IMB 2023 - APPROACHES IN MOLECULAR BIOLOGY 3: COMPUTATIONAL SYSTEMS BIOLOGY OF DISEASES

Minimum Credits: 2

Maximum Credits: 2

The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. The titles of the three course modules are: cancer, heart disease, and computational systems biology of disease. Although each module is distinguished by its focus on the molecular basis of human diseases, in module 3 we will use disease paradigms as means to explore questions of fundamental significance in the field of modern computational and systems biology. We will cover a variety of topics, from collection and analysis of high-throughput disease data, to viral diseases and drug design. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental and computational methods in modern biomedical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Integrative Molecular Biology (MSIMB-PHD or IMB-PHD)

IMB 2050 - PIMB RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students are required to attend a weekly research seminar. Students may attend seminars hosted by the School of Medicine and/or Department of Biological Sciences.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

IMB 2060 - PIMB JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Students will critically examine and present in a summary form new research relevant to modern-day molecular biology. Students may participate in journal clubs hosted by the School of Medicine and/or Department of Biological Sciences.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

IMB 2080 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific research project in the dissertation laboratory prior to admission to candidacy for the doctorate.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Molecular Biology (PHD)

IMB 2090 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

IMB 3090 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a dissertation for a doctoral degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Molecular Biology (PHD)

Integrative Systems Biology

ISB 2000 - LABORATORY RESEARCH ROTATION

Minimum Credits: 1

Maximum Credits: 9

Students are required to perform three distinct four-week laboratory rotations in the summer term of the first year. These rotations provide students with an opportunity to perform experimental research in three different scientific areas, while experiencing diverse laboratory environments and practices. They also facilitate selection of the dissertation laboratory and advisor. Students select the laboratory rotations based on their research interests and in consultation with their academic advisor. To capitalize on the cross campus nature of the program, students are required to distribute the rotations between participating laboratories in the Department of Biological Sciences and the School of Medicine.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

ISB 2010 - APPROACHES IN MOLECULAR BIOLOGY

Minimum Credits: 5

Maximum Credits: 5

The semester-long approaches in molecular biology course is divided into three separate modules and will meet three times a week. Each week there will be two 1.5-Hour lectures and a 2-hour discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three modules are: 'cancer: regulation and misregulation of cell growth and control', 'heart disease: molecular and cellular foundations', and 'viral diseases: life cycle and evolution of prokaryotic and eukaryotic viruses'. The course will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ISB 2011 - APPROACHES IN MOLECULAR BIOLOGY 1: CANCER

Minimum Credits: 2

Maximum Credits: 2

The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Integrative Molecular Biology (PHD)

ISB 2012 - APPROACHES IN MOLECULAR BIOLOGY 2: HEART DISEASE

Minimum Credits: 2

Maximum Credits: 2

The semester-long approaches in molecular biology course is divided into three separate course modules and will meet three times a week for two hours each session. Each week there will be two days of lecture and one discussion section at which one or more papers from the primary literature are analyzed. Although each module is distinguished by its focus on the molecular basis of a human disease, we will use the disease paradigm as means to explore questions of fundamental significance in the field of modern molecular biology. The titles of the three course modules are: cancer, heart disease, and viral diseases. The courses will be taught by members of the program with expertise in each area and will emphasize the design and interpretation of experimental methods in modern biomedical research.

ISB 2025 - INTRODUCTION TO BIOINFORMATICS PROGRAMMING IN PYTHON

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to a selection of popular python packages used in bioinformatics and computational and systems

biology. Students will be graded on programming assignments. Each assignment will explore a different sub-discipline of computational biology and introduce students to a new python package. Optional recitations will be available for students with programming and will assist in the development of basic programming skills. The course is designed for first-year graduate students in the corresponding fields of study. There will be a 1-hour lecture a week with time allocated for two 1-hour recitations. Both the lecture and recitations need to be scheduled in a computer lab (such as our classroom).

Academic Career: Graduate

ISB 2050 - ISB RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students are required to attend a weekly research seminar. Students may attend seminars hosted by the School of Medicine and/or Department of Biological Sciences.

Academic Career: GRAD

Course Component: Seminar

Grade Component: Grad HSU Basis

ISB 2055 - SCIENCE WRITING

Minimum Credits: 1

Maximum Credits: 1

This course will help students prepare to write their comprehensive exam proposals and will address other essential science communication skills, including research papers, oral and poster presentations, pitching ideas to industry, and web-based communication platforms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISB 2060 - RESEARCH IN PROGRESS

Minimum Credits: 1

Maximum Credits: 1

A weekly Research in Progress Seminar will be presented by students. Students will present their work, or primary literature relevant to their field. Weekly attendance and participation by all ISB students is required.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

ISB 2070 - THE BEDSIDE TO BENCH

Minimum Credits: 2

Maximum Credits: 2

This course introduced graduate students to biomedical research in a comprehensive format integrating organ system biology and clinical medicine with critical developments in the basic science research literature. Course topics include renal-electrolyte, cardiology, cancer, pulmonology, infectious diseases, endocrinology, neurology, rheumatology, and immunology, hepatology and liver disease, gastroenterology, geriatrics, and hematology/oncology. Course work includes an overview of each biomedical field, clinical tours, discussions with leading physicians on the current challenges in patient care, and analysis of the basic science literature in a journal club forum.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

ISB 2080 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9

This course provides the student an opportunity to carry out a specific research project in the dissertation laboratory prior to admission to candidacy for the doctorate.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Integrative Systems Biology (PHD)

ISB 2090 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

ISB 3090 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14

A directed research project which results in a dissertation for a doctoral degree.

Academic Career: Graduate

Intelligent Systems

ISSP 2000 - MS RESEARCH

Minimum Credits: 1
Maximum Credits: 9

Research and thesis MA degree.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2015 - FOUNDATIONS OF CLINICAL AND PUBLIC HEALTH INFORMATICS

Minimum Credits: 3
Maximum Credits: 3

A survey of fundamental concepts and activities on information technology applied to health care. Topics include computer-based medical records, knowledge-based systems, telehealth, decision theory and decision support, human-computer interfaces, systems integration, the digital library, bioinformatics, and educational applications. Department-specific applications such as pathology, radiology, psychiatry and intensive care are also discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2020 - TOPICS IN INTELLIGENT SYSTEMS

Minimum Credits: 1
Maximum Credits: 1

This course is an immigration course for the intelligent systems students.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2030 - ADVANCED TOPICS IN INTELLIGENT SYSTEMS

Minimum Credits: 1

Maximum Credits: 1

This course is a continuance of ISSP 2020. It is an immigration course for the intelligent systems students. Students continue with this course by carrying out their projects developed in ISSP 2020 and giving presentations presenting their results.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2062 - PROBLEM-ORIENTED PROGRAMMING IN MEDICAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to extend an experienced students' programming abilities through review of current program design and coding techniques, including fourth-generation languages, the unified modeling language (uml), object-oriented programming and extreme programming. The course includes a strong practical programming component based on the python language that includes in-class laboratories, weekly practical programming problems, and midterm and final programming projects. Programming assignments are drawn from areas relevant to medical informatics such as structured text and image processing, network communications, database management, natural language processing, expert systems, etc. Through the course, students learn to understand the programming process at a practical level and gain the ability to independently create useful software tools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2070 - PROBABILISTIC METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides an introduction to computational approaches for probabilistic modeling and inference. A particular focus is placed on Bayesian networks, although other probabilistic models also will be studied. Medical applications are emphasized, however, the principles are general and no medical knowledge is needed to take the course. The course does not require knowledge of a computer programming language. An understanding of basic probability theory would be helpful, but is not required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ISSP 2081 - FOUNDATIONS OF BIOINFORMATICS

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to selected topics of bioinformatics also known as computational biology. In this course, the difficult computational problems involving different types of biological information are identified using case studies from current literature. Emphasis is on genomic aspects of computational biology with some overview of proteomics and structural aspects. The course is structured as a seminar course intending to draw students into participating in discussions related to both problems and existing solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2083 - BIOMDCL INFORMATICS JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This course meets once each week for one hour. The research being presented will be taken from recent journal papers.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2090 - PRACTICUM IN ADV BIOMEDICAL IT

Minimum Credits: 1

Maximum Credits: 6

This course is designed for people who want a practicum experience in working with advanced information technology in the center for biomedical informatics.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2160 - FOUNDATIONS OF ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

The principal topics of AI are: representation knowledge, reasoning and problem solving, knowledge acquisition and machine learning, robotics, and natural language understanding. This course surveys these areas in order to provide an understanding of artificial intelligence methods and research problems. Specific topics include: action and object-centered representations, the search paradigm, planning and constraint satisfaction, qualitative reasoning, analogical reasoning, default reasoning, induction, other methods of learning, and knowledge engineering.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2170 - MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course will give an overview of many techniques and algorithms in machine learning, beginning with topics such as linear and logistic regression, multi-layer neural networks and ending up with more recent topics such as boosting and support vector machines. The basic ideas and intuition behind modern machine learning methods, as well as, a more formal understanding of how and why they work will be covered. Students will have an opportunity to experiment with various machine learning techniques or apply them to a selected problem or domain in the context of a term project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2180 - COMPUTER VISION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (PhD)

ISSP 2190 - KNOWLEDGE REPRESENTATION AND THE SEMANTIC WEB

Minimum Credits: 3

Maximum Credits: 3

Introduction to core ideas of knowledge representation and reasoning, including: predicate logic, resolution, rule-based reasoning, object-based and description-based representations, inheritance and default reasoning, semantic web languages from xml to owl, ontology development, and issues concerning representation of dimensions of the physical and social worlds.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2221 - HUMAN INFORMATION PROCESSING

Minimum Credits: 3

Maximum Credits: 3

Introduction to research and theory in human cognition, including perception, attention, pattern recognition, memory, representation of knowledge, language, problem solving, reasoning, and decision making, with implications for user interface design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2230 - INTRO NATURAL LANGUAGE PROCSSNG

Minimum Credits: 3

Maximum Credits: 3

Overview of computational approaches to natural language processing. Issues in syntax, semantics, and pragmatics, as well as overall systems architectures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2240 - DECISION ANAL & DECISN SUPRT SYS

Minimum Credits: 3

Maximum Credits: 3

Rationality and rational behavior; uncertainty, probability, decision making. Psychology of decision making. Decision theory and decision analysis, structuring decision problems, elicitation of probabilities and utilities. Conflicting objectives, multi-attribute decision theory. Probabilistic methods in artificial intelligence. Group and team decision making. Decision support systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2250 - RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

Beginning research design with emphasis on the basic process of inquiry. Identifying and articulating research problems; determining and describing procedures for conducting research; designing data collecting procedures; formulating testable hypotheses; interpreting and drawing conclusions from data analysis, and reporting research findings and implications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ISSP 2280 - ADAPTIVE INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Introduces key principles of adaptive information systems and modern techniques for user modeling and personalization. Covers the construction of user models and user profiles. Examines the use of various personalization techniques such as adaptive search, recommendation, and navigation support. Reviews major types of adaptive information systems and explores important application areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2430 - SOCIAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

Introduction to key theories and technologies of social computing. Reviews major types of social computing systems. Several social computing systems are explored and used throughout the course. Final group project focuses on designing and implementing a social web system.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Intelligent Systems (MS or PHD)

ISSP 2630 - FOUNDATIONS OF COGNITIVE PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce core issues, theories, and experimental findings in cognitive psychology. Topics to be covered include history of cognitive psychology, sensory perception, attention, memory, imagery, language, reasoning, learning and expertise, problem solving, decision making, and individual differences in cognition. The goal is to understand foundational theories and issues as well as the research methods used in this area. In other words, how human cognition can be studied scientifically, and why the results of experimental investigations support particular theories.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

ISSP 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3

A professional internship may be taken at any time during the course of graduate study. Ph.D. students may take this course up to two times for credit, MS students may take it at most once.

Academic Career: Graduate
Course Component: Internship
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9

Directed study.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 2990 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9

Independent study.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1
Maximum Credits: 9

Research and dissertation Ph.D.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3120 - ADV TOPCS NATURAL LANG PROCSSNG

Minimum Credits: 3
Maximum Credits: 3

Natural language processing (NLP) is primarily concerned with creating computer programs that interact with human languages. The objective of this course is to continue the studies of natural language processing (NLP), to explore selected topics among syntax, semantics, and pragmatics more deeply, and to discuss recent advances in (NLP).

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: ISSP 2230 or CS 2731 or INFSCI 2420; PLAN: Intelligent Systems (MS, PHD)

ISSP 3180 - VISUAL LANGUAGES AND PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3

This course will include fundamentals of formal language theory, iconic and symbolic representations, formal theory of iconic systems, icon operators and semantics, icon oriented system compiler for visual interface design, computer graphics and visual programming, issues in the design of visual programming systems, visual database systems, iconic indexing, and advanced topics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Intelligent Systems (MS, PHD)

ISSP 3535 - ADV TOPICS IN MACHINE LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course will survey advanced topics in machine learning, for example, inductive learning, reinforcement learning, and neural network learning.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: ISSP 2170 or CS 2750; PLAN: Intelligent Systems (MS, PHD)

ISSP 3565 - ADV TOPICS ARTIFICIAL INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course will survey current topics in artificial intelligence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: ISSP 2160 or CS 2710; PLAN: Intelligent Systems (MS, PHD)

Interdis Biomed Grad Prog

INTBP 2000 - FOUNDATIONS OF BIOMEDICAL SCIENCE

Minimum Credits: 8

Maximum Credits: 8

Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD) or Interdis Biomedical (UNK)

INTBP 2001 - FOUNDATIONS OF BIOMEDICAL SCIENCE STRUCTURAL BIOLOGY

Minimum Credits: 7

Maximum Credits: 7

Primary objectives of the course are to convey knowledge of the molecular and cellular mechanisms controlling cell, tissue and organ function, and to develop an understanding of the experimental evidence supporting these concepts through an integrated presentation of material from biochemistry, cell biology, molecular genetics, pathology, pharmacology, and physiology. The development of critical thinking skills will be emphasized through an evaluation of experimental evidence and reading of the primary literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

INTBP 2005 - FOUNDATIONS CONFERENCE

Minimum Credits: 4

Maximum Credits: 4

Contemporary approaches to problem-solving in biology, as well as principles underlying modern methods of biomedical research will be integrated with the lecture component of the course through an analysis of mechanisms underlying biological phenomena. Students will present papers, critically analyze data and devise experimental approaches to biomedical problems considered in lecture.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

INTBP 2010 - LABORATORY RESEARCH ROTATION

Minimum Credits: 1

Maximum Credits: 1

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad

exposure to method and practice.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

INTBP 2011 - LAB RESEARCH ROTATION SUPPLEMENT

Minimum Credits: 2

Maximum Credits: 4

Course supplement to INTBP 2010 for those students initiating their first rotation in summer.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

INTBP 2013 - D2K: FROM DATA TO KNOWLEDGE- BIOMEDICAL EXPERIMENTAL DESIGN AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Experimental biologists formulate hypotheses and models, design experiments, collect data and conduct analyses to draw conclusions. Deep understanding on biological principles requires D2K- the translation of data into knowledge that transcends first-order conclusions. This course for first year Ph.D. students in the biomedical sciences will examine basic principles of experimental design, together with measurement and sources of experimental error. The course will provide practical 'hands on' introduction to the quantitative tools required for experimental research using cellular, molecular, and systems based methods. Topics will include: goals of experimental design, making measurements, principles of parametric and non-parametric statistical inference, use of MS excel, graphpad prism and R, design of publication graphics and a brief introduction to big data approaches. Students will work in small groups to construct capstone projects by making 'you tube' style videos to illustrate key principles of experimental design and analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

INTBP 2090 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in degree-granting programs under the interdisciplinary biomedical graduate program.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

INTBP 2100 - BIOLOGY OF VISION

Minimum Credits: 3

Maximum Credits: 3

This course is being designed to meet the requirements of the t-32 training grant (t32 ey017271-01 interdisciplinary visual science training program) from NIH. The target students are the graduate students, fellows and residents in the department of ophthalmology. In addition, the post-doctoral fellows working in the department of ophthalmology will be encouraged to take this course. We are planning to cover a wide array of subjects including the ocular anatomy, embryology, biochemistry, pharmacology, immunology, microbiology and genetics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

INTBP 2290 - SCIENTIFIC ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Minimum Credits: 1

Maximum Credits: 1

The course is an introduction to the basic ethical issues which arise in the course of conducting scientific research. It is intended for graduate students and fellows in the biomedical sciences who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by discussion of issues in small groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Computational Biology (PHD) or Molecular Biophy & Struct Bio (PHD) or Computational Biology (PHD) or Integrative Molecular Biology (PHD) or Interdis Biomedical (UNK)

INTBP 3240 - GRADUATE STUDENT WRITING SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course teaches fundamental grantmanship skills using actual NIH training grant submissions. Students construct a competitive research training grant and are instructed on methods to identify funding sources. This course consists of introductory lectures followed by a series of workshops staffed by the IBGP training faculty. Workshops cover peer scientific review and study section operation, avoidance of common pitfalls in grant writing, grant writing ethics and scientific community service.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Interdisciplinary

BIND 2000 - ENGINEERING AND BUSINESS COLLABORATION IN INDIA

Minimum Credits: 3

Maximum Credits: 3

The program focuses on product and innovation value chains and students get to visit several world-famous companies and industrial sites in India.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2000IS - ENGINEERING AND BUSINESS COLLABORATION IN INDIA - IN-STATE

Minimum Credits: 0

Maximum Credits: 0

Non-graded course for in-state tuition.

Academic Career: Graduate

Course Component: Lecture

Grade Component: No Grade Required

Course Requirements: Katz Grad School of Business students only.

BIND 2024 - CONSULTING FIELD PROJECT

Minimum Credits: 3

Maximum Credits: 3

This course teaches management consulting in a real-world environment. Students are provided a unique opportunity to apply the analytical tools and concepts taught by katz, and do so in a practical manner. Each project includes three to five students assembled as a team. Each project involves a single "client" organization, which may be a profit, non-profit, or governmental. Each client provides its assigned study team with a project of immediacy and an executive dedicated to working with the team. A faculty advisor is assigned to each team. Students schedule their own time, dovetailing with client schedules and that of their faculty advisor. Students are further supported three Saturday consulting workshops led by consultants from the Pittsburgh office of McKinsey & company, management consultants. An end-of-term competitive competition is also held, the winner being awarded the McKinsey cup.

Course Requirements: PREQ: BACC 2401; PROG: Joseph M. Katz Grad Sch Bus

BIND 2031 - GLOBAL BUSINESS PROJECT

Minimum Credits: 3

Maximum Credits: 3

This graduate consulting project course is offered by a consortium of business schools in the United States and some in the target countries. The global business project asks students to apply both cross-cultural awareness and foreign language skills to produce

strategic advice for a company that is focused, compelling and actionable. The course offers students the opportunity to increase their global business competency through guided hands-on business experience while also introducing them to the challenges of virtual teaming. Teams of five or six are constructed through a competitive application process with members drawn from any of the partner schools. At the beginning of the term each student is given an assignment to help him or her prepare for the assignment. All students attend a kickoff meeting in march where they meet with their team and their client; during this meeting they draw up a scope of work, project timeline, and work plan. During the remainder of the term, the teams work virtually, gathering data and investigating solutions to their client's challenges. In May, the teams spend two weeks in their target country doing research and preparing for the final presentation with the client. On the final day of this in-country segment, the team presents its findings to the client in a final presentation. Grades are determined by the faculty advisor for the project based on the following weighted individual grade is 55% and team grade is 45%. Inputs are received from the client and from peer assessment of team members.

BIND 2200 - INTEGRATED PROJECT FOR MBA/MS IN ENGINEERING PROGRAM

Minimum Credits: 2

Maximum Credits: 2

All students in the MBA/MS in engineering joint degree program are required to complete an integrated project for a company or some other facility. Oversight of this project will be the joint responsibility of a faculty member from KGSB and one from the student's engineering department. It is the student's responsibility to identify these faculty members; program advisors will assist the student in this effort. Students must present a one or two page proposal prior to the start of the project outlining what they plan to do over the course of the project. Ideally, the project should blend skills learned from the business and engineering components of the program. The proposal must be approved by the business and engineering faculty members overseeing the project.

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2444 - MANAGEMENT SIMULATION CAPSTONE

Minimum Credits: 3

Maximum Credits: 3

The management game is an applied strategic management and general management exercise where teams of students operate computer simulated companies for 3 years acting as the executive committee of a multi-national manufacturing company. Groups of students compete against each other as they try to add value to their companies. The class teaches competitive dynamics group management skills, cross-functional management, and presentation skills. The class is intended to be taken during the student's last term in the program and is intended to provide an illustration of how to apply the tools acquired in other classes in a complex international business environment. A main focus of the learning is the unstructured nature of the problem. We want to train managers to solve open-ended problems with talented people in creative ways. External boards of directors may be utilized during the class for feedback and to assess student progress. Each team is asked to engage in externally focused exercises. Some examples of these exercises include negotiating a labor agreement with real union representatives and presenting their marketing plans to practicing marketing executives. The external feedback and evaluation structure of the course makes the exercise sharply realistic. The highly unstructured nature of the class makes it invaluable for students preparing to enter the job market as leaders instead of followers.

BIND 2510 - EXECUTIVE BOARDROOM SERIES 1

Minimum Credits: 1

Maximum Credits: 1

This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in previous courses. Students are engaged in a structured understanding of the "business of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course follows the dollar from patient to product and service in the following manner: patient->health insurance pharmacy benefit->p.m.->pharmaceutical industry->pharmacies. The selection process requires a one-page narrative on the potential contribution(s) of this course to the student's education and/or career goals.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2511 - EXECUTIVE BOARDROOM SERIES 2

Minimum Credits: 1

Maximum Credits: 1

This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in earlier courses including part 1 of this course. Students are engaged in a structured understanding of the "businesses of pharmacy in health care, and related fields that impact the profession in an executive boardroom format. This (one credit) is the second part of an elective series (offered on alternating years) which focuses on "entrepreneurship in medicines and health care". This course analyzes the fundamentals of entrepreneurship amongst successful executive finders, binders, and minders.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BIND 2512 - RESTRUCTURING AND VALUATION

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the value creation process in private firms. We begin with a broad perspective on what distinguishes private firms from publicly traded firms. This course provides students with the general perspective to appreciate these problems and also the specific tools to value their private company as an investment relative to other alternatives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2526 - BUSINESS PROCESS REDESIGN

Minimum Credits: 2

Maximum Credits: 2

Using a cross functional perspective, the course presents tools for the redesign of business processes, shows participants how to diagnose process problems, and explains how to generate and implement process redesign projects in different types of organizations. After the course, participants should be able to generate and implement business process redesign projects of their own.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

BIND 2600 - MIB PRACTICUM COURSE

Minimum Credits: 3

Maximum Credits: 3

This course is intended to give students in the MBA/MIB dual degree program practical experience in their fields (finance marketing, MIS, etc.). Students will work fulltime for a period of approximately 4 months in an organization located in countries other than their own native countries. The internship location will be based on near-native competence in a second language.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BIND 2602 - CPT INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

This course prepares the student for their internship opportunity and helps them to leverage the internship experience by focusing on career management, organization and people skills in the context of global executive mobility. Students are provided with a unique opportunity to apply the skills taught at Katz in a practical manner. Each student completes a project during an internship or co-op experience for an employer, which may be a for-profit, non-profit or governmental agency. The employer will sign-off that the student has completed the project. A faculty advisor is assigned to the student. The student is required to attend a one-hour orientation session prior to the internship. The student will attend a full-day global executive skills workshop upon completion of the internship, where the student will provide an executive level presentation to the class. The emphasis is on practical skills to enhance professional success in today's globally mobile business environment for managers. This course is for Katz students only.

BIND 2710 - GLOBAL RESEARCH PRACTICUM: GLOBAL ENERGY (EASTERN EUROPE)

Minimum Credits: 3

Maximum Credits: 3

Immerse yourself in international business while earning 3 credits. The global research practicum introduces students to the global business of natural gas and other energy resources through visits to 4 interconnected locations: Washington county, PA, Washington, DC, Moscow, Russia and Sofia, Bulgaria. The global energy research practicum features: -first hand exposure to different, and oftentimes conflicting, perspectives on major energy topics -access to natural gas producers, policy makers, and scholars in the US, Russia, and Bulgaria. -Behind-the-scenes site visits to several multinational companies and government institutions. -Cultural trips to famous landmarks, restaurants, shops that teach you about the people and history of Russia and Bulgaria. The global research practicum requires students to complete a small research project drawing on secondary sources and experiences gathered during the trip. Leading the program is Susan Hicks, anthropologist and program manager at the center for Russian and East European studies at the University of Pittsburgh.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

BIND 2715 - GLOBAL RESEARCH PRACTICUM: INDIA (GLOBAL STRATEGY)

Minimum Credits: 3

Maximum Credits: 3

The course will offer a first-hand, up-close and thought-provoking experience of opportunities and hurdles that characterize business and industry in the second most populous country, which is expected to soon become a dominating economic power. The course will explore strategic responses to the challenges and opportunities of globalization and reverse innovation emanating from the base of the pyramid. Business models that generate value by effectively responding to human needs in growth economies in developing nations will be studied and developed.

Academic Career: Graduate

BIND 2889 - BRAZIL TODAY

Minimum Credits: 1

Maximum Credits: 1

This short course will explore how these three factors interact in brazil and in the position of Brazil as a world economy. Examples of questions that may be explored during the lectures and that students may want to explore for their paper are: what is brazil's role in the

world economy? What are the major impediments to Brazil's economic growth? What role does race, ethnicity and class play in shaping Brazil's politics and economy? To what extent is the deep social and economic inequality in Brazilian society rooted in discrimination between races? How has development and trade coupled with Brazil's national economic policy affected Brazil's environment? What are the major impediments to Brazil's economic and business growth? Compare and contrast policy debates, environmental impacts etc. Of economic growth between those of the India and Brazil what does the economic growth mean for: an economically well-off American citizen? An American of lower economic status? An affluent Brazilian citizen? A poor Brazilian citizen? What are the current and future challenges of multinational firms in Brazil and what needs to happen to move towards the path of overcoming these to assist the economic and human growth of Brazil? A review of policies and education on a Brazilian industrial sector such as manufacturing, textiles, shoes, chemicals, cement, lumber, iron ore, tin, steel, aircraft, motor vehicles and parts, other machinery and equipment. Compare and contrast policy debates, environmental impacts etc. Of economic growth between those of the Brazil and another emerging economy such as India)

Interpersonal Skills

SWINT 2004 - GRIEF AND LOSS: INTERVENTIONS, IMPLICATIONS & UNDERSTANDING

Minimum Credits: 3

Maximum Credits: 3

This course explores the various models used by social workers who are interested in meeting the complicated needs of grieving clients and their families. Knowledge based practice patterns rooted in the framework of the tasks of mourning, the mediators of mourning and a review of the dual processing model are provided across a wide range of populations and practice settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2007 - INTRO PSYPMCLGY SOCL WRK PRACT

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize students with the basic terminology and models of pharmacokinetics, and the role of social workers in medication management. The development of psychopharmacology from a historical and sociological perspective as well as an overview of neurochemistry and biological-psychological functioning will be addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2009 - FAMILY CONFERENCE AND TEAMING

Minimum Credits: 3

Maximum Credits: 3

This course will familiarize students with Family Group Decision Making (FGDM), a cross system practice that builds on the strengths of families by supporting prevention strategies and planning for and ensuring the safety, permanency and well-being of children. Family group decision making recognizes the importance of involving family groups in decision making about children who need protection or care, and emphasizes family empowerment by acknowledging that families should be given the opportunity and responsibility to make their own decisions regarding their children and family members.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

SWINT 2011 - SOCIAL WORK PRACT WITH FAMILIES

Minimum Credits: 3

Maximum Credits: 3

This course explores various basic models used by social workers for examining, understanding, and intervening in family processes. Video, role play, and case material are used in developing skills for advanced practice in working with families.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2016 - INTERPERSONAL PSYCHOTHERAPY

Minimum Credits: 3

Maximum Credits: 3

This course builds on the student's knowledge of psychotherapies gained in the prerequisite course, SWINT 2082, Models of Intervention, and expands this knowledge to include a focus on the evidence-based model of interpersonal psychotherapy (IPT). The course enables students to learn skills in applying the latest IPT assessment and treatment methods for a variety of mood and non-mood disorders. Particular attention will be paid to empirical methods of evaluating client progress and outcomes. The course will also focus on the relevance of utilizing engagement strategies and IPT treatment approaches to clinical social work practice with "difficult-to-engage" and "at risk" populations confronting issues of age, race/ethnicity, poverty, gender, sexual orientation, religion, and disability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2018 - CLINICAL SKILLS PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the concepts and techniques employed in clinical work with severely mentally ill and/or chemically dependent clients. Categories of disturbance will include: schizophrenia, mood disorders, other psychoses, severe personality disorders and alcohol and/or other substance abuse. The overall purpose is to equip the beginning practitioner with the knowledge and skills requisite for working with the types of clients most commonly seen at public mental health/drug and alcohol services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 and SWBEH 2065 (MIN GRADE 'B-' for Listed Courses)

SWINT 2025 - SOCIAL WORK PRACTICE IN INTEGRATED HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the clinical and administrative skills, roles and functions of social work practice which take place in a wide range of community based agencies and institutions at the primary, secondary and tertiary levels of intervention with and on behalf of

a diverse population. Knowledge skills and ethics are integrated toward promoting readiness for employment in the healthcare field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2030 - DIRECT PRACT WITH ELDERLY

Minimum Credits: 3

Maximum Credits: 3

This course defines the range of interpersonal practice with and for the elderly in terms of primary, secondary and tertiary levels of intervention. A broad range of clinical practice roles is addressed in regards to practice across a broad spectrum of settings. All of the established social work practice approaches are looked at in detail for treatment procedures which can be applied to work with the elderly. An eclectic perspective to practice with the elderly is stressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2031 - ADV DRCT PRAC: COGNITV/BEHVRL

Minimum Credits: 3

Maximum Credits: 3

Building on the student's knowledge of cognitive/behavioral theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-'); SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2033 - ADV DRCT PRAC: PSYCHODYNAMIC

Minimum Credits: 3

Maximum Credits: 3

Building on the student's knowledge of psychosocial theory gained in the prerequisite course in generalist practice and models of intervention, this course will focus on these theoretical frames of reference in terms of application to interpersonal practice with individuals, families and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-'); SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2034 - DRCT PRACT DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

This course will focus upon issues of cultural diversity and oppression. It will emphasize empowerment as its overarching framework and as a major goal for social work direct practice with individuals, families and small groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWINT 2035 - INTIMATE PARTNER VIOLENCE

Minimum Credits: 3

Maximum Credits: 3

This course examines the dynamics and treatment implications of working with family members who have experienced various forms of physical and/or sexual maltreatment from other family members. Physical and sexual child abuse, spouse abuse and marital rape are topics of concern.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2042 - SOCIAL WORK DRUG & ALCOHOL ABUSE

Minimum Credits: 3

Maximum Credits: 3

This course provides a basic orientation to alcohol and drug abuse as problems requiring social work interventions. Emphasis is placed on examining a variety of treatment approaches in providing services to alcoholics, drug abusers, and their families. Special efforts are made to focus the content on the needs of working populations experiencing problems with alcohol and drugs, as well as their families.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2046 - PLANNED SHORT-TERM TREATMENT

Minimum Credits: 3

Maximum Credits: 3

A pluralistic theoretical framework for planned short-term treatment, highlighting contributions from interpersonal and social learning orientations is examined, and major research studies supporting short-term intervention are reviewed. Attention is given to the goals and process of the initial interview and major change strategies (behavioral rehearsal, task assignment, skill training, and cognitive restructuring) are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2047 - CHILD PERMANENCY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide the history, definitions, forms and skill sets for permanence for children and families served by the child welfare system. Based on an historical understanding of program development and human development needs, the course will offer a paradigm for providing healing interventions for children who come to the attention of the child welfare system. The course will explore ways that support is needed and provided to all parties in the work of permanency. The course also will look at the implications of permanency with regards to social/community health and wellness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2049 - DIRECT PRACTICE WITH CHILDREN

Minimum Credits: 3

Maximum Credits: 3

This course prepares students to work directly with children in social work settings. A variety of teaching techniques are used to help students: utilize different theories and models of working with children; differentiate fact from inference and normal from deviant development; be comfortable with a variety of play media; and examine in-depth the theme of separation and its effect on the child.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2050 - COUPLES THERAPY: THEORY & TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

This course concentrates on theory and techniques of treatment with the marital dyad. Emphasis is on empirically validated methods,

with particular focus on developing an eclectic approach for advanced social work practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2053 - GROUP INTERVENTIONS WITH HIGH-RISK POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Theory and concepts related to advanced social work practice with groups, including knowledge of group types, processes, selection, and composition, as well as group leader roles and functions are all considered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2058 - SOCIAL WORK EDUCATIONAL SETTINGS

Minimum Credits: 3

Maximum Credits: 3

This course provides a knowledge base for the practice of social work in school or school-related settings. Focus is on application of knowledge, and values and skills of social work practice toward resolution of diverse problems encountered by pupils, schools and communities in the effort to achieve educational goals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2063 - ISSUES IN CHILD MALTREATMENT

Minimum Credits: 3

Maximum Credits: 3

This course will provide a comprehensive examination of child sexual maltreatment issues at the micro, meso, and macro levels: etiology; identification; child welfare system response; treatment; the impact the maltreatment has upon individuals, families, groups, and the community (including those coming into contact with maltreatment in the course of their work) and resilience in the face of maltreatment. Emphasis will be on the student's development of assessment skills, knowledge of the therapeutic process of recovery, and the role and function of organizations. Social work interventions and treatment modalities, including outcome data, will be presented. Students will be offered information about maltreatment among diverse populations. All topics will be related to and examined in the light of the core values, ethical principles, and standards of the national association of social workers code of ethics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2072 - SOCIAL WORK PRACTICE AND TRAUMATIC STRESS

Minimum Credits: 3

Maximum Credits: 3

This course addresses theories of primary and secondary (vicarious) traumatic stress; the nature of traumatic events and environments; and the potential impacts on individuals, families, groups, and communities. Students will be offered information about traumatic exposure and stress among diverse populations. Interventions and treatment modalities for working with those affected by traumatic stress using the person-in-environment perspective will be presented. All topics will be related to and examined in the light of the core values, ethical principles, and standards of the national association of social workers code of ethics. Emphasis will be on the student's development of practice competencies such as critical thinking, supporting the therapeutic process by the use of research-informed and strengths-based practice, identifying opportunities for advocacy, effective self-care, and understanding the role and function of organizations in creating trauma-informed human services environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

SWINT 2073 - INTEGRATED HEALTHCARE AND PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop general knowledge of medical terminology and the social worker's role in medication management. Students learn how to educate and support patients in adhering to recommended medication treatment and in being knowledgeable

about possible side effects. Social workers have an extremely important role to play in the patient's ability to adhere to medication requirements. They can support patient compliance with medication by providing information and education that allows that patient to have realistic expectations for what may be achieved with medication. In addition, they can also work with patients to achieve their goals for improving medication adherence.

SWINT 2074 - SPIRITUALITY AND SOCIAL WORK

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

SWINT 2076 - HUMAN SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

This course presents current research about human sexuality, discusses the range of sexual life-styles, and develops a treatment typology for therapists working with couples and individuals with sexual dysfunctions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2082 - MODELS OF INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

The course provides a framework for understanding and differentially using treatment models in interpersonal social work practice. It examines four basic treatment models: psychosocial, crisis intervention, behavior modification, and an interpersonal approach based upon either communication theory, the client-centered approach, or an experiential humanist approach. These basis models are compared and contrasted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081; CREQ: SWRES 2021; SBPLAN: Direct Practice (Social Work-MSW)

SWINT 2087 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Given the changing nature of social work practice, the MSW program occasionally offers courses in new and/or unique content areas. When offered, this course is designed to provide skill and knowledge content not covered in other direct practice skill courses.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWINT 2096 - CLIN SOCL WRK AFRCN AMERCN FMLY

Minimum Credits: 3

Maximum Credits: 3

The overall objective of this course is to provide a knowledge base on African-American families within a community context that is the basis for developing methods and skills relevant for clinical intervention with African American families. It will provide the student with the opportunity to expand on concepts, skills and assumptions about clinical transactions learned in basic clinical method courses. Conceptual models for assessment/intervention will assist students to clarify and become comfortable with theoretical and practice approaches with black families.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWINT 2082 (MIN GRADE 'B-')

SWINT 2097 - DRCTD STUDY INTERPERSONAL SKILLS

Minimum Credits: 1

Maximum Credits: 3

A student-initiated educational experience, guided by a faculty member that significantly supplements the social work interpersonal skills curriculum and conforms to academic course content expectations.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWINT 2099 - FIELD WORK

Minimum Credits: 1

Maximum Credits: 8

The field practicum emphasizes the integration and application of social work values, knowledge and skills in practice settings. Placements are in community service delivery systems and are individualized to combine the student's choice of concentration area, certification program and specialized skills interest.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Italian

ITAL 2092 - ITALIAN TRANSLATION STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course explores the field of Translation Studies from the Italian perspective. It may address any or all of the following issues: the history of translation as a literary practice, editorial projects that involve translation, the ethics of translation, translation between standard and dialect languages, translation and power relations, the relative primacy of source and target texts, the relationship between translation and global literatures. Students will develop and pursue final projects that involve commentary on published translation or new translation projects with annotation.

Academic Career: Graduate

Course Component: Lecture

ITAL 2200 - DANTE

Minimum Credits: 3

Maximum Credits: 3

A close reading of selected cantos from Dante's divine comedy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2302 - THEATER OF THE RENAISSANCE

Minimum Credits: 3

Maximum Credits: 3

This seminar will study xvith century Italian theatre. It will start with a discussion on the nature of drama, distinguishing genres and dramatic character types.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2315 - RENAISSANCE HUMANISM

Minimum Credits: 3

Maximum Credits: 3

This course examines the major figures in Renaissance humanism, moving from the civic humanism of Florentine authors like Bruno to the philological humanists such as Poliziano. Attention is given also to the independent vernacular humanists, Alberti and Leonardo.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2410 - SETTECENTO

Minimum Credits: 3

Maximum Credits: 3

A survey of Italian literature of the xviiiith century: particular attention will be paid to the works of Pietro Metastasio, Carlo Goldoni and Vittorio Alfieri, as well as critical and theoretical texts of the period on theater.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2420 - GOLDONI

Minimum Credits: 3

Maximum Credits: 3

A course in Goldoni's plays and history of the theater in the 17th and 18th centuries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2500 - OTTOCENTO 1

Minimum Credits: 3

Maximum Credits: 3

A course in the literary and critical trends of the first quarter of the nineteenth century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2600 - NOVECENTO 1

Minimum Credits: 3

Maximum Credits: 3

A reading of 20th century Italian prose. The course focuses on the Italian writers who started to publish during and right after World War I.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2601 - NOVECENTO 2

Minimum Credits: 3

Maximum Credits: 3

Twentieth-Century Italian prose narrative and its relationship to literary movements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2610 - SICILY WRITING AND WRITTEN

Minimum Credits: 3

Maximum Credits: 3

This graduate-level seminar provides a forum for the analysis of Sicilian cultural production and a laboratory for the production of new knowledge about this Mediterranean Island. The seminar's texts are chiefly drawn from narrative and poetic genres, but also considers cinema, theatre, journalism, essays, and the visual and plastic arts that seek to express and represent the Sicilian experience.

ITAL 2710 - INTRODUCTION TO LITERARY AND CULTURAL THEORY

Minimum Credits: 3

Maximum Credits: 3

In this course intended for beginning graduate students in the modern languages, students will survey major movements and concepts in literary and cultural theory of the 20th/21st centuries. These theories have provided us important ways to think about how to read and interpret literature, film, and other cultural artifacts, and, as such, are an important aspect of graduate studies in the humanities. This course is meant to provide students a general background in theory that they can further develop in certain areas as they continue their studies. The course will be taught in English, and all readings will be available in English.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

ITAL 2751 - LITERARY LIVES: AUTOBIOGRAPHS AND LETTERS

Minimum Credits: 3

Maximum Credits: 3

This course explores the genre of the autobiography as it manifested itself in Italian literature from Petrarch to the present, as well as a study of individual authors, their motivations for telling the story of their lives, their idea of themselves and their notion of the political, social and cultural environment in which they lived. Autobiography is to be understood here in the broadest sense, and to be considered in all of the disparate forms (poems, letters, confessions, memoirs, journals, apologies, orations, prefaces, etc.) it took on at different times.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2801 - HISTORY OF ITALIAN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

The course will be organized around the central problem that has persisted throughout the history of the language, the so-called *Questione Della lingua*, or the question of which, if any, of its many co-existing forms is the true or correct or in some way the preferable form of Italian.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This course enables M.A. Candidates to do research under the direction of a faculty member, on a topic of mutual interest.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

ITAL 2903 - MA RESEARCH PAPER DIRECTED STUDY

Minimum Credits: 3

Maximum Credits: 3

In partial fulfillment of the MA in Italian Language and Literature, all students must write a Master's Research Paper (or *tesina*) of professional article quality and length (30 pp min.). Students must conduct research beyond the scope of any single graduate term paper, but are encouraged to develop and formulate their topic in the context of one particular seminar (or two, if seminars are thematically or otherwise related). Students will work closely with the faculty member whose field is most relevant to the chosen topic (typically the faculty member who initially taught the seminar that generated the initial term paper) to identify, appropriate areas for expansion, additional texts or case studies, and relevant methodologies. The paper must be written in Italian.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

ITAL 2910 - COMPREHENSIVE EXAMINATION MA

Minimum Credits: 1

Maximum Credits: 3

This course is intended for M.A. Candidates in their last term of study when they present themselves for the ma comprehensive examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

ITAL 2970 - TEACHING OF ITALIAN

Minimum Credits: 3

Maximum Credits: 3

This course will review the theory and practice of Italian language teaching. This will include all aspects of language teaching and testing, cultural understanding, bi lingual education and the teaching of reading.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

ITAL 2975 - ADVANCED TOPICS IN FOREIGN LANGUAGE LEARNING AND TEACHING

Minimum Credits: 3

Maximum Credits: 3

In this course intended for experienced foreign language teachers, students will focus on pedagogical issues encountered in advanced-level teaching in the areas of language, literature, and culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

ITAL 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This independent course is for M.A. Students who have completed, or are completing in their last term of study, all course requirements for the M.A. Degree.

Japanese

JPNSE 2022 - HISTORY OF THE JAPANESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course is a review of the historical development of the Japanese language from the earliest extant document to the present. Subjects covered include phonology, syntax and orthography, using examples from historical records, works of literature, and recent scholarship from both Japan and the U.S. This information is useful not only to those studying the history of Japan and of languages in general, but also to students of the modern language who will gain a deeper understanding of all aspects of spoken and written Japanese.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2023 - ASPECTS OF THE JAPANESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the Japanese language through a study of its structure, vocabulary and cultural heritage. Some topics discussed include word order, basic structural patterns, particles such as Wa and Ga, sexism, and word formation. This course is useful for the Japanese studies student wishing to have a deeper understanding of the language as well as the linguistics student interested in gaining knowledge of a non-Indo-European language.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2024 - TEACHING JAPANESE AS A 2ND LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

An introduction to approaches and techniques of teaching Japanese to speakers of English. Included will be some historical background, a review of the major textbooks, and discussions of curriculum development, learning and teaching strategies, romanization, testing, and other relevant topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2025 - EXPLORING THE JAPANESE LANGUAGE AND MIND

Minimum Credits: 3

Maximum Credits: 3

This course explores the relationship between language and thought through the study of linguistic and social phenomena in Japan and the U.S.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2035 - PRAGMATICS OF JAPANESE

Minimum Credits: 3

Maximum Credits: 3

This course will provide an introduction to the usage aspects of Japanese by reading articles on pragmatic aspects of the language. The instructor will lecture on salient points and lead discussion on specific issues and the appropriate use of the language.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2045 - LANGUAGE OF JAPANESE AESTHETICS

Minimum Credits: 3

Maximum Credits: 3

For over a thousand years, aesthetic values have been seen by the Japanese as central in defining the particular significance of their civilization and the driving force of these insights into the beauty of truth remains powerful even to day. Learning to appreciate the development of traditional Japanese aesthetic sensibilities and their historical manifestations in a variety of art forms such as poetry and painting to theatre and folk art not only helps one to understand Japanese culture but provides a nonWestern model to consider creativity, beauty and life. Readings are in English.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2056 - JAPANESE LITERATURE AND THE WEST

Minimum Credits: 3

Maximum Credits: 3

A critical study of modern Japanese works and selected modern Western literary materials with special emphasis on intensive analysis by means of modern Western criticism. The course is designed to encourage the student to examine significant similarities and differences between Japanese and non-Japanese materials and to judge the content from an oriental as well as a Western perspective.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2057 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course provides a critical study of selected international prize winning Japanese films and compares these films with Western films dealing with similar themes. The student learns to analyze and interpret films; becomes familiar with particular genres of Japanese films compared with Western; studies the history of Japanese cinema and its place in international cinematography and exposes the inter cultural benefits of judging the content of the films from oriental and Western aesthetic perspectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2058 - WESTERNS AND SAMURAI FILMS

Minimum Credits: 3

Maximum Credits: 3

A focus on the critical comparative study of two filmic genres--the samurai representing Japanese cinema and the Western representing American cinema. The course demonstrates the analytical processes of the film leading to its structural unity; shows the significance of both genres with respect to the history of Japanese, American and European cinema; compares approaches to films of different countries and provides the overall benefits of approaching films from an intercultural standpoint.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2059 - JAPANESE LITERATURE ON SCREEN

Minimum Credits: 3

Maximum Credits: 3

This course will investigate how literature and film treat some major ideological and socio-cultural issues in Japanese society. Readings of pre-modern tales, modern fiction and contemporary novels. Film adaptations will represent the best of Japan's postwar cinematic tradition. The course is designed for the student interested in Japanese society, culture and intellectual currents through film and literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2070 - WORLD OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

Students will receive a grounding in basic principles of Japanese classical literature, poetry and aesthetics. They will read the entire text in English of the Tale of the Genji and examine important works in Japanese literature composed in later periods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2071 - THE WORLD OF JAPAN

Minimum Credits: 3

Maximum Credits: 3

This course covers the period between 1570 and 1870. Beginning with the unification of Japan under sixteenth century military war lords and ending with the collapse of the Tokugana Shogunate. Students will read selections from the major scholarly literature on the period.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2072 - WRITERS AND THINKERS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an opportunity to read, analyze, and discuss texts by a variety of modern Japanese thinkers and writers who attempt to define the meaning of a changing Japanese culture and its place in the modern world, from about 1900 to 1960. Some are novelists and poets, others are essayists and philosophers writing for general audience. All materials will be read in English.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2080 - GHOSTS, MASKS AND ACTORS

Minimum Credits: 3

Maximum Credits: 3

A critical study of three major dramatic genres of Japan--noh, bunraku and kabuki--in cultural origins. Areas to be explored are the use of masks in the world of the noh theatre, the kabuki with its female impersonators and the near-lifesize puppets of the bunraku. Also discussed is the impact that noh and kabuki have had on modern Japanese and non-Japanese theatrical and film genres.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2081 - FORMS OF JAPANESE THEATRE

Minimum Credits: 3

Maximum Credits: 3

This course will provide a survey of various major forms of Japanese theatre using English language materials. Students will have access to relatively ancient forms of Japanese theatre such as kagura and no, kabuki drama and the bunraku puppet theatre through film and videocassette. The modern and avant-garde theatre are also accessible through translation and videocassette material. This course is designed for upperclass majors in theatre arts and non-majors in related fields.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

JPNSE 2082 - A TASTE OF JAPAN: AESTHETICS OF FOOD IN THE LITERATURE, CINEMA, AND POPULAR CULTURE OF POSTWAR JAPAN

Minimum Credits: 3

Maximum Credits: 3

Food is an expression of the culture it feeds. Course will examine how food reflects the socio-cultural transformation of Japan from the immediate postwar era of shortage and deprivation to the "gourmet boom" of the contemporary period of affluence and abundance. Readings include short stories, novels, essays, comics, film and anime. The questions for the main course are: how do contemporary directors/novelists use food as a means of satirizing certain aspects of Japanese society? What is unique about Japanese people's attitudes towards or outlook on food? How are these national characteristics reflected in some of the works being studied in class?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2085 - INTRODUCTION TO EAST ASIAN CINEMA

Minimum Credits: 3

Maximum Credits: 3

This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

JPNSE 2700 - INTRODUCTION TO THEORY AND PRACTICE OF TRANSLATION

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course that answers to a growing interest in the theory and practice of translation from Japanese to English. The genres of texts that will be dealt with include literary works of various kinds (novels, poems, children's books), magazine and newspaper articles, web posts, manga, subtitling of anime and other videos, and texts of technical nature. Students will first learn broadly about the discipline of translation studies, including a history of translation and issues in translation (invisibility of the translator, culturally specific translatability issues, etc.). Students will then learn specific types of translation issues that come up when translating Japanese into English, using excerpts from a variety of genres as case studies. Special attention is paid to the structural differences between Japanese and English, cross-cultural differences in stylistics, writing with clarity, reference work, etc.

Academic Career: Graduate

Korean

KOREAN 2023 - ASPECTS OF THE KOREAN LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This course will examine and explore essential topics in Korean linguistics such as the Korean scripts and sounds, genetic affiliation, historical development, word structure, grammatical structure, discourse, honorific and speech styles, and first/second language acquisition. Upon completion of this course, students will I) understand how the Korean language developed, and what kind of relationship the Korean language has with other languages, II) have an ability to critically analyze basic word, phrasal and sentence structures as well as discourse structures, III) have a general understanding of how the Korean language works as a communication system.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

KOREAN 2060 - LANGUAGE AND SOCIETY IN KOREA

Minimum Credits: 3

Maximum Credits: 3

Focus on fundamental knowledge of sociolinguistics, language variations, varieties and codes of inherent sociality cultural implements. With substantial differences between eastern and Western cultures, students will study linguistic behavior and social groups, social class, effects of gender, address and reference terms, politeness strategies and style of language form used both in

English and Korean in comparative study. Materials arranged to explain and evaluate the interaction of language, society and culture, the process of how people use language to construct social meaning and how those processes influence linguistic structure as well as cross-cultural communication.

Grade Component: Grad LG/SNC Basis

KOREAN 2065 - METAPHOR IN KOREAN LANGUAGE AND THOUGHT

Minimum Credits: 3

Maximum Credits: 3

Metaphor in Korean language and thought is an introduction course to the study of meaning, which focuses on the basic findings in the field of conceptual metaphor research. Metaphor is pervasive in everyday life, not just in LG but also in thought and culture. Metaphors also play a role in ethnic and cultural identity. In this course, we will examine how metaphor differences across cultures affect how people in different cultures think and consequently use LG differently. Korean will be the main LG to be studied throughout the course but other LGs such as English, Japanese and Chinese will also be discussed in order to maintain cross-linguistic and cross-cultural comparisons.

Law - JD course offerings

LAW 5020 - CONTRACTS

Minimum Credits: 4

Maximum Credits: 4

What promises are legally enforceable? Why does the law enforce those promises? What does it mean to enforce a promise? This course explores those questions, using the basic concepts, principles, and doctrines of contract law, sometimes called "the law of broken promises." Specific topics include the requirements for formation of a contract (such as offer and acceptance), justifications for enforcing promises (such as consideration or detrimental reliance), justifications for denying or limiting enforcement (such as unconscionability or mistake), interpretation of contract terms, and remedies for breach of contract.

LAW 5024 - PROPERTY

Minimum Credits: 4

Maximum Credits: 4

Property law, broadly defined, governs relationships among people with respect to "things." These "things" include land ("real property"), tangible objects such as a casebook ("personal property"), and intangibles such as a publisher's right to prevent others from reproducing the original content in a book ("intellectual property"). The property course examines how property rights may be limited, in situations where more than one person has rights to the same piece of property, and in situations where one owner's rights must be balanced against the rights of the owner of a separate piece of property. Topics covered in the property course may include: modes of acquisition of property (e.g., Capture, find, creation), present possessory estates and future interests, co-ownership of property, marital property, landlord-tenant law, land sales, title recording systems, easements, restrictive covenants, nuisance, public land use regulation (including zoning, eminent domain, and the issue of regulatory takings), and global property issues.

Academic Career: LAW

LAW 5038 - ENERGY LAW AND REGULATION

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to energy law with emphases on public utility regulation, electricity, and the effect of fuel choice on electricity regulation. The course consists of four modules. The first module on public utility regulation addresses the basic function of public utilities; the contemporary public utility scheme for energy; the basics of ratemaking economics. The second module on electricity regulation addresses the evolution of electricity regulation from the monopoly model to modern restructuring and competition; a technical understanding of electricity generation, transmission, and distribution; the functioning of electricity markets; Pennsylvania's framework for regulating electricity markets. The third module on the relationship between fuels and electricity regulation addresses the conversion of fuels to electricity; a comparative analysis of coal, wind and solar power; major issues in public utility regulation and litigation that relate to the transition from traditional to renewable fuels; Pennsylvania's framework for renewable energy. The fourth module consists of a brief introduction to natural gas regulation at the federal level and in Pennsylvania. The course provides students with an understanding of (1) public utility regulation of energy, with a focus on electricity; (2) the relationship between electricity regulation and fuels, especially coal and renewables; (3) the public utility regulation of natural gas; (4) the regulatory framework for electricity and natural gas in Pennsylvania.

LAW 5041 - LAWYERING: A HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course will survey the history of lawyering from ancient times to the present day. Students will be invited to meet Cicero and the Roman jurists, look inside medieval courtrooms to see English common lawyers and European civilians at work, experience the rhetoric of John Adams and Daniel Webster while considering the daunting challenges faced by the emerging bar in early America, and assess the economic, industrial and organizational conditions that contributed to the cultural ascendancy of lawyers in the twentieth century United States. We will investigate both the historical successes of the legal profession and its failures, its championing of great causes and its complicity in great injustices. We will look at lawyering in its changing social, ethical and technological contexts, examining how lawyers over time and in various national settings have constructed their identities, established their power, viewed their duty, and articulated their collective mission. We will investigate how lawyers have been trained, and how different methods of legal education have shaped them. We will learn about legal lives lived far away and right here in Pittsburgh. We will look at today's American bar, assessing its recent history as a business dominated by the rise of the billable hour, and at the end of the course we will peer into some of the possible futures awaiting attorneys working in a digital age.

Academic Career: LAW

LAW 5043 - INT'L COMMERCIAL ARBITRATION

Minimum Credits: 3

Maximum Credits: 3

This course will begin with coverage of basic aspects of the law of international commercial arbitration, including arbitral jurisdiction, arbitration procedure, choice of law, and enforcement of awards. This will include coverage of the New York Arbitration Convention and the U.S. Federal Arbitration Act, along with a focus on the UNCITRAL Model Law on International Commercial Arbitration and the UNCITRAL Arbitration Rules. In order to provide a practical context for consideration of arbitration law and policy, we will work with the problem for the *vis internationalis* arbitration moot that will become available the first week of October. After a review of the problem, we will catalogue the major issues and each student will be assigned a topic from that list for his or her course paper. We will work through all of the arbitration procedure issues as a class, using the contributions of each student to build the arguments and analysis for each side in the *vis* problem. We will also cover the basic substantive law issues raised under the United Nations Convention on Contracts for the International Sale of Goods (CISG). Each student will also be assigned a position to be presented in a mock arbitration at the end of the semester, using the *vis* problem studied during the semester. The Pitt Law *vis* moot team for the following year may be selected at the end of the semester from the J.D. students in the course, consistent with announcements made prior to the beginning of the semester.

LAW 5047 - CRIMINAL PROCEDURE

Minimum Credits: 3

Maximum Credits: 3

The subject matter is supreme court decisional law and policy issues relating to the application and scope of the fourth, fifth, sixth, and fourteenth amendments to the United States constitution. Topics typically covered include: incorporation theory, right to counsel and related entitlements, the exclusionary rule, pretrial identification procedures, search and seizure law, and interrogation law. Students should gain both knowledge relating to constitutional law, which governs the permissible parameters of police conduct and defendants' rights, and an informal sense of how the criminal justice system actually operates.

LAW 5061 - PITT LAW ACADEMY

Minimum Credits: 0

Maximum Credits: 0

This is a full-year course. Full credit is awarded upon completion of both fall and spring sections, no credit will be awarded until the completion of both. For determining full-time status each semester, equivalency is one-half of the total course credits. This speaker series on lawyers' roles will provide students, at the beginning of their law school careers, with exposure to and understanding of the variety of roles that lawyers play in the profession and society. The speaker series will feature 8 programs over the course of the academic year, and first year students are required to attend at least 6 of those programs during their first year. Each program, moderated by a full-time faculty member, features attorneys, judges, and/or people with law degrees working outside of law practice from different professional settings. These presentations should help first year students gain a better appreciation of the practical and intellectual aspects of different professional roles and to preview some of the important personal and professional issues and concerns that may confront them in the course of their careers.

LAW 5076 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 4

Maximum Credits: 4

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

LAW 5082 - CLIMATE CHANGE AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

This course examines the problems of climate change and how law and policy and corporate America are responding to them. The course begins by describing what is encompassed under the current "climate change" debate; considering what science can tell us about the climate change issue, including the uncertainties in that science and the significance and role of descent from the mainstream view of the science. It then considers, given the current state of the science, how we should assess the actions that should be taken to respond to this problem. That assessment should take account mitigation vs. Adaptation. The course also considers the legal responses to the issue of climate change. This course will discuss the united nations framework convention on climate change (UNFCCC), the Kyoto protocol, and the likely future of both. This course will discuss the domestic federal legislation with regard to GHGS as well as certain regional initiatives and voluntary commercial GHG reduction schemes. This part of the course will be examining the "Boomlet" in global warming litigation in federal and state courts looking at the administrative and tort actions pending in U.S. Courts. Finally, the course will address sustainability issues for business, including green building, carbon neutral strategies, certain esoteric accounting issues, some carbon trading issues. Lectures will include voluntary and NGO-driven business initiatives (proactive approaches) as well as certain secondary effects caused by climate change that affect businesses.

LAW 5089 - PUBLIC HEALTH LAW

Minimum Credits: 3

Maximum Credits: 3

Public health law touches the lives and livelihoods of every person. Understanding the intent, basic structure, and methods for employing the local, state, and federal laws governing public health activities will facilitate legal practice in a variety of disciplines, including: municipal, healthcare, environmental, and judicial practice. This is a survey course, intended to introduce students to the most commonly encountered national and world public health law issues. Specific topics include: an overview of the epidemiologic principles underlying public health law; police powers; balancing public and private interests at stake; privacy and confidentiality of public health information, emergency preparedness; search, inspection, embargo and condemnation of private property; abatement of nuisances and dangerous conditions; and the major federal statutes affecting public health. In addition, material concerning world public health issues will be presented to help students understand the community health benefit from comprehensive public health legislation. Finally, ongoing local public health law interventions will be analyzed using the basic principles introduced early in the course.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5090 - CNSTL LAW: FREEDOM OF RELIGION

Minimum Credits: 2

Maximum Credits: 2

This course will examine the first amendment's establishment and free exercise clauses, including the history and purpose of each, the applicable doctrinal tests, and how the supreme court's theory regarding the clauses has changed over time. Classroom discussion will focus on the specific application of these tests, the limitations of each, and whether the tests fulfill the purposes of the religion clauses. Finally, the course will explore how the requirements of the establishment and free exercise clauses can be reconciled and whether any of the current tests or theories can provide a workable solution and balance.

LAW 5093 - THE LAW OF PROFESSIONAL SPORTS

Minimum Credits: 2

Maximum Credits: 2

Focusing on the 4 major professional sports leagues, this course will examine how the common law, state and federal statutes, and even certain constitutional doctrines have been applied to professional sports franchises, its players and agents, and its fans. The topics for discussion will include: the role and power of the commissioner; the importance of collective bargaining agreements, including

uniform player contracts, in the development of a body of law governing the relationship between a player and his club; the current state of antitrust law in pro sports; the agent-player relationship; contract negotiations, including the salary arbitration process; the variety of intellectual property issues applicable to leagues, it teams and its players; the rights (or lack thereof) of pro sports fans, including the application of tort law principles to fan injuries; the attempts by pro-sports leagues and teams to control the off-field behavior of its players, and the approaches by the various leagues to regulate performance enhancing drugs.

LAW 5103 - EVIDENCE

Minimum Credits: 3

Maximum Credits: 3

This course is an introductory course on the rules of evidence and will focus on the federal rules of evidence. We will cover hearsay and its exceptions, relevance, the use of character evidence, cross-examination and impeachment, among other subjects.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5105 - FEDERAL INCOME TAXATION

Minimum Credits: 4

Maximum Credits: 4

This course will introduce the basic concepts found in the internal revenue code, as interpreted by the internal revenue service and the courts. We will explore the concept of "income," and specifically consider the difference between ordinary income and capital gain, the timing of income inclusion, and the determination of a taxpayer's basis in property (which relates to the calculation of income). We will also explore exclusions and deductions that may reduce a taxpayer's income. This course has two primary goals: first, to give the students a basic familiarity with the internal revenue code so that they will be aware of tax issues that may arise in their practice, and second, to prepare students who have (or acquire) a deeper interest in tax for more advanced courses in taxation.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5110 - ESTATES AND TRUSTS

Minimum Credits: 3

Maximum Credits: 3

This course provides a survey of the gratuitous, post-mortem transfer of wealth, including the substantive law of wills and trusts. Topics in estate law include probate and non-probate property; intestacy; bars to succession; constructive trusts; mental capacity; disclaimers; will formalities; holographic wills; revocation; integration; republication; revival; incorporation by reference; acts of independent significance; payable on death provisions; and predeceased beneficiaries. Topics in trust law include formation; parties; beneficiaries; resulting trusts; constructive trusts; discretionary trusts; trust protectors; self-settled asset protection trusts; and powers of appointment.

LAW 5112 - BUSINESS ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This elective course surveys the law of modern business organizations, including corporations, limited liability companies, and partnerships. The course covers topics such as business planning, corporate governance, fiduciary duties, shareholder liability and rights, as well as transactions in shares. The course also provides exposure to a variety of subjects, including agency, corporate finance, corporate taxation, mergers and acquisitions, and federal securities laws. No exposure to accounting, economics, or finance is necessary or presumed. Due to overlapping subjects, students are not permitted to take this course if they already have taken agency & partnership.

Academic Career: LAW

Course Component: Lecture

LAW 5126 - CORPORATE FINANCE

Minimum Credits: 3

Maximum Credits: 3

This course examines basic financial aspects of corporate matters. Covered topics include accounting, capital structure, portfolio theory, risk bearing, as well as valuation of derivatives, options, and securities.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5112 or LAW 5141 ; PROG: School of Law (LAWSC)

LAW 5129 - FEDL COURTS & FEDL LITIGATION

Minimum Credits: 3

Maximum Credits: 3

One of the defining features of the American legal system is federalism – the division of powers between the national and the state governments. This course deals primarily with two recurring problems in civil practice that have their roots in this division of powers. First, do one or both litigants have a choice between federal and state court, and, if so, how can the litigants maximize the likelihood of securing the preferred forum? Second, when does federal law trump state law? A dominant theme of the course is the relationship between legal doctrines and the practical consequences of those doctrines in light of existing (and possible future) institutional arrangements. In particular, defendants in civil cases often prefer federal court; plaintiffs tend to prefer state court. But the rules and doctrines that determine which side gets its preferred forum will often be invisible to the average lawyer. One purpose of this course is to alert students to the pitfalls that can trap the unwary; here, more than in other areas of the law, a little learning can be a dangerous thing. Representative topics include: the prerequisites for Supreme Court review of state-court judgments; elements of federal question jurisdiction; removal of cases from state to federal court; and the power of the federal courts to apply rules of law different from those applied in state courts. Attention will be given to litigation strategy (especially the choice of forum) as well as to critical analysis of the doctrines and statutes. This course will be taught by a sitting Federal Appeals Court Judge who will incorporate his perspective as both a former practitioner and as a jurist.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5132 - LAW AND HUMAN BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

In order to be effective, lawyers must understand both their clients and the operation of the legal system. Often, legal analysis imbues both clients and the legal system with the qualities of rationality: clients engage in cost-benefit calculations of success and the standard of the legal system is the "reasonable person." Recent developments in the social and natural sciences raise questions about the sufficiency of these models. The standard definition of rationality may be too narrow - a client may want an apology from an adversary rather than just a monetary award - and clients and legal systems do not always act in rational ways. This course will provide students with concrete insights from the social and natural sciences to help them become lawyers better able to assess both clients and the workings of the legal system as a whole. Examples will be drawn from a wide array of legal contexts: from client contacts to jury selection to subtle forms of discrimination to judicial ideology. Emphasis will be on understanding human behavior both as a predicate for effective legal regulation and as a predicate for the values - including economic, ideological, and religious values - that inform voting and legislative determinations. Several school faculty who employ these insights in their scholarship will visit the class to discuss their work. The course's goal is to provide students with a richer set of analytic and practical tools for them to become more effective attorneys in whatever area they may come to practice.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5133 - UNDST LGL SERVC MKTPLC

Minimum Credits: 2

Maximum Credits: 2

Today's increasingly competitive marketplace demands that new attorneys have an understanding of the commercial landscape of the legal services industry as complement to their substantive legal knowledge and as a means towards making a contribution to their firm, company or organization. This course is an exploration of the industry from three perspectives. The first is a birds-eye view that will examine macro-trends in the industry. The second is the view from the demand side of the industry where we will explore the types of issues driving demand for legal services, factors driving the decisions to procure legal services, and how legal services purchasers/users evaluate the services rendered. Throughout the course we will evaluate real-life, contemporary scenarios and interact with practicing attorneys, clients, and judges. The third is the view from the supply side of the industry where we explore the sales, marketing, operations and soft skills associated with the provision of legal services in the law-firm and in-house contexts.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5135 - COMMERCIALIZING NEW TECS

Minimum Credits: 3

Maximum Credits: 3

The key challenge addressed in this joint project course between the Katz Business School and the Law School is how to commercialize new technologies. Commercialization is the process of transforming an invention (i.e. A new technique or artifact that performs a useful function) into an innovation (i.e. A product or service that creates value in a specific use). Whether a new technology originates in a university, in an established company, or with an individual inventor, several issues must be addressed in order to determine whether it is worth investing in further, and to decide how the technology can be commercialized for maximum long-term value. We will focus on four types of analyses as input to a commercialization strategy: (i) technology analysis, (ii) market analysis, (iii) competitive assessment, and (iii) business model evaluation. For each, you will be provided with one or two practical articles, which outline an analytical tool or approach, and we will discuss their application to one of the cases. Although we'll walk through these steps in the order listed, they will need to be conducted iteratively (e.g. As you learn more about market opportunities you may wish to revisit your initial assessment of the technology's core elements). Throughout the course, law students will have the opportunity to assist the team in assessing legal matters that impact commercialization (from intellectual property matters, to regulatory landscape impacts, to alliance considerations) while also gaining an understanding of key business goals, strategies and tactics.

LAW 5139 - TRANSIT LAW

Minimum Credits: 2

Maximum Credits: 2

This is a course on the law and legal principles used to create, operate and maintain mass transportation infrastructure. The focus is on the legal functions and processes used in planning and operating mass transit and the rules and alternatives for spending government appropriated funds. This course gives an overview of regulatory, procurement and grant practice. Also covered are public/private collaboration as well as private sector participation in government assisted or sponsored projects, including the relationships between and among the federal government, state and local governments and the private sector. This course provides an introduction to basic government contracts and regulatory practice in the context of mass transportation.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5142 - LGL WRTNG TRANSACTIONAL LAWYER

Minimum Credits: 2

Maximum Credits: 2

This course will introduce students to the craft of drafting transactional agreements. This course is meant to fill a void that currently exists between formal law school education and actual work as a practicing attorney. Oftentimes, the first experience that young transactional lawyers have with drafting agreements follows a familiar pattern ' the young lawyer is given a form as a starting point, then asked to make changes to the form to "draft" the needed document. The young lawyer may successfully edit the party names and dates, but usually has little understanding of the rest of the agreement or even the basic business terms that the agreement must memorialize. Unfortunately, the realities of modern law practice may preclude inexperienced drafters from taking the time to properly

hone their craft. This course will prepare students for entering a transactional practice by allowing students to practice drafting and editing agreements, examine strategies for avoiding ambiguities by crafting precise language, and work in a fast paced, team-oriented environment.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5143 - WATER & SHALE GAS DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

Water plays a critical role in the development of our shale gas resources. This course will examine the relationship between water and shale gas extraction. The emphasis will be on the life cycle of water used in shale gas well development, beginning with common law, statutory and regulatory rights and requirements governing the ownership and allocation of water resources, with particular attention paid to interstate compacts and basin wide water allocation mechanisms. The course will place an emphasis on emerging issues that attorneys face in practice and will include guest lectures by hydro-geologists, geochemists, and other professionals. Some of the issues that will be covered include: common law water quantity rights; basin commission water quantity regulations, and their impact on shale development's significant water withdrawals; the application of the clean water act and the state version of it (the clean streams law) to the shale extraction process; treatment and disposal of wastewater; groundwater contamination; local zoning and land use; and trends in shale-based litigation.

Academic Career: LAW

LAW 5200 - INT TO ACCOUNTING FOR LAWYERS

Minimum Credits: 1

Maximum Credits: 1

Introductory accounting for lawyers will provide students with a fundamental understanding of the principles underlying financial accounting. Additionally, students will gain an understanding of the development and analysis of financial statements including the balance sheet, income statement and statement of cash flow. Other topics will include a discussion of financial analysis and financial theory. The course is intended to equip students with the basic mechanics to review and analyze an entity's financial statements, identify significant issues and to form a general familiarity with financial statements to aid in preparing for litigation or assisting with business transactions.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROGRAM: School of Law

LAW 5201 - ADMINISTRATIVE LAW

Minimum Credits: 3

Maximum Credits: 3

It is next to impossible to practice law today without dealing with administrative agencies, federal or state, or the law they create. Indeed, more cases are adjudicated in administrative bodies than in the courts. The substantive law that is created and implemented by agencies is the subject matter of individual courses such as environmental law, securities regulation, taxation, and banking. It is the procedural/structural law that governs the creation and implementation of substantive law by agencies that is the focus of administrative law. We will discuss the different types of functions undertaken by agencies, for example, rulemaking and adjudication in all its forms and how those disparate functions determine the appropriate structure of decision-making. At the federal level, where we will focus our attention, the procedures that apply originate in a variety of sources, including the United States constitution, the

administrative procedure act and other statutes, and agency rules. There is often a complex interplay among these sources of law, which will be one of the topics we will explore. Another is the relationship of agencies to the chief executive and the legislature, an area that implicates important constitutional doctrines, statutes, and executive orders. Finally, we will spend considerable time on the availability, timing, and scope of judicial review of agency action, including the doctrines of standing, ripeness, exhaustion of administrative remedies, and judicial deference to agency findings of fact, interpretations of law, and exercises of discretionary power.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5207 - ANTITRUST

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to the law of antitrust. The course examines practices by which firms allegedly eliminate competition among themselves (e.g., Cartels, conspiracies, horizontal mergers), as well as exclude actual or potential competition from their markets (e.g., Boycotts, price discrimination, tying arrangements, vertical integration). The course will cover the Clayton, Sherman, and Robinson-Patman acts. No exposure to corporate/securities law, economics, or finance is necessary or presumed.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5210 - PATENT LAW

Minimum Credits: 2

Maximum Credits: 2

For over two hundred years the United States patent system has stimulated innovation by conveying time-limited exclusionary rights to inventors who adequately disclose their novel and nonobvious inventions to the public. Throughout this time, technological advancements in various industries have repeatedly confronted the patent system with fascinating policy and doctrinal challenges. In a constant effort to keep up with the pace of innovation and ensure that the patent system fulfills its constitutional purpose to promote the progress of useful arts, patent case law has become one of the most rapidly evolving and adapting areas of American law. Through study of judicial decisions and statutory provisions, this course will examine the substantive legal doctrine and policy underlying two primary aspects of United States patent law: (1) the requirements for obtaining a patent; and (2) the means by which an issued patent is enforced (and its validity challenged). Specific topics include patentable subject matter (including computer-implemented inventions and biotechnology), novelty, nonobviousness, utility, loss of right, disclosure requirements, patent claim interpretation, literal infringement, the doctrine of equivalents, prosecution history estoppel, defenses to patent infringement resulting in invalidity and/or unenforceability, injunctive relief, damages, and the unique role of the United States court of appeals for the federal circuit in shaping patent law.

Course Requirements: PREQ: LAW 5112 or LAW 5141 ; PROG: School of Law (LAWSC)

LAW 5213 - CONFLICT OF LAWS

Minimum Credits: 3

Maximum Credits: 3

Disputes between parties from different states or countries and disputes having contacts with multiple jurisdictions raise a host of challenging legal questions, including: (1) which jurisdiction's law will govern the dispute; (2) whether and in what circumstances a judgment rendered in one state or country will be recognized and enforced in other jurisdictions; and (3) how courts should make these determinations. State laws, the federal constitution, and international and foreign law all play a role in deciding these issues,

which can have a profound impact on the ultimate resolution of the controversy.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5216 - EMPLOYMENT DISCRIMINATION

Minimum Credits: 3

Maximum Credits: 3

This course will examine federal statutory law as it applies to employment discrimination, with an emphasis on discrimination based on race, sex, color, ethnicity, national origin, religion and age. The most prominent statutes in this area are title vii of the civil rights act of 1964, the age discrimination in employment act, and an older civil rights statute from the reconstruction era, 42 U.S.C. §1981. The course will explore the substantive meanings of "discrimination" under these acts, the models of proof for establishing a claim, the theoretical underpinnings of the statutes, and some of the procedural and remedial issues relevant to employment discrimination law.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5218 - WHITE COLLAR CRIMES

Minimum Credits: 2

Maximum Credits: 2

This course will examine the prosecution and defense of federal white collar crimes, including mail and wire fraud, Rico, criminal tax violations, bank fraud, health care fraud, perjury, obstruction and false statements. Close examination will also be given to the law enforcement techniques used by federal prosecutors in white collar cases, including the grand jury, immunity, search warrants and subpoenas. The fifth amendment self-incrimination privilege and the attorney-client privilege will also be studied. Emphasis will be given to providing students with the background and tools to reason through practical problems faced by white collar practitioners.

Academic Career: LAW

LAW 5219 - FAMILY LAW

Minimum Credits: 3

Maximum Credits: 3

An introduction to the conceptual and practical issues involved in the modern practice of family law. Topics include: the legal definition of marriage, of family; the rights, powers, duties and obligations among family members; the extent and means of state involvement in the family's conduct of its own affairs; dissolution of the family, and the continuing obligations among family members thereafter; problems of jurisdiction and choice of law.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5221 - JURISPRUDENCE

Minimum Credits: 3

Maximum Credits: 3

Jurisprudence -- philosophy of law -- explores the nature of law and its role in society. This course tackles classic jurisprudential questions, focusing around what is known as the theory of adjudication, the theory of how judges actually do decide cases and how they should decide them. Do legal rules and doctrines really constrain legal decision making (and if so, how)? What makes something a legal rule? Is there some necessary connection between law and morality (perhaps inherent in the concept of rights)? Is judicial decision-making really different from political decision-making (and if so, how)? Most of our readings will be from twentieth- and twenty-first century writers: legal positivists (e.g., H.L.A. Hart), natural law theorists (e.g., Ronald Dworkin), legal realists (e.g., Felix Cohen and Karl Llewellyn), and critical theorists (e.g., Duncan Kennedy and Patricia Williams). But we will also dip into some older classics, e.g., William Blackstone and Jeremy Bentham. Some of the reading will be challenging, but no prior experience with either jurisprudence or philosophy will be assumed. What will be useful is the knowledge of legal doctrine and decision making that you've acquired in law school so far. We will look back at some of the classic cases that you read in con law, civil procedure, and property and see how they reflect different jurisprudential approaches. In fact, at some point in the semester you will probably find yourself thinking something like, "So that's what Professor X was trying to get at when we read that case!" We will also look at how jurisprudence informs current political and social issues in legal decision making. For instance, consider those driverless cars you see all around Oakland. Besides being programmed to avoid collisions, they must be instructed to follow traffic laws. Exactly what should

those instructions entail? When you have finished this course you won't be writing briefs that say, "you should rule for me because the legal positivists say so." But in another sense jurisprudence is of immense practical use: Jurisprudence brings to the surface conflicting assumptions lurking within different legal arguments and conclusions. When you learn to recognize those ideas, you understand something about how legal decision making operates on a deep level, and that makes you a better lawyer.

