere outside official power structures opened debate in the arts to previously marginal figures. A range of new voices thus emerged that impacted policy decisions in the urban realm and proffered advice and guidance in thinking about aesthetics and artistic production. The rise of science held out the possibility that cities and institutions could be reshaped to improve human welfare through better hygiene and the expansion of commerce. Influential new classes defined by wealth or specialized knowledge generated the creation of building types for a range of new activities. Elite domestic space in particular reflects a wholesale transformation of social priorities motivated by the novel concept of privacy. Narrowly defined Renaissance discourses on the arts founded exclusively on the model of ancient Rome collapsed under an avalanche of data gathered in remote sites around the Mediterranean and through contact with more far-flung civilizations around the world. New intellectual paradigms reconfigured the relationship between individual and nature, between modern present and historical past. Consequently, the purpose of architecture mutated in the course of the eighteenth century as a bewildering range of new possibilities for shaping building and reshaping social relations were explored. Well before political revolution rocked European governments and toppled traditional hierarchies, the built environment served as a laboratory for experimentation and as a forum for reimagining society.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2410 - CULT OF EXILE: GER EMIGS IN US
Minimum Credits: 3
Maximum Credits: 3
The seizure of power by the Nazis in 1933 resulted in an unprecedented exodus of writers, artists, scientists and intellectuals to the United States. This course offers both a historical survey of what must be considered a paradigmatic moment in the exchange and transfer of cultural capital including its impact on American mass culture and a more theoretical consideration of exile communities and immigrant cultures and the status of national traditions in an increasingly streamlined global mass culture.
HAA 2411 - MODERNISM
Minimum Credits: 3
Maximum Credits: 3
Something happened in the history of art around the time of Manet which set painting upon a new course. This change has been described as a kind of skepticism or uncertainty about the nature of representation in art, characterized by an attention to the material means by which illusions and likenesses are made. This course will examine several monuments in the history of modernism, in an attempt to define the political ambitions of modernism and to confront the issue of whether modernism has become simply an aesthetic or is still a viable artistic strategy in the "post-modern" era.

HAA 2420 - CONTEMPORARY VISUAL CULTURE
Minimum Credits: 3
Maximum Credits: 3
This seminar will consider visual culture, its history, theory and practice; style, picture, spectacle".

HAA 2430 - EIGHTEENTH-CENTURY ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The seminar is devoted to the fascinating architecture produced in the eighteenth century in Europe and America. One segment is devoted to rococo architecture, the other to neoclassicism: two very different manifestations of a century preoccupied with its relation to the past.

HAA 2440 - NINETEENTH-CENTURY ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The seminar examines the various 'problems' of nineteenth-century architecture: it's coming to grips with the radical new building materials and building technology, its rich but contradictory theoretical positions, its obsessive concern with the past, its relationship to the architectural profession. Each presentation of the seminar will select a particular aspect of nineteenth-century work in Europe and America.

HAA 2441 - EXPRESSIONISM
Minimum Credits: 3
Maximum Credits: 3
A history of the development of modernist art in Germany from the founding of the "bridge" group in 1905 to the "death" of German expressionism in 1920. Although primarily focused on the art of the "bridge" and "blue rider" groups, the course will also situate this art within the broader context of German art production during these years (academic art, jugendstil, secession, dada).

HAA 2445 - 20TH CENTURY ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
This seminar will deal with the life work and influence of LeCorbusier in 20th century architecture. It offers opportunities for student research on the modern architecture of South America, Africa, Asia, or Australia as well as the more usual areas of Europe and North America.
HAA 2450 - NINETEENTH-CENTURY EUROPEAN ART
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine various problems in the study of European painting, prints, and sculpture.

HAA 2451 - ART IN THE WEIMAR REPUBLIC
Minimum Credits: 3
Maximum Credits: 3
The course will examine art and architecture in Germany from the end of World War I to the rise of the national socialist dictatorship in 1933. Emphasis will be on a chronological study of the ways in which art developed in Germany under democratic social concepts and a new internationalist outlook in the early years of the republic, and the ways art became embedded in the political structures.

HAA 2455 - ART OF THE THIRD REICH
Minimum Credits: 3
Maximum Credits: 3
This course examines national socialist art and the fate of modernism under Hitler in the years between 1933 and 1945. As we will explore, Hitler's regime enlisted the arts and architecture, through party rallies, art exhibitions, building programs, and film, in enforcing its dictatorial policies on everything from the extermination of the Jews to sexuality and the war effort. We shall also consider the impact of the purge of modern art under Hitler on the work of such noted modernists as Otto Dix and Käthe Kollwitz, who chose to remain in Germany, and on the art of those who fled into exile, among them John Heartfield, George Grosz, and Max Beckmann. The final weeks of the course will consider critical issues involved in recent--and invariably controversial--attempts in museum building, sculpture, and site-specific installations to memorialize the Holocaust and examine Germany's Nazi past.

HAA 2460 - REALISM
Minimum Credits: 3
Maximum Credits: 3
The seminar will study some of the major art currents in France grouped under the name 'realism'. The focus will be on the types of art created by the major figures in this movement, Daumier, Courbet, Tassaert, Manet, Monet and Degas. It will also relate their art to contemporary political, social and scientific events, for example, the development of photography and optical devices, the radicalization of European workers, new attitudes to social needs in cities, the role of critics, the importance of lithography, etc.

HAA 2465 - RESEARCH ON 19THC EUROPEAN PTG
Minimum Credits: 3
Maximum Credits: 3
This seminar will give special emphasis to artists affiliated with realism, impressionism and post-impressionism. Students will read extensively on methodology in this area.

HAA 2475 - MODERNITY, MODERNISM & HOUSING
Minimum Credits: 3
Maximum Credits: 3
This course offers multiple perspectives on architectural modernism and modernity through the perspective of dwelling. We will consider examples of modern architecture from the Americas, Europe, Africa, the middle East and Asia from the late 19th century (starting with the debates regarding tenements in this country and working-class housing in England) and end with the demolition of the Pruitt-Igoe housing projects in St. Louis in 1972. The lens of housing will allow us to consider modernism in different geographic contexts (East and West); under different political conditions (in the colonial periphery, in the heart of empire, as part of state-sponsored redevelopment projects, and as part of the nation-building process in the developing world) and through a range of theoretical vectors (i.e. The modernist house as a manifesto for a new way of living; the attention received by vernacular building traditions and various schemes to replicate them as part of the modern project; the role of post-war technology in prefabricated housing; and the role of museums, such as the moma and other institutions such as the united nations in calcifying modernism in various locales around the world). This course is designed to give students a strong foundation in the theoretical, aesthetic and historical expressions of architectural modernism. It is also designed to expand the range of architectural modernism beyond the traditional Euro-Ameri-centric canon to include alternative modernisms across global geographies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2480 - ARCHITECTURE SINCE 1945
Minimum Credits: 3
Maximum Credits: 3
Treats the key developments in architecture throughout the world since World War II, including theory as well as practice. The course will focus on such figures as frank Lloyd Wright, Miles Van der Rohe, Le Corbusier, James Stirling, Eeko Saarinen, Louis Kahn, Kenzo Tange, Robert Venturi, Richard Rogers, and Norman Foster.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2490 - TOPICS IN 20TH CENTURY ART
Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on the political history of modern art from the final years of the first World War to the end of the second World War. Selected topics may include Malevich, Grosz, Ernst, Picasso and Pollock

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2491 - ART SINCE 1945
Minimum Credits: 3
Maximum Credits: 3
This course will present a review of art movements in America and Europe form 1905 - 1945 in the introduction, followed by a more intensive study of post-World War II art movements in Western Europe and America from 1945 to the 1980's. We will give special attention to: a) different styles of art which fit into the label "abstract expressionism" b) different styles under "pop(ular) art" c) conceptual art movements d) issues in critical evaluations of contemporary art.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HAA 2500 - SPECIAL TOPICS - AMERICAN
Minimum Credits: 3
Maximum Credits: 3
Special topics in American art.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2502 - SPECIAL TOPICS: LATIN AMERICA
Minimum Credits: 3
Maximum Credits: 3
Special topics: Latin America
HAA 2503 - AMERICAN ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The seminar selects a different area of American architecture each time it is presented. The general chronological scope is 17th through 20th
centuries. Typical questions might be colonial architecture of the Spanish, French, Dutch, and British colonies; relationship with Europe; regional
expression; and specific architects such as Jefferson, Richardson, Sullivan, or their contemporaries.

HAA 2510 - PITTSBURGH ARCHITECT/URBANISM
Minimum Credits: 3
Maximum Credits: 3
The course studies the physical environment of Pittsburgh; the topography, early settlement, the expansion of its industrial center, the post-war
renewal, and the current shift from production to a service-based economy. A parallel study in the architectural history of Pittsburgh focuses on
images of individual buildings from fort Pitt to the new skyscrapers. Student papers either expand research in building categories (industrial,
domestic, etc.) or integrate the physical development of the region with its political and social history.

HAA 2512 - AMERICAN SCULPTURE
Minimum Credits: 3
Maximum Credits: 3
Sculpture has long been a uniquely public medium: it fills our common spaces, commemorates national and local heroes, explains and adorns
government buildings. In addition to being integral to the history of American art, it also reflects some of the most important issues in the history of
American society. This course will survey American sculpture from the colonial era to the present, from carved tombstones and idealized marble
portraits to large-scale programs for public spaces and vast reshaping of the natural environment. We will study its relationships to other arts’
especially architecture, with which it is often associated’ and to major trends in Western art as a whole.

HAA 2531 - AMER ARCH SINCE INDSTRLZTN
Minimum Credits: 3
Maximum Credits: 3
By 1880 traditional American architectural values had broken down under a barrage of ornament and imported European styles. But at the same
moment a new American architecture was taking shape to express the new wealth of post-Civil War America and its new social order. The next
hundred years would see a succession of brilliant architects in Sullivan, Wright, Mies, Johnson and the pluralists of today. These individual successes
only partially mask some major problems; both constitute the underlying themes of this course.

HAA 2532 - EARLY AMERICAN ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
Architecture often serves as a prime document and indicator of America's past and future. The theme of this course is the search for identity in
American architecture in the centuries from the colonial settlements to the Civil War. The course studies both the recorded history of American
architecture and the unrecorded millennium before that, to show its surprising cohesion in the fact of great cultural and territorial diversity.
HAA 2560 - IN THE WARHOL MUSEUM
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine Andy Warhol's far flung activities and experiments by engaging directly with the documentary and artistic materials he left to us. Working with the cooperation of the Warhol museum staff, students will conduct original research in the still largely unexplored holdings of the museum. These include a vast archive of material collected by Warhol on himself and on the times in which he lived and major holdings of Warhol drawings, paintings, prints, photographs, and films.

HAA 2607 - NE ASIAN ART & PRACTC IN ANTH
Minimum Credits: 3
Maximum Credits: 3
The seminar will focus on NorthEast Asia, china, Korea, and Japan, in the period from the late Neolithic through the bronze age. Discussions will include the emergence of complex society in the region as well as interaction within and the effects on ritual art and practice.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2608 - EARLY CHIN ART & ARCHAEOLOGY
Minimum Credits: 3
Maximum Credits: 3
This is a seminar designed to introduce current problems in the study of early Chinese art and archaeology. Readings will be taken from recent books and periodicals in Western and eastern languages.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

HAA 2609 - EARLY CHINA: POWER & IDENTITY
Minimum Credits: 3
Maximum Credits: 3
The course is designed to look carefully at the ancient culture of the Chinese. The first task is to learn more about how and where they lived and to gain an understanding of the changes in culture throughout the period dating from c. 2500 BC-C. 200 A.D. It is hoped that the participants in the class will be able to distinguish various periods in Chinese history through study of the material culture; jade, bone, ivory, and bronze artifacts of all kinds. As each period is discussed significant art historical problems will be noted and examined.

Grade Component: Grad Letter Grade

HAA 2630 - CHINA: ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
The design of Chinese cities is guided by philosophical principles established in the early dynastic period. Imperial cities follow a regular grid pattern that faces south, and includes an inner city, open only to the imperial leaders and aristocrats, and an outer city in which the business is carried out. The design and use of the city is guided by Confucian and Daoist ideals. Religious centers follow palace designs, but are tied to Buddhist, Confucian and Daoist practice. Village centers are arranged according to Daoist ideas about nature called Fengshui.

Course Requirements: PLAN: History of Art & Architecture (MA, PHD)

HAA 2640 - 20TH CENTURY CHINESE ART
Minimum Credits: 3
Maximum Credits: 3
The 20th century in China was a period of tremendous change. Artists and the society in which they lived crashed into the modern world to struggle with the weight of tradition as well as the draw of the new. We will consider this period and artistic visions of it by looking at arts including printmaking, painting, film, installation and other synthetic and combined forms. All artistic production will be contextualized within the political and cultural history of the period.

HAA 2653 - ANCT EAST ASIAN VISUAL TRADTNS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to look at early cultures of East Asia through the study of material culture. It is arranged in chronological order, beginning with the Paleolithic and including the Neolithic, through the formation of states and empires in China, Korea and Japan. We will consider the artifacts as cultural documents and learn how to explain why they look the way they do based on an understanding of their patron's input, their function, use and time of manufacture.

Grade Component: Grad LG/SNC Basis

HAA 2654 - EARLY JAPAN: MATERIAL & RITUAL
Minimum Credits: 3
Maximum Credits: 3
This course will examine the early culture of Japan through the study of archaeologically recovered artifacts, tombs, the remains of cities and religious sites. The course is set in chronological order, beginning with the Neolithic cultures and continuing through the formation of cities and states. We will look at materials uncovered by archaeological excavations as well as collections in museums and will consider the artifacts as cultural documents.

HAA 2660 - JAPAN: HANDSCROLLS
Minimum Credits: 3
Maximum Credits: 3
The course begins by considering how handscroll paintings, as the first secular art of Japan, developed out of earlier religious painting. It seeks the source of this development in changes in religion itself, showing how as religion in Japan became increasingly philosophical, the making of religious art ceased to be the ritual creation of "magic objects" and became little more than the illustration of sutra texts. The course shows how these notions of art were codified into a "classic" tradition by the imperial court and ends with a look at how this aesthetic influenced ink ptg.

HAA 2923 - GLOBAL PRESERVATION
Minimum Credits: 3
Maximum Credits: 3
The late-nineteenth and early-twentieth century debates regarding the role of the architectural monument as a signifier of the past, as a container of memory and more importantly authenticity, were the definitive moment in the institutionalization and professionalization of architectural preservation around the world. In a 1903 essay titled 'the modern cult of monuments,' art historian Alois Reigl claimed that while the creation of monuments (i.e. structures built to memorialize certain events or persons) had a long history that predates modernity, the 'cult of the monument' (i.e. the allocation of the monument as a unique and original object in a pre-ordained historical narrative of social and cultural evolution) came about as recently as the nineteenth-century. It is this coupling of the advent as well as the progress of modernity along with the formalization of systems of historic preservation that this course seeks to explore.

Human Behavior

SWBEH 2006 - PSYCHO-SOCL ASPECTS OF ILLNESS
Minimum Credits: 2
Maximum Credits: 2
This course is designed for professionals who are concerned with the well-being of the physically ill and their families. The relationship between psycho-social factors and physical illness will be examined. Identification of factors which hinder or assist the patient and family in successful adaptation to the illness will be a major focus of inquiry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2008 - HUMN BHVR: URBAN ENVIRONMENT
Minimum Credits: 3
Maximum Credits: 3
This course deals with collective behavior and societal values relative to key urban issues, particularly race, gender, and poverty. Guest experts will lecture, with the course drawn together, coordinated, and enriched by a single instructor of wide experience, both in teaching and in running a large innovative agency.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: COSA (Social Work-MS)

SWBEH 2015 - CHILDHOOD ILLNESS & THE FAMILY
Minimum Credits: 2
Maximum Credits: 2
This course addresses itself to the physical and psycho social problems that illness/disability create for the child and his family. The course deals with the major health problems of children and the overall role of the clinical social worker in dealing with patient/family as part of a multidisciplinary team. Tapes, video tapes, and presentations by various clinical specialists are included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2058 - WOMEN AS PROFESSNALS & CLIENTS
Minimum Credits: 2
Maximum Credits: 2
This course examines some of the key issues, stemming from the women's movement, which affect women as professionals and as clients. Didactic and experiential instructional methods will be used.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2061 - HUMAN BEHAVR: CHLDHD ADLESCNCE
Minimum Credits: 3
Maximum Credits: 3
This course is the second level, required behavior course. From an ecological perspective, this course will examine child and adolescent development, environmental factors which have an impact on that development, and selected theories which guide practice with these client populations. Course content will emphasize behavior associated with developmental tasks of childhood and adolescence and implications for social work practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2062 - HUMN BHVR: CHLD FMLY AT RISK
Minimum Credits: 3
Maximum Credits: 3
This course is designed to examine the strengths and needs of children and families at risk. The effects on parent and child development of poverty, unemployment, drug and alcohol abuse, family violence, child maltreatment, inadequate housing, inadequate health care, inferior educational opportunities and other micro and macro factors will be examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: Direct Practice (Social Work-MSW)

SWBEH 2063 - HUMAN BEHAVR & SOCIAL ENVNMT
Minimum Credits: 3
Maximum Credits: 3
Using systems theory as an organizing framework, human behavior and its determinants are studied from the societal systems through the group, family, and individual systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2064 - HUMAN BEHAVIOR: HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course employs the holistic approach to physical and mental health with the greater emphasis on physical health problems encountered at different stages of the life cycle.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWBEH 2065 - HUMAN BEHAVIOR: MENTAL HEALTH
Minimum Credits: 3
Maximum Credits: 3
This course addresses the etiology, nature, course and treatment of mental disorders across the life cycle. Some mental illnesses begin early in life, and may continue throughout life, being modified by growth and development; others begin later in life or are specific to a particular stage in the life cycle; while others occur in response to environmental circumstances and stressors. Furthermore, gender, race, culture, ethnicity, socioeconomic status and other aspects of diversity shape how symptoms of mental illness are experienced, interpreted and expressed. A selection of the major categories of mental disorder and abnormal behavior will be addressed although it will not be possible to examine all of them in class. Understanding and applying the DSM-IV-TR manual as a clinical assessment tool, an introduction to psychopharmacology, and the nature and role of risk and protective factors associated with suicidal and violent behavior will also be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWBEH 2063; SBPLAN: Direct Practice (Social Work-MSW)

SWBEH 2066 - HUMN BHVR: HLTH/MENTAL HLTH
Minimum Credits: 3
Maximum Credits: 3
The overall purpose of this course is to expand student knowledge of physical health and mental health interactions which impact individuals and target populations during the life cycle process. This knowledge is used to design theory driven health promotion interventions. This course will investigate selected physical and public challenges that impact the overall health and well-being of individuals from early childhood to late adulthood. Definitions of health and well-being from both a social work and public health perspective will be defined and discussed to more fully understand the state of physical and mental issues in the Western society. Understanding the integration of health education, health behavior, health promotion, is required to facilitate the development of theory driven interventions. Special attention is focused on how values, historical experience, cultural norms and environmental factors such as race, gender, socioeconomic status, and access to resources impact the public's health and their
access to service delivery. Students will develop the ability to apply their knowledge and understanding of the interactions between physical health and mental health status across the lifespan to their own work with clients, organizations and policy initiatives.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWBEH 2063; SBPLAN: Direct Practice (Social Work-MSW)

**SWBEH 2069 - BEHAVIORAL DYNAMICS OF POVERTY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course focuses on various theoretical orientations and perspectives and the knowledge base that attempts to understand the association between poverty and behavior. The course examines poverty as both dependent and independent variable, a range of theories that have developed and the testing of these theories through the collection of empirical data.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWBEH 2071 - PSYCHO-SOCIAL DEVIANCE**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course examines pathological, dysfunctional, and deviant behavior. It also analyzes methods of social control and direct and indirect social work practitioner roles in relation to deviance.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWBEH 2073 - DRUGS, SOCIETY & HUMAN BEHAVR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to provide an empirical knowledge based on drug and alcohol dependence and abuse in American society and their impact on human behavior. It will examine the theories of drug and alcohol dependence, the classification of abused and dependency-producing drugs, empirical knowledge about behavior, personality, psychopathological, psychosocial and social and cultural aspects of these phenomena.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWBEH 2075 - PARENT/CHLD DEVELOPMNT LATENCY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course focuses on normative developmental processes that occur as children and parents grow together through the middle childhood years. Cognitive, social and emotional aspects of development are covered. This course deals with answers to three basic questions: what are the emerging developmental abilities of the child during the grade school years? What are the changing developmental needs of adults during their 30s and 40s? What are the significant qualities of parent/child interaction during this time?  
**Academic Career:** GRAD  
**Course Component:** Lecture

**Course Requirements:** School of Social Work students only.

**SWBEH 2077 - HUMN BHVR: ADLT DVLP AGING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on substantive content during adulthood (early and middle age) and old age. This course offers a framework for understanding mid-life and old age from a life-span developmental perspective and examines physical, social (environmental), and personal factors that influence the developing personality. The knowledge is integrated and appraised for its usefulness in working directly with and/or in behalf of middle-aged and older persons.  
**Academic Career:** GRAD
Human Genetics

HUGEN 2017 - HUMAN GENETICS
Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to basic genetic principles and their application to human heredity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HUGEN 2021 - SPECIAL STUDIES
Minimum Credits: 1
Maximum Credits: 15
Qualified students may undertake advanced work or research with the approval and under the guidance of a member of the staff.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

HUGEN 2022 - HUMAN POPULATION GENETICS
Minimum Credits: 2
Maximum Credits: 2
Deals with general principles of population genetics, especially those applicable to human populations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HUGEN 2023 - POPULATION GENETICS & EVOLUTION
Minimum Credits: 3
Maximum Credits: 3
Discusses various ways of establishing genetic polymorphisms in populations, including mutation, selection, and subdivision of populations. The consequences of nonrandom mating and finite population size are also covered. Experimental data from natural populations are included to illustrate the predictions from theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HUGEN 2024 - ADVANCED TOPICS HUMAN GENETICS
Minimum Credits: 1
Maximum Credits: 1
Focuses on the application of genetics to problems in public health. Topics of major concern include genetic toxicology, Eco genetics, biochemical and molecular genetics, cytogenetics, population genetics, population screening and surveillance, immunogenetics, teratology, cancer and genetic counseling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HUGEN 2025 - HUMAN GENETICS SEMINAR
Minimum Credits: 0
Maximum Credits: 0
Human genetics seminars present current genetics methodology, theory, and data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis
HUGEN 2026 - SPECIAL STUDIES HUMAN GENETICS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide advanced undergraduates and graduate students with directed, intensive training in laboratory, statistical or clinical research methods relevant to human genetics. These will be specialized skills not available through regularly taught courses in the university. Each special study is designed in consultation with an individual member of the human genetics faculty. Course performance will be judged by the preparation of a written final report to the supervising faculty member.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2027 - HUMAN GENETCS FALL JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
Human genetics journal club meets once a week during the fall semester to give students and faculty a chance to present exciting research which they feel is relevant to the department. The audience is other students and faculty from the department and other departments of the schools of health sciences. Presentations are informal and meant to give students the experience necessary to be an effective communicator, and to teach them critical skills for evaluating research publications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2028 - HUGEN JOURN CLUB & PEER REVW
Minimum Credits: 1
Maximum Credits: 1
Human genetics journal club and peer review meets once per week for one hour and provides students and faculty with an opportunity to present exciting research in an informal format. The purpose of the course is to hone students' oral and written critical evaluation skills via oral presentations of published literature, as well as a written review of a manuscript. Upon completion of the course, students will be able to orally critique a paper from the literature and also critically review a manuscript for publication.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2029 - INTRODUCTION TO GENE MAPPING
Minimum Credits: 3
Maximum Credits: 3
This course presents a literature-based approach to understanding and interpreting results from gene mapping papers in the field of human genetics. Traditional and state-of-the-art linkage analytic methodologies will be explored. Students should have a basic knowledge of biostatistics principles, molecular genetics, and population genetics. Short summaries will be given of each analytic technique, followed by student-led critiques of representative papers from the current literature and discussion of study design issues, results, interpretations, and shortcomings of each paper.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HUGEN 2022 and HUGEN 2034 and HUGEN 2040 and BIOST 2041

HUGEN 2030 - CHEM MUTAT OF HUMAN CHROMOSOMS
Minimum Credits: 3
Maximum Credits: 3
A structure-reactivity approach is taken regarding the interaction of potentially mutagenic/carcinogenic chemicals with human chromatin. Methods for assessing the genetic toxicity of environmental, industrial, and chemotherapeutic agents are discussed. Emphasis is on utilization of invitro human and other mammalian cytogenetic assays and invivo animal models for extrapolation to human populations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HUGEN 2031 - CHROMOSOMES AND HUMAN DISEASE
Minimum Credits: 3
Maximum Credits: 3
The role of chromosomes in human disease is discussed after a thorough background on chromosome structure and function is presented. Topics covered include cytogenetic methodology, aneuploidy, chromosome rearrangements, chromosomes and cancer, chromosome breakage syndromes, and fragile sites on human chromosomes.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HUGEN 2032 - GENETIC TECHNIQUES**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Students participate in laboratory exercises to become acquainted with cytogenetics laboratory procedures including cell culture, chromosome preparation, chromosome banding, and karyotyping. Chromosome analysis and karyotype interpretation are practiced.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: HUGEN 2031

**HUGEN 2033 - QUANTITATIVE GENETICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An advanced course for those who have a major interest in quantitative aspects of genetics, namely, in the genetic epidemiology of human diseases.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: HUGEN 2022 and BIOST 2043

**HUGEN 2034 - BIOCHEM MOLEC GENET CPLX DS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides students with an understanding of the molecular and biochemical genetic approaches to understanding genetically determined susceptibility to common disease. This will be presented using selected examples of complex human diseases (cardiovascular disease, neurodegenerative diseases, diabetes, lupus, age-related macular degeneration, cancer and osteoporosis). Risk of common, complex diseases is determined by genotypes at multiple genetic loci and the complex interaction of genetic variation and environmental exposures. Risk of almost every common disease is influenced by genes, but the relationship between genotype and disease phenotype is weak compared to that observed with rare Mendelian traits. However, understanding the contribution of genes to common disease susceptibility is important to public health.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HUGEN 2035 - PRINCIPLES OF GENETIC COUNSLNG**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Provides basic training in genetic counseling with particular reference to its applications in public health programs.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**HUGEN 2036 - GENETIC COUNSELING INTERNSHIP**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
Provides practical applications of the fundamentals of genetic counseling. Involves both the observation of and participation in at least 50 counseling sessions in the medical genetics departments of children's, Magee-Women's and West Penn hospitals. Literature review and searches pertinent to each patient will be necessary for adequate preparation. Weekly case presentations and/or lectures will also be included.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Genetic Counseling (MS)
HUGEN 2038 - INTERVNTN SKILL GENETIC CNSLG
Minimum Credits: 3
Maximum Credits: 3
Focuses on the understanding of theories of intervention, skill development and application to genetic counseling. The course aims at sensitizing students to the ethical dilemmas faced by affected families and health-care providers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Genetic Counseling (MS)

HUGEN 2039 - RISK CALCULATION GENETIC CNSLG
Minimum Credits: 1
Maximum Credits: 1
Provides training in calculating risk of disease, or carrier status, in a variety of genetic counseling situations by learning to identify the sources of risk in the counselee's personal and family history and to analyze and synthesis a single overall risk of disease from these competing risks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: CREQ: HUGEN 2022

HUGEN 2040 - MOL BASIS OF HUMN INHERITED DS
Minimum Credits: 3
Maximum Credits: 3
This course will provide an up-to-date overview of the most common and biologically informative human inherited disorders and will integrate clinical descriptions with recent genetic, molecular genetics and biochemical insights. Disorders covered include lysosomal storage disorders, neuromuscular diseases, organic acidopathies, amino acidopathies, neurofibromatosis, cystic fibrosis, neurodegenerative and ophthalmic disorders. Current techniques of gene mapping, cloning, transfer, and expression will be integrated into the overviews.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2041 - BIOETHICS
Minimum Credits: 3
Maximum Credits: 3
This course is an advanced treatment of significant problems in medical ethics. Topics may include euthanasia, rights to health care, competency, allocation of resources, and other issues of medical ethics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HUGEN 2042 - IMMUNOGENETICS
Minimum Credits: 3
Maximum Credits: 3
This course will deal in depth with the use of immunological and molecular biological techniques to study genetics, mainly, of cell surface antigens. The emphasis will be on the use of serological and biochemical tools to identify and isolate cell surface antigens and on their functional significance. The genetics and chemistry of the immunoglobulins will also be covered in detail. The molecular biology underlying the control of cell surface antigens and immunoglobulins will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2043 - SPECIAL TOPICS IN BIOETHICS
Minimum Credits: 3
Maximum Credits: 3
Students taking this seminar will collectively choose one of the following three topics on which the seminar will focus during the semester: (1) conceptual foundations of and ethical issues in public health; (2) philosophical and ethical issues in human genetics; or (3) feminist approaches in bioethics.
Academic Career: GRAD
HUGEN 2044 - HUMAN GENETICS SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This seminar will examine the ethical, legal and social issues that arise from genetic counseling, genetic screening, genetic therapy, and genetic technology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

HUGEN 2045 - GENOME ORGANIZATION & EVOLUTN
Minimum Credits: 3
Maximum Credits: 3
This course surveys the complexities of the structure and function of both prokaryotic and eukaryotic genomes, with special emphasis on the mammalian genome. Specific topics include the mitochondrial genome, repetitive DNA sequences, methods of gene mapping and DNA sequencing, higher order chromosome organization, and evolution. General knowledge of genetics and molecular genetics methods required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

HUGEN 2046 - MECHANISMS DNA METABOLISM, DMG
Minimum Credits: 3
Maximum Credits: 3
Mechanisms and consequences of somatic and hereditary genetic damage, including methods to detect, characterize and quantitate genetic lesions. Provides molecular and theoretical basis for evaluation of Genotoxicological data on exposure to mutagenic/carcinogenic agents and on genetic predisposition or susceptibility to disease.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

HUGEN 2047 - CLIN GENETICS CASE CONFERENCE
Minimum Credits: 1
Maximum Credits: 1
With clinical cases and specimens from various clinical genetics service units, this seminar illustrates and provides insights into the biologic, medical, ethical, and emotional aspects of genetic disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

HUGEN 2048 - LINKAGE ANLYSIS HUMAN GENETICS
Minimum Credits: 3
Maximum Credits: 3
An advanced course which discusses the principles and practice of linkage analysis in human genetics. The course will cover both parametric and non-parametric approaches to linkage analysis, and includes hands-on experience with the current computer programs used for linkage analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2049 - INTRO PUBLIC HEALTH GENETICS
Minimum Credits: 3
Maximum Credits: 3
This graduate level course focuses on public health genetics. The goal of this course is to educate the student about the basic principles of genetics and their application to public health practice and research. Public health genetics is the application of advances in genetics and molecular biotechnology to improve public health and prevent disease. This course will provide the knowledge necessary to apply genetic concepts to public health practice.
Academic Career: GRAD
HUGEN 2050 - PUBLIC HEALTH GENETICS PRACTCM
Minimum Credits: 1
Maximum Credits: 6
The practicum, through a structured and educationally supervised placement at an approved site with an experienced professional is aimed at providing a means to identify and to apply a variety of theories and skills discussed and demonstrated in the classroom to the real-life experiences to which the student is assigned in the field under professional supervision. The choice of practicum site is determined by the mph degree director and the director of graduate studies for the department of human genetics. The mph degree requirements and career goals of the student influence the choice of the practicum assignment.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Public Health Genetics (MPH or CERT)

HUGEN 2051 - INBORN ERRORS OF DEVELOPMENT
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the connections between human development and inherited disease. The course will include core principles of development of the body plan and signaling pathways involved in development and differentiation. These biological processes will be used to categorize inherited human diseases, understand disease mechanisms, and the current efforts to develop targeted treatments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

HUGEN 2070 - BIOINF FOR HUMAN GENETICS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on manipulation and management of human genetic data, with an emphasis on association and linkage studies. The course will cover bioinformatics for genome-wide association analysis, sequence data, and integrated analyses, as well as the R statistical computing language. A key component of the course will be hands-on analyses of example data sets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HUGEN 2022 and BIOST 2041

HUGEN 2080 - STATISTICAL GENETICS
Minimum Credits: 3
Maximum Credits: 3
An advanced course which discusses the principles and practice of statistical genetics in the area of genetic epidemiology of human diseases and traits. The course will cover statistical modeling and methodology in familial aggregation, linkage analysis and association analysis; the course includes hands-on experience with current computer programs used in these research areas.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: HUGEN 2022 and BIOST 2041

HUGEN 2601 - MOLECULAR EPDMLGY LABORTRY
Minimum Credits: 2
Maximum Credits: 2
This course is designed for students who have a basic understanding of human and molecular genetics, but no prior experience with molecular biology. In addition to gaining experience with the most commonly used laboratory methods, the students will process molecular data to evaluate associations and interactions between genetic/environmental risk factors for chronic disease.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PREQ: EPIDEM 2600 and HUGEN 2017
HUegen 3010 - Research & dissertation Ph.D.
Minimum Credits: 1
Maximum Credits: 15
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Immunology

MSIMM 2200 - MS Thesis Research
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSIMM 2210 - Comprehensive Immunology
Minimum Credits: 2
Maximum Credits: 2
This is a lecture course that will introduce the students to the fundamental concepts of modern immunology. The course will cover cells, tissues and organs of the immune system. Furthermore in-depth analysis of the development, activation, effector functions and regulation of immune response will be presented in this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSIMM 2220 - Comprehensive Immunology
Minimum Credits: 2
Maximum Credits: 2
This course will expose the students to classical and contemporary literature in modern immunology. Emphasis will be on paper analysis and critical evaluation of primary data. This course will parallel the topics presented in comprehensive immunology lecture course which must be taken before or simultaneously with experimental basis of immunology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: MSIMM 2210

MSIMM 2230 - Experimental Basis of Immunology
Minimum Credits: 2
Maximum Credits: 2
This course will provide immunology graduate students with the opportunity to serve as a teaching assistant in the undergraduate immunology course BIOSC 1760. The curriculum is designed to provide valuable teaching skills to the professional scientist. Students will attend all BIOSC 1760
lectures, prepare problem sets and session content for recitation period, conduct a one-hour recitation period each week, assist with the preparation and grading of exams, and proctor exams.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad HSU Basis  
**Course Requirements:** PLAN: Immunology (PHD)

---

**MSIMM 2260 - IMMUNOLOGY SEMINAR**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Graduate students and faculty present their current research in a seminar format.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

---

**MSIMM 2290 - DIRECTED STUDY**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in immunology.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Immunology (PHD) or Interdis Biomedical (UNK)

---

**MSIMM 2300 - SPECIAL TOPICS IN IMMUNOLOGY**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is aimed at extensively reviewing and discussing regulatory t cell (TREG) in basic immunology, preclinical and clinical manipulations. This course consists of two parts: lectures given by investigators and presentation given by students.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**MSIMM 3200 - PHD DISSERTATION RESEARCH**  
**Minimum Credits:** 1  
**Maximum Credits:** 14  
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Immunology (PHD)

---

**MSIMM 3220 - CNTMPRY TOPICS - IMMUNOLOGY**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This is an advanced level course in which students will read, present and evaluate the primary literature in immunology. Each semester will feature an integrated set of papers addressing a current issue of interest to modern immunologists. The course may be taken more than once by each student, since the topic addressed will change each semester.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad SN Basis

---

**MSIMM 3230 - IMMUNOLOGY AND HUMAN DISEASE**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course surveys basic immunological principles as they impact our understanding of the causes or treatments of human disease. The course
consists of a series of lecture blocks. Background reading is required and the course relies heavily on the reading of original articles. Classes are regularly devoted to paper discussions, and each student will be responsible for introducing one paper.

**Academic Career: GRAD**

**Course Component: Lecture**

**Grade Component:** Grad LG/SNC Basis

---

**MSIMM 3240 - GRADUATE STUDENT WRITING SEM**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

This course teaches fundamental grantmanship skills using actual NIH training grant submissions. Students construct a competitive research training grant and are instructed on methods to identify funding sources. This course consists of introductory lectures followed by a series of workshops staffed by the immunology training faculty. Workshops cover peer scientific review and study section operation, avoidance of common pitfalls in grant writing, grant writing ethics and scientific community service.

**Academic Career: GRAD**

**Course Component:** Seminar

**Grade Component:** Grad HSU Basis

---

**MSIMM 3250 - TRANSPLANTATION IMMUNOLOGY**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

Transplantation is a rapidly-expanding area of basic and applied immunology, with great potential for the cure of many human diseases. This course will focus on contemporary issues in transplantation immunobiology, including immunogenetics, aspects of ischemia-reperfusion injury, the role of innate and adaptive immunity, antigen-presenting and T cell biology, including T cell memory, tolerance, acute and chronic rejection, humoral rejection the biology of transplant infectious disease, cell transplantation (including pancreatic islet cell transplantation), xenotransplantation, and novel immunosuppressive/tolerogenic regimens.

**Academic Career: GRAD**

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

---

**MSIMM 3260 - IMMUNITY & NEUROENDOCRINE AXIS**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

This course will consider the interaction among the immune, nervous and endocrine systems. It will prepare the students for a critical understanding of how endocrine organs and the hormones they produce affect immune cell function, how the nervous system and nEuropeptides/neurohormones and neurotransmitters modify immunity and how the immune system (cells and their secreted molecules) affect the endocrine and the nervous system. The course will also permit the students to critically appraise and understand how drug therapy aimed at immunostimulation or immunosuppression may be affected by, and affect the neuroendocrine axis and how pharmacologic manipulation of the neuroendocrine axis can affect the immune system and the outcome of immunotherapies.

**Academic Career: GRAD**

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: MSIMM 3230

---

**MSIMM 3270 - INNATE IMMUNITY**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

This course will focus on the several aspects of host innate immunity against infection. Topics will include the conceptual basis for innate versus adaptive immunity, induction of innate immunity by pathogens, signaling by innate immune receptors, effector cells of the innate immune system, secreted effectors of innate immune signaling, and subversion of innate immune signaling by pathogens. Courses like molecular virology and comprehensive immunology are highly recommended but not a prerequisite for the course.

**Academic Career: GRAD**

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

---

**MSIMM 3280 - IMMUNOLOGY OF INFECTIOUS DISEASE**

- **Minimum Credits:** 2
- **Maximum Credits:** 2

This course examines the immune responses to pathogens, as well as on immune evasion of microbes. The organisms studied include bacteria, parasites, and viruses. Topics focus on host-pathogen interaction and include innate immunity, modulation of antigen processing and presentation,
pathogenic strategies for subversion of immune responses, effector functions of immune cells, and immunopathology.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: MSIMM 2210

Industrial Engineering

IE 2000 - FUNDAMNTLS OF INDUSTRIAL ENGR
Minimum Credits: 1
Maximum Credits: 1
This course will provide an overview of basic industrial engineering principals, primarily for those students who have not had prior exposure to industrial engineering. Topics will include, but are not limited to, flow charts, work methods, and work measurement including work sampling and most.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2001 - OPERATIONS RESEARCH
Minimum Credits: 3
Maximum Credits: 3
The operations research method; linear programming; network flows; CPM/pert; integer programming formulations. A group project is required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering (IE-MIE or IE-PHD)

IE 2003 - ENGINEERING MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Concepts and processes of qualitative engineering management applied to the management of technical and scientific organizations. Topics include: (1) general systems theory; (2) management and the systems concept; (3) strategic planning and management systems; (4) systems analysis; (5) project management systems; (6) organizational design; (7) evaluation and control of systems; and (8) managing technical professionals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering (MIE or PHD)

IE 2004 - DATA BASE DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course introduces the fundamental aspects of database design and management within the context of a relational data base management system (DBMS). Covered topics include: relational model, database design life-cycle, database design optimization, client/server architecture, data modeling, SQL, database security, database management, data warehousing, internet database environment. Students will gain hands-on experience in analysis, design, implementation, and management of relational data base systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2005 - PROBLTY & STATISTICS ENGRS 1
Minimum Credits: 3
Maximum Credits: 3
Probability, random variables, common discrete and continuous probability distributions, expected values, central limit theorem, distributions derived from the normal distribution (x2, t and f), estimation of parameters and fitting of probability distributions, testing hypothesis and assessing goodness of fit, comparing two samples.
Academic Career: GRAD
IE 2006 - INTRO TO MANUFACTURING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students that have a background in advanced manufacturing technologies with an opportunity to learn about fundamentals of micro and Nano machining processes. The course represents a good balance between theoretical problems and practical considerations related to the advanced manufacturing processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering (IE-MIE or IE-PHD)

IE 2007 - STATISTICS AND DATA ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Analysis of variance, experiments with one factor, experiments with two or more factors, regression analysis, multiple linear regression, response surface methods, analysis of categorical data, nonparametric statistics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2005

IE 2011 - FUNDMS MICRO & NANOMANUFCTRNG
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2012 - MANUFACT STRUCTRL NANOMATRLS
Minimum Credits: 3
Maximum Credits: 3
Description: this course covers contemporary research topics on the design and manufacture of nanostructured materials. In addition to design and manufacturing, this course would also emphasize the nanometer-scale phenomena that make nanostructured materials particularly attractive for structural applications. Topics such as dislocation theory, large strain plasticity phenomena, super plasticity and kinetics of coarsening will be discussed in the context of structural nanomaterials.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2013 - MANUFACTURING SAFETY ENGINRING
Minimum Credits: 3
Maximum Credits: 3
This course deals with safety as a management function. Topics include accident prevention fundamentals, safety performance, safety management, system safety engineering, risk management, legal issues, and health and safety programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2014 - MFG PROCESS ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to instill a fundamental understanding of manufacturing processes by focusing on the processes, metallurgy and mechanics of deformation in metal forming. To this end, analysis techniques will be developed from solid mechanical principles (stress-strain relationship, deformation and failure) which would then be applied to bulk deformation and material removal processes. The course assumes no prerequisites except basic concepts of stress, strain and strength of materials.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2015 - ENGINEERING LAW 1
Minimum Credits: 3
Maximum Credits: 3
Legal concepts and procedures most relevant to the technical professional, emphasizing contracts, product liability, litigation, regulatory acts, and formation of business entities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2016 - ENGINEERING LAW 2
Minimum Credits: 3
Maximum Credits: 3
Legal principles of relevance to the technical professional concerning professional certifications, intellectual property, labor relations, antitrust, environmental law.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2017 - AUTOMTN LOGC CTRL ROBTC APPLCS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2018 - ENGINRING TOOLS FOR E-COMMERCE
Minimum Credits: 3
Maximum Credits: 3
Integrating new and advanced information system databases with existing legacy systems has spurred development of modern architectures that operate in heterogeneous computing environments. Students will learn object-oriented design with application development done in Java programming language. JDBC will be used to interface Java programs to PSE an object oriented data management system. Students will learn concepts comprising RTS, a specification for integrating distributed objects. Topics will be integrated through a term project developing heterogeneous database systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

IE 2022 - SOFTWARE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
This course will cover the fundamentals of software engineering to include development, user interfaces, project management and life cycles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
IE 2025 - FACLT LAYOUT & MATRL HANDLING
Minimum Credits: 3  
Maximum Credits: 3
Introduction to facility layout and location. Topics including activity relationships, space and personnel requirements, computer algorithms for constructing layouts, and both single and multiple facility location methodologies; material handling methods and equipment including conveyors, lift trucks, carousels, automated guided vehicles, and automated storage and retrieval systems are also discussed.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PLAN: Industrial Engineering (MIE)

IE 2029 - KNOWLEDGE ENGINEERING
Minimum Credits: 3  
Maximum Credits: 3
This course covers artificial intelligence (AI) techniques that are based heavily on expert knowledge and how they can be used to improve decision making. AI systems to be explored may include neural networks, fuzzy systems, symbolic AI, etc. This course will concentrate on model building given the issues and needs of the expert system and the richness of the data.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

IE 2030 - BEHAVIORAL SYSTEMS ENGINEERING
Minimum Credits: 3  
Maximum Credits: 3
Organization theory, effectiveness, structure and design; individual and group behavior; motivation; leadership; human behavior in organizations; communication and decision systems.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

IE 2032 - CASES IN SYSTEMS MANAGEMENT
Minimum Credits: 3  
Maximum Credits: 3
This course involves case analysis with emphasis on design and execution of strategist for technical and scientific organizations. Students are expected to use concepts, knowledge and understanding gained in previous project and engineering management courses to critically evaluate various case situations and participate in classroom discussion. Topics include: introduction and basic project and engineering mgt. concepts, scope/integration mgt., schedule/time mgt., cost mgt., quality mgt., contract/procurement mgt., risk mgt., human resource mgt., and communications management.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

IE 2033 - BOARD GOVERNANCE & MANAGEMENT
Minimum Credits: 3  
Maximum Credits: 3
This course captures the new era in enterprise governance, where performance of an organization is shaped and ultimately determined by the characteristics and management of its board of directors. It utilizes the study of boards of directors in contemporary profit and non-profit organizations in conjunction with students' experiences in leadership roles. Topics covered will include foundation of boards, board structure, info management, communication, and relations with senior management and the function of boards. The course will include case studies and group projects.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering
IE 2034 - NEURL NTWRKS & INDUSTRL APPLC
Minimum Credits: 3
Maximum Credits: 3
This course covers the artificial intelligence techniques of neural networks including history, paradigms, hardware and software, applications and future outlook. Neural networks have been used to address some common problems found in manufacturing and service industries including pattern recognition and classification, predictive modeling, and optimization. The course will also introduce two related techniques - fuzzy systems and genetic algorithms - and discuss how these can be used with neural networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2035 - MGMT OF SYSTEM-LEVEL INNOV
Minimum Credits: 3
Maximum Credits: 3
The course focuses on making decisions to assess and improve system performance as applied to complex systems, such as communication networks, organizational networks, and networks mandated for accomplishing system-level change. The objective is to understand how to apply appropriate tools in the evaluation of system design alternatives. This process includes the proper identification of system goals, performance metrics, measurement and analysis tools, and proper presentation of results.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2036 - ISSUES IN MFG SYSTEMS ENGRNG
Minimum Credits: 3
Maximum Credits: 3
This course covers the major issues facing U.S. Manufacturers today with an emphasis on manufacturing systems engineering. Topics include global competitiveness, changing management and labor practices, total quality, agility, and other concepts for improving manufacturing, product and process innovation, environmental and manufacturing safety, manufacturing information and control systems, government initiatives, and strategies for overcoming barriers to implementing new manufacturing paradigms.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2037 - COST MANAGEMENT FOR ADVNCD MFG
Minimum Credits: 3
Maximum Credits: 3
Focuses on current cost management topics such as activity based costing, life cycle costing, target costing, and throughput accounting. Emphasis will be placed on the link ages to advanced manufacturing systems including performance measurement, design, cellular manufacturing, JIT, and MRP II.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2038 - INTEGRATED PRODUCT DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to familiarize students with the current principles and philosophies of product development and realization. Topics will span product specification and conceptual design through detailed and domain specific design, including manufacturing process development. Students will learn the principles of product data management and value of capturing product information and implications explicitly. In addition, cutting-edge technologies and tools will be introduced to students to give hands-on experience with a true collaborative engineering & design environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
IE 2039 - ENTREPRENEURSHIP FOR ENGINEERS
Minimum Credits: 3
Maximum Credits: 3
This course considers the development of a new technology company from ideation and opportunity evaluation to capital generation and launch. It includes an understanding of accounting principles, budgeting, capital markets, venture capital, operating in the development stage, executive and employee requirements, product development, and growing the company.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2040 - ADVANCED ENGINEERING ECONOMY
Minimum Credits: 3
Maximum Credits: 3
This course covers the theory and application of advanced engineering economy principles and methods. Topics include the following: basic concepts - introduction, the firm, accounting and its relationship to engineering economy, interest, interest factors, equivalence, depreciation, taxes, replacement analysis, cost estimating, financing function. Deterministic investment analysis - single project, multiple projects. Investment analysis under risk and uncertainty preference ordering theory, utility theory, capital asset pricing theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

IE 2041 - FINANCIAL MANAGEMENT IN ENGRNG
Minimum Credits: 3
Maximum Credits: 3
Financial and economic concepts in the management of technologies in technology-based organizations. Topics include: the analysis of financial statements, cash flow, risk, new project financing, economic analyses and capital budgeting in technical organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2042 - ENGINEERING DERIVATIVES MARKET
Minimum Credits: 3
Maximum Credits: 3
The basic building blocks for engineering futures contracts, call and put options, and swaps are studied within the context of real-world environments. By the end of this course learners will have a good understanding of how these tools are built for the purposes of hedging risks and formulating portfolio strategies, all within the goal of managing financial risk.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2051 - COMPUTER AIDED MANUFACTURING
Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course considers the diverse aspects of the product realization process. Aspects include defining user requirements, design concepts, selection of the best concept, design details, and development of a working prototype. Teams of 3-4 students from engineering and business disciplines work with an industrial advisor and faculty mentor to develop a product from concept to realization, addressing issues of market analysis, design, manufacturing, and commercialization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2052 - FINITE ELEMENT ANAL PRODC DSGN
Minimum Credits: 3
Maximum Credits: 3
This course investigates the growing trend of utilizing virtual design and analysis tools in the product development process. A brief overview of the product development process will be given, with particular emphasis on the role of virtual prototyping techniques. In this regard, the underlying theory of the finite element method will be demonstrated through the fundamental concepts of material models, stiffness matrices, loading and boundary conditions, and the generation of stress and displacement results. In addition, utilizing the commercial finite element software package ANSYS, potential consumer products will be virtual analyzed in an effort to rapidly change and obtain feedback on specific design solutions.

**Academic Career:** GRAD

**Course Requirements:** PROG: Swanson School of Engineering

**IE 2054 - INDUSTRL ROBOT PRIN & APPLCNTS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will focus on the industrial robot as part of a flexible and automated manufacturing system. It will introduce students to the basic elements of industrial robots and will emphasize knowledge needed to integrate these robots into a larger manufacturing system.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 2055 - AUTOMATION IN MFG & PRODC DSGN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to facility layout and location topics including activity relationships, space and personnel requirements, layout types, manual and computer algorithms for constructing layouts, single facility location methodologies, and warehouse operations. Material handling methods and equipment including conveyors, lift trucks, carousels, automated guided vehicles, and automated storage and retrieval systems are also discussed.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 2056 - E-MFG STRATEGIES & APPLICATNS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide an introduction to e-business in the context of product design and manufacturing. It will show how modern manufacturing environments utilize information systems to achieve global competitiveness and world-class status. Case studies will also be analyzed to provide a pragmatic perspective. Teaching methods will include lectures, case discussions, problem-solving exercises and class projects. This course should enable you to expand your understanding of modern manufacturing. It is intended to equip engineering, business and other students with concepts, knowledge and strategies for success in the new e-product development and manufacturing era.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 2057 - MANUFACTURING INFORMTN SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Systems engineering approach to the planning, development, organization, management, and reengineering of information systems in a manufacturing enterprise with emphasis on the interrelationships of digital computing equipment, software, and interconnected communication systems necessary to support manufacturing information system functions from strategic planning through design, manufacture, and distribution.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 2058 - AUTOMTC DATA COLLECTN SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is an introductory course on various automatic indentification (auto-id) technologies. Topics include biometrics, radio-frequency indentification
(RFID), barcodes, and magnetic stripes. In addition to knowledge on the operation principles behind the various technologies, students will gain hands-on experience in using auto-id equipment through laboratory sessions. To strengthen knowledge acquired, students will form teams to work on a term project that simulates typical auto-id projects carried out in industry. Although not a prerequisite, experiences in computer programming and database design would be helpful.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2059 - MANUFACTURING DATABASES
Minimum Credits: 3
Maximum Credits: 3
Objectives include the design of hierarchical, network, relational and object oriented databases as they apply to manufacturing applications. Includes topics on the manufacturing information system design lifecycle, functional requirements, data abstractions, SQL, graphical user interfaces and fourth generation languages. Applications include structuring of cad data, group technology databases, automated identification databases, and shop floor information systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2061 - ERGONOMICS & OCUPTNL BIOMECHNC
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of ergonomics as applied to the industrial workplace. Specific topics include: occupational bio mechanics, anthropometry, work physiology, cumulative trauma disorders and slip and fall prevention applied to the organization and physical design of the workstation, effects of hand tool design on workers, and analysis of manual material handling jobs.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 2062 - DATA MINING
Minimum Credits: 3
Maximum Credits: 3
Introductory course on data mining. Topics covered include: knowledge representation, classification methods such as decision trees, naive Bayesian, covering algorithms, neural networks, and instance based learning; association rules; clustering; applications.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2063 - COGNITIVE ENGRG BASED DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course will familiarize engineering students with human cognitive constraints and how these constraints can be accounted for in system design. Examples of specific topics include human perception, attention, knowledge structures, problem solving strategies and mental models of systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2064 - DATA SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Data science

Academic Career: GRAD
Course Component: Lecture
IE 2070 - REGRESN ANAL & ANAL OF VARNC
Minimum Credits: 3
Maximum Credits: 3
Simple linear regression; model validation; inferences in regression; simultaneous inferences; matrix approach to regression; multiple regression; single factor analysis of variance; implementation of Anova model; multifactor studies; case studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2072 - PROBABILITY
Minimum Credits: 3
Maximum Credits: 3
Interpretations of probability, counting methods, conditional probability, Bayes theorem, random variables and distributions, functions of random variables, expectations, special discrete and continuous univariate distributions, law of large numbers and central limit theorems, multivariate distributions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2073 - DESIGN OF EXPERIMENTS
Minimum Credits: 3
Maximum Credits: 3
Analysis of variance, completely randomized designs, randomized complete block designs, other blocking configurations, nested designs, fixed, random and mixed models. Factorial experiments with qualitative and quantitative factors in various designs. Single degree of freedom contrasts. Confounding in factorial experiments, fractional factorial designs, response surface models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2074 - CMPTL METH INFOMTCS DSGN & MFG
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the data structures, algorithms, and techniques in computational geometry. Topics covered include polygon triangulation and partitioning, 2d and 3d convex hulls, proximity algorithms via voronoi diagrams, geometric duality, geometric searching, and intersections. Applications of these techniques in mechanical design, manufacturing, and informatics will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2075 - E-COMMERCE TOOLS PRODUCTIVITY
Minimum Credits: 3
Maximum Credits: 3
Enterprise software technology, Java technology, enterprise systems development life cycle, it project management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2076 - TOTAL QUALITY MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
The total quality management philosophies of Dening, Juran, and Crosby are the basis for exploring modern concepts of kaizen, quality control, Taguchi, Evop, etc. The course will include learning the techniques used in TQM as well as gaining an understanding of how major corporations implement TQM programs.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Industrial Engineering; PREQ: IE 2005

### IE 2077 - STATISTICAL QUALITY CONTROL

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Process monitoring with control charts (Shewhart, Cusum, Ewma), feedback adjustment and engineering process control, process capability, autocorrelation, Taguchi, Evop, and selected topics from current literature.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 2078 - MATH MODELING TECHNIQUES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide a survey of mathematical methods used to model complex biological systems. It is organized into three sections that cover 1) continuous and deterministic state approaches using difference and differential equations, basic feedback models and compartmental models, 2) discrete and stochastic approaches using Markov, Monte Carlo, and discrete event simulation techniques and 3) agent-based models.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 2079 - LOGISTICS & SUPPLY CHAIN ENGRNG

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Modern supply chains are based on networks with a number of actors from manufacturer to distributor to retailer. This course covers the use of modeling for coordinating production, inventory, distribution, and transportation across a supply chain network.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 2080 - SOFTWARE ENGINEERING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
An introductory course to guide those who plan, manage, and control software development projects that require a disciplined engineering approach. Topics covered: conventional methods for software engineering. Such as classical analysis, design and testing methods; software process and project metrics; software quality assurance; software configuration management; guidance for the creation of human-computer interfaces.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### IE 2081 - NONLINEAR OPTIMIZATION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Necessary and sufficient conditions for an optimal solution to the non-linear programming problem; convex sets and functions; numerical solution of non-linear equations; search methods; unconstrained optimization including gradient, metric and penalty methods; algorithms for constrained optimization; quadratic and geometric programming.  
**Academic Career:** GRAD  
**Course Component:** Lecture
IE 2082 - LINEAR OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
Review of linear algebra, matrices and the simplex methods; revised simplex method; generalized bounds; product form of inverse; pricing and pivot selection; duality and sensitivity analysis; separable programming; linear complementarity; Dantzig-Wolfe decomposition; column generation; generalized LP; semi-infinite LP; stochastic LP; interior point methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2083 - PRODUCTION & INVENTORY CONTROL
Minimum Credits: 3
Maximum Credits: 3
An overview of production and inventory control functions with a strong quantitative orientation. Forecasting; aggregate planning; static, dynamic, probabilistic, and multi-echelon inventory control systems; scheduling; MRP-II; just in time systems; production in CIM environments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2084 - STOCHASTIC PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Reviews probability theory; conditional probability and expectations; discrete-time and continuous time Markov chains; Poisson process and exponential distributions; renewal theory and its applications; queueing theory; stochastic systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2072

IE 2085 - JAVA FDS FOR INDUSTRIAL ENGINEERS
Minimum Credits: 3
Maximum Credits: 3
Course covers topics related to object oriented e-commerce software development, enterprise Java technology, internet, and extranet systems environments in developing multi-tier client server architecture and web-based application for industrial engineering problem solving. Topics covered include: object oriented design concepts such as polymorphism, inheritance, information hiding, component based application development, Java programming language elements such as applets & applications, control structures, exception handling, input/output, and network programming.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2086 - DECISION MODELS
Minimum Credits: 3
Maximum Credits: 3
Methodologies for use by decision makers to tackle problems that consider a range of issues. Covers both quantitative and behavioral methods. Topics include multiple-objective methods, decision making under uncertainty, risk and uncertainty management, expert judgement, and scenario planning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2087 - SIMULATION MODELING WITH ARENA
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with the use of the Siman simulation language to develop discrete-event simulation models of representative industrial processes, with an emphasis on manufacturing-oriented processes. The course will concentrate on model building, but will include material on the full range of simulation activities, such as input analysis, output analysis, verification and validation, and model animation. Individual topics will include Siman fundamentals, control entities, stations and station sub models, transporters and conveyors.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2088 - DIGITAL SYSTEMS SIMULATION
Minimum Credits: 3
Maximum Credits: 3
Nature of simulation; discrete event simulators; modeling complex systems; input data reduction; random number generation; output data analysis; validation of simulation models; experimental design; variance reduction techniques; comparing alternative systems; overview of simulation languages.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2089 - ADDITIVE MANUFACTURING
Minimum Credits: 3
Maximum Credits: 3
In this course we will analyze the seven primary types of additive manufacturing, their materials, and machines, highlighting their benefits and limitations. Examples of industrial applications will be given along with ongoing research trends and future directions. Labs will focus on design for additive manufacturing, data capture and input, machine setup, and post processing. Field trips will include observation of machine building and part production at some local industries.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Industrial Engineering; PREQ: IE 2006

IE 2090 - M. S. PROJECT
Minimum Credits: 3
Maximum Credits: 3
This is the capstone project course for M.S. Students. Students working in teams of 3 or 4 will solve a real world problem in conjunction with a company liaison and a faculty advisor.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2091 - IE ENTREPRENEURIAL SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Students enrolled in this course will meet bi-weekly to discuss work experiences and assigned reading related to entrepreneurship. Instructors and guest lecturers will offer students insight into the requirements of creating, owning, and managing a small business. This seminar is offered in conjunction with an internship where students gain hands-on experience in an entrepreneurial environment. Students will be required to give presentations and submit a paper related to the experiences gained in their internship.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

IE 2092 - SEQUENCING AND SCHEDULING
Minimum Credits: 3
Maximum Credits: 3
This course will examine solution methodologies for a wide range of different scheduling problems. We will examine classical algorithms and the course material will include recent papers from the literature. There will also be a term project that will permit students to both apply their understanding of existing solution methodologies and to explore new solution methodologies. Students taking this course should have a general knowledge of optimization theory and linear programming similar to that found in IE 2001 or equivalent.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

IE 2093 - GRADUATE JOURNAL SEMINAR  
Minimum Credits: 2  
Maximum Credits: 2  
The current literature in operations research, engineering management, manufacturing systems, and ergonomics will be reviewed. This course is required for all full time students beginning with their second year of graduate school through the term in which their dissertation proposal is accepted.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad HSU Basis  
Course Requirements: PROG: Swanson School of Engineering

IE 2094 - ENGINEERING TEACHING PRACTICUM  
Minimum Credits: 1  
Maximum Credits: 1  
This is a seminar type course designed to introduce graduate students to teaching methods with an emphasis on engineering courses. The class is made up of a combination of lectures, presentations, hands-on methods, discussions and readings.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis  
Course Requirements: PROG: Swanson School of Engineering

IE 2095 - LAW AND ENGINEERING  
Minimum Credits: 3  
Maximum Credits: 3  
This is a survey course which will consider and review the impact of the law and the legal system on engineering and the impact of engineering on the law. It will review and consider the structure of relevant legal systems emphasizing the United States, the nature of legal reasoning, and the impact of the legal structure on a wide range of engineering activities. It will also review and consider how engineering developments change and develop the law and legal systems including the use of engineering experts in litigation.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

IE 2096 - ALGORITHMS FOR ENGINEERS  
Minimum Credits: 3  
Maximum Credits: 3  
The course will develop student's ability to understand algorithms and use them appropriately for real-world and theoretical problems. Examples will be taken from i.e. applications and may also be tailored to students' interests. Topics covered will include complexity theory, running times and performance measures, common ideas in algorithms, randomized algorithms, approximation algorithms, parallel processing and consequences of float-point arithmetic. At the end of the course, students will be prepared to further pursue topics on their own through additional course work.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

IE 2097 - FINANCIAL ENGINEERING  
Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the structure of forwards, futures, swaps and options as financial instruments relating to the treatment of risk. Risk neutral pricing of these instruments will be studied assisted by principles of optimization with an added emphasis on engineering analysis, and an emphasis
on real world" applications of the "dervigem" software in accompanying CD to textbook."

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2098 - FINITE ELEMENT ANAL PRODC DSGN
Minimum Credits: 3
Maximum Credits: 3
This course investigates the growing trend of utilizing virtual design and analysis tools in the product development process. A brief overview of the product development process will be given, with particular emphasis on the role of virtual prototyping techniques. In this regard, the underlying theory of the finite element method will be demonstrated through the fundamental concepts of material models, stiffness matrices, loading and boundary conditions, and the generation of stress and displacement results. In addition, utilizing the commercial finite element software package ANSYS, potential consumer products will be virtual analyzed in an effort to rapidly change and obtain feedback on specific design solutions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2099 - WAREHOUSE SYSTEM ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This is an independent study course focusing on the analysis of real time location systems in warehouses. The purpose of this independent study will be for students to become familiar with real time location systems and conduct analysis concerning the potential application and benefits of employing them. Students will meet on a regular basis with dr. Norman and will work directly with engineers from local industry utilizing real time location systems in warehousing operations.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2100 - SUPPLY CHAIN ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
An overview of supply chain management with an emphasis on operations and strong quantitative orientation. Supply chain strategies; sourcing decisions; demand forecasting; aggregate planning; managing supply and demand; production and inventory control systems including MRP and JIT; dealing with uncertainty; distribution networks; coordination and integration.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2101 - FACILITY LOGISTICS
Minimum Credits: 3
Maximum Credits: 3
This aim of this course is to study and analyze key factors affecting the productivity of logistics operations and material flows in facilities. In particular, the course focuses on warehouse and distribution center design and operation including: material handling equipment and system design, order picking, sortation systems, and cross docking. There is also an investigation of the use of different labor strategies such as bucket brigades.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2103 - LEAN SIX SIGMA II (BLACK BELT)
Minimum Credits: 3
Maximum Credits: 3
This is a follow up course in lean and six sigma covering topics such as influence principles and techniques, systems analysis, design for six sigma, lean enterprise analysis and response surface methods. Several projects are required and the student should be prepared for green belt certification at the end of the course.
IE 2105 - GEOGRAPHIC INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Explore the concepts and history of geographic information systems and learn to effectively use the most utilitarian GIS software, ArcGIS.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2102; PROG: Swanson School of Engineering

IE 2106 - OPERATIONS IMPROVEMENT IN HC
Minimum Credits: 3
Maximum Credits: 3
This course leads students to apply basic industrial engineering tools to healthcare. This includes fact gathering through interviews & observation, process mapping, system analysis and modeling, work sampling, work study and workflow improvement. Using the health operations laboratory, students learn to model core operations of key hospital departments, and are required to develop expertise in one of the following areas: work measurement in healthcare, quality improvement in healthcare, department productivity management, supply chain management, patient workflow through a department.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2107 - HEALTHCARE INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2108 - HEALTH SYSTEMS ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
This course uses the systems approach to lead students to understand the forces the drive the healthcare industry in the continuum of care. Typical care delivery models are analyzed. Students learn relevant healthcare terminology, industry values, regulatory requirements and the tools created by advocacy organizations (e.g. HIPAA, ARRA, Joint Commission, ONCHIT, CCHIT, NQF). They use this knowledge and understanding to apply systems engineering models that foster integration of silo operations to improve quality, effectiveness and efficiency. In addition, they learn to develop models for improving the effectiveness of decision support systems with focus on productivity and quality reporting systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2110 - HEALTH SYMS ENGINEERING SEMINR
Minimum Credits: 0
Maximum Credits: 0
The seminar supplements the education provided by health policy and management and industrial engineering departments by creating a forum for exposure and discussion of healthcare systems engineering issues. Students become aware and are exposed to the role of vendors/consultants that bring solutions for healthcare delivery processes. The standards for professional leadership required for health management are reinforced.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering
IE 2123 - PROJECT MANAGEMENT FOR ENGNRS
Minimum Credits: 3
Maximum Credits: 3
The focus of the course will be to understand professional project management in achieving strategic organizational objectives and mitigating risks. The process for obtaining professional project management (PMP) certification will be the foundation. The six domains of project management that will be addressed include: initiating the project planning the project, executing the project, monitoring and controlling the project, project transition and closure, professional and social responsibility.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2003 ; PROG: Swanson School of Engineering

IE 2124 - SPECIAL TOPICS PROJECT MGT
Minimum Credits: 3
Maximum Credits: 3
This seminar style course will focus on diverse range of special topics including the evolution and recent growth of project management. Students will prepare white papers on a review of archival work and current state of the art.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2123; PROG: Swanson School of Engineering

IE 2178 - INT MATRIX NUMRC METH SYMS ENGR
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course to the theory and applications of vector, matrix and other numerical methods. The topics covered in this course include solution of systems of linear and nonlinear equations, polynomial interpolation, numerical integration, characteristic values, error analysis, and discrete methods. We will discuss implementation of numerical methods using matlab.
Academic Career: GRAD
Course Component: Lecture
Grade Component: No Grade Required
Course Requirements: PROG: Swanson School of Engineering

IE 2180 - OPERATIONS ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Industrial engineers apply production concepts in manufacturing, retail, and healthcare settings. In today's increasingly competitive marketplace, companies must be efficient to remain in business. Many factors influence a company's efficiency but one key area is operational effectiveness. The purpose of this course is to enhance students' knowledge of several key aspects of operational effectiveness including just-in-time (JIT) and pull systems, fundamentals of factory dynamics, scheduling of machines and personnel, change management, and MRP and ERP systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (IE 2001 or IE 2082) and IE 2005

IE 2188 - SIMULATION MODELING & APPLCS
Minimum Credits: 3
Maximum Credits: 3
Introductory graduate course to the concepts, technology and applications of discrete-event and hybrid simulation. Covers the foundational concepts of simulation and the application of those concepts using commercial software. Topics include simulation, modeling, validation, input/output analysis, animation, and project success skills. Students will learn to use the Simio commercial simulation product as well as how to conduct/manage simulation projects. Practical experience will be gained in a simulation project.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2001 and IE 2005; PROG: Swanson School of Engineering

IE 2201 - BIOMATRL AND BIOMANUFACTURING
 Minimum Credits: 3
 Maximum Credits: 3

The purpose of this course is to provide students having a background in biomaterials and biomanufacturing with an opportunity to learn about the many modern aspect of biomaterials from basic science to clinical applications, across the formulations and chemistry of polymers, ceramics, metals and their use in various biomedical devices and implants, as well as their clinical performance and host responses. Students will also gain knowledge and experiences with designing and manufacturing biomedical devices through team projects. This one-semester, graduate course is intended for students majoring in the industrial engineering, or those who contemplating such a major (or minor). Students enrolled in the class should have an understanding of various biomaterials, and the ability to understand biological phenomena and manufacturing processes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2207 - SUSTNBLY: APPLCS OPERATIONS
Minimum Credits: 3
Maximum Credits: 3

This course covers the use of operations research techniques for the design and optimization of sustainable systems in natural resource management and other areas. Through specific examples and case studies students will learn and apply advanced operations research techniques for these problems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2301 - INTRO TO SAFETY ENGR
Minimum Credits: 3
Maximum Credits: 3

"Introduction to safety engineering" provides a basis to assist students in understanding and applying the scientific and engineering principles associated with the field of safety engineering. Specifically, the course will provide a background in, information on and application exercises in the natural, chemical and physical laws and forces associated with safe design and implementation of work-related tasks and industrial and construction projects. These involve soils and excavation, trenching and shoring, permanent and temporary work platforms and scaffolding, cranes, rigging, ropes, slings and chains, fall protection, pressure vessels, confined space entry, energy isolation and preparation of equipment, hot work, welding, personal protective equipment and non-destructive testing. The course will also address safety related issues associated with building and facility design and layout, job, task and work setting layout. The course will stress the importance of safety engineering as part of both the corrective process and the design process.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2302 - ENGR FOR PROCESS SAFETY
Minimum Credits: 3
Maximum Credits: 3

"Engineering for process safety" provides for a basic understanding of the quantitative and qualitative analysis methods of process safety engineering and process safety management. The course also provides guidance in planning, implementing and managing an overall process safety management program. It includes coverage of such applicable science and engineering principles as risk, human reliability, fault logic, failure modes, incident cost and prediction. The course is presented in an applied format where several different types of industries are discussed such as oil and chemical, pharmaceuticals, defense, nuclear, aerospace, paper, information technology and manufacturing industries. Regulatory influence on process safety is discussed. Quantitative aspects of the course include application of risk analysis, fault tree analysis, hazard and operability analysis, vapor-cloud dispersion modeling, human reliability analysis, failure modes and effects analysis, etc. This course is also intended to provide a background in managing an overall system safety program and its application to several industries, therefore, cost and effectiveness measurement are covered in the material.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 2303 - WORK DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students the opportunity to learn and use standard industrial tools commonly used in analyzing, troubleshooting, and designing work spaces and work processes. It includes the concepts of cost effectiveness, functional effectiveness, human interface design and characterization, analysis and improvement of productivity. These tools and design methodologies include human information processing, basic auditory and visual displays, cost models, facility layout and network transportation and delivery systems, cognitive engineering, anthropometry and musculoskeletal principles, cumulative trauma disorders, work measurement and time and motion analysis. Students taking this course should be familiar with basic engineering economics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering; PLAN: Industrial Engineering (IE-MIE, IE-PHD)

IE 2725 - DESIGN FOR INJURY PREVENTION
Minimum Credits: 3
Maximum Credits: 3
This course provides instruction for how to design a workplace to prevent occupational injuries. The course will primarily focus on preventing the three types of injuries, the injury mechanism, risk factors, tools for quantifying risk and engineering solutions will be covered. Upon completion of a course, students will be expected to develop custom engineering design solutions to prevent occupational injuries. Students will complete a project where they will design a solution to eliminate or reduce an existing hazard.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IE 2996 - HOMELAND SECU & EMRGY RESPONSE
Minimum Credits: 3
Maximum Credits: 3
This course will examine areas of homeland security and emergency response with applications of quantitative operations research models. It will provide an overview of current practices in homeland security policy, planning, preparedness and response for both natural and man-made events. The course then demonstrates the use of quantitative modeling to support analysis in homeland security settings.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade
Course Requirements: PREQ: (IE 2001 and IE 2005) or (IE 2007 and IE 2088); PROG: Swanson School of Engineering

IE 2997 - RESEARCH, M. S.
Minimum Credits: 1
Maximum Credits: 9
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IE 2998 - GRADUATE PROJECTS/PRACTICUM
Minimum Credits: 1
Maximum Credits: 12
This course is granted as part of the curriculum for work that is done on well-defined projects on campus or in the form of an internship in a company, the end result will be a final technical report and a presentation.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IE 2999 - M. S. THESIS
Minimum Credits: 1
Maximum Credits: 12
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

IE 3018 - DISTRIBUTED DATA ARCHITECTURES
Integrating new and advanced information system databases with existing legacy systems has spurred development of modern architectures that operate in heterogeneous computing environments. Students will learn object-oriented design with application development done in Java programming language. JDBC will be used to interface Java programs to PSE an object oriented data management system. Students will learn concepts comprising RTS, a specification for integrating distributed objects. Topics will be integrated through a term project developing heterogeneous database systems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 3030 - ADV TOPICS ENGINEERING MGT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
May cover various topics at the leading edge of technology in the area of engineering management. Course content is announced by the professor.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 3031 - PROJECT MANAGEMENT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The concepts, techniques, tools, and processes of project management will be examined to include planning, organizing, and controlling the use of resources during a project's life cycle. The strategic context of projects will be considered focusing on product and process development in the technical organization.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

**IE 3034 - MGMNT OF TECHNOLOGICAL INNOVTN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Technological innovation process; planning and organizing for innovation; the role of idea champion and participative management; risk-taking; technological risk assessment; creativity; entrepreneurship in small and large companies; challenges for tomorrow's technology managers. The course includes lectures, group discussions, guest lecturers, and individual projects.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**IE 3044 - NEURAL NETWORKS INDUSTRL APPLC**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers the artificial intelligence techniques of neural networks including history, paradigms, hardware and software, applications and future outlook. Neural networks have been used to address some common problems found in manufacturing and service industries including pattern recognition and classification, predictive modeling, and optimization. The course will also introduce two related techniques - fuzzy systems and
genetic algorithms - and discuss how these can be used with neural networks.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3047 - MEDL DVC PROTOTYPE MFG
Minimum Credits: 3
Maximum Credits: 3
This is a Ph.D. level course in medical device design and manufacturing covering fundamentals, simulations and experiments. This course will provide basic knowledge on the development of medical devices including designing, manufacturing and testing medical devices. This course will develop the student's ability to select and properly use the biomaterials and manufacturing processes for developing medical devices, instruments, biomedical sensors and artificial organs. Twelve laboratory experiments complement the lectures followed by three lectures for fundamentals on medical device development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3050 - ADVANCED TOPICS IN MANUFACTURING
Minimum Credits: 1
Maximum Credits: 3
May cover various topics at the leading edge of technology in the area of manufacturing. Course content is announced by the professor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3051 - COMPUTATIONAL OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This course addresses issues arising in the implementation of optimization algorithms. Computational strategies and techniques will be explored. A major emphasis will be placed on implementing various algorithms for large-scale linear, nonlinear, and integer programs. Such algorithms include benders' decomposition, Dantzig-Wolfe decomposition, Lagrangian relaxation and algorithms for specially-structured problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3052 - COMPUTER GRAPHICS & MACHINE VISION
Minimum Credits: 3
Maximum Credits: 3
This course will give the student a knowledge of (a) the theory, and (b) current research issues in computer graphics/machine vision technology as applied to manufacturing systems. Thus, the course will supplement the beginning courses in manufacturing offered by the department of industrial engineering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3053 - GLOBAL OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course to the theory and applications of global optimization. The topics covered in this course include properties of convex/non-convex sets and functions, convex envelopes, duality, local and global optimality conditions, algorithms and their convergence and finiteness, computational complexity of global optimization, cutting planes, outer approximation, convexification, decomposition, branch and bound, DC Programming, Lipschitzian programming.
Academic Career: GRAD
Course Component: Lecture
IE 3055 - ROBUST OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
Today the modeling of uncertain phenomena in both theory and practice is done via probability theory, the foundation of which is based on the axioms set forth by Kolmogorov in 1933. While it offers insights into understanding uncertainty, probability theory (in contrast to optimization) has not been developed with computational tractability as an objective when the dimension increases. Correspondingly, some of its major areas of application remain unsolved when the underlying systems become multidimensional. The goals of this course will be to propose an alternative via robust optimization (RO) for modeling uncertain phenomena, to develop RO as a tractable methodology for solving optimization problems under uncertainty, and to expose students to a large number of applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IE 3058 - E-DESIGN OF PRODUCTS & SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course is aimed at presenting e-design a new paradigm which allows designers at distributed remote locations to participate in design of a product directly. It establishes a design paradigm which enables supply chain stakeholders to become active in product design. This new design concept revolutionizes how designers and design software makers relate in the use of various product design tools for product development. Topics to be covered include: introduction to the e-design paradigm; collaborative design; service oriented architecture for e-design; information infrastructure; security and trust in e-design networks; conceptual and embodiment design; DFX and constraint representation; collaborative geometric modeling; collaborative product assembly design; virtual assembly analysis and prototyping; and design optimization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IE 3062 - ADVANCED ERGONOMICS
Minimum Credits: 3
Maximum Credits: 3
A new course to develop students' knowledge and skills in the areas of ergonomics and occupational biomechanics. The course will teach data acquisition and analysis techniques currently used in ergonomics research and industrial practice. The proposed areas to be covered will be: (1) biomechanical job analysis; (2) electromyographic techniques in the analysis of worker fatigue and injury; (3) metabolic analysis of workers and jobs; (4) strength testing for worker evaluation and placement; and (5) slip and fall analysis and prevention.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3071 - ATOMISTIC SIMULTNS NANOMATRLS
Minimum Credits: 3
Maximum Credits: 3
We introduce atomistic modeling techniques and its importance for solving problems in modern engineering sciences, with an emphasis on mechanical properties. We demonstrate how atomistic modeling can be used to understand how materials fail under extreme loading and propagation of cracks. Students will learn the basics of atomistic modeling, including choosing interatomic potentials, visualization and data analysis. We cover basic concepts of mechanics at small scales and relate it to common engineering concepts (e.g. Beam theory). Students will also work on hands-on simulation projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3072 - NANOMECHANICS
Minimum Credits: 3
Maximum Credits: 3
This is a Ph.D. Level course on the mechanics of materials at small nanometer-scales that is aimed at students in the industrial, mechanical and
materials science departments. The focus will be on understanding of why and how a length-scale dependence on mechanics of deformation is introduced in nanostructured materials.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3073 - CMPTL MODLNG INFECT DISEASES
Minimum Credits: 3
Maximum Credits: 3
This Ph.D. level course is intended to understand and master the concepts of computational modeling of infectious diseases. Through a combination of in-class discussions, self-directed research and oral presentations, students will identify current research topics and innovative approaches in modeling methods including agent-based modeling, mathematical modeling, methods to perform probabilistic sensitivity analysis, expected value of perfect information, and advances in cost-effectiveness analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3075 - RELIABILITY & MAINTAINABILITY
Minimum Credits: 3
Maximum Credits: 3
Review of mathematical preliminaries, e.g., Stochastic processes, Laplace transforms, etc. Combinational reliability, hazard rates and their application, reliability improvement through redundancy and repair, optimization of system reliability, replacement and maintainability policies, software reliability, network reliability, power system reliability, fault trees, introduction to life testing.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3076 - COMBINATORIAL OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
Common combinatorial problems and algorithms, including optimization algorithms and heuristics. Topics may include: max-flow, matching, primal-dual algorithms, Matroids, integer programming, cutting planes, tsp.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3077 - SEM THERAPEUTIC OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This seminar surveys current research in therapeutic optimization. Emphasis is placed on critiquing and extending the current state of the art. Students will also be expected to present their own work in class.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3078 - CONVEX OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This course develops a modern framework for convex optimization. The topics covered in this course include concepts of convex analysis, smooth convex optimization, non-smooth convex optimization, structural optimization, duality theory.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
IE 3079 - ADVANCED STOCHASTIC PROCESSES
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to provide graduate students with advanced knowledge of the theory and application of stochastic processes in operations research and industrial engineering. Specific topics include discrete- and continuous- time martingales, Brownian motion and diffusion processes, with applications in queuing, optimal stopping and stochastic control, among others.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2072 and 2084; PLAN: Industrial Engineering (BEH or BSE)

IE 3080 - ADV TOPICS IN OPERATIONS RES
Minimum Credits: 3
Maximum Credits: 3
May cover various topics at the leading edge of technology in the area of operations research. Course content is announced by the professor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3081 - NUMERICAL OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
Project-oriented course concerned with detailed computer implementation of an optimization algorithm. Each student will select a separate algorithm.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3082 - SCHEDULING MODELS
Minimum Credits: 3
Maximum Credits: 3
In-depth study of the theory of scheduling models. Material includes single-machine models, multi-machine models, heuristic models and rule-based models. Problems in workforce scheduling are also covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3083 - OPERATIONS RESEARCH IN ENERGY
Minimum Credits: 3
Maximum Credits: 3
This course is a seminar on the modeling, analysis and solution of problems related to energy, natural resources, sustainment and the environment using the tools and techniques of operations research. Students will survey a variety of current and emerging topics including, but not limited to, planning and control of energy systems (e.g. capacity planning and operation of large-scale gas and/or electricity networks); operational and design problems arising in renewable energy production, integration and storage; energy systems management and maintenance, as well as pricing and policy related issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IE 2082; PROG: Swanson School of Engineering

IE 3084 - OPERATIONS RES MODELS IN PRODCTN
Minimum Credits: 3
Maximum Credits: 3
This is a course on operations research models in production planning, scheduling and inventory control. The course is meant for doctoral and advanced master's students, and its emphasis will be on theoretical and modeling issues. The first half of the course will be in the nature of a survey of seminal work in this area. The second half will be based primarily upon journal articles in the literature and will address research issues. In
addition, all students will be expected to undertake and complete a project for the course.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3085 - QUEUING THEORY
Minimum Credits: 3
Maximum Credits: 3

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3086 - INTRO TO DYNABIC & INTEGER PROG
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in the areas of dynamic programming (DP) and integer programming (IP). DP topics to be covered include the theory and methodology of dynamic programming with applications to different areas such as capacity expansion, equipment replacement, production planning, Markov decision problems, etc. LP topics will include formulation of 0-1 integer programs, implicit enumeration, branch and bound methods, cutting plane methods, bender's decomposition, and LaGrangean relaxation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3087 - NETWORK-BASED OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This course covers graphs, digraphs and related concepts, node and edge covering problems, Euler tours, Hamiltonian cycles, tsp, set covering and matching problems, shortest path problems, maximum flow problems and minimum cost network flow problems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3088 - INTEGER PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
Polyhedral theory, computational complexity, super additive duality, and integral polyhedral.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3089 - REPAIRABLE SYMS MODLNG & ANAL
Minimum Credits: 3
Maximum Credits: 3
A repairable system is a system that can be restored to a satisfactory condition through some intervention by a decision maker. In a manufacturing setting, such actions might include inspections, part replacements or setting adjustments; in a medical context, such actions might include disease screening, surgery or drug therapy. In this course, we consider applications of probability, simulation and optimization in the: (a) mathematical modeling of the performance of repairable systems, and (b) designing of optimal inspection and maintenance policies for repairable systems. In each case, we compare and contrast.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
IE 3091 - HEURISTIC OPTIMIZATION
Minimum Credits: 3
Maximum Credits: 3
This course covers methods of heuristic optimization including genetic algorithms, simulated annealing and Tabu search. Both continuous and discrete optimization domains are considered with emphasis on np complete combinatorial problems found in engineering and production. Solution encodings, local and global search methodologies, stochastic aspects and convergence are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3092 - FUZZY LOGIC & INDUSTRIAL APPLC
Minimum Credits: 3
Maximum Credits: 3
This course is a joint offering between industrial and electrical engineering. It begins with the motivation, history and basic mathematical properties of fuzzy logic. Membership functions, logical composition, fuzzification and defuzzification, and fuzzy associative memories are covered in depth. The course then concentrates on the following application areas: fuzzy expert systems and rule bases, fuzzy control, and fuzzy data analysis, clustering and classification.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3093 - STOCHASTIC PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
This course considers stochastic programming, a technique for making optimal decisions under uncertainty. Will consider theory, algorithms and applications. Extensions to multi-stage problems and stochastic integer programs will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3094 - MARKOV DECISION PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Introduces the fundamentals of discrete sequential models when outcomes are uncertain. Covers formulation and analysis of stochastic dynamic programs under several objective criteria; developing and enhancing solution algorithms; applications in the areas of inventory control, vehicle routing, and resource allocation; development of approximate solution techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

IE 3095 - GRADUATE SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Speakers from universities and industry discuss research topics and state-of-the-art material in the areas of operations research, engineering management, and manufacturing systems. Enrollment in this course is mandatory for all full-time Ph.D. students.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PROG: Swanson School of Engineering

IE 3096 - TOPICS IN FINANCIAL ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
The main goal is to develop insight into the analysis of modern financial instruments and markets by means of: (1) term structures; intertemporal...
exchanges, interest late calculus, the zero curves, and approximation theory, the expectation hypothesis; (2) asset price dynamics under stochastic uncertainty; binomial lattice models, LP duality and martingales, random walks, Weiner processes and stock price models, the Black-Scholes calculus, replicating portfolios, entropy and goal programming illustrations; (3) asset pricing under uncertainty with perturbations.

Infectious Diseases & Microbiology

IDM 2001 - MOLECR BIOLOGY MICROBL PATHGNS
Minimum Credits: 3
Maximum Credits: 3
Students will develop a comprehension of (1) bacterial anatomy, metabolism, regulation of gene expression, genetics, and the action of anti-microbial agents at the molecular level; and (2) the relevance of this knowledge to understanding microbial pathogenesis and the host response. In addition, prokaryotic and eukaryotic model system of gene regulation will be compared to emphasize the conceptual aspects and application of molecular biology to infectious disease.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IDM 2002 - MOLECULAR VIROLOGY
Minimum Credits: 3
Maximum Credits: 3
The intent of this course is to provide a comprehensive coverage of the animal virus families and a few selected examples of bacterial viruses. The emphasis of the course will be to provide an in depth coverage of the viral life cycle, including the fundamental mechanisms of viral replication and gene regulation. Representative members of each virus family will be selected for the lecture material.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: IDM 2001 or INTBP 2000

IDM 2003 - HOST RESPONSE TO MICROBL INFEC
Minimum Credits: 2
Maximum Credits: 2
Students will develop a comprehension of the concepts and knowledge of resistance and immune responses of humans to microbial infection. The role of phagocytic cells; complement; lymphocytes; the development of humoral and cell mediated immunity at the molecular, cellular, and organ level; and the consequences in controlling and enhancing disease are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IDM 2004 - VIRAL PATHOGENESIS
Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to integrate the lectures given on a particular virus in the comprehensive virology course with two additional lectures which expand the basic biology of the virus life cycle to the level of virus-host interactions. The first lecture will address the pathogenic properties of the virus from the perspective of disease manifestations, immunology, and the natural history of infection. This will be followed by a second lecture which will address the molecular basis of viral pathogenesis and current advances in antiviral research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: LEVEL: Second Year Graduate Students and above

**IDM 2005 - IMMUNE MODULTN BY INFEC AGNT**
Minimum Credits: 2
Maximum Credits: 2
This advanced level course will provide graduate students with an in-depth knowledge on the mechanisms by which many infectious agents, such as human immunodeficiency virus and herpes viruses, disrupt the immune system, and how this affects development of suitable therapies and vaccines. Lectures and interactive teaching methods relying primarily on current literature will be used.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**IDM 2007 - PH Communicable Disease Pracm**
Minimum Credits: 1
Maximum Credits: 3
The practicum, through structured and educationally supervised assignments at an approved site with an experienced professional, is aimed at providing a means to identify and to apply a variety of theories and skills discussed and demonstrated in the classroom to the real life experiences to which the student is assigned in the field under professional supervision. The assignments and choice of site are determined by the director of the program and the program requirements and career goals of the student.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

**IDM 2008 - Public Health Educatn Methods**
Minimum Credits: 2
Maximum Credits: 2
To provide the student with a conceptual framework for the development and evaluation of educational interventions related to prevention and treatment with specific populations, individuals and organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**IDM 2010 - Pathogen Biology**
Minimum Credits: 2
Maximum Credits: 2
The goal of this course is to teach the basic biology and pathogenesis of many of the most important infectious diseases that are public health challenges in the 21st century. It is intended for students with a background in biological sciences, and will review those features that make these pathogens so successful as agents of disease. Topics covered will include: the interaction between the pathogen and the host genome, the strategies used by each pathogen to evade the host response, and the ways in which the pathogen defends itself against treatments and vaccines. The course will be taught using a combination of didactic lectures and paper discussions based on the current primary research literature.
Academic Career: GRAD

**IDM 2012 - Molecular Virology Conference**
Minimum Credits: 1
Maximum Credits: 1
This in-depth course deals with new topics of molecular virology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

**IDM 2014 - FNCT Genomcs of Micrbl Pathgns**
Minimum Credits: 3
Maximum Credits: 3
Functional genomics involves the systematic study of genes and their function. This course will introduce many of these innovative technologies for the systematic analysis of gene function including gene discovery, transcriptome analysis, random and targeted gene disruption strategies, proteomics, metabolomics, and integrative systems approaches with a particular emphasis on their application to infectious disease pathogens and their interaction with their host cells. We will also examine the genomes of well-studied pathogens and explore how these technologies have been used to study their biology and pathogenesis and the application of these techniques for drug and vaccine targeting and development.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PREQ: IDM 2001

**IDM 2015 - VACCINOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
Vaccines are widely regarded as one of the major contributors to increased life expectancy. The purpose of this course is to (1) explore the history of vaccines; (2) underscore the successful role of current vaccines in the management of infectious diseases; (3) present strategies for a new generation of safe and effective molecular vaccines; and (4) discuss the ethical and economic realities of vaccine use and development.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**IDM 2021 - SPECIAL STUDIES IN MICROBIOLOGY**

Minimum Credits: 1  
Maximum Credits: 15  
Properly qualified students may undertake special study, experience in a clinical laboratory, or research with the approval and under the guidance of a member of the faculty. Part or all of such study may be used as the basis for the essay or dissertation requirement for the master's and doctoral degrees.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**IDM 2022 - SPECIAL TOPICS**

Minimum Credits: 1  
Maximum Credits: 3  
Properly qualified students may undertake special study under guidance of a faculty member to acquire knowledge and skill to use independently a specific laboratory research tool, e.g., Gene cloning, DNA sequencing, cell sorting, oligonucleotide synthesizer, polymerase chain reaction, statistical analysis with pc.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**IDM 2023 - MICROBIOLOGY LABORATORY**

Minimum Credits: 2  
Maximum Credits: 2  
A series of laboratory exercises introduces the student to microbiological procedures, especially as they apply to virology and bacteriology.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**IDM 2025 - MICROBIOLOGY SEMINAR**

Minimum Credits: 1  
Maximum Credits: 1  
In this course students are going to present scientific journal articles dealing with virology, immunology, molecular biology, and epidemiology and drug therapy of viral diseases. In addition, students will present similar aspects of bacterial diseases. In some sessions students may be shown video presentation of diagnosis and clinical management of a particular viral or bacterial disease.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis
IDM 2028 - PUBLIC HLTH AND CLNCL MICROBIOL
Minimum Credits: 1
Maximum Credits: 1
This course covers basic and advanced principles in diagnostic microbiology and addresses current public health problems from infectious agents in the environment. By listening to lectures, reading the textbook, and participating in discussion students will learn about the isolation and identification of infectious agents in clinical specimens and samples, susceptibility testing of therapeutic agents, and environmental control measures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

IDM 2029 - PUBLIC HLTH AND CLN MICRO LABRT
Minimum Credits: 2
Maximum Credits: 2
This course provides laboratory bench training in diagnostic and public health microbiology. Students will learn how to process clinical and environmental samples and perform and interpret identification and susceptibility tests. Students will work in small groups with an instructor in laboratories in local Pittsburgh hospitals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

IDM 2030 - RETROVIROLOGY
Minimum Credits: 2
Maximum Credits: 2
Retroviruses such as HIV-1, the virus that causes aids, are currently of extreme medical significance. In this course, the complex molecular biology and biochemistry of retro viruses will be examined. The student completing this course will have an in-depth understanding of the current retrovirus literature. Virology and molecular biology background required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: IDM 2002 or MSMIC 2002

IDM 2032 - HUMAN DIVERSTY & PUBLIC HEALTH
Minimum Credits: 2
Maximum Credits: 2
This course will provide a theoretical framework for designing policy, research, and programs for diverse populations. Opportunities for expanding understanding and examining attitudes about human diversity will be presented. Community organizing and marketing methods related to program design and recruiting and sustaining volunteer or patient participation in programs will be a major focus of the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IDM 2034 - CONTRL & PREVENTN OF HIV/AIDS
Minimum Credits: 2
Maximum Credits: 2
This graduate level course on HIV disease prevention and control is aimed at providing an in-depth study of the HIV disease. The course goal is to provide advanced knowledge base of information on the complex clinical, preventive, treatment, and policy issues on HIV/aids.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate Sch of Public Health (PPBHL) or School of Medicine (MEDSC)

IDM 2036 - SOCL ORG INFECTIOUS DISEASES
Minimum Credits: 2
Maximum Credits: 2
Its purpose is to examine how social factors (poverty, inequality, social institutions) can impact risk and outcomes of infectious diseases (focusing more upon tuberculosis and HIV, but others will be discussed as appropriate). Students should come away from the course with an understanding of how social forces can affect people's experiences with tuberculosis, HIV, and to a lesser extent, SARS. The social contexts will be presented to see how they shaped our understanding of these diseases. Factors that will be discussed will be the role inequalities (race, class, gender, and sexual orientation) and institutional factors play in people's risk of infection as well as their access to services. Aspects of both prevention and treatment will
be discussed.
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IDM 2038 - PREVN TRMNT CTRL GLBL INFEC DS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is aimed to prepare the student to demonstrate knowledge of the prevention, treatment, and control of infectious diseases throughout the world. Students will develop knowledge in the pathogenesis, treatment, individual, and environment intervention in prevention and spread of infectious diseases.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PROG: Graduate Sch of Public Health (PPBHL) or School of Medicine (MEDSC)

**IDM 2161 - METHODS INFECTIOUS DISEAS EPID**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Covers important topics in infectious diseases epidemiology, including public health surveillance, emerging infectious diseases, the role of infectious diseases in the etiology of chronic diseases, and epidemiologic study designs and laboratory methods used in infectious diseases research.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: EPIDEM 2110

**IDM 2420 - EXPERIMENTAL VIROLOGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed for graduate students training in molecular virology research and is designed to provide a more in-depth study of molecular virology through a critical analysis by the student of seminal research publications in various virus systems. Paper discussion format.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: IDM 2002

**IDM 3010 - RESEARCH AND DISSERTATION PHD**  
**Minimum Credits:** 1  
**Maximum Credits:** 15  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**Information Science**

**HIM 1405 - MEDICAL TERMINOLOGY LAB**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is a basic study of the professional language of medicine. It is designed to include word construction, pronunciation, spelling, definition, and use of terms related to all areas of medical science, hospital service, and health related professions. This ONLINE course is designed to give the student a knowledge of words frequently used in the medical field and provides examples through the review of basic anatomy, physiology, surgical procedures, diagnostic procedures, and symptomatology. Coverage of the pathology of each body system is will take place along with an introduction to pharmacology, and the pharmacological treatment of frequently occurring conditions of each body system.  
**Academic Career:** UGRD  
**Course Component:** Mass Media  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Health Information Management (BPH or BS or BS-H)
INFSCI 2000 - INTRO TO INFORMATION SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Overview of the history, academic roots, conceptual structure, and methodology of information science. Explores principles and concepts that underlie information processing, including information theory, models of information storage and retrieval, and human cognition. Basic processes of information systems analysis, design and development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2020 - MATHMTCL FOUNDTNS FOR INFSCI
Minimum Credits: 3
Maximum Credits: 3
Basic concepts of theoretical mathematics needed to understand theoretical work in information science with the exception of probability and statistics; in particular, concepts from set theory, graph theory, combinatorics, logic, abstract algebra, topology, and mathematical analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2040 - RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
Beginning research design with emphasis on the basic process of inquiry. Identifying and articulating research problems, determining and describing procedures for conducting research, designing data collecting procedures, formulating testable hypotheses, interpreting and drawing conclusions from data analysis, and reporting research findings and implications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2120 - INFORMATION AND CODING THEORY
Minimum Credits: 3
Maximum Credits: 3
Includes measures of information, information sources, joint and conditional uncertainty, noiseless and deterministic channels, reliable messages through unreliable channels, channel capacities, properties of codes, minimal codes, and error-detecting and error-correcting codes. Examines entropy as a measure of semantic content.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2125 - NETWORK SCIENCE & ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

INFSCI 2130 - DECISION ANAL & DECISION SUPRT SYS
Minimum Credits: 3
Maximum Credits: 3
Introduction to decision analysis with elements of human cognition under uncertainty, including structuring decision problems and developing
creative decision options, quantifying uncertainty and preferences, and combining uncertainty and preferences to arrive at optimal decisions.

Foundations needed for applying the methods of decision analysis in decision support systems. Note: can also be used to fulfill distribution requirement in cognitive science area.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

### INFSCI 2135 - PROBABILISTIC METHODS

**Minimum Credits:** 3  
**Maximum Credits:** 3  

This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks, although other probabilistic models also will be studied. Medical applications are emphasized, however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. An understanding of basic probability theory would be helpful, but is not required.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

### INFSCI 2140 - INFORMATN STORAGE & RETRIEVAL

**Minimum Credits:** 3  
**Maximum Credits:** 3  

Problems and techniques related to storing and accessing unstructured information with an emphasis on textual information. Overview of several approaches to information access with a primary focus on search-based information access. Covers automated retrieval system design, content analysis, retrieval models, result presentation, and system evaluation. Examines applications of retrieval techniques on the web, in multimedia and multilingual environments, and in text classification and event tracking.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

### INFSCI 2150 - INFORMATION SECURITY & PRIVACY

**Minimum Credits:** 3  
**Maximum Credits:** 3  

Fundamental issues and first principles of security and information assurance. Security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. Basics of cryptography such as key management and digital signatures, etc. And network security such as PKI, IPsec, intrusion detection and prevention. Risk management, security assurance and secure design principles. Issues such as organizational security policy, legal and ethical issues in security, standards and methodologies for security evaluation and certification.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: TELCOM 2000 or INFSCI 1070; PROG: School of Information Science

### INFSCI 2160 - DATA MINING

**Minimum Credits:** 3  
**Maximum Credits:** 3  

Introduction to data mining techniques, including data preprocessing, data mining primitives, association rules, decision trees, cluster analysis, classification and machine learning, data visualization, and data warehousing. Detailed applications from a wide variety of domains.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: INFSCI 2020 (B+ or greater) or INFSCI Exemption-Analytics Component (Test Score 6 or higher); PROG: School of Information Science

### INFSCI 2170 - CRYPTOGRAPHY
INFSCI 2128 - KNOWL REPRESNTN & SEMANTIC WEB
Minimum Credits: 3
Maximum Credits: 3
Introduction to core ideas of knowledge representation and reasoning, including: predicate logic, resolution, rule-based reasoning, object-based and description-based representations, inheritance and default reasoning, semantic web languages from xml to owl, ontology development, and issues concerning representation of dimensions of the physical and social worlds.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2205 - TECHNCL COMNCTNS FOR INFO SCI
Minimum Credits: 3
Maximum Credits: 3
An English language support course for international students in sis who are non-native speakers of English. Helps develop students' academic vocabulary, language comprehension, and writing proficiency. Also addresses issues of academic integrity and plagiarism.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2220 - INFORMATION POLICY
Minimum Credits: 3
Maximum Credits: 3
Introduction to information policy with a focus on U.S. Federal policies. Issues and challenges faced in developing and implementing policies within organizations and companies, including the protection and use of intellectual property, first amendment concerns, access to public information, security and the protection of privacy of personally identifiable information.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Information Science (MSI, PHD, CERT-Advanced)

INFSCI 2300 - HUMAN INFORMATION PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Introduction to research and theory in human cognition, including perception, attention, pattern recognition, memory, representation of knowledge, language, problem solving, reasoning, and decision making, with emphasis on modeling human cognition and implications for user interface design and design of intelligent systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2350 - HUMAN FACTORS IN SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Introduces principles for analysis of human performance in human-machine systems. Emphasis on principles of human factors as applied to the design of systems other than the graphical user interface (GUI) that is covered in interactive systems INFSCI 2470.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2410 - INTRO TO NEURAL NETWORKS
Minimum Credits: 3
Maximum Credits: 3
Introduces mathematical and computer techniques used in constructing models of information processing by parallel distributed processing (PDP) networks; principles of input-output functions and adaptation (learning) functions in single units and in networks; examines the relation between PDP networks, neurobiology, artificial intelligence, and cognition.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2415 - INFORMATION VISUALIZATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the visual design, structure, and organization of information as applied to library and information environments and web site design. Topics include visualization literacy, usability research, theories of visual perception and cognition, visualization models, visual analytics, and data graphics. The emphasis is on user and task-centered design for developing and evaluating visualization-based tools for various types of data. Practical work with visualization technologies will be included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

INFSCI 2420 - INTRO NATURAL LANG PROCSSNG
Minimum Credits: 3
Maximum Credits: 3
Overview of computational approaches to natural language processing. Issues in syntax, semantics, and pragmatics, as well as overall system architectures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2300 and (INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1)); PROG: School of Information Science

INFSCI 2430 - SOCIAL COMPUTING
Minimum Credits: 3
Maximum Credits: 3
Introduction to key theories and technologies of social computing. Reviews major types of social computing systems. Several social computing systems are explored and used throughout the course. Final group project focuses on designing and implementing a social web system.
INFSCI 2440 - ARTIFICIAL INTELLIGENCE
Minimum Credits: 3
Maximum Credits: 3
Introduction to core ideas in artificial intelligence including search, logic and deduction, reasoning systems, knowledge representation, expert systems, planning, machine learning and language understanding.

INFSCI 2460 - SPATIAL REASONING FOR GIS
Minimum Credits: 3
Maximum Credits: 3
Fundamental issues in qualitative spatial reasoning, spatial languages, and spatial decision-making. Applications of spatial reasoning including problems of navigation and interface issues for GIS.

INFSCI 2470 - INTERACTIVE SYSTEM DESIGN
Minimum Credits: 3
Maximum Credits: 3
The environments that can or should be provided for interactive use of computers. Necessary hardware, software, and behavioral components of an interactive system; data structure considerations for various types of interactive applications; operating system fundamentals, functions, and characteristics. Emphasis on interactive operating systems, human machine dialogues, interactive graphics, programming languages, and application(s) design.

INFSCI 2480 - ADAPTIVE INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Introduces key principles of adaptive information systems and modern techniques for user modeling and personalization. Covers the construction of user models and user profiles. Examines the use of various personalization techniques such as adaptive search, recommendation, and navigation support. Reviews major types of adaptive information systems and explores important application areas.

INFSCI 2500 - DATA STRUCTURES
Minimum Credits: 3
Maximum Credits: 3
Theory and application of data structures. Data and file structures and their appropriateness to various applications.
INFSCI 2510 - INFORMATION SYSTEMS ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
The focus of this course is on studies of specifications of the information systems development process. The course covers fundamental topics on two main stages of information systems development life cycle: analysis, and design. Students will become familiar in techniques to investigate, collect, organize, and structure requirements for an information system as well as understanding how to design different component of the information system to satisfy the requirements. The course hands-on experiences such as working directly with real-world clients to address an information need challenge. Students are evaluated through regular assignments, quizzes, and a course project
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2511 - INFORMATION SYSTEMS DESIGN
Minimum Credits: 3
Maximum Credits: 3
Object-oriented design best practices; principles of system architecture; design patterns; requirements traceability; construction of uml-compliant models (class, sequence, communication and package diagrams); refactoring; iterative development of system prototype. Requires knowledge of fundamental of programming concepts including abstract classes, interfaces, inheritance, polymorphism, and message passing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2510; PROG: School of information Science

INFSCI 2540 - SOFTWARE ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Critical analysis of leading iterative software development processes; TSP/PSP, unified process, extreme programming and related agile processes; enterprise management and control of software projects (CMM and COBIT); configuration and change management; quality assurance and testing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2545 - SOFTWARE QUALITY ASSURANCE
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

INFSCI 2550 - CLIENT-SERVER SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Analysis and design of distributed systems. Emphasis on distributed applications and various protocols used in such applications. Explores algorithms for various iterative and concurrent server designs as well as the design of application level protocols. Includes various languages and operating systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science

INFSCI 2560 - WEB TECHNOLOGIES & STANDARDS
Minimum Credits: 3
Maximum Credits: 3
Covers core technologies and standards for distributed systems, especially web based distributed systems. Includes an overview of the
standardization process and the standards organizations. Looks at network and data standards with significant attention to HTML, XML, HTTP, URL and other web technologies including APIs to programming with them.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**INFSCI 2591 - ALGORITHM DESIGN**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Fundamentals of algorithm design including greedy algorithms, divide-and-conquer algorithms, dynamic programming, heuristics and approximate algorithms, parallel and distributed algorithms, multi-dimensional data structures, time complexity of algorithms, and development of programs from algorithms.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science

**INFSCI 2592 - ARCHITECTURES & ASSEMBLER LANG**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Computer architecture and assembly language programming. One main frame (i.e., Vax) and several microarchitectures. Demonstration of assembly language programming.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

**INFSCI 2620 - DEVELOPING SECURE SYSTEMS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Design and implementation of secure systems. Principles and practice of trustworthy computing, secure and high assurance software development process and lifecycle models. Secure software design using UMLSEC, secure design of operating systems and network services, database and applications. Secure webs services, cots-based and service-oriented systems. Software assurance tools and techniques such as code analysis and testing, evaluation and certification of software. Secure programming techniques.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: INFSCI 2150 or TELCOM 2810; PROG: School of Information Science

**INFSCI 2621 - SECURITY MANAGEMENT**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Administration and management of security of enterprise information systems and networks. Principles and tools related to intrusion detection systems, vulnerability analysis, anomaly detection, computer forensics, application logging, auditing and data management, risk management, contingency planning and incident handling, digital immune systems, and alarms and responses. Security standards, evaluation and certification process; security planning, ethical and legal issues in information; privacy, traceability and cyber-evidence.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PREQ: (INFSCI 2150 or TELCOM 2810) and TELCOM 2821; PROG: School of Information Science

**INFSCI 2625 - CYBERSECURITY & PRIVACY REGLN**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

**Academic Career:** GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

INFSCI 2629 - CAPSTONE IN SECURITY
Minimum Credits: 3
Maximum Credits: 3
Integrative class for master's students in their final semester of the sais track. Combination of business and technical case studies and group projects. Case studies focus on business/economics aspects of providing information assurance and how this service impacts technology. Group projects involve design and development of a prototype secure and survivable information system including application development, system deployment, system optimization and system economics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (INFSCI 2150 or TELCOM 2810) and TELCOM 2821; PROG: School of Information Science

INFSCI 2640 - PROGRAMMING LANGUAGES & ENVRN
Minimum Credits: 3
Maximum Credits: 3
A comparative study of four types of computer languages: control structured, list processing, logic processing, and object oriented. Contrast of language types with respect to expression of programs, data models, execution models, naming and abstraction, and interactive programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science

INFSCI 2710 - DATABASE MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Basic graduate course on database systems. Centralized relational database systems with emphasis on database design, implementation, and administration. Comprehensive coverage of SQL, data modeling, normalization, storage management, transaction management, and query evaluation. Students will develop practical skills in building and maintaining realistic medium-scale database systems. Also covers more advanced topics including data warehousing and OLAP.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PLAN: Information Science (MS or PHD); SUB: Digital Libraries & Info Mgmt

INFSCI 2711 - ADV TOPICS IN DATABASE MGT
Minimum Credits: 3
Maximum Credits: 3
Advanced graduate course on database systems. Key issues that typically arise in the context of large-scale enterprise database management in heterogeneous wide-area environments including distributed and non-relational database systems, network-centric data management, web-based information systems, heterogeneous databases, information integration, and wireless data management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2710; PROG: School of Information Science

INFSCI 2725 - DATA ANALYTICS
Minimum Credits: 3
Maximum Credits: 3
Introduction to fundamental technologies underlying distributed storage and efficient analysis of very large amounts of data. An overview of approaches to extracting information and knowledge from data, verification, testing, and presentation of results.
Academic Career: GRAD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
INFSCI 2730 - E-BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Conceptualization of e-business in the context of markets, business practices, and information theory. Implementation of e-business websites and services via various programming languages. Examines various models for online consumer systems, business-to-business systems, and enterprise computing—e.g., Supply chain models. Covers related technologies in document processing, telecommunications, and security.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2560 and INFSCI 2710; PROG: School of Information Science

INFSCI 2731 - SECURITY IN E-COMMERCE
Minimum Credits: 3
Maximum Credits: 3
Covers the technology, concepts, issues and principles that are important in the design and implementation of secure e-commerce systems. Examines technology for protecting electronic commerce. It will include discussion of basic security principles, as well as the issues, policy and standards particular to e-commerce applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2560; CREQ: (INFSCI 2150 or TELCOM 2810); PROG: School of Information Science

INFSCI 2739 - WEB SERVS & DISTRIBUTED COMPUTING
Minimum Credits: 3
Maximum Credits: 3
Looks at advanced techniques to client server computing. Covers design techniques necessary for organizing very large web sites. Integrates the knowledge and skills from e-business and web technologies to develop a functioning distributed application using web services, RMI, RSS, AJAX, etc.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2550 and INFSCI 2730; PROG: School of Information Science

INFSCI 2750 - CLOUD COMPUTING
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the concepts and design principles behind existing cloud solutions. Topics include large scale data processing techniques such as mapreduce/hadoop and its related ecosystem, overview of virtualized commercial cloud models, system virtualization, hypervisors and virtualized platforms. Design of cloud storage systems such as key-value stores and geographically distributed storage systems. Introduction to security and privacy issues in cloud computing, issues of data and execution privacy in modern commercial cloud services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: TELCOM 2000 and (INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1)); PLAN: School of Information Sciences

INFSCI 2780 - INTERACTIVE GRAPHICS
Minimum Credits: 3
Maximum Credits: 3
Computer graphics, point plotting techniques, line drawing display, clipping and windowing, display lines, geometric models, picture structure, graphic input devices and techniques, event handling, raster graphics, solid area scan conversion, three-dimensional graphics, shading, and user-interface design related to the associated behavioral factors in INFSCI 2300 and INFSCI 2350.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INFSCI 2500 or INFSCI 2500 Exemption (Test Score=1); PROG: School of Information Science

INFSCI 2801 - GEOSPATIAL INFO SYSTEMS (GIS)
INFSCI 2802 - LOCATION-BASED SERVICES
Minimum Credits: 3
Maximum Credits: 3
Internet GIS, distributed geo-processing on the internet, mobile GIS, location-based services, navigation systems and services, social networking, and a selection of emerging applications possible through mobile GIS and location-based services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science

INFSCI 2809 - SPATIAL DATA ANALYTICS
Minimum Credits: 3
Maximum Credits: 3
Geospatial data collection, geospatial data structures and indexing, geospatial analysis, data quality, geospatial data structures and algorithms for surfaces, spatiotemporal databases, and digital terrain modeling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science

INFSCI 2821 - FDS CLIN & PH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science

INFSCI 2850 - PROJECT MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Techniques and tools to assist in the managing process. Uses case study approach.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

INFSCI 2872 - E-BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Conceptualization of e-business in the context of markets, business practices, and information theoretic contexts. Implementation of e-business websites and services via various programming languages. End-user e-commerce, business-to-business e-commerce, and enterprise computing--e.g., supply chain models. Related technologies in document processing, telecommunications, and security.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

INFSCI 2903 - KNOWL REPRESNTN CLN DEC SUPPRT
Minimum Credits: 3
Maximum Credits: 3
An in-depth review of clinical information systems (e.g., Electronic medical records). Review of systems of historical interest and representative current systems. Topics will include functional requirements, standards, security, and technology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

INFSCI 2910 - INDEP STUDY: FOUNDATIONS
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2915 - SPECIAL TOPICS: FOUNDATIONS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2930 - INDEPENDENT STUDY: COGNITIVE
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2935 - SPECIAL TOPICS: COGNITIVE
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

INFSCI 2950 - INDEPENDENT STUDY: SYSTEMS
Minimum Credits: 1
Maximum Credits: 3
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2955 - SPECIAL TOPICS: SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
INFSCI 2965 - SEMINARS: SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Analysis of journal articles, books, and conference proceedings involving issues in information science. Techniques for preparing for the preliminary and comprehensive examinations.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

INFSCI 2970 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Independent studies are intended to cover advanced material outside of or beyond the scope of current course offerings.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis

INFSCI 2980 - PRACTICUM
Minimum Credits: 3
Maximum Credits: 6
For students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum with a business or organization.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

INFSCI 2990 - COLLOQUIUM
Minimum Credits: 0
Maximum Credits: 0
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science

INFSCI 2995 - THESIS
Minimum Credits: 3
Maximum Credits: 3
The thesis is a report of original, theoretical, or laboratory work suitable for publication.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

INFSCI 3005 - INTRO TO DOCTORAL PROGRAM
Minimum Credits: 3
Maximum Credits: 3
An introduction to the purpose and nature of doctoral studies in information science, theories and processes in scholarly research and the current state of research in the discipline. Graduate faculty in the program will present and discuss their current interests with students.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

INFSCI 3150 - SEMINARS: SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Analysis of journal articles, books, and conference proceedings involving issues in information science. Techniques for preparing for the preliminary and comprehensive examinations.