Academic Career: Law

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5223 - ADVANCED TRIAL EVIDENCE

Minimum Credits: 2

Maximum Credits: 2

This course will focus on evidentiary issues that arise frequently in trials. Each week a vignette or series of vignettes, which address common trial evidence situations, will be assigned. The vignettes will be based on case files, in order to provide continuity throughout the course and for students to see the impact of evidentiary rulings on continuing cases. Each student will be responsible for weekly written assignments, which may include motions in limine or outlines of direct and/or cross-examination of the witness(es) for vignettes(s). Each student will also be responsible for preparing to offer timely and well-stated objections to the evidence sought to be introduced. Students will be required to understand the rationale for both the introduction of evidence and the objections thereto.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5103; PROG: School of Law (LAWSC)

LAW 5224 - INSURANCE

Minimum Credits: 3

Maximum Credits: 3

The course will focus on insurance law and theory and the role of the state and federal courts in shaping insurance law based on perceptions of public policy (e.g., Should public policy preclude coverage for punitive damages? For intentional torts? For "criminal" acts that result in unintended consequences?). The course will survey significant categories of insurance, particularly liability and property insurance, as well as life, automobile, reinsurance, and the duties of liability insurers to defend their insureds in lawsuits and to make reasonable settlements of claims against their insureds. Insurance concepts will be examined in the context of recent events, such as the world trade center attack.

LAW 5225 - INTERNATIONAL BUSINESS TRANSACTIONS

Minimum Credits: 3

Maximum Credits: 3

This course analyzes basic international business transactions and the effects of U.S. Law, specific foreign law, and treaties on the conduct of the parties involved. The course covers issues of commercial law, regulation of cross-border transactions, dispute resolution, tax considerations, and antitrust law. Although a basic understanding of each of the areas of the law in the domestic context is helpful, there are no course prerequisites. Students are expected to develop an understanding of the U.S. Laws applicable to private international transactions and an awareness of the risks inherent in doing business in or with other countries and their nationals.

LAW 5226 - INTERNATIONAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course explores how international law regulates, or attempts to regulate, relations between states, and between states and individuals. It therefore examines both classical and contemporary topics such as the sources of international law, rights and responsibilities of states, jurisdiction, the incorporation of international law into domestic law, individuals as bearers of rights and obligations at the international level (in particular human rights law and humanitarian law), the law of treaties, the law on the use of force and the role of the United Nations and the International Court of Justice in the peaceful settlement of international disputes. Several specific topics will be examined to illustrate the increasing impact of international law on domestic legal practice, and the influence of the United States on the development of modern international law.

LAW 5232 - LEGAL PROCESS IN LATIN AMERICA

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide an introduction to the legal tradition and legal systems of Latin America. The course begins with a consideration of the historical and formal sources of the civil law and the reception of the civil law tradition in Latin America. Thereafter, particular attention is paid to selected aspects of the legal process, constitutionalism, and other areas of law in various Latin American republics.

LAW 5245 - SECURED TRANSACTIONS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on security interests in personal property, which are governed by article 9 of the uniform commercial code. Related sections in articles 1 and 2 will also be examined. The course primarily deals with the creation, perfection, priority and enforceability of security interests in personal property and fixtures, although it also deals with rights of secured creditors generally. The course examines: (1) the rights and remedies of the secured creditor and the debtor; (2) the mechanisms and law underlying obtaining perfected interests in collateral; and (3) the priority of the secured creditor over others such as other article 9 security interests holders, the bankruptcy trustee, sellers, buyers and federal tax liens. The treatment of secured parties in bankruptcy proceedings will also be covered.

LAW 5251 - BIOTECHNOLOGY LAW

Minimum Credits: 2

Maximum Credits: 2

Virtually every aspect of our lives is touched by biotechnology, so this class is designed as an introduction to many of the critical issues related to biotech and society. Specific topics include genetically modified organisms (Franken foods), patenting life, vaccination laws, human and animal testing, bioterrorism, biological weapons laws, bio-prospecting, pharmaceutical pricing, FDA laws, as well as scientific (and investor) fraud in biotech. The class also focuses on the policy relationships between law and public health, as well as related underlying economic incentives that can create tension in the life sciences. The class includes a number of guest speakers from industry including biotech licensing professionals and an FDA practice attorney. This class will be useful for anyone planning to practice law related to the life sciences including patent law. The issues are presented in a non-technical manner so the class is accessible to anyone interested in the field. It may be helpful to have exposure to patent law in general but it is not required.

LAW 5252 - INT'L & EURPN LABOR MARKTS LAW

Minimum Credits: 2

Maximum Credits: 2

This course examines international and European labor markets law, including how the "European social model", as opposed to the Anglo-Saxon or American model, which has generated European union wide standards for employment and labor protection. While the course begins with an introduction to the international labor organization, the bulk of the course focuses on the European union as the cradle of pan-European labor and employment law. The course begins with the basic constitutional framework of the EU, and the essential characteristics of EU-law, including the pseudo-federal nature of the EU, supremacy of EU law, the theory of enumerated powers and subsidiarity, and the functioning of the European court of justice as a genuine supreme court. This is followed with a historical overview of the political and legal roots of the famed European social model, with particular emphasis on its international origin. In its institutional section, the course will explain the position of social policy in the founding treaties and the emergence of a European labor movement complete with European-wide collective bargaining agreements. In its substantive part, the course will address relevant and topical issues with a focus on business relevance, such as employee protection in a transfer or restructuring of companies, information and consultation rights, the European company, and the exponential rise of employment discrimination law.

LAW 5258 - CAPITAL PUNISHMENT, THRY & PRA

Minimum Credits: 2

Maximum Credits: 2

There are few areas of law whose jurisprudence has been fully developed within a period of the last forty years. Eighth amendment

jurisprudence relative to the death penalty in the United States is such an area of law. We will explore how the United States supreme court has approached the development of this jurisprudence, and include within our examination some elements of due process as well, to see how the court, out of whole cloth, has created a practical jurisprudence for analyzing the constitutionality of capital punishment, and why the court was motivated to do so. This jurisprudence provides students with a window to the tug between justices who view the constitution as a 'living' document that adapts to the times and the society, and those who view the constitution as a static outline of the powers of respective governments within a federal system to be understood as the framers of the document would have understood it. Additionally, this jurisprudence provides students with a window to the strengths and weaknesses of a federal system in which the interplay between the power of the federal government and the power of the state governments must be understood and respected, even within the context of a constitutional jurisprudence that recognizes the imperative of the supremacy clause.

LAW 5265 - LABOR LAW: PRIVATE SECTOR

Minimum Credits: 2

Maximum Credits: 2

This course, after a short review of American labor history, will focus almost exclusively on the national labor relations act, the nation's premier statute dealing with labor management relations in the private sector, and the model for many public sector state laws covering the field. The course deals with the rights of individual employees, employers, and unions with respect to concerted activity, unionization, the establishment of collective bargaining units, elections conducted by the national labor relations board, and the collective bargaining process. The course will also cover strikes, picketing and hand-billing by unions, the current restrictions or limitations on such conduct, and the administration of collective bargaining agreements, grievance processing, and the arbitration of disputes. We will study and critically examine procedural and substantive case law developed by the national labor relations board, and its impact upon labor-management relations in both unionized and non-union environments. The course concludes with a discussion of the future of labor relations. We will discuss more recent tactics employed by unions and management and engage in a debate as to whether and how the current labor laws should be amended. Classes will be a combination of both lecture and dialogue. We also will discuss critical issues with representatives from Pittsburgh's union and business communities.

LAW 5272 - BANKRUPTCY

Minimum Credits: 3

Maximum Credits: 3

The study of bankruptcy law is the study of how the prospect and availability of bankruptcy affects legal relationships; therefore, bankruptcy attorneys must understand the full range of law, to determine the impact an insolvency proceeding has on the parties in interest and community at large. This course provides an introduction to federal bankruptcy law under the bankruptcy code of 1978 as amended, title 11 U.S.C.A. The code was substantially changed in 2005 and the course will deal with the revisions. The course focuses on substantive provisions of the bankruptcy code that apply in all varieties of bankruptcy proceedings and some of the associated rules of procedure. Covered topics include eligibility for federal bankruptcy relief; commencement of bankruptcy proceedings; jurisdiction and procedure; defining property of the bankruptcy estate; the automatic stay; adequate protection; discharge and discharge ability of debts; priorities; allowing, valuing and estimating claims; selected issues usually encountered in business, such as executory contracts and leases; the trustee's avoiding powers; set-off and recoupment; professionals. The course proceeds by analysis of problems and cases. Familiarity with the law of secured transactions (especially article 9 of the uniform commercial code) is necessary.

LAW 5282 - NATIONAL SECURITY LAW

Minimum Credits: 2

Maximum Credits: 2

The Preamble to the U.S. Constitution, which famously begins "We the People," makes clear the high value our founders placed on national security and the role of law. The Preamble describes the Constitution's very purpose as including "establish[ing] Justice, insur[ing] domestic Tranquility, provid[ing] for the common defence,... and secur[ing]... Liberty." Today, national security remains a priority responsibility for our federal leaders. Our nation continues to strive for the right balance between security and liberty, mixed with a healthy dose of Justice, all in the name of "form[ing] a more perfect Union." The Constitution has continued to provide a framework for our government's exercise of national security powers. At the same time, the field of national security law has witnessed rapid growth and significant change, particularly over the past fifteen years. The coming years will be no less dynamic. This course examines national security law through a study of essential legal sources, historical precedents, and current and emerging national security issues. Topics include: each branch's role (and limitations) in national security decision-making, war powers and military force, crime and counterterrorism, and the role of information in national security. Together, we will aim to better understand the role of law in keeping our homeland safe, and the relationship (and necessary balance) between security, liberty, and justice.

LAW 5294 - MINING LAW, HISTORY & PRACTICE

Minimum Credits: 2
Maximum Credits: 2

Mining law may seem a niche area- a "world apart which one can quite easily go through life without ever hearing about," as George Orwell said of mining-however, it is a unique combination of administrative law, employment law, contract law, tort law, and health and safety regulatory law. Federal regulatory agencies are increasingly the site of where the action is, and using mining law as a means of understanding this vast area of law will be of use to all students.

Over the period of this course, students would be introduced to the three primary aspects of mining law: 1) The history of mining, mining disasters, and passage of mining legislation in the United States; 2) Key elements of federal mining legislation; 3) The interpretation and evolution of mining law in the Commission and Courts.

Academic Career: LAW

LAW 5295 - EXPERT WITNESS

Minimum Credits: 2
Maximum Credits: 2

In recent years, the use of expert witnesses has proliferated as both civil and criminal litigation have become more complex and

technical. In this course, students will learn when expert testimony is needed; where to find appropriate experts; how to work with the expert to develop a theory of the case; and many more issues leading up to the actual trial of the case. Once the case reaches the courtroom, students will learn how to organize and present their own expert's testimony in a clear and concise fashion, and how to pursue the challenging task of "doing battle" with the opposing expert. In the end, students will achieve a greater appreciation for the subtleties of expert testimony, while at the same time acquiring the tools to deal with witnesses who speak in technical and unfamiliar language.

Course Requirements: PROG: School of Law (LAWSC)

LAW 5297 - WORKERS' COMPENSATION

Minimum Credits: 2

Maximum Credits: 2

This course deals with the law, theory and practice of workers' compensation under state and federal administrative programs, including the Pennsylvania and other state acts; longshore and harbor workers' compensation act (LHWCA); federal employees' compensation act (FECA); and the federal employers' liability act (FELA). The student will study the essential aspects of such laws, including their development and purpose, coverages, the various levels and varieties of benefits provided and how claims are established and enforced. Special emphasis is placed on how such laws affect the rights of individuals to other remedies such as the ability to sue in tort or assert discrimination claims; how compensation programs are implicated in contemporary efforts to reform healthcare coverage and delivery; and the role workers' compensation plays in occupational safety and health. The student will become familiar with the uniform policy of insurance for compensation coverage and how compensation coverage and other regulatory requirements are policed by governmental authorities. A pervasive theme of the course is the status of workers' compensation as a unique hybrid of administrative law and tort, with the consequent effects of such status on the law, theory and practice of the field.

LAW 5301 - CONSTITUTIONAL LAW: FIRST AMENDMENT

Minimum Credits: 3

Maximum Credits: 3

When we think of freedom of speech, we generally think of protest, dissent and political controversies. There is good reason for this; robust discussion of issues of public policy and candidates for public office is an essential element of democratic self-governance. Today, however, the first amendment is also invoked - often successfully - in a variety of other contexts. Can the federal government limit tobacco advertising? Can a school punish students for "cyber-bullying?" Can a city ban billboards for adult entertainment businesses? This course will provide a detailed examination of first amendment doctrines and their application in a wide variety of contexts, both traditional and contemporary. Topics will include: political speech, obscenity, libel, commercial speech, regulation of electronic media, limitations on the "time, place, and manner" of expression, symbolic speech, and rights of association. Some comparisons will be made between first amendment doctrines and other areas of constitutional law.

LAW 5311 - LAW AND ETHICS OF LAWYERING

Minimum Credits: 3

Maximum Credits: 3

The usual vantage point of the law student and the lawyer is one outside the system of law. Law is something we study, shape, use, support, attack, change, or act upon in one way or another. But this vantage point is an illusion. This course examines the boundaries

of that illusion. It seeks to make manifest what has been implicit all along: we, too, lawyers and law students, live within a world of law that demands our attention and response—a world of law that shapes our identities and relationships, threatens our disobedience with sanctions, and expresses some sense of the collective morality through which we can test our personal morality and commitment. The course examines the content of the law that governs the conduct of lawyers, including for example, agency law, criminal law (what constitutes aiding and abetting a client's fraud?), Tort law (duties to clients and to third parties), civil procedure (the demands of rule 11), and the codes of professional responsibility. It examines the world that law creates, and in which it operates: the criminal justice system, a corporate boardroom, law firms, and the law school.

LAW 5319 - LAWYERS IN AMERICAN CULTURE

Minimum Credits: 3

Maximum Credits: 3

Lawyers like to think of themselves as members of one of the most helpful and important professions in American society. All too often, however, we encounter suspicion, derision or open hostility, not to mention nasty jokes. Public and private criticism of lawyers in the United States has become noticeably more intense in recent decades, but we have rarely attempted to survey its range, explore its roots, assess its legitimacy, or evaluate our own responses to it. This course proposes to do these things by examining characterizations and representations of lawyers in American culture from colonial times to the present day. We will relate changing views of American lawyers and lawyering to shifting social and professional circumstances; we will also explore the impact of those circumstances on fictionalized depictions of lawyers in American plays, novels, films, radio and TV, humor, art and song. We will consider what members of other prominent groups in American society, from 17th Puritan clergy to 20th century businessmen ' have said or alleged about lawyers. We will also discuss how, where and with what effect lawyers have presented, promoted and defended themselves before the American public. We will conclude the course by considering how lawyers might learn from past experience and leverage the opportunities and challenges of 21st century law practice to restore or at least improve their public standing.

LAW 5328 - COPYRIGHT

Minimum Credits: 3

Maximum Credits: 3

Copyright law deals with legal protection for certain kinds of expressive work -- literature, music, film, photography, and computer software, among other things -- which is an essential element of modern culture, knowledge, and communication. The copyright law course will teach you about the many roles that copyright law plays in constructing businesses, markets and other institutions for creating, distributing, and consuming that work. For authors and publishers, how does copyright law help them make money based on their creative works, or based on others' creative works? For readers and consumers and society as a whole, how does copyright law preserve the power to access and use knowledge? The course will teach those things in the context of teaching the skills of copyright lawyering. How do practicing lawyers work with clients? How do practicing lawyers develop and exercise professional judgment? How do practicing lawyers solve copyright problems? The course will put students in the role of practicing lawyers and teach them to think, write, and act as lawyer's generally and especially as copyright lawyers.

LAW 5330 - EMPLOYEE BENEFITS

Minimum Credits: 3

Maximum Credits: 3

This course examines the law of employee retirement benefits as well as welfare benefits, chiefly health care benefits. The course will focus on the federal employee retirement income security act of 1974 (Erisa). Close attention will be paid to the statute and the case law that has developed to explain and apply that statute. Classes will feature detailed discussions of the relevant statutory provisions and the resulting case law. Students will be expected to discuss the statute, cases and the problems in the assigned case book. The course is designed to make students understand how federal law governs and protects pensions, retirement benefits such as 401(k) plans, and health care benefits for employees, retirees and their spouses and dependents.

LAW 5336 - LAND USE

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide students with a basic introduction to the mechanics and legal theories underlying land use controls. The course will strive to go beyond the theoretical by presenting a series of guest speakers (ranging from judges and zoning officials to land use planners and civil and transportation engineers) who deal with land use issues on a daily basis. Students will also be provided an opportunity to observe zoning board and court proceedings first hand and prepare class projects and papers based upon these proceedings. The course will emphasize the inter-relationship and conflict with environmental regulations. Class discussions and projects will focus upon recent judicial and legislative developments in land use law.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5339 - LAW OF DISABILITY DISCRIMINATION

Minimum Credits: 2

Maximum Credits: 2

This course will provide in-depth analysis and discussion of the major federal disability discrimination statutes, including the Americans with disabilities act, the individuals with disabilities education act, and section 504 of the rehabilitation act. Readings and class discussions will focus on the application of these laws to issues such as employment, public accommodations, education, architectural barriers, transportation and insurance. The course will explore how disability discrimination statutes interact with other statutes, such as the social security act, the family and medical leave act, and the genetic information nondiscrimination act.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5340 - ENVIRONMENTAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course focuses on domestic environmental law and, in particular, on federal law rather than state law. The diverse and technical nature of modern environmental law is such that, in practice, lawyers often specialize in very narrow areas. Nevertheless, the same or similar moral, scientific, and policy arguments familiar to one area of the law are found in many of the others and similar regulatory approaches have been adopted or proposed for adoption to deal with very different types of environmental hazards. This course will focus its attention on the clean air and water acts, the national environmental policy act, the resource conservation and recovery act, the comprehensive environmental response, compensation, and liability act, and wetland protection, with passing coverage of various federal public land management statutes. We will explore the basic regulatory and non-regulatory approaches currently in place, including market-based systems to achieve better environmental quality, as well as proposals for changes to those approaches. A significant portion of the course will also be devoted to exploring issues presented by government and citizen suit enforcement of environmental laws. While administrative law is obviously relevant to much of environmental law given the fact that it is agencies which make and administer the law involved, the course will offer students an overview of administrative law principles which will be sufficient background for the purposes of this course.

LAW 5355 - NON-PROFIT ORGANIZATIONS

Minimum Credits: 2

Maximum Credits: 2

This class will survey the state and federal laws governing nonprofit tax exempt organizations. The course will examine the formation of nonprofit corporations under the Pennsylvania nonprofit corporation law of 1988, principles of corporate management, and options for fundamental organizational change. In addition, the course will analyze the process of qualifying for exemption under the internal revenue code and under the laws of Pennsylvania. Issues of private inurement, unrelated business income, charitable giving and fundraising regulations will be discussed. The course will include statutory and regulatory analysis, selected case law and case studies based on actual NPO's.

LAW 5359 - WORKERS' COMPENSATION PRACTCM

Minimum Credits: 2

Maximum Credits: 2

The student undertakes this practicum concurrently with the workers' compensation course taught by adjunct professor Torrey. The practicum is not a requirement of the workers' compensation course. The workers' compensation course provides the student with an exposure to the history and theory of the law, a survey of the different state and federal systems, and the manner in which employers insure for workers' compensation. The practicum works as a supplement, and provides the student with firsthand exposure to and activity in the field. The student will observe lawyers meeting with clients and evaluating their cases. In addition, the student will learn how lawyers communicate and/or work with physicians, and how employers contesting claims obtain and present rebuttal medical evidence. The student will be introduced to the practice of taking trial depositions of medical and other experts, and have the opportunity to attend a deposition to observe attorneys at work. The student will also have the opportunity to attend hearings and observe the procedures of the opposing attorneys and the judge. In addition, the student will gain an understanding of the specific petitions that are advanced by the worker prosecuting the claim and the employer and/or insurance company that has contested entitlement. The participant in the practicum will be instructed in how to prepare written legal argument to the workers' compensation authorities, and briefs to the appeals courts. The student will also gain exposure to current practices surrounding evaluation of workers' compensation cases for possible lump sum settlement.

LAW 5364 - ADVANCED BANKRUPTCY

Minimum Credits: 3

Maximum Credits: 3

Lectures on chapter 11 issues and procedures will set the stage for what is going to happen in the class. Practicing attorneys or other professionals will be invited when the issues involve direct participation with a client and decisions that must be made from the business or legal side of the case. Lectures will cover the theoretical underpinnings to the bankruptcy code and rules, as applicable, and illustrate the points with appropriate case law. Discussion will cover the nature of chapter 11 reorganization, kinds of relief available in business cases, need for cash, why certain motions are needed early in the case whereas others wait, how the business issues interplay with the bankruptcy case, pre and post filing issues, solicitation of creditors committee, plan negotiation process and more. Students will be required to read and analyze the relevant statutory text and rules and relevant cases. They will be assigned certain drafting work and/or papers to write regarding the issues involved. "Papers" may take the form of legal briefs. Each student will be required to argue on behalf of a "client" an assigned topic. To simulate the practice of law, students will file all assignments on the bankruptcy court's test data base for electronic filing.

LAW 5365 - INTRO RUSS & UZBEK LEGAL SYS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to introduce students to the legal systems of the Russian federation and Uzbekistan. The foundation of the legal systems of these countries is almost identical, and by comparing one country's system to another, students will become more familiar with civil law systems. Special attention will be given to constitutions, court systems, the role of judges, state prosecutors, courtroom advocates and lawyers, as well as to the important commercial laws and treaties. I will use examples from my professional experience to give my students a realistic view of the legal systems of these countries. The class is intended to enhance student awareness of the legal environment and issues that often result from a decision to engage in relations or do business across national boundaries. Students must be prepared to actively discuss the assigned reading or other material in class each week.

LAW 5378 - JUVENILE JUSTICE

Minimum Credits: 3

Maximum Credits: 3

For over a century this country has wrestled with how to treat youth in the juvenile justice system. This struggle centers on the tension between recognizing youth as developmentally distinct from adults, thus deserving of second chances and rehabilitative services, and historically and culturally driven notions of accountability, justice, and safety. This course will explore this tension and examine how that internal struggle has shaped the building of the juvenile justice system as a separate legal institution governed by unique criminal law, procedure, and policy. Students will gain an in-depth understanding of juvenile justice from both policy and legal perspectives through analyzing case decisions, social science research, legal theory, and empirical studies. During this course the class will probe questions such as: what does juvenile justice actually look like? How does the social construction of adolescence impact legal definitions? What role do the advances in science on brain development play in the administration of juvenile justice? How has race, gender, and class impacted juvenile courts' jurisprudence? What factors have influenced the court's ever shifting understanding of culpability by age? Where are the overlaps and intersections between the juvenile justice and adult criminal justice systems?

LAW 5391 - CIVIL PRACTICE CLINIC - ELDER

Minimum Credits: 7

Maximum Credits: 7

The civil practice clinics offer students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering. Students enrolled in the clinics are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Elder law clinic representation focuses on issues of capacity in medical treatment, mental health law, estate planning, contractual relations, and property management. Emphasis will be placed on long term planning, including estate planning and medical assistance (Medicaid) eligibility. Litigation skills focuses on practice in the orphans' court division, for example, guardianship proceedings and settlement of small estates. Students will develop practical skills such as interviewing, counselling, research, drafting, negotiation, and trial practice skills. Students may work in teams to represent their clients. The classroom component is an integral part of the clinic experience, consisting of a series of discussions focusing on substantive law, policy, and practical skills training. The skills component of the course will be taught in tandem with the health law clinic. Experts in the fields of social work, psychology, psychiatry, and medicine will provide insights into interdisciplinary issues.

LAW 5393 - CIVIL PRACTICE CLINIC - HEALTH

Minimum Credits: 7

Maximum Credits: 7

The civil practice clinics offer students who have completed three semesters of law school an opportunity to represent clients and develop practical lawyering skills. Students enrolled in the clinics are certified to practice law and take primary responsibility for client representation under the supervision of their faculty/supervising attorneys. Health law clinic students represent their clients at all stages of seeking disability benefits through the social security administration. Students also represent clients in orphans' court in guardianship cases and in the US District Court on health related matters. They interview clients initially and if the case is accepted, proceed to gather and interpret evidence, develop case theory, prepare hearing memoranda, and represent clients at hearings or in court. The classroom component is an integral part of the clinic experience and consist of a series of lectures and discussions focusing on substantive law, policy, and practical skills training. Classroom simulations are designed to ready students for client work, and include an ADR exercise. The skills component of the course will be taught in tandem with the elder law clinic. Students may work in teams of two.

LAW 5395 - HEALTH LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This is a survey course of fundamental issues, covering a broad range of topics, in health law and policy intended both for students who merely wish to become acquainted with the field, and for those who plan on concentrating in the field. For those planning on concentrating, this course provides a foundation for in-depth courses such as health care business transactions, health care fraud and abuse, health care antitrust, and financing in the healthcare industry. For students not concentrating in health law, it provides an introduction to the multitude of issues with which lawyers working with clients in the health care industry need to be familiar. The course examines the role that law plays in achieving three societal goals: increasing access to health care, controlling health care costs, and assuring quality of health care. Specific topics are the structure of the health care system(including integrated health care delivery

systems); regulating quality through licensing, staff privileges, and accreditation; labor and employment issues; the legal obligation to provide treatment, including Emtala); tax exemption and charitable purposes; health care reform; state and federal regulation of health insurance and managed care (including Erisa); federal initiatives to expand private insurance coverage(including HIPAA, COBRA and ADA); Medicare/Medicaid eligibility, benefits, and reform efforts; health care fraud and abuse (false claims act, anti-kickback statute, stark); and antitrust issues in the health care industry. This course does not examine issues of professional liability, and it does not cover ethical issues in health care (covered in, which is the subject of "bioethics and law").

Course Requirements: PROG: School of Law (LAWSC)

LAW 5398 - FAMILY LAW CLINIC

Minimum Credits: 4

Maximum Credits: 4

The Family Law Clinic is a two semester clinic. Students will receive a grade at the conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a W for the course, thus nullifying the grade for the prior semester. Students will receive 4 credits per semester. Classroom study generally includes instruction in client interviewing, client counseling, custody, paternity and child support substantive Pennsylvania law and custody and child support litigation procedures in Allegheny County. Custody mediation techniques are also examined. In clinic, under faculty supervision: Students will interview clients with regard to Pennsylvania custody and child support law. Students will, as legal interns certified by the Supreme Court of Pennsylvania, interview, counsel and assist clients in certain proceedings in the Family Court of Allegheny County dealing with matters of child custody and support. Students may in the course of their clinic duties prepare and deliver educational lectures concerning the substance of family law to client groups as, if and when the need arises, thus providing the student the opportunity to teach. Students may prepare Briefs, Motions, Complaints, Petitions or other court documents depending upon the legal needs of the clients that the student assist. Students may prepare research memos to be presented to all the students at the Clinic Review Meetings. Second semester students will undertake to mentor incoming students in family law court procedures.

LAW 5402 - CRIMINAL PROCEDURE II

Minimum Credits: 3

Maximum Credits: 3

Course is designed to give students especially interested in the criminal area an opportunity to develop appellate advocacy skills while being exposed to relatively sophisticated concepts of criminal procedure. Students participate in mock-trial exercises and serve as mock appellate judges. Problems used in the course will relate to various topics among which are search and seizure, pre-trial publicity, speedy trial, and double jeopardy.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5404 - CYBERSPACE AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This course will examine legal and public policy issues that pertain specifically to the existence, operation, and governance of the network of networks that we call "the internet" and the metaphorical experience that we sometimes refer to as "cyberspace." What legal and policy problems are unique to the internet and cyberspace? When and how should "ordinary" legal problems be treated differently if they concern the internet or cyberspace in some respect? Specific topics are expected to include the construction and definition of the internet; internet governance, including domain name regulation and network neutrality; and network and information security. It is expected that the course will not consider intellectual property topics, freedom of expression topics, or jurisdictional (civil and criminal procedure) questions. The course will focus primarily on public policy questions wrapped up in legal questions, rather than on principles of law as such.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 5422 - ALTERNATIVE DISPUTE RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

Legal and other disputes are increasingly resolved by dispute resolution processes other than litigation. Given this trend, it is important for law students to be familiar with these alternative processes, such as arbitration and mediation, and the benefits and risks they present. At the same time, these alternative processes require creative and interdisciplinary problem-solving perspectives and skills. This course begins with an overview of problem-solving approaches, and is followed by the study of arbitration, mediation, and hybrid processes. The course emphasizes interactive student discussion and activities, including role-plays, exercises, and presentations that simulate professional activities of lawyers, arbitrators, mediators, and clients. The classes build on each other, so that knowledge that we acquire in the earlier classes will be integrated into our materials, discussion, and activities in later classes.

Academic Career: LAW

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5424 - INTERVIEWING AND COUNSELING

Minimum Credits: 2

Maximum Credits: 2

Proficiency in interviewing and counseling is essential to both the litigator and transactional lawyer. Lawyering process I will provide the student with theoretical understanding of interviewing/counseling and intensive training designed to develop these essential skills. Through lectures, readings, demonstrative videotapes and class discussions, the "client-centered" model advocated by the instructor as well as the "traditional approach" will be introduced, examined, and collectively critiqued. Practice will involve observing/critiquing weekly in-class simulations (with students as "client," "lawyer"). Periodic quizzes and two videotaped exercises at mid-point and end of course (with students interviewing/counseling 'outside' client) will be scheduled. Consistent attendance is required in order to ensure the effectiveness of in-class simulated exercises and to acquire comprehensive knowledge of/practice in each essential skill.

Academic Career: LAW

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

LAW 5425 - LOW-INCOME TAX CLINIC

Minimum Credits: 3

Maximum Credits: 3

Working under the supervision of experienced tax attorneys, students participating in this clinic will assist in all aspects of the delivery of legal services to low income taxpayers in disputes with the internal revenue service. Students may expect to engage in interviewing, counseling, research, drafting, and negotiation with the I.R.S. Calendar and the disposition of the cases taken. In addition to the client work, students will also meet for weekly case review sessions.

Academic Career: LAW

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: LAW 5105; PROG: School of Law (LAWSC)

LAW 5428 - LEGAL NEGOTIATION

Minimum Credits: 2

Maximum Credits: 2

Proficiency in negotiating is essential to both the litigator and transactional lawyer. Lawyering process II will provide the student with

theoretical understanding and intensive training designed to develop this essential skill. Through lectures, readings, and class discussions the two principal models of legal negotiation 'adversary' and 'problem-solving' will be introduced, examined, compared and critiqued. Students will engage in numerous negotiation exercises, some requiring drafting pre-negotiation plans and post-negotiation critiques. Highly experienced attorneys from the private/public sector will be invited to share their approaches/successes/challenges. Negotiations will be conducted both in-class and out-of-class. Two negotiations will be videotaped 'one at mid-point and the other at end of course' for subsequent viewing/critiquing on box. Consistent attendance is required in order to ensure the effectiveness of in-class simulated exercises and to acquire comprehensive knowledge of /practice in each negotiation model.

LAW 5429 - LAWYERING PROCESS CLINIC

Minimum Credits: 2

Maximum Credits: 2

Students participating in this clinical course will be provided with skills training and the opportunity to engage in a wide variety of lawyering activities (interviewing, counseling, negotiation, drafting of documents and pleadings, representation of clients before court and administrative agencies) in a controlled, supervised, instructional field-based program setting. Following initial orientation at the office, students will observe and thereafter participate in direct delivery of legal services to program clients. Cases assigned will primarily involve family law issues (divorce, protection from abuse, custody, dependency, etc.). Students who take the course for one semester will focus skills development on pre-hearing elements (interviewing, counseling, negotiating, etc.) During the first several weeks; thereafter, emphasis will be placed on in-court and administrative hearing representation. Students will be closely supervised by an experienced staff attorney under the direction of the course instructor. Selected student work may be videotaped for later review and critique by supervisor and instructor. Clinical time at the field-based office will be supplemented with a weekly case review session at the law school. Scheduling of clinical hours will be adjusted to accommodate the student's schedule. Transportation costs for travel to/from the office will be reimbursed. Students are encouraged to enroll in lawyering process I or II, since the focus of both such courses will provide skills support for the clinical experience. Course also available during the summer, with same supervisory input and course requirements as described above.

LAW 5430 - INFO PRIVACY LAW AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

This introductory course will provide a comprehensive overview of the primary laws, regulations and guidelines dictating data protection safeguards in the health care industry. It will begin with an introduction to the origins and philosophical perspectives that provide the framework for current privacy laws. Students will then explore the HIPPA privacy/security rules, provisions of Hi-tech breach notification standards, technical, physical and administrative safeguards and their intersection with the various state data protection laws. This course will include an introduction to the legal challenges associated with securing electronic data along the information highway and within the cloud, while attempting to safeguard against cybersecurity threats. Students will be introduced to the implications of privacy to the health care provider, health plans, health care clearinghouses, business associates, and the enforcement activities belonging to the office for civil rights. It will also afford students an opportunity to examine privacy from the financial and international perspectives.

LAW 5469 - FRENCH FOR LAWYERS 1

Minimum Credits: 2

Maximum Credits: 2

This is a course designed to develop the conversational, writing and reading skills in French to permit an American lawyer to communicate effectively with French-speaking clients, and to understand references to the French legal system and to the European union likely to arise in the course of an international law practice in the United States or an American law practice conducted in France. The course will differ from that of a typical college French class in that it will be oriented towards the law in the areas of vocabulary, composition topics, readings, dictations and in-class conversation.

LAW 5491 - ADVANCED LEGAL RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will build on the material presented in the foundations of legal research course, and will provide students with a broader array of strategies and skills to approach legal research projects. The course is to be broadly divided into three components. The first component focuses on strategic approaches to legal research, how to incorporate the research process into the litigation or transactional problem presented and to more effectively integrate the various legal research tools available into that strategic approach. Cost-effective research strategies, including strategies to effectively manage real-world lexis and Westlaw costs will also be covered. This component will somewhat overlap with, but significantly expand on material from the foundations course, and will give students a broader understanding of the research process. The second component of the course recognizes that not all substantive areas of the law utilize the same research resources, strategies and techniques. During this component of the course, students will self-select into one of three topical research tracks-expected to be intellectual property, environmental law, and health and disability law-and spend several weeks looking at the unique resources and research challenges presented by those areas. The third component of the course returns all students to the same material and focuses on non-legal research areas such as medical and scientific research, business and corporate research, investigative research, and financial and marketplace research.

LAW 5497 - HEALTH LAW PRACTICUM: ADR

Minimum Credits: 4

Maximum Credits: 4

The health law practicum offers third and second year law students an opportunity to work with lawyers in hospitals, health insurance companies, and in a variety of other placements in health law. Students work in the field with supervising attorneys for a minimum of 104 hours per semester. The primary emphasis of this practicum is legal representation of a non-profit enterprise in the changing health law environment. One of the changes being experienced in all health law environments is the resolution of disputes through the use of negotiation, mediation and other alternatives to adversary adjudication. The classroom sessions of two hours per week will be devoted to a consideration of the application of ADR techniques to health law disputes. Besides studying substantive health law issues, students will participate in ADR simulations as part of their classroom experience.

LAW 5503 - FEDERALISM & HEALTH POLC SEM

Minimum Credits: 3

Maximum Credits: 3

The interrelationship between the constitutional structure of federal and state governments and the piecemeal development of the U.S. health care system leads to fractured methods of regulating that system. This seminar will explore points of cooperation and tension between the federal and state governments and the varying effects of disparate state laws in a variety of health policy settings. Such settings will include the development of Medicaid; Medicaid expansion under the Affordable Care Act; the legalization of medical marijuana; the legalization of aid in dying; access to health care services through insurance coverage; and the assurance of quality care through regulation of health care payer decision-making.

LAW 5504 - CON LAW SEM CURRENT ISSUES

Minimum Credits: 3

Maximum Credits: 3

This seminar will examine a variety of current issues in constitutional law and the role of the supreme court in resolving them. The issues considered will range widely among those that come before the court; these will probably include questions involving the first amendment, the due process and equal protection clauses, and the powers of congress, as well as some issues of criminal law and procedure. Some consideration will be given to decision making processes within the supreme court and to the evolution of constitutional doctrines in the lower courts.

LAW 5537 - MEDICARE AND MEDICAID PRACTICU

Minimum Credits: 2

Maximum Credits: 2

Any lawyer who anticipates a practice that includes elder law, poverty law, health law or insurance law needs to have a fundamental understanding of the medicare and medicaid programs. Over 48 million individuals are currently enrolled in medicare; over 40 million individuals are currently enrolled in medicaid; and over 10 million are enrolled in both. For individuals 65 years and older, the costs of accessing health care and prescription medications represent, on average, more than 20% of their gross annual income. Beyond that, medicare and medicaid are significant national institutions that account for large percentages of federal and states resources. The continued scope and capacity of these programs represent fundamental issues in the national political debate. This course is designed to provide law students with an understanding of the medicare and medicaid programs and the practical skills for using this information to serve their clients. We will examine the purpose and design of medicare and medicaid; the medicare and medicaid vocabulary; and the criteria for eligibility and enrollment in these programs.

LAW 5547 - INT'L INTELLECTUAL PROPRTY LAW

Minimum Credits: 3

Maximum Credits: 3

International intellectual property law has expanded substantially over the past few decades, and today seeks broadly to regulate transnational flows of information and culture. This course analyzes the international IP regime, situating it within the dynamics of globalizing flows of information and cultural objects. It provides an overview of the law, theory, and politics of this area of law, and will use case studies to illuminate the interaction between the three. Subjects covered include copyright and related rights (moral rights, traditional cultural expression, performers rights); trademarks and geographical indications; Internet domain names; trade secrets and patents. Case studies may include considerations of access to medicines, moral rights in Europe, and piracy in China as well as copyright formalities and Berne retroactivity.

LAW 5572 - PA INNOCENCE PROJECT PRAC

Minimum Credits: 3

Maximum Credits: 3

The Pennsylvania Innocence Project is a two-semester course offered by Pitt and Duquesne law schools, and meets at Duquesne School of Law. A 2-hour weekly seminar will examine and discuss the substantive law and remedies associated with wrongful convictions. Topics include mistaken eyewitness identification, junk forensic science, forensic DNA testing, and post-conviction remedies. Students are expected to spend 10 additional hours per week on their cases. This practicum will give students exposure to post-conviction collateral litigation, ethics in criminal law both defense and prosecution and factual analysis training. Students may work on wrongful conviction cases and clemency cases. Students will develop lawyering skills in the context of factual analysis, and will develop creative legal arguments to aid the convicted innocent. They will explore criminal justice issues related to these fields.

Students will apply their substantive knowledge to actual cases by reviewing and investigating claims of actual innocence. Students are assigned their own cases to review for factual innocence claims. They are expected to review the entire case & discovery, transcripts, motions, appeals, court opinions & to determine whether the inmate presents a colorable claim of innocence. They may be involved in factual investigation including identifying potential witnesses locating physical evidence to be subjected to forensic testing, and identifying potential expert witnesses. The Pennsylvania Innocence Project Practicum is a two semester practicum. Students will receive an & grade at the conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a W for the course, thus nullifying the & grade for the prior semester. Students will receive 3 credits per semester.

LAW 5609 - PROFESSIONAL RESPONSIBILITY

Minimum Credits: 3

Maximum Credits: 3

This course will cover selected topics on the law governing lawyers. Major topics will include formation and termination of the attorney-client relationship and its attendant obligations, fee issues, conflicts of interest, ethics in advocacy, transactional lawyering, and entity representations, among others. The course will cover these topics from the vantage point of the model rules of professional conduct and the restatement of the law governing lawyers, as well as those aspects of constitutional law, evidence law, agency law, tort law, and procedural rules (both civil and criminal) that bear on an attorney's obligations to clients, courts, opposing parties and their attorneys, and the legal system at large. Class discussions will incorporate in-depth analysis of case law and the rules, as well as analysis of practical hypothetical scenarios in which a lawyer seeks advice about his or her legal and ethical options for moving forward in dealing with his or her clients.

LAW 5611 - ADVANCED FAMILY LAW ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

Much of the modern practice of family law involves litigation. From routine contested motions to complex equitable distribution and custody trials, the field of family law has seen a dramatic increase in the time the practicing family lawyer spends in the courtroom. Very often the family lawyer is faced with complex litigation that involves the direct and cross examination of expert witnesses and trial techniques and strategies molded well in advance of trial with the assistance of a child psychologist expert. In addition, "motions practice," arguing important discovery or interim issues that affect custody and equitable distribution cases, is an important, if not critical aspect of the practice of family law. We will follow hypothetical cases of families whose contentious divorce and custody issues must be tried to conclusion in non-jury mock trials. The students, working in small teams, will interview, counsel and prepare their role playing "client" for trials, develop trial strategy, engage in pretrial preparation, meet with and prepare expert witnesses for direct and cross examination and finally, try various issues to conclusion. The expert witnesses will be actual, highly experienced experts in various areas of valuation and custody. Students will be expected to prepare written trial materials. One class will be specifically devoted to arguing a motion against opposing counsel on a discovery issue. The student will be asked to prepare a motion and a supporting brief on the subject issue to be addressed before the motion's court judge.

LAW 5616 - MOCK TRIAL STRATEGY AND PRA

Minimum Credits: 2

Maximum Credits: 2

This is a performance and presentation-based course that serves as the intensive training component for the law school's mock trial team. The course covers the mechanics of trials with a focus on preparation for interscholastic trial advocacy competitions. Enrollment

is by permission from the professor only. Students can qualify based on a tryout. In addition, the previous year's top two finishers in the law school's internal trial competition will qualify automatically for the course, presuming they have not graduated. This program is a two year commitment. If you are accepted as a member of the mock trial team, you will automatically be eligible to participate in the course for the following year upon successful completion of the course in the first year. Topics in the course include development of case theory, effective advocacy skills, appropriate professional conduct, and trial preparation. Students will present direct and cross examinations of lay and expert witnesses, opening statements, and closing arguments, and will introduce evidentiary exhibits with appropriate foundation. A significant portion of the course will be devoted to a review of both the federal and Pennsylvania rules of evidence, with special emphasis on trial evidence. Returning third year students will focus on preparation for both fall and spring competitions. In that respect they will learn advanced trial techniques as applicable to the competitions. This will include working with actual experts, one on one video analysis of performance and specific, case related issues.

LAW 5618 - ARABIC FOR LAWYERS 1

Minimum Credits: 2

Maximum Credits: 2

Arabic for lawyers is a two semester course comprised of both Arabic for lawyers I and Arabic for lawyers II. Arabic for lawyers is a course that helps students to familiarize themselves with Arabic legal terminology and basic Arabic grammar. This is a beginner class that assumes no prior knowledge of or exposure to the language. As such, native speakers and those with formal training over a period of years may not enroll. The course is a two semester (full year) course and students are encouraged to take both semesters in order to benefit from the course. However, students are permitted to take only the first semester if they wish. They may take only the second semester with the professor's permission if they have had some modest experience with the Arabic alphabet. The first semester of the course deals with learning the Arabic alphabet, mastering pronunciation and developing the ability to write in Arabic by hand. In the second semester, we will turn to learning basic rules of grammar and developing vocabulary in a manner that is designed to be of interest and use to lawyers and legal professionals. The class will conclude by reading simple cases, laws and other basic legal materials. To facilitate the learning experience, laptops will not be permitted in class.

LAW 5622 - COMPARTV PROF RESPONSIBILITY

Minimum Credits: 3

Maximum Credits: 3

The course provides an exploration of the organization and the sources of regulation of the legal profession in the United States, and an overview of select countries in the Americas as well as Europe, briefly highlighting the main differences existing in lawyers' ethical standards in civil law and common law systems. It focuses on the main standards of professional legal ethics in the United States, and compares them with those of Latin American and European countries. The course will be centered on the ABA Model Rules of Professional Responsibility. The Model Rules will be compared with the rules of professional conduct proposed by international associations such as the International Bar Association and the rules proposed by bar associations in the MERCOSUR zone. The course also seeks to engage students in an exploration of the challenges posed by the increase in cross-border, transnational legal practice, and an overview of the ethical regulatory responses attempted so far in this field. This course meets the New York professional responsibility requirement. N.Y. Court Rules for Admission of Attorneys and Counselors at Law Rule 520.3(c)(1)(iii).

LAW 5631 - LAW AND ENTREPRENEURSHIP

Minimum Credits: 3

Maximum Credits: 3

This hands-on, practical course is intended to expose law students to entrepreneurs, innovation companies and the legal issues they face. The course will take students through the life cycle of a technology start-up company, from concept and formation to exit (IPO or sale), through careful analysis of relevant legal documents and case studies, as well as participation in lectures, workshops and simulations. The course will cover choice of entity and formation (including tax issues at start up and early stage fundraising), employee hiring and compensation, evaluation and protection of intellectual property and the development of a comprehensive IP strategy, valuation and financing (investment opportunities), licensing and sales, multinational operations, and exit strategy. The course will provide students with the legal framework and tools necessary to launch and grow a successful technology start-up, and to advise and assist entrepreneurs interested in launching a new business.

LAW 5638 - RACE AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This course will explore the legal treatment of race in the United States. Central to this examination will be: (1) the legal and social construction of race and racism; (2) the legal history of racialized groups including African Americans, Latinos/as, native Americans, Asian Americans, Arab and middle eastern Americans, and white Americans; (3) anti-discrimination laws (governing diverse areas such as education, employment, voting, familial relations, public accommodations, and housing); and (4) the relationship between race, language, and citizenship. A pervasive theme throughout the course will be the significance of race in the post-civil rights era. This inquiry will be analyzed under various modern civil rights perspectives including: traditionalism (advocating for colorblindness

and 'reverse' racism claims), reformism (supporting affirmative action); and critical race theory (recognizing continued systemic subordination).

LAW 5648 - CIVIL RIGHTS LITIGATION: HIST

Minimum Credits: 3

Maximum Credits: 3

This seminar will be a historical consideration of civil rights litigation in the United States. Our goal will be to understand the long history of segregation as it was created by legislatures and then supported by Courts, and how these precedents were reversed through litigation and other strategies. We will read classic cases on race, from the 19th and early 20th centuries, learning how the Supreme Court developed its segregation doctrines. We will simultaneously look at litigation strategies by abolitionists before the Civil War and civil rights activists in the late nineteenth century. We will then turn to the creation of the NAACP and see how it became the leading engine of civil rights litigation. This will lead to the long struggle for an end to segregation, culminating in *Brown v. Board of Education* (1954). Part of our focus will be on Thurgood Marshall as a lawyer. We will look at NAACP integration strategies along with more activist civil rights strategies by Martin Luther King and others. This part of the course will also look at federal actions on civil rights after the passage of the 1964 Civil Rights Act and other civil rights laws. Readings will include some cases -- often in full text -- the classic book *Simple Justice*, a biography of Marshall, and writings by King and others. Our consistent focus will be on (1) what this history teaches us about attorneys litigation strategies and (2) what overarching limits there may be on attaining fundamental change through the litigation process.

LAW 5653 - INTERNATIONAL HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

This course will examine the history of the development of international human rights laws, the concepts behind the current status of those laws, and the mechanics present for enforcing those laws in international, regional, and domestic legal systems. The course will include a discussion of the theories behind international human rights law and the ability (or lack thereof) to enforce international human rights standards. The course will look at different examples of human rights crises throughout the world, how those crises are being addressed and how we believe they should be addressed in light of established law and morality. In light of the growing importance of the r2p ("responsibility to protect") doctrine and the related doctrine of "human rights intervention," we will examine these doctrines closely, whether they comport with international human rights law and whether they in fact accomplish what they claim to accomplish.

LAW 5694 - TRADE MARK LAW

Minimum Credits: 3

Maximum Credits: 3

Trademark law deals with legal bases for obtaining and enforcing interests in commercial symbols, including logos, slogans, and the like, which play central roles both in modern commercial transactions (selling and buying stuff) and in daily conversation. Trademarks are partly information and partly the stuff of speech. The trademark law course will teach you about the many roles that trademark law plays in positioning trademarks as part of business strategies, commercial markets and other institutions, and everyday life. For producers of goods and services, how does trademark law help them make money? For competitors, for purchasers of goods and services, and for firms and citizens generally, how does trademark law preserve the power to access and use trademarks as information about commercial things, information that shapes about the commercial sphere, and information that guides daily experience (if that's separate from the commercial sphere). The course will teach those things in the context of teaching the skills of trademark lawyering. How do practicing lawyers work with clients? How do practicing lawyers develop and exercise professional judgment? How do practicing lawyers solve trademark problems? The course will put students in the role of practicing lawyers and teach them to think, write, and act as lawyers generally and especially as trademark lawyers.

LAW 5705 - TITLE IX SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Title ix of the education amendments of 1972 is often credited with explosive growth in the numbers of girls and women playing sports, which has had many secondary effects on gender relations in the broader society. Title IX'S supporters argue that the law has been unusually effective in promoting gender equality. And yet, title ix remains a highly controversial law, often blamed for cutbacks to men's sports and for putting added financial burdens on schools to fund sports programs which may detract from other educational priorities. It is an area of law that invites critical inquiry into methods of statutory interpretation, competing theories of equality, and law's relationship to social change.

LAW 5707 - FEMINIST LEGAL THEORY SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar introduces and explores feminist legal theory as a method of understanding and using the law. The course integrates theory and doctrine and explores how gender both affects and is affected by the development of the law. Areas of the law studied will include employment, education, domestic violence, family law, torts and criminal law. Students will write a major research paper using feminist legal theory to explain, critique or defend a legal doctrine and/or solve a legal problem. At the end of the semester, each student will give an oral presentation, in "workshop" format, based on their paper.

LAW 5717 - TELECOMMUNICATIONS LAW

Minimum Credits: 2

Maximum Credits: 2

This course explores the regulation and evolution of electronic communications in the United States. We will survey the legal

framework of telecommunications, broadband and the Internet at several significant points in its development. Following the respective regulatory paths of broadcast, wireline and wireless telephony, cable, and broadband, the analysis will include early Federal Communications Commission broadcast regulation; the Communications Act of 1934 and its progeny; the advent of long-distance and local market telephone competition; the evolution of multichannel video communications; and the changes wrought by the Telecommunications Act of 1996. Finally, we will examine technological convergence, the emergent dominance of broadband and wireless communications, and the impact of rapid technological changes. We will also look at telecommunications from a policy and practice-oriented perspective, keeping in mind that regulations and statutes have played as important (if not more so) a role as court decisions in the development of telecommunications law. Themes that will be addressed include: conflicts between federal and state/local jurisdiction; monopoly versus competitive market regulation and issues associated with transitioning from the former to the latter; universal service issues; and the impact of such concerns as intellectual property and free speech. No prior knowledge of the telecommunications industry (or associated law) is necessary. Exposure to administrative law or antitrust law might be beneficial.

LAW 5720 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 0

Maximum Credits: 0

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

LAW 5730 - CURRENT ISSUES IN HEALTH LAW 2

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is the same as current issues in health law 1. This course is open only to third-year students in the health law certificate program, and all third-year students in the program must take this course both fall and spring semesters. Students are required to create a file of at least 40 newspaper articles on health law and policy and to use these articles to write a paper (maximum length: 10 pages) based on the evolution of a theme in health law or policy that they identify from the articles (for example, patients' rights legislation; Medicare prescription drug benefit).

Course Requirements: PREQ: LAW 5831; PLAN: Health Law

LAW 5731 - CURRENT ISSUES IN HEALTH LAW

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to increase the awareness of students in the health law certificate program to the rapidly changing health care industry and the equally rapidly changing field of health law. It is difficult, if not impossible, to understand the law regulating the health care industry without understanding the industry itself. Another purpose of the course is to expose students to a more in-depth treatment of selected topics than they can obtain in the basic survey course in health law and policy. The course also exposes students to topics that are not covered in the basic course, providing a broader view of the field of health law, which helps in the selection of other course offerings and of a topic for the faculty supervised writing requirement. In addition, the course introduces students to the variety of settings in which lawyers are involved in health law and the range of kinds of clients they represent. Classes will be taught by leading experts in the fields of health management and health law practicing in Pittsburgh and elsewhere.

LAW 5733 - MB CONSTITUTIONAL LITERACY SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar relates to the Marshall-Brennan constitutional literacy component of the law school's pipeline diversity program. The Marshall-Brennan constitutional literacy project prepares students to teach a constitutional literacy seminar in Pittsburgh area high schools. Students selected for the Marshall-Brennan constitutional literacy project are required to participate in the Marshall-Brennan Constitutional Literacy seminar concurrent with their teaching assignment at a Pittsburgh area high school. The seminar will focus on teaching methodology and review of constitutional doctrine in the areas to be covered in the high school course. Areas of focus will include the first, fourth, fifth, sixth and eighth amendments to the United State constitution, with particular emphasis on the constitutional rights of high school students and young people generally. Students will develop detailed lesson plans relating to topics to be covered in the high school course. In addition, students will be required to produce a substantial paper relating to one of the topics covered in the curriculum.

LAW 5811 - HLTH CARE BUS TRANSACTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will expose students to a variety of commercial transactions prevalent in the health care industry. The course will focus initially on health care as a regulated commercial enterprise. After studying the case law, statutes and regulations applicable to health care providers, students will begin an in-depth study of negotiated health care transactions. This study will begin with an examination of the fundamental elements of the acquisition process and an analysis of the tax, antitrust, regulatory and successor liability considerations generally addressed in health care combinations. Students will then be exposed to the various stages of the negotiated acquisition process: due diligence; preliminary negotiations and agreements; transaction structure; final negotiations; definitive agreements; and post-closing relationships. We will also explore the financing mechanisms required to support healthcare entities. The course will examine sources of funding, enterprise valuation, healthcare cost controls, capital structure, traditional debt financing, tax exempt bond financing, securities filings, and insolvency. By the end of the course, the students will have acquired an understanding of the complexities of health care financing and will be familiar with the health care acquisition process from its inception to conclusion.

LAW 5839 - LAW ENTERTAINMENT SCL ENTRP PRAC

Minimum Credits: 2

Maximum Credits: 2

Law, entertainment and social enterprise ("lese") will expose students to the legal knowledge, skills and roles entailed in the representation of a social entertainment enterprise. Students will gain a broad understanding of the operations of the entertainment industry and the intellectual, corporate and securities matters that permeate the industry. We will specifically use a case study of the steel town entertainment project ("steel town"), a local social entertainment enterprise that is dedicated to building a socially and commercially significant entertainment sector in southwestern Pennsylvania. The course will involve cross-disciplinary and experiential learning and immersion opportunities. In lese, students will acquire substantive knowledge, practical skills and role models needed by lawyers representing a social entertainment enterprise ("see"). Students will learn about social enterprise, entertainment, intellectual property, corporate and securities law. Students will learn to research and draft a private placement memorandum based on a business plan for a strategic entertainment investment fund see will launch in the spring of 2010. Students will work closely with practicing lawyers who represent or volunteer for the steel town entertainment works and other social entertainment enterprises in southwestern Pennsylvania such as WQED, family communications and Pittsburgh Filmmakers. Students will gain a broad understanding of the business operations and legal needs of various social enterprise entertainment clients in the industry, including but not limited to incorporation, strategic alliances, licensing and venture capital.

LAW 5841 - INTERNATIONAL TAX

Minimum Credits: 3

Maximum Credits: 3

This course will serve as an introduction to the U.S. Federal tax aspects of the cross-border flow of capital and labor. At the most basic level, we will explore the distinction, both for income and for estate and gift tax purposes, between a U.S. And a foreign person. We will then compare and contrast the manner in which U.S. And foreign persons (including tax expatriates) are subject to income tax. We will also cover the special tax regimes applicable to investments made by U.S. Persons in foreign corporations (i.e., The controlled foreign corporation and passive foreign investment company regimes) as well as an introduction to the foreign tax credit rules. Throughout the course of the semester we will consider the potential impact of tax treaties on the rules in the internal revenue code. The grade for the course will be based on a series of drafting projects.

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5843 - LITERATURE AND THE LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Law both affects and reflects cultural values and norms. In this seminar we will investigate the degree to which the law represents and interprets fundamental societal values and norms as expressed in selected literary works. We shall read an eclectic sample of American 19th and 20th century novels in a search for the expression of fundamental cultural values, norms, and prohibitions to determine how they find expression or rejection in the law. Particular attention will be paid to whether the principles of property, contract, tort and criminal law promote or contradict the values found in the literary sources. By so doing, we should gain a richer understanding of how law embodies fundamental human needs and desires.

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5847 - GENDER AND LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course will examine how gender influences legal doctrine and how legal doctrine in a number of specific areas of law affects women and shapes societal understandings of gender. The objectives of the course are twofold: (1) to explore how an understanding of gender and feminist legal theory can enrich the study of law; and (2) to learn specific areas of legal doctrine that are particularly relevant to women and societal understandings of gender. The course will cover a number of areas related to issues of gender equality, such as employment, education, family and domestic responsibilities, sexual harassment, and domestic violence. Various feminist legal theories will provide a framework for studying these areas of law.

LAW 5858 - INTERNATIONAL SALES SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The seminar will consider the international law applicable to cross-border sales transactions involving a U.S. Party. We will focus primarily on the united nations convention on contracts for the international sale of goods ("CISG"), supplemented by study of the principles of international commercial contracts of the international institute for the unification of private law (UNIDROIT). The course emphasizes approaching these texts from an international perspective and employing new research resources that have developed in the area of international commercial law. No background beyond familiarity with general contract law is required, although the course on commercial transactions in goods and/or the course on international business transactions would be useful preparation. In the first part of the course we will explore the substantive provisions of the CISG and UNIDROIT principles, including discussion of applicability, contract formation, obligations of quality, avoidance of contract, risk of loss; exemption for failure to perform; and remedies for breach. The remainder of the course will be devoted to presentations by students on their paper topics.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5860 - ANCIENT LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar will introduce students to the very beginnings of Western legal history. Through a comparative examination of the legal systems and practices of ancient Mesopotamia (including Hammurabi's Babylon, c. 1700 B.C.), Ancient Egypt, ancient Israel, ancient Anatolia (the Hittite empire, c. 1500 B.C.), Ancient Greece and ancient Rome, we will investigate the historical origins of "law" as an idea. We will see how each of these societies created law in the image of its own beliefs and needs. We will look at what differentiated the resulting legal systems, and what united them. We will examine not merely the ancient "law in the books" (the formal written codes that have received so much historical and philological attention over the years) but also the ancient "law in action" (the performances, rituals and ceremonies that created legal rights and duties in all these proto-literate societies). We will look at some of the earliest surviving trial records. Throughout the seminar, emphasis will be placed on developing a broad interdisciplinary perspective on the ancient legal cultures examined; readings will be drawn not only from the fields of law and history, but also from religion, anthropology, archaeology, literature and communication studies.

Academic Career: LAW

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: School of Law (LAWSC)

LAW 5862 - FDS INTELCL PROPERTY LAW SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar deals with the theoretical and policy foundations of patent, copyright, and trademark law. The readings consist of both contemporary and "classic" law review articles and other primary and secondary sources that explore connections between intellectual property law and a variety of possible justifications for the law and its leading cases, statutes, and treaties, including history, liberal political theory, economics and other social sciences, literary theory, and cultural theory. The bulk of the work of the seminar consists of supervision and discussion of original research by students (that is, research in print collections and other collections of analog sources, and digital archives of print collections) on historical intellectual property topics of their choosing, and the production and classroom presentation of a significant piece of original writing by each student.

LAW 5864 - JURISPRUDENCE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

I devote this seminar to the refinement of the fundamental lawyering skill of reading and using cases. We will read together a set of cases drawn from various legal domains. In each instance we will discern the court's choice and its rationale for that choice. We will subject that rationale to rigorous scrutiny, seeing more clearly its weaknesses and its strengths. We will also develop and explore the range of plausible future meanings for each text, i.e., The so-called "holdings." In addition to the group seminar sessions, each student

will write a paper that analyzes one or more cases in this thorough and critical manner. The English historian, s.F.C. Milsom, addressed the conundrum of the common law system thus: "how can a system of law, a system of ideas whose hypothesis it is that rules are constant, adapt itself to a changing world? It has not been the ordered development of the jurist or the legislator ' it has been the rough free enterprise in argument of practitioners ' and the strength of the system has been in the doggedness, always insensitive and often unscrupulous, with which ideas have been used as weapons ' the life of the common law has been in the unceasing abuse of its elementary ideas." In this sense the seminar offers the opportunity for each student to become more proficient in rendering such abuse.

LAW 5866 - ISLAMIC LAW & JURISPRDNC SEM

Minimum Credits: 3

Maximum Credits: 3

This course will focus primarily on Islamic law, and Islamic jurisprudence, in the modern era, using the classical period only as the backdrop against which modern notions and understandings of Islamic law may be tested. We will begin with a brief introduction into the creation and development of Islamic law from its earliest formative period through its golden, classical era in an effort to explore the principles of Islamic jurisprudence. We will then move quickly to address central questions concerning how that law has evolved given that the empires that gave rise to law in the classical era have evaporated and been replaced with nation states that have adopted by and large transplanted political and legal ideas, among them constitutionalism and reliance on secular legal codes to resolve legal questions. In this context, our primary focus will be on the judicial application of Islamic law in Muslim and non-Muslim countries, surveying court practice in states as varied as Egypt, Iraq, Indonesia and Malaysia. We will also address the increased pan-national use of concepts that purport to be based on Islamic law, from Islamic finance to jihad.

LAW 5874 - SECURITIES ARBITRATION CLINIC

Minimum Credits: 4

Maximum Credits: 4

The securities arbitration clinic is a two-semester clinic; however, students may enroll in either the spring or the fall semesters, but must complete 2 semesters in order to receive credit. Total credits hours for the two semesters are 8 credits. The securities arbitration clinic offers a practical and educational opportunity in the securities arbitration process. In this course, the students will represent individual small investors with controversies of up to \$75,000.00 Before a securities panel under the supervision of practicing attorneys. The securities arbitration clinic is designed to impart negotiation, advocacy and trial litigation skills to the students, as well as provide a service to investors that might otherwise be unrepresented. Each student will handle all aspects of assigned a particular client's case, including: ' review case file ' meeting with the client to review facts, request supporting documents, and determine relevant issues ' research of applicable securities laws ' meeting with supervising attorney to determine course of action ' if case is accepted, file power of attorney or entry of appearance with the Pennsylvania supreme court or securities and exchange commission, preparing and filing a statement of claim with FINRA and following through with all aspects of case preparation. 'Contact sec attorneys, opposing counsel and the SRO to discuss recourse and schedule the arbitration panel if necessary. ' For arbitrations: prepare case to be presented to the arbitration panel, including obtaining all necessary documents and witnesses, as well as completion of all research on the law; represent the client in arbitration; complete post arbitration work, including review of stipulated decision, if case is settled before arbitration.

LAW 5879 - RIGHTS IN AMERICAN LAW SEMINAR

Minimum Credits: 3

Maximum Credits: 3

In this class we will delve into the whole idea of rights -- in contemporary American culture, in comparative context, and in their historic development in Anglo-American political theory and legal discourse. Then we will inquire how (whether) those ideas play out in current civil rights advocacy in our legal system. The course is not intended to be a doctrinal survey of civil rights law in the U.S. Or a doctrinal study of the law of any one particular area of civil rights. Instead, we will look at (1) the concept -- and history of the concept -- of rights, (2) some particular issues in civil rights doctrine today that run across substantive areas, e.g., Intent, and (3) see how those ideas play out in an interactive practical situation, through a simulated case study, in which students will play the part of lawyers mediating a civil rights issue. A secondary focus of the course is the combination of theory and practice. Does critical theory inform down to earth civil rights practice? If so, how? Sexual harassment or race discrimination are possible contexts for the interactive mediation part of the course (one will be chosen after the course begins). The reduced formality of mediation (as opposed to adjudication) should allow for a better simulation in a seminar setting and better accommodate some of the less doctrinal materials.

LAW 5880 - IMMIGRATION LAW CLINIC

Minimum Credits: 4

Maximum Credits: 4

The immigration law clinic is a two semester clinic. Students may enroll in either the spring or the fall semesters. Students will receive a grade at the conclusion of each semester, however, in the event that a student does not complete the second semester the student shall receive a w for the course (for both semesters), thus nullifying the grade for the prior semester. Students will receive 3 credits per semester. In the immigration clinic students represent immigrants requesting asylum, facing removal from the United States, and seeking special protection under the violence against women act. In representing clients under the supervision of the clinical professor, students perform all aspects of case preparation including interviewing clients, writing pleadings, appearing in immigration court, appearing before administrative agencies and managing post-relief issues. Clinic students also assist their clients in overcoming linguistic and cultural barriers that could impede their clients' success in the U.S. Legal system. Clients may include refugees, immigrant women and children survivors of domestic violence applying to change their status, persons with criminal convictions who seek relief from removal from the United States and other immigrant populations. Students are also expected to collaborate with community based organizations that serve the foreign born population in the city.

LAW 5883 - ENVIRONMENTAL LAW CLINIC

Minimum Credits: 6

Maximum Credits: 6

The environmental law clinic provides a forum for students to acquire practical expertise in environmental and administrative law by developing and integrating knowledge and skills with practical judgment in the assumption of responsibility for clients. The clinic will represent groups and individuals who otherwise could not afford legal and technical services for their environmental and community health needs. Focusing on, among other areas, water quality and land use issues in Western Pennsylvania, students may be assigned to handle matters involving the following activities: drafting court pleadings and briefs; representing clients at administrative hearings; engaging in collaborative legal and technical work; supporting pro bono environmental litigation filed by non-clinic counsel; conducting discovery; drafting proposed legislation and rules; commenting on proposed permits, regulations, and environmental impact statements and assessments; evaluating matters for potential future action; meeting with clients, other attorneys, and governmental officials; developing case strategy; factual investigation; community outreach and development; policy work; and

similar tasks. In some instances, students will have primary responsibility for their assigned matters, and the supervising attorney will maintain a secondary role.

LAW 5890 - ELECTRONIC DISCOVERY SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The discovery process has undergone a revolutionary change in the last quarter-century. Today, the vast majority of documents are created, stored and retrieved electronically, and the sheer volume of electronically-stored information ("ESI") has multiplied exponentially. This explosion in the volume of ESI has raised a host of legal, ethical and technological challenges for litigators and courts alike. This seminar will address many of the pressing legal issues that electronic discovery raises, including the creation, preservation and production of ESI; the distribution of the costs of e-discovery; the risk of spoliation; and the ethical and privilege issues that arise in connection with e-discovery.

LAW 5895 - ARTIFICIAL INTEL & LGL RES SEM

Minimum Credits: 3

Maximum Credits: 3

Researchers in Artificial Intelligence (AI) and law attempt to design computer programs that can perform legal reasoning or that can solve, or assist attorneys to solve, legal problems. The researchers ask tough, philosophical questions, such as, can one state precisely what a legal rule means and decide whether it applies to a situation? How can one separate "hard" from "easy" legal issues? What roles do cases play in interpreting a legal rule? Their answers, however, are not philosophical but scientific; they design computer programs that model the task and conduct experiments to evaluate how well the program performs. The seminar will involve law

students and graduate students from other disciplines. The seminar goals are to introduce the fundamentals of AI to law students and of legal reasoning to graduate students and jointly to grapple with the work of researchers who have built AI programs for the legal domain. Law students will more fully appreciate the techniques and assumptions employed by attorneys, and by AI and law researchers, to deal with the uncertainties inherent in legal reasoning.

LAW 5904 - APPELLATE MOOT COURT COMPETITION

Minimum Credits: 1

Maximum Credits: 1

This intra-school moot court competition is open to all second and third year students. During the initial fall round, students write a brief and orally argue it. The winning participants go on to an intermediate level "round robin". Participants advance through the round-robin based upon the relative quality of their oral advocacy. The final rounds, usually occurring after the winter break, consist of the successful participants from the previous semester's round-robin. Participants completing the first round receive one credit awarded in second semester.

LAW 5910 - LAW REVIEW

Minimum Credits: 1

Maximum Credits: 1

The law review is a quarterly legal journal published by second and third year students. Members not only write scholarly commentaries on recent developments in legislative and court decisions, but also analyze and edit student and non-student works, preparing those selected for publication. Students with high academic averages are invited to become members following completion of their first year, and, to a limited extent their second year. All first year students may enter a writing competition held over the summer from which additional members are chosen.

LAW 5929 - LEGAL SERVICES PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This course offers students a great opportunity to help indigent clients and to learn important lawyering skills under the close supervision of an experienced attorney at neighborhood legal services association or laurel legal services. Students will work on cases involving poverty law issues such as eviction, custody, protection from abuse, public benefits, and debt collection. The classroom component will focus on various substantive and procedural poverty law issues, on ethical considerations, and on lawyering skills - such as interviewing, counseling, fact-gathering, legal analysis, negotiation, research, drafting, and litigation - critical to many types of legal practice. Classroom assignments will include simulation exercises and preparing a monthly journal. The field component will focus on advising and representing indigent clients. Field assignments will be available in Pittsburgh, Bridgeville, New Castle, and Butler. This is an excellent opportunity for students to gain experience in the county where they live or hope to practice. Most field assignments will include courtroom experience, and most students will be able to complete the field component before final exams. Every attempt will be made to schedule the field assignment at times convenient to the student.

LAW 5939 - CRIMINAL DEFENSE PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course provides students with the analytical thinking, research, and writing skills that are needed to successfully litigate a criminal case for the defense from pre-trial through appeal to the Pennsylvania supreme court. The emphasis will be on legal writing and how an effective advocate uses writing to advance his clients' interests. Throughout the course, students will learn to hone their research and writing skills to present the best possible arguments in their pleadings. In addition, students will learn about the various stages of the criminal process and how to properly present and preserve issues for their clients. Analytical thinking and oral advocacy will also be enhanced through our in class simulations of trial court hearings and oral argument in the superior court.

LAW 5950 - UNEMPLOYMENT COMPENSATION PRAC

Minimum Credits: 2

Maximum Credits: 2

This course provides a clinical option that combines components of a traditional law school clinic and an externship at a legal services or public interest law firm. Representing claimants in unemployment compensation (UC) cases can provide law students with a meaningful trial advocacy experience. For the first three weeks, classes will meet twice a week so students can get up to speed on the substantive law and trial practice skills. Subsequent classes will include bringing in Referee to conduct mock hearings and a Commonwealth Court judge to discuss appeals. By week three, students will meet with and begin interviewing clients at the Pitt Clinic Offices, research applicable law, gather evidence, and conduct hearings before a Referee. The Practicum Supervisors will meet with students at additional times to assist them in preparation for hearings. The Supervisors will accompany each student to their first and perhaps a second hearing. For subsequent hearings, other students in the practicum will accompany the student attorney to observe his or her performance and provide feedback. In addition to representing claimants at hearings, students will file and draft briefs to the UC Board of Review and to Commonwealth Court. Students will submit a weekly journal which contains their analysis of their case preparation, the hearings themselves and their progress. Also, students will help update the Unemployment Compensation Manual, which John Stember has edited for a number of years and which has been published by the Pennsylvania Bar Institute (PBI).

LAW 5952 - CRIMINAL PROSECUTION PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

The office of the district attorney of Allegheny county administers the criminal prosecution practicum under the auspices of former prosecutor, judge Edward J. Borkowski. The practicum runs the full school year, so those interested must devote both semesters to the program. The practicum combines classroom instruction with actual courtroom prosecution experience in order to prepare students for the practice of criminal law. The classroom portion of the course requires students to attend a two hour class once a week in the courtroom of judge Borkowski in the Allegheny county courthouse. Students will be instructed on and be required to conduct opening statements, closing arguments, and direct and cross examination of lay and expert witnesses. Students are provided with a vehicle that includes police reports, lab reports, and transcripts of taped statements based on the class model (a homicide case) from which the exercises are performed in class by the students in a live courtroom setting with a judge and defense attorney present and participating as such. The practical portion of the course requires students to extern ten (10) hours per week in Stephen A. Zappala's Allegheny county district attorney's office. Certified students are permitted to litigate guilty pleas, suppression motions, and nonjury trials in the Allegheny county court of common pleas. The goal of the practicum is to give students a broad overview of the inner workings of a prosecution office while providing hands-on experience in prosecuting cases.

LAW 5954 - D.C. SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The D.C. Seminar is one component of the semester in D.C. Program. The other component of the semester in D.C. Program is the D.C. Externship, which is described separately. Students must enroll in both the D.C. Externship and the D.C. Seminar in order to participate in the semester in D.C. Program. The D.C. Seminar will provide intensive skills training, meetings with alumni and practitioners, and opportunities to reflect on and analyze students' externship experiences. The seminar will meet in the law school's D.C. Classroom. The three seminar credits will be graded. Grades will be based on class participation, a weekly journal, and a significant paper regarding a legal issue or set of issues relating to the externship. The paper can be used to satisfy the upper level writing requirement. Students interested in participating in the semester in D.C. Program should: (a) contact prof. Deasy and/or prof. Baylis directly to discuss the program requirements and externship application process and (b) sign the semester in D.C. Program statement of interest form included with the registration materials and return it to the registrar's office when they submit their registration materials. Students who sign the statement of interest for the semester in D.C. Program should also register for classes as they normally would, in order to keep open the option of taking a regular course load until they have obtained an externship position. Upon securing an externship position, students can drop their other classes and add the D.C. Externship and D.C. Seminar.

Maximum Credits: 10

The D.C. Externship is one component of the semester in D.C. Program. The other component of the semester in D.C. Program is the D.C. Seminar, which is described separately. Students must enroll in both the D.C. Externship and the D.C. Seminar in order to participate in the semester in D.C. Program. The D.C. Externship consists of an unpaid externship in Washington, D.C. With a government entity or non-profit organization. Students must be doing primarily legal work, must be supervised by an attorney, and must complete a minimum of 520 hours of work during the semester. Professors Baylis and Deasy can provide information about some potential employers, but students are responsible for finding and applying for their own externship positions. The 10 externship credits will be ungraded and will be awarded on a satisfactory/unsatisfactory basis. Students interested in participating in the semester in D.C. Program should: (a) contact prof. Deasy and/or prof. Baylis directly to discuss the program requirements and externship application process and (b) sign the semester in D.C. Program statement of interest form included with the registration materials and return it to the registrar's office when they submit their registration materials. LAW 5958 - LGL RESEARCH FELLOWS PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

Participants in this one credit, graded course will sharpen and refine basic research skills learned during previous legal research courses. With supervision from the faculty services librarian and other Barco law librarian librarians, students will learn to develop legal research strategies, conduct efficient and comprehensive legal research and to effectively communicate the results of their research to faculty members. Fellows may draft memos, generate spreadsheets or develop bibliographies as finished work products for assignments. The research fellow will encounter a diversity of research requests just as an associate would receive a variety of assignments in a law firm setting. Fellows will have an opportunity to directly interact with faculty members.