**Institute for Practice & Research in Education**

**IPRE 9009 - DESKTOP PUBLSHNG FOR EDUCATORS**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This workshop will provide educators with an introduction to concepts of desktop publishing using PageMaker 5.0 On a Macintosh system. It will include application of these concepts to classroom materials and development of course teaching materials, and use of peripherals such as scanning, color and page-layout design techniques.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9038 - COMPUTER APPLICATIONS FOR EDUC**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
A hands-on introduction to a number of software and hardware applications with a focus on their use in teaching and learning. It is designed for individuals with low or moderate technology skills.  
**Academic Career:** GRAD
**IPRE 9039 - OBJ-ORIENTED PROGRAMMING- C++**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This workshop is a C++ course for programmers who want to become familiar with the object-oriented programming paradigm. After a brief introduction to the basics, this workshop will focus on class construction and object manipulation through many programming problems/solutions. Topics covered include: data, control and functions; struts and classes; inheritance and polymorphism; pointers; classes and virtual functions; and templates.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9040 - INTRODUCTION TO COMPUTING**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course presents concepts and experiences for the computer novice wishing to learn about the basics of personal computing. Comprised of short presentations and hands-on experiences paced for the first time computer user, the objective is to become familiar with the operation, care and use of the computer as well as to develop basic word processor skills, use system utilities, understand hardware configurations and printing functions.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9041 - EDUCATIONAL COMPUTING**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course presents hands-on experiences for the beginning computer user who is familiar with the operation of hardware (i.e. Having had introduction to computing or its equivalent) and who wishes to explore use of the microcomputer with appropriate word processing, database and spreadsheet software for the development and management of information and instructional materials related to their classroom.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9042 - COMPUTER APPLICATIONS FOR TECHRS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course presents hands-on experiences for the computer user who is familiar with the operation of hardware (i.e. Having had introduction to computing or its equivalent) and who wishes to integrate microcomputers and appropriate courseware such as test and document generators, gradebook programs, desktop publishing, graphics, and electronic lesson plans into their curriculum to enhance teaching and learning.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9043 - HYPERCARD FOR MATH TEACHERS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The purpose of this course is to train mathematics teachers in the uses and applications of HyperCard. Students will develop skills in using HyperCard and the associated hyper talk authoring language through a series of examples drawn from mathematics. As a result of this training, students will design and develop computer-based instructional materials for use in the classroom.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9044 - MULTIMEDIA PRSNTN/HYPERCARD**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students will learn to compute graphics, audio and video data and integrate them into an educational end-product.
IPRE 9045 - APPLEWORKS DATABS:CLSSRM TOOL
Minimum Credits: 2
Maximum Credits: 2
This course will examine the application of databases across the content areas. It will also explore their use as clerical tools. In addition the connection between the database and other curriculum appropriate software will be covered. Knowledge and use of the development of an instructional or professional application of the database will be covered.

IPRE 9046 - CREATING ART USING THE COMPUTR
Minimum Credits: 1
Maximum Credits: 1
This course is for teachers who are interested in learning about computer graphics. Although it is open to anyone, specific emphasis will be placed on incorporating the computer into the art curriculum (or incorporating art into the computer curriculum). No prior experience is necessary: we will start with the basics on computer graphics, then apply recent technology.

IPRE 9047 - MULTIMEDIA PRSNTN HYPERCARD-2
Minimum Credits: 1
Maximum Credits: 1
This course offers educators a practical experience with multimedia technology and its application in enhancing teaching and learning in the classroom. It is a follow up to IPRE 9043 with more emphasis placed on the use of interactive video, scanned images and digitized sounds.

IPRE 9048 - PROGRAMMING IN C++
Minimum Credits: 1
Maximum Credits: 1
C++ is becoming very popular in academia and industry. It is a superset of the c programming language. The course introduces c++ syntax for those already familiar with the c programming language and will include the following topics in c++: data abstraction and c++ implementations; classes and derived classes; member functions and friends; pointers, overloading and virtual functions; memory management and parameter passing.

IPRE 9049 - INFORMATN TECHNOLOGY IN EDUC-2
Minimum Credits: 3
Maximum Credits: 3
This workshop will provide intermediate users of computers experience with applications promoting outcomes-based education and curriculum enhancement at elementary/ secondary levels. The hands-on workshop is devoted to desktop publishing, software evaluation, and use of teacher tools for the preparation of instructional materials.

IPRE 9050 - ARE WE A MIDDLE SCHOOL YET
Minimum Credits: 1
Maximum Credits: 1
This course will provide an overview of the classic middle school model. Participants will gain insight into each of the components of the model. Emphasis in the course will be given to the background, development, and implementation of a middle school program. Activities will include
development of an outline for an interdisciplinary unit, a flexible block time schedule and other components.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

### IPRE 9051 - MENTORING & ACHIEV AT MIDL LEVL
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
The purpose of this course is to enable middle level teachers and administrators to develop advisor/advisee programs that will promote academic achievement for middle level students. Achievement, in this context, is closely related to self-direction and self-management skills for students, fostered by teachers who thoroughly understand the role of teachers as mentors.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

### IPRE 9052 - LDRSHIP FOR EFFCTV MIDL LEVL ED
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course is designed to assist educators in understanding leadership behaviors and conditions that channel staff and students in the direction of successful teaching and learning. The interrelationship of learner needs, staff needs, and the cultural norms affecting school improvement will be explored as essentials in translating theory into practice. A conation-based model for energizing middle level programs will be presented after which a practicum component will allow participants to develop a project for local implementation.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

### IPRE 9053 - MIDL SCHL PRGMG: AT-RISK STDNT
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will give participants the opportunity to reflect upon the changing nature of middle school students and how teachers, counselors and school administrators can work to create effective programming to meet their unique educational and social needs. A number of current middle school practitioners will share their efforts to meet the needs of at-risk middle school students.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

### IPRE 9055 - SELECTV SCIENCING-MIDDLE LEVEL
- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will provide participants with instructional strategies, activities, and resources designed to meet the specific needs of the middle level learner in science. Information on the characteristics of early adolescents, strategies for effective grouping, and hands on science activities that actively engage early adolescents in the learning process, how to make abstract concepts concrete, alternate assessment strategies, and resources will be presented.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

### IPRE 9057 - APPROPRIATE INSTRUC-MIDL SCHL
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course is designed to provide participants with a variety of instructional strategies that will make the middle school classroom and exciting place to be. This course will highlight: 1) learning strategies based on age characteristics of early adolescents; 2) key components of a middle school; 3) the balanced curriculum; 4) subject integration and interdisciplinary instruction; 5) thinking skills; 6) hands-on opportunities to develop materials.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

### IPRE 9060 - PORTFOLIOS
Minimum Credits: 1
Maximum Credits: 1
Portfolio assessment is a form of performance assessment in education. This workshop will incorporate the theoretical basis of performance assessment and the practical use of portfolios in the classroom.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9061 - OUTCOMES-BASED EDUCATION
Minimum Credits: 1
Maximum Credits: 1
This workshop will explore outcomes-based education -- its implications, its implementation, and its problems. School district practitioners will share their experiences - successes and problems -- encountered in the implementation of various forms of outcomes-based education.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9062 - ISSUES IN OUTCOME - BASED ED
Minimum Credits: 1
Maximum Credits: 1
This workshop will review issues related to the implementation of outcome-based education in the classroom. Teachers and administrators from districts implementing aspects of these processes will share them. Topics will include: integrated learning, alternative authentic assessment, portfolios, projects, exit interviews, and community service.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9065 - PARTNERSHIPS IN EDUCATION
Minimum Credits: 1
Maximum Credits: 1
This institute is designed to promote and share ideas about successful education partnerships and to make educators aware of the many resources available for developing, sustaining, and expanding these partnerships. It will provide strategies and information for participants to use in developing their own partnership.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9066 - BOOT CAMP: BOOT TRNG NOVICES
Minimum Credits: 1
Maximum Credits: 1
This workshop provides basic survival" training for the novice computer user. Participants will learn what a computer is and how it works. Students will take a grand tour of the computer's desktop and learn about the care and feeding of floppies (i.e., Formatting, and saving work on a floppy disk). Participants will learn how to develop, create, edit, organize, and copy files. If participants make it beyond the first few rigorous days, they will learn some top secret information about trouble shooting."

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9067 - WORD PROCESSING
Minimum Credits: 1
Maximum Credits: 1
This workshop will introduce basic word processing software for teachers and students. It will provide hands-on practice in creating, editing, and saving text documents (e.g., Reports, lesson plans, newsletters, and instructional materials). Also, participants will learn how to add graphics and tables to a document. Practice will be provided in using word processing for personal productivity. Participants will design a lesson or unit plan for integrating word processing activities into the curriculum.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade
IPRE 9068 - GRAPHICS: PIC & FLICKS FOR ED
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of visual images. Participants will learn about creating visual media, cutting and pasting clip art into text-based documents, taking screen shots of images educational software, capturing pictures from the internet and world wide web, editing and formatting visuals, and cutting and pasting video clips. Each participant will design a lesson or unit that demonstrates the appropriate integration of graphic resources in the classroom.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9069 - ELECTRONIC PRESENTATIONS
Minimum Credits: 1
Maximum Credits: 1
This workshop introduces various types of presentation software, including the basic operations of PowerPoint and Mpower. Participants will learn how to organize presentations in accordance with research-based principles of instruction and learning. Also, participants will be able to create materials for instruction and identify ways in which students can use presentation software in classroom settings.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9070 - LINKING PEOPLE AND RESOURCES
Minimum Credits: 1
Maximum Credits: 1
This workshop deals with distance learning and telecommunication technologies. Participants will learn how to access ideas and information using electronic mail, bulletin boards, newsgroups, etc. Students will visit several online sources to locate information about the role of telecommunications in the 21st century. In collaboration with local and national experts, participants will consider various types of teaching and learning activities that are possible and design a lesson or unit that demonstrates the integration of telecommunications.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9071 - WIGGLING THROUGH THE WEB
Minimum Credits: 1
Maximum Credits: 1
This workshop introduces browsers, search engines, hyper media environments, and virtual classrooms. Participants will learn how to formulate search strategies and use short cuts to access web resources. Also, students will study different types of web pages, and how they can enhance personal productivity and teaching practice. The culminating activity for the workshop is a small-scale project involving the use of web pages for classroom instruction or school based inquiry.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9072 - WEBLISHING 101
Minimum Credits: 1
Maximum Credits: 1
In this workshop participants will design, create, and publish their own pages of the world wide web. It will introduce hypertext markup language (html), a relatively easy-to-learn set of conventions for getting documents into cyberspace. Participants will be introduced to different types of web pages and the basic steps required for designing and updating sites that are both attractive and relevant to their professional work. Students will design their own home page and construct a web site for their classroom or school.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9073 - SOFTWR-RDG,LANG ARTS,FRGN LANG
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of K-12 educational software in the content areas of reading, language arts, and foreign
languages. Participants will learn how to select, purchase, use, and evaluate various software products. In addition to the basics of installing and running educational software, students will become familiar with content-based assessment packages, world wide web resources, and instructional applications of personal productivity tools. Each participant will create a lesson or unit that demonstrates the integration of software.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9074 - SOFTWARE-MATH AND SCIENCE EDUC
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of K-12 educational software in the content areas of mathematics and science. Participants will learn how to select, purchase, use, and evaluate various software products. In addition to the basics of installing and running educational software, participants will become familiar with content-based assessment packages, world wide web resources, and instructional applications of personal productivity tools. Each participant will create a lesson or unit that demonstrates the integration of software.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9075 - SOFTWARE-SOCIAL STUDIES EDUC
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of K-12 education software in the content area of social studies. Participants will learn how to select, purchase, use, and evaluate various software products. In addition to the basics of installing and running educational software, participants will become familiar with content-based assessment packages, world wide web resources, and instructional applications of personal productivity tools. Each participant will create a lesson or unit that demonstrates the integration of software.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9076 - SOFTWARE-HLTH & PHYSICAL EDUC
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of K-12 educational software in the content areas of health and physical education. Participants will learn how to select, purchase, use and evaluate various software products. In addition to the basics of installing and running educational software, participants will become familiar with content-based assessment packages, world wide web resources, and instructional applications of personal productivity tools. Each participant will create a lesson or unit that demonstrates the integration of the software.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9077 - SOFTWARE FOR SPECIAL EDUCATION
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of K-12 educational software in special education, with emphasis on applications for children with mild disabilities. Participants will learn how to select, purchase, use, and evaluate software products. In addition to the basics of installing and running educational software, participants will become familiar with content-based software, assessment packages, www resources, and instructional applications of personal productivity tools. Participants will create a lesson using the software.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9078 - SOFTWARE FOR ART AND MUSIC
Minimum Credits: 1
Maximum Credits: 1
This workshop provides theoretical and practical studies of K-12 educational software for art, music and dance. Participants will learn how to select, purchase, use and evaluate various software products. In addition to the basics of installing and running educational software, participants will become familiar with content-based assessment packages, world wide web resources, and instructional applications of personal productivity tools. Each participant will create a lesson/unit demonstrating the integration of educational software in the classroom.

Academic Career: GRAD
IPRE 9079 - INTEGRTG TECHN ENG/LANG CLSSRM
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course designed for pre-service and in-service teachers. It will provide a pedagogical rationale and effective strategies for integrating technology into the English/language arts classroom. Participants will develop a familiarity with the digital learner and become sensitive to creative reading and writing opportunities using digital technology. The course will include creating multimedia lessons and web-based reading and writing activities for students, discussions, lectures, guest speakers, and written assignments.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9080 - INTERNET TECHN: WRLD LANG PROF
Minimum Credits: 2
Maximum Credits: 2
This course is designed to meet the professional development needs of world language teachers in the internet/technology area. In this course students will use the internet technologies about which they are learning. Discussions will focus on how to use these technologies in the world language classroom and how to access on-line professional development opportunities. Participants will develop an understanding of web-browsing, e-mail, chatting, newsgroups, and other internet technologies, and they will develop classroom activities incorporating these technologies.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9082 - BASC VIDEO EDITING FOR TEACHRS
Minimum Credits: 2
Maximum Credits: 2
This course will offer instruction and hands-on experience in basic video editing, including using a digital video camera to collect video, transferring video to a computer, and editing with an easy-to-use program. Editing will include cutting slips, duplicating video clips, adding background sound, title screens, text, and credits.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9097 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 6
A flexible curriculum oriented to special topics or current issues of concern to educators.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

IPRE 9100 - LITERACY CONFERENCE
Minimum Credits: 1
Maximum Credits: 1
The conference provides an opportunity to meet with other professionals from diverse areas of literacy. Each year a different general topic is explored. Current issues will be addressed through featured speakers, panels, workshops, and seminars.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9107 - READING IN CONTENT AREAS
Minimum Credits: 3
Maximum Credits: 3
Addresses methods and materials for assisting students as they read, study, and learn in content classrooms. Emphasis on functional approaches that facilitate learning of both content and process across the curriculum. Also implications of current research findings for content area instruction are examined.
IPRE 9108 - INTRO TO ADLT READNG & WRITING
Minimum Credits: 3
Maximum Credits: 3
Previews literature that relates to the basic literacy skills needed by adult learners. Explores current reading and writing programs, materials informal assessment, and teaching strategies.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

IPRE 9109 - STRUCTD APPRCH PHONICS INSTRUC
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to structured approaches for supporting students' development of phonemic awareness and phonics skills, with attention to issues related to fluency and comprehension as well.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9113 - EXAMPLE-BASED LEARNING
Minimum Credits: 1
Maximum Credits: 1
This workshop will focus on how example-based learning works and how teachers can first model, then coach students in the process. Workshop participants will actively engage in multiple episodes of example-based learning, reflecting on how examples, background knowledge, goals, and genre features interact as teachers and students construct understanding of a genre. Participants will examine a variety of example types and uses and will explore selection sequence, writing assignments, and discussion strategies.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9114 - READER'S WRKSHP BEGN READERS
Minimum Credits: 1
Maximum Credits: 1
Current research suggests that the workshop approach is an effective way to teach young readers. This workshop introduces participants to the reader's workshop approach to teaching reading in the primary grades. Participants will use current research to design reader's workshop activities using effective practices.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9115 - EARLY LITERACY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to extend the skills of experienced teachers to observe, assess and enhance the early literacy development of children. Participants will observe, record, and analyze the reading and writing behaviors of an individual child. Through coordinated activities, observations, and discussions, teachers will implement specialized reading methods with small groups in a regular classroom setting. They will develop lessons that actively engage children in authentic reading and writing experiences and draw children's attention to the details of print.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9116 - RES-BASED STRATEGIES: RDNG K-3
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to increase teachers' knowledge and understanding of beginning reading instruction. Teachers will be introduced to...
research-based strategies for teaching phonemic awareness, phonics, fluency, vocabulary, and comprehension. There will also be a focus on integrating writing into the reading program and an introduction to classroom assessment strategies. Teachers will have opportunities to practice teaching these strategies. This course is based upon leaders, a professional development program for K-3 teachers.

**Academic Career:** GRAD
**Course Component:** Workshop
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9125 - MOTIVATING MIDDLSCHL READERS**
**Minimum Credits:** 1
**Maximum Credits:** 1
This workshop will provide teachers with activities and strategies to help middle school students develop interest and motivation in reading and writing.
**Academic Career:** GRAD
**Course Component:** Workshop
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9126 - STRUGL ADOLSC READERS & WRITRS**
**Minimum Credits:** 3
**Maximum Credits:** 3
This is a workshop focusing on practical assessment and instructional and resource strategies to address the needs of struggling secondary readers and writers.
**Academic Career:** GRAD
**Course Component:** Workshop
**Grade Component:** Grad Letter Grade

**IPRE 9132 - A NOVL WAY OF TEACHNG THE NOVL**
**Minimum Credits:** 1
**Maximum Credits:** 1
The course is designed to give participants a rationale for using novels in their reading program, as well as exposure to sample units on novels. Participants will get experience responding to and writing their own units.
**Academic Career:** GRAD
**Course Component:** Workshop
**Grade Component:** Grad HSU Basis

**IPRE 9133 - READING CHILDREN'S LITERATURE**
**Minimum Credits:** 1
**Maximum Credits:** 1
A response approach to literature provides numerous opportunities for children to integrate their knowledge and experiences with the text and to construct their own meanings. This course is designed to present the theory that drives the response approach and to demonstrate classroom methods and activities that encourage unique responses to children's literature. The focus will be on classroom techniques that teachers and reading specialists can implement to facilitate oral, written, artistic, and dramatic responses to children's literature.
**Academic Career:** GRAD
**Course Component:** Workshop
**Grade Component:** Grad HSU Basis

**IPRE 9134 - CHILDRENS'S LIT FOR TCHRS K-8**
**Minimum Credits:** 3
**Maximum Credits:** 3
This course will expose participants to a wide range of books for students K-8. Participants will read extensively and talk and write about what they have read, anticipating student response to various books and, to a limited extent, exploring potential classroom applications. They will also become familiar with many resources for finding and evaluating books, and will create a file or database record of books. It will feature large and small group discussion; both in-class and out-of-class reading will be required.
**Academic Career:** GRAD
**Course Component:** Workshop
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9135 - TEACHING LITRATUR WITH WRITING**
Minimum Credits: 3  
Maximum Credits: 3  
This workshop-style course explores the uses of writing in whole-language and reader-response approaches to teaching literature (poetry, fiction,  
drama, media). Participants will develop projects for their classrooms and create assessment plans.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9136 - WRITING HISTORICAL FICTION**  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop for secondary English and social studies teachers examines the value of the traditional research paper and provides theoretical and  
practical insights into an exciting and productive alternative. This alternative utilizes creative writing (historical fiction) and teaches research skills.  
The workshop will involve discussion, in-class library research, informal writing and study of student writing.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9137 - POETRY MATTERS**  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop for middle/high school English teachers presents an approach to teaching creative writing. It uses writing of poetry, fiction and drama  
as a way to understand, experience, and encourage deep personal investments in students of literature while developing their ability and versatility as  
writers. Participants should expect to write for each class meeting.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9142 - PCRP 2: STRATEGIES FOR WRITING**  
Minimum Credits: 1  
Maximum Credits: 1  
Western Pennsylvania writing project fellows, all classroom teachers from schools in and around Pittsburgh, will demonstrate a wide range of  
strategies for implementing the pa framework, particularly for writing to learn across disciplines from grades K-12. Participants will also read current  
research and accounts of classroom practice in order to build a context from which implementation plans for their own classrooms will be developed.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9143 - INSERVC PRG TO IMPROVE WRITING**  
Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to offer teachers opportunities to develop a wide range of strategies for designing and presenting in-service activities. The  
course will emphasize group dynamics and strategies for teaching adult learners.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9144 - USING WRITING TO LEARN**  
Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to offer teachers (K-12) a wide range of strategies for implementing the writing process in their classrooms. Ways in which  
the writing process can be used to encourage learning and classroom management of the writing process if possible will be emphasized.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9145 - ASESMNT & EVAL OF STDNT WRITNG**
Minimum Credits: 1
Maximum Credits: 1
Western Pennsylvania writing project fellows, will demonstrate a wide range of strategies for assessment and evaluation of student writing for teachers from K-12. Analytical and holistic evaluation and portfolio assessment will be emphasized, as well as self-evaluation strategies and techniques for conferencing and classroom management. Participants will also read current research and participate in hands-on presentations in order to develop assessment and evaluation implementation plans for their own classrooms.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9146 - HISTORY OF WRITING & THE ALPHABET
Minimum Credits: 1
Maximum Credits: 3
This workshop provides an interdisciplinary study for teachers K-12 on the origins and practice of writing and reading in Egypt, Mesopotamia, Canaan/Israel, and Greece. It introduces the rudiments of cuneiform, hieroglyphs, and early alphabets, and examines the social and cultural context of each, with attention to the life and work of scribes and oral traditions and memory systems that shaped ancient literacy. It is designed to serve as the basis for curricula in social studies and language arts and to stimulate thinking about the role of literacy in society.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IPRE 9147 - REAL WORLD WRITING
Minimum Credits: 1
Maximum Credits: 1
Have you ever wanted to escape being viewed as the villain holding the red pen? Giving students the skills, confidence and means to reach audiences outside the classroom makes language arts meaningful for both writers and teachers. The workshop will provide teachers with strategies for helping their students move their writing outside the portfolio to realms where audiences of all ages can appreciate what they have to say in the form of publication, storytelling, and puppetry. It will also provide tried and tested national sources for students interested in publishing their work.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9150 - STORYING: WHOLE LANG INSTRUCTN
Minimum Credits: 2
Maximum Credits: 2
This course will explore film, song, and oral history as sources for stories of Western pa for use by students and teachers in classroom implementation of PCRP II framework on whole language instruction. Participants will collect their own sources and produce a class publication of stories. The purpose is to learn to use local available sources for classroom instructional purposes.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9151 - MOVING TOWARD WHOLE LANGUAGE
Minimum Credits: 1
Maximum Credits: 1
Exploring the philosophy of whole language, participants will work in collaborative groups to experience and plan elements of a whole language program. Through lecture and discussion, participants will examine the connection between literature, thinking and writing. Participants will plan and share thematic webs for use with their students.

Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9203 - PSYCHLGCL COMPTNCY IN YNG CHLD
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide a conceptual model of mental health in terms of psychological skill development. Assessment strategies will be taught as well as methods for promoting skill development in young children. Emphasis will be placed on the use of modeling, practice and reinforcement in the development of language, prosocial behavior, sustained attention, and conflict resolution.

Academic Career: GRAD
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

**IPRE 9204 - WORKING WITH YOUNG CHILDREN**  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop will orient early childhood educators, providers and parents to alternative, positive ways of thinking about and dealing with early childhood challenges. Information and encouragement will be provided to enhance the skills and self-esteem of both adults and children to effectively and creatively respond to everyday situations.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

**IPRE 9205 - PRESCHOOL PRACTICALS**  
Minimum Credits: 1  
Maximum Credits: 1  
This course will offer teachers, aides and prospective teacher's opportunities to address issues common to most pre-school situations. There will be a focus on staff development, disciplining the undisciplined, parent involvement and interaction, value clarification, expectations and assessment.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

**IPRE 9206 - CURR MATERLS FOR ERLY LEARNRS**  
Minimum Credits: 3  
Maximum Credits: 3  
This workshop offers beneficial activities and practical teaching aids for professionals and parents who work with young learners. Upon completion of the course, participants shall have developed their very own handbook to use with young children or for further training purposes. This handbook will contain practical, helpful, and reproducible activities that are appropriate for early and primary learners.  
Academic Career: GRAD

**IPRE 9212 - CREATV CURRIC FOR YNG CHLDREN**  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop will focus on the elements of an early childhood curriculum that is developmentally appropriate and which follows the guidelines of the national association for the education of young children (NAEYC).
IPRE 9213 - CHLD LIT: PRESCHL & PRIM TCHRS
Minimum Credits: 1
Maximum Credits: 1
This workshop focuses on methods and materials for using children's literature in early childhood education. It will also include strategies for helping parents to select and use children's literature.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9214 - RELTNSHP LRNG TO AFECTV DVLP
Minimum Credits: 0.5
Maximum Credits: 3
Affective development has a significant impact on the successful learning process for pre-school and primary children. This course, based on the conceptual focus of the work of Fred Rogers, will provide a framework for teachers to consider their work in understanding, respecting, and providing for the affective development of the children they teach. Participants will explore areas including supporting competency, exploring and understanding children's feelings, and nature of make-believe, routines transitions, teacher's expectations and emotions.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IPRE 9215 - PLN & OPERG ERLY CHLDHD/DAYCRE
Minimum Credits: 3
Maximum Credits: 3
During this workshop participants will be guided through all the steps necessary to plan and implement an early childhood education (ECE) program. Students will be guided in the development of a kit of basic management tools that are essential in making a success of a small business enterprise.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9216 - EARLY CHILDHOOD INSTITUTE
Minimum Credits: 1
Maximum Credits: 1
This institute will focus on advanced leadership skills required and issues faced by executive directors of early childhood education, care, and intervention organizations. Topics addressed will include: policy development, networking; empowering and developing staff; advanced marketing; futurism; etc.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9251 - PRIDE & PREJUDC: PAST & PRESENT
Minimum Credits: 1
Maximum Credits: 1
By focusing on 2 case studies - the holocaust against the Jews and black slavery in America and its aftermath, this course will use history to stimulate an examination of current issues of prejudice and discrimination and the importance of sensitizing students in the classroom.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9252 - EVOLVING FREEDOMS
Minimum Credits: 3
Maximum Credits: 3
This course examines how the bill of rights has evolved over time and projects possible future changes. Project activities include presentation/discussion sessions led by university personnel and the development of classroom lessons illustrating rights.

Academic Career: GRAD
Course Component: Workshop  
Grade Component: Grad HSU Basis

**IPRE 9254 - TCHNG FOR UNDERSTDG HISTORY**  
Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to increase dialogue between the often disparate voices of practice, research, assessment, and standards by having teachers reflect upon their current practice using aspects of expert practice, disciplinary standards, and involvement in authentic document-based reasoning activities.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad HSU Basis

**IPRE 9255 - ETHICS CURRICULUM FOR CHILDREN**  
Minimum Credits: 3  
Maximum Credits: 3  
In this course, participants will read extensively and talk and write about what they have read, anticipating student response to various books and, to a limited extent, exploring potential classroom applications. They will also become familiar with many resources for finding and evaluating books, and will create a file or database record of books.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

**IPRE 9256 - CHNA IN HIGH SCHOOL CURRICULUM**  
Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to prepare teachers to participate in the Pitt in china study abroad program. Prior to the trip to china, participants will attend two seminars that include required readings, presentations by the Asian studies faculty, and a sampling of china related curriculum. Teacher participants will identify a curriculum project that is relevant to their classroom/program and which they will study and develop while in china. They are expected to attend a workshop in the fall.  
Academic Career: GRAD  
Course Component: Independent Study  
Grade Component: Grad HSU Basis

**IPRE 9257 - EAST ASIA: YESTERDAY AND TODAY**  
Minimum Credits: 3  
Maximum Credits: 3  
The course is designed for middle and high school teachers of world cultures, world history, geography, economics, and literature. This seminar will provide students with the content and resources needed to implement the study of East Asia into their curriculum in accordance with various approaches to standards”. The seminar will include an analysis of the recently posted Pennsylvania civics and government standards. It will also reference to the latest national geography, world history, as well as NCSS standards.”  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad HSU Basis

**IPRE 9258 - HISTRY IS THE WORLD AROUND YOU**  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop shows how to open a window to history across the curriculum by using primary resources for research. Using photographs, documentary film, exhibit videos and archival documents that are part of the senator John Heinz Pittsburgh regional history center, teachers will learn about these resources and gain practical information on ways to integrate primary sources into their curricula. Using images and artifacts teachers will design lesson outlines that incorporate primary sources.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad HSU Basis

**IPRE 9259 - EXPLORING CHINA'S DIVERSITY**
Minimum Credits: 2
Maximum Credits: 2
Many people are familiar with China's extraordinary long and unified history as well as her ethnic homogeneity. While these perceptions are correct, this one week institute will focus on China's diversity. The course will scrutinize five different regions of China: Yunnan province in the southwest; the Xining region in the far West; the central Yangzi river area; Guangdong in the south; and Taiwan on the East coast. With each area of study the cultural, economic, religious, and international factors which are relevant to that region will be investigated.

Academic Career: GRAD

Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9265 - LRNG HIST THROUGH ARCHAEOLOGY
Minimum Credits: 2
Maximum Credits: 2
Through a hands-on archaeological experience at a Civil War military prison site, participants explore the creation of a learning environment that enhances primary and secondary education approaches to interdisciplinary study, scientific inquiry, problem solving, cooperative learning, and stewardship. The workshop includes morning sessions focused on the process and concepts of archaeology, followed by afternoon discussions in which the various historic forms of the personal experience (journals, diaries, letters, and poems) will be brought together with the archaeological data.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9300 - ART FOR PRESCHOOL & ELEMENTARY
Minimum Credits: 1
Maximum Credits: 1
This workshop is designed to provide strategies for developing creative and individualized art activities, and for integrating art with the classroom curriculum. Art experiences will include drawing, painting, working with paper, sculpture, printmaking, puppetry, and mural making.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9302 - MUSEUM AS EDUCATIONAL RESOURCE
Minimum Credits: 3
Maximum Credits: 3
This course will illustrate how museums and their varied operations can be used by educators to teach through objects, using an experimental approach including field trips, interviews, and applications of learning theory.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9303 - CREATIVE DRAMATICS
Minimum Credits: 3
Maximum Credits: 3
Participants take part in a full range of creative dramatics exercises appropriate for use with elementary and secondary students across subject areas. Participants also analyze how the activities work and how they can be applied to specific classroom situations.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9304 - STORYTELLING & DRAMATIZATION
Minimum Credits: 2
Maximum Credits: 2
This course is designed for those working with children from pre-school through middle levels. Teachers, counselors, theatre artists, and social workers will develop more techniques encouraging critical and creative thinking skills, better communication skills, and greater self and social awareness in the young people with whom they work using a holistic approach.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9305 - IMAGINATN LAB: AN ART WORKSHOP
Minimum Credits: 2
Maximum Credits: 2
This class offers a hands-on experiential curriculum designed expressly for teachers who wish to foster creative potential in the preschool or primary classroom. Students will begin by engaging in manipulative activities with multi-media arts materials, proceed to discuss individual experiences in order to analyze the learning process, and conclude by developing activity units appropriate for their current or intended workplace.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9306 - IMAG THINKING: VISUAL LITERACY
Minimum Credits: 1
Maximum Credits: 1
This course involves a hands-on approach to visual literacy. Participants will experience and develop competencies in the delivery of information through the modality of the image. The image, in turn, will be used as a tool for language development as well as an authentic assessment tool for use in portfolios and performance tasks such as exhibitions and presentations. Educators will be serviced by an in-depth look at the role that pictures, drawing, visual memory and graphic representation play in the process of thinking and learning.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9307 - LEISURE, THE ARTS, & EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This course examines current and potential links between areas of leisure and education in the greater Pittsburgh area. Emphasis will be placed on defining various conceptualizations of leisure, familiarization with the operational and development issues faced by leisure organizations (sport, theater, museum, etc.), And the integration of leisure concepts with various school levels and programs.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9401 - SIGN LANGUAGE 1
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop expressive and receptive skill in sign language and fingerspelling, utilizing various modes of manual communication.
IPRE 9402 - MAINSTRMG EXCEP CHILD & YOUTH
Minimum Credits: 3
Maximum Credits: 3
Introduction to principles and practices for successful mainstreaming. Teaching strategies for achieving basic instructional goals for different types of special students are reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IPRE 9404 - INCLSN PRE-K ERLY CHILD SETNG
Minimum Credits: 2
Maximum Credits: 3
This interdisciplinary course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development, and instructional strategies for creating early childhood programs that meet the needs of children with and without disabilities. The course will include simulations in which students solve real life problems with individuals.
Academic Career: GRAD
Course Component: Directed Studies

IPRE 9405 - HNDL/MOBLTY-CHILD MULTPL DISAB
Minimum Credits: 1
Maximum Credits: 1
This module provides practical information for practitioners who work with young children under age five with disabilities. It focuses on knowledge and recognition of normal and abnormal gross motor development of children, age's birth to five. Emphasis is on analysis and facilitation of movement, handling and positioning, adaptive equipment and safety. The program embodies family centered, transdisciplinary and natural environment strategies.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9406 - ORAL MOTR & FEEDING STRATEGIES
Minimum Credits: 1
Maximum Credits: 1
This module provides practical information for practitioners who work with young children under age five with disabilities. It focuses on physical, sensory, psychological, and social aspects of eating. The class will discuss the development of normal oral motor and self-feeding skills and the impact that disabilities have on these processes. Students will learn to use descriptive as well as criterion-referenced evaluations to identify a child's oral motor skill level, and devise treatment plans that address oral motor and self-feeding concerns.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9407 - EARLY COM-CHLDN MULTPL DISAB
Minimum Credits: 1
Maximum Credits: 1
This module provides practical information for practitioners who work with young children under age five with disabilities. It is designed to provide students with an understanding of the interactive communication behaviors of infants/toddlers and those children functioning at this early level. Included are assessment strategies, vocal and non-vocal communication systems, and argumentative communication and assistive technology.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9408 - HRNG IMPAIR/DEAFNS:YNG CHLDRN
Minimum Credits: 1
Maximum Credits: 1
This course provides students with an understanding of the impact of hearing loss on the early cognitive, social, and emotional development of the child, basic audiological concepts, assessment strategies, and screening techniques used to detect hearing loss. Students will become familiar with acoustical amplification devises and sensory aids, strategies for optimizing the use of residual hearing and encouraging the development of communication skills. The importance of collaboration with parents and professionals such as audiologists or SP therapists will be emphasized.

**Grade Component:** Grad Letter Grade

**IPRE 9409 - VISL IMPAIR/BLINDNS:YNG CHLDRN**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course focuses on the impact of visual impairments/blindness on infant development, the identification and characteristics of young children with visual impairment/blindness, and most common causes of visual impairment/blindness in children. The course also emphasizes the basic principles of orientation and mobility, as well as materials and methods for appropriate intervention with young children with visual impairment/blindness.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

**IPRE 9410 - SPEC TOPICS SPECIAL EDUCATION**

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

Investigates a variety of problems and issues that impact on practices in teaching special education.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SNC Basis

**IPRE 9413 - INTRO TO INSTRNL SUPPORT TEAM**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

This course will provide participants with information and opportunities for application of the five major components of the instructional support team concept. These components are: collaborative consultation, curriculum-based assessment, instructional adaptations, effective interaction patterns and student life skills.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9414 - YOUNG CHILDREN WITH AUTISM**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course will give students a general understanding of autism and related disorders. Students will gain an understanding of the characteristics, etiology, and developmental course of autism; the importance of parental and multidisciplinary collaboration; the ways autism impacts on the ability of young children to learn; and ways in which early intervention can be adapted to meet the needs of these children. Students will learn about some current areas of research and controversies in treating autism.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

**IPRE 9415 - MANAG CHALLGING BHVR IN CHLDRN**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This module will focus on challenging behaviors that may arise in young children with multiple disabilities. The behaviors that are likely to be considered are sleep and eating related issues, compliance, aggression and self-stimulatory and self-abusive behaviors. The course is taught by a developmental specialist who will focus on identifying and assessing such problems and designing strategies to address them in family-centered ways. The course culminates with a video-based assignment featuring young children with disabilities.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade
IPRE 9416 - MEDICALLY FRAGILE: YOUNG CHILD
Minimum Credits: 1
Maximum Credits: 1
This course focuses on the elements that influence the functioning of the medically fragile infant. The reactions and adaptations of the child, the family and professionals will be addressed, as well as the conditions, underlying problems, and functional concerns. Also, the processes utilized to assess, prioritize, and implement interventions will be discussed, and equipment that is common to settings with medically fragile children will be presented.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9417 - INTRVNTN IN NATRL ENVIRONMNTS
Minimum Credits: 1
Maximum Credits: 1
The law requires that interventions for infants and toddlers with disabilities be delivered in natural environments". This module examines the topic of natural environments with in the context of early intervention. Knowledge will be imparted concerning definition, legal and regulatory requirements and philosophical principles of natural environments. Further, natural environments within routines, activities and events of family and community life will be explored."
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9420 - WHAT TO DO WITH THE GIFTED
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to provide meaningful strategies for classroom teachers to understand and meet the needs of the gifted students in their classroom.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9422 - EDUCATING GIFTED CHILDREN
Minimum Credits: 1
Maximum Credits: 1
This course explores the unique characteristics of gifted children and the best programs, teaching strategies, and modes of assessment for meeting their special needs as required by pa law.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9430 - BRAILLE FAMILIARZTN & REFRESH
Minimum Credits: 1
Maximum Credits: 1
A chance to refresh braille skills for those in the field of training the visually impaired as well as giving the regular educator an introduction to the importance of braille.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9431 - BRAILLE UPDATE
Minimum Credits: 1
Maximum Credits: 1
Braille update" is designed for practitioners in vision education and is intended to provide information on assessing braille readiness, braille methods, and braille materials with braille enrichment activities. The workshop will include tips and techniques in literary braille and Nemeth code."
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis
IPRE 9432 - LOW VISION UPDATE
Minimum Credits: 1
Maximum Credits: 1
Low vision update is designed for practitioners in vision education and orientation and mobility. Instruction will include theoretical basis for selection and function of near and distance vision devices as well as instruction in practical application.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9433 - CORTICAL VISUAL IMPAIRMENT
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide practitioners with theoretical and practical methods of assessment and instruction for children with cvi. Techniques are pertinent to vision educators, orientation and mobility specialists, classroom educators and parents.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9434 - ALTERNTV MOBLTY DEVICE WRKSHIP
Minimum Credits: 1
Maximum Credits: 1
The purpose of this workshop is to teach orientation and mobility (O&M) practitioners how to construct alternative mobility devices (AMDS) for use with children and adults who are blind or visually disabled. AMDS provide an option to the O&M practitioner who serves the needs of young children or blind adults who may need an alternative device to facilitate independent travel. Participants will learn how to measure, construct, and evaluate the usefulness of AMDS for use with this population.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9435 - PA SUMMER INSTU: VISUAL IMPAIR
Minimum Credits: 1
Maximum Credits: 1
Pennsylvania governor's institute for service providers in the field of visual impairment is an annual institute which offers topics of current issues and interest to professional educators in the field of visual impairment. The institute is sponsored by Pennsylvania training and technical assistance network.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9436 - DAILY LIVNG SKILLS-VISLY IMPRD
Minimum Credits: 1
Maximum Credits: 1
This workshop consists of five modules that focus on practical application of techniques for daily living skills for the teacher of the visually impaired. Each module provides hands-on practice of the skills presented and opportunity to answer questions regarding specific student issues. Discussion will address how to teach the skills in the school setting. Topics include: eating techniques; cooking (double session); labeling and money; and dressing, hygiene, and toileting.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9440 - SPEC EDUC LEADERSHIP ACADEMY
Minimum Credits: 1
Maximum Credits: 2
An annual leadership academy which presents topics of current interest to aspiring new and veteran administrators.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
Pennsylvania governor's institute for service providers in the field of deafness or hard of hearing is an annual institute which offers topics of current issues and interest to professional educators in the area of deafness or hard of hearing. The institute is sponsored by Pennsylvania training and technical assistance network.

**IPRE 9445 - PA SUMMER INSTU: HEARNG IMPAIR**
- **Minimum Credits:** 1
- **Maximum Credits:** 1

This course is designed for service providers in the field of deafness or hard of hearing. It offers topics of current issues and interest to professional educators in the area of deafness or hard of hearing. The course is sponsored by Pennsylvania training and technical assistance network.

**Academic Career:** GRAD
- **Course Component:** Workshop
- **Grade Component:** Grad LG/SU3 Basis

**IPRE 9453 - CLASSRM DISCUSS: STDNT TALK**
- **Minimum Credits:** 2
- **Maximum Credits:** 2

This workshop will introduce teachers to a model of classroom discussion that promotes critical thinking, oral communication, and student responsibility. Participants will take part in discussions, practice leading discussions with their peers, and prepare lessons.

**Academic Career:** GRAD
- **Course Component:** Workshop
- **Grade Component:** Grad LG/SU3 Basis

**IPRE 9455 - GAMES & SIMULTN IN CURRICULM**
- **Minimum Credits:** 3
- **Maximum Credits:** 3

Participants will experience the principal genres of games and simulations as pedagogic techniques, from several role perspectives--as player, observer, critic, reviser, evaluator, analyzer, and designer.

**Academic Career:** GRAD
- **Course Component:** Workshop
- **Grade Component:** Grad Letter Grade

**IPRE 9462 - THINKING PROGRAM IN SCHOOL**
- **Minimum Credits:** 1
- **Maximum Credits:** 1

Demonstrates strategies for providing increased practice opportunities for thinking for students. Presentation of a five stage model for infusing thinking into their existing text or curriculum. Practice in improving questioning skills and in using methods of evaluating thinking will be involved.

**Academic Career:** GRAD
- **Course Component:** Workshop
- **Grade Component:** Grad LG/SU3 Basis

**IPRE 9463 - CLASSRM MGMT TECHNIQUES**
- **Minimum Credits:** 1
- **Maximum Credits:** 1

Assists classroom teachers establish effective management techniques. Issues concerning the development of class room procedures, rules, routines, the efficient use of space within the classroom, and the establishment of cooperative learning groups will be included. Assertive discipline and behavior modification techniques will also be discussed.

**Academic Career:** GRAD
- **Course Component:** Workshop
- **Grade Component:** Grad LG/SU3 Basis

**IPRE 9464 - DVLPNG LDRSHP SKILS OF ADLSCNT**
- **Minimum Credits:** 1
- **Maximum Credits:** 1

The course is designed for teachers, counselors and principals interested in developing the leadership skills of their students. The course is based on the leadership development network operating in 15 Western PA. School buildings. Participants in the course will learn a model of youth leadership, develop a youth leadership plan for their school, and practice leadership development.

**Academic Career:** GRAD
- **Course Component:** Workshop
- **Grade Component:** Grad SN Basis
IPRE 9465 - MORL ED: ROLE OF PUBLIC SCHOOLS
Minimum Credits: 1
Maximum Credits: 1
The course will examine the roles America's schools have played in moral education. Students will survey a variety of approaches and the theoretical and research bases which support them; e.g., Character education, stage development, values clarification. Specific instructional programs based on one or more of the preceding will be examined.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9466 - UNDERSTDG OUR GLOBL COMMUNITY
Minimum Credits: 1
Maximum Credits: 1
This course will provide classroom activities and curriculum for an interdisciplinary approach to a better understanding of our global society. Various teaching strategies which cross the disciplines of language arts, mathematics, social studies and science will introduce concepts appropriate for grades 4 through 12.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9467 - CREATIVITY: ENRICHMENT ACTIVTS
Minimum Credits: 1
Maximum Credits: 1
This workshop demonstrates techniques necessary for designing your own supplemental learning activities. It will focus on using everyday things and surplus materials to create exciting ideas for the elementary grades.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9468 - STUDENT TEAM LEARNING
Minimum Credits: 1
Maximum Credits: 1
This course will define cooperative learning and its essential elements, cite research and list positive outcomes of student team learning and provide a thorough description of STAD, TGT, and jigsaw ii. Involvement in a simulation of STAD, TGT, and jigsaw ii will clarify and enhance the training of the participants. Implementation concerns will be addressed.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9469 - EDUC FOR A GLOBAL PERSPECTIVE
Minimum Credits: 3
Maximum Credits: 3
This course explores the major dimensions of the field of global education, relevant research, and models for altering existing curricula to incorporate global perspectives. Teachers will be encouraged to reflect and translate theory into practical lessons for elementary and secondary classrooms.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9472 - DESIGNING THEMATIC UNITS
Minimum Credits: 2
Maximum Credits: 2
Participants in this workshop will design, implement, and evaluate thematic units for their classroom. The course will cover the various stages of unit development and organization. The instructor will present creative and innovative activities to integrate the content areas into the thematic units. Examples of both literature-based and content centered units will be shared. Authentic assessment procedures (e.g., Writing folders, checklists, and portfolios) will be discussed and developed.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
IPRE 9473 - THE TEACHER AS PERFORMER
Minimum Credits: 3
Maximum Credits: 3
This course will address the needs of the classroom teacher in discovering a methodology where the teacher will become exposed to varied
techniques allowing for renewal of classroom energy, pedagogical reinforcement, and learning motivational energizing experiences to be applied to
classroom techniques. The use of experiential learning, creative drama, encouraging, and mentoring techniques is one way to help provide the energy
for the classroom teacher to accomplish this task.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9474 - TEACHING IN THE URBAN SCHOOL
Minimum Credits: 1
Maximum Credits: 1
This workshop will provide classroom management strategies and motivational techniques for working with students in a multicultural setting.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9476 - NEW DRCITIONS-TITLE I RDNG PROG
Minimum Credits: 1
Maximum Credits: 1
This workshop is designed for the reading specialist of the future, and focuses on the recent changes in title i reading programs. Topics include:
teaching beginning reading; comprehension strategies; parent involvement; teaching collaboratively; portfolio assessment; and staff development.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9477 - THE MAKING CHOICES CURRICULUM
Minimum Credits: 3
Maximum Credits: 3
This in-depth participatory lecture/demonstration/discussion training program provides background and techniques for using the making choices
curriculum to both teach students and train teachers in nonviolent problem-solving. Participants learn basic nonviolence theory and methods and
practice teaching skills influenced by the work of educators like Paulo Friere. Though making choices is specifically designed for middle school
students, it can be adapted for use in elementary and high school.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9478 - THE COGNITIVE CLASSROOM
Minimum Credits: 1
Maximum Credits: 1
Designed for current teachers, the cognitive classroom provides opportunities for teachers to learn and practice strategies which encourage the
development of thinking skills.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9479 - SERVICE LEARNING 101
Minimum Credits: 1
Maximum Credits: 1
This hands-on interactive workshop will focus on the basics of service learning as a teaching methodology. It will concentrate on the various
components of service learning and will explore existing service learning projects that are integrated into a variety of curriculum areas. Participants
will design their own service learning curriculum integrated projects.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
IPRE 9480 - PROF PRESENTATIONS FOR EDUCATORS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to train education professionals to use effective communication strategies in a variety of educational contexts. Utilizing communication theory, educational principles, organizational theory, interpersonal skills, and presentation skills, students will apply information to preparing formal presentations, parent conferences, educational staffing, group meetings, etc.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9481 - MULTIPLE INTELLIGNCES IN CLASSRM
Minimum Credits: 1
Maximum Credits: 1
This workshop will explore the eight intelligences as described in the work of Howard Gardner. Included will be implications for classroom teachers in developing instructional strategies and adapting the curriculum.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9482 - WRITING FOR JOURNAL PUBLICATION
Minimum Credits: 3
Maximum Credits: 3
In this course students will write a paper for submission to a journal. Students will be guided through the steps of organizing, drafting, revising, and preparing for submission a manuscript (text, tables, and figures) based on their work. Individualized feedback will be provided.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9483 - CONFLICT RESOLUTION FOR CLASSRM MGT
Minimum Credits: 1
Maximum Credits: 1
The purpose of this class is to present, and practice skills helpful for conflict management in elementary, middle, and secondary school classrooms. Through the use of activities, discussion, lecture, video presentation and role-plays participants will be able to apply a three-phase conflict resolution process in resolving disputes. Participants will develop a framework for applying these skills in teaching, classroom management, and modeling in conflict situations they are likely to encounter in and out of the classroom.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9484 - SCH MEDIAT TRNG & PRG IMPLMNTN
Minimum Credits: 2
Maximum Credits: 2
The purpose of this course is to present, elicit and practice a mediation process for use in elementary, middle, and secondary schools. Through the use of activities, discussion, lecture, video presentation and role-plays participants will become proficient in managing the mediation process and applying it in a school setting. Participants will be prepared to be mediators in a school, to implement a mediation program and to supervise the development of a peer mediation program.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9485 - SUPERV: THE PATHWISE SYSTEM
Minimum Credits: 1
Maximum Credits: 1
This course was designed to train cooperating teachers and their principals in the implementation of the pathwise supervision system, which is being adopted at the university of Pittsburgh by the elementary and mental and physical disabilities programs. This supervision system provides supervisors and cooperating teachers with research-based criteria and scoring rules which ensure that observers accurately and reliably interpret observation data. This will enable observers to provide substantive feedback and coaching.
Academic Career: GRAD
IPRE 9486 - CONFLCT RESOLUTN-SAFE SCHOOLS
Minimum Credits: 1
Maximum Credits: 1
A curriculum designed and created to teach students K-12 an alternative to violence and bullying. Teachers and school personnel need to be proficient in conflict resolution prior to implementing these programs in their respective schools.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9487 - CREATING RESPECTFUL SCHOOLS
Minimum Credits: 1
Maximum Credits: 1
This course explores issues faced by lesbian, gay, bisexual and transgender youth and provides educators with the tools and skills to address these issues and create safe schools for all students. Topics include: identifying the issues faced by LGBT students; dealing with parents opposed to inclusion of LGBT issues in the classroom; addressing name calling, bullying and harassment; and developing school policies that are inclusive and respectful of all students. Classroom activities include self-reflective exercises, video presentations, readings, and discussion.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9490 - CONTROL THEORY IN EDUCATION
Minimum Credits: 3
Maximum Credits: 3
In this course participants will experience the power of using control theory and explore the multiphase process of success making. Students will participate in a skill development team, employ project planning packets, use simulations, and consult with other teams and with the course leader. Also, participants will use control theory to create a program of responsibility training for students in their own classroom.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9501 - EXERCISE SPECIALIST'S WORKSHOP
Minimum Credits: 3
Maximum Credits: 3
This course covers cardiac exercise therapy, functional capacity assessment, exercise prescription and supervision, and the American college of sports medicine exercise specialist certification examination.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9504 - NUTRITION IN SPORT & EXERCISE
Minimum Credits: 3
Maximum Credits: 3
A lecture and laboratory class in which the principles of nutrition are applied to sports performance and exercise, fluid intake and athletic performance, body composition, ergogenic aids, vitamins and minerals, the pre-game meal, sports anemia, nutritional considerations for the diabetic individual, and lipid metabolism and coronary heart disease.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IPRE 9506 - HOLISTIC GOLF
Minimum Credits: 1
Maximum Credits: 1
Two-part course contains skills of learning to play golf and teaching/coaching methods for a class or golf team.
Academic Career: GRAD
IPRE 9507 - NEW PRACTICES IN PHYSICAL EDUC
Minimum Credits: 2
Maximum Credits: 2
This workshop will deal with a wide variety of current issues in physical education and provide information updates, strategies and activities for developing and implementing changes in a physical education program. The topics in this workshop include providing for the special needs student, dealing with nutrition and healthy lifestyles, stress management techniques, ideas for creative movement and dance, youth sport, fitness, coaching, and athletic training for the gymnasium.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9508 - PHYSICAL ACTIVITY-ELEM CHILDRN
Minimum Credits: 1
Maximum Credits: 1
This workshop is aimed at obesity prevention among children and youth. Today, 11.1% Of children and 14.3% Of adolescents are obese (national center of health statistics, 1996). In this workshop, elementary school and physical education teachers and health care workers will develop a better understanding of how to promote lifelong physical fitness. The workshop will provide information on how to design activities that promote a physically active lifestyle, and will include examples and discussion of developmentally appropriate activities.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9512 - MOTOR SKILL DIAGNOSIS
Minimum Credits: 2
Maximum Credits: 2
The course will review fundamental motor pattern development then concentrate on analyzing sport skills. The transition for fundamental motor pattern development to sport skills will be addressed.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9513 - BASC LIFE SUPPORT SKILS WRKSHP
Minimum Credits: 1
Maximum Credits: 1
This workshop will be conducted in two segments. Segment 1 will focus on cardiopulmonary resuscitation skills; segment 2 will continue with the new skills for mastering American Red Cross standard first aid. Skills will be developed through lecture, demonstration, audio visual materials, and hands-on practice with mannequins and fellow students.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9514 - RESPONDING TO EMERGENCIES
Minimum Credits: 2
Maximum Credits: 2
This state-of-the-art course has been designed by the American Red Cross and should be of particular interest to: coaches, athletic trainers, and school nursing personnel. (It is a must for administrators and faculty who do not have a school nurse available on a daily basis.) The course emphasizes the value of a safe and healthy lifestyle in preventing injury and illness. It is an effective blend of lecture, discussion, and simulations of emergency situations.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9515 - AUTHENTIC ASSESSMNT IN PHYS ED
Minimum Credits: 1
Maximum Credits: 1
This will be offered in conjunction with the authentic assessment in physical education conference sponsored by the American alliance for health, physical and recreation education. Nationally recognized scholars from around the country will address the issue of authentic assessment in the gym. The national standards for physical education will be discussed and methods of assessment demonstrated.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9526 - SCRIPTWRITING**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The purpose of this course is to train students in scriptwriting principals and their application to the design of instructional materials. Topics include visualization, storyboarding, developing a treatment, and production principles unique to various mediated formats. Computer applications for scriptwriting will be addressed.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9527 - INTRO CNSLTNG INSTRNL TECHNLGY**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course introduces the roles educational consultants may be required to assume in various consulting settings and then focuses on critical skills that are required for educational consultants regardless of the setting. The course is highly interactive and students will have opportunities to diagnose their own and others' current skills and develop action plans for enhancing those skills.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9530 - SPEC TOPICS INSTRUCTNL DESIGN**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
Investigates a variety of problems and issues that impact on practices in teaching instructional design.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SNC Basis

**IPRE 9534 - CHILDREN AND TELEVISION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Areas of research related to the effects of children on television will be studied. The variables to be considered include the viewing environment, critical viewing skills, and the effects of violence and of specific programming. Students will do a project on television as it relates to an age group.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9535 - CREATIVE COMMUNICATION**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The purpose of this course is to provide the opportunity for self-analysis of communication style. The course will also cover how to analyze the communication styles of other people. Participants will use this information to solve communication problems.  
**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9536 - COMMUNICTN AND INNOV THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores areas of communication theory as they relate to the instructional design function. You will develop the ability to design communication strategies based on research and theory. The communication skills needed by an instructional designer and practiced.
IPRE 9540 - DESGN & DVLP WEB PAGES IN EDUC
Minimum Credits: 3
Maximum Credits: 3
The world wide web is a powerful device for delivering instruction. This course will cover the design of interactive web pages from both an instructional perspective and the development of actual home pages. Students will learn effective instructional and screen design skills, writing code (hypertext markup language), and the use of graphics and multimedia in web pages. Students will produce their own home page.

IPRE 9541 - INTEGRATING TECHNLGY IN CLSSRM
Minimum Credits: 1
Maximum Credits: 1
This course provides basic training for the teacher who is beginning to use computer technology in the classroom. This will include: using an internet class assistant as a classroom teaching tool; learning basic directions for Microsoft PowerPoint; evaluating and planning for use of educational software; using the internet as a classroom resource; using basic graphics; and creating curriculum using computer tools.

IPRE 9542 - ON-LINE DIG LIB RESORC-ELEM ED
Minimum Credits: 1
Maximum Credits: 1
This workshop is designed to provide elementary school teachers with the information and techniques necessary to incorporate on-line digital library resources into their classes. Participants will learn to access and use federal and state web sites that are designed to be educational resource centers. They will have hands-on practice with web browsers. Pa link-to-learn initiative sites will be highlighted. Participants must have basic computer literacy skills.

IPRE 9543 - ON-LINE DIG LIBR RESORC-SEC ED
Minimum Credits: 1
Maximum Credits: 1
This workshop is designed to provide secondary school teachers with the information and techniques necessary to incorporate on-line digital library resources into their classes. Participants will learn to access and use federal and state web sites that are designed to be educational resource centers. They will have hands-on practice with web browsers. Pa link-to-learn initiative sites will be highlighted. Participants must have basic computer literacy skills.

IPRE 9544 - TCHNG RESOURCES-INTRDIS HISTRY
Minimum Credits: 1
Maximum Credits: 1
This course will provide teachers of middle and high school students with outcome-based learning activities which integrate the materials and methods of social studies, science, math, art, literature, language and music.

IPRE 9546 - THE TECHNOLOGY MENTOR TEACHER
Minimum Credits: 1
Maximum Credits: 1
This course offers instruction for technology mentor teachers in addressing school-wide needs and providing instruction for increasing technology skills of other teachers.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

**IPRE 9549 - DEVELOPING ALGEBRAIC THINKING**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The purpose of this course is to increase middle grades mathematics teachers' knowledge in the domains of mathematics, pedagogy, and student learning. Participants will engage in a variety of activities intended to provide opportunities to explore, discuss and reflect on the topic of algebra as the study of patterns and functions. Participants will explore this topic in the context of cases of how cognitively demanding tasks play out in real middle school mathematics lessons, and through examining authentic student work.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

**IPRE 9554 - TEACHING AND LEARNING ALGEBRA**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course will deal with important issues in the study of algebra (e.g., Needed curricular changes, connections to other areas of the curriculum, the role of technology, problem solving in algebra, and teaching various algebra concepts).

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad HSU Basis

**IPRE 9555 - PROBLEM SOLVING IN MATH, K-8**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course is designed to provide participants with opportunities to study the theory/process of problem solving, to work non-routine problems, to learn various strategies, and to find ways to translate problem solving into their classrooms.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad Letter Grade

**IPRE 9556 - SUCCESS IN MATH FOR ALL STDNTS**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course is designed for practicing mathematics teachers in grades 1 through 9. Emphasis in the course will be given to the use of concrete manipulative materials to develop mathematics concepts. The participants will engage in learning activities that sequentially develop concepts and computation. Whole number computation, fraction concepts and computation, and decimal concepts and computation will be included.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9557 - MATHCAD FOR MATH & SCI TCHRS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Among the many tools for doing mathematics, Mathcad is by far one of the easiest to use. Mathcad turns a computer display into a notepad. Worksheets are constructed in a top-down fashion much like programs in a language like pascal are developed. However, it is not necessary to know programming to learn Mathcad. A worksheet is composed of text, formulas, and graphics. The integration of these three components permits the user to create documents that are easily understood by others.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

**IPRE 9558 - CYCLS FOR SCIENCE SUMMER INSTU**
This workshop is designed for secondary teachers (7-12). It provides an understanding of how scientific concepts and principles apply in the solid waste management field. Participants will become familiar with national solid waste management practices, natural resource conservation methods, and related environmental impacts. Participants will learn how to adapt cycles for science lessons/activities for use with existing curricula in biology, chemistry, physics, and general/earth science. Hands-on activities and field trips will be included.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

---

**IPRE 9559 - CURR & TXTBOOK EVAL SEC MATH**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The current reform movement in secondary mathematics has advocated many changes in the curriculum. What textbooks and/or curriculum projects reflect these changes? This workshop will deal with curriculum/textbook evaluation in secondary mathematics. How the trends in mathematics education are reflected in these materials will be examined. Individual district needs will be included.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

---

**IPRE 9563 - ENHANCING ALGEBRA WITH TECHNOLOGY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Teachers will discover how to use scientific calculators, graphing calculators, spreadsheets and computer algebra languages to enhance the teaching of mathematics topics in the middle and secondary school curriculum. Special focus will be given to the use of the graphing calculator to aid student learning of algebra 1 and algebra 2 topics through the "power of visualization". Teachers will learn how to operate the ti-81 graphing calculator through demonstration lessons and will create lesson plans for classroom use. No prior knowledge of calculator or computer is needed.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

---

**IPRE 9564 - GRAPHING CALCULATOR: ALG & PRE-CALC**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
As technology becomes increasingly available, it is changing the way we teach mathematics. The graphing calculator allows us to explore problems never thought of before. Teachers will be trained to use the ti-81 and ti-82 graphing calculators and will use them to solve algebra and pre-calculus problems. Teachers will then create lesson plans which they will be able to use in their classrooms and create an in-service project for their school district. This course is designed for high school and community college instructors of pre-calculus courses.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

---

**IPRE 9565 - TEACHING CALCULUS WITH MATHEMATICA**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
This workshop is an introduction to Mathematica and focuses on using Mathematica to teach calculus. Students will write an interactive calculus textbook-- a computer-based document from which numeric, symbolic, and graphical commands can be executed with the results appearing in the document. Curricular reform issues, created by the use of technology in the classroom will also be addressed.

**Academic Career:** GRAD  
**Course Component:** Workshop  
**Grade Component:** Grad LG/SU3 Basis

---

**IPRE 9566 - TEACHING EARTH SCIENCE**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The geology of Western Pennsylvania will be studied through the examination of rocks and minerals, and of topographic and geologic maps. This course is designed for all levels of teachers who wish to improve their ability to teach earth science.

**Academic Career:** GRAD
IPRE 9567 - TEACHING SCIENCE WITH TOYS
Minimum Credits: 2
Maximum Credits: 2
Teaching science with toys is designed to encourage elementary classroom teachers to make use of familiar objects, toys, to teach basic principles of chemistry and physics. The course focuses on an activity based approach to teaching science while emphasizing the construction of science knowledge in both the teachers and the students they teach.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9568 - ATOMS EXIST!
Minimum Credits: 1
Maximum Credits: 1
This workshop is designed for science educators K-8. Participants will examine evidence for the existence of atoms using a wide array of dramatic and fun science demonstrations and hands-on experiments. Topics include: the scientific method; states of matter and phase changes; electrostatics and sticky molecules; electrolysis and fuel cells; lasers and other optics; tests for minerals; engines and efficiency; etc. Loan kits developed to present these topics will be made available to all participants for use in their schools.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9572 - INTERVIEWING FOR MISCONCEPTIONS
Minimum Credits: 1
Maximum Credits: 1
Assessing learners' misconceptions about science through specialized interviewing techniques is the focus of this workshop. Class time will be split between lecture and interviewing activities.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9573 - WRITING WITH CONCEPT MAPS
Minimum Credits: 1
Maximum Credits: 1
Assessing learners' understanding of science through the writing process is the focus of this workshop. Class time will be split between lecture and writing-based activities.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9574 - PERFORMANCE ON PROGRESS
Minimum Credits: 1
Maximum Credits: 1
This workshop will develop skills in assessing student learning based on performance in process-oriented, inquiry, and problem solving activities. Strategies will be practiced by participants with their peers and elementary age children.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9575 - CONNECTING LAB ACTIVITIES & CONCEPTS
Minimum Credits: 1
Maximum Credits: 1
This workshop will develop skills for assessing learners' understanding of science through laboratory activities. The technique to develop lab skills in science will focus on connecting evidence to knowledge claims. These will be practiced by participants themselves through hands-on science activities. Some class meeting time will be devoted to completing and assessing investigative activities.
Academic Career: GRAD
IPRE 9576 - TECHNG ELEM SCI THROUGH INQRY
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to help elementary teachers improve their skills in using an inquiry method of teaching. Participants will engage in inquiry related activities that can be used in their classrooms.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9577 - DESIGNING SCIENCE FLD PROJECTS
Minimum Credits: 3
Maximum Credits: 3
Participants will work together to design, conduct and evaluate data from an inter-curricular science field project conducted at a local park. The final class report will serve as a model which participants can use for classroom implementation.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

IPRE 9578 - FRANKENSCIENCE
Minimum Credits: 3
Maximum Credits: 3
Most elementary science is taught by teachers with poor science background and little preparation in the use of hands-on" inquiry approaches. This is a science teaching methods workshop which prepares teachers to use an inquiry approach to teaching. Students participate in and design lessons using everyday inexpensive equipment."

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9579 - MIDL SCHL SCI:STANDRDS BY DSGN
Minimum Credits: 3
Maximum Credits: 3
This workshop is offered in collaboration with the national steel recycling institute. Scientists/corporate representatives will present current research/content related to environmental impact. Hands-on activities and field trips will be included. Classwork will include instructional strategies, authentic assessments, and alignment with science education standards, identification of mentor scientists / educators, an internet search and NASA materials selection. Participants will develop/write a classroom module according to grade level and curriculum addressed.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9585 - TEACHING INTRODUCTORY STATISTICS
Minimum Credits: 1
Maximum Credits: 1
Students will critically review typical syllabi for an introductory statistics course and explore other educational materials and activities such as: actual experiments (involving randomization); statistical packages and resources on the internet; and audiovisual tapes describing statistical applications.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9586 - ELEM SCI: USING LOCL RESOURCES
Minimum Credits: 3
Maximum Credits: 3
This course is designed for elementary teachers and it gives them the opportunity to explore local resources that can be used in teaching elementary science. Activities will include field trips to informal educational sites (Phipps conservatory, challenger learning center, etc.); Presentation of science resources (e.g., Wizard of AAHS, Carolina biological supply); and application of the national science education standards as well as pa state standards in science. Participants will be required to produce a unit plan that incorporates these resources in their sci-instruction.
IPRE 9587 - FRM SUBMARINE TO SPACE SHUTTLE
Minimum Credits: 1
Maximum Credits: 3
This hands-on lab, field trip, and distance learning course explores science devoted to middle school students as taught by secondary and elementary school teachers. Content is derived from that presented in materials from the national aeronautics and space administration and the department of defense. It includes experiences from submarines to the space shuttle. The purpose is to expose teachers to the science that complements regular school curricula. For elementary teachers it provides an excursion for how to update their science background knowledge.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IPRE 9588 - STANDRDS & STRATGY IN SCI EDUC
Minimum Credits: 3
Maximum Credits: 3
This course will provide knowledge about and practice in developing an instructional strategy which will align curriculum with the new science education standards. It will provide teachers an opportunity to identify and link with resources in the broad scientific community, experience collaborative work with their peers, and develop a module suitable for classroom use. Participants will use electronic communication and the internet as an instructional frame work to explore a repertoire of models, reflect on their ideas, and select goals and contexts of instruction.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9589 - SCI TECHN & SOCTY GREEN DESIGN
Minimum Credits: 1
Maximum Credits: 1
Science technology and society by green design will integrate concepts from science, math, technology and social science, using the engineering design approach (use of building, disassembling, simulating, and designing models). Teachers will be prepared to use a new format in teaching/learning in the classroom. The approach emphasizes group work, active learning, real world problem solving, critical thinking, and decision making. Real life situations, issues, and topics provide students a context to understand and classify how everything is interrelated.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9590 - LEWIS & CLARK COMMEMORATION
Minimum Credits: 1
Maximum Credits: 1
This summer institute will provide workshops and field experiences relating to all aspects of the Lewis and Clark commemoration. Using the STS by green design model, the experiences will link the historical and natural environments, and provide a basis for the development of a multidisciplinary classroom module. The module development will aid teachers in addressing the new standards while taking advantage of the unique resources related to the Lewis and Clark commemoration.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad HSU Basis

IPRE 9609 - RATING PBLC SCHL PROF EMPLOYEES
Minimum Credits: 1
Maximum Credits: 1
This workshop is designed to give administrators, assistant principals and principals, or administrators-to-be a practical experience in performing this duty in an effective manner. Emphasis will be placed on constructing appropriate documents to reflect both satisfactory and unsatisfactory ratings and writings and appropriate improvement plans that can meet and withstand legal scrutiny.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
IPRE 9622 - DISABILITIES LAW AND SOCIETY
Minimum Credits: 1
Maximum Credits: 3
This course provides an in-depth study of the legal rights of persons with disabilities, based primarily upon three federal statutes: individuals with disabilities education act; rehabilitation act of 1973; and Americans with disabilities act of 1990. Topics include discrimination in employment, public accommodation, and access to telecommunication. This course meets the school law requirement for state certification and is beneficial for administrators, teachers, social workers, rehabilitation counselors, nurses and other professionals.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IPRE 9625 - FUNDAMENTALS OF SUPERVISION
Minimum Credits: 3
Maximum Credits: 3
Participants will examine current issues and practices associated with the field of instructional supervision. Clinical supervision (or in-class supervision) will be the primary practice considered during the course. Several conflicting conceptions of supervisory policies and practice will be featured and critiqued through the readings, discussion and simulation activities.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SNC Basis

IPRE 9626 - ADULTS AS LEARNERS IN THE CURR
Minimum Credits: 3
Maximum Credits: 3
Course content will include the study of adult development and learning in educational settings. Class members will be able to practice a form of inquiry known as reflective theorizing” as they develop substantive concepts and principles from simulation-like experiences. A conceptual frame work for curriculum development will provide the center piece for class activities."
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9635 - THE NEW STATE STANDARDS
Minimum Credits: 1
Maximum Credits: 1
This workshop is for teachers and administrators who are responsible for implementing the new state standards. Sessions will include: an overview of chapter 4 regulations, as well as the implications and impact of standards; issues involved in aligning the curriculum with the standards; issues in instruction and assessment as related to the standards; and planning and procedures for implementation. Sessions will be interactive and students will see some school district implementations.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9705 - HUMAN LEARNING
Minimum Credits: 3
Maximum Credits: 3
Presents an overview of theories and of kinds of learning that educational professionals should know. Also considered are recent developments in cognitive psychology, such as information processing and knowledge-based approaches in transition from novice to expert, and from poorly to well-adjusted states.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IPRE 9706 - BRN RSRCH: HOW CHILDREN LEARN
Minimum Credits: 1
Maximum Credits: 3
Participants will review the latest brain research. They will explore its implications for learning and how it can enhance that learning.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis
IPRE 9712 - UNDERSTANDING UNDERSTANDING
Minimum Credits: 1
Maximum Credits: 1
This course examines application of cognitive theory to the description and measurement of understanding. Changes in understanding as described by developmental theory are also discussed. Understandings involved in the acquisition of various content and skill domains are included; students emerge with capacity to understand understanding.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

IPRE 9724 - ENHANCING SELF ESTEEM
Minimum Credits: 1
Maximum Credits: 1
Children and adolescents who do not feel good about themselves are likely to have difficulties in academic achievement and in relationships with peers and people in authority. This course will focus on the application of school-based interventions to enhance the self-esteem of children and adolescents.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9725 - HELPING TEENS MANAGE ANGER
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to teach adults who work with adolescents how to do self-control training with them. Cognitive-behavioral interventions with adolescents can bring about significant behavior change. With adolescents aggression all too often follows anger arousal. The consequences of expressed aggression, within the school setting, the neighborhood, and community are often dire for the adolescents who act on their anger, and for others as well.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9726 - WORKING WITH AT-RISK STUDENTS
Minimum Credits: 1
Maximum Credits: 1
This course will discuss various aspects of drug and alcohol abuse, school dropouts, suicide, and teenage pregnancy. Its purpose is to develop an awareness of the multiple problems faced by high school students.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9727 - UPROOTED CHILDREN
Minimum Credits: 1
Maximum Credits: 1
This interactive course will give teachers and other school personnel an opportunity to explore the impact of placement on the cognitive, physical and emotional development of adopted and foster children. Issues that arise in the classroom and often require special intervention by teachers, counselors, and school administrators will be emphasized.

Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad LG/SU3 Basis

IPRE 9732 - TEAM BUILDING IN REHAB
Minimum Credits: 2
Maximum Credits: 2
The teambuilding and work groups encourage the sharing of power and goal setting, decision making, and communicating patterns. Teambuilding is a continuous process that any work group can use to achieve optimal performance levels in a personally enriching environment. This workshop, designed for master's level professionals and front-line supervisory staff who are employed in rehabilitation, mental health, and provider agencies, is unique in that Myers-Briggs type inventory will be used to analyze "the what" of group dynamics and an awareness of neuro linguistic programming.

Academic Career: GRAD
IPRE 9733 - CASE STUDIES IN REHABILITATION  
Minimum Credits: 1  
Maximum Credits: 1  
This workshop will give participants the opportunity to critically examine issues in the rehabilitation process with persons with long-term mental illness. Examples of issues which will be addressed throughout the workshop are: effective interagency collaboration, case management, job readiness and vocational potential, creative uses of existing resources and personnel, realistic goal setting and building support networks in the community.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

IPRE 9734 - DUAL DIAGNOSES AND REHAB  
Minimum Credits: 1  
Maximum Credits: 1  
Course content will focus on assessment and treatment issues for patients who have dual disorders. Attention will be paid also to the perspectives of the caregiver, family, and treatment systems. Specific objectives will include a review of prevalence and incidence data on dual disorders; identification of specific factors which mediate recovery from dual disorders, and a review of recovery issues for individuals with dual disorders from a biopsychosocial perspective including selected combinations of comorbid disorders.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

IPRE 9740 - INTRO TO RESEARCH METHODOLOGY  
Minimum Credits: 3  
Maximum Credits: 3  
Introduces basic language and concepts of empirical research with emphasis on the applicability of research methodology (statistics, measurement, design, and evaluation) for improvement of professional practice in education.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

IPRE 9741 - STATISTICAL METHODS 1  
Minimum Credits: 3  
Maximum Credits: 3  
Introduction to descriptive and inferential statistics. Topics include frequency distributions, graphs, stem-and leaf displays, boxplots, scatter diagrams, measures of central tendency, measures of variability, correlation, sampling distributions, point estimation, introduction to hypothesis testing, and introduction to interval estimation.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

IPRE 9754 - UNDERSTDG & SHAPING BEHAVIOR  
Minimum Credits: 1  
Maximum Credits: 1  
As society has changed, so have the behaviors and choices available to youngsters. Behavior management skills that were effective ten to twenty years ago seem ineffective. This highly practical, interactive, hands-on course provides a common-sense basis for interpreting and predicting human behavior and strategies for applying that knowledge in working with children and adolescents. Participants will learn how to help youngsters accept responsibility for their behaviors and make more responsible choices.  
Academic Career: GRAD  
Course Component: Workshop  
Grade Component: Grad LG/SU3 Basis

Instruction & Learning
IL 2000 - INTRO TO ELEMENTARY TEACHING
Minimum Credits: 3  
Maximum Credits: 3  
An introduction to teaching in the elementary school. Addresses both historical and contemporary perspectives. Provides a basic introduction to instructional planning, curriculum, and management. Classroom observations and individual tutoring experiences with elementary and middle school students are part of course requirements.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2001 - INTRO PLN & ASSMNT ELEM CLSSRM  
Minimum Credits: 3  
Maximum Credits: 6  
This course provides a brief introduction to lesson planning and other aspects connected with preparing to teach in the elementary classroom. More in-depth attention is given to assessment. Main areas of assessment that are included are: authentic performance assessment, traditional test items, reliability, and validity, assessing students with special needs, standardized testing procedures, portfolio assessment, and grading.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad Letter Grade

IL 2018 - EXTENDED STUDENT TEACHING  
Minimum Credits: 1  
Maximum Credits: 3  
Full-time teaching practicum for teacher certification candidates. Provides opportunities to observe, plan, conduct, and evaluate instruction in the school setting and receive professional feedback from university supervisors and experienced master teachers.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis

IL 2041 - INTRO TO EARLY CHILDHOOD ED  
Minimum Credits: 3  
Maximum Credits: 3  
The course is a general introduction to the theoretical, political, economic, and social issues that are inherent in the conduct and development of services for young children. The primary thrust is intended to provide students with both an overview of current issues and a basis for assessment.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2042 - LANGUAGE & LIT FOR YOUNG CHILD  
Minimum Credits: 3  
Maximum Credits: 3  
An introduction to language and literacy for children birth through grade 4. Includes applied theories and stages of language development, transitions from oral to written expression, family literacy, and guidelines for the selection and use of quality literature.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

IL 2047 - INTEGRATED CURRICULUM PRE-K-4  
Minimum Credits: 3  
Maximum Credits: 3  
The second half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade
IL 2048 - SPECIAL TOPICS - ELEMNARY EDUC
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty and students or to current practice and policy issues of concern to teachers and teacher educators.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2050 - COMPUTER APPLICATIONS IN EDUC
Minimum Credits: 1
Maximum Credits: 3
Designed for the novice user of computer-based technologies for teaching and learning. Provides hands-on laboratory activities using various software applications to improve personal productivity and enhance student learning experiences. Emphasizes the skillful integration of technology into the academic subject fields that make up the K-12 curriculum. Also includes studies of adaptive technology for special education.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2051 - COMPUTER APPLICATNS IN EDUC 1
Minimum Credits: 1
Maximum Credits: 1
Designed for the novice user of computer-based technologies activities using various software applications to improve personal productivity and enhance student learning experiences. Emphasizes the skillful integration of technology into the academic subject fields that make up the K-12 curriculum. Also includes studies of adaptive technology for special education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2052 - COMPUTER APPLICATNS IN EDUC 2
Minimum Credits: 2
Maximum Credits: 2
Designed for the novice user of computer-based technologies activities using various software applications to improve personal productivity and enhance student learning experiences. Emphasizes the skillful integration of technology into the academic subject fields that make up the K-12 curriculum. Also includes studies of adaptive technology for special education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2053 - COMPUTER APPLICATNS IN EDUC 3
Minimum Credits: 3
Maximum Credits: 3
Designed for the novice user of computer-based technologies activities using various software applications to improve personal productivity and enhance student learning experiences. Emphasizes the skillful integration of technology into the academic subject fields that make up the K-12 curriculum. Also includes studies of adaptive technology for special education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2070 - PROF ISSUES IN ELEMENTARY EDUC
Minimum Credits: 1
Maximum Credits: 3
Examines local, national, and international issues in elementary education. Topics include curriculum censorship, professionalism, job opportunities, and teaching in multi-cultural settings.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
IL 2071 - CURRENT ISSUES IN EDUCATION
Minimum Credits: 2
Maximum Credits: 2
Students analyze educational reform movements, the school environment, and instructional research findings as related to classroom strategies and the development of a professional identity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2091 - SUPERVISED RESEARCH - SCIENCE
Minimum Credits: 1
Maximum Credits: 3
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

IL 2098 - DIRECTED STUDY - SCIENCE
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

IL 2191 - SUPERVISED RES - EARLY CHILDHD
Minimum Credits: 1
Maximum Credits: 3
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

IL 2198 - DIRECTED STUDY - EARLY CHILDHD
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

IL 2200 - STRUCTD APPRCH PHONICS INSTRUC
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to structured approaches for supporting students' development of phonemic awareness and phonics skills, with attention to issues related to fluency and comprehension as well.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2201 - SOCULTR PERSPS ON LITRCY LRNG
Minimum Credits: 3
Maximum Credits: 3
Sociocultural theory has profound implications for our understanding of literacy teaching and schooling writ large. The purpose of this course is to provide opportunities for students to develop an introductory yet critical understanding of the research literature in sociocultural theory as it relates to literacy learning. Course modules will focus on sociocultural theory as it relates to society, language, institutions of schooling, classroom practices in teaching literacy, and our understanding of individual learners.
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2202 - ASSMNT & ACOUNTBLTY POLC EDCTR  
Minimum Credits: 3  
Maximum Credits: 3  
High-stakes testing and accountability policies have been enacted at the federal, state, and local levels, with the aim of promoting student learning through the provision of test-score information and incentives. In this course we will explore the policy debate surrounding test-based accountability and the use of high-stakes assessment to lever instructional change. Topics we will consider include the alignment of state accountability tests to state standards for student learning, the influence of high-stakes testing on instruction and learning, and the use of student test scores in teacher evaluation systems.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2203 - LANGUAGE AND LANGUAGE SYSTEMS  
Minimum Credits: 3  
Maximum Credits: 3  
This course provides an overview of literacy research and instructional approaches that relate to language and language systems with emphasis on the historical development of English, linguistic and sociocultural perspectives on second language learners and speakers of dialects, and instructional approaches for encoding and decoding.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2206 - RDNG & LANG ARTS PRIM GRADES  
Minimum Credits: 3  
Maximum Credits: 3  
Designed to acquaint students with knowledge and skills that are required to teach reading and the language arts in the primary grades in elementary schools. Areas of concentration will include literacy learning and its development; modes of language; assessment; curriculum approaches and practices; word identification, vocabulary; comprehension; diverse learners; literacy-rich environments; and instruction.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2207 - READING & WRTNG IN CONTNT CURR  
Minimum Credits: 3  
Maximum Credits: 3  
Reading and writing skills for effective work in secondary school subjects. Examines student achievement differences and literacy problems. Offers techniques for developing vocabulary, comprehension, and skills in thinking, content writing, and study.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2208 - RDNG/WRIT METHS1: PREK-GRADE 1  
Minimum Credits: 3  
Maximum Credits: 3  
This course is intended for teacher candidates who are pursuing prek-4 certification. It is the first in a two-course sequence that focuses on classroom teaching methods for literacy. It is also part of a set of courses that focus on literacy development and instruction. Other courses in the set include reading/writing methods 2: grades 2-4, language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 1 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) oral language development, (b) emergent literacy, (c) concepts about print, (d) comprehension, and (e) writing. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in pre-kindergarten - grade 1.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade
**IL 2209 - RDNG/WRIT METHODS 2: GRADE 2-4**

Minimum Credits: 3  
Maximum Credits: 3  
This course is intended for teacher candidates who are pursuing prek-4 certification. It is the second in a two-course sequence and builds on concepts introduced in reading/writing methods 1. It is also part of set of courses that focus on literacy development and instruction. Other courses in the set include language and literature for the young child, and literacy assessment and instruction for children with disabilities in inclusive settings. Teacher candidates in reading/writing methods 2 will have opportunities to build their knowledge about specific aspects of literacy, including: (a) word study-decoding, spelling, and vocabulary, (b) comprehension, and (d) composition, including handwriting. In addition, candidates will learn about specific instructional approaches and resources for supporting students in developing those aspects of literacy in grades 2-4.

**Academic Career: GRAD**  
**Course Component: Lecture**  
**Grade Component: Grad Letter Grade**

**IL 2210 - LANGUAGE & THE READING PROCESS**

Minimum Credits: 3  
Maximum Credits: 3  
This course connects reading and writing to oral language. It includes overviews of multidimensional features that influence literacy, the nature of written English, issues in handwriting and spelling, the K-12 curriculum, multi-cultural literature, and composing.

**Academic Career: GRAD**  
**Course Component: Seminar**  
**Grade Component: Grad Letter Grade**

**IL 2211 - COMPREHENSION AND VOCABULARY**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an in-depth consideration of reading processes related to comprehension and learning from text, and instructional approaches that support student text comprehension, including vocabulary instruction.

**Academic Career: GRAD**  
**Course Component: Lecture**  
**Grade Component: Grad Letter Grade**

**IL 2212 - METHODS & MATERIALS IN READING**

Minimum Credits: 3  
Maximum Credits: 3  
Methods and materials that prepare teachers/specialists to teach beginning through high school reading, word identification, vocabulary, comprehension, study methods, and recreational reading. Classroom management of reading and evaluation of reading materials are also addressed.

**Academic Career: GRAD**  
**Course Component: Lecture**  
**Grade Component: Grad Letter Grade**

**IL 2213 - DIAGNOSIS AND INSTRUCTION 1**

Minimum Credits: 3  
Maximum Credits: 3  
Focus on diagnostic principles and procedures used in the teaching of reading, K-adult. Includes an analysis of in formal and formal assessment tools. Emphases are on helping students understand the importance of diagnosis in planning instruction and diagnosis as a process rather than a product.

**Academic Career: GRAD**  
**Course Component: Lecture**  
**Grade Component: Grad Letter Grade**

**IL 2214 - DIAGNOSIS AND INSTRUCTION 2**

Minimum Credits: 3  
Maximum Credits: 3  
Course focuses on developing understanding of instructional strategies that can be used with students experiencing difficulties with reading/language process. Various roles of specialists will be described and discussed.

**Academic Career: GRAD**  
**Course Component: Lecture**  
**Grade Component: Grad Letter Grade**  
**Course Requirements: PREQ: IL 2213**
IL 2215 - APPLD PRINCIPL OF REMEDIATION
Minimum Credits: 3
Maximum Credits: 3
In schools or clinical sites students use knowledge and skills gained in earlier experiences to diagnose reading difficulties of several pupils at varied levels, to develop and implement a thorough program of individualized remedial instruction, and to evaluate that program.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2213; CREQ: IL 2214

IL 2216 - LITRCY ASSMENT & INTRVN MODELS
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of reading processes and assessments of those processes with a focus on phonology, fluency, vocabulary, and comprehension. The course also provides an introduction to the response to intervention model and its application in various contexts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2217 - LITRCY PRAC ELEM STUDENTS
Minimum Credits: 3
Maximum Credits: 3
This course engages candidates in working with students in kindergarten through grade 3 to assess students' literacy abilities in decoding, spelling, vocabulary, fluency, and comprehension, and to design instruction targeted to support students' literacy development. The course is also an opportunity for candidates to videotape and analyze their interactions with students.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 2218 - LITRCY PRAC ADLSCNT STUDENTS
Minimum Credits: 3
Maximum Credits: 3
This course involves working with middle school students who are experiencing difficulties with reading. The course takes place at a school site for 3 weeks, 9:00-12:00, Monday through Friday, students meet at the University of Pittsburgh, 9:00-12:00, for three specific dates to prepare for the practicum sessions.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 2219 - DISCIPLINARY LITERACY
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the literacy development of adolescents with particular attention to the demands of discipline-specific reading and writing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2220 - READING IN CONTENT AREAS
Minimum Credits: 3
Maximum Credits: 3
Addresses methods and materials for assisting students as they read, study and learn in content classrooms. Emphasis on functional approaches that facilitate learning of both content and process across the curriculum. Also implications of current research findings for content area instruction are examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2221 - INTRO TO ADLT READNG & WRITING
Minimum Credits: 3
Maximum Credits: 3
Reviews literature that relates to the basic literacy skills needed by adult learners. Explores current reading and writing programs, materials, informal assessment, and teaching strategies. Online materials and various technologies are studied throughout the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2222 - THEORY & PRAC IN ADLT LITERACY
Minimum Credits: 3
Maximum Credits: 3
Addresses implications from research and learning theories used to enhance the development of life and work-related literacy skills for adult learners. Assessment and instruction for complex reading problems experienced by adults attempting to upgrade skills are practiced.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2223 - THEORY & PRAC IN COLLG READING
Minimum Credits: 3
Maximum Credits: 3
Study and analysis of learning and instructional theories, models of college reading programs, and college reading instructional techniques. Observation and practice in college skills classes are anticipated.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2224 - TEACHING WRTG IN ELEM SCHOOLS
Minimum Credits: 3
Maximum Credits: 3
This course will introduce writing and writing activities to students pursuing a teaching career. The purpose will be for students to see writing in action, how writing can enhance learning and not just be an end in itself. The class will consist of three main parts: experience the activities, discuss and connect the activities to classroom situations, reflect on how the activity helps students learn.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2225 - SPECIAL TOPICS - READING
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2226 - SPECIAL TOPICS - WRITING
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2227 - SPECIAL TOPICS-ENGLISH EDUCATN
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2228 - SUMMER INSTITUTE FOR TEACHERS
Minimum Credits: 6
Maximum Credits: 6
An intensive, teacher-centered, teacher-led professional development program in the teaching of writing, based on the highly successful national writing project model. Open to teachers in all grade levels (k-16) and all content areas.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2230 - TCH & LRNG IN SEC ENGLISH 1
Minimum Credits: 3
Maximum Credits: 3
In this course, teacher candidates are introduced to current issues and effective teaching practices in secondary English language arts education. Teacher candidates will learn the characteristics of English language arts classrooms, curriculum, and instruction that are inquiry-based, cognitively challenging, and engaging for adolescents.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2231 - RDNG & LANG ARTS INTM GRADES
Minimum Credits: 3
Maximum Credits: 3
This course is the companion course to reading and language arts in the primary grades. The course covers curricular, instructional and assessment techniques for the areas of reading, writing and oral communication in the intermediate grades. Theoretical bases and practical application skills for the reading and oral and written communication tasks are taught. Students are expected to prepare plans for instruction of students in these skills and to defend their choices and ideas.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2232 - INTERNSHIP IN READING
Minimum Credits: 1
Maximum Credits: 6
The objectives of this course are (a) to provide opportunities for students to participate in field experiences that complement the course work in reading instruction and assessment and (b) to work with classroom teachers or reading specialists as a means of enhancing graduate students' knowledge and understanding of literacy instruction. The internship provides a valuable experience for those graduate students who lack teaching experience. Those who want experience at grade levels with which they are not familiar, or those who need a field site in which to accomplish their course responsibilities.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad Letter Grade

IL 2233 - TEACHING WRITING
Minimum Credits: 3
Maximum Credits: 3
This course is required for English certification. It provides students with opportunities to: design sequenced reading and writing assignments; practice commenting on students' papers; study writing in the schools; study relationships of writing to thinking and learning; and practice portfolio assessments.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
IL 2234 - TEACHING LITERATURE AND MEDIA
Minimum Credits: 3
Maximum Credits: 3
Students will develop goals for teaching literature/language; demonstrate knowledge of multicultural education by location, selection, and use of instructional materials; develop skills, strategies, and techniques in literature instruction; demonstrate strategies in planning, organizing and teaching various ability groups.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2235 - THRY PRA TCH LANG GRAM USAGE
Minimum Credits: 3
Maximum Credits: 3
The purpose of this seminar is to teach students current best practices for the teaching of language, grammar and usage in multicultural and multilingual secondary English language arts classes. The course will introduce students to basic linguistic concepts and will help students understand how language and grammar are intertwined with all four language arts (reading, writing, listening and speaking). Students will practice developing language and grammar curriculum that is imbedded in reading and writing instruction and developmentally appropriate, explaining grammar and usage concepts clearly and appropriately, and assessing students' understanding of language, grammar, and usage concepts.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2236 - DRAM & PERFORMANCE IN CLSSROOM
Minimum Credits: 3
Maximum Credits: 3
Students experience a broad range of creative dramatics activities including imagination, movement, sensory, oral expression, improvisation, playmaking, and role playing. They learn about their appropriate use with elementary and secondary school students across subject areas.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2237 - CREATIVE DRAMATICS PRACTICUM
Minimum Credits: 3
Maximum Credits: 3
Students observe and analyze different creative drama leaders and practice designing and leading particular exercises with adults new to creative drama. A micro-teaching format is used for group analysis of practice sessions. Reading emphasizes leadership techniques in creative dramatics.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 2238 - RDG ELEM & MIDDLE SCHOOLS
Minimum Credits: 3
Maximum Credits: 3
Designed to acquaint students with knowledge and skills that are required to teach reading in elementary and middle schools. Areas of concentration will include comprehension, language, emerged literacy, word identification, vocabulary, assessment, and instruction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2239 - THRY PRA TCH NEW MEDIA LITRCYS
Minimum Credits: 3
Maximum Credits: 3
Teaching new literacies, multimodal forms of expression and technology in the English classroom will be the emphasis of the course. Students will follow a media literacy framework to learn theory into practice as they review and research current literature on digital tools such as wikis, blogs, social networking sites, and digital audio and video production applications. Methods for incorporating new literacies in the classroom will be explored and shared by the students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2240 - THEORY PRA: ASSMNT ENGLISH ED
Minimum Credits: 3
Maximum Credits: 3
Il 2240 theory & practice: assessment in English education this course will be a survey of the range of assessment tools and practices appropriate for use in evaluating student learning in the secondary English classroom. Students will explore the purposes, methods, and uses of classroom assessment as well as state and national assessments. Topics explored in this course will include standardized testing, formative and summative assessments, designing writing and project-based assessments and rubrics, providing feedback on student writing, analyzing the results of assessments in order to guide instruction, and other topics related to the design and use of assessments.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2241 - LANGUAGE ARTS CURRICULM ISSUES
Minimum Credits: 3
Maximum Credits: 3
This course reviews language arts curriculum as it relates to and is impacted by current educational, political and economic issues. Issues include literacy, political man dates, social influences, economic impact, student ability, and family/environment. A curriculum is developed by the class.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2242 - ISSUES IN THE ENGLISH CURRICULM
Minimum Credits: 3
Maximum Credits: 3
Students will explore issues and concerns about the English curriculum. What is it? How has it evolved? What should be the content? How should content be assessed? These issues are studied.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2243 - THEORY & PRAC IN TCHNG WRITING
Minimum Credits: 3
Maximum Credits: 3
This seminar critically studies various approaches to the teaching of writing from both theoretical and applied perspectives. Students are expected to have had some experience teaching writing.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2244 - SEMINAR IN TEACHING LITERATURE
Minimum Credits: 3
Maximum Credits: 3
Students will acquire current information on the status of research in the teaching of literature and the application of that research, as well as to expand upon those skills mastered through classroom experiences.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2245 - TCH & LRNG IN SEC ENGLISH 2
Minimum Credits: 4
Maximum Credits: 4
In this course, teacher candidates learn how to draw upon English language arts classroom research, learning theory, and knowledge of adolescent development to design and implement effective English language arts instruction. The course will emphasize the design and implementation of cognitively challenging reading and writing tasks as well as the appropriate instructional supports to help students succeed at those tasks. Teacher candidates will have opportunities to develop instructional plans and practice teaching techniques while receiving feedback from peers and the course
instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2246 - THRY & PRAC: MULTI-CULTRL LIT
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide teachers with a multicultural philosophical perspective, criteria for selecting multicultural literature, and strategies and techniques for infusing literature from diverse cultures into a literature program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2247 - STRUCTR ENG & AMER CN SIGN LANG
Minimum Credits: 3
Maximum Credits: 3
A course in the analysis of grammatical structures in English American sign language via a bilingual approach for future teachers of deaf/hard hearing students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2248 - SPEC TOPC-LANGUAGE & LITERACY
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2249 - VOCABLRY DVLP ACROSS DISCPLN
Minimum Credits: 3
Maximum Credits: 3
This course will develop research based practical techniques for enhancing vocabulary development across content areas and grade levels. It is intended for elementary and secondary teachers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2250 - TECHN IN FOREIGN LANG EDUC
Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2251 - INTRO TO FORGN LANG EDUCATN
Minimum Credits: 3
Maximum Credits: 3
A basic introduction course dealing with the most current issues in foreign language education in elementary, middle and secondary schools.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD
IL 2252 - TEACH & LEARN K12 FRGN LANG 1
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to foreign language classroom instruction, management, and methodology. Students will be introduced to the ACTFL national standards for foreign language learning and will explore instructional practices for helping learners develop proficiency in the target language and culture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2253 - PRIN/PRA FRGN LANG TESTNG
Minimum Credits: 3
Maximum Credits: 3
In this course, students become familiar with the most current language testing and assessment principles and procedures through discussion and hands-on practice. Topics covered include test usefulness, validity, reliability, practicality, impact, interactivity, and so on. Students practice creating tools ranging from multiple choice and short answer to portfolio and performance assessments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2254 - TCH & LRNG IN K-12 FRGN LANG 3
Minimum Credits: 3
Maximum Credits: 3
In this course, students discuss a variety of issues that relate to the ACTFL national standards for foreign language learning. In addition, teaching techniques that address these issues are modeled and practiced.
Academic Career: GRAD
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

IL 2255 - TECHNQ/PROC DR FOREIGN LANG TCH
Minimum Credits: 3
Maximum Credits: 3
The course will present strategies and techniques for teaching the four skills (listening, speaking, reading and writing), culture, and generic principles for effective proficiency-oriented instruction. The emphasis of this course is on practical applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2256 - ISSUES IN FOREIGN LANGUAGE ED
Minimum Credits: 3
Maximum Credits: 3
The course deals with current issues in foreign language teaching. Issues are determined by the current concerns and research in the field.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2257 - TEACHING ENG LANG LEARNERS
Minimum Credits: 3
Maximum Credits: 3
This course will explore strategies for teaching English language learners (ELLs) in formal and informal education settings. Students will be introduced to foundational theories and current research on the social and academic factors that influence ELLs learning experiences. The class will include a video component so students can observe instructional approaches for working with linguistically and culturally diverse ELLs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2258 - TCH & LRNG IN SEC FRGN LANG 2
Minimum Credits: 4
Maximum Credits: 4
In this course, students discuss and practice a variety of teaching techniques and assessment tools that support the ACTFL national standards for foreign language learning. In addition, students are introduced to current theories of second language acquisition and apply these theories to explain and design effective instruction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2259 - ISSUES TCHNG WORLD CULTS HIST
Minimum Credits: 3
Maximum Credits: 3
This course examines approaches to teaching world cultures, world history, and contemporary global issues in middle and elementary classrooms. The primary focus is on the internationalization of the school curriculum through the disciplines of history and geography. Particular attention is paid to practices that prepare young students to understand cultural diversity across the world in its historical context.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2260 - TCH & LRNG IN SEC SOCL STDS 1
Minimum Credits: 3
Maximum Credits: 3
In this course, students will draw upon research, policy, and curriculum documents to develop an overview of current issues in social studies education. The course is organized around three guiding questions: (1) what are the key practices of social studies educators? (2) What do classrooms in which powerful teaching and learning in social studies look like? And (3) what do teachers need to know and be able to do in order to engage students in powerful learning in social studies?
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2261 - SOCIAL STUDIES & TECH ELEM SCH
Minimum Credits: 3
Maximum Credits: 3
Studies the definitions, objectives, evaluation and problems of teaching social studies. Explores teaching strategies, materials and academic sources of subject matter.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2262 - TCH & LRNG IN SEC SOCL STDS 2
Minimum Credits: 4
Maximum Credits: 4
In this course, teacher candidates learn how to draw upon learning theory and knowledge of adolescent development to design and support social studies instruction. Teacher candidates utilize various curricular resources (e.g. Standards, text materials, online modules, etc.) To develop detailed instructional plans for daily lessons and entire units. Emphasis is placed on the selection and/or design of high cognitive demand tasks and appropriate pedagogical scaffolding to support students' engagement in those tasks. Teacher candidates will have opportunities to engage in key pedagogical practices while receiving critical feedback from peers and the course instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2263 - INSTRUCTN IN SOCIAL STUDIES ED
Minimum Credits: 3
Maximum Credits: 3
The methodology component to complement the curriculum course. A survey of teaching strategies and tactics to provide the prospective teacher with a variety of teaching approaches in the social studies field.
Academic Career: GRAD
IL 2264 - SOCIAL STUDIES CURRICULUM
Minimum Credits: 3
Maximum Credits: 3
An analysis of the evolution of the current scope and sequence in social studies with emphasis upon historical bases.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2265 - ISSUES IN HISTORY EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Students will explore the historical development of approaches to teaching us history and world history.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2266 - TECHNOLOGY IN SOC'L STUDIES ED
Minimum Credits: 3
Maximum Credits: 3
The student develops a curriculum unit focusing on a selected international studies topic, providing extensive background on the global perspective; to be used by the student teacher and intern upon assuming teaching responsibilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2267 - RSRCH IN SOCIAL STUDIES EDUC
Minimum Credits: 3
Maximum Credits: 3
Students will examine selected research models as applied to social studies. Emphasis is placed upon planning and using research findings in the classroom.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2268 - SOCIAL STUDIES METHS PRE-K-4
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a theoretical background in social studies education and to exemplify the appropriate principles and practices necessary to deliver effective social studies instruction in pre-k through grade 4.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2269 - SPECIAL TOPICS: SOCIAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
Students will research social studies topics of special interest. Content varies based on professional expertise and students' needs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2270 - INTGD ART & MUSIC IN ELEM SCHL
Minimum Credits: 3
Maximum Credits: 3
To introduce preservice classroom teachers to art and music contents and processes with relevance to their expected role in integrating authentic arts learning experiences in their instruction. Emphasis placed on developmental aspects of children's' responsive and expressive skills in art and music.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2271 - ARTS EDUC FOR YOUNG CHILDREN
Minimum Credits: 3
Maximum Credits: 3
Combines a review of theory and practice in child development, early learning and the arts for the purposes of planning and implementing integrative, developmentally appropriate, sequentially logical learning experiences for young children.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2272 - VISUAL THINKING/LEARNING
Minimum Credits: 3
Maximum Credits: 3
Looks at the multiple meanings and uses of visual images, imagery and imagination in various educational contexts. Participants will explore theory and practice in areas defined by visual which include thinking, learning, literacy and communication.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2273 - DEVELOPING CREATIVITY
Minimum Credits: 3
Maximum Credits: 3
This course will examine creativity by considering different theoretical approaches to the topic and their implications for education. We will discuss some of the factors that have been shown to influence creativity, such as knowledge, motivation, and learning environment. During the course, students will examine case studies of famous creative individuals (e.g. Picasso, Thomas Edison, the Beatles) and consider the relevance of these examples to our everyday creative problem solving. Creativity as a disciplinary practice will also be discussed. Students will have the opportunity to participate in field work in local after-school programs focused on developing creativity in art or technology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2274 - AESTHETICS IN EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Investigates the relationship between theories of aesthetics and aesthetic education. Opportunities to study current research and to explore instructional uses of a variety of productive processes as well as extant works of art are provided.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2275 - MUSEUMS AS EDUCATIONAL RESOURCE
Minimum Credits: 3
Maximum Credits: 3
An exploration of the uses of museums as a resource for teaching, learning and research from an educational point of view. An experiential approach is used to study the purposes and functions of museums and ways they may contribute to instructional processes.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2276 - INTEGRATING SCL STDS ELEM CURR
Minimum Credits: 3
Maximum Credits: 3
This web-based course is designed to allow elementary teachers to explore the nature and purpose of social studies, ways to integrate social studies
across the curriculum and how to connect social studies to the world beyond the classroom. Relevant topics of concern such as multicultural education and issues in elementary social studies will be examined along with current developments in the techniques, materials and technology for engaging students in social studies instruction.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

**IL 2277 - COMP & GLBL PERSPECTVS ON EDUC**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course, held on the campus of the University of cape town in cape town, South Africa, explores and compares the 20th century human/civil rights-related histories of the united states and South Africa, and examines implications these histories have had on the education systems (particularly in a context of social studies education) of each country. In their comparative survey of historical, social, and educational contexts, instructors will place special emphases on the philosophies, work, and legacies of key historical individuals including Mohandas K. Gandhi, Dr. Martin I. King, Jr., Nelson Mandela, among others. Study will incorporate a critical analysis of the universal declaration of human rights (1948), lectures by noted historical experts, visits to sites of historical significance, visits to schools and other learning environments, and group discussions of relevant texts and experiences.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2278 - PRAC IN SEC SCL STDS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Teacher candidates engage in 20 hours of fieldwork a secondary school site weekly. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction during this practicum. Assignments and weekly meetings are designed to support teacher candidates' abilities in two areas as they move towards high-engagement social studies instruction: recognizing and applying adolescent learning and developmental theory, and understanding the role of social context surrounding the classroom. Teacher candidates will reflect critically and productively on their own instruction.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**IL 2279 - PRINCIPLES TCH & LRNG AMER SCHS**

**Minimum Credits:** 3  
**Maximum Credits:** 6  
A flexible curriculum oriented to specific topics of interest or current issues of concern to educators. Concentration on teaching and learning in American schools.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 2280 - ARTS RESEARCH PRACTICUM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This guided-practice, focused study involves specific site related arts research.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**IL 2281 - LEADERSHIP SCHOOL LITERACY PROGM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines theories about leadership of the school literacy program. Leadership skills are defined and applied. Leadership theory and research as related to literacy curriculum and instruction are discussed; example of how reading specialists and others (principals, teachers) can fulfill a leadership role as described. Course combines theory with practical application.

**Academic Career:** GRAD
IL 2288 - SOCIAL STUDIES METHODS: PREK-4
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide a theoretical background in social studies education and to exemplify the appropriate principles and practices necessary to deliver effective social studies instruction in pre-k through grade 4.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2290 - RSRCH SEMINR FOR MED STUDENTS
Minimum Credits: 3
Maximum Credits: 3
The student proposes, carries out, and prepares a careful report of a study Germane to the student's professional role.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2291 - SUPERVISED RESEARCH - READING
Minimum Credits: 1
Maximum Credits: 6
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 2292 - CURRICULUM PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
The student under faculty supervision participates in the design, implementation, and/or evaluation of a curriculum project in the student's professional field.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2296 - DC DISSER RES LANG LITRCY CULT
Minimum Credits: 1
Maximum Credits: 9
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: GRAD
Course Component: Full Time Dissertation
Grade Component: Grad SN Basis

IL 2297 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
The student registers for this when the student must maintain active registration and needs to extend work on an in completed task or project from a previous term or when preparing for special examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

IL 2298 - DIRECTED STUDY - READING
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 2299 - MASTER THESIS RESEARCH**

Minimum Credits: 1  
Maximum Credits: 9  
The student prepares a proposal for an original research project, has that project approved by an appropriate faculty thesis committee, completes the proposed project, and defends the complete report in a thesis final oral examination.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**IL 2316 - AUDIO PRODUCTION**

Minimum Credits: 3  
Maximum Credits: 3  
Students develop audio production skills in order to produce instructional materials of high quality. Students learn basic audio history and physics and become familiar with the newest recording technologies.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 2318 - ADV PHOTOGRAPHY IN EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3  
Techniques of black and white photographic production and the specific application of these techniques to the design of photographic instructional materials are emphasized. Students apply visual perception principles to materials design.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 2323 - INSTRUCTIONAL CRSEWARE DESIGN**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces students to the theory and design of computer courseware. Including the processes and techniques required to design and produce computer-based instructional programs.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 2330 - MUSEUMS AS EDUCATNAL RESOURCE**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to help future teachers gain a better understanding of how out-of-school learning environments like museums can provide teachers with resources for the classroom. We will explore informal learning theory as well as practical issues about the ways that museums and schools work together through field trips, curriculum development, and lifelong professional development. The course features a 'lab' component through a local museum, where students will have the opportunity to work with museum staff on developing experiences in art, science, or the humanities. We will explore several questions throughout the course including: how do children learn in and out of school? What tools do teachers have to build bridges between schools and museums? How can teachers design effective educational programs using outside sources?

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 2332 - INTRNET & OTHR INSTRNL RESORC**
Minimum Credits: 3
Maximum Credits: 3
This course provides students with search and access strategies to locate, curriculum materials, both on and off line. Students develop skills in the selection, utilization and evaluation of such materials, particularly those available on the world wide web.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2340 - MGT OF INSTRUCTNAL TECHNOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course deals with the techniques of instructional resource administration; including budget construction, the design of physical facilities, and personnel management skills.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2348 - SPEC TOPC: INSTRUCTIONAL DESGN
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2349 - SPEC TOPC-INSTRUCTNAL TECHNLGY
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2364 - INSTRUCTIONAL SYSTEMS DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course provides the theoretical knowledge necessary to the study of instructional systems design. The course moves from an overview of the field to its theoretical bases and processes. Students practice the various id analysis steps.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2365 - THEORY OF INSTRUCTIONAL DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course introduces theory about the design steps in the instructional systems design process. Students work in teams to design, produce, implement and evaluate an instructional system for a field site.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2367 - DESIGN EXPERIMENTS EDUCL RES
Minimum Credits: 3
Maximum Credits: 3
Theory about R&D research in education. This seminar addresses instructional design and formative and summative evaluation.