LAW 5978 - COMP CORPR GOVERNANCE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Following the Enron and WorldCom debacles in 2001-02, the US Congress passed the Sarbanes-Oxley Act (2002)(SOX). Following the near complete economic meltdown of 2008, Congress passed the Dodd-Frank Act (2010). The seminar will review and discuss the governance provisions of the two acts. Students will then each write a paper concerning recent corporate governance developments in a foreign nation, such as China, Indonesia or Japan on the Pacific Rim, or the European Union, the United Kingdom, or France on the Atlantic, noting both the similarities and the differences between governance regimes. Both a substantial paper and a class presentation will be required.

LAW 5984 - TRADE SECRETS LAW

Minimum Credits: 2

Maximum Credits: 2

This course will cover various aspects of trade secret law with an emphasis on practical considerations relevant to the business environment. Students will examine public policy considerations of trade secret law, compare the uniform trade secrets act (UTSA) to the restatement approach and to the Pennsylvania UTSA, and compare trade secret protection with other forms of intellectual property. We will review the elements of a trade secret and compare the types of information and the circumstances under which courts have recognized or denied trade secret protection. The rights of a trade secret owner relative to its employees and third parties will be examined in detail, including use of confidentiality agreements and non-competition agreements. Enforcement of trade secret rights will be surveyed and include civil and criminal proceedings including the economic espionage act (EEA). Practical issues from the business world are strongly emphasized in this course including drafting and negotiating confidentiality agreements, establishment of business policies and procedures for trade secret protection, practical considerations surrounding the bringing and settling of trade secret cases, and drafting and enforcing non-competition agreements.

LAW 2020 - CONTRACTS

Minimum Credits: 4
Maximum Credits: 4
What promises are legally enforceable? Why does the law enforce those promises? What does it mean to enforce a promise? This course explores those questions, using the basic concepts, principles, and doctrines of contract law, sometimes called "the law of broken promises." Specific topics include the requirements for formation of a contract (such as offer and acceptance), justifications for enforcing promises (such as consideration or detrimental reliance), justifications for denying or limiting enforcement (such as unconscionability or mistake), interpretation of contract terms, and remedies for breach of contract.

LAW 2024 - PROPERTY

Minimum Credits: 4
Maximum Credits: 4
Property law, broadly defined, governs relationships among people with respect to "things." These "things" include land ("real property"), tangible objects such as a casebook ("personal property"), and intangibles such as a publisher's right to prevent others from reproducing the original content in a book ("intellectual property"). The property course examines how property rights may be limited, in situations where more than one person has rights to the same piece of property, and in situations where one owner's rights must be balanced against the rights of the owner of a separate piece of property. Topics covered in the property course may include: modes of acquisition of property (e.g., Capture, find, creation), present possessory estates and future interests, co-ownership of property, marital property, landlord-tenant law, land sales, title recording systems, easements, restrictive covenants, nuisance, public land use regulation (including zoning, eminent domain, and the issue of regulatory takings), and global property issues.

LAW 2028 - TORTS

Minimum Credits: 4
Maximum Credits: 4
This course explores the methods and policies for allocating losses from harm to one's person, property, relations, and economic and other interests. The course covers the substantive principles of tort claims and their defenses. The course examines the three main theories of tort liability: intent, negligence, and strict liability and analyzes the theoretical and practical aspects of tort liability.

LAW 2041 - LAWYERING: A HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course will survey the history of lawyering from ancient times to the present day. Students will be invited to meet Cicero and the Roman jurists, look inside medieval courtrooms to see English common lawyers and European civilians at work, experience the rhetoric of John Adams and Daniel Webster while considering the daunting challenges faced by the emerging bar in early America, and assess the economic, industrial and organizational conditions that contributed to the cultural ascendancy of lawyers in the twentieth century United States. We will investigate both the historical successes of the legal profession and its failures, its championing of great causes and its complicity in great injustices. We will look at lawyering in its changing social, ethical and technological contexts, examining how lawyers over time and in various national settings have constructed their identities, established their power, viewed their duty, and articulated their collective mission. We will investigate how lawyers have been trained, and how different methods of legal education have shaped them. We will learn about legal lives lived far away and right here in Pittsburgh. We will look at today's American bar, assessing its recent history as a business dominated by the rise of the billable hour, and at the end of the course we will peer into some of the possible futures awaiting attorneys working in a digital age.

LAW 2047 - CRIMINAL PROCEDURE

Minimum Credits: 3

Maximum Credits: 3

The subject matter is supreme court decisional law and policy issues relating to the application and scope of the fourth, fifth, sixth, and fourteenth amendments to the United States constitution. Topics typically covered include: incorporation theory, right to counsel and related entitlements, the exclusionary rule, pretrial identification procedures, search and seizure law, and interrogation law. Students should gain both knowledge relating to constitutional law, which governs the permissible perimeters of police conduct and defendants' rights, and an informal sense of how the criminal justice system actually operates.

LAW 2076 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 4

Maximum Credits: 4

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

LAW 2082 - CLIMATE CHANGE AND THE LAW

Minimum Credits: 2

Maximum Credits: 2

This course examines the problems of climate change and how law and policy and corporate America are responding to them. The course begins by describing what is encompassed under the current "climate change" debate; considering what science can tell us about the climate change issue, including the uncertainties in that science and the significance and role of descent from the mainstream view of the science. It then considers, given the current state of the science, how we should assess the actions that should be taken to respond to this problem. That assessment should take account mitigation vs. Adaptation. The course also considers the legal responses to the issue of climate change. This course will discuss the united nations framework convention on climate change (UNFCCC), the KYOTO protocol, and the likely future of both. This course will discuss the domestic federal legislation with regard to GHGS as well as certain regional initiatives and voluntary commercial GHG reduction schemes. This part of the course will be examining the "boomlet" in global warming litigation in federal and state courts looking at the administrative and tort actions pending in U.S. Courts. Finally, the course will address sustainability issues for business, including green building, carbon neutral strategies, certain esoteric accounting issues, some carbon trading issues. Lectures will include voluntary and NGO-driven business initiatives (proactive approaches) as well as certain secondary effects caused by climate change that affect businesses.

LAW 2089 - PUBLIC HEALTH LAW

Minimum Credits: 3

Maximum Credits: 3

Public health law touches the lives and livelihoods of every person. Understanding the intent, basic structure, and methods for employing the local, state, and federal laws governing public health activities will facilitate legal practice in a variety of disciplines, including: municipal, healthcare, environmental, and judicial practice. This is a survey course, intended to introduce students to the most commonly encountered national and world public health law issues. Specific topics include: an overview of the epidemiologic principles underlying public health law; police powers; balancing public and private interests at stake; privacy and confidentiality of public health information, emergency preparedness; search, inspection, embargo and condemnation of private property; abatement of nuisances and dangerous conditions; and the major federal statutes affecting public health. In addition, material concerning world public health issues will be presented to help students understand the community health benefit from comprehensive public health legislation. Finally, ongoing local public health law interventions will be analyzed using the basic principles introduced early in the course.

LAW 2093 - THE LAW OF PROFESSIONAL SPORTS

Minimum Credits: 2

Maximum Credits: 2

Focusing on the 4 major professional sports leagues, this course will examine how the common law, state and federal statutes, and

even certain constitutional doctrines have been applied to professional sports franchises, its players and agents, and its fans. The topics for discussion will include: the role and power of the commissioner; the importance of collective bargaining agreements, including uniform player contracts, in the development of a body of law governing the relationship between a player and his club; the current state of antitrust law in pro sports; the agent-player relationship; contract negotiations, including the salary arbitration process; the variety of intellectual property issues applicable to leagues, its teams and its players; the rights (or lack thereof) of pro sports fans, including the application of tort law principles to fan injuries; the attempts by pro-sports leagues and teams to control the off-field behavior of its players, and the approaches by the various leagues to regulate performance enhancing drugs.

LAW 2105 - FEDERAL INCOME TAX

Minimum Credits: 4

Maximum Credits: 4

This course will introduce the basic concepts found in the internal revenue code, as interpreted by the internal revenue service and the courts. We will explore the concept of "income," and specifically consider the difference between ordinary income and capital gain, the timing of income inclusion, and the determination of a taxpayer's basis in property (which relates to the calculation of income). We will also explore exclusions and deductions that may reduce a taxpayer's income. This course has two primary goals: first, to give the students a basic familiarity with the internal revenue code so that they will be aware of tax issues that may arise in their practice, and second, to prepare students who have (or acquire) a deeper interest in tax for more advanced courses in taxation.

LAW 2121 - BIOMEDICAL TECHNOLOGY LAW

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the commercial aspects of biomedical technology. Initially, students will explore the evolution of biotechnology companies. Topics in this section will include: product development, regulatory approvals, testing and market distribution and exclusivity programs. The course will then turn its attention to the integration of medical technologies in healthcare delivery systems and the responsibility of providers with respect to medical technology. Next, students will examine the development and commercialization of evolving medical technologies with a focus on human tissue products and the genome project. Finally, students will be provided with an overview of the role of governmental oversight in the field of medical technology and the emerging law relating to product advertising and liability. Significant time will not be spent on the following topics that are covered in other courses: intellectual property protections (including, patent, copyright and trademark law), antitrust concerns, bioethics and medical technology in the academic setting.

LAW 2124 - THE CIVIL LAW TRADITION

Minimum Credits: 3

Maximum Credits: 3

The civil law is the legal tradition of all of continental Europe and many other parts of the world. In our time of globalization, lawyers have increasing contacts with colleagues and clients from abroad. This course is designed to introduce you to the civil law legal tradition, and to familiarize you with foreign legal assumptions, institutions and reasoning through an examination of various areas of law, including civil and criminal. The cases and codifications studied will be principally those of France and Germany. The course also seeks to develop in students a comparative law approach to understanding foreign law more generally.

Course Requirements: School of Law (PLAW)

LAW 2201 - ADMINISTRATIVE LAW

Minimum Credits: 3

Maximum Credits: 3

It is next to impossible to practice law today without dealing with administrative agencies, federal or state, or the law they create. Indeed, more cases are adjudicated in administrative bodies than in the courts. The substantive law that is created and implemented by agencies is the subject matter of individual courses such as environmental law, securities regulation, taxation, and banking. It is the procedural/structural law that governs the creation and implementation of substantive law by agencies that is the focus of administrative law. We will discuss the different types of functions undertaken by agencies, for example, rulemaking and adjudication in all its forms and how those disparate functions determine the appropriate structure of decision-making. At the federal level, where we will focus our attention, the procedures that apply originate in a variety of sources, including the United States constitution, the administrative procedure act and other statutes, and agency rules. There is often a complex interplay among these sources of law, which will be one of the topics we will explore. Another is the relationship of agencies to the chief executive and the legislature, an area that implicates important constitutional doctrines, statutes, and executive orders. Finally, we will spend considerable time on the availability, timing, and scope of judicial review of agency action, including the doctrines of standing, ripeness, exhaustion of administrative remedies, and judicial deference to agency findings of fact, interpretations of law, and exercises of discretionary power.

LAW 2207 - ANTITRUST

Minimum Credits: 3

Maximum Credits: 3

This survey course will focus on federal antitrust law, including the Sherman and Clayton acts and cases construing those statutes. We will examine the legal and economic analyses of three major categories of anticompetitive conduct: agreements among competitors, monopolization, and horizontal mergers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2209 - PATENT LAW

Minimum Credits: 3

Maximum Credits: 3

For over two hundred years the U.S. Patent system has stimulated innovation by conveying time-limited exclusionary rights to inventors who adequately disclose their novel and nonobvious inventions to the public. Technologic challenges confronting the patent system span a circa-1800 priority dispute concerning the invention of steamboats to the supreme court's groundbreaking 1980 decision permitting the patenting of a living, genetically-engineered bacterium. Through study of relevant judicial decisions and statutory provisions, this course will examine the substantive legal doctrine and policy underlying two primary aspects of U.S. Patent law: the requirements for obtaining a patent and the means by which an issued patent is enforced (and its validity challenged). Specific topics include patentable subject matter (including computer-implemented inventions and biotechnology), novelty, no obviousness, utility, loss of right, disclosure requirements, patent claim interpretation, literal infringement, the doctrine of equivalents, prosecution history estoppel, defenses to patent infringement resulting in invalidity and/or unenforceability, and the unique role of the U.S. Court of appeals for the federal circuit in shaping U.S. Patent law. A technical background is not required for this course but a willingness to engage with inventions and discoveries and their legal protection is a must.

LAW 2213 - CONFLICT OF LAWS

Minimum Credits: 3

Maximum Credits: 3

Disputes between parties from different states or countries and disputes having contacts with multiple jurisdictions raise a host of challenging legal questions, including: (1) which jurisdiction's law will govern the dispute; (2) whether and in what circumstances a judgment rendered in one state or country will be recognized and enforced in other jurisdictions; and (3) how courts should make these determinations. State laws, the federal constitution, and international and foreign law all play a role in deciding these issues, which can have a profound impact on the ultimate resolution of the controversy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

LAW 2216 - EMPLOYMENT DISCRIMINATION

Minimum Credits: 3

Maximum Credits: 3

This course will examine federal statutory law as it applies to employment discrimination, with an emphasis on discrimination based on race, sex, color, ethnicity, national origin, religion and age. The most prominent statutes in this area are title vii of the civil rights act of 1964, the age discrimination in employment act, and an older civil rights statute from the reconstruction era, 42 U.S.C. 1981. The course will explore the substantive meanings of "discrimination" under these acts, the models of proof for establishing a claim, the theoretical underpinnings of the statutes, and some of the procedural and remedial issues relevant to employment discrimination law.

LAW 2225 - INTERNATIONAL BUSINESS TRANSACTION

Minimum Credits: 3
Maximum Credits: 3
This course analyzes basic international business transactions and the effects of U.S. Law, specific foreign law, and treaties on the conduct of the parties involved. The course covers issues of commercial law, regulation of cross-border transactions, dispute resolution, tax considerations, and antitrust law. Although a basic understanding of each of the areas of the law in the domestic context is helpful, there are no course prerequisites. Students are expected to develop an understanding of the U.S. Laws applicable to private international transactions and an awareness of the risks inherent in doing business in or with other countries and their nationals.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Law (PLAW)

LAW 2226 - INTERNATIONAL LAW

Minimum Credits: 3
Maximum Credits: 3
This course explores how international law regulates, or attempts to regulate, relations between states, and between states and individuals. It therefore examines both classical and contemporary topics such as the sources of international law, rights and responsibilities of states, jurisdiction, the incorporation of international law into domestic law, individuals as bearers of rights and obligations at the international level (in particular human rights law and humanitarian law), the law of treaties, the law on the use of force and the role of the united nations and the international court of justice in the peaceful settlement of international disputes. Several specific topics will be examined to illustrate the increasing impact of international law on domestic legal practice, and the influence of the united states on the development of modern international law.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Law (PLAW)

LAW 2237 - LEGISLATION

Minimum Credits: 3
Maximum Credits: 3
For most of this nation's history, judge-made common law provided the major legal principles governing personal and commercial relations. More recently, however, the preeminence of common law has been eclipsed by statutory law, to the degree that one commentator has complained of the "orgy of statute-making" current today. In this course we will study three essential facets of legislative law. First, more briefly, we will consider the processes by and standards under which bills are written, studied by committee, and enacted (or buried). Second, we will study the fate of the legislature's statutes when construed by the judiciary. The problem of statutory construction has sparked a lively debate on the proper weight to be accorded to the statute's text, its legislative history, and its implied or express statutory "purpose." Third, we will also analyze the prevalent role administrative agencies play in interpreting statutes, principally through the development of administrative regulations.

LAW 2251 - BIOTECHNOLOGY LAW

Minimum Credits: 2

Maximum Credits: 2

Virtually every aspect of our lives is touched by biotechnology, so this class is designed as an introduction to many of the critical issues related to biotech and society. Specific topics include genetically modified organisms (Franken foods), patenting life, vaccination laws, human and animal testing, bioterrorism, biological weapons laws, bio-prospecting, pharmaceutical pricing, FDA laws, as well as scientific (and investor) fraud in biotech. The class also focuses on the policy relationships between law and public health, as well as related underlying economic incentives that can create tension in the life sciences. The class includes a number of guest speakers from industry including biotech licensing professionals and an FDA practice attorney. This class will be useful for anyone planning to practice law related to the life sciences including patent law. The issues are presented in a non-technical manner so the class is accessible to anyone interested in the field. It may be helpful to have exposure to patent law in general but it is not required.

Minimum Credits: 2

Maximum Credits: 2

This course, after a short review of American labor history, will focus almost exclusively on the national labor relations act, the nation's premier statute dealing with labor management relations in the private sector, and the model for many public sector state laws covering the field. The course deals with the rights of individual employees, employers, and unions with respect to concerted activity, unionization, the establishment of collective bargaining units, elections conducted by the national labor relations board, and the collective bargaining process. The course will also cover strikes, picketing and hand-billing by unions, the current restrictions or limitations on such conduct, and the administration of collective bargaining agreements, grievance processing, and the arbitration of disputes. We will study and critically examine procedural and substantive case law developed by the national labor relations board, and its impact upon labor-management relations in both unionized and non-union environments. The course concludes with a discussion of the future of labor relations. We will discuss more recent tactics employed by unions and management and engage in a debate as to whether and how the current labor laws should be amended. Classes will be a combination of both lecture and dialogue. We also will discuss critical issues with representatives from Pittsburgh's union and business communities.

LAW 2282 - NATIONAL SECURITY LAW

Minimum Credits: 2

Maximum Credits: 2

The Preamble to the U.S. Constitution, which famously begins "We the People," makes clear the high value our founders placed on national security and the role of law. The Preamble describes the Constitution's very purpose as including "establish[ing] Justice, insur[ing] domestic Tranquility, provid[ing] for the common defence,... and secur[ing]... Liberty." Today, national security remains a priority responsibility for our federal leaders. Our nation continues to strive for the right balance between security and liberty, mixed with a healthy dose of Justice, all in the name of "form[ing] a more perfect Union." The Constitution has continued to provide a framework for our government's exercise of national security powers. At the same time, the field of national security law has witnessed rapid growth and significant change, particularly over the past fifteen years. The coming years will be no less dynamic. This course examines national security law through a study of essential legal sources, historical precedents, and current and emerging national security issues. Topics include: each branch's role (and limitations) in national security decision-making, war powers and military force, crime and counterterrorism, and the role of information in national security. Together, we will aim to better understand the role of law in keeping our homeland safe, and the relationship (and necessary balance) between security, liberty, and justice.

LAW 2283 - MENTAL HEALTH LAW

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the impact of the legal system on persons with mental health disabilities. Civil proceedings, such as guardianships, commitments and treatment rights will be covered. Civil law areas covered will include mental illness, substance abuse, confidentiality, consent, substitute decision making and the rights of parents and of children in juvenile proceedings, custody determinations and divorces. While the primary focus will be civil law, criminal law topics will include capacity, right to refuse treatment, and insanity as a defense. The role of mental health professionals and mental health courts will be a prominent issue in the course.

LAW 2295 - EXPERT WITNESS

Minimum Credits: 2

Maximum Credits: 2

In recent years, the use of expert witnesses has proliferated as both civil and criminal litigation have become more complex and technical. In this course, students will learn when expert testimony is needed; where to find appropriate experts; how to work with the expert to develop a theory of the case; and many more issues leading up to the actual trial of the case. Once the case reaches the courtroom, students will learn how to organize and present their own expert's testimony in a clear and concise fashion, and how to pursue the challenging task of "doing battle" with the opposing expert. In the end, students will achieve a greater appreciation for the subtleties of expert testimony, while at the same time acquiring the tools to deal with witnesses who speak in technical and unfamiliar language.

LAW 2297 - WORKERS' COMPENSATION

Minimum Credits: 2

Maximum Credits: 2

This course deals with the law, theory and practice of workers' compensation under state and federal administrative programs, including the Pennsylvania and other state acts; longshore and harbor workers' compensation act (LHWCA); federal employees' compensation act (FECA); and the federal employers' liability act (FELA). The student will study the essential aspects of such laws, including their development and purpose, coverages, the various levels and varieties of benefits provided and how claims are established and enforced. Special emphasis is placed on how such laws affect the rights of individuals to other remedies such as the ability to sue in tort or assert discrimination claims; how compensation programs are implicated in contemporary efforts to reform healthcare coverage and delivery; and the role workers' compensation plays in occupational safety and health. The student will become familiar with the uniform policy of insurance for compensation coverage and how compensation coverage and other regulatory requirements are policed by governmental authorities. A pervasive theme of the course is the status of workers' compensation as a unique hybrid of administrative law and tort, with the consequent effects of such status on the law, theory and practice of the field.

LAW 2300 - FOOD AND DRUG LAW

Minimum Credits: 1

Maximum Credits: 1

The U.S. Food and drug administration has the regulatory mandate to protect the American food supply, and to ensure that drugs are safe and effective for the purposes for which they are prescribed. This course will survey selected topics in food and drug law, including the new drug approval process, regulation of food additives and carcinogens, food labeling and nutrition, prescription vs. OTC drug status, and restrictions on pharmaceutical marketing. Related legal standards affect all of us as consumers in everyday life, and have even greater impact in circumstances like end-of-life decision making. In examining food and drug law issues, we will focus on the tension between information gathering, risk regulation, and paternalism as themes in FDA policy making.

LAW 2301 - CONSTITUTIONAL LAW: FIRST AMENDMENT

Minimum Credits: 3

Maximum Credits: 3

When we think of freedom of speech, we generally think of protest, dissent and political controversies. There is good reason for this; robust discussion of issues of public policy and candidates for public office is an essential element of democratic self-governance.

Today, however, the first amendment is also invoked - often successfully - in a variety of other contexts. Can the federal government limit tobacco advertising? Can a school punish students for "cyber-bullying?" Can a city ban billboards for adult entertainment businesses? This course will provide a detailed examination of first amendment doctrines and their application in a wide variety of contexts, both traditional and contemporary. Topics will include: political speech, obscenity, libel, commercial speech, regulation of electronic media, limitations on the "time, place, and manner" of expression, symbolic speech, and rights of association. Some comparisons will be made between first amendment doctrines and other areas of constitutional law.

LAW 2328 - COPYRIGHT LAW

Minimum Credits: 3
Maximum Credits: 3
Copyright law deals with legal protection for certain kinds of human "creativity," including creativity expressed in books, music, and computer code. The copyright law course will describe the role that copyright law plays - together with other intellectual property law, other non-IP law, and other non-legal institutions - in positioning that creativity as part of a knowledge ecology and the knowledge economy. For authors and publishers, how does copyright law help them make money based on their creative output? For readers and consumers (and next-generation authors), how does copyright law preserve the power to access and use knowledge? And for law students, how do lawyers participate in doing both things, by representing and counseling clients? The course will describe the constitutional and statutory attributes of copyright law; the rights and remedies that copyright law provides for authors and publishers; constitutional and statutory protection that copyright law provides for the public; and the intersection of American copyright law with other intellectual property law, with state law, and with international law. Students are expected to master the substantive law of copyright, but that mastery is only a preliminary step. The major goal of the course is to teach students how to use the law to advance their clients' interests in creative products. The course does that by requiring students repeatedly to use their professional judgment in a counseling context.

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Law (PLAW)

LAW 2340 - ENVIRONMENTAL LAW

Minimum Credits: 3

Maximum Credits: 3

This course focuses on domestic environmental law and, in particular, on federal law rather than state law. The diverse and technical nature of modern environmental law is such that, in practice, lawyers often specialize in very narrow areas. Nevertheless, the same or similar moral, scientific, and policy arguments familiar to one area of the law are found in many of the others and similar regulatory approaches have been adopted or proposed for adoption to deal with very different types of environmental hazards. This course will focus its attention on the clean air and water acts, the national environmental policy act, the resource conservation and recovery act, the comprehensive environmental response, compensation, and liability act, and wetland protection, with passing coverage of various federal public land management statutes. We will explore the basic regulatory and non-regulatory approaches currently in place, including market-based systems to achieve better environmental quality, as well as proposals for changes to those approaches. A significant portion of the course will also be devoted to exploring issues presented by government and citizen suit enforcement of environmental laws. While administrative law is obviously relevant to much of environmental law given the fact that it is agencies which make and administer the law involved, the course will offer students an overview of administrative law principles which will be sufficient background for the purposes of this course.

LAW 2365 - INTRODUCTION TO RUSSIAN AND UZBEK LEGAL SYSTEMS

Minimum Credits: 2
Maximum Credits: 2
This course is designed to introduce students to the legal systems of the Russian federation and Uzbekistan. The foundation of the legal systems of these countries is almost identical, and by comparing one country's system to another, students will become more familiar with civil law systems. Special attention will be given to constitutions, court systems, the role of judges, state prosecutors, courtroom advocates and lawyers, as well as to the important commercial laws and treaties. I will use examples from my professional experience to give my students a realistic view of the legal systems of these countries. The class is intended to enhance student awareness of the legal environment and issues that often result from a decision to engage in relations or do business across national boundaries. Students must be prepared to actively discuss the assigned reading or other material in class each week.

Minimum Credits: 1

Maximum Credits: 1

Federal antitrust law - arising from statutes, a large body of case law, and agency statements, policies, and rulings - is applicable to a variety of situations in the health care field. Antitrust violations can give rise to civil and criminal penalties. This course will examine federal antitrust law - particularly the Sherman act 1 and 2 and clayton act 7, as well as the department of justice and federal trade commission statements of antitrust enforcement policy in health care and horizontal merger guidelines - and their applicability in health care contexts, including provider-controlled networks, large providers with market power, health plans, mergers/acquisitions, joint ventures, accreditation/credentialing, tying and exclusive contracting. The course provides an excellent overview of applicable antitrust principles, within and outside health care.

Minimum Credits: 2

Maximum Credits: 2

This course is a wide introduction to the law of the European union. The course will begin with an examination of the history and institutions of the European community, including the legislative process. Particular attention will be given to the European court and the course will examine the specific powers the court holds. Additional topics will include internal market policy, competition policy, external relations, environmental protection and equal rights.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Law (PLAW)

LAW 2395 - HEALTH LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This is a survey course of fundamental issues, covering a broad range of topics, in health law and policy intended both for students who merely wish to become acquainted with the field, and for those who plan on concentrating in the field. For those planning on concentrating, this course provides a foundation for in-depth courses such as health care business transactions, health care fraud and abuse, health care antitrust, and financing in the healthcare industry. For students not concentrating in health law, it provides an introduction to the multitude of issues with which lawyers working with clients in the health care industry need to be familiar. The course examines the role that law plays in achieving three societal goals: increasing access to health care, controlling health care costs, and assuring quality of health care. Specific topics are the structure of the health care system(including integrated health care delivery systems); regulating quality through licensing, staff privileges, and accreditation; labor and employment issues; the legal obligation to provide treatment, including Emtala); tax exemption and charitable purposes; health care reform; state and federal regulation of health insurance and managed care (including Erisa); federal initiatives to expand private insurance coverage(including HIPAA, cobra and ADA); Medicare/Medicaid eligibility, benefits, and reform efforts; health care fraud and abuse (false claims act, ant kickback statute, stark); and antitrust issues in the health care industry. This course does not examine issues of professional liability, and it does not cover ethical issues in health care (covered in, which is the subject of "bioethics and law").

LAW 2403 - ESTATE PLANNING

Minimum Credits: 3

Maximum Credits: 3

The knowledge gained from prerequisite courses in estates and trusts, federal income taxation and estate and gift tax strategies will be brought together and applied toward solving realistic estate planning problems. Classroom instruction will review the ways in which wealth is passed at or in contemplation of death and the personal, tax and estate issues involved. A series of practice problems will develop skills in drafting testamentary documents and presentation of estate plans. Estate administration issues will be introduced to reveal how the administration process may be affected by the foresight of the estate planner. In addition, ethical considerations which arise in an estate planning practice will be discussed.

LAW 2422 - ALTERNATIVE DISPUTE RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

Legal and other disputes are increasingly resolved by dispute resolution processes other than litigation. Given this trend, it is important for law students to be familiar with these alternative processes, such as arbitration and mediation, and the benefits and risks they present. At the same time, these alternative processes require creative and interdisciplinary problem-solving perspectives and skills.

This course begins with an overview of problem-solving approaches, and is followed by the study of arbitration, mediation, and hybrid processes. The course emphasizes interactive student discussion and activities, including role-plays, exercises, and presentations that simulate professional activities of lawyers, arbitrators, mediators, and clients. The classes build on each other, so that knowledge that we acquire in the earlier classes will be integrated into our materials, discussion, and activities in later classes.

LAW 2469 - FRENCH FOR LAWYERS 1

Minimum Credits: 2

Maximum Credits: 2

This is a course designed to develop the conversational, writing and reading skills in French to permit an American lawyer to communicate effectively with French-speaking clients, and to understand references to the French legal system and to the European union likely to arise in the course of an international law practice in the United States or an American law practice conducted in France. The course will differ from that of a typical college French class in that it will be oriented towards the law in the areas of vocabulary, composition topics, readings, dictations and in-class conversation.

LAW 2547 - INTERNATIONAL INTELLECTUAL PROPERTY LAW

Minimum Credits: 3

Maximum Credits: 3

International intellectual property law has expanded substantially over the past few decades, and today seeks broadly to regulate transnational flows of information and culture. This course analyzes the international IP regime, situating it within the dynamics of globalizing flows of information and cultural objects. It provides an overview of the law, theory, and politics of this area of law, and will use case studies to illuminate the interaction between the three. Subjects covered include copyright and related rights (moral rights, traditional cultural expression, performers rights); trademarks and geographical indications; Internet domain names; trade secrets and patents. Case studies may include considerations of access to medicines, moral rights in Europe, and "piracy" in China as well as copyright formalities and Berne retroactivity.

LAW 2648 - CIVIL RIGHTS LITIGATION SEM

Minimum Credits: 3
Maximum Credits: 3

This seminar will be a historical consideration of civil rights litigation in the United States. Our goal will be to understand the long history of segregation as it was created by legislatures and then supported by Courts, and how these precedents were reversed through litigation and other strategies. We will read classic cases on race, from the 19th and early 20th centuries, learning how the Supreme Court developed its segregation doctrines. We will simultaneously look at litigation strategies by abolitionists before the Civil War and civil rights activists in the late nineteenth century. We will then turn to the creation of the NAACP and see how it became the leading engine of civil rights litigation. This will lead to the long struggle for an end to segregation, culminating in *Brown v. Board of Education* (1954). Part of our focus will be on Thurgood Marshall as a lawyer. We will look at NAACP integration strategies along with more activist civil rights strategies by Martin Luther King and others. This part of the course will also look at federal actions on civil rights after the passage of the 1964 Civil Rights Act and other civil rights laws. Readings will include some cases -- often in full text -- the classic book *Simple Justice*, a biography of Marshall, and writings by King and others. Our consistent focus will be on (1) what this history teaches us about attorneys' litigation strategies and (2) what overarching limits there may be on attaining fundamental change through the litigation process.

LAW 2653 - INTERNATIONAL HUMAN RIGHTS

Minimum Credits: 3

Maximum Credits: 3

This course will examine the history of the development of international human rights laws, the concepts behind the current status of those laws, and the mechanics present for enforcing those laws in international, regional, and domestic legal systems. The course will include a discussion of the theories behind international human rights law, the different hierarchies of human rights and the differing approaches to applying those hierarchies, and the ability (or lack thereof) to enforce international human rights standards. Students are required to either have already taken international law or to take it in conjunction with international human rights law.

LAW 2694 - TRADEMARK LAW

Minimum Credits: 3

Maximum Credits: 3

Trademark law concerns common law and statutory bases for obtaining and enforcing legal protection for commercial symbols, including logos, slogans, and other potentially distinctive product and service identifiers. The trademark law course will describe the role that trademark law plays - together with other intellectual property law, other non-IP law, and other non-legal institutions - in positioning that commercial "speech" as part of commercial markets generally. For producers of goods and services, how does trademark law help them make money? For competitors, for purchasers of goods and services, and for citizens generally, how does trademark law preserve the power to access and use information about the commercial sphere - and to extend that information into other "free speech" contexts? And for law students, how do lawyers participate in doing both things, by representing and counseling clients? The course will cover the constitutional, statutory, and common law attributes of trademark law; the rights and remedies that trademark law provides for producers; the protection that trademark law provides for competitors and consumers; and the intersection of American trademark law with other forms of intellectual property protection, with the first amendment, and with international law. Students are expected to master the substantive law of trademark, but that mastery is only a preliminary step. The major goal of the course is to teach students how to use the law to advance their clients' interests in commercial symbols. The course does that by requiring students repeatedly to use their professional judgment in a counseling context.

LAW 2695 - TRADEMARK LAW PRACTICE

Minimum Credits: 2

Maximum Credits: 2

A course to delve into trademark and unfair competition practice before the USPTO, trademark trial and appeal board and in state and federal courts. The course will advance practice oriented trademark issues including: the identification, protection and enforcement of trademark rights; the relief that can be acquired through enforcement of those rights; the role of lawyer as counselor in adopting trademarks as part of the branding process; avoiding infringement of others' trademarks; and the assignment and licensing of trademarks. The course will probe these same concepts in other jurisdictions, as well.

LAW 2717 - TELECOMMUNICATIONS LAW

Minimum Credits: 2

Maximum Credits: 2

This course explores the regulation and evolution of electronic communications in the United States. We will survey the legal framework of telecommunications, broadband and the Internet at several significant points in its development. Following the respective regulatory paths of broadcast, wireline and wireless telephony, cable, and broadband, the analysis will include early Federal Communications Commission broadcast regulation; the Communications Act of 1934 and its progeny; the advent of long-distance and local market telephone competition; the evolution of multichannel video communications; and the changes wrought by the Telecommunications Act of 1996. Finally, we will examine technological convergence, the emergent dominance of broadband and wireless communications, and the impact of rapid technological changes. We will also look at telecommunications from a policy and practice-oriented perspective, keeping in mind that regulations and statutes have played as important (if not more so) a role as court decisions in the development of telecommunications law. Themes that will be addressed include: conflicts between federal and state/local jurisdiction; monopoly versus competitive market regulation and issues associated with transitioning from the former to the latter; universal service issues; and the impact of such concerns as intellectual property and free speech. No prior knowledge of the telecommunications industry (or associated law) is necessary. Exposure to administrative law or antitrust law might be beneficial.

LAW 2720 - LEGAL ANALYSIS AND WRITING

Minimum Credits: 0

Maximum Credits: 0

Students in this first year course will begin to develop the art of analytical legal writing. In classes, students engage in discussions and practical exercises as they learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. Exercises and other assignments promote the students' awareness and appreciation of relevant ethical standards.

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Law (PLAW)

LAW 2731 - CURRENT ISSUES IN HEALTH LAW

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to increase the awareness of students in the health law certificate program to the rapidly changing health care industry and the equally rapidly changing field of health law. It is difficult, if not impossible, to understand the law regulating the health care industry without understanding the industry itself. Another purpose of the course is to expose students to a more in-depth treatment of selected topics than they can obtain in the basic survey course in health law and policy. The course also exposes students to topics that are not covered in the basic course, providing a broader view of the field of health law, which helps in the selection of other course offerings and of a topic for the faculty supervised writing requirement. In addition, the course introduces students to the variety of settings in which lawyers are involved in health law and the range of kinds of clients they represent. Classes will be taught by leading experts in the fields of health management and health law practicing in Pittsburgh and elsewhere.

LAW 2811 - HEALTH CARE BUSINESS TRANSACTIONS

Minimum Credits: 3

Maximum Credits: 3

This course will expose students to a variety of commercial transactions prevalent in the health care industry. The course will focus initially on health care as a regulated commercial enterprise. After studying the case law, statutes and regulations applicable to health care providers, students will begin an in-depth study of negotiated health care transactions. This study will begin with an examination of the fundamental elements of the acquisition process and an analysis of the tax, antitrust, regulatory and successor liability considerations generally addressed in health care combinations. Students will then be exposed to the various stages of the negotiated acquisition process: due diligence; preliminary negotiations and agreements; transaction structure; final negotiations; definitive agreements; and post-closing relationships. We will also explore the financing mechanisms required to support healthcare entities. The course will examine sources of funding, enterprise valuation, healthcare cost controls, capital structure, traditional debt financing, tax exempt bond financing, securities filings, and insolvency. By the end of the course, the students will have acquired an understanding of the complexities of health care financing and will be familiar with the health care acquisition process from its inception to conclusion.

LAW 2836 - CURRENT ISSUES IN LAW AND PUBLIC POLICY SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This seminar course will teach law students how to identify, research, evaluate, explain and advocate public policy options in the context of current issues raising questions of local, state and federal law. The actual issues providing the backdrop for the course in any particular semester will necessarily vary (in fall 2009, for example, the seminar explored law-related policy issues relating to the proposed Pittsburgh city-county consolidation, "distracted driving" legislation, and health care reform). The focus of the seminar is more process- than topic-based, however, with the issues simply providing the menu of "problems" to be assessed. In any given policy setting, students will learn how to identify relevant legal issues, how to research them as they develop in real time, how to formulate specific recommendations and how to explain and/or advocate policy positions orally and in writing. The course should be especially useful for law students contemplating careers in government or other public service, public interest law and journalism, or who might

expect, as traditional lawyers, to represent clients in these areas. This course satisfies the upper-level writing requirement.

LAW 2858 - INTERNATIONAL SALES SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The seminar will consider the international law applicable to cross-border sales transactions involving a U.S. Party. We will focus primarily on the united nations convention on contracts for the international sale of goods ("CISG"), supplemented by study of the principles of international commercial contracts of the international institute for the unification of private law (UNIDROIT). The course emphasizes approaching these texts from an international perspective and employing new research resources that have developed in the area of international commercial law. No background beyond familiarity with general contract law is required, although the course on commercial transactions in goods and/or the course on international business transactions would be useful preparation. In the first part of the course we will explore the substantive provisions of the CISG and UNIDROIT principles, including discussion of applicability, contract formation, obligations of quality, avoidance of contract, risk of loss; exemption for failure to perform; and remedies for breach. The remainder of the course will be devoted to presentations by students on their paper topics.

LAW 2984 - TRADE SECRET LAW

Minimum Credits: 2

Maximum Credits: 2

This course will cover various aspects of trade secret law with an emphasis on practical considerations relevant to the business environment. Students will examine public policy considerations of trade secret law, compare the uniform trade secrets act (UTSA) to the restatement approach and to the Pennsylvania UTSA, and compare trade secret protection with other forms of intellectual property. We will review the elements of a trade secret and compare the types of information and the circumstances under which courts have recognized or denied trade secret protection. The rights of a trade secret owner relative to its employees and third parties will be examined in detail, including use of confidentiality agreements and non-competition agreements. Enforcement of trade secret rights will be surveyed and include civil and criminal proceedings including the economic espionage act (EEA). Practical issues from the business world are strongly emphasized in this course including drafting and negotiating confidentiality agreements, establishment of business policies and procedures for trade secret protection, practical considerations surrounding the bringing and settling of trade secret cases, and drafting and enforcing non-competition agreements.

LSAP 3000 - ADVANCED APPLIED STATISTICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on approaches to the analysis of qualitative data. It is designed for students who have some experience with qualitative field research methods (introductory coursework or project experience) and have a set of qualitative data they are interested in analyzing for their own research. The principal aims of the course are to: (1) enable you to make informed and well-documented choices regarding the analysis of qualitative data that is to "establish a transparent path of inference" in your analysis and writing; and (2) explore a range of analysis strategies, techniques and tools. The course has two primary strands. The reading strand will introduce readings about qualitative analysis that delve into methodological issues, technical aspects of various approaches to qualitative analysis, validity and reliability, and issues related to writing and presentation of qualitative research. We will also examine examples of published qualitative analysis for their methodological and presentation choices. The second strand will be a practicum segment included in each course session that will provide time for consultation on your own work in small groups.

LSAP 3095 - ORGANIZATIONAL PERSPECTIVES ON EDUCATIONAL IMPROVEMENT

Minimum Credits: 3

Maximum Credits: 3

One way to see the act of education is that it is essentially about what occurs between teachers and learner. In other words the key unit of analysis is the classroom or activity structure. The classroom is important, but teaching and learning are also shaped by their context. Individuals are situated in organizations, which are situated in broader social, cultural, and political environments.

Consequently, reform and improvement efforts must not only take seriously individual factors, they must understand the ways in which individual action is enabled and constrained by organizational and environmental contexts. This seminar will focus on schools as organizations drawing on theoretical and empirical work grounded in organizational theory. We will interrogate the institutional, organizational, and day-to-day contexts of work in schools. We also explore how reform efforts targeting organizational features can intervene and perhaps, improve teaching and learning. In order to grapple with the concepts from the literature, students will analyze several cases or organizational improvement efforts and conduct a small study examining an improvement effort in a local educational organization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LSAP 3096 - CURRICULUM ISSUES IN MATHEMATICS AND SCIENCE EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course examines ideas that lie at the intersection of research in mathematics and science education, curriculum research, and

education policy. Specifically, the course will focus on research that is or will become relevant for the new policy climate created by the common core state standards (CCSS) and the next generation science standards (NGSS). We will begin by examining the CCSS and NGSS, analyzing their similarities and differences from past standards, and chronicling the assessment and curricular activities that have followed in their wake. We will then identify ways in which research conducted during past standards-based eras (e.g., the first and second cycles of NCTM standards; state standards in the NCLB era) can inform the direction of state and district policies surrounding curriculum and assessments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LSAP 3097 - SUPERVISED RESEARCH

Minimum Credits: 1

Maximum Credits: 6

Student demonstrates ability to apply research skills by planning and completing a research project under the direction of an appropriate faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

LSAP 3098 - DIRECTED STUDIES - LSAP

Minimum Credits: 1

Maximum Credits: 6

Student pursues study of various topics under direction of faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

LSAP 3099 - DOCTORAL DISSERTATION RESEARCH IN LSAP

Minimum Credits: 1

Maximum Credits: 18

Student plans and completes a doctoral dissertation under the guidance of the dissertation advisor.

Academic Career: Graduate

Course Component: Full Time Dissertation

Grade Component: Grad SN Basis

LSAP 3540 - DESIGN OF EDUCATIONAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

To develop successful educational innovations, a systems view must be taken, analyzing instructional goals, constraints and resources, considering alternative approaches to conveying ideas, motivating students, and guiding students to instructional objectives. Students will work in teams to enact an innovative educational design process with real projects and real clients. In the past, educational systems being (re)designed included museum exhibits, high school robotics units, afterschool digital literacy workshops, college lab courses, processes for selecting student assessments tools, and a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LSAP 3595 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Students will address selected topics for study.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Library Science

LIS 2000 - UNDERSTANDING INFORMATION

Minimum Credits: 3

Maximum Credits: 3

Introduction to major ideas and concerns of the information professions and examination of formal communication of relevant ideas, information, and knowledge. Exploration of nature and role of organizations in which archivists, librarians, and other information professionals work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2005 - KNOWLEDGE ORGANIZATION

Minimum Credits: 3

Maximum Credits: 3

Introduces key concepts in information organization and information retrieval, including: terminology and models of organizing information; classification schemes (e.g. Dewey decimal); aspects and examples of controlled vocabularies, thesauri, taxonomies, and ontologies; standards for data content (e.g., Aacr2, rda), data structure (e.g., Marc21, ead), and data value (e.g., Lcsh, sears, tgm); the nature of user information needs and implications for information organization and information retrieval; identifying appropriate resources from the range of types and formats; formulating retrieval strategies; and identifying information appropriate to the user. Required for all MLIS students except those admitted to the archives and information science specialization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; SBPLAN: Archives and Information Sci (MLISAIS-SP/MLIAIS-SP)

LIS 2110 - RESEARCH METHODS IN LIBRARY AND INFORMATION SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to quantitative and qualitative methodologies and techniques used to conduct scholarly inquiry and service evaluation in library and information science. The design, planning and execution of research studies, from conceptualization and proposal writing to reporting and dissemination of the findings. Topics covered include research problems and questions; critical appraisal of research literature; data sources and sampling; research ethics and integrity; and data collection, analysis and interpretation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2120 - INFORMETRICS

Minimum Credits: 3

Maximum Credits: 3

The course is an introduction to the study of quantitative aspects of information, including the production, dissemination, and use of all forms of information, and encompassing the following fields: bibliometric, which studies quantitative aspects of recorded information; altmetrics, which is concerned with non-traditional metrics that have been proposed as alternatives to more traditional citation impact metrics; scientometrics, which studies quantitative aspects of science; and webometrics, which studies quantitative aspects of the world wide web.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2184 - INTELLECTUAL PROPERTY AND "OPEN" MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

Concepts, legislation, and case law about censorship, freedom of access to information, privacy, copyright, professional liability, and other issues. Legal implications and safeguards. Origins, development, evolution, and pivotal role of copyright, fair use, and related issues within 21st century information, legal, policy, and economic framework. Key and emerging issues such as public domain, orphan works, section 108 exceptions for libraries and archives, licensing, recent statutory legislation and case law, and international copyright. Alternative protection schema, such as open access and creative commons.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2194 - INFORMATION ETHICS

Minimum Credits: 3

Maximum Credits: 3

Digital-age intersection of information and ethics with emphasis on key areas of intellectual property, privacy, confidentiality, authenticity, plagiarism, diversity/inclusion and special populations, accessibility, intellectual freedom, censorship, social networking, cyberbullying, security, preservation, transparency, accountability, policy making, and professionalism. Ethical theories and application of ethical decision-making models to real-world library and information center scenarios. Analysis of codes of ethics. Issues and resources related to creation, implementation, enforcement, and assessment of institutional ethical codes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2214 - LIBRARY AND ARCHIVAL PRESERVATION

Minimum Credits: 3

Maximum Credits: 3

Introduces the preservation and conservation of library and archival collections. Basic foundation in theoretical, managerial, analytical, and practical applications of preservation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2215 - PRESERVATION MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Methods of integrating and implementing preservation activities and programs in library and archival settings, based on a knowledge of preservation history, operations, and current issues. Understanding the complexities of practical applications; combining management ideals with less-than-ideal institutional environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: SBPLAN: Archives and Information Sci (MLISAIS-SP/MLIAIS-SP)

LIS 2220 - ARCHIVES AND RECORDS MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Introduction to the essentials of records management in diverse organizational settings and in society. Organizational theory and how this relates to the history and development of record-keeping systems, electronic-records management and the advent of new technologies, and the place of records management in the information professions. Theoretical principles, methodologies, and practical administration of archives, records, and other information sources from print to oral contributing to the management of evidence and information necessary for organizations and society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2222 - ARCHIVAL APPRAISAL

Minimum Credits: 3

Maximum Credits: 3

Advanced analysis of the basic theories, principles, techniques, and methods that archivists and records managers use for identifying and selecting (appraising) records with continuing or enduring value to records creators, researchers, and society. Comparison and contrast to related activities in other fields, such as library collection management and development, museum artifact selection, and the analysis of documentary evidence by historians and other researchers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2220; SBPLAN: Archives and Information Sci (MLISAIS-SP/MLIAIS-SP)

LIS 2223 - ARCHIVAL ADVOCACY AND ETHICS

Minimum Credits: 3

Maximum Credits: 3

Orientation to the ways in which archivists and other records professionals advocate for access to their holdings, their programs and societal mission, and the ethical and other challenges they face in carrying out such functions. Provides historical, theoretical and

practical orientation to advocacy, and ethical matters.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2220; SBPLAN: Archives and Information Sci (MLISAIS-SP/MLIAIS-SP)

LIS 2224 - ACCESS, SYSTEMS AND TOOLS FOR ARCHIVAL COLLECTIONS

Minimum Credits: 3

Maximum Credits: 3

Introduction to the theoretical foundations, history, principles, and research surrounding the access to and representation of archival materials. Examination and analysis of issues of effectiveness, economics, and audience surrounding different types of surrogates for archival collections including guides, calendars, finding aids, (in paper form and on-line), bibliographic records themselves, issues of context, appropriate levels of control, selection, and interpretation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information

LIS 2225 - MUSEUM ARCHIVES

Minimum Credits: 3

Maximum Credits: 3

Overview of the evolution of the purposes of museums; history and development of museum record keeping systems, with particular emphasis on changes in those systems in transition from paper-based to electronic records. Use of functional analysis to identify principle functions of museums and to guide the appraisal of records that document those functions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2226 - MOVING IMAGE ARCHIVES

Minimum Credits: 3

Maximum Credits: 3

This course will introduce you to the various contexts moving image media occupies in collecting institutions as well as the basic procedures to preserve these works. Motion picture film will be of primary focus, but other moving image media types will also be explored. Throughout the semester archival functions will be approached using cross-disciplinary frameworks as a way to interrogate the histories, technologies, preservation processes and accessibility of moving image media.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2220; PROGRAM: School of Information Sciences or Sch Computing and Information

LIS 2227 - PHOTOGRAPHIC ARCHIVES

Minimum Credits: 3

Maximum Credits: 3

Explore issues surrounding all aspects of managing photographic collections including storage, access, preservation, reference, cataloging, processing, and, digitization. Students completing this course will be able to: evaluate, identify, and inspect photographic collections for their preservation needs including determining and carrying out treatment and storage options. Develop processing plans for photographic collections. Create policies and guidelines for reference and access to photographic collections with attention paid to copyright issues. Use photographic collections as primary documents in reference situations. Be familiar with issues surrounding copyright and digitization of photographic collections.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROGRAM: School of Information Sciences or Sch Computing and Information

LIS 2228 - INTERNATIONAL PERSPECTIVES ON ARCHIVES

Minimum Credits: 3

Maximum Credits: 3

Archival issues analyzed from an international perspective: archival history in the 20th century, archival standards and practices, and relation between archives, collective memory and accountability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2220; PROGRAM: School of Information Sciences or Sch Computing and Information

LIS 2230 - RECORDS AND INFORMATION MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Contemporary approaches to records and information management (rim). Concepts, tools and best practices that help information professionals create useful and sustainable recordkeeping systems. Physical and digital recordkeeping. Metadata classifications and filing systems. Records retention. Role of standards, policy, law, ethics and tradition.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2220; PROG: School of Information Science or Sch Computing and Information

LIS 2280 - HISTORY OF BOOKS, PRINTING, PUBLISHING

Minimum Credits: 3

Maximum Credits: 3

The development of the book in its many forms in relation to contemporary society, education, and culture. Manuscript origins, the nature and development of the printing process, the reading public, the book trade, binding, and book illustration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2322 - RESOURCES FOR CHILDREN

Minimum Credits: 3

Maximum Credits: 3

Survey of literature, film, video, and other formats for children from infancy to adolescence with an emphasis on contemporary sources. Critical evaluation of materials for use in a multicultural society and strategies to encourage the use of those materials by children and those who work with children.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information

LIS 2323 - RESOURCES FOR YOUNG ADULTS

Minimum Credits: 3

Maximum Credits: 3

Survey of literature, periodicals, video, and other formats of interest to and importance for young adults with an emphasis on contemporary sources. Critical evaluation of materials for use in a multicultural society and strategies to encourage the use of those materials by young adults and those who work with young adults.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2324 - HISTORY OF CHILDREN'S LITERATURE

Minimum Credits: 3

Maximum Credits: 3

Introduction to literature for children from the Anglo-Saxon period in England through the 19th century in England and America. Emphasis on social and cultural history as reflected by literature for young people.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2325 - CURRICULUM RESOURCE AND SERVICE/SCHOOL LIBRARY

Minimum Credits: 3

Maximum Credits: 3

Integration of library media center collections and services into the curriculum. The teaching roles of the school library media specialist.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2326 - STORYTELLING

Minimum Credits: 3

Maximum Credits: 3

The historical role of the storyteller as preserver of culture and the contemporary role as performer in the context of traditional and contemporary sources of stories and techniques of presentation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2327 - MULTICULTURAL RESOURCES AND SERVICES IN SCHOOL AND LIBRARY MEDIA CENTERS

Minimum Credits: 3

Maximum Credits: 3

Survey of multicultural resources in a variety of formats; utilization of multicultural resources with students and teachers in k-12 schools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information

LIS 2328 - INFORMATION LITERACY RESOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

Overview of information seeking behaviors of students and teachers in the k-12 school library environment; services and resources that directly support information literacy skills instruction; policies that guide the use of information by students and teachers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2332 - RESOURCES AND SERVICES FOR ADULTS

Minimum Credits: 3

Maximum Credits: 3

Survey of materials in a variety of formats of interest to and importance for adults, with an emphasis on popular resources, utilization of resources and program development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2334 - INFORMATION RESOURCES, SERVICES & TECHNOLOGY IN AN AGING WORLD

Minimum Credits: 3

Maximum Credits: 3

This course will focus on collection development, reference, and education services for older adults, and their professional and family caregivers. The course will cover the critical evaluation of materials in print, non-print, and electronic formats, and a discussion of information services provided by healthcare organizations, community agencies, medical center and hospital libraries, public libraries which serve an aging population, and academic libraries serving students in the helping professions. This course is especially appropriate for those interested in working in medical and public libraries, healthcare organizations, community agencies, and academic libraries with students and faculty interested in the helping or service professions, especially in fields that focus on older people.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROGRAM: School of Information Sciences or Sch Computing and Information

LIS 2335 - LIBRARY SERVICES FOR EARLY CHILDHOOD

Minimum Credits: 3

Maximum Credits: 3

Knowledge and skills needed to provide developmentally appropriate services for children, ages 0 to 5 years, and their families and caregivers. Design, implementation, and evaluation of library programming for young children. Role of family and caregivers in language and literacy development. Current trends, issues, and problems in the area of library services for young children.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2405 - CATALOGING AND CLASSIFICATION

Minimum Credits: 3

Maximum Credits: 3

Theory, principles, and standards of descriptive and subject cataloging as currently practiced and conceptualized; emphasis on the changing information landscape. Focuses on analyzing systems and practices that respond to user needs, practically and ethically. Provides beginning level experience with bibliographic utilities, description, metadata and encoding schemes, choice of entry, construction of headings, authority control, Dewey and library of congress classification schemes, and library of congress subject headings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2005 or (2001 and 2002); PROG: School of Information Science or Sch Computing and Information

LIS 2407 - METADATA

Minimum Credits: 3

Maximum Credits: 3

Principles and application of metadata for networked information resource organization, representation, retrieval, and interoperability using a variety of schemes and tools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2500 - REFERENCE SOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

Survey and application of tools (paper and electronic) needed to respond to questions in the changing reference environment. Discussion of philosophies and theories underlying the practice of general reference. Introduction to subject reference tools and services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2005 or (2001 and 2002); PROG: School of Information Science or Sch Computing and Information

LIS 2520 - COLLECTION DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2537 - GOVERNMENT INFORMATION RESOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

The American political environment and its impact on the availability and control of information emanating from the federal government. Consideration and analysis of federal government materials in many formats.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2005; PROG: School of Information Science or Sch Computing and Information

LIS 2581 - COLLECTIONS AND RESOURCES IN HEALTHCARE ENVIRONMENTS

Minimum Credits: 4

Maximum Credits: 4

Selection, collection and access to print and electronic library and information resources and services in the healthcare environment. Budgets and justification of selections, vendor relations, licensing, and scholarly holdings' management. Examination of technologies used in health sciences library settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: SBPLAN: LIS Health Certificate (Library & Information Science-AC)

LIS 2585 - HEALTH CONSUMER RESOURCES AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

Collection development, reference, and educational services in the domain of consumer health resources in print, non-print, and electronic formats. Identification of appropriate and accurate resources for consumer health and family education; policy issues in providing consumer and family health information in different settings; role of public media; and information and referral services to and from healthcare organizations, community agencies, and public libraries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2586 - HEALTH SCIENCES RESOURCE AND SERVICES

Minimum Credits: 3

Maximum Credits: 3

Survey and evaluation of current sources, services, and trends related to information transfer in the health sciences, including medicine, nursing, pharmacy, dentistry, allied health, and veterinary science. Materials and services appropriate to hospital, academic, and special libraries and information centers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2587 - APPLICATIONS IN MEDICAL INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

Survey of concepts and activities in medical informatics, including an introduction to the applications of information technology in knowledge-based information and library informatics; integrated hospital information systems and patient-specific information; nursing, radiology, pathology and pharmacy services; clinical decision support; telehealth; and medical education. Concepts related to information in healthcare financing; legal ethical and philosophical issues in medical informatics; consumer informatics. Intended for masters-level graduate students in the helping and service professions without clinical experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2600 - INTRODUCTION TO INFORMATION TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

Introduction to computing and networking, with an emphasis on how computing and networking technologies are used to create, manipulate, and disseminate information related to library and archival services. Focus on a series of underlying themes, including standardization, interoperability, and hypertext presentation, with an emphasis on core technologies of digital libraries; namely, databases and digital documents. Web design, layout, and publishing incorporate a set of competencies essential for librarians and information professionals. "Hands-on" experiences with relevant technologies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2610 - LIBRARY AND ARCHIVAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

Development and roles of computational systems that form the basis of computing for libraries and archives, with particular emphasis on the role that digital libraries and repositories play in support of contemporary scholarship. 'Hands-on' experiences with key applications and systems that have been developed, mainly in the open-source environment 'lamp' architecture--for use in digital libraries and related settings, with an emphasis on collection building.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information

LIS 2630 - HUMAN INFORMATION INTERACTION

Minimum Credits: 3

Maximum Credits: 3

Theory, principles, techniques, and tools for design of information systems and services, with emphasis on understanding user-centered design. Analysis of design elements of information infrastructure to respond to user needs. Models for user-centered design. Approaches to design of specific information systems and services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2633 - TECHNOLOGY IN THE LIVES OF CHILDREN AND YOUTH

Minimum Credits: 3

Maximum Credits: 3

Effects of media on young people, ages birth to 18 years; technology in everyday life--from toys to television; gaming and libraries; filtering; privacy and child safety; social networking/cyber-bullying; information/media literacy instruction in children's libraries (public); digital libraries for children; evaluation of digital resources for children; children's information behavior; interaction/interface design for young people; digital divide and social equity issues; global perspectives--technology in young people's lives around the world; future trends.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2635 - INFORMATION ARCHITECTURE

Minimum Credits: 3

Maximum Credits: 3

Practical and theoretical issues associated with information architecture in organizations. User and organizational information needs and uses provide the basis for the conceptual design of web-based information systems and methods for analysis of stakeholder needs. Designed for students wishing to enhance knowledge and skills related to web development, networks, and related concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2670 - DIGITAL LIBRARIES IN THEIR COMMUNITIES

Minimum Credits: 3

Maximum Credits: 3

This course gives participants a comprehensive, multilayered yet integrated framework for understanding and contributing to digital libraries'from their collections to their emergent online communities; from their technological to their social and economic aspects; and from their origins within libraries, archives, museums, and other information service settings to their prospects on the social web. Students will analyze and evaluate a working digital library, and also develop a community-centered strategy for building or enhancing an open access repository. The course covers technological issues, but is non-technical in nature, with a focus on community engagement and the social roles of digital libraries. It will equip practitioners to design and implement digital library initiatives in their own organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2671 - DIGITAL HUMANITIES

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Sciences or Sch Computing and Information

LIS 2672 - TECHNOLOGIES AND SERVICES FOR DIGITAL DATA

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to prepare students to work creatively and productively in digital environment. With the focus on the technologies and services around digital data in web information context, this course includes the development of theoretical knowledge and a practical understanding of digital data. Taking a social-technical perspective, this course will help students to develop a broad understanding of digital data rather than solely view digital data as technical achievements. The course consists of three broad modules: overview of digital data, technologies supporting the life cycle of digital data, and services built around digital data in current networked participatory daily and professional environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2674 - PRESERVING DIGITAL CULTURE

Minimum Credits: 3

Maximum Credits: 3

Explores the history of digital media. Provides a theoretical framework for understanding the preservation of digital culture, including both digitized and born-digital materials. Introduces students to the latest research on the preservation problems surrounding digital culture. Tackles the ongoing debates focused on the related but distinct concepts of preservation, curation, maintenance, and stewardship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2676 - RESEARCH DATA MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This topical course is designed to introduce students to the conceptual and practical challenges of research data management and takes a highly innovative approach by "immersing" the participants in disciplinary research settings in subject domains beyond LIS, as part of the learning process. The seminar will explore disciplinary data diversity, but will also examine how universities and other organizations are developing policy, roadmaps, plans and tools to facilitate good research data management practice. The seminar will investigate roles, responsibilities, and relationships of key stakeholders engaging with legal and ethical data issues, advocacy and training methods, and the costs of providing such research data management services in institutions. A pragmatic approach will be supported by reference to case studies and exemplars, which show how researchers, librarians, technologists, administrators, and others are responding positively to the data challenge.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LIS 2677 - RESEARCH DATA INFRASTRUCTURE

Minimum Credits: 3

Maximum Credits: 3

This course will build on LIS 2676 Research Data Management course, and will focus on the elements of research data infrastructure which facilitate and enable effective data management. The course will examine approaches to data storage, data repositories and preservation practice, selected standards, schema, protocols and formats for describing datasets, data registries and catalogs enabling data discovery and the data publication process. We will explore developments in data citation and metrics to track data provenance and attribution. In each of the listed areas, there will be case studies and exemplars to illustrate the challenges and experiences of pilot implementations and fully operational services. Finally we will also consider public engagement with data, including the landscape of citizen science initiatives and the emergence of data science concepts and practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LIS 2678 - DATA SCIENCE FOR LIBRARY AND INFORMATION PROFESSIONALS

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to data science for library and information professionals so they can participate in the emerging ecosystem around data science. This course will survey the landscape of data science and explore the role library and information professionals play in the evolving ecosystem of academic and industrial data science. In the course, students will learn the concepts, practices, and technologies of data science, both within academia and industry. It will provide students with hand-on experiences as well as critically exploring how librarians and information professionals can work and provide value in data-adjacent roles. Topics include data collection, cleaning, analysis, and visualization. There are no technical requirements for this course, but students should be prepared learn about and use various technical tools and ideas related to data science.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2680 - DATABASE DESIGN AND APPLICATIONS

Minimum Credits: 3

Maximum Credits: 3

Characteristics and concepts of database systems; database development process, including entity-relationship model, relational database models, normalization, structured query language (SQL), basics of transaction management and physical database design; current database technologies; and database applications in libraries and archives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2690 - INFORMATION VISUALIZATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the visual design, structure, and organization of information as applied to library and information environments and web site design. Topics include visualization literacy, usability research, theories of visual perception and cognition, visualization models, visual analytics, and data graphics. The emphasis is on user and task-centered design for developing and evaluating visualization-based tools for various types of data. Practical work with visualization technologies will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2600 or LIS 2610; PROG: School of Information Science or Sch Computing and Information

LIS 2695 - GEOGRAPHIC INFORMATION SYSTEMS FOR LIBRARIANS

Minimum Credits: 3

Maximum Credits: 3

Concepts, techniques and technology of GIS: geospatial data sources, metadata, and databases; techniques for creating maps; using GIS applications and software.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LIS 2600 or 2610; PROG: School of Information Sciences or Sch Computing and Information

LIS 2700 - MANAGING AND LEADING INFORMATION SERVICES

Minimum Credits: 3

Maximum Credits: 3

Managing and leading libraries and information services, one of the required core courses for the MLIS degree, focuses on key management theories and practice-based competencies in preparing students to be successful, service-oriented managers and leaders at all levels of diverse organizations. Students in this diversity and inclusion infused course will develop understanding of important skill sets and management and leadership domain areas, such as communication; strategic planning; core values and organizational culture; leading productive meetings; managing people, money, facilities, conflict, and change; legal and ethical issues; collaboration and partnerships; marketing and public relations; and professional development. Guest speakers representing different types of libraries, as well as other institutional settings, will provide students with exposure to varied management and leadership styles and perspectives. Individual and group assignments, course content and case studies from non-profit and for-profit sectors, readings, podcasts, and in-class and online discussions will examine emerging trends, challenges, and opportunities for 21st century information center managers and leaders.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or ; EXCLUDING SBPLAN: Archives and Information Sci (MLISAIS-SP); School Library Cert Program (MLISLCP-TR); MLIS Fast Track School Lib Cer (MLISFTL-TR)

LIS 2771 - ACADEMIC LIBRARIES

Minimum Credits: 3

Maximum Credits: 3

The environment of academic libraries has changed radically since the 1990s with rapid advances in technology, developments in higher education and innovations in scholarly communication. The fundamental purpose of academic libraries has not changed, but traditional jobs have given way to self-service and professional roles have evolved into complex specialties. This course explores the challenges and problems facing academic libraries today, examining their resources, services, facilities and staffing, with reference to historical contexts and future directions. It will cover traditional and emerging practices in areas such as academic liaison, information literacy, research support, scholarly publishing, library assessment and career management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2773 - FOUNDATIONS OF KNOWLEDGE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course explores corporate culture, with a focus on how organizations in the private sector create and use information, seek and store information, and utilize information systems and technologies to carry out their activities. Topics to be addressed include infrastructure, expertise, compliance, planning, staffing, managing, budgeting, assessment, personnel concerns, marketing, technology, capitalism, bureaucracy, and group dynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2774 - SCHOOL LIBRARY MEDIA CENTER MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Planning, organizing, staffing, budgeting, implementing, and evaluating library media programs in elementary and secondary schools. The functions and roles of library media specialists in instruction and library media centers as information centers in schools.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LIS 2775 - SCHOOL DISTRICT LIBRARY MEDIA CENTER PROGRAM MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Planning, organizing, staffing, budgeting, implementing, and evaluating library media programs at the district level. Functions and roles of library media coordinator/supervisor as a manager and advocate for the district program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2781 - LIBRARIES IN HEALTHCARE ENVIRONMENTS

Minimum Credits: 4

Maximum Credits: 4

Examination of the healthcare environment and professional roles. Consideration of internal and external factors: finances, regulations and legislation. Exploration of various healthcare settings, research and grants, evidence-based practice, patient-centered focus, and information technologies used by healthcare professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: SBPLAN: LIS Health Certificate (Library & Information Science - AC)

LIS 2800 - ORGANIZATIONAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

Communication and personality theories and how these relate to interaction with staff, users and administrators in organizational settings. Interpersonal communications techniques, use of Myers Briggs type indicator and group dynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2830 - ADVOCACY AND MARKETING FOR LIBRARIES

Minimum Credits: 3

Maximum Credits: 3

This course explores marketing and advocacy in libraries today, within a physical space and online. Starting with the overall concepts of marketing, public relations and advocacy, the course provides a view of how these all work together as a continuum, as well as the details of marketing tools and elements of good design. The advocacy section of the course continues to build this toolkit, focusing on building relationships and telling the library's story, which is useful for any professional regardless of position or library.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2850 - INFORMATION PROFESSIONALS ROLE IN TEACHING AND LEARNING

Minimum Credits: 3

Maximum Credits: 3

This course prepares participants for formal and informal educational roles as teachers, trainers, and facilitators of learning for all age groups found in school, public and academic libraries, as well as those found in archives, museums, and other information service organizations. Topics covered include: teaching and training fundamentals; information literacies; learning styles; instructional strategies; managing large and small instruction programs; and delivering online instruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2880 - COMMUNITY KNOWLEDGE PRACTICES

Minimum Credits: 3

Maximum Credits: 3

Focuses on information needs and challenges in the nonprofit sector. Explores how nonprofits use information systems and services. Students will learn how to support nonprofits in a variety of activities, including entity registration, fundraising, technology acquisition and adoption, knowledge management, marketing, messaging, and reporting. Designed for students interested in working as information professionals in NGOs, community organizations, foundations, social service agencies, and government.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LIS 2881 - REFERENCE SERVICES AND INSTRUCTION IN HEALTHCARE ENVIRONMENTS

Minimum Credits: 4

Maximum Credits: 4

Examination of reference services with special focus on evidence-based medicine, systematic reviews and meta analyses, instructional and consulting services, imbedded, clinical and liaison services. Library services to special populations in the healthcare environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: SBPLAN: LIS Health Certificate (Library & Information Science-AC)

LIS 2901 - INDIVIDUAL RESEARCH 1

Minimum Credits: 1

Maximum Credits: 3

Research on a topic selected by the student and carried out with scheduled reports to a faculty member. Reports of the research may take various forms as determined in advance by the student and faculty member. Faculty member's agreement to sponsor required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2902 - INDIVIDUAL RESEARCH 2

Minimum Credits: 1

Maximum Credits: 3

Research on a topic selected by the student and carried out with scheduled reports to a faculty member. Reports of the research may take various forms as determined in advance by the student and faculty member. Faculty member's agreement to sponsor required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2910 - CERTIFICATE OF ADVANCED STUDY INDIVIDUAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

Research on a topic in the health sciences selected by the student and advisor and carried out with scheduled reports to the advisor.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Library & Information Science (LIS-AC)

LIS 2921 - FIELD EXPERIENCE

Minimum Credits: 3

Maximum Credits: 3

Supervised work in a library, archive or other information service environment that provides a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in other courses. Agreement of faculty sponsor and field work supervisor required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2922 - PRACTICUM IN SCHOOL LIBRARY MEDIA PROGRAMS

Minimum Credits: 3

Maximum Credits: 6

Experience in a school library, under the supervision of a cooperating teacher librarian working collaboratively with teachers, teaching information literacy skills, providing services to students and teachers, and managing resources. Weekly seminars, individual coaching sessions, and other online written requirements focus on identifying best practices and using case studies to problem solve.

Professional assessment; completion of SLCP portfolio of demonstrated competencies and electronic professional portfolio.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: SBPLAN: School Library Cert Program (Library & Information Science-MLIS) or LIS SLCP Certificate (Library & Information Science-AC) or MLIS Fast Track School Lib Cer (Library & Information Science-MLIS) or Special LIS (Not Candidate for Degree-ND)

LIS 2923 - PRACTICUM SCHOOL DISTRICT LIBRARY MEDIA PROGRAMS

Minimum Credits: 6

Maximum Credits: 6

Coordinated experience in various aspects of managing district- or regional-level school library programs, including professional development for district school librarians, collections and resources management, professional libraries, central-processing centers, and personnel.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: SBPLAN: LIS SLCP Certificate (Library & Information Science-AC) or Special LIS (Not Candidate for Degree-ND)

LIS 2924 - FIELD EXPERIENCE IN ARCHIVES AND INFORMATION SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Supervised work in an archive, or other information-service environment that provides a frame of reference for understanding and an opportunity to apply the skills, methodologies, and theories presented in other courses. Agreement of faculty sponsor and field work supervisor required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: SBPLAN: Archives and Information Sci (MLISAIS-SP)

LIS 2963 - UPDATE FOR SCHOOL LIBRARY MEDIA SPECIALISTS

Minimum Credits: 3

Maximum Credits: 3

Update of knowledge and skills needed by school library media specialists. Various topics. S/n grade only.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

Course Requirements: SBPLAN: School Library Cert Program (Library & Information Science-MLIS) or LIS SLCP Certificate (Library & Information Science-AC) or MLIS Fast Track School Lib Cer (Library & Information Science-MLIS) or Special LIS (Not Candidate for Degree-ND)

LIS 2970 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Courses offered on an experimental basis or as special topics seminars.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information

LIS 2971 - SPECIAL TOPICS: PUBLIC SERVICES

Minimum Credits: 1

Maximum Credits: 1

Individual 1-credit courses surveying and evaluating the current sources, services, and trends in reference and other public service areas of librarianship. Classes may include practical applications of theory, principles, and standards; hot topics; and discussion of the librarian's distinct roles within the LIS institution.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Linguistics

LING 1000 - INTRODUCTION TO LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of general linguistics, emphasizing the theory and methodology of the traditional central areas of the field-- phonetics, phonology, morphology, and syntax- with special concentration on phonological and syntactic theories and analytical

techniques. The remainder of the course will be devoted to phonetics, morphology, historical linguistics, semantics and pragmatics, sociolinguistics, and psycholinguistics.

Academic Career: UGRD

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

LING 2000 - THESIS RES FOR THE MA DEGREE

Minimum Credits: 1

Maximum Credits: 9

This course provides for individual work under the guidance of a faculty member.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

LING 2025 - ASPECTS OF THE CHINESE LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2142 - THEORIES AND PRACTICES OF SECOND LANGUAGE TEACHING

Minimum Credits: 3

Maximum Credits: 3

This course is intended to introduce current and prospective foreign and second language teachers to the various theories, approaches, issues, and practices employed in the teaching of English as a foreign or second language and, by extension, to other foreign language teaching as well. The course provides a broad overview of content in order to provide foundational knowledge of the field, and includes lectures, exams, and practical experience components.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: LING 1000 or 2144

LING 2143 - SEM LANG TCHNG MATLS DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This is a course designed to introduce students to the design and development of materials and texts for the teaching of second languages. The course is conducted as a seminar with student presentations on the various aspects of materials designed to teach language skills. Each student also presents a project prospectus that describes the purpose, descriptive objectives, operational objectives, concepts, and procedures for incorporating concepts into the materials. Students then prepare the materials (or part of them) and present reports on their projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2144 - RES METHODS IN APPLIED LING

Minimum Credits: 3

Maximum Credits: 3

This course will give a broad introduction to research methods for the study of non-native language development. Both quantitative and qualitative methods will be discussed for the study of as well as informal learning and acquisition processes. But some emphasis will be put on qualitative methods and on classroom language development. Occasional reference will be made to research strategies in sociolinguistics and psycholinguistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2146 - SECOND LANGUAGE ACQUISITION

Minimum Credits: 3

Maximum Credits: 3

This course will deal with second language development from a linguistic and psychological, rather than from an educational point of view. Both the influence of linguistic theory on second language research and the importance of second language data for linguistic theory will be discussed. Second language development in children as well as adults will be described, and frequent comparisons will

be made with data from first language acquisitions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LING 1000

LING 2147 - CUR ISSUES IN SECOND LANG LRNG

Minimum Credits: 3

Maximum Credits: 3

This course will cover four or five topics that have received a lot of attention in the applied linguistics literature of the last few years. Topics discussed in the past include learning vs. Acquisition, accuracy vs. Fluency, classroom interaction, individual differences, and computer-assisted instruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2149 - ADV SECOND LANGUAGE ACQUISITION

Minimum Credits: 3

Maximum Credits: 3

This course aims to cover a number of topics which are presently under discussion in the field of applied linguistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 2142 or 2146 or 2148

LING 2195 - PRACTICUM ESL TEACHING

Minimum Credits: 1

Maximum Credits: 1

The requirements of the practicum may be fulfilled by supervised teaching either in the English language institute or in its informal ESL course (for at least 15 contact hours). Teachers are required to attend orientation and training meetings, be observed in class, attend post-observation discussions, and provide an evaluation of the curriculum.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

LING 2196 - PRAC: SECOND LANGUAGE CURRICULUM

Minimum Credits: 1

Maximum Credits: 3

Experienced teachers in the English language institute become section leaders and work with the English language institute staff in coordinating various curricular areas, training newer teachers, or developing curriculum materials.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

LING 2197 - TEACHING OF LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide supervision and consultation to graduate student TA's and TF's in under graduate linguistics courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2253 - PIDGIN AND CREOLE LANGUAGES

Minimum Credits: 3

Maximum Credits: 3

This course surveys the new languages that have sprung up in various parts of the world and under various historical circumstances when people who speak different languages come into contact with each other. These contact languages are called pidgins as long as they are spoken only as second languages, and creoles if they become the main language of a speech community. This course focuses on the major structural, social, and historical features of pidgins and creoles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2267 - SOCIOLINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course in the social aspects of language. The course is divided into three parts: (1) linguistic competence; (2) communicative competence; and (3) language policy, which deals with implications of earlier topics when applied to society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2269 - CURRN ISSUES IN SOCIOLINGUISTICS

Minimum Credits: 1

Maximum Credits: 3

This course aims to cover a number of topics which are presently under discussion in the field of sociolinguistics.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

LING 2270 - ADVANCED SOCIOLINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of LING 2267, Sociolinguistics. This course will focus on topics selected by students' particular interests and these topics will be covered in depth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2272 - SOCIOLOGY OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

Sociology of language is constituted of topics which can be the subject of study by researchers without linguistic training, where the focus, rather than on the description of linguistic structure, is on the explanation of language use and behavior by social groups. This seminar will consider such topics as language and ethnicity; language maintenance; languages of wider communication; language loyalties; language rights; language policies and planning; speech communities and social networks; language, religion and sacred languages; language and educational issues.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

LING 2274 - LANGUAGE CONTACT

Minimum Credits: 3

Maximum Credits: 3

This course examines the effects of language contact on the structure of the involved languages. We will investigate a variety of language contact situations and the ways in which varying degrees of intensity of contact lead to differing degrees of interference between linguistic systems. Topics include: language contact as a cause for linguistic change (loan words, phonological and other structural change); typologies of language contact (substratum, sprachbund); bilingualism in the individual and the bilingual community (social dialects, diglossia); the emergence of new languages through contact (regional versions of standard languages, pidgins and Creoles).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 1253 or 2253 or 2267

LING 2330 - INTRO TO COMPUTATIONAL LING

Minimum Credits: 3

Maximum Credits: 3

In both linguistics and computer science, we need to study languages and their grammar from a mathematical point of view. This course is an introduction to the mathematical theory of language and its applications. The first half will deal mainly with elements of the theory of automata and its relation to grammars. The second half will survey ways in which this theory can be applied to English grammar and to the design of programming languages. We will concentrate on syntax, but will also pay some attention to theories of

meaning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2340 - DATA SCIENCE FOR LINGUISTS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

LING 2390 - SYNTAX OF SPANISH

Minimum Credits: 3

Maximum Credits: 3

This course addresses Spanish syntactic constructions and structures from the point of view of current linguistic theory. Topics to be dealt with include constituent structure of nominal, verbal and adjectival projections, functional categories, word order, main and embedded clauses, and case assignment. Special attention will be paid to the relationship between syntax and the lexicon as it manifests itself in phenomena such as passive voice, divinizaton, light verb constructions, and argument alternations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2391 - PHONOLOGY OF SPANISH

Minimum Credits: 3

Maximum Credits: 3

This course provides a description of Spanish sounds (vowels, diphthongs and consonants in all their allophonic realizations), and prosodic features (stress and intonation) in light of current phonological theories. Special attention will be paid to syllable structure, as well as different phonological processes such as assimilation, dissimilation, and epenthesis. The relationship between phonology and other components of the grammar (in particular morphology and syntax) will also be dealt with.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2394 - SPANISH DIALECTOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course looks at varieties of Spanish from different perspectives: regional, social, and stylistic. Phonological, morphological, syntactic, and lexical variation will be taken into account. Special attention will be paid to heritage Spanish, creoles, language contact, as well as the diachronic sources of regional differentiation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2397 - SPECIAL TOPICS IN HISPANIC LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course aims to cover a number of topics which are presently under discussion in the field of Hispanic linguistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3

Maximum Credits: 4

This course is meant to simulate the experience of linguistic field work, and raise awareness about the effective ness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of a non (Indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethno semantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LING 2579 and 2773 and 2777

LING 2578 - PHONETICS AND PHONEMICS

Minimum Credits: 3

Maximum Credits: 3

Intensive analysis of the sounds of speech, giving special attention to organs involved in the articulations of speech sounds and auditory discrimination. Students will obtain grounding in practical phonetic skills. Concepts of phoneme, features, abstractness in addition to grammatical theory regarding descriptive phonology will be introduced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2579 - PHONOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the principles of phonological analysis and theory. After a brief survey of the roots of modern phonology in Prague school and American descriptivist ('classical phonemic') theories, the main focus of the course will be on generative phonology. Both in and out of class, students will be expected to solve phonological problems and construct theoretical arguments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 2578

LING 2682 - INTRODUCTION TO SEMANTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

A survey course designed to introduce students who have been exposed to linguistics and logic to contemporary work in the theory of meaning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2720 - STRUCTURE OF SIGN LANGUAGES

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the linguistic structure of sign languages, drawing examples principally, though not exclusively, from American sign language (ASL). It will also highlight similarities and differences between sign languages and spoken languages. In addition to structural features, the course will cover mechanisms unique to visual/spatial languages, the use of the face and body for grammatical signals, language variation, and acquisition of sign languages.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2721 - SOCIOLINGUISTICS OF SIGN LANG

Minimum Credits: 3

Maximum Credits: 3

There are various sociolinguistic topics that one must consider with respect to signed languages of the deaf. Regarding language contact, ambient languages-either signed or spoken-influence a signed language. Less than 10% of deaf people are exposed to signed language from birth, which results in unique phenomena. Additionally, signed languages exhibit variation based on a myriad of social and geographical factors. These topics, in addition to language planning and language policy, will be addressed in this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2722 - DEAF CULTURE

Minimum Credits: 3

Maximum Credits: 3

Many deaf people in the U.S. are united by a language (ASL) that differs from English and a culture with characteristics that differ from those of the larger hearing society. This culture is known as deaf culture, and students in this course will be introduced to various facets of American deaf culture through readings, videos, and discussions. Students will also explore other deaf cultures throughout the world. Among the course foci are: issues of accessibility, perspectives of deaf versus hearing individuals, and various examples of

deaf literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: LING 0473

LING 2738 - LINGUISTIC STRUCTURES OF ENGLISH

Minimum Credits: 3

Maximum Credits: 3

This course is a "nuts and bolts" description of the lexical and syntactic structures of English. An attempt will be made to provide students with a thorough grounding in traditional grammar, while, at the same time, presenting insights and explanations from a transformational-generative perspective. The class is designed for English language teachers- either those who are teaching it in American school systems or those who wish to teach EFL. Lecture format with class discussion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: LING 1000

LING 2761 - DISCOURSE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Many aspects of language cannot be handled adequately in sentence grammars. Although these aspects arguably pertain to a separate area of study, the fieldworker or student of language in context must not avoid them. This course studies discourse in a number of languages, from formal and functional perspectives. Discourse will be shown to provide rich insights into language and culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2773 - MORPHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Morphology, the study of words, is interrelated with the syntax, the phonology, the lexicon, and semantics. The purpose of this course is to develop operational competence, through problem solving and discussion, in the major aspects of morphological theory.

Theoretical issues to be addressed will include lexical phonology, prosodic morphology, morphology and logical form, morphology and valence alternations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2777 - SYNTACTIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction, stressing understanding of theoretical concepts, to the transformational generative approach to English sentence structure. This approach uses formal rules to produce sentences, and to explain how they are composed of phrases. The first part of the course concentrates on mechanical manipulation of systems of rules, aiming to acquaint the student with how the rules work. The second part concentrates on how syntacticians use evidence about a language to support or disconfirm their theories.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2787 - ALTERNATIVE SYNTACTIC THEORIES

Minimum Credits: 3

Maximum Credits: 3

Certain formal linguistic models dominate theoretical linguistic thinking and practice ' government and binding, lexical functional grammar, and montague grammar. But other theories are being honed and practiced, some formal, such as categorical grammar, arc-pair grammar, and role and reference grammar, and some non-formal, such as functional grammar. This seminar will survey such of these marginal and/or uNorthodox theories as match the current interests of the professor and the students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2860 - INTRO TO HISTORICAL LINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

A survey of the principles and methods of historical linguistics; practice in the basic techniques of historical linguistic research. The major topics to be studied are the analysis of sound change, analogic change, contact-induced language change, the relationship between variation (regional and social) and language change, the comparative method, and internal reconstruction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

LING 2902 - DIRECTED STUDY FOR MA STUDENTS

Minimum Credits: 1

Maximum Credits: 9

This course provides for individual work under the guidance of a faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

LING 2959 - DEPARTMENTAL SEMINAR

Minimum Credits: 1

Maximum Credits: 1

A forum for the exchange of ideas among faculty members and advanced graduate students. Topics to be presented and discussed will include areas of linguistic endeavor which are under current exploration by any of the program participants, i.e. Faculty projects, doctoral dissertation work, and M.A. Long paper research.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad LG/SNC Basis

LING 2990 - INDEPENDENT STUDY FOR MA STUDENTS

Minimum Credits: 1

Maximum Credits: 9

This course provides an opportunity for students to formally pursue work on an individual basis.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

LING 3000 - DISSERTATION RESEARCH FOR PHD

Minimum Credits: 1

Maximum Credits: 9

This course provides for individual work under the guidance of a faculty member.

Academic Career: Graduate

Management Information Systems

BMIS 2034 - INFORMATION TECHNOLOGY GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

In this course, we will examine issues associated with information systems planning activities (designing, assessing, budgeting, managing, and maintaining) that are often associated with a firm's ability to apply information systems and technologies in the creation of business value, customer satisfaction, supply chain management, and operational cost reductions; while supporting the continuous drive for product innovation & enterprise growth. Through a combination of readings, class discussions, presentations, and hands-on projects, the students will learn about information systems planning practices and management efforts to better understand the organization's information systems strategic needs, define the systems requirements, acquire, build, and deliver the desired information system solution; plan the systems sustainment needs, and actively plan for future changes. Additional interrelated topics within the (ICT) Information and Communications Technology planning process will be discussed (systems acquisition & sourcing, ICT Supply Chain Risk Management, Vendor Management, Governance, Capital Project & Portfolio Management, decision making mechanisms, standard setting, and the ethical use of information) with the purpose to provide greater insight into the 'why and how' business leaders continuously evaluate and manage their information systems & technology capital investments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2051 - PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Describes project evaluation and selection and the role of projects in the implementation of strategy. Surveys the various techniques of project integration in the matrix organization. Investigates project planning and monitoring, change control, and implementation factors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2053 - HUMAN FACTORS IN INFORMATION SYSTEMS DESIGN

Minimum Credits: 3

Maximum Credits: 3

While many organizations have outsourced the design of production systems, there is still a need to provide specifications for those systems. In addition, the recent internet and e-commerce explosion has created an even wider need to design corporate web sites. Organizational practices must exist to make sure designers and developers take into account what we know about human factors engineering. This course focuses on how to gather requirements, achieve a usable first draft, and test and improve that draft. A half-dozen course projects will include usability critiques, assessments of users' difficulties in understanding systems, and designs of forms, screen layouts, and icons. A mid-term YouTube video project will evaluate usability of various pc or mobile devices. A final project will provide prototype screens and an in-depth plan for an actual application. The course is intended for anyone with special interest in, and appreciation for usability, and will be especially useful for those who will provide input to design teams, manage projects, or develop systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2056 - MGT INFORMATION SYSTEMS PRACM

Minimum Credits: 3

Maximum Credits: 3

The objective of the practicum is to give the student information systems experience in an actual organizational setting. Examples of areas for internships are: Systems Analysis and design; Programming and Implementation; Problem Definition and Documentation; marketing and needs analysis, education and training. A project proposal is prepared by the student that, when approved by both a faculty advisor and a corporate supervisor, becomes the formal agreement to complete the project.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Management of Information Systems(MS)

BMIS 2060 - INDEP STUDY MGT INFOR SYSTEMS

Minimum Credits: 1

Maximum Credits: 6

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2074 - STRATEGIC INFORMATION TECHNOLOGY IN GLOBAL SUPPLY CHAINS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the strategic design and application of integrated information technology systems within the supply chain and how companies depend upon the exchange of data regarding raw materials, supplies, manufacturing, logistics and service commitments between the many different companies and customers, resulting in a competitive advantage of an end-to-end flow of information in the supply chain. Supply chain management information systems will be explored using related industry cases, project collaboration and simulation within an enterprise resource planning (ERP) system such as sap to provide the student with a working environment to validate key concepts covered in the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2409 - INFORMATION SYSTEMS

Minimum Credits: 2

Maximum Credits: 2

.How does information technology enable the business? How does it provide business value? This course provides an overview of information technology and its application in a business. By simultaneously examining business cases and the capabilities of relevant technologies, students will develop an understanding of how information technology supports and enables business strategies, innovation, and improved business capabilities and processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2411 - INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of how general managers can apply information technology (it) to increase their effectiveness. A variety of systems, technologies, and approaches will be covered to provide a broad understanding of how it can be used in organizations. A number of cases and other assignments will be used to illustrate how it can provide information to support decision-making, cooperative work, organizational competitive advantage, and inter-organizational communication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course introduces concepts in ERP and integrated nature of business processes. Students are introduced to all the major

components of SAP ERP. The course participants in enterprise systems and integration of business processes will gain extensive theoretical foundations of the enterprise resource planning (ERP) using the SAP ERP software. The theoretical knowledge is practically implemented and deepened during the course by the use of case studies and hands-on exercises using the SAP ERP system. After completion of the course, students have a comprehensive, theoretical and practical knowledge of the central SAP ERP modules. This includes the organizational and data structure and the integration of a variety of business processes and functional areas. This course is designed to prepare the student for the SAP TERP10 certification exam. The certification - as completion of the course - will be held at the University of Pittsburgh and is a three-hour, 80 multiple-choice questions based knowledge test. Passing the exam leads to a sap certification widely acknowledged in business: the sap certified business associate with SAP ERP 6.0. The course addresses the following functional areas of the SAP ERP systems: logistics, finance, controlling and human capital management. Furthermore, the integration with the SAP systems sap business intelligence (BI) and SAP strategic enterprise management (SEM) is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2525 - CURRENT ISSUES IN COMPUTING

Minimum Credits: 2

Maximum Credits: 2

This course will cover current and future hardware and software technologies that can be useful in business at the organizational, group, or individual levels. Two opposing points of view will be used: from the top-down (what technologies can serve a given industry?) and the bottom-up (what industries can benefit from a given technology?). The particular industries and technologies to examine will be chosen by students. Discussion, student research, and presentations will form a large part of class sessions. Two main projects (top-down and bottom-up) and two case analyses are required. Brief lectures will provide some useful resources for conducting research on future technologies and case discussion will balance out the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2526 - PRACTICAL DATA SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Data science skills are highly valued in the job market and most businesses are heavily investing to develop their analytics capabilities. This course adopts an experience-based learning approach and introduces the practice of data science to Katz graduate students. The course will emphasize the acquisition of skills such as (1) the use of a programming language (R, Python, etc.) to assemble, clean, and analyze data sets, (2) analytical and text-processing procedures for answering business questions, and (3) visualization and presentation of data-driven results for evaluation of business goals. The primary mode of learning will be through hands-on exercises involving real-world data used to make business decisions. For example, students will make use of the datasets and scripts used in data science competitions (e.g., Kaggle). Although no prior programming experience is required to enroll in the course, students should expect intensive out-of-class readings and practice sessions to get the most out of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401

BMIS 2527 - PRIVACY, SECURITY AND ETHICAL COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course requires students to investigate ethical issues that emerge around the use of Information Systems. The focus of the course is to provide awareness, emphasis and analysis of important issues as they are related to Information Systems and Computing, such as ethical use of technology, data protection, cloud computing, cyber security, privacy, the digital divide, social media, intellectual property, whistleblowing, professional codes of conduct, emerging technologies, professional liability, internet freedom in computing, international laws and governance, and other selected topics. Emphasis is placed on the study of ethical situations and responsibilities of IS professionals around current and emerging technologies in a global setting. By studying current issues, cases and applying real world application through active learning techniques, students will gain a greater awareness of the ethical, social, and legal structure around their technology driven environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BMIS 2537 - BUSINESS SYSTEMS PLATFORMS

Minimum Credits: 3

Maximum Credits: 3

Lectures and additional presentations by outside speakers will survey the most important software and hardware technologies that businesses used to deploy information systems. This will include an examination of capabilities, strengths, weaknesses, and relevant standards. It will also address alternative implementations and costs. Full-length case studies and class discussion will facilitate the examination of the business implications of and the context in which these system deployment technologies are utilized. Individual and team student projects will give the students experience in researching, understanding, evaluating and explaining information technologies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2538 - BMIS STRATEGIC CYBERSECURITY IN BUSINESS

Minimum Credits: 2

Maximum Credits: 2

This course introduces students to the vital topic of strategic cybersecurity management in business today. An ever increasing demand for effective cybersecurity, driven by the accelerated number of well published data breaches and internet attacks on governments, businesses, and users, has challenged business leaders to increase their awareness and gain a deeper understanding of the cybersecurity threats and risks facing their it operations; a support role once reserved only for the it professional. Accelerating the need for greater management cybersecurity knowledge is the fact that businesses are increasingly integrated via complex global telecommunication networks and management information systems, collaborating with employees, suppliers, and customers. By advancing management's understanding of cybersecurity, leadership will be better prepared in avoiding unauthorized data access, theft, and cyber related attacks.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2542 - INTRODUCTION TO DATA SCIENCE: PROGRAMMING ESSENTIALS

Minimum Credits: 3

Maximum Credits: 3

This course introduced basic data science concepts behind turning data into actionable insights and knowledge. In addition, the course will emphasize the development of necessary programming skills needed for doing data science. Students will learn and use the Python programming language along with a focus on learning applied statistical inference, machine learning, data visualization, text analysis, and social network analysis techniques. The course takes a hands-on approach and no prior programming experience is expected. This is a required course for students interested in pursuing the Katz Data Science specialization. Follow on courses include Practical Data Science (BMIS 2526) and Advanced Topics in Data Science (BMIS 2543)

Academic Career: Graduate

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2556 - MGT INFORMATION SYSTEMS PRACTCM

Minimum Credits: 3

Maximum Credits: 3

The objective of the practicum is to give the student information systems experience in an actual organizational setting. Examples of areas for internships are: systems analysis and design; programming and implementation; problem definition and documentation; marketing and needs analysis; education and training. A project proposal is prepared by the student that, when approved by both a faculty advisor and a corporate supervisor, becomes the formal agreement to complete the project.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2588 - DATA BASE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Explains data base design, effective use of data bases, basic design objectives, methods, costs and benefits associated with the use of data base management systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Katz Graduate School of Business

BMIS 2590 - CUR TOPCS MIS OPEN SOURCE TEC

Minimum Credits: 2

Maximum Credits: 2

In this course, we will examine issues associated with open source technologies. Through a combination of readings, discussion, presentations, and hands-on projects we will examine (1) characteristics of key open source technologies (linux, mysql, and apache), (2) the nature of open source communities and development processes, and (3) the evolving structure of the open source industry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2591 - E-BUSINESS STRATEGY

Minimum Credits: 2

Maximum Credits: 2

This course focuses on strategic decisions that must be made in e-business, and makes use of tools such as lectures, discussion, guest speakers, case analyses, and a required business plan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2603 - CURRENT TOPICS IN MIS: BUSINESS INTELLIGENCE 1

Minimum Credits: 2

Maximum Credits: 2

As the speed, capacity, and reach of information systems increase, organizations are recognizing opportunities to improve analysis and decision making by leveraging these capabilities. This course focuses on helping students formulate questions that are important to the organization's success, select appropriate business intelligence technologies, and develop plans for implementation of these systems. Particular attention will be given to developing students' ability to deal with the particular challenges associated with planning, managing, and evaluating investments in business intelligence systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2605 - CURRENT TOPICS IN MIS: IT IN THE FINANCIAL SERVICES

Minimum Credits: 2

Maximum Credits: 2

The securities industry runs on information technology. Ultimately, this industry is built on the advanced, high-speed and accurate record-keeping that computers provide and on rapidly moving information between institutions over modern, high-speed and low cost networks. Computers and networks have facilitated incredible and explosive growth in financial markets and services. Information is available faster and more widely, transactions are settled more quickly and with ever-higher degrees of accuracy. These same technologies also contribute to the ever-increasing volatility in the financial markets -- indexes routinely drop or climb hundreds of points in minutes. The purpose of this course is to provide the student with a general understanding of the securities industry and the main types of information systems that support it. The focus will be on three topics: 1) an overview of the securities industry, its major players and roles, 2) securities information systems and how they interrelate and 3) how these systems are integrated with the operations and business practices of the companies using them. The course will use three approaches: 1. Lectures to cover the fundamentals of the securities industries and its systems 2. The goal is to give the students a true 'insider's' view of these systems and how they are used. Presentations by outside, industry expert speakers will survey the most important features of these systems and how they impact the business. 3. Team projects will give the students experience in researching, understanding, evaluating and explaining business implications of these systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2678 - ELECTRONIC COMMERCE

Minimum Credits: 3

Maximum Credits: 3

Examines the opportunities and challenges of online commerce conducted via websites and mobile apps. Students learn how companies launch initiatives to gain competitive advantage and improve their relationships with customers, suppliers, and other business partners. Case study assignments help students gain a deeper and sometimes surprising understanding of well-known sites, and instruct them on how to analyze e-commerce opportunities and risks. A midterm group project analyzes an e-commerce failure selected by the group. A final group project proposes a new e-commerce start-up enterprise, a new app, or a new project for an existing firm. Testing is conducted with multiple quizzes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Katz Graduate School of Business

BMIS 2679 - TECHNOLOGY INNOVATION, ADOPTION, AND DIFFUSION

Minimum Credits: 3

Maximum Credits: 3

Expose students to concepts in technology innovation, markets for information technology goods and services, and adoption dynamics within organizations for new products and processes, and therefore should prove useful in a variety of student careers. Assignments emphasize written and oral communication skills. There is an opportunity for a self-selected project to customize the course to particular student interests. Skill acquisition and improvement goals for the course include case analysis, short analytic writing, technology research, and long-form writing. Technological innovation is the origin of what the economist Joseph Schumpeter termed the 'creative destruction' of capitalism (1942). This is the dynamic process by which prior technologies, and their accompanying industrial structures and associated leading firms, are replaced by successive generations of technologies. This is a constantly ongoing process that provides both opportunities for new entrants and threats to existing firms in the market. Students are likely to need a thorough understanding of this process throughout their professional careers. Topics typically covered include: innovation sources and management, s-curves and product life cycles, dominant design and paradigm shifts, disruptive and discontinuous innovation, innovation in design, network effects, standards, complementary goods, standards, intellectual property, partnerships, alliances, and value chain ownership, environment/government regulations, organizational assimilation of technology, and lead-user design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2685 - TECHNOLOGY INNOVATION AND ADOPTION

Minimum Credits: 2

Maximum Credits: 2

Technology innovation and adoption is a graduate-level elective course with a focus on developing student understanding of the technological and market forces underlying the development and use of new technologies, with an emphasis on information technologies. Class sessions will be divided among lecture, discussion, and business cases. Work outside of class will emphasize current readings in technology, academic research, and case studies. The major requirements are a set of one-page written case assignments and one longer assignment. The course will emphasize both oral and written communications skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2687 - CURRENT TOPICS IN MIS: MANAGING BIG DATA

Minimum Credits: 2

Maximum Credits: 2

This course introduces students to key concepts in big data, one of the most potentially transformative ideas to arrive in the business world in the last decade. This half-semester course consists of three main parts, each crucial to managers' effective use of big data. First, we look at key management issues related to big data. How is big data different from "regular data" and what does it promise? What are the key challenges of managing big data and how can its advantages be integrated into the organization? Second, there can be a fine line between using data to arrive at effective, meaningful business insight and creating false understandings. With this in mind, the course examines the process of effectively formulating and evaluating data-driven business questions. Finally, we drive home issues of big data in practice by engaging in hands-on experience analyzing information in a big data environment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 2689 - TECHNOLOGY-ENABLED BUSINESS TRANSFORMATION

Minimum Credits: 3

Maximum Credits: 3

Business in the 21st century runs on it. However, competitive advantage seldom comes from having exclusive or proprietary access to a technology. It rather comes from more effectively utilizing the technologies to which everyone ' including the competition ' has access. The implications of this reality are many. First, it is necessary to understand what technologies are available in marketplace and what their capabilities are. Next ' and far more challenging -- it is necessary to understand how those capabilities might positively (or negatively) interact with business strategy. The capabilities of information technologies can certainly contribute to meeting a strategy, but it is also conceivable that those same capabilities could contribute to the necessity of changing a strategy. Business transformation has been defined as the alignment of process, people and technology such that it can both support and innovate business strategies. Given that technologies evolve and develop at a rather rapid pace, it is desirable for managers to develop skills that allow them to understand what technologies can do (both established and new) and how they might be leveraged to create real value. Using lecture and current case studies, this course will examine topics to help students develop those skills. These topics include: 1.) Transformation strategies. 2.) The relationship between information technology and business transformation. 3.) When to build and when to buy. 4.) Business analysis. 5.) Process modeling. 6.) Enterprise systems. 7.) Software development methodologies.

Course Requirements: PROG: Joseph M. Katz Grad Sch Bus

BMIS 2811 - INFORMATION TECHNOLOGY AND BUSINESS VALUE

Minimum Credits: 3

Maximum Credits: 3

This required EMBA course introduces students to information technology, with an emphasis on employing it to maximize business value. Topical coverage will be broad, and will examine both processes and it products that executives encounter on a regular basis. After completing the course, students will be better able to communicate with it staff, understand how systems are developed, and evaluate the strategic implications of it decisions. Class sessions will involve lecture, discussion, and business case problem-solving. Outside of the classroom, students will make use of on-line resources, academic research, and case studies. Both written and oral communications skills will be tapped in frequent and focused case write-ups and class presentations.

Course Requirements: Katz Grad School of Business students only.

BMIS 3019 - HUMAN/COMPUTER INTERACTION

Minimum Credits: 3

Maximum Credits: 3

Investigates the current research and research directions of the Human-Computer Interaction (HCI) literature. The course will emphasize aspects of the relationship between humans and computers, including user learning, understanding and manipulation (usage) of systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BMIS 3023 - IS, ECONOMICS, & IS IMPLEMENTN

Minimum Credits: 3

Maximum Credits: 3

Information systems represents a critical resource to organizations; yet, there are many unknowns about how to success fully design and implement them and firms still struggle with the deployment process. Seminar will explore issues associated with the implementation of information systems in organizations. The emphasis is on understanding is implementation from an organizational perspective, in particular, an organizational change perspective. Therefore, we will review literature related to system design, development, and deployment as well as literature related to change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 3024 - COMMUNICATION, TECHNOLOGY AND ORGANIZATION

Minimum Credits: 3

Maximum Credits: 3

Many of the issues and phenomena which are of interest to information systems researchers, such as knowledge management, electronic commerce, group and team support systems, systems development, and technology adoption, are inherently communication-based. However, common approaches taken by is and organization researchers either assume isolated individuals (hence ignoring communication) or assume that communication can be conceptualized as a mechanical process in which information is deterministically transferred from one person to another. While these approaches can yield valuable insights, explicit consideration of aspects of human communication such as structure, process, and meaning is often necessary to understand how (and why) technologies are (or are not) created and used. The objective of this course is to introduce you to theoretical and empirical studies of communication at a variety of levels (interpersonal, group, intra-organizational, inter-organizational, and "mass-media") and encourage you to consider how focusing on communication can be useful when examining issues surrounding the development, management, and impact of technology in organizations and society.

Minimum Credits: 3

Maximum Credits: 3

The following topics will be covered in this seminar: adoption/assimilation, technology acceptance, s-curves and diffusion modeling, learning curves, organizational learning, economics of standards, social/fashion bandwagons, implementation process models, adoption of inter-organizational systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BMIS 3031 - WORKSHOP SERIES IN INFORMATION SYSTEMS 1

Minimum Credits: 2

Maximum Credits: 2

The purpose of the seminar is to give Ph.D. students a flavor of different topic areas within information systems and exposure to cutting-edge research within these areas. The seminar will also involve speakers from different universities, providing the students with networking opportunities. At the end of the seminar, students will have a broad understanding of the research being conducted in information systems. Students will also get exposure to the research process in general, including: creating effective paper reviews, developing a research proposal, presenting proposals in a public forum.

Academic Career: Graduate

BMIS 3041 - OPEN SOURCE SOFTWARE DEVELOPMENT AND ADOPTION

Minimum Credits: 2

Maximum Credits: 2

This seminar exposes Ph.D. students to the state of the art research related to open source software (OSS) development and adoption. The course will focus on four main questions explored in this body of work: 1. Why do developers participate in OSS? 2. How do project managers sustain developer contributions to a project? 3. What factors lead to OSS project success? 4. What factors facilitate OSS adoption? In examining literature that addresses these questions, students will be exposed to a variety of methods (e.g. Archival, survey, simulation and qualitative) at multiple levels of analysis (e.g. Individual and group). Finally, the seminar will focus on how to leverage existing theoretical bases to understand emerging phenomena. Classes will be principally student-led discussions of research papers.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BMIS 3042 - DESIGN INFORMATION SYSTEMS RESEARCH

Minimum Credits: 2

Maximum Credits: 2

This Ph.D. seminar course exposes students to management theories related to the design of software-intensive products and processes. Drawing upon the literatures of design thinking, software engineering, and sociotechnical systems, we will explore the role of product and process design in influencing phenomena of interest to management scholars such as organizational transformation, innovation, and industrial evolution. Classes will be principally student-led discussions of research papers.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

BMIS 3044 - QUANTITATIVE METHODS IN INFORMATION SYSTEMS RESEARCH

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to prepare Ph.D. students to understand and confidently apply a variety of statistical methods and research designs that are important for research in information systems and technology management (ISTM). Through discussions of published ISTM research papers and practical data analysis exercises, we will explore models such as those applied for event counts, time-series cross-sectional analysis, causal inference, Bayesian inference, competing risks, differences-in-differences, and designs for randomized field experiments. The course will also place an emphasis on developing skills to communicate econometric results in a rigorous way.

BMIS 3099 - READINGS IN MIS

Minimum Credits: 1
Maximum Credits: 9
Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad Letter Grade

Materials Science & Engineering

MSE 2003 - STRUCTURE OF MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of crystallography; lattice geometry; bravais lattices; crystal systems; stereographic projection; point and space groups; symmetry elements; tensor properties of crystals; physical properties; elasticity of crystals; introduction to diffraction by crystals; reciprocal lattice; ewald construction.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2008 - PROCESSING OF MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSE 2011 - ENERGETICS

Minimum Credits: 3
Maximum Credits: 3
Advanced classical thermodynamics; chemical equilibrium solution thermodynamics; quasichemical model; electrochemical cells; surface tension; thermodynamics of interfaces; introduction to thermodynamics of irreversible processes.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2013 - KINETICS IN MATERIALS SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Diffusion in solids; mathematics of diffusion; atomistics of diffusion and diffusion mechanisms; diffusion in alloys, the Kirkendall effect; uphill diffusion; generalized phenomenological treatment of diffusion; diffusion in ionic solids; diffusion in multicomponent systems; grain boundary diffusion; surface diffusion and dislocation effects; anelasticity and internal friction phenomena; the liquid state; diffusion in liquids; viscosity.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

MSE 2015 - ELECTROMGNTC PROPS MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Magnetic properties of matter; ferro- ferri- and antiferromagnetism; diamagnetic and paramagnetic substances; magnetostatics; the fundamental quantities in the description magnetic behavior; measurement of magnetic quantities; hysteresis; magnetic domains; magnetic anisotropy; magnetostriction; permeability; coercivity; hard and soft magnetic materials for engineering applications.
Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2030 - MECHANICAL BEHAVIOR OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Continuum mechanics concepts; elastic, plastic, and viscous deformation; strength in metals, ceramics, and polymers. Application of concepts to details of material tests (e.g., Tension, torsion, compression, hardness tests); metallurgical phenomena (e.g., Precipitate strain fields, dislocations, transformations, residual stresses, anisotropy); failure (by brittle fracture, ductile fracture, creep, fatigue, wear, hydrogen effects); design of components for industrial use or research equipment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2032 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Failure of manufactured products in service, implications for design. Energy release rates, toughness, evaluation of experimental tests. Fracture mechanisms in different material systems. Damage tolerance. Fracture control. Design studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2036 - INTRODUCTION TO CONTINUUM MECHANICS

Minimum Credits: 3

Maximum Credits: 3

The fundamental concepts of continuum mechanics necessary for studying the mechanical behavior of solids and fluids. Includes a review of vectors and tensors; stress; strain and deformation; general principles in the form of balance laws; constitutive equations and their restrictions; and specialization to the theories of linearized elasticity and fluid mechanics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2037 - NANOMECHANICS, MATERIALS AND DEVICE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction for current nanotechnology and fundamentals for nanoengineering. It mainly contains three areas: nanomechanics, nanomaterials and nanoscaled devices. In nanomechanics, it covers nanoindentation mechanics, thin film mechanics and one dimensional nanowire mechanics, nanocrack mechanics, deformation in nanomaterials. Nanomechanical model will be emphasized. In nanomaterials, it covers carbon nanotube, one dimensional semiconducting nanowires and nanomultilayers as well as nanostructured composites. Novel property/phenomena reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2038 - APPLIED SOLID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Stress and strain transformations; applied elasticity problems in torsion and plane problems; thermal stresses and elementary plasticity; energy methods; fundamentals of finite element methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2041 - ADVANCED PHYSICAL METALLURGY 1

Minimum Credits: 3

Maximum Credits: 3

The cold-worked state; crystal plasticity, production of crystalline defects; annealing phenomena; recovery, recrystallization, and grain growth; secondary recrystallization, tertiary recrystallization; genesis of preferred orientation; deformation and recrystallization textures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2042 - ADVANCED PHYSICAL METALLURGY 2

Minimum Credits: 3

Maximum Credits: 3

Strengthening mechanisms in metals and alloys; theoretical strength of crystals; particle strengthening; dislocation particle interactions; grain size strengthening; strengthening by presence of grain boundaries; hall-petch expression; theories of discontinuous yielding; solid solution strengthening; fiber strengthening and the design of high strength microstructures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2043 - ELECTRON MICROSCOPY IN MATERIALS SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Electron optics, lens aberrations, depth of field, depth of focus, resolution, contrast, bright and dark field microscopy, selected area diffraction, calibration, specimen preparation, electron scattering, electron diffraction, Bragg's law, laue conditions, structure factor, ewald construction, double diffraction, twinning, kikuchi lines, contrast theory, kinematical theory of diffraction by perfect and imperfect crystals, limitations, column approximation, extinction contours, dynamical theory, special techniques, high voltage microscopy, applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2045 - ADV FERROUS PHYSICAL METALLURGY

Minimum Credits: 3

Maximum Credits: 3

Phenomena related to non-metallic inclusions; influence of size, shape, and amount of inclusions on mechanical properties and property anisotropy; thermomechanical treatment of austenite; hot rolling as a thermomechanical treatment; hot rolling behavior of austenite in plain carbon and low alloy steels; grain size and texture control through thermomechanical treatment; relationship between thermomechanical treatment, microstructure, and mechanical properties.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2047 - ANALYSIS AND CHARACTERIZATION AT THE NANO-SCALE

Minimum Credits: 3

Maximum Credits: 3

This course offers a survey of micro-analytical, microscopy and diffraction methods that are widely used for the analysis of composition, chemistry, structure, scale and morphology of advanced materials. It introduces the most basic concepts required to understand experimental data obtained with these modern techniques. The main objectives of the course are to enable students to interpret and evaluate relevant data sets presented in the research literature and to identify experimental tools to solve a given Nano-research characterization problem. Some prerequisite basic knowledge of the structure of solid matter (e.g. Crystals and amorphous materials), diffraction methods (e.g. X-ray diffraction) and processing-property-structure relationships in materials is expected.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

MSE 2048 - ENGINEERING ALLOYS FOR CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to understand modern metallic alloys used in construction. To accomplish this goal, the following sequence

is offered: review of mechanical properties required of structural alloys; review of physical metallurgy principles: thermodynamics, kinetics, phase diagrams and phase transformations; microstructure and properties of stainless steels, aluminum alloys, titanium alloys, nickel and cobalt-based super alloys and alloys for nuclear core applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering (PENGR)

MSE 2050 - GAS-METAL REACTIONS

Minimum Credits: 3

Maximum Credits: 3

Oxidation of metals, alloy oxidation, internal oxidation, effect of metallurgical variables on oxidation, reactions of metals and alloys with gases other than oxygen, hot corrosion, coatings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2055 - PRINCIPLES OF SOLIDIFICATION ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Solidification is one of the most important phenomena shown in alloy processing such as casting, welding, additive manufacturing (3d printing). In this course, the principles of solidification process will be introduced based on the alloy thermodynamics and diffusion.

Application of solidification for materials processing will be included in the discussion. This course is an advanced course for both senior undergraduates and graduates with good materials science background. Before taking this course, students should have already taken some courses with basic knowledge of crystal structure, phase diagrams, phase equilibria, and phase transformations. The course introduces (1) basic principles of solidification and fundamental phenomena during alloy solidification, (2) delineation of the processing parameters that control crystal perfection, solidification substructure, grain size and shape, microsegregation, macrosegregation, microporosity, inclusions, mechanical properties, and physical properties, (3) microstructure in solidification, thermodynamics and kinetics in solidification, casting, welding, metals additive manufacturing, bulk metallic glass, (4) some important simulation and modeling techniques in alloy solidification

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (MEMS 1059 and 1053) or MSE 2011; PROG: Swanson School of Engineering

MSE 2067 - ELEMENTS OF MATRLS SCI & ENGRG 1

Minimum Credits: 3

Maximum Credits: 3

This course is primarily designed for graduate students entering the program without a degree in a field of materials engineering. Bonding and structure of materials; thermodynamics and phase diagrams; imperfections in crystals; rate processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2073 - MSE CERAMIC MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2077 - THIN FILM PROCESSES & CHRCTRZN

Minimum Credits: 3

Maximum Credits: 3

This course will be an overview of the major thin film processing methods and the primary techniques to characterize thin film surfaces and interfaces. Topics to be included: vacuum science and technology, thin-film deposition techniques, such as pvd, mbe, cvd and the fundamental surface processes of epitaxial growth. The analytical techniques will be presented, e.g., Electron microscopy, aes, xps, afm, and stm.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2084 - INTRODUCTION TO POLYMER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to basic concepts of polymer science. Kinetics and mechanism of polymerization, synthesis and processing of polymers. Relationship of molecular conformation, structure and morphology to physical and mechanical properties. Structural and physical aspects of polymers. Molecular and atomic basis for polymer properties and behavior. Characteristics of thermoplastic and thermoset polymers for single and multicomponent systems. Understanding of the viscoelastic and relaxation behavior of single and multicomponent systems. Thermodynamics and kinetics of transition phenomena. Structure, morphology and behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2096 - MS/MBA INTEGRATED PROJECTS COURSE

Minimum Credits: 2

Maximum Credits: 2

This is the integrated projects course for MS/MBA majors. The project will be jointly overseen by Katz and SSOE. A 1-2 page proposal is due at the beginning of the term, followed by a final report. The project should blend the student's business and engineering skills.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

MSE 2110 - NUCLEAR MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course presumes that students have the knowledge base needed to understand materials issues associated with the design and operation of nuclear power plants, such as basic concepts of physical metallurgy, a mechanistic and microstructural-based view of material properties, and basic metallurgical principles. This course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well the effects of irradiation on corrosion performance, as well as the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2111 - MATERIALS FOR ENERGY GENERATION AND STORAGE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2112 - NANOSCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics, continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods, accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

MSE 2113 - NANOSCALE MODELING AND SIMULATIONS:

Minimum Credits: 3

Maximum Credits: 3

This course teaches the essentials of nanoscale modeling and simulations, which concerns the use of modern computational tools to the analysis of materials at the nanoscale. The current emphasis of this course is on first-principle density functional theory (DFT) calculation method. The course covers topics on basic quantum mechanics, fundamentals of DFT, statistical mechanics, thermodynamics, and continuum mechanics, and their role in atomistic scale modeling and simulation. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a nanomaterial system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS

Minimum Credits: 3

Maximum Credits: 3

This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole. Principles are applied through the application of major industry codes to specific cases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

MSE 2118 - COMPUTATIONAL RADIATION TRANSPORT

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth review of modern computational techniques used for solving the linear Boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern radiation transport through materials, monte Carlo methods for the simulation of radiation transport, a first-principles derivation of the Boltzmann radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in Legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the Boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also place a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSE 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course will be developed in conjunction with University of Pittsburgh faculty with an interest in environmental issues impacting the nuclear power industry including school of engineering faculty involved with the Mascaro sustainability initiative, faculty from the department of civil and environmental engineering and faculty from the graduate school of public and international affairs. The course will address such topics as sustainable energy resources, engineering and societal ethical concerns, risk analysis, and future energy supplies in general and as each of these topics relates to such specific issues as the nuclear fuel cycle, nuclear reactor safety, nuclear waste disposal and transportation, and gen iv and the hydrogen economy. Students will better understand the socio-economic issues surrounding achieving a sustainable nuclear power future as it impacts fuel acquisition, plant operation and waste disposal.

Mathematics

MATH 0120 - BUSINESS CALCULUS

Minimum Credits: 4
Maximum Credits: 4
This course introduces the basic concepts of limits, continuity, differentiation, integration, maximization and minimization. Applications to the social sciences, especially business and economics, are stressed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: MATH 0020 or 0031 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

MATH 0220 - ANALYTIC GEOMETRY AND CALCULUS 1

Minimum Credits: 4
Maximum Credits: 4
This is the first of a sequence of three basic calculus courses. It covers the derivative and integral of functions of one variable and their applications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: MATH 0032 (MIN GRADE 'C') or MATH 0200 (MIN GRADE 'C') or MATH PLACEMENT SCORE (76 or GREATER)

MATH 0230 - ANALYTIC GEOMETRY AND CALCULUS 2

Minimum Credits: 4
Maximum Credits: 4
This is the second of a sequence of three basic calculus courses. It covers the calculus of transcendental functions, techniques of integration, series of numbers and functions, polar coordinates, and conic sections.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: MATH 0220; MIN GRADE: 'C'

MATH 0280 - INTRO TO MATRICES & LINEAR ALG

Minimum Credits: 3
Maximum Credits: 3
The principal topics which this course will cover include vectors, matrices, determinants, linear transformations, eigenvalues and eigenvectors, and selected applications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: MATH 0220 or 0235 (Min Grade 'C')

MATH 0400 - FINITE MATHEMATICS

Minimum Credits: 3
Maximum Credits: 3
The course covers the basic concepts of set theory, logic, combinatorics, Boolean algebra, and graph theory with an orientation towards applications.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0020 or 0031 (MIN GRADE 'C') or MATH PLACEMENT SCORE (61 or GREATER)

MATH 1180 - LINEAR ALGEBRA 1

Minimum Credits: 3

Maximum Credits: 3

This course stresses the theoretical and rigorous development of linear algebra. Major topics include the theory of vector spaces, linear transformations, matrices, characteristic polynomials, bases and canonical forms. Other topics may be covered as time permits.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: CREQ: MATH 0413 or MATH 0450

MATH 2000 - THESIS MS

Minimum Credits: 1

Maximum Credits: 15

This course is for students writing a master of science thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MATH 2010 - TEACHING ORIENTATION

Minimum Credits: 1

Maximum Credits: 1

This course prepares T.A.'S to teach mathematics at a University level.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

MATH 2012 - PREPARING FOR PRELIMS AND RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course is intended for students who have not yet passed the preliminary exams. The purpose of the course is to help students prepare for the prelims and prepare for research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

MATH 2014 - COMMUNICATING MATH

Minimum Credits: 1

Maximum Credits: 1

This course will help students gain the skills and experience needed to do research in mathematics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2020 - PROGRESS IN MATH

Minimum Credits: 3

Maximum Credits: 3

This course will deepen the students understanding of analysis through intensive training in problem solving followed by comprehensive study and dissection of the problems attempted. Students preparing for the analysis portion of the preliminary exam are strongly encouraged to enroll.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2030 - ITERATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Topics include matrix theory, matrix and vector norms, error analysis, factorizations, direct and iterative methods for solving linear systems, least squares and the algebraic eigenvalue problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2060 - COMBINATORICS 1

Minimum Credits: 3

Maximum Credits: 3

This is a graduate level course in combinatorics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2070 - NUMERICAL METH IN SCI COMPUTING 1

Minimum Credits: 4

Maximum Credits: 4

This is an introductory survey course for non-numerical analysis students. It covers the underlying theory and computational aspects of numerical linear algebra. Topics include directional iterative methods, computation of eigenvalues and eigenvectors and least squares problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2071 - NUMERICAL MATH IN SCI COMPUTING 2

Minimum Credits: 4

Maximum Credits: 4

This course is a continuation of 2070. Topics include numerical solutions of PDE's by finite differences and finite element methods also numerical differentiation and integration are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2090 - NUMERICAL SOLUTION ORDINARY DE

Minimum Credits: 3

Maximum Credits: 3

The topic covered is modern methods for solving initial value problems. This will include the basic theory and software implementations and numerical experiments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2301 - ANALYSIS 1

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to real analysis/measure theory and functional analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2302 - ANALYSIS 2

Minimum Credits: 3

Maximum Credits: 3

This course presents an introduction to the analysis of holomorphic functions followed by an introduction to harmonic analysis. It is a natural continuation of math 2300 analysis 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2303 - ANALYSIS 3

Minimum Credits: 3

Maximum Credits: 3

This course presents an introduction to the analysis of holomorphic functions followed by an introduction to harmonic analysis. It is a natural continuation of MATH 2300 analysis 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2304 - ANALYSIS 4

Minimum Credits: 3

Maximum Credits: 3

Analysis 4 is a new course that follows on from the analysis 1, 2, 3; especially analysis 2. Its focus will be complex and harmonic analysis. We will integrate this new material with the real, functional, complex and harmonic analysis of the previous three courses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2370 - MATRICES AND LINEAR OPERATORS

Minimum Credits: 3

Maximum Credits: 3

Linear transformations on finite dimensional vector spaces are studied in a semi-abstract setting. The emphasis is on topics and techniques which can be applied to other areas, e.g., Bases and dimension, matrix representation, linear functional, duality, canonical forms, vector space decomposition, inner products and spectral theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2371 - MATRICES & LINEAR OPERATORS 2

Minimum Credits: 3

Maximum Credits: 3

Continuation of MATH 2370.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2500 - ALGEBRA 1

Minimum Credits: 3

Maximum Credits: 3

The basic concepts and results of group theory are developed with an emphasis on finite groups. Topics include: homomorphism theorems, isomorphism theorems, Sylow theorems, permutation representations and Hall's characterization of solvable groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2501 - ALGEBRA 2

Minimum Credits: 3

Maximum Credits: 3

In this course the fundamental properties of rings, fields and modules are studied.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2505 - ALGEBRA 3

Minimum Credits: 3

Maximum Credits: 3

This is a third course in algebra. It covers commutative algebra, homological algebra and rudiments of category theory. The material covered provides the necessary background for the advanced courses in algebraic geometry and number theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2601 - ADVANCED SCIENTIFIC COMPUTING 1

Minimum Credits: 3

Maximum Credits: 3

These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2602 - ADVANCED SCIENTIFIC COMPUTING 2

Minimum Credits: 3

Maximum Credits: 3

Course develops the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2603 - ADVANCED SCIENTIFIC COMPUTING 3

Minimum Credits: 3

Maximum Credits: 3

These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2604 - ADVANCED SCIENTIFIC COMPUTING 4

Minimum Credits: 3

Maximum Credits: 3

These courses develop the computational mathematics of evolving areas of current scientific interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2700 - TOPOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

A first course in topology, some of the topics covered include separation axioms, bases and sub-bases, product and quotient topology, homeomorphisms, compactness, the Baire category theorem, the Lindelof property, connectedness, topological spaces and compactification.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2701 - TOPOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2700. In this course the basic concepts and results in algebraic topology will be covered, this includes both homotopy and homology theory. In particular the calculation of the fundamental group and homology groups from chain complexes will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2800 - DIFFERENTIAL GEOMETRY 1

Minimum Credits: 3

Maximum Credits: 3

This course covers introductory topics in differential geometry. Topics include topological manifolds, differential structures, tangent and tensor bundles, vector fields and differential equations, integral manifolds and Riemannian structures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2801 - DIFFERENTIAL GEOMETRY 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2800 and its goal is to develop advanced concepts in differential geometry. Some topics which might be covered include Riemann surfaces and the differential geometry of \mathbb{R}^4 and in particular the relevance of these to quantum super string theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2810 - ALGEBRAIC GEOMETRY

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the basic ideas of algebraic geometry. The approach to the subject may be via either the linear series on a curve approach or the algebraic approach through fields of algebraic functions or the sheaf theoretic approach. Applications may also be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2900 - PARTIAL DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This is an introduction course to this area. Some of the topics to be covered include: linear second order equations, the method of characteristics, Laplace and wave equations, the heat equation and various maximum principles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2901 - PARTIAL DIFFERENTIAL EQUATIONS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2900. The topics covered in this course include an introduction to parabolic and hyperbolic equations, a priori estimates, free boundary problems, shock waves and Riemann problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2920 - ORDINARY DIFFERENTIAL EQUATIONS 1

Minimum Credits: 3

Maximum Credits: 3

This course covers basic concepts in O.D.E.'S. In particular, emphasis is given to connections of this area to applied mathematics and differential geometry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2921 - ORDINARY DIFFERENTIAL EQUATIONS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of 2920. Some of the topics which are covered include boundary value problems, green's functions, integral equations and the spectral theory of second order differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2930 - ASYMPTOTICS & SPECIAL FUNCTIONS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the theory of asymptotic and special functions. Some of the functions studied are the gamma function, orthogonal polynomials and Bessel functions. This course also covers techniques for finding asymptotic expansions of

integrals and of solutions to differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2940 - APPLIED STOCHASTIC METHODS

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of stochastic methods that can be applied to problems in biology, finance, and physics. Analytical and computational techniques will be presented which apply to both continuous and discrete stochastic models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2950 - METHODS IN APPLIED MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

This course is a rigorous treatment of various aspects of numerical linear algebra, special features of symmetric operators, optimization with emphasis on properties of convex functions and duality theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 15

This course is independent study by the student under the direction of a faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

MATH 3000 - THESIS PH.D.

Minimum Credits: 1

Maximum Credits: 15

This course is taken by a student who is working on a Ph.D. dissertation under the direction of a student's thesis advisor.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MATH 3020 - CALCULUS OF VARIATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the subject. Topics include: variation formulation, the Euler-LaGrange equations, and applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3040 - TOPICS IN SCIENTIFIC COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This is a topics course at the advanced graduate level. The subject matter will change each time the course is offered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3060 - TOPICS IN COMBINATORICS

Minimum Credits: 3

Maximum Credits: 3

This course covers a variety of topics in combinatorics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3071 - NUMRC SOLUTN PARTL DIFFT EQUA

Minimum Credits: 3

Maximum Credits: 3

This course covers contemporary methods for solving initial and boundary value problems. Topics include: properly posed problems, characteristics, finite difference and finite element methods and error estimates.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3072 - FINITE ELEMENT METHOD

Minimum Credits: 3

Maximum Credits: 3

Topics include a description of the method in one, two and three dimensions, variation and minimum energy principles, implementation and discussion of the necessary data structure and evaluation of the errors. Possibly a special topic such as applications to fluid dynamics will be done.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3225 - MATHEMATICS OF FINANCE 1

Minimum Credits: 3

Maximum Credits: 3

A mathematical introduction to the pricing of options and other derivative securities, portfolio theory and risk management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3226 - MATHEMATICS OF FINANCE 2

Minimum Credits: 3

Maximum Credits: 3

This course will investigate the mathematical modeling, theory and computational methods in modern finance. It will treat mathematical models for financial risk factors, pricing of options and other derivative securities, basic portfolio theory and elementary risk management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3227 - MATH FINANCE 3

Minimum Credits: 3

Maximum Credits: 3

This course covers special topics in mathematical finance. Topics will include: extensions of the black-Scholes model to alternative stochastic processes, risk management, models for credit risk and credit derivatives, American options, portfolio selection and derivatives pricing under transactions costs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3228 - MATHEMATICS OF FINANCE 4

Minimum Credits: 3

Maximum Credits: 3

This course covers advanced topics in modern mathematical finance. Topics will include: advanced credit risk and interest rate models, stochastic control and stochastic optimization models for portfolio selection and option pricing, and numerical methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3370 - MATHEMATICAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

Course covers computational and mathematical neuroscience. It will do modeling and analysis of complex dynamics of single neurons and large-scale networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3375 - COMPUTATIONAL NEUROSCIENCE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course offers an introduction to modeling methods in neuroscience. Topics range from modeling the firing patterns of single neurons to using computational methods to understand neural coding. Some systems level modeling is also done.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3380 - MATHEMATICAL BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course introduces a number of modeling methods for biological systems. We will examine a number of problems from cell biology, immunology, population biology, physiology and molecular genetics. The main tools will be techniques from ordinary and partial differential equations. Discrete and delay-differential equations will also be used however the background for these will not be assumed. We will take models from current and classic papers in the field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3436 - FIXED POINTS WAVELETS & FRACTALS

Minimum Credits: 3

Maximum Credits: 3

The course will cover iterative image reconstruction using the wavelet transform, initiated by Mallat and Zhang.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3437 - FRAMES, WAVELETS AND SIGNAL PROCESSING

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the theory and application of Hilbert and Banach frames and wavelets, from the original work of Duffin and Schaeffer on frames of exponentials, through the work of Daubechies and Mallat on wavelet bases, biorthogonal systems and frames; and their application to signal and image processing ideas from electrical engineering. The recent interesting work of Grochenig, Casazza and others on Hilbert and Banach space frames --- which are generalized bases, where the assumption of linear independence is dropped --- will also be discussed. We will also discuss work of Grafakos and myself on a Gabor frame characterization of $L^p(\mathbb{R}^n)$, $1 \leq p < \infty$.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3440 - FIXED POINT THEORY IN BANACH SPACES

Minimum Credits: 3

Maximum Credits: 3

We will begin with an overview of basic fixed point theory in banach spaces, from the banach contraction mapping theorem and schauder's theorem through to kirk's theorem. The course will continue with topics in metric fixed point theory and its connections to banach space geometry and topology. This will include recent work of pei-kee lin, who showed that there exists a non-reflexive banach with the fixed point property for nonexpansive mappings; and tomas dominguez benavides, who proved that every reflexive banach space can be equivalently renormed to have the fixed point property for nonexpansive mappings. We will also discuss extensions of Lin's work to the function space L^1 by Maria Japon Pineda and Carlos Hernandez Linares. The course will further include some of my (joint) research in this area, and related research of other authors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3460 - HARMONIC ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The course will cover basic topics in harmonic analysis of euclidean spaces and it will include fourier series, maximal functions, interpolation, fourier transform, singular integrals and littlewood-paley theory. The students need to be familiar with measure theory and basic functional analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3550 - LIE GROUPS AND LIE ALGEBRAS

Minimum Credits: 3

Maximum Credits: 3

This course will cover the basic properties of lie groups and lie algebras. Also the basic classification of simple lie algebras and lie groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3600 - TOPICS IN PURE MATH

Minimum Credits: 3

Maximum Credits: 3

This course covers special topics in pure mathematics. The subject matter varies each semester. Topics may include the theory of modular forms, automorphic representations, Galois representations, class field theory, trace formula, special topics in algebraic geometry, the Langland's program, discrete and algorithmic geometry, motivic integration, and the formalization of pure mathematics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3650 - TOPICS IN SYMPLECTIC GEOMETRY

Minimum Credits: 3

Maximum Credits: 3

This course will cover topics in symplectic geometry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3760 - TOPICS IN TOPOLOGY

Minimum Credits: 3

Maximum Credits: 3

Topics will include topological algebra, especially non metric topological groups, and topological semi-groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3761 - TOPICS IN TOPOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

The course will be concerned with topics of current research activity in analytic topology, especially in the areas of generalized metric spaces and topological algebra.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MATH 3900 - INTERNSHIP

Minimum Credits: 1

Maximum Credits: 9

Internship and/or employment experience under the supervision and oversight of a faculty member. This experience is to be an integral part of the student's individual course of study.

Academic Career: Graduate

Course Component: Internship
Grade Component: Grad SN Basis

MATH 3902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9

This is a course of directed study under a faculty member covering a topic of special interest which is not normally in the curricula.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

MATH 3923 - TOPICS PARTIAL DIFFERENTIAL EQNS

Minimum Credits: 3
Maximum Credits: 3

This course will explore recent developments in the theory of partial differential equations centered on the notion of viscosity solution. After a review of Hamilton-Jacobi equations, we will discuss how they can be used as a substitute for convolution in non-linear problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3935 - TOPICS IN APPLIED MATHEMATICS

Minimum Credits: 3
Maximum Credits: 3

After briefly introducing very elementary theory of asymptotic expansions, the course will focus on its applications. In particular, boundary layer expansion, interior inter facial layer expansion, as well as multi-scale expansion techniques will be quite detailed by examples of a number of up-to-date research problems.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MATH 3940 - APPLIED ANALYSIS 1

Minimum Credits: 3
Maximum Credits: 3

Methods will be developed to analyze the behavior of bumps and waves in integral models arising in neuroscience, and also in reaction-diffusion biological type models.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

Mechanical Engineering

ME 2001 - DIFFERENTIAL EQUATIONS

Minimum Credits: 3
Maximum Credits: 3

Ordinary differential equations; series solutions of differential equations; introduction to partial differential equations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2002 - LINEAR AND COMPLEX ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

Linear algebra; vector analysis; complex variables; intro to calculus of variations.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PROG: Swanson School of Engineering

ME 2003 - INTRODUCTION TO CONTINUUM MECHANICS

Minimum Credits: 3

Maximum Credits: 3

The fundamental concepts of continuum mechanics are necessary for studying the mechanical behavior of solids and fluids. Includes a review of vectors and tensors; stress; strain and deformation; general principles in the form of balance laws; constitutive equations and their restrictions; and specialization to the theories of linearized elasticity and fluid mechanics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2004 - ELASTICITY

Minimum Credits: 3

Maximum Credits: 3

Fundamental concepts of stress and strain. Linear theory; boundary-value problems of elasticity, including plane stress, plane strain, torsion, and flexure. Elementary variational theory of elasticity.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: ME 2003; PROG: Swanson School of Engineering

ME 2005 - STRUCTURE OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of crystallography; lattice geometry; Bravais lattices; crystal systems; stereographic projection; point and space groups; symmetry elements; tensor properties of crystals; physical properties; elasticity of crystals; introduction to diffraction by crystals; reciprocal lattice; Ewald construction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2007 - ELEMENTS OF MATERIAL SCIENCE AND ENGINEERING 1

Minimum Credits: 3

Maximum Credits: 3

This course is primarily designed for graduate students entering the program without a degree in a field of materials engineering. Bonding and structure of materials; thermodynamics and phase diagrams; imperfections in crystals; and rate processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2009 - PROCESSING OF MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course is primarily designed for graduate students entering the program without a degree in a field of materials. Alloy design, strengthening mechanisms, mechanical properties: plastic deformation, mechanical properties and microstructure control; high temperature deformation, grain size control during reheating and during deformation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2010 - NANOMECHANICS, MATERIALS AND DEVICE

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction for current nanotechnology and fundamentals for Nano engineering. It mainly contains three areas: Nano mechanics, nanomaterials and nanoscale devices. In Nano mechanics, it covers Nano indentation mechanics, thin film mechanics and one dimensional nanowire mechanics, Nano crack mechanics, deformation in nanomaterials. Nano mechanical model will be emphasized. In nanomaterials, it covers carbon nanotube, one dimensional semiconducting nanowires & Nano multilayers as well as nanostructured composites. Novel property/phenomena reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2011 - FUNDAMENTALS OF MICRO AND NANOMANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2015 - HUMAN ROBOTICS AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course is intended for graduate students interested in human movement control. The engineering framework from robotics controls, and filtering will be widely employed to model human movement and its control. These concepts will be merged with neurophysiology and computational neuroscience to understand adaptability in human motor control and its applications to neuro-rehabilitation. The course will introduce dynamic modeling of human limbs, internal models for movement control, sensorimotor integration using optimal filtering, neurophysiology of locomotion, and motor skill learning in able-bodied persons and persons with mobility disorders the course will be helpful for students who want to pursue a career in robotics and control for neuro-rehabilitation. The course will also be valuable to students who are curious about robotics, control, and estimation theory

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2020 - MECHANICAL VIBRATIONS

Minimum Credits: 3

Maximum Credits: 3

Analysis of linear and non-linear multi-degree of freedom systems. Lagrangian formulation, model analysis, lumped parameter analysis of discrete systems, and continuous system vibrations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2022 - APPLIED SOLID MECHANICS

Minimum Credits: 3

Maximum Credits: 3

Stress and strain transformations; applied elasticity problems in torsion and plane problems; thermal stresses and elementary plasticity; energy methods; fundamentals of finite element methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2027 - ADVANCED DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Variational principles, Lagrangian and Hamiltonian formalisms, kinematics and dynamics of rigid bodies, first integrals, Routh's method, stability, canonical transformations, the Hamiltonian-Jacobi theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2033 - FRACTURE MECHANICS FOR PRODUCT DESIGN AND MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

Failure of manufactured products in service, implications for design. Energy release rates, toughness, evaluation of experimental tests. Fracture mechanisms in different material systems. Damage tolerance. Fracture control. Design studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2042 - MEASUREMENT AND ANALYSIS OF VIBRO-ACOUSTIC SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course will present measurement and analysis techniques for dynamic systems, with particular emphasis on mechanical vibrations and acoustics. Background on vibration of lumped and continuous parameter systems, acoustics, and noise and vibration control will be given. Other concepts include FFTs, windowing, input/output relationship calculations, test methods, transducers, instrumentation, and the use of dynamic signal analyzers. Application to system identification and modal analysis will be included, as well as hardware demonstrations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2045 - LINEAR CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course builds upon the foundation laid in a classical feedback control course. The tools will be developed for analyzing and designing controllers for multi-input, multi-output dynamic systems. Ideas of controllability and observability will be discussed, as well as modern control design techniques such as pole-placement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2046 - DIGITAL CONTROL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides the student with the tools necessary to analyze and design discrete-time (digital computer) control systems for real-time control of dynamic systems. It builds upon the background of classical control topics including Nyquist, bode, and root locus, and transform ideas will be used extensively for design and analysis to give the student an understanding of how discrete-time and classical control systems are related. State-space representations will be used for MIMO systems, so a prior understanding of modern control ideas is important.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2047 - FINITE ELEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Development of elements from variational principles and application to static continuum problems. Introduction to techniques for dynamics, stability, and generalized field problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2048 - ENGINEERING ALLOYS FOR CONSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to understand modern metallic alloys used in construction. To accomplish this goal, the following sequence is offered: review of physical metallurgy principles: thermodynamics, kinetics, phase diagrams and phase transformations; microstructure and properties of stainless steels, aluminum alloys, titanium alloys, nickel and cobalt-based super alloys and alloys for nuclear core applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering (PENGR)

ME 2049 - THERMAL MANAGEMENT IN ELECTRONIC SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course reviews the prevalent thermal management techniques commonly employed to mitigate overheating of electronic systems. The primary goal of this course is to gain fundamental understanding of the following topics: thermal spreading, contact resistance, free and forced convection, radiation, fins and heat sinks, phase change materials, boiling/condensation/immersion cooling, jet impingement, heat pipes, and microchannels. The secondary goal is to acquire the ability to apply this knowledge to real applications including computing and communication systems as well as military and medical electronic systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2050 - THERMODYNAMICS

Minimum Credits: 3

Maximum Credits: 3

Detailed presentation of the conceptual foundations of thermodynamics. Energy and the first law of thermodynamics. The second law of thermodynamics and entropy. Thermo-physical properties of pure substances. Energy conversion systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2053 - HEAT AND MASS TRANSFER

Minimum Credits: 3

Maximum Credits: 3

Steady state and transient conduction in solids. Conservation laws of mass, momentum, and energy. Forced and free convection heat transfer; condensation and boiling; thermal radiation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2055 - COMPUTR ANAL TRANSPORT PHENOMENA

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to implementation of some of the numerical/computational methods for solving problems in transport phenomena. Fields described by linear and non-linear ordinary differential equations (initial and boundary value problems), and partial differential equations (elliptic, parabolic and hyperbolic) will be considered by means of various examples from fluid dynamics, heat and mass transfer, and combustion. Numerical discretization techniques based on finite difference methods (FDM) will be the subject of main discussions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2056 - INTRO TO COMBUSTION THEORY

Minimum Credits: 3

Maximum Credits: 3

Covers the general solution techniques associated with combustion phenomena as well as chemical thermodynamics, heat and mass transfer, laminar flame theory, one dimensional reactive flow, heterogeneous combustion, and turbulent combustion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2060 - NUMERICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduction to numerical techniques for the solution of linear and non-linear equations, numerical integration and differentiation, interpolation, ordinary and partial differential equations, and eigenvalue problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2062 - ORTHOPAEDIC ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

This is an advanced course that applies mechanics of materials, material failure theories and rigid body dynamics to orthopedic device design, tissue mechanical modeling and surgical procedure evaluation. The course is meant to provide an introductory background to engineering aspects of orthopedic medicine and biomechanics for students preparing for medical school, positions in the medical device industry or graduate studies in this field.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2067 - MUSCULOSKELETAL BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Course work will include the structure, function, and mechanics of the musculoskeletal system. Specific topics will include the kinematics and control of human movement and the mechanics of the musculoskeletal connective tissues, such as ligament, tendon, bone, cartilage, and muscle. Special emphasis will be placed on the relationship between function and material properties of these tissues. A research paper will be required as a term project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2070 - MICROFLUIDICS

Minimum Credits: 3

Maximum Credits: 3

The basic hypotheses in the macro-scale fluid mechanics may no longer be applicable in micro or even smaller scale. The objectives of this course are: to identify dominant forces and their effects in micro-scale fluid systems that are different from those in the macro-scale; to understand the fundamentals of micro fluidic phenomena; to discuss various micro fluidic applications in research and commercial levels and to explore new possible microfluidic applications in the emerging fields.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2074 - ADVANCED FLUID MECHANICS 1

Minimum Credits: 3

Maximum Credits: 3

Kinematics of fluids, Eulerian and Lagrangian descriptions, continuity, stream and potential functions, stress and rate of strain relation, derivations of Navier stokes and energy equations, some exact solutions, boundary layer theory, turbulent flows.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2082 - ELCTRMECHL SENSORS & ACTUATORS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to provide a thorough understanding of the various mechanisms that can be exploited in the design of electromechanical sensors and actuators. These transduction mechanisms include: 1) transduction based on changes; in the energy stored in the electric field, 2) in the energy stored in the magnetic field, 3) piezoelectricity and pyro electricity, 4) linear inductive transduction mechanisms, and 5) resistive transduction mechanisms. Will discuss various transduction materials, sensors and actuators from a wide range of applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2084 - INTRODUCTION TO POLYMER SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to basic concepts of polymer science. Kinetics and mechanism of polymerization, synthesis and processing of polymers. Relationship of molecular conformation, structure and morphology to physical and mechanical properties. Structural and physical aspects of polymers. Molecular and atomic basis for polymer properties and behavior. Characteristics of thermoplastic and thermoset polymers for single and multicomponent systems. Understanding of the viscoelastic and relaxation behavior of single and multicomponent systems. Thermodynamics and kinetics of transition phenomena. Structure, morphology and behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2085 - GRADUATE SEMINAR

Minimum Credits: 0

Maximum Credits: 0

Designed to acquaint graduate students with various subjects in advanced mechanics and graduate-level current research in mechanical engineering; aspects of graduate-level engineering and applied mechanics not normally encountered in classes.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2086 - MECHANICS OF 3D PRINTED MATERIALS AND STRUCTURES

Minimum Credits: 3

Maximum Credits: 3

This course covers the mechanics of materials and structures fabricated by 3D printing. Topics to be covered include various 3D printing processes and materials, effects of process parameters and printing direction on mechanical behavior, microstructure-mechanical property relationships, constitutive models, etc. The difference between 3D printing and traditional materials will be highlighted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2087 - STRUCTURAL TOPOLOGY OPTIMIZATION FOR ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

This course introduces structural topology optimization and teaches the related problem solution skills. Specific methods including SIMP (Solid Isotropic Material with Penalization), level set method, and PTO (proportional topology optimization) will be explained in depth. Topics to be covered include the different types of topology optimization problems (compliance-minimization, stress-constrained, natural frequency design, etc.), multi-material topology optimization, multi-scale topology optimization and meta-material design, etc. Applications will be focused on addressing manufacturability issues in order to produce manufacturing-friendly design solutions. With regard to design optimization for additive manufacturing (or 3D printing), various important topics will be covered, including lattice structure design, self-support structure and infill design, material anisotropy issue, hybrid manufacturing part design, etc. Homework assignments and projects will focus on implementing basic topology optimization algorithms and performing design optimization using a commercial tool for additive manufacturing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2047 and 2060 and 2022 and 2003 and 2004

ME 2089 - RAPID PROTOTYPING TO ADDITIVE MANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

In this course we will analyze the seven primary types of additive manufacturing, their materials, and machines, highlighting their benefits and limitations. Examples of industrial applications will be given along with ongoing research trends and future directions. Labs will focus on design for additive manufacturing, data capture and input, machine setup, and post processing. Field trips will include observation of machine building and part production at some local industries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2094 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide students who are engaged in thesis or dissertation research an opportunity to participate in an internship with an external organization (industry or government laboratory). The internship must be related to the thesis or dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

ME 2095 - GRADUATE PROJECTS

Minimum Credits: 1

Maximum Credits: 15

A special problems or reading course of individual study guided by the student's major adviser. Topics selected from any phase of mechanical engineering not covered in the regular M.S. - Level course. This course serves as comprehensive examination for non-thesis programs.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

ME 2096 - MS/MBA INTEGRATED PROJECTS COURSE

Minimum Credits: 2

Maximum Credits: 2

This is the integrated projects course for MS/MBA majors. The project will be jointly overseen by KATZ and SSOE. A 1-2 page proposal is due at the beginning of the term, followed by a final report. The project should blend the student's business and engineering skills. Prerequisites: approval of advisor and graduate director.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2097 - SPECIAL STUDY MECHANICAL ENGRG

Minimum Credits: 3

Maximum Credits: 3

Special topics of particular importance to an individual's plan of study.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

ME 2100 - FUNDAMENTALS OF NUCLEAR ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to application of theory to practical aspects of nuclear science and technology. It is intended as a ramp-up course for non-nuclear engineers who wish to pursue a graduate level certificate in nuclear engineering at the University of Pittsburgh. Graduate level content will be assured by use of open-ended assignments and group discussions via an electronic blackboard. The course is designed to accommodate working adults who must travel from time to time. Topics will include: 1. Introduction: a grand tour of the nuclear fuel cycle 2. Power reactors and nuclear systems 3. Atomic and nuclear physics: the Einstein connection 4. Nuclear reactions and radiation: the life and trials of a neutron 5. Radiation and radiation protection: radiation and realism 6. Nuclear reactor theory: from complex to simple 7. Reactor kinetics and control: thanks for delayed neutrons 8. Reactor energy removal: the balance between resilience and power density 9. Power conversion systems and the balance of plant: from neutrons to electricity 10. Reactor accidents and lessons learned.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2101 - NUCLEAR CORE DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

This course reviews the mathematics of nuclear reactor kinetics. Linear systems of ordinary differential equations are solved by state vector techniques, laplace transform techniques, or finite difference techniques including the treatment of discretization errors resulting from various finite differencing approximations. A review of the physics of nuclear kinetics is followed by treatments of the kinetics equations including the effect of uncertainties, approximate solutions, and the interpretation of experiments to measure kinetics parameters. Representations and the physical basis of reactivity feedback mechanisms are treated. Lumped and distributed parameter models of fuel, coolant, fission products are derived and applied to develop quantitative static relationships and qualitative dynamic results for transient conditions. The course provides an introduction to space dependent reactor kinetics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2102 - NUCLEAR PLANT DYNAMICS AND CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course provides an integrated engineering examination of a nuclear power plant from the perspective of instrumentation and control systems used to infer the condition of the nuclear plants and its systems, control its normal operation, and provide protection during transient situations as well as assess core damage during severe accident situations. Students will apply previous knowledge of analog, digital, and microprocessor electronics techniques to nuclear power plant design and operation and reactor protection and safety considerations that influence the design of the reactor plant. A major outcome of this course will be an integrated understanding of the interaction between the physics of nuclear plant control (reactivity and heat balance) and the control and protection systems. This integrated plant understanding will be essential for the successful completion of the integrated nuclear power plant operations course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2103 - INTEGRATION OF NUCLEAR PLANT SYSTEMS WITH THE REACTOR CORE

Minimum Credits: 3

Maximum Credits: 3

This course examines design bases for major systems and components in a nuclear plant and evaluates how the systems function in an integrated fashion. The student will examine a typical nuclear power plant and those components and systems of the nuclear plant complex that have the potential for affecting core power, and whose failure could be an initiating event for a plant transient. Dynamic relationships for the systems developed in the companion nuclear courses will be transformed into stable, numerical algorithms for computer solutions and system interactions will be illustrated using a major industry transient analysis code. Emphasis is on how operations of and faults in systems and components can influence reactivity and core behavior. Through classroom discussions the students will assess engineering problems and operational problems that have been experienced in historical nuclear plant operations. The intended outcome is an aptitude for predicting complex transient behavior of the integrated nuclear plant considering factors that are important for safe and efficient operation: reactivity management and control, coolant inventory control, and core heat removal.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2104 - NUCLEAR OPERATIONS AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

This course reviews the development of reactor safety concepts, the emergence of safety strategies and culture, and the perspectives of severe accidents and how they can be mitigated. Risk-influenced regulatory practices will be introduced and quantitative use of probabilistic risk assessment will be described in terms of its use as a guide to intelligent decision-making. The characteristics of accident progression in the reactor vessel and containment in the unlikely event of core melting and relocation of fuel material will be explained. Offsite impacts of such severe accidents will be introduced. Source terms, dispersion of radionuclides, and dose projections will be developed for both conservative and realistic evolutions. Protective actions and emergency preparedness will be introduced. This course will cover the regulatory aspects of nuclear operations and the roles that the NRC, INPO, WANO and the IAEA play and what impact each has on plant operations. An introduction into regulatory requirements, the safety analysis report, nuclear safety and licensing, and whistle-blower rules will be provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2105 - INTEGRATED NUCLEAR POWER PLANT OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

This course promotes understanding of how the integrated nuclear plant works and what challenges the operator faces, and helps an engineer 'speak operations' with interfacing groups. Use of the replica simulator is an effective way for students to understand accident control, emergency operating procedures, and how the control room interfaces with the rest of the plant. Emphasis is placed on understanding plant characteristics and controls, rather than on developing control manipulation skills. Intended outcomes are an aptitude for predicting transient behavior of the integrated plant and a command of reactivity management and control that is important for efficient operation of a nuclear plant complex. The course presumes knowledge of the major systems in a nuclear power plant and will emphasize how operations of and faults in those systems and components can affect reactivity and core transient behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2106 - NUCLEAR QUALITY ASSURANCE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

An introduction to the basic concepts of nuclear quality assurance through a series of case studies of the 18 criteria of NQA-1, 10CFR50 appendix B and other applicable standards that govern work in the construction, service and the supply of safety related items to support the nuclear industry. There will be a concentration of pragmatic examples of what to expect as engineers in support of nuclear power plants. These lectures will highlight such topics as the following: small modular reactors, new passive system designed in the new generations of nuclear power plants, relationships with the NRC, authorized nuclear inspectors, and the nation board, what to expect with respect to acquiring patents and your registered professional engineer qualifications, what is critical to know about non-destructive examinations, software control and validation and verification requirements, an introduction to auditing, welding and other special processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2107 - HIGH PERFORMANCE COMPUTING ALGORITHMS AND METHODS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to solve complex physical problems using algorithms developed for supercomputing platforms. The course will introduce key concepts in the field of high performance computing, including how to design algorithms. The theoretical concepts will be tied directly to practical applications in the field of science and engineering such as radiation transport, heat transfer, and acoustics. Particular attention will be devoted to hardware selection for supercomputing applications, and will cover the concept and utilization of "open source" libraries, a key component for rapid algorithm development in today's scientific environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2110 - NUCLEAR MATERIALS