Academic Career: GRAD
IL 2372 - VISUAL THINKING AND LEARNING  
Minimum Credits: 3  
Maximum Credits: 3  
This class will focus on understanding visual culture in a broad sense. We will use strategies from aesthetics and art criticism as a means to understand a variety of artworks from different times and places. Focusing on visual thinking and visual literacy will provide a new window into thinking about the use of objects and artworks in classroom settings that blend art, humanities, and science. Much of the class learning will take place in the context of fieldtrips and projects based in local museums.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

IL 2373 - GROWING UP WITH THE MEDIA  
Minimum Credits: 3  
Maximum Credits: 3  
Before they get to school, children have already learned a lot about school based disciplines, about learning, and about themselves by watching television, playing digital games, and using the web. As they mature, children become increasingly sophisticated media users, until a large part of their learning and social lives involve IM, email, chats, browsing, and, increasingly, self-expression through content creation. What do we know about how children learn with new media? What are they learning? How has it changed how they relate to school-based subjects? The course will focus on these questions from the perspective of how classroom teachers can connect with and take advantage of the diverse new media-based knowledge and literacies their students are bringing to school.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

IL 2375 - SCRIPTWRITING IN IDT  
Minimum Credits: 3  
Maximum Credits: 3  
Students will develop skills and fluency in the preparation of scripts for a variety of media productions. Contemporary procedures for scriptwriting will be addressed. Students will learn to use microcomputers for the production of scripts and storyboards.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis

IL 2376 - CNSLTNG SKILLS INSTRNL TECHN  
Minimum Credits: 1  
Maximum Credits: 3  
This course explores the role of consultants and strategies for consulting on instructional technology or curriculum projects. Students study process consulting; consultant skills; roles and models.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad LG/SU3 Basis

IL 2390 - RESEARCH SEMINAR IN IDT  
Minimum Credits: 3  
Maximum Credits: 3  
This course, conducted in seminar form, is a comprehensive survey of both classical and current research in the field of instructional design and technology. Each student completes a research paper on one major area of research inquiry.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis

IL 2391 - SUPERVISED RESEARCH IN ENGLISH  
Minimum Credits: 1  
Maximum Credits: 6  
The student works collaboratively with a sponsoring faculty member in carrying out a research project.
**IL 2392 - ID&T PRACTICUM**  
Minimum Credits: 1  
Maximum Credits: 3  
The student under faculty supervision participates in the design, implementation, and/or evaluation of a project in a chosen professional area.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 2396 - INTERNSHIP IN IDT**  
Minimum Credits: 1  
Maximum Credits: 6  
Master's students are placed at a field site where a professional mentor is provided, and students are given professional responsibilities. A contract is negotiated by the site supervisor and the student. An internship requires a full-time commitment.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**IL 2397 - INDEPENDENT STUDY IN IDT**  
Minimum Credits: 1  
Maximum Credits: 6  
The student registers for this when the student must maintain active registration and needs to extend work on an incompleted task or project from a previous term or when preparing for special examinations.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

**IL 2398 - DIRECTED STUDY IN ENGLISH**  
Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 2405 - INTRO ACTION RESEARCH METHODS**  
Minimum Credits: 3  
Maximum Credits: 3  
This course introduces students to action research as a method of improving their practice. Students will learn what action research is, how it is carried out, and where it falls in the spectrum of research methodologies. The role of literature in supporting practitioners and their action research and how to develop a literature review will be addressed. Students will design an action research project on a topic relevant to their own practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2420 - SCIENCE & TECHN IN ELEM SCHLS**  
Minimum Credits: 3  
Maximum Credits: 3  
Basic orientation to teaching in the inquiry disciplines of science. The design and development of teaching strategies, resources, lesson plans, curriculum activities and methods of evaluation are stressed. Inquiry and problem solving activities are compared to didactics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade
IL 2421 - ELEMENTARY SCIENCE METHODS
Minimum Credits: 3
Maximum Credits: 3
Students will examine science education practices at the elementary levels to establish and/or enhance their teaching of science. We will consider the following topics related to science: visioning elementary science; argumentation and explanations; exposing and advancing student thinking; representations as well as planning for and assessing instruction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2430 - TCH & LRNG IN SEC SCI 1
Minimum Credits: 3
Maximum Credits: 3
In this course, teacher candidates will draw upon research, policy, and curriculum documents to develop an overview of current issues in science education. The course is organized around three guiding questions: (1) what are some key practices of scientists? (2) what do classrooms in which students engage in key science practices look like? And (3) what do teachers need to know and be able to do in order to support learning in classrooms where students learn science ideas through engagement in science practices?
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2431 - TCH & LRNG IN SEC SCI 2
Minimum Credits: 4
Maximum Credits: 4
In this course, teacher candidates learn how to draw upon learning theory and knowledge of adolescent development to design and support science instruction. Teacher candidates utilize various curricular resources (e.g. Standards, text materials, online modules, etc.) To develop detailed instructional plans for daily lessons and entire units. Emphasis is placed on the selection and/or design of high cognitive demand tasks and appropriate pedagogical scaffolding to support students' engagement in those tasks. Teacher candidates have opportunities to engage in key pedagogical practices while receiving critical feedback from peers and the course instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2432 - TEACH & LEARN IN SEC SCI 3
Minimum Credits: 3
Maximum Credits: 3
Designed to develop an overall rationale for dealing with classroom science instruction; students design, teach and evaluate teaching strategies for secondary school; specific materials for teaching science and strategies for their effective use are examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2433 - MATH/SCI INSTRUC YOUNG LRNRS 1
Minimum Credits: 3
Maximum Credits: 3
The first half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2434 - MATH & SCI METHODS 2 (PREK-4)
Minimum Credits: 3
Maximum Credits: 3
The first half of a two-semester course sequence in which pre-service teachers learn about young (pre-k through grade 4) children's thinking related to core ideas in mathematics and science and gradually, through a series of scaffolded tasks, develop pedagogical skills for designing and implementing math and science instruction.
Academic Career: GRAD
IL 2443 - ISSUES IN TEACHING SCIENCE
Minimum Credits: 3
Maximum Credits: 3
This seminar course provides each student the opportunity to choose a current issue in science teaching and learning and explore that issue in-depth. Course activities include readings on current topics in science education, critical analysis of scholarly and practitioner oriented literature, formal presentations, and the preparation of literature reviews.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2445 - ASSESSMENT AND EVALUATION MATH ED
Minimum Credits: 3
Maximum Credits: 3
In this course we will examine current assessment practices in mathematics education, both historically and in terms of their forms and purposes in today's educational and political climate. Most importantly, however, we will focus on improving current assessment practices to support students' learning in the mathematics classroom. Based on an integrated view of assessment and instruction, students will be expected to employ ideas from the course to improve their own assessment practices.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2448 - SPECIAL TOPICS: SCIENCE ED
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum opportunity oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

IL 2450 - SPEC TOPC-MIDDLE GRADES SCIENCE
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum opportunity oriented to special content and research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2451 - SPECIAL TOPICS: MATH
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2454 - SPEC TOPC-MIDDLE GRADES MATHEMTC
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
IL 2455 - SPEC TOPC-SECONDARY MATHEMTC
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2457 - SPEC TOPC-INTEGRTG MATH & SCI
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum opportunity oriented to special content and research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2470 - RESNG & PROVING IN SEC MATH
Minimum Credits: 3
Maximum Credits: 3
This course focuses on addressing three overarching questions: 1) what is reasoning-and-proving? 2) How do secondary students benefit from engaging in reasoning-and-proving? 3) How can teachers support the development of students' capacity to reason-and-prove? Teachers explore these questions through engagement in a variety of activities that include: solving and discussing challenging mathematical tasks; analyzing narrative cases that make salient the relationship between teaching and learning and the ways in which student learning can be supported; examining and interpreting student work that features a range of solution strategies, representations, and misconceptions; and making connections to their own teaching practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2471 - MATH FOR SECONDARY TEACHERS
Minimum Credits: 3
Maximum Credits: 3
Topics in mathematics may include transformational geometry, probability/statistics, computers or other topics of importance to secondary mathematics teachers. Curricular innovations may dictate some topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2472 - ALGEBRA STUDY PATTRNS FUNCTNS
Minimum Credits: 3
Maximum Credits: 3
Focus on developing teacher's ability to reason algebraically and to design instructional experience that fosters child's algebraic reasoning through the study of patterns and functions. Includes solving math tasks related to pattern and function and analyzing teaching and learning situations that highlight pedagogical approaches that support student learning in this domain.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2473 - MATH FOR ELEMENTARY TEACHERS
Minimum Credits: 3
Maximum Credits: 3
Students will improve their mathematics knowledge of concepts and skills in numeration systems, integers, rationales, geometry, probability/statistics, and other selected topics.
Academic Career: GRAD
IL 2474 - PROPORTNL REASNG MID SCH MATH  
Minimum Credits: 3  
Maximum Credits: 3  
Focuses on developing teacher's ability to reason proportionally and capacity for designing instructional experiences that foster's child understanding of proportional relationships. Includes solving math tasks related to proportional reasoning and analyzing teaching and learning situations that highlight pedagogical approaches that support student learning in this domain.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2475 - ELEMENTARY MATH METHODS  
Minimum Credits: 3  
Maximum Credits: 3  
Students will study goals, methods, and materials available for teaching topics such as numeration, geometry, basic operations, fractions, decimals, percent, measurement and probability in the elementary school. Issues related to problem solving and technology will also be examined.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2476 - TCH & LRNG IN SEC MATH 1  
Minimum Credits: 3  
Maximum Credits: 3  
Basic orientation to the issues, lectures, and resources in the field of mathematics education. Issues currently affecting the teaching and learning of mathematics focused on middle and secondary schooling.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2477 - TCH & LRNG IN SEC MATH 2  
Minimum Credits: 4  
Maximum Credits: 4  
Topics include learning, instruction and assessment, planning lessons, effective learning environments, successful teaching strategies, and materials and resources. Responsibilities and professionalism will also be discussed.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2478 - TCH & LRNG IN SEC MATH 3  
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on the development and support of learning contexts in which adolescents have opportunities to engage in challenging mathematical practices. Drawing on cognitive change learning theory, teacher candidates learn to select and develop various assessments that reveal students' thinking and to draw upon their understanding of students' ideas to scaffold learning experiences in the classroom. Emphasis is placed on strategies that build and support students' capacity to engage in mathematical discourse.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2479 - INTRODUCTION TO MATH EDUCATION  
Minimum Credits: 3  
Maximum Credits: 3  
Basic orientation to the issues, lectures, and resources in the field of mathematics education. Issues currently affecting the teaching and learning of mathematics focused on middle and secondary schooling.  
Academic Career: GRAD
IL 2482 - MICROCOMPUTER APPLICATNS-MATH
Minimum Credits: 3
Maximum Credits: 3
Hands-on experiences centered on laboratory interface design and construction, microcomputer simulations and database construction as applied to science learning and instruction. A special emphasis is placed on technology infusion into K-12 science learning environments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2484 - MATH PROBLEM SOLVING K-12
Minimum Credits: 3
Maximum Credits: 3
Students will become familiar with various theories of problem solving. They will solve challenging mathematical problems, discuss strategies, and identify ways to translate what they learn into their own mathematics classrooms.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2486 - SCIENCE CURR ANLYSIS & DVLPMNT
Minimum Credits: 3
Maximum Credits: 3
Curriculum forces shaping the scope and sequence of learning activities and resources are studied and adapted for current school science education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2489 - STAT/COMPUTING IN SCIENCE EDUC
Minimum Credits: 3
Maximum Credits: 3
Mainframe and microcomputer data management programs for statistical computing in science education are stressed; parametric and nonparametric statistics are covered in detail.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 2490 - RESEARCH SEMINAR MATH & SCI ED
Minimum Credits: 3
Maximum Credits: 3
The student proposes, carries out, and prepares a careful report of a study Germane to the student's nascent professional role.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2491 - SUPERVISED RESEARCH - MATH
Minimum Credits: 1
Maximum Credits: 3
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 2492 - CURRICULUM PRACT MATH & SCI ED
Minimum Credits: 1
Maximum Credits: 3
The student under faculty supervision participates in the design, implementation, and/or evaluation of a curriculum project consistent with the student's nascent professional role.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**IL 2493 - PRACTCM IN SEC MATHEMATICS 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Students will share and discuss implementation of school-based assignments linked to teaching lab and methods courses  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 2495 - INTERNSHIP - MATH**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
Interns (mat program) work with cooperating teachers in a school setting to master teaching skills and to enhance their professional attitudes. Responsibility includes half-day teaching.  
**Academic Career:** GRAD  
**Course Component:** Internship  
**Grade Component:** Grad HSU Basis

**IL 2496 - INTERNSHIP - SCIENCE**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
Interns assume half-time teaching in a secondary school working with cooperating teachers and supervisors to master concepts, skills and professional attitudes. Career goal orientation is rigorously tested.  
**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad HSU Basis

**IL 2497 - INDEPDNNT STUDY MATH & SCI ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
Registration for independent study when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

**IL 2498 - DIRECTED STUDY - MATH**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 2499 - MASTR'S THESIS RES MATH SCI ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student prepares a proposal for an original research project, has that project approved by an appropriate faculty thesis committee, completes the proposed project, and defends the completed report in a thesis final oral examination.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis
IL 2500 - FOUNDATIONS OF SPECIAL EDUC
Minimum Credits: 3
Maximum Credits: 3
Course provides an overview of the field of special education. It includes such topics as 1) identification; 2) placement; 3) programming; 4) inclusion; 5) advocacy; and other topics relating to individuals with disabilities, and gifted and talented individuals. The course examines the various philosophical views of exceptionality.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2501 - STUDENT W/DISAB IN ELEM CLSSRM
Minimum Credits: 3
Maximum Credits: 3
Course is an introduction to teaching students with disabilities in elementary general education classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding inclusive educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, and (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2502 - STUDNT W/DISAB IN SEC CLSSRM
Minimum Credits: 3
Maximum Credits: 3
Course is an intro to teaching students with disabilities in sec level general EDUC classrooms. Course will provide students who plan to become educators with opportunities to (1) develop a knowledge base of the attitudinal issues regarding INCL educational practices & a philosophical orientation towards effective inclusion support strategies, (2) increase interpersonal skills for working effectively with individuals and groups, (3) increase technical skills in observing, planning, assessing, & evaluating for both behavioral & instructional challenges, & adapting instruction & curricula.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2503 - STDNT TCH DUAL CERT SEC SCHS
Minimum Credits: 3
Maximum Credits: 3
Student teaching for dual certification in secondary schools teacher candidates engage in fieldwork five days a week in secondary school sites for 14 weeks. Teacher candidates will collaborate with both content area and special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of the term, assume responsibility for the majority of provided instruction and classroom management. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

IL 2504 - ISSUES IN EMOTIONAL DISORDERS
Minimum Credits: 3
Maximum Credits: 3
Focuses upon issues relating to theoretical perspectives, definitions, characteristics, differential diagnosis, assessment procedures and intervention research. Social skills training and behavior management will also be addressed.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2505 - AUTISM: CHARACT AND INTERVNTN
Minimum Credits: 3
Maximum Credits: 3
This course will present information on the characteristics of and intervention approaches for children with autism spectrum disorders (ASDS).
Introductory material will include diagnosis criteria and characteristics of ASDS. Current research on theories of etiology will be explored and analyzed. Screening tools and assessments specific to this population will be examined in detail. Intervention approaches (e.g., LBI/Discrete Trial, ABLLS, precision teaching, teach) will be described and analyzed in terms of basic premises, research base, associated curricula, and evaluative guidelines from the autism society of America and national institute of mental health. Representatives from local education and behavioral health systems serving children with ASDS will present services/intervention models available in the area.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

---

**IL 2506 - SOCIAL AND COMM INTRVN: AUTISM**

**Minimum Credits:** 3  
**Maximum Credits:** 3

The course will consider programming and strategies for facilitating the communication and social development of young children with autism. Communication strategies will include a focus on nonverbal children, echolalic, and verbal children. Strategies will include sign language, picture systems, developmental approaches, naturalistic teaching, and discrete trial formats. Social interventions will examine play, peer interactions, and peer relationships. For both areas, assessment tools and strategies; published curricula; and a range of intervention procedures will be covered.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: IL 2505

---

**IL 2507 - EARLY INTERVNTN CONSULTATION**

**Minimum Credits:** 1  
**Maximum Credits:** 1

This module focuses on providing students with skills for consulting with families, childcare providers, related service personnel, other teachers and paraprofessionals, to assist them in carrying out interventions for young children with autism, in homes, inclusive classrooms, and the community. The class will place special emphasis on classroom-based services. The module emphasizes a collaborative approach to consultation. Communication and interpersonal skills, relationship-building, the inclusion of families in all consultations, and techniques for assisting others to carry out interventions are considered. Finally issues related to interagency collaborations with emphasis on strategies to overcome challenges that occur in the daily life of a consulting professional in a variety of settings will be investigated.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PREQ: IL 2505

---

**IL 2509 - APPLD BHVR ANAL/POSTV SUPRT**

**Minimum Credits:** 3  
**Maximum Credits:** 3

The course focuses upon the application of applied behavior analysis principles to the instruction of students with disabilities. These include individual, small group and classroom-wide instruction. The course emphasizes the acquisition, fluency, maintenance and generalization of skills and providing positive behavior support for changing behaviors.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

---

**IL 2510 - ASSMNT & INSTRUC-SEVR DISABLTY**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Basic methods course that addresses teaching techniques used with students who have severe disabilities. Includes assessment strategies, instructional methods, data collection, medical and parental concerns, classroom organization and current issues and trends in the education of students with severe disabilities.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

---

**IL 2511 - CURR DVLP-LOW INCDNC DISABS**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course addresses program and curriculum development for students with moderate/severe disabilities. Topics include the development of assessment, instruction/curricula for the following areas: personal management, social interaction, language communication, leisure, community,
vocational, and functional academics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 2512 - ASSMNT INSTRUC - HIGH INCDNC**

Minimum Credits: 3  
Maximum Credits: 3  
Course is designed to provide knowledge of assessment procedures for designing academic programs for children and youth with mild disabilities, with emphasis on assessment for teaching reading, written language and mathematics. Course includes assessment for eligibility for special education and ongoing assessment of instructional effectiveness.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 2513 - INSTRNL METH-HI INCDNC DISABS**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the methods and procedures for developing literacy for students with learning disabilities, mild mental retardation, and behavioral disorders. The focus of the first 5 sessions is on learning to teach young students who have extraordinary difficulty; the next sections address the literacy needs of older students.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

---

**IL 2514 - ADOLSCNT & ADULT WITH DISABLTY**

Minimum Credits: 3  
Maximum Credits: 3  
Course covers the general knowledge and information related to the education and transitional needs of young adults with disabilities; high school models/approaches, curriculum programming, community instruction, instructional methods, classroom/program management, vocational preparation, leisure skills, etc.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 2515 - MEDICL & PHYSICAL ASPCT DSBLTY**

Minimum Credits: 3  
Maximum Credits: 3  
Medical problems and physical disabilities, especially of young children will be reviewed. Educational implications and adaptations, including the use of assistive technology, will be discussed. A variety of conditions will be covered including those frequently experienced by premature and low birthweight infants.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 2516 - INCLUSIVE SET CLSSR MGT STRATS**

Minimum Credits: 3  
Maximum Credits: 3  
Students will learn methods for creating successful learning environments in classrooms that include a diversity of learners including those with exceptionalities. Students will acquire general knowledge, information, and experience on how to collect and use behavioral data and develop and implement positive proactive interventions to support all students at both the individual and classroom levels. The roles of social and academic interventions to enhance student outcomes will be addressed. It is required that student has access to working with children with or without disabilities (preferably a classroom setting).

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**IL 2517 - COLLABORATION AND CONSULTATION**
Minimum Credits: 3
Maximum Credits: 3
This course includes a focus on content and process related to the practice of collaboration among general and special educators. Topics related to the content of collaboration include various models of collaboration and consultation, class wide intervention strategies for implementation in the mainstream (e.g., Cooperative learning and peer tutoring) as well as more individualized supports. Topics related to the process of collaboration include considerations for cooperative teaching/team teaching.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2518 - POSTN/HNDL/MOBLTY: CHILD DISABS
Minimum Credits: 1
Maximum Credits: 1
Focuses on knowledge and recognition of normal and abnormal gross motor development of children, aged birth to 5, with an emphasis on analysis and facilitation of movement, handling and positioning, adaptive equipment, and safety.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2519 - ORL MOTR FEDG STRAT: CHLD DISAB
Minimum Credits: 1
Maximum Credits: 1
Provides an overview of medical, motor, sensory, psychological and social aspects of feeding children. The class reviews the development of normal oral motor and self-feeding skills and the impact that disabilities may have on these processes. Use of descriptive, criterion-referenced evaluations and clinical observations to identify a child's level of oral motor control will be reviewed. Students will have an opportunity to use assessment procedures and devise treatment plans to address oral motor and feeding needs of children.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2520 - LITRCY ASMNT INSTC CHILD/DISAB
Minimum Credits: 3
Maximum Credits: 3
General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their secondary classrooms for whom reading is a challenge. This course is designed to provide graduate students preparing to teach in general secondary education settings with an understanding of literacy assessment and instruction for children who are at risk or who have disabilities. Students will develop an understanding of assessment components included in a standards aligned system and be able to explain the differences between the various components and to articulate the proper use of each. Students will also gain an understanding of the components of reading, the challenges these pose for children with disabilities, and effective, research-validated methods for intervening. Students will select a child with a disability who is receiving reading instruction in a general education setting and demonstrate the ability to interpret standardized assessment, administer and interpret progress monitoring assessment, and successfully design an individualized, research-validated instructional plan for this child based on assessment data.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2521 - ADV PRIN & TECHNQ - BHVR MGMNT
Minimum Credits: 3
Maximum Credits: 3
This course will focus upon advanced skills relevant to the development and implementation of behavioral support programs for students who are seriously emotionally disturbed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2522 - ED STDNT EMOTIONAL DISTURBANCE
Minimum Credits: 3
Maximum Credits: 3
The course provides knowledge of curriculum content, teaching techniques and instructional materials for children and youth with emotional...
disturbance through a focus upon academic content areas and social skills. The utilization of instruction as therapeutic programming will be the central theme.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2523 - LITRCY ASMNT INSTC CHILD/DISAB
Minimum Credits: 3
Maximum Credits: 3
General education classrooms are increasingly diverse and all teachers must be able to assess the literacy skills of and provide effective instruction to the children in their elementary classrooms for whom reading is a challenge. IL 2524 - LEVEL 2 STUDENT TCH PRACM: VI
Minimum Credits: 5
Maximum Credits: 5
This course is required by the pa department of education for certification to become a teacher of the visually impaired. Placements for this clinical experience are arranged by the vision studies program faculty and may be conducted in the student's home area. The approximate length of the placement is 14-weeks serving children who are blind or visually impaired ages three to 21-years.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

IL 2525 - TECHNOLOGY CHILDREN WITH VI
Minimum Credits: 3
Maximum Credits: 3
This course evaluates many facets of assistive technology for individuals who are blind or visually impaired. Coursework includes projects and a weekend workshop for direct experiences with adapted software, hardware, and peripheral devices.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2526 - LEVL 1 OBSRVL PRAC: VI/O&M/EI
Minimum Credits: 1
Maximum Credits: 3
This course involves direct contact with persons with visual impairments. Students are placed in various types of pub lic/private educational and rehabilitation settings where persons with visual disabilities are served.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 2527 - LEVEL 1 OBSERVATIONAL PRAC: VI
Minimum Credits: 1
Maximum Credits: 1
This clinical experience requires students to engage in observations of practitioners serving a wide range of needs of individuals who are blind or visually impaired.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis
IL 2528 - ED CHLDRN LEARNG DISABILITIES
Minimum Credits: 3
Maximum Credits: 3
The course will provide an in-depth overview of the field of learning disabilities from its inception to the present. A review of controversial issues in the field will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2529 - BRAILLE
Minimum Credits: 3
Maximum Credits: 3
This course places emphasis on reading and writing braille. It emphasizes proficiency in reading and writing contracted and uncontracted braille, as well as teaching pre-braille and braille readiness to individuals who are blind or visually impaired.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2530 - INTRO TO THE EYE & LOW VISION
Minimum Credits: 3
Maximum Credits: 3
This course presents an overview on the anatomy and physiology of the eye. It also presents information about visual pathology and its effect upon learning and function.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2531 - EDUC OF CHILDREN WITH VI 1
Minimum Credits: 3
Maximum Credits: 3
This methods course reviews the concepts and philosophies of educating children who are blind or visually impaired. It presents information on serving the needs of children in public schools, with emphasis on the itinerant model of delivery. This methods course examines assessment, programming, instructional materials and methods, and their theoretical and research basis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2532 - EARLY INTRV CHILDREN WITH VI
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the topics unique to children aged birth through five who are blind and visually impaired and their families. Focus will be on typical and atypical development as a basis for assessing the child's needs and designing appropriate interventions and family supports. The course includes individual and collaborative work in the areas of family-centered practices and collaboration among professional agencies across disciplines. Emphasis will be placed on assessment and intervention in the areas of sensory, cognitive, motoric, and communicative development as well as providing developmentally appropriate orientation and mobility.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2533 - ORIENTATION & MOBILITY FOR TVI
Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare teachers of the visually impaired with the knowledge and skills to provide initial level sensory, cognitive, and motor skill development to children who are blind or visually impaired. Students will learn the basic skills of sighted guide and self-protective techniques including assessment and remediation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2534 - ORIETN & MOBLTY FOR CLSSR TCHR
Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare teachers of children with visual impairments to provide initial level sensory, cognitive, and motor skill development to children with visual impairments. Students will learn the basic skills of sighted guide and self-protective techniques including assessment and remediation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2535 - EDUCATION OF CHLDREN WITH VI 1
Minimum Credits: 3
Maximum Credits: 3
This course examines concepts and philosophies of educating children with visual impairments. Students will explore sociological and psychological implications for children with visual impairments who may also possess concomitant
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2536 - EDUCATION OF CHLDREN WITH VI 2
Minimum Credits: 3
Maximum Credits: 3
This course examines assessment, programming, instructional materials and methods, and their theoretical and research bases. Uses level 1 course as a foundation for developing teaching methodologies and adaptation techniques for children with visual disabilities who may also possess concomitant disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2537 - INTRO TO THE EYE & LOW VISION
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the anatomy and physiology of the visual system, the development of the visual process and the impact of visual disorders upon the visual systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2538 - TECHNOLOGY CHILDREN WITH VI
Minimum Credits: 3
Maximum Credits: 3
This course evaluates many facets of the electronic explosion within the field of blindness and visual disabilities. Direct experience with adapted software, hardware, and peripheral devices to determine appropriate equipment for individual students in the equipment acquisition process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2539 - ERLY INTRV FOR CHLDREN WITH VI
Minimum Credits: 2
Maximum Credits: 2
This course will examine typical and atypical infant development, birth-3 years. Emphasis will be placed on understanding developmental domains and etiological factors pertaining to visual impairments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2540 - FDS OF ORIENTATION & MOBILITY
Minimum Credits: 3
Maximum Credits: 3
This fully on-line course is taken prior to IL 2750. It integrates relevant aspects of the process of teaching O&M (I. E., Sensory, cognitive) to individuals who are blind or with visually impaired who may also possess additional disabilities. In addition the history, philosophy, and aspects of professional ethics are covered. Service delivery models are discussed along with O&M resources, supervision, and program administration.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2541 - PROGRM DEVELP: ORIETN & MOBLTY
Minimum Credits: 3
Maximum Credits: 3
This fully on-line is taken prior to IL 2752. This course builds upon the knowledge students acquired in IL 2540 to understand assessment and instructional strategies for teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Aspects related to research in the field of O&M are also presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2542 - WEB CURRNT ISSS & TRENDS SP ED
Minimum Credits: 3
Maximum Credits: 3
This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2543 - BRAILLE
Minimum Credits: 3
Maximum Credits: 3
This course reviews research and literature on systems for reading and writing braille. Emphasizes proficiency in reading and writing grades 1 and 2 braille, as well as teaching pre-braille and braille readiness to individuals who are visually disabled.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2544 - NEMETH CODE/ABACUS
Minimum Credits: 2
Maximum Credits: 2
This course is designed to provide instruction in the mathematical braille code (Nemeth code) and in use of the Cranmer abacus. Students will be instructed in arithmetic computation and mathematical problem solving using both systems. Students will also learn methodological instruction in Nemeth code/abacus.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2545 - EDUCATN OF CHILDREN WITH VI 2
Minimum Credits: 3
Maximum Credits: 3
This course builds on the concepts presented in IL 2531 for developing teaching methodologies and adaptation techniques for children who are blind or visually impaired who may also possess additional disabilities. Curricular and classroom adaptions and modifications are stressed with emphasis placed on teaching academic and functional skills.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2546 - SURVEY DEAFNS & DEAF EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Practice and trends in the education of deaf/hard of hearing students. Review of the historical developments and research contributions. Appropriate for those specializing in the education of the deaf/hard of hearing or working in related fields.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2547 - NEMETH CODE/ABACUS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide instruction in the mathematical braille code (Nemeth code) as well as the Cranmer abacus. Students will be instructed in arithmetic computation and mathematical problem solving using both systems. Students will also learn instructional strategies to assist students who are blind or visually impaired to obtain mathematical literacy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2548 - SPECIAL TOPICS SPECIAL EDUCATN
Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum orientated to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2549 - LESN DSGN INSTRUC DEF/HRD HEAR
Minimum Credits: 3
Maximum Credits: 3
Assessment and identification of the needs of deaf/hard hearing students; development and adaptation of curriculum materials and instruction procedures, including the use of media and appropriate technology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2550 - LANG DVLP-DEAF/HARD OF HEARING
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2551 - METH TCH ENG DEAF/HARD HEARING
Minimum Credits: 3
Maximum Credits: 3
Approaches to teaching English to deaf/hard of hearing students. Instruction in the assessment and analysis of communication in deaf/hard of hearing children, and the development and design of language arts and reading lessons.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2552 - STDNT TCH-SPEC EDUC IN SEC SCH
Teacher candidates engage in fieldwork five days a week in secondary school sites with students with both high and low incidence disabilities. Teacher candidates will collaborate with special education mentor teachers to develop and implement a plan by which the teacher candidate will, by the end of each experience, assume responsibility for the majority of provided instruction and classroom management. Experiences are designed to support teacher candidates' ability to recognize and apply evidence-based practices with adolescents in the school context.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad HSU Basis

IL 2553 - AMERICAN SIGN LANGUAGE 3
Minimum Credits: 3
Maximum Credits: 3
Designed to provide advanced-level proficiency in American sign language (ASL), with special emphasis on communicating with people who use ASL in the school setting. Students will focus on conversations, storytelling and general instruction K-12. The course is conducted in ASL with no voice interpretation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2554 - ASL IN THE CLASSROOM
Minimum Credits: 1
Maximum Credits: 3
Designed specifically for students majoring in deaf education, the course provides advanced-level proficiency in American sign language (ASL) specific to classroom instruction. Students will focus on conversations, classroom storytelling strategies/techniques, and specific communication of K-12 subject matter. The course is conducted in ASL with no voice interpretation.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 2555 - SP DVLP-DEAF/HARD OF HEARING 1
Minimum Credits: 2
Maximum Credits: 3
Theoretical foundations of teaching speech to deaf/hard of hearing students.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

IL 2556 - SP DVLP-DEAF/HARD OF HEARING 2
Minimum Credits: 2
Maximum Credits: 2
Techniques for developing communication skills and speech reading and for correcting speech in deaf/hard of hearing students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2557 - AMERICAN SIGN LANGUAGE 1
Minimum Credits: 3
Maximum Credits: 3
Designed to develop vocabulary and receptive and expressive skills in American sign language.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2558 - AMERICAN SIGN LANGUAGE 2
Minimum Credits: 3
Maximum Credits: 3
Designed to develop vocabulary and receptive and expressive skills in American sign language.
IL 2559 - AUDTRY/VISL MGT DEAF/HARD HRNG
Minimum Credits: 2
Maximum Credits: 2
Covers interpretation of audiograms, acoustics of classrooms, auditory visual perception of spoken language, assistive listening devices.

IL 2560 - ERLY ED CHLDREN WITH DISABLTYS
Minimum Credits: 3
Maximum Credits: 3
Provides an overview of early intervention, including its historical and legal foundations, efficacy, rationale, basic service delivery systems, environmental and biological risk factors, effects of disability on development, and current practices, trends, and issues.

IL 2561 - PROGRMMNG IN ERLY INTERVENTION
Minimum Credits: 3
Maximum Credits: 3
Focuses on the development of curriculum and instructional strategies for children under five years of age with disabilities and their implementation in a variety of settings, including inclusive classrooms, home-based programs, and clinical settings.

IL 2562 - ASESMNT YOUNG CHLDRN DISABLTY
Minimum Credits: 3
Maximum Credits: 3
Focuses on the identification and assessment of children with disabilities under five years of age and the use of assessment information to plan programs for children in partnership with families and other professionals.

IL 2563 - SEM: INCLUSION EARLY CHILDHOOD
Minimum Credits: 2
Maximum Credits: 3
This interdisciplinary course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development, and instructional strategies for creating early childhood programs that meet the needs of children with and without disabilities. The course will include simulations in which students solve real life problems with individuals from other disciplines.

IL 2564 - APLD BHVRL ANAL 1: FUNDMS 1
Minimum Credits: 3
Maximum Credits: 3
This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.
IL 2565 - APLD BHVRL ANAL 2: FUNDMS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals I course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2566 - ABA 3: APPLCS IN DEVELM DISABS
Minimum Credits: 3
Maximum Credits: 3
This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and IL 2565

IL 2567 - APPLIED BEHAVIOR ANALYSIS 4
Minimum Credits: 3
Maximum Credits: 3
This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and IL 2565

IL 2568 - ABA 5:CUR DEVELOPMENTS IN ABA
Minimum Credits: 3
Maximum Credits: 3
This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: IL 2564 and IL 2565

IL 2569 - APPLIED BEHAVIORAL ANAL PRAC
Minimum Credits: 1
Maximum Credits: 3
The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACH) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as well as to seek support and ideas from classmates.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

II 2570 - PROGRAMS AND SERVICES SEMINAR
Minimum Credits: 2
Maximum Credits: 2
Course covers knowledge about community, educational, residential, employment and related services for youth and adults with severe disabilities.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

II 2571 - ECOLOGICAL-BEHAVRXL ASSESSMNT
Minimum Credits: 2
Maximum Credits: 2
Course covers theory, methods, and procedures for ecological behavioral assessment for persons with severe disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

II 2572 - SYSTEMATIC INSTRUCTION
Minimum Credits: 2
Maximum Credits: 2
Course covers information and competencies for providing instruction and supports to persons with severe disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

II 2573 - COMMUNITY LIVING
Minimum Credits: 2
Maximum Credits: 2
Course covers informational and performance competencies related to independent community living support for persons with severe disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

II 2574 - SUPPORTED EMPLOYMENT
Minimum Credits: 2
Maximum Credits: 2
Course covers informational and performance competencies related to supported employment for adolescents/adults with severe disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

II 2575 - TRANSTN PROC SP EDUC PROCDR
Minimum Credits: 3
Maximum Credits: 3
Course covers critical information related to transition and special education services for students with disabilities in secondary settings
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

II 2576 - PROGRAM DESIGN
Minimum Credits: 3
Maximum Credits: 3
This course covers design of educational and related services and supports for persons with severe disabilities.
Academic Career: GRAD
IL 2577 - BRIDG CRSE:BCBA CURR EDTN 3-4
Minimum Credits: 2
Maximum Credits: 3
This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2578 - ABA 6: ETHICS
Minimum Credits: 3
Maximum Credits: 3
This is one of six courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on ethical practices involving the application of principles and procedures covered in ABA I through ABA V. The ethical practices relate to working with individuals with autism spectrum disorders, developmental disabilities and other behavioral/emotional disorders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD
Course Requirements: PREQ: IL 2564 and IL 2565

IL 2579 - TRMNT FIDELITY & CCHNG: AUTISM
Minimum Credits: 3
Maximum Credits: 3
This course will present information on the strategies used to monitor and enhance the accuracy and the delivery of evidence-based interventions for children with autism spectrum disorder (ASD) and other disabilities. The course will focus on defining intervention and implementation fidelity, exploring examples of the documentation, planning and assessment of treatment fidelity for evidence-based interventions, and learning skills for peer, parent, and supervisory coaching.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD
Course Requirements: PREQ: IL 2505

IL 2581 - SPEC TOPC-ED CHLD VISL DSBLTY
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
IL 2582 - WORKING WITH FAMILIES
Minimum Credits: 3
Maximum Credits: 3
Course focuses on understanding family systems theory and its application to early intervention, including the development of individualized family service plans. Family centered practices, cultural, ethnic, racial, educational, and economic diversity among families, and accessing community resources will be covered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 2584 - SPECIAL TOPICS - DEAFNESS
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators focused on areas with deaf education program.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: IL 2509 and 2511 and 2512 and 2513 and 2522 and 2591 and 2571; CREQ: IL 2517; SBPLAN: Ed of Sts w/Mentl & Phys Disab; MIN CUM GPA: 3.0

IL 2585 - TEC-BASD INTERVENTIONS: AUTISM
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the application of assistive technology to interventions for children with autism spectrum disorder (ASD) and other non-physical disabilities. The course addresses a) the principles of assistive technology (at), b) assessment of students for at, and c) the at continuum of low, mid, and high technology. A range of hardware (E.G., ipad, computers, specialized speech generating devices), software (E.G., imovie, board maker), and interventions (E.G., Video modeling, alternative and augmentative communication strategies, academic skills) will be considered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD
Course Requirements: PREQ: IL 2505

IL 2586 - AUTISM INTRV SCH & COMNY SET
Minimum Credits: 3
Maximum Credits: 3
This course is designed to prepare graduate students to teach school-aged students with ASD in a range school and community settings, with a particular focus on interventions and strategies appropriate for inclusive classrooms. Through readings, presentations, class discussions, and activities, students will acquire information and skills needed to implement evidence-based interventions approaches to assessment and intervention for students with ASD. As part of the final project, students will develop and deliver an assessment-based intervention for one of the suggested outcome areas.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD
Course Requirements: PREQ: IL 2505

IL 2587 - SPECIAL TOPICS - INCLUSION
Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

IL 2588 - SPEC TOPICS - VISION STUDIES
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### IL 2589 - VI/O&M/ERLY INTRODUCTION SEMINAR

**Minimum Credits:** 1  
**Maximum Credits:** 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### IL 2590 - RESEARCH SEMINAR IN SP ED

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides students with competencies necessary for utilizing and evaluating research in special education. Focus is on the critical analysis of research and examination of methodological and ethical considerations. Students in M/PD sections conduct single subject research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### IL 2591 - LITERACY TUTORING

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

### IL 2592 - COLLABORATION PRACTICUM

**Minimum Credits:** 1  
**Maximum Credits:** 3  
The student under faculty supervision participates in the design, implementation, and/or evaluation of a curriculum project in the student's professional field.

**Academic Career:** GRAD  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

### IL 2593 - FIELD EXPERIENCE IN SPECIAL EDUC

**Minimum Credits:** 1  
**Maximum Credits:** 3  
Practicum in topics related to teaching special education students. Topics include an overview of various models of instruction and the philosophical basis for the presence, participation, and inclusion of students in the mainstream of public education. Integrated field observations are a component of the course as well.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

### IL 2594 - INTDIS LDRS SEM DEVELOPMENTAL DISAB 1

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.
IL 2595 - INTDIS LDRS SEM DEVELM DISAB 2
Minimum Credits: 1
Maximum Credits: 3
This seminar, a continuation of the interdisciplinary leadership seminar in developmental disabilities 1, provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, & policy/legislation. Leadership is considered.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2596 - INTERNSHIP IN SPECIAL EDUCATN
Minimum Credits: 1
Maximum Credits: 3
An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad SN Basis

IL 2597 - INDEPENDENT STUDY IN SP ED
Minimum Credits: 1
Maximum Credits: 6
The student registers for this when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

IL 2598 - DIRECTED STUDY IN SP ED
Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2599 - MASTER'S THESIS RESEARCH SP ED
Minimum Credits: 1
Maximum Credits: 6
The student prepares a proposal for an original research project, has that project approved by an appropriate faculty thesis committee, completes the proposed project, and defends the completed report in a thesis final oral examination.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 2600 - COORDINTN METH IN COOPERTV ED
Minimum Credits: 3
Maximum Credits: 3
This course involves the study of principles, laws, practices, and problems encountered in the coordination of cooperative vocational education. Students learn techniques to recruit, place, monitor, and evaluate cooperative education students in school-based training sites.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2630 - CURRICULUM & INSTRUC IN BUS ED
Minimum Credits: 3
Maximum Credits: 3
Students develop strategies for implementing plans of instruction for an office technologies class on the secondary level. Topics such as curriculum, evaluation, and achievement standards are addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2635 - TRENDS & ISSS IN BUSINESS EDUC
Minimum Credits: 3
Maximum Credits: 3
Written reports on issues taken from course literature are prepared, submitted, and discussed in class meetings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2639 - SCHL/INDSTRY PARTNRSHPS VOC ED
Minimum Credits: 3
Maximum Credits: 3
Students will examine and apply public relations concepts and activities in vocational education. These concepts and activities are used to promote cooperation and participation among vocational educational programs and internal/external publics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2662 - ISSS & TRENDS IN MARKETING ED
Minimum Credits: 3
Maximum Credits: 3
This course is an analysis of the current philosophies of an expanded concept in marketing and distributive education. The student will examine current teaching methods and modern marketing technology as related to teaching marketing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2690 - RESEARCH SEMINAR ONLINE
Minimum Credits: 3
Maximum Credits: 3
This is a required three-credit course for graduate level students in education. It offers opportunities for students to investigate research questions, collect and interpret data and present research documents. Overall, students will be expected to write and submit a research proposal, conduct the research described in the proposal, and use information in the proposal to write a research paper that describes their research. Students will also write an abstract of their research paper.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 2691 - SUPV RSRCH - EARLY CHILDHOOD
Minimum Credits: 1
Maximum Credits: 3
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2697 - INDEPNDT STUDY IN VOCATNAL ED
Minimum Credits: 1  
Maximum Credits: 9  
The student registers for this when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.  
Academic Career: GRAD  
Course Component: Independent Study  
Grade Component: Grad LG/SU3 Basis

**IL 2698 - DRCTD STUDY - EARLY CHILDHOOD**
Minimum Credits: 1  
Maximum Credits: 9  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad SN Basis

**IL 2700 - SPECIAL TOPICS**
Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues in or about the arts that are of concern to educators.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

**IL 2701 - FIELD SEMINAR: PRIMARY PLUS**
Minimum Credits: 1  
Maximum Credits: 1  
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

**IL 2702 - SPEC PROJ FOREIGN LANG EDUC MS**
Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

**IL 2703 - SPECIAL TOPICS IN READING**
Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SU3 Basis

**IL 2705 - PRACTICUM-ELEMENTARY EDUCATION**
Minimum Credits: 1  
Maximum Credits: 1  
School-based practicum for teacher certification candidates. For one day a week, students observe and assist master teachers, conduct case studies, and complete methods course assignments.  
Academic Career: GRAD
Course Component: Practicum  
Grade Component: Grad HSU Basis

**IL 2706 - TEACHING LAB-ELEMENTARY**
Minimum Credits: 1  
Maximum Credits: 1  
Laboratory practicum for teacher certification candidates. Provides opportunities to observe and practice basic teaching skills, analyze videotaped teaching episodes, and receive feedback from instructors and peers.  
Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad HSU Basis

**IL 2707 - FIELD SEM IN EARLY CHLDHOOD ED**
Minimum Credits: 1  
Maximum Credits: 1  
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade

**IL 2708 - FIELD SEMINAR IN ELEMNARY EDUC**
Minimum Credits: 1  
Maximum Credits: 2  
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad Letter Grade

**IL 2709 - FLD SEMINAR IN SECONDARY EDUC**
Minimum Credits: 1  
Maximum Credits: 2  
Students participate in district-based in-service activities and complete field-based assignments aimed at promoting an understanding of the professional, personal, social, and political dimensions of schools.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad Letter Grade

**IL 2710 - ADV SOCIAL STUDIES METHODS**
Minimum Credits: 3  
Maximum Credits: 3  
This course explores and examines theoretical discourses and advanced methods and materials for improving social studies instruction in the secondary (grades 7-12) social studies classroom. Course content, procedures, and activities focus on effective strategies for engaging and teaching learners from diverse backgrounds and developmental levels. Approaches include investigation and analysis of constructionist ideas, student empowerment, historical thinking, historiography, global citizenship, real-world connectedness, and various technologies as they apply to teaching and learning in the secondary social studies classroom.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Letter GRD

**IL 2711 - SPEC TOPICS - FORGN LANG EDUC**
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Letter GRD
II. 2712 - HISTL THINKG & HISTORIOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
This online course is an examination of teaching strategies and techniques related to historical thinking and historiographical analysis in the secondary social studies classroom. Course participants will investigate recent research supporting historical thinking and historiographical analysis strategies and techniques, engage in various projects intended to increase their knowledge and skills in these strategies and techniques, and explore creative ways to enrich their own classroom instruction by getting students engaged in "doing" history.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD

II. 2720 - PRACTCM IN SEC ENGLISH 1
Minimum Credits: 1
Maximum Credits: 1
Practicum in secondary English language arts 1 teacher candidates engage in 20 hours of fieldwork in one or two secondary school sites weekly. Fieldwork includes working with individual and small groups of students, collaborating with mentor teachers to design lessons, supporting instruction in the classrooms, and observing classroom instruction. Assignments and weekly meetings are designed to help teacher candidates recognize and apply current research on effective English language arts instruction and theories of adolescent learning and development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

II. 2721 - PRACTICUM IN COMMUNICATIONS
Minimum Credits: 2
Maximum Credits: 2
This pre-student teaching activity is designed to provide prospective teachers learning experiences in the secondary high school classroom where they will observe and assist a model classroom teacher.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

II. 2722 - PRACTICUM IN FOREIGN LANGUAGE
Minimum Credits: 1
Maximum Credits: 3
Prospective teachers experience the reality of teaching the foreign languages in a public school setting.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

II. 2723 - PRACTCM IN SEC SOCL STDS 1
Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in 20 hours of fieldwork in one or two secondary school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Assignments and weekly meetings are designed to support teacher candidates' abilities in two areas as they move towards high-engagement social studies instruction: recognizing and applying adolescent learning and developmental theory, and understanding the role of social context surrounding the classroom.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

II. 2725 - PRACTCM IN SEC ENG EDUCATION
Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.
IL 2727 - TEACHING LAB - FORGN LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop students' teaching techniques and procedures in a peer teaching environment.

IL 2728 - TEACHING LAB - SOCIAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
The teaching laboratory serves to complement the instruction and curriculum courses in social studies education. The lab provides a practical means by which students can practice the teaching strategies and tactics learned during course work in a model classroom setting.

IL 2729 - PRAC IN K12 FRGN LANG 1
Minimum Credits: 1
Maximum Credits: 1
In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction. In this course, students engage in 20 hours of fieldwork in one or two school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in classrooms, collaborating with mentor teachers to design lessons, and careful observation of instruction. In addition to fieldwork, students engage in weekly assignments and meetings that support students' ability to apply theory and current methodology in school context and reflect critically on their own instruction.

IL 2740 - PRACTICUM IN SECONDARY MATH
Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in fieldwork in a secondary school site daily. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Teacher candidates will also be responsible for independent instruction. Teacher candidates will reflect critically and productively on their own instruction. Teacher candidates are responsible for timely submission of all required certification paperwork.

IL 2741 - PRAC IN SEC SCI 1
Minimum Credits: 1
Maximum Credits: 1
Teacher candidates engage in 20 hours of fieldwork in one or two secondary school sites weekly. Fieldwork includes tutoring individual students, supporting instruction in secondary classrooms, collaborating with mentor teachers to design and/or set up lessons, and careful observation of classroom instruction. Assignments and weekly meetings are designed to support teacher candidates' ability to recognize and apply adolescent learning and developmental theory in the school context.

IL 2742 - TECHNOLOGY WRKSHP MATH TEACHRS
Minimum Credits: 3
Maximum Credits: 3
Students will become familiar with the use of technology in the mathematics classroom. This may include databases, spreadsheets, certain commercial software packages, and the use of graphing calculators in the classroom.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2746 - TEACHING LAB - MATHEMATICS
Minimum Credits: 1
Maximum Credits: 3
Students learn the art of lesson presentation.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 2747 - TEACHING LAB - SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Involves preparing, teaching and evaluating secondary science lessons in peer group and laboratory school settings; videotape assessment techniques are utilized and experiences are integrated as part of the methods course.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

IL 2749 - TECHNOLOGY IN SCIENCE EDUCATN
Minimum Credits: 3
Maximum Credits: 3
A hands-on microcomputer laboratory course devoted to the learning of science content, process skills and relevancy to social issues enhanced by science. Hardware and software solutions for direct science instruction, classroom management, instructional support, and communication are studied.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2750 - TECHNIQUES ORIETN & MOBLTY 1
Minimum Credits: 3
Maximum Credits: 3
This first part of this two part methods course, which is offered on-campus in summer two, is designed to introduce the student to the elementary level travel skills (e.g., Use of human guidance) and procedures (e.g., Sensory development) used when teaching O&M to individuals who are blind or visually impaired who may also possess additional disabilities. Students begin their knowledge of teaching travel skills indoors and gradually transition to the introductory level outdoor environment. Students wear simulation materials designed to fully or partially occlude vision while traveling.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2751 - METHODS & MANAGEMENT IN SP ED
Minimum Credits: 3
Maximum Credits: 3
This course is designed for students entering the teacher preparation program in mental and physical disabilities. Instruction concerning how to prepare for instruction, write lesson plans, and implement lessons is provided. Field observations and micro-teaching experiences are also provided.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2752 - TECHNIQUES ORIETN & MOBLTY 2
Minimum Credits: 3  
Maximum Credits: 3  
This second part of a two part methods course, which builds upon the knowledge gained in IL 2750, is offered on-campus in summer two. It introduces the student to developing instructional strategies for teaching more complex O & M travel skills (e.g., Use of public transportation systems) and procedures (e.g., Use of tactile maps) to individuals who are blind or visually impaired who may also possess additional disabilities who travel in a variety of indoor and outdoor environments. The course also covers teaching strategies for serving the O & M needs of children as well as adults through simulated teaching activities.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

**IL 2753 - O&M FOR DIVERSE POPULATIONS**  
Minimum Credits: 3  
Maximum Credits: 3  
The focus of this online course is on designing assessment and instructional strategies for various populations of individuals who are blind or visually impaired. Specific populations to be examined include: persons with low vision, individuals with dual sensory loss (deaf blindness), infants and preschoolers, school-aged students, individuals with cognitive impairments, students with cortical visual impairments, and dog guide users.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Letter GRD

**IL 2755 - PROFESSIONAL ISSS SEMINAR-MPD**  
Minimum Credits: 2  
Maximum Credits: 2  
This seminar is designed to develop professional skills needed by all teachers and to provide a forum for exploration of controversial issues in special education. Additional topics include a review of recent court cases and how they may impact the practice of special education, as well as an update on Pennsylvania rules and regulations guiding special education.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad LG/SU3 Basis

**IL 2780 - AUTISM ENDORSEMENT PRACTICUM**  
Minimum Credits: 3  
Maximum Credits: 3  
As part of this practicum course, students will get practical experience working with students with ASD of various age groups in different educational and community settings. They will also get an in-depth experience at their primary practicum placement by working closely with a mentor teacher and a University supervisor on a variety of application-based projects. All practicum activities will be completed at an approved practicum site (E.G., Autistic support classroom in a public school; general education classroom). Students will acquire competencies related to assessment, intervention, and collaboration with professionals, families, and community organizations. The practicum meetings will be used for group supervision and sharing of the experiences, ideas, and challenges with a team of peers.  
Academic Career: GRAD  
Course Component: Lecture

IL 2901 - NATURE OF THE YOUNG CHILDREN
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the nature of the child so as to enable the student to develop an informed philosophical frame work with which to make educational considerations about the role of the teacher. Students will read from a variety of sources to establish a knowledge base with regard to the young child. Practical, guided activities will enable students to develop the basis for subsequent work in theoretical and practical venues with regard to the young child, the development of self-esteem, the role of play in development, the teacher's observational skills and teaching philosophy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2902 - TEACHING PRIMRY-AGED CHLDREN 1
Minimum Credits: 3  
Maximum Credits: 3  
This course is constructivist in nature. Students focus on general and specific issues dealing with constructivist theory and practice, behavior management and the application of technology. It is designed to provide students the necessary background to effectively teach and manage their own classrooms at the primary grade level.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2903 - TEACHING PRIMRY-AGED CHLDREN 2
Minimum Credits: 3  
Maximum Credits: 3  
The course is constructivist in nature. Students focus on general and specific issues dealing with constructivist theory and practice, specifically content and lesson development in math, science, and social studies in the primary grade level.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2904 - TCH YNG CHLD INCLUSIVE CLSSRM
Minimum Credits: 5  
Maximum Credits: 5  
This course provides the foundation for creating optimal developmentally appropriate learning environments for all young children in center-based programs, with particular attention to the inclusion of young children with disabilities. The course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development and instruction, and curricular adaptations and strategies for meeting the needs of all children in inclusive early childhood settings.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2905 - TCH INFNTS, TODDLERS & PRESCHL
Minimum Credits: 3  
Maximum Credits: 3  
This course provides the foundation for teaching infants, toddlers, and preschoolers, in group settings in centers outside the home. Topics include developmentally appropriate curriculum and instruction, program design and implementation, legal compliance and program enhancement, family and community relations, professionalism, and advocacy.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade

IL 2906 - COMMUNITY RESOURCES
Minimum Credits: 2  
Maximum Credits: 3  
This interdisciplinary course focuses on the role of the professional in supporting families of young children with and without disabilities by linking them with formal and in formal community resources. The course explores rationale; family-centered principles; models and practices for supporting families; and considerations in the development of community resources. It surveys available resources through guest speakers, on-site visits, and the development of a resource directory.  
Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad Letter Grade

IL 2907 - COLLAB PARTNRSHPS FAML CMMNTYS
Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the role of the professional in supporting families of young children (pre-k - grade 4), including families of children with disabilities and other diverse characteristics. Students will learn about family systems, including how family characteristics affect the development of children, how to communicate, interact, and collaborate with families in school settings, and how to link families with formal and informal community resources.
**IL 2908 - SEMINAR IN EARLY CHILDHOOD EDUC**
Minimum Credits: 3
Maximum Credits: 3
Graduate level introduction to the technical and political forces that influence the conduct, development and assessment of early childhood provisions. Emphasis is given to the practical considerations of program development, community structure, and the early childhood education relationship to elementary education.

**IL 2910 - EARLY CHILDHOOD EDUC PROGRAMS**
Minimum Credits: 3
Maximum Credits: 3
For all early childhood students. Course content focuses on current national and international trends and practices in designing, implementing, evaluating, adapting, and administering educational programs for young learners, ages 0-8, in secular and non-secular learning environments.

**IL 2911 - ARTS EARLY CHILDHOOD PROGRAMS**
Minimum Credits: 3
Maximum Credits: 3
Coursework combines three strands as a basis for planning programs for early childhood education--these include knowledge of children's development in the arts, knowledge of the arts and knowledge of appropriate teaching strategies and planning models.

**IL 2912 - MGNG ERLY CHLDHOOD ED SETTINGS**
Minimum Credits: 3
Maximum Credits: 3
Course requires potential directors to formulate philosophy and goals, program objectives, personnel and staff development. Licensing, budgeting, center evaluation, parent education are considered. Team leadership, professionalism and teacher assessment are discussed. Research issue papers and comprehensive management models are developed.

**IL 2914 - MODELS OF TEACHING**
Minimum Credits: 3
Maximum Credits: 3
Basic graduate course on alternative models of teaching different subjects, grade levels, and learner populations. Includes opportunities to observe, analyze, and practice selected models in classroom settings. Also covers conceptual and structural models of teacher education that enable teachers to develop a repertoire of best practices.

**IL 2915 - INTERGENERTNL PROGS EDUCL SET**
Minimum Credits: 3
Maximum Credits: 3
Course will examine a variety of issues and practices related to the preparation, implementation, and impact of school based programs that involve interaction between students and the community's older adults.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2920 - SECONDARY SCHOOL CURRICULUM
Minimum Credits: 3
Maximum Credits: 3
Selected curricular patterns will be studied in terms of philosophy, offerings and achievements followed by an analysis of various models for implementing change.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2927 - LEGL & LEGISLTV FOUNDS OF SPE
Minimum Credits: 2
Maximum Credits: 2
This course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2928 - WEB LGL & LEGISLTV FDS SP ED
Minimum Credits: 3
Maximum Credits: 3
This web-based course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 2929 - SCHOOL LAW FOR TEACHERS
Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth study of the legal rights and responsibilities of the classroom teacher, and examines such legal concepts as negligence, teacher suspension, teacher dismissal, and freedom of speech.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2930 - THE ELEMNARY SCHOOL CURRICULM
Minimum Credits: 3
Maximum Credits: 3
An advanced level course which considers current trends and practices in curriculum decision making and planning for elementary school professionals. Students will learn useful techniques in formulating and justifying criteria for the evaluation of a curriculum design and teaching plan.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2936 - ACHIEVEMENT MOTIVATION
Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to examine the 'fit' between the theoretical models commonly associated with the concept of achievement motivation and brain research data that indicates that the individual him/herself can play a vital role in establishing his/her own level of academic achievement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 2943 - SCI & SOCL STDY ELEM/MIDL SCHL
Minimum Credits: 3
Maximum Credits: 3
Course provides prospective elementary teachers with knowledge and skills to teach science and social studies as a separate course of study and as
integrated instructional units.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2948 - SPEC TOPC-EARLY CHILDHOOD EDUC
Minimum Credits: 1
Maximum Credits: 4
A flexible curriculum oriented to special research topics of interest to faculty or to current issues of concern to educators. Focused on areas within
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 2949 - SPEC TOPICS-ELEMENTARY EDUCATN
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2950 - SPEC TOPICS-SECONDARY EDUCATN
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 2961 - INFORMATION TECHNOLOGY IN ED 1
Minimum Credits: 3
Maximum Credits: 3
Use of microcomputers in K-12 classrooms/laboratories to teach educational concepts/processes. Demonstrate entry level competence in basic or
logo computer language. Evaluate, select, and recommend for purchase microcomputer hard ware/software. Recognize philosophical, ethical, and
legal implications for microcomputer use in educational settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2962 - INFORMATION TECHNOLOGY IN ED 2
Minimum Credits: 3
Maximum Credits: 3
Demonstrate integrated management software; evaluate, select, integrate courseware with curriculum in classroom learning environment. Utilize
communication systems to access, retrieve, and store information. Produce instructional resources for class use. Use microcomputer for direct
laboratory measurement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 2983 - INDIV DIFFERNC IN THE CLSSROOM
This course focuses on current trends, issues, and practices in adapting instruction to learning variations based on cognitive, cultural, social, and developmental needs of learners. For students in teacher education and beneficial to students enrolled in programs in the allied professions.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 2990 - RSRCH SEMINAR FOR MAT INTRNS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The student proposes, carries out, and prepares a careful report of a study Germane to the student's professional role.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**IL 2991 - SUPRVSD RESEARCH ELEMENTARY ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student works collaboratively with a sponsoring faculty member in the carrying out of a research project.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad HSU Basis

**IL 2992 - CURRICULUM PRACTICUM ELEM ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
The student under faculty supervision participates in the design, implementation, and/or evaluation of a curriculum project in the student's professional field.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

**IL 2997 - INDEPENDENT STUDY ELEMENTARY ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
The student registers for this when the student must maintain active registration and needs to extend work on an un completed task or project from a previous term or when preparing for special examinations.  
**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

**IL 2998 - DIRECTED STUDY ELEMENTARY ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SNC Basis

**IL 2999 - MASTER THESIS RESEARCH ELEM ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
The student prepares a proposal for an original research project, has that project approved by an appropriate faculty thesis committee, completes the proposed project, and defends the completed report in a thesis oral examination.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis
IL 3001 - DIL DOCTORAL SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This seminar is intended to build a learning community among doctoral students from various programs in I & L. Doctoral students in their first year are especially encouraged to enroll. Part of the course will be focused on the nuts and bolts of getting a doctoral students research program up and running. Part of the course will be discussions of emerging themes in educational research. The thematic portion of the seminar focuses on issues related to assessment. Many classes will involve guest lectures from other I & L faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 3002 - CLASSROOM DISCOURSE
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to introduce students to the theoretical underpinnings, methodological concerns, and pedagogical implications of the study of classroom discourse - the study of who can say what to whom, when and where, for what purposes, under what conditions, and with what outcomes in a range of classroom contexts. The course critically reviews empirical research on classroom discourse (both recent and classical investigations), and covers the accepted methods for conducting research on classroom discourse including different approaches to collecting, recording, and analyzing both verbal and nonverbal discourse. A range of theoretical approaches to analyzing discourse are also covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3003 - RESEARCH INTERVIEWING
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce doctoral students to the theories and methodologies of research interviewing in the social sciences. The course introduces students to aspects of research interviewing such as designing research questions that can be answered through interview data, identifying potential participants, creating interview protocols, transcribing interviews, coding interviews, and recognizing the role/bias of the interviewer. The course will also teach students how to critically analyze the representation and use of interview data in educational research. Students are expected to read published studies, collect and analyze data from interviews, and critically evaluate various approaches in light of their own research questions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3004 - IDENTITY EDUCATIONAL SETTINGS
Minimum Credits: 3
Maximum Credits: 3
Recent approaches to conceptualizing and studying identity in complex social environments will be reviewed through course readings and discussions. The historical background of this work will also be addressed. Particular attention will be paid to the identity development of students who are often marginalized in educational settings. Qualitative and interpretive methods for studying identity will also be covered. Students will be expected to actively participate in discussions and complete a term project (either a review of the literature or a small-scale study of identity formation).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3005 - INT'L PERSPS TCH CURR & LRNG
Minimum Credits: 3
Maximum Credits: 3
This course investigates curriculum and teaching practices from different nations and regions across the world. The primary objective is to give students an understanding of the ways that educational practices differ as a function of culture, economic conditions, and historical circumstances. In considering that cross-national borrowing of educational ideas and practices has long been important in the history of education, it is important to understand that borrowed ideas are interpreted and adapted to local contexts. This is especially true for classroom practices. The comparative approach taken in this course is designed to foster critical reflection about curriculum and teaching in the U.S.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
IL 3007 - CULTURE AND COGNITION
Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the field of cultural psychology and its perspective on the language and thinking of children, adolescents, and adults. Research conducted from a cultural psychology perspective will be reviewed and applied to the assessment of the thinking, speaking, and acting of people from diverse ethnic, racial, economic, and national backgrounds. Instructional practices that have been employed with multicultural populations will be reviewed and evaluated. Students will be expected to actively participate in discussions and complete several short papers and one in-class presentation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3010 - RESEARCH IN TEACHER EDUCATION
Minimum Credits: 3
Maximum Credits: 3
In this 3-credit graduate course, we will explore empirically and theoretically models for supporting teacher learning. We will draw from these models as we engage in a semester-long collaborative project to design a program that supports the learning of teachers preparing to work with middle-grades students. Course participants will also have an opportunity to design research studies targeted at measuring the efficacy of the designed learning context.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3011 - THE STUDY OF TEACHING
Minimum Credits: 3
Maximum Credits: 3
Advanced graduate course for students interested in research on teachers and teaching. Covers mainstream and alternative paradigms, including behavioral, cognitive, and ethnographic modes of pedagogical inquiry. Offers a critical analysis of recent studies on the nature of expertise in teaching, and new approaches to teacher performance assessment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3012 - CRITL RDG LANG LITRCY & CULT 1
Minimum Credits: 3
Maximum Credits: 3
This course is part of a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3013 - CRITL RDGS LANG,LITRCY&CULT 2
Minimum Credits: 3
Maximum Credits: 3
This course is the second in a two-course sequence that provides opportunities for students to engage in thoughtful and critical ways with important texts related to language, literacy, and culture. Examining works by influential theorists and researchers, students will consider such fundamental questions as: how are discussions of language, literacy, and culture deeply rooted in broader social and political contexts? How do issues of language, literacy, and culture relate to education?
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3014 - THRTCL PERSP LANG LITRCY CULT1
Minimum Credits: 3
Maximum Credits: 3
This course is the first in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**IL 3015 - THRTCL PERSP LANG LITRCY CULT2**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course is the second in a two-course sequence that provides opportunities for students to investigate important theoretical perspectives informing research in language, literacy, and culture. Students consider fundamental questions such as: how do theories shape the choice of research questions and methodologies? And how do theories provide frameworks for analyzing data?

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**IL 3016 - LLC PHD WRITING SEMINAR**

**Minimum Credits:** 1

**Maximum Credits:** 1

This course is a writing workshop designed to provide LLC Ph.D. students beyond their first year of study with regular feedback on their academic writing, including research articles, grant proposals, and milestone documents.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad HSU Basis

**IL 3048 - SPECIAL TOPICS: ELEMENTARY ED**

**Minimum Credits:** 1

**Maximum Credits:** 3

A flexible curriculum oriented to special research topics of interest to faculty and students or to current practice and policy issues of concern to teachers and teacher educators.

**Academic Career:** GRAD

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SU3 Basis

**IL 3052 - DSGN & DVLP-CURRCLM MATERLS 1**

**Minimum Credits:** 3

**Maximum Credits:** 3

Provides theory and practice in four primary analytical processes used in the design and development of curricular materials; goal analysis, deriving instructional strategies from learning theory, concept analysis and component analysis. Students apply these processes to their own discipline areas.

**Academic Career:** GRAD

**Course Component:** Independent Study

**Grade Component:** Grad LG/SNC Basis

**IL 3053 - DSGN & DVLP-CURRCLM MATERLS 2**

**Minimum Credits:** 3

**Maximum Credits:** 3

Students design a complete instructional unit, including objectives, methods, media, strategies, and an administrative plan for implementation and evaluation. They also develop step-by-step procedures for the design of instruction, based on theory learned in I&L 3052.

**Academic Career:** GRAD

**Course Component:** Independent Study

**Grade Component:** Grad LG/SNC Basis

**IL 3054 - DSGN & DVLP-CURRCLM MATERLS 3**

**Minimum Credits:** 3

**Maximum Credits:** 3

Applying the procedures developed in I&L 3053, student's complete a design project, which includes developing, learning hierarchies, selecting optimal testing points and writing appropriate tests. They also prepare a lesson rationale and develop one complete lesson.
IL 3070 - RSRCH ON INDIVDLZD INSTRUCTION
Minimum Credits: 3
Maximum Credits: 3
Students participate in a seminar on problems in individualized instruction at all levels in education. Applications of principles and strategies of individualized instruction in the students' areas of interest are emphasized.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

IL 3071 - LEARNING STYLES
Minimum Credits: 3
Maximum Credits: 3
The role of individual style in learning is analyzed and measurement techniques are examined. Results are interpreted as they influence pedagogy and curriculum.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3073 - PRACM & SEM: INSTRNL SUPRVSN
Minimum Credits: 3
Maximum Credits: 3
Students participate in a practicum and seminar to develop and demonstrate competence in observation, analysis, and conferences related to teaching and learning behaviors. Students will synthesize the general and research literature on instructional supervision and relate instructional supervision to staff development.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3078 - SUPRVSNG MENTORING PRESRV TCHR
Minimum Credits: 3
Maximum Credits: 3
This course is designed specifically for supervisors of interns and student teachers in the department of instruction and learning. The purpose of the course is to orient graduate students who supervise toward a practice of mentoring-based supervision.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 3087 - ACADEMIC GAME DESIGN
Minimum Credits: 3
Maximum Credits: 3
Participants in this course utilize the cognitive, affective, psychomotor and conative domains in the design of academic games for classroom use: K-12. Theoretical bases of academic games are examined, various roles of the game player are considered, and the multicultural aspects of games are explored.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 3089 - CURRICULUM ANALYSIS & DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Students submit an individual goal proposal to analyze or develop curriculum materials in an area of interest to them. Criteria for curriculum analysis and development are developed jointly by the students and the instructor. Students will relate curriculum to instruction and evaluate the appropriateness of instructional strategies to curriculum designs.
Academic Career: GRAD
IL 3091 - SUPERVISED RESEARCH - SCIENCE
Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grade SN Basis

IL 3098 - DIRECTED STUDY - SCIENCE
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grade SN Basis

IL 3099 - DCRL DISSER RES - SCIENCE
Minimum Credits: 1
Maximum Credits: 15
The student proposes and carries out a project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grade SN Basis

IL 3191 - DOCTORAL DISSERTATION RES-IDT
Minimum Credits: 1
Maximum Credits: 10
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grade SN Basis

IL 3200 - LEADERSHIP IN PROG DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
Leadership theory and research needed for supervision. Examines leadership style, psychology of teachers, teacher effectiveness, and specific steps in a process to effect change in curriculum and practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3210 - PSYCHLGCL RES & THRY IN READNG
Minimum Credits: 3
Maximum Credits: 3
This advanced course in reading theory and research is concerned with the nature of reading from an information processing orientation. The emphasis is on understanding the mental processes involved in reading.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3212 - HISTRY OF READNG RES & INSTRUC
Minimum Credits: 3
Maximum Credits: 3
Through this course students will learn about the historical movements influencing current practices in reading research and instruction. Student may demonstrate their understanding of the history and philosophy of reading instruction through written and oral projects.
IL 3215 - LANG/SOCL BASES-READNG/WRITING
Minimum Credits: 3
Maximum Credits: 3
Students will read and discuss research on the linguistic, social and cultural dimensions of reading and writing. Topics include theories of language, research methods and educational practices.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3216 - CURRICULUM ISSUES IN READING
Minimum Credits: 3
Maximum Credits: 3
Relates recent reading innovations to the broader context of the curriculum reform movement. Philosophical and theoretical questions regarding reading curriculum are addressed. Students will gain understanding of trends. They will also study research regarding effective curriculum.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3217 - THEORY & RES ADLT LITERCY EDUC
Minimum Credits: 3
Maximum Credits: 3
Adult literacy will be explored through perspectives in adult education, instructional theories, and student developed research projects.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3218 - ASSESSMENT IN READING
Minimum Credits: 3
Maximum Credits: 3
Addresses issues that grow out of study of the history of the testing movement, reading models, and related assessment practices. Also, political, social, economic, and psychological implications of reading assessment are explored.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3219 - ACADEMIC DISCOURSE
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the features of written academic discourse related to educational research. Specifically, this course provides opportunities for students to analyze articles and chapters for the purposes of distinguishing the various genres available to educational researchers, and identifying the structures of argument and explanation that those genres require. This analysis will be informed by theories of argumentation and discourse put forth by Aristotle and Toulmin whose work provides discourse-related conceptual frameworks and terminology.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3224 - APPL PRIN OF READNG SUPRVSN
Minimum Credits: 3
Maximum Credits: 3
Clinical practicum in which students demonstrate their supervisory skills, with the supervision and guidance of a university faculty member. Experiences pull together the various threads of the reading supervisory program.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
IL 3225 - SPECIAL TOPICS - READING
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3227 - SPECIAL TOPICS-ENGLISH EDUCATN
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3230 - HIST & PHIL OF ENGLISH EDUCATN
Minimum Credits: 3
Maximum Credits: 3
This advanced graduate seminar studies the historical, philosophical, and political contexts of the handful of major approaches to pedagogy and teaching of English.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

IL 3237 - RESEARCH IN CREATIVE DRAMA
Minimum Credits: 3
Maximum Credits: 3
Students study theories of major figures in creative drama such as Heathcote, Bolton, way, Courtney, and Mccaslin. They read and discuss articles presenting associated theoretical backgrounds and reporting original research in creative drama.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3240 - RESEARCH IN READER RESPONSE
Minimum Credits: 3
Maximum Credits: 3
This is an advanced graduate seminar designed to familiarize students with the various theories of reader response while testing those theories against their own responses to reading.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3241 - ADVANCED RESEARCH IN COMPOSITION
Minimum Credits: 3
Maximum Credits: 3
Course provides perspective on current basic and applied research on written composition and understanding of the methods, procedures, techniques, and metrics used in composition research; students read and critically analyze published research and propose and critically analyze their own research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 3248 - SPEC TOPC-LANGUAGE & LITERACY
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** GRAD

**Course Component:** Practicum

**Grade Component:** Grad LG/SU3 Basis

**IL 3250 - SPEC TOPC-FORGN LANGUAGE EDUC**

Minimum Credits: 3
Maximum Credits: 3

The course focuses on the development of language in children, primarily in those acquiring language in a monolingual setting. Research findings and theories of acquisition are discussed.

**Academic Career:** GRAD

**Course Component:** Directed Studies

**Grade Component:** Grad LG/SU3 Basis

**IL 3259 - SEMINAR IN FIRST LANG ACQUISTN**

Minimum Credits: 3
Maximum Credits: 3

Students will develop a sophisticated conceptual framework for conation (striving) as related to both curriculum and instructional/ supervisory practice. Relationships to other domains of learning will be explored.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**IL 3260 - HIST & THRY IN SOCL STDY EDUC**

Minimum Credits: 3
Maximum Credits: 3

Emphasis is placed upon the psychological and historical factors influencing the evolution of the field. Instructional theory and supervisory practices are analyzed as significant contributors to practice.

**Academic Career:** GRAD

**Course Component:** Seminar

**Grade Component:** Grad Letter Grade

**IL 3262 - RES CONATV DOMAIN - SOCL STUDY**

Minimum Credits: 3
Maximum Credits: 3

This course examines the role of education in preparing youth to comprehend our culturally diverse and increasingly interdependent global society. With the intensification of globalization, learning about the world has become increasingly valued and, at the same time, contested. The aim is to involve graduate students in the critical examination of the theory and practice of international education and world studies, the teaching and curricular fields concerned with global issues, events and perspectives. Education for global citizenship will be introduced as one contemporary lens for examining this issue.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**IL 3264 - INTL’ AND GLOBAL EDUCATION**

Minimum Credits: 3
Maximum Credits: 3

A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** GRAD

**Course Component:** Practicum

**Grade Component:** Grad LG/SU3 Basis

**IL 3266 - LEADERS IN SOCIAL STUDY EDUC**
IL 3267 - CHARACTER EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Emphasis will be placed upon the contributions of selected individuals to the field of social studies education. Historical research skills are required to engage in bibliographic analysis.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3268 - LEARNING STYLE RES: SOCIAL STUDY
Minimum Credits: 3
Maximum Credits: 3
Students will analyze learning style theory as it relates to student and professional growth. Interaction among various types will be explored.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3269 - SPECIAL TOPICS SOCIAL STUDIES
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in social studies education.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3270 - COGNITION AND THE ARTS
Minimum Credits: 3
Maximum Credits: 3
An advanced course in which theories and research in the arts and cognition are considered as a basis for understanding and studying the internal processes which are involved in response to art forms as well as in the production or performance of them.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3291 - SUPERVISED RESEARCH - READING
Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3292 - SUPERVISION PRACTICUM
Minimum Credits: 1
Maximum Credits: 3
The student under faculty supervision works with prospective, beginning, or experienced teachers in the development of their professional teaching skills. This practicum may be completed in conjunction with the professional year sequence or at approved educational sites.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 3296 - DC DISSER RES LANG LITRCY CULT
Minimum Credits: 1
Maximum Credits: 9
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: GRAD
Course Component: Full Time Dissertation
Grade Component: Grad HSU Basis

IL 3297 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 9
The student registers for this when the student must maintain active registration and needs to extend work on an in completed task or project from a previous term or when preparing for special examinations.

Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

IL 3298 - DIRECTED STUDY - READING
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3299 - DOCTORAL DISSER RES - READING
Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad LG/SU3 Basis

IL 3324 - THRY OF CMPTR-BASED INSTRUCTN
Minimum Credits: 3
Maximum Credits: 3
Students will review the research and theory associated with computer-based instruction program design; study related newer technology, such as response peripherals and authoring languages; evaluate the instructional effectiveness of programs; and explore a specialized area of computer-based instruction design research.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3325 - INTERACTIVE MULTIMEDIA
Minimum Credits: 3
Maximum Credits: 3
Focuses on the design and production of interactive video, CD-ROMs, and integrated media programs for instruction. Research and theory related to interactive computer based software design and multimedia applications are addressed. Students will develop a functioning multimedia package.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
IL 3342 - PROFESSIONAL ISSUES IN IDT
Minimum Credits: 3
Maximum Credits: 3
This seminar provides a forum where current issues in the field can be explored. Students identify and critically consider several social, economic, aesthetic and technological issues. Discussion takes place in a climate of intense critical debate.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 3349 - SPEC TOPOC-INSTRUCTNAL TECHNLGY
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3360 - PSYCHOLOGY AND MEDIA
Minimum Credits: 3
Maximum Credits: 3
Students learn to apply psychological principles to the design of instructional materials. Emphasis is on the design of a message or a series of messages to be presented through media. Students explore an in-depth research or design problem.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3365 - INSTRUCNL DESGN TEAM LEADERSHIP
Minimum Credits: 3
Maximum Credits: 3
This course covers theory about the design steps in the isd process. Students will lead a team which designs, produces, implements and evaluates an instructional system developed for a field site. Team leaders must ensure the quality and integrity of the design and design report.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

IL 3367 - DESIGN EXPERIMENTS EDUCL RES
Minimum Credits: 3
Maximum Credits: 3
Theory about R&D research in education. This seminar addresses instructional design and formative and summative evaluation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 3373 - RESEARCH ON TELEVISION EFFECTS
Minimum Credits: 3
Maximum Credits: 3
Examines the implications of findings on television related to cognitive processing; school achievement; home viewing environment; attitudes, behaviors, and beliefs, programming and utilization, and critical viewing for teachers, parents, and instructional technologists. Distance education via television will also be explored. Students will design and conduct a research study on television.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3374 - COMMUNICTN & INNOV THRY IN IDT
Minimum Credits: 3
Maximum Credits: 3
Explores areas of communication theory as they relate to instructional technology. Students develop communication skills including the ability to: design communication strategies based on research and theory, write about communication problems, and facilitate interpersonal communication. Emphasis is placed on practicing analytical and discussion skills related to diffusion of innovations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### IL 3391 - SUPERVISED RESEARCH IN ENGLISH
- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
The student works collaboratively with a sponsoring faculty member in carrying out a research project.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### IL 3392 - PRACTCM IN INSTRNL TECHNOLOGY
- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Doctoral students are placed in field sites where they are supervised by someone on-site and by a faculty member. A contract is negotiated among student, site supervisor and faculty member. Does not require a full-time commitment on the part of the student.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis

### IL 3396 - INTERNSHIP INSTRNL TECHNOLOGY
- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Doctoral students are placed at a field site where a professional mentor is provided and students are given professional responsibilities. A contract is negotiated between site supervisor and student. Requires a full-time commitment.

**Academic Career:** GRAD  
**Course Component:** Internship  
**Grade Component:** Grad LG/SU3 Basis

### IL 3397 - INDEPENDENT STUDY IN IDT
- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
The student registers for this when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

### IL 3398 - DIRECTED STUDY IN ENGLISH
- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

### IL 3399 - DOCTORAL DISSERTATN RES IN ENG
- **Minimum Credits:** 1  
- **Maximum Credits:** 18  
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis
IL 3446 - THE LEARNING OF SCIENCE
Minimum Credits: 3
Maximum Credits: 3
Students design modules of science experiences (K-12) demonstrating psychological applications based on contemporary and classical learning theories.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3447 - COMPARATIVE SCIENCE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Cross-national examination of the organization and content of science curricula and the national policies and goals for science education. Students select one nation, state or local district and prepare a critical analysis of its science curriculum and science education policies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

IL 3448 - SPECIAL TOPICS: SCIENCE ED
Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum opportunity oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3449 - SP TOPC-ADV STDY MATH/SCI RES
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum opportunity oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3450 - SP TOPC-ADV STDY MATH/SCI POLC
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum opportunity oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3451 - SPECIAL TOPICS: MATH
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3458 - PRACTICUM IN SCIENCE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Advanced practices displayed by trainees are examined and remodeled, where necessary, to deliver effective instruction, design strategies, implementation techniques, and valid and reliable evaluations of student progress.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 3470 - CURRICULM ISSUES IN MSE
Minimum Credits: 3
Maximum Credits: 3
In this course students will draw on the research literature and their own professional experiences to examine current practices of large- and small-scale assessment and teacher evaluation in mathematics and science education - both historically and in terms of their forms and purposes in today's educational and political climate. Current research and practice will be examined with respect to equity, theories of learning, methodology, and policy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

IL 3471 - INSTRNL ISSUES MATH SCI EDUC
Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to introduce students to current approaches to understanding and studying instructional practices in mathematics and science education. A historical perspective on the use of observations to document effective teaching will be reviewed. Students will be introduced to recent research on increasing students' agency, authority, and accountability through classroom discourse. Additional topics will include: the impact of high cognitive demand tasks on student learning and fostering equity in instruction. Students will apply course readings to the analysis of classroom artifacts and videotapes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3472 - HISTORY OF MATHEMATICS EDUCATN
Minimum Credits: 3
Maximum Credits: 3
The history of mathematics education will be presented as the story of changing issues and forces as they affect practices and goals. Various reform movements and their impact on instruction, curriculum, and teacher education will be examined.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3473 - RSRCH,DESIGN & METHD IN MATH ED
Minimum Credits: 3
Maximum Credits: 3
Current research in mathematics education will be analyzed and evaluated with respect to methodological issues. Literature reviews, research methodologies, and professional writing will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3474 - COLLG SCIENCE TEACHING PRACTCM
Minimum Credits: 3
Maximum Credits: 3
Issues associated with higher education in the science disciplines are explored to develop a perspective for the college science instructor. Supervised teaching handout preparation, cognitive patterns of the adult, and evaluation of learning are studied.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad HSU Basis
IL 3476 - ASSMNT & EVAL IN MATH & SCI EDUC
Minimum Credits: 3
Maximum Credits: 3
International, national, and local perspectives on mathematics assessment will be presented. Areas include classroom and large-scale assessment and curriculum and program evaluation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

IL 3484 - COGNITION IN SCIENCE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
This course features a review of theory and research in cognitive science as it applies to learning and instruction in science content areas. The use and representation of knowledge in science classrooms will be emphasized.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3485 - HIST/PHIL OF SCIENCE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Historical, educational, philosophical and nature of science issues are examined with respect to research and practice in science education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3486 - SCI CURRICULM ANAL & DEVELP
Minimum Credits: 3
Maximum Credits: 3
Curriculum forces shaping the scope and sequence of learning activities and resources are studied and adapted for current school science education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3487 - INDIVIDL & GRP SCIENCE INSTRUC
Minimum Credits: 3
Maximum Credits: 3
Design and development of teaching, learning, and assessment strategies to facilitate and maximize student learning in science with technology are explored. Relationship to distance learning is studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3488 - RESEARCH IN SCIENCE EDUCATION
Minimum Credits: 3
Maximum Credits: 3
Research reports, journal readings, articles and studies in science education are critically evaluated as to importance and magnitude.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3489 - STATSTCL COMPUTNG SCI ED RSRCH
Minimum Credits: 3
Maximum Credits: 3
Overview of statistical computing and analysis related to the researcher's problem under study is presented to maximize information flow and its eventual placement in the analysis section of the research study.
Academic Career: GRAD
IL 3491 - SUPERVISED RESEARCH - MATH
Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3492 - CURRICULUM PRACT MATH & SCI ED
Minimum Credits: 1
Maximum Credits: 3
The practicum student under faculty supervision works with prospective, beginning, or experienced teachers in the development of their professional teaching skills. This practicum may be completed in conjunction with the professional year sequence or at approved educational sites.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 3497 - INDEPENDENT STUDY MATH & SCI ED
Minimum Credits: 1
Maximum Credits: 9
Registration for independent study when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

IL 3498 - DIRECTED STUDY - MATH
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out a study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3499 - DOCTORAL DISSERTATION - MATH
Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3500 - FINANCING SPECIAL EDUCATION
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide prospective special education supervisors with an overview of the development and content of mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

IL 3501 - WEB FINANCING SPECIAL EDUCATION
This web-based course is designed to provide prospective special education supervisors with an overview of the development and content of mandated special education plans for school districts and intermediate units and to link those plans to the development of a comprehensive special education budget.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

### IL 3502 - ADV SEMINR LEARNING DISABLTYS
Min Credits: 1  
Max Credits: 1

This course has been designed to cover the most recent findings in the area of learning disabilities. Each term, the focus will allow for examination of a variety of topical areas to include but not be limited to: disorders of reading and language; academic strategy training; cognitive behavior modification; service delivery systems for learning disabled students; definition and identification of the learning disabled population.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### IL 3508 - ADVANCED SEMINAR: DEAFNESS
Min Credits: 3  
Max Credits: 3

Discussion of current readings and issues in deafness.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

### IL 3509 - ADV SEMINAR: ERLY INTERVENTION
Min Credits: 3  
Max Credits: 3

This course will acquaint students with the latest research in early education and will apply those findings to infants, toddlers and preschoolers with disabilities.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

### IL 3515 - ADV SEMINAR: VISION STUDIES
Min Credits: 1  
Max Credits: 3

Discussion of current research, intervention, and administrative issues related to services for persons with visual disabilities.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

### IL 3519 - LANGUAGE AND DEAF PEOPLE
Min Credits: 3  
Max Credits: 3

Provides an understanding of interpersonal communication, the effects of hearing loss on the development of oral and written English, current methods of developing communication skills, and American sign language and literature.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

### IL 3520 - PSYCHOSOCIAL ASPCTS OF DEAFNS
Min Credits: 3  
Max Credits: 3

Examines the psychosocial development of deaf people in relation to the hearing world and deaf culture.

**Academic Career:** GRAD
IL 3521 - RESEARCH IN DEAFNESS
Minimum Credits: 3
Maximum Credits: 3
An examination and evaluation of current research pertaining to deaf people. Reviews issues related to designing research in deaf related fields.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3526 - PRACTICUM IN COLLEGE TEACHING
Minimum Credits: 1
Maximum Credits: 3
Students prepare and teach a course under the direct supervision of a faculty member.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade

IL 3530 - SENSORY & PHYSICAL DIFFERENCES
Minimum Credits: 3
Maximum Credits: 3
First of a two-term sequence designed to update advanced students in areas of hearing, visual, physical, and severe multiple handicaps. Also included, historical and contemporary concepts criteria used to label various approaches to education and services and research trends.
Academic Career: GRAD
Course Component: Lecture
Grade Component: No Grade Required

IL 3531 - INSTRUCTIONAL PRACTICES IN SPE
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the most current research on instructional practices for students with disabilities and prepares the prospective supervisor for what should be happening in special education classrooms and in the provision of special education services.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3532 - CUR ISS & TRENDS IN SPEC EDUC
Minimum Credits: 3
Maximum Credits: 3
This course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3533 - ISS ASESMNT OF STUDNT W/DISAB
Minimum Credits: 3
Maximum Credits: 3
A review of the problems in assessment of skill levels and treatment effects in students with disabilities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3535 - GROUP DESIGNS IN SPECIAL EDUC
Minimum Credits: 3
Maximum Credits: 3
A review of research designs and research methodologies used in historical, descriptive, quasi-experimental, experimental, and qualitative research in the field of special education.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 3536 - SINGLE SUBJECT RESEARCH**  
Minimum Credits: 3  
Maximum Credits: 3  
Course covers single subject research methodology applied in studies involving exceptional populations.  
**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad Letter Grade

**IL 3537 - APPLIED BEHAVIOR ANALYSIS**  
Minimum Credits: 3  
Maximum Credits: 3  
This course covers principles and practices of applied behavior analysis procedures within educational and related service settings with children, youth and adults with disabilities. Topics include skill development, maintenance and generalization, and positive approaches to challenging behaviors.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**IL 3541 - WEB INSTRNL PRACTICES SP EDUC**  
Minimum Credits: 3  
Maximum Credits: 3  
This web-based course focuses on the most current research on instructional practices for students with disabilities and prepares the prospective supervisor for what should be happening in special education classrooms and in the provision of special education services.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 3542 - WEB CURRNT ISSS & TRENDS SP ED**  
Minimum Credits: 3  
Maximum Credits: 3  
This web-based course focuses on philosophical issues as well as research findings that impact on the education of persons with disabilities. Through critical analysis of assigned readings, the course facilitates a thorough understanding of various points of view on the education of students with disabilities.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 3548 - SPECIAL TOPICS-SPEC EDUCATION**  
Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within program.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 3563 - SEM: INCLUSION EARLY CHILDHOOD**  
Minimum Credits: 2  
Maximum Credits: 3  
This interdisciplinary course will cover the rationale, service delivery models, teaming components, family considerations, curriculum development, and instructional strategies for creating early childhood programs that meet the needs of children with and without disabilities. The course will include simulations in which students solve real life problems with individuals from other disciplines.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3564 - APLD BHVRL ANALYS 1: FUNDMS 1
Minimum Credits: 3
Maximum Credits: 3
This is the first in a series of five courses designed to meet the total academic requirements for board certification in behavior analysis. This course focuses on defining applied behavior analysis, selecting, assessing and evaluating behavior to change, and functional and experimental analyses of behavior change. The primary goal of this and the second course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3565 - APLD BHVRL ANALYS 2: FUNDMS 2
Minimum Credits: 3
Maximum Credits: 3
This is the second of five courses meeting the total course requirements for board certification as a behavior analyst. This course focuses on the development of new behaviors, various clinical interventions for decreasing interfering behavioral, and maintaining behavioral changes. The instructor presumes that students have limited or no background experiences with applied behavior analysis. Some students will have already completed the fundamentals 1 course. The primary goal of this and the first course is to provide students with a complete, accurate, and contemporary view of applied behavior analysis, and how functional analysis can be used to understand socially significant behaviors.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3566 - APPLIED BEHAVIORAL ANALYSIS 3
Minimum Credits: 3
Maximum Credits: 3
This is the third of five courses meeting the total academic requirements for board certification as a behavior analyst. This course focuses on the application of principles and procedures covered in IL 2564 and IL 2565 to a wide range of behavior disorders in individuals with developmental disabilities.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3567 - APPLIED BEHAVIORAL ANALYSIS 4
Minimum Credits: 3
Maximum Credits: 3
This is the fourth of five courses meeting academic requirements for board certification as a behavior analyst. This course focuses on etiology, analysis, assessment and intervention for mental health disorders of childhood and adolescence with an emphasis on an applied behavior analysis of disorders.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3568 - APPLIED BEHAVIORAL ANALYSIS 5
Minimum Credits: 3
Maximum Credits: 3
This is the fifth and final course meeting the total academic requirements for board certification as a behavior analyst. This course is specifically focused on a number of advanced topics, including verbal behavior, ethics, and parent training.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3569 - APPLIED BHVRL ANALYS PRACTICUM
The applied behavior analysis practicum provides students with intensive opportunities to learn and practice the various roles of a behavior analyst in a variety of different settings and to demonstrate competence as a beginning applied behavior analyst. Opportunities will include conducting assessment activities related to the need for behavioral interventions, designing, implementing and monitoring behavior analysis activities, overseeing implementation of behavior analysis programs by others, and other activities typically performed by a behavior analyst such as attending planning meetings and researching the literature to prepare a behavioral intervention. Each student will work closely with an assigned university supervisor and a mentoring professional from their individual placement site during the practicum. The practicum requires group seminar supervision, individual supervision, on-site observations, and small group supervision in amounts determined by the behavior analysis certification board (BACB) standards. The accompanying practicum seminar allows students to share experiences and knowledge gained in placement sites, as well as to seek support and ideas from classmates.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 3570 - SUPERVISION OF SPECIAL EDUCATN
Minimum Credits: 2
Maximum Credits: 3
This course examines ideas that lie at the intersection of research in mathematics and science education, curriculum research, and education policy. Specifically, the course will focus on research that is or will become relevant for the new policy climate created by the common core state standards (CCSS) and the next generation science standards (NGSS). We will begin by examining the CCSS and NGSS, analyzing their similarities and differences from past standards, and chronicling the assessment and curricular activities that have followed in their wake. We will then identify ways in which research conducted during past standards-based eras (e.g., The first and second cycles of NCTM standards; state standards in the NCLB era) can inform the direction of state and district policies surrounding curriculum and assessments.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 3571 - WEB SUPERVISION SPEC EDUCATN
Minimum Credits: 3
Maximum Credits: 3
This web-based course reviews problems and practices in special education supervision. Emphasis is placed in increasing interpersonal skills and developing technical skills in observing, planning and evaluating instruction.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

IL 3577 - BRIDG CRSE:BCBA CURR EDTN 3-4
Minimum Credits: 2
Maximum Credits: 3
This course is designed to update the competencies of edition 3 of the board certified behavior analyst curriculum to edition 4 of the curriculum so that individuals who took all or part of their ABA studies under edition 3 may sit for the national exam under the current edition 4. The course will address 10 topics such as direct instruction, incidental teaching, alternative and augmentative communication, MAND training, precision teaching. The required competencies (e.g. measurement and data analysis; change systems; implementation, management and supervision; intervention and behavior change considerations) will be distributed across each topic.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IL 3580 - POSTDOCTORAL STUDY IN SPEC EDUC
Minimum Credits: 1
Maximum Credits: 3
Advanced professional study and investigation utilizing the resources of the university for broadening and enriching general educational background and professional competence.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PREQ: IL 2505
IL 3583 - SPEC TOPC-SPECIAL EDUC RSRCH
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3587 - SPECIAL TOPICS - INCLUSION
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3588 - SPEC TOPICS - VISION STUDIES
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3590 - ADV RSRCH SEM IN SPECIAL EDUC
Minimum Credits: 3
Maximum Credits: 3
Designed to enhance the student's ability to use research methodology, techniques and/or procedures as tools for seeking answers to important research problems in special education. The course will focus upon the logistical problems encountered in the process of doing research.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

IL 3591 - SUPRVSD RSRCH IN SPECIAL EDUC
Minimum Credits: 1
Maximum Credits: 9
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

IL 3592 - SUPERVISION PRACTICUM IN SP ED
Minimum Credits: 1
Maximum Credits: 3
The student under faculty supervision works with prospective, beginning, or experienced teachers in the development of their professional supervision skills. This practicum may be completed in conjunction with the professional sequence of coursework in supervision at approved educational sites.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

IL 3593 - RESEARCH PRACTCM IN SPEC EDUC
Course is a field-based internship in research methodology. Purpose of the course is to provide opportunities for students to get hands-on experience and direct supervision in the development, implementation and dissemination of educational research.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis

**IL 3594 - INTDIS LDRS SEM DEVELM DISAB 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This seminar provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, and policy/legislation. Leadership issues are also explicitly considered at the beginning and end of each term.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SNC Basis

**IL 3595 - INTDIS LDRS SEM DEVELM DISAB 2**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
This seminar, a continuation of the interdisciplinary leadership seminar in developmental disabilities 1, provides the advanced master's or doctoral student with an opportunity to study and analyze with students and faculty from a variety of disciplines current issues affecting children with neurodevelopmental disabilities, their families, and their communities. Within a framework of family-centered and cross-cultural principles, the seminar examines issues related to advances in diagnosis, treatment, child development, service delivery, & policy/legislation. Leadership is considered.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**IL 3596 - INTERNSHIP IN SPECIAL EDUCATN**  
**Minimum Credits:** 1  
**Maximum Credits:** 3  
An internship is proposed, then reviewed by faculty and implemented in varying types of special education settings.

**Academic Career:** GRAD  
**Course Component:** Internship  
**Grade Component:** Grad SN Basis

**IL 3597 - INDEPENDENT STUDY IN SP ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student registers for this when the student must maintain active registration and needs to extend work on an un completed task or project from a previous term or when preparing for special examinations.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SU3 Basis

**IL 3598 - DIRECTED STUDY IN SP ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 3599 - DOCTRL DISSER RES - SPECIAL ED**  
**Minimum Credits:** 1  
**Maximum Credits:** 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

**Academic Career:** GRAD
**Course Component:** Thesis Research
**Grade Component:** Grad SN Basis

**IL 3691 - SUPERVISED RESEARCH - IDT**
**Minimum Credits:** 1
**Maximum Credits:** 6
The student works collaboratively with a sponsoring faculty member in the carrying out and in the preparation of a written report of a research project.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad SN Basis

**IL 3698 - DIRECTED STUDY IDT**
**Minimum Credits:** 1
**Maximum Credits:** 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Letter Grade

**IL 3701 - SPECIAL TOPICS - COMMUNICATIONS**
**Minimum Credits:** 1
**Maximum Credits:** 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad LG/SU3 Basis

**IL 3702 - SPECI PROJ FOREIGN LANG ED PHD**
**Minimum Credits:** 1
**Maximum Credits:** 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in foreign language education. This course is designated for students to pursue independent research in foreign language education under the supervision of appropriate faculty member.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad LG/SU3 Basis

**IL 3703 - SPECIAL TOPICS IN READING**
**Minimum Credits:** 1
**Maximum Credits:** 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern in reading education.

**Academic Career:** GRAD
**Course Component:** Directed Studies
**Grade Component:** Grad LG/SU3 Basis

**IL 3791 - SUPERVISED RES - FOREIGN LANG**
**Minimum Credits:** 1
**Maximum Credits:** 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.

**Academic Career:** GRAD
**Course Component:** Practicum
**Grade Component:** Grad LG/SU3 Basis
IL 3798 - DIRECTED STUDY - FOREIGN LANG
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3799 - DCTRL DISSER RES-FOREIGN LANG
Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

IL 3800 - PRACT & SEMINAR COLLG TEACHING
Minimum Credits: 3
Maximum Credits: 3
A supervised practicum experience for graduate student's preparing for college teaching careers in the educational disciplines and professions. Includes periodic seminars, workshops, and conferences with senior faculty. Students must complete a professional teaching portfolio documenting their practicum experiences.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

IL 3890 - ADVANCED TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 9
Course designed for students seeking additional field teacher certification. Includes a school-based practicum in accordance with the student's experience and interests.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad HSU Basis

IL 3891 - SUPERVISED RES - SOCL STUDIES
Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

IL 3898 - DIRCTED STUDY - SOCIAL STUDIES
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

IL 3899 - DOCTRL DISSER RES-SOCL STUDIES
Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

**IL 3906 - SEM: COMNY RESORC YNG CHLD**  
Minimum Credits: 2  
Maximum Credits: 3  
This interdisciplinary course focuses on the role of the professional in supporting families of young children with and without disabilities by linking them with formal and in formal community resources. The course explores rationale; family-centered principles; models and practices for supporting families; and considerations in the development of community resources. It surveys available resources through guest speakers, on-site visits, and the development of a resource directory.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad Letter Grade

**IL 3928 - WEB LEGL & LEGISLTV FDS OF SP**  
Minimum Credits: 3  
Maximum Credits: 3  
This course reviews the practical application of laws, regulations, court decisions, and public policy to the supervision of special education services and programs.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis

**IL 3948 - SPEC TOPC-EARLY CHILDHOOD EDUC**  
Minimum Credits: 1  
Maximum Credits: 3  
A flexible curriculum oriented to special research topics of interest to faculty or to current issues of concern to educators. Focused on areas within programs.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad LG/SU3 Basis

**IL 3980 - COGNITV STUDY-INSTRUC & LEARNG**  
Minimum Credits: 3  
Maximum Credits: 3  
Overview of current approaches to the study of teaching and learning from a cognitive perspective. Extensive reading of contemporary cognitive research and theory applied to educational issues. In-depth consideration of selected major issues related to the learning or teaching of subject matter.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**IL 3982 - INSTRUCTNL EXPLAN SUBJ MATTER**  
Minimum Credits: 3  
Maximum Credits: 3  
An in-depth analysis from the point of view of both education and psychology of instructional explanations embedded in subject matter. Extensive reading in current exemplars of teaching, models of explanations and analogies, and simulations. Systematic analysis of videotaped examples.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade

**IL 3984 - MATHEMATICAL COGNITION**  
Minimum Credits: 3  
Maximum Credits: 3  
Analysis of mathematics learning and performance from a cognitive perspective. Consideration of research and theory related to procedural and conceptual knowledge, understanding, representation, knowledge organization, reasoning, problem solving, self-regulation and beliefs.
IL 3985 - RESEARCH IN COGNITION IN EDUC
Minimum Credits: 3
Maximum Credits: 3
A specific and narrowly defined area of research in teaching and learning will be the focus of an in-depth analysis from the point of view of both psychology and education. The research will be embedded in specific subject matter fields such as mathematics, history, or science.

IL 3986 - SPECIAL TOPICS-COGNITV STUDIES
Minimum Credits: 1
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within programs.

IL 3991 - SUPERVISED RESEARCH - COGNITV
Minimum Credits: 1
Maximum Credits: 6
The doctoral student works collaboratively with a sponsoring faculty member in the carrying out and preparation of a written report of a research project.

IL 3992 - SUPERVISION PRACTICUM ELEM ED
Minimum Credits: 1
Maximum Credits: 3
A field-based internship in the supervision of preservice, beginning or experienced teachers in the development of their professional teaching skills. This practicum may be completed in conjunction with the professional year sequence or at approved educational sites.

IL 3997 - INDEPENDENT STUDY ELEMNARY ED
Minimum Credits: 1
Maximum Credits: 9
The student registers for this when the student must maintain active registration and needs to extend work on an uncompleted task or project from a previous term or when preparing for special examinations.

IL 3998 - DIRECTED STUDY - COGNITIVE
Minimum Credits: 1
Maximum Credits: 9
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
IL 3999 - DOCTRL DISSER RES - COGNITIVE
Minimum Credits: 1
Maximum Credits: 15
The student prepares a proposal for a detailed research study, has that proposal approved by an appropriate faculty dissertation committee, completes the proposed study, and defends the completed draft in a dissertation final oral examination.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Integrative Molecular Biology

IMB 2000 - LABORATORY RESEARCH ROTATIONS
Minimum Credits: 1
Maximum Credits: 9
Students are required to perform three distinct four-week laboratory rotations in the summer term of the first year. These rotations provide students with an opportunity to perform experimental research in three different scientific areas, while experiencing diverse laboratory environments and practices. They also facilitate selection of the dissertation laboratory and advisor. Students select the laboratory rotations based on their research interests and in consultation with their academic advisor. To capitalize on the cross campus nature of the program, students are required to distribute the rotations between participating laboratories in the Department of Biological Sciences and the School of Medicine.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

IMB 2010 - APPROACHES MOLECULAR BIOLOGY
Minimum Credits: 5
Maximum Credits: 5
The semester-long approaches in molecular biology course is divided into three separate modules and will meet three times a week. Each week there will be two 1.5-hour lectures and a 2-hour discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three modules are: "cancer: regulation and mis-regulation of cell growth and control", "heart disease: molecular and cellular foundations", and "viral diseases: life cycle and evolution of prokaryotic and eukaryotic viruses". The course will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

IMB 2011 - APPROACHES 1: CANCER
Minimum Credits: 2
Maximum Credits: 2
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Integrative Molecular Biology (PHD)

IMB 2012 - APPROACHES 2: HEART DISEASE
Minimum Credits: 2
Maximum Credits: 2
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design
and interpretation of experimental methods in modern biomedical research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

### IMB 2013 - APPROACHES 3: VIRAL DISEASES

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PHD)

### IMB 2022 - APPROACHES 2: MODELING HUMAN

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be one day of lecture and two discussion sections at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, modeling human disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PLAN: Integrative Molecular Biology (PhD, ND) or Integrative Molecular Biology (PhD, ND)

### IMB 2023 - APPROACHES 3: CMPTL SYSTS BIOL DS

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. The titles of the three course modules are: cancer, heart disease, and computational systems biology of disease. Although each module is distinguished by its focus on the molecular basis of human diseases, in module 3 we will use disease paradigms as means to explore questions of fundamental significance in the field of modern computational and systems biology. We will cover a variety of topics, from collection and analysis of high-throughput disease data, to viral diseases and drug design. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental and computational methods in modern biomedical research.