Minimum Credits: 3

Maximum Credits: 3

This course presumes that students have the knowledge base needed to understand materials issues associated with the design and operation of nuclear power plants, such as basic concepts of physical metallurgy, a mechanistic and microstructural-based view of material properties, and basic metallurgical principles. This course will cover the metallurgy and phase diagrams of alloy systems important in the design of commercial nuclear power plants. The micro-structural changes that result from reactor exposure (including radiation damage and defect cluster evolution) are discussed in detail. The aim is to create a linkage between changes in the material microstructure and changes in the macroscopic behavior of the material. Also discussed is the corrosion of cladding materials as well the effects of irradiation on corrosion performance, as well as the effects of primary and secondary coolant chemistry on corrosion. Both mathematical methods and experimental techniques are emphasized so that theoretical modeling is guided by experimental data. Materials issues in current commercial nuclear reactors and materials issues in future core and plant designs are covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2112 - NUCLEAR CHEMISTRY AND RADIOCHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

Nuclear and radiochemistry are subdisciplines of nuclear science that focus on the study of radioactive materials and their applications. The course will provide students with knowledge of fundamental nuclear science concepts that are key to the understanding of nuclear power plant safety, spent fuel and nuclear waste management, nuclear fuel reprocessing, environmental radioactivity, nuclear forensics, radionuclide production, medical imaging, nuclear pharmacy, and medical and health physics. The proposed course will consist of lectures on nuclear science fundamentals that include: atomic structure, nuclear models and properties, phenomenon of radioactive growth and decay, radiation emissions, nuclear reactions, radiation interactions with matter, radiation detection and measurement, radiation dosimetry and biological effects, and applications of nuclear and radiochemistry in science, engineering, and medicine.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2113 - RADIATION DETECTION AND MEASUREMENT

Minimum Credits: 3

Maximum Credits: 3

This combined lecture and laboratory course will provide students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical basis of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: ME 2100 or ENGR 2100; PROG: Swanson School of Engineering (PENGR)

ME 2115 - HEAT TRANSFER AND FLUID FLOW IN NUCLEAR PLANTS

Minimum Credits: 3

Maximum Credits: 3

This course provides advanced knowledge to promote understanding and application of thermal and hydraulic tools and procedures used in reactor plant design and analysis. It assumes that the student has a fundamental knowledge base in fluid mechanics, thermodynamics, heat transfer and reactor thermal analysis. The focus of the course is on physical and mathematical concepts useful for design and analysis of light water nuclear reactor plants. Applications of mass, momentum, and energy balances are combined with use of water properties to analyze the entire reactor plant complex as a whole. Principles are applied through the application of major industry codes to specific cases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2116 - BOILING WATER REACTOR THERMAL-HYDRAULICS AND SAFETY

Minimum Credits: 3

Maximum Credits: 3

BWR thermal-hydraulics and safety is a course that focuses on the boiling water reactor (BWR), design, operation, transient response, and abnormal operating conditions and accidents; boiling water heat transfer and two-phase flow; applications with respect to the Fukushima Dai-ichi BWRs. The course will cover the evolution of BWR systems including BWR features and characteristics and containment configurations. Basic thermal-hydraulics (T/H), boiling heat transfer and two-phase flow in BWR systems, T/H performance and thermal limits, BWR abnormal operating conditions and accidents including accident evaluations and overview of the state-of-the-art safety analysis techniques will be the focus of this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2118 - COMPUTATIONAL RADIATION TRANSPORT

Minimum Credits: 3

Maximum Credits: 3

This course provides an in-depth review of modern computational techniques used for solving the linear boltzmann equation, with specific applications to neutron and photon radiation transport problems. Topics to be covered include: an introduction to the physical processes that govern radiation transport through materials, monte carlo methods for the simulation of radiation transport, a first-principles derivation of the boltzmann radiation transport equation for multiplying and non-multiplying systems, the multi-group, diffusion, and discrete ordinates approximations to the transport equation, expansion of the scattering kernel in legendre polynomials, and numerical methods for approximating solutions to the transport equation. In addition, the course will review many commonly used numerical methods for solving integral and differential equations, including: finite differencing, numerical quadrature, harmonic analysis, and the power method for solving eigenvalue problems. Topics covered in the class will be reinforced with weekly programming exercises designed to illustrate the different methods for solving the boltzmann radiation transport equation and demonstrate how these methods can be used to solve realistic problems related to nuclear reactor and radiation shielding analysis. The course will also place a strong emphasis on formal quality assurance methods (and best-practices) for the development, verification, and validation of scientific computer codes intended for use in engineering design calculations of record.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2120 - MATHEMATICAL MODELING OF NUCLEAR PLANTS

Minimum Credits: 3

Maximum Credits: 3

Graduate students will develop the graphics/simulation framework and the underlying mathematical models for simulating nuclear power plants in ME/ENGR 2120 mathematical modeling of nuclear plants. Models will be developed in Matlab/Simulink(tm) and configured to run on a PC so that students can both examine the mathematical models on which the simulation is based and use the simulation program in laboratory-like sessions to study the effect of design changes on plant behavior. The simulation model fidelity developed is suitable for educational purposes and provides students with a desktop tool to realistically model and better understand reactor performance under various conditions. While it would not be intended to replace or duplicate the high-fidelity dynamic simulation used in major accident analysis codes such as Relap, Trac, and Trace, the course will provide the student with an introduction and a working knowledge what is embodied in these industry standard codes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2122 - MANAGEMENT PRINCIPLES IN NUCLEAR POWER

Minimum Credits: 3

Maximum Credits: 3

This course will teach management theory and best practices associated for a successful manager in the nuclear industry. The following topics presented and discussed: management theory and practice; ethics; generation economics across the U.S.; dispatch curves; implications of economic factors for existing and new nuclear plants and likely future changes; compensation theory and best practices; labor law issues and challenges common to the nuclear industry; contract law issues and challenges in the nuclear industry; management techniques for dealing with the diverse age groups; change management techniques and best practices in corporations; ethics challenges and issues in the nuclear field; management interactions with inpo and the nrc; project management techniques and practices; management's role in nuclear safety and security culture. Case studies of actual business situations will be studied.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2125 - CASE STUDIES IN NUCLEAR CODES AND STANDARDS

Minimum Credits: 3

Maximum Credits: 3

Presentation of major issues associated with systems and component engineering relative to the nuclear power industry and the industry's consensus codes and standards. The course provides an explanation of the necessity of consensus codes and standards, a high-level view of codes and standards organizations, and shows how codes and standards promotes the safe operation of nuclear power plants. The course discusses how the NRC adopts and makes use of consensus codes and standards. It covers codes and standards for current, advanced and next generation, and high-temperature reactors, including global conformity assessment requirements. Relevant codes and standards from other communities, including nuclear quality assurance, are also summarized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2130 - NUCLEAR FUEL CYCLE AND ENVIRONMENTAL ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course will be developed in conjunction with university of Pittsburgh faculty with an interest in environmental issues impacting the nuclear power industry including school of engineering faculty involved with the Mascaro sustainability initiative, faculty from the department of civil and environmental engineering and faculty from the graduate school of public and international affairs. The course will address such topics as sustainable energy resources, engineering and societal ethical concerns, risk analysis, and future energy supplies in general and as each of these topics relates to such specific issues as the nuclear fuel cycle, nuclear reactor safety, nuclear waste disposal and transportation, and gen iv and the hydrogen economy. Students will better understand the socio-economic issues surrounding achieving a sustainable nuclear power future as it impacts fuel acquisition, plant operation and waste disposal.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (ME 2100) or (ENGR 2100); PROG: Swanson School of Engineering (PENGR)

ME 2201 - BIOMATERIALS AND BIOMANUFACTURING

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide students having a background in biomaterials and bio manufacturing with an opportunity to learn about the many modern aspect of biomaterials from basic science to clinical applications, across the formulations and chemistry of polymers, ceramics, metals and their use in various biomedical devices and implants, as well as their clinical performance and host responses. Students will also gain knowledge and experiences with designing and manufacturing biomedical devices through team projects. This one-semester, graduate course is intended for students majoring in the industrial engineering, or those who contemplating such a major (or minor). Students enrolled in the class should have an understanding of various biomaterials, and the ability to understand biological phenomena and manufacturing processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2222 - NANOSCALE MODELING AND SIMULATION: MOLECULAR DYNAMICS

Minimum Credits: 3

Maximum Credits: 3

The course covers the essentials of molecular dynamics simulation by integrating theories from dynamics, statistical mechanics, thermodynamics, continuum mechanics, and quantum mechanics. Topics include heat bath methods, time integration methods, accelerated methods, and different applications related to nanotechnology. Students gain hands-on experience using state-of-the-art simulation software.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 2223 - NANOSCALE MODELING AND SIMULATIONS:

Minimum Credits: 3

Maximum Credits: 3

This course teaches the essentials of nanoscale modeling and simulations, which concerns the use of modern computational tools to the analysis of materials at the nanoscale. The current emphasis of this course is on first-principle density functional theory (DFT) calculation method. The course covers topics on basic quantum mechanics, fundamentals of DFT, statistical mechanics, thermodynamics, and continuum mechanics, and their role in atomistic scale modeling and simulation. Crystal structure, mechanical properties, structural defects, and electronic structures of materials as well as techniques for modeling them are also discussed. The course consists of a term project, in which students perform modeling and simulation of a nanomaterial system of their choice and analyze simulation results by visualization and data mining methods using software provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Swanson School of Engineering

ME 2227 - FINITE ELEMENT ANALYSIS 2

Minimum Credits: 3

Maximum Credits: 3

This course builds upon material given in an entry level finite element course. Variational principles are introduced and used to derive element quantities. The theory and methods for the development of advanced continuum and beam and plate elements are covered.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad Letter Grade

ME 2247 - INTRODUCTION TO NONLINEAR CONTROL DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is devoted to Lyapunov-based control design for nonlinear dynamical systems. Mainly, this course is developed as an introduction to nonlinear control. In the beginning, the course will emphasize the drawbacks of linearization and richness of nonlinear phenomena compared to linear dynamics. A brief introduction to study qualitative behavior of linear and nonlinear systems using phase portraits will also be provided. These topics will be used as motivations for this course where main topics include: Lyapunov stability analysis for autonomous and nonautonomous systems, input-output stability, Barbalat's lemma, feedback linearization, and nonlinear control design tools such as Lyapunov redesign, sliding mode control, integrator backstepping, and other robust and adaptive control methods. If time allows, we will cover nonlinear control design methods for dynamical systems with delays. The content will be mathematical supplemented with application examples taken from robotics and human musculoskeletal system. Prerequisites for the course include an understanding of undergraduate calculus, linear algebra, and linear control methods (ME 2045). Students are also expected to be able to use some simulation software (e.g. Matlab).
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ME 2255 - TWO PHASE FLOW AND HEAT TRANSFER

Minimum Credits: 3
Maximum Credits: 3
This course is a graduate level course dealing with two-phase flow, boiling and condensation heat transfer in engineering systems. Physical phenomena and applications of various types of theoretical models to real systems will be emphasized. The real systems will be industries. Two-phase flow ranks as one of the more complex engineering problems. Two-phase flow combines all of the uncertainty of turbulent flow and the physical processes that occur at the gas-liquid interface.

ME 2801 - INTRODUCTION TO CYBER-PHYSICAL SYSTEMS

Minimum Credits: 1

Maximum Credits: 1

This course is an introductory course to be taken with hacking for defense (h4d). It will introduce lean startup concepts used (h4d), and will present fundamental and necessary background information in cyber-physical systems (more generally described as mechatronics and the internet of things). Topics covered include: embedded systems and micro-controllers, interfacing with physical systems, networks, communications, and mobile platforms.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 2811 - HACKING FOR DEFENSE

Minimum Credits: 3

Maximum Credits: 3

This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

Academic Career: Graduate

ME 3003 - THEORY OF CONTINUOUS MEDIA

Minimum Credits: 3

Maximum Credits: 3

Kinematics of deformation, compatibility, material rates, relative deformation. Analysis of stress; balance equations; constitutive relations for simple materials, isotropy groups; elastic solids, viscous fluids.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 3008 - FINITE ELASTICITY OF SOFT TISSUES

Minimum Credits: 3

Maximum Credits: 3

This team-taught course is designed as the second course in graduate biomechanics that applies and builds on the concepts of finite elasticity to study the constitutive response of various soft tissues. Course topics will include kinematics of large deformation, concepts of stress, thermodynamic principles, and development of constitutive relationships for hyperelastic materials. Isotropy,

transverse isotropy, incompressibility, viscoelasticity as well as isotropic damage will be discussed. Specific application areas will include the mechanics of three general types of primary load-bearing soft tissues: vascular, orthopedic, and reproductive.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 3023 - COMPOSITES

Minimum Credits: 3

Maximum Credits: 3

Anisotropic linear elasticity, laminates. Basic micromechanics; particulates reinforcement, polycrystalline aggregates, continuous fiber reinforced materials. The inclusion problem. Hashin-Shtikman bounds and estimates of overall moduli. Strength. Micro cracking and damage.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Minimum Credits: 3

Maximum Credits: 3

Global stability and uniqueness, Stuart-Landau theory, introduction to bifurcation theory, thermal instability, inertial instability, and stability of parallel shear flow.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 3079 - TURBULENCE

Minimum Credits: 3

Maximum Credits: 3

Definitions and equations of turbulent flow, correlations, scales of turbulence. Differential equations, spectrum and decay of isotropic turbulence. Nonisotropic turbulence, mathematical models, transport processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Swanson School of Engineering

ME 3090 - SPEC TOPICS IN MECHANICAL ENGRNG

Minimum Credits: 3

Maximum Credits: 3

Special topics of current interest to students and faculty given by a senior member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

ME 3095 - GRADUATE PROJECTS

Minimum Credits: 3

Maximum Credits: 3

A special problems or reading course of individual study guided by the student's major advisor. Topics selected from any phase of mechanical engineering not covered in the regular Ph.D.-Level course.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

ME 3100 - ENGINEERING RESEARCH LEADERSHIP AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ME 3997 - RESEARCH, PHD

Minimum Credits: 1

Maximum Credits: 12

Research methods and procedures for outlining methods of solution of research problems. Students are assigned problems and are required to submit an outline of attack and prepare a literature survey concerning a research problem that can meet the dissertation requirement.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

ME 3999 - PHD DISSERTATION

Minimum Credits: 1

Maximum Credits: 15

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Medical Education

MEDEDU 2005 - COMPUTER METHODS FOR CLINICAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to provide a concentrated introduction in the use of computers in the analysis of data from patient-oriented research. Specifically, participants will learn: principles of database design, methods for data manipulation, transformation, merging and subsetting descriptive statistics and exploratory data analysis, and graphical display of data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2010 - CLINICAL RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

Clinical research methods provides an overview of the basic research strategies, methods, and goals of clinical research. Topics include study design, data analysis and interpretation, and determination of appropriate methodologies to answer different research questions. Bias and confounding in observational research, the clinical value of diagnostic tests, appropriate use of cross-sectional, case control and cohort study designs, and various statistical modeling used in clinical research will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2020 - BIostatISTICS

Minimum Credits: 4

Maximum Credits: 4

This course focuses on basic concepts and statistical methods and their application to problems in the health and biomedical sciences. Topics include data description and summarization, basic probability theory, estimation, and hypothesis testing with emphasis on one- and two-sample comparisons involving continuous and categorical data. Linear regression and analysis of variance will be introduced. Students will develop their analytic skills through the analysis and discussion of large clinical studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: CLRES 2005; PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2040 - MEASUREMENT IN CLINICAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the general properties of good measurement integral to the research process. The domain sampling model is presented as the major theory of measurement error with the parallel test model presented as a special case of domain sampling model. The construct, criterion and content validity of psychosocial instruments are explored and methods for evaluating each of these relative to specific instruments are presented. A variety of scaling methodologies will be discussed as well as the principles involved in the design and formatting of questionnaires.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2045 - SURVEY DESIGN AND DATA ANALYSIS

Minimum Credits: 1

Maximum Credits: 1

Survey design and data analysis will provide information on the skills and resources needed to design and conduct survey and techniques of analyzing survey data. The skills include identifying and developing specific survey objectives, designing survey studies, sampling respondents, developing reliable and valid self-administered questionnaires, and administering surveys. The techniques of analyzing survey data include both classic methods such as factor analysis and advanced methods such as item response theory. A majority of lectures will focus on survey research, constructing surveys, response set, survey administration methods, questionnaire construction and programming surveys, sampling and power calculation, maximizing response rates, data coding and

entry, reliability and validity, survey data analysis, factor analysis and item response theory. The students will be introduced to the internet based survey and the computerized adaptive testing to broaden their scope of the current survey design and collection. I will use manuscripts of survey data and protocols of completed studies to facilitate learning of concepts discussed in class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: CLRES 2040 or MEDEDU 2040; PLAN: Medical Education (ACM or MS) or Clinical Research (ACM or MS) or Clinical and Translational Sci (PHD)

MEDEDU 2080 - MASTERS RESEARCH

Minimum Credits: 1

Maximum Credits: 3

Trainees may register for this course with approval from the mentor and selected faculty of the CEPT curriculum committee. Mededu 2080 is designed for trainees who are prepared to undertake their substantive research project or thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2100 - ENHANCING TEACHING SKILLS

Minimum Credits: 2

Maximum Credits: 2

This course will briefly review the basic principles of adult learning as they relate to clinician-educators but will devote the majority of the time to discussing, developing and advancing teaching skills of clinician educators. Topics will also include setting goals and expectations, feedback and evaluation and dealing with the student in need of remediation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2111 - FUNDAMENTALS OF ADULT LEARNING IN MEDICAL EDUCATION

Minimum Credits: 1

Maximum Credits: 1

Course objectives: at the completion of this course, participants will have demonstrated through class participation and written assignments: (1) knowledge of current research and theory on the adult learner and adult learning as they relate to the practice of adult education. (2) Understanding of theoretical basis of clinical reasoning and concepts of expertise. (3) Skill in the selection and use of theoretical foundation of learning as it applies to the context of medical education practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2120 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course will provide the future clinician educators information about challenges unique to their career path so that the physician is better prepared when starting his or her career. In addition, the course will provide specific skills to enhance the clinician educator's ability to set goals, demonstrate their suitability for promotion, manage time effectively, and function in leadership roles.

Academic Career: Graduate

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MEDEDU 2130 - CURRICULUM DEVELOPMENT & EVALTN

Minimum Credits: 1

Maximum Credits: 1

Course is designed to explore and develop the principles of curriculum design, implementation, and evaluation. Students will learn the fundamentals of developing goals and objectives; performing a needs assessment for curriculum development; designing the most efficient teaching strategy including lecture, workshop, and problem based learning sessions, evaluating student performance including both knowledge assessment and performance based assessment; evaluating faculty performance and course success; and finally strategies for grading.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2131 - STRATEGIES FOR DEALING WITH THE PROBLEM LEARNER

Minimum Credits: 1

Maximum Credits: 1

This course is designed to be a practical, hands on approach to dealing with students who present with learning difficulties. Both didactic instruction and small group problem solving for difficulty learners will be presented. The goals for the course are as follows 1) learn how to identify problem learners, 2) develop a differential diagnosis of problem learner behavior, 3) develop strategies for remediation and monitoring remediation, 4) review strategies for documentation and tracking of problem students and 5) review issues of competency and promotion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MEDEDU 2140 - MEDICAL WRITING & PRESENTATION SKILLS

Minimum Credits: 1

Maximum Credits: 1

The main objective of this course is to help students develop excellent medical writing and presentation skills. This objective will be achieved through a combination of lectures, readings and individual and small-group projects where students will practice specific skills. Students will have the opportunity to be videotaped while they present a talk and will receive anonymous written feedback.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2150 - MEDEDU:CUR PRACTICE & FUTR DRCTN

Minimum Credits: 1

Maximum Credits: 1

Course will provide an introduction to the forces shaping medical education in the U.S. The history of medical EDUC, its linkage to Medicare legislation, and the impact of managed care, cost reduction, and international graduates on the US GME and health care delivery will be reviewed. Current GME funding sources and financial issues will be discussed. Other topics include workforce needs, controls and projections, GME accreditation process, us medical school promotion and tenure criteria, and practical aspects of devising, running, funding and sustaining a house staff training program.

Academic Career: Graduate

MEDEDU 2170 - MAKING THE MOST OF MENTORING

Minimum Credits: 1

Maximum Credits: 1

We strongly believe that effective mentoring is the cornerstone of a successful academic career; whether it be in education, research, or clinical work. Good mentors are able to guide mentees as they attempt to navigate through the course of their careers. This course is designed to provide a basis for understanding the mentor-mentee relationship and provide strategies for making the most out of the experience, topics will include: communication and negotiation, the use of mentoring contracts, providing and accepting feedback, evaluating the mentoring relationship, and solving problems and meeting challenges. Fellows, post-docs, other ICRE trainees as well as junior faculty will discover useful ways to enhance the mentoring relationship and make it a rewarding experience for both mentees and mentors.

MEDEDU 2220 - TEACHING EVIDENCE BASED MEDICINE

Minimum Credits: 1

Maximum Credits: 1

Course will introduce the core concepts of evidence-based medicine and introduce methods to teach it in the clinical setting. The course will begin by reviewing the history of evidence-based medicine and clinical epidemiology & describe its rise to now become a new "paradigm of clinical practice". We will review the core concepts and practices of evidence-based medicine as they relate to clinical questions of therapy, diagnosis, prognosis and harm. We will then describe the current approaches to teaching evidence-based medicine and the literature to support those approaches.

Course Requirements: PLAN: Medical Education (CERT-Master's or MS), Clinical Research (CERT-Master's or MS), Clinical and Translational Sci (PHD)

MEDEDU 2260 - SEMINAR SERIES IN MEDICAL EDUCATION

Minimum Credits: 1

Maximum Credits: 1

This course allows students the flexibility to choose among 3 established seminar series in medical education and attend specific topics of interest and relevance to their teaching roles. The seminar series include: mermaid series: medical educational research methods and innovative design, academy of master educators (AME) seminar series, and medical education grand rounds. Specific information of dates and current and past topics for each series is contained on the individual websites. In order to receive the credit, the student is responsible to document attendance at 16 sessions. In order to promote active learning and enhance the relevance of the topics to the individuals' teaching roles, enrollees for this course will be required to choose one skill or learning point from the any of the 16 sessions attended. The enrollee will then provide a one page (maximum) description on how this was implemented in one of their specific teaching assignments or activities and describe its outcome. This needs to be completed prior to credit allocation and submitted to the course director.

Medical Elective

MSELCT 5100 - PSTP PROFESSIONAL DEVELOPMENT 1

Minimum Credits: 0

Maximum Credits: 0

This course is designed for entering PSTP students. The purpose of this course is to highlight contemporary questions in biomedicine and how different scientific fields approach these questions. After surveying appropriate background material the students analyze scientific papers from the primary literature under the mentorship of different department faculty. Presentation of these papers provides a forum for discussion of experimental design, technique, laboratory and clinical observations. Exposure to different departments and faculty will help the students select laboratories for the summer rotations and the research year.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSELCT 5110 - PSTP LABORATORY RESEARCH ROTATION

Minimum Credits: 0

Maximum Credits: 0

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/her selection of a lab for the research year.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSELCT 5120 - PSTP PROFESSIONAL DEVELOPMENT 2

Minimum Credits: 0

Maximum Credits: 0

This course prepares PSTP students to successfully navigate key developmental milestones in their trajectory toward a physician scientist career. Career expectations are discussed and framed in the perspective of grant writing and the review process. A small amount of lecture material is linked to a series of workshops, where each student composes a bio-sketch, specific aims, experimental plan and training plan related to their research year. Constructive peer critiquing of grant material provides a perspective on which to

build grant writing skills.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSELCT 5130 - PSTP RESEARCH BASIS OF MEDICAL KNOWLEDGE

Minimum Credits: 0

Maximum Credits: 0

This small group session is required during the first 3 semesters of medical school. Class meets to review primary literature linked to current first and second year curricula. Before each session, a faculty member and one student meet and review the paper assigned for that week. Students learn about the research basis of knowledge and how to present and critically review primary literature.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSELCT 5215 - MENTORED PROJECT INTERIM GRADE

Minimum Credits: 0

Maximum Credits: 0

The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. Interim grades will be assigned in May of the second year, November and may of the third year, and November of the fourth year. This course will record the grade assignment for May 1 of the second year.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5300 - BOARD STUDY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when the necessity to record a block of time taken to participate in an intensive study period is required. This will usually mean a structured USMLE study course taken outside Pitt but could include a self-structured study schedule here at the school. The course may be given a specific title including the number of weeks.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: No Grade Required

MSELCT 5301 - SPECIAL STUDIES

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when students are permitted to participate in a special project for one month during the third year of medical school. A descriptive title will be recorded on the official transcript to define this one month period of time.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5310 - MENTORED PROJECT INTERIM GRADE

Minimum Credits: 0

Maximum Credits: 0

The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. Interim grades will be assigned in May of the second year, November and may of the third year, and November of the fourth year. This course will record the grade assignment for November 1 of the third year.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5315 - MENTORED PROJECT INTERIM GRADE

Minimum Credits: 0

Maximum Credits: 0

The mentored scholarly project is a longitudinal experience of the four-year medical school curriculum. It is a graduation requirement and progress must be shown throughout. Students will register and be graded for each term of registration, beginning with the spring term of the second year. Interim grades will be assigned in May of the second year, November and may of the third year, and

November of the fourth year. This course will record the grade assignment for May 1 of the third year.

MSELCT 5450 - GET READY FOR RESIDENCY

Minimum Credits: 0

Maximum Credits: 0

This elective is an intensive preparation for students who are about to enter residency. Through daily interactive sessions, students will explore potential challenges a resident may face in a variety of specialties including medicine, infectious disease, pediatrics, obstetrics/gynecology, psychiatry, radiology, etc. There will also be simulated patient scenarios, entitled "nightmares on call," medical/legal preparation, including a mock deposition and trial, and procedural workshops. The course objectives are: 1) integrate clinical skills and knowledge in preparation for internship; 2) facilitate the fusion of knowledge obtained throughout the four years of medical school and translate it into treatment of complex patients with multi-system issues; 3) explore the evaluation and treatment of the patient with acute abdominal pain including when to call for a surgical consult; 4) identify the acutely ill child and explore the appropriate advice to give parents; 5) identify and treat the top ten women's health issues; 6) evaluate and manage acute electrolyte imbalances; 7) evaluate and treat illnesses in the pregnant patient including medication use in pregnancy; 8) gain insight into treating the patient with acute delirium and management of the violent patient; 9) evaluate and treat acute epistaxis; 10) interpret disease processes on chest x-rays, abdominal films and ct scans; 11) gain insight in to the treatment of a patient with an acute stroke; 12) learn the proper way to communicate with patients, parents of patients and health care providers on the telephone; 13) manage (through simulation) a variety of urgent patient situations the student may encounter while on call in the hospital; 14) become familiar with the

steps involved in legal actions against a medical practitioner including a simulated deposition and trial; 15) help students develop essential and durable approaches to personal wellness.

Course Component: Practicum

Grade Component: H/HS/S/LS/U

MSELCT 5455 - LITERATURE AND MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This course is intended for the student participating in the medical humanities area of concentration (AOC). The objective of this independent study elective is to use different kinds of culturally relevant literature (drama, poetry, children's literature, popular fiction, classics) to help explore the ways our culture imagines and interprets the experience of medicine. Specifically to gain an appreciation for the various parts physicians play in the literature of our culture. To learn to use the tools and systems of literary criticism to analyze literature, and then in turn to analyze the "text" of a clinical medical encounter. To gain an appreciation for the complex ways in which our own words and actions may be interpreted and misinterpreted within the clinical setting by patients who listen to us with ears and minds which have been prepared for the encounter by the literature, myths and stories of our culture. Selections to be read may include selections from Moliere, dr. Seuss, Nathaniel Hawthorne, Gwendolyn Brooks, Jane Austen, J.R.R. Tolkien, the Bible, Mother Goose and others. Requirements consist of: completion of a set of mutually agreed upon reading assignments. Preparation and submission of four, weekly essays each approximately 3 to 4 pages long. These essays will generally be reflective papers based on that week's reading assignment. Completion of an in-depth reflective manuscript of approximately 10 pages. This manuscript will be based on my reading of the poetry of Charles Bukowski, and will address the specific theme of Bukowski's attitudes (mainly pessimistic) towards the body and medicine, as well as his portrayal of poverty, addiction and other forms of "hard living." I may change my topic pending discussion with and approval of Dr. Maier. IV. Attend a literature and medicine discussion series during the four week elective. The progress of this elective will be assessed on the basis of the submitted essays, final paper, and participation in the literature discussions. All of the assigned papers will be submitted no later than the Friday of the fourth week of the rotation.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSELCT 5495 - FUNDAMENTALS OF ORAL AND MAXILLOFACIAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

This four-week clinical elective is offered by the School of Dental Medicine and is designed for the medical student seeking exposure to oral and maxillofacial surgery and oral medicine. There is an emphasis for the physician-student to develop skills in the initial evaluation, differential diagnosis, and decision-making for a variety of problems in the oral cavity and craniomaxillofacial region. Development of medical decision-making skills will be encouraged by working closely with the attending staff and residents in ambulatory and inpatient settings. The clinical experience consists of supervised activity with a variety of patients who have issues related to craniofacial trauma, congenital deformities, oral pathology, oral manifestations of systemic disease, and other entities useful for most any practicing physician. The course curriculum includes an orientation to the scope of oral and maxillofacial surgery, a workshop on performing a detailed examination of the head and neck, and a laboratory experience on anesthetic injection techniques. Students will be able to formulate a basic differential diagnosis of a variety of disorders and evaluate a variety of different imaging modalities commonly used. A sizeable component of the rotation occurs in the operating room, where students will encounter a wide variety of procedures including trauma reconstruction, cleft and craniofacial surgery, treatment of pathology, and others. Continuity of care is emphasized by having the opportunity to see patients with the attending staff both pre- and post-operatively. Students will also participate in the department's conference series and journal club. Other in-depth experiences may be arranged based on individual interests and career paths. One of the strengths of this elective is the ability to formulate a custom approach to learning based upon the student's desires. Student's interest in careers in otolaryngology, emergency medicine, OMFS, ophthalmology, pathology, plastic surgery, or dermatology are likely to find this experience particularly interesting and practical.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSELCT 5500 - INTERNATIONAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This elective is intended to give some structure and guidelines for students wishing to experience medical care in another country. Students are encouraged to pursue their own interests and contacts to arrange an international experience. The student is responsible for arranging this rotation. Information to be provided to the office of student affairs at least two months in advance - prepare an international clinical experience request form, travel abroad contract and checklist for international electives; designate one primary preceptor at the elective site and have written approval from the preceptor or school; develop a list of goals and objectives and a tentative list of activities which will allow the goals to be met. The student is responsible for assuring that a grade is received at the end of the four-week elective.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSELCT 5700 - CHANGING SCIENCE, CHANGING SOCIETY: A GUIDE TO 21ST CENTURY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Biomedical knowledge is evolving at an ever-increasing pace. The environments where our graduates will practice are also changing, in response to society's needs and fiscal and policy influences. The most effective medical care of patients will be inextricably linked to the application of the most up-to-date knowledge. Optimal care will be patient-centered, and take fully into account the social determinants that influence health, illness and well-being. This new course directly supports learning about these subjects, at an opportune point in students' professional development.

Academic Career: Medical School

Course Component: Lecture

Grade Component: Grad SN Basis

MSELCT 5720 - SCHOLARLY PROJECT ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

Analytical thought and rational decision-making are the hallmarks of modern medical practice. The ability to read and critically evaluate medical literature and to think through a patient's medical concerns or a biomedical problem from first principles is an essential component of undergraduate medical education in the current era. The design, performance, and presentation of an independent project and the critical evaluation of the projects of others represent one outstanding way to develop and crystallize analytical thinking skills and the tools for rational decision-making. Students are given an opportunity to read and critically evaluate scientific and medical literature, present a research proposal and get direct feedback from faculty and other students on that proposal, perform a research project under direct mentorship from an expert in that field, present the research project in both informal and formal collegial venues, and discuss, trouble-shoot, and critique the research and presentations of their colleagues in their medical school class. Students must spend the equivalent of eight weeks in pursuit of their mentored project during the final two years of medical school. Students may participate during a block of time or over an extended period of time. When a block of time is used, this course is registered. The grading and evaluation for this course is completed by the student mentor.

Academic Career: Medical School

Grade Component: H/HS/S/LS/U

MSELCT 5730 - MENTORED PROJECT COMPLETION

Minimum Credits: 0

Maximum Credits: 0

The design, performance, and presentation of an independent project and the critical evaluation of the projects of others represent one outstanding way to develop and crystallize analytical thinking skills and the tools for rational decision-making. Students are given an opportunity to read and critically evaluate scientific and medical literature, present a research proposal and receive direct feedback from faculty and other students on their proposal, perform a research project under direct mentorship from an expert in that field, present the research project in both informal and formal collegial venues, and discuss, trouble-shoot, and critique the research and presentations of their colleagues in their medical school class. The completion of a mentored project is a graduation requirement. This course is registered by all fourth-year students to verify that this graduation requirement has been met. The final grade is assigned by the Mentored Project Steering Committee and the Associate Dean for Student Research.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSELCT 5745 - REMEDIATE MENTORED PROJECT

Minimum Credits: 0

Maximum Credits: 0

The mentored project (aka scholarly project) is a graduation requirement. MSELCT 5745 will be registered when an unsatisfactory grade is assigned to MSELCT 5730, mentored project completion. The scholarly project (SP) committee will outline a plan to remediate the deficiency. The plan will include a specific period of time in which the student must successfully complete the remediation to the satisfaction of the SP committee. The student transcript will record that MSELCT 5745 is a repeat of MSELCT 5730.

Academic Career: Medical School

Grade Component: H/HS/S/LS/U

MSELCT 5805 - INTERPROFESSIONAL HEALTH CARE TEAMS

Minimum Credits: 0

Maximum Credits: 0

Course objectives: clarify the knowledge base, skills and resources different professions contribute to a health care problem, and develop understanding and respect for those contributions; explore overlapping roles and responsibilities of HC team members; clarify boundaries and responsibilities unique to individual professions; learn to communicate constructively with other HC team members; learn to design patient care plans based on shared input; identify ways of managing team members with shared / different responsibilities; realize one's own limitations and recognize when it is appropriate to seek advice or assistance from another profession. This elective course will bring together advanced level students in medicine, nursing and pharmacy to learn about and actively practice interprofessional, team-based health care. Clinically based, experiential learning will be emphasized and interwoven with didactic and reflective sessions. The course will begin with presentations and discussions to explore the meaning of interprofessional teamwork; to introduce students to the backgrounds and contributions of different professions on teams; to provide examples of highly functional vs.. Dysfunctional team interactions; and to consider the consequences of team behavior for patient care. The experiential components are organized around two disease models, heart failure and renal disease, and include inpatient and outpatient settings. Each student team will be paired with patients and participate in various aspects of care including, for example, assessment of a patient's disease and ongoing status, development of management plans responsive to the patient's evolving state, discharge planning, follow-up and care in outpatient settings, etc. Students will interact with health care teams at various sites, as well as receive instruction and feedback from core teaching faculty. Evaluation and grading will consist of attendance and participation; presentation of a written assessment, care plan and patient summary for each "disease unit," to include a team oral presentation.

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSELCT 5808 - ADVANCED INTERPROFESSIONAL NURSING HOME HEALTH CARE TEAMS

Minimum Credits: 0

Maximum Credits: 0

This elective course brings together advanced level students in medicine, nursing, and pharmacy to learn about and actively practice interprofessional, team-based health care in nursing home (NH) environments. Clinically based, experiential learning is emphasized and interwoven with didactic and reflective sessions. The course entails presentations and discussions to explore the meaning of interprofessional team work; to introduce students to the backgrounds and contributions of different professions and teams; to provide examples of functional vs. Dysfunctional team interactions; and to consider the consequences of team behavior for patient care. The experiential components are organized around a NH model and include patients in various care stages in this overall setting. Each student team will be paired with patients and participate in various aspects of care including, for example, assessment of a patient's history (medical, nursing, pharmacy, social/family, financial, etc.) And ongoing status, development of management plans, and evaluation of outcomes. Students will interact with health care team members at a local nursing home site, as well as receive instruction and feedback from core teaching faculty. The course will run Monday through Friday. Evaluation and grading will be done on both an individual and a team participation level. Included will be attendance, written assessments, care plans and patient summaries. A team oral presentation will be evaluated by core faculty and representative health care experts.

Academic Career: Medical School

Grade Component: H/HS/S/LS/U

MSELCT 5850 - PEPTIDE HORMONE RECEPTORS

Minimum Credits: 0

Maximum Credits: 0

This four to eight week senior elective is available for one student per month. Research is in the general area of the mode of action of polypeptide hormones, the isolation of hormone receptors and structure function studies of biologically active polypeptide hormone receptors.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5851 - RESUSCITOLOGY

Minimum Credits: 0

Maximum Credits: 0

Research opportunities are provided for one student per month at the international resuscitation research center under the direction of the director. Laboratory studies range from the cellular level to long-term animal outcome experiments on total circulatory arrest (cardiac arrest) and shock states.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5852 - HEALTH SERVICE RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Four week elective is a quality assurance program for community hospitals-to provide technical assistance to participating hospitals in the design of module audit and quality assurance studies with a particular emphasis upon forms design, data collection, data analysis, and the utility of data to inform and educate professionals in participating hospitals research in the area of population, family planning, and maternal and child health. Studies in public health gerontology-numerous studies of the provision of supportive services to the elderly.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5853 - HEALTH POLICY

Minimum Credits: 0

Maximum Credits: 0

The objectives of this course are to expose medical students to current health policy issues and to methods used in analyzing them. Medical students do independent studies of issues of interest to them. They may also join teams of researchers in the health policy institute in conducting institute-sponsored studies.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSELCT 5854 - ETHICS IN CLINICAL PRACTICE

Minimum Credits: 0

Maximum Credits: 0

The aim of the four week elective is to help physicians identify, analyze and resolve the ethical dilemmas they face in clinical practice. Students will meet in small group seminars with faculty to discuss readings which emphasize the central issues in medical ethics. Students will also participate in one of several in-patient services, identifying patients about whom ethical issues arise. The students will present these cases at ethics rounds for discussion. Students will also be involved in formal hospital ethics counsels.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSELCT 5855 - CLINICAL GENETICS

Minimum Credits: 0

Maximum Credits: 0

A tutorial experience is tailored to the interests of the student with the advice of senior faculty. The experience is modeled after the diverse responsibilities of a clinical fellow in medical genetics, with some consultations on clinic and hospital patients, attendance at selected seminars and classes in genetics, and participation in a research project, including in the molecular genetics, biochemical genetics, or cytogenetics laboratories or with clinical or mathematical geneticists.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSELCT 5856 - MILITARY SCHOLARSHIP ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This course will accommodate health profession scholarship students who must do an active duty tour during each year of medical school for which they have a scholarship. These clinical experiences do not always conform to a specific course offered by the medical school, such as flight surgeon and aerospace medicine. This generic course will cover all military exposures for credit.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSELCT 5857 - EVIDENCE-BASED MEDICINE

Minimum Credits: 0

Maximum Credits: 0

A 4 week elective to introduce graduating students to the latest techniques in EBM as they apply to the clinical practice of medicine. EBM is the conscientious, explicit, and judicious use of the best available evidence in making decisions about the care of individual patients. It is an approach to problem solving based on information gathering and analysis. The course consists of a clinical rotation, small group workshops, computer lab sessions and independent study. Each student will present the results of their analysis of one clinical question.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSELCT 5858 - PUBLIC HEALTH FIELD PRACTICUM

Minimum Credits: 0
Maximum Credits: 0

This elective is a hands-on public health practicum that is appropriate for 3rd and 4th year medical students. Prior public health experience, while useful, is not required. Under faculty guidance, students will be placed at a local or state public health agency and participate in on-going activities. These may include disease surveillance and early warning; communicable disease control including outbreaks and food safety; environmental health (air, water, and ground); disaster preparedness, planning and response; health policy and planning; vector and pest control; and applied epidemiology. Specifics of the activities will vary depending on site and student interest. Students wishing to develop their own field-placement opportunity may arrange alternative sites with the advance approval of the course director. Students will also participate in a series of focused seminars on public health topics, presented on one half-day per week, on topics such as: public health practice; epidemiology in clinical practice; disasters, outbreaks and emergencies; avian and pandemic influenza. A short presentation and paper (3 - 5 pages) summarizing key aspects of the experience is also required. Through these activities, students will gain the opportunity to work closely with experienced public health professionals and to develop a fuller understanding of the intersection of clinical medicine and public health.

Academic Career: Medical School
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MSELCT 5860 - EDUCATIONAL TECHNOLOGY

Minimum Credits: 0
Maximum Credits: 0

This 4-week elective combines medical science with new technology in the information and computer sciences. The student will study a wide variety of aspects of technology as it relates to research, clinical medicine and/or medical education. The elective will provide an opportunity for expansion of the student's knowledge base and allow the student to create and/or evaluate a new implementation of technology in medicine. This elective assumes basic understanding of current computer software, the internet and general use.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: Grad LG/SU5

MSELCT 5890 - EXTRAMURAL RESEARCH

Minimum Credits: 0
Maximum Credits: 0

Students will register for this four-week elective when they have arranged to do research with a preceptor who is not a faculty member of the university of Pittsburgh school of medicine. The research will be completed within the United States. The research prospectus will be vetted by the student research administrative office and a copy of the approval will be maintained in the student record.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSELCT 5895 - INTERNATIONAL RESEARCH

Minimum Credits: 0
Maximum Credits: 0

Students will register for this four-week elective when they have arranged to do research with a preceptor outside of the United States. The research prospectus will be vetted by the student research administrative office and a copy of the approval will be maintained in the student record.

MSELCT 5900 - TRANSLATING KNOWLEDGE INTO ACTION: THE BASIC SCIENCE OF CARE

Minimum Credits: 2
Maximum Credits: 2

The "basic science of health care" course was designed to help all health science students understand that: 1) the delivery of excellent medical care requires an interdisciplinary approach; 2) there are many barriers in the current health-care environment to the delivery of safe, effective, evidence-based care, and that these problems can be remedied; 3) the health care delivery system is buffeted by many structural and economic constraints that inhibit the delivery of excellent, efficient medical care; 4) information systems play an essential role in improving and delivering cost-effective, error-free medical care; and 5) professionalism includes the personal obligation of all health care professionals to work together to remove the barriers to the delivery of safe, effective, and evidence-based care.

Academic Career: Medical School
Course Component: Lecture
Grade Component: Grad HSU Basis

MSELCT 5901 - INTERDISCIPLINARY COLLABORATION, PROBLEM SOLVING, AND CREATIVITY IN HEALTH CARE DELIVERY

Minimum Credits: 1
Maximum Credits: 1

The "interdisciplinary collaboration, problem solving, and creativity in health care delivery" course was designed to help all health science students understand that: 1) the delivery of excellent medical care requires an interdisciplinary approach; 2) there are many barriers in the current health-care environment to the delivery of safe, effective, evidence-based care, and these problems can be remedied; 3) the health care delivery system is buffeted by many structural and economic constraints that inhibit the delivery of excellent, efficient medical care; 4) information systems play an essential role in improving and delivering cost-effective, error-free medical care; and 5) professionalism includes the personal obligation of all health care professionals to work together to remove the barriers to the delivery of safe, effective, and evidence-based care.

Academic Career: Medical School
Course Component: Lecture
Grade Component: Grad HSU Basis

MSELCT 5910 - AREA OF CONCENTRATION

Minimum Credits: 0
Maximum Credits: 0

This four-week elective will allow the student a dedicated period of time to complete the area of concentration (AOC) requirements. The AOC program at the university of Pittsburgh school of medicine offers the opportunity for students to pursue an area of personal interest, over their four years of medical school. This is accomplished with a series of longitudinal, elective experiences which supplement the required core curriculum. These para-curricular education tracks provide an opportunity for interested students to explore a potential career plan and uniquely enhance their medical education. The AOC may be utilized to meet the scholarly project, which is a graduation requirement.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSELCT 5950 - PSTP WORK IN PROGRESS SEMINAR

Minimum Credits: 0
Maximum Credits: 0

This course meets monthly throughout the year and is designed for all physician scientist training program students. The purpose of this course is to provide each PSTP student a forum to present his or her research and to discuss their research ideas, designs and results, and to give and to obtain peer feedback. Each student has the opportunity to present at all stages of a project, whether it is starting a project, planning the design, analyzing the data, or getting ready to present the results at conferences or in manuscripts. This course encourages all students to engage in scientific discussion and feedback on each project.

Academic Career: Medical School
Course Component: Seminar
Grade Component: H/HS/S/LS/U

MSELCT 5975 - CLINICAL SCIENTIST TRAINING PROGRAM RESEARCH

Minimum Credits: 0
Maximum Credits: 0

Students who apply and are accepted to the clinical scientist training program (CSTP) participate in a course of study leading to either a certificate or a master of science in clinical research. Participants will devote one year of dedicated study to clinical research following the third year of the professional medicine (md) program. During the fourth year of the md program, a maximum of twelve (12) weeks may be scheduled to complete CSTP course work or the research project. This experience will be graded by the director of the CSTP program and will be recorded on the student's official university transcript. A course subtitle form will be processed to record the specific amount of time (in weeks) to be given credit, e.g., CSTP-related research 12 weeks.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

Medical Scientist Training Program

MSTP 5010 - MOLECULAR MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This course is designed for entering MSTP students. The purpose of this course is to highlight contemporary questions in biomedicine and how different scientific fields approach these questions. After surveying appropriate background material the students analyze scientific papers from the primary literature under the mentorship of different department faculty. Presentation of these papers provides a forum for discussion of experimental design, technique, laboratory and clinical observations. Exposure to the primary scientific literature will prepare the students for entry into the Ph.D. component of the combined degree. Exposure to different departments and faculty will help the students select laboratories for their thesis work.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

MSTP 5015 - MSTP LABORATORY RESEARCH ROTATION

Minimum Credits: 0

Maximum Credits: 0

This lab is designed to introduce the student to relevant laboratory methods as well as the layout and conceptualization of experiments. The course will serve to acquaint the student with the laboratory process, and to facilitate his/ her selection of a lab for dissertation research. Students are required to register for and complete rotations through three different laboratories, thereby ensuring broad exposure to method and practice.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

MSTP 5290 - RESEARCH BASIS OF MEDICAL KNOWLEDGE

Minimum Credits: 0

Maximum Credits: 0

This small group session is restricted to MD/Ph.D. students during their first two years of medical school. Class meets to review primary literature linked to current first and second year curricula. Before each session, a faculty member and one student meet and review the paper assigned for that week. Students learn about the research basis of medical knowledge and how to present and critically review primary literature.

Academic Career: Medical School

Course Component: Seminar

Grade Component: H/HS/S/LS/U

MSTP 5955 - MSTP WORKSHOPS

Minimum Credits: 0

Maximum Credits: 0

This discussion-based course, guided by faculty preceptors, meets eight (8) times per year over dinner and is attended by MSTP students from all years. Each class begins with description of a topic related to training on being a physician scientist. The topic for discussion is developed by students from different years in order to assure good representation of the challenges offered at various stages of training. After presentation of the topic, students work in groups of 8-10 at assigned dinner tables and each table reports a summary of the discussion followed by group discussion. Every student must complete a class evaluation at the end of each session. The goals of the course are to provide a forum in which students can openly discuss training and ethically challenging situations with their peers; to provide a venue in which junior students can learn from senior students; to understand that responsible conduct of research and medicine is a critical aspect of research training and that it remains an important concern at all levels of a research career.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSTP 5971 - MSTP PROFESSIONAL DEVELOPMENT

Minimum Credits: 0

Maximum Credits: 0

This course is required of the students participating in the md/Ph.D. program medical student training program (MSTP), at the end of their first graduate school year. Career expectations are discussed and framed in the perspective of grant writing and the review process. A small amount of lecture material is linked to a series of workshops, where each student composes a biosketch, specific aims, experimental plan and training plan related to their Ph.D. thesis. Constructive peer critiquing of grant material provides a perspective on which to build grant writing skills.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSTP 5973 - PROFESSIONAL DEVELOPMENT II: METHODS AND ANALYSIS

Minimum Credits: 0

Maximum Credits: 0

This seminar style course is designed for MSTP students during the summer between the first and second year of medical school with one or two faculty facilitators. The learning objectives of the course are to foster social and scientific collaboration between students; to expose students to different scientific methods, techniques, and analyses; to create an environment where students can voice difficulties with their research, labs or mentors and seek constructive feedback; to develop habits of daily writing/presenting. The students are required to present three times during the course and assessed on the clarity and quality of their MSTP retreat poster.

Academic Career: Medical School

Course Component: Seminar

Grade Component: H/HS/S/LS/U

MSTP 5975 - CAREER-RELATED RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students apply and are accepted to the medical scientist training program (MSTP) during which they participate in the first two years of the professional medicine program before taking leave to pursue a doctor of philosophy degree of their choosing. They must defend their thesis before reentry to the professional program. They then participate in the combined third and fourth years of the professional program, which will grant a maximum of six months of credit for being granted the Ph.D. degree. A number of these physician-scientists will chose to spend all or part of this six months of the fourth year in the pursuit of research related to their Ph.D. field of study. The proposal for this research is vetted by the dean of the MSTP and when approved the student will be registered for this elective course. This experience will be graded by the research preceptor and recorded on the student's official university transcript. A course subtitle form will be processed to record the specific amount of time (in weeks) to be given credit.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

MSTP 5983 - ETHICS FOR MEDICAL SCIENTISTS

Minimum Credits: 0

Maximum Credits: 0

Offered to md/Ph.D. students in the first three Ph.D. years. Part one is a 4-hr introductory workshop with emphasis on principles in ethical decision-making and formulating conceptual frameworks for evaluating situations with ethical implications. Part two consists of student participation in upper-level case-based workshops. Facilitation will be by university faculty and will apply the principles and methods of general ethics problem solving covered in the introductory workshop. The scenarios will be of specific import to the physician scientist.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSTP 5990 - LONGITUDINAL CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

20 - 1/2 days are given 2 weeks outpatient credit. Students evaluate patients in a specialty outpt clinic. Plan and conduct appropriate evaluations and therapeutic approaches. Attending physician oversee student's learning of adv clinical skills in interviewing and physical diagnosis, with emphasis on symptom-based exam. Students involved in decision-making regarding the need for hospitalization and longitudinal care. Extensive opportunity for followup care of patients with chronic disorder both for eval of new symptoms and for health maintenance. Emphasis on role of clin investigator in care of pt.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Medicine

MED 2101 - BIO-MEDICINE:PAST,PRESENT,FUTURE

Minimum Credits: 3

Maximum Credits: 3

Course offered to honors college students only. Topics will provide knowledge of basic and diverse elements constituting the present structure of biomedicine and how these elements arose from and interacted with historical, social and technological events. Develop an appreciation of the revolution in biomedicine over the past five centuries and how it applies to societal concepts of health. Become more critically able to evaluate claims about such topics as biomedical progress, the war on cancer, transplantation, healthcare economics and the influence of genomics on medical ethics.

Academic Career: Graduate

MED 2115 - HISTORY OF BIOMEDICAL THOUGHT

Minimum Credits: 3

Maximum Credits: 3

This is an honors college course only. Course surveys the history of biomedical concepts from Aristotle through the close of the nineteenth century. Concepts of normal biology and disease etiology of each time period within the context of both contemporaneous ideas and methods in the physical and biological sciences, the humanities and broader societal factors will be explored. Students will develop an inductive understanding of the development of the modern biomedical sciences and the complex interrelationships between basic research, applied research and medical practice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MED 2116 - HISTORY OF BIOMEDICAL THOUGHT 2

Minimum Credits: 2

Maximum Credits: 2

This seminar course is a sequel to med 2115. It surveys the history of biomedical concepts from late eighteenth century through the mid-twentieth century. Primary and secondary source materials form the basis for an exploration of concepts of normal biology and disease etiology within the context of both contemporaneous ideas and methods in the physical and biological sciences, the humanities and broader societal factors. The general background and context for each topic will be provided by readings from secondary source material and contemporaneous textbook chapters, so that important primary sources can be understood within their historical context. The discussion of these readings will elucidate factors that influence scientific discourse, experimental design and the interpretive process. As a result, the students will refine their inductive understanding of the development of the modern biomedical sciences and the complex interrelationships between basic research, applied research, ethics and medical practice. This course should be helpful to students with (1) a pre-med or biology background (2) a background in the history and philosophy of science and (3) a desire to explore the intellectual heritage of modern biomedical thought.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

MED 2120 - CANCER-AND INTEGRATED INTRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course is offered only to students in the honors college. The course will explore current concepts about cancer using principles from multiple disciplines, including genetics, cellular and molecular biology, epidemiology, public health, international health, sociology and psychology. A spectrum of topics related to cancer will be covered, including the global impact of cancer, causes and risk factors, cellular and molecular models of cancer development, the clinical diagnosis of cancer, clinical management of cancer patients, and the psychosocial aspects of cancer.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MED 2125 - PATHOLOGY-THE STUDY OF DISEASE

Minimum Credits: 4

Maximum Credits: 4

Registration for this honors course requires pre-approval from the instructor. The course introduces pre-medicine students to the foreign language of the terminology of disease, which reduces the extreme burden of simultaneously learning this language and using it to learn the diseases in the first year of medical school. The course also introduces pre-medicine students to all the most common and most important diseases of humans as well as general concepts of disease, integrating the pathology of each disease (the way it appears visually, especially under a microscope) with the epidemiology, the symptoms, the signs, the laboratory test manifestations, the pathophysiology, the treatment and the prognosis in an understanding of the disease. Two chapters of the largest and best comprehensive textbook of pathology will be assigned reading each week and the students will be expected to have used the internet, the library, the dictionary and whatever textbooks of anatomy, histology, physiology and medicine necessary to understand it in preparation for class. A prior course in anatomy and physiology is highly recommended, but is not an absolute prerequisite. Each class will be an interactive question, answer and discussion session. The students will be encouraged to ask the teacher about anything they need help understanding, and the teacher will use the Socratic method, asking them questions on the assumption they know and understand everything they have not asked him about. 70% Of the grade will be from a weekly ten-minute in-class essay test on a disease (or concept of disease) and 30% from three one-minute definitions of terms, all handwritten, all graded by both the teacher and

an independent grader (each counting for half). The terms and diseases to be tested will be drawn from lists provided to the students the previous week.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

MED 2130 - THE HUMAN BODY: BIOMEDICAL SCIENCE, LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course is offered only to students in the honors college. The course will explore the phenomenal leading-edge development in biomedical science and how they impact what it means to be human, along with the philosophical and moral traditions in law that give expression to the human body. Also to be considered are how social values and cultural norms that shape our laws and public policy have evolved historically and should evolve, whether there should be limits on biomedical innovation, what those limits might be, and how they should be determined and drawn. The relationship between society and biomedical science will be examined, competing interests identified, the role of law and regulatory oversight considered, including restraint on bio-scientific and physician authority to 'enhance' and prolong life and how the balance should be struck among innovative progress, societal interests, and individual decision-making. Requirements for the course include assigned readings and participation in class discussions, a short position paper with a class colloquium on the ideas expressed in the paper, and developing the position into a thesis for a paper, which provides students with an opportunity to write on a topic that may satisfy graduation requirements.

Grade Component: Grad LG/SNC Basis

MED 2135 - HISTORICAL AND SOCIOLOGICAL PERSPECTIVES IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course is offered only to students in the honors college. The course provides an introduction to the history, current status, and future trends in the American health care system within a public health context. Special focus will be on the past and current barriers to the American public health system. Key topics include the past and current impact of epidemics on the evolution of American public health infrastructure and concerns over health insurance, smoking, changing definitions of illness and health, the growth of health care facilities, and the individual's responsibility for their own health. This course is primarily a reading/discussion seminar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MED 5112 - BASIC SCIENCE FUNDMENTALS 1

Minimum Credits: 0

Maximum Credits: 0

Medical anatomy - section 1 of the basic science block introduces themes from anatomy, as well as providing an introduction to imaging and radiology. Instructional modalities in this intensive course include lecture, dissection and problem based learning exercises.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5116 - BASIC SCIENCE FUNDAMENTALS 3

Minimum Credits: 0

Maximum Credits: 0

Section 3 of the basic science block begins with a segment that elucidates the systems of communication that are activated upon challenge by disease causing organisms and physiologic stressors (immunology). The final course in this section is the study of disease-causing organisms, their occurrence, preferred hosts and the diseases they cause. Evaluation is based on laboratory exercises, problem-solving sessions and written examinations.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5124 - PATIENT, PHYSICIAN AND SOCIETY 1

Minimum Credits: 0

Maximum Credits: 0

This section consists of two courses: 1) introduction to being a physician has case problems on public health and medicine, breast cancer and HIV/AIDS with patient interviews, group exercises, lectures, independent study and self-directed learning; 2) ethics, law and professionalism addresses the basic concepts and methods for analysis of ethical and legal issues in the physician-patient

relationship. The course's sessions are structured as seminars with both didactic and interactive components. Videotapes, email case discussions, and debate will complement the lectures.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5127 - BASIC SCIENCE FUNDAMENTALS 2: CELLULAR PATHOLOGIC BASIS OF DISEASE; HUMAN GENETICS; FUEL METABOLISM

Minimum Credits: 0

Maximum Credits: 0

Section 2 of the basic science block is a multi-disciplinary section that introduces students to core principles and terminology of cell and tissue biology and pathology, genetics and metabolism. It introduces students to the biochemical and molecular basis of cell function in the context of normal physiologic function, and to the processes of disease at the cellular level. Cellular, individual and population genetics builds on this course and study of the principles governing energy metabolism of cells and organisms necessary to maintain homeostasis complete this sequence of courses. Lectures, workshops, laboratory exercises and small group problem-solving sessions comprise this section.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5128 - PATIENT, PHYSICIAN AND SOCIETY BLOCK - SECTION 2: BEHAVIORAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Section 2 of this block consists of the course - behavioral medicine - which is a multi-faceted consideration of human behavior from the perspectives of both the patient and the physician. The course uses the biopsychosocial model to consider defining elements of the patient-physician relationship, showing how neurobiological, behavioral and social factors can have determinative and interactive impacts in the causation and course of human disease, how they contribute to health, and how they can be modified. Topics are introduced in large group format via patient interviews, videos and panel discussions, each followed by breakout small group sessions featuring case-based scenarios to further the understanding of this complex topic. Student evaluations are based on small group participation, a writing assignment and an exam.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5133 - NEUROSCIENCE/PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This first organ systems block includes two courses: neuroscience and introduction to psychiatry. The neuroscience course provides a detailed, comprehensive survey of nervous system structure, function and dysfunction. Topics include sensory and motor systems, learning and memory, language, sleep and epilepsy, as well as brain imaging methods, vascular disorders, neoplasms, and infections of the central nervous system. Material is integrated across multiple disciplines including neurophysiology, neurology, pharmacology, neuropathology and neuroradiology. The goal is to provide a mechanistic understanding of normal and pathological brain function, and to teach methods of identifying and localizing major disease processes. The learning formats are lectures, laboratories, PBLs, case-based neurology conferences and self-study. Student evaluation is based on two written exams and PBL participation. The introduction to psychiatry course introduces students to common psychiatric illnesses and their assessment and treatment. There is a written exam and a final paper or presentation due at the end of the course. Student group attendance and small group participation are also included in the overall course grade, which will combine the two courses.

Academic Career: Medical School

Grade Component: S/U Basis

MED 5137 - INTRODUCTION TO PATIENT CARE 1

Minimum Credits: 0

Maximum Credits: 0

The medical interviewing course assists the student in developing interviewing skills using patient simulators. The introduction to physical examination course provides the first introduction to the techniques of performing a history and physical examination. Practicing on peers, students learn the skills of a normal physical exam and how to conduct it in an orderly and sequential fashion. Emphasis is on technique and normal findings with little discussion of pathophysiology. Use of the stethoscope, oto-ophthalmoscope, reflex hammer and tuning fork are demonstrated and practiced. The goal is to familiarize students in the use of their instruments and prepare them to be observers in physician offices during the remainder of the first year.

Academic Career: Medical School

Course Component: Lecture
Grade Component: S/U Basis

MED 5138 - INTRODUCTION TO PATIENT CARE 2

Minimum Credits: 0

Maximum Credits: 0

The clinical experience course is designed to familiarize students with how physicians practice medicine in their offices and to expose students to the various aspects of health care delivery in the community. The advanced physical examination course spans the first two years. Pathophysiology and its correlation to hx and ph skills are stressed. Students will record and synthesize the information collected during the clinical encounter as a written history, physical exam, and patient assessment with a goal to do complete and accurate history-taking and physicals.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5180 - EVIDENCE AND DISCOVERY 1

Minimum Credits: 0

Maximum Credits: 0

The first course of this block, introduction to medical decision making, teaches critical thinking regarding diagnosis, treatment and prevention of disease as well as statistical methods applicable to clinical studies. This course uses lecture, small group learning sessions, and final individual presentations by students.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5181 - EVIDENCE AND DISCOVERY 2

Minimum Credits: 0

Maximum Credits: 0

The second section of this block is the first part of a two-year course intended to prepare students for their four- year, mentored scholarly project. In this segment, students will use the tools and skills obtained during the preceding course to analyze seminal literature in science and medicine. Evaluation will be based on student critiques of assigned papers as well as on a formal presentation, to their small group, of a problem of interest to them, methods of approaching it and feasibility of their proposed approach.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5218 - ORGAN SYSTEMS PATHOPHYSIOLOGY SECTION 2: INTRODUCTION TO PATHOBIOLOGY - BODY FLUID HOMEOSTASIS

Minimum Credits: 0

Maximum Credits: 0

This second section of the organ systems pathophysiology block consists of four segments: a week long study of principles of pharmacology, followed by courses on the cardiovascular, renal, and pulmonary systems. The course is interdisciplinary. In addition to the basic science components, the subject matter includes clinical aspects of diseases and their medical management. The learning format is in small groups, laboratories, lectures, tutorials/conferences and self-study. Student evaluation is based on written exams and small group problem-solving participation.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5222 - ORGAN SYMS PATHPHYLGY SECTN 3: DIGESTION & NUTRN; HEMATOLOGY; ENDOCRINE; REPRDCTV & DEVELM BIOL

Minimum Credits: 0

Maximum Credits: 0

This third section of the organ systems pathophysiology block consists of four segments: endocrine and digestion and nutrition cover normal structure and function of the digestive and endocrine systems as well as introduction to diseases of both systems. Reproductive and developmental biology covers material in a chronological fashion from fertilization through aging. Hematology covers the physiology of the major blood forming organs and an introduction to common hematologic diseases. The learning format is small groups, clinical pathologic correlation sessions, laboratories, lectures, tutorials/conferences and self-study. Student evaluation will be based on written exams and small group problem-solving participation.

Grade Component: S/U Basis

MED 5225 - ORGAN SYSTEMS PATHOPHYSIOLOGY SECTION 4: PHARMACOLOGY

Minimum Credits: 0
Maximum Credits: 0
This course begins with the neuroscience segment of organ systems pathophysiology (OS) and runs through all of the courses in organ systems 1, 2 and 3, including a concentrated week of principles of pharmacology with an emphasis on adrenergic pharmacology at the beginning of os2. At appropriate times in those courses, basic mechanisms of pharmacologic agents are taught in the context of each organ system. This course covers classes of agents, mechanisms and drug targets as well as potential side effects and future developments. The format is primarily lecture with some workshops, as well as material incorporated into problem-based learning sessions.
Academic Career: Medical School
Course Component: Lecture
Grade Component: S/U Basis

MED 5227 - ORGAN SYSTEMS PATHOPHYSIOLOGY SECTION 5: INTEGRATED CASE STUDIES

Minimum Credits: 0
Maximum Credits: 0
The course objective of this fifth section of the organ systems block is to apply information acquired during the first two years to patient cases as presented on the computer, further developing independent active learning and data acquisition skills. In addition, the course serves as a bridge to the direct patient responsibilities of the final two years of medical school. The format is exclusively problem-based learning. There is no final examination. The course is honors/pass/fail based on small group participation.
Academic Career: Medical School
Course Component: Lecture
Grade Component: S/U Basis

**MED 5233 - INTRODUCTION TO PATIENT CARE SECTION 3: ADVANCED PHYSICAL EXAMINATION 2
AND CLINICAL EXPERIENCE 2**

Minimum Credits: 0
Maximum Credits: 0
The advanced physical examination course of the introduction to patient care block is an extension of the introduction to physical examination course. During this course, which spans the first two years, students will expand their knowledge of history taking and physical examination skills by examining patients both in adult medicine and in the pediatric setting. Patho-physiology and its correlation to history and physical examination skills are stressed. Students are also expected to record and synthesize the information collected during the clinical encounter as a written history, physical exam, and patient assessment. The goal is to prepare students to do complete and accurate history-taking and physical examinations during their clerkships. This course is integrated with the clinical experience course. There are seven, month-long sessions, four of which will be physical examination sessions and three will be the clinical experience rotations described below. There is a written examination, a clinical performance grade from instructors, and a required performance-based assessment at the end of the course. The clinical experience course is designed to familiarize students with how physicians practice medicine in their offices and to expose students to the various aspects of health care delivery in the community. Each student will be scheduled for three, month-long rotations, one month of one afternoon a week in a physician's office, one month of once a week afternoon visits to an assigned community site for underserved populations, and one month with a student-selected ambulatory sub-specialty office or an additional month at a primary care physician's office. There will also be full class sessions on health care disparities, alcohol and substance abuse, and health care to the underserved. No textbook is required but a syllabus is provided. Completion of weekly teaching and learning logs is required. Grading is determined by attendance and passing the final examination.
Academic Career: Medical School
Course Component: Practicum
Grade Component: S/U Basis

**MED 5234 - INTRODUCTION TO PATIENT CARE-SECTION 4: ADVANCED MEDICAL INTERVIEWING -
CLINICAL PROCEDURES**

Minimum Credits: 0

Maximum Credits: 0

The first four weeks of the final section of the introduction to patient care block will be the advanced medical interviewing course. This course is designed to move students from the basic patient interviewing skills that were introduced in the first year medical interviewing course to a higher skill level in patient communication which will be required during the clinical clerkship years. Using patient simulators, and with guidance from a faculty facilitator and peers in small groups, students will learn and practice "hard to ask questions" and deal with specific "content-sensitive" cases (e., Abuse, anger, drug use and sexuality). The second four weeks of the block will consist of the clinical procedures course, which will introduce students to basic diagnostic, therapeutic, invasive, and non-invasive procedures commonly performed in clinical medicine. This course gives students the opportunity to practice clinical procedures in a laboratory setting, through interactive small-group sessions with the faculty, using equipment and supplies normally found on patient care units. The goal is to familiarize students with basic clinical procedures that they may be asked to perform on patients during their clinical rotations.

Grade Component: S/U Basis

MED 5261 - PATIENT, PHYSICIAN AND SOCIETY: POPULATION HEALTH

Minimum Credits: 0

Maximum Credits: 0

This course has been developed to bring students essential and timely content on selected topics in population health. The course will address issues of: health care finance from the patient's perspective; public health overview; social determinants of care; global health issues with an emphasis on the global burden of disease and related financial issues; financial preparedness for physicians (student debt and looking ahead to specialty choice); health care reform. Learning modalities will be large group didactic sessions, self-study segments, and small group exercises. Evaluation will be determined by: completion of assigned self-study units; attendance at large group sessions; completion of course segment assignments.

Academic Career: Medical School

Course Component: Lecture

Grade Component: S/U Basis

MED 5265 - EVIDENCE AND DISCOVERY 3

Minimum Credits: 0

Maximum Credits: 0

The third section of this block is the second part of a two-year course (methods and logic in medicine) intended to prepare students for their four-year, mentored scholarly project. In this segment, students will use the tools and skills obtained during the preceding course to analyze seminal literature in science and medicine. Evaluation will be based on students' critiques of assigned papers as well as on a formal presentation, to their small group, of a problem of interest to them, methods of approaching it and feasibility of their proposed approach.

Grade Component: S/U Basis

MED 5322 - ADULT INPATIENT MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This is an 8 week interdisciplinary clerkship divided into 2 blocks of 4 weeks each. During each block, the student is assigned to an inpatient rotation either at Montefiore, the Oakland V.A. medical center or Shadyside hospital. On the first day of each block, the student is required to attend didactic sessions given by faculty in emergency medicine and geriatric medicine. During the inpatient rotation, students are assigned their own patients and are taught, under supervision, to apply acquired skills to clinical situation. Usmlc in medicine is given at end of rotation and exam in CCM.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5328 - COMBINED AMBULATORY MEDICINE AND PEDIATRIC CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

The eight week combined ambulatory medicine and pediatrics clerkship provides a combination of four week experiences in the disciplines of internal medicine and pediatrics. One half-day per week the students participate in a multi-faceted, interactive didactic session learning advanced skills and discussing issues common to both of these disciplines. Student's clinical experiences in internal medicine and pediatrics are at office or clinic sites where they will be exposed to the spectrum of care that is provided in the ambulatory setting. Sites may include hospital-based practices and community locations. This is a required clerkship.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5345 - CLERKSHIP REPEAT COURSE

Minimum Credits: 0
Maximum Credits: 0

This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MED 5346 - AMBULATORY CLERKSHIP REPEAT

Minimum Credits: 0
Maximum Credits: 0

This course will be registered when the necessity to record a student's repeat of an unsatisfactory performance in the ambulatory care clerkship of the third year. This course is used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MED 5350 - DEATH, DYING AND THE DOCTOR

Minimum Credits: 0
Maximum Credits: 0

This elective offers medical students the opportunity to explore in depth some of the philosophical, cultural, religious, and existential aspects of human beings' encounter with death. The course will employ short stories and poetry, the visual arts, and more traditional scholarly work in the humanities and social sciences. Though the course is not a clinical introduction to palliative care, it is intended to enhance students' preparation for intelligent, self-aware, and skillful care of critically ill and dying patients. While students will have some contact with the palliative care consultation service during the elective, the primary goal of the course is to enrich students' appreciation of the meanings of death and dying as experienced and expressed by human beings throughout history, and in various cultural settings. Requirements will include weekly meetings to discuss assigned reading, observation with the palliative care service, and a personal reflection paper of 7 to 10 pages.

Grade Component: H/HS/S/LS/U

MED 5398 - CLINICAL MILITARY CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

Medical students who are on military scholarship and must do an active duty tour, will be given credit provided it is approved by the school as a worthwhile education experience. This is a third year level, four week experience.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5399 - NON-CLINICAL MILITARY CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

Medical students who are on military scholarship and must do an active duty tour, will be given credit provided it is approved by the school as a worthwhile experience. The course will be given a course title appropriate to the contents at the time of evaluation. This is a third year level, four week experience.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MED 5401 - MEDICINE ACTING INTERNSHIP

Minimum Credits: 0
Maximum Credits: 0

Elective provides student with exceptional insight into the practice and theory of internal medicine and serves as preparation for other intensive primary care oriented specialties. Student will have an advanced degree of primary patient involvement. Sub intern will

perform initial patient evaluation and institute appropriate diagnostic, therapeutic measures under direct guidance and supervision of resident and attending physician and begin to learn order-writing skills. This experience serves as a bridge between basic clerkship and internship year. Also available at hospitals outside the health center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5402 - ACTING INTERNSHIP IN MICU

Minimum Credits: 0

Maximum Credits: 0

Course designed to actively involve students in evaluation and therapy of critically ill patients with shock, respiratory failure and other acute life-threatening disorders. Students have primary responsibility for a limited number of patients in the ICU under direct supervision of medical residents and pulmonary critical care fellows. Student will perform initial evaluation of patient with a resident and assist in resuscitation and life support procedures. Students will formulate diagnosis and therapeutic plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5403 - CARDIAC INTENSIVE CARE UNIT

Minimum Credits: 0

Maximum Credits: 0

Course is designed to actively involve qualified students in evaluation and therapy of critically ill patients with acute myocardial infarction, unstable angina pectoris, disorders of cardiac rate and rhythm, heart failure, cardiogenic shock, and other life-threatening cardiac disorders. Students have primary responsibilities for limited number of patients under direct supervision of residents and cardiology fellows. Students perform initial evaluation with resident/fellows and assist in all aspects of acute care with members of micu-team.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5406 - EXTRAMURAL ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will register for this course when participating in an internal medicine acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5425 - COMBINED MEDICINE/PEDIATRICS HEALTH CARE TRANSITIONS

Minimum Credits: 0

Maximum Credits: 0

The goals of this elective are to introduce medical students to the specialty of combined internal medicine-pediatrics. In particular, this elective focuses on understanding the issues of patients with special health care needs as they transition from pediatric to adult-centered care. Students will be involved in numerous educational activities, including attending several outpatient specialty clinics, visiting pediatric rehabilitation facilities, performing home visits with patients, performing independent learning activities, and reading the current literature about transitions in care. Students are supervised by internal medicine, pediatric, and med/peds faculty members who are involved in caring for patients with special health care needs of all ages. If students have a particular interest in a certain subspecialty clinic, every effort will be made to accommodate a request made to the course director.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5430 - CLINICAL PHARMACOLOGY AND HYPERTENSION

Minimum Credits: 0

Maximum Credits: 0

During a 4 week elective, students will engage in daily patient care activities; seeing hypertensive patients and patients with treatment-related problems (adverse reactions, drug abuse, drug interaction problem, therapeutic misadventures). Student has opportunity to study diagnosis and treatment in hospitalized patients at PUH and VAH only, as well as in hypertensive clinics at both hospitals. Proper evaluation of specific therapy will be emphasized to the student indicating the role of clinical pharmacology in the internist's activities with reference to ongoing research whenever applicable.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5440 - CARDIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective offers broad experience in clinical cardiology and exposure to current research problems at the health center as well as at hospitals outside health center. Activities center on cardiology teaching service, noninvasive graphics, coronary care unit, intensive cardiac monitoring area, central heart station (ECG), and nuclear cardiology. Students participate in daily activities including inpatient and outpatient consultations of the initial workup on patients. Students observe pacemaker insertions, cardioversions, cardiac catheterizations, etc.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5460 - ENDOCRINOLOGY AND METABOLISM

Minimum Credits: 0

Maximum Credits: 0

Emphasis is placed on clinical and lab evaluation and treatment of patients with endocrine disorders during 4 week elective. Under supervision of resident and fellow, student will perform initial workups of all patients seen in consultation by endocrinology service. Patients will be presented to attending physician and discussed in depth on rounds held 3-4 days/week. Students will perform initial evaluation of outpatients seen in endo-diabetic clinic. Goal is to provide student with knowledge of endocrinology that is expected of a general internist. The elective is also available at hospitals outside the health center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5470 - GASTROENTEROLOGY AND NUTRITION

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective gives students the exposure to the wide variety of diseases referable to the gastrointestinal tract, liver, biliary system and pancreas. Student is offered the opportunity to perform initial consultation workups of patients, observe and/or participate in special procedures as procto proctosigmoidoscopy, colonoscopy, endoscopy, liver biopsy and endoscopic retrograde cholangiopancreatography and attend clinical conferences and seminars for discussion of case findings, x-rays and histologic material for patient management. Also available at hospitals outside the health center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5471 - OUTPATIENT GI AND HEPATOLOGY

Minimum Credits: 0

Maximum Credits: 0

This is a unique ambulatory care experience in a nonhospital setting. Students will take medical histories and perform physical examinations under supervision of a gastroenterologist. Student will observe the clinical evaluation as well as performance of endoscopic procedures in patients with gastrointestinal disorders.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5479 - ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Elective provides opportunity to be involved in care of patients with diverse oncologic diseases. Students participate in consults at PUH, MUH, VAH, and PGH cancer institute outpatient clinic. Consults and rounds are supervised by residents and fellows. Objectives are to provide an in-depth understanding of patho-physiology of cancer and metastasis, as well as the principles of systemic treatment with standard anti-neoplastic agents and rationale and approach of clinical investigation of new approaches to cancer diagnosis and therapy.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5480 - HEMATOLOGY/ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective provides an opportunity to be involved in the care of patients with diverse hematologic and oncologic diseases. Consultations are supervised by the fellows with formal rounds being made on all patients seen, resident and fellows with formal rounds being made on all patients seen in consultation. Clinical and research conferences and morphology review conferences are held weekly. Also available at hospitals outside the health center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5481 - BLOOD COAGULATION

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective offers a number of interesting and useful experiences. Student is exposed to both outpatient and inpatient bleeding problems. In addition, student learns to evaluate and interpret clotting tests. There is also an opportunity to meet, examine and become involved in the treatment of 200 hemophiliacs followed in the hemophilia center of Western pa.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5485 - STEM CELL TRANSPLANTATION SERVC

Minimum Credits: 0

Maximum Credits: 0

This 4-week elective supervised by a hematology fellow and a dedicated nurse practitioner manages patients receiving high dose chemotherapy and the complications of stem cell transplantation (eg. Graft versus host disease, opportunistic infections). Clinical and research conferences are held weekly.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5490 - INFECTIOUS DISEASES

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective will acquaint the student with the clinical and laboratory aspects of infectious diseases, with varying emphasis on one or the other, may be tailor-made to the interest of the individual student. Student will be supervised by resident or fellow and will make daily rounds on patients. Students will workup cases and present them to a senior staff member with whom they will also have daily contact. Student will learn to correlate and evaluate laboratory findings. Formal rounds are held weekly where pathogenesis, diagnosis and treatment are discussed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5500 - PULMONARY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Elective is aimed at acquainting student with the diagnostic and therapeutic approaches to the common pulmonary diseases, including lung cancer, asthma, chronic bronchitis, emphysema, etc. Student will become acquainted specifically with chest roentgenogram and subtleties of its interpretation through daily rounds with staff and fellows. Student will work as a team with a fellow and staff attending seeing consultations and developing therapeutic and diagnostic plans which will be reviewed and critiqued by the fellow and attending. This is a 4 week elective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5510 - RHEUMATOLOGY AND IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective is engaged in an integrated program of patient care, teaching and research with emphasis on clinical evaluation and treatment of patients with a variety of rheumatic and immunologic disorders. Students perform initial exam of patients seen under the supervision of a fellow and rotating residents and take an active role in teaching rounds with a member of the faculty specifically assigned to this service. Students may share in responsibility for primary care of patients admitted to hospital and several

outpatient clinics.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5520 - RENAL DISEASE

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective provides exposure to a full range of renal and fluid-electrolyte disorders. Students interview and examine patients admitted to the care of the renal staff physician or referred consultation, will follow the patients jointly with the nephrology fellow and participate in daily rounds with faculty. Attending also conducts ad hoc discussions regarding renal pathophysiology, diagnosis and management of acute and chronic renal diseases, and electrolyte disorders. Students attend regularly scheduled conferences. This elective is also available at hospitals outside the health center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5530 - NUTRITION AND INTESTINAL HEALTH

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to offer students a learning experience in both the science and practice of medical nutrition. Under the supervision of faculty and fellows, students will be given responsibility for evaluation and management of patients seen in nutrition clinics, admitted to the medical and surgical services. Daily work and teaching rounds are supplemented with regular conferences and seminars on basic and clinical topics in nutrition. Students will be required to participate in weekly journal club to review current literature pertinent to nutrition.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5540 - GERIATRIC MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective will introduce students to fundamentals of practice of geriatric medicine. Students will participate in all aspects of a multidisciplinary clinic, working primarily with interests but also with geriatric psychiatrists and geriatric social workers. Primary care of the elderly will be stressed, but consultative work will also be done. Conference will be held to discuss cases with all team members and for more didactic teaching, including weekly geriatric psychiatry conferences. Also participate in evaluation and care of nursing home patients, in home visits, family conferences and WPIC.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5560 - PULMONARY INTENSIVE CARE UNIT

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to actively involve qualified students in evaluation and therapy of critically ill medical patients with shock, respiratory failure and other acute life-threatening disorders. Students have primary patient responsibilities for a limited number of patients in the ICU under direct supervision of medical residents and pulmonary critical care fellows. Student will perform initial evaluation of patient with a resident and will assist in resuscitation and life support procedures. Students will formulate diagnostic and therapeutic plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5565 - PALLIATIVE/HOSPICE CARE

Minimum Credits: 0

Maximum Credits: 0

A structured clinical rotation to increase awareness, knowledge and clinical skills when dealing with terminally ill patients and their families. Time will be spent doing consults and seeing patients and families in outpatient clinics and their homes. The objectives include assess, diagnose and effectively manage common problems and symptoms of terminal illness; recognize and know how to deal with symptoms of normal and complicated grief; recognize common psychosocial and spiritual issues faced; understand the impact on the family and friends; develop appropriate communication skills.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5570 - LIVER TRANSPLANT

Minimum Credits: 0
Maximum Credits: 0

This 4 week elective offers an opportunity to participate in the workup and evaluation of prospective liver and gut transplant candidates. Student will work closely with GI fellow and senior staff of the division. Student will be taught the criteria utilized to make a decision for transplantation and an appreciation of the care required in the management of such patients.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5580 - SEXUALLY TRANSMITTED DISEASES

Minimum Credits: 0
Maximum Credits: 0

This 4 week elective will provide an opportunity to gain practical experience under the direct guidance and supervision of the attending physician in the diagnosis and treatment of commonly seen sexually transmissible diseases including gonorrhea and syphilis. Opportunities will be available for obtaining skills in the commonly performed laboratory procedures such as gram staining and culturing and in performing dark field exams.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5590 - SUBSTANCE ABUSE IN PRIMARY CARE

Minimum Credits: 0
Maximum Credits: 0

This elective is offered to explore diagnosis and treatment of substance abuse disorders in primary care setting (both inpatient and outpatient). A variety of clinical sites will be used to accomplish objectives of identifying common presenting symptoms, become familiar with diagnostic criteria for dependence vs hazardous use, become familiar with variety of screening and assessment instruments, participate in patient detox, experience inpatient rehabilitation, implement brief interventions for hazardous drinkers, experience 12 step program, participate in smoking cessation counseling.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5600 - OUTPATIENT MEDICINE

Minimum Credits: 0
Maximum Credits: 0

This 4 week elective will introduce students to the practice of outpatient medicine. Student will have the opportunity to evaluate new patients in the outpatient setting and plan appropriate investigative and therapeutic approaches. Student will also provide follow-up care of patients with chronic illness in an attempt to maintain their maximum wellbeing and also evaluate new symptoms in patients with chronic illness. Student will be involved in decision-making regarding the need for hospitalization and how to minimize this aspect of patient care.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5601 - COMMUNITY HEALTH

Minimum Credits: 0
Maximum Credits: 0

The community health elective is a four-week course designed to expose fourth-year medical students to health care access and public health issues among underserved populations in the Pittsburgh area. The curriculum will include assigned readings/research on health issues for underserved populations, particularly in community organizing and health promotion/disease prevention. Clinical experience involves supervising patient care in many locations, such as: community health centers (squirrel hill community health center, hilltop clinic, Mt. Oliver, McKeesport, and Wilkinsburg); family links; Beth haven; wellspring; jubilee kitchen. Also included are those homeless clinics or outreach locations operated by the program for health care to underserved populations (PHCUP): (operation safety net; Birmingham clinic; the salvation army Northside). Exposure will be given to multi-disciplinary outreach efforts by the health care for the homeless project and other social services agencies. Students will also spend one-half day at the health law clinic assisting law students and their clients on disability cases, tenant-landlord dispute and other legal services. Students may also have the opportunity to assist clients at their court hearings. Students will also have the opportunity to lead health talks at community agencies and present at the community health forum. Very interested and motivated students will be taught the basics of designing

survey, conducting focus groups and community needs assessment. There are also opportunities to participate in ongoing research projects by PHCUP. Students participating in the underserved area of concentration are given time to pursue their longitudinal projects. A short self-reflective or advocacy paper is also required. Patient care is sixty percent of the elective with thirty percent of that spent at the Birmingham clinic. Twenty percent is spent within multi-disciplinary outreach. Twenty percent of the four-week elective will be spent doing research, attending or giving health talks and a presentation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5610 - BONE MARROW TRANSPLANTATION

Minimum Credits: 0

Maximum Credits: 0

Provides an introduction to adult bone marrow transplantation for the treatment of acute and chronic leukemia, aplastic anemia, other hematologic diseases and treatment of solid tumors. Student has an opportunity to participate in initial selection of patients, the intake interview, and the marrow harvesting procedure and become familiar with various marrow preparative regimens. Student participates in daily patient management rounds, treatment of complications, including graft vs host disease, interstitial pneumonia and various infectious problems.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5620 - INTERNAL MEDICINE CONSULTATION

Minimum Credits: 0

Maximum Credits: 0

This consult service provides consultation for patients on the psychiatric service. Students participate as partners with a senior medical resident under direct supervision of the course director. Objectives are that student be proficient in HX, PE and assessment required of GIM consultant; be proficient in fiscally responsible diagnosis and treatment; be proficient in clinical pharmacology of psychiatric patient and develop skills required to participate as a member of the psychiatric therapeutic team.

Academic Career: Medical School

Course Component: Clinical

MED 5630 - ADVANCED CLINICAL REASONING

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Lecture

Grade Component: Grad HSU Basis

MED 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of internal medicine to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5655 - INTERNAL MEDICINE SUBSPECIALTY

Minimum Credits: 0

Maximum Credits: 0

This elective will be divided into two (2) periods for two (2) weeks each. Students taking this elective will chose any two of the subspecialties listed: rheumatology & immunology; pulmonary medicine; gastroenterology & nutrition; endocrinology & nutrition; cardiology, infectious disease; palliative/hospice care; geriatric medicine; renal disease and hematology/oncology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5710 - CLINICAL PHARMACOLOGY (ILS)

Minimum Credits: 0

Maximum Credits: 0

The integrated course program consists of four overlapping components; general clinical pharmacology; disease-specific clinical topics; workshops; and four sessions on recently developed drugs. The format of the course includes traditional lectures, case discussions, and discussions of current articles, problem-based learning, and workshops. Computer assisted techniques will be utilized.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5715 - NEOPLASIA & NEOPLASTIC DISEASE

Minimum Credits: 0

Maximum Credits: 0

Selective will emphasize principles of neoplastic and neoplastic disease. There will be an emphasis on interactive participation in a variety of clinical and basic activities. Format will include traditional as well as interactive lectures, case discussions, discussion of current articles, problem-based learning, workshops and clinical/basic science experiences.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

MED 5765 - PRECLERKSHIP COURSE

Minimum Credits: 0

Maximum Credits: 0

The course is an introduction and transition for rising third year medical students to provide necessary skills and information. The daily sessions include large and small group formats. Topics include: an introduction to the combined clinical years, industry relations, communication skills, roundsmanship, honor council, infection control, clinical logs, general rules for a successful clerkship, and using the electronic patient record training. Clerkship directors will meet the students in skills workshops to and instruct in writing prescriptions, order writing, history and physical write-up reviews, and SOAP (subjective data, objective data, assessment, and plan) notes. Exercises will include a hands-on hospital simulation on pandemic and disaster preparedness, patient assessment workshops and interdisciplinary teamwork presentations (allied health professional presentation and panel, and a clinical presentation on resident team/nursing support). All students will participate in a CPR recertification course, with respiratory n95 mask fit testing. There will also be a lecture on professionalism followed by humanism honor society group read vignettes presented by student members of the Watson humanism honor society. Faculty facilitators will then conduct humanism in medicine small group sessions. Attendance at all sessions is required to satisfactorily complete the course. Grades will be based on attendance, course participation, and completion of homework assignments.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5771 - ASSESSMENT WEEK

Minimum Credits: 0

Maximum Credits: 0

The overall goal of this course is for students, who are entering the fourth year of the first professional medicine program, to complete a series of structured assessments and participate in focused review sessions designed to enhance preparation for the National Board of Medical Examiners (NBME) United States Medical Licensing Examination (USMLE), step 2 clinical knowledge and clinical skills exams. Specific objectives include: reviewing common important dermatological conditions and how to describe skin lesions. Reviewing common radiologic findings that every graduating student should know how to identify. Reviewing targeted areas in obstetrics and gynecology in preparation for step 2 CK. Interpreting clinical pathological lab values to provide better patient care. Interpreting common and life-threatening EKG findings. Practicing with step 2 CK exam questions to better understand content and timing of the exam. Practicing common clinical procedures often performed in acting internships.

Course Component: Lecture

Grade Component: Grad HSU Basis

MED 5777 - GERIATRICS AND ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This one week course provides an update for clerkship students in the related areas of cancer diagnosis and treatment and in the recognition and approach to common problems in older adults in various environments. Updates on specific advances in both fields are presented as well as several sessions on the intersection of cancer diagnosis and care as specifically relevant to aging populations. Teaching modalities include lecture, small group sessions and interactive skill sessions.

Academic Career: Medical School

Course Component: Workshop
Grade Component: H/HS/S/LS/U

MED 5778 - CLINICAL FOCUS COURSE: GERIATRICS AND ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

The week-long geriatrics and oncology course focuses on the critical issues of aging and cancer. This course is placed in the curriculum at the mid-point of the third year, which is a unique teachable moment where students can benefit from focused instruction on key topics which are commonly encountered during the core clerkships. The coverage of both topics is designed to build on the clinical exposure that students have had; both to the impact of the aging population on clinical practice as well as the pervasiveness of cancer as a medical challenge. Both topics address practical issues related to care of these patients, recent advances in clinical care, and also have an experiential component. Students visit with patients at the Hillman Cancer Center during the oncology segment and visit one of three local nursing homes to meet with the patients and the people who care for them during the geriatrics section. Conferences follow these experiences to allow faculty-guided discussions of the experience.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5779 - CLINICAL FOCUS: GERIATRICS

Minimum Credits: 0

Maximum Credits: 0

The week-long geriatric course focuses on an interprofessional team approach to complex issues related to aging, which span the basic sciences, clinical acumen, and profound socioeconomic issues for our society. The course is intended to help medical students, as well as selected nursing and pharmacy students, understand the critical issues of aging, and the importance of team-based health care for geriatric patients in long term care facilities. The course is placed in the curriculum at the mid-point of the third year, which is a unique teachable moment where students can benefit from focused instruction on key topics which are commonly encountered during the core clerkships. The course is designed to provide students with the knowledge, skills, and experience to recognize and approach common problems in older adults in inpatient and outpatient settings as well as in the nursing home.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5810 - MEDICAL RESEARCH

Minimum Credits: 0

Maximum Credits: 0

A number of pure research opportunities are available to interested students and such arrangements should be made with individual members of the department. Research elective experiences may be intellectually rewarding and afford the opportunity to determine their aptitude for research and teach them a life-long way of thinking about the approach to biological problems whether or not they intend to make research a career. A few that are available are research in renal electrolyte physiology, investigative gastroenterology and research in hematology/oncology.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MED 5815 - RESEARCH IN CLINICAL PHARMACOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective offers participation in research activities within the center for clinical pharmacology. The student will be integrated into an ongoing research project being conducted at the center, with the type and degree of participation appropriately adjusted for prior research experience. The objective of the course is to acquaint students with career opportunities in clinical pharmacology; introduce students to modern biomedical research and increase student's knowledge of a specific area in clinical pharmacology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MED 5830 - INVESTIGATIVE GASTROENTEROLOGY

Minimum Credits: 0

Maximum Credits: 0

Areas of investigation include clinical studies of constipation and defecatory disorders, fecal incontinence, gastric emptying, lab studies of changes in bile and liver chemistry occurring during liver regeneration, partial obstruction of common bile duct, or biliary lithotripsy. This 4 week elective is conducted at Montefiore hospital.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5831 - MEDICAL ONCOLOGY RESEARCH

Minimum Credits: 0
Maximum Credits: 0

This 8 week elective is available to students interested in laboratory and/or clinical research experience in medical oncology. An approved prospectus must be prepared prior to the start of project.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5833 - RENAL PHYSIOLOGY RESEARCH

Minimum Credits: 0
Maximum Credits: 0

Intended for the student with special interest in renal physiology especially as it applies to human medicine. Exposure to techniques employed in the study of human and animal renal physiology and body fluid metabolism, including standard clearance techniques, total balance study and renal micro puncture. Assistance with and direct involvement in an ongoing research project and in certain cases, the student may initiate a related project. Adequate time will be reserved for literature research and data analysis. Optimum time for this elective is 16 weeks.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5835 - RHEUM & CLINICAL IMMUNO RESEARCH

Minimum Credits: 0
Maximum Credits: 0

Students may participate in either clinical or laboratory based research projects. Student will complete background reading on selected area of concentration. Goal is for student to present findings at a research seminar, a regional or national meeting or as a publication in a professional journal.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5900 - EXTRAMURAL INTERNAL MEDICINE

Minimum Credits: 0
Maximum Credits: 0

This pertains to all senior electives taken at other schools.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5901 - INDEPENDENT STUDY

Minimum Credits: 0
Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience. This course is for students outside the school of medicine and will be specifically titled to define content of experience.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MED 5902 - ADVANCED GENERAL MEDICINE

Minimum Credits: 0
Maximum Credits: 0

This 4 week elective will introduce medical students to a wide variety of health care experiences in general internal medicine. This will include opportunities to evaluate patients in the in- and out-patient settings, review physical diagnosis skills, improve interviewing skills, evaluate and analyze laboratory, radiology and pathology data, attend a variety of didactic lectures and participate in case presentations. Settings will include a community medicine program, a veteran's health care system and a tertiary care medical center.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5910 - NARATIV, LIT & EXPRN OF ILLNESS

Minimum Credits: 0
Maximum Credits: 0

Will explore culture and practice of medicine from perspective of an outside observer through use of various types of medical literature (poetry, fiction, non-fiction and essays). Clinical experiences traditionally considered to lie outside physician's role designed to complement exploration of perceptions patients have of hospitals and doctors. Sessions focus on assigned readings, with attention to journal entries and weekly short essays. Clinical experiences, for two half days per week, complement participant's interests, seminar readings, and goals of experiencing clinical setting through a non-medical lens.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

MED 5911 - TEACHING MEDICAL STUDENTS HOW TO TEACH

Minimum Credits: 0
Maximum Credits: 0

Those who go on to post-graduate education (residency) at teaching hospitals will be responsible for teaching medical students. This elective is designed to help our graduates acquire the teaching skills necessary to effectively teach medical students. This fourth-year level course has two primary objectives: 1) introducing fourth year students to the skills of teaching; and 2) enhancing physical diagnosis skills while practicing the skills of effective teaching. This fourth-year level course will consist of didactic instruction, small group exercises, and working with standardized patients. Topics to be covered include: giving an effective lecture; precepting a medical student; giving feedback; evaluating students; dealing with problem learners; teaching clinical reasoning and just plain teaching. Physical diagnosis instruction will highlight core information and more advanced skills. Small group exercises will include giving a mini lecture; running a PBL; teaching about oral presentations/writing up h & PS; and teaching at the bedside. The students will alternate being teacher and student. Other practical teaching experiences working with current third year students may be possible depending on interest and availability. These opportunities could include: running a student-teaching attending session in medicine; working with current students participating in an outpatient setting; facilitating a small group (e.g. Ethics). Students will also learn how to critique teaching sessions by evaluating faculty lectures and sitting in on small groups and evaluating the facilitator. To successfully complete this course you must attend all scheduled sessions, give one presentation of a mini-lecture to the group, and critique assigned educational experiences.

Academic Career: Medical School
Course Component: Practicum
Grade Component: H/HS/S/LS/U

MED 5920 - GLOBAL HEALTH PREPARATORY SEMINAR

Minimum Credits: 0
Maximum Credits: 0

This is a four (4) week seminar designed to prepare a student or resident for an international clinical experience and to provide a foundation for future global health advocacy and activism. The seminar will consist of 1/3 didactic instructions, 1/3 team-based learning and 1/3 practical experiential learning. It is organized into 4 tracks: 1) global health public policy 2) ethics & human rights 3) evidence based medicine for developing countries and clinical skills and 4) tropical infections. Faculty from GSPIA will provide guest lectures on selected topics regarding NGOs, global actors, development, policy analysis, corruption and transnational governance. Dr. Barnard will coordinate the bioethics and human rights track which highlights important documents regarding the right to health, policy and system factors contributing to health inequalities, social determinants of health and research ethics through case studies. Dr. Veldkamp coordinates the tropical medicine track that provides in-depth exploration of the diagnosis and treatment of common parasitic diseases, HIV, TB, and malaria according to international guidelines and local context. Participants will be exposed to hands-on sessions in basic microscopic examination. Lastly, Dr. Bui will cover EBM in developing countries reviewing existing literature, physical exam skills/tools including ultrasound, low cost/bedside diagnostics, algorithms and clinical procedures relevant for the general practitioners in developing countries.

Academic Career: Medical School
Course Component: Seminar
Grade Component: H/HS/S/LS/U

MED 5925 - STREET MEDICINE - OPERATION SAFETY NET

Minimum Credits: 0
Maximum Credits: 0

This one month clinical elective will focus on the health care of those sleeping on the streets of Pittsburgh. This group presents significant challenges in terms of access to care, continuity of care, cultural barriers, as well as a variety of medical issues. By working directly with the street homeless in their environment, students will see the health care system "from the outside" and learn to partner with a largely alienated population to improve their health. Operation safety net (OSN) is a unique program of the Pittsburgh mercy

health system, located at UPMC Mercy, in which walking teams visit the unsheltered homeless in the alleys, under the bridges and along the river banks where they live. Follow-up care, including medical, psychiatric, social and housing services are provided by a dedicated case management team. An inpatient consult service specializes in the interface of the street homeless with the medical system.

MED 5996 - PROLOGUE TO MEDICINE PROGRAM

Minimum Credits: 0

Maximum Credits: 0

The five week prologue to medicine program promotes academic achievement and retention by introducing students to the courses that they will take during the first year of medical school. The program features a non-graded instruction in the following areas: introduction to medical gross anatomy, cell biology, and introduction to professionalism. Problem-based learning (PBL) exercises and learning/study strategies instruction supplement the curriculum. All classes are designed to model the content and pace of the actual courses. The courses are taught by the same medical school faculty who teach the courses during the school year.

Academic Career: Medical School

Course Component: Lecture

Grade Component: No Grade Required

MED 5999 - FULL TIME RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students may participate in a research fellowship with a basic science or clinical researcher at the University of Pittsburgh or at another University for a period of one year. The fellowship must be competitive (open to other students with the best qualified student chosen) and must be approved by the associate dean for student affairs in the medical school.

Medicine - Pharmacology

MSMPHL 2300 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Biophy & Struct Bio (MS)

MSMPHL 2310 - PRINCIPLES OF PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course consists of a series of lectures and tutorial sessions that focus on the general principles of pharmacology. Major topics are principles of pharmacokinetics (including drug absorption, distribution, and metabolism), pharmacodynamics (quantitation of drug-receptor interactions) and mechanisms of action of cardiovascular and autonomic drugs. In addition, this course will include both animal laboratory and human simulator demonstrations that illustrate important pharmacological principles discussed in class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 2350 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Beginning in the second year of the program students will be required to attend the departmental seminar series. These seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers in pharmacology and related fields. In order to receive credit for the course, students must attend a minimum of 80% of the seminars.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMPHL 2355 - PHARMACOLOGY SUMMER SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Beginning in the second year of the program students will be required to attend the departmental seminar series. These seminars are held approximately once a week throughout the fall and spring semesters and include presentations by nationally and internationally recognized visiting researchers in pharmacology and related fields. In order to receive credit for the course, students must attend a minimum of 80% of the seminars. Present once each summer and attend a minimum of 80% of the summer seminars in order to receive credit for the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMPHL 2360 - BIOLOGY OF SIGNAL TRANSDUCTION

Minimum Credits: 3

Maximum Credits: 3

This course will explore different types of signaling pathways activated by receptor-ligand interactions. Topics to be covered include, but are not limited to: g-protein linked receptors, adenylate cyclases, small gtpases, kinases and phosphatases, nitric oxide, phospholipases, steroid hormone signaling, and pharmacological applications of signaling pathways.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSMPHL 2370 - DRUG DISCOVERY

Minimum Credits: 3

Maximum Credits: 3

Drug discovery is an interdisciplinary science that seeks to identify small molecular and/or biologic probes and to understand at the molecular level how these probes affect macromolecular processes. This course will discuss various topics that are relevant to current approaches and principles in drug discovery including target validation, drug origins, cell based screening, high throughput screening, proteomic approaches to drug discovery, computational biological aspects of drug discovery, and pharmacoinformatics, as well as topics in preclinical drug development and intellectual property. The course will include case studies intended to aid students in a full understanding of the drug discovery process.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 2390 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides an opportunity for students to carry out a specific laboratory project in any area of interest in pharmacology.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Pharmacology (PHD) or Interdis Biomedical (UNK)

MSMPHL 3300 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Pharmacology (PHD)

MSMPHL 3310 - CANCER BIOLOGY AND THERAPEUTICS

Minimum Credits: 3

Maximum Credits: 3

This course presents biochemical and clinical aspects of cancer biology and therapy, and is designed for graduate students training in the basic sciences or medicine. The lectures cover: the biology of normal and neoplastic cells, mechanisms of neoplastic transformation, chemical and environmental carcinogenesis, viral oncogenesis, breast and prostate cancer, radiotherapy, tumor immunology chemotherapy and chemoprevention.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 3320 - JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Beginning in the second year of the program students will participate in the departmental Journal Club. Presentations will be held each week that the department hosts a seminar speaker (i.e. 2-3 times/month) during the fall and spring semester. Students entering their fifth year of study may petition the program director to be excused from the spring session of the Journal Club. Sixth year students and beyond are not required to enroll in Journal Club although their attendance is encouraged. A log-in sheet will be available at all Journal Club meetings. All students in attendance will complete an anonymous peer-evaluation sheet that will be provided to the presenter. Students must inform the program director in advance if they are unable to attend a specific Journal Club. Excusable absences from Journal Club include individual or family illness or presentation (i.e. poster, platform talk) at a major scientific conference. Students are allowed two unexcused absence/semester.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMPHL 3330 - GENOME INSTABILITY AND HUMAN DISEASE

Minimum Credits: 3

Maximum Credits: 3

Mechanisms that maintain genome stability allowed the origin of species. DNA damage is omnipresent and DNA repair and DNA damage tolerance mechanisms are interwoven in systems that control transcription, replication, cell division, signal transduction, cell death and evolution. More than 40 distinct human diseases are caused by defects in DNA repair, including syndromes of impaired development, immunodeficiency, cancer predisposition, neurodegeneration, and premature aging. This course will emphasize the molecular biology and biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes as they pertain to health and disease. Environmental, clinical and endogenous sources of DNA damage will be discussed. An understanding of the fundamental role of DNA repair mechanisms in immunology, oncology, neurology, and aging will be central to all lectures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 3335 - DNA REPAIR JOURNAL

Minimum Credits: 1

Maximum Credits: 1

The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond.

Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).

MSMPHL 3340 - FOUNDATIONS OF SUCCESSFUL CAREER PLANNING AND DEVELOPMENT PART 1

Minimum Credits: 1

Maximum Credits: 1

The goals of the fall and spring consecutive courses are to enhance the career development capacity and foster the life-long career management habits of graduate students and postdocs to maximize their scholarly training success and facilitate personal career outcomes. The courses will provide foundational background through experiential learning and small-group discussions, while facilitating peer mentoring. These approaches support the self-construction of individually relevant understandings of career development that is consistent with similar independence in scholarly expertise. The areas of focus include self-assessments, career exploration, goal setting, professional development, career planning and management, career adaptability, and additional topics identified by students. Participation in the subsequent spring course is expected for those enrolled in the fall prerequisite course.

These approaches support the self-construction of individually relevant understandings of career development that is consistent with similar independence in scholarly expertise. The areas of focus include self-assessments, career exploration, goal setting, professional development, career planning and management, career adaptability, and additional topics identified by students. Participation in the subsequent spring course is expected for those enrolled in the fall prerequisite course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: MSMPHL 3340

MSMPHL 3360 - MOLECULAR PHARMACOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course examines molecular mechanisms of drug interactions with an emphasis on drugs that modulate cell signaling, cellular responses to drugs, and drug discovery. The course will include student participation through presentations and discussion of relevant contemporary scientific literature. Topics include: cell cycle checkpoints and anti-cancer drugs, therapeutic control of ion channels, and blood glucose, anti-inflammatory agents and nuclear receptor signaling, and molecular mechanisms of drugs used for the treatment of cardiovascular diseases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 3375 - NEUROPHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will broadly review neuropharmacology and neurobiology, study monoamine, cholinergic and GPCR biology, and explore the blood-brain barrier and its significance to neuropharmacology. The course will focus on the molecular mechanisms of drug action

for different classes of compounds including, but not limited to, antidepressants, antipsychotics, anti-epileptics, anesthetics, weight loss, stimulants, and neuroprotective, addiction, pain and migraine drugs. In addition to the formal lectures the course will emphasize critical reading of the primary literature through journal-club style discussions and cover the most recent treatment and therapeutic avenues being developed for a broad range of neurologic and psychiatric disorders. The course is ideally suited for molecular pharmacology and neuroscience graduates students or any other graduate student with interest in neurological diseases and their treatments. The course is also appropriate for pre-professional undergraduates who have completed 4 semesters of chemistry and 2 semesters of biology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMPHL 5833 - ADVANCED PHARMACOLOGY

Minimum Credits: 0

Maximum Credits: 0

Opportunities for application of advanced experimental methods in areas of special interest to the student are available in the fields of neuropharmacology and biochemical pharmacology. Experimental projects, preferably based on a problem or an observation that arose from the student's activity in the clinic, can be designed in consultation with the faculty.

Academic Career: Medical School

Course Component: Practicum

Grade Component: Grad HSU Basis

Medicine Anesthesiology

MSANE 5372 - ANESTHESIA CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

Two-week rotation in anesthesia runs in tandem with general surgery (SURG 5372). Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Instructional focus on airway management (intraoperative), post-operative recovery and pain management. Registration must be accompanied by registration in SURG 5372.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSANE 5381 - PAIN EVALUATION AND TREATMENT

Minimum Credits: 0

Maximum Credits: 0

This junior elective will be located at the pain evaluation and treatment institute (PETI). Students will observe and participate in the clinical evaluation of chronic and acute pain patients as well as help to formulate treatment plans.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSANE 5382 - RESEARCH OR INDIVIDUAL STUDY

Minimum Credits: 0

Maximum Credits: 0

This junior elective will provide an opportunity for students to learn basic research methodology; including conceiving hypotheses, experimental design, protocol development, data analysis, and statistical evaluation of research results. The student may participate in ongoing research, either in the laboratory or in the clinical setting.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSANE 5420 - ANESTHESIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective designed to provide information and skills required to care for patients in the perioperative period. At the end of this elective, student should have sufficient knowledge and skill to plan and administer anesthesia in a straightforward case under the direct supervision of faculty. Core content of the third year, but material covered in greater depth. Specific material varies depending upon selected institution. Teaching is on a one-to-one basis in the operating room and during rounds. The course can be tailored to satisfy the needs and goals of the individual.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSANE 5440 - SUBSPECIALTIES ANESTHESIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course is being offered for two types of medical students: 1) those who have completed a general anesthesia elective and who would like to develop expertise in an anesthesia sub-specialty and 2) those who have a special interest in non-anesthesia specialty areas such as internal medicine, pediatrics, cardiology, neurosurgery, otolaryngology, obstetrics, transplantation medicine, pain therapy or outpatient/preoperative consultation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSANE 5445 - PAIN MEDICINE

Minimum Credits: 0

Maximum Credits: 0

The pain evaluation and treatment institute (PETI) staff physicians will introduce you to the interdisciplinary approach of dealing with patients with chronic pain of nonmalignant origin. You will interface with other PETI disciplines of occupational, physical, and psychological therapy as well as be exposed to nerve block techniques when appropriate. Examples of commonly seen problems are myofascial pain, headaches, and reflex sympathetic dystrophy. You will learn about post-op pain. Epidural and patient controlled analgesia will be highlighted.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSANE 5450 - MD/OMS ANESTHESIA SPECIALTIES

Minimum Credits: 0

Maximum Credits: 0

This four month rotation for third or fourth year medical students who are participants in the md/oral maxillofacial surgery program, provides exposure to patients undergoing a variety of procedures under general anesthetics and monitored anesthesia care. Clinical experience and didactics are under the supervision of the anesthesia attending physicians for an experience that includes basic principles of planning an anesthetic, pre-operative evaluation of risk, intra-operative techniques, and post-operative care including pain management. Graduated and supervised exposure is expected over the term of the course that includes care of trauma and neurosurgical patients with a particular emphasis on head and neck procedures. Cognitive objectives: 1) recognize and explain the pre-operative work-up for patients undergoing surgery requiring an anesthetic; 2) develop and explain the concept of an anesthetic plan; 3) recognize common complications of anesthesia and their management; 4) recognize and explain safe anesthesia practices and systems-based practice of care in a team environment; 5) evaluate and understand the use of various anesthetic agents and techniques; 6) recognize the issues present in difficult airways and their management techniques. Skill objectives: 1) demonstrate competency for iv placement; 2) demonstrate competency for intubation including experience with nasal intubations and fiber optic intubation for the difficult airway; 3) assist in the application of general anesthetic techniques and the overall anesthetic plan with the supervising attending.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSANE 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSANE 5840 - ANESTHESIOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

These electives provide opportunities to learn basic research methodology, including approach to experimental design, protocol development, data analysis and evaluation of results. Student participates in ongoing research in the lab and on patients. Opportunities for research in resuscitation, high frequency jet ventilation, patient monitoring, hemorheology, brain pathophysiology, and pharmacology of anesthesia-related drugs are available. Many other topics are also possible.

Academic Career: Medical School

Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSANE 5900 - INDEPENDENT STUDY

Minimum Credits: 0
Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSANE 5901 - EXTRAMURAL ANESTHESIOLOGY

Minimum Credits: 0
Maximum Credits: 0

A clinical experience in anesthesiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the UPSOM course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Molecular Biophysics

MOLBPH 2000 - LABORATORY RESEARCH ROTATIONS

Minimum Credits: 1
Maximum Credits: 1

These rotations serve three (3) purposes: 1. Encourage the student to experience different research environments and methods. 2. Provide the students opportunities to optimize their choice of research advisor/lab through direct experience in different laboratory environments. 3. Provide faculty advisors with a basis for informed judgment regarding prospective students. Academic advisors provide help in suggesting a choice of lab rotations if necessary.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

MOLBPH 2001 - MOLECULAR BIOPHYSICS 1: STRUCTURE

Minimum Credits: 3
Maximum Credits: 3

This is the first of three (3) courses, which together constitute the common core of the first year of the molecular biophysics graduate program. Here, the emphasis is on the structural foundation, especially that of proteins and nucleic acids. Fundamental results are covered together with experimental techniques (x-ray diffraction, NMR, EM/CryoEM, AFM, CD/ORD, Raman and fluorescence spectroscopy), as well as structural systematics and informatics.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MOLBPH 2002 - MOLECULAR BIOPHYSICS 2: THEORY AND SIMULATION

Minimum Credits: 3
Maximum Credits: 3

Core course of the molecular biophysics & structural biology (MBSB) graduate program. Students learn about the integration of different techniques to elucidate molecular mechanisms of disease, through the study of biomolecular structure, interactions and dynamics. The course includes hands-on demos of x-ray crystallography and other essential tools in structural biology. With the help of MBSB faculty experts, students prepare and present a research seminar on primary research. Students also gain experience in the writing of grant/fellowship applications to support their research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MOLBPH 2010 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in molecular biophysics.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD)

MOLBPH 2012 - MOLECULAR BIOPHYSICS 2: MOLECULAR INTERACTIONS AND DYNAMICS

Minimum Credits: 4

Maximum Credits: 4

Core course of the molecular biophysics & structural biology (MBSB) graduate program. Students learn about the integration of different techniques to elucidate molecular mechanisms of disease, through the study of biomolecular structure, interactions and dynamics. The course includes hands-on demos of x-ray crystallography and other essential tools in structural biology. With the help of MBSB faculty experts, students prepare and present a research seminar on primary research. Students also gain experience in the writing of grant/fellowship applications to support their research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MOLBPH 2013 - MOLECULAR BIOPHYSICS 3: THEORY AND SIMULATION

Minimum Credits: 4

Maximum Credits: 4

This course will introduce students to computational structural biology, primarily relying on physical and chemical principles, as well as associated computational approaches. The course is a core class for both (a) the joint program in computational biology and (b) the molecular biophysics program. The course will cover biomolecular structure, statistical mechanical phenomenon in biophysics, simulation of biomolecular behavior, and key applications of computations in the field of structural biology. Specific topics: probability theory, statistical mechanics and thermodynamics, simulation methods, electrostatic phenomena, biochemical kinetics, binding, coarse-grained modeling, computations for structure determination, drug design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MOLBPH 2020 - STRUCTURAL BIOLOGY/MOLECULAR BIOPHYSICS SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course comprises weekly lectures by nationally renowned guest speakers as well as faculty from the Pittsburgh schools engaged in the development and application of biophysical and structural techniques towards important biomedical questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MOLBPH 2030 - DATA AND LITERATURE CLUB

Minimum Credits: 1

Maximum Credits: 1

This course, designed for students in the molecular biophysics graduate program, will alternate between 'data sessions' in which postdocs and students present research results for feedback and critique, and 'literature sessions' in which students will lead discussions and critiques of the current literature. The course is designed to give students experience in presentation and critical analysis skills, as well as to create opportunities for broader learning and interaction.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MOLBPH 2040 - TA: MBSB

Minimum Credits: 1

Maximum Credits: 1

The course will provide graduate students in the molecular biophysics and structural biology graduate program with the opportunity to serve as a teaching assistant in the mb3 core course. The curriculum is designed to provide valuable teaching skills to the professional scientist.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

MOLBPH 2050 - SPECIAL TOPICS IN MBSB: CRYOEM

Minimum Credits: 3

Maximum Credits: 3

Students will focus on a selected topic in molecular biophysics and structural biology: cryoem. This course is designed to enable graduate level students to understand the theoretical and practical aspects of Cryo-Electron Microscopy (cryoem). The course covers the basic anatomy of electron microscopes, the principles of image formation, and major cryoem techniques including tomography, single particle analysis and 2-d crystallography. The course emphasizes concepts rather than mathematical details, and is ideal for anyone who needs an introduction to the cryoem field to be able to understand the literature, the talks at meetings/seminars and conversations they will have with collaborators.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Molecular Biophy & Struct Bio (PHD)

MOLBPH 2090 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MOLBPH 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Integrative Molecular Biology (PHD)

MSMBPH 2000 - LABORATORY RESEARCH ROTATIONS

Minimum Credits: 1

Maximum Credits: 1

These rotations serve three (3) purposes: 1. Encourage the student to experience different research environments and methods. 2. Provide the students opportunities to optimize their choice of research advisor/lab through direct experience in different environments. 3. Provide faculty advisors with a basis for informed judgment regarding prospective students. Academic advisors provide help in suggesting a choice of lab rotations if necessary.

MSMGDB 3510 - ADV TOPICS IN GENE EXPRESSION

Minimum Credits: 3

Maximum Credits: 3

This course consists of lectures and class presentations on recent advances in the molecular genetics. The emphasis of the course is on the regulation of gene expression at the DNA, RNA and protein levels. Regulation in eukaryotes is emphasized, including yeast, protozoan, and mammalian systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMGDB 3530 - GENOME INSTABILITY AND HUMAN DISEASE

Minimum Credits: 3

Maximum Credits: 3

Mechanisms that maintain genome stability allowed the origin of species. DNA damage is omnipresent and DNA repair and DNA damage tolerance mechanisms are interwoven in systems that control transcription, replication, cell division, signal transduction, cell death and evolution. More than 40 distinct human diseases are caused by defects in DNA repair, including syndromes of impaired development, immunodeficiency, cancer predisposition, neurodegeneration, and premature aging. This course will emphasize the molecular biology and biochemistry of DNA repair, placing these mechanisms into the context of other cellular processes as they pertain to health and disease. Environmental, clinical and endogenous sources of DNA damage will be discussed. An understanding of the fundamental role of DNA repair mechanisms in immunology, oncology, neurology, and aging will be central to all lectures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMGDB 3535 - DNA REPAIR JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

The course is a journal club on current topics in DNA repair as it relates to human disease, DNA damage processing, genome stability, telomere biology, cancer and aging. Primarily designed for students in the second year of their graduate program and beyond.

Presentations will be held twice per month during the fall and spring semester. In order to receive credit for the course, students must attend a minimum of 80% of the sessions, present once per semester, participate in class discussion and complete anonymous peer-evaluations for each presenter. One week prior to presentation, presenters will identify a recent publication in the field and distribute it to their classmates. Presenters must define the hypothesis of the paper, provide background and significance, describe experimental methods used, interpret the data, conclude whether the data support the authors' conclusions and propose future experiments. Grades will be determined by attendance (10%), class participation (20%) and quality of presentation (70%).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSMGDB 3540 - REPRODUCTIVE DEVELOPMENT FROM MODEL ORGANISMS TO HUMANS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the molecular aspects of the transition from gamete to a reproductive organism. The course progresses through the building of germ cells, fertilization and stem cell participation to sex determination, gonad morphogenesis, puberty, menopause and pregnancy. This course highlights both human and model organisms to bring together diverse aspects of the cell and developmental biology of reproductive tissues and their impact on disease pathology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INTBP 2000

MSMGDB 3550 - STEM CELLS

Minimum Credits: 3

Maximum Credits: 3

This course will provide a comprehensive overview of stem cell biology - an intriguing and a most-debated research area. The course will focus on the biology of stem cells and their role in health & disease with emphasis on development and carcinogenesis. Trans-differentiation of stem cells for tissue engineering applications will also be discussed. Lectures and student presentations will cover: embryonic as well as fetal and adult stem cells in blood, liver, brain, muscle, kidney, pancreas and gut. Students will also be educated on bioethical issues and existing laws governing stem cell research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMIC 5835 - MOLECLR GENETC & BIOCHMST RSRCH

Minimum Credits: 0

Maximum Credits: 0

Comprehensive laboratory research rotation in the department of molecular genetics and biochemistry with rotations available in biochemistry, immunology, molecular genetics, molecular pathogenesis, and virology.

Academic Career: Medical School

Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

MSMVM 2400 - MS THESIS RESEARCH

Minimum Credits: 1
Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

MSMVM 2410 - MOLECULAR VIROLOGY

Minimum Credits: 2
Maximum Credits: 2

This course stresses basic concepts of animal virology. Subjects include different viruses, the expression and regulation of viral genes, the mechanisms of viral-induced cytopathology, latency, and cell transformation, and the nature of viroids and prions. Supplementary reading assignments are required.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 2420 - EXPERIMENTAL VIROLOGY

Minimum Credits: 2
Maximum Credits: 2

This course is designed for graduate students training in molecular virology research and is designed to provide a more in-depth study of molecular virology through a critical analysis by the student of seminal research publications in various virus systems. Paper discussion format.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 2430 - TA: MEDICAL MICROBIOLOGY

Minimum Credits: 1
Maximum Credits: 1

The purpose of this course is to introduce graduate students of the interdisciplinary biomedical sciences graduate program to the principles of teaching. The students will be trained in basic teaching techniques as well as provided material for teaching students specific concepts. As a major part of this course, students will participate in teaching first-year medical students the fundamentals of microbiology, in conjunction with the laboratory and problem based learning sections of the molecular pathogenesis of infectious disease crse of basic science medical school book.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

MSMVM 2450 - RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

Grade Component: Grad HSU Basis

MSMVM 2470 - CONTEMPORARY TOPICS IN MOLECULAR VIROLOGY AND MICROBIOLOGY

Minimum Credits: 1
Maximum Credits: 1

This is a course in which students will read, present, and evaluate the primary literature in molecular virology and microbiology. Each semester will feature an integrated set of papers addressing a current issue of interest. The course may be taken more than once by each student, since the topics addressed will change each semester.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad SN Basis

MSMVM 2480 - MECHANISMS OF MICROBIAL PERSISTENCE

Minimum Credits: 2
Maximum Credits: 2

Microorganisms have evolved a vast array of mechanisms to avoid detection or elimination by host defenses, and to establish persistent infections that can lead to chronic or recurrent disease. The ability to establish persistent infections often complicates the successful therapeutic treatment of disease caused by such microorganisms. This course is designed to familiarize students with the mechanisms by which select bacterial and viral pathogens establish persistence in their host cells and/or organisms, and the subsequent considerations for pathogenesis and therapy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad SN Basis

MSMVM 2490 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in molecular virology and microbiology.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Virology & Microbiol (PHD) or Interdis Biomedical (UNK)

MSMVM 3290 - AUTOIMMUNITY & IMMUNOPATHOLOGY

Minimum Credits: 2
Maximum Credits: 2

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

MSMVM 3400 - PHD DISSERTATION RESEARCH

Minimum Credits: 1
Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Molecular Virology & Microbiol (PHD)

MSMVM 3410 - MICROBIAL PATHOGENESIS

Minimum Credits: 2
Maximum Credits: 2

This course is an introduction to the molecular basis of bacterial and parasitic pathogenesis. Topics include: 1) introduction to microbial pathogens, 2) molecular and classical Koch's postulates, 3) pathogen adhesion strategies, 4) molecular mechanisms of invasion 5) microbial strategies for immune evasion 6) genetics and action of bacterial toxins 7) coordinate regulation of virulence factors 8) antibiotics and antibiotic resistance 9) host responses to infection 10) vaccines.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3420 - VIRAL PATHOGENESIS

Minimum Credits: 2
Maximum Credits: 2

The goal of this course is to integrate the lectures given on a particular virus in the comprehensive virology course with two additional lectures which expand the basic biology of the virus life cycle to the level of virus-host interactions. The first lecture will address the pathogenic properties of the virus from the perspective of disease manifestations, immunology, and the natural history of infection. This will be followed by a second lecture which will address the molecular basis of viral pathogenesis and current advances in antiviral research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MSMVM 3435 - TUMOR VIROLOGY

Minimum Credits: 2

Maximum Credits: 2

The purpose of the course is to introduce students to viruses known or suspected of causing tumors and with special emphasis on viruses causally linked to human cancer. Polyomaviruses, Epstein-Barr virus, Kaposi's sarcoma-associated herpesvirus, adenoviruses, papillomaviruses, hepatitis viruses, human t-cell lymphotropic virus and their relevant gene products will be covered in detail during weekly two-hour lectures. Lectures will be given by experts in each virus. Criteria for establishing causal links between a virus and human cancer will be discussed. Focus will be on how viral mechanisms of transformation can provide key mechanistic insight on cellular pathways that drive tumorigenesis including in malignancies with non-viral etiology. Topics covered will include oncogenes, tumor suppressors, oncogenic cofactors, disruption of innate/ adaptive immune responses, latency, viral mimicry/ piracy of cellular regulatory genes, genomic instability and role of non-coding RNAs in viral pathogenesis. Techniques for novel tumor virus discovery will also be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: MSMVM 2410

MSMVM 3440 - VACCINES AND IMMUNITY

Minimum Credits: 2

Maximum Credits: 2

Vaccines are widely regarded as one of the major contributors to increased life expectancy. The purpose of this course is to (1) explore the history of vaccines; (2) underscore the successful role of current vaccines in the management of infectious diseases; (3) present strategies for a new generation of safe and effective molecular vaccines; and (4) discuss the ethical and economic realities of vaccine use and development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 3445 - ACUTE VIRUS INFECTIONS

Minimum Credits: 2

Maximum Credits: 2

Acute virus infections are a leading cause of global morbidity and mortality. Viruses are obligate parasites that require host cells to propagate. Over time, viruses have evolved myriad mechanisms to ensure entry into host cells, propagation of their genomes, and release of progeny. Often, a consequence of infection is disease and death. Acute virus infections is designed to be an advanced graduate level course covering various aspects of virus infections between different virus families.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: MSMVM 2410 or IDM 2002

MSMVM 3455 - ANTIMICROBIAL THERAPEUTICS

Minimum Credits: 2

Maximum Credits: 2

The development and mechanism of action of antimicrobial drugs, including anti-bacterials, anti-fungals, anti-parasitics and antivirals will be described at the molecular level with some emphasis on diseases with significant public health impact (HIV, malaria, tuberculosis, etc.). Aspects of medicinal chemistry, biochemistry, and molecular biology will be considered in drug development. Primarily lecture format with student presentations of selected papers as warranted. Some emphasis on chemistry, but accessible to students without a strong chemistry background.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSMVM 3471 - INNATE IMMUNITY

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the several aspects of host innate immunity against infection. Topics will include the conceptual basis for innate versus adaptive immunity, induction of innate immunity by pathogens, signaling by innate immune receptors, effector cells of the innate immune system, secreted effectors of innate immune signaling, and subversion of innate immune signaling by pathogens.

Courses like molecular virology and comprehensive immunology are highly recommended but not a prerequisite for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSMVM 3475 - IMAGING HOST-PATHOGEN INTERACTIONS

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to fluorescence microscopy with an emphasis on the study of host-pathogen interactions. Experts in the fields of bacterial pathogenesis, viral entry, viral protein signaling, fungal pathogenesis, polymicrobial infections will present lectures on the use of imaging in their fields of research and lead a journal club discussion of relevant papers from the literature. The goal is to provide students with a basic understanding of fluorescence microscopy for the purpose of properly designing their own experiments and effectively evaluating the work of others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

MSMVM 3480 - IMMUNOLOGY OF INFECTIOUS DISEASE

Minimum Credits: 2

Maximum Credits: 2

General mechanisms of immunity to microbial pathogens and common strategies of immune evasion will be discussed with emphasis on detailed examples from viral, bacterial and parasitic systems. An in depth examination of survival strategies of pathogens in intracellular and extracellular host environments will be addressed, as well as the consequences of inadequate and inappropriate immune responses.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: MSIMM 2210

Music

MUSIC 2000 - MA THESIS

Minimum Credits: 3

Maximum Credits: 3

Research and writing of a thesis for an MA degree in music.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MUSIC 2020 - COLLEGIATE CHORALE

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad LG/SNC Basis

MUSIC 2038 - MUSIC, CULTURE & TECHNOLOGY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MUSIC 2040 - MUSIC OF INDIA: THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2041 - MUSIC IN AFRICA

Minimum Credits: 3

Maximum Credits: 3

This course examines the historical social and cultural background of music in Africa with particular reference to music in community life, performing groups, the training of musicians, instrument structures in African music, and the interrelations of music and dance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2042 - MUSIC IN LATIN AMERICA

Minimum Credits: 3

Maximum Credits: 3

Mexico, Venezuela, Columbia, Panama, and Peru will be the major countries represented in this general survey of the music of Latin America. The course will be taught in a lecture-discussion format with extensive use made of recordings, slides, and films. Some actual performance of drumming traditions will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2044 - MUSIC IN SOUTHEAST ASIA

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the musical cultures of SouthEast Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2045 - MUSIC IN SOUTH ASIA

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the musical cultures of South Asia; historical, social and cultural background of music, music theory, instruments, and selected musical genres from different countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2046 - AFRICAN-AMERICAN MUSIC IN U.S.

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize the student with various phases of African-American music existing in North America; blues, gospel-spirituals, work songs, children's games songs, and classical compositions of ragtime composers Scott Jobin, JP Johnson, etc. Students will conduct field projects centered around "street recordings, locations, interviews of local and visiting artists, etc." A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2047 - WOMEN AND MUSIC IN CROSS CULTURAL PERSPECTIVES

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with music of, by, and about women from a cross-cultural perspective. Topics include, but are not limited to, traditional and ritual music, music as empowerment, sexual aesthetics, women as composers and performers, and feminist music criticism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2048 - INSTRUMENTATION AND ORCHESTRATION

Minimum Credits: 3

Maximum Credits: 3

A survey of different styles of instrumentation and orchestration in the European art music tradition. Focus of the course may change from year to year.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2049 - LATE ROMANTIC AND EARLY 20TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

This course will begin with the more revolutionary nineteenth-century composers who worked in Paris--Chopin, Berlioz, Liszt--and trace the breakdown of tonality and the emergence of new styles and structural principles in the late nineteenth and twentieth centuries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2051 - JAZZ COMPOSITION AND ARRANGING 1

Minimum Credits: 3

Maximum Credits: 3

This course develops the students' knowledge of the techniques of jazz-rock composition and arranging. The distinctive features of jazz-rock harmony are studied, and students write arrangements for various instrumental combinations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2052 - JAZZ COMPOSITION AND ARRANGING 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of music 2051. The course develops the student's knowledge of the techniques of jazz-rock composition and arranging. The distinctive features of jazz-rock harmony are studied, and students write arrangements for various instrument combinations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2054 - GLOBAL HIP HOP

Minimum Credits: 3

Maximum Credits: 3

This seminar analyzes how diverse groups of musicians and listeners use hip-hop to express local and transnational claims of belonging through the appropriation of musical genres identified with the West and with African Americans in particular. A closer reading of global hip-hop practices offers insights into the genre's artistic goals and its social profile in a variety of contexts. Through analyses of locally distinct musical expressions, marketing trends within national and global music industries, and state-sponsored policies relating to hip-hop, this course sheds light on hip-hop's role in constituting cultural and political identities among diverse groups of people in the U.S. and abroad.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MUSIC 2057 - MUSIC IN CENTRAL ASIA

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MUSIC 2061 - JAZZ IMPROV 1

Minimum Credits: 3

Maximum Credits: 3

This course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2062 - JAZZ IMPROV 2

Minimum Credits: 3

Maximum Credits: 3

A continuation of music 2061. The course provides an analysis of the techniques of jazz-rock-pop improvisation. Students develop a repertoire of current standards and compose and analyze pieces in several styles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2071 - ELECTRONIC AND COMPUTER MUSIC 1

Minimum Credits: 3

Maximum Credits: 3

This course provides an introduction to composing music in the university of Pittsburgh electroacoustic music studio. Instruction in midi sequencing, introduction to synthesis, sampling, and other digital audio technology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2072 - ELECTRONIC AND COMPUTER MUSIC 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of music 2071. It provides further experience in composing music in the university of Pittsburgh computer and electronic music studio, instruction in the advanced digital audio applications, and hard disk recording and editing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2111 - PRINCIPLES OF RESEARCH AND BIBLIOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

This course is for all first-year graduate students, and introduces them systematically to the significant research and reference methods and their resulting tools within all major categories and formats of music research and publication. It treats music research as a unified field in which the major disciplines--historical musicology, ethnomusicology, theory/analysis and composition--necessarily interact to inform the most productive and significant results, even for narrowly defined research topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2121 - INTRODUCTION TO ETHNOMUSICOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course is designed for all first graduate students in music and aims to give them an overall understanding of the discipline through a survey of its history, theory, and methodology, and of the writings of major scholars in the field. A series of specific research projects will be integrated with the theoretical discussions, and technical aspects of research such as field work, transcription, and analysis will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2131 - INTRODUCTION TO MUSICOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course is designed for all first year graduate students in music and aims to give them an overall understanding of the discipline through a survey of its history, theory, and methodology, and of the writings of major scholars in the field. A series of specific research projects will be integrated with the theoretical discussions, and technical aspects of research such as notation, source studies, sketch studies, criticism, performance problems, and analysis will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2141 - MUSICAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Examination of issues in the invention and description of musical structures and the relation of these activities to each other, with attention given to such special problems as intersubjectivity, contextuality, the role of inference in perception, and introspection as a mode of empirical inquiry; examples will be drawn from a wide range of literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2151 - INTRODUCTION TO JAZZ STUDIES

Minimum Credits: 3

Maximum Credits: 3

This proseminar provides a critical review of writings on jazz, by analyzing and evaluating the development of the scholarly literature on jazz, focusing on the writings of some of the most influential critics and historians who have shaped the field. The writers will include Nat Hentoff, Ira Gitler, Leonard Feather, Mike Hennessey (England), Gunther Schuler, Andre Hodier (France) etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2230 - SEMINAR IN TWENTIETH CENTURY MUSIC

Minimum Credits: 3

Maximum Credits: 3

The contents of this course change from year to year, but will consist either of an intensive survey of a limited chronological period, or of the exploration of a special Twentieth-Century topic.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MUSIC 2232 - SEMINAR IN MUSIC SINCE 1945

Minimum Credits: 3

Maximum Credits: 3

The course studies postwar masterpieces and examines the modes of thought that produced them. Sessions, Berio, Boulez, Lutoslawski, Stockhausen, Babbitt, and Carter. The scope and method of the course will be determined in part by the interests of the participants.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2320 - SEMINAR IN AMERICAN MUSIC

Minimum Credits: 3

Maximum Credits: 3

A review of ethnographic, historical and stylistic problems in the study of musical cultures of North America with particular reference to one or more specific musical genres of selected societies and culture areas.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

MUSIC 2396 - MUSIC IN SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

MUSIC 2442 - FIELD AND LAB METHODS

Minimum Credits: 3
Maximum Credits: 3
A study of research designs, field procedures, recording and photographic possibilities, as well as some laboratory procedures will be related to actual field work conducted as a part of this course.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2494 - MUSIC AND COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Music and communication is a team-taught, interdisciplinary graduate-level seminar on cultural studies approaches to music and communication. The course will be divided into two parts: the beginning of the course will map out some of the key intellectual and methodological issues arising at the intersection of music and communication studies. After this theoretical introduction, the second part of the course will consider recent scholarship that has attempted to address these concerns.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

MUSIC 2517 - MAJOR COMPOSER

Minimum Credits: 3
Maximum Credits: 3
This course examines the life and works of a major figure in Western art music. The content of the course changes, but it emphasizes music in its historical and cultural contexts, as well as individual genres and styles.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2611 - MUSICOLOGY SEMINAR

Minimum Credits: 3
Maximum Credits: 3
The seminar focuses on selected research problems or theoretical issues for intensive study and discussion with students taking a major role in class presentation. Past topics have included American music before the Civil War, and source study of the Bach passions.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2621 - ETHNOMUSICOLOGY SEMINAR

Minimum Credits: 3
Maximum Credits: 3
The seminar focuses on selected research problems or theoretical issues for intensive study and discussion with students taking a major role in class presentation. Past topics have included the writings of Charles Seeger.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2631 - COMPOSITION & ANALYSIS TUTORIAL

Minimum Credits: 3

Maximum Credits: 3

Tutorial instruction in composition and analysis; students in composition and theory normally enroll every semester.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2632 - COMPOSITION SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Issues of collective interest to composers; student's examination of one another's work; reading and performance of students' (and others') work.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2700 - JAZZ MUSICIAN AS COMPOSER

Minimum Credits: 3

Maximum Credits: 3

This course will consider the language of jazz through the study of jazz composition and form. Using works by master composer/performers of the jazz canon, we will explore some of the concepts and relationships between compositional structure, improvisation, and spontaneous composition.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

MUSIC 2710 - JAZZ STYLES AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This seminar will be an analytical examination of musical transcripts and composers' manuscripts of works by some of the most innovative jazz composers. Many of these manuscripts and transcriptions are held by the university of Pittsburgh jazz archives, which houses the music and recordings of jazz innovators who have participated in the university of Pittsburgh jazz seminar beginning in 1970. The course will also draw on the archival services of the Klaus Kuhnke-Archiv, in Bremen, Germany; and the Rutgers University Institute of Jazz Studies, Dan Morgenstern, director. (Morgenstern is a frequent participant in the Pitt annual jazz seminar and a contributor to Pitt's international jazz archive journal.) This course is primarily theory-based analysis, and will require that students understand and develop a thorough knowledge of accepted analytical techniques. It will examine works by major innovators such as Art Tatum, Bud Powell, Charlie Parker, Dizzy Gillespie, Sonny Stitt, Sonny Rollins, Wes Montgomery, Jim Hall, and Dodo Marmarosa in detail.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MUSIC 2720 - ADVANCED JAZZ COMPOSITION AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course offers tutorial instruction in jazz composition, orchestration and analysis to graduate students in music.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PHD)

MUSIC 2721 - JAZZ STUDIES SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

MUSIC 2731 - JAZZ SALON

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

MUSIC 2740 - SMALL ENSEMBLE

Minimum Credits: 3

Maximum Credits: 3

This course is designed as a performance course that focuses on the repertoire of the small jazz ensemble from 1940 through 1960.

The student will be expected to learn the repertoire of such major jazz innovators as Charlie Parker, Dizzy Gillespie, Art Blakey and the jazz messengers, Thelonious Monk, John Coltrane, Bill Evans, Oscar Peterson, Miles Davis, Sonny Rollins, Stan Getz, etc. Grades in this course will be based solely on the student's ability to perform from memory in a concert setting, works from the major artists listed above.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Music (MA or PhD)

MUSIC 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

Independent study is used only to allow time in the student's schedule to prepare for the comprehensive examination or prospectus meeting. It is not appropriate to register for independent study to complete the requirements for any other course; nor, as a rule, is independent study an appropriate option for first- or second-year students (or any other student having many outstanding course requirements). Grading: s/n. Note: for students in composition and theory and historical musicology, no more than six credits of independent study may be counted toward the 72 credits required for the Ph.D. Degree; for students in ethnomusicology, no credits earned in courses of independent study may be counted toward the 72 credits required for the Ph.D. Degree.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

MUSIC 3000 - PHD DISSERTATION

Minimum Credits: 1

Maximum Credits: 9

Research for and writing of the doctoral dissertation in music.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MUSIC 3902 - DIRECTED STUDY FOR PHD STUDENT

Minimum Credits: 3

Maximum Credits: 3

Directed study on musical topics for students in the Ph.D. program.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Neurobiology

MSNBIO 2008 - PRO-SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Each member of the program faculty presents an overview of the topic on which s/he works and then leads a discussion of a research article in that area. Critical analysis of experiments and of research is emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

MSNBIO 2010 - SCIENTIFIC ETHICS

Minimum Credits: 1

Maximum Credits: 1

The course is an introduction to basic ethical issues that arise in the course of conducting scientific research. It is intended for graduate students in the center for neuroscience who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by class discussion of issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSNBIO 2014 - SPEAKING OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSNBIO 2041 - DEVELOPMENTAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of principles that govern the developmental assembly of a complex nervous system. Topics covered include formation of neural tube and neural crest, birth and proliferation of neurons, cell migration, neuronal differentiation, synapse formation, synaptic plasticity, development of CNS circuits, and behavior. These topics will be discussed in the context of experimental results obtained by anatomical, biochemical and electrophysiological techniques using vertebrate and invertebrate animals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSNBIO 2070 - HUMAN PHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

Lectures and reading on the following: (1) functions of the cardiovascular system; (2) respiration; (3) digestion and absorption in the gut; (4) kidney function and the regulation of body fluids; (5) the regulation of metabolism; and (6) reproduction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2072 - INTRODUCTION TO NEURAL ENGINEERING

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

MSNBIO 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

Minimum Credits: 5

Maximum Credits: 5

This course is the first component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers nerve cell biology, protein chemistry, regulation of gene expression, receptor function, and second messenger signaling in a lecture format. A background in basic biology is required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neurobiology (PHD) or Neuroscience (PHD or MS)

MSNBIO 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers the electrical properties of neurons, synaptic transmission, and neural development. A background in basic biology is required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neurobiology (PHD) or Neuroscience (PHD or MS)

MSNBIO 2102 - SYSTEMS NEUROBIOLOGY

Minimum Credits: 6

Maximum Credits: 6

This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. This course provides an introduction to the structure of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions. It is taught primarily in a lecture format with some laboratory work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neurobiology (PHD)

MSNBIO 2112 - NEUROBIOLOGY OF DISEASE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder. Participants will be asked to do some background reading each week, to prepare a short grant application on a topic of relevance to the neurobiology of disease, and to then participate in the peer review of an application of another course participant. Reading will consist of reviews and recent research articles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2135 - HISTORICAL PERSPECTV IN NEUROSCI

Minimum Credits: 2

Maximum Credits: 2

This seminar course explores the origins and evolution of modern neuroscientific concepts from the 17th and mid-20th centuries. Discussions of primary and secondary source material will focus on understanding the role of contemporary philosophical, scientific, social and technological factors in the development of neuroscientific thought. Another goal is to develop an appreciation of their contributions to current neuroscientific dogma.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2600 - MS THESIS RESEARCH

Minimum Credits: 1

Maximum Credits: 14

A directed research project which results in a thesis for a master's degree.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

MSNBIO 2612 - ADVANCED DEVELOPMENTAL BIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course will examine selected topics in developmental biology at an advanced level. Topics may include pattern formation in insects, cell lineage analysis, cell-cell interactions and the specification of cell fates, cell adhesion molecules, genetic approaches to mammalian embryo genesis and the extracellular matrix in development. Emphasis will be placed on the critical reading of papers and classroom discussion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2614 - NEUROPHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will broadly review neuropharmacology and neurobiology, study monoamine, cholinergic, and GPCR biology, and

explore the blood-brain barrier and its significance to neuropharmacology. The course will focus on the molecular mechanisms of a drug action for different classes of compounds including, but not limited to, antidepressants, antipsychotics, anti-epileptics, anesthetics, weight loss, stimulants, neuroprotective, addiction, pain, and migraine drugs. In addition to the formal lectures the course will emphasize critical reading of the primary literature through journal-club style discussions and cover the most recent treatment and therapeutic avenues being developed for a broad range of neurologic and psychiatric disorders. The course is ideally suited for Molecular Pharmacology and Neuroscience graduate students or any other graduate student with an interest in neurological diseases and their treatments. The course is also appropriate for pre-professional undergraduates who have completed 4 semesters of chemistry and 2 semesters of biology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2616 - METALS, GASES, FATS, IN NEUROTRANSMISSION

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

MSNBIO 2622 - MECHANISMS AND CLINICAL PRESENTATION OF PAIN

Minimum Credits: 3

Maximum Credits: 3

This course provides attendees with vocabulary and knowledge about anatomy, physiology, mechanisms, and modulation of pain. This fundamental knowledge is complemented by assigned readings from literature and clinical presentations about pain syndromes and pain management. The course is offered in the fall term.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

MSNBIO 2623 - PAIN MODELS: RATIONALE, TESTING AND INTERPRETATION

Minimum Credits: 1

Maximum Credits: 1

This course will focus on the design and analysis of animal and human pain models and will incorporate classroom presentations about various pain models (e.g. inflammatory, neuropathic, etc.). Classroom discussions will be based on assigned readings and include the relevant history and rationale for use of different tests/models, including critical assessment of strengths/weaknesses and limitations to interpretation of outcomes. Importantly, data acquisition, analysis and presentation will be included in evaluating the interpretability of outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2624 - GRANT WRITING

Minimum Credits: 3

Maximum Credits: 3

The course will cover the fundamentals of grant writing with a focus on NIH style pre-doctoral grants. Through a combination of lectures and student led critiques and discussions, students will work their way through the essential components of a fundable proposal starting with specific aims and ending with an introduction to a revised application. Students will generate each component of a grant application which will be critiqued by faculty and the other members of the class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Neurobiology (PhD) or Neuroscience (PhD)

MSNBIO 2632 - ADVANCED NEUROPHYSIOLOGY

Minimum Credits: 2

Maximum Credits: 2

The primary objective of this course is for students to develop critical scientific reasoning by learning to evaluate the essential components of classic research presented in well written papers. Secondly, students will gain a solid foundation in neurophysiology by examining, in detail, the underlying principles underlying current flow through a neuron's membrane, the generation and propagation of action potentials, synaptic transmission at the neural muscular junction, and sensory transduction. Course material will consist of papers from Hodgkin, Huxley, Katz, Fatt and others. Complementing the classic papers will be contemporary work on the same topic. Students will be expected to have had basic neurophysiology and be familiar with electrostatics, electric circuits and

differential equations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

MSNBIO 2650 - JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Students present their research, or a recent research article from a broad range of topics selected by the student in consultation with a faculty advisor. The course meets weekly during which the student presents his/her research in progress or an article of his/her choice. Emphasis is placed on a careful analysis and critical evaluation of the manuscript as well as the development of teaching and speaking skills needed for scientific presentation. The student is expected to elucidate issues relevant to the topic and to answer questions from other graduate students and faculty.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2651 - PAIN JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This discussion-based course uses assigned readings to examine pain mechanisms and management with an emphasis on critical literature evaluation and topical developments in the field of pain.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2652 - TOPICS IN NEUROLOGICAL DISORDERS

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MSNBIO 2660 - NEUROBIOLOGY SEMINAR SERIES

Minimum Credits: 1

Maximum Credits: 1

Nationally and internationally recognized researchers in the field of neuroscience present scientific findings. Students meet informally with each speaker to discuss seminal topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2680 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 9

A series of special topics courses are offered by individual members of the department or by small groups of the faculty. The general format involves the detailed analysis of a specific research area, exploring its development and current status by the presentation and discussion of research papers.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

MSNBIO 2681 - SEMINAR IN CORTICAL CIRCUITS

Minimum Credits: 1

Maximum Credits: 1

This discussion-based course uses current readings to examine cortical function with an emphasis on circuit analyses using electrophysiological, computational, behavioral and/or developmental approaches.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2682 - CURRENT RESEARCH ON PAIN

Minimum Credits: 1

Maximum Credits: 1

An advanced graduate level course for students interested in current research on pain mechanisms, management and clinical presentation of pain. Presentations by course participants form the basis for class participation and discussion.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

MSNBIO 2683 - CURRENT TOPICS IN DEVELOPMENTAL NEUROBIOLOGY

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: [(MSNBIO 2100 or NROSCI 2100) and (MSNBIO 2101 or NROSCI 2101)] or INTBP 2000; Plan: Neuroscience (PHD) or Neurobiology (PHD)

MSNBIO 2690 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This course provides the student an opportunity to carry out a specific laboratory project in any area of interest in neurobiology.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Neurobiology (PHD)

MSNBIO 3030 - SEMINARS IN SYNAPTIC FUNCTION

Minimum Credits: 1

Maximum Credits: 1

This discussion-based course uses recently published research articles to examine synaptic function, including neurotransmitter release, receptor regulation, and different forms of synaptic plasticity.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

MSNBIO 3600 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 14

After advancement to candidacy for the Ph.D. degree, students enroll in this course to pursue original experimental laboratory research, the results of which will provide the substance of their doctoral dissertation. A minimum of 40 credits of this course are required for the Ph.D. degree in the school of medicine.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neurobiology (PHD)

Neurological Surgery

NSURG 2907 - INDEPENDENT STUDY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NSURG 5383 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of neurological surgery will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

NSURG 5420 - NEUROSURGERY SUBINTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

During this four-week elective the student will work as a subintern sharing in the operation of the neurosurgery service. Points of interest will be pathophysiology of neurological problems, neurological diagnosis and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate in all conferences.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NSURG 5422 - PEDIATRIC NEUROSURGERY

Minimum Credits: 0

Maximum Credits: 0

A four-week elective offering the student a sub internship sharing in the full operation of the neurosurgery service with the house staff. Points of emphasis will be pathophysiology of neurological problems, neurological diagnosis and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate actively in all conferences. The elective objectives are: to perform a careful, problem-oriented, neurological examination; to recognize, evaluate and direct the diagnostic work up of common neurosurgical problems such as lumbar and cervical disc herniation, brain tumor, head trauma, intracranial aneurysm, etc.; to recognize and manage increased intracranial pressure, brain herniation, and electrolyte and metabolic disturbances, peculiar to neurological patients; and the basic principles of neurosurgical techniques as well as basic neurosurgical topographic anatomy.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NSURG 5430 - INTRO CLINICAL NEUROPHYSIOLOGY

Minimum Credits: 0

Maximum Credits: 0

During this four-week elective the student will be exposed to the use of electrodiagnostic tools with particular emphasis on the utilization of auditory, visual and somatosensory evoked potentials in the study of clinical neurological disorders in man. Computational analysis of ongoing EEG will also be utilized. Diagnostic assessment both intraoperative and ICU monitoring will be performed. Opportunities are available to participate in research in electrophysiology and computational analysis of data.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NSURG 5435 - INTRODUCTION TO CLINICAL NEUROSURGERY

Minimum Credits: 0

Maximum Credits: 0

This introductory clinical elective will provide students with experiences in the care of neurosurgical patients. A student will work as a member of the clinical team, sharing in the full operation of the neurosurgery service with the house staff. Points of emphasis will be pathophysiology of neurological/neurosurgical problems, neurological diagnosis, and recognition and treatment of neurosurgical emergencies. The student will scrub at surgery and attend and participate actively in all conferences. Students will have the opportunity to be exposed to cutting edge specialized areas of neurosurgery including gamma knife radiosurgery, neuroendoscopy, and endovascular neurosurgery. In selected cases, students may elect to participate in ongoing research projects in neuro-oncology, neuro-trauma, spine biomechanics, functional neurosurgery, and neurophysiology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NSURG 5705 - HEAD AND NECK DISSECTION (ILS)

Minimum Credits: 0

Maximum Credits: 0

This course fulfills the integrated life science (ILS) graduation requirement. The course is a four-week selective combining precepted anatomic dissection, various imaging modalities, lectures, operating room exposure, and clinical pathology in a systematic manner. The areas to be covered include anatomy of the head and neck. The course will include lectures in anatomy, pathology and imaging modalities; precepted anatomical dissections and clinical experiences. Clinical experiences will include, but are not limited to, exposure to neurosurgical and otorhinolaryngological procedures in the operating rooms, shadowing time in clinic, as well as assisting in neuropathological examinations. All students will be exposed to the diagnostic modalities appropriate for each anatomic area. They will also have the opportunity to see patients and follow their evaluations and management. To fulfill course requirements, each student will be expected to prepare a formal case presentation correlating the clinical findings, anatomy, diagnostic modalities, pathology and treatment plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NSURG 5810 - INJURY RESEARCH AND CONTROL

Minimum Credits: 0

Maximum Credits: 0

Students in four-week elective may join basic research projects or initiate their own research projects at center for injury research and control (circl). Center conducts injury control research, gathers and disseminates information on injuries, provides training for healthcare professionals and informs public and community leaders on injury control measures. Students work with epidemiologists to identify risk factors associated with specific injury types. Designed for those interested in gaining residency experience in epidemiologic methods with emphasis on surveillance and/or descriptive injury evaluation..