**Academic Career:** GRAD  
**Course Component:** Lecture

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2010 - BIOMEDICAL INFORMATICS COLLOQ
Medical informatics research of general interest is presented and discussed. In some cases, the research being presented will be taken from recent journal papers. In other cases, medical informatics researchers will be presenting their own research results.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

### ISSP 2015 - FDS CLIN & PH INFORMATICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

### ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is an immigration course for the intelligent systems students.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

### ISSP 2030 - ADV TOPICS INTELLIGENT SYSTEMS

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is a continuance of ISSP 2020. It is an immigration course for the intelligent systems students. Students continue with this course by carrying out their projects developed in ISSP 2020 and giving presentations presenting their results.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad Letter Grade  
**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

### ISSP 2040 - INTRO CLN MULTIMEDIA & INTRNET

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to introduce students to the core technologies and applications related to clinical multimedia and medical applications of the internet. The subjects introduced will include medical imaging modalities, medical imaging standards, image databases, image compression and multimedia technologies. The internet applications section of the course will review internet technologies and applications in clinical medicine and education.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### ISSP 2045 - KNOWL REPRESNTN CLN DEC SUPPRRT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is an in-depth review of clinical information systems (e.g., Electronic medical records). We will review systems of historical interest and representative current systems. Topics will include functional requirements, standards, security, and technology.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
ISSP 2050 - INTELLGNT SYS RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
The ISSP faculty presents their research in a series of lectures. Purpose of this seminar is to give an overview of research activities in the program.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ISSP 2060 - EVAL METHODS MEDICAL INFORMTCS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to expose students to the wide range of empirical evaluation and research methods used in medical informatics, to immerse students in the empirical literature of the field, and to prepare students to design and conduct studies appropriate to problems in the field.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2062 - PROBLEM-ORIENTED PROGRMMNG MI
Minimum Credits: 3
Maximum Credits: 3
This course is designed to extend an experienced students' programming abilities through review of current program design and coding techniques, including fourth-generation languages, the unified modeling language (uml), object-oriented programming and extreme programming. The course includes a strong practical programming component based on the python language that includes in-class laboratories, weekly practical programming problems, and midterm and final programming projects. Programming assignments are drawn from areas relevant to medical informatics such as structured text and image processing, network communications, database management, natural language processing, expert systems, etc. Through the course, students learn to understand the programming process at a practical level and gain the ability to independently create useful software tools.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2065 - INFO TECHN & HEALTH CARE ORGNS
Minimum Credits: 3
Maximum Credits: 3
This course is meant to introduce medical informatics fellows who have no formal medical background to the basic principles and terminology of clinical medicine.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ISSP 2070 - PROBABILISTIC METHODS
Minimum Credits: 3
Maximum Credits: 3
This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks, although other probabilistic models also will be studied. Medical applications are emphasized, however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. An understanding of basic probability theory would be helpful, but is not required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ISSP 2080 - INFO TECHN AND HEALTH CARE ORG
Minimum Credits: 3
Maximum Credits: 3
Seminar discussing medical informatics seminar topics.
Academic Career: GRAD
Course Component: Lecture
ISSP 2081 - FNDTNS OF BIOINFORMATICS
Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2082 - VIRTUAL SIMULTN IN BIOMED INF
Minimum Credits: 3
Maximum Credits: 3
Using a range of biomedical problems, this course will explore simulation models in medical and biomedical informatics. The course will explore a range of simulation applications in the biosciences and teach the theory and principles of simulation. Students will apply these principles as they develop their own simulation models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2083 - BIOMDCL INFORMTCS JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
This course meets once each week for one hour. The research being presented will be taken from recent journal papers.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2085 - BIOINFORMATICS AT PITT
Minimum Credits: 1
Maximum Credits: 1
This course aims to provide students interested in computational biology and bioinformatics an understanding of different bioinformatics projects that are either ongoing or being initiated at the university of Pittsburgh. Different faculty members across the university will be invited to present their research each week. Students will be assigned relevant articles that describe research being conducted by each group.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2090 - PRACTICUM IN ADV BIOMEDICAL IT
Minimum Credits: 1
Maximum Credits: 6
This course is designed for people who want a practicum experience in working with advanced information technology in the center for biomedical informatics.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2100 - INTRO TO INTELLIGENT SYSTEMS
We discuss the data structures, control structures, and paradigms of artificial intelligence programming. We focus on the lisp language/programming environment and use of that environment to develop higher level programming tools. Topics include abstract data types, knowledge structuring, recursive programming, discrimination nets, agenda control, deductive information retrieval, slot filler databases, sophisticated data dependencies, closure-based programming, and expert systems. We discuss several application areas.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

---

**ISSP 2140 - INTRO PARLEL DISTB PROCESSING**

**Minimum Credits:** 3

**Maximum Credits:** 3

Introduces mathematical and computer techniques used in constructing models of information processing by parallel distributed processing (PDP) networks; principles of input output functions and adaptation (learning) functions in single units and in networks; examines the relation between PDP networks, neurobiology, artificial intelligence, and cognition.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

---

**ISSP 2160 - FOUNDTNS OF ARTIFICL INTELLGNC**

**Minimum Credits:** 3

**Maximum Credits:** 3

The principal topics of AI are: representation knowledge, reasoning and problem solving, knowledge acquisition and machine learning, robotics, and natural language understanding. This course surveys these areas in order to provide an understanding of artificial intelligence methods and research problems. Specific topics include: action and object-centered representations, the search paradigm, planning and constraint satisfaction, qualitative reasoning, analogical reasoning, default reasoning, induction, other methods of learning, and knowledge engineering.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Intelligent Systems (MS, PHD)

---

**ISSP 2170 - MACHINE LEARNING**

**Minimum Credits:** 3

**Maximum Credits:** 3

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Intelligent Systems (PhD)

---

**ISSP 2180 - COMPUTER VISION**

**Minimum Credits:** 3

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Letter GRD

**Course Requirements:** PLAN: Intelligent Systems (PhD)

---

**ISSP 2190 - KNOWL REPRESNTN & SEMANTIC WEB**

**Minimum Credits:** 3

**Maximum Credits:** 3

Introduction to core ideas of knowledge representation and reasoning, including: predicate logic, resolution, rule-based reasoning, object-based and description-based representations, inheritance and default reasoning, semantic web languages from xml to owl, ontology development, and issues concerning representation of dimensions of the physical and social worlds.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PLAN: Intelligent Systems (MS or PHD)
ISSP 2210 - ARTIFICIAL INTELLIGENCE
Minimum Credits: 3
Maximum Credits: 3
Introduction to artificial intelligence: search, logic and deduction; knowledge representation and memory organization; production systems; expert systems; planning; language understanding, and machine learning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2221 - HUMAN INFORMATION PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Introduction to research and theory in human cognition, including perception, attention, pattern recognition, memory, representation of knowledge, language, problem solving, reasoning, and decision making, with implications for user interface design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2230 - INTRO NATURAL LANG PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Overview of computational approaches to natural language processing. Issues in syntax, semantics, and pragmatics, as well as overall systems architectures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2240 - DECISION ANAL & DECISION SUPPORT SYS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2250 - RESEARCH DESIGN
Minimum Credits: 3
Maximum Credits: 3
Beginning research design with emphasis on the basic process of inquiry. Identifying and articulating research problems; determining and describing procedures for conducting research; designing data collecting procedures; formulating testable hypotheses; interpreting and drawing conclusions from data analysis, and reporting research findings and implications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ISSP 2260 - VISUAL LANGUAGES
Minimum Credits: 3
Maximum Credits: 3
Definition and classification of visual languages. Examples of visual programming languages and languages for visual presentation of data. Principles of visual language design and evaluation.
Academic Career: GRAD
ISSP 2280 - ADAPTIVE INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Introduces key principles of adaptive information systems and modern techniques for user modeling and personalization. Covers the construction of user models and user profiles. Examines the use of various personalization techniques such as adaptive search, recommendation, and navigation support. Reviews major types of adaptive information systems and explores important application areas.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2400 - INTELLIGENT SYSTEMS LABORATORY
Minimum Credits: 3
Maximum Credits: 3
Supervised work on an AI programming project. Restricted to ISSP graduate students.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

ISSP 2430 - SOCIAL COMPUTING
Minimum Credits: 3
Maximum Credits: 3
Introduction to key theories and technologies of social computing. Reviews major types of social computing systems. Several social computing systems are explored and used throughout the course. Final group project focuses on designing and implementing a social web system.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2470 - ADVANCED LOGIC (CORE)
Minimum Credits: 3
Maximum Credits: 3
This is the first term of an introductory graduate course in mathematical logic. Topics are completeness of propositional logic and quantification theory and elementary set theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2510 - SEM: AI & LEGAL REASONING
Minimum Credits: 3
Maximum Credits: 3
The goals of the seminar are to examine aspects of legal reasoning from the viewpoint of an AI researcher. In general, the seminar will consider the nature and problems of reasoning with rules in the law and the ways in which reasoning analogically with cases supplements the rules. We will examine recent work by researchers in developing knowledge representation and control techniques for dealing with legal tasks and relate those approaches to fundamental AI concerns.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ISSP 2630 - FDS OF COGNITIVE PSYCHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course will introduce core issues, theories, and experimental findings in cognitive psychology. Topics to be covered include history of cognitive psychology, sensory perception, attention, memory, imagery, language, reasoning, learning and expertise, problem solving, decision making, and
individual differences in cognition. The goal is to understand foundational theories and issues as well as the research methods used in this area. In other words, how human cognition can be studied scientifically, and why the results of experimental investigations support particular theories.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**ISSP 2710 - MEDICAL EXPERT SYSTEMS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Major expert systems and decision support systems in the field of medical informatics.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ISSP 2805 - ARTFCL INTELGNC & LOGC DISCV**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will survey some of the work done by computer scientists in the last two decades towards developing programs which can discover scientific generalizations. Inductive strategies employed in such work will be compared with philosophical work on induction, explanation, and theory evaluation.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**ISSP 2820 - PRAGMATICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Theories of how context of utterance affects the content, and of relationships between language and human action and communication. Topics include presupposition, conversational implicature, no declarative sentences, deixis and anaphora, and discourse analysis of units larger than sentences.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ISSP 2850 - COMPUTATIONAL LINGUISTICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An introduction to the concepts and techniques of computational linguistics, based on the programming language prolog.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ISSP 2860 - INTRO TO SEMANTIC THEORY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A survey course designed to introduce students who have been exposed to linguistics and logic to contemporary work in the theory of meaning.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**ISSP 2870 - THEORY OF LOGIC & COMPUTATION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
An advanced introduction to a symbolic logic and the theory of computation. The course will develop the theory of propositional and quantificational logic, including automated theorem proving techniques. There will be a brief introduction to the theory of computability and complexity, with applications to logic-related problems. There will be several lectures on applications of logic in computer science especially in artificial intelligence. Students will be exposed to several computer programs illustrating points that are made in class.  
**Academic Career:** GRAD
**ISSP 2871 - ART OF LOGIC AND COMPUTATION**

Minimum Credits: 1  
Maximum Credits: 1  
A quick introduction to the art of using logic as a representation language. The presentation will be aimed at linguists and computer scientists who want to become acquainted with the idea of logical form. The course will use parts of a textbook by Jon Barwise and John Etchemendy, and will rely on accompanying tutorial software for Macintosh computers. There will be an opportunity at the end of the course for students to learn something about either logic programming or relating logical forms to natural language, whichever they prefer.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**ISSP 2875 - LOGC PROGMMNG & CMPTL MORPHLGY**

Minimum Credits: 2  
Maximum Credits: 2  
Basic concepts of logic programming. Introduction to programming in prolog, with special attention to recursion, lists, and natural language programming. Theory of finite state networks and finite state transducers, and applications to natural language morphology. This introduction will not aim at programming expertise, but at concepts and basic techniques that will be valuable to professional users of natural language software.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

**ISSP 2900 - GRADUATE INTERNSHIP**

Minimum Credits: 1  
Maximum Credits: 3  
A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.

Academic Career: GRAD  
Course Component: Internship  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

**ISSP 2902 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Directed study.

Academic Career: GRAD  
Course Component: Directed Studies  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

**ISSP 2990 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 9  
Independent study.

Academic Career: GRAD  
Course Component: Independent Study  
Grade Component: Grad SN Basis  
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

**ISSP 3000 - RESEARCH AND DISSERTATION PHD**

Minimum Credits: 1  
Maximum Credits: 9  
Research and dissertation Ph.D.

Academic Career: GRAD  
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3120 - ADV TOPCS NATRL LANG PROCSSNG
Minimum Credits: 3
Maximum Credits: 3
Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more deeply, and to discuss recent advances in (NLP).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ISSP 2230 or CS 2731 or INFSCI 2420; PLAN: Intelligent Systems (MS, PHD)

ISSP 3180 - VISUAL LANGUAGES & PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
This course will include fundamentals of formal language theory, iconic and symbolic representations, formal theory of iconic systems, icon operators and semantics, icon oriented system compiler for visual interface design, computer graphics and visual programming, issues in the design of visual programming systems, visual database systems, iconic indexing, and advanced topics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3300 - ADVANCED TOPICS IN EXPERT SYMS
Minimum Credits: 3
Maximum Credits: 3
A practical course in expert systems involving discussions of fundamentals of building expert systems, discussion of open problems, and designing and building a prototype expert system.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ISSP 2160 or CS 2710; PLAN: Intelligent Systems (MS, PHD)

ISSP 3360 - STRUCT & INTRPRRTN CMPTR PROGM
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to fundamental ideas in computer programming. Topics discussed include building abstractions with procedures, building abstractions with data, modularity, objects and state, metalinguistic abstraction, and computing with register machines. The programming language used is the scheme dialect of lisp. The course presupposes no formal programming as well as formal issues.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3370 - ARTIFICIL INTELGNC IN BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Focuses on the fundamental artificial intelligence (AI) ideas that underline applications in such diverse areas as natural language processing, automatic programming, robotics, machine vision, automatic theorem proving, intelligent data retrieval systems, etc. Emphasis on general computational concepts involving kinds of data structures, and properties of control strategies used by AI systems. Students also will be expected to conduct an in-depth review of some area of application of AI methods and report their investigation.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)
ISSP 3380 - KNOWLEDGE-BASED EXPERT SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Focuses on key issues in the design and implementation of knowledge based systems. Such as knowledge representation and methods of dealing with uncertainty. Representative systems are studied in-depth.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3390 - ADVANCED TOPICS IN AI
Minimum Credits: 3
Maximum Credits: 3
This course will focus on artificial intelligence and expert system issues in data analysis. Readings will include papers presented at the first workshop on AI and statistics (see w. Gale, artificial intelligence and statistics"). If student interest warrants, we will be collecting and analyzing protocols of data analysis, and implementing selected portions of the resulting cognitive model during the term."
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3520 - THEORY OF LEARNING ALGORITHMS
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to present fundamental results regarding the learning capabilities of computer programs. Basic results from computation theory, formal languages, automata theory and logic are first presented. These are then used to show the limitations and capabilities of algorithmic strategies for various learning environments including program synthesis, language acquisition and identification of finite state machines.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: CS 2110; PLAN: Intelligent Systems (MS, PHD)

ISSP 3530 - SEM: NATURAL LANGUAGE GENERTN
Minimum Credits: 3
Maximum Credits: 3
An introductory-level survey of the branch of artificial intelligence known as natural language generation. Specific topics include: content planning, discourse structure, focus constraints, user modeling, pragmatics, grammars for generation, and lexical choice. Participants will be expected to have a working knowledge of AI concepts and programming techniques.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ISSP 3535 - ADV TOPICS IN MACHINE LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ISSP 2170 or CS 2750; PLAN: Intelligent Systems (MS, PHD)

ISSP 3560 - VISL LANG & VISL PROGRAMMING
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of formal language theory, iconic and symbolic representations, formal theory and iconic systems, icon operators, icon semantics, icon-oriented system compiler for visual interface design, computer graphics and visual programming, issues in the design of visual programming systems, visual programming in the future.
Academic Career: GRAD
Course Component: Seminar
ISSP 3565 - ADV TOPICS ARTIFICIAL INTELLIGENCE
Minimum Credits: 3
Maximum Credits: 3
This course will survey current topics in artificial intelligence.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ISSP 2160 or CS 2710; PLAN: Intelligent Systems (MS, PHD)

ISSP 3610 - SEMINAR LEARNING & INSTRUCTIONAL PROC
Minimum Credits: 3
Maximum Credits: 3
A review of recent literature in research on instructional and tutorial processes.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3712 - KNOWLEDGE REPRESENTATION
Minimum Credits: 3
Maximum Credits: 3
The course will presuppose familiarity with AI programming techniques and research methods. Specific topics include: logic-based representations, semantic networks, frame-based representations, rule-based methods, object-oriented methods, conceptual dependency networks, no monotonic reasoning, and specific issues in the representation of casual, temporal, and spatial relations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ISSP 2160 or CS 2710; PLAN: Intelligent Systems (MS, PHD)

Interdis Biomed Grad Prog

INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE
Minimum Credits: 8
Maximum Credits: 8
Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue, and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD) or Interdis Biomedical (UNK)

INTBP 2005 - FOUNDATIONS CONFERENCE
Minimum Credits: 4
Maximum Credits: 4
Contemporary approaches to problem-solving in biology, as well as principles underlying modern methods of biomedical research will be integrated with the lecture component of the course through an analysis of mechanisms underlying biological phenomena. Students will present papers, critically analyze data and devise experimental approaches to biomedical problems considered in lecture.
Academic Career: GRAD
Course Component: Workshop
Grade Component: Grad Letter Grade

INTBP 2010 - LABORATORY RESEARCH ROTATION
Minimum Credits: 1
Maximum Credits: 1
This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad exposure to method and practice.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

INTBP 2011 - LAB RSRCH ROTATION SUPPLEMENT
Minimum Credits: 2
Maximum Credits: 4
Course supplement to INTBP 2010 for those students initiating their first rotation in summer.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis

INTBP 2012 - MD/PHD LAB RESEARCH ROTATION
Minimum Credits: 1
Maximum Credits: 1
Intensive lab rotation for md/Ph.D. students in their first term of INTBP study. This lab is designed for the experienced student researcher who has a research topic in mind. The course will facilitate the final selection of a lab for dissertation research.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE
Minimum Credits: 3
Maximum Credits: 3
Experimental biologists formulate hypotheses and models, design experiments, collect data and conduct analyses to draw conclusions. Deep understanding on biological principles requires D2K- the translation of data into knowledge that transcends first-order conclusions. This course for first year Ph.D. students in the biomedical sciences will examine basic principles of experimental design, together with measurement and sources of experimental error. The course will provide practical ‘hands on’ introduction to the quantitative tools required for experimental research using cellular, molecular, and systems based methods. Topics will include: goals of experimental design, making measurements, principles or parametric and non-parametric statistical inference, use of MS excel, graphpad prism and R, design of publication graphics and a brief introduction to big data approaches. Students will work in small groups to construct capstone projects by making ‘you tube’ style videos to illustrate key principles of experimental design and analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

INTBP 2015 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 14
This series of intensive workshops involves a combination of lectures, discussions, readings, written exercises, and practical experiences to enhance the professional development of graduate and professional students, postdoctoral fellows, residents, and junior faculty. Special topics can also be used to assess student mastery of research concepts and methods using written and/or oral examinations.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

INTBP 2020 - INTRO TO STATISTICAL METHODS 1
Minimum Credits: 2
Maximum Credits: 2
This course will present contemporary approaches to quantitative analysis of data relevant to basic science in biomedical research. It will describe appropriate quantitative and analytical approaches that should be applied to common research techniques, the use of computer software and curve fitting to facilitate such analysis, and the evaluation of data by application of common statistical methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

INTBP 2030 - INTRODUCTION TO BIOCOMPUTING
Minimum Credits: 2
Maximum Credits: 2
This course will provide students with the skills needed to prepare written and oral scientific presentations. Topics to be covered include web browsers, library database searches, use of bibliographic management software, proper citation usage, electronic journal access, use and manipulation of pdf files, PowerPoint presentations, molecular biology databases available on the web, construction and use of relational databases, blast searches, nucleic acid sequence analysis programs and molecular structure programs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

INTBP 2040 - USING PERL FOR BIOINFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course will provide students with an introduction to computer programming using PERL language with particular emphasis on its use for tasks in bioinformatics. Topics to be covered include: programming basics, working with DNA sequences and strings, Perl data structures, pattern matching with regular expressions", finding complex motifs in DNA and protein sequences, using Perl to parse PDB records, annotations in Genbank, and blast output.

**BIND 2023 - PROJECT COURSE**

Minimum Credits: 3  
Maximum Credits: 3  
Intent of this project course is to provide MBA students with a meaningful and measurable business experience. Students should view projects as providing a unique opportunity to apply the various analytical tools and concepts taught at KATZ, in such a way as develop creative and useful business solutions. Logistically, the course consists of a client company project augmented by workshops. Students will be divided into small teams of four to five students, with one team having responsibility for completing one project. Client company meetings are scheduled at mutual convenience, but most typically late afternoons. A few "management consulting" workshops will also be scheduled, typically on Saturday mornings during the term. Workshops will be led by experienced consultants. Grading is based on the project's successful completion as measured by the company and faculty advisor.

**BIND 2024 - CONSULTING FIELD PROJECT**

2286
Minimum Credits: 3
Maximum Credits: 3
This course teaches management consulting in a real-world environment. Students are provided a unique opportunity to apply the analytical tools and concepts taught by Katz, and do so in a practical manner. Each project includes three to five students assembled as a team. Each project involves a single "client" organization, which may be a profit, non-profit, or governmental. Each client provides its assigned study team with a project of immediacy and an executive dedicated to working with the team. A faculty advisor is assigned to each team. Students schedule their own time, dovetailing with client schedules and that of their faculty advisor. Students are further supported three Saturday consulting workshops led by consultants from the Pittsburgh office of McKinsey & company, management consultants. An end-of-term competitive competition is also held, the winner being awarded the McKinsey cup.

BIND 2031 - GLOBAL BUSINESS PROJECT
Minimum Credits: 3
Maximum Credits: 3
This graduate consulting project course is offered by a consortium of business schools in the United States and some in the target countries. The global business project asks students to apply both cross-cultural awareness and foreign language skills to produce strategic advice for a company that is focused, compelling and actionable. The course offers students the opportunity to increase their global business competency through guided hands-on business experience while also introducing them to the challenges of virtual teaming. Teams of five or six are constructed through a competitive application process with members drawn from any of the partner schools. At the beginning of the term each student is given an assignment to help him or her prepare for the assignment. All students attend a kickoff meeting in March where they meet with their team and their client; during this meeting they draw up a scope of work, project timeline, and work plan. During the remainder of the term, the teams work virtually, gathering data and investigating solutions to their client's challenges. In May, the teams spend two weeks in their target country doing research and preparing for the final presentation with the client. On the final day of this in-country segment, the team presents its findings to the client in a final presentation. Grades are determined by the faculty advisor for the project based on the following weighted individual grade is 55% and team grade is 45%. Inputs are received from the client and from peer assessment of team members.

BIND 2200 - INTEGRATED PROJECT MBA/MS
Minimum Credits: 2
Maximum Credits: 2
All students in the MBA/MS in engineering joint degree program are required to complete an integrated project for a company or some other facility. Oversight of this project will be the joint responsibility of a faculty member from KGSB and one from the student's engineering department. It is the student's responsibility to identify these faculty members; program advisors will assist the student in this effort. Students must present a one or two page proposal prior to the start of the project outlining what they plan to do over the course of the project. Ideally, the project should blend skills learned from the business and engineering components of the program. The proposal must be approved by the business and engineering faculty members overseeing the project.

**BIND 2444 - MANAGEMENT SIMULATION CAPSTONE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  

The management game is an applied strategic management and general management exercise where teams of students operate computer simulated companies for 3 years acting as the executive committee of a multi-national manufacturing company. Groups of students compete against each other as they try to add value to their companies. The class teaches competitive dynamics group management skills, cross-functional management, and presentation skills. The class is intended to be taken during the student's last term in the program and is intended to provide an illustration of how to apply the tools acquired in other classes in a complex international business environment. A main focus of the learning is the unstructured nature of the problem. We want to train managers to solve open-ended problems with talented people in creative ways. External boards of directors may be utilized during the class for feedback and to assess student progress. Each team is asked to engage in externally focused exercises. Some examples of these exercises include negotiating a labor agreement with real union representatives and presenting their marketing plans to practicing marketing executives. The external feedback and evaluation structure of the course makes the exercise sharply realistic. The highly unstructured nature of the class makes it invaluable for students preparing to enter the job market as leaders instead of followers.

BIND 2511 - EXECUTIVE BOARDROOM SERIES 2
Minimum Credits: 1
Maximum Credits: 1
This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in earlier courses including part 1 of this course. Students are engaged in a structured understanding of the "businesses of pharmacy in health care, and related fields that impact the profession in an executive boardroom format. This (one credit) is the second part of an elective series (offered on alternating years) which focuses on "entrepreneurship in medicines and health care". This course analyzes the fundamentals of entrepreneurism amongst successful executive finders, binders, and minders.
Academic Career: GRAD

BIND 2512 - RESTRUCTURING & VALUATION
Minimum Credits: 1.5
Maximum Credits: 1.5
This course focuses on the value creation process in private firms. We begin with a broad perspective on what distinguishes private firms from publicly traded firms. This course provides students with the general perspective to appreciate these problems and also the specific tools to value their private company as an investment relative to other alternatives.

**BIND 2527 - UTILITY CO INT'L COMPV MARKETS**
Minimum Credits: 2
Maximum Credits: 2
This course will explore, examine, compare, contrast, debate, and analyze the various operations, strategies, organizations, structuring, investments, and future outlooks of these utilities. Much of the course learning will be accomplished through case studies and analysis of these utility's portfolios, contrasting successful strategies to-date with the future challenges that these utilities face in the international market today. These case studies will be both group oriented efforts, as well as individual. The course will also explore how utilities in competitive international markets will deal with the changing business and political landscapes in the different parts of the world in which they operate, as well as the various environmental pressures that will impact their operations, from new technology development and implementation to renewable resource integration to carbon footprint emissions and sequestration issues. By establishing an understanding of the business practices, operations, organizations, and strategies of the selected utilities, an appreciation for studying the challenges that lie ahead in future years in the international competitive arena will become a cornerstone of the course experience. Course objectives: on successful completion of the course, participants should be able to: 1) understand the business practices, operations, organizations, investments, and forward looking strategies of the utility's studied 2) assess the impact of the various strategies on future international market operations 3) compare and contrast the various portfolios and holdings of the utilities for future market growth and sustainability 4) analyze the challenges that lie ahead in terms of technology integration, environmental impacts, and various public policy issues.

**BIND 2702 - GLOBAL RES PRAC: LATIN AMERICA**  
Minimum Credits: 3  
Maximum Credits: 3
This course is tied closely to field study abroad, providing a hands-on experience in a foreign culture. Main objectives are to challenge students to consider business issues from a global perspective and to expose them to actual business environments abroad. Requirements include a team research project and an individual cultural report. The course includes a 9-day trip to various businesses in Chile. Students develop a research question in areas of managerial specialization and draw evidence from the field study to support their project report. While abroad, students visit a number of selected organizations and/or companies, and explore current business practices/issues. The group meets for three, 3-hour class sessions prior to the trip. Portions of these classes will focus on developing the research project. Also, to help prepare for the trip, selected outside speakers will share their experiences and perspectives on Latin American business and culture. At the final class session after the trip, projects are presented in both written and oral forms.

BIND 2889 - BRAZIL TODAY
Minimum Credits: 1
Maximum Credits: 1
This short course will explore how these three factors interact in Brazil and in the position of Brazil as a world economy. Examples of questions that may be explored during the lectures and that students may want to explore for their paper are: what is Brazil's role in the world economy? What are the major impediments to Brazil's economic growth? What role does race, ethnicity and class play in shaping Brazil's politics and economy? To what extend is the deep social and economic inequality in Brazilian society rooted in discrimination between races? How has development and trade coupled with Brazil's national economic policy affected Brazil's environment? What are the major impediments to Brazil's economic and business growth? Compare and contrast policy debates, environmental impacts etc. Of economic growth between those of the India and Brazil what does the economic growth mean for: an economically well-off American citizen? An American of lower economic status? An affluent Brazilian citizen? A poor Brazilian citizen? What are the current and future challenges of multinational firms in Brazil and what needs to happen to move towards the path of overcoming these to assist the economic and human growth of Brazil? A review of policies and education on a Brazilian industrial sector such as manufacturing, textiles, shoes, chemicals, cement, lumber, iron ore, tin, steel, aircraft, motor vehicles and parts, other machinery and equipment. Compare and contrast policy debates, environmental impacts etc. Of economic growth between those of the Brazil and another emerging economy such as India)

**BIND 9111 - DEALING WITH BUS AMBIGUITY**  
Minimum Credits: 0  
Maximum Credits: 0  
You have completed a solid foundation of required courses, as well as electives in your interest area. Now it's time to up the ante. What if you were
hired to consult with a business on a real world problem, with conflicting, insufficient information and hostile opinions? You have no case study to begin the analysis. No previous solutions. Only uncertainties. Where would you begin? Join our faculty as they host professionals from the business community who will present their current, real world, unsolved business problems. The intended learning outcome of these workshops is to increase your awareness of the pervasiveness of ambiguity in business, and to understand how successful executives deal with ambiguous situations critical to their businesses. Through dialog with executives and supporting faculty, you will begin developing your own tools for dealing with business ambiguity.

**BIND 9112 - DEVELOPING YOUR BUSINESS STYLE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This six week course will focus on developing your personal growth as an "actor" in business situations from interviews and presentations to dinner parties and elevator moments. Students will learn basic acting techniques, including listening and responding, choosing and achieving objectives, and improvisation. Improvisation develops the ability to "think on your feet," a valuable skill when responding to the impromptu questions following a presentation, and effectively handle unexpected interview questions. Other skills introduced will include a keen awareness of self and others, confidence and establishing a presence, verbal and physical communication, giving and receiving feedback, and the ability to collaborate and work as a team - all important leadership skills. Some class exercises will be videotaped and reviewed in class.

**BIND 9113 - GENERAL BUSINESS WRITING**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
An MBA skills gap analysis done by the MBA career services council of the graduate management admissions council identifies written communication as one of the primary areas which is highly valued by companies, yet where MBA students need to improve. Managers use writing to get work done. They need to use persuasive strategies that motivate individuals in organizational settings. Master effective business writing for a variety of high-powered, career-oriented situations. There is no better way to impress or disappoint your boss than with your written communications skills. Address cases involving a critical management situation that requires a written response. For example, you may be asked to provide arguments in favor of keeping a sales training program or to describe actions an employee must take to significantly improve performance. You will be judged on your ability to select, develop, and organize content, employ effective language and syntactical choices, and use persuasive appeals to achieve management goals. Topics covered will include: writing for results; key elements of successful documents; communication purposes and strategies; support for your argument; language, style and 'personality'; proposals and reports. International students may want to consider attending 'business writing for international students' before attending this course.

**BIND 9116 - LDR DVLPMNT & ASSMNT FACLTR TN**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  

This is a challenging series of outdoor leadership and team problem-solving exercises designed to help future leaders to think strategically, communicate effectively and act decisively. The course implements a planned series of challenges ' the goals of each challenge build on the previous one. All of the activities are 'challenge by choice,' meaning that participants are encouraged to go beyond their normal comfort zones, but each participant determines his or her level of involvement. At the conclusion of each challenge, an after action review (AAR) is conducted. The AAR is a professional discussion of an event, focused on performance standards, that enables individuals to discover for themselves what happened, why it happened and how to sustain strengths and improve on weaknesses.

Interpersonal Skills

SWINT 2002 - ENHAN PARNT: HELP FAMLY ATTACH
Minimum Credits: 2
Maximum Credits: 2
This course examines some special needs and problems of parenting and analyzes educationally oriented techniques that help parents cope with these difficulties. Among topics included are problematic parenting behavior, special concerns in rearing children with special needs, transactional analysis, parent effectiveness training and behaviorally oriented approaches.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.
SWINT 2004 - GRIEF AND LOSS
Minimum Credits: 3
Maximum Credits: 3
This course explores the various models used by social workers who are interested in meeting the complicated needs of grieving clients and their families. Knowledge based practice patterns rooted in the framework of the tasks of mourning, the mediators of mourning and a review of the dual processing model are provided across a wide range of populations and practice settings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2005 - DEATH AND DYING LAB
Minimum Credits: 1
Maximum Credits: 1
This lab is designed to develop skills and competencies in the variety of interventions in the field of death and dying through the use of experiential learning approaches. Students taking this course must either be currently registered for SWINT 2004 death & dying, or have taken it previously.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2007 - INTRO PSYPHMCLGY SOCL WRK PRA
Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize students with the basic terminology and models of pharmacokinetics, and the role of social workers in medication management. The development of psychopharmacology from a historical and sociological perspective as well as an overview of neurochemistry and biological-psychological functioning will be addressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2009 - FAMILY CONFERENCE & TEAMING
Minimum Credits: 3
Maximum Credits: 3
This course will familiarize students with Family Group Decision Making (FGDM), a cross system practice that builds on the strengths of families by supporting prevention strategies and planning for and ensuring the safety, permanency and well-being of children. Family group decision making recognizes the importance of involving family groups in decision making about children who need protection or care, and emphasizes family empowerment by acknowledging that families should be given the opportunity and responsibility to make their own decisions regarding their children and family members.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

SWINT 2010 - CHILD AND FAMILY INTERVIEWING
Minimum Credits: 2
Maximum Credits: 2
This course familiarizes the student with all aspects of the assessment process in evaluating children and families. The emphasis is on clinical skills used in the diagnostic process; engaging the client(s), gathering data, defining treatment goals and plans, interpreting findings to parents; we will also explore issues in therapy with children and adolescents. Using lecture, discussion, and role play, the student has the opportunity to learn and test skills used in clinical practice.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2011 - SOCL WORK PRACT WITH FAMILIES
Minimum Credits: 3
Maximum Credits: 3
This course explores various basic models used by social workers for examining, understanding, and intervening in family processes. Video, role
play, and case material are used in developing skills for advanced practice in working with families.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2015 - PRIVATE PRACT CLINICAL SETTING
Minimum Credits: 2
Maximum Credits: 2
Private practice of social work in the clinical setting will be studied and discussed. Approaches to dealing with managed care, recordkeeping, fee-
setting, and other issues related to private practice will be discussed. This is a course based on requiring other clinical courses and field placement in
the clinical setting. Requires previous clinical courses and field placement in a clinical setting.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2016 - INTERPERSONAL PSYCHOTHERAPY
Minimum Credits: 3
Maximum Credits: 3
This course builds on the student's knowledge of psychotherapies gained in the prerequisite course, SWINT 2082, models of intervention, and
expands this knowledge to include a focus on the evidence-based model of interpersonal psychotherapy (IPT). The course enables students to learn
skills in applying the latest IPT assessment and treatment methods for a variety of mood and non-mood disorders. Particular attention will be paid to
empirical methods of evaluating client progress and outcomes. The course will also focus on the relevance of utilizing engagement strategies and IPT
treatment approaches to clinical social work practice with "difficult-to-engage" and "at risk" populations confronting issues of age, race/ethnicity,
poverty, gender, sexual orientation, religion, and disability.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2018 - CLINICAL SKILLS PSYCHOPATHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the concepts and techniques employed in clinical work with severely mentally ill and/or chemically dependent
clients. Categories of disturbance will include: schizophrenia, mood disorders, other psychoses, severe personality disorders and alcohol and/or other
substance abuse. The overall purpose is to equip the beginning practitioner with the knowledge and skills requisite for working with the types of
clients most commonly seen at public mental health/drug and alcohol services.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 and SWBEH 2065 (MIN GRADE 'B-' for Listed Courses)

SWINT 2025 - SOCW WORK PRACTICE INTGD HLTH
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the clinical and administrative skills, roles and functions of social work practice which take place in a wide range of
community based agencies and institutions at the primary, secondary and tertiary levels of intervention with and on behalf of a diverse population.
Knowledge skills and ethics are integrated toward promoting readiness for employment in the healthcare field.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2027 - AIDS: IMPLCTN SOCW WRK PRAC
Minimum Credits: 3
Maximum Credits: 3
This course will focus on intervention with people affected by AIDS/HIV, their significant others, and those at-risk for HIV infection. Knowledge, skills, attitudes, values and ethical issues will be addressed in depth. The policy debates that inform how services are delivered will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2028 - THEORY & PRACT BEHAVRAL METHOD
Minimum Credits: 2
Maximum Credits: 2
The basic concepts of social learning theory will be reviewed and their application, in several major behavior change strategies, will be examined. Such strategies will include systematic desensitization, relaxation training, behavioral rehearsal and cognitive relabeling. Emphasis will be placed on adapting behavioral strategies to the settings and client populations served by social workers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2030 - DIRECT PRACT WITH ELDERLY
Minimum Credits: 3
Maximum Credits: 3
This course defines the range of interpersonal practice with and for the elderly in terms of primary, secondary and tertiary levels of intervention. A broad range of clinical practice roles is addressed in regards to practice across a broad spectrum of settings. All of the established social work practice approaches are looked at in detail for treatment procedures which can be applied to work with the elderly. An eclectic perspective to practice with the elderly is stressed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL
Minimum Credits: 3
Maximum Credits: 3
Building on the student's knowledge of cognitive/behavioral theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.
Academic Career: GRAD
Course Component: Lecture

SWINT 2033 - ADV DRCT PRAC: PSYCHODYNAMIC
Minimum Credits: 3
Maximum Credits: 3
Building on the student's knowledge of psychosocial theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-'); SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2034 - DRCT PRACT DIVERSE POPULATIONS
Minimum Credits: 3
Maximum Credits: 3
This course will focus upon issues of cultural diversity and oppression. It will emphasize empowerment as its overarching framework and as a major goal for social work direct practice with individuals, families and small groups.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2035 - INTIMATE PARTNER VIOLENCE
Minimum Credits: 3
Maximum Credits: 3
This course examines the dynamics and treatment implications of working with family members who have experienced various forms of physical and/or sexual maltreatment from other family members. Physical and sexual child abuse, spouse abuse and marital rape are topics of concern.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2038 - CHILD ABUS/NEGLECT: PHYSL ABUS
Minimum Credits: 2
Maximum Credits: 2
The course provides comprehensive objectives and strategies for a multidisciplinary approach to assessment and treatment of families at high risk for child abuse and neglect. Topics include emergency intervention, initial assessment, protective services, legal investigation and placement. In-patient and out-patient modalities are covered including coordinated case management and development of multidisciplinary teams. Instructional methodology will be designed to translate diagnosis into effective treatment modalities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2039 - SOCL WRK CHMCL DEPEND CLIENTS
Minimum Credits: 2
Maximum Credits: 2
This course examines assessment frameworks and treatment approaches for social work practice with chemically dependent clients. Core counseling skills for engaging the client and maintaining client commitment are studied, as well as individual, family, and residential treatment approaches. Relapse prevention strategies and other recent treatment innovations will be discussed. Special considerations for selected populations also will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2042 - SOCL WORK DRUG & ALCHOL ABUSE
Minimum Credits: 3
Maximum Credits: 3
This course provides a basic orientation to alcohol and drug abuse as problems requiring social work interventions. Emphasis is placed on examining a variety of treatment approaches in providing services to alcoholics, drug abusers, and their families. Special efforts are made to focus the content on the needs of working populations experiencing problems with alcohol and drugs, as well as their families.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')
SWINT 2043 - ADVNCD CLINICAL PRACT FAMILIES
Minimum Credits: 2
Maximum Credits: 2
This course explores current theoretical approaches in family centered social work. Included for purposes of instruction are experiential exercises, tapes, and other audio-visual material.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2046 - PLANNED SHORT-TERM TREATMENT
Minimum Credits: 3
Maximum Credits: 3
A pluralistic theoretical framework for planned short-term treatment, highlighting contributions from interpersonal and social learning orientations is examined, and major research studies supporting short-term intervention are reviewed. Attention is given to the goals and process of the initial interview and major change strategies (behavioral rehearsal, task assignment, skill training, and cognitive restructuring) are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2047 - CHILD PERMANENCY
Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide the history, definitions, forms and skill sets for permanence for children and families served by the child welfare system. Based on an historical understanding of program development and human development needs, the course will offer a paradigm for providing healing interventions for children who come to the attention of the child welfare system. The course will explore ways that support is needed and provided to all parties in the work of permanency. The course also will look at the implications of permanency with regards to social/community health and wellness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2048 - GROUP WORK IN MENTAL HEALTH
Minimum Credits: 3
Maximum Credits: 3
This class is designed for students in mental health, social services, health, institutional or residential settings. It focuses on learning techniques of group psychotherapy, network intervention, support and self-help. Group treatment of alcoholics and other addicted individuals will be taught as well as group treatment of children, adolescents, and adults.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2049 - DIRECT PRACTICE WITH CHILDREN
Minimum Credits: 3
Maximum Credits: 3
This course prepares students to work directly with children in social work settings. A variety of teaching techniques are used to help students: utilize different theories and models of working with children; differentiate fact from inference and normal from deviant development; be comfortable with a variety of play media; and examine in-depth the theme of separation and its effect on the child.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Theory and concepts related to advanced social work practice with groups, including knowledge of group types, processes, selection, and composition, as well as group leader roles and functions are all considered.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: SWINT 2082 (MIN GRADE 'B-')

**SWINT 2054 - ADVANCED SOCIAL WORK WITH GRPS**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
An advanced seminar wherein the class will use its own dynamics to develop group work skills. Major types of groups are reviewed, followed by an examination of advanced therapy groups with alcoholics and children as well as self-help groups. The class will choose two other target populations which can effectively utilize therapeutic group dynamics and learn how to facilitate them through role playing and extensive reviews of research and practice.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWINT 2055 - ADV WRKSHP THERPUTC CORE SKIL**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course aims at consolidating the basic facilitative qualities and continuing the development of such qualities as immediacy, concreteness, and confrontation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Social Work students only.

**SWINT 2058 - SOCIAL WORK EDUCATIONAL SETTINGS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a knowledge base for the practice of social work in school or school-related settings. Focus is on application of knowledge, and values and skills of social work practice toward resolution of diverse problems encountered by pupils, schools and communities in the effort to achieve educational goals.

**Academic Career:** GRAD  
**Course Component:** Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2060 - DIRECT PRACTICE WITH ADOLESCNTS
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the problems encountered by adolescents and the methods of treatment. Problem areas, symptom pictures, and the dynamics of problem areas will be given emphasis in relation to treatment techniques. Some of the problem areas to be covered are: delinquency, sexual issues, emotional disturbance, substance abuse, and career planning.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2063 - ISSUES IN CHILD MALTREATMENT
Minimum Credits: 3
Maximum Credits: 3
This course will provide a comprehensive examination of child sexual maltreatment issues at the micro, meso, and macro levels: etiology; identification; child welfare system response; treatment; the impact the maltreatment has upon individuals, families, groups, and the community (including those coming into contact with maltreatment in the course of their work) and resilience in the face of maltreatment. Emphasis will be on the student's development of assessment skills, knowledge of the therapeutic process of recovery, and the role and function of organizations. Social work interventions and treatment modalities, including outcome data, will be presented. Students will be offered information about maltreatment among diverse populations. All topics will be related to and examined in the light of the core values, ethical principles, and standards of the national association of social workers code of ethics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2065 - RESIDNTL TREATMENT OF CHLDRN
Minimum Credits: 3
Maximum Credits: 3
This course deals with services to children in substitute care settings. It deals with practice skills in working with children, families and institutional staff. Consideration is given to current dilemmas and issues, in residential and day treatment settings, as well as responsibilities of child care staff.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2070 - CHLD YOUTH FAMILY INTERVENTIONS
Minimum Credits: 3
Maximum Credits: 3
Students will learn concrete skills needed for practice with children and their families, these include child and family interviewing, risk assessment, family interventions, age appropriate interventions with children and youth, and interdisciplinary collaborations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2071 - JUVENILE DELINQUENCY
Minimum Credits: 2
Maximum Credits: 2
A survey of theories of delinquency causation, current literature on "gangs", and factors affecting the orientation of correctional practitioners. This course is offered to direct practice students and others who have a particular interest in juvenile delinquency.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.
SWINT 2072 - SOCL WRK PRA & TRAUMATIC STRESS
Minimum Credits: 3
Maximum Credits: 3
This course addresses theories of primary and secondary (vicarious) traumatic stress; the nature of traumatic events and environments; and the potential impacts on individuals, families, groups, and communities. Students will be offered information about traumatic exposure and stress among diverse populations. Interventions and treatment modalities for working with those affected by traumatic stress using the person-in-environment perspective will be presented. All topics will be related to and examined in the light of the core values, ethical principles, and standards of the national association of social workers code of ethics. Emphasis will be on the student's development of practice competencies such as critical thinking, supporting the therapeutic process by the use of research-informed and strengths-based practice, identifying opportunities for advocacy, effective self-care, and understanding the role and function of organizations in creating trauma-informed human services environments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

SWINT 2076 - HUMAN SEXUALITY
Minimum Credits: 3
Maximum Credits: 3
This course presents current research about human sexuality, discusses the range of sexual life-styles, and develops a treatment typology for therapists working with couples and individuals with sexual dysfunctions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2080 - ADVNCD DIRECT PRACT INDIVIDL
Minimum Credits: 3
Maximum Credits: 3
This course focuses on cognitive-behavioral approaches for working with individuals. Methods of enlisting, building, and modifying social supports are studied. Developing assessment and treatment skills based on these approaches is emphasized. The course is especially helpful for students whose field placements afford an opportunity to work with individuals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2082 - MODELS OF INTERVENTION
Minimum Credits: 3
Maximum Credits: 3
The course provides a framework for understanding and differentially using treatment models in interpersonal social work practice. It examines four basic treatment models: psychosocial, crisis intervention, behavior modification, and an interpersonal approach based upon either communication theory, the client-centered approach, or an experiential humanist approach. These basis models are compared and contrasted.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081; CREQ: SWRES 2021; SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2087 - SPECIAL TOPICS
Minimum Credits: 1
Maximum Credits: 3
Given the changing nature of social work practice, the MSW program occasionally offers courses in new and/or unique content areas. When offered, this course is designed to provide skill and knowledge content not covered in other direct practice skill courses.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Social Work students only.

SWINT 2096 - CLIN SOCL WRK AFRCN AMRCN FMLY
Minimum Credits: 3
Maximum Credits: 3
The overall objective of this course is to provide a knowledge base on African-American families within a community context that is the basis for developing methods and skills relevant for clinical intervention with African American families. It will provide the student with the opportunity to expand on concepts, skills and assumptions about clinical transactions learned in basic clinical method courses. Conceptual models for assessment/intervention will assist students to clarify and become comfortable with theoretical and practice approaches with black families.
Academic Career: GRAD

Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: SWINT 2082 (MIN GRADE ’B-’)

SWINT 2097 - DRCTD STUDY INTRPRSNAL SKILLS
Minimum Credits: 1
Maximum Credits: 3
A student-initiated educational experience, guided by a faculty member that significantly supplements the social work interpersonal skills curriculum and conforms to academic course content expectations.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWINT 2099 - FIELD WORK
Minimum Credits: 1
Maximum Credits: 8
The field practicum emphasizes the integration and application of social work values, knowledge and skills in practice settings. Placements are in community service delivery systems and are individualized to combine the student's choice of concentration area, certification program and specialized skills interest.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PREQ: SWGEN 2099; SBPLAN: Direct Practice (Social Work-MSW)

Italian

ITAL 2200 - DANTE
Minimum Credits: 3
Maximum Credits: 3
A close reading of selected cantos from Dante's divine comedy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2201 - TRECENTO
Minimum Credits: 3
Maximum Credits: 3
An examination of a crucial century in the development of Italian culture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2300 - QUATTROCENTO CINQUECENTO
Minimum Credits: 3
Maximum Credits: 3
A course in the rise of humanism in Italy in the early renaissance. It will trace this revolution in man's idea of himself through its several stages, from the late trecento to the early cinquecento, including its effect on cities and courts, the founding of libraries and academies, and the great debates over the nature of learned language.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
ITAL 2302 - THEATER OF THE RENAISSANCE
Minimum Credits: 3
Maximum Credits: 3
This seminar will study sixteenth century Italian theatre. It will start with a discussion on the nature of drama, distinguishing genres and dramatic character types.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2305 - TASSO
Minimum Credits: 3
Maximum Credits: 3
A close reading of Torquato Tasso's Gerusalemme Liberata; analysis of his innovations in epic style and narrative mode; exploration of the historical background, critical reception sources of the poem; survey of recent Tasso's bibliography.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2315 - RENAISSANCE HUMANISM
Minimum Credits: 3
Maximum Credits: 3
This course examines the major figures in Renaissance humanism, moving from the civic humanism of Florentine authors like Bruno to the philological humanists such as Poliziano. Attention is given also to the independent vernacular humanists, Alberti and Leonardo.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2320 - ARIOSTO & VERNACULAR CLASSICISM
Minimum Credits: 3
Maximum Credits: 3
This course examines the literary career of Italy's greatest Renaissance poet. It considers how Ariosto transforms the Renaissance humanist tradition into one of classicism in the vernacular.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2400 - SEICENTO
Minimum Credits: 3
Maximum Credits: 3
A survey of Italian literature of the eighteenth century: reading and discussion of Marino and the Marinist school of poetry; in-depth examination of Galileo's scientific revolution and its effect on life and literature; study of the origins and development of Italian melodrama and the commedia Dell'arte.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2408 - 18THC REPUBLIC LTRS (FR & ITAL)
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to study how writers and artists of the enlightenment were part of a supra-national community, an international republic of letters. We will observe this phenomenon through the two examples of France and Italy, for the period going from the 1740s to the 1770s. We will focus on a series of themes to which the students will contribute with their own research: writers in an international public sphere; travels and correspondences across borders; projects and reality of cosmopolitanism, a supra-national theory of human rights; language.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
ITAL 2410 - SETTECENTO
Minimum Credits: 3
Maximum Credits: 3
A survey of Italian literature of the xviiith century: particular attention will be paid to the works of Pietro Metastasio, Carlo Goldoni and Vittorio Alfieri, as well as critical and theoretical texts of the period on theater.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2420 - GOLDONI
Minimum Credits: 3
Maximum Credits: 3
A course in Goldoni's plays and history of the theater in the 17th and 18th centuries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2500 - OTTOCENTO 1
Minimum Credits: 3
Maximum Credits: 3
A course in the literary and critical trends of the first quarter of the nineteenth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2501 - OTTOCENTO 2
Minimum Credits: 3
Maximum Credits: 3
A course in the literary and critical movements of the second half of the nineteenth century.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2511 - MANZONI
Minimum Credits: 3
Maximum Credits: 3
Reading and discussion of the lyrics and plays and the religious and historical works that Manzoni wrote before I Promessi Sposi.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2513 - FOSCOLO
Minimum Credits: 3
Maximum Credits: 3
A study of Foscolo's literary works, his correspondence, his position between neoclassicism and Romanticism, his life in Italy and in exile, his importance in pre-revolutionary Italy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2600 - NOVECENTO 1
Minimum Credits: 3
Maximum Credits: 3
A reading of 20th century Italian prose. The course focuses on the Italian writers who started to publish during and right after World War I.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
ITAL 2601 - NOVECENTO 2
Minimum Credits: 3
Maximum Credits: 3
Twentieth-Century Italian prose narrative and its relationship to literary movements.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2602 - 20THC LITERATURE: GENERL TOPIC
Minimum Credits: 3
Maximum Credits: 3
This course, broad in scope, will treat some aspect of 20th century French and Italian literature.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2603 - RPRESNTATIONS OF THE HOLOCAUST
Minimum Credits: 3
Maximum Credits: 3
This course examines representations of the holocaust in literature and film, with particular attention to the stages of the testimonial process, the issues of guilt and the grey zone, and the interplay between the problem of ineffability and the use of traditional" narrative models."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2604 - FILM DIRECTORS: PASOLINI
Minimum Credits: 3
Maximum Credits: 3
This course will not confine its work exclusively to pier Paolo Pasolini's filmmaking. We will examine his writings - journalistic, poetic, novelistic, and theoretical - and screen certain of his films in order to evaluate his endeavors in all of these literary, cinematic, political and cultural forms. In particular, we will situate his work in the context of Italian history and culture of the 20th century and also in terms of his relevance for an understanding of international events, particularly fascism.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ITAL 2607 - ITAL LITERATURE UNDER FASCISM
Minimum Credits: 3
Maximum Credits: 3
A study of the literary and political cultures of the period 1910-1945 in Italy. Their interrelationships, and their effects on the literature of the post-war period.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2610 - SICILY WRITING AND WRITTEN
Minimum Credits: 3
Maximum Credits: 3
This graduate-level seminar provides a forum for the analysis of Sicilian cultural production and a laboratory for the production of new knowledge about this Mediterranean Island. The seminar's texts are chiefly drawn from narrative and poetic genres, but also considers cinema, theatre, journalism, essays, and the visual and plastic arts that seek to express and represent the Sicilian experience.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ITAL 2700 - PROBLEMS IN LITERARY CRITICISM

2322
The course is designed as both a theoretical introduction to the literary text and a survey of current methods in literary criticism.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2701 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Period and literary topics are determined by the instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2710 - INTRO LITERARY & CULTL THEORY
Minimum Credits: 3
Maximum Credits: 3
In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all readings will be available in English.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ITAL 2715 - TOPCS LITERARY & CULTL THEORY
Minimum Credits: 3
Maximum Credits: 3
In this course, students will examine a special topic in literary and cultural theory. The course may be organized around a given theoretician, a theoretical movement, or a problematic. Students are expected to have some background in literary and cultural theory.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

ITAL 2750 - SCIENTIFIC DISCRSE IN ITAL LIT
Minimum Credits: 3
Maximum Credits: 3
This course considers several of the most important writers in the Italian literary tradition who happen, also, to be interested in issues of science. From Dante’s concern with cosmology through Galileo’s theoretical astronomy and physics to Levi’s chemistry, this course will investigate how literary stylists incorporate scientific discourse into artistic forms. Other writers treated include: Leonardo, Ariosto, Bruno, Galvani, Volta, Leopardi, and Calvino.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2751 - LITERARY LIVES: AUTOBIOGS & LTRS
Minimum Credits: 3
Maximum Credits: 3
This course explores the genre of the autobiography as it manifested itself in Italian literature from Petrarch to the present, as well as a study of individual authors, their motivations for telling the story of their lives, their idea of themselves and their notion of the political, social and cultural environment in which they lived. Autobiography is to be understood here in the broadest sense, and to be considered in all of the disparate forms (poems, letters, confessions, memoirs, journals, apologies, orations, prefaces, etc.) it took on at different times.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
ITAL 2801 - HISTORY OF ITALIAN LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
The course will be organized around the central problem that has persisted throughout the history of the language, the so-called Questione Della lingua, or the question of which, if any, of its many co-existing forms is the true or correct or in some way the preferable form of Italian.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 3
This course enables M.A. Candidates to do research under the direction of a faculty member, on a topic of mutual interest.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

ITAL 2910 - COMPREHENSIVE EXAMINATION MA
Minimum Credits: 1
Maximum Credits: 3
This course is intended for M.A. Candidates in their last term of study when they present themselves for the ma comprehensive examination.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad SN Basis

ITAL 2970 - TEACHING OF ITALIAN
Minimum Credits: 3
Maximum Credits: 3
This course will review the theory and practice of Italian language teaching. This will include all aspects of language teaching and testing, cultural understanding, bi-lingual education and the teaching of reading.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

ITAL 2971 - TEACHING PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This course is designed for Italian TAS who have completed Italian 2970 but who have not satisfied all teaching requirements of the department. Students will review and discuss pedagogical theory, effective lesson planning, professional and curricular development, curricular collaboration, and classroom management.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade

ITAL 2975 - ADV TOPICS FRGN LANG LRNG TCH
Minimum Credits: 3
Maximum Credits: 3
In this course intended for experienced foreign language teachers, students will focus on pedagogical issues encountered in advanced-level teaching in the areas of language, literature, and culture.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ITAL 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
This independent course is for M.A. Students who have completed, or are completing in their last term of study, all course requirements for the M.A.
Japanese

JPNSE 2022 - HISTORY OF THE JAPANESE LANG
Minimum Credits: 3
Maximum Credits: 3
This course is a review of the historical development of the Japanese language from the earliest extant document to the present. Subjects covered include phonology, syntax and orthography, using examples from historical records, works of literature, and recent scholarship from both Japan and the U.S. This information is useful not only to those studying the history of Japan and of languages in general, but also to students of the modern language who will gain a deeper understanding of all aspects of spoken and written Japanese.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

JPNSE 2023 - ASPECTS OF THE JAPANESE LANG
Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the Japanese language through a study of its structure, vocabulary and cultural heritage. Some topics discussed include word order, basic structural patterns, particles such as Wa and Ga, sexism, and word formation. This course is useful for the Japanese studies student wishing to have a deeper understanding of the language as well as the linguistics student interested in gaining knowledge of a non-Indo-European language.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2024 - TCH JAPANESE AS A 2ND LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
An introduction to approaches and techniques of teaching Japanese to speakers of English. Included will be some historical background, a review of the major textbooks, and discussions of curriculum development, learning and teaching strategies, romanization, testing, and other relevant topics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2025 - EXPLORING THE JAPANESE LANG
Minimum Credits: 3
Maximum Credits: 3
This course explores the relationship between language and thought through the study of linguistic and social phenomena in Japan and the U.S.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2035 - PRAGMATICS OF JAPANESE
Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to the usage aspects of Japanese by reading articles on pragmatic aspects of the language. The instructor will lecture on salient points and lead discussion on specific issues and the appropriate use of the language.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2045 - LANGUAGE JAPANESE AESTHETICS
For over a thousand years, aesthetic values have been seen by the Japanese as central in defining the particular significance of their civilization and the driving force of these insights into the beauty of truth remains powerful even to day. Learning to appreciate the development of traditional Japanese aesthetic sensibilities and their historical manifestations in a variety of art forms such as poetry and painting to theatre and folk art not only helps one to understand Japanese culture but provides a non-Western model to consider creativity, beauty and life. Readings are in English.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### JPNSE 2056 - JAPANESE LITERATURE AND WEST

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A critical study of modern Japanese works and selected modern Western literary materials with special emphasis on intensive analysis by means of modern Western criticism. The course is designed to encourage the student to examine significant similarities and differences between Japanese and non-Japanese materials and to judge the content from an oriental as well as a Western perspective.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### JPNSE 2057 - JPNE CULT SOCTY THRGH CINE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a critical study of selected international prize winning Japanese films and compares these films with Western films dealing with similar themes. The student learns to analyze and interpret films; becomes familiar with particular genres of Japanese films compared with Western; studies the history of Japanese cinema and its place in international cinematography and exposes the inter cultural benefits of judging the content of the films from oriental and Western aesthetic perspectives.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### JPNSE 2058 - WESTERNS AND SAMURAI FILMS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A focus on the critical comparative study of two filmic genres—the samurai representing Japanese cinema and the Western representing American cinema. The course demonstrates the analytical processes of the film leading to its structural unity; shows the significance of both genres with respect to the history of Japanese, American and European cinema; compares approaches to films of different countries and provides the overall benefits of approaching films from an intercultural standpoint.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### JPNSE 2059 - JAPANESE LITERATURE ON SCREEN

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will investigate how literature and film treat some major ideological and socio-cultural issues in Japanese society. Readings of pre-modern tales, modern fiction and contemporary novels. Film adaptations will represent the best of Japan's postwar cinematic tradition. The course is designed for the student interested in Japanese society, culture and intellectual currents through film and literature.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### JPNSE 2070 - WORLD OF JAPAN

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will receive a grounding in basic principles of Japanese classical literature, poetry and aesthetics. They will read the entire text in English of the Tale of the Genji and examine important works in Japanese literature composed in later periods.  
**Academic Career:** GRAD
JPNSE 2071 - THE WORLD OF JAPAN
Minimum Credits: 3
Maximum Credits: 3
This course covers the period between 1570 and 1870. Beginning with the unification of Japan under sixteenth century military war lords and ending with the collapse of the Tokugana Shoganate. Students will read selections from the major scholarly literature on the period.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2072 - WRITERS AND THINKERS
Minimum Credits: 3
Maximum Credits: 3
This course will provide an opportunity to read, analyze, and discuss texts by a variety of modern Japanese thinkers and writers who attempt to define the meaning of a changing Japanese culture and its place in the modern world, from about 1900 to 1960. Some are novelists and poets, others are essayists and philosophers writing for general audience. All materials will be read in English.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2080 - GHOSTS, MASKS AND ACTORS
Minimum Credits: 3
Maximum Credits: 3
A critical study of three major dramatic genres of Japan--noh, bunraku and kabuki--in cultural origins. Areas to be explored are the use of masks in the world of the noh theatre, the kabuki with its female impersonators and the near-lifesize puppets of the bunraku. Also discussed is the impact that noh and kabuki have had on modern Japanese and non-Japanese theatrical and film genres.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2081 - FORMS OF JAPANESE THEATRE
Minimum Credits: 3
Maximum Credits: 3
This course will provide a survey of various major forms of Japanese theatre using English language materials. Students will have access to relatively ancient forms of Japanese theatre such as kagura and no, kabuki drama and the bunraku puppet theatre through film and videocassette. The modern and avant-garde theatre are also accessible through translation and videocassette material. This course is designed for upperclass majors in theatre arts and non-majors in related fields.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2082 - A TASTE OF JAPAN
Minimum Credits: 3
Maximum Credits: 3
Food is an expression of the culture it feeds. Course will examine how food reflects the socio-cultural transformation of Japan from the immediate postwar era of shortage and deprivation to the "gourmet boom" of the contemporary period of affluence and abundance. Readings include short stories, novels, essays, comics, film and anime. The questions for the main course are: how do contemporary directors/novelists use food as a means of satirizing certain aspects of Japanese society? What is unique about Japanese people's attitudes towards or outlook on food? How are these national characteristics reflected in some of the works being studied in class?
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

JPNSE 2085 - INTRODUCTION EAST ASIAN CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**JPNSE 2700 - INTRO THEORY & PRA OF TRANLT**

Minimum Credits: 3
Maximum Credits: 3
This is an introductory course that answers to a growing interest in the theory and practice of translation from Japanese to English. The genres of texts that will be dealt with include literary works of various kinds (novels, poems, children's books), magazine and newspaper articles, web posts, manga, subtitling of anime and other videos, and texts of technical nature. Students will first learn broadly about the discipline of translation studies, including a history of translation and issues in translation (invisibility of the translator, culturally specific translatability issues, etc.). Students will then learn specific types of translation issues that come up when translating Japanese into English, using excerpts from a variety of genres as case studies. Special attention is paid to the structural differences between Japanese and English, cross-cultural differences in stylistics, writing with clarity, reference work, etc.

**KOREAN 2060 - LANGUAGE AND SOCIETY IN KOREA**

Minimum Credits: 3
Maximum Credits: 3
Focus on fundamental knowledge of sociolinguistics, language variations, varieties and codes of inherent sociality cultural implements. With substantial differences between eastern and Western cultures, students will study linguistic behavior and social groups, social class, effects of gender, address and reference terms, politeness strategies and style of language form used both in English and Korean in comparative study. Materials arranged to explain and evaluate the interaction of language, society and culture, the process of how people use language to construct social meaning and how those processes influence linguistic structure as well as cross-cultural communication.

Grade Component: Grad LG/SNC Basis

**KOREAN 2065 - METAPHOR KOREAN LANG THOUGHT**

Minimum Credits: 3
Maximum Credits: 3
Metaphor in Korean language and thought is an introduction course to the study of meaning, which focuses on the basic findings in the field of conceptual metaphor research. Metaphor is pervasive in everyday life, not just in LG but also in thought and culture. Metaphors also play a role in ethnic and cultural identity. In this course, we will examine how metaphor differences across cultures affect how people in different cultures think and consequently use LG differently. Korean will be the main LG to be studied throughout the course but other LGs such as English, Japanese and Chinese will also be discussed in order to maintain cross-linguistic and cross-cultural comparisons.

Law - JD course offerings
LAW 5020 - CONTRACTS
Minimum Credits: 4
Maximum Credits: 4
What promises are legally enforceable? Why does the law enforce those promises? What does it mean to enforce a promise? This course explores those questions, using the basic concepts, principles, and doctrines of contract law, sometimes called "the law of broken promises." Specific topics include the requirements for formation of a contract (such as offer and acceptance), justifications for enforcing promises (such as consideration or detrimental reliance), justifications for denying or limiting enforcement (such as unconscionability or mistake), interpretation of contract terms, and remedies for breach of contract.

LAW 5024 - PROPERTY
Minimum Credits: 4
Maximum Credits: 4
Property law, broadly defined, governs relationships among people with respect to "things." These "things" include land ("real property"), tangible objects such as a casebook ("personal property"), and intangibles such as a publisher's right to prevent others from reproducing the original content in a book ("intellectual property"). The property course examines how property rights may be limited, in situations where more than one person has rights to the same piece of property, and in situations where one owner's rights must be balanced against the rights of the owner of a separate piece of property. Topics covered in the property course may include: modes of acquisition of property (e.g., Capture, find, creation), present possessory estates and future interests, co-ownership of property, marital property, landlord-tenant law, land sales, title recording systems, easements, restrictive covenants, nuisance, public land use regulation (including zoning, eminent domain, and the issue of regulatory takings), and global property issues.
Academic Career: LAW

LAW 5038 - ENERGY LAW AND REGULATION
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to energy law with emphases on public utility regulation, electricity, and the effect of fuel choice on electricity
regulation. The course consists of four modules. The first module on public utility regulation addresses the basic function of public utilities; the contemporary public utility scheme for energy; the basics of ratemaking economics. The second module on electricity regulation addresses the evolution of electricity regulation from the monopoly model to modern restructuring and competition; a technical understanding of electricity generation, transmission, and distribution; the functioning of electricity markets; Pennsylvania's framework for regulating electricity markets. The third module on the relationship between fuels and electricity regulation addresses the conversion of fuels to electricity; a comparative analysis of coal, wind and solar power; major issues in public utility regulation and litigation that relate to the transition from traditional to renewable fuels; Pennsylvania's framework for renewable energy. The fourth module consists of a brief introduction to natural gas regulation at the federal level and in Pennsylvania. The course provides students with an understanding of (1) public utility regulation of energy, with a focus on electricity; (2) the relationship between electricity regulation and fuels, especially coal and renewables; (3) the public utility regulation of natural gas; (4) the regulatory framework for electricity and natural gas in Pennsylvania.

**LAW 5041 - LAWYERING: A HISTORY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will survey the history of lawyering from ancient times to the present day. Students will be invited to meet Cicero and the Roman jurists, look inside medieval courtrooms to see English common lawyers and European civilians at work, experience the rhetoric of John Adams and Daniel Webster while considering the daunting challenges faced by the emerging bar in early America, and assess the economic, industrial and organizational conditions that contributed to the cultural ascendency of lawyers in the twentieth century United States. We will investigate both the historical successes of the legal profession and its failures, it's championing of great causes and its complicity in great injustices. We will look at lawyering in its changing social, ethical and technological contexts, examining how lawyers over time and in various national settings have constructed their identities, established their power, viewed their duty, and articulated their collective mission. We will investigate how lawyers have been trained, and how different methods of legal education have shaped them. We will learn about legal lives lived far away and right here in Pittsburgh. We will look at today's American bar, assessing its recent history as a business dominated by the rise of the billable hour, and at the end of the course we will peer into some of the possible futures awaiting attorneys working in a digital age.

**LAW 5043 - INT'L COMMERCIAL ARBITRATION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will begin with coverage of basic aspects of the law of international commercial arbitration, including arbitral jurisdiction, arbitration procedure, choice of law, and enforcement of awards. This will include coverage of the New York arbitration convention and the U.S. Federal arbitration act, along with a focus on the UNCITRAL model law on international commercial arbitration and the UNCITRAL arbitration rules. In order to provide a practical context for consideration of arbitration law and policy, we will work with the problem for the Vis International Arbitration Moot that will become available the first week of October. After a review of the problem, we will catalogue the major issues and each student will be assigned a topic from that list for his or her course paper. We will work through all of the arbitration procedure issues as a class, using the contributions of each student to build the arguments and analysis for each side in the Vis problem. We will also cover the basic substantive law issues raised under the UNCITRAL Convention on Contracts for the International Sale of Goods (CISG). Each student will also be assigned a position to be presented in a mock arbitration at the end of the semester, using the Vis problem studied during the semester. The Pitt law Vis Moot team for the following year may be selected at the end of the semester from the J.D. students in the course, consistent with announcements made prior to the beginning of the semester.

**LAW 5061 - PITT LAW ACADEMY**

**Minimum Credits:** 0  
**Maximum Credits:** 0  

This is a full-year course. Full credit is awarded upon completion of both fall and spring sections, no credit will be awarded until the completion of both. For determining full-time status each semester, equivalency is one-half of the total course credits. This speaker series on lawyers' roles will provide students, at the beginning of their law school careers, with exposure to and understanding of the variety of roles that lawyers play in the profession and society. The speaker series will feature 8 programs over the course of the academic year, and first year students are required to attend at least 6 of those programs during their first year. Each program, moderated by a full-time faculty member, features attorneys, judges, and/or people with law degrees working outside of law practice from different professional settings. These presentations should help first year students gain a better appreciation of the practical and intellectual aspects of different professional roles and to preview some of the important personal and professional issues and concerns that may confront them in the course of their careers.

**LAW 5076 - LEGAL ANALYSIS AND WRITING**

**Minimum Credits:** 4  
**Maximum Credits:** 4  

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

LAW 5082 - CLIMATE CHANGE AND THE LAW
Minimum Credits: 2
Maximum Credits: 2
This course examines the problems of climate change and how law and policy and corporate America are responding to them. The course begins by describing what is encompassed under the current "climate change" debate; considering what science can tell us about the climate change issue, including the uncertainties in that science and the significance and role of descent from the mainstream view of the science. It then considers, given the current state of the science, how we should assess the actions that should be taken to respond to this problem. That assessment should take account mitigation vs. Adaptation. The course also considers the legal responses to the issue of climate change. This course will discuss the united nations framework convention on climate change (UNFCCC), the Kyoto protocol, and the likely future of both. This course will discuss the domestic federal legislation with regard to GHGS as well as certain regional initiatives and voluntary commercial GHG reduction schemes. This part of the course will be examining the "Boomlet" in global warming litigation in federal and state courts looking at the administrative and tort actions pending in U.S. Courts. Finally, the course will address sustainability issues for business, including green building, carbon neutral strategies, certain esoteric accounting issues, some carbon trading issues. Lectures will include voluntary and NGO-driven business initiatives (proactive approaches) as well as certain secondary effects caused by climate change that affect businesses.

LAW 5089 - PUBLIC HEALTH LAW
Minimum Credits: 3
Maximum Credits: 3
Public health law touches the lives and livelihoods of every person. Understanding the intent, basic structure, and methods for employing the local, state, and federal laws governing public health activities will facilitate legal practice in a variety of disciplines, including: municipal, healthcare, environmental, and judicial practice. This is a survey course, intended to introduce students to the most commonly encountered national and world public health law issues. Specific topics include: an overview of the epidemiologic principles underlying public health law; police powers; balancing public and private interests at stake; privacy and confidentiality of public health information, emergency preparedness; search, inspection, embargo and condemnation of private property; abatement of nuisances and dangerous conditions; and the major federal statutes affecting public health. In addition, material concerning world public health issues will be presented to help students understand the community health benefit from comprehensive public health legislation. Finally, ongoing local public health law interventions will be analyzed using the basic principles introduced early in the course.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

LAW 5093 - THE LAW OF PROFESSIONAL SPORTS
Minimum Credits: 2
Maximum Credits: 2
Focusing on the 4 major professional sports leagues, this course will examine how the common law, state and federal statutes, and even certain constitutional doctrines have been applied to professional sports franchises, its players and agents, and its fans. The topics for discussion will include: the role and power of the commissioner; the importance of collective bargaining agreements, including uniform player contracts, in the development of a body of law governing the relationship between a player and his club; the current state of antitrust law in pro sports; the agent-player relationship; contract negotiations, including the salary arbitration process; the variety of intellectual property issues applicable to leagues, it teams and its players; the rights (or lack thereof) of pro sports fans, including the application of tort law principles to fan injuries; the attempts by pro-sports leagues and teams to control the off-field behavior of its players, and the approaches by the various leagues to regulate performance enhancing drugs.
Academic Career: LAW
Course Component: Lecture
LAW 5103 - EVIDENCE
Minimum Credits: 3
Maximum Credits: 3
This course is an introductory course on the rules of evidence and will focus on the federal rules of evidence. We will cover hearsay and its exceptions, relevance, the use of character evidence, cross-examination and impeachment, among other subjects.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5104 - CORPORATIONS
Minimum Credits: 4
Maximum Credits: 4
Basic survey course of corporation's law, including the laws on the formation, control, and management of corporations; and the duties of directors and officers in carrying out their responsibilities. There is limited discussion of federal securities laws, shareholder litigation, and the role of corporations in society.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5105 - FEDERAL INCOME TAXATION
Minimum Credits: 4
Maximum Credits: 4
This course will introduce the basic concepts found in the internal revenue code, as interpreted by the internal revenue service and the courts. We will explore the concept of "income," and specifically consider the difference between ordinary income and capital gain, the timing of income inclusion, and the determination of a taxpayer's basis in property (which relates to the calculation of income). We will also explore exclusions and deductions that may reduce a taxpayer's income. This course has two primary goals: first, to give the students a basic familiarity with the internal revenue code so that they will be aware of tax issues that may arise in their practice, and second, to prepare students who have (or acquire) a deeper interest in tax for more advanced courses in taxation.
Academic Career: LAW
Course Component: Lecture

LAW 5110 - ESTATES AND TRUSTS
Minimum Credits: 3
Maximum Credits: 3
This course provides a survey of the gratuitous, post-mortem transfer of wealth, including the substantive law of wills and trusts. Topics in estate law include probate and non-probate property; intestacy; bars to succession; constructive trusts; mental capacity; disclaimers; will formalities; holographic wills; revocation; integration; republication; revival; incorporation by reference; acts of independent significance; payable on death provisions; and predeceased beneficiaries. Topics in trust law include formation; parties; beneficiaries; resulting trusts; constructive trusts; discretionary trusts; trust protectors; self-settled asset protection trusts; and powers of appointment.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5112 - BUSINESS ORGANIZATIONS
Minimum Credits: 3
Maximum Credits: 3
This elective course surveys the law of modern business organizations, including corporations, limited liability companies, and partnerships. The course covers topics such as business planning, corporate governance, fiduciary duties, shareholder liability and rights, as well as transactions in shares. The course also provides exposure to a variety of subjects, including agency, corporate finance, corporate taxation, mergers and acquisitions, and federal securities laws. No exposure to accounting, economics, or finance is necessary or presumed. Due to overlapping subjects, students are not permitted to take this course if they already have taken agency & partnership.
LAW 5126 - CORPORATE FINANCE  
Minimum Credits: 3  
Maximum Credits: 3  
This course examines basic financial aspects of corporate matters. Covered topics include accounting, capital structure, portfolio theory, risk bearing, as well as valuation of derivatives, options, and securities.

LAW 5129 - FEDL COURTS & FEDL LITIGATION  
Minimum Credits: 3  
Maximum Credits: 3  
One of the defining features of the American legal system is federalism - the division of powers between the national and the state governments. This course deals primarily with two recurring problems in civil practice that have their roots in this division of powers. First, do one or both litigants have a choice between federal and state court, and, if so, how can the litigants maximize the likelihood of securing the preferred forum? Second, when does federal law trump state law? A dominant theme of the course is the relationship between legal doctrines and the practical consequences of those doctrines in light of existing (and possible future) institutional arrangements. In particular, defendants in civil cases often prefer federal court; plaintiffs tend to prefer state court. But the rules and doctrines that determine which side gets its preferred forum will often be invisible to the average lawyer. One purpose of this course is to alert students to the pitfalls that can trap the unwary; here, more than in other areas of the law, a little learning can be a dangerous thing. Representative topics include: the prerequisites for supreme court review of state-court judgments; elements of federal question jurisdiction; removal of cases from state to federal court; and the power of the federal courts to apply rules of law different from those applied in state courts. Attention will be given to litigation strategy (especially the choice of forum) as well as to critical analysis of the doctrines and statutes.

LAW 5132 - LAW AND HUMAN BEHAVIOR  
Minimum Credits: 3  
Maximum Credits: 3  
In order to be effective, lawyers must understand both their clients and the operation of the legal system. Often, legal analysis imbues both clients and the legal system with the qualities of rationality: clients engage in cost-benefit calculations of success and the standard of the legal system is the "reasonable person." Recent developments in the social and natural sciences raise questions about the sufficiency of these models. The standard definition of rationality may be too narrow - a client may want an apology from an adversary rather than just a monetary award - and clients and legal systems do not always act in rational ways. This course will provide students with concrete insights from the social and natural sciences to help them become lawyers better able to assess both clients and the workings of the legal system as a whole. Examples will be drawn from a wide array of legal contexts: from client contacts to jury selection to subtle forms of discrimination to judicial ideology. Emphasis will be on understanding human behavior both as a predicate for effective legal regulation and as a predicate for the values - including economic, ideological, and religious values - that inform voting and legislative determinations. Several school faculty who employ these insights in their scholarship will visit the class to discuss their work. The course's goal is to provide students with a richer set of analytic and practical tools for them to become more effective attorneys in whatever area they may come to practice.

LAW 5133 - UNDST LGL SERVC MKTPLC  
Minimum Credits: 2  
Maximum Credits: 2  
Today's increasingly competitive marketplace demands that new attorneys have an understanding of the commercial landscape of the legal services industry as complement to their substantive legal knowledge and as a means towards making a contribution to their firm, company or organization. This course is an exploration of the industry from three perspectives. The first is a birds-eye view that will examine macro-trends in the industry. The second is the view from the demand side of the industry where we will explore the types of issues driving demand for legal services, factors driving
the decisions to procure legal services, and how legal services purchasers/users evaluate the services rendered. Throughout the course we will
evaluate real-life, contemporary scenarios and interact with practicing attorneys, clients, and judges. The third is the view from the supply side of the
industry where we explore the sales, marketing, operations and soft skills associated with the provision of legal services in the law-firm and in-house
contexts.

LAW 5135 - COMMERCIALIZING NEW TECS
Minimum Credits: 3
Maximum Credits: 3
The key challenge addressed in this joint project course between the Katz Business School and the Law School is how to commercialize new
technologies. Commercialization is the process of transforming an invention (i.e. A new technique or artifact that performs a useful function) into an
innovation (i.e. A product or service that creates value in a specific use). Whether a new technology originates in a university, in an established
company, or with an individual inventor, several issues must be addressed in order to determine whether it is worth investing in further, and to decide
how the technology can be commercialized for maximum long-term value. We will focus on four types of analyses as input to a commercialization
strategy: (i) technology analysis, (ii) market analysis, (iii) competitive assessment, and (iii) business model evaluation. For each, you will be provided
with one or two practical articles, which outline an analytical tool or approach, and we will discuss their application to one of the cases. Although
we'll walk through these steps in the order listed, they will need to be conducted iteratively (e.g. As you learn more about market opportunities you
may wish to revisit your initial assessment of the technology's core elements). Throughout the course, law students will have the opportunity to assist
the team in assessing legal matters that impact commercialization (from intellectual property matters, to regulatory landscape impacts, to alliance
considerations) while also gaining an understanding of key business goals, strategies and tactics.

LAW 5138 - FEDERAL APPELLATE ADVOCACY
Minimum Credits: 3
Maximum Credits: 3
This course in federal appellate advocacy will select a recent case on appeal from a circuit court, where certiorari has been granted by the U.S.
Supreme court. There will be an emphasis in the course on the federal rules of appellate procedure, an examination of jurisdiction and standards of
review. Students will be paired up to write a brief, present oral argument, decide the case and write an opinion. There may be an opportunity to view
oral argument before the third circuit in Pittsburgh and arrangements will be made to allow students to visit the U.S. Supreme court to hear oral
argument on the selected case.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

LAW 5139 - TRANSIT LAW
Minimum Credits: 2
Maximum Credits: 2
This is a course on the law and legal principles used to create, operate and maintain mass transportation infrastructure. The focus is on the legal
functions and processes used in planning and operating mass transit and the rules and alternatives for spending government appropriated funds. This
course gives an overview of regulatory, procurement and grant practice. Also covered are public/private collaboration as well as private sector
participation in government assisted or sponsored projects, including the relationships between and among the federal government, state and local
governments and the private sector. This course provides an introduction to basic government contracts and regulatory practice in the context of mass
transportation.

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5142 - LGL WRTNG TRANSACTIONAL LAWYER
Minimum Credits: 2
Maximum Credits: 2
This course will introduce students to the craft of drafting transactional agreements. This course is meant to fill a void that currently exists between
formal law school education and actual work as a practicing attorney. Oftentimes, the first experience that young transactional lawyers have with
drafting agreements follows a familiar pattern: the young lawyer is given a form as a starting point, then asked to make changes to the form to "draft" the needed document. The young lawyer may successfully edit the party names and dates, but usually has little understanding of the rest of the agreement or even the basic business terms that the agreement must memorialize. Unfortunately, the realities of modern law practice may preclude inexperienced drafters from taking the time to properly hone their craft. This course will prepare students for entering a transactional practice by allowing students to practice drafting and editing agreements, examine strategies for avoiding ambiguities by crafting precise language, and work in a fast-paced, team-oriented environment.

**LAW 5143 - WATER & SHALE GAS DEVELOPMENT**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Water plays a critical role in the development of our shale gas resources. This course will examine the relationship between water and shale gas extraction. The emphasis will be on the life cycle of water used in shale gas well development, beginning with common law, statutory and regulatory rights and requirements governing the ownership and allocation of water resources, with particular attention paid to interstate compacts and basin wide water allocation mechanisms. The course will place an emphasis on emerging issues that attorneys face in practice and will include guest lectures by hydro-geologists, geochemists, and other professionals. Some of the issues that will be covered include: common law water quantity rights; basin commission water quantity regulations, and their impact on shale development's significant water withdrawals; the application of the clean water act and the state version of it (the clean streams law) to the shale extraction process; treatment and disposal of wastewater; groundwater contamination; local zoning and land use; and trends in shale-based litigation.

**LAW 5191 - THE LAW OF ART AND CULTURE**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will introduce the student, from an academic and practical perspective, to the body of law that regulates and is applied to artists, fine art and cultural property. Moreover, this class will survey legal and practical concepts relating to protection, acquisition, exhibition and sale of works of art, including: issues regarding copyright, first amendment, art censorship, moral rights, resale rights, art sale and purchase transactions, and online user generated content. Specific topics will include: contexts in which a legal institution must determine whether a particular object is a work of "art" or art of a particular type; 'artists' rights, including statutory and non-statutory moral rights and resale rights; problems of authenticity; licensing images, hyperlinking, art in social networking sites and other issues relevant to art and new media. Stolen art, including objects looted during World War II; developments in law and industry practice relevant to "cultural heritage," the association of particular objects with particular places or societies.

**LAW 5197 - ADVANCED TORTS**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
An in-depth study of the practical considerations and specialized rules which lawyers need to employ when handling cases such as auto accidents, product liability, medical malpractice, local and state government torts claims, and premises liability. The course will not only concentrate on various types of torts actions, but also on considerations which may be involved in all of those actions such as insurance coverage, emotional distress, bystander claims, damages, apportionment of fault and special duties. The course also will cover tort reform issues.

**Academic Career:** LAW

**LAW 5199 - INT'L DSPUTE RESLUTN PROCESSES**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course explores the dispute resolution methods and their application both internationally and in the United States with the emphasis being on the arbitration process. The globalization of the economy and the increasingly international aspects of life have promoted arbitration as a preferred means
of resolving international commercial disputes. The rise of alternative dispute resolution (ADR) in North America is mirrored abroad as numerous civil law countries enact domestic arbitration statutes. The course focuses not only on the theory and law of mediation and arbitration, but on its practical application. In addition to the traditional approach of reading cases, the course methodology explores all aspects of mediation and arbitration, including the decision to use ADR and the drafting of dispute resolution clauses. Attitudes of consumers, business entities and the legal profession, especially the interaction between the court systems and the treatment of arbitration are considered in depth. Students engage in advocacy skills in the representation of clients in classroom simulations. Course objectives include: to acquaint students with various arbitration and other dispute resolution process models available as alternatives or supplements to traditional litigation/adjudication; to enable students to analyze judicially-remediable disputes in terms of legal rights, defenses and remedies with litigants' goals, objectives or interests in mind; to enable students to make appropriate recommendations to clients. The approach is an interactive dialogue with role playing and exercises requiring student participation.

LAW 5200 - INT TO ACCOUNTING FOR LAWYERS
Minimum Credits: 1
Maximum Credits: 1
Introductory accounting for lawyers will provide students with a fundamental understanding of the principles underlying financial accounting. Additionally, students will gain an understanding of the development and analysis of financial statements including the balance sheet, income statement and statement of cash flow. Other topics will include a discussion of financial analysis and financial theory. The course is intended to equip students with the basic mechanics to review and analyze an entity's financial statements, identify significant issues and to form a general familiarity with financial statements to aid in preparing for litigation or assisting with business transactions.

Academic Career: LAW

Grade Component: Grad LG/SU3 Basis
Course Requirements: PROGRAM: School of Law

LAW 5201 - ADMINISTRATIVE LAW
Minimum Credits: 3
Maximum Credits: 3
It is next to impossible to practice law today without dealing with administrative agencies, federal or state, or the law they create. Indeed, more cases are adjudicated in administrative bodies than in the courts. The substantive law that is created and implemented by agencies is the subject matter of individual courses such as environmental law, securities regulation, taxation, and banking. It is the procedural/structural law that governs the creation and implementation of substantive law by agencies that is the focus of administrative law. We will discuss the different types of functions undertaken by agencies, for example, rulemaking and adjudication in all its forms and how those disparate functions determine the appropriate structure of decision-making. At the federal level, where we will focus our attention, the procedures that apply originate in a variety of sources, including the United States constitution, the administrative procedure act and other statutes, and agency rules. There is often a complex interplay among these sources of law, which will be one of the topics we will explore. Another is the relationship of agencies to the chief executive and the legislature, an area that implicates important constitutional doctrines, statutes, and executive orders. Finally, we will spend considerable time on the availability, timing, and scope of judicial review of agency action, including the doctrines of standing, ripeness, exhaustion of administrative remedies, and judicial deference to agency findings of fact, interpretations of law, and exercises of discretionary power.

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law

LAW 5210 - PATENT LAW
For over two hundred years the United States patent system has stimulated innovation by conveying time-limited exclusionary rights to inventors who adequately disclose their novel and nonobvious inventions to the public. Throughout this time, technological advancements in various industries have repeatedly confronted the patent system with fascinating policy and doctrinal challenges. In a constant effort to keep up with the pace of innovation and ensure that the patent system fulfills its constitutional purpose to promote the progress of useful arts, patent case law has become one of the most rapidly evolving and adapting areas of American law. Through study of judicial decisions and statutory provisions, this course will examine the substantive legal doctrine and policy underlying two primary aspects of United States patent law: (1) the requirements for obtaining a patent; and (2) the means by which an issued patent is enforced (and its validity challenged). Specific topics include patentable subject matter (including computer-implemented inventions and biotechnology), novelty, nonobviousness, utility, loss of right, disclosure requirements, patent claim interpretation, literal infringement, the doctrine of equivalents, prosecution history estoppel, defenses to patent infringement resulting in invalidity and/or unenforceability, injunctive relief, damages, and the unique role of the United States court of appeals for the federal circuit in shaping patent law.

LAW 5212 - BUS PLANNING, ENTREPRENEURSHIP & TECHNOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course will address key legal and business issues faced by entrepreneurs when establishing a commercial enterprise. Specifically, it will address the protection and development of ideas, the commercialization of technology, and the legal and business aspects involved in forming, funding, operating, and managing the emerging business enterprise. The course will be taught from a business planning perspective. Through participation in the course, students will be exposed to advanced business law concepts applicable to emerging companies in the business, technology, and medical fields.

Academic Career: LAW

LAW 5213 - CONFLICT OF LAWS
Minimum Credits: 3
Maximum Credits: 3
Disputes between parties from different states or countries and disputes having contacts with multiple jurisdictions raise a host of challenging legal questions, including: (1) which jurisdiction's law will govern the dispute; (2) whether and in what circumstances a judgment rendered in one state or country will be recognized and enforced in other jurisdictions; and (3) how courts should make these determinations. State laws, the federal constitution, and international and foreign law all play a role in deciding these issues, which can have a profound impact on the ultimate resolution of the controversy.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5216 - EMPLOYMENT DISCRIMINATION
Minimum Credits: 3
Maximum Credits: 3
This course will examine federal statutory law as it applies to employment discrimination, with an emphasis on discrimination based on race, sex, color, ethnicity, national origin, religion and age. The most prominent statutes in this area are Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, and an older civil rights statute from the Reconstruction era, 42 U.S.C. §1981. The course will explore the substantive meanings of "discrimination" under these acts, the models of proof for establishing a claim, the theoretical underpinnings of the statutes, and some of the procedural and remedial issues relevant to employment discrimination law.

LAW 5221 - JURISPRUDENCE
Minimum Credits: 3
Maximum Credits: 3
The legal academy has never waivered in its devotion to the idea that 'law' is something that can be the proper subject of theory-understood and explained and from that understanding, justified or found wanting. The parallel assumption has been that law, once unpackaged, could become the instrument by which we might socially engineer a better world. From langdell's laboratory of law, through llewyllyn's longing embrace of the cheyenne way, the process school of the mid-20th century, the neo-Marxist crits masquerading as nihilists, rumbling all the way through posner's arrogant version of microeconomics turned on law right up to the contemporary turn to evolutionary biology, different methods but the same holy grail. (Even the academy's infatuation with 'law and literature' was a project that assumed we could someday unlock the riddle of legal interpretation. In that sense it too was 'theoretical."
We will read representative works of both the scientists of law and the nihilists. The ideas they grappled with are fascinating, but also useful. After all, the study of jurisprudence is the study ultimately of the practicing lawyer's terrain.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5223 - ADVANCED TRIAL EVIDENCE
Minimum Credits: 2
Maximum Credits: 2
This course will focus on evidentiary issues that arise frequently in trials. Each week a vignette or series of vignettes, which address common trial evidence situations, will be assigned. The vignettes will be based on case files, in order to provide continuity throughout the course and for students to see the impact of evidentiary rulings on continuing cases. Each student will be responsible for weekly written assignments, which may include motions inlimine or outlines of direct and/or cross-examination of the witness(es) for vignette(s). Each student will also be responsible for preparing to offer timely and well-stated objections to the evidence sought to be introduced. Students will be required to understand the rationale for both the introduction of evidence and the objections thereto.

Academic Career: LAW

Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: LAW 5103; PROG: School of Law (LAWSC)

LAW 5224 - INSURANCE
Minimum Credits: 3
Maximum Credits: 3
The course will focus on insurance law and theory and the role of the state and federal courts in shaping insurance law based on perceptions of public policy (e.g., Should public policy preclude coverage for punitive damages? For intentional torts? For "criminal" acts that result in unintended consequences?). The course will survey significant categories of insurance, particularly liability and property insurance, as well as life, automobile, reinsurance, and the duties of liability insurers to defend their insureds in lawsuits and to make reasonable settlements of claims against their insureds. Insurance concepts will be examined in the context of recent events, such as the world trade center attack.

Academic Career: LAW
LAW 5225 - INTERNATNL BUSINESS TRANSACTIONS
Minimum Credits: 3
Maximum Credits: 3
This course analyzes basic international business transactions and the effects of U.S. Law, specific foreign law, and treaties on the conduct of the parties involved. The course covers issues of commercial law, regulation of cross-border transactions, dispute resolution, tax considerations, and antitrust law. Although a basic understanding of each of the areas of the law in the domestic context is helpful, there are no course prerequisites. Students are expected to develop an understanding of the U.S. Laws applicable to private international transactions and an awareness of the risks inherent in doing business in or with other countries and their nationals.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5226 - INTERNATIONAL LAW
Minimum Credits: 3
Maximum Credits: 3
This course explores how international law regulates, or attempts to regulate, relations between states, and between states and individuals. It therefore examines both classical and contemporary topics such as the sources of international law, rights and responsibilities of states, jurisdiction, the incorporation of international law into domestic law, individuals as bearers of rights and obligations at the international level (in particular human rights law and humanitarian law), the law of treaties, the law on the use of force and the role of the United Nations and the International Court of Justice in the peaceful settlement of international disputes. Several specific topics will be examined to illustrate the increasing impact of international law on domestic legal practice, and the influence of the United States on the development of modern international law.

LAW 5236 - PRE-TRIAL PRA-PLEADINGS DISCV
Minimum Credits: 2
Maximum Credits: 2
This course will focus on pre-trial practice issues that arise during the pleading and discovery phase of a civil case. Students will learn about a variety of substantive issues under federal and state law including pleading requirements the scope of discovery, various forms of discovery, privilege issues, and many other related issues. In addition to those and other substantive issues, great emphasis will be placed on giving students the opportunity to draft pleadings, argue discovery motions and take oral depositions.
Academic Career: LAW
Course Component: Lecture
LAW 5242 - PATENT LAW PRACTICE
Minimum Credits: 2
Maximum Credits: 2
A course designed for students with a special interest in patent law, and for those students preparing to take the patent bar examination. Students are taught claim drafting, rules of practice and procedure followed by the United States patent and trademark office, how to draft patent documents and how to write a patentability search report.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5245 - SECURED TRANSACTIONS
Minimum Credits: 2
Maximum Credits: 2
This course focuses on security interests in personal property, which are governed by article 9 of the uniform commercial code. Related sections in articles 1 and 2 will also be examined. The course primarily deals with the creation, perfection, priority and enforceability of security interests in personal property and fixtures, although it also deals with rights of secured creditors generally. The course examines: (1) the rights and remedies of the secured creditor and the debtor; (2) the mechanisms and law underlying obtaining perfected interests in collateral; and (3) the priority of the secured creditor over others such as other article 9 security interests holders, the bankruptcy trustee, sellers, buyers and federal tax liens. The treatment of secured parties in bankruptcy proceedings will also be covered.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5246 - SECURITIES REGULATION
Minimum Credits: 3
Maximum Credits: 3
This elective course surveys the legal and regulatory framework for publicly traded securities. The course covers the securities act of 1933, the securities exchange act of 1934, and state "blue sky" laws. This course focuses on procedural and substantive aspects of registration, distribution, and trading of securities. No exposure to accounting, economics, or finance is necessary or presumed. Students are not permitted to take this course unless they already have taken business organizations.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5251 - BIOTECHNOLOGY LAW
Minimum Credits: 2
Maximum Credits: 2
Virtually every aspect of our lives is touched by biotechnology, so this class is designed as an introduction to many of the critical issues related to biotech and society. Specific topics include genetically modified organisms (Franken foods), patenting life, vaccination laws, human and animal testing, bioterrorism, biological weapons laws, bio-prospecting, pharmaceutical pricing, FDA laws, as well as scientific (and investor) fraud in biotech. The class also focuses on the policy relationships between law and public health, as well as related underlying economic incentives that can create tension in the life sciences. The class includes a number of guest speakers from industry including biotech licensing professionals and an FDA practice attorney. This class will be useful for anyone planning to practice law related to the life sciences including patent law. The issues are presented in a non-technical manner so the class is accessible to anyone interested in the field. It may be helpful to have exposure to patent law in general but it is not required.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5252 - INT'L & EURPN LABOR MARKTS LAW
Minimum Credits: 2
Maximum Credits: 2
This course examines international and European labor markets law, including how the "European social model", as opposed to the Anglo-Saxon or American model, which has generated European union wide standards for employment and labor protection. While the course begins with an introduction to the international labor organization, the bulk of the course focuses on the European union as the cradle of pan-European labor and employment law. The course begins with the basic constitutional framework of the EU, and the essential characteristics of EU-law, including the pseudo-federal nature of the EU, supremacy of EU law, the theory of enumerated powers and subsidiarity, and the functioning of the European court of justice as a genuine supreme court. This is followed with a historical overview of the political and legal roots of the famed European social model, with particular emphasis on its international origin. In its institutional section, the course will explain the position of social policy in the founding treaties and the emergence of a European labor movement complete with European-wide collective bargaining agreements. In its substantive part, the course will address relevant and topical issues with a focus on business relevance, such as employee protection in a transfer or restructuring of companies, information and consultation rights, the European company, and the exponential rise of employment discrimination law.

LAW 5253 - TRANAT LITIGATN CRT AROND WRLD
Minimum Credits: 3
Maximum Credits: 3
This course covers the basic concepts a U.S. lawyer needs to understand when practicing law with an international dimension. The coverage will extend from U.S. understandings to that of foreign courts, including issues of discovery abroad, foreign understandings of relevant legal concepts, and international arbitration.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5258 - CAPITAL PUNISHMENT, THRY & PRA
Minimum Credits: 2
Maximum Credits: 2
There are few areas of law whose jurisprudence has been fully developed within a period of the last forty years. Eighth amendment jurisprudence relative to the death penalty in the United States is such an area of law. We will explore how the United States supreme court has approached the development of this jurisprudence, and include within our examination some elements of due process as well, to see how the court, out of whole cloth, has created a practical jurisprudence for analyzing the constitutionality of capital punishment, and why the court was motivated to do so. This jurisprudence provides students with a window to the tug between justices who view the constitution as a 'living' document that adapts to the times and the society, and those who view the constitution as a static outline of the powers of respective governments within a federal system to be understood as the framers of the document would have understood it. Additionally, this jurisprudence provides students with a window to the strengths and weaknesses of a federal system in which the interplay between the power of the federal government and the power of the state governments must be understood and respected, even within the context of a constitutional jurisprudence that recognizes the imperative of the supremacy clause.
Academic Career: LAW
Course Component: Lecture

LAW 5260 - INTELLECTUAL PROPERTY
Minimum Credits: 3
Maximum Credits: 3
In the information age, intellectual property (IP) law has taken on even greater significance. IP law is designed to encourage the production of certain
forms of information by granting property rights to the producers, enabling them to appropriate the value of the information they produce. In this course, we survey state intellectual property law (e.g., Unfair competition and trade secrets) as well as federal intellectual property law including trademark, patent and copyright. We examine some of the ramifications of recent technological developments on intellectual property law and some of the problems of international protection of intellectual property.

**LAW 5265 - LABOR LAW: PRIVATE SECTOR**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course, after a short review of American labor history, will focus almost exclusively on the national labor relations act, the nation's premier statute dealing with labor management relations in the private sector, and the model for many public sector state laws covering the field. The course deals with the rights of individual employees, employers, and unions with respect to concerted activity, unionization, the establishment of collective bargaining units, elections conducted by the national labor relations board, and the collective bargaining process. The course will also cover strikes, picketing and hand-billing by unions, the current restrictions or limitations on such conduct, and the administration of collective bargaining agreements, grievance processing, and the arbitration of disputes. We will study and critically examine procedural and substantive case law developed by the national labor relations board, and its impact upon labor-management relations in both unionized and non-union environments. The course concludes with a discussion of the future of labor relations. We will discuss more recent tactics employed by unions and management and engage in a debate as to whether and how the current labor laws should be amended. Classes will be a combination of both lecture and dialogue. We also will discuss critical issues with representatives from Pittsburgh's union and business communities.

**LAW 5272 - BANKRUPTCY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The study of bankruptcy law is the study of how the prospect and availability of bankruptcy affects legal relationships; therefore, bankruptcy attorneys must understand the full range of law, to determine the impact an insolvency proceeding has on the parties in interest and community at large. This course provides an introduction to federal bankruptcy law under the bankruptcy code of 1978 as amended, title 11 U.S.C.A. The code was substantially changed in 2005 and the course will deal with the revisions. The course focuses on substantive provisions of the bankruptcy code that apply in all varieties of bankruptcy proceedings and some of the associated rules of procedure. Covered topics include eligibility for federal bankruptcy relief; commencement of bankruptcy proceedings; jurisdiction and procedure; defining property of the bankruptcy estate; the automatic stay; adequate protection; discharge and discharge ability of debts; priorities; allowing, valuing and estimating claims; selected issues usually encountered in business, such as executory contracts and leases; the trustee's avoiding powers; set-off and recoupment; professionals. The course proceeds by analysis of problems and cases. Familiarity with the law of secured transactions (especially article 9 of the uniform commercial code) is necessary.

**LAW 5275 - INT'L & FOREIGN LEGAL RESEARCH**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Finding the law of foreign places, knowing the resources produced by international entities, and searching within the variety of documents that govern our world can qualify you for some of the best jobs in the legal market. In this one credit course you will acquire those skills while completing five short research projects and compiling your own vade mecum for future reference.  

**Academic Career:** LAW
LAW 5276 - PATENT LITIGATION
Minimum Credits: 2
Maximum Credits: 2
This is an advanced, participation-oriented course that addresses issues that arise in patent litigation. The participation activities will include preparation and argument of preliminary and procedural motions, discovery practice, for example, preparation of protective orders, written discovery, participation in mock depositions, and preparation and argument of pretrial and dispositive motions, and a brief introduction to trial and appellate work in patent cases. Class time will involve both lecture and discussion, with substantial time devoted to mock situations using an adversarial team structure.

Course Requirements: PREQ: LAW 5209 or LAW 5242 or LAW 5260; PROG: School of Law (LAWSC)

LAW 5282 - NATIONAL SECURITY LAW
Minimum Credits: 2
Maximum Credits: 2
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5283 - MENTAL HEALTH LAW
Minimum Credits: 2
Maximum Credits: 2
This course provides an introduction to the laws and issues that affect individuals with mental illness, many of whom find themselves in the criminal or civil justice systems. Emphasis will be on the issues surrounding civil commitment and the emerging use of treatment courts on the criminal side. This will require a review of Pennsylvania's mental health procedures act and other state and federal statutes, cases, and regulations. Students will be permitted to attend a session of mental health court.
Academic Career: LAW

Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5290 - EMPLOYMENT LAW
Minimum Credits: 3
Maximum Credits: 3
This course discusses select areas of employment laws and considers both legal principles and their applications. (The course will not cover labor law.)
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5291 - M & A TRANSACTION PRACTICE
Minimum Credits: 2
Maximum Credits: 2
**LAW 5294 - MINING LAW, HISTORY & PRACTICE**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Mining law may seem a niche area- a "world apart which one can quite easily go through life without ever hearing about," as George Orwell said of mining-however, it is a unique combination of administrative law, employment law, contract law, tort law, and health and safety regulatory law. Federal regulatory agencies are increasingly the site of where the action is, and using mining law as a means of understanding this vast area of law will be of use to all students. 
Over the period of this course, students would be introduced to the three primary aspects of mining law: 1) The history of mining, mining disasters, and passage of mining legislation in the United States; 2) Key elements of federal mining legislation; 3) The interpretation and evolution of mining law in the Commission and Courts.

**Academic Career:** LAW  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3  
**Course Requirements:** PREQ: LAW 5112 or LAW 5141

**LAW 5295 - EXPERT WITNESS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
In recent years, the use of expert witnesses has proliferated as both civil and criminal litigation have become more complex and technical. In this course, students will learn when expert testimony is needed; where to find appropriate experts; how to work with the expert to develop a theory of the case; and many more issues leading up to the actual trial of the case. Once the case reaches the courtroom, students will learn how to organize and present their own expert's testimony in a clear and concise fashion, and how to pursue the challenging task of "doing battle" with the opposing expert. In the end, students will achieve a greater appreciation for the subtleties of expert testimony, while at the same time acquiring the tools to deal with witnesses who speak in technical and unfamiliar language.

**Academic Career:** LAW  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3

**LAW 5296 - CORPORATE GOVERNANCE**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will examine the internal structures, processes and standards of behavior that are required by law in the governance of corporate organizations, utilizing a series of hypothetical problems. Particular attention will be given to the corporate director's duties of oversight, care and loyalty, to the shareholders' ability to enforce those duties, and to the concept of fiduciary "independence." Some features of the Sarbanes-Oxley act of July 2002 and related rules will also be considered.

**Academic Career:** LAW  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3  
**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5297 - WORKERS' COMPENSATION**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course deals with the law, theory and practice of workers' compensation under state and federal administrative programs, including the Pennsylvania and other state acts; longshore and harbor workers' compensation act (LHWCA); federal employees' compensation act (FECA); and the federal employers' liability act (FELA). The student will study the essential aspects of such laws, including their development and purpose, coverages, the various levels and varieties of benefits provided and how claims are established and enforced. Special emphasis is placed on how such laws affect the rights of individuals to other remedies such as the ability to sue in tort or assert discrimination claims; how compensation programs are implicated in contemporary efforts to reform healthcare coverage and delivery; and the role workers' compensation plays in occupational safety and health. The student will become familiar with the uniform policy of insurance for compensation coverage and how compensation coverage and other regulatory requirements are policed by governmental authorities. A pervasive theme of the course is the status of workers' compensation as a unique hybrid of administrative law and tort, with the consequent effects of such status on the law, theory and practice of the field.

Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

The U.S. Food and drug administration has the regulatory mandate to protect the American food supply, and to ensure that drugs are safe and effective for the purposes for which they are prescribed. This course will survey selected topics in food and drug law, including the new drug approval process, regulation of food additives and carcinogens, food labeling and nutrition, prescription vs. Otc drug status, and restrictions on pharmaceutical marketing. Related legal standards affect all of us as consumers in everyday life, and have even greater impact in circumstances like end-of-life decision making. In examining food and drug law issues, we will focus on the tension between information gathering, risk regulation, and paternalism as themes in FDA policy making.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5300 - FOOD AND DRUG LAW
Minimum Credits: 1
Maximum Credits: 1
This course will examine the law and practice concerning payment systems. The course examines the state and federal laws and cases governing negotiable instruments such as promissory notes and checks (articles 3 and 4 of the uniform commercial code, reg cc, and check 21), letters of credit (UCC article 5 and uniform customs & practices 600), electronic funds transfer and credit and debit cards (UCC article 4a, the federal electronic funds transfer act, expedited funds availability act, truth in lending act, the consumer credit protection act and the various applicable regulations, such as reg cc, reg e, reg z and reg j).

Course Requirements: PROQ: LAW 5101 ; PROG: School of Law (LAWSC)

LAW 5301 - CONSTITNL LAW: FIRST AMENDMENT
Minimum Credits: 3
Maximum Credits: 3
When we think of freedom of speech, we generally think of protest, dissent and political controversies. There is good reason for this; robust discussion of issues of public policy and candidates for public office is an essential element of democratic self-governance. Today, however, the first amendment is also invoked - often successfully - in a variety of other contexts. Can the federal government limit tobacco advertising? Can a school punish students for "cyber-bullying?" Can a city ban billboards for adult entertainment businesses? This course will provide a detailed examination of first amendment doctrines and their application in a wide variety of contexts, both traditional and contemporary. Topics will include: political speech, obscenity, libel, commercial speech, regulation of electronic media, limitations on the "time, place, and manner" of expression, symbolic speech, and rights of association. Some comparisons will be made between first amendment doctrines and other areas of constitutional law.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROQ: LAW 5101 ; PROG: School of Law (LAWSC)

LAW 5303 - COMMERCIAL PAPER AND BANKING
Minimum Credits: 2
Maximum Credits: 2
This course will examine the law and practice concerning payment systems. The course examines the state and federal laws and cases governing negotiable instruments such as promissory notes and checks (articles 3 and 4 of the uniform commercial code, reg cc, and check 21), letters of credit (UCC article 5 and uniform customs & practices 600), electronic funds transfers and credit and debit cards (UCC article 4a, the federal electronic funds transfer act, expedited funds availability act, truth in lending act, the consumer credit protection act and the various applicable regulations, such as reg cc, reg e, reg z and reg j).

Course Requirements: PROQ: LAW 5101 ; PROG: School of Law (LAWSC)

LAW 5304 - COMMERCIAL TRANSACTIONS
Minimum Credits: 3
Maximum Credits: 3
This course explores the primary U.S. Legislation governing agreements to transfer an interest in goods -- article 2 of the uniform commercial code. It emphasizes aspects of UCC article 2 that are not covered in the first year contracts course. Subjects covered include applicability of article 2, selected contract formation rules; warranties; acceptance, rejection and revocation of acceptance of goods; risk of loss; excuse for failure to perform;
and remedies for breach.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5308 - EDUCATION LAW
Minimum Credits: 3
Maximum Credits: 3
Consists of detailed considerations of selected practical and theoretical legal problems in the area of education. Among the topics will be student discipline and student rights; the rights and duties of professional personnel under probationary and tenure appointments; selection of school board members; powers and duties of the board of education; internal and external authority with respect to such issues as curriculum, admission, and purpose. Involves extensive constitutional analysis of the appropriate balance among divergent need of the state, the family and the child.

Academic Career: LAW

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5311 - LAW AND ETHICS OF LAWYERING
Minimum Credits: 3
Maximum Credits: 3
The usual vantage point of the law student and the lawyer is one outside the system of law. Law is something we study, shape, use, support, attack, change, or act upon in one way or another. But this vantage point is an illusion. This course examines the boundaries of that illusion. It seeks to make manifest what has been implicit all along: we, too, lawyers and law students, live within a world of law that demands our attention and response—a world of law that shapes our identities and relationships, threatens our disobedience with sanctions, and expresses some sense of the collective morality through which we can test our personal morality and commitment. The course examines the content of the law that governs the conduct of lawyers, including for example, agency law, criminal law (what constitutes aiding and abetting a client's fraud?), Tort law (duties to clients and to third parties), civil procedure (the demands of rule 11), and the codes of professional responsibility. It examines the world that law creates, and in which it operates: the criminal justice system, a corporate boardroom, law firms, and the law school.

LAW 5319 - LAWYERS IN AMERICAN CULTURE
Minimum Credits: 3
Maximum Credits: 3
Lawyers like to think of themselves as members of one of the most helpful and important professions in American society. All too often, however, we encounter suspicion, derision or open hostility, not to mention nasty jokes. Public and private criticism of lawyers in the United States has become
noticeably more intense in recent decades, but we have rarely attempted to survey its range, explore its roots, assess its legitimacy, or evaluate our
own responses to it. This course proposes to do these things by examining characterizations and representations of lawyers in American culture from
colonial times to the present day. We will relate changing views of American lawyers and lawyering to shifting social and professional
circumstances; we will also explore the impact of those circumstances on fictionalized depictions of lawyers in American plays, novels, films, radio
and TV, humor, art and song. We will consider what members of other prominent groups in American society, from 17th Puritan clergy to 20th
century businessmen have said or alleged about lawyers. We will also discuss how, where and with what effect lawyers have presented, promoted
and defended themselves before the American public. We will conclude the course by considering how lawyers might learn from past experience and
leverage the opportunities and challenges of 21st century law practice to restore or at least improve their public standing.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5320 - LITIGATION STRATEGY & PLANNING
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the planning that a litigator must do throughout the life of a case in developing strategies for the conduct of the litigation. It
covers in part taking a case, anticipating pretrial procedures, preservation of evidence, deciding on causes of actions, obtaining expert witnesses,
discovery strategy, motions practice, development of trial themes, demonstrative evidence, jury selection, order of witnesses, and
settlement considerations.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

LAW 5324 - INSURANCE
Minimum Credits: 2
Maximum Credits: 2
Among the topics to be covered are the nature and function of insurance, insurance contract formation and meaning, and insurance regulation. Some
specific attention will be paid to particular types of insurance, including fire and first party insurance, life insurance, liability insurance, and
automobile insurance. Additional issues considered include coordinating multiple coverages and the secondary markets. Some special emphasis is
placed upon toxic tort and environmental coverage cases.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5325 - FEDERAL TAX PRACTICE & PROCEDURE
Minimum Credits: 2
Maximum Credits: 2
This course will be conducted by two experienced practicing tax lawyers. The principal subject matter will be an examination of federal tax practice
and procedure with particular emphasis upon issues of current importance and interest to tax counsel. The faculty will also cover material relevant
and important to students who participate in the law school's low income tax clinic. In addition to procedural matters, the course will delve into
matters of tax policy and issues of particular interest in tax litigation and tax enforcement.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: LAW 5105; PROG: School of Law (LAWSC)

LAW 5328 - COPYRIGHT
Minimum Credits: 3
Maximum Credits: 3
Copyright law deals with legal protection for certain kinds of expressive work -- literature, music, film, photography, and computer software, among
other things -- which is an essential element of modern culture, knowledge, and communication. The copyright law course will teach you about
many roles that copyright law plays in constructing businesses, markets and other institutions for creating, distributing, and consuming that work. For
authors and publishers, how does copyright law help them make money based on their creative works, or based on others' creative works? For readers
and consumers and society as a whole, how does copyright law preserve the power to access and use knowledge? The course will teach those things
in the context of teaching the skills of copyright lawyering. How do practicing lawyers work with clients? How do practicing lawyers develop and
exercise professional judgment? How do practicing lawyers solve copyright problems? The course will put students in the role of practicing lawyers
and teach them to think, write, and act as lawyer's generally and especially as copyright lawyers.

2351
LAW 5330 - EMPLOYEE BENEFITS
Minimum Credits: 3
Maximum Credits: 3
This course examines the law of employee retirement benefits as well as welfare benefits, chiefly health care benefits. The course will focus on the federal employee retirement income security act of 1974 (Erisa). Close attention will be paid to the statute and the case law that has developed to explain and apply that statute. Classes will feature detailed discussions of the relevant statutory provisions and the resulting case law. Students will be expected to discuss the statute, cases and the problems in the assigned case book. The course is designed to make students understand how federal law governs and protects pensions, retirement benefits such as 401(k) plans, and health care benefits for employees, retirees and their spouses and dependents.

LAW 5336 - LAND USE
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide students with a basic introduction to the mechanics and legal theories underlying land use controls. The course will strive to go beyond the theoretical by presenting a series of guest speakers (ranging from judges and zoning officials to land use planners and civil and transportation engineers) who deal with land use issues on a daily basis. Students will also be provided an opportunity to observe zoning board and court proceedings first hand and prepare class projects and papers based upon these proceedings. The course will emphasize the inter-relationship and conflict with environmental regulations. Class discussions and projects will focus upon recent judicial and legislative developments in land use law.

LAW 5339 - LAW OF DISABILTY DISCRIMINATION
Minimum Credits: 2
Maximum Credits: 2
This course will provide in-depth analysis and discussion of the major federal disability discrimination statutes, including the Americans with disabilities act, the individuals with disabilities education act, and section 504 of the rehabilitation act. Readings and class discussions will focus on the application of these laws to issues such as employment, public accommodations, education, architectural barriers, transportation and insurance. The course will explore how disability discrimination statutes interact with other statutes, such as the social security act, the family and medical leave act, and the genetic information nondiscrimination act.

LAW 5340 - ENVIRONMENTAL LAW
Minimum Credits: 3
Maximum Credits: 3
This course focuses on domestic environmental law and, in particular, on federal law rather than state law. The diverse and technical nature of modern environmental law is such that, in practice, lawyers often specialize in very narrow areas. Nevertheless, the same or similar moral, scientific, and policy arguments familiar to one area of the law are found in many of the others and similar regulatory approaches have been adopted or proposed for adoption to deal with very different types of environmental hazards. This course will focus its attention on the clean air and water acts, the national environmental policy act, the resource conservation and recovery act, the comprehensive environmental response, compensation, and liability act, and wetland protection, with passing coverage of various federal public land management statutes. We will explore the basic regulatory and non-regulatory approaches currently in place, including market-based systems to achieve better environmental quality, as well as proposals for changes to those approaches. A significant portion of the course will also be devoted to exploring issues presented by government and citizen suit enforcement of environmental laws. While administrative law is obviously relevant to much of environmental law given the fact that it is agencies which make and administer the law involved, the course will offer students an overview of administrative law principles which will be sufficient background for the purposes of this course.
LAW 5341 - ENVIRONMENTAL LAW 2
Minimum Credits: 3
Maximum Credits: 3
Allows students specializing in environmental law to concentrate on the clean air act.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5347 - ELDER LAW
Minimum Credits: 3
Maximum Credits: 3
Elder law examines the aspect of aging that impact law and public policy. The law attempts to protect the elderly and grants rights and privileges to them. In this course we will examine and evaluate the interplay of law and public policy as we survey significant legal issues and governmental programs such as social security, Medicare, Medicaid, long-term care, guardianship and mental capacity, and other selected topics.

Academic Career: LAW

LAW 5355 - NON-PROFIT ORGANIZATIONS
Minimum Credits: 2
Maximum Credits: 2
This class will survey the state and federal laws governing nonprofit tax exempt organizations. The course will examine the formation of nonprofit corporations under the Pennsylvania nonprofit corporation law of 1988, principles of corporate management, and options for fundamental organizational change. In addition, the course will analyze the process of qualifying for exemption under the internal revenue code and under the laws of Pennsylvania. Issues of private inurement, unrelated business income, charitable giving and fundraising regulations will be discussed. The course will include statutory and regulatory analysis, selected case law and case studies based on actual NPO's.

Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5359 - WORKERS' COMPENSATION PRACTCM
Minimum Credits: 2
Maximum Credits: 2
The student undertakes this practicum concurrently with the workers' compensation course taught by adjunct professor Torrey. The practicum is not a requirement of the workers' compensation course. The workers' compensation course provides the student with an exposure to the history and theory of the law, a survey of the different state and federal systems, and the manner in which employers insure for workers' compensation. The practicum works as a supplement, and provides the student with firsthand exposure to and activity in the field. The student will observe lawyers meeting with clients and evaluating their cases. In addition, the student will learn how lawyers communicate and/or work with physicians, and how employers contesting claims obtain and present rebuttal medical evidence. The student will be introduced to the practice of taking trial depositions of medical and other experts, and have the opportunity to attend a deposition to observe attorneys at work. The student will also have the opportunity to attend hearings and observe the procedures of the opposing attorneys and the judge. In addition, the student will gain an understanding of the specific petitions that are advanced by the worker prosecuting the claim and the employer and/or insurance company that has contested entitlement. The participant in the practicum will be instructed in how to prepare written legal argument to the workers' compensation authorities, and briefs to the
appeals courts. The student will also gain exposure to current practices surrounding evaluation of workers' compensation cases for possible lump sum settlement.

**LAW 5364 - ADVANCED BANKRUPTCY**  
Minimum Credits: 3  
Maximum Credits: 3  
Lectures on chapter 11 issues and procedures will set the stage for what is going to happen in the class. Practicing attorneys or other professionals will be invited when the issues involve direct participation with a client and decisions that must be made from the business or legal side of the case. Lectures will cover the theoretical underpinnings to the bankruptcy code and rules, as applicable, and illustrate the points with appropriate case law. Discussion will cover the nature of chapter 11 reorganization, kinds of relief available in business cases, need for cash, why certain motions are needed early in the case whereas others wait, how the business issues interplay with the bankruptcy case, pre and post filing issues, solicitation of creditors committee, plan negotiation process and more. Students will be required to read and analyze the relevant statutory text and rules and relevant cases. They will be assigned certain drafting work and/or papers to write regarding the issues involved. "Papers" may take the form of legal briefs. Each student will be required to argue on behalf of a "client" an assigned topic. To simulate the practice of law, students will file all assignments on the bankruptcy court's test data base for electronic filing.

**LAW 5365 - INTRO RUSS & UZBEK LEGAL SYS**  
Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to introduce students to the legal systems of the Russian federation and Uzbekistan. The foundation of the legal systems of these countries is almost identical, and by comparing one country's system to another, students will become more familiar with civil law systems. Special attention will be given to constitutions, court systems, the role of judges, state prosecutors, courtroom advocates and lawyers, as well as to the important commercial laws and treaties. I will use examples from my professional experience to give my students a realistic view of the legal systems of these countries. The class is intended to enhance student awareness of the legal environment and issues that often result from a decision to engage in relations or do business across national boundaries. Students must be prepared to actively discuss the assigned reading or other material in class each week.

**Academic Career:** LAW

LAW 5371 - PARTNERSHIP TAXATION
Minimum Credits: 3
Maximum Credits: 3
This course involves the study of the federal income tax treatment of partners and partnerships. We will examine the tax issues that arise in connection with the formation, operation, and liquidation of partnerships. We will also study the tax consequences of acquiring or transferring a partnership interest and of transactions between partners and partnerships. Some attention may be given to comparisons with the tax treatment of C and S corporations.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: LAW 5105; PROG: School of Law (LAWSC)

LAW 5378 - JUVENILE JUSTICE
Minimum Credits: 3
Maximum Credits: 3
For over a century this country has wrestled with how to treat youth in the juvenile justice system. This struggle centers on the tension between recognizing youth as developmentally distinct from adults, thus deserving of second chances and rehabilitative services, and historically and culturally driven notions of accountability, justice, and safety. This course will explore this tension and examine how that internal struggle has shaped the building of the juvenile justice system as a separate legal institution governed by unique criminal law, procedure, and policy. Students will gain an in-depth understanding of juvenile justice from both policy and legal perspectives through analyzing case decisions, social science research, legal theory, and empirical studies. During this course the class will probe questions such as: what does juvenile justice actually look like? How does the social construction of adolescence impact legal definitions? What role do the advances in science on brain development play in the administration of juvenile justice? How has race, gender, and class impacted juvenile courts' jurisprudence? What factors have influenced the court's ever shifting understanding of culpability by age? Where are the overlaps and intersections between the juvenile justice and adult criminal justice systems?

LAW 5391 - CIVIL PRACTICE CLINIC - ELDER
Minimum Credits: 7
Maximum Credits: 7
The civil practice clinics offer students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering. Students enrolled in the clinics are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Elder law clinic representation focuses on issues of capacity in medical treatment, mental health law, estate planning, contractual relations, and property management. Emphasis will be placed on long term planning, including estate planning and medical assistance (Medicaid) eligibility. Litigation skills focuses on practice in the orphans' court division, for example, guardianship proceedings and settlement of small estates. Students will develop practical skills such as interviewing, counselling, research, drafting, negotiation, and trial practice skills. Students may work in teams to represent their clients. The classroom component is an integral part of the clinic experience, consisting of a series of discussions focusing on substantive law, policy, and practical skills training. The skills component of the course will be taught in tandem with the health law clinic. Experts in the fields of social work, psychology, psychiatry, and medicine will provide insights into interdisciplinary issues.

LAW 5393 - CIVIL PRACTICE CLINIC - HEALTH
Minimum Credits: 7
Maximum Credits: 7
The civil practice clinics offer students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering skills. Students enrolled in the clinics are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Health law clinic students represent their clients at all stages of seeking disability benefits through the social security administration. Students also represent clients in orphans' court in guardianship cases and in the US District Court on health related matters. They interview clients initially and if the case is accepted, proceed to gather and interpret evidence, develop case theory, prepare hearing memoranda, and represent clients at hearings or in court. The classroom component is an integral part of the clinic experience and consist of a series of lectures and discussions focusing on substantive law, policy, and practical skills training. Classroom simulations are designed to ready students for client work, and include an ADR exercise. The skills component of the course will be taught in tandem with the elder law clinic. Students may work in teams of two.

LAW 5395 - HEALTH LAW AND POLICY
Minimum Credits: 3
Maximum Credits: 3
This is a survey course of fundamental issues, covering a broad range of topics, in health law and policy intended both for students who merely wish to become acquainted with the field, and for those who plan on concentrating in the field. For those planning on concentrating, this course provides a foundation for in-depth courses such as health care business transactions, health care fraud and abuse, health care antitrust, and financing in the healthcare industry. For students not concentrating in health law, it provides an introduction to the multitude of issues with which lawyers working with clients in the health care industry need to be familiar. The course examines the role that law plays in achieving three societal goals: increasing access to health care, controlling health care costs, and assuring quality of health care. Specific topics are the structure of the health care system (including integrated health care delivery systems); regulating quality through licensing, staff privileges, and accreditation; labor and employment issues; the legal obligation to provide treatment, including Emtala); tax exemption and charitable purposes; health care reform; state and federal regulation of health insurance and managed care (including Erisa); federal initiatives to expand private insurance coverage (including HIPAA, COBRA and ADA); Medicare/Medicaid eligibility, benefits, and reform efforts; health care fraud and abuse (false claims act, anti-kickback statute, stark); and antitrust issues in the health care industry. This course does not examine issues of professional liability, and it does not cover ethical issues in health care (covered in, which is the subject of "bioethics and law").

LAW 5398 - FAMILY LAW CLINIC
Minimum Credits: 4
Maximum Credits: 4
The family law clinic is a two semester clinic. Students will receive a grade at the conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a w for the course, thus nullifying the grade for the prior semester. Students will
receive 4 credits per semester. Classroom study generally includes instruction in client interviewing, client counseling, custody, paternity and child support substantive Pennsylvania law and custody and child support litigation procedures in Allegheny county. Custody mediation techniques are also examined. In clinic, under faculty supervision: students will interview clients with regard to Pennsylvania custody and child support law. Students will, as legal interns certified by the Supreme Court of Pennsylvania, interview, counsel and assist clients in certain proceedings in the family court of Allegheny county dealing with matters of child custody and support. Students may in the course of their clinic duties prepare and deliver educational lectures concerning the substance of family law to client groups as, if and when the need arises, thus providing the student the opportunity to teach. Students may prepare briefs, motions, complaints, petitions or other court documents depending upon the legal needs of the clients that the student assist. Students will prepare research memos to be presented to all the students at the clinic review meetings. Second semester students will undertake to mentor incoming students in family law court procedures.

**Academic Career:** LAW  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PREQ: LAW 5219; PROG: School of Law (LAWSC)

**LAW 5402 - CRIMINAL PROCEDURE II**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Course is designed to give students especially interested in the criminal area an opportunity to develop appellate advocacy skills while being exposed to relatively sophisticated concepts of criminal procedure. Students participate in mock-trial exercises and serve as mock appellate judges. Problems used in the course will relate to various topics among which are search and seizure, pre-trial publicity, speedy trial, and double jeopardy.

**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5404 - CYBERSPACE AND THE LAW**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will examine legal and public policy issues that pertain specifically to the existence, operation, and governance of the network of networks that we call "the internet" and the metaphorical experience that we sometimes refer to as "cyberspace." What legal and policy problems are unique to the internet and cyberspace? When and how should "ordinary" legal problems be treated differently if they concern the internet or cyberspace in some respect? Specific topics are expected to include the construction and definition of the internet; internet governance, including domain name regulation and network neutrality; and network and information security. It is expected that the course will not consider intellectual property topics, freedom of expression topics, or jurisdictional (civil and criminal procedure) questions. The course will focus primarily on public policy questions wrapped up in legal questions, rather than on principles of law as such.

**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5405 - LEGAL PROFESSION**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This course will consider the responsibilities and obligations of an attorney to his or her client, the court and the legal system. Emphasis will be placed on the rules of professional conduct which have been adopted by the Pennsylvania Supreme Court as the standard of conduct for all attorneys admitted to practice within the commonwealth. Classroom meetings will focus on the common ethical problems which attorneys face including the scope of the duty to zealously represent your client; responsibilities owed to the courts and to other parties that may conflict with your client's interests; what decisions are made by the client and what decisions are made by counsel; potential conflicting responsibilities of counsel to his or her insurance company and the insured; potential conflicting responsibilities of corporate counsel to the corporation and the corporate officers; disqualification of counsel; the scope of the attorney-client privilege; confidentiality requirements; fee arrangements; withdrawal from representation; competency requirements; and pretrial and trial conduct.

**LAW 5408 - HEALTH CARE FRAUD AND ABUSE**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
A variety of federal and state laws prescribe requirements for healthcare providers who seek reimbursement under governmentally-funded healthcare programs. Violations of these requirements can give rise to civil and criminal penalties. Penalties may be imposed through administrative proceedings or through law suits brought either by the government or by private parties (‘qui tam’ actions). This course will examine the major federal legislation 'the Medicare and Medicaid anti-kickback statute, the false claims act, and the Stark I and Stark II legislation and regulations, as well as parallel state enactments.

**Course Requirements:** PREQ: LAW 5395; PROG: School of Law (LAWSC)

**LAW 5416 - GERMAN FOR LAWYERS**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
This beginners' course in the German language will present the student with a basic vocabulary, the fundamentals of German grammar, and legal terminology through reading, writing, listening and speaking experience.

**Academic Career:** LAW  
**Course Component:** Practicum  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5417 - LAWYERING PROCESS SUMMER CLINC**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
Students will be able to gain live client experience in performing an ensemble of essential lawyering skills, including: interviewing, counseling, negotiation, document/pleading drafting, and representation before the court of common pleas. Modeling, training and supervision will be provided by experienced staff attorneys at the field-based setting in Washington and the professor in a one-hour weekly group review meeting at the law school/online through Lync. Family law ‘ protection from abuse, custody, divorce, and child dependency ‘ will be the principal area of practice, with students provided preparatory substantive instruction/materials by staff attorneys and professor. Family law is not a required prerequisite. Scheduling of clinical hours will be adjusted to accommodate each student's other work commitments. Transportation costs associated with travel to/from the office will be reimbursed.

**Academic Career:** LAW  
**Course Component:** Clinical  
**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: School of Law (LAWSC)
LAW 5422 - ALTERNATIVE DISPUTE RESOLUTION
Minimum Credits: 3
Maximum Credits: 3
Legal and other disputes are increasingly resolved by dispute resolution processes other than litigation. Given this trend, it is important for law students to be familiar with these alternative processes, such as arbitration and mediation, and the benefits and risks they present. At the same time, these alternative processes require creative and interdisciplinary problem-solving perspectives and skills. This course begins with an overview of problem-solving approaches, and is followed by the study of arbitration, mediation, and hybrid processes. The course emphasizes interactive student discussion and activities, including role-plays, exercises, and presentations that simulate professional activities of lawyers, arbitrators, mediators, and clients. The classes build on each other, so that knowledge that we acquire in the earlier classes will be integrated into our materials, discussion, and activities in later classes.
Academic Career: LAW
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5424 - INTERVIEWING AND COUNSELING
Minimum Credits: 2
Maximum Credits: 2
Proficiency in interviewing and counseling is essential to both the litigator and transactional lawyer. Lawyering process I will provide the student with theoretical understanding of interviewing/counseling and intensive training designed to develop these essential skills. Through lectures, readings, demonstrative videotapes and class discussions, the "client-centered" model advocated by the instructor as well as the "traditional approach" will be introduced, examined, and collectively critiqued. Practice will involve observing/critiquing weekly in-class simulations (with students as "client," "lawyer"). Periodic quizzes and two videotaped exercises at mid-point and end of course (with students interviewing/counseling 'outside' client) will be scheduled. Consistent attendance is required in order to ensure the effectiveness of in-class simulated exercises and to acquire comprehensive knowledge of/practice in each essential skill.
Academic Career: LAW
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: School of Law (LAWSC)

LAW 5425 - LOW-INCOME TAX CLINIC
Minimum Credits: 3
Maximum Credits: 3
Working under the supervision of experienced tax attorneys, students participating in this clinic will assist in all aspects of the delivery of legal services to low income taxpayers in disputes with the internal revenue service. Students may expect to engage in interviewing, counseling, research, drafting, and negotiation with the I.R.S. Calendar and the disposition of the cases taken. In addition to the client work, students will also meet for weekly case review sessions.
Academic Career: LAW
Course Component: Clinical
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: LAW 5105; PROG: School of Law (LAWSC)

LAW 5428 - LEGAL NEGOTIATION
Minimum Credits: 2
Maximum Credits: 2
Proficiency in negotiating is essential to both the litigator and transactional lawyer. Lawyering process II will provide the student with theoretical understanding and intensive training designed to develop this essential skill. Through lectures, readings, and class discussions the two principal models of legal negotiation 'adversary' and 'problem-solving' will be introduced, examined, compared and critiqued. Students will engage in numerous negotiation exercises, some requiring drafting pre-negotiation plans and post-negotiation critiques. Highly experienced attorneys from the private/public sector will be invited to share their approaches/successes/challenges. Negotiations will be conducted both in-class and out-of-class. Two negotiations will be videotaped 'one at mid-point and the other at end of course' for subsequent viewing/critiquing on box. Consistent attendance is required in order to ensure the effectiveness of in-class simulated exercises and to acquire comprehensive knowledge of/practice in each negotiation model.

LAW 5429 - LAWYERING PROCESS CLINIC

2359
Minimum Credits: 2
Maximum Credits: 2
Students participating in this clinical course will be provided with skills training and the opportunity to engage in a wide variety of lawyering activities (interviewing, counseling, negotiation, drafting of documents and pleadings, representation of clients before court and administrative agencies) in a controlled, supervised, instructional field-based program setting. Following initial orientation at the office, students will observe and thereafter participate in direct delivery of legal services to program clients. Cases assigned will primarily involve family law issues (divorce, protection from abuse, custody, dependency, etc.). Students who take the course for one semester will focus skills development on pre-hearing elements (interviewing, counseling, negotiating, etc.) During the first several weeks; thereafter, emphasis will be placed on in-court and administrative hearing representation. Students will be closely supervised by an experienced staff attorney under the direction of the course instructor. Selected student work may be videotaped for later review and critique by supervisor and instructor. Clinical time at the field-based office will be supplemented with a weekly case review session at the law school. Scheduling of clinical hours will be adjusted to accommodate the student's schedule. Transportation costs for travel to/from the office will be reimbursed. Students are encouraged to enroll in lawyering process I or II, since the focus of both such courses will provide skills support for the clinical experience. Course also available during the summer, with same supervisory input and course requirements as described above.

LAW 5430 - INFO PRIVACY LAW AND PRACTICE
Minimum Credits: 2
Maximum Credits: 2
This introductory course will provide a comprehensive overview of the primary laws, regulations and guidelines dictating data protection safeguards in the health care industry. It will begin with an introduction to the origins and philosophical perspectives that provide the framework for current privacy laws. Students will then explore the HIPPA privacy/security rules, provisions of Hi-tech breach notification standards, technical, physical and administrative safeguards and their intersection with the various state data protection laws. This course will include an introduction to the legal challenges associated with securing electronic data along the information highway and within the cloud, while attempting to safeguard against cybersecurity threats. Students will be introduced to the implications of privacy to the health care provider, health plans, health care clearinghouses, business associates, and the enforcement activities belonging to the office for civil rights. It will also afford students an opportunity to examine privacy from the financial and international perspectives.

LAW 5491 - ADVANCED LEGAL RESEARCH
Minimum Credits: 3
Maximum Credits: 3
This course will build on the material presented in the foundations of legal research course, and will provide students with a broader array of strategies and skills to approach legal research projects. The course is to be broadly divided into three components. The first component focuses on strategic approaches to legal research, how to incorporate the research process into the litigation or transactional problem presented and to more effectively integrate the various legal research tools available into that strategic approach. Cost-effective research strategies, including strategies to effectively manage real-world lexis and Westlaw costs will also be covered. This component will somewhat overlap with, but significantly expand on material from the foundations course, and will give students a broader understanding of the research process. The second component of the course recognizes that not all substantive areas of the law utilize the same research resources, strategies and techniques. During this component of the course, students will self-select into one of three topical research tracks—expected to be intellectual property, environmental law, and health and disability law—and spend several weeks looking at the unique resources and research challenges presented by those areas. The third component of the course returns all students to the same material and focuses on non-legal research areas such as medical and scientific research, business and corporate research, investigative research, and financial and marketplace research.

LAW 5497 - HEALTH LAW PRACTICUM: ADR
Minimum Credits: 4
Maximum Credits: 4
The health law practicum offers third and second year law students an opportunity to work with lawyers in hospitals, health insurance companies, and in a variety of other placements in health law. Students work in the field with supervising attorneys for a minimum of 104 hours per semester. The primary emphasis of this practicum is legal representation of a non-profit enterprise in the changing health law environment. One of the changes being experienced in all health law environments is the resolution of disputes through the use of negotiation, mediation and other alternatives to adversary adjudication. The classroom sessions of two hours per week will be devoted to a consideration of the application of ADR techniques to health law disputes. Besides studying substantive health law issues, students will participate in ADR simulations as part of their classroom experience.
Academic Career: LAW
Course Component: Practicum
LAW 5503 - FEDERALISM & HEALTH POLC SEM
Minimum Credits: 3
Maximum Credits: 3
The interrelationship between the constitutional structure of federal and state governments and the piecemeal development of the U.S. health care system leads to fractured methods of regulating that system. This seminar will explore points of cooperation and tension between the federal and state governments and the varying effects of disparate state laws in a variety of health policy settings. Such settings will include the development of Medicaid; Medicaid expansion under the Affordable Care Act; the legalization of medical marijuana; the legalization of aid in dying; access to health care services through insurance coverage; and the assurance of quality care through regulation of health care payer decision-making.

Academic Career: LAW
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis

LAW 5537 - MEDICARE AND MEDICAID PRACTICUM
Minimum Credits: 2
Maximum Credits: 2
Any lawyer who anticipates a practice that includes elder law, poverty law, health law or insurance law needs to have a fundamental understanding of the medicare and medicaid programs. Over 48 million individuals are currently enrolled in medicare; over 40 million individuals are currently enrolled in medicaid; and over 10 million are enrolled in both. For individuals 65 years and older, the costs of accessing health care and prescription medications represent, on average, more than 20% of their gross annual income. Beyond that, medicare and medicaid are significant national institutions that account for large percentages of federal and states resources. The continued scope and capacity of these programs represent fundamental issues in the national political debate. This course is designed to provide law students with an understanding of the medicare and medicaid programs and the practical skills for using this information to serve their clients. We will examine the purpose and design of medicare and medicaid; the medicare and medicaid vocabulary; and the criteria for eligibility and enrollment in these programs.

LAW 5609 - PROFESSIONAL RESPONSIBILITY

**Minimum Credits:** 3

**Maximum Credits:** 3

This course will cover selected topics on the law governing lawyers. Major topics will include formation and termination of the attorney-client
relationship and its attendant obligations, fee issues, conflicts of interest, ethics in advocacy, transactional lawyering, and entity representations,
among others. The course will cover these topics from the vantage point of the model rules of professional conduct and the restatement of the law
governing lawyers, as well as those aspects of constitutional law, evidence law, agency law, tort law, and procedural rules (both civil and criminal)
that bear on an attorney's obligations to clients, courts, opposing parties and their attorneys, and the legal system at large. Class discussions will
incorporate in-depth analysis of case law and the rules, as well as analysis of practical hypothetical scenarios in which a lawyer seeks advice about
his or her legal and ethical options for moving forward in dealing with his or her clients.

LAW 5611 - ADVANCED FAMILY LAW ADVOCACY

**Minimum Credits:** 3

**Maximum Credits:** 3

Much of the modern practice of family law involves litigation. From routine contested motions to complex equitable distribution and custody trials,
the field of family law has seen a dramatic increase in the time the practicing family lawyer spends in the courtroom. Very often the family lawyer is
faced with complex litigation that involves the direct and cross examination of expert witnesses and trial techniques and strategies molded well in
advance of trial with the assistance of a child psychologist expert. In addition, "motions practice," arguing important discovery or interim issues that
affect custody and equitable distribution cases, is an important, if not critical aspect of the practice of family law. We will follow hypothetical cases
of families whose contentious divorce and custody issues must be tried to conclusion in non-jury mock trials. The students, working in small teams,
will interview, counsel and prepare their role playing "client" for trials, develop trial strategy, engage in pretrial preparation, meet with and prepare
expert witnesses for direct and cross examination and finally, try various issues to conclusion. The expert witnesses will be actual, highly experienced
experts in various areas of valuation and custody. Students will be expected to prepare written trial materials. One class will be specifically devoted
to arguing a motion against opposing counsel on a discovery issue. The student will be asked to prepare a motion and a supporting brief on the
subject issue to be addressed before the motion's court judge.

LAW 5616 - MOCK TRIAL STRATEGY AND PRA
Minimum Credits: 2
Maximum Credits: 2
This is a performance and presentation-based course that serves as the intensive training component for the law school's mock trial team. The course covers the mechanics of trials with a focus on preparation for interscholastic trial advocacy competitions. Enrollment is by permission from the professor only. Students can qualify based on a tryout. In addition, the previous year's top two finishers in the law school's internal trial competition will qualify automatically for the course, presuming they have not graduated. This program is a two year commitment. If you are accepted as a member of the mock trial team, you will automatically be eligible to participate in the course for the following year upon successful completion of the course in the first year. Topics in the course include development of case theory, effective advocacy skills, appropriate professional conduct, and trial preparation. Students will present direct and cross examinations of lay and expert witnesses, opening statements, and closing arguments, and will introduce evidentiary exhibits with appropriate foundation. A significant portion of the course will be devoted to a review of both the federal and Pennsylvania rules of evidence, with special emphasis on trial evidence. Returning third year students will focus on preparation for both fall and spring competitions. In that respect they will learn advanced trial techniques as applicable to the competitions. This will include working with actual experts, one on one video analysis of performance and specific, case related issues.

LAW 5618 - ARABIC FOR LAWYERS 1
Minimum Credits: 2
Maximum Credits: 2
Arabic for lawyers is a two semester course comprised of both Arabic for lawyers I and Arabic for lawyers II. Arabic for lawyers is a course that helps students to familiarize themselves with Arabic legal terminology and basic Arabic grammar. This is a beginner class that assumes no prior knowledge of or exposure to the language. As such, native speakers and those with formal training over a period of years may not enroll. The course is a two semester (full year) course and students are encouraged to take both semesters in order to benefit from the course. However, students are permitted to take only the first semester if they wish. They may take only the second semester with the professor's permission if they have had some modest experience with the Arabic alphabet. The first semester of the course deals with learning the Arabic alphabet, mastering pronunciation and developing the ability to write in Arabic by hand. In the second semester, we will turn to learning basic rules of grammar and developing vocabulary in a manner that is designed to be of interest and use to lawyers and legal professionals. The class will conclude by reading simple cases, laws and other basic legal materials. To facilitate the learning experience, laptops will not be permitted in class.

LAW 5620 - CYBERSECURITY & PRIVACY REGLN
Minimum Credits: 3
Maximum Credits: 3
This course examines the legal frameworks in place to protect consumer privacy and maintain necessary information security protections for privately owned and operated infrastructure, with a strong focus on regulatory and compliance issues. Taught collaboratively with the schools of law and information sciences, students will collaborate on projects simulating the types of problems both legal and technical professionals confront in actual practice. Some individual writing will be required, and a written paper option may be available for students in lieu of group projects with the consent of the instructor.

LAW 5622 - COMPARTV PROF RESPONSIBILITY
Minimum Credits: 3
Maximum Credits: 3
The course provides an exploration of the organization and the sources of regulation of the legal profession in the United States, and an overview of select countries in the Americas as well as Europe, briefly highlighting the main differences existing in lawyers' ethical standards in civil law and common law systems. It focuses on the main standards of professional legal ethics in the United States, and compares them with those of Latin American and European countries. The course will be centered on the ABA Model Rules of Professional Responsibility. The Model Rules will be compared with the rules of professional conduct proposed by international associations such as the International Bar Association and the rules proposed by bar associations in the MERCOSUR zone. The course also seeks to engage students in an exploration of the challenges posed by the increase in cross-border, transnational legal practice, and an overview of the ethical regulatory responses attempted so far in this field. This course meets the New York professional responsibility requirement. N.Y. Court Rules for Admission of Attorneys and Counselors at Law Rule 520.3(c)(1)(iii).

LAW 5630 - FEDERAL CIVIL LITIGATION SKILS
Minimum Credits: 2
Maximum Credits: 2
This course explores practical and procedural pretrial litigation activities encountered in federal civil litigation. The course is designed to develop practical case management, advocacy and negotiation skills while increasing awareness and familiarity with the local rules which govern litigation in the United States district court (W.D. Pa.). The course will consist of both lectures and 'hands on' exercises, both written and role-play, that track the procedural progress of a federal case.

LAW 5631 - LAW AND ENTREPRENEURSHIP
Minimum Credits: 3
Maximum Credits: 3
This hands-on, practical course is intended to expose law students to entrepreneurs, innovation companies and the legal issues they face. The course will take students through the life cycle of a technology start-up company, from concept and formation to exit (IPO or sale), through careful analysis of relevant legal documents and case studies, as well as participation in lectures, workshops and simulations. The course will cover choice of entity and formation (including tax issues at start up and early stage fundraising), employee hiring and compensation, valuation and protection of intellectual property and the development of a comprehensive IP strategy, valuation and financing (investment opportunities), licensing and sales, multinational operations, and exit strategy. The course will provide students with the legal framework and tools necessary to launch and grow a successful technology start-up, and to advise and assist entrepreneurs interested in launching a new business.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5638 - RACE AND THE LAW
Minimum Credits: 3
Maximum Credits: 3
This course will explore the legal treatment of race in the United States. Central to this examination will be: (1) the legal and social construction of
race and racism; (2) the legal history of racialized groups including African Americans, Latinos/as, native Americans, Asian Americans, Arab and middle eastern Americans, and white Americans; (3) anti-discrimination laws (governing diverse areas such as education, employment, voting, familial relations, public accommodations, and housing); and (4) the relationship between race, language, and citizenship. A pervasive theme throughout the course will be the significance of race in the post-civil rights era. This inquiry will be analyzed under various modern civil rights perspectives including: traditionalism (advocating for colorblindness and 'reverse' racism claims), reformism (supporting affirmative action); and critical race theory (recognizing continued systemic subordination).

LAW 5653 - INTERNATIONAL HUMAN RIGHTS
Minimum Credits: 3
Maximum Credits: 3
This course will examine the history of the development of international human rights laws, the concepts behind the current status of those laws, and the mechanics present for enforcing those laws in international, regional, and domestic legal systems. The course will include a discussion of the theories behind international human rights law and the ability (or lack thereof) to enforce international human rights standards. The course will look at different examples of human rights crises throughout the world, how those crises are being addressed and how we believe they should be addressed in light of established law and morality. In light of the growing importance of the r2p ("responsibility to protect") doctrine and the related doctrine of "human rights intervention," we will examine these doctrines closely, whether they comport with international human rights law and whether they in fact accomplish what they claim to accomplish.

LAW 5694 - TRADE MARK LAW
Minimum Credits: 3
Maximum Credits: 3
Trademark law deals with legal bases for obtaining and enforcing interests in commercial symbols, including logos, slogans, and the like, which play central roles both in modern commercial transactions (selling and buying stuff) and in daily conversation. Trademarks are partly information and partly the stuff of speech. The trademark law course will teach you about the many roles that trademark law plays in positioning trademarks as part of business strategies, commercial markets and other institutions, and everyday life. For producers of goods and services, how does trademark law help them make money? For competitors, for purchasers of goods and services, and for firms and citizens generally, how does trademark law preserve the power to access and use trademarks as information about commercial things, information that shapes about the commercial sphere, and information that guides daily experience (if that's separate from the commercial sphere). The course will teach those things in the context of teaching the skills of trademark lawyering. How do practicing lawyers work with clients? How do practicing lawyers develop and exercise professional judgment? How do practicing lawyers solve trademark problems? The course will put students in the role of practicing lawyers and teach them to think, write, and act as lawyers generally and especially as trademark lawyers.
Academic Career: LAW

LAW 5704 - ADV SECURITIES REGULATION SEM
Minimum Credits: 3
Maximum Credits: 3
Academic Career: LAW
Title ix of the education amendments of 1972 is often credited with explosive growth in the numbers of girls and women playing sports, which has
had many secondary effects on gender relations in the broader society. Title IX'S supporters argue that the law has been unusually effective in
promoting gender equality. And yet, title ix remains a highly controversial law, often blamed for cutbacks to men's sports and for putting added
financial burdens on schools to fund sports programs which may detract from other educational priorities. It is an area of law that invites critical
inquiry into methods of statutory interpretation, competing theories of equality, and law's relationship to social change.

LAW 5705 - TITLE IX SEMINAR
Minimum Credits: 3
Maximum Credits: 3

This seminar introduces and explores feminist legal theory as a method of understanding and using the law. The course integrates theory and doctrine
and explores how gender both affects and is affected by the development of the law. Areas of the law studied will include employment, education,
domestic violence, family law, torts and criminal law. Students will write a major research paper using feminist legal theory to explain, critique or
defend a legal doctrine and/or solve a legal problem. At the end of the semester, each student will give an oral presentation, in “workshop” format,
based on their paper.

LAW 5707 - FEMINIST LEGAL THEORY SEMINAR
Minimum Credits: 3
Maximum Credits: 3

This course will provide students an introduction to the regulation of electronic communications in the United States. The course will examine
telecommunications law at several significant points in its development. Following the respective regulatory paths of broadcast, telephone and cable, the analysis will include early federal communications commission broadcast regulation; the communications act of 1934; pre-divestiture regulation of the American telephone & telegraph company; the advent of long-distance and local market telephone competition; the evolution of multichannel video communications; and the changes wrought by the telecommunications act of 1996. Finally, we will examine technological convergence, the growing influence of wireless communications, and the impact of the internet. We will also look at telecommunications from a policy and practice-oriented perspective, keeping in mind that regulations and statutes have played as important (if not more so) a role as court decisions in the development of telecommunications law. Themes that will be addressed include: conflicts between federal and state/local jurisdiction; monopoly versus competitive market regulation and issues associated with transitioning from the former to the latter; universal service issues; and competition matters. No prior knowledge of the telecommunications industry (or associated law) is necessary. Exposure to administrative law or antitrust law might be beneficial.

LAW 5720 - LEGAL ANALYSIS AND WRITING
Minimum Credits: 0
Maximum Credits: 0
Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students’ awareness and appreciation of relevant ethical standards.

LAW 5731 - CURRENT ISSUES IN HEALTH LAW 1
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to increase the awareness of students in the health law certificate program to the rapidly changing health care industry and the equally rapidly changing field of health law. It is difficult, if not impossible, to understand the law regulating the health care industry without understanding the industry itself. Another purpose of the course is to expose students to a more in-depth treatment of selected topics than they can obtain in the basic survey course in health law and policy. The course also exposes students to topics that are not covered in the basic course, providing a broader view of the field of health law, which helps in the selection of other course offerings and of a topic for the faculty supervised writing requirement. In addition, the course introduces students to the variety of settings in which lawyers are involved in health law and the range of kinds of clients they represent. Classes will be taught by leading experts in the fields of health management and health law practicing in Pittsburgh and elsewhere.

LAW 5733 - MB CONSTITUTIONAL LITERACY SEM
Minimum Credits: 3
Maximum Credits: 3
This seminar relates to the Marshall-Brennan constitutional literacy component of the law school's pipeline diversity program. The Marshall-Brennan constitutional literacy project prepares students to teach a constitutional literacy seminar in Pittsburgh area high schools. Students selected for the Marshall-Brennan constitutional literacy project are required to participate in the Marshall-Brennan Constitutional Literacy seminar concurrent with their teaching assignment at a Pittsburgh area high school. The seminar will focus on teaching methodology and review of constitutional doctrine in the areas to be covered in the high school course. Areas of focus will include the first, fourth, fifth, sixth and eighth amendments to the United State constitution, with particular emphasis on the constitutional rights of high school students and young people generally. Students will develop detailed lesson plans relating to topics to be covered in the high school course. In addition, students will be required to produce a substantial paper relating to one of the topics covered in the curriculum.

LAW 5811 - HLTH CARE BUS TRANSACTIONS
Minimum Credits: 3
Maximum Credits: 3
This course will expose students to a variety of commercial transactions prevalent in the health care industry. The course will focus initially on health care as a regulated commercial enterprise. After studying the case law, statutes and regulations applicable to health care providers, students will begin an in-depth study of negotiated health care transactions. This study will begin with an examination of the fundamental elements of the acquisition process and an analysis of the tax, antitrust, regulatory and successor liability considerations generally addressed in health care combinations. Students will then be exposed to the various stages of the negotiated acquisition process: due diligence; preliminary negotiations and agreements; transaction structure; final negotiations; definitive agreements; and post-closing relationships. We will also explore the financing mechanisms required to support healthcare entities. The course will examine sources of funding, enterprise valuation, healthcare cost controls, capital structure, traditional debt financing, tax exempt bond financing, securities filings, and insolvency. By the end of the course, the students will have acquired an understanding of the complexities of health care financing and will be familiar with the health care acquisition process from its inception to conclusion.

LAW 5839 - LAW ENTRTAINMNT SCL ENTRP PRAC
Minimum Credits: 2
Maximum Credits: 2
Law, entertainment and social enterprise ("lese") will expose students to the legal knowledge, skills and roles entailed in the representation of a social entertainment enterprise. Students will gain a broad understanding of the operations of the entertainment industry and the intellectual, corporate and securities matters that permeate the industry. We will specifically use a case study of the steel town entertainment project ("steel town"), a local social entertainment enterprise that is dedicated to building a socially and commercially significant entertainment sector in southwestern Pennsylvania. The course will involve cross-disciplinary and experiential learning and immersion opportunities. In lese, students will acquire substantive knowledge, practical skills and role models needed by lawyers representing a social entertainment enterprise ("see"). Students will learn about social enterprise, entertainment, intellectual property, corporate and securities law. Students will learn to research and draft a private placement memorandum based on a business plan for a strategic entertainment investment fund see will launch in the spring of 2010. Students will work closely with practicing lawyers who represent or volunteer for the steel town entertainment works and other social entertainment enterprises in southwestern Pennsylvania such as WQED, family communications and Pittsburgh Filmmakers. Students will gain a broad understanding of the business operations and legal needs of various social enterprise entertainment clients in the industry, including but not limited to incorporation, strategic alliances, licensing and venture capital.

LAW 5841 - INTERNATIONAL TAX
Minimum Credits: 3
Maximum Credits: 3
This course will serve as an introduction to the U.S. Federal tax aspects of the cross-border flow of capital and labor. At the most basic level, we will
explore the distinction, both for income and for estate and gift tax purposes, between a U.S. And a foreign person. We will then compare and contrast
the manner in which U.S. And foreign persons (including tax expatriates) are subject to income tax. We will also cover the special tax regimes
applicable to investments made by U.S. Persons in foreign corporations (i.e., The controlled foreign corporation and passive foreign investment
company regimes) as well as an introduction to the foreign tax credit rules. Throughout the course of the semester we will consider the potential
impact of tax treaties on the rules in the internal revenue code. The grade for the course will be based on a series of drafting projects.

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5843 - LITERATURE AND THE LAW SEMINAR**

**Minimum Credits:** 3

**Maximum Credits:** 3

Law both affects and reflects cultural values and norms. In this seminar we will investigate the degree to which the law represents and interprets
fundamental societal values and norms as expressed in selected literary works. We shall read an eclectic sample of American 19th and 20th century
novels in a search for the expression of fundamental cultural values, norms, and prohibitions to determine how they find expression or rejection in the
law. Particular attention will be paid to whether the principles of property, contract, tort and criminal law promote or contradict the values found in
the literary sources. By so doing, we should gain a richer understanding of how law embodies fundamental human needs and desires.

**Academic Career:** LAW

**Course Component:** Seminar

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5847 - GENDER AND LAW SEMINAR**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course will examine how gender influences legal doctrine and how legal doctrine in a number of specific areas of law affects women and shapes
societal understandings of gender. The objectives of the course are twofold: (1) to explore how an understanding of gender and feminist legal theory
can enrich the study of law; and (2) to learn specific areas of legal doctrine that are particularly relevant to women and societal understandings of
gender. The course will cover a number of areas related to issues of gender equality, such as employment, education, family and domestic
responsibilities, sexual harassment, and domestic violence. Various feminist legal theories will provide a framework for studying these areas of law.

**Academic Career:** LAW

**Course Component:** Seminar

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5854 - LAW AND ECONOMICS SEMINAR**

**Minimum Credits:** 3

**Maximum Credits:** 3

This seminar introduces principles of positive and normative microeconomics to explore the extent to which they can explain the workings of the
legal system and to examine the effect of legal rules on behavior. Covered topics include the Coase theorem; the choice between property, liability,
and alienability rules; comparative liability rules (e.g., Negligence versus strict liability); contractual damages; criminal liability; family law; game
theory; and legal decision theory (e.g., Risk, uncertainty).

**Course Requirements:** PREQ: LAW 5112; PROG: School of Law (LAWSC)

**LAW 5858 - INTERNATIONAL SALES SEMINAR**
The seminar will consider the international law applicable to cross-border sales transactions involving a U.S. Party. We will focus primarily on the United Nations convention on contracts for the international sale of goods ("CISG"), supplemented by study of the principles of international commercial contracts of the international institute for the unification of private law (UNIDROIT). The course emphasizes approaching these texts from an international perspective and employing new research resources that have developed in the area of international commercial law. No background beyond familiarity with general contract law is required, although the course on commercial transactions in goods and/or the course on international business transactions would be useful preparation. In the first part of the course we will explore the substantive provisions of the CISG and UNIDROIT principles, including discussion of applicability, contract formation, obligations of quality, avoidance of contract, risk of loss; exemption for failure to perform; and remedies for breach. The remainder of the course will be devoted to presentations by students on their paper topics.

**LAW 5860 - ANCIENT LAW SEMINAR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar will introduce students to the very beginnings of Western legal history. Through a comparative examination of the legal systems and practices of ancient Mesopotamia (including Hammurabi's Babylon, c. 1700 B.C.), Ancient Egypt, ancient Israel, ancient Anatolia (the Hittite empire, c. 1500 B.C.), Ancient Greece and ancient Rome, we will investigate the historical origins of "law" as an idea. We will see how each of these societies created law in the image of its own beliefs and needs. We will look at what differentiated the resulting legal systems, and what united them. We will examine not merely the ancient "law in the books" (the formal written codes that have received so much historical and philological attention over the years) but also the ancient "law in action" (the performances, rituals and ceremonies that created legal rights and duties in all these proto-literate societies). We will look at some of the earliest surviving trial records. Throughout the seminar, emphasis will be placed on developing a broad interdisciplinary perspective on the ancient legal cultures examined; readings will be drawn not only from the fields of law and history, but also from religion, anthropology, archaeology, literature and communication studies.

**Course Requirements:** PROG: School of Law (LAWSC)

**LAW 5862 - FDS INTELCL PROPERTY LAW SEM**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar deals with the theoretical and policy foundations of patent, copyright, and trademark law. The readings consist of both contemporary and "classic" law review articles and other primary and secondary sources that explore connections between intellectual property law and a variety of possible justifications for the law and its leading cases, statutes, and treaties, including history, liberal political theory, economics and other social sciences, literary theory, and cultural theory. The bulk of the work of the seminar consists of supervision and discussion of original research by students (that is, research in print collections and other collections of analog sources, and digital archives of print collections) on historical intellectual property topics of their choosing, and the production and classroom presentation of a significant piece of original writing by each student.

**LAW 5864 - JURISPRUDENCE SEMINAR**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
I devote this seminar to the refinement of the fundamental lawyering skill of reading and using cases. We will read together a set of cases drawn from various legal domains. In each instance we will discern the court's choice and its rationale for that choice. We will subject that rationale to rigorous scrutiny, seeing more clearly its weaknesses and its strengths. We will also develop and explore the range of plausible future meanings for each text, i.e., The so-called "holdings." In addition to the group seminar sessions, each student will write a paper that analyzes one or more cases in this thorough and critical manner. The English historian, S.F.C. Milsom, addressed the conundrum of the common law system thus: "how can a system of law, a system of ideas whose hypothesis it is that rules are constant, adapt itself to a changing world? It has not been the ordered development of the jurist or the legislator ' it has been the rough free enterprise in argument of practitioners ' and the strength of the system has been in the doggedness, always insensitive and often unscrupulous, with which ideas have been used as weapons ' the life of the common law has been in the unceasing abuse of its elementary ideas." In this sense the seminar offers the opportunity for each student to become more proficient in rendering such abuse.

**Course Component:** Seminar
LAW 5866 - ISLAMIC LAW & JURISPRDNC SEM
Minimum Credits: 3
Maximum Credits: 3
This course will focus primarily on Islamic law, and Islamic jurisprudence, in the modern era, using the classical period only as the backdrop against which modern notions and understandings of Islamic law may be tested. We will begin with a brief introduction into the creation and development of Islamic law from its earliest formative period through its golden, classical era in an effort to explore the principles of Islamic jurisprudence. We will then move quickly to address central questions concerning how that law has evolved given that the empires that gave rise to law in the classical era have evaporated and been replaced with nation states that have adopted by and large transplanted political and legal ideas, among them constitutionalism and reliance on secular legal codes to resolve legal questions. In this context, our primary focus will be on the judicial application of Islamic law in Muslim and non-Muslim countries, surveying court practice in states as varied as Egypt, Iraq, Indonesia and Malaysia. We will also address the increased pan-national use of concepts that purport to be based on Islamic law, from Islamic finance to jihad.

LAW 5874 - SECURITIES ARBITRATION CLINIC
Minimum Credits: 4
Maximum Credits: 4
The securities arbitration clinic is a two-semester clinic; however, students may enroll in either the spring or the fall semesters, but must complete 2 semesters in order to receive credit. Total credits hours for the two semesters are 8 credits. The securities arbitration clinic offers a practical and educational opportunity in the securities arbitration process. In this course, the students will represent individual small investors with controversies of up to $75,000.00 Before a securities panel under the supervision of practicing attorneys. The securities arbitration clinic is designed to impart negotiation, advocacy and trial litigation skills to the students, as well as provide a service to investors that might otherwise be unrepresented. Each student will handle all aspects of assigned a particular client's case, including: 'review case file ' meeting with the client to review facts, request supporting documents, and determine relevant issues ' research of applicable securities laws ' meeting with supervising attorney to determine course of action ' if case is accepted, file power of attorney or entry of appearance with the Pennsylvania supreme court or securities and exchange commission, preparing and filing a statement of claim with FINRA and following through with all aspects of case preparation. 'Contact sec attorneys, opposing counsel and the SRO to discuss recourse and schedule the arbitration panel if necessary. ' For arbitrations: prepare case to be presented to the arbitration panel, including obtaining all necessary documents and witnesses, as well as completion of all research on the law; represent the client in arbitration; complete post arbitration work, including review of stipulated decision, if case is settled before arbitration.

Minimum Credits: 3
Maximum Credits: 3
Academic Career: LAW
LAW 5879 - RIGHTS IN AMERICAN LAW SEMINAR
Minimum Credits: 3
Maximum Credits: 3
In this class we will delve into the whole idea of rights -- in contemporary American culture, in comparative context, and in their historic
development in Anglo-American political theory and legal discourse. Then we will inquire how (whether) those ideas play out in current civil rights
advocacy in our legal system. The course is not intended to be a doctrinal survey of civil rights law in the U.S. Or a doctrinal study of the law of any
one particular area of civil rights. Instead, we will look at (1) the concept -- and history of the concept -- of rights, (2) some particular issues in civil
rights doctrine today that run across substantive areas, e.g., Intent, and (3) see how those ideas play out in an interactive practical situation, through a
simulated case study, in which students will play the part of lawyers mediating a civil rights issue. A secondary focus of the course is the
combination of theory and practice. Does critical theory inform down to earth civil rights practice? If so, how? Sexual harassment or race
discrimination are possible contexts for the interactive mediation part of the course (one will be chosen after the course begins). The reduced
formality of mediation (as opposed to adjudication) should allow for a better simulation in a seminar setting and better accommodate some of the less
doctrinal materials.

LAW 5880 - IMMIGRATION LAW CLINIC
Minimum Credits: 4
Maximum Credits: 4
The immigration law clinic is a two semester clinic. Students may enroll in either the spring or the fall semesters. Students will receive a grade at the
conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a w for the course
(for both semesters), thus nullifying the grade for the prior semester. Students will receive 3 credits per semester. In the immigration clinic students
represent immigrants requesting asylum, facing removal from the United States, and seeking special protection under the violence against women act.
In representing clients under the supervision of the clinical professor, students perform all aspects of case preparation including interviewing clients,
writing pleadings, appearing in immigration court, appearing before administrative agencies and managing post-relief issues. Clinic students also
assist their clients in overcoming linguistic and cultural barriers that could impede their clients' success in the U.S. Legal system. Clients may include
refugees, immigrant women and children survivors of domestic violence applying to change their status, persons with criminal convictions who seek
relief from removal from the United States and other immigrant populations. Students are also expected to collaborate with community based
organizations that serve the foreign born population in the city.

LAW 5883 - ENVIRONMENTAL LAW CLINIC
Minimum Credits: 6
Maximum Credits: 6
The environmental law clinic provides a forum for students to acquire practical expertise in environmental and administrative law by developing and
integrating knowledge and skills with practical judgment in the assumption of responsibility for clients. The clinic will represent groups and
individuals who otherwise could not afford legal and technical services for their environmental and community health needs. Focusing on, among
other areas, water quality and land use issues in Western Pennsylvania, students may be assigned to handle matters involving the following activities:
drafting court pleadings and briefs; representing clients at administrative hearings; engaging in collaborative legal and technical work; supporting pro
bono environmental litigation filed by non-clinic counsel; conducting discovery; drafting proposed legislation and rules; commenting on proposed
permits, regulations, and environmental impact statements and assessments; evaluating matters for potential future action; meeting with clients, other
attorneys, and governmental officials; developing case strategy; factual investigation; community outreach and development; policy work; and
similar tasks. In some instances, students will have primary responsibility for their assigned matters, and the supervising attorney will maintain a
secondary role.

LAW 5890 - ELECTRONIC DISCOVERY SEMINAR  
Minimum Credits: 3  
Maximum Credits: 3  
The discovery process has undergone a revolutionary change in the last quarter-century. Today, the vast majority of documents are created, stored and retrieved electronically, and the sheer volume of electronically-stored information ("ESI") has multiplied exponentially. This explosion in the volume of ESI has raised a host of legal, ethical and technological challenges for litigators and courts alike. This seminar will address many of the pressing legal issues that electronic discovery raises, including the creation, preservation and production of ESI; the distribution of the costs of e-discovery; the risk of spoliation; and the ethical and privilege issues that arise in connection with e-discovery.

LAW 5895 - ARTIFICIAL INTEL & LGL RES SEM  
Minimum Credits: 3  
Maximum Credits: 3  
Researchers in Artificial Intelligence (AI) and law attempt to design computer programs that can perform legal reasoning or that can solve, or assist attorneys to solve, legal problems. The researchers ask tough, philosophical questions, such as, can one state precisely what a legal rule means and decide whether it applies to a situation? How can one separate "hard" from "easy" legal issues? What roles do cases play in interpreting a legal rule? Their answers, however, are not philosophical but scientific; they design computer programs that model the task and conduct experiments to evaluate how well the program performs. The seminar will involve law students and graduate students from other disciplines. The seminar goals are to introduce the fundamentals of AI to law students and of legal reasoning to graduate students and jointly to grapple with the work of researchers who have built AI programs for the legal domain. Law students will more fully appreciate the techniques and assumptions employed by attorneys, and by AI and law researchers, to deal with the uncertainties inherent in legal reasoning.

LAW 5904 - APPELLATE MOOT COURT COMPETITION
Minimum Credits: 1
Maximum Credits: 1
This intra-school moot court competition is open to all second and third year students. During the initial fall round, students write a brief and orally argue it. The winning participants go on to an intermediate level "round robin". Participants advance through the round-robin based upon the relative quality of their oral advocacy. The final rounds, usually occurring after the winter break, consist of the successful participants from the previous semester's round-robin. Participants completing the first round receive one credit awarded in second semester.

LAW 5929 - LEGAL SERVICES PRACTICUM
Minimum Credits: 4
Maximum Credits: 4
This course offers students a great opportunity to help indigent clients and to learn important lawyering skills under the close supervision of an experienced attorney at neighborhood legal services association or laurel legal services. Students will work on cases involving poverty law issues such as eviction, custody, protection from abuse, public benefits, and debt collection. The classroom component will focus on various substantive and procedural poverty law issues, on ethical considerations, and on lawyering skills - such as interviewing, counseling, fact-gathering, legal analysis, negotiation, research, drafting, and litigation - critical to many types of legal practice. Classroom assignments will include simulation exercises and preparing a monthly journal. The field component will focus on advising and representing indigent clients. Field assignments will be available in Pittsburgh, Bridgeville, New Castle, and Butler. This is an excellent opportunity for students to gain experience in the county where they live or hope to practice. Most field assignments will include courtroom experience, and most students will be able to complete the field component before final exams. Every attempt will be made to schedule the field assignment at times convenient to the student.

Minimum Credits: 3
Maximum Credits: 3
This course provides students with the analytical thinking, research, and writing skills that are needed to successfully litigate a criminal case for the defense from pre-trial through appeal to the Pennsylvania supreme court. The emphasis will be on legal writing and how an effective advocate uses writing to advance his clients' interests. Throughout the course, students will learn to hone their research and writing skills to present the best possible arguments in their pleadings. In addition, students will learn about the various stages of the criminal process and how to properly present and preserve issues for their clients. Analytical thinking and oral advocacy will also be enhanced through our in class simulations of trial court hearings and oral argument in the superior court.

**LAW 5950 - UNEMPLOYMENT COMPENSATION PRAC**

**Minimum Credits:** 2

**Maximum Credits:** 2

This course provides a clinical option that combines components of a traditional law school clinic and an externship at a legal services or public interest law firm. Representing claimants in unemployment compensation ("UC") cases can provide law students with a meaningful trial advocacy experience. For the first three weeks, classes will meet twice a week so students can get up to speed on the substantive law and trial practice skills. Subsequent classes will include bringing in referee to conduct mock hearings and a commonwealth court judge to discuss appeals. By week three, students will meet with and begin interviewing clients at the Pitt clinic offices, research applicable law, gather evidence, and conduct hearings before a referee. The practicum supervisors will meet with students at additional times to assist them in preparation for hearings. The supervisors will accompany each student to their first and perhaps a second hearing. For subsequent hearings, other students in the practicum will accompany the student attorney to observe his or her performance and provide feedback. In addition to representing claimants at hearings, students will file and draft briefs to the UC board of review and to commonwealth court. Students will submit a weekly journal which contains their analysis of their case preparation, the hearings themselves and their progress. Also, students will help update the unemployment compensation manual, which John Stember has edited for a number of years and which has been published by the Pennsylvania bar institute (PBI).

**LAW 5952 - CRIMINAL PROSECUTION PRACTICUM**

**Minimum Credits:** 0

**Maximum Credits:** 0

The office of the district attorney of Allegheny county administers the criminal prosecution practicum under the auspices of former prosecutor, judge Edward J. Borkowski. The practicum runs the full school year, so those interested must devote both semesters to the program. The practicum combines classroom instruction with actual courtroom prosecution experience in order to prepare students for the practice of criminal law. The classroom portion of the course requires students to attend a two hour class once a week in the courtroom of judge Borkowski in the Allegheny county courthouse. Students will be instructed on and be required to conduct opening statements, closing arguments, and direct and cross examination of lay and expert witnesses. Students are provided with a vehicle that includes police reports, lab reports, and transcripts of taped statements based on the class model (a homicide case) from which the exercises are performed in class by the students in a live courtroom setting with a judge and defense attorney present and participating as such. The practical portion of the course requires students to extern ten (10) hours per week in Stephen A. Zappala’s Allegheny county district attorney's office. Certified students are permitted to litigate guilty pleas, suppression motions, and nonjury trials in the Allegheny county court of common pleas. The goal of the practicum is to give students a broad overview of the inner workings of a prosecution office while providing hands-on experience in prosecuting cases.

**LAW 5954 - D.C. SEMINAR**

**Minimum Credits:** 3  
**Maximum Credits:** 3

The D.C. Seminar is one component of the semester in D.C. Program. The other component of the semester in D.C. Program is the D.C. Externship, which is described separately. Students must enroll in both the D.C. Externship and the D.C. Seminar in order to participate in the semester in D.C. Program. The D.C. Seminar will provide intensive skills training, meetings with alumni and practitioners, and opportunities to reflect on and analyze students' externship experiences. The seminar will meet in the law school's D.C. Classroom. The three seminar credits will be graded. Grades will be based on class participation, a weekly journal, and a significant paper regarding a legal issue or set of issues relating to the externship. The paper can be used to satisfy the upper level writing requirement. Students interested in participating in the semester in D.C. Program should: (a) contact Prof. Deasy and/or Prof. Baylis directly to discuss the program requirements and externship application process and (b) sign the semester in D.C. Program statement of interest form included with the registration materials and return it to the registrar's office when they submit their registration materials. Students who sign the statement of interest for the semester in D.C. Program should also register for classes as they normally would, in order to keep open the option of taking a regular course load until they have obtained an externship position. Upon securing an externship position, students can drop their other classes and add the D.C. Externship and D.C. Seminar.

**Minimum Credits:** 8  
**Maximum Credits:** 10

The D.C. Externship is one component of the semester in D.C. Program. The other component of the semester in D.C. Program is the D.C. Seminar, which is described separately. Students must enroll in both the D.C. Externship and the D.C. Seminar in order to participate in the semester in D.C. Program. The D.C. Externship consists of an unpaid externship in Washington, D.C. With a government entity or non-profit organization. Students must be doing primarily legal work, must be supervised by an attorney, and must complete a minimum of 520 hours of work during the semester. Professors Baylis and Deasy can provide information about some potential employers, but students are responsible for finding and applying for their own externship positions. The 10 externship credits will be ungraded and will be awarded on a satisfactory/unsatisfactory basis. Students interested in participating in the semester in D.C. Program should: (a) contact Prof. Deasy and/or Prof. Baylis directly to discuss the program requirements and externship application process and (b) sign the semester in D.C. Program statement of interest form included with the registration materials and return it to the registrar's office when they submit their registration materials. Students who sign the statement of interest for the semester in D.C. Program should also register for classes as they normally would, in order to keep open the option of taking a regular course load until they have obtained an externship position. Upon securing an externship position, students can drop their other classes and add the D.C. Externship and D.C. Seminar.

**LAW 5958 - LGL RESEARCH FELLOWS PRACTICUM**

**Minimum Credits:** 1  
**Maximum Credits:** 1

Participants in this one credit, graded course will sharpen and refine basic research skills learned during previous legal research courses. With supervision from the faculty services librarian and other Barco law librarian librarians, students will learn to develop legal research strategies, conduct efficient and comprehensive legal research and to effectively communicate the results of their research to faculty members. Fellows may draft memos, generate spreadsheets or develop bibliographies as finished work products for assignments. The research fellow will encounter a diversity of research requests just as an associate would receive a variety of assignments in a law firm setting. Fellows will have an opportunity to directly interact with faculty members.

LAW 5984 - TRADE SECRETS LAW
Minimum Credits: 2
Maximum Credits: 2
This course will cover various aspects of trade secret law with an emphasis on practical considerations relevant to the business environment. Students will examine public policy considerations of trade secret law, compare the uniform trade secrets act (UTSA) to the restatement approach and to the Pennsylvania UTSA, and compare trade secret protection with other forms of intellectual property. We will review the elements of a trade secret and compare the types of information and the circumstances under which courts have recognized or denied trade secret protection. The rights of a trade secret owner relative to its employees and third parties will be examined in detail, including use of confidentiality agreements and non-competition agreements. Enforcement of trade secret rights will be surveyed and include civil and criminal proceedings including the economic espionage act (EEA). Practical issues from the business world are strongly emphasized in this course including drafting and negotiating confidentiality agreements, establishment of business policies and procedures for trade secret protection, practical considerations surrounding the bringing and settling of trade secret cases, and drafting and enforcing non-competition agreements.

Law - MSL (graduate program) course offerings

**LAW 2020 - CONTRACTS**
**Minimum Credits:** 4
**Maximum Credits:** 4
What promises are legally enforceable? Why does the law enforce those promises? What does it mean to enforce a promise? This course explores those questions, using the basic concepts, principles, and doctrines of contract law, sometimes called "the law of broken promises." Specific topics include the requirements for formation of a contract (such as offer and acceptance), justifications for enforcing promises (such as consideration or detrimental reliance), justifications for denying or limiting enforcement (such as unconscionability or mistake), interpretation of contract terms, and remedies for breach of contract.

**LAW 2024 - PROPERTY**
**Minimum Credits:** 4
**Maximum Credits:** 4
Property law, broadly defined, governs relationships among people with respect to "things." These "things" include land ("real property"), tangible objects such as a casebook ("personal property"), and intangibles such as a publisher's right to prevent others from reproducing the original content in a book ("intellectual property"). The property course examines how property rights may be limited, in situations where more than one person has rights to the same piece of property, and in situations where one owner's rights must be balanced against the rights of the owner of a separate piece of property. Topics covered in the property course may include: modes of acquisition of property (e.g., Capture, find, creation), present possessory
estates and future interests, co-ownership of property, marital property, landlord-tenant law, land sales, title recording systems, easements, restrictive covenants, nuisance, public land use regulation (including zoning, eminent domain, and the issue of regulatory takings), and global property issues.

LAW 2041 - LAWYERING: A HISTORY
Minimum Credits: 3
Maximum Credits: 3
This course will survey the history of lawyering from ancient times to the present day. Students will be invited to meet Cicero and the Roman jurists, look inside medieval courtrooms to see English common lawyers and European civilians at work, experience the rhetoric of John Adams and Daniel Webster while considering the daunting challenges faced by the emerging bar in early America, and assess the economic, industrial and organizational conditions that contributed to the cultural ascendance of lawyers in the twentieth century United States. We will investigate both the historical successes of the legal profession and its failures, its championing of great causes and its complicity in great injustices. We will look at lawyering in its changing social, ethical and technological contexts, examining how lawyers over time and in various national settings have constructed their identities, established their power, viewed their duty, and articulated their collective mission. We will investigate how lawyers have been trained, and how different methods of legal education have shaped them. We will learn about legal lives lived far away and right here in Pittsburgh. We will look at today's American bar, assessing its recent history as a business dominated by the rise of the billable hour, and at the end of the course we will peer into some of the possible futures awaiting attorneys working in a digital age.

LAW 2076 - LEGAL ANALYSIS AND WRITING
Minimum Credits: 4
Maximum Credits: 4
Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

LAW 2082 - CLIMATE CHANGE AND THE LAW
Minimum Credits: 2
Maximum Credits: 2
This course examines the problems of climate change and how law and policy and corporate America are responding to them. The course begins by describing what is encompassed under the current "climate change" debate; considering what science can tell us about the climate change issue, including the uncertainties in that science and the significance and role of descent from the mainstream view of the science. It then considers, given the current state of the science, how we should assess the actions that should be taken to respond to this problem. That assessment should take account mitigation vs. Adaptation. The course also considers the legal responses to the issue of climate change. This course will discuss the united nations framework convention on climate change (UNFCCC), the KYOTO protocol, and the likely future of both. This course will discuss the domestic federal legislation with regard to GHGS as well as certain regional initiatives and voluntary commercial GHG reduction schemes. This part of the course will be examining the "boomlet" in global warming litigation in federal and state courts looking at the administrative and tort actions pending in U.S. Courts. Finally, the course will address sustainability issues for business, including green building, carbon neutral strategies, certain esoteric accounting issues, some carbon trading issues. Lectures will include voluntary and NGO-driven business initiatives (proactive approaches) as well as certain secondary effects caused by climate change that affect businesses.
Academic Career: GRAD
LAW 2089 - PUBLIC HEALTH LAW
Minimum Credits: 3
Maximum Credits: 3
Public health law touches the lives and livelihoods of every person. Understanding the intent, basic structure, and methods for employing the local, state, and federal laws governing public health activities will facilitate legal practice in a variety of disciplines, including: municipal, healthcare, environmental, and judicial practice. This is a survey course, intended to introduce students to the most commonly encountered national and world public health law issues. Specific topics include: an overview of the epidemiologic principles underlying public health law; police powers; balancing public and private interests at stake; privacy and confidentiality of public health information; emergency preparedness; search, inspection, embargo and condemnation of private property; abatement of nuisances and dangerous conditions; and the major federal statutes affecting public health. In addition, material concerning world public health issues will be presented to help students understand the community health benefit from comprehensive public health legislation. Finally, ongoing local public health law interventions will be analyzed using the basic principles introduced early in the course.

**LAW 2105 - FEDERAL INCOME TAX**  
**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course will introduce the basic concepts found in the internal revenue code, as interpreted by the internal revenue service and the courts. We will explore the concept of "income," and specifically consider the difference between ordinary income and capital gain, the timing of income inclusion, and the determination of a taxpayer's basis in property (which relates to the calculation of income). We will also explore exclusions and deductions that may reduce a taxpayer's income. This course has two primary goals: first, to give the students a basic familiarity with the internal revenue code so that they will be aware of tax issues that may arise in their practice, and second, to prepare students who have (or acquire) a deeper interest in tax for more advanced courses in taxation.

LAW 2201 - ADMINISTRATIVE LAW  
Minimum Credits: 3  
Maximum Credits: 3  
It is next to impossible to practice law today without dealing with administrative agencies, federal or state, or the law they create. Indeed, more cases are adjudicated in administrative bodies than in the courts. The substantive law that is created and implemented by agencies is the subject matter of individual courses such as environmental law, securities regulation, taxation, and banking. It is the procedural/structural law that governs the creation and implementation of substantive law by agencies that is the focus of administrative law. We will discuss the different types of functions undertaken by agencies, for example, rulemaking and adjudication in all its forms and how those disparate functions determine the appropriate structure of decision-making. At the federal level, where we will focus our attention, the procedures that apply originate in a variety of sources, including the United States constitution, the administrative procedure act and other statutes, and agency rules. There is often a complex interplay among these sources of law, which will be one of the topics we will explore. Another is the relationship of agencies to the chief executive and the legislature, an area that implicates important constitutional doctrines, statutes, and executive orders. Finally, we will spend considerable time on the availability, timing, and scope of judicial review of agency action, including the doctrines of standing, ripeness, exhaustion of administrative remedies, and judicial deference to agency findings of fact, interpretations of law, and exercises of discretionary power.
**LAW 2207 - ANTITRUST**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This survey course will focus on federal antitrust law, including the Sherman and Clayton acts and cases construing those statutes. We will examine the legal and economic analyses of three major categories of anticompetitive conduct: agreements among competitors, monopolization, and horizontal mergers.

**LAW 2212 - BUS PLANNING, ENTREP & TECHN**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2

This course will address key legal and business issues faced by entrepreneurs when establishing a commercial enterprise. Specifically, it will address the protection and development of ideas, the commercialization of technology, and the legal and business aspects involved in forming, funding, operating, and managing the emerging business enterprise. The course will be taught from a business planning perspective. Through participation in the course, students will be exposed to advanced business law concepts applicable to emerging companies in the business, technology, and medical fields.

**LAW 2213 - CONFLICT OF LAWS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Disputes between parties from different states or countries and disputes having contacts with multiple jurisdictions raise a host of challenging legal questions, including: (1) which jurisdiction's law will govern the dispute; (2) whether and in what circumstances a judgment rendered in one state or country will be recognized and enforced in other jurisdictions; and (3) how courts should make these determinations. State laws, the federal constitution, and international and foreign law all play a role in deciding these issues, which can have a profound impact on the ultimate resolution of the controversy.

---

**LAW 2216 - EMPLOYMENT DISCRIMINATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course will examine federal statutory law as it applies to employment discrimination, with an emphasis on discrimination based on race, sex, color, ethnicity, national origin, religion, and age. The most prominent statutes in this area are Title VII of the Civil Rights Act of 1964, the Age Discrimination in Employment Act, and an older civil rights statute from the Reconstruction era, 42 U.S.C. §1981. The course will explore the substantive meanings of “discrimination” under these acts, the models of proof for establishing a claim, the theoretical underpinnings of the statutes, and some of the procedural and remedial issues relevant to employment discrimination law.

**LAW 2225 - INTERNATIONAL BUSINESS TRANSACT**
Minimum Credits: 3
Maximum Credits: 3
This course analyzes basic international business transactions and the effects of U.S. Law, specific foreign law, and treaties on the conduct of the parties involved. The course covers issues of commercial law, regulation of cross-border transactions, dispute resolution, tax considerations, and antitrust law. Although a basic understanding of each of the areas of the law in the domestic context is helpful, there are no course prerequisites. Students are expected to develop an understanding of the U.S. Laws applicable to private international transactions and an awareness of the risks inherent in doing business in or with other countries and their nationals.

**LAW 2226 - INTERNATIONAL LAW**
Minimum Credits: 3
Maximum Credits: 3
This course explores how international law regulates, or attempts to regulate, relations between states, and between states and individuals. It therefore examines both classical and contemporary topics such as the sources of international law, rights and responsibilities of states, jurisdiction, the incorporation of international law into domestic law, individuals as bearers of rights and obligations at the international level (in particular human rights law and humanitarian law), the law of treaties, the law on the use of force and the role of the united nations and the international court of
justice in the peaceful settlement of international disputes. Several specific topics will be examined to illustrate the increasing impact of international law on domestic legal practice, and the influence of the United States on the development of modern international law.

### LAW 2251 - BIOTECHNOLOGY LAW
Virtually every aspect of our lives is touched by biotechnology, so this class is designed as an introduction to many of the critical issues related to biotech and society. Specific topics include genetically modified organisms (Frankenfoods), patenting life, vaccination laws, human and animal testing, bioterrorism, biological weapons laws, bio-prospecting, pharmaceutical pricing, FDA laws, as well as scientific (and investor) fraud in biotech. The class also focuses on the policy relationships between law and public health, as well as related underlying economic incentives that can create tension in the life sciences. The class includes a number of guest speakers from industry including biotech licensing professionals and an FDA practice attorney. This class will be useful for anyone planning to practice law related to the life sciences including patent law. The issues are presented in a non-technical manner so the class is accessible to anyone interested in the field. It may be helpful to have exposure to patent law in general but it is not required.

LAW 2260 - INTELLIGENT PROPERTY
Minimum Credits: 3
Maximum Credits: 3
In the information age, intellectual property (IP) law has taken on even greater significance. IP law is designed to encourage the production of certain forms of information by granting property rights to the producers, enabling them to appropriate the value of the information they produce. In this course, we survey state intellectual property law (e.g., unfair competition and trade secrets) as well as federal intellectual property law including trademark, patent, and copyright. We examine some of the ramifications of recent technological developments on intellectual property law and some of the problems of international protection of intellectual property.

LAW 2265 - LABOR LAW: PRIVATE SECTOR
Minimum Credits: 2
Maximum Credits: 2
This course, after a short review of American labor history, will focus almost exclusively on the national labor relations act, the nation's premier statute dealing with labor management relations in the private sector, and the model for many public sector state laws covering the field. The course deals with the rights of individual employees, employers, and unions with respect to concerted activity, unionization, the establishment of collective bargaining units, elections conducted by the national labor relations board, and the collective bargaining process. The course will also cover strikes,
picketing and hand-billing by unions, the current restrictions or limitations on such conduct, and the administration of collective bargaining agreements, grievance processing, and the arbitration of disputes. We will study and critically examine procedural and substantive case law developed by the national labor relations board, and its impact upon labor-management relations in both unionized and non-union environments. The course concludes with a discussion of the future of labor relations. We will discuss more recent tactics employed by unions and management and engage in a debate as to whether and how the current labor laws should be amended. Classes will be a combination of both lecture and dialogue. We also will discuss critical issues with representatives from Pittsburgh's union and business communities.

**LAW 2295 - EXPERT WITNESS**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
In recent years, the use of expert witnesses has proliferated as both civil and criminal litigation have become more complex and technical. In this course, students will learn when expert testimony is needed; where to find appropriate experts; how to work with the expert to develop a theory of the
case; and many more issues leading up to the actual trial of the case. Once the case reaches the courtroom, students will learn how to organize and present their own expert's testimony in a clear and concise fashion, and how to pursue the challenging task of "doing battle" with the opposing expert. In the end, students will achieve a greater appreciation for the subtleties of expert testimony, while at the same time acquiring the tools to deal with witnesses who speak in technical and unfamiliar language.

LAW 2297 - WORKERS' COMPENSATION
Minimum Credits: 2
Maximum Credits: 2
This course deals with the law, theory and practice of workers' compensation under state and federal administrative programs, including the Pennsylvania and other state acts; longshore and harbor workers' compensation act (LHWCA); federal employees' compensation act (FECA); and the federal employers' liability act (FELA). The student will study the essential aspects of such laws, including their development and purpose, coverages, the various levels and varieties of benefits provided and how claims are established and enforced. Special emphasis is placed on how such laws affect the rights of individuals to other remedies such as the ability to sue in tort or assert discrimination claims; how compensation programs are implicated in contemporary efforts to reform healthcare coverage and delivery; and the role workers' compensation plays in occupational safety and health. The student will become familiar with the uniform policy of insurance for compensation coverage and how compensation coverage and other regulatory requirements are policed by governmental authorities. A pervasive theme of the course is the status of workers' compensation as a unique hybrid of administrative law and tort, with the consequent effects of such status on the law, theory and practice of the field.

LAW 2300 - FOOD AND DRUG LAW
Minimum Credits: 1
Maximum Credits: 1
The U.S. Food and drug administration has the regulatory mandate to protect the American food supply, and to ensure that drugs are safe and effective for the purposes for which they are prescribed. This course will survey selected topics in food and drug law, including the new drug approval process, regulation of food additives and carcinogens, food labeling and nutrition, prescription vs. OTC drug status, and restrictions on pharmaceutical marketing. Related legal standards affect all of us as consumers in everyday life, and have even greater impact in circumstances like end-of-life decision making. In examining food and drug law issues, we will focus on the tension between information gathering, risk regulation, and paternalism as themes in FDA policy making.

LAW 2301 - CONSTITNL LAW: FIRST AMENDMENT
Minimum Credits: 3
Maximum Credits: 3
When we think of freedom of speech, we generally think of protest, dissent and political controversies. There is good reason for this; robust discussion of issues of public policy and candidates for public office is an essential element of democratic self-governance. Today, however, the first amendment is also invoked - often successfully - in a variety of other contexts. Can the federal government limit tobacco advertising? Can a school punish students for "cyber-bullying?" Can a city ban billboards for adult entertainment businesses? This course will provide a detailed examination of first amendment doctrines and their application in a wide variety of contexts, both traditional and contemporary. Topics will include: political speech,
obscenity, libel, commercial speech, regulation of electronic media, limitations on the "time, place, and manner" of expression, symbolic speech, and rights of association. Some comparisons will be made between first amendment doctrines and other areas of constitutional law.

LAW 2340 - ENVIRONMENTAL LAW
Minimum Credits: 3
Maximum Credits: 3
This course focuses on domestic environmental law and, in particular, on federal law rather than state law. The diverse and technical nature of modern environmental law is such that, in practice, lawyers often specialize in very narrow areas. Nevertheless, the same or similar moral, scientific, and policy arguments familiar to one area of the law are found in many of the others and similar regulatory approaches have been adopted or proposed for adoption to deal with very different types of environmental hazards. This course will focus its attention on the clean air and water acts, the national environmental policy act, the resource conservation and recovery act, the comprehensive environmental response, compensation, and liability act, and wetland protection, with passing coverage of various federal public land management statutes. We will explore the basic regulatory and non-regulatory approaches currently in place, including market-based systems to achieve better environmental quality, as well as proposals for changes to those approaches. A significant portion of the course will also be devoted to exploring issues presented by government and citizen suit enforcement of environmental laws. While administrative law is obviously relevant to much of environmental law given the fact that it is agencies which make and administer the law involved, the course will offer students an overview of administrative law principles which will be sufficient
LAW 2347 - ELDER LAW
Minimum Credits: 3
Maximum Credits: 3
With over 35 million Americans age 65 or older, society and the law have grown very attentive to the needs of the elderly. In this course we will examine the aspects of aging that have particularly impacted on law and public policy. Law both protects the elderly and grants those rights and privileges. We will examine the interplay of law and public policy in the context of social security, private pensions, Medicare, Medicaid, long-term care financing, guardianship and mental capacity, health care decision making, housing and the abuse and neglect of the elderly.

LAW 2351 - EUROPEAN UNION LAW
Minimum Credits: 3
Maximum Credits: 3

LAW 2355 - NON-PROFIT ORGANIZATIONS
Minimum Credits: 2
Maximum Credits: 2
This class will survey the state and federal laws governing nonprofit tax exempt organizations. The course will examine the formation of nonprofit corporations under the Pennsylvania nonprofit corporation law of 1988, principles of corporate management, and options for fundamental organizational change. In addition, the course will analyze the process of qualifying for exemption under the internal revenue code and under the laws of Pennsylvania. Issues of private inurement, unrelated business income, charitable giving and fundraising regulations will be discussed. The course will include statutory and regulatory analysis, selected case law and case studies based on actual NPO's.

LAW 2359 - WORKERS COMPENSATION PRACTICUM
Minimum Credits: 2
Maximum Credits: 2

LAW 2360 - SECURED TRANSACTIONS
Minimum Credits: 3
Maximum Credits: 3

LAW 2365 - INTRO RUSSIAN & UZBEK LGL SYMS
Minimum Credits: 2
Maximum Credits: 2
This course is designed to introduce students to the legal systems of the Russian federation and Uzbekistan. The foundation of the legal systems of these countries is almost identical, and by comparing one country's system to another, students will become more familiar with civil law systems. Special attention will be given to constitutions, court systems, the role of judges, state prosecutors, courtroom advocates and lawyers, as well as to the important commercial laws and treaties. I will use examples from my professional experience to give my students a realistic view of the legal systems of these countries. The class is intended to enhance student awareness of the legal environment and issues that often result from a decision to engage in relations or do business across national boundaries. Students must be prepared to actively discuss the assigned reading or other material in class each week.

**LAW 2395 - HEALTH LAW & POLICY**  
Minimum Credits: 3  
Maximum Credits: 3  
This is a survey course of fundamental issues, covering a broad range of topics, in health law and policy intended both for students who merely wish to become acquainted with the field, and for those who plan on concentrating in the field. For those planning on concentrating, this course provides a foundation for in-depth courses such as health care business transactions, health care fraud and abuse, health care antitrust, and financing in the healthcare industry. For students not concentrating in health law, it provides an introduction to the multitude of issues with which lawyers working with clients in the health care industry need to be familiar. The course examines the role that law plays in achieving three societal goals: increasing access to health care, controlling health care costs, and assuring quality of health care. Specific topics are the structure of the health care system(including integrated health care delivery systems); regulating quality through licensing, staff privileges, and accreditation; labor and employment issues; the legal obligation to provide treatment, including Emtala); tax exemption and charitable purposes; health care reform; state and federal regulation of health insurance and managed care (including Erisa); federal initiatives to expand private insurance coverage(including HIPAA,
LAW 2404 - HEALTH CARE FRAUD AND ABUSE
Minimum Credits: 1
Maximum Credits: 1
This course will consider the responsibilities and obligations of an attorney to his or her client, the court and the legal system. Emphasis will be placed on the rules of professional conduct which have been adopted by the Pennsylvania supreme court as the standard of conduct for all attorneys admitted to practice within the commonwealth. Classroom meetings will focus on the common ethical problems which attorneys face including the scope of the duty to zealously represent your client; responsibilities owed to the courts and to other parties that may conflict with your client's interests; what decisions are made by the client and what decisions are made by counsel; potential conflicting responsibilities of counsel to his or her insurance company and the insured; potential conflicting responsibilities of corporate counsel to the corporation and the corporate officers; disqualification of counsel; the scope of the attorney-client privilege; confidentiality requirements; fee arrangements; withdrawal from representation; competency requirements; and pretrial and trial conduct.

LAW 2408 - IMMIGRATION LAW
Minimum Credits: 2
Maximum Credits: 2

LAW 2418 - ALTERNATIVE DISPUTE RESOLUTION
Minimum Credits: 3
Maximum Credits: 3
Legal and other disputes are increasingly resolved by dispute resolution processes other than litigation. Given this trend, it is important for law students to be familiar with these alternative processes, such as arbitration and mediation, and the benefits and risks they present. At the same time, these alternative processes require creative and interdisciplinary problem-solving perspectives and skills. This course begins with an overview of problem-solving approaches, and is followed by the study of arbitration, mediation, and hybrid processes. The course emphasizes interactive student discussion and activities, including role-plays, exercises, and presentations that simulate professional activities of lawyers, arbitrators, mediators, and clients. The classes build on each other, so that knowledge that we acquire in the earlier classes will be integrated into our materials, discussion, and activities in later classes.

Minimum Credits: 2
Maximum Credits: 2
This is a course designed to develop the conversational, writing and reading skills in French to permit an American lawyer to communicate effectively with French-speaking clients, and to understand references to the French legal system and to the European union likely to arise in the course of an international law practice in the United States or an American law practice conducted in France. The course will differ from that of a typical college French class in that it will be oriented towards the law in the areas of vocabulary, composition topics, readings, dictations and in-class conversation.

LAW 2653 - INTERNATIONAL HUMAN RIGHTS
Minimum Credits: 3
Maximum Credits: 3
This course will examine the history of the development of international human rights laws, the concepts behind the current status of those laws, and the mechanics present for enforcing those laws in international, regional, and domestic legal systems. The course will include a discussion of the theories behind international human rights law, the different hierarchies of human rights and the differing approaches to applying those hierarchies, and the ability (or lack thereof) to enforce international human rights standards. Students are required to either have already taken international law or to take it in conjunction with international human rights law.

Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: LAW 5226; PROG: School of Law (LAWSC)

LAW 2694 - TRADEMARK LAW
Minimum Credits: 3
Maximum Credits: 3
Trademark law concerns common law and statutory bases for obtaining and enforcing legal protection for commercial symbols, including logos, slogans, and other potentially distinctive product and service identifiers. The trademark law course will describe the role that trademark law plays - together with other intellectual property law, other non-IP law, and other non-legal institutions - in positioning that commercial "speech" as part of commercial markets generally. For producers of goods and services, how does trademark law help them make money? For competitors, for purchasers of goods and services, and for citizens generally, how does trademark law preserve the power to access and use information about the commercial sphere - and to extend that information into other "free speech" contexts? And for law students, how do lawyers participate in doing both things, by representing and counseling clients? The course will cover the constitutional, statutory, and common law attributes of trademark law; the rights and remedies that trademark law provides for producers; the protection that trademark law provides for competitors and consumers; and the intersection of American trademark law with other forms of intellectual property protection, with the first amendment, and with international law.
Students are expected to master the substantive law of trademark, but that mastery is only a preliminary step. The major goal of the course is to teach students how to use the law to advance their clients' interests in commercial symbols. The course does that by requiring students repeatedly to use their professional judgment in a counseling context.
Academic Career: GRAD
Course Component: Lecture

Course Requirements: School of Law (PLAW)
LAW 2695 - TRADEMARK LAW PRACTICE
Minimum Credits: 2
Maximum Credits: 2
A course to delve into trademark and unfair competition practice before the USPTO, trademark trial and appeal board and in state and federal courts. The course will advance practice oriented trademark issues including: the identification, protection and enforcement of trademark rights; the relief that can be acquired through enforcement of those rights; the role of lawyer as counselor in adopting trademarks as part of the branding process; avoiding infringement of others’ trademarks; and the assignment and licensing of trademarks. The course will probe these same concepts in other jurisdictions, as well.

Grade Component: Grad LG/SU3 Basis

LAW 2705 - TITLE IX SEMINAR
Minimum Credits: 2
Maximum Credits: 2
Title ix of the education amendments of 1972 is often credited with explosive growth in the numbers of girls and women playing sports, which has had many secondary effects on gender relations in the broader society. Title IX's supporters argue that the law has been unusually effective in promoting gender equality. And yet, title ix remains a highly controversial law, often blamed for cutbacks to men's sports and for putting added financial burdens on schools to fund sports programs which may detract from other educational priorities. It is an area of law that invites critical inquiry into methods of statutory interpretation, competing theories of equality, and law's relationship to social change. This seminar will provide an opportunity for students to engage in an intensive writing project on some aspect of title ix and/or gender equality in sports.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Law (PLAW)

LAW 2717 - TELECOMMUNICATIONS LAW
Minimum Credits: 2
Maximum Credits: 2
This course will provide students an introduction to the regulation of electronic communications in the United States. The course will examine telecommunications law at several significant points in its development. Following the respective regulatory paths of broadcast, telephone and cable, the analysis will include early federal communications commission broadcast regulation; the communications act of 1934; pre-divestiture regulation of the American telephone & telegraph company; the advent of long-distance and local market telephone competition; the evolution of multichannel video communications; and the changes wrought by the telecommunications act of 1996. Finally, we will examine technological convergence, the growing influence of wireless communications, and the impact of the internet. We will also look at telecommunications from a policy and practice-oriented perspective, keeping in mind that regulations and statutes have played as important (if not more so) a role as court decisions in the development of telecommunications law. Themes that will be addressed include: conflicts between federal and state/local jurisdiction; monopoly versus competitive market regulation and issues associated with transitioning from the former to the latter; universal service issues; and competition matters. No prior knowledge of the telecommunications industry (or associated law) is necessary. Exposure to administrative law or antitrust law might be beneficial.

LAW 2720 - LEGAL ANALYSIS AND WRITING
Minimum Credits: 0
Maximum Credits: 0
Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form.
Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

**Grade Component:** No Grade Required  
**Course Requirements:** School of Law (PLAW)

**LAW 2730 - CURRENT ISSUES IN HEALTH LAW 2**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The purpose of this course is the same as current issues in health law 1. This course is open only to third-year students in the health law certificate program, and all third-year students in the program must take this course both fall and spring semesters. Students are required to create a file of at least 40 newspaper articles on health law and policy and to use these articles to write a paper (maximum length: 10 pages) based on the evolution of a theme in health law or policy that they identify from the articles (for example, patients' rights legislation; Medicare prescription drug benefit).

**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** School of Law (PLAW)

**LAW 2731 - CURRENT ISSUES IN HEALTH LAW 1**  
**Minimum Credits:** 0.5  
**Maximum Credits:** 0.5  
The purpose of this course is to increase the awareness of students in the health law certificate program to the rapidly changing health care industry and the equally rapidly changing field of health law. It is difficult, if not impossible, to understand the law regulating the health care industry without understanding the industry itself. Another purpose of the course is to expose students to a more in-depth treatment of selected topics than they can obtain in the basic survey course in health law and policy. The course also exposes students to topics that are not covered in the basic course, providing a broader view of the field of health law, which helps in the selection of other course offerings and of a topic for the faculty supervised writing requirement. In addition, the course introduces students to the variety of settings in which lawyers are involved in health law and the range of kinds of clients they represent. Classes will be taught by leading experts in the fields of health management and health law practicing in Pittsburgh and elsewhere.

**LAW 2811 - HEALTH CARE BUS TRANS & FIN**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will expose students to a variety of commercial transactions prevalent in the health care industry. The course will focus initially on health care as a regulated commercial enterprise. After studying the case law, statutes and regulations applicable to health care providers, students will begin an in-depth study of negotiated health care transactions. This study will begin with an examination of the fundamental elements of the acquisition process and an analysis of the tax, antitrust, regulatory and successor liability considerations generally addressed in health care combinations. Students will then be exposed to the various stages of the negotiated acquisition process: due diligence; preliminary negotiations and agreements; transaction structure; final negotiations; definitive agreements; and post-closing relationships. We will also explore the financing mechanisms required to support healthcare entities. The course will examine sources of funding, enterprise valuation, healthcare cost controls, capital structure, traditional debt financing, tax exempt bond financing, securities filings, and insolvency. By the end of the course, the students will have acquired an understanding of the complexities of health care financing and will be familiar with the health care acquisition process from its inception to conclusion.

LAW 2847 - GENDER AND LAW SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This course will examine how gender influences legal doctrine and how legal doctrine in a number of specific areas of law affects women and shapes societal understandings of gender. The objectives of the course are twofold: (1) to explore how an understanding of gender and feminist legal theory can enrich the study of law; and (2) to learn specific areas of legal doctrine that are particularly relevant to women and societal understandings of gender. The course will cover a number of areas related to issues of gender equality, such as employment, education, family and domestic responsibilities, sexual harassment, and domestic violence. Various feminist legal theories will provide a framework for studying these areas of law.

LAW 2858 - INTERNATIONAL SALES SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The seminar will consider the international law applicable to cross-border sales transactions involving a U.S. Party. We will focus primarily on the United Nations Convention on Contracts for the International Sale of Goods ("CISG"), supplemented by study of the principles of international commercial contracts of the International Institute for the Unification of Private Law (UNIDROIT). The course emphasizes approaching these texts from an international perspective and employing new research resources that have developed in the area of international commercial law. No background beyond familiarity with general contract law is required, although the course on commercial transactions in goods and/or the course on international business transactions would be useful preparation. In the first part of the course we will explore the substantive provisions of the CISG and UNIDROIT principles, including discussion of applicability, contract formation, obligations of quality, avoidance of contract, risk of loss; exemption for failure to perform; and remedies for breach. The remainder of the course will be devoted to presentations by students on their paper topics.

LAW 2860 - ANCIENT LAW SEMINAR
Minimum Credits: 3
Maximum Credits: 3
This seminar will introduce students to the very beginnings of Western legal history. Through a comparative examination of the legal systems and practices of ancient Mesopotamia (including Hammurabi's Babylon, c. 1700 B.C.), Ancient Egypt, ancient Israel, ancient Anatolia (the Hittite empire, c. 1500 B.C.), Ancient Greece and ancient Rome, we will investigate the historical origins of "law" as an idea. We will see how each of these societies created law in the image of its own beliefs and needs. We will look at what differentiated the resulting legal systems, and what united them. We will examine not merely the ancient "law in the books" (the formal written codes that have received so much historical and philological attention over the years) but also the ancient "law in action" (the performances, rituals and ceremonies that created legal rights and duties in all these proto-literate societies). We will look at some of the earliest surviving trial records. Throughout the seminar, emphasis will be placed on developing a broad interdisciplinary perspective on the ancient legal cultures examined; readings will be drawn not only from the fields of law and history, but also from religion, anthropology, archaeology, literature and communication studies.

LAW 2984 - TRADE SECRET LAW
Minimum Credits: 2
Maximum Credits: 2
This course will cover various aspects of trade secret law with an emphasis on practical considerations relevant to the business environment. Students
will examine public policy considerations of trade secret law, compare the uniform trade secrets act (UTSA) to the restatement approach and to the Pennsylvania UTSA, and compare trade secret protection with other forms of intellectual property. We will review the elements of a trade secret and compare the types of information and the circumstances under which courts have recognized or denied trade secret protection. The rights of a trade secret owner relative to its employees and third parties will be examined in detail, including use of confidentiality agreements and non-competition agreements. Enforcement of trade secret rights will be surveyed and include civil and criminal proceedings including the economic espionage act (EEA). Practical issues from the business world are strongly emphasized in this course including drafting and negotiating confidentiality agreements, establishment of business policies and procedures for trade secret protection, practical considerations surrounding the bringing and settling of trade secret cases, and drafting and enforcing non-competition agreements.

Learning Science and Policy

LSAP 3095 - ORGNL PERSPS EDUC IMPROVMNT
Minimum Credits: 3
Maximum Credits: 3
One way to see the act of education is that it is essentially about what occurs between teachers and learner. In other words the key unit of analysis is the classroom or activity structure. The classroom is important, but teaching and learning are also shaped by their context. Individuals are situated in organizations, which are situated in broader social, cultural, and political environments. Consequently, reform and improvement efforts must not only take seriously individual factors, they must understand the ways in which individual action is enabled and constrained by organizational and environmental contexts. This seminar will focus on schools as organizations drawing on theoretical and empirical work grounded in organizational theory. We will interrogate the institutional, organizational, and day-to-day contexts of work in schools. We also explore how reform efforts targeting organizational features can intervene and perhaps, improve teaching and learning. In order to grapple with the concepts from the literature, students will analyze several cases or organizational improvement efforts and conduct a small study examining an improvement effort in a local educational organization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

LSAP 3096 - CURRICULM ISSUES IN MSE
Minimum Credits: 3
Maximum Credits: 3
This course examines ideas that lie at the intersection of research in mathematics and science education, curriculum research, and education policy. Specifically, the course will focus on research that is or will become relevant for the new policy climate created by the common core state standards (CCSS) and the next generation science standards (NGSS). We will begin by examining the CCSS and NGSS, analyzing their similarities and differences from past standards, and chronicling the assessment and curricular activities that have followed in their wake. We will then identify ways in which research conducted during past standards-based eras (e.g., the first and second cycles of NCTM standards; state standards in the NCLB era) can inform the direction of state and district policies surrounding curriculum and assessments.
Academic Career: GRAD
Course Component: Lecture

Course Component: Full Time Dissertation
Grade Component: Grad SN Basis

LSAP 3520 - INTRODUCTION EDUCATIONAL POLICY
Minimum Credits: 3
Maximum Credits: 3
Improving the education system has been a top priority for decades. A great deal of effort has gone into creating and enacting educational policies, especially since the 1983 report titled 'a nation at risk'. This course explores the difficulties in improving and documenting changes in teaching and learning as a result of externally imposed federal, state and district level processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

LSAP 3530 - ASSESSMENT AND ACCOUNTABILITY
Minimum Credits: 3
Maximum Credits: 3
Policies establishing standards and requirements for testing codified in the No Child Left Behind Act (NCLB) are, in principle, aimed at improving teaching and learning and closing the achievement gap between more and less privileged students. The specific design and implementation of NCLB, however, has been sharply criticized. In this course we will explore the debate surrounding NCLB and test-based accountability generally. The topics this course will address include the use of assessments to lever instructional change, the assumptions about learning that underpin different types of assessments and test-based accountability, and research investigating the influence of high-stakes testing on instruction and learning. This course also will consider issues pertaining to teacher evaluation including the use of value-added models, merit-based salary compensation, and performance-based measures of teaching quality.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

LSAP 3540 - DESIGN OF EDUCATIONAL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
To develop successful educational innovations, a systems view must be taken, analyzing instructional goals, constraints and resources, considering alternative approaches to conveying ideas, motivating students, and guiding students to instructional objectives. Students will work in teams to enact an innovative educational design process with real projects and real clients. In the past, educational systems being (re)designed included museum exhibits, high school robotics units, afterschool digital literacy workshops, college lab courses, processes for selecting student assessments tools, and a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

LSAP 3595 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Students will address selected topics for study.
Library Science

LIS 2000 - UNDERSTANDING INFORMATION
Minimum Credits: 3
Maximum Credits: 3
Introduction to major ideas and concerns of the information professions and examination of formal communication of relevant ideas, information, and knowledge. Exploration of nature and role of organizations in which archivists, librarians, and other information professionals work.

LIS 2005 - ORGANIZING AND RETRIEVING INFO
Minimum Credits: 3
Maximum Credits: 3
Introduces key concepts in information organization and information retrieval, including: terminology and models of organizing information; classification schemes (e.g. Dewey decimal); aspects and examples of controlled vocabularies, thesauri, taxonomies, and ontologies; standards for data content (e.g., Aacr2, rda), data structure (e.g., Marc21, ced), and data value (e.g., Lcsh, sears, tgm); the nature of user information needs and implications for information organization and information retrieval; identifying appropriate resources from the range of types and formats; formulating retrieval strategies; and identifying information appropriate to the user. Required for all MLIS students except those admitted to the archives and information science specialization.

LIS 2110 - RESEARCH METHODS IN LIS
Minimum Credits: 3
Maximum Credits: 3
Introduction to quantitative and qualitative methodologies and techniques used to conduct scholarly inquiry and service evaluation in library and information science. The design, planning and execution of research studies, from conceptualization and proposal writing to reporting and dissemination of the findings. Topics covered include research problems and questions; critical appraisal of research literature; data sources and sampling; research ethics and integrity; and data collection, analysis and interpretation.

LIS 2184 - CPYRGHT & FAIR USE IN DGTL AGE
Minimum Credits: 3
Maximum Credits: 3
Concepts, legislation, and case law about censorship, freedom of access to information, privacy, copyright, professional liability, and other issues. Legal implications and safeguards. Origins, development, evolution, and pivotal role of copyright, fair use, and related issues within 21st century information, legal, policy, and economic framework. Key and emerging issues such as public domain, orphan works, section 108 exceptions for libraries and archives, licensing, recent statutory legislation and case law, and international copyright. Alternative protection schema, such as open access and creative commons.

LIS 2186 - INFORMATION POLICY
Minimum Credits: 3
Maximum Credits: 3
Introduction to information policy with a focus on U.S. Federal policies. Issues and challenges faced in developing and implementing policies within
organizations and companies, including the protection and use of intellectual property, first amendment concerns, access to public information, security and the protection of privacy of personally identifiable information.

### LIS 2194 - INFORMATION ETHICS
- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Digital-age intersection of information and ethics with emphasis on key areas of intellectual property, privacy, confidentiality, authenticity, plagiarism, diversity/inclusion and special populations, accessibility, intellectual freedom, censorship, social networking, cyberbullying, security, preservation, transparency, accountability, policy making, and professionalism. Ethical theories and application of ethical decision-making models to real-world library and information center scenarios. Analysis of codes of ethics. Issues and resources related to creation, implementation, enforcement, and assessment of institutional ethical codes.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### LIS 2214 - LIB & ARCHIVAL PRESERVATION
- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Introduces the preservation and conservation of library and archival collections. Basic foundation in theoretical, managerial, analytical, and practical applications of preservation.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### LIS 2215 - PRESERVATION MANAGEMENT
- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Methods of integrating and implementing preservation activities and programs in library and archival settings, based on a knowledge of preservation history, operations, and current issues. Understanding the complexities of practical applications; combining management ideals with less-than-ideal institutional environments.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** SBPLAN: Archives and Information Sci (MLISAIS-SP)

### LIS 2220 - ARCHIVES & RECORDS MGMNT
- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Introduction to the essentials of records management in diverse organizational settings and in society. Organizational theory and how this relates to the history and development of record-keeping systems, electronic-records management and the advent of new technologies, and the place of records management in the information professions. Theoretical principles, methodologies, and practical administration of archives, records, and other information sources from print to oral contributing to the management of evidence and information necessary for organizations and society.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science

### LIS 2222 - ARCHIVAL APPRAISAL
- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Advanced analysis of the basic theories, principles, techniques, and methods that archivists and records managers use for identifying and selecting (appraising) records with continuing or enduring value to records creators, researchers, and society. Comparison and contrast to related activities in other fields, such as library collection management and development, museum artifact selection, and the analysis of documentary evidence by historians and other researchers.
LIS 2223 - ARCHVL ADVOCACY AND ETHICS
Minimum Credits: 3
Maximum Credits: 3
Orientation to the ways in which archivists and other records professionals advocate for access to their holdings, their programs and societal mission, and the ethical and other challenges they face in carrying out such functions. Provides historical, theoretical and practical orientation to advocacy, and ethical matters.

LIS 2224 - ACCESS SYS & TOOL ARCHVL COLLC
Minimum Credits: 3
Maximum Credits: 3
Introduction to the theoretical foundations, history, principles, and research surrounding the access to and representation of archival materials. Examination and analysis of issues of effectiveness, economics, and audience surrounding different types of surrogates for archival collections including guides, calendars, finding aids, (in paper form and on-line), bibliographic records themselves, issues of context, appropriate levels of control, selection, and interpretation.

LIS 2225 - MUSEUM ARCHIVES
Minimum Credits: 3
Maximum Credits: 3
Overview of the evolution of the purposes of museums; history and development of museum record keeping systems, with particular emphasis on changes in those systems in transition from paper-based to electronic records. Use of functional analysis to identify principle functions of museums and to guide the appraisal of records that document those functions.

LIS 2226 - MOVING IMAGE ARCHIVES
Minimum Credits: 3
Maximum Credits: 3
This course will introduce you to the various contexts moving image media occupies in collecting institutions as well as the basic procedures to preserve these works. Motion picture film will be of primary focus, but other moving image media types will also be explored. Throughout the semester archival functions will be approached using cross-disciplinary frameworks as a way to interrogate the histories, technologies, preservation processes and accessibility of moving image media.

LIS 2227 - PHOTOGRAPHIC ARCHIVES
Minimum Credits: 3
Maximum Credits: 3
Explore issues surrounding all aspects of managing photographic collections including storage, access, preservation, reference, cataloging, processing, and, digitization. Students completing this course will be able to: evaluate, identify, and inspect photographic collections for their preservation needs including determining and carrying out treatment and storage options. Develop processing plans for photographic collections. Create policies and guidelines for reference and access to photographic collections with attention paid to copyright issues. Use photographic collections as primary documents in reference situations. Be familiar with issues surrounding copyright and digitization of photographic collections.
LIS 2228 - INT'L PERSPECTIVES ON ARCHIVES
Minimum Credits: 3
Maximum Credits: 3
Archival issues analyzed from an international perspective: archival history in the 20th century, archival standards and practices, and relation between archives, collective memory and accountability.

LIS 2230 - RECORDS AND INFORMATION MGT
Minimum Credits: 3
Maximum Credits: 3

LIS 2280 - HIST BOOKS, PRNTING, PBLSHNG
Minimum Credits: 3
Maximum Credits: 3
The development of the book in its many forms in relation to contemporary society, education, and culture. Manuscript origins, the nature and development of the printing process, the reading public, the book trade, binding, and book illustration.

LIS 2322 - RESOURCES FOR CHILDREN
Minimum Credits: 3
Maximum Credits: 3
Survey of literature, film, video, and other formats for children from infancy to adolescence with an emphasis on contemporary sources. Critical evaluation of materials for use in a multicultural society and strategies to encourage the use of those materials by children and those who work with children.

LIS 2323 - RESOURCES FOR YOUNG ADULTS
Minimum Credits: 3
Maximum Credits: 3
Survey of literature, periodicals, video, and other formats of interest to and importance for young adults with an emphasis on contemporary sources. Critical evaluation of materials for use in a multicultural society and strategies to encourage the use of those materials by young adults and those who work with young adults.
LIS 2324 - HISTRY OF CHILDREN'S LITERATURE
Minimum Credits: 3
Maximum Credits: 3
Introduction to literature for children from the Anglo-Saxon period in England through the 19th century in England and America. Emphasis on social and cultural history as reflected by literature for young people.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2325 - CRRCLM RESORC & SERVC/SCHL LIB
Minimum Credits: 3
Maximum Credits: 3
Integration of library media center collections and services into the curriculum. The teaching roles of the school library media specialist.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LIS 2326 - STORYTELLING
Minimum Credits: 3
Maximum Credits: 3
The historical role of the storyteller as preserver of culture and the contemporary role as performer in the context of traditional and contemporary sources of stories and techniques of presentation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2327 - MULTI-CULT RESOURCES & SERVS
Minimum Credits: 3
Maximum Credits: 3
Survey of multicultural resources in a variety of formats; utilization of multicultural resources with students and teachers in k-12 schools.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2328 - INFOR LITERACY RESOURC & SERV
Minimum Credits: 3
Maximum Credits: 3
Overview of information seeking behaviors of students and teachers in the k-12 school library environment; services and resources that directly support information literacy skills instruction; policies that guide the use of information by students and teachers.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LIS 2332 - RESOURCES & SERVICES FOR ADLTS
Minimum Credits: 3
Maximum Credits: 3
Survey of materials in a variety of formats of interest to and importance for adults, with an emphasis on popular resources, utilization of resources and program development.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2334 - INFO SRVCS & TECH IN AGNG WRLD
Minimum Credits: 3
Maximum Credits: 3
This course will focus on collection development, reference, and education services for older adults, and their professional and family caregivers. The course will cover the critical evaluation of materials in print, non-print, and electronic formats, and a discussion of information services provided by healthcare organizations, community agencies, medical center and hospital libraries, public libraries which serve an aging population, and academic libraries serving students in the helping professions. This course is especially appropriate for those interested in working in medical and public libraries, healthcare organizations, community agencies, and academic libraries with students and faculty interested in the helping or service professions, especially in fields that focus on older people.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROGRAM: School of Information Sciences

LIS 2335 - LIB SVCS FOR EARLY CHILDHOOD
Minimum Credits: 3
Maximum Credits: 3
Knowledge and skills needed to provide developmentally appropriate services for children, ages 0 to 5 years, and their families and caregivers. Design, implementation, and evaluation of library programming for young children. Role of family and caregivers in language and literacy development. Current trends, issues, and problems in the area of library services for young children.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2405 - CATALOGING AND CLASSIFICATION
Minimum Credits: 3
Maximum Credits: 3
Theory, principles, and standards of descriptive and subject cataloging as currently practiced and conceptualized; emphasis on the changing information landscape. Focuses on analyzing systems and practices that respond to user needs, practically and ethically. Provides beginning level experience with bibliographic utilities, description, metadata and encoding schemes, choice of entry, construction of headings, authority control, Dewey and library of congress classification schemes, and library of congress subject headings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LIS 2005 or (2001 and 2002); PROG: School of Information Science

LIS 2407 - METADATA
Minimum Credits: 3
Maximum Credits: 3
Principles and application of metadata for networked information resource organization, representation, retrieval, and interoperability using a variety of schemes and tools.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: LIS 2005 or (2001 and 2002) or LIS 2224; PROG: School of Information Science

LIS 2452 - INDEXING AND ABSTRACTING
Minimum Credits: 3
Maximum Credits: 3
Principles, practices, and applications of abstracting, subject indexing, controlled vocabularies, and syndetic reference structures. Survey of current issues and relevant research. Projects in abstracting and derived and assigned indexing in journal/database and web context
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LIS 2005; PROG: School of Information Science

LIS 2500 - REFERENCE SOURCES AND SERVICES
Minimum Credits: 3
Maximum Credits: 3
Survey and application of tools (paper and electronic) needed to respond to questions in the changing reference environment. Discussion of philosophies and theories underlying the practice of general reference. Introduction to subject reference tools and services.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LIS 2005 or (2001 and 2002); PROG: School of Information Science

---

**LIS 2520 - COLLECTION DEVELOPMENT**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**LIS 2537 - GVRNT INFOR RESOURCS & SERVCS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
The American political environment and its impact on the availability and control of information emanating from the federal government. Consideration and analysis of federal government materials in many formats.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LIS 2005; PROG: School of Information Science

---

**LIS 2543 - HUMNITIES RESOURCES & SERVICES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Survey and evaluation of resources in the fields of literature, religion, mythology, philosophy, music, art; historical background and development of each subject, its scope, the structure of its literature, and its relationship to other humanistic disciplines. Problems of bibliographic control and retrieval.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LIS 2005; PROG: School of Information Science

---

**LIS 2544 - SOCL SCI RESOURCES & SERVICES**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Survey and evaluation of current sources, services, and trends related to information transfer with examples chosen from the social science areas of history, geography, anthropology, sociology, psychology, political science, international relations, law, library/information science, African American studies, women's studies, and peace studies.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LIS 2005 or (2001 and 2002); PROG: School of Information Science

---

**LIS 2545 - SCI & TECHNLGY RESORC & SERVCS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Information resources and services in science and technology including primary and secondary publications, electronic text, image and numeric databases; user needs and communications patterns within the scientific community.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LIS 2005; PROG: School of Information Science

---

**LIS 2555 - LAW RESOURCES AND SERVICES**
Minimum Credits: 3  
Maximum Credits: 3  
The administration and organization of law libraries with emphasis on knowledge of the judicial system and the literature of law.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: LIS 2005; PROG: School of Information Science

LIS 2581 - COLLCS & RESORCS IN HEALTHCARE  
Minimum Credits: 4  
Maximum Credits: 4  
Selection, collection and access to print and electronic library and information resources and services in the healthcare environment. Budgets and justification of selections, vendor relations, licensing, and scholarly holdings' management. Examination of technologies used in health sciences library settings.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: SBPLAN: LIS Health Certificate (Library & Information Science-AC)

LIS 2585 - HLTH CONSUMER RESOURCES & SVCS  
Minimum Credits: 3  
Maximum Credits: 3  
Collection development, reference, and educational services in the domain of consumer health resources in print, non-print, and electronic formats. Identification of appropriate and accurate resources for consumer health and family education; policy issues in providing consumer and family health information in different settings; role of public media; and information and referral services to and from healthcare organizations, community agencies, and public libraries.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: School of Information Science

LIS 2586 - HEALTH SCIENCES RESORC & SERVS  
Minimum Credits: 3  
Maximum Credits: 3  
Survey and evaluation of current sources, services, and trends related to information transfer in the health sciences, including medicine, nursing, pharmacy, dentistry, allied health, and veterinary science. Materials and services appropriate to hospital, academic, and special libraries and information centers.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: School of Information Science

LIS 2587 - APPLCTNS IN MEDICAL INFORMTCS  
Minimum Credits: 3  
Maximum Credits: 3  
Survey of concepts and activities in medical informatics, including an introduction to the applications of information technology in knowledge-based information and library informatics; integrated hospital information systems and patient-specific information; nursing, radiology, pathology and pharmacy services; clinical decision support; telehealth; and medical education. Concepts related to information in healthcare financing; legal ethical and philosophical issues in medical informatics; consumer informatics. Intended for masters-level graduate students in the helping and service professions without clinical experience.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: School of Information Science

LIS 2600 - INTRO TO INF TECHNOLOGIES  
Minimum Credits: 3  
Maximum Credits: 3  
Introduction to computing and networking, with an emphasis on how computing and networking technologies are used to create, manipulate, and
disseminate information related to library and archival services. Focus on a series of underlying themes, including standardization, interoperability, hypertext presentation, with an emphasis on core technologies of digital libraries; namely, databases and digital documents. Web design, layout, and publishing incorporate a set of competencies essential for librarians and information professionals. "Hands-on" experiences with relevant technologies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2610 - LIBRARY & ARCHIVAL COMPUTING
Minimum Credits: 3
Maximum Credits: 3
Development and roles of computational systems that form the basis of computing for libraries and archives, with particular emphasis on the role that digital libraries and repositories play in support of contemporary scholarship. "Hands-on" experiences with key applications and systems that have been developed, mainly in the open-source environment 'lamp' architecture--for use in digital libraries and related settings, with an emphasis on collection building.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2630 - HUMAN INFORMATION INTERACTION
Minimum Credits: 3
Maximum Credits: 3
Theory, principles, techniques, and tools for design of information systems and services, with emphasis on understanding user-centered design.
Analysis of design elements of information infrastructure to respond to user needs. Models for user-centered design. Approaches to design of specific information systems and services.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2633 - TEC IN LIVES CHILDREN & YOUTH
Minimum Credits: 3
Maximum Credits: 3
Effects of media on young people, ages birth to 18 years; technology in everyday life--from toys to television; gaming and libraries; filtering; privacy and child safety; social networking/cyber-bullying; information/media literacy instruction in children's libraries (public); digital libraries for children; evaluation of digital resources for children; children's information behavior; interaction/interface design for young people; digital divide and social equity issues; global perspectives--technology in young people's lives around the world; future trends.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2635 - INFORMATION ARCHITECTURE
Minimum Credits: 3
Maximum Credits: 3
Practical and theoretical issues associated with information architecture in organizations. User and organizational information needs and uses provide the basis for the conceptual design of web-based information systems and methods for analysis of stakeholder needs. Designed for students wishing to enhance knowledge and skills related to web development, networks, and related concepts.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LIS 2600 or LIS 2610; PROG: School of Information Science

LIS 2658 - ADV TOPC INFOR STORG & RETREVL
Minimum Credits: 3
Maximum Credits: 3
Problems and techniques in storage and retrieval of textual and non-textual materials in various IR environments; theory and research in seeking.
searching, and retrieving information; new challenges for information professionals.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LIS 2610; PROG: School of Information Science

**LIS 2670 - DIG LIBRARIES IN THEIR COMMYS**  
Minimum Credits: 3  
Maximum Credits: 3  
Examines conditions and factors influencing the development of digital publishing and digital library services, focusing largely on socioeconomic and technological issues.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science

**LIS 2672 - TECHN & SVCS FOR DIGITAL DATA**  
Minimum Credits: 3  
Maximum Credits: 3  
The goal of this course is to prepare students to work creatively and productively in digital environment. With the focus on the technologies and services around digital data in web information context, this course includes the development of theoretical knowledge and a practical understanding of digital data. Taking a social-technical perspective, this course will help students to develop a broad understanding of digital data rather than solely view digital data as technical achievements. The course consists of three broad modules: overview of digital data, technologies supporting the life cycle of digital data, and services built around digital data in current networked participatory daily and professional environments.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LIS 2674 - PRESERVING DIGITAL CULTURE**  
Minimum Credits: 3  
Maximum Credits: 3  
Explores the history of digital media. Provides a theoretical framework for understanding the preservation of digital culture, including both digitized and born-digital materials. Introduces students to the latest research on the preservation problems surrounding digital culture. Tackles the ongoing debates focused on the related but distinct concepts of preservation, curation, maintenance, and stewardship.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PROG: School of Information Science

**LIS 2676 - RESEARCH DATA MANAGEMENT**  
Minimum Credits: 3  
Maximum Credits: 3  
This topical course is designed to introduce students to the conceptual and practical challenges of research data management and takes a highly innovative approach by "immersing" the participants in disciplinary research settings in subject domains beyond LIS, as part of the learning process. The seminar will explore disciplinary data diversity, but will also examine how universities and other organizations are developing policy, roadmaps, plans and tools to facilitate good research data management practice. The seminar will investigate roles, responsibilities, and relationships of key stakeholders engaging with legal and ethical data issues, advocacy and training methods, and the costs of providing such research data management services in institutions. A pragmatic approach will be supported by reference to case studies and exemplars, which show how researchers, librarians, technologists, administrators, and others are responding positively to the data challenge.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**LIS 2677 - RESEARCH DATA INFRASTRUCTURE**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will build on LIS 2676 Research Data Management course, and will focus on the elements of research data infrastructure which facilitate and enable effective data management. The course will examine approaches to data storage, data repositories and preservation practice, selected standards, schema, protocols and formats for describing datasets, data registries and catalogs enabling data discovery and the data publication
process. We will explore developments in data citation and metrics to track data provenance and attribution. In each of the listed areas, there will be case studies and exemplars to illustrate the challenges and experiences of pilot implementations and fully operational services. Finally we will also consider public engagement with data, including the landscape of citizen science initiatives and the emergence of data science concepts and practice.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

LIS 2680 - DATABASE DESIGN & APPLICATIONS
Minimum Credits: 3
Maximum Credits: 3
Characteristics and concepts of database systems; database development process, including entity-relationship model, relational database models, normalization, structured query language (SQL), basics of transaction management and physical database design; current database technologies; and database applications in libraries and archives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LIS 2600 or LIS 2610; PROG: School of Information Science

LIS 2690 - INFORMATION VISUALIZATION
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the visual design, structure, and organization of information as applied to library and information environments and web site design. Topics include visualization literacy, usability research, theories of visual perception and cognition, visualization models, visual analytics, and data graphics. The emphasis is on user and task-centered design for developing and evaluating visualization-based tools for various types of data. Practical work with visualization technologies will be included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: LIS 2600 or LIS 2610; PROG: School of Information Science

LIS 2695 - GIS FOR LIBRARIANS
Minimum Credits: 3
Maximum Credits: 3
Concepts, techniques and technology of GIS: geospatial data sources, metadata, and databases; techniques for creating maps; using GIS applications and software.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: LIS 2600 or LIS 2610; PROG: School of Information Sciences

LIS 2700 - MGNG LEADNG LIBS & INF SVCS
Minimum Credits: 3
Maximum Credits: 3
Managing and leading libraries and information services, one of the required core courses for the MLIS degree, focuses on key management theories and practice-based competencies in preparing students to be successful, service-oriented managers and leaders at all levels of diverse organizations. Students in this diversity and inclusion infused course will develop understanding of important skill sets and management and leadership domain areas, such as communication; strategic planning; core values and organizational culture; leading productive meetings; managing people, money, facilities, conflict, and change; legal and ethical issues; collaboration and partnerships; marketing and public relations; and professional development. Guest speakers representing different types of libraries, as well as other institutional settings, will provide students with exposure to varied management and leadership styles and perspectives. Individual and group assignments, course content and case studies from non-profit and for-profit sectors, readings, podcasts, and in-class and online discussions will examine emerging trends, challenges, and opportunities for 21st Century information center managers and leaders.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science; EXCLUDING SBPLAN: Archives and Information Sci (MLISAIS-SP); School Library Cert Program (MLISLCP-TR); MLIS Fast Track School Lib Cer (MLISFTL-TR)

LIS 2771 - ACADEMIC LIBRARIES
Minimum Credits: 3
Maximum Credits: 3
The environment of academic libraries has changed radically since the 1990s with rapid advances in technology, developments in higher education and innovations in scholarly communication. The fundamental purpose of academic libraries has not changed, but traditional jobs have given way to self-service and professional roles have evolved into complex specialties. This course explores the challenges and problems facing academic libraries today, examining their resources, services, facilities and staffing, with reference to historical contexts and future directions. It will cover traditional and emerging practices in areas such as academic liaison, information literacy, research support, scholarly publishing, library assessment and career management.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2772 - PUBLIC LIBRARY MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Planning, organizing, staffing, managing, budgeting, and evaluating public libraries with emphasis on a library's roles in the community.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2773 - CORPORATE KNOWLEDGE PRACTICES
Minimum Credits: 3
Maximum Credits: 3
This course explores corporate culture, with a focus on how organizations in the private sector create and use information, seek and store information, and utilize information systems and technologies to carry out their activities. Topics to be addressed include infrastructure, expertise, compliance, planning, staffing, managing, budgeting, assessment, personnel concerns, marketing, technology, capitalism, bureaucracy, and group dynamics.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2774 - SCHOOL LIBRARY MEDIA CENTR MGT
Minimum Credits: 3
Maximum Credits: 3
Planning, organizing, staffing, budgeting, implementing, and evaluating library media programs in elementary and secondary schools. The functions and roles of library media specialists in instruction and library media centers as information centers in schools.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LIS 2775 - SCHOOL DISTRICT LIBRARY MGT
Minimum Credits: 3
Maximum Credits: 3
Planning, organizing, staffing, budgeting, implementing, and evaluating library media programs at the district level. Functions and roles of library media coordinator/ supervisor as a manager and advocate for the district program.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2781 - LIBRYS IN HEALTHCARE ENVRNS
Minimum Credits: 4
Maximum Credits: 4
"Examination of the healthcare environment and professional roles. Consideration of internal and external factors: finances, regulations and legislation. Exploration of various healthcare settings, research and grants, evidence-based practice, patient-centered focus, and information technologies used by healthcare professionals."
LIS 2800 - ORGANIZATIONAL BEHAVIOR
Minimum Credits: 3
Maximum Credits: 3
Communication and personality theories and how these relate to interaction with staff, users and administrators in organizational settings. Interpersonal communications techniques, use of Myers Briggs type indicator and group dynamics.