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NSURG 5880 - NEUROSURGICAL RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Student will participate in an ongoing research project in the department of neurosurgery under the supervision of an advisor. Objectives include training in basic neurosurgical research techniques and procedures as well as the opportunity to gain in-depth knowledge in the basic neurosciences. This elective is offered in four-week blocks and two blocks must be elected.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NSURG 5899 - INDEPENDENT STUDY IN NEUROLOGICAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

NSURG 5900 - EXTRAMURAL NEUROSURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in neurological surgery may be arranged at an institution other than the university of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Neurology

NEURO 5366 - NEUROLOGY CORE CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

The (3-week) neurology clerkship focuses on common neurological problems: presentation, diagnosis and treatment. NSURG, neuropath and neurorad experiences are also provided. Clinical teaching includes INPT and OPT settings. Exposure to NSURG or neuropath Brain cutting are required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature. Performance-based evaluations and NBME shelf exam are main modes of student evaluation. Must accompany registration in PSYCH 5366.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5389 - CLINICAL NEUROLOGY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This four week elective will provide a broad exposure to neurological disorders in an inpatient and outpatient setting. Students may rotate on the inpatient neurology ward, the neurology consult service, or the pediatric neurology service. Students will do initial patient evaluations and will follow patients daily. They will be involved in diagnostic and therapeutic decision making. An emphasis will be placed on neuroanatomical correlation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5393 - INDEPENDENT STUDY IN NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

This is a third-year level elective. This course may be arranged as a research or a special clinical period of time. All electives are four weeks in duration and will be more specifically identified as to content on the student's transcript at the time credit is given.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5410 - NEUROLOGY ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

A four week acting internship is offered on the clinical neurology service. Students will be the primary person responsible for initial patient evaluations and will follow patients daily, order tests and perform procedures including lumbar puncture. They will assimilate test and treatment results for discussion with the attending neurologist during daily rounds. Students will be directly involved with diagnostic and therapeutic decision making. An emphasis will be placed on neuroanatomical correlation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5420 - CLINICAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective on consult service at health center hospitals and outlying hospitals; participation in investigation and management of patients; discussion of cases and basic mechanisms pertinent to understanding neural function and pathogenesis of neurological diseases. History taking, detailed physical and neurological examination, and recording information on patients will be required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5421 - STROKE SERVICE

Minimum Credits: 0

Maximum Credits: 0

This four week clinical neurology elective will place an emphasis on the evaluation and treatment of patients with cerebrovascular disease including ischemic cerebral infarction and intracerebral hemorrhage. Patients will be seen in the inpatient ward and in an outpatient stroke clinic. Students may participate in ongoing acute stroke trials. They will observe carotid and transcranial doppler ultrasound studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5425 - OUTPATIENT CLINICAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective is a closely supervised clinical clerkship providing a broad exposure to common and unusual outpatient neurologic conditions. Initial manifestations of disease, physical exam findings, effective diagnostic evaluation and treatment options are emphasized. Students will actively participate in initial and follow visits of patients with faculty. Students will also work in neurology subspecialty clinics including stroke, epilepsy, multiple sclerosis, neuromuscular disease, aphasia and neurological rehabilitation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5430 - NEONATAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A four week elective consists of a closely supervised clinical clerkship in neonatal neurology. Students will participate in the diagnostic investigation and management of neonates and young infants with neurologic disorders in both inpatient and outpatient settings. Students, with attending supervision, will learn the neurologic examination of the newborn and evaluation of children with suspected neural disorders. The understanding of neural function and development with its relationship to brain disorders will be emphasized.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5435 - PEDIATRIC NEUROMUSCULAR DISEASE

Minimum Credits: 0

Maximum Credits: 0

This four week elective is a closely supervised clinical clerkship which will provide an opportunity to study a variety of pediatric neuromuscular disorders. Students will participate in the diagnostic evaluation and management of patients in the muscular dystrophy association clinic and have an opportunity to observe electromyographic examinations. Students will perform new patient evaluations and participate in the planning and interpretation of diagnostic studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5440 - PEDIATRIC NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective on consult service; participation in investigation and management of patients; discussion of cases and basic mechanisms pertinent to understanding neural function and pathogenesis of neurological diseases. History taking, detailed physical and neurological examination, and recording information on patients will be required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5441 - CHILD NEUROLOGY/EPILEPSY

Minimum Credits: 0

Maximum Credits: 0

A four week elective at Childrens' Hospital will provide the student with the opportunity to see inpatients and outpatients with seizures. Students will participate in the evaluation, diagnosis and treatment of these patients and will help to evaluate patients undergoing surgical consideration. Students will learn to identify certain seizure patterns by review of seizures and EEGs recorded on video tape. They will review neuroimaging studies and be involved in discussions about antiepileptic drug management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5445 - BEHAVIORAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A four to twelve week elective is offered at highland drive VA Medical Center for students who have an interest in cognitive and psychiatric manifestations of neurological disease. Typical clinical problems include cognitive and personality changes after stroke,

head trauma, epilepsy, dementia, neurodegenerative disorders, movement disorders, amnesic syndromes, confusional states and patients with obsessive compulsive presentations. Teaching will include neuropsychological assessments, case conferences and clinical bedside attending rounds.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

NEURO 5450 - NEUROLOGY BOOT CAMP

Minimum Credits: 0

Maximum Credits: 0

Students who are entering the field of neurology or with strong interest in neurology and related fields require a solid foundation of knowledge and skills before embarking on internship and assuming the duties of an intern. This intensive course addresses relevant knowledge and skill building activities by educators deeply involved in postgraduate training.

Academic Career: Medical School

Course Component: Practicum

Grade Component: S/U Basis

NEURO 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty members, as well as the student's scheduling advisor. When approvals have been received, the course will be scheduled and department notified.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NEURO 5730 - CLINICAL NEUROSCIENCES (ILS)

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective will satisfy the requirement of the integrated life science course of the senior year. The course objectives are: introduce students to clinical academic medicine; educate students in the conduct, design and interpretation of clinical trials; illustrate how basic science findings lead to clinical research advances; and provide additional subspecialty experience. The course will consist of seminars illustrating how basic scientific observations lead to clinical research, internships with a clinical neuroscience residency mentor and a pbl where a clinical research project is designed.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

NEURO 5875 - INDEPENDENT STUDY IN NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A research project can be arranged with a faculty person on or off-site. Approval of all projects must be secured at the departmental and student affairs level. These independent study opportunities will be more specifically identified as to content on the student's transcript at the time credit is given.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NEURO 5876 - BASIC RESEARCH IN NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

In this elective the student will be involved in the study of the molecular mechanisms that underly neuronal injury in ischemic stroke and the physiological repair mechanisms that injury triggers. One major focus is how prior ischemia induces the expression of neuroprotective gene products, such as stress proteins and death suppressor genes. Another interest is the role of neural stem cells in neural plasticity after injury. Techniques include animal surgery, cell culture, immunohistochemistry, in situ hybridization, Northern analysis and fluorescence detection of calcium.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NEURO 5877 - COGNITIVE NEUROSCIENCE RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This four week elective involves research in cognitive neuroscience. Students can participate in one of several research projects including: computer modeling of human language, computer modeling of the somatosensory cortex, behavioral studies of patients with language disorders and functional neuroimaging of language function. Emphasis will be placed on the relationship between cognitive structures of the mind and the neurobiologic implementation of mental structures in the cellular and molecular hardware of the brain.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NEURO 5878 - ALZHEIMER'S DISEASE RESEARCH

Minimum Credits: 0

Maximum Credits: 0

An eight week elective places a special emphasis on memory and cognitive problems associated with aging and dementia. Emphasis is placed on clinical diagnosis and the use of neuropsychological testing, laboratory and neuroimaging studies in the diagnosis of dementia. There will be an opportunity to be involved in experimental therapeutic trial being carried out in patients with Alzheimer's disease.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NEURO 5879 - MOLECULAR NEURO-BIOLOGY/GENETICS

Minimum Credits: 0

Maximum Credits: 0

This neurology elective will provide exposure to research directed at identifying molecules expressed during critical phases of neuronal differentiation using rat cerebellum as a model system. This tissue is studied using molecular biological methods to clone genes in granule cells to study their regulation. Methods used include standard cloning techniques, preparation of RNA from rat tissues, Northern blot analysis, in situ hybridization and histochemistry.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

NEURO 5900 - EXTRAMURAL NEUROLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in neurology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Neuroscience

NROSCI 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 12

Students working on their early research requirement may (but are not required to) register for NROSCI 2000.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2005 - COGNITIVE NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will cover fundamental findings & approaches in cognitive neuroscience, with the goal of providing an over view of the field at an advanced level. Topics will include high-level vision, spatial cognition, working memory, long term memory, learning, language, executive control, and emotion. Each topic will be approached from a variety of methodological directions, i.e.

Computational modeling, cognitive assessment in brain-damaged humans, non-invasive brain monitoring in humans and single-neuron recording in animals. Lectures will alternate with sessions in seminar format.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS or PHD)

NROSCI 2007 - JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

This course is intended for all graduate students and faculty members. Papers will be selected from current periodicals in neuroscience for presentation. Emphasis is placed on a critical evaluation of experimental procedure and interpretation of data.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2008 - PRO SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Each member of the program faculty presents an overview of the topic on which s/he works and then leads a discussion of a research article in that area. Critical analysis of experiments and of research is emphasized.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 2010 - SCIENTIFIC ETHICS

Minimum Credits: 1

Maximum Credits: 1

The course is an introduction to basic ethical issues that arise in the course of conducting scientific research. It is intended for graduate students in the center for neuro science who have completed at least one year of graduate work. The course will be composed of informal lecture presentations followed by class discussion of issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NROSCI 2011 - FUNCTIONAL NEUROANATOMY

Minimum Credits: 4

Maximum Credits: 4

This course deals with human neuroanatomy and covers the basic structure of the central nervous system from spinal cord to cerebral cortex. Emphasis is placed on major systems and subsystems within the brain, and on their functional significance. The basic structure and morphology of nerve cells will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS or PHD)

NROSCI 2012 - NEUROPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the electrical properties of nerve cells and the mechanisms by which nerve cells communicate. The following topics will be covered: electrical principles used by nerve cells, the basis of the resting potential, the function of voltage-dependent ionic channels, the mechanisms by which action potentials are generated, neurotransmitter receptor function, and the physiology of fast synaptic communication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

NROSCI 2014 - SPEAKING OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Fulfills neuroscience advanced elective requirement. You will learn strategies for giving presentations about science to both a scientific audience and a public audience. Topics covered will include (1) how to engage your audience, (2) the art of breaking down your message, (3) tips for how to make clear, interesting slides, and (4) pointers on presentation style. All audiences want to learn interesting new scientific information, and have it delivered as a good story in an understandable manner by a personable, easy to approach person. You want to emphasize your message, stay focused, and convey the importance of your message while being interesting, maintaining the attention of the audience and making the learning process enjoyable. Guest speakers will provide background information about various uses of scientific information in the public domain. Communication skills, including knowing your audience and why they are interested in the information you are speaking about, how to translate scientific jargon into understandable concepts for the public, and how to keep the audience engaged will be discussed. Pointers will be given on answering questions, being conversational, and conveying the "big picture". Students will give a number of presentations in this course and learn to receive and give feedback effectively.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Neuroscience (PhD) or Neurobiology (PhD)

NROSCI 2017 - SYNAPTIC TRANSMISSION

Minimum Credits: 3

Maximum Credits: 3

This course examines the mechanisms by which neurotransmitters are synthesized and released and the biochemistry of synaptic responses. Basic physiological, biochemical, and morphological characteristics of neural transmission will be discussed. An emphasis will be placed on the experimental approaches used to examine these processes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS, PHD) or Neurobiology (PHD)

NROSCI 2041 - DEVELOPMENTAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of principles that govern the developmental assembly of a complex nervous system. Topics covered include formation of neural tube and neural crest, birth and proliferation of neurons, cell migration, neuronal differentiation, synapse formation, synaptic plasticity, development of CNS circuits, and behavior. These topics will be discussed in the context of experimental results obtained by anatomical, biochemical and electrophysiological techniques using vertebrate and invertebrate animals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2043 - NEURAL PLASTICITY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NROSCI 2070 - HUMAN PHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

Lectures and reading on the following: (1) functions of the cardiovascular system; (2) respiration; (3) digestion and absorption in the gut; (4) kidney function and the regulation of body fluids; (5) the regulation of metabolism; and (6) reproduction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2100 - CELLULAR AND MOLECULAR NEUROBIOLOGY 1

Minimum Credits: 5

Maximum Credits: 5

This course is the first component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers nerve cell biology, protein chemistry, regulation of gene expression, receptor function, and second messenger signaling in a lecture format. A background in basic biology is required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2101 - CELLULAR & MOLECULAR NEUROBIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course is the second component of the introductory graduate sequence designed to provide an overview of cellular and molecular aspects of neuroscience. This course covers the electrical properties of neurons, synaptic transmission, and neural development. A background in basic biology is required.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2102 - SYSTEMS NEUROBIOLOGY

Minimum Credits: 6

Maximum Credits: 6

This course is a component of the introductory graduate sequence designed to provide an overview of neuroscience. This course provides an introduction to the structure of the mammalian nervous system and to the functional organization of sensory systems, motor systems, regulatory systems, and systems involved in higher brain functions. It is taught primarily in a lecture format with some laboratory work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2106 - NEUROSCIENCE SEMINAR SERIES

Minimum Credits: 1

Maximum Credits: 1

Nationally and internationally recognized neuroscience researchers present scientific findings. Students meet with speakers to discuss seminar topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2107 - CURRENT NEURAL BASIS COGNITION

Minimum Credits: 1

Maximum Credits: 1

Presentations of current research by students and faculty of the center for the neural basis of cognition, and by visiting researchers from other universities. Areas of cognition covered include perception, memory, language, attention, motor control, and executive functions. Disorders of cognition as well as developmental issues are considered. Methodologies include single neuron recording studies, functional brain imaging studies, computational modeling studies, and behavioral investigations using normal populations and individuals with cognitive disorders.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2112 - NEUROBIOLOGY OF DISEASE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a survey of some of the major neurological and psychiatric disorders for the non-clinician. Each session will focus on a particular disorder and will include a patient presentation (live or by video tape), and a discussion of the etiology, epidemiology, pathophysiology, and treatment of that disorder. Participants will be asked to do some background reading each week, to prepare an essay on a topic of relevance to the neurobiology of disease. Reading will consist of reviews and recent research articles.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Neuroscience (PHD) or Neurobiology (PHD)

NROSCI 2200 - NEUROPHARMACOLOGY OF ADDICTION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide an overview of the biological basis of addiction and the neuropharmacology of drugs of abuse and dependence, including basic principles of drug action as well as comprehensive coverage of the major classes of drugs (opioids, stimulants, nicotine, alcohol, sedatives, cannabis, hallucinogens). Students will study mechanisms of action, effects, pharmacokinetics as well as tolerance and dependence for each of these drugs/drug classes. The reasons for addiction including biological, genetic, cultural and other determinants will be discussed. Students will learn about laboratory-based methods used in addiction research, common pharmacotherapies used to manage alcohol and drug addiction, and consider public health issues associated with addiction.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

NROSCI 2410 - TRANSLATING SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Students will work in creative teams of 2-3 students/team to develop creative new outreach tools for communication of science to the public (new lectures, laboratories, videos, films, activities). At the beginning of the semester, didactic lectures will cover background information about how to effectively communicate scientific information, how to break down a message, production of effective, engaging slides, animations and videos, and the use of hands-on activities to engage the audience. Guest speakers with expertise in film, video and use of museum exhibits will be included. Students will then choose a topic area they wish to create an outreach lecture/video/etc. In, and with the assistance of dr. Cameron you will choose a scientific advisor with specific expertise on the topic you will develop an outreach tool for. Students will do background reading for the development of their outreach tool and have discussions with their advisor. If developing a lecture, students will develop a set of PowerPoint slides for the lecture, the lecture text with background references, and hands-on activities to complement the lecture for both a junior high and a high school version of the lecture. They will present the lecture at one of the grade levels it was designed for. For other activities, the activity will be developed along with background information regarding the use of the activity. The activity will be presented to a public group.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NROSCI 2902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 12

Students doing laboratory research with a neuroscience faculty member should register for this course.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 12

Students doing laboratory research with a neuroscience faculty member should register for this course.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 12

Students working on their dissertation may register for this course.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis
Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 3001 - APPRENTICESHIP

Minimum Credits: 1

Maximum Credits: 3

Students doing laboratory research with a faculty member who is not their mentor may register for this course.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (PHD)

NROSCI 3019 - SEMINAR IN AUTONOMIC FUNCTION

Minimum Credits: 1

Maximum Credits: 3

Students discuss research articles published recently in the general area of autonomic function. The goal of the course for the students is to gain perspective on this ongoing research, and more generally to receive instruction on how to critically evaluate the scientific literature.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

NROSCI 3030 - SEMINARS IN SYNAPTIC FUNCTION

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: PLAN: Neuroscience (MS, PHD)

Nurse Anesthesia

NURSAN 2633 - NURSE ANESTHESIA CARE DELIVERY IN CAMBODIA: STUDY ABROAD

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the undergraduate nursing student with exposure to the culture and health care delivery system in a foreign country. Emphasis will be placed on exploring health issues and risk factors, the impact of cultural characteristics on health care delivery and utilization, and the achievement of health-related goals in Cambodia. Students will compare the health care systems, nursing education and nursing practice in Cambodia and the United States.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NURSAN 2633IS - NURSE ANESTHESIA CARE DELIVERY IN CAMBODIA: STUDY ABROAD - IN-STATE

Minimum Credits: 0

Maximum Credits: 0

Non-graded course for in-state tuition.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: No Grade Required

NURSAN 2633OS - NURSE ANESTHESIA CARE DELIVERY IN CAMBODIA: STUDY ABROAD - OUT-OF-STATE

Minimum Credits: 0

Maximum Credits: 0

Non-graded course for out-of-state tuition.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: No Grade Required

NURSAN 2700 - BASIC PRINCIPLES OF ANESTHESIA

Minimum Credits: 5

Maximum Credits: 5

This course prepares the student for entry into the clinical setting using classroom lecture and workshops. Basic concepts of anesthesia practice, techniques, monitoring, pharmacology, and responsibilities of the nurse anesthetist are presented. Students are introduced to anesthesia management strategies for common problems and situations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2701 - CHEMISTRY AND PHYSICS OF ANESTHESIA

Minimum Credits: 3

Maximum Credits: 3

Provides a detailed study of chemical and physical principles which apply to physiology, pharmacology and anesthesia equipment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2715 - ADVANCED PRACTICE INITIATIVES FOR THE CRNA

Minimum Credits: 3

Maximum Credits: 3

Course focuses on the expansion of the knowledge base and refinement of practice skills of experienced CRNA's. Students identify an area of study in the field of nurse anesthesia in which they wish to improve knowledge and clinical expertise. Students develop and implement a comprehensive plan which includes establishing specific goals, developing a program of independent study, negotiation of a clinical practice site and completion of a defined clinical practicum. Objectives are met thru a learning contract, an oral and poster presentation and a written scholarly paper.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2720 - APPLD PHYSLGY & PATHOPHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

Integrates basic physiologic principles with clinical anesthesia management regimens. Designed to formulate approaches to anesthesia nursing management in the presence of various common pathophysiologic conditions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2730 - ADV PRINCIPLES OF ANESTHESIA 1

Minimum Credits: 4

Maximum Credits: 4

Provides in-depth study of specialized areas of nurse anesthesia practice. Lectures concentrate on the theoretical basis for specific anesthesia nursing interventions and the rationale for their use in each of the areas of sub specialization. These areas encompass pediatric, obstetric, and regional anesthesia management as well as acute and chronic pain management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2731 - APPLIED PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides the basis for an in-depth understanding of the pharmacology of clinical anesthesia practice. Specific properties of anesthetic agents and commonly used adjunctive drugs are discussed and critically analyzed for appropriate application in clinical situations. Development of a comprehensive knowledge base with respect to drugs used by the nurse anesthetist in the clinical setting will be achieved through lecture, presentation, situational examples, and case analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2740 - ADV PRINCIPLES OF ANESTHESIA 2

Minimum Credits: 3

Maximum Credits: 3

The course provides in-depth study of specialized areas of nurse anesthesia practice. Lectures concentrate on the theoretical basis for specific anesthesia nursing interventions and relevant research-based rationale for their use in each of the areas of sub specialization. The focus is on anesthetic care for patients with diseases requiring cardiac, thoracic, vascular, pulmonary cardiac/lung transplant procedures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2750 - ADV PRINCIPLES OF ANESTHESIA 3

Minimum Credits: 3

Maximum Credits: 3

Provides an in-depth study of specialized areas of nurse anesthesia practice. The concentration is on the theoretical basis for specific anesthesia nursing interventions and the rationale for these interventions in each area of sub-specialization. Course will focus on anesthesia for neurologic, trauma, renal, respiratory, hepatic and hematologic disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; CREQ: NURSAN 2794 or 2795; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2751 - TEAM TRAINING IN PATIENT SAFETY

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2760 - CRNA ROLE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course prepares the nurse anesthetist for new areas of responsibility as a professional contributing to education, research, and advanced practice roles. Students gain experience in developing and implementing a community service project designed to promote a positive image of nurse anesthetists. Current legislative, legal and ethical issues are presented. Professional opportunities and issues are explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia(DNP, MSN)

NURSAN 2780 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Allows individual student to pursue a specific problem or area of study with faculty guidance. Examples of individual projects which may be pursued include library study focused on a specific area relevant to anesthesia nursing or clinical work in a health care delivery setting.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2785 - THESIS

Minimum Credits: 1

Maximum Credits: 3

Individual instruction provides guidance in the preparation of a scholarly written report relating to anesthesia nursing. This report synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2787 - SEDATION PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004 and 2031; CREQ: NUR 2034 and NURSAN 2787 and 2788

NURSAN 2791 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This initial clinical course is designed to integrate with basic didactic coursework. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be introduced to anesthesia equipment, procedures, medications and the perioperative environment. Students will be required to meet or exceed level specific objectives and experiences will build from simple cases and techniques to the more complex. Clinical experience will be guided by certified registered nurse anesthetists and anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: CREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2792 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This second clinical course is designed to integrate with more advanced didactic coursework with focus on physiology and pathophysiology applied in anesthesia practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to more complicated cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2793 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This third clinical course is designed to build on more advanced didactic coursework including focus on pathophysiology, applied pharmacology and specialty case management. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2794 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This fourth clinical course is designed to assist the nurse anesthesia student to apply concepts from didactic coursework including focus on cardiovascular, thoracic, and vascular anesthesia. Advanced airway techniques and sophisticated laboratory analysis will be included. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2795 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This fifth clinical course is designed to assist the nurse anesthesia student to apply concepts from didactic coursework including focus on neurosurgical, trauma, orthopedic, renal transplant and hepatic transplant anesthesia. Students will apply advanced principles of fluid and blood management and demonstrate the ability to treat perioperative hematologic disorders. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2796 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This sixth clinical course is designed to assist the nurse anesthesia student to synthesize content from all advanced principles courses and to become increasingly independent in their clinical practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to increasingly complicated and specialty cases and will be required to meet or exceed level specific objectives. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 2797 - CLINICAL PRACTICUM

Minimum Credits: 0

Maximum Credits: 0

This seventh clinical course is designed to assist the nurse anesthesia student to synthesize all didactic content and to demonstrate their ability to meet all program outcome criteria for clinical practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be assigned to all types of cases for patients across the acuity spectrum. Students will be expected to manage anesthesia with a high degree of autonomy in this clinical rotation. Clinical experiences will be guided by certified registered nurse anesthetists and/or anesthesiologists.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSAN 2700; PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 3251 - TEAM TRAINING IN PATIENT SAFETY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSAN 3282 - DIRECTED SEMINARS IN NURSE ANESTHESIA PRACTICE

Minimum Credits: 1

Maximum Credits: 3

This seminar based course series is designed to provide the nurse anesthesia program DNP student with a strong theoretical and practical foundation grounded in nurse anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including nurse anesthesia education, nurse anesthesia simulation methods, clinical research for the nurse anesthetist and nurse anesthesia administration, and nurse anesthesia policy. The seminar series focus and content will change according to current state of-the-art practice in nurse anesthesia with consideration given to faculty and student areas of interest, to include international practice in developing countries.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

NURSAN 3751 - TEAM TRAINING IN PATIENT SAFETY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide the student with a theoretical and practical foundation relating to human factors, crew resource management and team performance issues that impact patient safety. Information and skills gained in this course will prepare the student to function as a patient advocate in a multidisciplinary environment and implement team-based strategies designed to promote patient safety. Crisis management protocols and communication algorithms e.g., Situation-background-assessment-recommendation (SBAR) will be used as examples.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nurse Anesthesia (DNP, MSN)

NURSAN 3783 - REGULATION AND REIMBURSEMENT IN NURSE ANESTHESIA PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course examines the current regulatory requirements of governmental and non-governmental entities that impact and control nurse anesthesia practice. Approaches to influence positive changes in this practice discipline are explored. The generation of revenue in the specialty of anesthesia, including billing procedures and requirements of governmental and private health insurance providers, effective departmental organizational structure, and fraud are discussed. Current legal and advanced professional issues are included

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSAN 3784 - CURRICULUM, INSTRUCTION AND EVALUATION IN NURSE ANESTHESIA EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course will prepare CRNAs for the various roles of an educator within a nurse anesthesia program. Concepts of academic and clinical curriculum development specific to nurse anesthesia programs, best practice methodologies for clinical and didactic instruction, and evaluation approaches for academic and clinical performance will be included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSAN 3785 - INTRODUCTION TO THE NURSE ANESTHETIST ROLE

Minimum Credits: 2

Maximum Credits: 2

This introductory course will provide student socialization into the role of nurse anesthesia practice and prepares the student for more advanced content within curriculum. This course provides fundamental concepts related to the professional role, anesthesia types and anesthesia processes. Safety principles essential to preventing negative outcomes for both patients and providers will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3099

NURSAN 3786 - BASIC PRINCIPLES OF ANESTHESIA

Minimum Credits: 3

Maximum Credits: 3

This course prepares the student for entry into the clinical practice setting by presenting fundamental concepts of general, regional, pain management, and sedation anesthesia. Airway management techniques, positioning, and an introduction to anesthetic pharmacology are emphasized. Anesthetic management strategies for patients with common diseases and perioperative problems are examined.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3785 ; CREQ: NURSAN 3790

NURSAN 3786 - BASIC PRINCIPLES OF ANESTHESIA

Minimum Credits: 3

Maximum Credits: 3

This course prepares the student for entry into the clinical practice setting by presenting fundamental concepts of general, regional, pain management, and sedation anesthesia. Airway management techniques, positioning, and an introduction to anesthetic pharmacology are emphasized. Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3785; CREQ: NURSAN 3790

NURSAN 3787 - BASIC PRINCIPLES OF ANESTHESIA LAB

Minimum Credits: 1

Maximum Credits: 1

This course provides students with necessary skills to enter clinical practice. Psychomotor, critical thinking and affective skills will be developed using a variety of experiential learning approaches. Best practices in simulation educational methods will be used and will include a variety of approaches. Students will demonstrate attainment of entry level skills required for clinical practice.

Academic Career: Graduate

Course Component: Credit Laboratory

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3785; CREQ: NURSAN 3790

NURSAN 3788 - CHEMISTRY AND PHYSICS IN ANESTHESIA

Minimum Credits: 2

Maximum Credits: 2

This course provides the nurse anesthesia student with a fundamental understanding of chemical, biochemical and physics principles

as they relate to physiology, pharmacology and the practice of anesthesia. Essential concepts related to chemistry and physics principles necessary to provide safe and effective anesthesia care are emphasized. Chemistry and physics concepts will be related to anesthesia equipment and processes in order to illustrate their importance to practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3785; CREQ: NURSAN 3790

NURSAN 3789 - PHYSICAL DIAGNOSIS- ANESTHESIA

Minimum Credits: 1

Maximum Credits: 1

This course offers students the skills required for conducting a preoperative anesthesia history and physical (H&P) exam, identifying risk factors (anesthetic, patient, surgical), developing a relevant anesthetic management plan and writing appropriate post-operative orders. Students will gain skill in interpreting pre-operative diagnostic tests and lab values. Students will gain familiarity with the Electronic Medical Record and charting skills. Students in this course will also develop in the areas of enhancing patient and family relations as well as health screening and intervention. Students will participate in immersive educational approaches utilizing standardized patients and structured debriefing methods.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004 or 2004D) and NUR 2031; CREQ: NURSAN 3790; PLAN: Nurse Anesthesia (DNP)

NURSAN 3790 - BASIC CLINICAL CARE 1: INTRO TO TECHNOLOGY, MONITORING, AND PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This initial clinical course is designed to integrate with basic didactic coursework. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Students will be introduced to basic level anesthesia technology and equipment, medications, monitoring procedures, and the perioperative environment. Experiences will begin with simple cases and techniques and build to more complex ones. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Clinical case conferences and ongoing assessments will be conducted to evaluate the students' ability to apply basic didactic coursework into clinical anesthesia care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3786

NURSAN 3791 - ADVANCED PRINCIPLES ANATOMY, PHYSIOLOGY & PATHOPHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

This first course in a 2- course series is designed to help students understanding of advanced concepts in Anatomy, Physiology and Pathophysiology related to anesthesia care. Advanced principles of patient management supported by best evidence will be applied to the clinical practice of nurse anesthesia across a variety of body systems and surgical procedures. Students will formulate and evaluate approaches to anesthesia management in the presence of pathophysiologic conditions affecting the Central Nervous System (CNS), neuromuscular, cardiovascular, respiratory, skeletal, and immune systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3786; CREQ: NURSAN 3792

NURSAN 3792 - BASIC CLINICAL CARE 2: BASIC PRE-OPERATIVE, INTRAOPERATIVE, AND POST-OPERATIVE CARE

Minimum Credits: 2

Maximum Credits: 2

This second clinical course promotes development of skills gained in NURSAN 3790 and integrates prior basic didactic content with more advanced concepts. The primary focus will be on the application of physiology and pathophysiology into anesthetic practice. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas as well as increasingly complicated cases. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and Anesthesiologists. Clinical case conferences will be conducted to assess the students' ability to combine more advanced didactic content into patient specific perioperative anesthesia care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3790; CREQ: NURSAN 3791

NURSAN 3793 - ADVANCED PRINCIPLES OF ANESTHESIA 1

Minimum Credits: 3

Maximum Credits: 3

This course is the first in the three-part Advanced Principles series which provides in-depth study of specialized areas of nurse anesthesia practice. Lectures will concentrate on the theoretical basis for specific anesthesia nursing interventions and the rationale for their use in the pediatric and obstetric specialties. Concepts related to regional anesthesia, acute pain management and chronic pain management will be reviewed. Plans of care for pediatrics, obstetrics, patients requiring regional anesthesia and pain patients will be developed and evaluated. Current techniques and technologies related to management of regional anesthesia and pain blocks will be reviewed and reinforced with a variety of simulation experiences (hands-on, screen based, virtual).

Grade Component: Grad Letter Grade

NURSAN 3794 - EVIDENCE BASED NURSE ANESTHESIA PRACTICE

Minimum Credits: 1

Maximum Credits: 1

This course builds on knowledge and skills acquired in NUR 2000 and NUR 2011. Translation of research evidence to nurse anesthesia clinical practice is a focus. Students will critique research papers, quality improvement projects and programmatic evaluations. Students will gain an understanding of how clinical practice guidelines (e.g., American Society of Anesthesia, American Heart Association, World Health Organization, and Centers for Disease Control) are developed, evaluated and disseminated. Differences between research projects, quality improvement projects and program evaluation projects will be explored. Students will gain an understanding of methods for integrating clinical practice guidelines into capstone projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NUR 2034 and 2000

NURSAN 3795 - ADVANCED PRINCIPLES OF ANATOMY, PHYSIOLOGY, AND PATHOPHYSIOLOGY 2

Minimum Credits: 2

Maximum Credits: 2

This second course in the series is designed to review the relevant anatomy and physiology of the endocrine, renal, hepatic, gastrointestinal, (and other intraabdominal organ), immune, hematologic and genitourinary systems. Students will develop in-depth understanding of how pathophysiology involving these systems will influence anesthetic choices and management approaches. Referencing best-evidence and clinical protocols, students will describe management approaches for surgical and therapeutic procedures related to these systems. Additionally, the pathophysiology of psychiatric illness, infectious disease, cancer and obesity will be reviewed and approaches to anesthesia care in the presence of these conditions will be developed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3791; CREQ: NURSAN 3797

NURSAN 3796 - ADVANCED PHARMACOLOGY FOR NURSE ANESTHETISTS

Minimum Credits: 3

Maximum Credits: 3

This course provides the basis for in-depth understanding of the pharmacology of clinical anesthesia practice. Specific properties of anesthetic agents and commonly used adjunctive drugs are discussed and evaluated for appropriate application in clinical situations. Development of a comprehensive knowledge base with respect to drugs used by the Nurse Anesthetist in the clinical setting will be achieved through lecture, presentation, situational examples, and case analysis. Students will formulate specific pharmacologic plans through synthesis of a variety of concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NUR 2034; CREQ: NURSAN 3797

NURSAN 3797 - ADVANCED CLINICAL CARE 1: PAIN MANAGEMENT, ULTRASOUND, REGIONAL ANESTHESIA, PEDIATRICS, & OBSTETRIC

Minimum Credits: 2

Maximum Credits: 2

This third clinical course is designed to begin integrating more advanced clinical concepts into the clinical experience. Primary focus

will be on application of the principles of advanced physiology, pathophysiology and applied pharmacology to management of increasingly advanced clinical cases. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and Anesthesiologists. Supplemental clinical case conferences will focus on the students' ability to integrate more advanced didactic content into patient specific clinical anesthesia care. Particular emphasis will be placed on discussion of approaches to pain management, regional anesthesia, obstetrics and pediatrics.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3792; CREQ: NURSAN 2730

NURSAN 3798 - ADVANCED PRINCIPLES OF ANESTHESIA 2

Minimum Credits: 3

Maximum Credits: 3

The second course in the Advanced Principles series provides in-depth study of specialized areas of Nurse Anesthesia Practice. Lectures concentrate on the theoretical basis for specific interventions and relevant research-based rationale for their use in each area of sub specialization. Planning for the anesthetic care of patients with diseases requiring cardiothoracic, pulmonary, vascular, gynecologic, genitourinary and transplant (heart and lung) procedures is the focus. Current techniques and technology related to safe management of care for patients undergoing these procedures will be reviewed. Incorporated interactive workshops using models and mannequins will allow skill development in the areas of fiberoptic bronchoscopy, jet ventilation, Double Lumen Endobronchial Tube placement (DLEBT) and Central Venous Catheter insertion. Skills in scientific writing for publication in preparation for Capstone project completion will be developed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 3799 - DIRECTED SEMINAR: THE BSN TO DNP STUDENT ANESTHETIST

Minimum Credits: 1

Maximum Credits: 1

This seminar based course is designed to provide the Nurse Anesthesia Program DNP Student with a strong theoretical and practical foundation grounded in Nurse Anesthesia science. In consultation with their faculty advisor, students will choose from among four different areas of focus including Nurse Anesthesia Education, Nurse Anesthesia Simulation Methods, Clinical Research for the Nurse Anesthetist and Nurse Anesthesia Administration, and nurse anesthesia policy. The focus and content will change according to current state 'of-the-art' practice in Nurse Anesthesia with consideration given to faculty and student areas of interest, to include international practice in developing countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3794; CREQ: NURSAN 3800

NURSAN 3800 - NURSE ANESTHETIST ROLE SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course prepares the nurse anesthesia student for their new role as a CRNA and Advanced Practice Registered Nurse. Areas of professional responsibility and potential professional roles will be addressed including APRN, educator, military member, consultant, self-employed practitioner, CRNA clinician, leader, change agent, organizational leadership position and administrator. Licensure, accreditation, certification and educational requirements for CRNAs as APRNs will be reviewed. Pathways to active involvement in community service and legislative advocacy will be discussed and analyzed. Legal, financial, malpractice and ethical issues related to nurse anesthesia practice will be addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; CREQ: NURSAN 3801

NURSAN 3801 - ADVANCED CLINICAL CARE 2: CARDIOTHORACIC, CARDIOVASCULAR AND VASCULAR

Minimum Credits: 2

Maximum Credits: 2

This fourth clinical course is designed to assist the nurse anesthesia student to integrate advanced clinical concepts being covered concurrently in the classroom with the clinical experience. Primary focus will be on specialty case management, including cardiovascular, thoracic, and vascular anesthesia. Advanced airway techniques and sophisticated laboratory analysis will be included. Students will be assigned to affiliated clinical sites and anesthesia related specialty areas to manage increasingly complicated and specialty cases. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Supplemental

clinical case conferences will be conducted with focus on these specialty populations These conferences will correspond to current didactic courses.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3797; CREQ: NURSAN 2740

NURSAN 3802 - ADVANCED PRINCIPLES OF ANESTHESIA 3

Minimum Credits: 3

Maximum Credits: 3

The third course in the Advanced Principles series provides in-depth study of specialized areas of Nurse Anesthesia Practice. Lectures concentrate on the evidence base for specific anesthetic and surgical interventions. Anesthetic approaches and management plans for patients with traumatic injuries, burns (across the lifespan), alterations of hemostasis, hematologic disorders and neuropathology and pulmonary conditions will be reviewed. Neurosurgical, diagnostic radiology, solid organ transplant (renal, hepatic etc.) trauma, reconstructive and plastic surgery procedures will be reviewed. Current techniques and technology related to safe management of care for patients undergoing procedures involving these areas will be examined. Interactive workshops in managing trauma and performing invasive and non-invasive procedures will allow development of psychomotor skills in caring for burn and trauma patients. This course will also focus on principles of scientific writing for publication.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSAN 3803 - ADVANCED CLINICAL CARE 3: NEUROSURGICAL, TRAUMA, AND EMERGENCY

Minimum Credits: 2

Maximum Credits: 2

This fifth clinical course builds upon experiences gained in NURSAN- 3801 and prior courses. The focus will be on demonstration and refinement of more advanced skills as well as incorporating content from concurrent didactic coursework into patient care. Students will demonstrate the ability to implement patient specific plans of care for neurosurgical, neurovascular, and trauma, renal, hepatic and emergency procedures. Students will also demonstrate the ability to manage complex pathophysiology. Students will gain an awareness of the broader professional roles and responsibilities of the CRNA (administrative, patient advocacy, process and patient safety evaluator). Supplemental clinical case conferences will be conducted with focus on these specialty populations and the CRNA role.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3801; CREQ: NURSAN 2750

NURSAN 3804 - ADVANCED CLINICAL CARE 4: SYNTHESIS OF PERIOPERATIVE CARE

Minimum Credits: 2

Maximum Credits: 2

This sixth clinical course builds upon experiences gained in NURSAN- 3803 and prior courses and is designed to help the student refine their knowledge base and develop increasing sophistication in practice. Students will be able to provide care for any combination of patient acuity level and complexity of procedure across the lifespan. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists. Integrated clinical case conferences will require students to present their patients and defend their plan of care with rationale based on best practices.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 3803

NURSAN 3805 - COMPREHENSIVE ANESTHESIA REVIEW SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course is designed to comprehensively review the body of knowledge necessary to enter Nurse Anesthesia practice. Nurse Anesthesia student preparation for both the DNP Comprehensive Examination and the National Board of Certified Registered Nurse Anesthetist National Certification Examination will be enhanced. Review topics will include: Basic Sciences, Equipment, Instrumentation, Technology, Basic Principles of Anesthesia and Advanced Principles of Anesthesia. A series of seminars and presentations interspersed with comprehensive, computerized examinations will be administered to allow students to evaluate their knowledge level and their test taking skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Nurse Anesthesia; PREQ: NURSAN 2750

NURSAN 3806 - TRANSITION TO CLINICAL PRACTIC

Minimum Credits: 2

Maximum Credits: 2

This final clinical course is designed to help the student transition from the student role to clinical practice. Students will be expected to create sophisticated patient and case specific management plans. Clinical experiences will be guided by Certified Registered Nurse Anesthetists and/or Anesthesiologists, but students will be expected to practice with little or no prompting from their clinical supervisors and understand their limitations. Clinical experiences will include specialty cases and experiences in all areas of practice as assigned. Clinical case conferences will be held that challenge the breadth of the students' knowledge base across the full scope of the clinical and professional role of the CRNA.

Nurse Midwife

NURNM 3500 - AMBULATORY ROLE PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

This course targets the implementation of evidence-based practices and interventions that serve as the basis for the nurse midwifery care of health conditions associated with pregnant and non-pregnant women within ambulatory healthcare settings. The implementation of culturally sensitive and appropriate gynecological, antepartal, and postpartum care drawn from diverse theoretical frameworks is also a primary focus of the course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3507 and NURNM 3513; CREQ: NURNM 3511; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3501 - GLOBAL/COMMUNITY ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on nurse midwifery assessment of various community level women's and maternal-child health issues and planning for intervention. Public health, epidemiologic, ethical and legal considerations are applied to critiquing proposed projects.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3508 and NURNM 3509; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3502 - HIGH RISK CHILDBEARING FAMILY

Minimum Credits: 4

Maximum Credits: 4

This course targets evidence based-practices and interventions that serve as the basis for family-centered nurse midwifery care of high risk conditions associated with pregnancy, labor and delivery, postpartum, and the neonatal period. Theories related to the woman's and family's experience associated with a high risk pregnancy are discussed and examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3500; CREQ: 3504; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3503 - INTEGRATION ROLE PRACTICUM

Minimum Credits: 7

Maximum Credits: 7

This course is the culminating nurse midwifery practicum with the student focusing on the practice of full scope nurse midwifery under the guidance and supervision of a Certified Nurse Midwife preceptor. Full scope nurse midwifery care encompasses counseling and management during the preconception, pregnancy, labor and birth, postpartum, neonatal period, and across the reproductive life cycle within the family.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3504; CREQ: NURNM 3510; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3504 - LABOR & BIRTH ROLE PRACTICUM

Minimum Credits: 4

Maximum Credits: 4

This practicum targets the nurse midwifery model of care in implementation of evidence-based practices and interventions that serve as the basis for the management of health conditions associated with family-centered pregnancy, labor and birth, postpartum, and the neonatal period. The implementation of culturally sensitive and appropriate antepartal to postpartal to neonatal care drawn from diverse theoretical frameworks is also a primary focus of the course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3500; CREQ: NURNM 3502; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3505 - MANAGEMENT FETUS/NEONATE IN DYAD

Minimum Credits: 2

Maximum Credits: 2

This course focuses on nurse midwifery management of the fetus/neonate within the mother-newborn dyad and family. Emphasis is on selected theories, principles, and techniques from the physical and behavioral sciences central to the nurse midwifery model of care for the fetus/neonate. The NM DNP scope of practice with interprofessional collaboration and referral is incorporated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3507; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3506 - MANAGEMENT WOMEN'S COMPLEX HEALTH ISSUES

Minimum Credits: 2

Maximum Credits: 2

This course focuses on nurse midwifery model of care with women experiencing complex reproductive health issues. Emphasis is on selected theories, principles and techniques from the physical and behavioral sciences central to the nurse midwifery management of women, women's issues, health promotion for women, and diagnosing and managing complicated reproductive health problems. The NM DNP scope of practice with interprofessional collaboration and referral is incorporated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2523 and 2515 and 2505; CREQ: NURNM 3513; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3507 - NEONATAL ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on the nurse midwifery model of care for the neonate within the mother-newborn dyad and family. Examination, assessment and management of the neonate from birth through the first 28 days of life are applied in practice.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3505 and NURNM 3513; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3508 - NURSE MIDWIFE GLOBAL AND COMMUNITY HEALTH

Minimum Credits: 1

Maximum Credits: 1

This course is concerned with the role of nurse midwives in population-based health. Public health, epidemiologic, ethical and legal issues applicable to women, newborns, and childbearing families in diverse settings at local, national and international levels will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3509; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3509 - ROLE SEMINAR 1: PROFESSIONAL NURSE MIDWIFE

Minimum Credits: 1

Maximum Credits: 1

This introductory seminar is designed for enculturation to the art and science of the nurse midwifery profession for care of women, newborns, and families in diverse settings. Articulation of nurse midwife (NM) role with the Doctor of Nursing Practice (DNP) will be developed. Midwifery history, philosophy of care, ethics, standards, and competencies will be emphasized in developing the role and scope of NM DNP practice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NUR 2010 and NUR 3099; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3510 - NURSE MIDWIFE ROLE SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This is a culminating seminar emphasizing issues unique to the implementation of the role of the Nurse Midwife (NM) in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice for then DNP care trends, health care needs of women, maternal-infant dyads and childbearing families in diverse environments, and legislative and professional practice issues. Professional, inter-professional, economic, cultural, and legal issues related to NM practice will be emphasized. Identification, assessment, and advanced management of common and complex health problems in specific populations will be addressed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

NURNM 3511 - NORMAL CHILDBEARING FAMILY

Minimum Credits: 4

Maximum Credits: 4

This course targets evidence-based practices and interventions that serve as the basis for nurse midwife (NM) management of normal and common health conditions associated with pregnancy, labor and delivery, postpartum, and the neonatal period. Theories related to the woman's experience of pregnancy, childbirth, and the taking-on of the maternal identity/role in context of family are also examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3505 and NURNM 3506; CREQ: NURNM 3500; PLAN: Nurse Midwife (NURSMW-DNP)

NURNM 3512 - WOMEN'S HEALTH ROLE PRACTICUM 1

Minimum Credits: 1

Maximum Credits: 1

This is an entry level clinical practicum focused on well-woman care and includes intermediate level seminars that emphasize issues unique to the implementation of the role of the Nurse Midwife (NM) as provider of primary care for women in various settings. This course is designed to develop assessment skills and differential diagnoses with beginning management skills, and to analyze factors that have an impact on advanced nursing practice, emphasizing the scope of practice in NM and DNP health care trends, health care needs in diverse environments, and professional practice issues. Professional, inter-professional, economic, cultural, and legal issues related to NM DNP practice experiences will be emphasized.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

NURNM 3513 - WOMEN'S HEALTH ROLE PRACTICUM 2

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on implementing the nurse midwife (NM) model of care with non-pregnant woman. Examination, assessment, and management of the woman from puberty through menopause will be the focus of this course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNM 3512; CREQ: NURNM 3506 and 3507; PLAN: Nurse Midwife (NURSMW-DNP)

Nurse Practitioner

NURNP 2026 - ROLE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NURNP 2026D - ROLE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This is an introductory seminar emphasizing issues unique to the implementation of the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, health care needs in diverse environments, and professional practice issues. Professional, economic, cultural, and legal issues related to nurse practitioner practice will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NURNP 2028 - ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This course is designed to provide each student with a practicum experience in role development for the nurse practitioner. Experiences emphasize clinical decision making in an interprofessional environment with a focus on the nurse practitioner as a principal provider of care for individuals with population specific health care needs and conditions.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PROG: Graduate School of Nursing

NURNP 2029 - ROLE SEMINAR 2

Minimum Credits: 2

Maximum Credits: 2

This is a culminating seminar emphasizing issues unique to transitioning to the role of the nurse practitioner in various practice settings. This course is designed to analyze factors that have an impact on advanced nursing practice with emphasis on the scope of practice of the nurse practitioner, health care trends, and legislative and professional practice issues.

Academic Career: Graduate

NURNP 2100 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced nursing practice in the diagnosis and management of common episodic and complex chronic dysfunctions/alterations in the acutely ill adult-gerontology population. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for adult-gerontology patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2033; CREQ: (NUR 2034 or 2434 or 2034D); PROG: Graduate School of Nursing

NURNP 2100D - MANAGEMENT OF ADULT WITH EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE THEORY

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a theoretical, practical, and evidence-based foundation for advanced practice nursing in the diagnosis and management of common episodic and chronic dysfunctions/alterations. Through didactic information, students develop the knowledge base needed to apply advanced practice skills in patient/family assessment, develop and implement a management plan, and evaluate the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health restoration, and health protection appropriate to these patients and families will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2033 or 2433 or 2033D); CREQ: (NUR 2034 or 2434 or 2234 or 2034D)

NURNP 2101 - MANAGEMENT OF ADULT EPISODIC/CHRONIC HEALTH PROBLEMS IN ACUTE CARE CLINICAL

Minimum Credits: 3

Maximum Credits: 3

This clinical course is designed to provide opportunities to apply a theoretical, practical and evidenced based foundation for advanced nursing practice in the diagnosis and management of common episodic and complex chronic dysfunctions/alterations in the acutely ill adult-gerontology population. Through clinical experience, students implement advanced practice skills in patient/family assessment, develop and implement a management plan and evaluate the plan's effectiveness when caring for adult-gerontology patients across the continuum of the acute care services. Health promotion, health protection, and health restoration appropriate to these patients and families will be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2100 or 2100D

NURNP 2102 - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems commonly seen in adult-gerontology patients who are acutely and/or critically ill. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2104

NURNP 2102D - MANAGEMENT OF COMPLEX HEALTH PROBLEMS OF THE ACUTELY AND CRITICALLY ILL ADULT 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to expand on the comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for patients with problems

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2101 or 2401 or 2100D

NURNP 2105 - CLINICAL EMPHASIS - CARDIOPULMONARY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with cardiopulmonary dysfunctions/alterations. The course integrates the pathophysiology of cardiopulmonary dysfunctions/alterations with appropriate diagnostic parameters and management strategies. Through ongoing clinical experience, students implement the nursing process when caring for patients who are acutely ill and apply the clinical decision-making process in the care of these patients. Health promotion, protection, and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2106 - CLINICAL EMPHASIS - CRITICAL CARE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of selected dysfunctions/alterations commonly seen in the critically ill adult-gerontology patient. Through ongoing clinical experience, students implement the nursing process when caring for patients who are critically ill and apply the clinical decision-making process in care of patients. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2107 - CLINICAL EMPHASIS - ONCOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive, evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with cancer. The course integrates the pathophysiology of problems associated with cancer and its treatment with appropriate diagnostic parameters and management strategies. Through ongoing clinical experiences the student will implement the clinical decision-making in the care of the acutely ill adult-gerontology patient with cancer. Health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2109 - CLINICAL EMPHASIS - DIRECTED STUDY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive evidence-based practical foundation for clinical application of advanced nursing practice in the diagnosis and management of adult-gerontology patients with dysfunctions/alterations in a selected area of clinical specialization. The course integrates the pathophysiology of dysfunctions/alterations in the selected area with appropriate diagnostic parameters and management strategies. Through ongoing clinical experience, students implement the nursing process when caring for patients who are acutely ill and apply the clinical decision-making process in the care of these patients. Health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2110 - MASTER'S THESIS

Minimum Credits: 1

Maximum Credits: 3

Individual instruction provides guidance in conducting a nursing research study. The thesis includes the review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

NURNP 2161 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Nursing students only.

NURNP 2194 - CLINICAL EMPHASIS: TRAUMA EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive practical foundation for the clinical application of advanced nursing practice in the management of selected dysfunctions/alterations commonly seen in the traumatized adult-gerontology patient. Through ongoing clinical experience, students implement the nursing process when caring for adult-gerontology patients who are emergent, traumatized, or involved in disasters, and apply the clinical decision-making process in the care of these patients in all phases of the trauma cycle.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NURNP 2102

NURNP 2218 - FAMILY THEORY FOR NPS: PRINCIPLES, IMPLICATIONS AND APPLICATION ACROSS THE LIFE SPAN

Minimum Credits: 3

Maximum Credits: 3

This theory course is concerned with the exploration and application of the various family health theories with respect to np practice. Focus is on the definition and development of the family, types of families, family assessment and care of the family with application of family health theories. Examination and analysis of cultural diversity within families, health care policies, and end-of-life issues are included. Ethical issues with regard to the care of the family are also addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURNP 2246 - MANAGEMENT: ADOLESCENT HEALTH THEORY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NUR 2034 or 2234 or 2434 or 2034D) and (NUR 2033 or 2433 or 2033D); CREQ: NURNP 2540

NURNP 2303 - MANAGEMENT AND PRACTICUM 1 PMH ADULT ACUTE AND CHRONIC

Minimum Credits: 2

Maximum Credits: 2

Students develop advanced practice skills in the clinical management of patients with common acute and chronic primary health care needs and problems. Emphasis is on the synthesis of diagnostic findings with the development, implementation and evaluation of general management strategies. Clinical practica enable students to integrate knowledge derived from courses and readings with that obtained from experiences which will include precepted clinical work in primary health care settings with adult medical patients.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2033 or 2433 or 2033D; CREQ: 2314 and 2515

NURNP 2310 - MASTER'S THESIS

Minimum Credits: 1

Maximum Credits: 6

Individual instruction provides guidance in the preparation of a scholarly written report which synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion, as well as the appropriate institutional human rights reviews.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

NURNP 2314 - MANAGEMENT AND PRACTICUM 2 PMH ADULT ACUTE AND CHRONIC

Minimum Credits: 1

Maximum Credits: 1

This practicum focuses on diagnosis and management of primary health care needs and problems. Students are precepted in primary health care settings where they learn to plan, implement and evaluate therapeutic regimens for adult patients with acute and chronic illnesses commonly encountered.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004 or 2204 or 2404 or 2004D) and (NUR 2033 or 2433 or 2033D); CREQ: (NUR 2034 or 2234 or 2434 or 2034D) and NURNP 2303

NURNP 2320 - NEUROBIOLOGY OF PSYCHIATRIC DISORDERS

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the knowledge base developed in the pathophysiology course, extending and applying this content to psychiatric disorders. It is designed with a threefold purpose: (a) to transition students from general concepts utilized in advanced practice to specific theories that are unique to the role of the psychiatric/mental health nurse practitioner; (b) to develop an appreciation of current biological theories as a major dimension in understanding the etiology, course, and outcome of selected

psychiatric disorders; and, (c) to prepare students to utilize research findings as the empirical basis for the advanced practice of nursing. Content will focus on the major biological theories of psychiatric disorders in relationship to their respective technologies, neuroanatomical structures, neurochemical pathways, specific behaviors and symptomatology. Current research findings will be presented to supplement theoretical content.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004 or 2204 or 2404 or 2004D

NURNP 2325 - PSYCHOPHARMACOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the conceptual principles developed in NUR 2034 advanced pharmacology and is designed to prepare students to manage the pharmacological aspects of treatment in patients with psychiatric disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004 or 2204 or 2404 or 2004D) and (NUR 2034 or 2234 or 2434 or 2034D) and NURNP 2331; CREQ: NURNP 2320

NURNP 2325D - PSYCHOPHARMACOLOGY

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the conceptual principles developed in NUR 2034 advanced pharmacology and is designed to prepare students to manage the pharmacological aspects of treatment in patients with psychiatric disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004 or 2204 or 2404 or 2004D) and (NUR 2034 or 2234 or 2434 or 2034D) and NURNP 2331; CREQ: NURNP 2320

NURNP 2330 - PSYCHIATRIC DIAGNOSIS THEORY

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the diagnostic reasoning skills developed in the diagnostic physical exam and differential diagnosis courses, theory and clinical. It is designed to prepare students to utilize these skills in conducting psychiatric evaluations and in the preparation of case formulations across the life span. A bio-psycho-social perspective will be used to conceptualize case formulation and the examination of differential diagnoses. This course is open to students in other graduate programs in the school of nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2314 and NURNP 2515 and NURNP 2320; CREQ: NURNP 2331; PROG: School of Nursing

NURNP 2330D - PSYCHIATRIC DIAGNOSIS THEORY

Minimum Credits: 2

Maximum Credits: 2

This course builds upon the diagnostic reasoning skills developed in the diagnostic physical exam and differential diagnosis courses, theory and clinical. It is designed to prepare students to utilize these skills in conducting psychiatric evaluations and in the preparation of case formulations. A biopsychosocial perspective will be used to conceptualize case formulation and the examination of differential diagnoses. This course is open to students in other graduate programs in the school of nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2314 and 2515 and 2320; CREQ: NURNP 2331

NURNP 2331 - PSYCHIATRIC DIAGNOSIS PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

This clinical course is designed to complement and expand on the application of diagnostic reasoning skills developed in diagnostic physical exam across the life span, differential diagnosis theory and differential diagnosis clinical. In addition to the diagnoses of common health problems, the student will develop advanced diagnostic skills in relation to psychiatric disorders across the life span.

The focus is on the identification and synthesis of pertinent physical, biological, psychological, and social data in order to complete a comprehensive psychiatric evaluation. The students will refine their diagnostic skills in a psychiatric setting with psychiatric patients across the life span.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2320; CREQ: 2330

NURNP 2340 - MANAGEMENT OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the theory and concepts relevant to management of the primary health care needs and problems of clients with a diagnosed psychiatric problem across the life span. The focus is on selected theories and principles from the physical and behavioral sciences central to planning, implementing, and evaluating therapeutic regimens for clients with acute psychiatric problems across the life span encountered in a primary care setting. Emphasis is also placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans. This course builds directly on the knowledge base developed in the physical diagnosis and primary health care courses, expanding that base to the care of clients who have a diagnosed psychiatric problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2331; CREQ: NURNP 2325 and 2341; PROG: School of Nursing

NURNP 2341 - MANAGEMENT PRACTICUM OF ACUTE HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

The goal of this practicum is to provide the student with an opportunity to refine advanced practice skills in the clinical management of the primary health care needs and psycho-biological problems of clients with psychiatric disorders across the life span. The practicum focuses on synthesizing relevant psycho-therapeutic modalities with the management of common health problems into the client's plan of care, and evaluating the effectiveness of these interventions.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2331; CREQ: NURNP 2340 and 2325; PROG: School of Nursing

NURNP 2345 - MANAGEMENT OF CHRONIC HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on theory and concepts relevant to the management of chronic psychiatric and primary health care needs/problems of clients with long-term psychiatric disorders across the life span. The focus is on selected theories and principles from the physical and behavioral sciences central to planning, implementing, and evaluating therapeutic regimens for the client populations commonly encountered in psychiatric settings. Emphasis is also placed on understanding the unique contributions of social and cultural factors in the development of appropriate treatment plans for clients experiencing long-term psychiatric problems. This course builds on the scientific knowledge acquired in previous psychiatric mental health nurse practitioner core and theory courses. It offers a framework for integrating a primary care approach in the management of chronic and severe psychiatric problems across the life span.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2341; CREQ: NURNP 2346; PROG: School of Nursing

NURNP 2346 - MANAGEMENT PRACTICUM CHRONIC HEALTH PROBLEMS OF PSYCHIATRIC PATIENTS

Minimum Credits: 2

Maximum Credits: 2

This clinical course is designed to provide the student with a culminating practicum experience in the role of the psychiatric mental health nurse practitioner (PMHNP). Experiences emphasize clinical decision-making in an interdisciplinary environment with focus on the PMHNP as a principal provider of care for clients with chronic and severe psychiatric disorders across the life span in a variety of psychiatric settings.

Course Requirements: PREQ: NUR 2031 or 2231; CREQ: NUR 2033 or 2433 or 2033D

NURNP 2523D - MANAGEMENT: WOMEN'S HEALTH 1

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the health care of women. Emphasis is on selected theories, principles and techniques from the physical and behavioral sciences central to the assessment of women, women's issues, health promotion for women, and diagnosing and managing common gynecologic needs and problems

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2031 or 2231; CREQ: NUR 2033 or 2433 or 2033D

NURNP 2526 - MANAGEMENT: GERIATRIC HEALTH THEORY

Minimum Credits: 2

Maximum Credits: 2

This theory course explores the evidence base for the evaluation, diagnosis and management of problems commonly encountered in the geriatric population. Emphasis is on the aging process, health promotion, and the diagnosis and management of common health problems of older adults in primary care settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2031 or 2231

NURNP 2526D - MANAGEMENT: GERIATRIC HEALTH

Minimum Credits: 2

Maximum Credits: 2

This theory course explores the evidence base for the evaluation, diagnosis and management of problems commonly encountered in the geriatric population. Emphasis is on the aging process, health promotion, and the diagnosis and management of common health problems of older adults in primary care settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2031 or 2231

NURNP 2527 - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES

Minimum Credits: 3

Maximum Credits: 3

The focus of this theory course is on advanced concepts related to current and complex geriatric management issues. The course builds on the foundation of geriatric care management presented in NURNP 2526. Utilization of health care resources, health care policies, and end-of-life care and caregiver issues will be presented. Primary care is the emphasis but the concepts will be applied across the continuum of care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2526

NURNP 2527D - ADVANCED MANAGEMENT: COMPLEX GERIATRIC HEALTH ISSUES

Minimum Credits: 3

Maximum Credits: 3

The focus of this theory course is on advanced concepts related to current and complex geriatric management issues. The course builds on the foundation of geriatric care management presented in NURNP 2526. Utilization of health care resources, health care policies, and end-of-life care and caregiver issues will be presented. Primary care is the emphasis but the concepts will be applied across the continuum of care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2526

NURNP 2528 - SEMINAR IN GERIATRIC CARE

Minimum Credits: 1

Maximum Credits: 1

This course will focus on the role of the intra-professional team in regard to geriatric syndromes, current research, pharmaceuticals, and timely geriatric issues related to health care delivery.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2526

NURNP 2529 - GERONTOLOGY CLINICAL PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

This clinical course is designed for students to gain experience in the assessment, diagnosis and management of older adults in a variety of settings. The application of evidence based protocols will be included in the prevention, early diagnosis and management of geriatric syndromes. An interdisciplinary team approach will be emphasized.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

NURNP 2540 - PEDIATRIC WELL CHILD CARE THEORY

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an introduction to primary health care for children, where theories and concepts pertinent to the

delivery of health care to well children and adolescents are explored. Emphasis is placed on anticipatory guidance as well as the identification and management of developmental and behavioral issues in children. Child development theories and issues will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURNP 2540D - PEDIATRIC WELL CHILD CARE THEORY

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an introduction to primary health care for children, where theories and concepts pertinent to the delivery of health care to well children and adolescents are explored. Emphasis is placed on anticipatory guidance as well as the identification and management of developmental and behavioral issues in children. Child development theories and issues will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURNP 2546 - MGT: ADOLESCENT HEALTH THEORY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2033 or 2433 or 2033D) and (NUR 2034 or 2434 or 2034D); CREQ: (NURNP 2440 or 2540 or 2540D)

NURNP 2546D - MGT: ADOLESCENT HEALTH THEORY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide the student with an opportunity to learn about adolescent health care from a developmental and theoretical perspective. Emphasis is placed on the identification, assessment and management of health problems common to adolescents in primary care settings utilizing knowledge of adolescent developmental principles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2033 or 2433 or 2033D) and (NUR 2034 or 2434 or 2034D); CREQ: (NURNP 2440 or NURNP 2540 or 2540D)

NURNP 2549 - MANAGEMENT: ADVANCED PEDIATRIC HEALTH PROBLEMS THEORY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to provide the student with an advanced study of children with primary, complex, and chronic health conditions and disabilities. Emphasis is placed on the identification, assessment, and management of chronic pediatric problems, neurodevelopmental disabilities, and behavioral issues. The influence that these conditions have on children and their families is also integrated. Emphasis is placed on understanding the physiologic rationale for treatment measures as well as the provision of physical and psychological care to children and families.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NURNP 2520 or 2420 or 2520D); CREQ: NURNP 2550

NURNP 2550 - MANAGEMENT: ADVANCED PEDIATRIC HEALTH PROBLEMS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

The purpose of this clinical course is to provide students with an opportunity to provide comprehensive primary health care services to children with primary health care needs, developmental concerns, complex and chronic health problems. Concepts and content from NURNP 2549 will be applied in clinical practice.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NURNP 2521 or 2421 or 2521D); CREQ: NURNP 2549

NURNP 2561 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Allows the student the opportunity to acquire knowledge and skill through independent experiences involving little or no formal interaction between the student and instructor. Typically selected when no formal course is available that meets the student's individual learning needs.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NURNP 2570 - COMPREHENSIVE NEONATAL ASSESSMENT THEORY

Minimum Credits: 2

Maximum Credits: 2

This course addresses the complete neonatal assessment process. It includes a genetics overview, perinatal and neonatal physiology, neonatal pharmacology, common neonatal diagnostic and laboratory testing and invasive procedures. The comprehensive neonatal assessment, including prenatal through neonatal history and neonatal physical examination is reviewed. Family function, dynamics, crisis theory and the grieving process are also examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004 or 2204 or 2404 or 2004D

NURNP 2571 - GENERAL MANAGEMENT OF THE SICK NEONATE - THEORY

Minimum Credits: 4

Maximum Credits: 4

This theory course builds on the neonatal assessment theory course and assists the students in developing the neonatal assessment skills necessary to function in the role of the NNP in the neonatal intensive care nursery (NICU), particularly in emergency situations. It focuses on the knowledge necessary to resuscitate and stabilize a sick newborn. In addition, the course discusses the physiology of pain and pain management. The course is taught with an accompanying clinical course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2570; CREQ: NUR 2572

NURNP 2572 - GENERAL ASSESSMENT AND MANAGEMENT OF THE SICK NEONATE - CLINICAL

Minimum Credits: 5

Maximum Credits: 5

This clinical course builds on the physical diagnosis and the neonatal assessment and general management courses. The students master the neonatal assessment skills necessary to function in the role of the NNP in the neonatal intensive care nursery (NICU). The students will obtain and evaluate a complete neonatal patient database, including conducting a history and physical examination. The students will also learn stabilization and resuscitation in the delivery room and during transport. In addition, the course affords the students the opportunity to perform neonatal therapeutic and diagnostic procedures in the clinical setting.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURNP 2570; CREQ: NURNP 2571

NURNP 2573 - NEONATAL DISEASE PROCESS 1 - THEORY

Minimum Credits: 4

Maximum Credits: 4

Clinical management of neonatal (preterm and term infants in the neonatal intensive care unit) patients requires a broad knowledge base. This theory course will provide a thorough understanding of the embryology, physiology, pathophysiology and management of common neonatal disease processes. This is the first in a series of 2 consecutive courses and will focus on the cardiovascular, pulmonary, gastrointestinal/nutrition, renal/genitourinary and hematologic systems as well as fluids and electrolytes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2571; CREQ: NURNP 2028

NURNP 2574 - NEONATAL DISEASE PROCESS 2 - THEORY

Minimum Credits: 4

Maximum Credits: 4

Clinical management of neonatal (preterm and term infants in the neonatal intensive care unit) patients requires a broad knowledge base. This theory course will provide a thorough understanding of the embryology, physiology, pathophysiology and management of common neonatal disease processes. This is the second in a series of 2 consecutive courses and will focus on the endocrine & metabolic, immune, neurobehavioral, musculoskeletal, eyes/ears/nose/throat and dermatologic systems. It also includes discharge planning and follow-up care for the high-risk neonate.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURNP 2573; CREQ: NURNP 2028

NURNP 2582 - MGT:ADLT ACUTE/CHRONIC 1 ANP CLN

Minimum Credits: 2

Maximum Credits: 2

This practicum is concerned with diagnosis and management of primary health care needs and problems. Students are assigned to an ambulatory health care setting and carry out the nursing process as they provide primary health care services to adults with primary health care needs and problems. Students learn to plan, implement and evaluate therapeutic regimens for patients with acute and chronic illnesses commonly encountered in primary health care settings.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

NURNP 3025 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Minimum Credits: 4

Maximum Credits: 4

This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURNP 3025D - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Minimum Credits: 4

Maximum Credits: 4

This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

Grade Component: Grad LG/SU3 Basis

NURNP 3038 - DNP NP ROLE PRACTICUM

Minimum Credits: 1

Maximum Credits: 10

A culminating practicum experience in role development for the DNP np. Experiences emphasize clinical decision making in a multidisciplinary environment with focus on the nurse practitioner as a principal provider of care

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURNP 3218 - FAMILY THEORY FOR NPS: PRINCIPLES, IMPLICATIONS, AND APPLICATION ACROSS THE LIFESPAN

Minimum Credits: 3

Maximum Credits: 3

This theory course is concerned with the exploration and application of the various family health theories with respect to np practice. Focus is on the definition and development of the family, types of families, family assessment and care of the family with application of family health theories. Examination and analysis of cultural diversity within families, health care policies, and end-of-life issues are included. Ethical issues with regard to the care of the family are also addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURNP 3225 - DIAGNOSIS AND MANAGEMENT OF PSYCHIATRIC CONDITIONS IN PRIMARY CARE

Minimum Credits: 4

Maximum Credits: 4

This didactic course explores the evidence base for the evaluation, diagnosis and management of common psychiatric-mental health issues across the lifespan. Emphasis is on (1) current understanding of the etiology, including the genetic basis, of psychiatric illnesses; (2) evaluation and diagnosis of individuals presenting with psychiatric-mental health symptoms; (3) recognizing problems that can be managed in a primary care setting and those that need to be referred for psychiatric evaluation and care; (4) ongoing management of psychiatric-mental health problems in primary care including management in collaboration with psychiatry; and (5) the impact of mental health problems from a family perspective.

Nurse Specialty Role

NURSP 2061 - ORGANIZTNL & MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 2061D - ORGANIZATION & MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2064 - PRACTICUM IN NURSING SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Course is designed for students enrolled in the administration minor and serves as the clinical practicum. Course will provide students with opportunities to observe, apply, analyze and discuss selected administrative and managerial skill and processes which are relevant to the practice of nursing administration. Seminar portion will provide content, discussion and individual and group activities. A critical course component is a practicum with a designated preceptor employed full-time in a selected site. Negotiated sites and experiences are tailored to enhance student's career goals.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2070 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an introduction to information technology project management. Students will learn how to create a comprehensive project management plan which includes: scope, integration, communication, time, cost, risk, quality and human resources management. This course also covers the following topics: system life cycles, messaging standards and procurement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2071 - DESIGN AND PROCESS OF INSTRUCTION

Minimum Credits: 3

Maximum Credits: 3

This course provides students with the conceptual knowledge base and practice experiences necessary for competent classroom and clinical instruction. Students synthesize a conceptual foundation for developing effective learning activities for individuals and groups to provide realistic problem solving opportunities. Instructional design principles and related educational technologies are applied to both classroom and clinical teaching. Traditional and innovative learning environments are analyzed in relationship to the advanced role of the nurse. Issues and research findings important to classroom and clinical teaching are addressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2072 - MEASUREMENT AND EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Concepts and methods for learning measurement and evaluation as they relate to teaching and learning in nursing and the health sciences are reviewed and assessed. Course activities offer the student opportunities to study and use a variety of measurement and evaluation techniques that are appropriate for classroom and clinical healthcare settings. Opportunities are provided for students to critique and evaluate ethical, legal and social issues involving measurement and evaluation as well as uses and limitations of evaluation methods in diverse healthcare settings and educator roles.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2073 - PRACTICUM 1 IN NURSING EDUCATION: TEACHING AND LEARNING ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This course is designed to enable students to put into practice all the elements of clinical, didactic, simulation, research-focused, and laboratory instruction, under the supervision of an accomplished preceptor/mentor in diverse learning environments. Students have the opportunity to implement the role of nurse-educator through a guided, supportive, personally-designed practicum experience with one or more settings, populations, or roles, as determined by each student's learning needs.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURSP 2071; PROG: School of Nursing

NURSP 2074 - PRACTICUM 2 IN NURSING EDUCATION: EDUCATIONAL PROGRAM MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course builds on the principles of NURSP 2073 practicum 1 in nursing education: teaching and learning assessment. In this course students have the opportunity to further develop and implement the role of nurse educator through a guided, supportive practicum experience under the direct supervision of an accomplished preceptor. Students are able to choose the teaching environment that best meets his or her learning needs.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURSP 2071 and NURSP 2072 and NURSP 2073; PROG: School of Nursing

NURSP 2075 - INTRODUCTION TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2075D - INTRODUCTION TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2076 - CLINICAL INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on an analysis of nursing information systems within the context of the health care system. Emphasis is placed on the use of computers for documentation in clinical settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NURSP 2075 or 2275 or 2475 or 2075D

NURSP 2082 - INFORMATICS THEORIES AND ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course covers relevant theories and models from the fields of: nursing informatics, communication, information science and computer science. The foundations of behavioral theories, group dynamics and principles of adult learning will be introduced. Students will apply these theories and models to emerging issues in informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2083 - SYSTEM USABILITY AND EVALUATION METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2085 - NURSING INFORMATICS PRACTICUM 1

Minimum Credits: 3

Maximum Credits: 4

This course provides an opportunity for the learner to synthesize previous nursing informatics coursework. The student will implement the theory learned in class in a real-world setting and demonstrate beginning competency as an informatics nurse.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURSP 2076 or 2276

NURSP 2086 - NURSING INFORMATICS PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 4

The course employs an application focus in which the learner demonstrates leadership, comprehension, critical thinking, and problem-solving abilities within the context of a real-world environment. The student will assume the role of a beginning nursing informatics specialist.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURSP 2085

NURSP 2088 - INTRODUCTION TO DATABASE MANAGEMENT SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with the conceptual knowledge base and practice experiences necessary to understand the design and function of a modern relational database management system. It will provide students with the historical and practical knowledge needed to design a relational database. The students will have hands on experience with databases and other software that interfaces with databases. Standards as they apply to the logical and physical design of databases will be stressed. The future of database design and remote access including mobile devices will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2090 - HEALTHCARE OUTCOMES

Minimum Credits: 3

Maximum Credits: 3

Knowledge and understanding of healthcare outcomes is an important competency for healthcare professionals. This course will provide students with opportunities to discuss and analyze key issues in the healthcare quality movement. Conceptual frameworks used in explaining healthcare outcomes and identification of driving forces defining the development of various outcomes will be addressed. Specific healthcare outcomes and the influence that they have on advance practice nursing and policy formulation will be examined and analyzed. Finally, the strategies and skills healthcare professionals will need to practice and manage effectively within this outcomes environment will be detailed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 2091 - FINANCE AND ECONOMICS FOR HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 2091D - FINANCE AND ECONOMICS FOR HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2092 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Nursing students only.

NURSP 2092D - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

NURSP 2093 - EDUCATION AND MENTORING IN THE CLINICAL SETTING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a theoretical, practical, and evidence-based foundation for graduate students in the education of clients/patient/families, nurse colleagues, and other health care providers. Students will broaden their knowledge base in the dynamics of human behavior, values clarification, educational psychology, and motivation which are fundamental to behavior change and sustaining that change (transformation). Content includes principles of andragogy and pedagogy, analysis of learning styles, replete with instruments and a contemporary model focusing upon behavior change of employees, mentoring, the role and function of preceptors, coaching and feedback skills and application of a competency model will be emphasized. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NURSP 2095 - CONTEMPORARY ISSUES IN NURSING AND THE CNL ROLE SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the major contemporary issues facing the nursing profession. Patient safety, process improvement, effective patient care and family partnerships, improved care coordination and implementation of evidence based practice are examples that the CNL role could impact. The course also focuses on successful implementation of the CNL role through knowledge, evidence-based practice and application of leadership principles. The AACN competencies and curricular expectations for clinical nurse leader education and practice (October 2013) will serve as the overall framework for the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NURSP 2096 - CNL CLINICAL PRACTICUM 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN competencies and curricular expectations for clinical nurse leader education and practice (2013) will provide the framework for the practicum.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NURSP 2061 or 2261 or 2461 or 2061D) and (NURSP 2090 or 2290)

NURSP 2097 - CNL CLINICAL PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN competencies and curricular expectations for clinical nurse leader education and practice (2013) will provide the framework for the practicum.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: PREQ: NURSP (2061 and 2090) or (2261 and 2290); CREQ: NURSP 2096 or 2296

NURSP 2098 - HEALTHCARE QUALITY

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2161 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students elect an area of interest and work with a specific faculty member to meet agreed upon objectives.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Nursing students only.