LIS 2830 - ADVOCACY & MKTG FOR LIBRARIES
Minimum Credits: 3
Maximum Credits: 3
The creation, design, and production of publicity and marketing. Strategies of effective public relations: lobbying, fundraising, news management, market and audience research, and needs assessment.

LIS 2850 - INF PROFS ROLE IN TCHNG & LRNG
Minimum Credits: 3
Maximum Credits: 3
Teaching and training fundamentals; learning styles; instructional strategies; managing large and small instruction programs; designing online library instruction modules; and creating successful library instruction classes in all types of library settings, with a focus on academic libraries.

LIS 2880 - COMMUNITY KNOWLEDGE PRACTICES
Minimum Credits: 3
Maximum Credits: 3
Focuses on information needs and challenges in the nonprofit sector. Explores how nonprofits use information systems and services. Students will learn how to support nonprofits in a variety of activities, including entity registration, fundraising, technology acquisition and adoption, knowledge management, marketing, messaging, and reporting. Designed for students interested in working as information professionals in NGOs, community organizations, foundations, social service agencies, and government.

LIS 2881 - REF SVCS & INSTC IN HEALTHCARE
Minimum Credits: 4
Maximum Credits: 4
Examination of reference services with special focus on evidence-based medicine, systematic reviews and meta analyses, instructional and consulting services, imbedded, clinical and liaison services. Library services to special populations in the healthcare environment.

LIS 2901 - INDIVIDUAL RESEARCH 1
Minimum Credits: 1
Maximum Credits: 3
Research on a topic selected by the student and carried out with scheduled reports to a faculty member. Reports of the research may take various forms as determined in advance by the student and faculty member. Faculty member's agreement to sponsor required.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science

LIS 2902 - INDIVIDUAL RESEARCH 2
Minimum Credits: 1
Maximum Credits: 3
Research on a topic selected by the student and carried out with scheduled reports to a faculty member. Reports of the research may take various forms as determined in advance by the student and faculty member. Faculty member's agreement to sponsor required.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad Letter Grade
Course Requirements: PROG: School of Information Science

LIS 2910 - CAS INDIVIDUAL RESEARCH
Minimum Credits: 1
Maximum Credits: 1
Research on a topic in the health sciences selected by the student and advisor and carried out with scheduled reports to the advisor.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Library & Information Science (LIS-AC)

LIS 2921 - FIELD EXPERIENCE
Minimum Credits: 3
Maximum Credits: 3
Supervised work in a library, archive or other information service environment that provides a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in other courses. Agreement of faculty sponsor and field work supervisor required.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: PROG: School of Information Science

LIS 2922 - PRACM IN SCH LIB MEDIA PROGRMS
Minimum Credits: 3
Maximum Credits: 6
Experience in a school library, under the supervision of a cooperating teacher librarian working collaboratively with teachers, teaching information literacy skills, providing services to students and teachers, and managing resources. Weekly seminars, individual coaching sessions, and other online written requirements focus on identifying best practices and using case studies to problem solve. Professional assessment; completion of SLCP portfolio of demonstrated competencies and electronic professional portfolio.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: SBPLAN: School Library Cert Program (Library & Information Science-MLIS) or LIS SLCP Certificate (Library & Information Science-AC) or MLIS Fast Track School Lib Cer (Library & Information Science-MLIS) or Special LIS (Not Candidate for Degree-ND)

LIS 2923 - PRAC SCH DISTRC LIB MEDIA PRGS
Minimum Credits: 6
Maximum Credits: 6
Coordinated experience in various aspects of managing district- or regional-level school library programs, including professional development for district school librarians, collections and resources management, professional libraries, central-processing centers, and personnel.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: SBPLAN: LIS SLCP Certificate (Library & Information Science-AC) or Special LIS (Not Candidate for Degree-ND)

LIS 2924 - FIELD EXPERIENCE IN ARCHVS IS
Minimum Credits: 3
Maximum Credits: 3
Supervised work in an archive, or other information-service environment that provides a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in other courses. Agreement of faculty sponsor and field work supervisor required.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad SN Basis
Course Requirements: SBPLAN: LIS SLCP Certificate (Library & Information Science-AC) or Special LIS (Not Candidate for Degree-ND)

LIS 2960 - CONTINUING EDUCATION
Minimum Credits: 1
Maximum Credits: 3
Courses designed for the practitioner in a continuing education format.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: SBPLAN: LIS SLCP Certificate (Library & Information Science-AC) or Special LIS (Not Candidate for Degree-ND)

LIS 2963 - UPDT SCHOOL LIB MEDIA SPECLST
Minimum Credits: 3
Maximum Credits: 3
Update of knowledge and skills needed by school library media specialists. Various topics. S/n grade only.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis
Course Requirements: SBPLAN: LIS SLCP Certificate (Library & Information Science-AC) or Special LIS (Not Candidate for Degree-ND)

LIS 2970 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Courses offered on an experimental basis or as special topics seminars.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: SBPLAN: LIS SLCP Certificate (Library & Information Science-AC) or Special LIS (Not Candidate for Degree-ND)

LIS 2971 - SPECIAL TOPICS: PUBLIC SERVS
Minimum Credits: 1
Maximum Credits: 1
Individual 1-credit courses surveying and evaluating the current sources, services, and trends in reference and other public service areas of librarianship. Classes may include practical applications of theory, principles, and standards; hot topics; and discussion of the librarian's distinct roles within the LIS institution.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Science

LIS 2975 - SEMINARS: SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: School of Information Sciences

LIS 2990 - COLLOQUIUM
Minimum Credits: 0
Maximum Credits: 0
Guest speakers from the information professions present information on current topics and trends, providing student's additional stimulus for professional growth.
Academic Career: GRAD
Course Component: Colloquium
Grade Component: Grad SN Basis
Course Requirements: PROG: School of Information Science

LIS 3000 - INTRODCTN TO DOCTRAL STUDIES
Minimum Credits: 3
Maximum Credits: 3
An introduction to the requirements for the Ph.D. Degree in the department of library and information science and to the broader social and academic context of doctoral studies: its history and traditions, social role, methodologies, and outcomes of doctoral scholarship in library and information science.
Academic Career: GRAD
Course Component: Seminar

Linguistics

LING 1000 - INTRODUCTION TO LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This course is a survey of general linguistics, emphasizing the theory and methodology of the traditional central areas of the field—phonetics, phonology, morphology, and syntax— with special concentration on phonological and syntactic theories and analytical techniques. The remainder of the course will be devoted to phonetics, morphology, historical linguistics, semantics and pragmatics, sociolinguistics, and psycholinguistics.

Academic Career: UGRD
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

LING 2000 - THESIS RES FOR THE MA DEGREE
Minimum Credits: 1
Maximum Credits: 9
This course provides for individual work under the guidance of a faculty member.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

LING 2010 - STATISTICS REASEARCH IN LING
Minimum Credits: 3
Maximum Credits: 3
Students finish this course with a basic understanding of the reasoning behind the most common statistical tests and measures used in linguistics. Students are able to use their knowledge to select, perform, and interpret statistical tests in both corpus-based and experimental research.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2025 - ASPCTS OF THE CHINESE LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
LING 2050 - SPECIAL TOPICS IN LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This course focuses on a specialized topic in linguistics. The content changes depending on the instructor, but most often a particular language, language group, or language area will be the topic.

LING 2139 - APPROACHES & METHODS L2 LEARNING
Minimum Credits: 3
Maximum Credits: 3
This course is intended to introduce language teachers and prospective language teachers to the various approaches and methods currently employed in the teaching of English as a foreign or second language and, by extension, to other foreign language teaching as well. This course is paired with linguistics 2142, which presents the more practical aspects of Tesol teaching methods and classroom techniques.

LING 2140 - CONTRS ANALYS & ALTNTV APPRCHS
Minimum Credits: 3
Maximum Credits: 3
An analysis of the types of errors made by second language learners with special emphasis on both first-language (traditionally known as contrastive analysis) and second language interference, but with a discussion of other sources of errors as well. The course will emphasize the theoretical implications of these for a theory of second language learning. Readings will be selected from the current literature, and students will be asked to conduct a project dealing with some aspect of error analysis.

LING 2142 - SECOND LANGUAGE TEACHING
Minimum Credits: 3
Maximum Credits: 3
This course is intended to introduce current and prospective foreign and second language teachers to the various theories, approaches, issues, and practices employed in the teaching of English as a foreign or second language and, by extension, to other foreign language teaching as well. The course provides a broad overview of content in order to provide foundational knowledge of the field, and includes lectures, exams, and practical experience components.

LING 2143 - SEM LANG TCH MATLS DEVELOPMNT
Minimum Credits: 3
Maximum Credits: 3
This is a course designed to introduce students to the design and development of materials and texts for the teaching of second languages. The course is conducted as a seminar with student presentations on the various aspects of materials designed to teach language skills. Each student also presents a project prospectus that describes the purpose, descriptive objectives, operational objectives, concepts, and procedures for incorporating concepts into the materials. Students then prepare the materials (or part of them) and present reports on their projects.

LING 2144 - RES METHODS IN APPLIED LING
Minimum Credits: 3
Maximum Credits: 3
This course will give a broad introduction to research methods for the study of non-native language development. Both quantitative and qualitative methods will be discussed for the study of as well as informal learning and acquisition processes. But some emphasis will be put on qualitative methods and on classroom language development. Occasional reference will be made to research strategies in sociolinguistics and psycholinguistics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2146 - SECOND LANGUAGE ACQUISITION
Minimum Credits: 3
Maximum Credits: 3
This course will deal with second language development from a linguistic and psychological, rather than from an educational point of view. Both the influence of linguistic theory on second language research and the importance of second language data for linguistic theory will be discussed. Second language development in children as well as adults will be described, and frequent comparisons will be made with data from first language acquisitions.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: LING 1000

LING 2147 - CUR ISSUES IN SECOND LANG LRNG
Minimum Credits: 3
Maximum Credits: 3
This course will cover four or five topics that have received a lot of attention in the applied linguistics literature of the last few years. Topics discussed in the past include learning vs. Acquisition, accuracy vs. Fluency, classroom interaction, individual differences, and computer-assisted instruction.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2148 - COMPUTR-ASISTD LANGUAGE LEARNNG
Minimum Credits: 3
Maximum Credits: 3
This course will review the literature in Computer-Assisted Language Learning (CALL) in view of the implications of call in foreign/second language instruction, and the many ways in which linguistic theory and techniques from artificial intelligence can contribute to the development of call software.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LING 1000 or 1930 or LING 2139

LING 2149 - ADV SECOND LANGUAGE ACQUISTN
Minimum Credits: 3
Maximum Credits: 3
This course aims to cover a number of topics which are presently under discussion in the field of applied linguistics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LING 2142 or LING 2146 or LING 2148

LING 2190 - SEM ESL TEACHER SUPERVISION
Minimum Credits: 1
Maximum Credits: 3
This course combines seminar discussion, supervision of teachers, and co-observation with English language institute supervision. Topics covered include objectives and techniques of supervision, classroom supervision, post observation feedback to instructors, and overall teaching effectiveness.

Academic Career: GRAD
Course Component: Internship
Grade Component: Grad SN Basis
LING 2191 - SEM ESL DEMONSTRATION LESSONS  
Minimum Credits: 1  
Maximum Credits: 3  
Participants in the seminar observe ESL or foreign language teaching demonstrations, videotapes, or peer teaching and then discuss what has been observed. Participants take turns in being responsible for presentations related to the demonstration teaching or discussion. Related readings are required for some sessions.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad SN Basis  

LING 2192 - SEM ESL RECENT PUBLICATIONS  
Minimum Credits: 1  
Maximum Credits: 3  
Recently published articles and books on methods and techniques of teaching ESL and foreign languages are reviewed and discussed. Selections are made to cover as wide a range of issues as possible and according to the interests of seminar participants.

Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad SN Basis  

LING 2195 - PRACTICUM ESL TEACHING  
Minimum Credits: 1  
Maximum Credits: 1  
The requirements of the practicum may be fulfilled by supervised teaching either in the English language institute or in its informal ESL course (for at least 15 contact hours). Teachers are required to attend orientation and training meetings, be observed in class, attend post-observation discussions, and provide an evaluation of the curriculum.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad SN Basis  

LING 2196 - PRAC: SECOND LANG CURRICULM  
Minimum Credits: 1  
Maximum Credits: 3  
Experienced teachers in the English language institute become section leaders and work with the English language institute staff in coordinating various curricular areas, training newer teachers, or developing curriculum materials.

Academic Career: GRAD  
Course Component: Practicum  
Grade Component: Grad SN Basis  

LING 2197 - TEACHING OF LINGUISTICS  
Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide supervision and consultation to graduate student TA's and TF's in undergraduate linguistics courses.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  

LING 2234 - LANGUAGE PLANNING  
Minimum Credits: 3  
Maximum Credits: 3  
This course concerns planning language at the national level; selection of national languages; standardization, modernization and elaboration of a language; educational practices, etc. We will begin by considering language planning theories and then move on to a variety of case studies that will provide a viewpoint from which we can then re-examine the theories.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis
LING 2235 - LANGUAGE, GENDER AND SOCIETY
Minimum Credits: 3
Maximum Credits: 3
The primary objective of this course is to sensitize students to the impressions given through language and the degree to which these are sex-linked. The course addresses a number of questions relevant to gender-specific language variation, including these: does language influence the way we view our gender roles, or do our gender roles condition our language? What do gender differences in languages have to do with the maintenance of social boundaries?
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2240 - LANGUAGE AND THE LAW
Minimum Credits: 3
Maximum Credits: 3
This course explores some of the ways in which linguistic science can shed light on the use and misuse of language in the legal system. After an introduction to the origins and special characteristics of written English legal language ("legalese"), we will study the layman's (non-) understanding of technical legal language; the language of persuasion (e.g. Exploitation of such linguistic features of ambiguity, implicit "rules of conversation" and socially stigmatized dialect features); and arguments for and against the participation of linguists as expert witnesses in the courtroom.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2250 - LANG PLCYS & ED LING MINORTYS
Minimum Credits: 3
Maximum Credits: 3
This course examines the basic problems and principles of language policies in general as well as language planning and implementation specifically in the education of linguistic minorities. This course will explore the nature of bi-lingual education and its effectiveness in various social settings. The approach will be at the macro level of types of bilingual education and the societal needs which give cause to its various forms of institutionalization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2253 - PIDGIN AND CREOLE LANGUAGES
Minimum Credits: 3
Maximum Credits: 3
This course surveys the new languages that have sprung up in various parts of the world and under various historical circumstances when people who speak different languages come into contact with each other. These contact languages are called pidgins as long as they are spoken only as second languages, and creoles if they become the main language of a speech community. This course focuses on the major structural, social, and historical features of pidgins and creoles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2265 - SOCIOLINGUISTIC VARTN & CHANGE
Minimum Credits: 3
Maximum Credits: 3
At the end of this course, students are able to explain: how variation is structured in phonology and morphosyntax; how language variation is related to language change; how variation is affect by (and used for) social identity, motivation, and social structure; how to study variation (methods); how variation is acquired; and how variation is deployed as a conversational resource. Students are also able to apply their understanding of the methodologies and literature to produce a variationist study of publishable quality.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2267 - SOCIOLINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course in the social aspects of language. The course is divided into three parts: (1) linguistic competence; (2) communicative competence; and (3) language policy, which deals with implications of earlier topics when applied to society.
LING 2269 - CURRN ISSS IN SOCIOLINGUISTICS
Minimum Credits: 1
Maximum Credits: 3
This course aims to cover a number of topics which are presently under discussion in the field of sociolinguistics.

LING 2270 - ADVANCED SOCIOLINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of LING 2267, Sociolinguistics. This course will focus on topics selected by students' particular interests and these topics will be covered in depth.

LING 2272 - SOCIOLOGY OF LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
Sociology of language is constituted of topics which can be the subject of study by researchers without linguistic training, where the focus, rather than on the description of linguistic structure, is on the explanation of language use and behavior by social groups. This seminar will consider such topics as language and ethnicity; language maintenance; languages of wider communication; language loyalties; language rights; language policies and planning; speech communities and social networks; language, religion and sacred languages; language and educational issues.

LING 2274 - LANGUAGE CONTACT
Minimum Credits: 3
Maximum Credits: 3
This course examines the effects of language contact on the structure of the involved languages. We will investigate a variety of language contact situations and the ways in which varying degrees of intensity of contact lead to differing degrees of interference between linguistic systems. Topics include: language contact as a cause for linguistic change (loan words, phonological and other structural change); typologies of language contact (substratum, sprachbund); bilingualism in the individual and the bilingual community (social dialects, diglossia); the emergence of new languages through contact (regional versions of standard languages, pidgins and Creoles).

LING 2276 - VARIATION ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Students finishing this course will be able to carry out their own variation study. The course will cover both linguistic aspects of variation, such as how phonological theory can model variation patterns, and social aspects of variation, such as how social concepts explain the variation patterns found for class, gender, etc. The course will also focus on the methods of gathering, coding, and especially analyzing linguistic data using a variationist perspective.

LING 2320 - LANGUAGE DEVELOPMENT
Language acquisition is central to the issues of innateness and modularity and has spawned highly polarized camps with little or no middle ground. This course will present a range of current perspectives by exploring phonological, lexical and syntactic development. Topics will include the nature of children's linguistic representations. Proposed learning mechanisms, and the role of attention and memory in the process of language development.

**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**LING 2330 - INTRO TO COMPUTATIONAL LING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In both linguistics and computer science, we need to study languages and their grammar from a mathematical point of view. This course is an introduction to the mathematical theory of language and its applications. The first half will deal mainly with elements of the theory of automata and its relation to grammars. The second half will survey ways in which this theory can be applied to English grammar and to the design of programming languages. We will concentrate on syntax, but will also pay some attention to theories of meaning.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**LING 2350 - LOGC PROGM NG & CMPTL MORPHLGY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
Basic concepts of logic programming. Introduction to programming in prolog, with special attention to recursion, lists and natural language programming. Theory of finite state networks and finite state transducers, and applications to natural language morphology. This introduction will not aim at programming expertise, but at concepts and basic techniques that will be valuable to professional users of natural language software.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**LING 2390 - SYNTAX OF SPANISH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course addresses Spanish syntactic constructions and structures from the point of view of current linguistic theory. Topics to be dealt with include constituent structure of nominal, verbal and adjectival projections, functional categories, word order, main and embedded clauses, and case assignment. Special attention will be paid to the relationship between syntax and the lexicon as it manifests itself in phenomena such as passive voice, divinization, light verb constructions, and argument alternations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**LING 2391 - PHONOLOGY OF SPANISH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a description of Spanish sounds (vowels, diphthongs and consonants in all their allophonic realizations), and prosodic features (stress and intonation) in light of current phonological theories. Special attention will be paid to syllable structure, as well as different phonological processes such as assimilation, dissimilation, and epenthesis. The relationship between phonology and other components of the grammar (in particular morphology and syntax) will also be dealt with.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

---

**LING 2392 - HISTRY OF THE SPANISH LANGUAGE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with the evolution of the Spanish language from Latin. Language change at all levels will be taken in to account: phonological, morphological, syntactic, lexical, and semantic. Both internal and external factors of change will be considered. Special topics to be covered include grammaticalization, language contact, and the evolution of Latin American Spanish. Authentic texts from different periods will be analyzed.

**Academic Career:** GRAD  

---
LING 2393 - SPANISH SOCIOLOGICUTICS
Minimum Credits: 3
Maximum Credits: 3
This course explores the variation found in the Spanish language due to social factors. Issues of gender, education, occupation and ethnicity are considered in the analysis of Spanish sociolects. Social differences are discussed in relation to language use, acquisition and education.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2394 - SPANISH DIALECTOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course looks at varieties of Spanish from different perspectives: regional, social, and stylistic. Phonological, morphological, syntactic, and lexical variation will be taken into account. Special attention will be paid to heritage Spanish, creoles, language contact, as well as the diachronic sources of regional differentiation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2396 - SEMINAR STRUCTURE OF SPANISH
Minimum Credits: 3
Maximum Credits: 3
This course examines specific issues related to the Spanish language. The levels of analysis include phonetic, phonological (including prosodic), morphosyntactic, lexical and pragmatic. The focus of this course is to emphasize the main aspects of the linguistic structure of Spanish.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2397 - SP TOPICS HISPANIC LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This course aims to cover a number of topics which are presently under discussion in the field of Hispanic linguistics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2440 - LANG AND PREHIST IN MESOAMERC
Minimum Credits: 3
Maximum Credits: 3
Mesoamerica is well-known linguistically, & its linguistic prehistory is rather well understood. Archeological research has achieved knowledge in great detail for many key areas. Ethno historical sources in native languages abound. The integration of linguistic archeology & ethno historical knowledge can yield a detailed picture of the area's culture history. We will survey the ethnolinguistic history of Mesoamerica from 5000 to 1500 ad. Attention will be given to the ethnic association of archeological cultures & the cultural/ecological interpretation of reconstructed words.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2441 - FIELD METHODS IN LINGUISTICS
Minimum Credits: 3
Maximum Credits: 4
This course is meant to simulate the experience of linguistic field work, and raise awareness about the effective ness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of a non (Indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethno semantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.
Academic Career: GRAD
LING 2442 - MAYAN LANGUAGES AND CULTURES
Minimum Credits: 3
Maximum Credits: 3
The 30 Mayan languages of southern Mexico, Guatemala, & Belize are among the best documented languages of Mesoamerica; they are ergative, & have both passives & anti passives. The results of comparative study of Mayan languages surpass those for any other Mesoamerican family. Some Mayans had pre-Columbian writing, & this writing system is currently being deciphered. Mayan society has been well studied by ethnographers, & ethno historical sources are numerous & valuable. Besides these topics, ethnographically meaningful texts in two Mayan languages will be studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2443 - AMERICAN INDIAN LANGUAGES
Minimum Credits: 3
Maximum Credits: 3
Of over 1000 different languages spoken by Native Americans in 1492, about 600 survive, most spoken by small numbers, although many populous Amer-Indian ethnic groups are found in Mesoamerica & the Andes. This course will survey the language families of the new world, & study the grammar & ethno graphic texts of two languages. The results of historical & comparative research on Amer-Indian languages will be studied, particularly as they relate to the culture history of their region. Also to be studied are pre-Columbian writing & literature & efforts at cultural maintenance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2445 - COPTIC GRAMMAR AND READINGS
Minimum Credits: 3
Maximum Credits: 3
Coptic is the name we give to the latest stage of the Egyptian language, from ca 200 CE to ca 1400 CE. Coptic is writ ten using primarily the Greek alphabet. Coptic is known in five dialects; this course will focus on the Saidic, in which the majority of orthodox and some gnostic writings were composed. The main work in this course will be to learn the grammar, but some text will be read. The grammar of Coptic is relatively uncomplicated and the pronunciation presents only moderate difficulty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

LING 2446 - MESO-AMERICAN WRITING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
In pre-Columbian times full writing was in use in southern Meso-America among epi-olmecs, Zapotecs, and Mayans in the period spanning 300bce to 1700ce. In Northern Meso-America partial writing was practiced by some groups. Virtually all knowledge of the content of these systems has been achieved through decipherment. This course will introduce students to the deciphered systems, and engage them in research to expand our knowledge of the details of both the deciphered and un-deciphered systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2448 - AZTEC LANGUAGE AND CULTURE
Minimum Credits: 3
Maximum Credits: 3
The Aztecs spoke Nahua, as did the Toltec's before them. One million present-day Nahuas still speak the language & practice an Amer-Indian culture. The Nahua language is the best documented of all native American languages, from the 16thc to the present. The ethno historical sources in Nahua & on late pre-Columbian culture are unsurpassed in scope. All the writings in Nahua make up a small library. In this course we will study the grammar of Nahua, read ethnographic texts from the 20th & 16th centuries, & trace the culture history of the Nahua-speaking peoples within Mesoamerica.
Academic Career: GRAD
LING 2449 - MESOAMERICAN LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
Mesoamerica is noteworthy for its pre-Columbian cultural achievements and also for the research accomplishments of ethnographers and linguists working in the area. This course will examine this culture area's convergent linguistic features, as well as pre-Columbian writing and calendar. The language families and isolates of the area will be surveyed, as well as their classification and diachronic developments. Selected languages from a variety of families will be studied descriptively, and the recent phenomenon of training Indians as linguists and ethnographers will be examined.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2450 - STRUCTURE OF AN AMERINDAN LANG
Minimum Credits: 3
Maximum Credits: 3
This is a seminar for the investigation of anthropological linguistic topics of interest to the professor and students. Topics covered might include ethno botany, ethnozoology, ethno medicine, ethno psychology, kinship terminology, diffusion of artifacts/cultigens and their names, and many others. Methodology will vary with topic.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2466 - TOPICS IN ANTHROPOLOGICAL LING
Minimum Credits: 3
Maximum Credits: 3
This is a seminar for the investigation of anthropological linguistic topics of interest to the professor and students. Topics covered might include ethno botany, ethnozoology, ethno medicine, ethno psychology, kinship terminology, diffusion of artifacts/cultigens and their names, and many others. Methodology will vary with topic.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2578 - PHONETICS AND PHONEMICS
Minimum Credits: 3
Maximum Credits: 3
Intensive analysis of the sounds of speech, giving special attention to organs involved in the articulations of speech sounds and auditory discrimination. Students will obtain grounding in practical phonetic skills. Concepts of phoneme, features, abstractness in addition to grammatical theory regarding descriptive phonology will be introduced.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2579 - PHONOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course introduces the principles of phonological analysis and theory. After a brief survey of the roots of modern phonology in Prague school and American descriptivist ('classical phonemic') theories, the main focus of the course will be on generative phonology. Both in and out of class, students will be expected to solve phonological problems and construct theoretical arguments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LING 2578

LING 2580 - TOPICS IN PHONOLOGICAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This course provides an opportunity for students to explore in depth one or more topics in phonological theory. The subject matter of the course varies according to the particular interests of students and instructor in a given year. Topics that are likely to be covered are phonetic phonological interface, articulatory phonology, and phonological acquisition.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: LING 1579 or LING 2579

**LING 2581 - ADVANCED PHONOLOGY**  
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on current developments in phonological theory. The specific content changes with the instructor. Possible topics include a focus on one phonological theory, a group of processes, or a particular language.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2670 - THEORY OF LOGIC & COMPUTATION**  
Minimum Credits: 3  
Maximum Credits: 3  
An advanced introduction to a symbolic logic and the theory of computation. The course will develop the theory of propositional and quantificational logic, including automated theorem proving techniques. There will be a brief introduction to the theory of computability and complexity, with applications to logic-related problems. There will be several lectures on applications of logic in computer science especially in artificial intelligence. Students will be exposed to several computer programs illustrating points that are made in class.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2681 - PRAGMATICS**  
Minimum Credits: 3  
Maximum Credits: 3  
Theories of how context of utterance affects the relationships between language and human action and communication. Topics include presupposition, conversational implicature, no declarative sentences, deixis and anaphora, and discourse analysis of units larger than sentences.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2682 - INTRODUCTION TO SEMANTIC THEORY**  
Minimum Credits: 3  
Maximum Credits: 3  
A survey course designed to introduce students who have been exposed to linguistics and logic to contemporary work in the theory of meaning.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2683 - ASPECTS OF LEXICAL MEANING**  
Minimum Credits: 3  
Maximum Credits: 3  
The course begins with a discussion of an approach to linguistics within which lexical meaning can be explained, and continues with the assignment of lexical meaning to linguistic units and an exploration of the implications of lexical spectrum intersection theory.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2720 - STRUCTURE OF SIGN LANGUAGES**  
Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on the linguistic structure of sign languages, drawing examples principally, though not exclusively, from American sign
It will also highlight similarities and differences between sign languages and spoken languages. In addition to structural features, the course will cover mechanisms unique to visual/spatial languages, the use of the face and body for grammatical signals, language variation, and acquisition of sign languages.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2721 - SOCIOLINGUISTICS OF SIGN LANG**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
There are various sociolinguistic topics that one must consider with respect to signed languages of the deaf. Regarding language contact, ambient languages—either signed or spoken—influence a signed language. Less than 10% of deaf people are exposed to signed language from birth, which results in unique phenomena. Additionally, signed languages exhibit variation based on a myriad of social and geographical factors. These topics, in addition to language planning and language policy, will be addressed in this course.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2722 - DEAF CULTURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Many deaf people in the U.S. Are united by a language (ASL) that differs from English and a culture with characteristics that differ from those of the larger hearing society. This culture is known as deaf culture, and students in this course will be introduced to various facets of American deaf culture through readings, videos, and discussions. Students will also explore other deaf cultures throughout the world. Among the course foci are: issues of accessibility, perspectives of deaf versus hearing individuals, and various examples of deaf literature.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** CREQ: LING 0473

**LING 2723 - ANALYSES OF ASL LITERATURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed for students to explore and analyze American sign language and American deaf culture through asl literature. Studying asl literature is a way to examine the linguistic complexity of asl as well as explore the deaf community's values and traditions as a minority group and a group to which visual depiction of ideas is highly valued. This course is conducted in asl.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  

**LING 2738 - LINGUISTIC STRUCTRS OF ENGLISH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is a "nuts and bolts" description of the lexical and syntactic structures of English. An attempt will be made to provide students with a thorough grounding in traditional grammar, while, at the same time, presenting insights and explanations from a transformational-generative perspective. The class is designed for English language teachers—either those who are teaching it in American school systems or those who wish to teach EFL. Lecture format with class discussion.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** PREQ: LING 1000

**LING 2761 - DISCOURSE ANALYSIS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Many aspects of language cannot be handled adequately in sentence grammars. Although these aspects arguably pertain to a separate area of study, the fieldworker or student of language in context must not avoid them. This course studies discourse in a number of languages, from formal and functional perspectives. Discourse will be shown to provide rich insights into language and culture.

**Academic Career:** GRAD
LING 2773 - MORPHOLOGY
Minimum Credits: 3
Maximum Credits: 3
Morphology, the study of words, is interrelated with the syntax, the phonology, the lexicon, and semantics. The purpose of this course is to develop operational competence, through problem solving and discussion, in the major aspects of morphological theory. Theoretical issues to be addressed will include lexical phonology, prosodic morphology, morphology and logical form, morphology and valence alternations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2774 - SEM CURRENT ISSUES IN SYNTAX
Minimum Credits: 1
Maximum Credits: 3
This course will deal in depth with one or two topics (to be announced each term) in syntactic theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2777 - SYNTACTIC THEORY
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction, stressing understanding of theoretical concepts, to the transformational generative approach to English sentence structure. This approach uses formal rules to produce sentences, and to explain how they are composed of phrases. The first part of the course concentrates on mechanical manipulation of systems of rules, aiming to acquaint the student with how the rules work. The second part concentrates on how syntacticians use evidence about a language to support or disconfirm their theories.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2778 - READINGS IN SYNTAX
Minimum Credits: 1
Maximum Credits: 3
This course will extend students' knowledge to the fundamental concepts of the principles and parameters approach to syntax (government and binding theory). Its goals are to enable students to manipulate the theory with confidence and to enable students to read primary literature. Furthermore, it aims to provide students with exposure to analyses of a range of languages in order to achieve an understanding of the value of cross-linguistic analysis in theory construction. Finally, we shall consider the motivation for the recent developments in syntactic theory proposed by Chomsky.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

LING 2779 - ADVANCED SYNTAX
Minimum Credits: 3
Maximum Credits: 3
This course focuses on current developments in syntactic theory. The specific content changes with the instructor. Possible topics include a focus on one syntactic theory, a group of processes, or a particular language.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 2787 - ALTERNATIVE SYNTACTIC THEORIES
Minimum Credits: 3
Maximum Credits: 3
Certain formal linguistic models dominate theoretical linguistic thinking and practice – government and binding, lexical functional grammar, and montague grammar. But other theories are being honed and practiced, some formal, such as categorical grammar, arc-pair grammar, and role and
reference grammar, and some non-formal, such as functional grammar. This seminar will survey such of these marginal and/or unorthodox theories as match the current interests of the professor and the students.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2860 - INTRO TO HISTORICAL LINGUISTICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
A survey of the principles and methods of historical linguistics; practice in the basic techniques of historical linguistic research. The major topics to be studied are the analysis of sound change, analogic change, contact-induced language change, the relationship between variation (regional and social) and language change, the comparative method, and internal reconstruction.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2861 - TOPICS IN HISTORICAL LINGUISTICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides an opportunity for students with some background in historical linguistics to investigate one or more areas of the field in depth. The content of the course varies according to the particular interests of students and instructor in a given year. Topics that have been covered include theory and methodology of linguistic reconstruction; contact-induced language change; and a general survey of theoretical writings on language change.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2871 - ART OF LOGIC AND COMPUTATION**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
A quick introduction to the art of using logic as a representation language. The presentation will be aimed at linguists and computer scientists who want to become acquainted with the idea of logical form. The course will use parts of a textbook by Jon Barwise and John Etchemendy, and will rely on accompanying tutorial software for Macintosh computers. There will be an opportunity at the end of the course for students to learn something about either logic programming or relating logical forms to natural language, whichever they prefer.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2873 - ADVANCED MORPHOLOGY**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on current developments in morphological theory. The specific content changes with the instructor. Possible topics include a focus on one morphological theory, a group of processes, or a particular language.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2902 - DIRECTED STUDY FOR MA STUDENTS**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course provides for individual work under the guidance of a faculty member.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis

**LING 2945 - PSYCHOLINGUISTICS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3
This course is a general introduction to psycholinguistics, which will focus on a specific topic such as speech, perception, language processing, language production and/or language acquisition. Throughout the course, we will consider the relationship between theoretical linguistics concepts and constructs, and psycholinguistic data. We will also touch on related areas, such as processes of reading, language and the brain, and language and thought.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2950 - HISTORY OF LINGUISTICS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course surveys the history of linguistics from ancient times to today, with emphasis on the nineteenth and twentieth centuries. A major topic is the birth of structural linguistics and the development of various 'schools' of linguistics during the Twentieth Century.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**LING 2959 - DEPARTMENTAL SEMINAR**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
A forum for the exchange of ideas among faculty members and advanced graduate students. Topics to be presented and discussed will include areas of linguistic endeavor which are under current exploration by any of the program participants, i.e. Faculty projects, doctoral dissertation work, and M.A. Long paper research.

**Academic Career:** GRAD  
**Course Component:** Colloquium  
**Grade Component:** Grad LG/SNC Basis

**LING 2990 - INDEPENDENT STUDY FOR MA STUDENTS**

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
This course provides an opportunity for students to formally pursue work on an individual basis.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad SN Basis

**LING 3000 - DISSERTATION RESEARCH FOR PHD**

- **Minimum Credits:** 1

This course provides the opportunity for students to formally pursue work on an individual basis.

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis

**LING 3101 - PHD COMPREHENSIVE PAPER 1**

- **Minimum Credits:** 1  
- **Maximum Credits:** 9  
This course provides students with guidance in proposing, researching, writing, and orally presenting the final draft of part one of the Ph.D. comprehensive requirement, normally no later than their fourth year. Depending on the time spent on the comprehensive, the course can be worth one to nine credits. If nine credits are chosen, the comprehensive paper must be completed by the end of the semester.

**Academic Career:** GRAD
LING 3102 - PHD COMPREHENSIVE PAPER 2
Minimum Credits: 1
Maximum Credits: 9
This course provides guidance to students in proposing, researching, writing, and orally presenting the final draft of part two of the Ph.D. comprehensive requirement, normally no later than their fourth year. Depending on the time spent on the comprehensive, the course can be worth one to nine credits. If nine credits is chosen, the comprehensive paper must be completed by the end of the semester.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

LING 3146 - ADV SECOND LANGUAGE ACQUISTN
Minimum Credits: 3
Maximum Credits: 3
This course is a doctoral seminar in which students discuss the most recent papers on a topic of interest to the professor and the students in second language acquisition and learning. Students and the faculty member will agree on a set of topics to be covered in the class, and students will present papers and lead discussions on topics relevant to their doctoral work.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 3267 - ADVANCED SOCIOLINGUISTICS
Minimum Credits: 1
Maximum Credits: 3
This course is a continuation of LING 2267, Sociolinguistics. This course will focus on topics selected by students' particular interests and these topics will be covered in-depth.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: LING 2267 or LING 2272

LING 3397 - SPECIAL TOPICS HISPANIC LING
Minimum Credits: 3
Maximum Credits: 3
This course aims to cover a number of topics which are presently under discussion in the field of Hispanic linguistics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 3579 - ADVANCED PHONOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course will continue to build on LING 2579 constructing a model of phonological theory. This course provides students with an overview of advanced topics in phonology such as feature geometry, under specification, lexical phonology, syllable theory, auto segmental phonology, metrical phonology and optimal theory. Students will be provided with opportunities to apply the theory to data from a wide variety of languages, leading to a greater understanding of the applications of the theory to sound systems and of the implications for an understanding of human cognition.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

LING 3773 - ADVANCED MORPHOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course consists of an in-depth analysis of morphological phenomena in natural language in light of current theories (both formal and functional). Special attention will be paid to polysynthetic and non-concatenative morphology, as well as to the interaction between morphology and other components of the grammar.
LING 3777 - ADVANCED SYNTAX
Minimum Credits: 3
Maximum Credits: 3
This course consists of an in-depth analysis of syntactic phenomena in natural language in light of current theories. The interaction between syntax and other components of the grammar will occupy a central place in the syllabus. Representative problems to be addressed include non-local dependencies, functional categories, ellipsis, and the representation vs derivation debate in syntactic theory.

LING 3860 - ADVANCED HISTORICAL LINGUISTICS
Minimum Credits: 3
Maximum Credits: 3
This seminar, every time it is offered, will have a specific thematic focus. Each student will undertake a project that will entail dealing with a reasonable body of data, and thereby acquire hands-on experience in doing research in historical linguistics. Thought-experiments or unfocused speculation will not be accepted. Possible topics will include lexical-phonological reconstruction, grammatical reconstruction, dialectology, language contact, and particular language families.

LING 3902 - DIRECTED STUDY FOR PHD STUDENTS
Minimum Credits: 1
Maximum Credits: 9
This course provides for individual work under the guidance of a faculty member.

LING 3990 - INDEPENDENT STUDY FOR PHD STUDENTS
Minimum Credits: 1
Maximum Credits: 9
This course provides the opportunity for students to formally pursue work on an individual basis.

Management Information Systems

BMIS 2002 - COMPUTER-BASED INFORMATION SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
Introduction to computers, their applications, potential, and limitations, emphasizing problem definition and problem solving so that the student may make effective use of this technology.

BMIS 2011 - BUSINESS INFORMATION STRUCTURE & PROCESSING
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will cover structured techniques of a business related programming language. It will also cover issues of language, information, and
algorithms for basic business information processing. The intent of this course is to provide a rather technical introduction to computers using common business oriented language (COBOL), and to apply this language to a variety of business problems. The course will begin with introductory programming and COBOLI concepts, and move onto problems of increasing difficulty through the half-semester.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2013 - MANAGEMENT INFORMATN SYSTEMS 1**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Familiarizes students with modern information systems and the processes used to develop such systems. Emphasizes the fit" between the system and the organization and strategic planning for information systems."  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2014 - MANAGEMENT INFORMATN SYSTEMS 2**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Misissues associated with areas such as distributed processing, decision support systems, and office automation. Individuals or groups of students are assigned to work on a case or in an industrial project.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2015 - DECISION SUPPORT SYSTEMS 1**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
Develops understanding of decision support systems through the use of cases dealing with the development of a range of computer-based systems supportive of managerial judgment as applied to semi-structured decisions.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2016 - DECISION SUPPORT SYSTEMS 2**  
Minimum Credits: 1.5  
Maximum Credits: 1.5  
A continuation of decision support systems 1" emphasizing the organizational issues involved in the design, development, and implementation of decision support systems."  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2017 - COMPUTER STRUCTURE & ALGORTHM**  
Minimum Credits: 3  
Maximum Credits: 3  
An introduction to solving business-oriented problems using a procedural computer language such as cobol. Topics will include structural techniques, sequential and direct file updating. Chain/list structures, report writing and sorting.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.
BMIS 2019 - ACCOUNTING INFORMATION SYSTEMS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Causes of the proliferation of computer applications in various areas of business, the systems approach, behavioral and organizational considerations, hardware components of computer systems, software technology, data storage, data management systems, operating systems concepts, and systems analysis and design techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2020 - ACCOUNTING INFORMATION SYSTEMS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
An analysis of computerized applications such as general ledger, payroll, accounts payable, accounts receivable, order processing, inventory control, market analysis, production scheduling, etc. Also considers computer systems evaluation and acquisition, data processing system controls, and electronic data processing auditing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2021 - SYSTEMS ANALYSIS & DESIGN 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Emphasizes a high-level management perspective on information systems design and development. The systems development life cycle is used as a basis for defining appropriate roles and responsibilities for specialists and users in contexts ranging from large centralized data processing to applications of personal computers and local area networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2022 - SYSTEMS ANALYSIS & DESIGN 2
Minimum Credits: 1.5
Maximum Credits: 1.5
Emphasizes the tools and techniques used in the systems analysis and design process such as structured analysis and design methodologies, business systems planning, and information requirements analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2023 - DATA BASE MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Explains data base design, effective use of data bases, basic design objectives, methods, costs and benefits associated with the use of data base management systems. Presents approaches to data base management with emphasis on condasyl, inverted file, and relations models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2024 - DATA BASE MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of Data Base Management 1 emphasizing managerial issues and logical data base design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2026 - INTERNATIONAL INFO SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
The proposed class will examine the role of information systems and technology in a global environment. The underlying theme for the class is that global information technology (IT) has significantly affected three societal units: the individual, the Multi National Corporation (MNC), and the state.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2029 - MANAGEMENT INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Familiarizes students with modern information systems and the processes used to develop such systems. Emphasizes the fit" between the system and the organization and strategic planning for information systems."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2033 - COMPUTER STRUCTURE & ALGORITHM
Minimum Credits: 3
Maximum Credits: 3
An introduction to solving business-oriented problems using a procedural computer language such as cobol. Topics will include structured techniques, sequential and direct file updating, chain/list structures, report writing, and sorting.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2034 - INFORMATION SYSTEMS PLANNING
Minimum Credits: 3
Maximum Credits: 3
In this course, we will examine issues associated with information systems planning activities (designing, assessing, budgeting, managing, and maintaining) that are often associated with a firm's ability to apply information systems and technologies in the creation of business value, customer satisfaction, supply chain management, and operational cost reductions; while supporting the continuous drive for product innovation & enterprise growth. Through a combination of readings, class discussions, presentations, and hands-on projects, the students will learn about information systems planning practices and management efforts to better understand the organization's information systems strategic needs, define the systems requirements, acquire, build, and deliver the desired information system solution; plan the systems sustainment needs, and actively plan for future changes. Additional interrelated topics within the (ICT) Information and Communications Technology planning process will be discussed (systems acquisition & sourcing, ICT Supply Chain Risk Management, Vendor Management, Governance, Capital Project & Portfolio Management, decision making mechanisms, standard setting, and the ethical use of information) with the purpose to provide greater insight into the 'why and how' business leaders continuously evaluate and manage their information systems & technology capital investments.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2037 - SYSTEMS ANALYSIS & DESIGN
Minimum Credits: 3
Maximum Credits: 3
Emphasizes a high-level management perspective on information systems design and development. The systems development life cycle is used as a basis for defining appropriate roles and responsibilities for specialists and users. Emphasizes tools and techniques used in the systems analysis and design process.
Academic Career: GRAD
BMIS 2039 - DATA BASE MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
In order to understand data base design and make effective use of data bases, managers must have a good working knowledge of the basic design objectives, methods, costs, and benefits associated with the use of data base management systems. This course is designed to help satisfy that need. Many different approaches to management will be presented with specific emphasis on CODASYL, inverted file, and relational models.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2043 - MANAGEMENT OF INFO SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Survey of information systems concepts from the developer's perspective, serving as a capstone course for mis concentrators. Material will be drawn from some of the following topic areas: mis management, is planning, strategic information systems, telecom implications, computer networks, interorganizational systems, the human/ computer interface, and human factors in design.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2051 - PROJECT MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Describes project evaluation and selection and the role of projects in the implementation of strategy. Surveys the various techniques of project integration in the matrix organization. Investigates project planning and monitoring, change control, and implementation factors.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2052 - MANAG END-USER COMPUTNG ENVRN
Minimum Credits: 3
Maximum Credits: 3
Information systems (is) specialists in today's organizations will be exposed to a constantly changing mix of hard ware and software platforms from a range of vendors. The objective of this course is to overview the computing industry, identifying the forces that shape it, major players, current products, and future trends.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2053 - HUMAN FACTRS IN INFO SYMS DSGN
Minimum Credits: 3
Maximum Credits: 3
While many organizations have outsourced the design of production systems, there is still a need to provide specifications for those systems. In addition, the recent internet and e-commerce explosion has created an even wider need to design corporate web sites. Organizational practices must exist to make sure designers and developers take into account what we know about human factors engineering. This course focuses on how to gather requirements, achieve a usable first draft, and test and improve that draft. A half-dozen course projects will include usability critiques, assessments of users' difficulties in understanding systems, and designs of forms, screen layouts, and icons. A mid-term YouTube video project will evaluate usability of various pc or mobile devices. A final project will provide prototype screens and an in-depth plan for an actual application. The course is intended for anyone with special interest in, and appreciation for usability, and will be especially useful for those who will provide input to design teams, manage projects, or develop systems.

Academic Career: GRAD
BMIS 2055 - IS PROJECT COURSE
Minimum Credits: 3
Maximum Credits: 3
This is project is an opportunity for students to apply their management skills and develop their understanding of the challenges of is management. In this course a select group of students will work closely with a faculty member to create a specific deliverable that meets the needs of a client organization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2056 - MGT INFORMATION SYSTEMS PRACM
Minimum Credits: 3
Maximum Credits: 3
The objective of the practicum is to give the student information systems experience in an actual organizational setting. Examples of areas for internships are: Systems Analysis and design; Programming and Implementation; Problem Definition and Documentation; marketing and needs analysis, education and training. A project proposal is prepared by the student that, when approved by both a faculty advisor and a corporate supervisor, becomes the formal agreement to complete the project.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Management of Information Systems(MS)

BMIS 2060 - INDEP STUDY MGT INFOR SYSTEMS
Minimum Credits: 1
Maximum Credits: 6
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2070 - TELECOMMUNICATION MANAGEMENT
Minimum Credits: 3
Maximum Credits: 3
Focuses on the management of corporate telecommunications, including voice and data communications, text and image. The objective of the course is to provide students with a technical introduction to telecommunications. Application and implications of telecommunications in the work setting, and telecommunications management issues are discussed. Other topics addressed in this course include: international regulatory bodies and the impacts on the organization.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2073 - MANAGING SOFTWARE DESIGN
Minimum Credits: 3
Maximum Credits: 3
Surveys the various techniques of computer program design, including structured analysis, SADT (structured analysis and design technique), data structure design, and programming calculus. Covers program design, related project management issues, and error finding. Applies the concepts of one particular technique using group projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.
BMIS 2074 - STRATEGIC IT IN GLOBAL SUPPLY CHAIN
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the strategic design and application of integrated information technology systems within the supply chain and how companies depend upon the exchange of data regarding raw materials, supplies, manufacturing, logistics and service commitments between the many different companies and customers, resulting in a competitive advantage of an end-to-end flow of information in the supply chain. Supply chain management information systems will be explored using related industry cases, project collaboration and simulation within an enterprise resource planning (ERP) system such as SAP to provide the student with a working environment to validate key concepts covered in the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2155 - IS PROJECT COURSE
Minimum Credits: 2
Maximum Credits: 2
Collaboration and team support technologies are an increasingly important part of organizations infrastructures. Whether it is supporting telecommuting within a crowded urban area, the management team overseeing geographically distributed operations, or the execution of a globally source business-development effort, effectively selecting and applying collaboration technologies is an important aspect of successfully realizing business objectives. The virtual team/collaboration support technology project provides you with the opportunity to engage challenges associated with selecting, applying, and evaluating these technologies. As part of this project, you will identify a technology that can be applied to improve team performance, make the business case, acquire the technology, implement it within KATZ, and evaluate its use and impact (time permitting). In the process, you will gain first-hand experience with the benefits and risks associated with collaboration technology development initiatives. Although it is not a requirement, it is recommended that this project be taken in conjunction with the current topics in MIS: virtual team/collaboration support technologies.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2202 - COMPUTR-BASED INFORMTN SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
Introduction to computers, their applications, potential, and limitations, emphasizing problem definition and problem solving so that the student may make effective use of this technology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2409 - INFORMATION SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
How does information technology enable the business? How does it provide business value? This course provides an overview of information technology and its application in a business. By simultaneously examining business cases and the capabilities of relevant technologies, students will develop an understanding of how information technology supports and enables business strategies, innovation, and improved business capabilities and processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2410 - INFORMATION SYSTEMS
Minimum Credits: 2
Maximum Credits: 2
This course provides an overview of how general managers can apply information technology (IT) to increase their effectiveness. A variety of systems, technologies, and approaches will be covered to provide a broad understanding of how it can be used in organizations. A number of cases and other assignments will be used to illustrate how it can provide information to support decision-making, cooperative work, organizational competitive advantage, and inter-organizational communication.
Academic Career: GRAD
BMIS 2411 - INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of how general managers can apply information technology (IT) to increase their effectiveness. A variety of systems, technologies, and approaches will be covered to provide a broad understanding of how it can be used in organizations. A number of cases and other assignments will be used to illustrate how it can provide information to support decision-making, cooperative work, organizational competitive advantage, and inter-organizational communication.

Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2501 - ENTR SYMS & INTGN BUS PROCES
Minimum Credits: 3
Maximum Credits: 3
This course introduces concepts in ERP and integrated nature of business processes. Students are introduced to all the major components of SAP ERP. The course participants in enterprise systems and integration of business processes will gain extensive theoretical foundations of the enterprise resource planning (ERP) using the SAP ERP software. The theoretical knowledge is practically implemented and deepened during the course by the use of case studies and hands-on exercises using the SAP ERP system. After completion of the course, students have a comprehensive, theoretical and practical knowledge of the central SAP ERP modules. This includes the organizational and data structure and the integration of a variety of business processes and functional areas. This course is designed to prepare the student for the SAP TERP10 certification exam. The certification - as completion of the course - will be held at the University of Pittsburgh and is a three-hour, 80 multiple-choice questions based knowledge test. Passing the exam leads to a sap certification widely acknowledged in business: the sap certified business associate with SAP ERP 6.0. The course addresses the following functional areas of the SAP ERP systems: logistics, finance, controlling and human capital management. Furthermore, the integration with the SAP systems sap business intelligence (BI) and SAP strategic enterprise management (SEM) is presented.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2515 - DECISION SUPPORT SYSTEMS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Develops understanding of decision support systems through the use of cases dealing with the development of a range of computer-based systems; its purpose is the support of managerial judgment as applied to semi-structured decisions. Emphasizes the organizational issues involved in the design, development, and implementation of decision support systems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2516 - DECISION SUPPORT SYSTEMS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BMIS 2515.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2517 - COMPUTER STRUCT & ALGORITHMS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
An introduction to solving business-oriented problems using a procedural computer language such as cobol. Topics include structural techniques, sequential and direct file updating, chain/list structures, report writing and sorting.
BMIS 2518 - COMPUTER STRUCT & ALGORITHMS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BMIS 2517.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2519 - ACCOUNTING INFORMATION SYSTEMS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
A conceptual introduction to business data processing from an accounting point of view. Topics include computer concepts, decision-making and accounting reports, data management, accounting systems design, and implementation. Cases and problems from past CPA, CMA, and CIA examinations will be assigned and covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2520 - ACCOUNTING INFORMATION SYSTEMS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A practical introduction to the design and usage of accounting systems. Topics include general ledger systems, controls and security, automated accounting processes, file structures and auditing. Hands-on assignments in dbase processing and package use will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2521 - SYSTEMS ANALYSIS AND DESIGN 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Emphasizes a high-level management perspective on information systems design and development. The systems development life cycle is used as a basis for defining appropriate roles and responsibilities for specialists and users in contexts ranging from large centralized data processing to applications of personal computers and local area networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2522 - SYSTEMS ANALYSIS AND DESIGN 2
Minimum Credits: 1.5
Maximum Credits: 1.5
Emphasizes the tools and techniques used in the systems analysis and design process such as structured analysis and design methodologies, business systems planning, and information requirements analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2523 - DATA BASE MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Explains data base design, effective use of data bases, basic design objectives, methods, costs and benefits associated with the use of data base management systems. Presents approaches to data base management with emphasis on codasyl, inverted file, and relations models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2524 - DATA BASE MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of Data Base Management 1" emphasizing managerial issues and logical database design."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2525 - CURRENT ISSUES IN COMPUTING
Minimum Credits: 1.5
Maximum Credits: 1.5
This course will cover current and future hardware and software technologies that can be useful in business at the organizational, group, or individual levels. Two opposing points of view will be used: from the top-down (what technologies can serve a given industry?) and the bottom-up (what industries can benefit from a given technology?). The particular industries and technologies to examine will be chosen by students. Discussion, student research, and presentations will form a large part of class sessions. Two main projects (top-down and bottom-up) and two case analyses are required. Brief lectures will provide some useful resources for conducting research on future technologies and case discussion will balance out the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2530 - PROJECT MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Describes project evaluation and selection and the role of projects in the implementation of strategy. Surveys the various techniques of project integration in the matrix organization. Investigates project planning and monitoring, change control and implementation factors.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BMIS 2531 - PROJECT MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of project management 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2532 - APPLC DEVELP IN MAINFR ENVRN 1
Minimum Credits: 1.5
Maximum Credits: 1.5
The objective of this course is to overview the computing industry, identifying the forces that shape it, major players, current products, and future trends. In addition, this course will expose the students to a group of software products designed for one common hardware platform -- the IMB mainframe environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2533 - APPLC DEVELOP IN MAINFR ENV RN 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of application development in the mainframe environment 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2534 - INFORMATION SYSTEMS PLANNING 1
Minimum Credits: 1.5
Maximum Credits: 1.5
In this course we will discuss three important trends that are affecting the evolution of the information systems; function-strategic information systems, interorganizational information systems, and end-user computing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2535 - INFORMATION SYSTEMS PLANNING 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BMIS 2534.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

BMIS 2536 - ENTERPR-WIDE COMPTNG SOLUTNS
Minimum Credits: 3
Maximum Credits: 3
This course has several purposes: (1) to examine the business drivers for domestic enterprise-wide applications and for Global IT Solutions; (2) to overview the IT solutions themselves; (3) to consider the implementation strategies for enterprise-wide applications and Global IT Solutions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2537 - BUSINESS SYSTEMS PLATFORMS
Minimum Credits: 3
Maximum Credits: 3
Lectures and additional presentations by outside speakers will survey the most important software and hardware technologies that businesses used to deploy information systems. This will include an examination of capabilities, strengths, weaknesses, and relevant standards. It will also address alternative implementations and costs. Full-length case studies and class discussion will facilitate the examination of the business implications of and the context in which these system deployment technologies are utilized. Individual and team student projects will give the students experience in researching, understanding, evaluating and explaining information technologies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2538 - BMIS STRATGC CYBERSECRTY BUS
Minimum Credits: 2
Maximum Credits: 2
This course introduces students to the vital topic of strategic cybersecurity management in business today. An ever increasing demand for effective
cybersecurity, driven by the accelerated number of well published data breaches and internet attacks on governments, businesses, and users, has challenged business leaders to increase their awareness and gain a deeper understanding of the cybersecurity threats and risks facing their IT operations; a support role once reserved only for the IT professional.

**Academic Career:** GRAD  
**Course Component:** Seminar

**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2547 - DISTBD ARCH (CLIENT-SERVER)**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
Covers the technical and managerial methods and problems of distributing computing resources over a vast array of processors in an organization. While particular emphasis is currently placed on client-server computing, new breakthrough technologies will be covered as they appear. Technical issues to be examined include methods of communication between processors and programs and options for constructing distributed systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2548 - PROCESS-ORIENT BUS PROGRAMMING**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
This course presents an introduction to a business-oriented programming language (such as cobol). Included are the basic rules of syntax as well as principles of processing flow. Exercises will be required for practice in four functions such as input-output operations, formatting, arithmetic, array handling and multi-level reporting.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** Katz Grad School of Business students only.

**BMIS 2549 - OBJ-ORIENTED BUS PROGRAMMING**  
**Minimum Credits:** 1.5  
**Maximum Credits:** 1.5  
The purpose of this course is to give students wider experience in planning and executive business algorithms, using a language that is based upon objects. Heavy emphasis will be placed on introducing a language such as c" and/or "c++". It is assumed that students are already somewhat familiar with one programming language."  
**Academic Career:** GRAD

Course Requirements: Katz Grad School of Business students only.

BMIS 2563 - IMPACT ANALYSIS 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This course focuses on concepts, issues, and methods that comprise the information systems planning process. Course topics include an overview of strategic information systems, planning methodologies, designing an information architecture, process reengineering, and the changing role of information systems organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2564 - IMPACT ANALYSIS 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of BMIS 2563 (impact analysis 1).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2566 - DATA STRUCTURES
Minimum Credits: 1.5
Maximum Credits: 1.5
Introduction to software engineering and modular design including basic data structures, control structures and some advanced data structures. Focuses on the c" language."
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2569 - OBJECT-ORIENTED SYSTEM DESIGN
Minimum Credits: 1.5
Maximum Credits: 1.5
Studies the processes and structures necessary to integrate object-oriented programming into the methods used in a modern organization. Particular attention will be paid to the specification, collection, management, and structure of object-oriented program modules; specific techniques for
ensuring conformance to object-oriented specification; and requirements for its implementation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2571 - TELECOMMUNICATION MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Focuses on the management of corporate telecommunications, including voice and data communications, text and image. The objective of the course is to provide students with a technical introduction of telecommunications in the work setting, and telecommunications management issues are discussed. Other topics addressed in this course include: international regulatory bodies and their impact on the organizations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2572 - TELECOMMUNICATION MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of telecommunications management 1 (BMIS 2571).
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2573 - MANAGING SOFTWARE DESIGN 1
Minimum Credits: 1.5
Maximum Credits: 1.5
Surveys the various techniques of computer program design, including structured analysis, Sadt (structured analysis and design technique), data structure design, and programming calculus. Covers program design, related project management issues, and error finding. Applies the concepts of one particular technique using group projects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2592 - CUR TOPC MIS: BUS CONTINUITY
Minimum Credits: 2
Maximum Credits: 2
Through a combination of readings, discussion, presentations and hands on projects we will examine issues associated with business continuity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2593 - CUR TOPC IN MIS: SOCL CMPTNG
Minimum Credits: 2
Maximum Credits: 2
Sarbanes-Oxley, HIPAA, open source software licenses, consumer data protection, risk management, and software patents' these are just a few of the areas in which regulatory and legal issues affect is management. Across a variety of industries, firms' ability to use and manage information technology is increasingly tied to their ability to understand and work with the complex legal issues associated with information systems and data management. In this course, using a combination of readings, discussion, presentations, and projects, you will examine the legal and regulatory challenges associated with is management and consider the strategies, structures, and approaches that firms use to manage these issues.
BMIS 2595 - CUR TOPCS MIS:IT, MKTS, AUCTNS
Minimum Credits: 2
Maximum Credits: 2
Over the past decade, information technology has played a significant role in reshaping and enabling a range of markets. It has enabled the emergence of a wide array of auctions and a market for consumer-to-consumer, business-to-business, and business-to-consumer transactions. In addition, information technologies have enabled the design and implementation of markets in a variety of non-traditional arenas. In this course, we will examine the role that information systems play in various types of markets, the kinds of impacts (positive and negative) that information technology can have on markets, and how participants in those markets can better use technology to successfully compete in these environments.

BMIS 2597 - CUR TOPCS MIS: PERSP IS MGT
Minimum Credits: 2
Maximum Credits: 2
Information systems are embedded in a complex web of organizational structures, professional practices, technical infrastructures, and economic decisions. Even small changes in the design or management of a firm's systems can have significant consequences (intended and unintended) for individuals, teams, business units, industries, and even society as a whole. Whether you are formally part of this function or not, your success as a leader of it enabled business initiatives is dependent on your ability to understand the full range of implications for your work, your team and your firm. In this class you will learn strategies for anticipating and managing the complex implications of it enabled business initiatives. Topics will include: business agility, reliability and it infrastructure management it impacts on retail value chain systems; business implications of data quality; strategic alignment and it investment. The course will be conducted as a seminar, combining discussion, poster presentations, and guest speakers. Readings will include consultant and vendor materials, academic research, and non-traditional sources (science fiction, movies and television) chosen to help you examine a range of perspectives on each issue.

BMIS 2598 - CUR TOPCS IN MIS: SUPPLY CHAIN
Minimum Credits: 2
Maximum Credits: 2
Ecommerce continues to grow and develop as a legitimate outlet for both retailers and manufacturers. This presents a challenge to businesses in terms of reaching the 130 million+ potential customers as well as creating a strategy to best capitalize upon the estimated $316 billion dollars of revenue generated electronically each year. In this course we will focus on a comprehensive view of the supply chain, from engaging the consumer to fulfilling an order. In addition, students will examine how the continued growth of ecommerce affects an organization's ability to establish a lean and efficient supply chain process. The objectives of this course are to: 'establish an understanding of the relationship of different facets of the supply chain 'investigate current strategies in ecommerce 'explore how ecommerce strategies effect the supply chain model 'expose students to different marketing, merchandising, and design strategies that will aid them in designing and managing efficient and profitable sales and supply chain channels.

BMIS 2601 - CUR TOPCS MIS VIRTUAL COLLABRTN
Minimum Credits: 2
Maximum Credits: 2
In global organizations, supporting successful collaborations is critical. Individuals work together in a variety of different arrangements that span organizational boundaries, cultures, locations, and time. Technologies for enabling efficient, effective collaborations are growing in number and complexity. These include physical collaboration spaces which combine architecture, design and technology (e.g. Ergonomic workspaces, multi-touch surfaces, and smartboards), shared virtual workspaces (e.g. Sharepoint, wikis, huddle, etc.), And video and audio conferencing tools. Creating and managing successful teams requires that you be able to select and use these tools to maximize individual and team performance. In this current topics in mis course, you will learn about different collaboration technologies and develop your ability to apply them to manage and support diverse, distributed teams. Through a combination of readings, discussions, presentations, and hands-on projects we will examine (i) the capabilities and limitation of various collaboration tools (including, but not limited to, hosted tools, content management systems (CMS), physical and virtual tools), (ii) techniques for selecting and applying team-support technologies and (iii) methods for evaluating these technologies' impact on the collaboration process. Although it is not a requirement, it is recommended that this course be taken in conjunction with the virtual team/collaboration support technology project.

BMIS 2602 - CUR TOPCS MIS: INF TEC SEC IN
Minimum Credits: 2
Maximum Credits: 2
Financial services run on information technology. Ultimately, this industry is built on the advanced, high-speed and accurate record-keeping that computers provide and on rapidly moving information between institutions over modern, high-speed and low cost networks. Computers and networks have facilitated incredible and explosive growth in financial markets and services. Information is available faster and more widely, transactions are settled more quickly and with ever-higher degrees of accuracy. However, these same technologies have also contributed to an ever-widening disparity between the capabilities of large investors and small. These same technologies also contribute to the ever-increasing volatility in the financial markets -- indexes routinely drop or climb hundreds of points in minutes. The purpose of this course is to provide the student with an understanding of the main types of information systems used in the financial services industry. The focus will be on two main questions: 1) what are the various types of systems and how do they inter-relate? And 2) how are these systems integrated with the operations and business practices of the companies using them?
Academic Career: GRAD

BMIS 2605 - CURRNT TOPCS: IT FINANCL SERVS
Minimum Credits: 2
Maximum Credits: 2
The securities industry runs on information technology. Ultimately, this industry is built on the advanced, high-speed and accurate record-keeping that computers provide and on rapidly moving information between institutions over modern, high-speed and low cost networks. Computers and networks have facilitated incredible and explosive growth in financial markets and services. Information is available faster and more widely, transactions are settled more quickly and with ever-higher degrees of accuracy. These same technologies also contribute to the ever-increasing volatility in the financial markets -- indexes routinely drop or climb hundreds of points in minutes. The purpose of this course is to provide the student with a general understanding of the securities industry and the main types of information systems that support it. The focus will be on three topics: 1) an overview of the securities industry, its major players and roles, 2) securities information systems and how they interrelate and 3) how these systems are integrated with the operations and business practices of the companies using them. The course will use three approaches: 1. Lectures to cover the fundamentals of the securities industries and its systems 2. The goal is to give the students a true 'insider's' view of these systems and how they are used. Presentations by outside, industry expert speakers will survey the most important features of these systems and how they impact the business. 3. Team projects will give the students experience in researching, understanding, evaluating and explaining business implications of these systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

BMIS 2678 - ELECTRONIC COMMERCE
Minimum Credits: 3
Maximum Credits: 3
Examines the opportunities and challenges of online commerce conducted via websites and mobile apps. Students learn how companies launch initiatives to gain competitive advantage and improve their relationships with customers, suppliers, and other business partners. Case study assignments help students gain a deeper and sometimes surprising understanding of well-known sites, and instruct them on how to analyze e-commerce opportunities and risks. A midterm group project analyzes an e-commerce failure selected by the group. A final group project proposes a new e-commerce start-up enterprise, a new app, or a new project for an existing firm. Testing is conducted with multiple quizzes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Katz Graduate School of Business

BMIS 2679 - TEC INNOV, ADOPT, & DIFFUSION
Minimum Credits: 3
Maximum Credits: 3
Expose students to concepts in technology innovation, markets for information technology goods and services, and adoption dynamics within organizations for new products and processes, and therefore should prove useful in a variety of student careers. Assignments emphasize written and oral communication skills. There is an opportunity for a self-selected project to customize the course to particular student interests. Skill acquisition and improvement goals for the course include case analysis, short analytic writing, technology research, and long-form writing. Technological innovation is the origin of what the economist Joseph Schumpeter termed the 'creative destruction' of capitalism (1942). This is the dynamic process by which prior technologies, and their accompanying industrial structures and associated leading firms, are replaced by successive generations of technologies. This is a constantly ongoing process that provides both opportunities for new entrants and threats to existing firms in the market. Students are likely to need a thorough understanding of this process throughout their professional careers. Topics typically covered include: innovation sources and management, s-curves and product life cycles, dominant design and paradigm shifts, disruptive and discontinuous innovation, innovation in design, network effects, standards, complementary goods, standards, intellectual property, partnerships , alliances, and value chain ownership, environment/government regulations, organizational assimilation of technology, and lead-user design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Joseph M. Katz Grad Sch Bus
BMIS 2681 - IS SECURITY
Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to introduce students to the concepts and nomenclature of computer and network security. The course will give students insight into the, who, what, where, when, and why of security issues. It begins with the psychology of hackers and hacking. Why are there hackers? Why do hackers hack? What type of person does hacking? What do they get out of doing it? The rest of the course concentrates on types of host and network attacks, how they are done, what to do when attacks occur, and how to prevent future attacks. We will look at access control and site security, review TCP/IP networking as it pertains to security issues, look in depth at attack methods, examine the functionality of firewalls, examine host security, briefly examine some elements of cryptography, try to understand methods of handling incident and disaster response, and finally examine how best to manage the security function in an organization. Students should have had BMIS 2070 before entering this course, but it is not necessary.

BMIS 2684 - CUR TOPICS: INF TEC SERVC MGT
Minimum Credits: 2
Maximum Credits: 2
In the 21st century, business runs on it. Powerful computer hardware, versatile software and super-fast networks -- all connected to each other worldwide ' have allowed businesses to develop and deploy information-dependent products and services to an ever greater extent, and bring them to market faster. This age of information has resulted in an unprecedented reliance on it for business effectiveness and success. Interruptions in service can have devastating consequences. Business survival depends on the highest levels of it reliability, availability, correctness and performance. Ever-increasing it budgets have also forced companies to dramatically improve the financial as well as operational management of their investments. Information technology service management (ITSM) has emerged as a discipline to encourage businesses to make the organizational, operational and financial changes necessary to improve all aspects of their information technology utilization. The information technology infrastructure library (ITIL) ' now in its third version ' has emerged as the pre-eminent approach to achieving these goals by providing specific guidance on what a business needs to do in order to improve its it service management.

BMIS 2687 - CUR TOPICS IN MGNG BIG DATA
Minimum Credits: 2
Maximum Credits: 2
This course introduces students to key concepts in big data, one of the most potentially transformative ideas to arrive in the business world in the last decade. This half-semester course consists of three main parts, each crucial to managers' effective use of big data. First, we look at key management
issues related to big data. How is big data different from "regular data" and what does it promise? What are the key challenges of managing big data and how can its advantages be integrated into the organization? Second, there can be a fine line between using data to arrive at effective, meaningful business insight and creating false understandings. With this in mind, the course examines the process of effectively formulating and evaluating data-driven business questions. Finally, we drive home issues of big data in practice by engaging in hands-on experience analyzing information in a big data environment.

BMIS 2689 - TECHNOLOGY-ENABLED BUSINESS TRANSFORMATION
Minimum Credits: 3
Maximum Credits: 3
Business in the 21st century runs on it. However, competitive advantage seldom comes from having exclusive or proprietary access to a technology. It rather comes from more effectively utilizing the technologies to which everyone — including the competition — has access. The implications of this reality are many. First, it is necessary to understand what technologies are available in marketplace and what their capabilities are. Next — and far more challenging — it is necessary to understand how those capabilities might positively (or negatively) interact with business strategy. The capabilities of information technologies can certainly contribute to meeting a strategy, but it is also conceivable that those same capabilities could contribute to the necessity of changing a strategy. Business transformation has been defined as the alignment of process, people and technology such that it can both support and innovate business strategies. Given that technologies evolve and develop at a rather rapid pace, it is desirable for managers to develop skills that allow them to understand what technologies can do (both established and new) and how they might be leveraged to create real value. Using lecture and current case studies, this course will examine topics to help students develop those skills. These topics include: 1.) Transformation strategies. 2.) The relationship between information technology and business transformation. 3.) When to build and when to buy. 4.) Business analysis. 5.) Process modeling. 6.) Enterprise systems. 7.) Software development methodologies.

Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 2902 - BIOMEDICAL & HEALTHCARE INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
Information systems and the data they contain are central to the efficient and effective operation, development, and transformation of modern healthcare systems. Within hospitals, clinics, and practices, operations are increasingly embedded in workflow systems, supported by decision and
analysis tools, and integrated with electronic health record (EHR) systems and other data warehouses. At regional, national, and international levels significant investments are being made in telemedicine networks, data-sharing infrastructures and standards with the goals of reducing costs, eliminating errors, and increasing the quality and accessibility of care. Along with increased impact and investment in information systems have come the additional complexities of implementing relevant policies and regulations (e.g. Hipaa) and how the goals of cost reduction, improvement, and compliance can be balanced and managed. In this environment, physicians are increasingly called upon to evaluate, participate in, and even lead it-enabled initiatives. This course introduces you to core concepts and theories needed to understand and leverage information technology (it) as a key part of efforts to effectively and efficiently provide healthcare. After completing the course, you will be better able to interact effectively with it professionals, understand how systems are developed and deployed, and evaluate the operational, organizational, and strategic implications of it investment decisions.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BMIS 3024 - COMMNCTN TECHN & ORGN
Minimum Credits: 3
Maximum Credits: 3
Many of the issues and phenomena which are of interest to information systems researchers, such as knowledge management, electronic commerce, group and team support systems, systems development, and technology adoption, are inherently communication-based. However, common approaches taken by is and organization researchers either assume isolated individuals (hence ignoring communication) or assume that communication can be conceptualized as a mechanical process in which information is deterministically transferred from one person to another. While these approaches can yield valuable insights, explicit consideration of aspects of human communication such as structure, process, and meaning is often necessary to understand how (and why) technologies are (or are not) created and used. The objective of this course is to introduce you to theoretical and empirical studies of communication at a variety of levels (interpersonal, group, intra-organizational, inter-organizational, and mass-media”) and encourage you to consider how focusing on communication can be useful when examining issues surrounding the development, management, and impact of technology in organizations and society.

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This seminar exposes Ph.D. students to the state of the art research related to open source software (OSS) development and adoption. The course will focus on four main questions explored in this body of work: 1. Why do developers participate in OSS? 2. How do project managers sustain developer contributions to a project? 3. What factors lead to OSS project success? 4. What factors facilitate OSS adoption? In examining literature that addresses these questions, students will be exposed to a variety of methods (e.g. Archival, survey, simulation and qualitative) at multiple levels of analysis (e.g. Individual and group). Finally, the seminar will focus on how to leverage existing theoretical bases to understand emerging phenomena. Classes will be principally student-led discussions of research papers.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**BMIS 3042 - DESIGN INFO SYMS RESEARCH**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
This Ph.D. seminar course exposes students to management theories related to the design of software-intensive products and processes. Drawing upon the literatures of design thinking, software engineering, and sociotechnical systems, we will explore the role of product and process design in influencing phenomena of interest to management scholars such as organizational transformation, innovation, and industrial evolution. Classes will be principally student-led discussions of research papers.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SU3 Basis

**BMIS 3044 - QUAN MTHS INF SYMS RESEARCH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The goal of this course is to prepare Ph.D. students to understand and confidently apply a variety of statistical methods and research designs that are important for research in information systems and technology management (ISTM). Through discussions of published ISTM research papers and practical data analysis exercises, we will explore models such as those applied for event counts, time-series cross-sectional analysis, causal inference, Bayesian inference, competing risks, differences-in-differences, and designs for randomized field experiments. The course will also place an emphasis on developing skills to communicate econometric results in a rigorous way.

Managerial Controls

BMGC 3010 - INDEP STUDY MANAGERIAL CONTROLS  
Minimum Credits: 1  
Maximum Credits: 9  
Academic Career: GRAD  
Course Component: Independent Study  
Grade Component: Grad HSU Basis

BMGC 3011 - MANAGEMENT CONTROL SYSTEMS  
Minimum Credits: 3  
Maximum Credits: 3  
Study of management control and analysis of the problems of managing a decentralized operation. Integrates material from accounting, the behavioral sciences, economics, managerial information systems, and strategic planning in discussing these problems.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: Katz Grad School of Business students only.

BMGC 3012 - ADV TOPICS MANAGEMENT CONTROLS  
Minimum Credits: 3  
Maximum Credits: 3  
This seminar will cover current issues in the area of planning and control such as emerging organizational forms and high velocity environments from an interdisciplinary perspective. It will focus on the development of alternative paradigms with which to examine critical issues in the planning and control process.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad Letter Grade  
Course Requirements: Katz Grad School of Business students only.

Manufacturing Sys Engineering

MSEP 2001 - ISSUES IN MFG SYSTEMS ENGRNG  
Minimum Credits: 3  
Maximum Credits: 3  
This course covers the major issues facing U.S. Manufacturers today with an emphasis on manufacturing systems engineering. Topics include global competitiveness, changing management and labor practices, total quality, agility, and other concepts for improving manufacturing, product and process innovation, environmental and manufacturing safety, manufacturing information and control systems, government initiatives, and strategies for overcoming barriers to implementing new manufacturing paradigms.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering
MSEP 2002 - MFG SYSTEMS INTEGRATION
Minimum Credits: 3
Maximum Credits: 3
Overview of computer-integrated manufacturing (CIM), automation and computer integrated manufacturing, hierarchical computer control, information systems and processing, computer communications systems and software, computer networks, design nodes, control nodes, accounting nodes, standardization, data formats, management access, inventory control, man/machine interfaces, simulation and systems evaluation, and impacts on technological change.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2003 - MANUFACTURING PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Introduction to modern continuous, batch and hybrid manufacturing processes; manufacturing specifications, metrology, tolerances and interchangeability, testing and inspection, group technology, semi-finished product manufacturing, macroprocessing (net-shape forming, reactive processing, casting and molding, powder metallurgy, metal working and metal forming, composite fabrication); joining; non-traditional manufacturing processes, and surface processing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2004 - MGMT OF MANUFACTURING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Management within the automated factory context, planning, organizational design, motivation of people, directing, monitoring, evaluation and control, the production supervisor-facilitator, behavioral and cultural aspects of automated manufacturing, managing quality teams - quality circles, quality productivity management, factory project management, managing production teams, managing product design teams, collective bargaining and unionism, and worker incentives.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2005 - MATERIALS IN MFG PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Properties of modern materials, their relationship to manufacturing processes and the serviceability of products made from them, materials used in manufacturing including metals, ceramics, polymers, natural materials, and composites, internal structural transformations, scientific principles governing the application of microscopic and macroscopic structures to processing and properties, measurement and evaluation of important engineering properties.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2006 - DESIGN FOR MFG AND PERFORMANCE
Minimum Credits: 3
Maximum Credits: 3
Manufacturing design process (independent of the final item that is being designed), design strategies, economic aspects of design/manufacturing alternatives, design synthesis; considerations in the minimization of total cost (development costs, production costs and life-cycle costs), methods of meeting goals (optimal design techniques, axiomatic design), and coupling of the design process, manufacturing process, and material properties.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering
MSEP 2007 - MFG PROCESS CONTROL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Foundation for modeling physical manufacturing systems utilizing mathematical techniques, systems engineering techniques, modeling, design
techniques, linearization techniques, introduction to csmp, state-space models applied to continuous time systems, stability, discrete-time systems,
observability and controllability, and feedback.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2008 - MANUFACTURING SAFETY ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
Engineering solutions to safety problems encountered both in and outside of a modern manufacturing plant, fundamental principles needed to
recognize, evaluate and control hazards, safe design, installation and operation of tools, machines, facilities and support services, the workplace
environment, fire prevention and suppression, hazardous materials, impact on environment, OSHA and FEA legal requirements, equipment design,
hazardous waste disposal and plant construction issues.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2009 - MANUFACTURING INFORMATION SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Systems engineering approach to the planning, development, organization, management, and reengineering of information systems in a
manufacturing enterprise with emphasis on the interrelationships of digital computing equipment, software, and interconnected communication
systems necessary to support manufacturing information system functions from strategic planning through design, manufacture, and distribution.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2010 - MANUFACTURING QUALITY ASSESSMENT
Minimum Credits: 3
Maximum Credits: 3
State-of-the-art methods for the assessment of the quality of products prior to shipment using both on and off line measurement techniques; hardware,
software, and systems. Engineering aspects of the quality measurement process, system design strategies, economic impact of quality measurement
alternatives on manufacturing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2012 - SIMULATION MODELING WITH ARENA
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with the use of the Siman simulation language to develop discrete-event simulation models of representative industrial
processes, with an emphasis on manufacturing-oriented processes. The course will concentrate on model building, but will include material on the
full range of simulation activities, such as input analysis, output analysis, verification and validation, and model animation. Individual topics will
include Siman fundamentals, control entities, stations and station submodels, transporters and conveyors.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2013 - ADVANCED ENGINEERING ECONOMY
This course covers sources and costs of capital, and the role of capital budgeting in achieving the financial goals of the organization. It also covers advanced engineering economy topics including project justification and competition, project selection under risk and uncertainty, multi-attribute decision making, and sensitivity analysis.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Swanson School of Engineering

### MSEP 2014 - FINITE ELEMENT ANALYSIS IN MFG

**Minimum Credits:** 3

**Maximum Credits:** 3

This course provides an introduction to the finite element method. The methodology for the modeling of stress analysis and heat transfer will be developed. Applications of the finite element method to the analysis of manufacturing processes will be discussed.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

### MSEP 2015 - CASTING WELDG THERM SURFC METL

**Minimum Credits:** 3

**Maximum Credits:** 3

Principles & practice of casting, welding & thermal surfacing of metal manufactured products, esp net-shape parts. Sand, investment, permanent, die & evaporative pattern casting; rapid solidification processes; shielded arc, gas, tig, mig, resistance spot & seam, electroslag, submerged arc, ultrasonic, electron beam & laser welding; brazing & soldering processes included. Thermal surfacing processes include flame spraying, plasma spray coating, laser surface treatment & electroslag surfacing. Metallurgical compatibilities of processes will be an important part of treatment.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

### MSEP 2016 - FRAC MECHC FOR PRODC DSGN/MFG

**Minimum Credits:** 3

**Maximum Credits:** 3

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

### MSEP 2017 - COST MANAGEMENT FOR ADVNCD MFG

**Minimum Credits:** 3

**Maximum Credits:** 3

Focuses on current cost management topics such as activity based costing, life cycle costing, target costing, and throughput accounting. Emphasis will be placed on the link ages to advanced manufacturing systems including performance measurement, cellular manufacturing, jif, and mrp ii.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Swanson School of Engineering

### MSEP 2018 - ADVANCD HEAT TRANSF APPLICATNS

**Minimum Credits:** 3

**Maximum Credits:** 3

This course covers the fundamentals of engineering heat transfer including conduction, convection, and radiation with application in manufacturing systems. The focus of the course will be on physical understanding of heat transfer processes, modeling approach and particularly problem solving methods. Applications include cooling requirements of electronic components, transient heat transfer analysis applicable to heat treating processes, design and analysis of fins and heat exchangers.
MSEP 2019 - ENVIRONMENTAL ISSUES IN MFG
Minimum Credits: 3
Maximum Credits: 3
This course focuses on environmental issues raised by manufacturing processes, including the use & generation of hazardous materials in manufacturing, the regulations governing them, & practices which can and should be followed regarding these materials. An important aspect will be to emphasize practices intended to minimize environmental concerns, including pollution prevention and source reduction techniques that can be implemented throughout the manufacturing cycle. This practical introduction to relevant environmental concepts includes lectures, case studies, & student projects.

MSEP 2020 - COST MGMNT FOR MFG COMPTVNS
Minimum Credits: 3
Maximum Credits: 3
This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case based and will cover cost measurement issues in both conventional and modern manufacturing environments.

MSEP 2021 - HUMAN RESOURCES MGMNT IN MFG
Minimum Credits: 3
Maximum Credits: 3
The focus of this course is the design, development, implementation, and evaluation of human resource policy at the plant and corporate levels of manufacturing firms. Topics include labor-management relations, newer forms of work organizations, merit and other incentive pay systems, legal and regulatory issues, and human resource strategy.

MSEP 2023 - GLOBAL/US COMPETITN & TEC MGT
Minimum Credits: 3
Maximum Credits: 3
The purpose of the seminar is to analyze global competition and industrial competitiveness from the standpoint of the U.S. Economy as a whole, specific industries, and individual companies. The course is designed to provide an understanding of the role of the U.S. In the world economy, the competitive pressures facing individual companies and their industries, the role of innovation and product development in supporting a company's and a nation's competitiveness, and the alternatives available to government to stimulate or redirect its industries.

MSEP 2026 - STRATEGIC COST MANAGEMENT 1
Minimum Credits: 1.5
Maximum Credits: 1.5
This course deals with the strategic implications of alternative methods of product cost measurement. The discussions will primarily be case based and will cover cost measurement issues in both conventional and modern manufacturing environments.
MSEP 2027 - STRATEGIC COST MANAGEMENT 2
Minimum Credits: 1.5
Maximum Credits: 1.5
A continuation of strategic cost management 1.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSEP 2030 - MANAGING INTERNATIONAL BUSINESS
Minimum Credits: 3
Maximum Credits: 3
Due to internationalization of business and the complexity of the international business world, familiarity with international business practices is of growing importance to firms. Thus, the purpose of this course is to familiarize the student (manager) with the major concepts and issues necessary to perform effectively in today's rapidly changing international business environment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSEP 2031 - HUMN RESORC MGT IN MANUFCTRNG
Minimum Credits: 3
Maximum Credits: 3
This course examines human resources management within the manufacturing sector of the economy. It describes and analyzes relevant practices in manufacturing firms. Focusing heavily on labor-management relations and conflict resolution.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSEP 2032 - PERF EVAL & JUSTF ADV PROD SYS
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide engineering and business students with the modeling tools and the capability to analyze computer integrated manufacturing systems. The analysis (including feasibility study, justification and performance evaluation) of high technology integrated systems involves complex economic and tangible/intangible factors. This course combines traditional engineering and financial/accounting analysis techniques. It involves many areas such as systems and computer engineering and operations management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2050 - RELIABILITY & MAINTAINABILITY
Minimum Credits: 3
Maximum Credits: 3
Review of mathematical preliminaries, e.g., Stochastic processes, laplace transforms, etc. Combinational reliability, hazard rates and their application, reliability improvement through redundancy and repair, optimization of system reliability, replacement and maintainability policies, software reliability, network reliability, power system reliability, fault trees, introduction to life testing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSEP 2090 - SPEC TOPICS IN MFG SYS ENGRNG
Minimum Credits: 3
Maximum Credits: 3
Special topics of current interest to students and faculty presented by a member of the MSEP faculty.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2101 - INTEGRTD PRODUCT & PROCESS DEV
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the methods and mindsets required for rational & rapid development of quality products & their compatible manufacturing processes. Topics include product need & design concept, product engineering analysis, process modeling & visualization, material characterization, collaborative engineering, expert systems, life cycle factors, environmentally conscious design & manufacturing, the virtual enterprise, agile manufacturing, electronic information, & quality management. Case studies are presented to illustrate concurrent ENGR applications & enterprise integration.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSEP 2995 - INDEPENDENT STUDY MS
Minimum Credits: 3
Maximum Credits: 3
A special course of individual study in a thesis-related topic.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

MSEP 2997 - RESEARCH, M.S.
Minimum Credits: 3
Maximum Credits: 3
Preliminary, on-campus background research related to the MSEP student internship. The student is expected to have selected a manufacturing company sponsor and an internship project before this course begins. The student will perform a literature search and develop a precise problem definition. Some preliminary analytical work may also begin during this period. The student is also expected to interact with his/her industrial sponsor as part of this course, though the work will be conducted primarily on campus.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

MSEP 2998 - MS PROJECT
Minimum Credits: 1
Maximum Credits: 3
A manufacturing improvement project course for practicing engineers. Students are expected to solve a real world problem using a systems approach and proper scientific method. Course requirements include problem definition, a literature search, experimentation, data collection, analysis, a final technical report and an oral presentation.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

MSEP 2999 - M.S. THESIS
Minimum Credits: 1
Maximum Credits: 6
This course is intended as the substantive portion of the student MSEP internship. The actual work should be conducted on site, under the coordinated direction of a manufacturing company sponsor and an academic advisor. The project will culminate with a formal thesis, and an oral defense of the project.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Materials Science & Engineering

MSE 2001 - STATISTICAL PHYSICS OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Quantum theory of matter; wave mechanics; kinetic theory; statistical mechanics; statistical thermodynamics; phase space and ensembles; canonical and microcanonical ensembles; fluctuations; statistical mechanics of crystals; free electron theory of metals; cooperative phenomena; statistical mechanical theory of rate processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2002 - SOLID STATE THEORY MATERIALS SCI
Minimum Credits: 3
Maximum Credits: 3
Diffraction by crystals; symmetry; lattice waves; lattice vibrations and thermal properties; band theory of solids; theory of the metallic state; transition metals; semiconductors; optical properties; electronic structure of solids; ferromagnetism; magnetic properties of matter; magnetic materials and technical magnets; domain theory; superconductivity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2003 - STRUCTURE OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of crystallography; lattice geometry; bravais lattices; crystal systems; stereographic projection; point and space groups; symmetry elements; tensor properties of crystals; physical properties; elasticity of crystals; introduction to diffraction by crystals; reciprocal lattice; ewald construction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2004 - ADVANCED DISLOCATION THEORY
Minimum Credits: 3
Maximum Credits: 3
Origin, geometric aspects, and types of dislocations; experimental evidence; theoretical strength of crystals; elastic properties, stress field, and strain energy of dislocations, interaction with other dislocations and lattice imperfections; dislocations in particular crystal structures; dislocation reactions, the structure of crystal boundaries; applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2005 - POIN DEFECTS CRYSTALLINE SOLIDS
Minimum Credits: 3
Maximum Credits: 3
Thermodynamic principles, point defects in metals and alloys, point defects in compounds, defect-related transport phenomena, adsorption of gases on metals, dissolution of gases in metals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2006 - TEXTURES OF MATERIALS
The principles of the measurement and the mathematical description of textures are discussed and applied to materials. Topics include: texture representation and measurement; pole figures and orientation distribution functions; evolution of textures; relation to physical properties; stress analysis; application of texture analysis to metals and alloys, thin films and other materials.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**MSE 2008 - PROCESSING OF MATERIALS**  
Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

**MSE 2009 - COMPUTR APPLICATN IN MATERIALS**  
Minimum Credits: 3  
Maximum Credits: 3  
A variety of numerical techniques are discussed, including solution of transcendental equations, integration, matrix manipulation, solution of simultaneous equations, use of finite difference and finite element methods for solution of partial differential equations. Specific computer topics demonstrated include graphics modeling and use of the digitizer; materials applications covered include heat and fluid flow analyses for metals and polymers, diffusion, and metalworking die and preform design.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**MSE 2011 - ENERGETICS**  
Minimum Credits: 3  
Maximum Credits: 3  
Advanced classical thermodynamics; chemical equilibrium solution thermodynamics; quasichemical model; electrochemical cells; surface tension; thermodynamics of interfaces; introduction to thermodynamics of irreversible processes.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**MSE 2013 - KINETICS IN MATERIALS SCIENCE**  
Minimum Credits: 3  
Maximum Credits: 3  
Diffusion in solids; mathematics of diffusion; atomistics of diffusion and diffusion mechanisms; diffusion in alloys, the Kirkendall effect; uphill diffusion; generalized phenomenological treatment of diffusion; diffusion in ionic solids; diffusion in multicomponent systems; grain boundary diffusion; surface diffusion and dislocation effects; anelasticity and internal friction phenomena; the liquid state; diffusion in liquids; viscosity.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SU3 Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**MSE 2014 - PHASE TRANSFORMATIONS**  
Minimum Credits: 3  
Maximum Credits: 3  
Energetics of transformations; stability criteria; classification of tranformations; theory of rate processes; classical nucleation theory; liquid-solid transformations; precipitation from solid solution; spinodal decomposition; metastable phases; transition phases and g.P. Zones; growth of phases; interfacial stability; eutectoid decomposition, massive transformations, martensitic transformations, orderdisorder phenomena, nucleation in glass-forming systems, phase separation in glasses, metastability in glass, glass ceramics.  
**Academic Career:** GRAD  
**Course Component:** Lecture
MSE 2015 - ELECTROMAGNETC PROPS MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Magnetic properties of matter; ferro- ferri- and antiferromagnetism; diamagnetic and paramagnetic substances; magnetostatics; the fundamental quantities in the description magnetic behavior; measurement of magnetic quantities; hysteresis; magnetic domains; magnetic anisotropy; magnetostriiction; permeability; coercivity; hard and soft magnetic materials for engineering applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2019 - TRANSPORT PHENOMENA IN MSE
Minimum Credits: 3
Maximum Credits: 3
This course discusses the conceptual building blocks for continuum mechanics analysis of various transport situations involved in materials processing. This approach stems from the claim that what is happening to the material in a certain type of processing operation is not unique; materials undergo similar transport experiences in other processing environments. This particular approach to materials processing integrates the body of knowledge of transport phenomena relevant to analysis of processing of metals, polymers, and ceramics into a single course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2020 - ANALYS OF METALURGCL OPERATNS
Minimum Credits: 3
Maximum Credits: 3
Analysis of metallurgical operations based on fluid flow. Heat and mass transfer, and equilibrium considerations to determine the factors limiting production rates and affecting product composition, energy requirements, process control, and overall economics. Emphasis will be placed on the relevancy of analytical models to experimental and industrial experience.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2021 - PHYSCL CHEM OF PROCESS METLRGY
Minimum Credits: 3
Maximum Credits: 3
Thermodynamic and kinetic aspects of process metallurgy reactions are studied. Topics are drawn from the ionic theory of slags, heat and mass balance modelling, vacuum and ladle treatments of liquid steel with particular reference to deoxidation, desulfurization and cleanliness.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2022 - MODIFCTN & PRODCTN METAL SURFC
Minimum Credits: 3
Maximum Credits: 3
Review of basic principles of high temperature corrosion and aqueous corrosion; monitoring and use of controlled atmospheres for modification of metal surfaces at high temperatures; surface modification of metals and alloys by ion implantation using plasma discharge techniques; coatings formation for metals and alloys using chemical vapor depositions, physical vapor deposition, plasma spray, and flame spray techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
MSE 2030 - MECHANICAL BEHAVIOR OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Continuum mechanics concepts; elastic, plastic, and viscous deformation; strength in metals, ceramics, and polymers. Application of concepts to details of material tests (e.g., Tension, torsion, compression, hardness tests); metallurgical phenomena (e.g., Precipitate strain fields, dislocations, transformations, residual stresses, anisotropy); failure (by brittle fracture, ductile fracture, creep, fatigue, wear, hydrogen effects); design of components for industrial use or research equipment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2031 - METAL FORMING PROCESSES
Minimum Credits: 3
Maximum Credits: 3
Mechanical fundamentals; stress, strain, strain-rate, yield criteria, stress-strain relations, strain energy, friction, limit analysis; metal forming processes considered with respect to practices, analyses, and interrelationships between practice and theory; metal forming processes covered include forging, rolling, wire drawing, extrusion (direct and hydrostatic), and sheet forming operations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2032 - FRAC MECHC FOR PRODC DSGN/MFG
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2033 - MAGNETIC PROPERTIES OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Magnetic properties of matter; ferro-, ferri-, and antiferromagnetism; diamagnetic and paramagnetic substances; magnetostatics; the fundamental quantities in the description magnetic behavior; measurement of magnetic quantities; hysteresis; magnetic domains; magnetic anisotropy; magnetostriction; permeability; coercivity; and hard and soft magnetic materials for engineering applications; thin film and fine-particle behavior.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2035 - ADVANCED PHYSICS OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Diffraction by crystals; crystal symmetry; lattice waves; lattice vibrations and thermal properties; free electron theory of metals; band theory of solids; transition metals; insulators and semiconductors; superconductivity; ferroelectrics; optical properties of solids.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2036 - INTRO TO CONTINUUM MECHANICS
Minimum Credits: 3
Maximum Credits: 3
The fundamental concepts of continuum mechanics necessary for studying the mechanical behavior of solids and fluids. Includes a review of vectors and tensors; stress; strain and deformation; general principles in the form of balance laws; constitutive equations and their restrictions; and
specialization to the theories of linearized elasticity and fluid mechanics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2037 - NANOENGINEERING MATRiLS & DEVICE
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction for current nanotechnology and fundamentals for nanoengineering. It mainly contains three areas: nanomechanics, nanomaterials and nanoscaled devices. In nanomechanics, it covers nanoindentation mechanics, thin film mechanics and one dimensional nanowire mechanics, nanocrack mechanics, deformation in nanomaterials. Nanomechanical model will be emphasized. In nanomaterials, it covers carbon nanotube, one dimensional semiconducting nanowires and nanomultilayers as well as nanostructured composites. Novel property/phenomena reviewed.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2038 - APPLIED SOLID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Stress and strain transformations; applied elasticity problems in torsion and plane problems; thermal stresses and elementary plasticity; energy methods; fundamentals of finite element methods.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2041 - ADVANCED PHYSICAL METALLURGY 1
Minimum Credits: 3
Maximum Credits: 3
The cold-worked state; crystal plasticity, production of crystalline defects; annealing phenomena; recovery, recrystallization, and grain growth; secondary recrystallization, tertiary recrystallization; genesis of preferred orientation; deformation and recrystallization textures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2042 - ADVANCED PHYSICAL METALLURGY 2
Minimum Credits: 3
Maximum Credits: 3
Strengthening mechanisms in metals and alloys; theoretical strength of crystals; particle strengthening; dislocation particle interactions; grain size strengthening; strengthening by presence of grain boundaries; half-pitch expression; theories of discontinuous yielding; solid solution strengthening; fiber strengthening and the design of high strength microstructures.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2043 - ELECTRON MICROSCOPY IN MATRiLS SCI
Minimum Credits: 3
Maximum Credits: 3
Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, laue conditions, structure factor, ewald construction, double diffraction, twinning, kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.

Academic Career: GRAD
Course Component: Lecture
MSE 2044 - SCANNING ELECTRON MICROCOPY & EPMA
Minimum Credits: 3
Maximum Credits: 3
Interaction of electrons with solids, electron optics, image formation in the s.E.M., Qualitative and quantitative x-ray spectroscopy (microprobe), and applications of s.E.M. in metallurgy and materials science.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2045 - ADVANCED PHYSICAL METALLURGY
Minimum Credits: 3
Maximum Credits: 3
Phenomena related to non-metallic inclusions; influence of size, shape, and amount of inclusions on mechanical properties and property anisotropy; thermomechanical treatment of austenite; hot rolling as a thermomechanical treatment; hot rolling behavior of austenite in plain carbon and low alloy steels; grain size and texture control through thermomechanical treatment; relationship between thermomechanical treatment, microstructure, and mechanical properties.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2046 - PHYSICAL METALLURGY ENGR ALLOYS
Minimum Credits: 3
Maximum Credits: 3
Property requirements of engineering alloys are discussed: strength, toughness, formability, weldability, fatigue resistance, corrosion/oxidation resistance. Review is made of pertinent phase diagrams, transformations, and microstructures in the Fe-Fe3C and other alloy systems. Composition, processing, microstructure and properties of important structural steels, sheet steels, stainless steels, tool steels, aluminum alloys, titanium alloys, as well as nickel based & copper-based alloys will be presented. Case studies, design problems & selection criteria are discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2047 - ANALYSIS & CHARACTERIZATION NANO-SCALE
Minimum Credits: 3
Maximum Credits: 3
This course offers a survey of micro-analytical, microscopy and diffraction methods that are widely used for the analysis of composition, chemistry, structure, scale and morphology of advanced materials. It introduces the most basic concepts required to understand experimental data obtained with these modern techniques. The main objectives of the course are to enable students to interpret and evaluate relevant data sets presented in the research literature and to identify experimental tools to solve a given Nano-research characterization problem. Some prerequisite basic knowledge of the structure of solid matter (e.g. Crystals and amorphous materials), diffraction methods (e.g. X-ray diffraction) and processing-property-structure relationships in materials is expected.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSE 2048 - ENGR ALLOYS FOR CONSTRUCTION
Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to understand modern metallic alloys used in construction. To accomplish this goal, the following sequence is offered: review of mechanical properties required of structural alloys; review of physical metallurgy principles: thermodynamics, kinetics, phase diagrams and phase transformations; microstructure and properties of stainless steels, aluminum alloys, titanium alloys, nickel and cobalt-based super alloys and alloys for nuclear core applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering (PENG)

MSE 2050 - GAS-METAL REACTIONS
Minimum Credits: 3
Maximum Credits: 3
Oxidation of metals, alloy oxidation, internal oxidation, effect of metallurgical variables on oxidation, reactions of metals and alloys with gases other than oxygen, hot corrosion, coatings.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2055 - PRIN OF SOLIDIFICATION ENGRNG
Minimum Credits: 3
Maximum Credits: 3
Study of fundamental phenomenon during the formation of crystalline materials. Delineation of the processing parameters that control crystal perfection, solidification substructure, grain size and shape, microsegregation, macrosegregation, microporosity, inclusions, mechanical properties, and physical properties. Application of fundamental principles to the processing of single crystals, ingots, castings, and composites.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2057 - WELDING METALLURGY
Minimum Credits: 3
Maximum Credits: 3
Welding methods and equipment will be reviewed with regard to interaction with metallurgical parameters. The influence of welding parameters, atmosphere, preparation, and materials properties, on the heat affected zone, weld metal, and weld quality will be reviewed in terms of general principles with some examples from specific applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2058 - CASTING WELDG THERM SURFC METL
Minimum Credits: 3
Maximum Credits: 3
Principles & practice of casting, welding & thermal surfacing of metal manufactured products, esp net-shape parts. Sand, investment, permanent, die & evaporative pattern casting; rapid solidification processes; shielded arc, gas, tig, mig, resistance spot & seam, electroslag, submerged arc, ultrasonic, electron beam & laser welding; brazing & soldering processes included. Thermal surfacing processes include flame spraying, plasma spray coating, laser surface treatment & electroslag surfacing. Metallurgical compatibilities of processes will be an important part of treatment.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2067 - ELEMNS OF MATRLS SCI & ENGRG 1
Minimum Credits: 3
Maximum Credits: 3
This course is primarily designed for graduate students entering the program without a degree in a field of materials engineering. Bonding and structure of materials; thermodynamics and phase diagrams; imperfections in crystals; rate processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
MSE 2068 - ELEMNS OF MATRLS SCI & ENGRG 2
Minimum Credits: 3
Maximum Credits: 3
This course is primarily designed for graduate students entering the program without a degree in a field of materials. Mechanical properties; plastic deformation, mechanical properties and microstructure control; high temperature deformation; deformation of amorphous materials. Electromagnetic properties; electrons in solids; electronic transport; junctions; magnetic properties; dielectric and optical properties.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2069 - MATRLS SCI OF NANOSTRUCTURES
Minimum Credits: 3
Maximum Credits: 3
A graduate level course that reviews the theories and phenomena associated with solid structures that lie in the nano- or Meso- scale regime from 1 to 1000 nm. Engineered structures of these dimensions have unique properties due to their size including surface and interface dominated energy considerations governing shape and phase formation, optical interactions due to confinement effects, unique electronic/ quantum effects due to confinement. The course will survey issues associated with creation, analysis and theoretical modeling of these structures with a kinetics-thermodynamics perspective.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

MSE 2070 - STRUCTURE OF CERAMICS
Minimum Credits: 3
Maximum Credits: 3
Characteristics of ceramic solids, bonding and structure of crystalline and noncrystalline solids; imperfections; development of microstructures; nucleation and crystal growth; solid-state reactions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2071 - PROPERTIES OF CERAMICS
Minimum Credits: 3
Maximum Credits: 3
Microstructure of ceramics; principles and application to ceramic products; thermal properties; mechanical properties; elasticity and strength, plastic deformation, and creep.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2072 - CERAMIC PROCESSING
Minimum Credits: 3
Maximum Credits: 3
Raw material–body preparation; forming processes; powder pressing, slipcasting, plastic forming; glass forming; drying and firing, controls, sintering and vitrification; special processes; hot-forming, fluid processing, coatings; testing and quality control.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2073 - MSE CERAMIC MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
MSE 2074 - COLLOIDS AND SURFACES
Minimum Credits: 3
Maximum Credits: 3
Concepts from physical chemistry and transport phenomena are extended to study surface and colloidal phenomena, and related applications to materials processing and separations technology. Topics include: surface tension, adsorption, electrostatic double layer, dominant forces on the colloidal lengthscale, colloid stability, electrokinetic phenomena, and suspension rheology surface probes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2075 - STRUCTR AND PROPERTIES OF GLAS
Minimum Credits: 3
Maximum Credits: 3
This is a graduate materials course mostly on inorganic glasses (ceramic and metallic glasses). Its aim is to attain greater depth of coverage about glasses than is possible in the other mse ceramics or materials courses. Therefore only a limited number of topics will be treated and they are related usually to current interests. The coverage will be intermediate between glass science and physics of amorphous materials.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2076 - SURFACES OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of surfaces; structure, thermodynamics, dynamics of surface atoms, electrical properties. Interaction of gases with surfaces; surface forces, physical adsorption, characterization of solids, vacuum techniques, chemisorption. Solid-solid interface; structure and properties of grain boundaries, g.B. Dislocations, g.B. Migration and sliding, role of g.B. In sintering, and creep.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2077 - THIN FILM PROCESSES & CHRCTRZN
Minimum Credits: 3
Maximum Credits: 3
This course will be an overview of the major thin film processing methods and the primary techniques to characterize thin film surfaces and interfaces. Topics to be included: vacuum science and technology, thin-film deposition techniques, such as pvd, mbe, cvd and the fundamental surface processes of epitaxial growth. The analytical techniques will be presented, e.g., Electron microscopy, aes, xps, afin, and stm.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2078 - NANOPARTICLES: SCI & TECHNLGY
Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course introduces students to the science and technology of nanoparticles. Synthesis of nanoparticles will be discussed. Applications of nanoparticles for advanced electronic, magnetic, biomedical, catalysis and other areas will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2079 - ELECTROMGNTC PROPRTS CERAMCS
An in-depth analysis of the electrical, optical, and magnetic properties of ceramic materials. The influence of composition, crystal chemistry, and microstructure on the properties of insulators, dielectrics, ferro-electrics, and ferrites is examined.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

### MSE 2080 - POLYMERIZATION ENGINEERING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Historical development of the synthetic polymer industry; economic and chemical development; feedstocks; molecular architecture, introductory concepts, and definitions; polymerization reactions; step growth and chain reactions; mechanisms and kinetics; homopolymer, copolymer; block and graft copolymerization; commercial processes; reactors (cstr and tubular); new polymers; high-temperature polymers; property-chemical structure correlations; thermal, stability, degradation, uses, and application of polymers.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

### MSE 2081 - INTRO TO POLYMER PROCESSING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Scope of polymer processing; thermoplastics and thermosets; basic transport phenomena; equations of motion, energy; viscous dissipation; non-newtonian fluids, poiseuille and couette flows; lubrication approximation; plasticating extrusion; calendering. Injection moulding; fiber spinning; film blowing; distributive and dispersive mixing; mixers.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

### MSE 2082 - APPLIED POLYMER PRINCIPLES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Polyethylene sheet/film production; polymerization, molecular characterization, melt processing properties, role of stabilizers/antitoxicants, extrusion and pelletization, die swell, crystallization, stretching, molecular and physical properties of the product, quality control. Polyurethane foam processing: step polymerization, flexible and rigid systems, integral skin focus, foam processing, correlation between processing and foam morphology, flammability, quality control.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

### MSE 2084 - INTRO TO POLYMER SCIENCE

**Minimum Credits:** 3  
**Maximum Credits:** 3  

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

### MSE 2086 - POLYMER PROCESSING

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course deals with applications of continuum mechanics to selected flow, heat and mass transfer problems. The following industrial operations are discussed: extrusion, injection molding, fiber spinning, mixing, devolatilization, reaction injection molding. In addition to theoretical aspects, experimental techniques will be covered.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

MSE 2087 - POLYMER CRISTLLZTN & MORPHOLGY
Minimum Credits: 3  
Maximum Credits: 3  
A historical account of the development of the field is followed by a discussion of techniques used for investigating the morphology of polymers. The morphology and crystallization behavior are dealt with from a thermodynamic as well as a kinetic viewpoint. Transitional behavior, polymer stereospecificity, light scattering (from the solid state), and polymer stability are a part of this course.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

MSE 2089 - FRACTURE PHENOMENA IN POLYMERS
Minimum Credits: 3  
Maximum Credits: 3  
Stress-strain behavior, time dependent failure, tearing and fatigue in elastomers, rupture envelopes, crazing, flaw theory of fracture.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

MSE 2091 - POLYMER STABLTY AND DEGRADN
Minimum Credits: 3  
Maximum Credits: 3  
Types of polymer degradation (thermal, oxidative, radiative, chemical, biological, and mechanochemical). Kinetics and mechanisms of degradation. Factors (environmental, morphological, and structural) affecting stability. Experimental methods of characterization; flammability; toxicity.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

MSE 2092 - REACTIVE PROCSSNG OF POLYMERS
Minimum Credits: 3  
Maximum Credits: 3  
This course deals with the fundamentals of and interactions between reaction kinetics, non-newtonian flow, heat and mass transfer in homogeneous and two-phase polymeric systems involved in reactive processing. Particular attention is paid to transport phenomena involved in the formation of foams and certain types of composites.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering

MSE 2093 - ASPECTS OF POLYMER THEORY
Minimum Credits: 3  
Maximum Credits: 3  
Introduction and development of the theoretical concepts behind polymer behavior. The course will cover the fundamentals of the statistical mechanics of polymer chains, as well as current research topics such as behavior of polymer blends (thermodynamics and phase separation), bipolymers, scaling concepts in polymers, polymer-surface interfacial phenomenon, and computer simulations of polymer properties.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SU3 Basis  
Course Requirements: PROG: Swanson School of Engineering
MSE 2094 - SPECIAL ADVANCED SEMINAR
Minimum Credits: 1

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2110 - NUCLEAR MATERIALS
Minimum Credits: 3
Maximum Credits: 3
This course presumes that students have the knowledge base needed to understand materials issues associated with the design and operation of nuclear power plants, such as basic concepts of physical metallurgy, a mechanistic and microstructural-based view of material properties, and basic metallurgical principles. This course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well the effects of irradiation on corrosion performance, as well as the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2111 - MATLS ENERGY GENRT & STORAGE
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MSE 2112 - NANO SCALE MODLG SIMUL MOL DYNM
Minimum Credits: 3
Maximum Credits: 3
The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics, continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods, accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

MSE 2113 - NANO SCALE MODELING AND SIMULS
Minimum Credits: 3
Maximum Credits: 3
This course teaches the essentials of nanoscale modeling and simulations, which concerns the use of modern computational tools to the analysis of materials at the nanoscale. The current emphasis of this course is on first-principle density functional theory (DFT) calculation method. The course covers topics on basic quantum mechanics, fundamentals of DFT, statistical mechanics, thermodynamics, and continuum mechanics, and their role in atomistic scale modeling and simulation. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a nanomaterial system of their choice and analyze simulation results by visualization and data mining methods using software provided.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MSE 2115 - HEAT TRNSF FLUID FLOW NUCLRPLNT
Minimum Credits: 3
Maximum Credits: 3
This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole. Principles are applied through the application of major industry codes to specific cases.

---

**MSE 2118 - COMPUTATIONAL RADIATN TRANSPRT**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course provides an in-depth review of modern computational techniques used for solving the linear Boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern radiation transport through materials, monte Carlo methods for the simulation of radiation transport, a first-principles derivation of the Boltzmann radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in Legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the Boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also places a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

**Academic Career:** GRAD

**MSE 2130 - NUCLEAR FUEL CYCL ENVRN ISSUES**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course will be developed in conjunction with University of Pittsburgh faculty with an interest in environmental issues impacting the nuclear power industry including school of engineering faculty involved with the Mascaro sustainability initiative, faculty from the department of civil and environmental engineering and faculty from the graduate school of public and international affairs. The course will address such topics as sustainable energy resources, engineering and societal ethical concerns, risk analysis, and future energy supplies in general and as each of these topics relates to such specific issues as the nuclear fuel cycle, nuclear reactor safety, nuclear waste disposal and transportation, and gen iv and the hydrogen economy. Students will better understand the socio-economic issues surrounding achieving a sustainable nuclear power future as it impacts fuel acquisition, plant operation and waste disposal.

Mathematics

MATH 2000 - THESIS MS
Minimum Credits: 1
Maximum Credits: 15
This course is for students writing a master of science thesis.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis

### MATH 2005 - MATH FOR HIGH SCHOOL TEACHERS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will be a service course for students enrolled in the mathematics education certification programs at the School of Education, Department of Learning and Instruction.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2010 - TEACHING ORIENTATION

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course prepares T.A.'S to teach mathematics at a University level.

**Academic Career:** GRAD  
**Course Component:** Practicum  
**Grade Component:** Grad SN Basis

### MATH 2012 - PREPARING PRELIMS AND RESEARCH

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course is intended for students who have not yet passed the preliminary exams. The purpose of the course is to help students prepare for the prelims and prepare for research.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad SN Basis

### MATH 2014 - COMMUNICATING MATH

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course will help students gain the skills and experience needed to do research in mathematics.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2020 - PROGRESS IN MATH

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will deepen the students understanding of analysis through intensive training in problem solving followed by comprehensive study and dissection of the problems attempted. Students preparing for the analysis portion of the preliminary exam are strongly encouraged to enroll.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2030 - ITERATIVE METHODS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Topics include matrix theory, matrix and vector norms, error analysis, factorizations, direct and iterative methods for solving linear systems, least squares and the algebraic eigenvalue problem.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
MATH 2050 - GRAPH THEORY
Minimum Credits: 3
Maximum Credits: 3
Basic concepts and definitions from the theory are studied. In particular, enumerative problems are selected by the instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2055 - CODES AND DESIGNS
Minimum Credits: 3
Maximum Credits: 3
A unified theory of linear codes, combinatorial design and statistical design will be presented. Hamming, BCH, Golay, quadratic residue and other classes of codes will be constructed. Several decoding schemes, including decoding by way of locator polynomials, will be done. Applications to statistical design and quality control will be described in detail.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2060 - COMBINATORICS 1
Minimum Credits: 3
Maximum Credits: 3
This is a graduate level course in combinatorics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2061 - COMBINATORICS 2
Minimum Credits: 3
Maximum Credits: 3
This is a second graduate course in combinatorial theory. Topics will include an introduction to designs and codes, algebraic graph theory, combinatorial aspects of the symmetric group, polya theory, and other topics selected by the instructor.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2070 - NUMERICAL MATH IN SCI COMPUTING 1
Minimum Credits: 4
Maximum Credits: 4
This is an introductory survey course for non-numerical analysis students. It covers the underlying theory and computational aspects of numerical linear algebra. Topics include directional iterative methods, computation of eigenvalues and eigenvectors and least squares problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2071 - NUMERICAL MATH IN SCI COMPUTING 2
Minimum Credits: 4
Maximum Credits: 4
This course is a continuation of 2070. Topics include numerical solutions of PDE's by finite differences and finite element methods also numerical differentiation and integration are covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2090 - NUMERICAL SOLUTN ORDINARY DE
Minimum Credits: 3
Maximum Credits: 3
The topic covered is modern methods for solving initial value problems. This will include the basic theory and software implementations and
numerical experiments.

MATH 2160 - SET THEORY
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course intended to prepare the students for the various applications of set theory. The contents include basic axioms, Boolean algebra of classes, algebra of relations, ordinals, transfinite induction, equivalents of the axiom of choice, and of the continuum hypothesis.

MATH 2170 - MATHEMATICAL LOGIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course include the propositional calculus, the predicate calculus, model theory and their applications to mathematical systems.

MATH 2180 - INTRODUCTION FRACTAL GEOMETRY
Minimum Credits: 3
Maximum Credits: 3
This course will give an introduction to fractal geometry. Topics include metric spaces, measures, fractal dimensions, discrete dynamical systems and multifractal analysis.

MATH 2190 - FUNCTIONS OF SEVERAL VARIABLES
Minimum Credits: 3
Maximum Credits: 3
This course covers topics of the calculus of several variables from a more general and theoretical point of view. Topics include convergence, continuity, compactness, inverse and implicit function theorems and differential forms.

MATH 2200 - REAL ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
This is the basic real analysis course for graduate students. In particular, the theory of Lebesque integral and some of its many ramifications are studied. This leads to differentiation and integration theories for real valued functions.

MATH 2201 - REAL ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of 2200. Topics include elements of the theory of Banach and Hilbert spaces, Radon Nikodym theorem, duality for the LP spaces, product measures, Fubini's theorem and differentiation.
MATH 2210 - COMPLEX ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
This is the basic first course in complex analysis. Topics include analytic functions, Cauchy-Riemann equations, elementary conformal mappings, Poisson formula, Taylor and Laurent series, argument principle, residues and the classifications of singularities.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2211 - COMPLEX ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of 2210. The major topics are normal families, the Riemann mapping theorem and harmonic functions. Selected topics, by the instructor, will also be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2215 - TOPICS IN COMPLEX ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course will cover various topics in complex analysis. This may include harmonic measure, quasi-conformal maps, Kleinian groups and holomorphic dynamics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2216 - HARMONIC MEASURES
Minimum Credits: 3
Maximum Credits: 3
This course will cover the theory of harmonic measures on plane domains. Topics may include the relationship to Brownian motion and harmonic functions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2217 - QUASICONFORMAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course covers the basics of quasi-conformal maps in plane domains. The geometric and analytic theory will both be done.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2218 - KLEINIAN GROUPS
Minimum Credits: 3
Maximum Credits: 3
The theory of Kleinian groups in hyperbolic space will be covered. This will include both the planar and n dimensional cases. The relationship to Thurston's theory of 3 manifolds will be touched upon.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2219 - DYNAMICAL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the student to new concepts from dynamical systems. Invariant manifolds, normal form; Bifurcations and chaos will be discussed from the geometric point of view. Some global analysis will also be described. Numerical tools and methods for analyzing local bifurcations will also be discussed. Emphasis will be on practical applications of these techniques.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2240 - ANALYTIC NUMBER THEORY
Minimum Credits: 3
Maximum Credits: 3
Some of the topics covered in this course include residue classes, unique prime factorization, character mod n, the Riemann zeta function and its analytic continuation, poles and functional equations. Also the prime number theorem and Dirichlet theorem will be covered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2245 - ALGEBRAIC NUMBER THEORY
Minimum Credits: 3
Maximum Credits: 3
In this course the theory of numbers will be algebraically, that is, as the study of algebraic numbers. Particular attention will be paid to the development of quadratic and cyclotomic number fields and to factorization theorems. Other topics include ideal theory and the work of Kummer and Fermat's last theorem.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2251 - REPRESENTATION THEORY
Minimum Credits: 3
Maximum Credits: 3
Representation theory is a central discipline in modern mathematics. Its study often involves a mix of algebraic, geometric, analytic, arithmetic, and sometimes even combinatorial techniques. The course will generally focus on the representation theory of real reductive groups and the accompanying harmonic analysis, stressing various topics and/or points of view depending on the audience's interest. Topics may include: the representation theory of compact lie groups (Peter-Weyl theorem, Cartan-Weyl theory of finite dimensional representations, Borel-Weil theorem), the representation theory of real reductive groups (Harish-Chandra's theory of admissible representations, the Langlands classification, discrete series), the representation theory of reductive p-adic groups (admissible representations, supercuspidal representations), automorphic forms.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2260 - POTENTIAL THEORY
Minimum Credits: 3
Maximum Credits: 3
This is an elementary introduction to the subject. Topics include harmonic functions, Poisson integral, maximum principle, classical Dirichlet problem, Harnack's inequality, boundary limit theorem, super harmonic functions and their properties and green's potentials.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2280 - HARDY SPACES
Minimum Credits: 3
Maximum Credits: 3
A brief introduction to HP space theory in the disk. Topics include Poisson formula, boundary behavior and Fatou's theorem, factorization theorems and Blaschke products.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2301 - ANALYSIS 1
This course is an introduction to real analysis/measure theory and functional analysis.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MATH 2302 - ANALYSIS 2**  
Minimum Credits: 3  
Maximum Credits: 3  
This course presents an introduction to the analysis of holomorphic functions followed by an introduction to harmonic analysis. It is a natural continuation of MATH 2300 analysis 1.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MATH 2303 - ANALYSIS 3**  
Minimum Credits: 3  
Maximum Credits: 3  
This course presents an introduction to the analysis of holomorphic functions followed by an introduction to harmonic analysis. It is a natural continuation of MATH 2300 analysis 1.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MATH 2304 - ANALYSIS 4**  
Minimum Credits: 3  
Maximum Credits: 3  
Analysis 4 is a new course that follows on from the analysis 1, 2, 3; especially analysis 2. Its focus will be complex and harmonic analysis. We will integrate this new material with the real, functional, complex and harmonic analysis of the previous three courses.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MATH 2370 - MATRICES AND LINEAR OPERATORS**  
Minimum Credits: 3  
Maximum Credits: 3  
Linear transformations on finite dimensional vector spaces are studied in a semi-abstract setting. The emphasis is on topics and techniques which can be applied to other areas, e.g., Bases and dimension, matrix representation, linear functional, duality, canonical forms, vector space decomposition, inner products and spectral theory.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MATH 2371 - MATRICES & LINEAR OPERATORS 2**  
Minimum Credits: 3  
Maximum Credits: 3  
Continuation of MATH 2370.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MATH 2390 - INTRODUCTION TO HILBERT SPACES**  
Minimum Credits: 3  
Maximum Credits: 3  
Some of the major topics covered in this course will include: inner product spaces, weak convergence, compactness bounded operators on Hilbert spaces, compact operators, Riesz representation theorem, Hilbert-Schmidt operators, spectral theory of self-adjoint operators and positive operators.  
**Academic Career:** GRAD
MATH 2400 - FUNCTIONAL ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
A first course in the area, the emphasis of the course will be on normed linear spaces and linear operations, their basic properties will be discussed. Also, inner product spaces and their properties will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2401 - FUNCTIONAL ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of 2400. Topics to be covered include the spectral theory, compact operators, and distribution theory and Sobolev spaces.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2410 - HARMONIC ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
This is a basic first course in harmonic analysis. The major topic is the Fourier transform and Fourier series. In particular, various kernels and pointwise sum ability of Fourier series will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2480 - COMPUTATIONAL APPROXIMATION THEORY
Minimum Credits: 3
Maximum Credits: 3
Topics include fundamental theorems, polynomial approximation, splines, surface approximation, domain transformations and applications to science and engineering.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2500 - ALGEBRA 1
Minimum Credits: 3
Maximum Credits: 3
The basic concepts and results of group theory are developed with an emphasis on finite groups. Topics include: homomorphism theorems, isomorphism theorems, Sylow theorems, permutation representations and hall's characterization of solvable groups.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2501 - ALGEBRA 2
Minimum Credits: 3
Maximum Credits: 3
In this course the fundamental properties of rings, fields and modules are studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2502 - LINEAR REPRESENTATION OF FINITE GROUPS
Minimum Credits: 3
Maximum Credits: 3
Classical linear groups, semi simple algebras and modules, Clifford's theorem, characters, induced representations. The material is based on texts by Isaacs and Gorenstein's "finite groups".

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2503 - MATRIX GROUPS
Minimum Credits: 3
Maximum Credits: 3
The course is an introduction to some of the concepts of lie groups and lie algebra--all done at concrete level of matrix groups. It centers around the isomorphism questions on matrix groups of small dimensions, and it leads to maximal torus, Clifford algebra, and Weyl group.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2505 - ALGEBRA 3
Minimum Credits: 3
Maximum Credits: 3
This is a third course in algebra. It covers commutative algebra, homological algebra and rudiments of category theory. The material covered provides the necessary background for the advanced courses in algebraic geometry and number theory.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2506 - ALGEBRA 4
Minimum Credits: 3
Maximum Credits: 3
This is a fourth course in algebra. It covers introductory topics in algebraic geometry, number theory, and representation theory, selected by the instructor.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2601 - ADVANCED SCIENTIFIC COMPUTING 1
Minimum Credits: 3
Maximum Credits: 3
These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2602 - ADVANCED SCIENTIFIC COMPUTING 2
Minimum Credits: 3
Maximum Credits: 3
Course develops the computational mathematics of evolving areas of current scientific interest.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2603 - ADVANCED SCIENTIFIC COMPUTING 3
Minimum Credits: 3
Maximum Credits: 3
These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MATH 2604 - ADVANCED SCIENTIFIC COMPUTING 4
Minimum Credits: 3
Maximum Credits: 3
These courses develop the computational mathematics of evolving areas of current scientific interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2700 - TOPOLOGY 1
Minimum Credits: 3
Maximum Credits: 3
A first course in topology, some of the topics covered include separation axioms, bases and sub-bases, product and quotient topology, homeomorphisms, compactness, the Baire category theorem, the Lindelof property, connected ness, topological spaces and compactification.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2701 - TOPOLOGY 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of 2700. In this course the basic concepts and results in algebraic topology will be covered, this includes both homotopy and homology theory. In particular the calculation of the fundamental group and homology groups from chain complexes will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2750 - GENERAL TOPOLOGY
Minimum Credits: 3
Maximum Credits: 3
The fundamental theorems of general topology will be studied in particular, those results concerning generalized metric spaces, coverings and mapping will be studied.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2800 - DIFFERENTIAL GEOMETRY 1
Minimum Credits: 3
Maximum Credits: 3
This course covers introductory topics in differential geometry. Topics include topological manifolds, differential structures, tangent and tensor bundles, vector fields and differential equations, integral manifolds and Riemannian structures.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2801 - DIFFERENTIAL GEOMETRY 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of 2800 and its goal is to develop advanced concepts in differential geometry. Some topics which might be covered include Riemann surfaces and the differential geometry of r4 and in particular the relevance of these to quantum super string theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 2810 - ALGEBRAIC GEOMETRY
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the basic ideas of algebraic geometry. The approach to the subject may be via either the linear series on a curve approach or the algebraic approach through fields of algebraic functions or the sheaf theoretic approach. Applications may also be included.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2815 - DISCRETE GEOMETRY & COMPUTERS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will discuss various classical problems in discrete geometry. It will develop the theory of packings and coverings, the Kepler sphere packing theorem, the dodecahedral theorem, kissing number problems, lattice packing problems in higher dimensions, and the kelvin problem in foams.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2900 - PARTIAL DIFFERENTIAL EQUATIONS 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This is an introduction course to this area. Some of the topics to be covered include: linear second order equations, the method of characteristics, Laplace and wave equations, the heat equation and various maximum principles.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2901 - PARTIAL DIFFERENTIAL EQUATIONS 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course is a continuation of 2900. The topics covered in this course include an introduction to parabolic and hyperbolic equations, a priori estimates, free boundary problems, shock waves and Riemann problems.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2920 - ORDINARY DIFFERENTIAL EQUATIONS 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course covers basic concepts in O.D.E.'s. In particular, emphasis is given to connections of this area to applied mathematics and differential geometry.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2921 - ORDINARY DIFFERENTIAL EQUATIONS 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course is a continuation of 2920. Some of the topics which are covered include boundary value problems, green's functions, integral equations and the spectral theory of second order differential equations.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 2930 - ASYMPTOTICS & SPECIAL FUNCTIONS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course is an introduction to the theory of asymptotic and special functions. Some of the functions studied are the gamma function, orthogonal polynomials and Bessel functions. This course also covers techniques for finding asymptotic expansions of integrals and of solutions to differential equations.
MATH 2940 - APPLIED STOCHASTIC METHODS
Minimum Credits: 3
Maximum Credits: 3
This course will provide an overview of stochastic methods that can be applied to problems in biology, finance, and physics. Analytical and computational techniques will be presented which apply to both continuous and discrete stochastic models.

MATH 2950 - METHODS IN APPLIED MATHEMATICS
Minimum Credits: 3
Maximum Credits: 3
This course is a rigorous treatment of various aspects of numerical linear algebra, special features of symmetric operators, optimization with emphasis on properties of convex functions and duality theory.

MATH 2960 - COMPUTATIONAL FLUID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Topics include a review of symmetric linear systems and matrix theory, equilibrium and the calculus of variations in discrete and continuous systems, orthogonal series, networks Fourier series and convolutions, Fourier integrals, complex variables and conformal mapping. Also some numerical methods such as the fast Fourier transform will be covered.

MATH 2980 - PROJECTS IN FINANCIAL MATHEMATICS
Minimum Credits: 3
Maximum Credits: 3
Representatives from business or government will present real-world problems and issues. Students will select one of the problems and generate some solutions either alone or in teams. Oral and written reports of the results will then be presented to both the posers of the problems and to the faculty and students in the professional master's program.

MATH 2990 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 15
This course is independent study by the student under the direction of a faculty member.

MATH 3000 - THESIS PH.D.
Minimum Credits: 1
Maximum Credits: 15
This course is taken by a student who is working on a Ph.D. dissertation under the direction of a student's thesis advisor.
MATH 3005 - TOPOLOGICAL VECTOR SPACES
Minimum Credits: 3
Maximum Credits: 3
Topics will include Banach space review, convergence of nets in topological spaces, uniform spaces, and measure in topology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3010 - SOBOLEV SPACES
Minimum Credits: 3
Maximum Credits: 3
Topics include: definitions and basic properties, the Sobolev imbedding theorem, applications of the theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3015 - TOPICS IN OPTIMAL TRANSPORT
Minimum Credits: 3
Maximum Credits: 3
This course will be an introduction to the optimal transport theory with an emphasis on analytic and geometric aspects of the problem. After the formulation of the classical Monge-Kantorovich problem, the basic questions and some fundamental results (such as Kantorovich duality and Brenier's polar factorization theorem) will be discussed in detail. Further, these problems will be studied in different contexts and from different points of views: functional analysis, geometry, and pdes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3020 - CALCULUS OF VARIATIONS
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the subject. Topics include: variation formulation, the Euler-Lagrange equations, and applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3030 - MATRIX ITERATIVE ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This course will study iterative methods used in solving large sparse systems. In particular systems that arise from finite difference and finite element discretization of partial differential equations will be analyzed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

MATH 3031 - NETWORK THEORY
Minimum Credits: 3
Maximum Credits: 3
The general problem discussed in flows on networks. Topics will include some graph theory, flows and potential differences, transport problems and flow algorithms.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3035 - DIFFERENCE METHODS
Minimum Credits: 3
Maximum Credits: 3
This course treats the interplay between analysis and practical computation in the theory of difference methods. Difference methods will be developed for various problems in mathematical physics and a mathematical theory of their stability, consistency and convergence presented.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

---

**MATH 3040 - TOPICS IN SCIENTIFIC COMPUTING**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This is a topics course at the advanced graduate level. The subject matter will change each time the course is offered.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

---

**MATH 3050 - SEMINAR IN GRAPH THEORY**

- **Minimum Credits:** 1
- **Maximum Credits:** 1

This is a seminar course which is designed to acquaint students with the current research in this area and the specific research interests of the faculty.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

---

**MATH 3051 - THEORY OF GRAPH COLORING**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Topics to be covered include planar graphs, graphs on higher surfaces, critical graphs, conjectures of Hadwiger and Hajos, chromatic polynomials and orientations and flows.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

---

**MATH 3055 - CHROMATIC POLYNOM GRPH STRUCT**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will focus on the relationship between chromatic polynomials and graph structures. Some structure properties to be considered are connectivity, chromatic number, girth, graph components, and graph isomorphism and homeomorphisms.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

---

**MATH 3060 - TOPICS IN COMBINATORICS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course covers a variety of topics in combinatorics.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis

---

**MATH 3061 - PROBABLISTIC COMBINATORICS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

An introduction to probabilistic methods in combinatorics, and combinatorial methods in probability. Main topics to be discussed are martingales, stein's method, correlation inequalities, and if time permits, random graphs.

**Academic Career:** GRAD
**Course Component:** Lecture
**Grade Component:** Grad LG/SNC Basis
MATH 3065 - TOPICS IN ELLIPTIC CURVES
Minimum Credits: 3
Maximum Credits: 3
This course will serve as an introduction to the rich and varied research area of elliptic curves, and in particular their use in cryptography and in algebraic number theory. Some previous experience with abstract algebra (groups, rings, fields, vector spaces) would be required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3070 - NUMRC SOLUTN NONLINEAR EQUATNS
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to modern methods for solutions of such equations. Topics include: algorithms for one-dimensional equations, linearization methods for systems, method of Gauss-Seidel type, quasi-Newton methods, continuation methods and elements of unconstrained minimization methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3071 - NUMRC SOLUTN PARTL DIFFT EQUA
Minimum Credits: 3
Maximum Credits: 3
This course covers contemporary methods for solving initial and boundary value problems. Topics include: properly posed problems, characteristics, finite difference and finite element methods and error estimates.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3072 - FINITE ELEMENT METHOD
Minimum Credits: 3
Maximum Credits: 3
Topics include a description of the method in one, two and three dimensions, variation and minimum energy principles, implementation and discussion of the necessary data structure and evaluation of the errors. Possibly a special topic such as applications to fluid dynamics will be done.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3075 - PARALLEL FINITE ELEMN METHODS
Minimum Credits: 3
Maximum Credits: 3
This course will cover major new developments in fully parallel finite element methods. The reasons why this is a great advantage over traditional methods will be discussed and explained.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3077 - COMPTR FOURR ANAL & APPLICATN
Minimum Credits: 3
Maximum Credits: 3
This course will present an introduction to some of the computational methods for the Fourier transform since they are used in science and engineering. In particular, the discrete Fourier transform and FFT will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3090 - CODING THEORY

2508
Minimum Credits: 3
Maximum Credits: 3
Material for this course will be drawn from portions of the book by Sloan and MacWilliams.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3160 - SEMINAR IN LOGIC
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course in logic. The topics will vary from term to term depending upon the interests of the participants.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MATH 3200 - SEMINAR IN ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course which is designed to introduce students to the current active areas of research in analysis and to the specific research interest of the faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MATH 3210 - SEMINAR IN DISCRETE GROUPS
Minimum Credits: 3
Maximum Credits: 3
This is a seminar course which is designed to introduce students to the current active areas in this area and the specific research interests of the faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MATH 3215 - QUASICONFORMAL MAPPINGS
Minimum Credits: 3
Maximum Credits: 3
This course will cover the quasi-conformal and quasi-regular mappings. They relate to several areas of mathematics and some of these applications will be covered. The methods used in the course will included analysis, topology and geometry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3216 - QUASICONFORMAL MAPPINGS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of MATH 3215. It will be devoted to quasi-conformal analysis in Riemannian manifolds, the so called Donaldson - Sullivan point of view.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3222 - SEVERAL COMPLEX VARIABLES
Minimum Credits: 3
Maximum Credits: 3
A systematic study of invariant distances on complex manifolds and the built in Schwarz-pick lemmas induced by these distances with respect to holomorphic functions of several complex variables.
Academic Career: GRAD
MATH 3225 - MATHEMATICS OF FINANCE 1
Minimum Credits: 3
Maximum Credits: 3
A mathematical introduction to the pricing of options and other derivative securities, portfolio theory and risk management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3226 - MATHEMATICS OF FINANCE 2
Minimum Credits: 3
Maximum Credits: 3
This course will investigate the mathematical modeling, theory and computational methods in modern finance. It will treat mathematical models for financial risk factors, pricing of options and other derivative securities, basic portfolio theory and elementary risk management.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3227 - MATH FINANCE 3
Minimum Credits: 3
Maximum Credits: 3
This course covers special topics in mathematical finance. Topics will include: extensions of the Black-Scholes model to alternative stochastic processes, risk management, models for credit risk and credit derivatives, American options, portfolio selection and derivatives pricing under transaction costs.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3228 - MATHEMATICS OF FINANCE 4
Minimum Credits: 3
Maximum Credits: 3
This course covers advanced topics in modern mathematical finance. Topics will include: advanced credit risk and interest rate models, stochastic control and stochastic optimization models for portfolio selection and option pricing, and numerical methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3230 - OPERS THRY IN FUNCTION SPACES
Minimum Credits: 3
Maximum Credits: 3
This course will cover various operators acting on spaces of analytic functions. Operators to be considered include the Hankel, Toeplitz and composition operators acting on the Hardy and Bergman spaces on the unit disc and unit ball.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3231 - OPERS THRY IN FUNCTN SPACES 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of 3230. The theory of Hankel and Toeplitz operators in both one and several variables will be developed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3240 - TOPICS IN HARMONIC ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
This is a topics course at the advanced graduate level. The subject matter will change each time the course is offered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3241 - ANALYSIS ON HEISENBERG GROUP 2
Minimum Credits: 3
Maximum Credits: 3
Continuation of MATH 3240.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3245 - ANALYSIS ON METRIC SPACES
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to analysis on metric spaces. Topics to be covered include doubling measures, Sobolev spaces, Harnack's inequality, and applications to PDEs, quasi-conformal mappings, differentiable structures and geometric embedding.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3260 - TOPICS IN FRACTAL GEOMETRY
Minimum Credits: 3
Maximum Credits: 3
Topics to be covered include Hausdorff measure, various definitions for dimensions of a set, techniques for calculating these dimensions, also the local structure projections, products and intersections of fractals will be discussed. Further topics include self-similar sets, self-similar measures, dynamical systems, Julia sets and random fractals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3261 - TOPICS IN FRACTAL GEOMETRY 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of MATH 3260. Some topics which will be covered include self-similar sets, self-similar measures, dynamical systems, Julia sets and random fractals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3270 - ITERATION BY RATIONAL MAPS
Minimum Credits: 3
Maximum Credits: 3
This is an introductory course on complex dynamics. In particular, the Fatou and Julia sets for a large number of examples will be worked out. The general properties of these two sets will be given and relations to the Mandelbrot set and fractals will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3271 - ITERATION OF RATIONAL MAPS 2
Minimum Credits: 3
Maximum Credits: 3
This is a continuation of MATH 3270. Topics will include application of quasi-conformal maps to polynomial maps, Hermann rings, quasi-conformal surgery, the local geometry of the Fatou and Julia sets and the study of the Mandelbrot set.
Academic Career: GRAD
MATH 3300 - MATHMTL MDLNG/DYNMS FINCL MKT
Minimum Credits: 3
Maximum Credits: 3
The course will survey recent ideas in mathematical modeling of the dynamics of financial markets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3301 - MATHMTCL MODELS BEHVRL FINANCE
Minimum Credits: 3
Maximum Credits: 3
This course will cover research ideas relating to mathematical modeling of price changes due to factors that are not limited to valuation. The methodology will involve mainly differential equations, and some "hybrid" methods in which the differential equations are combined with statistical methodology. The use of experimental data in modeling will also be discussed. Students will also make presentations on price theory and research papers. The main background is some familiarity with ordinary differential equations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3350 - COMPACT CONVEX SETS 1
Minimum Credits: 3
Maximum Credits: 3
This course develops the integral representation theorem of Choquet and Bishop-Deleeuw on compact convex subsets of a Hausdorff locally convex topological vector space. Applications of the theory to several fields such as function and C+ algebra are the surveyed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3360 - SEMINAR IN MODELING
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course which covers research of interest to the faculty and students.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3370 - MATHEMATICAL NEUROSCIENCE
Minimum Credits: 3
Maximum Credits: 3
Course covers computational and mathematical neuroscience. It will do modeling and analysis of complex dynamics of single neurons and large-scale networks.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3375 - CMPTL NEUROSCIENCE METHODS
Minimum Credits: 3
Maximum Credits: 3
This course offers an introduction to modeling methods in neuroscience. Topics range from modeling the firing patterns of single neurons to using computational methods to understand neural coding. Some systems level modeling is also done.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MATH 3380 - MATHEMATICAL BIOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course introduces a number of modeling methods for biological systems. We will examine a number of problems from cell biology, immunology, population biology, physiology and molecular genetics. The main tools will be techniques from ordinary and partial differential equations. Discrete and delay-differential equations will also be used however the background for these will not be assumed. We will take models from current and classic papers in the field.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3381 - PARAMETER ESTIM NONLINR MODELS
Minimum Credits: 3
Maximum Credits: 3
When creating mathematical models of real life processes, the typically most challenging step in model calibration and validation is the (approximate) solution of the so-called inverse problem that is, inferring model parameters and states from real-life observations. Focusing on the inverse problem for deterministic models described by ordinary differential equations, we will first discuss methods of parameter estimation that are based on non-linear programming techniques and efficiently exploit available derivative information, such as non-linear least squares. Core issues of practical relevance generic to any non-linear program, such as the existence of local minima, and the effects of the regularization will be discussed theoretically and explored practically. Limitations of these computationally efficient approaches when the model is large and the data is sparse (as is typical in biology, for example) will be discussed and illustrated, motivating the second part of this course. Here we will take a Bayesian approach to the inverse problem by finding a representation of the posterior distribution of model parameters and/or states conditional on the available observations using Markov chain Monte Carlo methods. We will cover the basic steps required to make this methodology work in practice, including the core issues of tuning and convergence diagnostics. Throughout the course, emphasis will be put on the practical application, including the implementation of simple instances of key algorithms and guided experimentation to learn to recognize and address typical modes of failure, as well as the interfacing to and application of standard software. Theoretical background will be covered in sufficient detail to enable understanding of the inner workings of the techniques, and thus their practical behaviour, and to enable the student to select appropriate methodology for the problem at hand.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3400 - SEMINAR IN FUNCTIONAL ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course which is designed to introduce students to the current active areas of research in this subject and to the specific research interests of the faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MATH 3405 - NONLINEAR FUNCTIONAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Course does calculus of nonlinear operators. Local analysis and bifurcation theory especially in the context on nonlinear differential equations will be covered. These will be applied to dynamical systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3406 - DIFFRNC CALC BANACH SPAC/APPLC
Minimum Credits: 3
Maximum Credits: 3
Topics include derivatives and Riemann integral in Banach spaces, Taylor formula, implicit functions, submersions, and global inevitability.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3410 - HILBERT SPACS OF ENTIRE FUNCNS
Minimum Credits: 3
Maximum Credits: 3
This course will cover Debranges theory. The functional Hilbert spaces will be introduced and the salient properties of reproducing kernels will be studied. Applications of this theory including a formal proof of the Riemann hypothesis will be covered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3411 - HILBERT SPACES ENTIRE FUNCTIONS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of MATH 3410. The material will consist of a more careful study of the work of L. Debranges in this area. An application will be the Riemann zeta function and the Riemann hypothesis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3415 - FOURIER ANALYSIS EUCLIDEAN SPACE
Minimum Credits: 3
Maximum Credits: 3
The course will present the basic theory of and recent developments in Fourier analysis. Some of the topics to be covered include maximal functions, BMO and Hardy spaces.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3416 - FOURIER ANALYSIS EUCLIDEAN SPACE 2
Course continues MATH 3415. It will do recent developments in maximal operators, singular integral and pseudo differential operators, weighted norm inequalities, hardy spaces and oscillatory integrals. Applications to several complex variables and PDE theory will be done.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3417 - FOURIER ANALYSIS 3
This is a continuation of MATH 3415 and MATH 3416. Research topics in Fourier analysis will be done.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3420 - INTRO TO OPERATOR ALGEBRAS
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to Banach algebras and C*- algebras. Some topics include bounded and unbounded operator Haar measure, and the double commutation theorem of von Neumann.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3421 - OPERATOR ALGEBRAS 2
Course is a continuation of MATH 3420. It aims to give the students the depth necessary to study applications of the theory of operator algebras to study such areas as quantum physics and non-commutative integration theory.

Academic Career: GRAD
MATH 3422 - OPERATOR THEORY
Minimum Credits: 3
Maximum Credits: 3
This course will introduce the basic properties of operators on Banach spaces and especially Hilbert spaces.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3430 - INTRODUCTION TO WAVELETS
Minimum Credits: 3
Maximum Credits: 3
Wavelet theory is a newly developed mathematical subject with many applications. This introduction will include such topics as Fourier analysis, wavelet transforms, orthogonal wavelets, scaling and time frequency analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3431 - INTRODUCTION TO WAVELETS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of MATH 3430. Topics include Fourier analysis, wavelet transform, scaling functions and orthogonal wavelets.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3432 - WAVELETS AND OPERATORS
Minimum Credits: 3
Maximum Credits: 3
This course continues MATH 3430 and MATH 3431. The topic covered is those aspects of wavelets corresponding to classical harmonic analysis, including Littlewood-Paley theory, $l^p$ spaces, $H^p$ spaces and BMO.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3433 - WAVELETS AND SIGNAL PROCESSING
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to wavelets and signal and image processing. Topics include filter banks, dilation equations, algorithms, compression and edge detection.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3434 - WAVELET & FRACTAL IMAG ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
An introduction to image processing with wavelets and fractals.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3435 - COMP WAVELETS FRACTAL IMAG ANAL
Minimum Credits: 3
Maximum Credits: 3
A study of the mathematical structures which facilitate the efficient computations of wavelet and fractal image analysis.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 3436 - FIXD POINS WAVELETS & FRACTALS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course will cover iterative image reconstruction using the wavelet transform, initiated by Mallat and Zhang.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 3437 - FRAMES, WAVELETS SIGNAL PROCNG

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is an introduction to the theory and application of Hilbert and Banach frames and wavelets, from the original work of Duffin and Schaeffer on frames of exponentials, through the work of Daubechies and Mallat on wavelet bases, biorthogonal systems and frames; and their application to signal and image processing ideas from electrical engineering. The recent interesting work of Grochenig, Casazza and others on Hilbert and Banach space frames --- which are generalized bases, where the assumption of linear independence is dropped --- will also be discussed. We will also discuss work of Grafakos and myself on a Gabor frame characterization of $L^p (\mathbb{R}^n)$, $1 \leq p < \infty$.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 3440 - FIXD POINT THRY BANANCH SPACES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
We will begin with an overview of basic fixed point theory in Banach spaces, from the Banach contraction mapping theorem and Schauder's theorem through to Kirk's theorem. The course will continue with topics in metric fixed point theory and its connections to Banach space geometry and topology. This will include recent work of Pei-kee Lin, who showed that there exists a non-reflexive Banach with the fixed point property for nonexpansive mappings; and Tomas Dominguez Benavides, who proved that every reflexive Banach space can be equivalently renormed to have the fixed point property for nonexpansive mappings. We will also discuss extensions of Lin's work to the function space $L^1$ by Maria Japon Pineda and Carlos Hernandez Linares. The course will further include some of my (joint) research in this area, and related research of other authors.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 3450 - THEORY OF DISTRIBUTIONS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Using the theory of topological vector scales the theory of distributions will be studied. Some of the applications of this theory to Fourier transforms and the Paley Wiener theory will be discussed.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 3451 - THEORY OF DISTRIBUTIONS 2

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is a continuation of 3450. Further topics in this theory will be developed and expanded upon.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

### MATH 3460 - HARMONIC ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3
The course will cover basic topics in harmonic analysis of euclidean spaces and it will include fourier series, maximal functions, interpolation, fourier transform, singular integrals and littlewood-paley theory. The students need to be familiar with measure theory and basic functional analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**MATH 3480 - SPLINE APPROXIMATION**
Minimum Credits: 3
Maximum Credits: 3
Spline approximation isPiecewise analytic approximation. Most cad-cam systems rely heavily on spline approximation. In this course topics to be covered include b-splines data fitting using splines and numerical integration and differentiation.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**MATH 3500 - TOPICS IN ALGEBRA**
Minimum Credits: 3
Maximum Credits: 3
Symmetric spaces are manifolds admitting symmetries of a certain nature. The theory was developed by Cartan at the beginning of the last century and it constitutes the proper framework for many questions in modern mathematics. The course will cover compact, noncompact, hermitian symmetric spaces, the Cartan classification, invariant differential operators, the Darboux and Poisson equations, the Plancherel inversion formula and the Paley-wiener theorem for the spherical transform.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**MATH 3510 - THE SYMMETRIC GROUP**
Minimum Credits: 3
Maximum Credits: 3
We will study algebraic and combinatorial aspects of the symmetric group on n symbols. Along the way we will develop representation theory of finite groups and give applications to random walk.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**MATH 3550 - LIE GROUPS AND LIE ALGEBRAS**
Minimum Credits: 3
Maximum Credits: 3
This course will cover the basic properties of lie groups and lie algebras. Also the basic classification of simple lie algebras and lie groups.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**MATH 3600 - TOPICS IN PURE MATH**
Minimum Credits: 3
Maximum Credits: 3
This course covers special topics in pure mathematics. The subject matter varies each semester. Topics may include the theory of modular forms, automorphic representations, Galois representations, class field theory, trace formula, special topics in algebraic geometry, the Langland's program, discrete and algorithmic geometry, motivic integration, and the formalization of pure mathematics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

**MATH 3650 - TOPICS IN SYMPLECTIC GEOMETRY**
Minimum Credits: 3
Maximum Credits: 3
This course will cover topics in symplectic geometry.

Academic Career: GRAD
MATH 3700 - SEMINAR IN TOPOLOGY
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course which is designed to introduce students to the current active areas of research in this subject and to the specific research interests of the faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MATH 3750 - GENERAL TOPOLOGY 2
Minimum Credits: 3
Maximum Credits: 3
This is a second course in general topology in which the fundamental questions and open problems in the area are discussed. In particular, generalized metri-spaces, covering theorems and mapping of spaces will be covered.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3760 - TOPICS IN TOPOLOGY
Minimum Credits: 3
Maximum Credits: 3
Topics will include topological algebra, especially non metric topological groups, and topological semi-groups.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3761 - TOPICS IN TOPOLOGY 2
Minimum Credits: 3
Maximum Credits: 3
The course will be concerned with topics of current research activity in analytic topology, especially in the areas of generalized metric spaces and topological algebra.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3800 - SEMINAR IN DIFFERNTL GEOMETRY
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course which is designed to introduce students to the current active areas of research in this subject and to the specific research interests of the faculty.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3810 - INTEGRABLE SYSTEMS & SOLUTIONS
Minimum Credits: 3
Maximum Credits: 3
Topics covered include a description of the basic integrable systems in dimensions one through five. The common features of these systems will be highlighted. Possible universal integrable systems will be discussed. Other topics include theory or lax pairs, symplectic theory, loop groups and quantum integrable systems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MATH 3900 - INTERNSHIP
Minimum Credits: 1
Maximum Credits: 9
Internship and/or employment experience under the supervision and oversight of a faculty member. This experience is to be an integral part of the student’s individual course of study.
Academic Career: GRAD
Course Component: Internship
Grade Component: Grad SN Basis

MATH 3902 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This is a course of directed study under a faculty member covering a topic of special interest which is not normally in the curricula.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MATH 3910 - SEMINAR IN SCIENTIFIC COMPUTNG
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course which is designed to introduce students to the current active areas of research in this subject and to the specific research interests of the faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MATH 3919 - ADVANCED ODE'S
Minimum Credits: 3
Maximum Credits: 3
This course will discuss advanced methods in the theory of ode including shooting methods, homotopy methods and unique ness theorems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3920 - NONLINER METH DIFFERNTL EQUATN
Minimum Credits: 3
Maximum Credits: 3
This course covers functional analytic methods in the theory of differential equations, including applications of the fixed point theorem and the implicit function theorem to existence results. It also presents an introduction to bifurcation theory and discusses numerical problems, schemes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3921 - PSEUDODIFFERENTIAL OPERATORS
Minimum Credits: 3
Maximum Credits: 3
Course will give an introduction to pseudo differential operators and their applications to partial differential equations and topology. Topics include hypo elliptic operators, elliptic complexes and the index theorem.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3922 - PSEUDODIFFERENTIAL OPERATORS 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of MATH 3921. The subject of pseudodifferential operators will be covered.
Academic Career: GRAD
MATH 3923 - TOPICS PARTIAL DIFFERNTL EQNS
Minimum Credits: 3
Maximum Credits: 3
This course will explore recent developments in the theory of partial differential equations centered on the notion of viscosity solution. After a review of Hamilton-Jacobi equations, we will discuss how they can be used as a substitute for convolution in non-linear problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3924 - MARKOV CHAIN THEORY
Minimum Credits: 3
Maximum Credits: 3
Markov chains have numerous applications in mathematics and scientific computing. Bounding convergence rates of Markov chains involves many beautiful ideas from linear algebra and probability theory. In this course we give a rigorous introduction to the applications and theory of Markov chains.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MATH 3925 - STOCHASTIC DIFFERNTL EQUATNS
Minimum Credits: 3
Maximum Credits: 3
This course will concern itself with Brownian motion and Stochastic calculus. In particular these concepts will be applied to partial differential equations and stochastic differential equations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3926 - TOPCS IN DFFRNCL EQUATIONS
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3930 - FIXED POINT THEORY
Minimum Credits: 3
Maximum Credits: 3
Topics include: Banach's fixed point theorem, Brouwer's fixed point theorem and various applications, topological degree theory in finite dimensions and constructive aspects by simplicial algorithms. Also a brief introduction to the Leray-Schauder degree in infinite dimension will be discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3931 - DEGREE THEORY & APPLICATION
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to topological degree and its applications in nonlinear problems from analysis, odes and PDEs. The main topics include Sard's theorem, Brouwer's degree, Brouwer's fixed point theorem, Borsuk's theorem and invariance of domain, Poincare maps and existence of periodic solutions of odes, nonlinear compact maps, Leray-Schauder's degree, Schauder's fixed point theorem, further existence results in odes. Applications to PDEs will be discussed briefly.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MATH 3935 - TOPICS IN APPLIED MATHEMATICS
Minimum Credits: 3
Maximum Credits: 3
After briefly introducing very elementary theory of asymptotic expansions, the course will focus on its applications. In particular, boundary layer expansion, interior inter facial layer expansion, as well as multi-scale expansion techniques will be quite detailed by examples of a number of up-to-date research problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3940 - APPLIED ANALYSIS 1
Minimum Credits: 3
Maximum Credits: 3
Methods will be developed to analyze the behavior of bumps and waves in integral models arising in neuroscience, and also in reaction-diffusion biological type models.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3941 - APPLIED ANALYSIS 2
Minimum Credits: 3
Maximum Credits: 3
This course covers advanced methods in the theory of ordinary differential equations. Topics include: shooting arguments in existence problems, energy arguments, reduction of invariant equations, a discussion of bifurcation theory and differential equations in the complex domain.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3945 - SEMINAR IN APPLIED ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
This is a seminar course in applied analysis. The topics to be covered will be research oriented toward the interests of the instructor and the seminar members.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MATH 3950 - NONLINEAR DYNMC CHAOS & OSCILL
Minimum Credits: 3
Maximum Credits: 3
This course gives a description of modern techniques for analyzing nonlinear differential equations. It covers topics such as chaos, nonlinear oscillations, bifurcation theory, phase locking and invariant manifold methods. Topics such as averaging, singular perturbation, and equations on tori are also discussed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3951 - PHYSICAL METHODS IN MATHEMTC
Minimum Credits: 3
Maximum Credits: 3
This course investigates the mathematical structure of various methods in physics. Topics include renormalization scaling and interfaces. Applications to differential and difference equations will be done.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MATH 3952 - PHYSICAL METHODS IN MATH 2
Minimum Credits: 3
Maximum Credits: 3
This is a continuation of MATH 3951. Some topics include renormalization theory and scaling.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3954 - TOPCS SCALING & RENORMLIZATION
Minimum Credits: 3
Maximum Credits: 3
Development and use of the tools of scaling and renormalization theory in differential equations and other applications.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3960 - MATH OF PHASE BOUNDARIES
Minimum Credits: 3
Maximum Credits: 3
This course will concentrate on developing the major models used in solidification theory. Thus the study of systems of differential equations will be a major theme of the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3965 - COMPUTATIONAL FLUID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
This course will deal with the theory and methodology of computational fluid mechanics. Topics include derivation of the fundamental equations governing compressible and incompressible flow, existence and uniqueness theory for the Navier stokes equation and various computer algorithms for solving such equations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3966 - MATHMTL TOPCS FLUID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to introduce the students to the mathematical theory of the Navier-Stokes initial-boundary value problem and to some of the solved and unsolved fundamental questions. In this course, after deriving the Navier-Stokes equations from the general continuum theory, we shall prove the main known results of existence, uniqueness and regularity of solutions to the corresponding initial-boundary value problem. Moreover, we shall present a number of significant open questions and explain why the current mathematical approaches fail to answer them.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3975 - HYDRODYNAMIC STABILITY
Minimum Credits: 3
Maximum Credits: 3
Global stability and uniqueness, Stuart-Landau theory, introduction to bifurcation theory, thermal instability, inertial instability, and stability of parallel shear flow.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Mechanical Engineering
ME 2001 - DIFFERENTIAL EQUATIONS
Minimum Credits: 3
Maximum Credits: 3
Ordinary differential equations; series solutions of differential equations; introduction to partial differential equations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2002 - LINEAR AND COMPLEX ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Linear algebra; vector analysis; complex variables; intro to calculus of variations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2003 - INTRO TO CONTINUUM MECHANICS
Minimum Credits: 3
Maximum Credits: 3
The fundamental concepts of continuum mechanics are necessary for studying the mechanical behavior of solids and fluids. Includes a review of vectors and tensors; stress; strain and deformation; general principles in the form of balance laws; constitutive equations and their restrictions; and specialization to the theories of linearized elasticity and fluid mechanics.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2004 - ELASTICITY
Minimum Credits: 3
Maximum Credits: 3
Fundamental concepts of stress and strain. Linear theory; boundary-value problems of elasticity, including plane stress, plane strain, torsion, and flexure. Elementary variational theory of elasticity.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2005 - STRUCTURE OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of crystallography; lattice geometry; Bravais lattices; crystal systems; stereographic projection; point and space groups; symmetry elements; tensor properties of crystals; physical properties; elasticity of crystals; introduction to diffraction by crystals; reciprocal lattice; Ewald construction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2007 - ELEMENTS OF MATRL SCI ENGR 1
Minimum Credits: 3
Maximum Credits: 3
This course is primarily designed for graduate students entering the program without a degree in a field of materials engineering. Bonding and structure of materials; thermodynamics and phase diagrams; imperfections in crystals; and rate processes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
ME 2009 - PROCESSING OF MATERIALS
Minimum Credits: 3
Maximum Credits: 3
This course is primarily designed for graduate students entering the program without a degree in a field of materials. Alloy design, strengthening mechanisms, mechanical properties; plastic deformation, mechanical properties and microstructure control; high temperature deformation, grain size control during reheating and during deformation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2010 - NANOMECHANICS
Minimum Credits: 3
Maximum Credits: 3
This course is an introduction for current nanotechnology and fundamentals for Nano engineering. It mainly contains three areas: Nano mechanics, nanomaterials and nanoscale devices. In Nano mechanics, it covers Nano indentation mechanics, thin film mechanics and one dimensional nanowire mechanics, Nano crack mechanics, deformation in nanomaterials. Nano mechanical model will be emphasized. In nanomaterials, it covers carbon nanotube, one dimensional semiconducting nanowires & Nano multilayers as well as nanostructured composites. Novel property/phenomena reviewed.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2015 - HUMAN ROBOTICS AND CONTROL
Minimum Credits: 3
Maximum Credits: 3
This course is intended for graduate students interested in human movement control. The engineering framework from robotics controls, and filtering will be widely employed to model human movement and its control. These concepts will be merged with neurophysiology and computational neuroscience to understand adaptability in human motor control and its applications to neuro-rehabilitation. The course will introduce dynamic modeling of human limbs, internal models for movement control, sensorimotor integration using optimal filtering, neurophysiology of locomotion, and motor skill learning in able-bodied persons and persons with mobility disorders the course will be helpful for students who want to pursue a career in robotics and control for neuro-rehabilitation. The course will also be valuable to students who are curious about robotics, control, and estimation theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2020 - MECHANICAL VIBRATIONS
Minimum Credits: 3
Maximum Credits: 3
Analysis of linear and non-linear multi-degree of freedom systems. Lagrangian formulation, model analysis, lumped parameter analysis of discrete systems, and continuous system vibrations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2022 - APPLIED SOLID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Stress and strain transformations; applied elasticity problems in torsion and plane problems; thermal stresses and elementary plasticity; energy methods; fundamentals of finite element methods.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering
ME 2027 - ADVANCED DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
Variational principles, Lagrangian and Hamiltonian formalisms, kinematics and dynamics of rigid bodies, first integrals, Routh's method, stability, canonical transformations, the Hamiltonian-Jacobi theory.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2028 - COMPUTATIONAL MULTIBODY DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
The course presents computational methods for problems in kinematics, mass distributions, generalized forces, energy functions, equations of motion and the integration of the equations of motion and simulation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2033 - FRAC MECH FOR PRODC DSGN/MFG
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2036 - INTRO MECHANIC STRENGTH FRACTR
Minimum Credits: 3
Maximum Credits: 3
Basic mechanisms of failure and fracture of materials, theory of linear elastic fracture mechanics; design and fracture control problems are discussed; theory of the nonlinear regime and non-linear behavior; experimental observations of fracture surfaces.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2040 - EXPERIMENTATION
Minimum Credits: 3
Maximum Credits: 3
Study of the process of planning and conducting engineering experiments. Development of hypotheses of physical phenomena, detailed experimental development and plan, advanced instrumentation, uncertainty analysis, and methods of evaluating experimental results.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2041 - EXPERIMENTAL MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Stress determination from strain measurements, strain measuring device and system; variable resistance strain gages with emphasis on circuits, calibration, compensation, static, and dynamic application; stress analysis in bio and mems system. Force measurement in the micro- and Nano Newton level in bio and micro-system by optical and piezo electric techniques.
Academic Career: GRAD
Course Component: Lecture
ME 2042 - MSRMT & ANAL VIBRO-ACUSTC SYMS
Minimum Credits: 3
Maximum Credits: 3
This course will present measurement and analysis techniques for dynamic systems, with particular emphasis on mechanical vibrations and acoustics. Background on vibration of lumped and continuous parameter systems, acoustics, and noise and vibration control will be given. Other concepts include FFTs, windowing, input/output relationship calculations, test methods, transducers, instrumentation, and the use of dynamic signal analyzers. Application to system identification and modal analysis will be included, as well as hardware demonstrations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2044 - FUNDAMENTALS OF TRIBOLOGY
Minimum Credits: 3
Maximum Credits: 3
Fundamentals of friction theory and models; advanced topics in lubrication, mechanism in wear, micro-scale analysis of surface interaction.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2045 - LINEAR CONTROL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course builds upon the foundation laid in a classical feedback control course. The tools will be developed for analyzing and designing controllers for multi-input, multi-output dynamic systems. Ideas of controllability and observability will be discussed, as well as modern control design techniques such as pole-placement.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2046 - DIGITAL CONTROL SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
This course provides the student with the tools necessary to analyze and design discrete-time (digital computer) control systems for real-time control of dynamic systems. It builds upon the background of classical control topics including Nyquist, bode, and root locus, and transform ideas will be used extensively for design and analysis to give the student an understanding of how discrete-time and classical control systems are related. State-space representations will be used for Mimo systems, so a prior understanding of modern control ideas is important.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2047 - FINITE ELEMENT ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Development of elements from variational principles and application to static continuum problems. Introduction to techniques for dynamics, stability, and generalized field problems.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2048 - ENGR ALLOYS FOR CONSTRUCTION
The goal of this course is to understand modern metallic alloys used in construction. To accomplish this goal, the following sequence is offered: review of physical metallurgy principles: thermodynamics, kinetics, phase diagrams and phase transformations; microstructure and properties of stainless steels, aluminum alloys, titanium alloys, nickel and cobalt-based super alloys and alloys for nuclear core applications.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering (PENGR)

**ME 2049 - THERM MGT IN ELECTRONIC SYS**
Minimum Credits: 3
Maximum Credits: 3
This course reviews the prevalent thermal management techniques commonly employed to mitigate overheating of electronic systems. The primary goal of this course is to gain fundamental understanding of the following topics: thermal spreading, contact resistance, free and forced convection, radiation, fins and heat sinks, phase change materials, boiling/condensation/immersion cooling, jet impingement, heat pipes, and microchannels. The secondary goal is to acquire the ability to apply this knowledge to real applications including computing and communication systems as well as military and medical electronic systems.
Academic Career: GRAD

**ME 2053 - HEAT AND MASS TRANSFER**
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2055 - COMPUTR ANAL TRANSPRT PHENOMNA**
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to implementation of some of the numerical/computational methods for solving problems in transport phenomena. Fields described by linear and non-linear ordinary differential equations (initial and boundary value problems), and partial differential equations (elliptic, parabolic and hyperbolic) will be considered by means of various examples from fluid dynamics, heat and mass transfer, and combustion. Numerical discretization techniques based on finite difference methods (FDM) will be the subject of main discussions.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**ME 2056 - INTRO TO COMBUSTION THEORY**
Minimum Credits: 3
Maximum Credits: 3
Covers the general solution techniques associated with combustion phenomena as well as chemical thermodynamics, heat and mass transfer, laminar
flame theory, one dimensional reactive flow, heterogeneous combustion, and turbulent combustion.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2060 - NUMERICAL METHODS**

Minimum Credits: 3  
Maximum Credits: 3

Introduction to numerical techniques for the solution of linear and non-linear equations, numerical integration and differentiation, interpolation, ordinary and partial differential equations, and eigenvalue problems.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2062 - ORTHOPAEDIC ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3

This is an advanced course that applies mechanics of materials, material failure theories and rigid body dynamics to orthopedic device design, tissue mechanical modeling and surgical procedure evaluation. The course is meant to provide an introductory background to engineering aspects of orthopedic medicine and biomechanics for students preparing for medical school, positions in the medical device industry or graduate studies in this field.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**ME 2064 - INTRO TO CELL MECHANOBIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3

The objective of this course is to provide an overview & a basic understanding of cell mechanobiology. The materials that will be covered in this introductory course include; 1) stress, strain & deformation: uniaxial and biaxial loading, hydrostatic pressure; 2) fluid shear stress; 3) cell structure and function; 4) basic cell & molecular techniques; 5) effects of mechanical forces on cells; 6) mechanotransduction; and 7) applications of cell mechanobiology to tissue engineering. This course will be of interest to students in BIOENG, biomechanics, biophysics, & cell & molecular bio.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2067 - MUSCULOSKELETAL BIOMECHANICS**

Minimum Credits: 3  
Maximum Credits: 3

Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2069 - MATRLS SCI OF NANOSTRUCTURES**

Minimum Credits: 3  
Maximum Credits: 3

A graduate level course that reviews the theories and phenomena associated with solid structures that lie in the Nano- or Meso- scale regime from 1 to 1000 nm. Engineered structures of these dimensions have unique properties due to their size including surface and interface dominated energy considerations governing shape and phase formation, optical interactions due to confinement effects, unique electronic/ quantum effects due to confinement. The course will survey issues associated with creation, analysis and theoretical modeling of these structures with a kinetics-
thermodynamics perspective.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2070 - MICROFLUIDICS**

Minimum Credits: 3
Maxmum Credits: 3

The basic hypotheses in the macro-scale fluid mechanics may no longer be applicable in micro or even smaller scale. The objectives of this course are: to identify dominant forces and their effects in micro-scale fluid systems that are different from those in the macro-scale; to understand the fundamentals of micro fluidic phenomena; to discuss various micro fluidic applications in research and commercial levels and to explore new possible microfluidic applications in the emerging fields.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2074 - ADVANCED FLUID MECHANICS 1**

Minimum Credits: 3
Maxmum Credits: 3

Kinematics of fluids, Eulerian and Lagrangian descriptions, continuity, stream and potential functions, stress and rate of strain relation, derivations of Navier stokes and energy equations, some exact solutions, boundary layer theory, turbulent flows.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2075 - ADVANCED FLUID MECHANICS 2**

Minimum Credits: 3
Maxmum Credits: 3

Vortex kinematics, vortex line, line vortex, vortex tube biot-savart's law, vortex dynamics, derivation of vorticity equation, generalized circulation theorem, irrational flows of inviscid fluid in a plane, Bernoulli's equations, complex potential and method of superposition, conformal transformation, image theorems, irrational inviscid flow in axisymmetric cases, compressible fluid flows, steady id and isentropic flow, steady id flow with friction and heat transfer, normal shock, steady 3d adiabatic flow of inviscid fluid, small perturbation techniques.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2080 - INTRO MICROELCTRMECHL SYS**

Minimum Credits: 3
Maxmum Credits: 3

This course is aimed to provide basic understanding of microfabrication processes, fundamentals of micro-electro mechanical systems (mems) technologies. The first part of the course emphasizes thin film deposition, photolithography and etching. The 2nd part deals with micromachining processes including micromachining processes, LIGA, RIE/deep RIE, and other processes commonly used in mems fabrication. The 3rd part covers the physical mechanisms of mems devices. The final part of the course gives some commercial application examples of mems technologies.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

**ME 2082 - ELCTRMECHL SENSORS & ACTUATORS**

Minimum Credits: 3
Maxmum Credits: 3

The objective of this course is to provide a thorough understanding of the various mechanisms that can be exploited in the design of electromechanical sensors and actuators. These transduction mechanisms include: 1) transduction based on changes; in the energy stored in the electric field, 2) in the energy stored in the magnetic field, 3) piezoelectricity and pyro electricity, 4) linear inductive transduction mechanisms, and 5) resistive transduction mechanisms. Will discuss various transduction materials, sensors and actuators from a wide range of applications.
ME 2084 - INTRO TO POLYMER SCIENCE
Minimum Credits: 3
Maximum Credits: 3

ME 2085 - GRADUATE SEMINAR
Minimum Credits: 0
Maximum Credits: 0
Designed to acquaint graduate students with various subjects in advanced mechanics and graduate-level current research in mechanical engineering; aspects of graduate-level engineering and applied mechanics not normally encountered in classes.

ME 2086 - MECHC 3D PRNT MATLS &STRUCT
Minimum Credits: 3
Maximum Credits: 3
This course covers the mechanics of materials and structures fabricated by 3D printing. Topics to be covered include various 3D printing processes and materials, effects of process parameters and printing direction on mechanical behavior, microstructure-mechanical property relationships, constitutive models, etc. The difference between 3D printing and traditional materials will be highlighted.

ME 2089 - RAPID PROTOTYPING ADDITIVE MFG
Minimum Credits: 3
Maximum Credits: 3
In this course we will analyze the seven primary types of additive manufacturing, their materials, and machines, highlighting their benefits and limitations. Examples of industrial applications will be given along with ongoing research trends and future directions. Labs will focus on design for additive manufacturing, data capture and input, machine setup, and post processing. Field trips will include observation of machine building and part production at some local industries.

ME 2090 - M. S. EVALUATION
Minimum Credits: 1
Maximum Credits: 1
Comprehensive examination for non-thesis programs.

2530
ME 2094 - PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization (industry or government laboratory). The internship must be related to the thesis or dissertation research.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad HSU Basis

ME 2095 - GRADUATE PROJECTS
Minimum Credits: 1
Maximum Credits: 15
A special problems or reading course of individual study guided by the student's major adviser. Topics selected from any phase of mechanical engineering not covered in the regular M.S. - Level course. This course serves as comprehensive examination for non-thesis programs.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ME 2096 - MS/MBA INTEGRATED PROJECTS
Minimum Credits: 2
Maximum Credits: 2
This is the integrated projects course for MS/MBA majors. The project will be jointly overseen by KATZ and SSOE. A 1-2 page proposal is due at the beginning of the term, followed by a final report. The project should blend the student's business and engineering skills. Prerequisites: approval of advisor and graduate director.
Academic Career: GRAD
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2097 - SPECIAL STUDY MECHANICAL ENGRG
Minimum Credits: 3
Maximum Credits: 3
Special topics of particular importance to an individual's plan of study.
Academic Career: GRAD

ME 2100 - FUNDAMENTALS NUCLEAR ENGR
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2101 - NUCLEAR CORE DYNAMICS
Minimum Credits: 3
Maximum Credits: 3
This course reviews the mathematics of nuclear reactor kinetics. Linear systems of ordinary differential equations are solved by state vector techniques, laplace transform techniques, or finite difference techniques including the treatment of discretization errors resulting from various finite
differencing approximations. A review of the physics of nuclear kinetics is followed by treatments of the kinetics equations including the effect of uncertainties, approximate solutions, and the interpretation of experiments to measure kinetics parameters. Representations and the physical basis of reactivity feedback mechanisms are treated. Lumped and distributed parameter models of fuel, coolant, fission products are derived and applied to develop quantitative static relationships and qualitative dynamic results for transient conditions. The course provides an introduction to space dependent reactor kinetics.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Swanson School of Engineering

**ME 2102 - NUCLEAR PLANT DYNAMICS & CTRL**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course provides an integrated engineering examination of a nuclear power plant from the perspective of instrumentation and control systems used to infer the condition of the nuclear plants and its systems, control its normal operation, and provide protection during transient situations as well as assess core damage during severe accident situations. Students will apply previous knowledge of analog, digital, and microprocessor electronics techniques to nuclear power plant design and operation and reactor protection and safety considerations that influence the design of the reactor plant. A major outcome of this course will be an integrated understanding of the interaction between the physics of nuclear plant control (reactivity and heat balance) and the control and protection systems. This integrated plant understanding will be essential for the successful completion of the integrated nuclear power plant operations course.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Swanson School of Engineering

**ME 2103 - INTGRTN OF NUCLR PLANT SYMS**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course examines design bases for major systems and components in a nuclear plant and evaluates how the systems function in an integrated fashion. The student will examine a typical nuclear power plant and those components and systems of the nuclear plant complex that have the potential for affecting core power, and whose failure could be an initiating event for a plant transient. Dynamic relationships for the systems developed in the companion nuclear courses will be transformed into stable, numerical algorithms for computer solutions and system interactions will be illustrated using a major industry transient analysis code. Emphasis is on how operations of and faults in systems and components can influence reactivity and core behavior. Through classroom discussions the students will assess engineering problems and operational problems that have been experienced in historical nuclear plant operations. The intended outcome is an aptitude for predicting complex transient behavior of the integrated nuclear plant considering factors that are important for safe and efficient operation: reactivity management and control, coolant inventory control, and core heat removal.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Swanson School of Engineering

**ME 2104 - NUCLEAR OPERATIONS AND SAFETY**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course reviews the development of reactor safety concepts, the emergence of safety strategies and culture, and the perspectives of severe accidents and how they can be mitigated. Risk-influenced regulatory practices will be introduced and quantitative use of probabilistic risk assessment will be described in terms of its use as a guide to intelligent decision-making. The characteristics of accident progression in the reactor vessel and containment in the unlikely event of core melting and relocation of fuel material will be explained. Offsite impacts of such severe accidents will be introduced. Source terms, dispersion of radionuclides, and dose projections will be developed for both conservative and realistic evolutions. Protective actions and emergency preparedness will be introduced. This course will cover the regulatory aspects of nuclear operations and the roles that the NRC, INPO, WANO and the IAEA play and what impact each has on plant operations. An introduction into regulatory requirements, the safety analysis report, nuclear safety and licensing, and whistle-blower rules will be provided.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Swanson School of Engineering

**ME 2105 - INTGD NUCLR POWER PLANT OPRTN**
Minimum Credits: 3
Maximum Credits: 3
This course promotes understanding of how the integrated nuclear plant works and what challenges the operator faces, and helps an engineer 'speak operations' with interfacing groups. Use of the replica simulator is an effective way for students to understand accident control, emergency operating procedures, and how the control room interfaces with the rest of the plant. Emphasis is placed on understanding plant characteristics and controls, rather than on developing control manipulation skills. Intended outcomes are an aptitude for predicting transient behavior of the integrated plant and a command of reactivity management and control that is important for efficient operation of a nuclear plant complex. The course presumes knowledge of the major systems in a nuclear power plant and will emphasize how operations of and faults in those systems and components can affect reactivity and core transient behavior.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2106 - NUCLEAR QUALITY ASSURANCE MGMT
Minimum Credits: 3
Maximum Credits: 3
An introduction to the basic concepts of nuclear quality assurance through a series of case studies of the 18 criteria of NQA-1, 10CFR50 appendix B and other applicable standards that govern work in the construction, service and the supply of safety related items to support the nuclear industry. There will be a concentration of pragmatic examples of what to expect as engineers in support of nuclear power plants. These lectures will highlight such topics as the following: small modular reactors, new passive system designed in the new generations of nuclear power plants, relationships with the NRC, authorized nuclear inspectors, and the nation board, what to expect with respect to acquiring patents and your registered professional engineer qualifications, what is critical to know about non-destructive examinations, software control and validation and verification requirements, an introduction to auditing, welding and other special processes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2107 - HI PERF CMPTNG ALGRTHM & MTHS
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to solve complex physical problems using algorithms developed for supercomputing platforms. The course will introduce key concepts in the field of high performance computing, including how to design algorithms. The theoretical concepts will be tied directly to practical applications in the field of science and engineering such as radiation transport, heat transfer, and acoustics. Particular attention will be devoted to hardware selection for supercomputing applications, and will cover the concept and utilization of "open source" libraries, a key component for rapid algorithm development in today's scientific environment.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2110 - NUCLEAR MATERIALS
Minimum Credits: 3
Maximum Credits: 3
This course presumes that students have the knowledge base needed to understand materials issues associated with the design and operation of nuclear power plants, such as basic concepts of physical metallurgy, a mechanistic and microstructural-based view of material properties, and basic metallurgical principles. This course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well the effects of irradiation on corrosion performance, as well as the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2112 - NUCLR CHEM AND RADIOCHEMISTRY
Nuclear and radiochemistry are subdisciplines of nuclear science that focus on the study of radioactive materials and their applications. The course will provide students with knowledge of fundamental nuclear science concepts that are key to the understanding of nuclear power plant safety, spent fuel and nuclear waste management, nuclear fuel reprocessing, environmental radioactivity, nuclear forensics, radionuclide production, medical imaging, nuclear pharmacy, and medical and health physics. The proposed course will consist of lectures on nuclear science fundamentals that include: atomic structure, nuclear models and properties, phenomenon of radioactive growth and decay, radiation emissions, nuclear reactions, radiation interactions with matter, radiation detection and measurement, radiation dosimetry and biological effects, and applications of nuclear and radiochemistry in science, engineering, and medicine.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2113 - RADIATION DETECTION & MSRMT
Minimum Credits: 3
Maximum Credits: 3
This combined lecture and laboratory course will provide students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical basis of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.

ME 2115 - HEAT TRNSF FLUD FLOW NUCLRPLNT
Minimum Credits: 3
Maximum Credits: 3
This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole. Principles are applied through the application of major industry codes to specific cases.

Academic Career: GRAD

ME 2116 - BOILG WATR REACTR THERM-HYRDL
Minimum Credits: 3
Maximum Credits: 3
BWR thermal-hydraulics and safety is a course that focuses on the boiling water reactor (BWR), design, operation, transient response, and abnormal operating conditions and accidents; boiling water heat transfer and two-phase flow; applications with respect to the fukishima dai-ichi BWRs. The course will cover the evolution of BWR systems including BWR features and characteristics and containment configurations. Basic thermal-hydraulics (T/H), boiling heat transfer and two-phase flow in BWR systems, T/H performance and thermal limits, BWR abnormal operating conditions and accidents including accident evaluations and overview of the state-of-the-art safety analysis techniques will be the focus of this course.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2118 - COMPUTATIONAL RADIATN TRANSPRT
Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth review of modern computational techniques used for solving the linear boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern
radiation transport through materials, monte carlo methods for the simulation of radiation transport, a first-principles derivation of the boltzmann radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also places a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

Academic Career: GRAD

Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2120 - MATHMTL MODELING NUCLR PLANTS
Minimum Credits: 3
Maximum Credits: 3
Graduate students will develop the graphics/simulation framework and the underlying mathematical models for simulating nuclear power plants in ME/ENGR 2120 mathematical modeling of nuclear plants. Models will be developed in Matlab/Simulink(tm) and configured to run on a PC so that students can both examine the mathematical models on which the simulation is based and use the simulation program in laboratory-like sessions to study the effect of design changes on plant behavior. The simulation model fidelity developed is suitable for educational purposes and provides students with a desktop tool to realistically model and better understand reactor performance under various conditions. While it would not be intended to replace or duplicate the high-fidelity dynamic simulation used in major accident analysis codes such as Relap, Trac, and Trace, the course will provide the student with an introduction and a working knowledge what is embodied in these industry standard codes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ME 2125 - CASE STDS NUCLR CODE STANDRDS
Minimum Credits: 3
Maximum Credits: 3
Presentation of major issues associated with systems and component engineering relative to the nuclear power industry and the industry's consensus codes and standards. The course provides an explanation of the necessity of consensus codes and standards, a high-level view of codes and standards organizations, and shows how codes and standards promotes the safe operation of nuclear power plants. The course discusses how the NRC adopts and makes use of consensus codes and standards. It covers codes and standards for current, advanced and next generation, and high-temperature reactors, including global conformity assessment requirements. Relevant codes and standards from other communities, including nuclear quality assurance, are also summarized.

ME 2130 - NUCLEAR FUEL CYCL ENVRN ISSUES
Minimum Credits: 3
Maximum Credits: 3
This course will be developed in conjunction with university of Pittsburgh faculty with an interest in environmental issues impacting the nuclear power industry including school of engineering faculty involved with the Mascaro sustainability initiative, faculty from the department of civil and environmental engineering and faculty from the graduate school of public and international affairs. The course will address such topics as sustainable energy resources, engineering and societal ethical concerns, risk analysis, and future energy supplies in general and as each of these topics relates to such specific issues as the nuclear fuel cycle, nuclear reactor safety, nuclear waste disposal and transportation, and gen iv and the hydrogen economy. Students will better understand the socio-economic issues surrounding achieving a sustainable nuclear power future as it impacts fuel acquisition, plant operation and waste disposal.

ME 2222 - NANSCAL MODLG SIMUL MOL DYNAMC
Minimum Credits: 3
Maximum Credits: 3
The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics, continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods, accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2223 - NANOSCALE MODELING AND SIMULS
Minimum Credits: 3
Maximum Credits: 3
This course teaches the essentials of nanoscale modeling and simulations, which concerns the use of modern computational tools to the analysis of materials at the nanoscale. The current emphasis of this course is on first-principle density functional theory (DFT) calculation method. The course covers topics on basic quantum mechanics, fundamentals of DFT, statistical mechanics, thermodynamics, and continuum mechanics, and their role in atomistic scale modeling and simulation. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a nanomaterial system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Grade Component: Grad Letter Grade

ME 2247 - INTRO TO NONLINEAR CTRL DESGN
Minimum Credits: 3
Maximum Credits: 3
This course is devoted to lyapunov-based control design for nonlinear dynamical systems. Mainly, this course is developed as an introduction to nonlinear control. In the beginning, the course will emphasize the drawbacks of linearization and richness of nonlinear phenomena compared to linear dynamics. A brief introduction to study qualitative behavior of linear and nonlinear systems using phase portraits will also be provided. These topics will be used as motivations for this course where main topics include: Lyapunov stability analysis for autonomous and nonautonomous systems, input-output stability, Barbalat's lemma, feedback linearization, and nonlinear control design tools such as lyapunov redesign, sliding mode control, integrator backstepping, and other robust and adaptive control methods. If time allows, we will cover nonlinear control design methods for dynamical systems with delays. The content will be mathematical supplemented with application examples taken from robotics and human musculoskeletal system. Prerequisites for the course include an understanding of undergraduate calculus, linear algebra, and linear control methods (ME 2045). Students are also expected to be able to use some simulation software (e.g. Matlab).

**ME 3005 - VISCOELASTICITY**

Minimum Credits: 3  
Maximum Credits: 3  
Methods of specifying viscoelastic properties of materials. Formulation and some basic solutions in viscoelastic stress analysis. Experimental methods, vibration and wave propagation; thermos-viscoelasticity and general theorems.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

---

**ME 3006 - INELASTICITY**

Minimum Credits: 3  
Maximum Credits: 3  
The course is meant for senior graduate students. It deals with the inelastic behavior of metals and will consider finite deformations of elastic-plastic solids. Stress and strain space formulation of rate independent plasticity will be studied in detail. An introduction to crystal plasticity will also be provided. Finally, several advanced topics in metal plasticity such as Drucker's postulate, the consequences of the work - inequality will be discussed.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad LG/SU3 Basis

**Course Requirements:** PROG: Swanson School of Engineering

---

**ME 3007 - ENERGETICS**
The objectives of this course are to understand and apply the theory of thermodynamics and transport properties, to distinguish the thermodynamics of properties from the thermodynamics of systems, to acquire the capacity to calculate properties from a minimal set of experimental data, and to gain the ability to estimate properties based on chemical behavior. Topics include derivation of the Gibbs equations and Maxwell relations, advanced equations of state, molecular structure and fugacity, mixing rules, and vapor-liquid equilibrium calculations.

Course Requirements: PROG: Swanson School of Engineering

ME 3008 - FINITE ELASTICITY OF SOFT TISSUE
Minimum Credits: 3
Maximum Credits: 3
This team-taught course is designed as the second course in graduate biomechanics that applies and builds on the concepts of finite elasticity to study the constitutive response of various soft tissues. Course topics will include kinematics of large deformation, concepts of stress, thermodynamic principles, and development of constitutive relationships for hyperelastic materials. Isotropy, transverse isotropy, incompressibility, viscoelasticity as well as isotropic damage will be discussed. Specific application areas will include the mechanics of three general types of primary load-bearing soft tissues: vascular, orthopedic, and reproductive.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

ME 3011 - FINITE ELASTICITY
Minimum Credits: 3
Maximum Credits: 3
Deformation and stress; constitutive theory; universal solutions, exact solutions for finite elasticity; elastic waves.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 3016 - SPEC TOPICS IN MECHNCL ENGRG
Minimum Credits: 3
Maximum Credits: 3
Differential equations of plates and boundary conditions; Navier's and levy's series solution; circular plates and continuous plates; orthotropic plates; large deformation of plates; numerical and approximate methods in plates; theory of thin shells and curved plates.

ME 3023 - COMPOSITES
Minimum Credits: 3
Maximum Credits: 3

Academic Career: GRAD
Course Component: Lecture
ME 3024 - ADVANCES IN NANOCOMPOSITES
Minimum Credits: 3
Maximum Credits: 3
The intent of this course is to address the theory and applications of bio-inspired and nuclear materials at Nano scales. The course will provide an overview of nanomaterials, with specific applications to bio-inspired intelligent structures and nuclear materials and the relations to energy and fission reactor concepts under extreme temperature and radiation conditions; background on the types of composite materials used in nuclear reactors and their response to neutron irradiation will be presented, case studies in mechanochemical functions, chemical modification of nanocomposites, emerging applications for bio-inspired and nuclear-composite materials will also be presented.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 3036 - ADVANCED FRACTURE MECHANICS
Minimum Credits: 3
Maximum Credits: 3
Describing quantitatively the mechanical state of a deformable body containing a crack, with a view toward predicting fracture initiation and crack propagation. Linear elastic fracture mechanics; elastic-plastic fracture mechanics; micro-mechanics of fracture; interfacial fracture mechanics/mixed-mode fracture.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 3047 - ADVANCED FINITE ELEMENT ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Theory and analysis of integration methods for transient finite element problems; finite elements for the modeling of plates and shells; variational principles; plastic analysis.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 3052 - CONDUCTION HEAT TRANSFER
Minimum Credits: 3
Maximum Credits: 3
Study of the diffusion of heat in continuous media by analytical and numerical methods. Analytical methods include series solution, superposition, Duhamel's theorem, and Laplace transforms. Numerical methods include finite differences, finite elements, and response factors.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 3054 - CONVECTION HEAT TRANSFER
Minimum Credits: 3
Maximum Credits: 3
Derivation of general governing equations using tensor notations; heat transfer in laminar and turbulent flows; incompressible and compressible thermal boundary layers; advanced solution methods for convective heat transfer.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 3055 - MULTIPHASE FLOW
Minimum Credits: 3
Maximum Credits: 3
Study of the fluid mechanics and heat transfer processes in multiphase system; steady-state and transient models, boiling regimes, and a variety of correlation relations for void, critical phenomena, and flow regimes.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 3066 - MATHMTL TOPCS FLUID MECHANICS
Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to introduce the students to the mathematical theory of the Navier-Stokes equations from the general continuum theory, we shall prove the main known results of existence, uniqueness and regularity of solutions to the corresponding initial-boundary value problem. Moreover, we shall present a number of significant open questions and explain why the current mathematical approaches fail to answer them.

Academic Career: GRAD
Course Component: Lecture

Medical Education

MEDEDU 2005 - COMPUTER METHODS CLIN RESEARCH
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to provide a concentrated introduction in the use of computers in the analysis of data from patient-oriented research. Specifically, participants will learn: principles of database design, methods for data manipulation, transformation, merging and subletting descriptive statistics and exploratory data analysis, and graphical display of data.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2010 - CLINICAL RESEARCH METHODS
Minimum Credits: 3
Maximum Credits: 3
Clinical research methods provides an overview of the basic research strategies, methods, and goals of clinical research. Topics include study design, data analysis and interpretation, and determination of appropriate methodologies to answer different research questions. Bias and confounding in observational research, the clinical value of diagnostic tests, appropriate use of cross-sectional, case control and cohort study designs, and various statistical modeling used in clinical research will be presented.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2020 - BIOSTATISTICS
Minimum Credits: 4
Maximum Credits: 4
This course focuses on basic concepts and statistical methods and their application to problems in the health and biomedical sciences. Topics include data description and summarization, basic probability theory, estimation, and hypothesis testing with emphasis on one- and two-sample comparisons involving continuous and categorical data. Linear regression and analysis of variance will be introduced. Students will develop their analytic skills through the analysis and discussion of large clinical studies.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: CLRES 2005; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2040 - MEASURMNT IN CLINCAL RESEARCH
Minimum Credits: 1
Maximum Credits: 1
This course focuses on the general properties of good measurement integral to the research process. The domain sampling model is presented as the major theory of measurement error with the parallel test model presented as a special case of domain sampling model. The construct, criterion and content validity of psychosocial instruments are explored and methods for evaluating each of these relative to specific instruments are presented. A variety of scaling methodologies will be discussed as well as the principles involved in the design and formatting of questionnaires.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2045 - SURVEY DESIGN & DATA ANALYSIS
Minimum Credits: 1
Maximum Credits: 1
Survey design and data analysis will provide information on the skills and resources needed to design and conduct survey and techniques of analyzing survey data. The skills include identifying and developing specific survey objectives, designing survey studies, sampling respondents, developing reliable and valid self-administered questionnaires, and administering surveys. The techniques of analyzing survey data include both classic methods such as factor analysis and advanced methods such as item response theory. A majority of lectures will focus on survey research, constructing surveys, response set, survey administration methods, questionnaire construction and programming surveys, sampling and power calculation, maximizing response rates, data coding and entry, reliability and validity, survey data analysis, factor analysis and item response theory. The students will be introduced to the internet based survey and the computerized adaptive testing to broaden their scope of the current survey design and collection. I will use manuscripts of survey data and protocols of completed studies to facilitate learning of concepts discussed in class.
Academic Career: GRAD
Course Component: Lecture

MEDEDU 2170 - MAKING THE MOST OF MENTORING
Minimum Credits: 1
Maximum Credits: 1
We strongly believe that effective mentoring is the cornerstone of a successful academic career; whether it be in education, research, or clinical work. Good mentors are able to guide mentees as they attempt to navigate through the course of their careers. This course is designed to provide a basis for understanding the mentor-mentee relationship and provide strategies for making the most out of the experience, topics will include: communication and negotiation, the use of mentoring contracts, providing and accepting feedback, evaluating the mentoring relationship, and solving problems and meeting challenges. Fellows, post-docs, other ICRE trainees as well as junior faculty will discover useful ways to enhance the mentoring relationship and make it a rewarding experience for both mentees and mentors.

**MEDEDU 2210 - TEACHING THE TEACHERS**  
**Minimum Credits:** 1  
**Maximum Credits:** 1
This course is aimed at enhancing the clinician educators' skills in creating and carrying out faculty development programs for a variety of learners and learner's needs. We will review the wide range of areas in which faculty development plays a role, methods for assessing the learning needs of specific groups of teachers and learners, methods that have been used in specific faculty development programs and ways to assess the short and long-term outcomes of faculty development efforts.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

**MEDEDU 2220 - TEACHING EVIDNC BASED MEDICINE**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- Course will introduce the core concepts of evidence-based medicine and introduce methods to teach it in the clinical setting. The course will begin by reviewing the history of evidence-based medicine and clinical epidemiology & describe its rise to now become a new paradigm of clinical practice”. We will review the core concepts and practices of evidence-based medicine as they relate to clinical questions of therapy, diagnosis, prognosis and harm. We will then describe the current approaches to teaching evidence-based medicine and the literature to support those approaches."
- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis

**MEDEDU 2230 - INNOVATIVE TEACHING STRATEGIES**
- **Minimum Credits:** 2
- **Maximum Credits:** 2
- This course is designed to enable medical educators to use information and telecommunications technology (ITT) to expand access to educational resources, implement new models of education, and enhance student and physician competence throughout the continuum of training and practice.
- **Academic Career:** GRAD
- **Course Component:** Seminar
- **Grade Component:** Grad LG/SNC Basis
- **Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

**MEDEDU 2240 - CULTRL COMPETENCE MEDICAL EDUC**
- **Minimum Credits:** 1
- **Maximum Credits:** 1
- This course is designed to explore the impact of diversity on the training of physicians and other health care providers. Cultural differences have always been an integral component in the working of American society. Only recently has there been recognition of the importance of addressing these cultural differences in medical education. Cultural competence is now of interest to the liaison committee on medical education, the accrediting body for allopathic medical schools, universities, managed care organizations and various governmental bodies.

**MEDEDU 2250 - TEACHING COMMUNICATION SKILLS**
- **Minimum Credits:** 2
- **Maximum Credits:** 2
- Doctor-patient communication has received increasing attention in medical education. There has been increasing data regarding the efficacy of educational interventions to improve physician communication skills. Will provide didactic and experiential curriculum to ensure that medical educators understand data, and have practical skills needed to design and teach communication courses. Topics include process in teaching communication skills, feedback, video-review, role playing, and use of the standardized and motivational interviewing. A strong emphasis placed on interactions teaching.
- **Academic Career:** GRAD
- **Course Component:** Lecture
- **Grade Component:** Grad LG/SNC Basis
- **Course Requirements:** PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)
MEDEDU 2260 - SEMINAR SERIES IN MEDICAL EDUC
Minimum Credits: 1
Maximum Credits: 1
This course allows students the flexibility to choose among 3 established seminar series in medical education and attend specific topics of interest and relevance to their teaching roles. The seminar series include: mermaid series: medical educational research methods and innovative design, academy of master educators (AME) seminar series, and medical education grand rounds. Specific information of dates and current and past topics for each series is contained on the individual websites. In order to receive the credit, the student is responsible to document attendance at 16 sessions. In order to promote active learning and enhance the relevance of the topics to the individuals' teaching roles, enrollees for this course will be required to choose one skill or learning point from the any of the 16 sessions attended. The enrollee will then provide a one page (maximum) description on how this was implemented in one of their specific teaching assignments or activities and describe its outcome. This needs to be completed prior to credit allocation and submitted to the course director.

MEDEDU 2300 - TEACHING IN PRIMARY SETTING
Minimum Credits: 1
Maximum Credits: 1
This course is designed for those educators that work in outpatient and nontraditional (i.e. Non-hospital) settings. The course covers topics such as use of screening tools, dealing with uncertainty, and caring for patients outside of a setting. Methods of instruction will include didactics, role-play and video vignettes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MEDEDU 2310 - TEACHING INTERDISCIPLINARY CARE
Minimum Credits: 2
Maximum Credits: 2
Teamwork and inter-professional communication has been identified as an important skill. This course is designed to help health professionals and specifically physicians to think outside of the box about teaching in a healthcare setting by including multiple members of a team. Individual sessions will be led by different team members (e.g. Physical therapy, nursing, social work etc.) And are designed to talk about creating teams, teaching within a team setting, and using teams to teach. Topics covered will include communication among healthcare professionals, defining the team leader, and conflict in teams as well as other areas. A final project on team teaching will be required. This course is required for the area of concentration in geriatrics for the CETP.
Academic Career: GRAD

Grade Component: Grad LG/SNC Basis

MEDEDU 2320 - CLN PROB SOLV & MED DEC MAKNG
Minimum Credits: 1
Maximum Credits: 1
The process by which physicians make decisions is complicated and multifactorial. Understanding this process is critical in order to be able to teach the principles of clinical problem solving and medical decision making. Many theories and strategies have been put forward to better elucidate this process. The overall goal of this course is to introduce the learner to the principles of adult learning, how they are applied in the medical arena, and to develop strategies for teaching these skills in the clinical setting. Course objectives: at the end of the course, learners will be able to: 1. Describe the major theories of adult learning and problem solving. 2. Understand how to apply these theories to medical decision making in the clinical arena. 3. Develop strategies for teaching clinical problem solving and medical decision making.

Minimum Credits: 1
Maximum Credits: 1
Academic Career: GRAD
Medical Elective

MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1
Minimum Credits: 0
Maximum Credits: 0
This course is designed for entering PSTP students. The purpose of this course is to highlight contemporary questions in biomedicine and how different scientific fields approach these questions. After surveying appropriate background material the students analyze scientific papers from the primary literature under the mentorship of different department faculty. Presentation of these papers provides a forum for discussion of experimental design, technique, laboratory and clinical observations. Exposure to different departments and faculty will help the students select laboratories for the summer rotations and the research year.
Academic Career: MEDS
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSELCT 5110 - PSTP LABORATORY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/her selection of a lab for the research year.
Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2
Minimum Credits: 0
Maximum Credits: 0
This course prepares PSTP students to successfully navigate key developmental milestones in their trajectory toward a physician scientist career. Career expectations are discussed and framed in the perspective of grant writing and the review process. A small amount of lecture material is linked to a series of workshops, where each student composes a bio-sketch, specific aims, experimental plan and training plan related to their research year. Constructive peer critiquing of grant material provides a perspective on which to build grant writing skills.
Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSELCT 5130 - PSTP RES BASIS-MEDL KNOWLEDGE
Minimum Credits: 0
Maximum Credits: 0
This small group session is required during the first 3 semesters of medical school. Class meets to review primary literature linked to current first and second year curricula. Before each session, a faculty member and one student meet and review the paper assigned for that week. Students learn about the research basis of knowledge and how to present and critically review primary literature.
Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSELCT 5215 - MENTORED PROJECT INTERIM GRADE
Minimum Credits: 0
Maximum Credits: 0
The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. Interim grades will be assigned in May of the second year, November and may of the third year, and November of the fourth year. This course will record the grade assignment for May 1 of the second year.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U
MSELCT 5300 - BOARD STUDY ELECTIVE  
Minimum Credits: 0  
Maximum Credits: 0  
This course will be registered when the necessity to record a block of time taken to participate in an intensive study period is required. This will usually mean a structured USMLE study course taken outside Pitt but could include a self-structured study schedule here at the school. The course may be given a specific title including the number of weeks.  
Academic Career: MEDS  
Course Component: Independent Study  
Grade Component: No Grade Required

MSELCT 5301 - SPECIAL STUDIES  
Minimum Credits: 0  
Maximum Credits: 0  
This course will be registered when students are permitted to participate in a special project for one month during the third year of medical school. A descriptive title will be recorded on the official transcript to define this one month period of time.  
Academic Career: MEDS  
Course Component: Directed Studies  
Grade Component: H/HS/S/LS/U

MSELCT 5310 - MENTORED PROJECT INTERIM GRADE  
Minimum Credits: 0  
Maximum Credits: 0  
The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. MSELCT 5450 - GET READY FOR INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
This elective is an intensive preparation for students who are about to enter residency. Through daily interactive sessions, students will explore potential challenges a resident may face in a variety of specialties including medicine, infectious disease, pediatrics, obstetrics/gynecology, psychiatry, radiology, etc. There will also be simulated patient scenarios, entitled "nightmares on call," medical/legal preparation, including a mock deposition and trial, and procedural workshops. The course objectives are: 1) integrate clinical skills and knowledge in preparation for internship; 2) facilitate the fusion of knowledge obtained throughout the four years of medical school and translate it into treatment of complex patients with multi-system issues; 3) explore the evaluation and treatment of the patient with acute abdominal pain including when to call for a surgical consult; 4) identify the acutely ill child and explore the appropriate advice to give parents; 5) identify and treat the top ten women's health issues; 6) evaluate and manage acute electrolyte imbalances; 7) evaluate and treat illnesses in the pregnant patient including medication use in pregnancy; 8) gain insight into treating the patient with acute delirium and management of the violent patient; 9) evaluate and treat acute epistaxis; 10) interpret disease processes on chest x-rays, abdominal films and ct scans; 11) gain insight into the treatment of a patient with an acute stroke; 12) learn the proper way to communicate with patients, parents of patients and health care providers on the telephone; 13) manage (through simulation) a variety of urgent patient situations the student may encounter while on call in the hospital; 14) become familiar with the steps involved in legal actions against a medical practitioner including a simulated deposition and trial; 15) help students develop essential and durable approaches to personal wellness.
Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MSELCT 5455 - LITERATURE AND MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This course is intended for the student participating in the medical humanities area of concentration (AOC). The objective of this independent study elective is to use different kinds of culturally relevant literature (drama, poetry, children's literature, popular fiction, classics) to help explore the ways our culture imagines and interprets the experience of medicine. Specifically to gain an appreciation for the various parts physicians play in the literature of our culture. To learn to use the tools and systems of literary criticism to analyze literature, and then in turn to analyze the "text" of a clinical medical encounter. To gain an appreciation for the complex ways in which our own words and actions may be interpreted and misinterpreted within the clinical setting by patients who listen to us with ears and minds which have been prepared for the encounter by the literature, myths and stories of our culture. Selections to be read may include selections from Molière, dr. Seuss, Nathaniel Hawthorne, Gwendolyn Brooks, Jane Austen, J.R.R. Tolkien, the bible, mother goose and others. Requirements consist of: completion of a set of mutually agreed upon reading assignments. Preparation and submission of four, weekly essays each approximately 3 to 4 pages long. These essays will generally be reflective papers based on that week's reading assignment. Completion of an in-depth reflective manuscript of approximately 10 pages. This manuscript will be based on my reading of the poetry of Charles Bukowski, and will address the specific theme of Bukowski's attitudes (mainly pessimistic) towards the body and medicine, as well as his portrayal of poverty, addiction and other forms of "hard living." I may change my topic pending discussion with and approval of dr. Maier. Iv. Attend a literature and medicine discussion series during the four week elective. The progress of this elective will be
assessed on the basis of the submitted essays, final paper, and participation in the literature discussions. All of the assigned papers will be submitted no later than the Friday of the fourth week of the rotation.

**MSELCT 5495 - ORAL & MAXILLOFACIAL MEDICINE**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0

This four-week clinical elective is offered by the School of Dental Medicine and is designed for the medical student seeking exposure to oral and maxillofacial surgery and oral medicine. There is an emphasis for the physician-student to develop skills in the initial evaluation, differential diagnosis, and decision-making for a variety of problems in the oral cavity and craniomaxillofacial region. Development of medical decision-making skills will be encouraged by working closely with the attending staff and residents in ambulatory and inpatient settings. The clinical experience consists of supervised activity with a variety of patients who have issues related to craniofacial trauma, congenital deformities, oral pathology, oral manifestations of systemic disease, and other entities useful for most any practicing physician. The course curriculum includes an orientation to the scope of oral and maxillofacial surgery, a workshop on performing a detailed examination of the head and neck, and a laboratory experience on anesthetic injection techniques. Students will be able to formulate a basic differential diagnosis of a variety of disorders and evaluate a variety of different imaging modalities commonly used. A sizeable component of the rotation occurs in the operating room, where students will encounter a wide variety of procedures including trauma reconstruction, cleft and craniofacial surgery, treatment of pathology, and others. Continuity of care is emphasized by having the opportunity to see patients with the attending staff both pre- and post-operatively. Students will also participate in the department's conference series and journal club. Other in-depth experiences may be arranged based on individual interests and career paths. One of the strengths of this elective is the ability to formulate a custom approach to learning based upon the student's desires. Student's interest in careers in otolaryngology, emergency medicine, OMFS, ophthalmology, pathology, plastic surgery, or dermatology are likely to find this experience particularly interesting and practical.

**MSELCT 5500 - INTERNATIONAL MEDICINE**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0

This elective is intended to give some structure and guidelines for students wishing to experience medical care in another country. Students are encouraged to pursue their own interests and contacts to arrange an international experience. The student is responsible for arranging this rotation. Information to be provided to the office of student affairs at least two months in advance - prepare an international clinical experience request form, travel abroad contract and checklist for international electives; designate one primary preceptor at the elective site and have written approval from the preceptor or school; develop a list of goals and objectives and a tentative list of activities which will allow the goals to be met. The student is responsible for assuring that a grade is received at the end of the four-week elective.

**Academic Career:** MEDS  
**Course Component:** Clinical

**MSELCT 5720 - SCHOLARLY PROJECT ELECTIVE**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0

Analytical thought and rational decision-making are the hallmarks of modern medical practice. The ability to read and critically evaluate medical literature and to think through a patient's medical concerns or a biomedical problem from first principles is an essential component of undergraduate medical education in the current era. The design, performance, and presentation of an independent project and the critical evaluation of the projects of others represent one outstanding way to develop and crystallize analytical thinking skills and the tools for rational decision-making. Students are given an opportunity to read and critically evaluate scientific and medical literature, present a research proposal and get direct feedback from faculty and other students on that proposal, perform a research project under direct mentorship from an expert in that field, present the research project in both informal and formal collegial venues, and discuss, trouble-shoot, and critique the research and presentations of their colleagues in their medical school class. Students must spend the equivalent of eight weeks in pursuit of their mentored project during the final two years of medical school. Students may participate during a block of time or over an extended period of time. When a block of time is used, this course is registered. The grading and evaluation for this course is completed by the student mentor.

**Academic Career:** MEDS

**MSELCT 5805 - INTERPROFESSIONAL HEALTH CARE**

**Minimum Credits:** 0  
**Maximum Credits:** 0

Course objectives: clarify the knowledge base, skills and resources different professions contribute to a health care problem, and develop understanding and respect for those contributions; explore overlapping roles and responsibilities of HC team members; clarify boundaries and responsibilities unique to individual professions; learn to communicate constructively with other HC team members; learn to design patient care plans based on shared input; identify ways of managing team members with shared / different responsibilities; realize one's own limitations and recognize when it is appropriate to seek advice or assistance from another profession. This elective course will bring together advanced level students in medicine, nursing and pharmacy to learn about and actively practice interprofessional, team-based health care. Clinically based, experiential learning will be emphasized and interwoven with didactic and reflective sessions. The course will begin with presentations and discussions to explore the meaning of interprofessional teamwork; to introduce students to the backgrounds and contributions of different professions on teams; to provide examples of highly functional vs. Dysfunctional team interactions; and to consider the consequences of team behavior for patient care. The experiential components are organized around two disease models, heart failure and renal disease, and include inpatient and outpatient settings. Each student team will be paired with patients and participate in various aspects of care including, for example, assessment of a patient's disease and ongoing status, development of management plans responsive to the patient's evolving state, discharge planning, follow-up and care in outpatient settings, etc. Students will interact with health care teams at various sites, as well as receive instruction and feedback from core teaching faculty. Evaluation and grading will consist of attendance and participation; presentation of a written assessment, care plan and patient summary for each "disease unit," to include a team oral presentation.

**Academic Career:** MEDS

**Grade Component:** H/HS/S/LS/U

---

**MSELCT 5808 - NURSING HOME HEALTH CARE TEAMS**

**Minimum Credits:** 0  
**Maximum Credits:** 0

This elective course brings together advanced level students in medicine, nursing, and pharmacy to learn about and actively practice interprofessional, team-based health care in nursing home (NH) environments. Clinically based, experiential learning is emphasized and interwoven with didactic and reflective sessions. The course entails presentations and discussions to explore the meaning of interprofessional team work; to introduce students to the backgrounds and contributions of different professions and teams; to provide examples of functional vs. Dysfunctional team interactions; and to consider the consequences of team behavior for patient care. The experiential components are organized around a NH model and include patients in various care stages in this overall setting. Each student team will be paired with patients and participate in various aspects of care including, for example, assessment of a patient's history (medical, nursing, pharmacy, social/family, financial, etc.) And ongoing status, development of management plans, and evaluation of outcomes. Students will interact with health care team members at a local nursing home site, as well as receive instruction and feedback from core teaching faculty. The course will run Monday through Friday. Evaluation and grading will be done on both an individual and a team participation level. Included will be attendance, written assessments, care plans and patient summaries. A team oral presentation will be evaluated by core faculty and representative health care experts.

**Academic Career:** MEDS
MSELCT 5850 - PEPTIDE HORMONE RECEPTORS
Minimum Credits: 0
Maximum Credits: 0
This four to eight week senior elective is available for one student per month. Research is in the general area of the mode of action of polypeptide hormones, the isolation of hormone receptors and structure function studies of biologically active polypeptide hormone receptors.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSELCT 5851 - RESUSCITOLOGY
Minimum Credits: 0
Maximum Credits: 0
Research opportunities are provided for one student per month at the international resuscitation research center under the direction of the director. Laboratory studies range from the cellular level to long-term animal outcome experiments on total circulatory arrest (cardiac arrest) and shock states.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSELCT 5852 - HEALTH SERVICE RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Four week elective is a quality assurance program for community hospitals-to provide technical assistance to participating hospitals in the design of module audit and quality assurance studies with a particular emphasis upon forms design, data collection, data analysis, and the utility of data to inform and educate professionals in participating hospitals research in the area of population, family planning, and maternal and child health. Studies in public health gerontology-numerous studies of the provision of supportive services to the elderly.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSELCT 5853 - HEALTH POLICY
Minimum Credits: 0
Maximum Credits: 0
The objectives of this course are to expose medical students to current health policy issues and to methods used in analyzing them. Medical students do independent studies of issues of interest to them. They may also join teams of researchers in the health policy institute in conducting institute-sponsored studies.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSELCT 5854 - ETHICS IN CLINICAL PRACTICE
Minimum Credits: 0
Maximum Credits: 0
The aim of the four week elective is to help physicians identify, analyze and resolve the ethical dilemmas they face in clinical practice. Students will meet in small group seminars with faculty to discuss readings which emphasize the central issues in medical ethics. Students will also participate in one of several in-patient services, identifying patients about whom ethical issues arise. The students will present these cases at ethics rounds for discussion. Students will also be involved in formal hospital ethics counsels.

Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSELCT 5855 - CLINICAL GENETICS
Minimum Credits: 0
Maximum Credits: 0
A tutorial experience is tailored to the interests of the student with the advice of senior faculty. The experience is modeled after the diverse responsibilities of a clinical fellow in medical genetics, with some consultations on clinic and hospital patients, attendance at selected seminars and
classes in genetics, and participation in a research project, including in the molecular genetics, biochemical genetics, or cytogenetics laboratories or with clinical or mathematical geneticists.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/LS/U

MSELCT 5856 - MILITARY SCHOLARSHIP ELECTIVE
Minimum Credits: 0
Maximum Credits: 0
This course will accommodate health profession scholarship students who must do an active duty tour during each year of medical school for which they have a scholarship. These clinical experiences do not always conform to a specific course offered by the medical school, such as flight surgeon and aerospace medicine. This generic course will cover all military exposures for credit.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSELCT 5857 - EVIDENCE-BASED MEDICINE
Minimum Credits: 0
Maximum Credits: 0
A 4 week elective to introduce graduating students to the latest techniques in EBM as they apply to the clinical practice of medicine. EBM is the conscientious, explicit, and judicious use of the best available evidence in making decisions about the care of individual patients. It is an approach to problem solving based on information gathering and analysis. The course consists of a clinical rotation, small group workshops, computer lab sessions and independent study. Each student will present the results of their analysis of one clinical question.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSELCT 5858 - PUBLIC HEALTH FIELD PRACTICUM
Minimum Credits: 0
Maximum Credits: 0
This elective is a hands-on public health practicum that is appropriate for 3rd and 4th year medical students. Prior public health experience, while useful, is not required. Under faculty guidance, students will be placed at a local or state public health agency and participate in on-going activities. These may include disease surveillance and early warning; communicable disease control including outbreaks and food safety; environmental health (air, water, and ground); disaster preparedness, planning and response; health policy and planning; vector and pest control; and applied epidemiology. Specifics of the activities will vary depending on site and student interest. Students wishing to develop their own field-placement opportunity may arrange alternative sites with the advance approval of the course director. Students will also participate in a series of focused seminars on public health topics, presented on one half-day per week, on topics such as: public health practice; epidemiology in clinical practice; disasters, outbreaks and emergencies; avian and pandemic influenza. A short presentation and paper (3 - 5 pages) summarizing key aspects of the experience is also required. Through these activities, students will gain the opportunity to work closely with experienced public health professionals and to develop a fuller understanding of the intersection of clinical medicine and public health.
Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MSELCT 5860 - EDUCATIONAL TECHNOLOGY
Minimum Credits: 0
Maximum Credits: 0
This 4-week elective combines medical science with new technology in the information and computer sciences. The student will study a wide variety of aspects of technology as it relates to research, clinical medicine and/or medical education. The elective will provide an opportunity for expansion of the student's knowledge base and allow the student to create and/or evaluate a new implementation of technology in medicine. This elective assumes basic understanding of current computer software, the internet and general use.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: Grad LG/SU5

MSELCT 5890 - EXTRAMURAL RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Students will register for this four-week elective when they have arranged to do research with a preceptor who is not a faculty member of the
university of Pittsburgh school of medicine. The research will be completed within the United States. The research prospectus will be vetted by the student research administrative office and a copy of the approval will be maintained in the student record.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSELCT 5895 - INTERNATIONAL RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Students will register for this four-week elective when they have arranged to do research with a preceptor outside of the United States. The research prospectus will be vetted by the student research administrative office and a copy of the approval will be maintained in the student record.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSELCT 5900 - BASIC SCIENCE OF CARE
Minimum Credits: 2
Maximum Credits: 2
The "basic science of health care" course was designed to help all health science students understand that: 1) the delivery of excellent medical care requires an interdisciplinary approach; 2) there are many barriers in the current health-care environment to the delivery of safe, effective, evidence-based care, and that these problems can be remedied; 3) the health care delivery system is buffeted by many structural and economic constraints that inhibit the delivery of excellent, efficient medical care; 4) information systems play an essential role in improving and delivering cost-effective, error-free medical care; and 5) professionalism includes the personal obligation of all health care professionals to work together to remove the barriers to the delivery of safe, effective, and evidence-based care.

Academic Career: MEDS
Course Component: Lecture
Grade Component: Grad HSU Basis

MSELCT 5901 - HEALTH CARE DELIVERY PROBLEMS
Minimum Credits: 1
Maximum Credits: 1
The "interdisciplinary collaboration, problem solving, and creativity in health care delivery" course was designed to help all health science students understand that: 1) the delivery of excellent medical care requires an interdisciplinary approach; 2) there are many barriers in the current health-care environment to the delivery of safe, effective, evidence-based care, and these problems can be remedied; 3) the health care delivery system is buffeted by many structural and economic constraints that inhibit the delivery of excellent, efficient medical care; 4) information systems play an essential role in improving and delivering cost-effective, error-free medical care; and 5) professionalism includes the personal obligation of all health care professionals to work together to remove the barriers to the delivery of safe, effective, and evidence-based care.

Academic Career: MEDS
Course Component: Lecture
Grade Component: Grad HSU Basis

MSELCT 5910 - AREA OF CONCENTRATION
Minimum Credits: 0
Maximum Credits: 0
This four-week elective will allow the student a dedicated period of time to complete the area of concentration (AOC) requirements. The AOC program at the university of Pittsburgh school of medicine offers the opportunity for students to pursue an area of personal interest, over their four years of medical school. This is accomplished with a series of longitudinal, elective experiences which supplement the required core curriculum. These para-curricular education tracks provide an opportunity for interested students to explore a potential career plan and uniquely enhance their medical education. The AOC may be utilized to meet the scholarly project, which is a graduation requirement.

Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR
Minimum Credits: 0
Maximum Credits: 0
This course meets monthly throughout the year and is designed for all physician scientist training program students. The purpose of this course is to provide each PSTP student a forum to present his or her research and to discuss their research ideas, designs and results, and to give and to obtain peer feedback. Each student has the opportunity to present at all stages of a project, whether it is starting a project, planning the design, analyzing the
data, or getting ready to present the results at conferences or in manuscripts. This course encourages all students to engage in scientific discussion and feedback on each project.

Academic Career: MEDS
Course Component: Seminar
Grade Component: H/HS/S/LS/U

MSELCT 5975 - CSTP-RELATED RESEARCH
Minimum Credits: 0
Maximum Credits: 0

Students who apply and are accepted to the clinical scientist training program (CSTP) participate in a course of study leading to either a certificate or a master of science in clinical research. Participants will devote one year of dedicated study to clinical research following the third year of the professional medicine (md) program. During the fourth year of the md program, a maximum of twelve (12) weeks may be scheduled to complete CSTP course work or the research project. This experience will be graded by the director of the CSTP program and will be recorded on the student's official university transcript. A course subtitle form will be processed to record the specific amount of time (in weeks) to be given credit, e.g., CSTP-related research 12 weeks.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

Medical Scientist Training Program

MSTP 2090 - MSTP DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest available to mstp students.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

MSTP 5010 - MOLECULAR MEDICINE
Minimum Credits: 0
Maximum Credits: 0

This course is designed for entering MSTP students. The purpose of this course is to highlight contemporary questions in biomedicine and how different scientific fields approach these questions. After surveying appropriate background material the students analyze scientific papers from the primary literature under the mentorship of different department faculty. Presentation of these papers provides a forum for discussion of experimental design, technique, laboratory and clinical observations. Exposure to the primary scientific literature will prepare the students for entry into the Ph.D. component of the combined degree. Exposure to different departments and faculty will help the students select laboratories for their thesis work.

Academic Career: MEDS
Course Component: Lecture
Grade Component: H/HS/S/LS/U

MSTP 5015 - LABORATORY RESEARCH ROTATION
Minimum Credits: 0
Maximum Credits: 0

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad exposure to method and practice.

Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MSTP 5290 - RSRCH BASIS OF MEDL KNOWLDGE
Minimum Credits: 0
Maximum Credits: 0

This small group session is restricted to MD/Ph.D. students during their first two years of medical school. Class meets to review primary literature linked to current first and second year curricula. Before each session, a faculty member and one student meet and review the paper assigned for that week. Students learn about the research basis of medical knowledge and how to present and critically review primary literature.

Academic Career: MEDS
MSTP 5955 - MSTP WORKSHOPS
Minimum Credits: 0
Maximum Credits: 0
This discussion-based course, guided by faculty preceptors, meets eight (8) times per year over dinner and is attended by MSTP students from all years. Each class begins with description of a topic related to training on being a physician scientist. The topic for discussion is developed by students from different years in order to assure good representation of the challenges offered at various stages of training. After presentation of the topic, students work in groups of 8-10 at assigned dinner tables and each table reports a summary of the discussion followed by group discussion. Every student must complete a class evaluation at the end of each session. The goals of the course are to provide a forum in which students can openly discuss training and ethically challenging situations with their peers; to provide a venue in which junior students can learn from senior students; to understand that responsible conduct of research and medicine is a critical aspect of research training and that it remains an important concern at all levels of a research career.
Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT
Minimum Credits: 0
Maximum Credits: 0
This course is required of the students participating in the md/Ph.D. program medical student training program (MSTP), at the end of their first graduate school year. Career expectations are discussed and framed in the perspective of grant writing and the review process. A small amount of lecture material is linked to a series of workshops, where each student composes a biosketch, specific aims, experimental plan and training plan related to their Ph.D. thesis. Constructive peer critiquing of grant material provides a perspective on which to build grant writing skills.
Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MSTP 5973 - METHODS AND ANALYSIS
Minimum Credits: 0
Maximum Credits: 0
This seminar style course is designed for MSTP students during the summer between the first and second year of medical school with one or two faculty facilitators. The learning objectives of the course are to foster social and scientific collaboration between students; to expose students to different scientific methods, techniques, and analyses; to create an environment where students can voice difficulties with their research, labs or mentors and seek constructive feedback; to develop habits of daily writing/presenting. The students are required to present three times during the course and assessed on the clarity and quality of their MSTP retreat poster.
Academic Career: MEDS
Course Component: Seminar
Grade Component: H/HS/S/LS/U

MSTP 5975 - CAREER-RELATED RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Students apply and are accepted to the medical scientist training program (MSTP) during which they participate in the first two years of the professional medicine program before taking leave to pursue a doctor of philosophy degree of their choosing. They must defend their thesis before reentry to the professional program. They then participate in the combined third and fourth years of the professional program, which will grant a maximum of six months of credit for being granted the Ph.D. degree. A number of these physician-scientists will chose to spend all or part of this six months of the fourth year in the pursuit of research related to their Ph.D. field of study. The proposal for this research is vetted by the dean of the MSTP and when approved the student will be registered for this elective course. This experience will be graded by the research preceptor and recorded on the student's official university transcript. A course subtitle form will be processed to record the specific amount of time (in weeks) to be given credit.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS
Minimum Credits: 0
Maximum Credits: 0
Offered to md/Ph.D. students in the first three Ph.D. years. Part one is a 4-hr introductory workshop with emphasis on principles in ethical decision-making and formulating conceptual frameworks for evaluating situations with ethical implications. Part two consists of student participation in upper-level case-based workshops. Facilitation will be by university faculty and will apply the principles and methods of general ethics problem solving covered in the introductory workshop. The scenarios will be of specific import to the physician scientist.

**Academic Career:** MEDS  
**Course Component:** Workshop  
**Grade Component:** H/HS/S/LS/U

### MSTP 5990 - LONGITUDINAL CLINICAL COURSE

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  

20 - 1/2 days are given 2 weeks outpatient credit. Students evaluate patients in a specialty outpt clinic. Plan and conduct appropriate evaluations and therapeutic approaches. Attending physician oversee student's learning of adv clinical skills in interviewing and physical diagnosis, with emphasis on symptom-based exam. Students involved in decision-making regarding the need for hospitalization and longitudinal care. Extensive opportunity for followup care of patients with chronic disorder both for eval of new symptoms and for health maintenance. Emphasis on role of clin investigator in care of pt.  

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

### Medical Surgical Nursing

### NURSMS 2008 - ALTERNNTV RESEARCH REQUIREMENT

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

Students select options in consultation with their advisor which provide experience in the design, implementation and data analysis phase of the research process. A written paper describing outcomes of the research experience is reviewed and critiqued by the student's advisor.  

**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** School of Nursing students only.

### NURSMS 2010 - MASTER'S THESIS

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

Students select a research problem designed to resolve questions relating to the clinical management of cardiopulmonary, critical care or oncology patients. With guidance from the thesis committee chair and committee members, the student identifies the problem, reviews related literature, designs an appropriate methodology, collects and analyzes data and discusses implications of the findings. A written and verbal presentation and committee approval are required prior to initiation of the proposal (overview) and prior to completion of the final report (defense).  

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** School of Nursing students only.

### NURSMS 2061 - INDEPENDENT STUDY

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.  

**Academic Career:** GRAD  
**Course Component:** Independent Study  
**Grade Component:** Grad LG/SNC Basis  
**Course Requirements:** School of Nursing students only.

### Medicine

### MED 2101 - BIO-MEDICINE:PAST,PRESENT,FUTR

- **Minimum Credits:** 3  
- **Maximum Credits:** 3
Course offered to honors college students only. Topics will provide knowledge of basic and diverse elements constituting the present structure of biomedicine and how these elements arose from and interacted with historical, social and technological events. Develop an appreciation of the revolution in biomedicine over the past five centuries and how it applies to societal concepts of health. Become more critically able to evaluate claims about such topics as biomedical progress, the war on cancer, transplantation, healthcare economics and the influence of genomics on medical ethics.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: (BIOSC 0160 or 0716 or 0191 or 0180 or BIOL 0102 or 0120) and (BIOSC 1250 or 1070 or NROSCI 1250 or 1070); LVL: Jr, Sr

MED 2110 - HEALTH: FRM CELLS TO COMMUNITYS
Minimum Credits: 3
Maximum Credits: 3
This is an honors course only. The biology behind the most significant sources of death and disease in the United States will be explored and the social, psychological, economic and political factors shown to cause or worsen those diseases. Subjects discussed from a public health perspective: cigarette smoking; kids and TV time; alcohol use; pregnancy rate in the U.S.; Violent video games and movies; murder and suicide in the U.S. There will be a final community project, in which you will design, implement and evaluate a public health intervention designed to improve health of the community.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MED 2111 - FROM MOLECULES TO MASS MEDIA
Minimum Credits: 3
Maximum Credits: 3
This honors college course will explore the most significant public health problems affecting young Americans at college age: tobacco use, diet and activity patterns, alcohol abuse, violence, sexual behavior, and mental health. Each of these topics will be explored both on a societal and a molecular level. For example, discussion of tobacco will include both the social, psychological, and economic factors predicting tobacco use as well as the pathophysiology of nicotine dependence. Each section will involve both lecture and discussion. Readings assigned and discussed will include a variety of sources including textbook sections, medical journal articles, and lay sources such as newspapers. The course will culminate in final projects created, implemented, and evaluated by the students. Each project will involve study of one aspect of public health on the campus of the university of Pittsburgh. One student may develop a series of alcohol free events on campus, another may survey her dormitory on their understanding of genital warts and cervical cancer, and a third may obtain permission to label foods in a certain restaurant on campus with grams of saturated fat and trans-fats. Students will be required to explore both biological and psychosocial aspects of their chosen topics. By the end of this course, students should be able to: 1.List the major causes of death and disease in the United States 2.Describe basic pathophysiologic characteristics of the following health topics which in particular affect young adults: tobacco use, diet and activity patterns, alcohol abuse, violence, risky sexual behavior, and emotional health 3.Explain basic theories of health behavior, and describe the social, psychological, and economic factors which contribute to the health topics mentioned above 4.Study the impact of one of the above topics on the health of the community of the university of Pittsburgh

MED 2115 - HISTORY OF BIOMEDICAL THOUGHT
Minimum Credits: 3
Maximum Credits: 3
This is an honors college course only. Course surveys the history of biomedical concepts from Aristotle through the close of the nineteenth century. Concepts of normal biology and disease etiology of each time period within the context of both contemporaneous ideas and methods in the physical and biological sciences, the humanities and broader societal factors will be explored. Students will develop an inductive understanding of the development of the modern biomedical sciences and the complex interrelationships between basic research, applied research and medical practice.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MED 2116 - HISTORY BIOMEDICAL THOUGHT 2
Minimum Credits: 2
Maximum Credits: 2
This seminar course is a sequel to med 2115. It surveys the history of biomedical concepts from late eighteenth century through the mid-twentieth century. Primary and secondary source materials form the basis for an exploration of concepts of normal biology and disease etiology within the
context of both contemporaneous ideas and methods in the physical and biological sciences, the humanities and broader societal factors. The general background and context for each topic will be provided by readings from secondary source material and contemporaneous textbook chapters, so that important primary sources can be understood within their historical context. The discussion of these readings will elucidate factors that influence scientific discourse, experimental design and the interpretive process. As a result, the students will refine their inductive understanding of the development of the modern biomedical sciences and the complex interrelationships between basic research, applied research, ethics and medical practice. This course should be helpful to students with (1) a pre-med or biology background (2) a background in the history and philosophy of science and (3) a desire to explore the intellectual heritage of modern biomedical thought.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

MED 2120 - CANCER-AN INTEGRATED INTRO
Minimum Credits: 3
Maximum Credits: 3
This course is offered only to students in the honors college. The course will explore current concepts about cancer using principles from multiple disciplines, including genetics, cellular and molecular biology, epidemiology, public health, international health, sociology and psychology. A spectrum of topics related to cancer will be covered, including the global impact of cancer, causes and risk factors, cellular and molecular models of cancer development, the clinical diagnosis of cancer, clinical management of cancer patients, and the psychosocial aspects of cancer.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MED 2125 - PATHOLOGY-STUDY OF DISEASE
Minimum Credits: 4
Maximum Credits: 4
Registration for this honors course requires pre-approval from the instructor. The course introduces pre-medicine students to the foreign language of the terminology of disease, which reduces the extreme burden of simultaneously learning this language and using it to learn the diseases in the first year of medical school. The course also introduces pre-medicine students to all the most common and most important diseases of humans as well as general concepts of disease, integrating the pathology of each disease (the way it appears visually, especially under a microscope) with the epidemiology, the symptoms, the signs, the laboratory test manifestations, the pathophysiology, the treatment and the prognosis in an understanding of the disease. Two chapters of the largest and best comprehensive textbook of pathology will be assigned reading each week and the students will be expected to have used the internet, the library, the dictionary and whatever textbooks of anatomy, histology, physiology and medicine necessary to understand it in preparation for class. A prior course in anatomy and physiology is highly recommended, but is not an absolute prerequisite. Each class will be an interactive question, answer and discussion session. The students will be encouraged to ask the teacher about anything they need help understanding, and the teacher will use the Socratic method, asking them questions on the assumption they know and understand everything they have not asked him about. 70% Of the grade will be from a weekly ten-minute in-class essay test on a disease (or concept of disease) and 30% from three one-minute definitions of terms, all handwritten, all graded by both the teacher and an independent grader (each counting for half). The terms and diseases to be tested will be drawn from lists provided to the students the previous week.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

MED 2130 - BIOMEDICAL SCIENCE, LAW, POLCY
Minimum Credits: 3
Maximum Credits: 3
This course is offered only to students in the honors college. The course will explore the phenomenal leading-edge development in biomedical science and how they impact what it means to be human, along with the philosophical and moral traditions in law that give expression to the human body. Also to be considered are how social values and cultural norms that shape our laws and public policy have evolved historically and should evolve, whether there should be limits on biomedical innovation, what those limits might be, and how they should be determined and drawn. The relationship between society and biomedical science will be examined, competing interests identified, the role of law and regulatory oversight considered, including restraint on bio-scientific and physician authority to ‘enhance’ and prolong life and how the balance should be struck among innovative progress, societal interests, and individual decision-making. Requirements for the course include assigned readings and participation in class discussions, a short position paper with a class colloquium on the ideas expressed in the paper, and developing the position into a thesis for a paper, which provides students with an opportunity to write on a topic that may satisfy graduation requirements.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MED 2135 - HISTL SOCLGCL PERSP PBLC HLTH
This course is offered only to students in the honors college. The course provides an introduction to the history, current status, and future trends in the American health care system within a public health context. Special focus will be on the past and current barriers to the American public health system. Key topics include the past and current impact of epidemics on the evolution of American public health infrastructure and concerns over health insurance, smoking, changing definitions of illness and health, the growth of health care facilities, and the individual's responsibility for their own health. This course is primarily a reading/discussion seminar.

**Academic Career:** GRAD
**Course Component:** Seminar
**Grade Component:** Grad LG/SNC Basis

### MED 5112 - BASIC SCIENCE FUNDAMENTALS 1
**Minimum Credits:** 3
**Maximum Credits:** 3
Medical anatomy - section 1 of the basic science block introduces themes from anatomy, as well as providing an introduction to imaging and radiology. Instructional modalities in this intensive course include lecture, dissection and problem based learning exercises.

**Academic Career:** MEDS
**Course Component:** Lecture
**Grade Component:** S/U Basis

### MED 5113 - BASIC SCIENCE FUNDAMENTALS 2
**Minimum Credits:** 3
**Maximum Credits:** 3
Cell and tissue physiology and human genetics courses. Section 2 of the basic science block is a multi-disciplinary section that covers molecular and cellular principles and concepts from cell biology, developmental biology and genetics. It introduces the major theme of transmission of information - between generations and between and among cells and cell systems. Lectures, workshops, laboratory exercises and small group problem-solving sessions comprise this section.

**Academic Career:** MEDS
**Course Component:** Lecture
**Grade Component:** H/HS/S/LS/U

### MED 5116 - BASIC SCIENCE FUNDAMENTALS 3
**Minimum Credits:** 3
**Maximum Credits:** 3
Section 3 of the basic science block begins with a segment that elucidates the systems of communication that are activated upon challenge by disease causing organisms and physiologic stressors (immunology). The final course in this section is the study of disease-causing organisms, their occurrence, preferred hosts and the diseases they cause. Evaluation is based on laboratory exercises, problem-solving sessions and written examinations.

**Academic Career:** MEDS
**Course Component:** Lecture
**Grade Component:** S/U Basis

### MED 5124 - PATIENT/PHYSICIAN & SOCIETY 1
**Minimum Credits:** 3
**Maximum Credits:** 3
This section consists of two courses: 1) introduction to being a physician has case problems on public health and medicine, breast cancer and HIV/AIDS with patient interviews, group exercises, lectures, independent study and self-directed learning; 2) ethics, law and professionalism addresses the basic concepts and methods for analysis of ethical and legal issues in the physician-patient relationship. The course's sessions are structured as seminars with both didactic and interactive components. Videotapes, email case discussions, and debate will complement the lectures.

**Academic Career:** MEDS
**Course Component:** Lecture
**Grade Component:** S/U Basis

### MED 5127 - BASIC SCIENCE FUNDAMENTALS 2
**Minimum Credits:** 3
**Maximum Credits:** 3
Section 2 of the basic science block is a multi-disciplinary section that introduces students to core principles and terminology of cell and tissue biology and pathology, genetics and metabolism. It introduces students to the biochemical and molecular basis of cell function in the context of normal physiologic function, and to the processes of disease at the cellular level. Cellular, individual and population genetics builds on this course
and study of the principles governing energy metabolism of cells and organisms necessary to maintain homeostasis complete this sequence of courses. Lectures, workshops, laboratory exercises and small group problem-solving sessions comprise this section.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5128 - PPS2 BEHAVIORAL MEDICINE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Section 2 of this block consists of the course - behavioral medicine - which is a multi-faceted consideration of human behavior from the perspectives of both the patient and the physician. The course uses the biopsychosocial model to consider defining elements of the patient-physician relationship, showing how neurobiological, behavioral and social factors can have determinative and interactive impacts in the causation and course of human disease, how they contribute to health, and how they can be modified. Topics are introduced in large group format via patient interviews, videos and panel discussions, each followed by breakout small group sessions featuring case-based scenarios to further the understanding of this complex topic. Student evaluations are based on small group participation, a writing assignment and an exam.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5133 - NEUROSCIENCE/PSYCHIATRY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This first organ systems block includes two courses: neuroscience and introduction to psychiatry. The neuroscience course provides a detailed, comprehensive survey of nervous system structure, function and dysfunction. Topics include sensory and motor systems, learning and memory, language, sleep and epilepsy, as well as brain imaging methods, vascular disorders, neoplasms, and infections of the central nervous system. Material is integrated across multiple disciplines including neurophysiology, neurology, pharmacology, neuropathology and neuroradiology. The goal is to provide a mechanistic understanding of normal and pathological brain function, and to teach methods of identifying and localizing major disease processes. The learning formats are lectures, laboratories, PBLs, case-based neurology conferences and self-study. Student evaluation is based on two written exams and PBL participation. The introduction to psychiatry course introduces students to common psychiatric illnesses and their assessment and treatment. There is a written exam and a final paper or presentation due at the end of the course. Student group attendance and small group participation are also included in the overall course grade, which will combine the two courses.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5137 - INTRODUCTION TO PATIENT CARE 1**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The medical interviewing course assists the student in developing interviewing skills using patient simulators. The introduction to physical examination course provides the first introduction to the techniques of performing a history and physical examination. Practicing on peers, students learn the skills of a normal physical exam and how to conduct it in an orderly and sequential fashion. Emphasis is on technique and normal findings with little discussion of pathophysiology. Use of the stethoscope, oto-ophthalmoscope, reflex hammer and tuning fork are demonstrated and practiced. The goal is to familiarize students in the use of their instruments and prepare them to be observers in physician offices during the remainder of the first year.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5138 - INTRO TO PATIENT CARE 2**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The clinical experience course is designed to familiarize students with how physicians practice medicine in their offices and to expose students to the various aspects of health care delivery in the community. The advanced physical examination course spans the first two years. Pathophysiology and its correlation to hx and ph skills are stressed. Students will record and synthesize the information collected during the clinical encounter as a written history, physical exam, and patient assessment with a goal to do complete and accurate history-taking and physicals.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis
MED 5180 - EVIDENCE AND DISCOVERY 1
Minimum Credits: 0
Maximum Credits: 0
The first course of this block, introduction to medical decision making, teaches critical thinking regarding diagnosis, treatment and prevention of disease as well as statistical methods applicable to clinical studies. This course uses lecture, small group learning sessions, and final individual presentations by students.
Academic Career: MEDS
Course Component: Lecture
Grade Component: S/U Basis

MED 5181 - EVIDENCE AND DISCOVERY 2
Minimum Credits: 0
Maximum Credits: 0
The second section of this block is the first part of a two-year course intended to prepare students for their four-year, mentored scholarly project. In this segment, students will use the tools and skills obtained during the preceding course to analyze seminal literature in science and medicine. Evaluation will be based on student critiques of assigned papers as well as on a formal presentation, to their small group, of a problem of interest to them, methods of approaching it and feasibility of their proposed approach.
Academic Career: MEDS
Course Component: Lecture
Grade Component: S/U Basis

MED 5211 - ORGAN SYMS: NEUROSCIENCES
Minimum Credits: 0
Maximum Credits: 0
Neurosciences, the first course of year two, focuses on a specific neural function or system each week focusing on sensory and motor systems, vegetative functions, learning, language, etc. Material is integrated across multiple disciplines and applies fundamental principles developed in the year 1. The learning format is in small groups, laboratories, lectures, tutorials/conferences and self-study. Student evaluation will be based on written exams and small group problem-solving participation.
Academic Career: MEDS
Course Component: Lecture
Grade Component: H/HS/S/LS/U

MED 5217 - BODY FLUID HOMEOSTASIS
Minimum Credits: 0
Maximum Credits: 0
This second section of the organ systems pathophysiology block consists of four segments: a computer-based introduction to principles of pathology, followed by courses on the cardiovascular, renal, and pulmonary systems. The course is interdisciplinary. In addition to the basic science components, the subject matter includes clinical aspects of diseases and their medical management. The learning format is in small groups, laboratories, lectures, tutorials/conferences and self-study. Student evaluation is based on written exams and small group problem-solving participation.
Academic Career: MEDS
Course Component: Lecture
Grade Component: Grad HSU Basis

MED 5218 - OS2: BODY FLUID HOMEOSTASIS
Minimum Credits: 0
Maximum Credits: 0
This second section of the organ systems pathophysiology block consists of four segments: a week long study of principles of pharmacology, followed by courses on the cardiovascular, renal, and pulmonary systems. The course is interdisciplinary. In addition to the basic science components, the subject matter includes clinical aspects of diseases and their medical management. The learning format is in small groups, laboratories, lectures, tutorials/conferences and self-study. Student evaluation is based on written exams and small group problem-solving participation.
Academic Career: MEDS
Course Component: Lecture
Grade Component: S/U Basis

MED 5222 - ENDOCRINE SYMS/GI/HEMATOLOGY
Minimum Credits: 0
Maximum Credits: 0
This third section of the organ systems pathophysiology block consists of four segments: endocrine and digestion and nutrition cover normal structure and function of the digestive and endocrine systems as well as introduction to diseases of both systems. Reproductive and developmental biology covers material in a chronological fashion from fertilization through aging. Hematology covers the physiology of the major blood forming organs and an introduction to common hematologic diseases. The learning format is small groups, clinical pathologic correlation sessions, laboratories, lectures, tutorials/conferences and self-study. Student evaluation will be based on written exams and small group problem-solving participation.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**MED 5223 - GI/ENDO/HEM/SKIN/MUSK/REPROSCI**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5225 - PHARMACOLOGY**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course begins with the neuroscience segment of organ systems pathophysiology (OS) and runs through all of the courses in organ systems 1, 2 and 3, including a concentrated week of principles of pharmacology with an emphasis on adrenergic pharmacology at the beginning of os2. At appropriate times in those courses, basic mechanisms of pharmacologic agents are taught in the context of each organ system. This course covers classes of agents, mechanisms and drug targets as well as potential side effects and future developments. The format is primarily lecture with some workshops, as well as material incorporated into problem-based learning sessions.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5227 - INTEGRATED CASE STUDIES**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The course objective of this fifth section of the organ systems block is to apply information acquired during the first two years to patient cases as presented on the computer, further developing independent active learning and data acquisition skills. In addition, the course serves as a bridge to the direct patient responsibilities of the final two years of medical school. The format is exclusively problem-based learning. There is no final examination. The course is honors/pass/fail based on small group participation.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5233 - INTRO TO PATIENT CARE 3**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The advanced physical examination course of the introduction to patient care block is an extension of the introduction to physical examination course. During this course, which spans the first two years, students will expand their knowledge of history taking and physical examination skills by examining patients both in adult medicine and in the pediatric setting. Patho-physiology and its correlation to history and physical examination skills are stressed. Students are also expected to record and synthesize the information collected during the clinical encounter as a written history, physical exam, and patient assessment. The goal is to prepare students to do complete and accurate history-taking and physical examinations during their clerkships. This course is integrated with the clinical experience course. There are seven, month-long sessions, four of which will be physical examination sessions and three will be the clinical experience rotations described below. There is a written examination, a clinical performance grade from instructors, and a required performance-based assessment at the end of the course. The clinical experience course is designed to familiarize students with how physicians practice medicine in their offices and to expose students to the various aspects of health care delivery in the community. Each student will be scheduled for three, month-long rotations, one month of one afternoon a week in a physician's office, one month of once a week afternoon visits to an assigned community site for underserved populations, and one month with a student-selected ambulatory sub-specialty office or an additional month at a primary care physician's office. There will also be full class sessions on health care disparities, alcohol and substance abuse, and health care to the underserved. No textbook is required but a syllabus is provided. Completion of weekly teaching and learning logs is required. Grading is determined by attendance and passing the final examination.

**Academic Career:** MEDS  
**Course Component:** Practicum  
**Grade Component:** S/U Basis
The first four weeks of the final section of the introduction to patient care block will be the advanced medical interviewing course. This course is designed to move students from the basic patient interviewing skills that were introduced in the first year medical interviewing course to a higher skill level in patient communication which will be required during the clinical clerkship years. Using patient simulators, and with guidance from a faculty facilitator and peers in small groups, students will learn and practice "hard to ask questions" and deal with specific "content-sensitive" cases (e.g., Abuse, anger, drug use and sexuality). The second four weeks of the block will consist of the clinical procedures course, which will introduce students to basic diagnostic, therapeutic, invasive, and non-invasive procedures commonly performed in clinical medicine. This course gives students the opportunity to practice clinical procedures in a laboratory setting, through interactive small-group sessions with the faculty, using equipment and supplies normally found on patient care units. The goal is to familiarize students with basic clinical procedures that they may be asked to perform on patients during their clinical rotations.

**Academic Career:** MEDS  
**Course Component:** Practicum  
**Grade Component:** S/U Basis

**MED 5236 - MEDICINE, ETHICS, & SOCIETY 2**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course directs students' attention to the context in which medicine resides. We explore ways in which factors such as race, gender, economics, technologic change, law, and ethics have an impact on how patients perceive bodily function, the way practitioners behave in the medical care system, and how patients and care givers interact. The course uses combinations of whole-class lecture, video tape, panel discussion, and interviews with small-group sessions. The small groups involve general discussion, formal debate, role playing, and some patient encounters.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** H/HS/S/LS/U

**MED 5260 - BASIC SCIENCE OF CARE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course will focus on health systems and the delivery of health care. Major objectives will examine a.) How the health care system works, b.) Safety and quality and c.) Interdisciplinary collaboration, problem solving and creativity in health care delivery. The final segment of the course will consist of several small-group, problem-solving sessions. Educational formats include lectures, panel discussions, group exercises and invited speakers. Evaluation will be based on a written examination and on the presentation given in the small group exercise.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** Grad HSU Basis

**MED 5261 - PPS 3 POPULATION HEALTH**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This course has been developed to bring students essential and timely content on selected topics in population health. The course will address issues of: health care finance from the patient's perspective; public health overview; social determinants of care; global health issues with an emphasis on the global burden of disease and related financial issues; financial preparedness for physicians (student debt and looking ahead to specialty choice); health care reform. Learning modalities will be large group didactic sessions, self-study segments, and small group exercises. Evaluation will be determined by: completion of assigned self-study units; attendance at large group sessions; completion of course segment assignments.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** S/U Basis

**MED 5265 - EVIDENCE AND DISCOVERY 3**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
The third section of this block is the second part of a two-year course (methods and dlogic in medicine) intended to prepare students for their four-year, mentored scholarly project. In this segment, students will use the tools and skills obtained during the preceding course to analyze seminal literature in science and medicine. Evaluation will be based on students' critiques of assigned papers as well as on a formal presentation, to their small group, of a problem of interest to them, methods of approaching it and feasibility of their proposed approach.

**Academic Career:** MEDS
MED 5322 - ADULT INPATIENT MEDICINE
Minimum Credits: 0
Maximum Credits: 0
This is an 8 week interdisciplinary clerkship divided into 2 blocks of 4 weeks each. During each block, the student is assigned to an inpatient rotation either at Montefiore, the Oakland V.A. medical center or Shadyside hospital. On the first day of each block, the student is required to attend didactic sessions given by faculty in emergency medicine and geriatric medicine. During the inpatient rotation, students are assigned their own patients and are taught, under supervision, to apply acquired skills to clinical situation. Usml in medicine is given at end of rotation and exam in CCM.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/LS/U

MED 5328 - AMBULATORY CARE CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
The eight week combined ambulatory medicine and pediatrics clerkship provides a combination of four week experiences in the disciplines of internal medicine and pediatrics. One half-day per week the students participate in a multi-faceted, interactive didactic session learning advanced skills and discussing issues common to both of these disciplines. Student's clinical experiences in internal medicine and pediatrics are at office or clinic sites where they will be exposed to the spectrum of care that is provided in the ambulatory setting. Sites may include hospital-based practices and community locations. This is a required clerkship.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/LS/U

MED 5345 - CLERKSHIP REPEAT COURSE
Minimum Credits: 0
Maximum Credits: 0
This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/LS/U

MED 5346 - AMBULATORY CLERKSHIP REPEAT
Minimum Credits: 0
Maximum Credits: 0
This course will be registered when the necessity to record a student's repeat of an unsatisfactory performance in the ambulatory care clerkship of the third year. This course is used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/LS/U

MED 5350 - DEATH, DYING AND THE DOCTOR
Minimum Credits: 0
Maximum Credits: 0
This elective offers medical students the opportunity to explore in depth some of the philosophical, cultural, religious, and existential aspects of human beings' encounter with death. The course will employ short stories and poetry, the visual arts, and more traditional scholarly work in the humanities and social sciences. Though the course is not a clinical introduction to palliative care, it is intended to enhance students' preparation for intelligent, self-aware, and skillful care of critically ill and dying patients. While students will have some contact with the palliative care consultation service during the elective, the primary goal of the course is to enrich students' appreciation of the meanings of death and dying as experienced and expressed by human beings throughout history, and in various cultural settings. Requirements will include weekly meetings to discuss assigned reading, observation with the palliative care service, and a personal reflection paper of 7 to 10 pages.
Academic Career: MEDS
Course Component: Practicum
Grade Component: H/HS/LS/U
MED 5398 - CLINICAL MILITARY CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
Medical students who are on military scholarship and must do an active duty tour, will be given credit provided it is approved by the school as a worthwhile education experience. This is a third year level, four week experience.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5399 - NON-CLINICAL MILITARY CLERKSHIP
Minimum Credits: 0
Maximum Credits: 0
Medical students who are on military scholarship and must do an active duty tour, will be given credit provided it is approved by the school as a worthwhile experience. The course will be given a course title appropriate to the contents at the time of evaluation. This is a third year level, four week experience.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MED 5401 - MEDICINE ACTING INTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Elective provides student with exceptional insight into the practice and theory of internal medicine and serves as preparation for other intensive primary care oriented specialties. Student will have an advanced degree of primary patient involvement. Sub intern will perform initial patient evaluation and institute appropriate diagnostic, therapeutic measures under direct guidance and supervision of resident and attending physician and begin to learn order-writing skills. This experience serves as a bridge between basic clerkship and internship year. Also available at hospitals outside the health center.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5402 - ACTING INTERNSHIP IN MICU
Minimum Credits: 0
Maximum Credits: 0
Course designed to actively involve students in evaluation and therapy of critically ill patients with shock, respiratory failure and other acute life-threatening disorders. Students have primary responsibility for a limited number of patients in the ICU under direct supervision of medical residents and pulmonary critical care fellows. Student will perform initial evaluation of patient with a resident and assist in resuscitation and life support procedures. Students will formulate diagnosis and therapeutic plan of management.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5403 - CARDIAC INTENSIVE CARE UNIT
Minimum Credits: 0
Maximum Credits: 0
Course is designed to actively involve qualified students in evaluation and therapy of critically ill patients with acute myocardial infarction, unstable angina pectoris, disorders of cardiac rate and rhythm, heart failure, cardiogenic shock, and other life-threatening cardiac disorders. Students have primary responsibilities for limited number of patients under direct supervision of residents and cardiology fellows. Students perform initial evaluation with resident/fellows and assist in all aspects of acute care with members of cicu-team.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5405 - ADVANCED SUBINTERNSHIP
Minimum Credits: 0
Maximum Credits: 0
Student will be treated in all respects as an intern on a team with a full medical intern and resident; on-call every 4th night. Offered in the second half of the year because a more advanced clinical background will be necessary in order to function in this independent role. This rotation is only for...
those students who have demonstrated the ability to perform in this fashion as judged by the department of medicine. Prior approval is required.

**MED 5406 - EXTRAMURAL ACTING INTERNSHIP**

- **Minimum Credits:** 0
- **Maximum Credits:** 0

Students will register for this course when participating in an internal medicine acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

**MED 5425 - COMBINED MEDICINE/PEDIATRICS**

- **Minimum Credits:** 0
- **Maximum Credits:** 0

The goals of this elective are to introduce medical students to the specialty of combined internal medicine-pediatrics. In particular, this elective focuses on understanding the issues of patients with special health care needs as they transition from pediatric to adult-centered care. Students will be involved in numerous educational activities, including attending several outpatient specialty clinics, visiting pediatric rehabilitation facilities, performing home visits with patients, performing independent learning activities, and reading the current literature about transitions in care. Students are supervised by internal medicine, pediatric, and med/peds faculty members who are involved in caring for patients with special health care needs of all ages. If students have a particular interest in a certain subspecialty clinic, every effort will be made to accommodate a request made to the course director.

**MED 5430 - CLIN PHARMACLGY & HYPERTENSION**

- **Minimum Credits:** 0
- **Maximum Credits:** 0

During a 4 week elective, students will engage in daily patient care activities; seeing hypertensive patients and patients with treatment-related problems (adverse reactions, drug abuse, drug interaction problem, therapeutic misadventures). Student has opportunity to study diagnosis and treatment in hospitalized patients at PUH and VAH only, as well as in hypertensive clinics at both hospitals. Proper evaluation of specific therapy will be emphasized to the student indicating the role of clinical pharmacology in the internist's activities with reference to ongoing research whenever applicable.

**MED 5440 - CARDIOLOGY**

- **Minimum Credits:** 0
- **Maximum Credits:** 0

This 4 week elective offers broad experience in clinical cardiology and exposure to current research problems at the health center as well as at hospitals outside health center. Activities center on cardiology teaching service, noninvasive graphics, coronary care unit, intensive cardiac monitoring area, central heart station (ECG), and nuclear cardiology. Students participate in daily activities including inpatient and outpatient consultations of the initial workup on patients. Students observe pacemaker insertions, cardioversions, cardiac catherizations, etc.

**MED 5460 - ENDOCRINOLOGY AND METABOLISM**

- **Minimum Credits:** 0
- **Maximum Credits:** 0

Emphasis is placed on clinical and lab evaluation and treatment of patients with endocrine disorders during 4 week elective. Under supervision of resident and fellow, student will perform initial workups of all patients seen in consultation by endocrinology service. Patients will be presented to attending physician and discussed in depth on rounds held 3-4 days/week. Students will perform initial evaluation of outpatients seen in endo-diabetic clinic. Goal is to provide student with knowledge of endocrinology that is expected of a general internist. The elective is also available at hospitals outside the health center.
MED 5470 - GASTROENTEROLOGY AND NUTRITION
Minimum Credits: 0
Maximum Credits: 0
This 4 week elective gives students the exposure to the wide variety of diseases referable to the gastrointestinal tract, liver, biliary system and pancreas. Student is offered the opportunity to perform initial consultation workups of patients, observe and/or participate in special procedures as procto proctosigmoidoscopy, colonoscopy, endoscopy, liver biopsy and endoscopic retrograde cholangiopancreatography and attend clinical conferences and seminars for discussion of case findings, x-rays and histologic material for patient management. Also available at hospitals outside the health center.

MED 5471 - OUTPATIENT GI AND HEPATOLOGY
Minimum Credits: 0
Maximum Credits: 0
This is a unique ambulatory care experience in a nonhospital setting. Students will take medical histories and perform physical examinations under supervision of a gastroenterologist. Student will observe the clinical evaluation as well as performance of endoscopic procedures in patients with gastrointestinal disorders.

MED 5479 - ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
Elective provides opportunity to be involved in care of patients with diverse oncologic diseases. Students participate in consults at PUH, MUH, VAH, and PGH cancer institute outpatient clinic. Consults and rounds are supervised by residents and fellows. Objectives are to provide an in-depth understanding of patho-physiology of cancer and metastasis, as well as the principles of systemic treatment with standard anti-neoplastic agents and rationale and approach of clinical investigation of new approaches to cancer diagnosis and therapy.

MED 5480 - HEMATOLOGY/ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
This 4 week elective provides an opportunity to be involved in the care of patients with diverse hematologic and oncologic diseases. Consultations are supervised by the fellows with formal rounds being made on all patients seen, resident and fellows with formal rounds being made on all patients seen in consultation. Clinical and research conferences and morphology review conferences are held weekly. Also available at hospitals outside the health center.

MED 5481 - BLOOD COAGULATION
Minimum Credits: 0
Maximum Credits: 0
This 4 week elective offers a number of interesting and useful experiences. Student is exposed to both outpatient and inpatient bleeding problems. In addition, student learns to evaluate and interpret clotting tests. There is also an opportunity to meet, examine and become involved in the treatment of 200 hemophiliacs followed in the hemophilia center of Western pa.
MED 5485 - STEM CELL TRANSPLANTATION SERVC
Minimum Credits: 0
Maximum Credits: 0
This 4-week elective supervised by a hematology fellow and a dedicated nurse practitioner manages patients receiving high dose chemotherapy and the complications of stem cell transplantation (e.g. Graft versus host disease, opportunistic infections). Clinical and research conferences are held weekly.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5490 - INFECTIOUS DISEASES
Minimum Credits: 0
Maximum Credits: 0
This 4 week elective will acquaint the student with the clinical and laboratory aspects of infectious diseases, with varying emphasis on one or the other, may be tailor-made to the interest of the individual student. Student will be supervised by resident or fellow and will make daily rounds on patients. Students will workup cases and present them to a senior staff member with whom they will also have daily contact. Student will learn to correlate and evaluate laboratory findings. Formal rounds are held weekly where pathogenesis, diagnosis and treatment are discussed.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5500 - PULMONARY MEDICINE
Minimum Credits: 0
Maximum Credits: 0
Elective is aimed at acquainting student with the diagnostic and therapeutic approaches to the common pulmonary diseases, including lung cancer, asthma, chronic bronchitis, emphysema, etc. Student will become acquainted specifically with chest roentgenogram and subtleties of its interpretation through daily rounds with staff and fellows. Student will work as a team with a fellow and staff attending seeing consultations and developing therapeutic and diagnostic plans which will be reviewed and critiqued by the fellow and attending. This is a 4 week elective.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5510 - RHEUMATOLOGY AND IMMUNOLOGY
Minimum Credits: 0
Maximum Credits: 0
This four week elective is engaged in an integrated program of patient care, teaching and research with emphasis on clinical evaluation and treatment of patients with a variety of rheumatic and immunologic disorders. Students perform initial exam of patients seen under the supervision of a fellow and rotating residents and take an active role in teaching rounds with a member of the faculty specifically assigned to this service. Students may share in responsibility for primary care of patients admitted to hospital and several outpatient clinics.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5520 - RENAL DISEASE
Minimum Credits: 0
Maximum Credits: 0
This 4 week elective provides exposure to a full range of renal and fluid-electrolyte disorders. Students interview and examine patients admitted to the care of the renal staff physician or referred consultation, will follow the patients jointly with the nephrology fellow and participate in daily rounds with faculty. Attending also conducts ad hoc discussions regarding renal pathophysiology, diagnosis and management of acute and chronic renal diseases, and electrolyte disorders. Students attend regularly scheduled conferences. This elective is also available at hospitals outside the health center.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5530 - NUTRITION & INTESTINAL HEALTH
Minimum Credits: 0
Maximum Credits: 0
This elective is designed to offer students a learning experience in both the science and practice of medical nutrition. Under the supervision of faculty
and fellows, students will be given responsibility for evaluation and management of patients seen in nutrition clinics, admitted to the medical and surgical services. Daily work and teaching rounds are supplemented with regular conferences and seminars on basic and clinical topics in nutrition. Students will be required to participate in weekly journal club to review current literature pertinent to nutrition.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5540 - GERIATRIC MEDICINE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This 4 week elective will introduce students to fundamentals of practice of geriatric medicine. Students will participate in all aspects of a multidisciplinary clinic, working primarily with interests but also with geriatric psychiatrists and geriatric social workers. Primary care of the elderly will be stressed, but consultative work will also be done. Conference will be held to discuss cases with all team members and for more didactic teaching, including weekly geriatric psychiatry conferences. Also participate in evaluation and care of nursing home patients, in home visits, family conferences and WPIC.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5550 - OCCUPATIONAL MEDICINE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This 4 week elective will allow students to develop the technical skills to take an occupational and environmental history, how to obtain exposure information, how to identify toxicological information, and how to manage exposure-related diseases. Students will learn the legal, social, economic and preventive issues central to occupational medicine.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5560 - PULMONARY INTENSIVE CARE UNIT**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This elective is designed to actively involve qualified students in evaluation and therapy of critically ill medical patients with shock, respiratory failure and other acute life-threatening disorders. Students have primary patient responsibilities for a limited number of patients in the ICU under direct supervision of medical residents and pulmonary critical care fellows. Student will perform initial evaluation of patient with a resident and will assist in resuscitation and life support procedures. Students will formulate diagnostic and therapeutic plan of management.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5565 - PALLIATIVE/HOSPICE CARE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
A structured clinical rotation to increase awareness, knowledge and clinical skills when dealing with terminally ill patients and their families. Time will be spent doing consults and seeing patients and families in outpatient clinics and their homes. The objectives include assess, diagnose and effectively manage common problems and symptoms of terminal illness; recognize and know how to deal with symptoms of normal and complicated grief; recognize common psychosocial and spiritual issues faced; understand the impact on the family and friends; develop appropriate communication skills.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5570 - LIVER TRANSPLANT**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This 4 week elective offers an opportunity to participate in the workup and evaluation of prospective liver and gut transplant candidates. Student will work closely with GI fellow and senior staff of the division. Student will be taught the criteria utilized to make a decision for transplantation and an appreciation of the care required in the management of such patients.  
**Academic Career:** MEDS
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**MED 5580 - SEXUALLY TRANSMITTED DISEASES**

Minimum Credits: 0  
Maximum Credits: 0  
This 4 week elective will provide an opportunity to gain practical experience under the direct guidance and supervision of the attending physician in the diagnosis and treatment of commonly seen sexually transmissible diseases including gonorrhea and syphilis. Opportunities will be available for obtaining skills in the commonly performed laboratory procedures such as gram staining and culturing and in performing dark field exams.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**MED 5590 - SUBSTANCE ABUSE IN PRIMARY CARE**

Minimum Credits: 0  
Maximum Credits: 0  
This elective is offered to explore diagnosis and treatment of substance abuse disorders in primary care setting (both inpatient and outpatient). A variety of clinical sites will be used to accomplish objectives of identifying common presenting symptoms, become familiar with diagnostic criteria for dependence vs hazardous use, become familiar with variety of screening and assessment instruments, participate in patient detox, experience inpatient rehabilitation, implement brief interventions for hazardous drinkers, experience 12 step program, participate in smoking cessation counseling.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**MED 5600 - OUTPATIENT MEDICINE**

Minimum Credits: 0  
Maximum Credits: 0  
This 4 week elective will introduce students to the practice of outpatient medicine. Student will have the opportunity to evaluate new patients in the outpatient setting and plan appropriate investigative and therapeutic approaches. Student will also provide follow-up care of patients with chronic illness in an attempt to maintain their maximum wellbeing and also evaluate new symptoms in patients with chronic illness. Student will be involved in decision-making regarding the need for hospitalization and how to minimize this aspect of patient care.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**MED 5601 - COMMUNITY HEALTH**

Minimum Credits: 0  
Maximum Credits: 0  
The community health elective is a four-week course designed to expose fourth-year medical students to health care access and public health issues among underserved populations in the Pittsburgh area. The curriculum will include assigned readings/research on health issues for underserved populations, particularly in community organizing and health promotion/disease prevention. Clinical experience involves supervising patient care in many locations, such as: community health centers (squirrel hill community health center, hilltop clinic, Mt. Oliver, McKeesport, and Wilkinsburg); family links; Beth haven; wellspring; jubilee kitchen. Also included are those homeless clinics or outreach locations operated by the program for health care to underserved populations (PHCUP): (operation safety net; Birmingham clinic; the salvation army Northside). Exposure will be given to multi-disciplinary outreach efforts by the health care for the homeless project and other social services agencies. Students will also spend one-half day at the health law clinic assisting law students and their clients on disability cases, tenant-landlord dispute and other legal services. Students may also have the opportunity to assist clients at their court hearings. Students will also have the opportunity to lead health talks at community agencies and present at the community health forum. Very interested and motivated students will be taught the basics of designing survey, conducting focus groups and community needs assessment. There are also opportunities to participate in ongoing research projects by PHCUP. Students participating in the underserved area of concentration are given time to pursue their longitudinal projects. A short self-reflective or advocacy paper is also required. Patient care is sixty percent of the elective with thirty percent of that spent at the Birmingham clinic. Twenty percent is spent within multidisciplinary outreach. Twenty percent of the four-week elective will be spent doing research, attending or giving health talks and a presentation.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

**MED 5610 - BONE MARROW TRANSPLANTATION**
Minimum Credits: 0
Maximum Credits: 0
Provides an introduction to adult bone marrow transplantation for the treatment of acute and chronic leukemia, aplastic anemia, other hematologic diseases and treatment of solid tumors. Student has an opportunity to participate in initial selection of patients, the intake interview, and the marrow harvesting procedure and become familiar with various marrow preparative regimens. Student participates in daily patient management rounds, treatment of complications, including graft vs host disease, interstitial pneumonia and various infectious problems.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5620 - INTERNAL MEDICINE CONSULTATION
Minimum Credits: 0
Maximum Credits: 0
This consult service provides consultation for patients on the psychiatric service. Students participate as partners with a senior medical resident under direct supervision of the course director. Objectives are that student be proficient in HX, PE and assessment required of GIM consultant; be proficient in fiscally responsible diagnosis and treatment; be proficient in clinical pharmacology of psychiatric patient and develop skills required to participate as a member of the psychiatric therapeutic team.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
An individualized course of study may be arranged with the department of internal medicine to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5655 - INTRL MED SUBSPCLTY
Minimum Credits: 0
Maximum Credits: 0
This elective will be divided into two (2) periods for two (2) weeks each. Students taking this elective will chose any two of the subspecialties listed: rheumatology & immunology; pulmonary medicine; gastroenterology & nutrition; endocrinology & nutrition; cardiology, infectious disease; palliative/hospice care; geriatric medicine; renal disease and hematology/oncology.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5710 - CLINICAL PHARMACOLOGY (ILS)
Minimum Credits: 0
Maximum Credits: 0
The integrated course program consists of four overlapping components; general clinical pharmacology; disease-specific clinical topics; workshops; and four sessions on recently developed drugs. The format of the course includes traditional lectures, case discussions, and discussions of current articles, problem-based learning, and workshops. Computer assisted techniques will be utilized.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5715 - NEOPLASIA & NEOPLASTIC DISEASE
Minimum Credits: 0
Maximum Credits: 0
Selective will emphasize principles of neoplastic and neoplastic disease. There will be an emphasis on interactive participation in a variety of clinical and basic activities. Format will include traditional as well as interactive lectures, case discussions, discussion of current articles, problem-based learning, workshops and clinical/basic science experiences.

Academic Career: MEDS
Course Component: Lecture  
Grade Component: H/HS/S/LS/U

MED 5765 - PRECLERKSHIP COURSE  
Minimum Credits: 0  
Maximum Credits: 0  
The course is an introduction and transition for rising third year medical students to provide necessary skills and information. The daily sessions include large and small group formats. Topics include: an introduction to the combined clinical years, industry relations, communication skills, roundsmanship, honor council, infection control, clinical logs, general rules for a successful clerkship, and using the electronic patient record training. Clerkship directors will meet the students in skills workshops to and instruct in writing prescriptions, order writing, history and physical write-up reviews, and soap (subjective data, objective data, assessment, and plan) notes. Exercises will include a hands-on hospital simulation on pandemic and disaster preparedness, patient assessment workshops and interdisciplinary teamwork presentations (allied health professional presentation and panel, and a clinical presentation on resident team/nursing support). All students will participate in a CPR recertification course, with respiratory n95 mask fit testing. There will also be a lecture on professionalism followed by humanism honor society group read vignettes presented by student members of the Watson humanism honor society. Faculty facilitators will then conduct humanism in medicine small group sessions. Attendance at all sessions is required to satisfactorily complete the course. Grades will be based on attendance, course participation, and completion of homework assignments.  
Academic Career: MEDS  
Course Component: Clinical  
Grade Component: H/HS/S/LS/U

MED 5771 - ASSESSMENT WEEK  
Minimum Credits: 0  
Maximum Credits: 0  
The overall goal of this course is for students, who are entering the fourth year of the first professional medicine program, to complete a series of structured assessments and participate in focused review sessions designed to enhance preparation for the National Board of Medical Examiners (NBME) United States Medical Licensing Examination (USMLE), step 2 clinical knowledge and clinical skills exams. Specific objectives include: reviewing common important dermatological conditions and how to describe skin lesions. Reviewing common radiologic findings that every graduating student should know how to identify. Reviewing targeted areas in obstetrics and gynecology in preparation for step 2 CK. Interpreting clinical pathological lab values to provide better patient care. Interpreting common and life-threatening EKG findings. Practicing with step 2 CK exam questions to better understand content and timing of the exam. Practicing common clinical procedures often performed in acting internships.

Grade Component: Grad HSU Basis

MED 5775 - GERIATRIC INTERSESSION COURSE  
Minimum Credits: 0  
Maximum Credits: 0  
This new three day course (six half days) in geriatric medicine provides a multifaceted exposure to geriatric medicine through lectures, small group sessions using case studies, and patient experiences during visits to long term care (LTC) facilities. The course will provide each student with the knowledge, skills, and experience to recognize and approach common problems in older adults in outpatient and inpatient settings and in nursing homes. The course is designed to be interactive and teach practical skills that can be used in students' future training and career. Topics will include geriatric assessment and geriatric syndromes; assisted living, post hospital rehabilitation, dementia in a nursing home or LTC setting; pharmacology related to aging, drug selection for the elderly, medication reviews and ethics, communication and decision making in geriatrics. Students will be exposed to the spectrum of care for geriatric patients by visiting one of three UPMC long term care facilities in local community settings. Students will make a final presentation of their case study to faculty and peers, take a written examination, and evaluate the course and the course faculty on the last day. One grade [honors/pass/fail] will be given for the entire three-day course and will be based on student attendance at all sessions, participation in small group learning sessions, an acceptable case presentation to peers and faculty, and a passing grade on the written examination.  
Academic Career: MEDS  
Course Component: Lecture  
Grade Component: Grad HSU Basis

MED 5776 - ONCOLOGY INTERSESSION COURSE  
Minimum Credits: 0  
Maximum Credits: 0  
This new three day course (six half days) in oncology will address clinically-relevant oncology, including cancer etiology and prevention, and targeted cancer treatment. The content of this course is targeted at the level of "what every physician should know". Thus it has sessions on myths of cancer prevention and cure, pain management, evaluation of some publicized 'new' cancer treatments and on oncologic emergencies. The course will provide students with a multifaceted exposure to oncology and oncology research through lectures, small group sessions using case studies, and hands on assessments of oncology patients with skill sessions for brEast exams, prostate exams, colonoscopies and UGI endoscopies. Students will
also participate in a UPCI basic science seminar and oncology grand rounds. One grade [honors/pass/fail] will be given for the entire three-day course, based on student attendance at all sessions, participation in small group skills and case study sessions, and the grade on the final examination.

Academic Career: MEDS
Course Component: Clinical

MED 5777 - GERIATRICS AND ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
This one week course provides an update for clerkship students in the related areas of cancer diagnosis and treatment and in the recognition and approach to common problems in older adults in various environments. Updates on specific advances in both fields are presented as well as several sessions on the intersection of cancer diagnosis and care as specifically relevant to aging populations. Teaching modalities include lecture, small group sessions and interactive skill sessions.

Academic Career: MEDS
Course Component: Workshop
Grade Component: H/HS/S/LS/U

MED 5778 - GERIATRICS AND ONCOLOGY
Minimum Credits: 0
Maximum Credits: 0
The week-long geriatrics and oncology course focuses on the critical issues of aging and cancer. This course is placed in the curriculum at the mid-point of the third year, which is a unique teachable moment where students can benefit from focused instruction on key topics which are commonly encountered during the core clerkships. The coverage of both topics is designed to build on the clinical exposure that students have had; both to the impact of the aging population on clinical practice as well as the pervasiveness of cancer as a medical challenge. Both topics address practical issues related to care of these patients, recent advances in clinical care, and also have an experiential component. Students visit with patients at the Hillman Cancer Center during the oncology segment and visit one of three local nursing homes to meet with the patients and the people who care for them during the geriatrics section. Conferences follow these experiences to allow faculty-guided discussions of the experience.

Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5779 - CLINICAL FOCUS: GERIATRICS
Minimum Credits: 0
Maximum Credits: 0
The week-long geriatric course focuses on an interprofessional team approach to complex issues related to aging, which span the basic sciences, clinical acumen, and profound socioeconomic issues for our society. The course is intended to help medical students, as well as selected nursing and pharmacy students, understand the critical issues of aging, and the importance of team-based health care for geriatric patients in long term care facilities. The course is placed in the curriculum at the mid-point of the third year, which is a unique teachable moment where students can benefit from focused instruction on key topics which are commonly encountered during the core clerkships. The course is designed to provide students with the knowledge, skills, and experience to recognize and approach common problems in older adults in inpatient and outpatient settings as well as in the nursing home.

Grade Component: H/HS/S/LS/U

MED 5810 - MEDICAL RESEARCH
Minimum Credits: 0
Maximum Credits: 0
A number of pure research opportunities are available to interested students and such arrangements should be made with individual members of the department. Research elective experiences may be intellectually rewarding and afford the opportunity to determine their aptitude for research and teach them a life-long way of thinking about the approach to biological problems whether or not they intend to make research a career. A few that are available are research in renal electrolyte physiology, investigative gastroenterology and research in hematology/oncology.

Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MED 5815 - RES IN CLINICAL PHARMACOLOGY
Minimum Credits: 0
Maximum Credits: 0
This elective offers participation in research activities within the center for clinical pharmacology. The student will be integrated into an ongoing research project being conducted at the center, with the type and degree of participation appropriately adjusted for prior research experience. The objective of the course is to acquaint students with career opportunities in clinical pharmacology; introduce students to modern biomedical research and increase student's knowledge of a specific area in clinical pharmacology.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5830 - INVESTIGATIVE GASTROENTEROLOGY**  
Minimum Credits: 0  
Maximum Credits: 0  
Areas of investigation include clinical studies of constipation and defecatory disorders, fecal incontinence, gastric emptying, lab studies of changes in bile and liver chemistry occurring during liver regeneration, partial obstruction of common bile duct, or biliary lithotripsy. This 4 week elective is conducted at Montefiore hospital.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5831 - MEDICAL ONCOLOGY RESEARCH**  
Minimum Credits: 0  
Maximum Credits: 0  
This 8 week elective is available to students interested in laboratory and/or clinical research experience in medical oncology. An approved prospectus must be prepared prior to the start of project.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5833 - RENAL PHYSIOLOGY RESEARCH**  
Minimum Credits: 0  
Maximum Credits: 0  
Intended for the student with special interest in renal physiology especially as it applies to human medicine. Exposure to techniques employed in the study of human and animal renal physiology and body fluid metabolism, including standard clearance techniques, total balance study and renal micro puncture. Assistance with and direct involvement in an ongoing research project and in certain cases, the student may initiate a related project. Adequate time will be reserved for literature research and data analysis. Optimum time for this elective is 16 weeks.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5835 - RHEUM & CLINCAL IMMUNO RSRCH**  
Minimum Credits: 0  
Maximum Credits: 0  
Students may participate in either clinical or laboratory based research projects. Student will complete background reading on selected area of concentration. Goal is for student to present findings at a research seminar, a regional or national meeting or as a publication in a professional journal.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5900 - EXTRAMURAL INTERNAL MEDICINE**  
Minimum Credits: 0  
Maximum Credits: 0  
This pertains to all senior electives taken at other schools.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**MED 5901 - INDEPENDENT STUDY**
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience. This course is for students outside the school of medicine and will be specifically titled to define content of experience.

**Academic Career:** MEDS  
**Course Component:** Independent Study  
**Grade Component:** H/HS/S/LS/U

---

**MED 5902 - ADVANCED GENERAL MEDICINE**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This 4 week elective will introduce medical students to a wide variety of health care experiences in general internal medicine. This will include opportunities to evaluate patients in the in- and out-patient settings, review physical diagnosis skills, improve interviewing skills, evaluate and analyze laboratory, radiology and pathology data, attend a variety of didactic lectures and participate in case presentations. Settings will include a community medicine program, a veteran's health care system and a tertiary care medical center.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**MED 5910 - NARATV, LIT & EXPRN OF ILLNESS**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Will explore culture and practice of medicine from perspective of an outside observer through use of various types of medical literature (poetry, fiction, non-fiction and essays). Clinical experiences traditionally considered to lie outside physician's role designed to complement exploration of perceptions patients have of hospitals and doctors. Sessions focus on assigned readings, with attention to journal entries and weekly short essays. Clinical experiences, for two half days per week, complement participant's interests, seminar readings, and goals of experiencing clinical setting through a non-medical lens.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**MED 5911 - TEACHING MEDICAL STUDENTS**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
Those who go on to post-graduate education (residency) at teaching hospitals will be responsible for teaching medical students. This elective is designed to help our graduates acquire the teaching skills necessary to effective teach medical students. This fourth-year level course has two primary objectives: 1) introducing fourth year students to the skills of teaching; and 2) enhancing physical diagnosis skills while practicing the skills of effective teaching. This fourth-year level course will consist of didactic instruction, small group exercises, and working with standardized patients. Topics to be covered include: giving an effective lecture; precepting a medical student; giving feedback; evaluating students; dealing with problem learners; teaching clinical reasoning and just plain teaching. Physical diagnosis instruction will highlight core information and more advanced skills. Small group exercises will include giving a mini lecture; running a PBL; teaching about oral presentations/writing up h & PS; and teaching at the bedside. The students will alternate being teacher and student. Other practical teaching experiences working with current third year students may be possible depending on interest and availability. These opportunities could include: running a student-teaching attending session in medicine; working with current students participating in an outpatient setting; facilitating a small group (e.g. Ethics). Students will also learn how to critique teaching sessions by evaluating faculty lectures and sitting in on small groups and evaluating the facilitator. To successfully complete this course you must attend all scheduled sessions, give one presentation of a mini-lecture to the group, and critique assigned educational experiences.

**Academic Career:** MEDS  
**Course Component:** Practicum

---

**MED 5920 - GLOBAL HEALTH PREPARATORY SEM**  
**Minimum Credits:** 0  
**Maximum Credits:** 0  
This is a four (4) week seminar designed to prepare a student or resident for an international clinical experience and to provide a foundation for future global health advocacy and activism. The seminar will consist of 1/3 didactic instructions, 1/3 team-based learning and 1/3 practical experiential learning. It is organized into 4 tracks: 1) global health public policy 2) ethics & human rights 3) evidence based medicine for developing countries and clinical skills and 4) tropical infections. Faculty from GSPIA will provide guest lectures on selected topics regarding NGOS, global actors, development, policy analysis, corruption and transnational governance. Dr. Barnard will coordinate the bioethics and human rights track which
highlights important documents regarding the right to health, policy and system factors contributing to health inequalities, social determinants of health and research ethics through case studies. Dr. Veldkamp coordinates the tropical medicine track that provides in-depth exploration of the diagnosis and treatment of common parasitic diseases, HIV, TB, and malaria according to international guidelines and local context. Participants will be exposed to hands-on sessions in basic microscopic examination. Lastly, Dr. Bui will cover EBM in developing countries reviewing existing literature, physical exam skills/tools including ultrasound, low cost/bedside diagnostics, algorithms and clinical procedures relevant for the general practitioners in developing countries.

**Academic Career:** MEDS  
**Course Component:** Seminar  
**Grade Component:** H/HS/S/LS/U

### MED 5925 - STREET MEDICINE

**Minimum Credits:** 0  
**Maximum Credits:** 0  
This one month clinical elective will focus on the health care of those sleeping on the streets of Pittsburgh. This group presents significant challenges in terms of access to care, continuity of care, cultural barriers, as well as a variety of medical issues. By working directly with the street homeless in their environment, students will see the health care system "from the outside" and learn to partner with a largely alienated population to improve their health. Operation safety net (OSN) is a unique program of the Pittsburgh mercy health system, located at UPMC Mercy, in which walking teams visit the unsheltered homeless in the alleys, under the bridges and along the river banks where they live. Follow-up care, including medical, psychiatric, social and housing services are provided by a dedicated case management team. An inpatient consult service specializes in the interface of the street homeless with the medical system.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

**Grade Component:** No Grade Required

### MED 5996 - PROLOGUE TO MEDICINE PROGRAM

**Minimum Credits:** 0  
**Maximum Credits:** 0  
The five week prologue to medicine program promotes academic achievement and retention by introducing students to the courses that they will take during the first year of medical school. The program features a non-graded instruction in the following areas: introduction to medical gross anatomy, cell biology, and introduction to professionalism. Problem-based learning (PBL) exercises and learning/study strategies instruction supplement the
All classes are designed to model the content and pace of the actual courses. The courses are taught by the same medical school faculty who teach the courses during the school year.

**Academic Career:** MEDS  
**Course Component:** Lecture  
**Grade Component:** No Grade Required

### MED 5999 - FULL TIME RESEARCH
- **Minimum Credits:** 0  
- **Maximum Credits:** 0

Students may participate in a research fellowship with a basic science or clinical researcher at the University of Pittsburgh or at another University for a period of one year. The fellowship must be competitive (open to other students with the best qualified student chosen) and must be approved by the associate dean for student affairs in the medical school.

**Academic Career:** MEDS  
**Course Component:** Independent Study  
**Grade Component:** No Grade Required

### Medicine - Pharmacology

#### MSMPHL 2300 - MS THESIS RESEARCH
- **Minimum Credits:** 1  
- **Maximum Credits:** 14  

A directed research project which results in a thesis for a master's degree.

**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Molecular Biophy & Struct Bio (MS)

#### MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY
- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course consists of a series of lectures and tutorial sessions that focus on the general principles of pharmacology. Major topics are principles of pharmacokinetics (including drug absorption, distribution, and metabolism), pharmacodynamics (quantitation of drug-receptor interactions) and mechanisms of action of cardiovascular and autonomic drugs. In addition, this course will include both animal laboratory and human simulator demonstrations that illustrate important pharmacological principles discussed in class.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

#### MSMPHL 2350 - RESEARCH SEMINAR
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

Beginning in the second year of the program students will be required to attend the departmental seminar series. These seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers in pharmacology and related fields. In order to receive credit for the course, students must attend a minimum of 80% of the seminars.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

#### MSMPHL 2355 - PHARMACOLOGY SUMMER SEMINAR
- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

Beginning in the second year of the program students will be required to attend the departmental seminar series. These seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers in pharmacology and related fields. In order to receive credit for the course, students must attend a minimum of 80% of the seminars. Present once each summer and attend a minimum of 80% of the summer seminars in order to receive credit for the course.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis
MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION
Minimum Credits: 3
Maximum Credits: 3
This course will explore different types of signaling pathways activated by receptor-ligand interactions. Topics to be covered include, but are not limited to: g-protein linked receptors, adenylate cyclases, small GTPases, kinases and phosphatases, nitric oxide, phospholipases, steroid hormone signaling, and pharmacological applications of signaling pathways.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MSMPHL 2370 - DRUG DISCOVERY
Minimum Credits: 3
Maximum Credits: 3
Drug discovery is an interdisciplinary science that seeks to identify small molecular and/or biologic probes and to understand at the molecular level how these probes affect macromolecular processes. This course will discuss various topics that are relevant to current approaches and principles in drug discovery including target validation, drug origins, cell based screening, high throughput screening, proteomic approaches to drug discovery, computational biological aspects of drug discovery, and pharmacoinformatics, as well as topics in preclinical drug development and intellectual property. The course will include case studies intended to aid students in a full understanding of the drug discovery process.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMPHL 2390 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This course provides an opportunity for students to carry out a specific laboratory project in any area of interest in pharmacology.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Pharmacology (PHD) or Interdis Biomedical (UNK)

MSMPHL 3300 - PHD DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Pharmacology (PHD)

MSMPHL 3310 - CANCER BIOLOGY & THERAPEUTICS
Minimum Credits: 3
Maximum Credits: 3
This course presents biochemical and clinical aspects of cancer biology and therapy, and is designed for graduate students training in the basic sciences or medicine. The lectures cover: the biology of normal and neoplastic cells, mechanisms of neoplastic transformation, chemical and environmental carcinogenesis, viral oncogenesis, breast and prostate cancer, radiotherapy, tumor immunology chemotherapy and chemoprevention.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMPHL 3315 - BIOINF CANCER BIOL & THERPUTCS
Minimum Credits: 1
Maximum Credits: 1
Reading and discussion on bioinformatics resources available to enhance research on cancer biology and therapeutics. We will discuss bioinformatics databases and other resources related to: regulatory networks and signal transduction pathways, genes associated with cancer risk and the progression of cancer; cytogenomics, sources of information on the distribution of cancer occurrence and trends in the us population, databases DNA repair
genes, their structure & function, models of cancer progression & responses to therapy, biomarkers for cancer detection, treatment & prevention.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad LG/SNC Basis

**MSMPHL 3320 - JOURNAL CLUB**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Beginning in the second year of the program students will participate in the departmental Journal Club. Presentations will be held each week that the department hosts a seminar speaker (i.e. 2-3 times/month) during the fall and spring semester. Students entering their fifth year of study may petition the program director to be excused from the spring session of the Journal Club. Sixth year students and beyond are not required to enroll in Journal Club although their attendance is encouraged. A log-in sheet will be available at all Journal Club meetings. All students in attendance will complete an anonymous peer-evaluation sheet that will be provided to the presenter. Students must inform the program director in advance if they are unable to attend a specific Journal Club. Excusable absences from Journal Club include individual or family illness or presentation (i.e. poster, platform talk) at a major scientific conference. Students are allowed two unexcused absence/semester.

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**MSMPHL 3330 - GENOME INSTABILITY & HUMAN DS**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
Cellular responses to DNA damage impact cell cycle control, transcription, replication, cell division, signal transduction and evolution. More than 40 distinct human diseases are caused by defects in DNA repair, including syndromes of impaired development, cancer predisposition or premature aging. This course will emphasize the biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes such as DNA replication, transcription and damage signaling. Sources of DNA damage, both environmental and endogenous will be discussed, as well as the importance of DNA repair mechanisms during development and to prevent cancer and aging.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSMPHL 3335 - DNA REPAIR JOURNAL**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).

**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**MSMPHL 3340 - FDS SUCSSFUL CARR PLN DVLP 1**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
The goals of the fall and spring consecutive courses are to enhance the career development capacity and foster the life-long career management habits of graduate students and postdocs to maximize their scholarly training success and facilitate personal career outcomes. The courses will provide foundational background through experiential learning and small-group discussions, while facilitating peer mentoring. These approaches support the self-construction of individually relevant understandings of career development that is consistent with similar independence in scholarly expertise. The areas of focus include self-assessments, career exploration, goal setting, professional development, career planning and management, career adaptability, and additional topics identified by students. Participation in the subsequent spring course is expected for those enrolled in the fall prerequisite course.

MSMPHL 3341 - FDS SUCSSFUL CARR PLN DVLP 2
Minimum Credits: 1
Maximum Credits: 1
The goals of the fall and spring consecutive courses are to enhance the career development capacity and foster the life-long career management habits of graduate students and postdocs to maximize their scholarly training success and facilitate personal career outcomes. The courses will provide foundational background through experiential learning and small-group discussions, while facilitating peer mentoring. These approaches support the self-construction of individually relevant understandings of career development that is consistent with similar independence in scholarly expertise. The areas of focus include self-assessments, career exploration, goal setting, professional development, career planning and management, career adaptability, and additional topics identified by students. Participation in the subsequent spring course is expected for those enrolled in the fall prerequisite course.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
Course Requirements: PREQ: MSMPHL 3340

MSMPHL 3360 - MOLECULAR PHARMACOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course examines molecular mechanisms of drug interactions with an emphasis on drugs that modulate cell signaling, cellular responses to drugs, and drug discovery. The course will include student participation through presentations and discussion of relevant contemporary scientific literature. Topics include: cell cycle checkpoints and anti-cancer drugs, therapeutic control of ion channels, and blood glucose, anti-inflammatory agents and nuclear receptor signaling, and molecular mechanisms of drugs used for the treatment of cardiovascular diseases.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMPHL 3370 - NEUROPHARMACOLOGY
Minimum Credits: 2
Maximum Credits: 2
This course consists of a series of lectures and tutorial sessions which focus on the mechanisms by which drugs alter synaptic transmission in the central and peripheral nervous system. Major topics include: mechanisms of transmitter release and cotransmission, fast and slow synaptic transmission, nontraditional transmitters (peptides and puriner gic substances), actions of drugs on voltage-sensitive and ligand-gated ion channels.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Medicine Anesthesiology

MSANE 5372 - ANESTHESIA CLERKSHIP
Two-week rotation in anesthesia runs in tandem with general surgery (SURG 5372). Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Instructional focus on airway management (intraoperative), post-operative recovery and pain management. Registration must be accompanied by registration in SURG 5372.

**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**MSANE 5381 - PAIN EVALUATION AND TREATMENT**  
Minimum Credits: 0  
Maximum Credits: 0  
This junior elective will be located at the pain evaluation and treatment institute (PETI). Students will observe and participate in the clinical evaluation of chronic and acute pain patients as well as help to formulate treatment plans.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**MSANE 5382 - RESEARCH OR INDIVIDUAL STUDY**  
Minimum Credits: 0  
Maximum Credits: 0  
This junior elective will provide an opportunity for students to learn basic research methodology; including conceiving hypotheses, experimental design, protocol development, data analysis, and statistical evaluation of research results. The student may participate in ongoing research, either in the laboratory or in the clinical setting.  
**Academic Career:** MEDS  
**Course Component:** Directed Studies  
**Grade Component:** H/HS/S/LS/U

---

**MSANE 5420 - ANESTHESIOLOGY**  
Minimum Credits: 0  
Maximum Credits: 0  
Four week elective designed to provide information and skills required to care for patients in the perioperative period. At the end of this elective, student should have sufficient knowledge and skill to plan and administer anesthesia in a straightforward case under the direct supervision of faculty. Core content of the third year, but material covered in greater depth. Specific material varies depending upon selected institution. Teaching is on a one-to-one basis in the operating room and during rounds. The course can be tailored to satisfy the needs and goals of the individual.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**MSANE 5440 - SUBSPECIALTIES ANESTHESIOLOGY**  
Minimum Credits: 0  
Maximum Credits: 0  
This course is being offered for two types of medical students: 1) those who have completed a general anesthesia elective and who would like to develop expertise in an anesthesia sub-specialty and 2) those who have a special interest in non-anesthesia specialty areas such as internal medicine, pediatrics, cardiology, neurosurgery, otolaryngology, obstetrics, transplantation medicine, pain therapy or outpatient/preoperative consultation.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U

---

**MSANE 5445 - PAIN MEDICINE**  
Minimum Credits: 0  
Maximum Credits: 0  
The pain evaluation and treatment institute (PETI) staff physicians will introduce you to the interdisciplinary approach of dealing with patients with chronic pain of nonmalignant origin. You will interface with other PETI disciplines of occupational, physical, and psychological therapy as well as be exposed to nerve block techniques when appropriate. Examples of commonly seen problems are myofascial pain, headaches, and reflex sympathetic dystrophy. You will learn about post-op pain. Epidural and patient controlled analgesia will be highlighted.  
**Academic Career:** MEDS  
**Course Component:** Clinical  
**Grade Component:** H/HS/S/LS/U
MSANE 5450 - MD/OMS ANESTHESIA SPECIALTIES
Minimum Credits: 0
Maximum Credits: 0
This four month rotation for third or fourth year medical students who are participants in the md/oral maxillofacial surgery program, provides exposure to patients undergoing a variety of procedures under general anesthetics and monitored anesthesia care. Clinical experience and didactics are under the supervision of the anesthesia attending physicians for an experience that includes basic principles of planning an anesthetic, pre-operative evaluation of risk, intra-operative techniques, and post-operative care including pain management. Graduated and supervised exposure is expected over the term of the course that includes care of trauma and neurosurgical patients with a particular emphasis on head and neck procedures. Cognitive objectives: 1) recognize and explain the pre-operative work-up for patients undergoing surgery requiring an anesthetic; 2) develop and explain the concept of an anesthetic plan; 3) recognize common complications of anesthesia and their management; 4) recognize and explain safe anesthesia practices and systems-based practice of care in a team environment; 5) evaluate and understand the use of various anesthetic agents and techniques; 6) recognize the issues present in difficult airways and their management techniques. Skill objectives: 1) demonstrate competency for iv placement; 2) demonstrate competency for intubation including experience with nasal intubations and fiber optic intubation for the difficult airway; 3) assist in the application of general anesthetic techniques and the overall anesthetic plan with the supervising attending.
Academic Career: MEDS

Grade Component: H/HS/S/LS/U

MSANE 5650 - INDIVIDUALIZED CLINICAL COURSE
Minimum Credits: 0
Maximum Credits: 0
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSANE 5840 - ANESTHESIOLOGY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
These electives provide opportunities to learn basic research methodology, including approach to experimental design, protocol development, data analysis and evaluation of results. Student participates in ongoing research in the lab and on patients. Opportunities for research in resuscitation, high frequency jet ventilation, patient monitoring, hemorheology, brain pathophysiology, and pharmacology of anesthesia-related drugs are available. Many other topics are also possible.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSANE 5900 - INDEPENDENT STUDY
Minimum Credits: 0
Maximum Credits: 0
The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.
Academic Career: MEDS
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSANE 5901 - EXTRAMURAL ANESTHESIOLOGY
Minimum Credits: 0
Maximum Credits: 0
A clinical experience in anesthesiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
Academic Career: MEDS
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Mining Engineering
MINE 2002 - MINE VALUATION
Minimum Credits: 3
Maximum Credits: 3
Mining enterprises have a definite and finite life. Valuation develops methods of estimating ore reserves and placing a value upon them prior to mining. This involves present value analysis using annuities and sinking funds of various rates of interest.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

MINE 2005 - MINERAL ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
Economic role of minerals and the mineral industry on both national and international levels. Importance of minerals to underdeveloped and industrialized countries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

MINE 2008 - ADVANCED MINE VENTILATION
Minimum Credits: 3
Maximum Credits: 3
Mine ventilation engineering and solution to problems encountered in mine planning and operation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

MINE 2009 - ADVANCED MINING LAW
Minimum Credits: 3
Maximum Credits: 3
A review of the legal problems typically encountered by engineers and managers. Specifically agreements such as leases, options, purchases, easements and rights-of-way. Arbitration proceedings and legal impact of labor relation decisions, options during strikes.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

MINE 2013 - ADVANCED COAL PREPARATION
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

MINE 2063 - ADVANCED MINING SYSTEMS
Minimum Credits: 3
Maximum Credits: 3
Problems of equipment balance as a function of design production within a mining system. Relationship of size, availability, and mobility of equipment to production requirements.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering
MINE 2996 - SPEC INVSTGTN FOR M.S. STDNT
Minimum Credits: 1
Maximum Credits: 3
A special project course in which students may broaden their knowledge by studying approved topics or problems in a specific field within the department under the guidance of a faculty member.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad Letter Grade

MINE 2997 - RESEARCH, M.S.
Minimum Credits: 1
Maximum Credits: 3
By appointment with full-time faculty members. A special project course in which advanced students may be permitted to broaden their knowledge by conducting research and study in specific fields within the program.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis

MINE 2999 - M.S. THESIS
Minimum Credits: 1
Maximum Credits: 6
By appointment with full-time faculty members and with the approval of the program director. Scheduled discussion periods covering literature survey, selection of thesis topic, development of research methods and procedures, and the outline of the thesis.

Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

Molecular Biophysics

MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS
Minimum Credits: 1
Maximum Credits: 1
These rotations serve three (3) purposes: 1. Encourage the student to experience different research environments and methods. 2. Provide the students opportunities to optimize their choice of research advisor/lab through direct experience in different laboratory environments. 3. Provide faculty advisors with a basis for informed judgment regarding prospective students. Academic advisors provide help in suggesting a choice of lab rotations if necessary.

Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

MOLBPH 2001 - MOL BIOPHYS 1: STRUCTURE
Minimum Credits: 3
Maximum Credits: 3
This is the first of three (3) courses, which together constitute the common core of the first year of the molecular biophysics graduate program. Here, the emphasis is on the structural foundation, especially that of proteins and nucleic acids. Fundamental results are covered together with experimental techniques (x-ray diffraction, NMR, EM/CryoEM, AFM, CD/ORD, Raman and fluorescence spectroscopy), as well as structural systematics and informatics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MOLBPH 2002 - MOL BIOPHYS 2: THEORY & SIMUL
Minimum Credits: 3
Maximum Credits: 3
This is the second of three courses, which together constitute the common core of the first year of the molecular biophysics graduate program. Here, the emphasis is on macromolecules and their interactions at equilibrium. Theoretical topics include equilibrium statistical mechanics and thermodynamics as well as related computational methods. Experimental techniques include binding measurements, SPR, 'single molecule'
techniques (tweezers, fret,...), Calorimetry, and hydrodynamics.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MOLBP 2003 - MB 3: BIOMOL INTERC & DYNAMICS
Minimum Credits: 4
Maximum Credits: 4
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MOLBP 2010 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in molecular biophysics.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD)

MOLBP 2012 - MB2: BIOMOL INTERC & DYNAMICS
Minimum Credits: 4
Maximum Credits: 4
This is the third of three courses, which together constitute the common core of the first year of the molecular biophysics graduate program. Here, the emphasis is on time-dependent process; topics covered include proteins with conformational change, enzyme kinetics, molecular motors and folding. Experimental techniques include MMR and EPR. Theoretical methods include those for the situation of dynamic events including flexibility, folding and trajectory analysis.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MOLBP 2013 - MOL BIOPHYS 3: THEORY & SIMUL
Minimum Credits: 4
Maximum Credits: 4
This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MOLBP 2020 - STRUCL BIOL/MOL BIOPHYS SEM
Minimum Credits: 1
Maximum Credits: 1
This course comprises weekly lectures by nationally renowned guest speakers as well as faculty from the Pittsburgh schools engaged in the development and application of biophysical and structural techniques towards important biomedical questions.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MOLBP 2030 - DATA AND LITERATURE CLUB
Minimum Credits: 1
Maximum Credits: 1
This course, designed for students in the molecular biophysics graduate program, will alternate between 'data sessions' in which postdocs and
students present research results for feedback and critique, and 'literature sessions' in which students will lead discussions and critiques of the current literature. The course is designed to give students experience in presentation and critical analysis skills, as well as to create opportunities for broader learning and interaction.

**Academic Career:** GRAD  
**Course Component:** Seminar

Molecular Genetics & Biochemistry

MSMGDB 2500 - MS THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSMGDB 2520 - EUKARYOTIC MOLECULAR GENETICS
Minimum Credits: 2
Maximum Credits: 2
This course covers topics on DNA replication in eukaryotes, the structure and function of human chromosomes, inheritance patterns and the phenotypic consequences of mutations in humans, the mapping and isolation of human genes, animal models of human diseases, regulation of the mammalian cell cycle, and current aspects of gene therapy.
Academic Career: GRAD
MSMGDB 2525 - DEVELM MECHANISMS HUMN DISEASE  
Minimum Credits: 2  
Maximum Credits: 2  
This course covers principles of developmental biology and how embryonic developmental pathways impinge on human disease. Topics include congenital organ related disease, stem cell based and reproductive events relating to disease.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSMGDB 2530 - DNA REPAIR, MUTAGEN CARCINOGEN  
Minimum Credits: 3  
Maximum Credits: 3  
This course will cover molecular genetic principles that apply to all cancers and then move to current examples of these principles in specific types of human cancers from the literature. Topics will include loss of heterozygosity in tumor suppressor genes, oncogene activation, and genetic instability caused by mutator genes. Some discussion of the possible hierarchy of genomic instability as it occurs in tumor formation versus tumor progression (and chemotherapy drug resistance) will be discussed.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSMGDB 2535 - MODEL ORGANISMS  
Minimum Credits: 2  
Maximum Credits: 2  
This course covers the use of vertebrate and invertebrate model organisms in biomedical research. Topics include the use of several models including: mouse, rat, Zebrafish, Xenopus, c. Elegans, and Drosophila. Special emphasis will be placed on the strengths that specialized techniques of each organism provides the research community in understanding the etiology of disease.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSMGDB 2540 - INTRO COMPUTATNAL STRUCL BIOL  
Minimum Credits: 2  
Maximum Credits: 2  
This is a general introduction to current theories and methods used in computational structural biology. Fundamental concepts of probability, statistics, statistical thermodynamics and polymer physics will be considered as well as a general description of our current knowledge of biomolecular structure and dynamics for modeling and simulations of biological interactions and function. The protein data bank and software commonly used in computational structural biology will be used for modeling and simulations of structure and dynamics.  
Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis

MSMGDB 2550 - RESEARCH SEMINAR  
Minimum Credits: 1  
Maximum Credits: 1  
Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.  
Academic Career: GRAD  
Course Component: Seminar  
Grade Component: Grad HSU Basis

MSMGDB 2560 - BIOLOGY OF SIGNAL TRANSDUCTION  
Minimum Credits: 3  
Maximum Credits: 3
This course will explore different types of signaling pathways activated by receptor-ligand interactions. Topics to be covered include, but are not limited to: g-protein linked receptors, adenylate cyclases, small GTPases, kinases and phosphatases, nitric oxide, phospholipases, steroid hormone signaling, and pharmacological applications of signaling pathways.

**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

**MSMGDB 2570 - CONTEMPORARY TOPICS IN BMG**  
**Minimum Credits:** 1  
**Maximum Credits:** 1  
Contemporary topics in biochemistry and molecular genetics: this is a course in which students will read, present, and evaluate the primary literature in biochemistry and molecular genetics. Each semester will focus on a current topic of interest. The course may be taken more than once by each student, since the topics addressed will continue to change each semester.  
**Academic Career:** GRAD  
**Course Component:** Seminar  
**Grade Component:** Grad HSU Basis

**MSMGDB 2590 - DIRECTED STUDY**  
**Minimum Credits:** 1  
**Maximum Credits:** 9  
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in biochemistry and molecular genetics.  
**Academic Career:** GRAD  
**Course Component:** Directed Studies  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Interdis Biomedical (INTBP-UNK) or Biochem & Molecular Genetics (MSBMG-PHD) or Mol Genetics & Dev Biology (MGDB-PHD)

**MSMGDB 3465 - GENE DELIVERY**  
**Minimum Credits:** 2  
**Maximum Credits:** 2  
The prospect of using genetically engineered viruses to infect human cells has led to the development of the science of viral vectors. This course will discuss the basic strategies for the development of viral vectors as well as their molecular biology and biochemistry.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis

**MSMGDB 3500 - PHD DISSERTATION RESEARCH**  
**Minimum Credits:** 1  
**Maximum Credits:** 14  
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.  
**Academic Career:** GRAD  
**Course Component:** Thesis Research  
**Grade Component:** Grad SN Basis  
**Course Requirements:** PLAN: Interdis Biomedical (INTBP-UNK) or Biochem & Molecular Genetics (MSBMG-PHD) or Mol Genetics & Dev Biology (MGDB-PHD)

**MSMGDB 3510 - ADV TOPICS IN GENE EXPRESSION**  
**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course consists of lectures and class presentations on recent advances in the molecular genetics. The emphasis of the course is on the regulation of gene expression at the DNA, RNA and protein levels. Regulation in eukaryotes is emphasized, including yeast, protozoan, and mammalian systems.  
**Academic Career:** GRAD  
**Course Component:** Lecture  
**Grade Component:** Grad LG/SNC Basis
MSMGDB 3520 - CUR TOPCS CLLR MOL STRUCL BIOL
Minimum Credits: 1
Maximum Credits: 1
This advanced level course will focus on important new papers in four rotating topic areas (one per semester, two year cycle). Tentative topic ideas include signal transduction, apoptosis, DNA replication, and cell cycle control.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

MSMGDB 3530 - GENOME INSTABILITY & HUMAN DS
Minimum Credits: 3
Maximum Credits: 3
Cellular responses to DNA damage impact cell cycle control, transcription, replication, cell division, signal transduction and evolution. More than 40 distinct human diseases are caused by defects in DNA repair, including syndromes of impaired development, cancer predisposition or premature aging. This course will emphasize the biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes such as DNA replication, transcription and damage signaling. Sources of DNA damage, both environmental and endogenous will be discussed, as well as the importance of DNA repair mechanisms during development and to prevent cancer and aging.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMGDB 3535 - DNA REPAIR JOURNAL CLUB
Minimum Credits: 1
Maximum Credits: 1
The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond. Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis

MSMGDB 3540 - REPRDCTV DVLP MODL ORGNSM HUMN
Minimum Credits: 2
Maximum Credits: 2
This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: INTBP 2000

MSMGDB 3550 - STEM CELLS
Minimum Credits: 3
Maximum Credits: 3
This course will provide a comprehensive overview of stem cell biology - an intriguing and a most-debated research area. The course will focus on the biology of stem cells and their role in health & disease with emphasis on development and carcinogenesis. Trans-differentiation of stem cells for tissue engineering applications will also be discussed. Lectures and student presentations will cover: embryonic as well as fetal and adult stem cells in blood, liver, brain, muscle, kidney, pancreas and gut. Students will also be educated on bioethical issues and existing laws governing stem cell research.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MSMIC 5835 - MOLECULAR GENETICS & BIOCHEMISTRY RESEARCH
Minimum Credits: 0
Maximum Credits: 0
Comprehensive laboratory research rotation in the department of molecular genetics and biochemistry with rotations available in biochemistry, immunology, molecular genetics, molecular pathogenesis, and virology.
Academic Career: MEDS
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSVM 2400 - MS THESIS RESEARCH
Minimum Credits: 1
Maximum Credits: 14
A directed research project which results in a thesis for a master's degree.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSVM 2410 - MOLECULAR Virology
Minimum Credits: 2
Maximum Credits: 2
This course stresses basic concepts of animal virology. Subjects include different viruses, the expression and regulation of viral genes, the mechanisms of viral-induced cytopathology, latency, and cell transformation, and the nature of viroids and prions. Supplementary reading assignments are required.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSVM 2420 - EXPERIMENTAL Virology
Minimum Credits: 2
Maximum Credits: 2
This course is designed for graduate students training in molecular virology research and is designed to provide a more in-depth study of molecular virology through a critical analysis by the student of seminal research publications in various virus systems. Paper discussion format.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

MSVM 2430 - TA: MEDICAL MICROBIOLOGY
Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to introduce graduate students of the interdisciplinary biomedical sciences graduate program to the principles of teaching. The students will be trained in basic teaching techniques as well as provided material for teaching students specific concepts. As a major part of this course, students will participate in teaching first-year medical students the fundamentals of microbiology, in conjunction with the laboratory and problem based learning sections of the molecular pathogenesis of infectious disease course of basic science medical school book.
Academic Career: GRAD
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

MSVM 2450 - RESEARCH SEMINAR
Minimum Credits: 1
Maximum Credits: 1
Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad HSU Basis
MSMVM 2470 - CONTEMPORARY TOPICS IN MVM
Minimum Credits: 1
Maximum Credits: 1
This is a course in which students will read, present, and evaluate the primary literature in molecular virology and microbiology. Each semester will feature an integrated set of papers addressing a current issue of interest. The course may be taken more than once by each student, since the topics addressed will change each semester.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad SN Basis

MSMVM 2480 - MECHNSMS OF MICRBL PERSISTENCE
Minimum Credits: 2
Maximum Credits: 2
Microorganisms have evolved a vast array of mechanisms to avoid detection or elimination by host defenses, and to establish persistent infections that can lead to chronic or recurrent disease. The ability to establish persistent infections often complicates the successful therapeutic treatment of disease caused by such microorganisms. This course is designed to familiarize students with the mechanisms by which select bacterial and viral pathogens establish persistence in their host cells and/or organisms, and the subsequent considerations for pathogenesis and therapy.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

MSMVM 2490 - DIRECTED STUDY
Minimum Credits: 1
Maximum Credits: 9
This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in molecular virology and microbiology.
Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Virology & Microbiol (PHD) or Interdis Biomedical (UNK)

MSMVM 3400 - PHD DISSERTATION RESEARCH
Minimum Credits: 1
Maximum Credits: 14
After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Virology & Microbiol (PHD)

MSMVM 3410 - MICROBIAL PATHOGENESIS
Minimum Credits: 2
Maximum Credits: 2
This course is an introduction to the molecular basis of bacterial and parasitic pathogenesis. Topics include: 1) introduction to microbial pathogens, 2) molecular and classical Koch's postulates, 3) pathogen adhesion strategies, 4) molecular mechanisms of invasion 5) microbial strategies for immune evasion 6) genetics and action of bacterial toxins 7) coordinate regulation of virulence factors 8) antibiotics and antibiotic resistance 9) host responses to infection 10) vaccines.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3415 - EXPRMNTL MICROBL PATHOGENESIS
Minimum Credits: 1
Maximum Credits: 1
This course is designed to teach students entering graduate research projects involving microbial pathogenesis to critically evaluate the scientific literature in terms of experimental strategies, presentation and interpretation of data, justification of conclusions made in published articles. Paper
MSMVM 3420 - MECHS OF MICROBIAL PERSISTENCE
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MSMVM 3425 - PATHOGEN: HOST INTERACTIONS
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

MSMVM 3430 - RETROVIRIOLOGY
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3435 - TUMOR VIROLOGY
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: MSMVM 2410

MSMVM 3440 - VACCINES AND IMMUNITY
Minimum Credits: 2
Maximum Credits: 2
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MSMVM 3445 - ACUTE VIRUS INFECTIONS
Minimum Credits: 2
Maximum Credits: 2
Acute virus infections are a leading cause of global morbidity and mortality. Viruses are obligate parasites that require host cells to propagate. Over time, viruses have evolved myriad mechanisms to ensure entry into host cells, propagation of their genomes, and release of progeny. Often, a consequence of infection is disease and death. Acute virus infections is designed to be an advanced graduate level course covering various aspects of virus infections between different virus families.
Academic Career: GRAD
Course Component: Lecture
Course Requirements: CREQ: MSMVM 2410 or IDM 2002

MSMVM 3450 - HERPES VIROLOGY
Minimum Credits: 2
Maximum Credits: 2
The focus of this course will be molecular biology and pathogenesis of the 8 known herpes viruses that infect and cause disease in man. It will cover the molecular details of the life cycles of these viruses, including attachment, entry, gene expression, replication, assembly, latency, immunology, and pathogenesis. There will be discussions concerning antiviral approaches, vaccines and the use of herpes viruses as gene transfer vectors. Class participation in paper discussions is essential, and will constitute a large part of the final grade, two take-home exams constitute the remainder.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3455 - ANTIMICROBIAL THERAPEUTICS
Minimum Credits: 2
Maximum Credits: 2
The development and mechanism of action of antimicrobial drugs, including anti-bacterials, anti-fungals, anti-parasitics and antivirals will be described at the molecular level with some emphasis on diseases with significant public health impact (HIV, malaria, tuberculosis, etc.). Aspects of medicinal chemistry, biochemistry, and molecular biology will be considered in drug development. Primarily lecture format with student presentations of selected papers as warranted. Some emphasis on chemistry, but accessible to students without a strong chemistry background.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3460 - VIRAL VECTORS
Minimum Credits: 2
Maximum Credits: 2
The prospect of using genetically engineered viruses to infect human cells has led to the development of the science of viral vectors. This course will discuss the basic strategies for the development of viral vectors as well as their molecular biology and biochemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3465 - GENE DELIVERY
Minimum Credits: 2
Maximum Credits: 2
The prospect of using genetically engineered viruses to infect human cells has led to the development of the science of viral vectors. This course will discuss the basic strategies for the development of viral vectors as well as their molecular biology and biochemistry.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3470 - ADVANCED TOPICS IN MVM
Minimum Credits: 2
Maximum Credits: 2
This course addresses contemporary topics in the area of molecular virology and microbiology. Specifically, it is an advanced topic course that allows an MVM faculty member to offer instruction on a highly specialized topic.
Academic Career: GRAD
MSMVM 3471 - INNATE IMMUNITY
Minimum Credits: 2
Maximum Credits: 2
This course will focus on the several aspects of host innate immunity against infection. Topics will include the conceptual basis for innate versus adaptive immunity, induction of innate immunity by pathogens, signaling by innate immune receptors, effector cells of the innate immune system, secreted effectors of innate immune signaling, and subversion of innate immune signaling by pathogens. Courses like molecular virology and comprehensive immunology are highly recommended but not a prerequisite for the course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3475 - IMAGING HOST-PATHOGEN INTERAC
Minimum Credits: 1
Maximum Credits: 1
This course will provide an introduction to fluorescence microscopy with an emphasis on the study of host-pathogen interactions. Experts in the fields of bacterial pathogenesis, viral entry, viral protein signaling, fungal pathogenesis, polymicrobial infections will present lectures on the use of imaging in their fields of research and lead a journal club discussion of relevant papers from the literature. The goal is to provide students with a basic understanding of fluorescence microscopy for the purpose of properly designing their own experiments and effectively evaluating the work of others.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad SN Basis

MSMVM 3480 - IMMUNOLOGY OF INFECTIOUS DISEA
Minimum Credits: 2
Maximum Credits: 2
General mechanisms of immunity to microbial pathogens and common strategies of immune evasion will be discussed with emphasis on detailed examples from viral, bacterial and parasitic systems. An in depth examination of survival strategies of pathogens in intracellular and extracellular host environments will be addressed, as well as the consequences of inadequate and inappropriate immune responses.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: CREQ: MSIMM 2210

MSMVM 3485 - EMERGING PATHOGENS
Minimum Credits: 1
Maximum Credits: 1
Infectious diseases have a profound impact on society. Many infectious agents are well-recognized and have been studied for years. Others, however, have only recently been recognized because of advances in diagnostics or because of human exposure to new agents. The MVM course emerging pathogens will explore the pathobiology and recent literature surrounding newly-recognized or resurgent infectious agents. Organisms and the diseases they cause will be reviewed and papers will be discussed to highlight developments in understanding virulence, host defenses, and strategies to diagnose, treat, or prevent infection.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3496 - MOLECULAR VIROLOGY CONFERENCE
Minimum Credits: 1
Maximum Credits: 1
This in-depth course deals with new topics of molecular virology.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Music
MUSIC 2000 - MA THESIS
Minimum Credits: 3
Maximum Credits: 3
Research and writing of a thesis for an MA degree in music.
Academic Career: GRAD
Course Component: Thesis Research
Grade Component: Grad SN Basis

MUSIC 2040 - MUSIC OF INDIA: THEORY & PRACT
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2041 - MUSIC IN AFRICA
Minimum Credits: 3
Maximum Credits: 3
This course examines the historical social and cultural background of music in Africa with particular reference to music in community life, performing groups, the training of musicians, instrument structures in African music, and the interrelations of music and dance.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2042 - MUSIC IN LATIN AMERICA
Minimum Credits: 3
Maximum Credits: 3
Mexico, Venezuela, Columbia, Panama, and Peru will be the major countries represented in this general survey of the music of Latin America. The course will be taught in a lecture-discussion format with extensive use made of recordings, slides, and films. Some actual performance of drumming traditions will be included.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2043 - MUSIC IN EAST ASIA
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the musical cultures of East Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2044 - MUSIC IN SOUTHEAST ASIA
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the musical cultures of SouthEast Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)
MUSIC 2045 - MUSIC IN SOUTH ASIA
Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the musical cultures of South Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2046 - AFRICAN-AMERICAN MUSIC IN U.S.
Minimum Credits: 3
Maximum Credits: 3
This course is designed to familiarize the student with various phases of African-American music existing in North America; blues, gospel-spirituals, work songs, children's games songs, and classical compositions of ragtime composers Scott Jobin, JP Johnson, etc. Students will conduct field projects centered around "street recordings, locations, interviews of local and visiting artists, etc." A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2047 - WOMN & MUS IN CROSS CULT PERSP
Minimum Credits: 3
Maximum Credits: 3
This course is concerned with music of, by, and about women from a cross-cultural perspective. Topics include, but are not limited to, traditional and ritual music, music as empowerment, sexual aesthetics, women as composers and performers, and feminist music criticism.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2048 - INSTRUMNTN & ORCHESTRATION
Minimum Credits: 3
Maximum Credits: 3
A survey of different styles of instrumentation and orchestration in the European art music tradition. Focus of the course may change from year to year.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2049 - LATE ROMNTC & EARLY 20TH CNTUR
Minimum Credits: 3
Maximum Credits: 3
This course will begin with the more revolutionary nineteenth-century composers who worked in Paris--Chopin, Berlitz, Liszt--and trace the breakdown of tonality and the emergence of new styles and structural principles in the late nineteenth and twentieth centuries.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2050 - HISTORY OF PERFORMANCE STYLES
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)
MUSIC 2051 - JAZZ COMPOSITION & ARRANGING 1
Minimum Credits: 3
Maximum Credits: 3
This course develops the students' knowledge of the techniques of jazz-rock composition and arranging. The distinctive features of jazz-rock harmony are studied, and students write arrangements for various instrumental combinations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2052 - JAZZ COMPOSITION & ARRANGING 2
Minimum Credits: 3
Maximum Credits: 3
A continuation of music 2051. The course develops the student's knowledge of the techniques of jazz-rock composition and arranging. The distinctive features of jazz-rock harmony are studied, and students write arrangements for various instrument combinations.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2053 - EUROPEAN & AMERICAN FOLK MUSIC
Minimum Credits: 3
Maximum Credits: 3
This course surveys the folk music traditions of Europe and America.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2054 - GLOBAL HIP HOP
Minimum Credits: 3
Maximum Credits: 3
This seminar analyzes how diverse groups of musicians and listeners use hip-hop to express local and transnational claims of belonging through the appropriation of musical genres identified with the West and with African Americans in particular. A closer reading of global hip-hop practices offers insights into the genre's artistic goals and its social profile in a variety of contexts. Through analyses of locally distinct musical expressions, marketing trends within national and global music industries, and state-sponsored policies relating to hip-hop, this course sheds light on hip-hop's role in constituting cultural and political identities among diverse groups of people in the U.S. and abroad.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad Letter Grade

MUSIC 2055 - LATER RENAISSANCE AND BAROQUE
Minimum Credits: 3
Maximum Credits: 3
Starting with the new attitudes towards word-tone relationships that can be seen in the music of Josquin, and with the rise of idiomatic instrumental music, the course will trace those trends, among others through the music of such composers as Josquin, Willaert, Rore, Lassus, Monteverdi, Corelli, Vivaldi, Handel, and J.S. Bach.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2056 - RUSSIAN LITERATURE IN MUSIC
Minimum Credits: 3
Maximum Credits: 3
This course explores Russian literature as interpreted in music. Students will read works of Russian poetry and prose, then examine the 'transposition' of the works into media such as opera, ballet, and song cycle. The syllabus includes (among others) such authors as Mussorgsky, Tchaikovsky, Rimsky-Korsakov, and Desiatnikov.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MUSIC 2061 - JAZZ IMPROV 1
Minimum Credits: 3
Maximum Credits: 3
This course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2062 - JAZZ IMPROV 2
Minimum Credits: 3
Maximum Credits: 3
A continuation of music 2061. The course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2070 - COMPOSITION 2
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2071 - ELECTRONIC & COMPUTER MUSIC 1
Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to composing music in the university of Pittsburgh electroacoustic music studio. Instruction in midi sequencing, introduction to synthesis, sampling, and other digital audio technology.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2072 - ELECTRONIC & COMPUTER MUSIC 2
Minimum Credits: 3
Maximum Credits: 3
This course is a continuation of MUSIC 2071. It provides further experience in composing music in the university of Pittsburgh computer and electronic music studio, instruction in the advanced digital audio applications, and hard disk recording and editing.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2111 - PRIN OF RESEARCH & BIBLGRPHY
Minimum Credits: 3
Maximum Credits: 3
This course is for all first-year graduate students, and introduces them systematically to the significant research and reference methods and their resulting tools within all major categories and formats of music research and publication. It treats music research as a unified field in which the major disciplines--historical musicology, ethnomusicology, theory/analysis and composition--necessarily interact to inform the most productive and significant results, even for narrowly defined research topics.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)
MUSIC 2121 - INTRODUCTION TO ETHNOMUSICOLOGY
Minimum Credits: 3
Maximum Credits: 3
The course is designed for all first graduate students in music and aims to give them an overall understanding of the discipline through a survey of its history, theory, and methodology, and of the writings of major scholars in the field. A series of specific research projects will be integrated with the theoretical discussions, and technical aspects of research such as field work, transcription, and analysis will be covered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2131 - INTRO TO HISTORICAL MUSICOCOLOGY
Minimum Credits: 3
Maximum Credits: 3
The course is designed for all first year graduate students in music and aims to give them an overall understanding of the discipline through a survey of its history, theory, and methodology, and of the writings of major scholars in the field. A series of specific research projects will be integrated with the theoretical discussions, and technical aspects of research such as notation, source studies, sketch studies, criticism, performance problems, and analysis will be covered.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2141 - MUSICAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Examination of issues in the invention and description of musical structures and the relation of these activities to each other, with attention given to such special problems as intersubjectivity, contextuality, the role of inference in perception, and introspection as a mode of empirical inquiry; examples will be drawn from a wide range of literature.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2151 - INTRODUCTION JAZZ LITERATURE
Minimum Credits: 3
Maximum Credits: 3
This pro-seminar provides a critical review of writings on jazz, by analyzing and evaluating the development of the scholarly literature on jazz, focusing on the writings of some of the most influential critics and historians who have shaped the field. The writers will include Nat Hentoff, Ira Gitler, Leonard Feather, Mike Hennessey (England), Gunther Schuller, Andre Hodier (France) etc.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2222 - SEMINAR IN MEDIEVAL MUSIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special medieval topic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2223 - SEMINAR IN RENAISSANCE MUSIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the
exploration of a special Renaissance topic.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2224 - SEMINAR IN BAROQUE MUSIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special baroque topic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2226 - SEMINAR IN CLASSICAL MUSIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special classical topic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2228 - SEMINAR IN ROMANTIC MUSIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special nineteenth-century topic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2230 - SEMINAR IN 20TH CENTURY MUSIC
Minimum Credits: 3
Maximum Credits: 3
The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special Twentieth-Century topic.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

Grade Component: Grad LG/SNC Basis

MUSIC 2358 - SEMINAR IN SOUTH ASIAN MUSIC
Minimum Credits: 3
Maximum Credits: 3
A review of ethnographic, historical and stylistic problems in the study of musical cultures of South Asia with particular reference to one or more specific musical genres of selected societies and culture areas.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2396 - MUSIC IN SOCIETY
Minimum Credits: 3
Maximum Credits: 3
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
MUSIC 2441 - TRANSCRIPTION AND ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
A study of different approaches to both transcription and analysis in ethnomusicology through a survey of the existing literature on the subjects. Development of transcription and analytical skills and the relationships of these skills to the student's specific research needs will be emphasized.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2442 - FIELD AND LAB METHODS
Minimum Credits: 3
Maximum Credits: 3
A study of research designs, field procedures, recording and photographic possibilities, as well as some laboratory procedures will be related to actual field work conducted as a part of this course.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2450 - SEMINAR IN CREATIVE MUSICOLOGY
Minimum Credits: 3
Maximum Credits: 3
Creative musicology is the practice whereby information derived from research and analysis is used as the basis of composition. The research and analysis are usually concerned with the music of oral traditions, such as the folk music of Europe and the traditional and popular music of Asia, Africa and Latin America. The purpose of the seminar is to study the activities of musicologist-composers and to see how they have transformed research into composition. Creative musicology, exemplified by the music of Bela Bartok, is practiced extensively around the world and the materials used in the course will reflect its global distribution.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2460 - SEMINAR INTERCULTURAL MUSICOLOGY
Minimum Credits: 3
Maximum Credits: 3
The aim of this seminar is to generate discourse on the theoretical framework of intercultural musicology, which includes the study of one musical culture by using techniques applicable to other musical cultures, as well as music created by combining elements from various cultures.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

MUSIC 2471 - TONAL ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
Analysis of triadic-tonal compositions from a variety of standpoints.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade

MUSIC 2484 - PROBLEMS IN THEORY
Minimum Credits: 3
Maximum Credits: 3
To be arranged according to the participants' interests.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
MUSIC 2494 - MUSIC AND COMMUNICATION
Minimum Credits: 3
Maximum Credits: 3
Music and communication is a team-taught, interdisciplinary graduate-level seminar on cultural studies approaches to music and communication. The course will be divided into two parts: the beginning of the course will map out some of the key intellectual and methodological issues arising at the intersection of music and communication studies. After this theoretical introduction, the second part of the course will consider recent scholarship that has attempted to address these concerns.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2512 - SEMINAR IN HISTORIOGRAPHY
Minimum Credits: 3
Maximum Credits: 3
Exploration of various theories of the study of history as they apply to music. Readings from the historiographical literature of music as well as other fields will serve as the background for an examination of current trends and controversies. Special emphasis will be placed on developing a working definition of historical musicology, and on studying the formation of various canons of great works. This course is designed to help students to a better understanding of the directions of their own work.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2513 - SEMINAR IN SOURCE STUDIES
Minimum Credits: 3
Maximum Credits: 3
An intensive introduction to the techniques and applications of source criticism. Students will learn scientific methods of examination and description of manuscripts and printed books. Topics to be covered include collation, paper and watermarks, scripts, typography, deciphering corrections and additions, concordances, readings studies, and stemmatics. Students will also explore the application of the results of their work to contextual studies, editing, criticism, analysis, and general historical studies.
Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2516 - SEMINAR IN PERFORMNC PRACTC 2
Minimum Credits: 3
Maximum Credits: 3
An examination of the musical practices of the seventeenth and eighteenth centuries with special emphasis on the music of an individual composer and/or school. Seminar will focus on primary source materials, theoretical works and specific musical repertories. Problems to be addressed include: tempo, ornamentation and instrumentation, as well as various stylistic issues.

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2517 - MAJOR COMPOSER
Minimum Credits: 3
Maximum Credits: 3
This course examines the life and works of a major figure in Western art music. The content of the course changes, but it emphasizes music in its historical and cultural contexts, as well as individual genres and styles.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2611 - MUSICOLOGY SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The seminar focuses on selected research problems or theoretical issues for intensive study and discussion with students taking a major role in class presentation. Past topics have included American music before the Civil War, and source study of the Bach passions.
Academic Career: GRAD
MUSIC 2621 - ETHNOMUSICOLOGY SEMINAR
Minimum Credits: 3
Maximum Credits: 3
The seminar focuses on selected research problems or theoretical issues for intensive study and discussion with students taking a major role in class presentation. Past topics have included the writings of Charles Seeger.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2631 - COMPOSITION & ANALYSIS TUTORIAL
Minimum Credits: 3
Maximum Credits: 3
Tutorial instruction in composition and analysis; students in composition and theory normally enroll every semester.

Academic Career: GRAD
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2632 - COMPOSITION SEMINAR
Minimum Credits: 3
Maximum Credits: 3
Issues of collective interest to composers; student's examination of one another's work; reading and performance of students' (and others') work.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2700 - JAZZ MUSICIAN AS COMPOSER
Minimum Credits: 3
Maximum Credits: 3
This course will consider the language of jazz through the study of jazz composition and form. Using works by master composer/performers of the jazz canon, we will explore some of the concepts and relationships between compositional structure, improvisation, and spontaneous composition.

Academic Career: GRAD
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2710 - JAZZ STYLES AND ANALYSIS
Minimum Credits: 3
Maximum Credits: 3