NURSP 2180 - ADVANCED SPECIALTY OPTION: ADULT EPISODIC AND CHRONIC ACUTE CARE

Minimum Credits: 4

Maximum Credits: 4

This course is designed to develop a foundation for advanced nursing practice in the care of patients with common episodic and chronic dysfunctions/alterations. The student will develop advanced practice skills in patient/family assessment, developing and implementing a nursing plan and evaluating the plan's effectiveness when caring for patients across the continuum of acute care services. Health promotion, health maintenance, disease prevention and health restoration appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 2185 - ADVANCED SPECIALTY OPTION: COMPLEX HEALTH PROBLEMS IN ACUTE CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a theoretical foundation for advanced nursing care of the acutely and critically ill adult-gerontology patient. Through didactic information and course assignments, students develop the knowledge base central to planning, implementing and evaluating nursing care for acutely and critically ill adult-gerontology patients with complex health problems that are commonly seen across the continuum of acute care delivery systems. Health maintenance, health promotion, disease prevention and health protection appropriate to this patient population will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NUR 2004 or 2404 or 2004D) and (NUR 2034 or 2434 or 2034D)

NURSP 2190 - ADV SPECIALTY OPT: CARDIOPULMONARY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing practice in the care of adult-gerontology patients with cardiopulmonary dysfunctions/alterations. The course integrates the pathophysiology of cardiopulmonary dysfunctions/alterations with appropriate diagnostic parameters and management strategies. Health promotion, protection, and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004

NURSP 2191 - ADV SPECIALTY OPTN: CRITICAL CARE

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with selected dysfunctions/alterations commonly seen in critical illness. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the critical care setting. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004

NURSP 2192 - ADV SPECIALTY OPTION: ONCOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with cancer dysfunctions/alterations. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the oncology setting. Aspects of health promotion, protection, and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004

NURSP 2193 - ADVANCED SPECIALTY OPTION: DIRECTED STUDY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing care of adult-gerontology patients with dysfunctions/alterations in the selected area of clinical specialization. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the selected area of clinical specialization. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2004

NURSP 2195 - ADVANCED SPECIALTY OPTION: TRAUMA EMERGENCY PREPAREDNESS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a comprehensive theoretical and practical foundation for advanced nursing practice in the diagnosis & management of selected dysfunctions/alterations commonly seen in the trauma, emergency and disaster affected adult-gerontology patient. Didactic content focuses on information central to planning, implementing and evaluating therapeutic regimens for adult-gerontology patients with problems commonly seen in the trauma, emergency, and disaster settings. Aspects of health promotion and maintenance appropriate to these patients and families will also be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004

NURSP 2261 - ORGANIZATIONAL AND MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 2270 - INFORMATION TECHNOLOGY PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides students with an introduction to information technology project management. Students will learn how to create a comprehensive project management plan which includes: scope, integration, communication, time, cost, risk, quality and human resources management. This course also covers the following topics: system life cycles, messaging standards and procurement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2272 - USING DATA TO DRIVE DECISIONS

Minimum Credits: 2

Maximum Credits: 2

This course is the first practicum and is designed to apply the knowledge, skills and critical thinking developed through the core content courses of the administrative program. Using a data base of a 'virtual hospital', students are presented with common administrative problems they are likely to encounter in an administrative role. Particular emphasis is given to solving problems with the appropriate balance of cost and quality.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NURSP 2061 or 2261 or 2461 or 2061D) and (NURSP 2091 or 2291 or 2491 or 2091D)

NURSP 2273 - NURSING ADMINISTRATION RESIDENCY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to synthesize the knowledge, skills, and critical thinking developed through the core content courses of the administrative program within a practice environment. Students will be assigned a preceptor based on their identified learning needs and area of interest. It is anticipated that students will be exposed to and involved in various experiences that nursing administrators face in today's health care environment. In collaboration with their preceptor, the student will identify, design and implement a relevant project at the beginning of the semester. The project must be approved by the course instructor. Once a week students will complete an on-line journal through blackboard that illustrates how they have met the objectives below. Each objective must be met by the conclusion of the term. The course instructor will provide feedback on a weekly basis.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

NURSP 2275 - INTRODUCTION TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Nursing

NURSP 2276 - CLINICAL INFORMATION SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on an analysis of nursing information systems within the context of the health care system. Emphasis is placed on the use of computers for documentation in clinical settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2282 - INFORMATICS THEORIES AND ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course covers relevant theories and models from the fields of: nursing informatics, communication, information science and computer science. The foundations of behavioral theories, group dynamics and principles of adult learning will be introduced. Students will apply these theories and models to emerging issues in informatics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2283 - SYSTEM USABILITY AND EVALUATION METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory to informatics projects.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2285 - NURSING INFORMATICS PRACTICUM 1

Minimum Credits: 3

Maximum Credits: 4

This course provides an opportunity for the learner to synthesize previous nursing informatics coursework. The student will implement the theory learned in class in a real-world setting and demonstrate beginning competency as an informatics nurse.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NURSP 2286 - NURSING INFORMATICS PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 4

The course employs an application focus in which the learner demonstrates leadership, comprehension, critical thinking, and problem-solving abilities within the context of a real-world environment. The student will assume the role of a beginning nursing informatics specialist.

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SU3 Basis

NURSP 2288 - INTRODUCTION TO DATA BASE MANAGEMENT SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with the conceptual knowledge base and practice experiences necessary to understand the design and function of a modern relational database management system. It will provide students with the historical and practical knowledge needed to design a relational database. The students will have hands on experience with databases and other software that interfaces with databases. Standards as they apply to the logical and physical design of databases will be stressed. The future of database design and remote access including mobile devices will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

NURSP 2290 - HEALTHCARE OUTCOMES

Minimum Credits: 3

Maximum Credits: 3

Knowledge and understanding of healthcare outcomes is an important competency for healthcare professionals. This course will provide students with opportunities to discuss and analyze key issues in the healthcare quality movement. Conceptual frameworks used in explaining healthcare outcomes and identification of driving forces defining the development of various outcomes will be addressed. Specific healthcare outcomes and the influence that they have on advance practice nursing and policy formulation will be examined and analyzed. Finally, the strategies and skills healthcare professionals will need to practice and manage effectively within this outcomes environment will be detailed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: School of Nursing students only.

NURSP 2291 - FINANCE AND ECONOMICS FOR HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NURSP 2292 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Graduate School of Nursing

NURSP 2293 - EDUCATION AND MENTORING IN THE CLINICAL SETTING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to develop a theoretical, practical, and evidence-based foundation for graduate students in the education of patient/families, nurse colleagues and other health care providers. Students will broaden their knowledge base in the dynamics of human behavior, values clarification, educational psychology and motivation which are fundamental to behavior change and sustaining that change (transformation). Content includes principles of andragogy and pedagogy, analysis of learning styles, replete with instruments and a contemporary model focusing upon behavior change of employees. Mentoring, the role and function of preceptors, coaching and feedback skills and application of a competency model will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Graduate School of Nursing

NURSP 2295 - CONTEMPORARY ISSUES IN NURSING AND THE CNL ROLE SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the major contemporary issues facing the nursing profession. Patient safety, process improvement, effective patient care and family partnerships, improved care coordination and implementation of evidence based practice are examples that the CNL role could impact. The course also focuses on successful implementation of the CNL role through knowledge, evidence-based practice and application of leadership principles.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

NURSP 2296 - CNL CLINICAL PRACTICUM 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to focus on the role of the clinical nurse leader in implementing quality improvement strategic imperatives with special emphasis on process improvement at the micro and macro levels, customer satisfaction, patient centered care, inter-professional healthcare teams, outcomes management and evidence-based practice. The AACN end of life program competencies provide the framework for the practicum.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NURSP 2061 or 2261 or 2461 or 2061D) and (NURSP 2090 or 2290); PROG: Graduate School of Nursing

NURSP 2297 - CNL CLINICAL PRACTICUM 2

Minimum Credits: 3

Maximum Credits: 3

This course is designed to synthesize the knowledge, skills and critical thinking developed through the core content courses of the clinical nurse leader area of concentration. Students practice the role of the CNL in a clinical setting within the healthcare milieu. The AACN and end-of-program competencies provide the framework for the practicum.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NURSP 2061 or 2261 or 2461 or 2061D) and (NURSP 2090 and 2290); CREQ: NURSP 2096 or 2296

NURSP 2310 - MASTER'S THESIS

Minimum Credits: 1

Maximum Credits: 6

Individual instruction provides guidance in the preparation of a scholarly written report which synthesizes the components of a research project; review of literature, methodology, presentation and discussion of findings, application of appropriate statistical measures, and conclusion, as well as the appropriate institutional human rights reviews.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

NURSP 2361 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

An in-depth study in a particular area of interest by arrangement with a designated faculty member.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

NURSP 2372 - USING DATA TO DRIVE DECISIONS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to apply the knowledge, skills and critical thinking developed through the core content courses of the administrative program. Using a data base of a 'virtual hospital', students are presented with common administrative problems they are likely to encounter in an administrative role. Particular emphasis is given to solving problems with the appropriate balance of cost and quality.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NURSP 2061 or 2261 or 2461 or 2061D) and (NURSP 2091 or 2291 or 2491 or 2091D)

NURSP 2373 - NURSING ADMINISTRATION RESIDENCY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to synthesize the knowledge, skills, and critical thinking developed through the core content courses of the administrative program within a practice environment. Students will be assigned a preceptor based on their identified learning needs and area of interest. It is anticipated that students will be exposed to and involved in various experiences that nursing administrators face in today's health care environment.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NURSP 2272

NURSP 2383 - METHODS IN TECHNOLOGY EVALUATION & USABILITY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide informatics students with the knowledge necessary to take an applied role in the design, implementation, and evaluation of healthcare information systems. In this course, students will apply principles of usability and evaluation theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2388 - DATABASE MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This course provides students with the conceptual knowledge base and practice experiences necessary to understand the workings of a modern relational database management system. It will provide the students with the historical and practical knowledge needed to design a relational database. The students will have hands-on experience with databases and other software that will interface with databases. Standards, such as html, SQL, ODBC and normalization will be stressed in both the theory and practical aspects of this course. The future of database design and access from non-traditional environments will be discussed. Use of databases on servers will be demonstrated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2388D - DATABASE MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

This course provides students with the conceptual knowledge base and practice experiences necessary to understand the workings of a modern relational database management system. It will provide the students with the historical and practical knowledge needed to design a relational database. The students will have hands-on experience with databases and other software that will interface with databases. Standards, such as html, SQL, ODBC and normalization will be stressed in both the theory and practical aspects of this course. The future of database design and access from non-traditional environments will be discussed. Use of databases on servers will be demonstrated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Nurse Specialty Role (DNP)

NURSP 2461 - ORGANIZTNL & MANAGEMENT THEORY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course focuses on organizational, leadership, and management theories and how they apply to health service organizations, both today and in the future. Emphasis will be placed on leading the clinical discipline of nursing based on organizational and systems thinking as well as relevant political and cultural perspectives. Quality and performance improvement strategies, as well as creating and sustaining appropriate levels of change, are explored in order to facilitate the ability to create safe and effective care delivery environments.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2475 - INTRO TO HEALTH INFORMATICS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on a conceptual foundation for understanding nursing informatics and includes analysis of various applications of information systems within the context of the health care system. This course introduces theoretical models of nursing informatics; healthcare computing; and systems design and analysis. Other topics include nursing vocabularies, nursing knowledge generation; ethical and social issues in healthcare informatics; and the impact of consumer health informatics.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

NURSP 2491 - FINC ECON HEALTH CARE LEADERS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize clinical leaders with the basic concepts of business, economics, and financial management in health care organizations. Students will learn key financial terms; the relevance of health care finances in today's environment; the ability to develop and monitor budgets for practice initiatives; and the business and financial acumen needed to evaluate and design effective practice changes. The course utilizes financial and clinical data from a virtual hospital which allows those in clinical leadership roles learn how to effectively balance the administrative and clinical needs of today's health care environment.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 2492 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of leadership theory and the development of critical leadership skills necessary for success in today's health care environment. The course is based on five essential competencies for nursing leadership: professionalism, business skills and principles, knowledge of the health care environment, communication and relationship management, and transformational leadership.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

NURSP 3092 - LEADERSHIP IN COMPLEX SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This advanced level leadership course focuses on leading complex organizations and systems to facilitate the transformation of health care. Using principles of chaos and complexity theory, students will explore methods for assessing organizations, identifying emerging issues, and facilitating organization-wide changes to meet the ongoing challenges facing health care organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 3094 - EVIDENCE-BASED MANAGEMENT AND QUALITY IMPROVEMENT

Minimum Credits: 3

Maximum Credits: 3

This course is designed to assist students pursuing leadership roles within health systems with the application of evidence-based management principles and the design of quality improvement approaches that support a culture of clinical and service excellence. During this course, students learn to find, interpret, and use scientific evidence related to managerial decisions. Using quality improvement theories, students will analyze their own organizations and identify best practices. Students will apply selected quality tools and techniques to solve actual problems in their workplaces.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 3096 - DATA ANALYTICS AND CLINICAL SYSTEMS DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course is designed to assist students pursuing leadership roles within health systems to use data analytics to assist with the design of clinical systems to improve organizational outcomes. Using a web-designed structure, students will access a Virtual Hospital and use financial and clinical data to successfully resolve issues presented in a case study format. These case studies are designed to simulate actual problems facing nursing leaders both today and in the future. Through class discussions, students will then learn multiple approaches to resolving complicated issues.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 3097 - DNP RESIDENCY: ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 10

This course is designed to provide a culminating practicum experience for the DNP leadership student. Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies related to the leadership complex issues, organizations and systems.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NURSP 3292 - LEADERSHIP IN COMPLEX SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

This advanced leadership course focuses on leading complex organizations and systems to facilitate the transformation of health care. Using principles of chaos and complexity theory, students will explore methods for assessing organizations, identifying emerging issues, and facilitating organization-wide changes to meet the ongoing challenges facing health care organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 3294 - EVIDENCE-BASED QUALITY IMPROVEMENT

Minimum Credits: 3

Maximum Credits: 3

In this doctoral level course, students will learn how to create and implement a culture of clinical and service excellence. Using quality improvement theories, they will analyze their own organization and themselves in relationship to quality improvement challenges. Evidence-based qi systems and best practices will be examined. Students will analyze information systems/technology opportunities to enhance healthcare quality. They will also have an opportunity to apply selected quality tools and techniques to solve actual problems in their workplaces.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NURSP 3296 - CLINICAL SYSTEMS ANALYSIS AND DESIGN

Minimum Credits: 3

Maximum Credits: 3

In this course students will apply knowledge they have learned throughout their program in meeting challenges experienced by nursing leaders. Using a web-designed structure, students will access a virtual hospital and use financial and clinical data to successfully resolve issues presented in a case study format. These case studies are designed to simulate actual problems facing nursing leaders both today and in the future. Through class discussions, students will then learn multiple approaches to resolving complicated issues.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

NURSP 3297 - DNP RESIDENCY: ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 10

This course is designed to provide a culminating practicum experience for the DNP leadership student. Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies related to the leadership of complex issues, organizations and systems.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

Nursing

NUR 2000 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2011 or 2211 or 2411 or 2011D

NUR 2000D - RESEARCH FOR EVIDENCE-BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2011 or 2211

NUR 2002 - RESEARCH PRACTICUM

Minimum Credits: 2

Maximum Credits: 2

This course builds on the knowledge and skills acquired in NUR 2000/2400 and NUR 2011/2411 and focuses on the continuing development of an understanding of the research process through participation in an ongoing research project and course seminars. Students identify a researcher who is conducting an ongoing project and who is willing to serve as a preceptor. Students prepare a contract defining the role of the student and how he/she will meet the course objectives while working with the designated preceptor. A written log is submitted documenting the student's learning activities for the practicum. Seminars are held on a regular basis by the primary teacher and focus on discussion of the research process, guided critiques of published research, and presentations by the students of their practicum experiences.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2007 or 2407 or 2207 or 2007D

NUR 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the lifespan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2004D - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2007 - RESEARCH FOR EVIDENCE-BASED PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

During this course students build on the knowledge they acquired in NUR 2000/NUR 2200 and NUR 2011/ NUR 2211 to develop an evidence-based protocol to address an answerable clinical question. Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2000 and 2011) or (NUR 2200 and 2211) or (NUR 2400 and 2411) or (NUR 2000D and 2011D)

NUR 2007D - RESEARCH FOR EVIDENCE-BASED PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

Academic Career: Graduate

Course Component: Lecture

NUR 2008 - ETHICS FOR ADVANCED PRACTICE NURSING

Minimum Credits: 0

Maximum Credits: 0

This course provides a web-based learning experience that includes a review of basic terms, concepts, and theories related to ethics. The student is guided through methods of ethical decision-making in clinical, research, health care organizational, local and international settings. The course provides a foundation for the study of ethics-based advanced nursing practice as integrated in specialty-specific courses.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: MUST be taken with any 2000 or 3000-level Nursing Course

NUR 2009 - LEADERSHIP AND HEALTHCARE SYSTEMS: POLICY, ORGANIZATION, AND FINANCING OF HEALTH CARE

Minimum Credits: 0

Maximum Credits: 0

The purpose of this web-enhanced course is to equip the graduate prepared nurse with beginning skills to influence health policy, to provide leadership in the healthcare delivery system, and to utilize basic principles of fiscal management in making high-quality cost-effective choices in the use of health care resources. The course consists of three units. The first unit explores the policymaking process, the role of the advanced practice nurse or advanced generalist and the effect of public policy on healthcare delivery systems. The second unit examines the organization and delivery of healthcare with an emphasis on the continuum of health care, including acute, specialized, and community based systems. Preparation for a nursing leadership role in these integrated care systems is emphasized. The third unit presents an overview of healthcare financing as it relates to the delivery of health care services. The nurse's role as the monitor of quality control, patient safety, and cost-effective care is examined in the context of clinical decision making.

Grade Component: Grad HSU Basis

Course Requirements: MUST be taken with any 2000 or 3000-level Nursing Course

NUR 2010 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2010D - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. NUR 2011 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2011D - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and nonparametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2019 - PED PHYSICAL DIAGNOSIS CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the performance of the health assessment of the child. Students practice performing a patient database, the physical exam, developmental assessment, and to applying the diagnostic process.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2025 - PHYSICAL DIAGNOSIS-AN

Minimum Credits: 1

Maximum Credits: 1

This course focuses on health assessment of the adult. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to developing the patient data base and to applying the diagnostic process.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2004 or 2204 or 2404 or 2004D; CREQ: NUR 2031 or 2231; PLAN: Nurse Anesthesia (MSN)

NUR 2031 - THE DIAGNOSTIC PHYSICAL EXAM ACROSS THE LIFE SPAN

Minimum Credits: 3

Maximum Credits: 3

This didactic course focuses on the use of the diagnostic history and physical examination to formulate a health assessment in patient populations across the lifespan. Concentration is on selected theories, principles and techniques from the physical and behavioral sciences essential to obtaining a complete health history and performing a methodical physical examination on patients across the life span.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: (NUR 2004or2204or2404or2004D); PLAN: NURSAN-MSN or NURSAN-DNP or NURSMW-DNP; SUBPLAN: MSNNDP or DNPNDP or DNPFLNP or DNPPNP or MSNCNL or DNPMSN or DNPAGAC or DNPNA or ODNPA or MSNADM or OCNL or ONAD or DNPAGNP-SP or DNPPCNP or DNPAGCN or DNPPMHN

NUR 2032 - DIFFERENTIAL DIAGNOSIS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This clinical course builds upon the diagnostic process that is introduced in NUR 2031 and expanded upon in NUR 2033. Using a problem based approach; students will use the information on the diagnostic process that is taught in NUR 2033 and apply it to the clinical setting. Differential diagnoses will be formulated based on the accurate and thorough health history and physical exam conducted on patients across the lifespan. Students will learn the process of verbally presenting patient cases, formulating differential diagnoses, formulating patient problem lists, and identifying stressors to health.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2031 or 2231; CREQ: NUR 2033 or 2433 or 2033D; PROG: Graduate School of Nursing

NUR 2032D - DIFFERENTIAL DIAGNOSIS CLINICAL

Minimum Credits: 2

Maximum Credits: 2

This clinical course builds upon the diagnostic process that is introduced in NUR 2031 and expanded upon in NUR 2033. Using a problem based approach; students will use the information on the diagnostic process that is taught in NUR 2033 and apply it to the clinical setting. Differential diagnoses will be formulated based on the accurate and thorough health history and physical exam conducted on patients across the lifespan. Students will learn the process of verbally presenting patient cases, formulating differential diagnoses, formulating patient problem lists, and identifying stressors to health.

Academic Career: Graduate

Course Component: Lecture

NUR 2033 - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN

Minimum Credits: 2

Maximum Credits: 2

This didactic course builds upon the diagnostic process introduced in NUR 2031. Using a problem-based approach to symptoms, students will be introduced to the diagnostic framework, algorithms, and terminology that will allow them to move from symptom to diagnosis. Evidence-based diagnosis will focus on the accuracy of the health history and sensitivity of the physical exam, laboratory studies and tests to "rule in" or "rule out" specific diseases. Students will learn the importance of formulating clinical impressions that lead to hypothesis testing in the care of patients across the life span.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2031 or 2231; CREQ: NUR 2032 or 2432 or 2032D; PROG: Graduate School of Nursing

NUR 2033D - DIFFERENTIAL DIAGNOSIS THEORY ACROSS THE LIFE SPAN

Minimum Credits: 2

Maximum Credits: 2

This didactic course builds upon the diagnostic process introduced in NUR 2031. Using a problem-based approach to symptoms, students will be introduced to the diagnostic framework, algorithms, and terminology that will allow them to move from symptom to diagnosis. Evidence-based diagnosis will focus on the accuracy of the health history and sensitivity of the physical exam, laboratory studies and tests to "rule in" or "rule out" specific diseases. Students will learn the importance of formulating clinical impressions that lead to hypothesis testing in the care of patients across the life span.

NUR 2034 - ADVANCED PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is a basic science course covering the principles of drug action for several important classes of drugs. A basic knowledge of principles of chemistry and biochemistry will be helpful in understanding the chemical basis of drug receptor interactions. The course begins with fundamentals of pharmacodynamics and pharmacokinetics and then covers the pharmacology of the central nervous system, respiratory system, gastrointestinal system, renal/cardiovascular system, endocrine system, immunosuppression, antibiotics and antifungals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NUR 2004 or 2204 or 2404 or 2004D)

NUR 2034D - ADVANCED PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This is a basic science course covering the principles of drug action for several important classes of drugs. A basic knowledge of principles of chemistry and biochemistry will be helpful in understanding the chemical basis of drug receptor interactions. The course

begins with fundamentals of pharmacodynamics and pharmacokinetics and then covers the pharmacology of the central nervous system, respiratory system, gastrointestinal system, renal/cardiovascular system, endocrine system, immunosuppression, antibiotics and antifungals

NUR 2043 - FOUNDATIONS OF PERSONALIZED HEALTH: TRANSLATION FROM BASIC RESEARCH TO CLINICAL PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NUR 2044 - NURSING GRADUATE ORIENTATION MODULE

Minimum Credits: 0

Maximum Credits: 0

This module provides a web-based graduate nursing orientation that is designed to provide graduate nursing students with an overview of the school of nursing and information that they will need to successfully complete their programs and achieve their career goals.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: MUST be taken with any 2000 or 3000-level Nursing Course

NUR 2072 - MEASUREMENT AND EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Theories of measurement and evaluation are analyzed as they relate to the various aspects of instruction in nursing. Class activities are designed to offer the student opportunities to study and use a variety of measurement and evaluation techniques appropriate for classroom and clinical nursing settings. Opportunities are provided for students to analyze ethical, legal and social issues involving measurement and evaluation as well as uses and limitations of evaluation instruments in a variety of nursing situations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2077 - RESEARCH COMPUTING

Minimum Credits: 3

Maximum Credits: 3

This course focuses on computing tools and techniques currently used in nursing research. Principles for organizing, collecting, storing, managing, and analyzing data will be examined. Different data entry procedures and methods, creating spreadsheets, managing databases, and statistical analysis will be introduced and practiced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2078 - CLINICAL DIAGNOSTICS

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. The course is designed for nurse practitioners who may practice where on-site laboratory and diagnostic services may not be available. Included are EKG and x-ray interpretation and performing and interpreting selected laboratory tests. Suturing, casting, splinting workshops and wound care techniques are also included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2033 or 2433 or 2033D; PROG: School of Nursing

NUR 2078D - CLINICAL DIAGNOSTICS

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. Course Requirements: PREQ: NUR 2033 or 2433 or 2033D

NUR 2079 - CHILDREN W/DISABILITIES: CLIN 1

Minimum Credits: 2

Maximum Credits: 2

Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2081 - DATA MANAGEMENT FOR RESEARCHERS

Minimum Credits: 2

Maximum Credits: 2

This course focuses on computing tools and techniques currently used in health science research. Principles for organizing, collecting, sorting, managing, and analyzing data will be presented. Software for scanning, spreadsheets, database management, and statistical analysis will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2089 - CHILDREN W/DISABILITIES: CLIN 2

Minimum Credits: 2

Maximum Credits: 2

Course provides an interdisciplinary clinical training experience to graduate students from nursing, medicine, public health, psychology, social work, education, early intervention, nutrition, physical therapy, speech/language pathology, occupational therapy, and audiology. Students have the opportunity to learn about the impact of disabilities on children, families, schools, communities, and society thru clinical activities as part of the university, community leaders for individuals with disabilities (UCLID) center's leadership training program.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2200 - RESEARCH FOR EVIDENCE-BASED PRACTICE 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: NUR 2011 or 2211 or 2411 or 2011D

NUR 2202 - HEALTH POLICY AND MANAGEMENT IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

NUR 2204 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2207 - RESEARCH FOR EVIDENCE-BASED PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

During this course students build on the knowledge they acquired in NUR 2000/NUR 2200 and NUR 2011/2211 to develop an evidence-based protocol to address an answerable clinical question. Students will learn how to write an evidence-based question, conduct an exhaustive review of published literature on a clinical topic, integrate critically appraised research studies, develop an evidence-based protocol, and propose a method to implement and evaluate the protocol. Students will also learn to critically appraise published clinical practice guidelines. Students will develop an evidence-based document that transforms empirically developed information for use in clinical practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (NUR 2000 or 2200 or 2400 or 2000D) and (NUR 2011 or 2211 or 2411 or 2011D)

NUR 2208 - ETHICS FOR ADVANCED PRACTICE NURSING

Minimum Credits: 0

Maximum Credits: 0

This course provides a web-based learning experience that includes a review of basic terms, concepts, and theories related to ethics. The student is guided through methods of ethical decision-making in clinical, research, health care organizational, local and international settings. The course provides a foundation for the study of ethics-based advanced nursing practice as integrated in specialty-specific courses.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

Course Requirements: School of Nursing students only.

NUR 2209 - LEADERSHIP AND HEALTHCARE SYSTEMS: POLICY, ORGANIZATION, AND FINANCING OF HEALTH CARE

Minimum Credits: 0

Maximum Credits: 0

The purpose of this web-enhanced course is to equip the graduate prepared nurse with beginning skills to influence health policy, to provide leadership in the healthcare delivery system, and to utilize basic principles of fiscal management in making high-quality cost-effective choices in the use of health care resources. The course consists of three units. The first unit explores the policymaking process, the role of the advanced practice nurse or advanced generalist and the effect of public policy on healthcare delivery systems. The second unit examines the organization and delivery of healthcare with an emphasis on the continuum of health care, including acute, specialized, and community based systems. Preparation for a nursing leadership role in these integrated care systems is emphasized. The third unit presents an overview of healthcare financing as it relates to the delivery of health care services. The nurse's role as the monitor of quality control, patient safety, and cost-effective care is examined in the context of clinical decision making.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad HSU Basis

Course Requirements: School of Nursing students only.

NUR 2210 - HEALTH PROMOTION AND DISEASE PREVENTION IN CULTURALLY DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

Health promotion and disease prevention are examined from theoretical foundations to clinical applications. The course focuses on individual and community health promotion assessment, screening, and interventions in diverse populations. Epidemiological principles and real clinical examples are discussed as a basis for focusing health promotion assessment and interventions. Course topics are delineated according to health people 2010 goals with a corresponding focus on factors related to health care disparities among vulnerable populations. Current research in health promotion and disease prevention is the basis for identifying appropriate interventions in diverse populations and settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2211 - APPLIED STATISTICS FOR EVIDENCE-BASED PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with the basis for understanding and interpreting commonly used statistical tests, as well as critically appraising their use in published research studies. Content will include descriptive and inferential statistics commonly reported in published research studies including both univariate and multivariate parametric and non parametric tests. The course will also cover meta-analytic techniques and students will learn to calculate effect sizes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2244 - NURSING GRADUATE ORIENTATION MODULE

Minimum Credits: 0

Maximum Credits: 0

This module provides a web-based graduate nursing orientation that is designed to provide graduate nursing students with an overview of the school of nursing and information that they will need to successfully complete their programs and achieve their career goals.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: School of Nursing students only.

NUR 2265 - FUNDAMENTALS OF DIASTER AND MASS CASUALTY CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2278 - CLINICAL DIAGNOSTICS

Minimum Credits: 3

Maximum Credits: 3

This course emphasizes performing and/or interpreting cost effective office-based laboratory and selected diagnostic tests in problem-based cases. The course is designed for nurse practitioners who may practice where on-site laboratory and diagnostic services may not be available. Included are ekg and x-ray interpretation and performing and interpreting selected laboratory tests. Suturing, casting, splinting workshops and wound care techniques are also included.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2033 or 2433 or 2033D; PROG: School of Nursing

NUR 2280 - INTRODUCTION TO GENETICS AND MOLECULAR THERAPEUTICS

Minimum Credits: 3

Maximum Credits: 3

This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current and future genetic diagnoses and therapies encountered in nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2400 - RES FOR EBP 1

Minimum Credits: 2

Maximum Credits: 2

This course examines the interaction of theory, research, and clinical expertise in the development of evidence-based nursing practice. Students develop the skills needed to identify relevant research and to critically appraise published studies to evaluate their quality and applicability to clinical practice. Students gain an understanding of the research process, the critical appraisal of published research studies that use a variety of research designs, and the role of research in evidence-based practice.

Academic Career: GRAD

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: CREQ: NUR 2011 or NUR 2211

NUR 2404 - PATHOPHYS ACROSS LIFE SPAN

Minimum Credits: 4

Maximum Credits: 4

This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.

Academic Career: GRAD

Minimum Credits: 3

Maximum Credits: 3

This is a 12-week graduate level course that will emphasize the clinical aspects of genetic disorders including diagnosis, current standard treatment, available gene testing and molecular therapy, ethical/cultural issues, support group availability and the state of

current research in the field. This will be accomplished using a problem based learning approach with case resolutions to demonstrate the clinical variation of genetic disorders, including the variety of causes, treatments, testing and ethical concerns. This course is also designed to introduce the student to resources related to teaching genetics/genomics and appropriate design of genetic/genomic research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 2690 - EXPLORING CANCER CARE

Minimum Credits: 2

Maximum Credits: 2

The overall objective of this course is to provide the student a broad introduction to cancer care and the role of the professional within this specialty. Through the use of discussion, presentations and observational experiences, students explore various aspects of cancer care. Specific cancers, therapies and care issues are explored. The health needs of the cancer patient and family are examined. Health promotion through education, screening and early detection as recommended thru the American cancer society and healthy people 2000/2010 will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Nursing students only.

NUR 2800 - COORDINATING CLINICAL TRIALS

Minimum Credits: 2

Maximum Credits: 2

.The purpose of this course is to provide individuals with a basic understanding of clinical trials research conducted in accordance with federal regulations. Aspects of clinical trials research such as regulatory requirements, informed consent, pre- and post-study activities, audit procedures, and budgetary issues will be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2000 or 2200 or 2400 or 2000D

NUR 2801 - COORDINATING CLINICAL TRIALS PRACTICUM

Minimum Credits: 1

Maximum Credits: 2

The course is designed to familiarize the student with the various roles and responsibilities of a clinical research coordinator. Each student may select one or more research areas. Preceptors in these areas will guide observations that exemplify the role of the clinical research coordinator. Each student will also participate in the review of research proposals at the university of Pittsburgh institutional review board and an observational experience at the clinical and translational research center (CTRC). The CTRC is an NIH funded center at the University of Pittsburgh used for inpatient and outpatient studies. The course includes opportunities for discussion of research protocols and review of procedures from a variety of perspectives.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: CREQ: NUR 2800

NUR 2820 - PRINCIPLES AND PRACTICE OF FORENSIC NURSING AND LEGAL NURSE CONSULTING

Minimum Credits: 3

Maximum Credits: 3

This course provides knowledge in areas of the law; the process of a lawsuit; and ethical, legal, and social issues (ELSI) related to nurse consulting and forensic nursing (FN). It is designed to provide an overview of how nursing knowledge and skills can be transferred and translated into legal nurse consulting (LNC) and forensic nursing examination (FNE) practice. Approaches and methods in legal nurse consulting and forensic nursing are discussed including but not limited to screening cases, analyzing health professional malpractice cases, performing medical records review and examination, quality assurance and risk management, preparing effective written and verbal reports and abstracts, and preparing for testifying as an expert witness. Specific activities focused on the development of investigative techniques in forensic nursing examination are included. Emphasis is placed on the application of nursing skills and knowledge to questions of law and health in criminal and civil investigations and other court related issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2821 - ADVANCED PRACTICE IN FORENSIC NURSING AND LEGAL NURSE CONSULTING

Minimum Credits: 3

Maximum Credits: 3

Advanced practice in forensic nursing (FN) and legal nurse consulting (LNC) is designed to provide the learner with an opportunity to combine nursing knowledge with forensic science and legal principles in scientific investigation, evidence collection and preservation, analysis, and legal documentation. The course explores forensic principles and roles as applied to advanced practice in forensic nursing and legal nurse consulting throughout the life span. Techniques of forensic assessment and physical examination, evidence collection, chain of custody, forensic documentation that withstands courtroom scrutiny, and challenges of the roles will be discussed. Participation in case analyses including ethical, legal, sociocultural issues (ELSI) allow for critique and development of skills relevant to the various roles in forensic nursing practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2820

NUR 2822 - SEMINAR AND PRACTICUM IN FORENSIC NURSING AND LEGAL NURSE CONSULTING

Minimum Credits: 3

Maximum Credits: 3

The seminar and practicum in forensic nursing and legal nurse consulting course provides the student with an opportunity to attend a seminar with other students who are completing their practicum experience in a variety of settings and mentored by diverse preceptors. Emphasis is placed on the application of nursing skills and knowledge to areas of practice in law (reviewing malpractice cases for and attorney, collaborating with law enforcement, health, correctional, or psychiatric or ed settings) where a forensic nurse or legal nurse consultant practices.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Nursing students only.

NUR 2823 - FORENSIC PMH NURSING AND CORRECTIONAL NURSING

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of forensic psychiatric mental health nursing and correctional nursing practice. The course focuses on the role of the forensic psychiatric mental health nurse (FPMHN) and correctional forensic nurse (CFN) in caring and providing interventions for the criminally insane, adjudicated criminal defendants unable to stand trial by reason of insanity or mental disorder/defect, or incarcerated offenders in rehabilitation or in treatment, as well as survivors and their families who are affected by interpersonal violence. Emphasis is placed on the role of the nurse when FPMHN and CN intersect with the law to affect patient outcomes. Research themes, standards of practice, evidence-based interventions and outcomes are discussed. The application of ELSI (ethical, legal and sociocultural issues) in FPMHN and CFN are presented. The role of the CFN in various correctional facilities and level of client treatment needs will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 2820

NUR 2829 - CONTEMPORARY ISSUES IN CROSS CULTURAL HEALTH CARE

Minimum Credits: 3

Maximum Credits: 3

Purpose of course is to increase awareness of how the delivery and acceptance of health care may be influenced by social, cultural, and environmental factors. It will provide an overview of how these factors influence a person's response to stressors, daily health and living needs. Goal is to help students increase their understanding of culturally congruent care by utilizing cultural concepts, theories and research. Students will analyze factors that facilitate/ hinder communication about health needs, acceptance of the health care regimen and access to health care systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

NUR 2830 - ADV LEADERSHIP CLINICAL PRACTICE

Minimum Credits: 6

Maximum Credits: 6

This course is designed for experienced nurse managers currently operating at a department director level or above. The course will include an advanced level overview of nursing leadership in the areas of finance, clinical practice, information technology, leadership development, and human resource management.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

NUR 2865 - FUNDAMENTALS OF DISASTER AND MASS CASUALTY CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2865D - FUNDAMENTALS OF DISASTER AND MASS CASUALTY CARE

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a comprehensive understanding and practical foundation for advanced nursing practice of the causes, prevention, and response to disasters as well as insight into the disaster management system nationally and locally. Didactic content focuses on information central to emergency preparedness, disaster planning and response and mass casualty care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 2890 - INTRODUCTION TO EPIDEMIOLOGY

Minimum Credits: 2

Maximum Credits: 2

Epidemiology is the study of the patterns and causes of health and disease in populations. It is the scientific basis of public health. Using a problem-based approach, this course will focus on the basic principles and methods of epidemiology as they apply to health and disease in populations, as well as the development of health policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 2000; PROG: School of Nursing

NUR 3010 - PHD DISSERTATION

Minimum Credits: 1

Maximum Credits: 9

The Ph.D. dissertation fulfills two major purposes: (1) to establish the student's competency in the conduct of scholarly research, including demonstrated ability to carry out, analyze, and report scholarly research at a high level of professional competency, and (2) to contribute to the science of nursing through the dissemination of results from the investigation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

NUR 3012 - PUBLIC POLICY IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course offers political and analytical insights into understanding U.S. health policy-making and into developing strategies that influence health policy outcomes. The course presents an analysis of the functions of the public and private sector in creating and implementing health policy across diverse patient populations. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government and various types of public and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and the impact of public policy on patient health outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3012D - PUBLIC POLICY IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

Grade Component: Grad LG/SU3 Basis

NUR 3013 - ETHICS IN HEALTHCARE

Minimum Credits: 1

Maximum Credits: 1

Philosophical and clinical foundations in ethics are analyzed and used to provide a basis for guidelines in ethical decision-making and practice. Content will include legal-ethical issues in practice, ethical implications in the role of the doctorally prepared nurse, historical and political influences on ethics in health care, diversity in race, gender, and sexual orientation, and principals of justice, autonomy, and provider-patient relations. Additionally this course describes general ethical practices and ethical principles associated with the proper conduct of research, scientific integrity and protection of human subjects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3016 - THEORETICAL FOUNDATIONS FOR RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses upon the relationship of theory to research with an emphasis on the role of theory in the design and interpretation of research. Attention is given to the evaluation of theory, the utility of theories in research, and the comparison of research strategies from various theoretical perspectives. Emphasis is placed upon midrange, multidisciplinary theories relevant to clinical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3018 - FOCUS GROUP PRACTICUM

Minimum Credits: 2

Maximum Credits: 6

This course builds upon the student's didactic knowledge gained in NUR 3055 or equivalent through the supervised experience of planning, conducting, analyzing, and preparing reports for focus groups. Emphasis is placed upon the student's mastery of the ability to formulate questions, facilitate discussion, including the management of difficult participants, note taking, and analysis of data and preparation of the report. Students will be expected to lead at least two focus groups and to serve as note taker in at least two additional groups. It is expected that a secondary component of the practicum will be to develop an understanding of cultural differences in approaches to health and health care through the conduct of focus groups among different cultural groups as well as learning from the focus group experiences of others.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3020 - QUANTITATIVE RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of quantitative research methods, including various research designs appropriate for studying health care phenomena. Some of the quantitative methods included are: descriptive, comparative, correlational, survey, methodological,

epidemiological, experimental and quasi-experimental designs, clinical trials, evaluation research, longitudinal, and secondary analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2019 or BOST 2042

NUR 3022 - QUALITATIVE RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the study of research traditions that guide the collection and analysis of qualitative data. The course provides an overview of various qualitative methods, such as phenomenology, grounded theory, case study, ethnography, hermeneutics and historical approaches. It includes a focus on the philosophical perspectives underlying each of the methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3027 - SEMINAR ON STRUCTURE OF KNOWLEDGE

Minimum Credits: 3

Maximum Credits: 3

In this course the focus is on the organization and integration of evidence from a series of scientific work in order to structure the results in such a manner that the perspectives, assumptions, and ways of knowing are evident. Structuring involves historical review, critical inquiry, and synthesis of disseminated knowledge. The process results in creating a knowledge structure that is used for the advancement of science.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: NUR 3016 and (HPS 1653 or PHIL 1610)

NUR 3030 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on competencies needed to develop and sustain a program of research. Emphasis will be placed on developing skills that support a program of research, and assist in the dissemination of knowledge, e.g., abstract/oral/poster presentations grant preparation, IRB submission, grants management. The course will include presentations by researchers conducting multidisciplinary research using a variety of funding mechanisms. Students will analyze strategies used in initiating and sustaining a research career.

Academic Career: Graduate

NUR 3036 - CAPSTONE PROJECT

Minimum Credits: 2

Maximum Credits: 2

Students will undertake a systematic investigation of a clinically based or administration based problem selected by the student and supported by faculty. Course requirements include identification of the problem to be addressed, review and critique of pertinent literature, and implementation of the project. The project will use an evidence-based practice model, and it will be systematically developed in consultation with the student's capstone committee who will evaluate each step of the process. This process can begin in NUR 2007: research for evidence-based practice 2.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

NUR 3037 - DNP PROJECT CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This practicum represents the final clinical course for the DNP degree. Here the student will experience a mentored and supervised immersion in a clinical practice where the project designed and approved in the capstone project course will be implemented and evaluated. The practice site, approved by the capstone committee must provide access to the necessary and appropriate population for project implementation, as well as support for full expression of the DNP scope of practice.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 3036 or 3236; PROG: School of Nursing (Graduate)

NUR 3040 - RESEARCH EMPHASIS : CRITICAL CARE

Minimum Credits: 3

Maximum Credits: 3

This seminar will explore current and future trends in physiologic research involving adults who are critically or acutely ill with the potential for acute decompensation. Emphasis will be placed on strategies that have the potential to restore or optimize physiologic function, evaluation of outcomes, ethical issues, and new developments in genetic research. The course will include presentations by multidisciplinary faculty who are currently conducting biobehavioral research in these areas and student presentations.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NUR 3041 - RESEARCH EMPHASIS SEMINAR - ADOLESCENT HEALTH

Minimum Credits: 3

Maximum Credits: 3

This seminar will explore the developmental trajectory of research on adolescent health and development, as well as theoretical/conceptual models applicable to such research. Key research areas will be critically evaluated. Topics will focus primarily on research related to transitions experienced during adolescence (e.g., Biological, psychological, social cognitive). An emphasis will be placed on the integration of biological and behavioral research and its inherent methodologies. Human and lower animal studies will be utilized. The course will include presentations, discussion, and critiques of selected readings. Students will provide a class presentation and paper focusing on a developmental conceptual model applicable to their selected area of research with adolescents.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NUR 3042 - RESEARCH EMPHASIS SEMINAR-CHRONIC DISORDERS

Minimum Credits: 3

Maximum Credits: 3

This seminar is designed to provide an in-depth examination of the cross-discipline literature on chronic illness. The common manifestations of chronic disorders will be addressed, including such common features as impact on cognitive function, functional ability, quality of life, adherence to treatment, depression, sleep, pain, stress, physical activity, dietary considerations, as well as other areas relevant to student interests. Discussion of these paradigms across chronic disorder populations and settings will be included, varying with the interests of the students in the course. Students will be expected to complete an in-depth critical review of the research literature on a specific feature of chronic disorders as well as a review of clinical research evidence related to a set of common features within a specific chronic disorder of interest.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

NUR 3043 - RESEARCH EMPHASIS SEMINAR: WOMEN'S HEALTH

Minimum Credits: 3

Maximum Credits: 3

This seminar is directed toward expanding the capability of scientists for knowledge building that will maximize the health of women and transform the values and structures of the health care system. This course will examine the influence of gender, ethnicity, socioeconomic class and other barriers that may affect the quality of health care for women by exploring exemplars of current research in women's health.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

NUR 3044 - RESEARCH EMPHASIS SEMINAR: CANCER SURVIVORSHIP

Minimum Credits: 3

Maximum Credits: 3

The cancer survivorship research emphasis seminar focuses on synthesis of the empirical evidence in cancer survivorship and critical evaluation of theories from multiple disciplines underlying this research. Students will examine controversies and methodological issues associated with investigations of the physical, psychological and social responses to cancer and cancer therapy and discuss innovations in cancer survivorship research. Emphasis will be placed on the examination of the influence of underrepresented populations on research in cancer survivorship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3045 - RESEARCH PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This course focuses on the student's development of selected research skills in collaboration with a mentor and his or her research team. Each student has the opportunity to design a practicum that complements prior research experience and is tailored to his or her current learning needs. The array of course activities may include but not be limited to developing a research proposal, submitting it as part of a grant application, preparing a protocol for submission to the institutional review board, assisting with recruitment or data collection activities for ongoing investigation, learning data management skills, participating in performance of laboratory procedures, participating in research team meetings, conducting literature searches, and preparing abstracts and/or manuscripts for presentation or publication.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3049 - RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This seminar focuses on assisting students to identify their area of research concentration for their doctoral studies and subsequent research trajectory. Students will learn how to: generate evidence through research; critically appraise quantitative and qualitative knowledge; and conduct a systematic literature review to address a specific research question. Students will be introduced to a variety of research programs related to nursing, including interdisciplinary and translational research programs lead by nurse researchers. Students will distinguish primary from secondary data analyses. Students will be expected to examine relevant concepts from nursing science and to identify faculty areas of expertise that can support their own research agenda.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

NUR 3050 - GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3050D - GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3051 - BUILDING A PROGRAM OF RESEARCH: PRELIMINARY STUDIES, TEAM BUILDING, AND HUMAN SUBJECT PROTECTIONS

Minimum Credits: 1

Maximum Credits: 1

This seminar addresses sequential development of a research trajectory by engaging the student in focused discussion of the rationale for and design of preliminary studies. Students explore various approaches to conducting and funding preliminary studies as well as how to foster interdisciplinary collaboration and build a research team. In addition, they consider key issues in conducting responsible science and human subject protection as well as dissemination of research findings.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3052 - MANUSCRIPT DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. Multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3052D - MANUSCRIPT DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

NUR 3054 - PRACTICUM FOR NURSING AND HEALTH SCIENCES EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course is designed to help teachers conceptualize and operationalize the elements of clinical and didactic instruction in a variety of practice settings. Students have the opportunity to enact the role of educator through a guided seminar/ preceptorship experience in an area relevant to the student's practice and educational interests. This course will provide a theoretical foundation for application and synthesis activities that characterize instruction and learning in a practice profession. Philosophical and experiential issues specific to health sciences education are emphasized in class discussion.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

NUR 3055 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS: PREPARATION, FACILITATION AND APPLICATION

Minimum Credits: 2

Maximum Credits: 2

This seven-week workshop will introduce students to the focus group as a data-gathering tool and will prepare them to use focus groups in their work. The workshop will use lectures, discussions and interactive exercises to familiarize students with all aspects of focus groups. Topics to be covered include the theoretical basis of focus groups, formulating questions, recruiting participants, facilitating the discussion, taking notes and applying the data. It is recommended that students read one text. In addition, students will complete a series of assignments designed to sharpen their listening, facilitating and analytical abilities. Critical components of the class will be observation of and hands-on experience with facilitating discussions, taking notes and reporting. Ability to role play highly desirable.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

NUR 3056 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2

Maximum Credits: 2

Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3058 - INTERNATIONAL RESEARCH AND COLLABORATION

Minimum Credits: 2

Maximum Credits: 2

This interdisciplinary elective course prepares graduate students for professional conduct and research collaboration in a global context. Topics include globalization, building collaborative international relationships, international research ethics, and sources of funding for international research. Students will become familiar with the status of research in their professions world-wide, evaluate research topics of international interest, evaluate requirements for adaptations in research methods, and collaborate with international colleagues or with a mentors/researchers engaged in international research to produce a hypothetical feasible research proposal. Synthesis of the knowledge gained in this course will be evidenced by 1) weekly maintenance of a diary or on-line blog demonstrating growth in international knowledge and cross-culture communication skills, and 2) development of an abbreviated proposal for international research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3060 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

This course focuses on the student's development of unique knowledge and skills in collaboration with a faculty mentor. Each student has the opportunity to design an independent study that complements prior knowledge and is tailored to the student's current learning needs. Content of the independent study will reflect an in-depth focus in a particular area of study as arranged between the student and designated faculty member. Content to be covered may include, but is not limited to, theoretical approaches from the biomedical and psychosocial sciences, research designs and methods, data analytic techniques, and advanced clinical practice issues.

Academic Career: Graduate

Grade Component: Grad SN Basis

NUR 3099 - THE SCIENCE OF HEALTH CARE DELIVERY

Minimum Credits: 2

Maximum Credits: 2

This course is designed to develop a theoretical, practical, and evidence-based foundation for the delivery of safe, effective, evidence-based health care. Participants in this course will develop the knowledge base and critical thinking skills central to identifying and solving problems in the planning, implementation and evaluation of health care across the continuum of care delivery systems and across professions. The two overarching goals of the course are to a) develop a better understanding of how the healthcare delivery system works and fails to work, and b) develop a foundation for organizational and systems leadership for care reform, quality improvement and systems thinking in the delivery of safe, effective, evidence-based care using interprofessional approaches.

NUR 3110 - RESEARCH INSTRUMENTATION

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the general properties of skillful measurement integral to the research process. The domain sampling model is presented as the major theory of measurement error with the parallel test model presented as a special case of domain sampling model. The construct, criterion and content validity of psychosocial instruments are explored and methods for evaluating each of these relative to specific instruments are presented. The theory of reliability is approached from the domain sampling model and factors are identified that reduce the reliability of an instrument. Methods to estimate reliability such as internal consistency, alternative forms and long-range stability are included. The basic concepts of biomedical instrumentation and the static characteristics that describe instruments performance (e.g., Accuracy, precision, resolution, reproducibility, zero drift, sensitivity drift, and linearity) of physiological instruments are reviewed. Also, a basic discussion will be held on laboratory standardization's (e.g., CDC) and

reliability of laboratory assays (use of split samples, coefficient of variation measures). A variety of scaling methodologies will be discussed as well as the principals involved in the design and formatting of questionnaires.

Course Requirements: PREQ: PSYED 2019 or BIOST 2042; PROG: School of Nursing

NUR 3115 - ADVANCED QUANTITATIVE METHODS IN HEALTH SCIENCE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of advanced statistical techniques in current health science research. Aspects of methodology relevant to statistical analysis such as design, statistical power, sample size, and statistical significance will be conceptually integrated with data analysis. Statistical strategies popular in a variety of areas of research, such as epidemiology, nursing and medicine, will be considered for their utility in answering research questions and/or testing hypotheses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3212 - PUBLIC POLICY IN HEALTH CARE

Minimum Credits: 2

Maximum Credits: 2

This course offers political and analytical insights into understanding U.S. Health policy-making and into developing strategies that influence health policy outcomes. The course presents an analysis of the functions of the public and private sector in creating and implementing health policy across diverse patient populations. The role of political and social philosophy in defining nursing and health services is examined. The course includes consideration of areas in which policy made by multiple branches of government and various types of public and private organizations significantly affects nursing as a profession and its ability to deliver care; regulation of professional practice; and the impact of public policy on patient health outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3213 - ETHICS IN HEALTHCARE

Minimum Credits: 1

Maximum Credits: 1

Philosophical and clinical foundations in ethics are analyzed and used to provide a basis for guidelines in ethical decision-making and practice. Content will include legal-ethical issues in practice, ethical implications in the role of the doctorally prepared nurse, historical and political influences on ethics in health care, diversity in race, gender, and sexual orientation, and principals of justice, autonomy, and provider-patient relations. Additionally this course describes general ethical practices and ethical principles associated with the proper conduct of research, scientific integrity and protection of human subjects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3236 - CAPSTONE PROJECT

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide a culminating practicum experience for the DNP leadership student. Students will focus on promoting evidence based practice as interdisciplinary team members and providing high quality, cost effective care in a dynamic health care environment. Emphasis is placed on further refinement of competencies related to the leadership of complex issues, organizations and systems.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

NUR 3237 - CAPSTONE CLINICAL

Minimum Credits: 1

Maximum Credits: 1

This practicum represents the final clinical course for the DNP degree. Here the student will experience a mentored and supervised immersion in clinical or administrative practice where the project designed and approved in the capstone project course will be implemented and evaluated. The practice site, approved by the capstone committee must provide access to the necessary and appropriate population for project implementation, as well as support for full expression of the DNP scope of practice.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 3036 or NUR 3236

NUR 3250 - GRANT WRITING

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the organization, development and preparation of a grant application. Course content is based on the general issues encountered during the development of grant applications. Students are expected to prepare components of their grant application under the direction of their mentor using the guidelines for an appropriate funding organization. Ph.D. students are expected to support some aspect of their dissertation research.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

NUR 3252 - MANUSCRIPT DEVELOPMENT

Minimum Credits: 1

Maximum Credits: 1

This course focuses on the process of preparing a manuscript for possible publication. Attention is directed toward selecting an appropriate journal, the organization of the paper, relevant legal and ethical issues, single vs. Multiple authorship, refining one's writing skills, and the development and preparation of a manuscript for submission to a peer-reviewed journal.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

NUR 3280 - INTRODUCTION TO GENETICS AND MOLECULAR THERAPEUTICS

Minimum Credits: 3

Maximum Credits: 3

This introductory course focuses on the fundamentals of human and molecular genetics. It is designed to give students a basic understanding of genetic concepts and molecular techniques so that this knowledge can be applied to current and future genetic diagnoses and therapies encountered in nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

NUR 3285 - PHILOSOPHICAL UNDERPINNINGS OF NURSING RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the application of advanced quantitative statistical methods used in research. Aspects of methodology relevant to statistical analysis such as design, sampling, statistical power, sample size, and significance will be conceptually integrated with data analysis. Statistical strategies popular in other research areas will be explored for their utility in answering research questions and/or testing hypotheses in nursing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nursing (PhD)

NUR 3286 - THEORETICAL FOUNDATIONS OF NURSING

Minimum Credits: 3

Maximum Credits: 3

This course focuses upon the relationship of theory to research with an emphasis on the role of theory in the design and interpretation of research. The relationship between the development of science and theory is stressed. Attention is given to the evaluation of theory, the utility of theories in research, and the comparison of research strategies from various theoretical perspectives and the contribution of effect size. Emphasis is placed upon midrange, multidisciplinary theories relevant to clinical research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: NUR 3285 PLAN: Nursing (PhD)

NUR 3287 - RESEARCH DESIGN & METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is a core component and foundational to the dissertation process and the program of research. The course provides a compendium of qualitative and quantitative research methods and study designs appropriate for studying health care phenomena. The emphasis of the course is on the interrelationship between clinical problems, literature reviews, research questions, study designs, and methods of inquiry and analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: LEVEL: Nursing PhD; PREQ: NUR 3285 and BIOST 2041 or PSYED 2018; CREQ: NUR 3286 and BIOST 2042 or PSYED 2019

NUR 3288 - RESEARCH MEASUREMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on quantitative approaches to analyze reliability, validity, and sensitivity of measurements in health research. Classic and emerging measurement theories will be discussed. Principles of psychometrics, including reliability and validity, and latent variable-based measurement models such as exploratory factor analysis will be discussed and applied by students to evaluate the reliability and validity of research instruments. Emphasis is placed on understanding the interrelationship of study aims, design and methods in outcomes measurement.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: LEVEL: Nursing PhD; PREQ: (BIOST 2041 or PSYED 2018) and (BIOST 2042 or PSYED 2019) and NUR 3285 and 3286; CREQ: NUR 3289

NUR 3289 - INTERVENTION DEVELOPMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on an analysis of the relationship between intervention theory and the development of intervention protocols. In-depth exploration of selected programs of research will be used to generate and evaluate theories and intervention protocols. Methodological and practical issues in the design and implementation of theory-based intervention studies will be examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: (BIOST 2041 or PSYED 2018) and (BIOST 2042 or PSYED 2019) and NUR 3285 and NUR 3286 and NUR 3287 and NUR 3285; PLAN: Nursing (PhD)

NUR 3291 - RESPONSIBILITIES AND ACTIVITIES OF SCIENTISTS 1

Minimum Credits: 2

Maximum Credits: 2

This seminar addresses the moral and ethical agency of a nursing scientist in the health professions, developing knowledge and skills to act ethically. First the course will cover multiple challenges of conducting research including ethical issues, health policy, scientific freedom and social responsibility, collaboration and negotiation, and interdisciplinary responsibilities. Next, key issues in conducting responsible science and human subject protection will be covered, including the conduct of culturally competent scholarship. Lastly issues in nursing leadership including valuing and upholding the caring nature of professional practice and advocacy for, and valuing the needs and concerns of patients/families will be addressed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Nursing (PhD)

Obstetrics and Gynecology

OBGYN 5341 - OBSTETRICS AND GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

This is a four week clerkship at Magee-Womens Hospital. The clerkship is divided among obstetrics, gynecology, and outpatient services. The daily schedule includes teaching rounds, small group tutorials, and lectures, in addition to patient responsibilities. Students are expected to take call and remain in the hospital overnight approximately twice a week during their rotation on obstetrics. At the end of the clerkship, an oral and/or written examination will be given.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5345 - CLERKSHIP REPEAT COURSE

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

OBGYN 5387 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of obstetrics, gynecology and reproductive sciences will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School

Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OBGYN 5420 - OBSTETRICAL SUBINTERNSHIP

Minimum Credits: 0
Maximum Credits: 0

This elective is offered for a four-week period of time. The student will function similar to an intern on the obstetrical service. Examine patients on admission to the labor suite, assess these patients during labor, assist at their delivery and follow them during their postpartum hospitalization.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5430 - GYNECOLOGICAL SUBINTERNSHIP

Minimum Credits: 0
Maximum Credits: 0

The student will function similar to an intern on the gynecologic service during this four-week elective. Time will be spent on the ward and/or private gynecology services. The subintern will work up patients following admissions, examine these patients and establish a differential diagnosis. Student will assist at the surgical procedures of these patients and their postoperative care.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5432 - MINIMALLY INVASIVE GYNECOLOGIC SURGERY

Minimum Credits: 0
Maximum Credits: 0

This elective will teach minimally invasive gynecologic surgery as well as the principles of evaluation and management of women with pelvic pain. Students will learn to take pertinent history and perform the (pelvic pain specific) physical exams on women with endometriosis as well as women with other sources of chronic pelvic pain. There will be exposure to all disciplines of minimally invasive gynecologic surgery including laparoscopic deep excision of endometriosis, presacral neurectomy, reconstruction for pelvic organ prolapse, hysterectomy, myomectomy, and adenexal surgery. Students will participate in the pre-op evaluations with the faculty and will have the opportunity to scrub in on cases. The students will renew their understanding and appreciation of pelvic anatomy (retroperitoneal and pelvic support anatomy) from the laparoscopic perspective.

Academic Career: Medical School
Course Component: Clinical
Grade Component: Grad LG/SU5

OBGYN 5435 - OBSTETRIC/GYNECOLOGY ELECTIVE

Minimum Credits: 0
Maximum Credits: 0

This clinical elective can be customized to meet individual needs. Students may elect to concentrate on maternal-fetal medicine, genetics, or gyn-one. The rotation will include both in-patient and ambulatory experience. Students must make advance arrangements and a specific descriptive course title may be assigned for recording on the official transcript.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5440 - OBSTETRICAL AND AMBULATORY CARE

Minimum Credits: 0
Maximum Credits: 0

This four-week elective offers hands-on experience in the delivery room and clinic at mercy hospital. The ob service consists mostly of 600 clinic deliveries per year with 24 hour, in-house coverage by attending staff. The clinic has a supervisory obstetrician/gynecologist full-time in attendance.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5445 - OUTPATIENT GYNECOLOGY

Minimum Credits: 0
Maximum Credits: 0

The student will function similarly to an intern. Time will be spent at office sites as well as hospital affiliates. The sub intern will obtain histories and physicals, establish a differential diagnosis and assist in developing a plan of care with an additional focus on the

cultural and socioeconomic challenges of a diverse population. The student will assist in minor and major surgical procedures as well as post-operative care. S/he will assist in the management of obstetrical patients during the antepartum, intrapartum and postpartum periods. The student will also have the opportunity to interact with patients who experience termination procedures. The sub internship will be offered for a four-week period with one weekend call required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

OBGYN 5450 - REPRODUCTIVE ENDOCRINOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective offers a clinical experience in two areas: the evaluation of couples with infertility and the diagnostic evaluation and management of endocrine dysfunctions involving the hypothalamic-pituitary-ovarian axis. The majority of work will be evaluating and managing these problems in outpatient areas. Inpatient gynecological procedures including laparoscopy, hysteroscopy, microsurgical techniques for resection of endometriosis and tuboplastic procedures for restoration of fertility will be observed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5460 - MATERNAL AND FETAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

In this four-week elective students will follow high-risk obstetrical patients as outpatients in the perinatal and medical clinics and as inpatients in the labor suite. Students will become familiar with the principles of biophysical and biochemical monitoring of the fetus during labor as well as the techniques of antepartum fetal evaluation. These include amniocentesis, sonography, and antepartum fetal heart rate monitoring. Management of pregnancies with underlying medical problems of the mother will be an integral part of the elective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5470 - GYNECOLOGIC ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students will participate as a member of a team providing care to patients with gynecologic malignancies during this four-week elective at Magee-Womens Hospital. Student will learn the staging classifications, the appropriate workup and be involved in the treatment and follow up of patients. The individual will scrub in the operating room and be involved in the administration of chemotherapy and radiation therapy for gynecologic malignancies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5480 - UROGYNECOLOGY SUBINTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Elective with intensive exposure to women with urinary incontinence and other pelvic floor defects. Student will see patients in an office setting learning to obtain an appropriate history, neurologic and pelvic examination. Student will also assist in the surgical procedures and post-operative care of these patients. Additional exposure is planned for cystometric evaluations, pharmacologic intervention, pelvic floor muscle rehabilitation, behavioral and biofeedback intervention protocols.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5487 - FAMILY PLANNING

Minimum Credits: 0

Maximum Credits: 0

The focus of this elective is to learn more about the gynecologic subspecialty of family planning. During the four weeks of the elective, the student will be present in several clinical settings to include: planned parenthood of Western Pennsylvania; family planning clinics in the Magee outpatient clinic - one specializing more in IUDs, implants, and sterilization pre-operative evaluations and the other specializing more in pre-operative preparation and evaluation for dilation and evacuation procedures); time will be spent with faculty in the private office seeing general GYN patients, family planning consults, and abortion patients; Magee or, both sterilization surgery and dilation and evacuation procedures. The student will decide on a topic from the current medical literature and

present a full review to the family planning faculty, fellows and research staff.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5488 - REPRODUCTIVE GENETICS

Minimum Credits: 0

Maximum Credits: 0

Clinical reproductive genetics with the opportunity to tailor the experience to the student's interest. Core experience in genetic counseling will include advanced maternal age (AMA), abnormal family history, prenatal screenings, teratogen exposure, prenatally detected anomalies, adult genetics clinic and cancer counseling. The student will observe invasive diagnostic procedures (CVS and amniocentesis) as well as in the cytogenetics lab. The student will attend weekly fetal diagnosis & treatment center meetings and weekly clinical genetics meetings. The student will observe how genetics impacts personalized medicine. There may be opportunity to attend adult genetics clinic and participate in research.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5490 - WOMEN'S HEALTH

Minimum Credits: 0

Maximum Credits: 0

This elective is an interdisciplinary offering by the department of obstetrics, gynecology and reproductive sciences and the department of medicine. The goal is to introduce students to the breadth and complexity of gender-specific health care. A variety of ambulatory clinical sites will be utilized to provide experience in women's health care, including, but not limited to; health maintenance and preventive care; family planning; genetic counseling; menopause and hormone replacement; osteoporosis; coronary artery disease; depression; violence against women.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5495 - MIDLIFE HEALTH

Minimum Credits: 0

Maximum Credits: 0

Course objectives: extract a targeted history from patients presenting to the midlife health center; perform a physical exam focused on perimenopausal and menopausal issues; be familiar with the gynecologic and medical needs of midlife female patients; develop a differential diagnosis for common conditions in perimenopause and menopause, such as abnormal vaginal bleeding; be familiar with the indications and contraindications with commonly used therapies for menopausal issues; competently assist on various surgical procedures; write postoperative orders on patients; be familiar with the work-up and management of postoperative complications. Students planning to practice primary care medicine, gynecology, urology, or geriatrics will benefit from this intensive exposure to the health needs of midlife-aged women. He/she will see patients in an office setting, learning to obtain an appropriate history and physical exam focused on menopausal issues. He/she will also be exposed to procedures such as endometrial biopsies and vulvar biopsies. He/she will be exposed to standard pharmacologic interventions, as well as integrative approaches such as acupuncture. In addition, the student may assist in the surgical procedures and postoperative care of these patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OBGYN 5500 - INTERNATIONAL MEDICINE IN OBSTETRICS AND GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

The student will function similarly to an intern with faculty mentorship by designated OB/GYN faculty and staff. The student will spend this four-week elective at an international hospital and rural clinical affiliation. The sub intern will obtain histories and physicals, establish a differential diagnosis and assist in developing a plan of care with an additional focus on the cultural and socioeconomic challenges and resources of a developing country. The student will assist in minor and major surgical procedures as well as pre and post-operative care. He/she will assist in the management of obstetrical patients during antepartum, intrapartum and post partum periods. Course objectives: understand the multifaceted challenges in accessing and delivering care in developing countries; recognize the disparity gap in healthcare as it relates to the personnel, medical and surgical resources; evaluate patients with OB/GYN problems endemic to the international site; manage pregnant patients with both normal and high acuity medical and obstetrical issues; evaluate the course of normal labor and delivery and the post partum period; assist on OB/GYN procedures and recognize common pathology; assist in the planning and implementation of family planning programs and post abortive care.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5580 - SEXUALLY TRANSMITTED DISEASES

Minimum Credits: 0
Maximum Credits: 0

This rotation, located in the clinics of the Allegheny county health department, will provide an opportunity to gain practical experience under the direct guidance and supervision of the attending physician in the diagnosis and treatment of commonly seen sexually transmissible diseases including gonorrhea and syphilis. Opportunities will be available for obtaining skills in the commonly performed laboratory procedures such as gram staining and culturing and in performing darkfield examinations. Limited experience in contact investigation will be gained.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0
Maximum Credits: 0

An individualized course of study may be arranged with the department of obstetrics, gynecology and reproductive sciences to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5725 - INFECTIOUS DISEASE-OB/GYN (ILS)

Minimum Credits: 0
Maximum Credits: 0

This four week selective emphasizes the many unique features of infections in obstetrics, gynecology, and reproductive medicine. Students will learn the pathogenesis of organisms relevant to the female reproductive tract, and about transmission of organisms to the fetus. Students will evaluate pregnant and non pregnant patients with reproductive tract infections and discuss clinical and management issues daily with faculty. Students will also be exposed to contemporary laboratory techniques of identifying pathogenic organisms.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5885 - OB AND GYN RESEARCH

Minimum Credits: 0
Maximum Credits: 0

The research elective at Magee-Womens Hospital will involve the student in basic or clinical research projects under the supervision of a full-time faculty member. The student will participate in the design and conduct of the study as well as in the analysis of the data obtained during the study. The student will then be expected to participate writing a report of the study which should be of a quality suitable for publication in a refereed journal. This elective is offered in four-week time blocks.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

OBGYN 5886 - INDIVIDUAL STUDY

Minimum Credits: 0
Maximum Credits: 0

The department of obstetrics, gynecology and reproductive sciences will arrange an individual clinical experience to fit the student's needs.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

OBGYN 5899 - INDEPENDENT STUDY OBSTETRICS/GYNECOLOGY

Minimum Credits: 0
Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under

the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OBGYN 5900 - EXTRAMURAL OBSTETRICS AND/OR GYNECOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in obstetrics and/or gynecology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Occupational Therapy

OT 2100 - FDS OCCUPATIONAL SCIENCE & OT

Minimum Credits: 3

Maximum Credits: 3

Examines the history, philosophy, and science of the profession of occupational therapy. The focus is on the meaning of occupation and its role in health, wellness, and participation. Occupational science and occupational performance theories of practice are introduced. Examines how occupational therapists develop and manage their therapeutic relationships with clients using a model of intentional relationships, focusing on the use of narrative reasoning, emotional intelligence and empathy, and a client-centered collaborative approach. Formal interview techniques and casual conversation approaches used to obtain information are introduced and practiced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Occupational Therapy (MOT)

OT 2101 - HUMAN MOVEMENT ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Examines human performance in-depth using the approaches of occupational analysis and activity analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022; PLAN: Occupational Therapy (MOT)

OT 2102 - GROUP THEORY AND PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Group process as a tool to assess and facilitate societal participation is studied. Emphasis is placed on enhancing communication and leadership skills, and clinical reasoning abilities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2102; PLAN: Occupational Therapy (MOT)

OT 2103 - OCCUPATION ACROSS THE LIFESPAN

Minimum Credits: 3

Maximum Credits: 3

Human development from conception through senescence and death is studied, with the emphasis on adulthood and late life maturity. The focus is on age-associated changes in sensory, motor, cognitive, emotional, and psychosocial functions and their implications for self-care, play-leisure, school and work occupations in the context of occupational therapy services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2104 - CLINICAL PSYCHIATRY

Minimum Credits: 1

Maximum Credits: 1

Psychiatric diagnoses that are highly prevalent in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, psychiatric management, morbidity, and prognosis are reviewed. The influence of psychiatric pathology on daily living skills and routines, and societal participation is examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2105 - CLINICAL MEDICINE

Minimum Credits: 2

Maximum Credits: 2

General medical diagnoses that are leading causes of disability in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed. Influence of medical pathology on activities of daily living and routines, and societal participation is examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100 and HRS 2022; PLAN: Occupational Therapy (MOT)

OT 2106 - CLINICAL RESEARCH FOR OT

Minimum Credits: 2

Maximum Credits: 2

Occupational therapy and rehabilitation research and its application to practice, management, and education is explored. Scientific method, hierarchies of evidence, levels of measurement, and interpretation of findings are examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2107 - PSYCHOSOCIAL / COGNITIVE THEORY AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 4

Maximum Credits: 4

The occupational therapy process for clients with psychosocial and/or cognitive dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society. Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with psychosocial and/or cognitive dysfunction and the skills needed for the analysis and adaptation of occupational performance deficits.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2102 and 2104; PLAN: Occupational Therapy (MOT)

OT 2108 - CLIN NEUROLOGY & ORTHOPEDICS

Minimum Credits: 3

Maximum Credits: 3

Neurologic and orthopedic diagnoses that are leading causes of disability in children, adolescents, adults, and older adults are defined and described. Etiology, signs and symptoms, clinical course, medical management, morbidity and prognosis are reviewed. This course provides the background for understanding the influence of neurologic and orthopedic pathology on activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022 and OT 2100; PLAN: Occupational Therapy (MOT)

OT 2109 - NEUROBEHAVIORAL SCIENCE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Concepts of normal sensorimotor integration, including the influence of neural centers on postural control and functional movement are considered and the clinical manifestations of dysfunction of major neural elements are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2105; PLAN: Occupational Therapy (MOT)

OT 2110 - BIOMECHANICAL THEORY & PRACT 1

Minimum Credits: 2

Maximum Credits: 2

OT process for clients with physical dysfunctions involving biomechanical impairments is introduced. Emphasis is on clinical evaluations and their function in diagnostic reasoning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2101 and 2105 and 2113; PLAN: Occupational Therapy (MOT)

OT 2111 - OCCUPATIONAL THEORY AND THE HEALTH CARE SYSTEM/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Examines health care trends, reimbursement regulations, legislative policies, and current issues affecting occupational therapy. Strategies for maintaining continued competence and supervisory roles are interpreted and applied to practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2100; PLAN: Occupational Therapy (MOT)

OT 2112 - NEUROREHABILITATION THEORY & AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with neurological and neurobehavioral dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2109; PLAN: Occupational Therapy (MOT)

OT 2113 - REHABILITATION THEORY AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

The interface between functional impairment, activity, and societal participation is studied in-depth. Emphasis is on adaptation to compensate for dysfunction in performance of occupations for life activities (self-care, home and community management, rest/sleep, education/work, and play/leisure, and social participation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: HRS 2022 and OT 2100; PLAN: Occupational Therapy (MOT)

OT 2114 - BIOMECHANICAL THEORY AND PRACTICE/MOT

Minimum Credits: 4

Maximum Credits: 4

The occupational therapy process for clients with physical dysfunction involving biomechanical impairments is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society. Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with neurological/neurobehavioral and biomechanical dysfunction. Addresses professional issues and the professional development of the occupational therapist. Issues explored include the application of professional and clinical reasoning in traditional and emerging practice settings, collaborative practice, ethics, licensure,

certification, and professional sustainability.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2110; PLAN: Occupational Therapy (MOT)

OT 2115 - DEVELOPMENTAL THEORY AND PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 4

Maximum Credits: 4

The occupational therapy process for children and youth is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society. Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of children and youth, and older adults.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2103 and 2109; PLAN: Occupational Therapy (MOT)

OT 2116 - INTEGRATIVE CAPSTONE SEMINAR

Minimum Credits: 3

Maximum Credits: 3

Course addresses the role of the OT as a contributor to the profession. Problem-focused and solution-oriented students pose, and subsequently solve questions related to clinical issues. Solutions are evidenced in quantitative or qualitative learning products.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2106; PLAN: Occupational Therapy (MOT)

OT 2117 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE/MASTER OF OCCUPATIONAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Examines the role of the occupational therapist as a manager of occupational therapy services. Focuses on the application of principles and practices of administration and supervision in diverse practice environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2111; PLAN: Occupational Therapy (MOT)

OT 2118 - SP TOPICS OT THEORY & PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The role of occupational therapy in productive aging and the promotion of successful aging in older adults is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2110; PLAN: Occupational Therapy (MOT)

OT 2119 - OT FIELDWORK EDUCATION A (FW2)

Minimum Credits: 1

Maximum Credits: 10

Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2114 and 2115 and 2118; PLAN: Master of Occupational Therapy

OT 2120 - OT FIELDWORK EDUCATION B (FW2)

Minimum Credits: 1

Maximum Credits: 10

Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2114 and 2115 and 2118; PLAN: Occupational Therapy (MOT)

OT 2121 - OT FIELDWORK EDUCATION C

Minimum Credits: 1

Maximum Credits: 6

Course offers an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop specialized skills.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Occupational Therapy (MOT)

OT 2199 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

A topic of interest to the student is examined in-depth under the guidance of a faculty mentor. It is the student's responsibility to contract with a faculty member for this tutorial.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SU3 Basis

OT 2200 - FOUNDATIONS OF OCCUPATION

Minimum Credits: 2

Maximum Credits: 2

Examines the history, philosophy, and science of the profession of occupational therapy. The focus is on the meaning of occupation and its role in health, wellness, and participation. Occupational science and occupational performance theories of practice are introduced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2201 - BODY FUNCTIONS AND STRUCTURES: ANATOMY

Minimum Credits: 3

Maximum Credits: 3

Emphasizes the understanding and application of knowledge of human anatomy in diagnostics of clinical conditions commonly encountered by an occupational therapist. The practical component includes the use of prosected cadavers, skeletal models, and palpation of surface anatomical features in live models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2202 - THERAPEUTIC APPROACHES 1

Minimum Credits: 2

Maximum Credits: 2

Examines how occupational therapists develop and manage their therapeutic relationships with clients using a model of intentional relationships, focusing on the use of narrative reasoning, emotional intelligence and empathy, and a client-centered collaborative approach. Formal interview techniques and casual conversation approaches used to obtain information are introduced and practiced.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2203 - CLINICAL SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Focuses on diversity, inclusion, self-awareness, and self-understanding. Issues explored include the roles and functions of occupational therapy practitioners; participation in professional organizations; and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Doctor of Occupational Therapy (OTD)

OT 2204 - HUMAN PERFORMANCE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Examines human performance in-depth using the approaches of occupational analysis and activity analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2200 and 2201; PLAN: Doctor of Occupational Therapy (OTD)

OT 2205 - NEUROBEHAVIORAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Examines neuroscientific concepts underlying normal somatosensory, special sensory, motor, cognition, and emotion functional systems, and explores the manifestation of dysfunction of major neural elements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2201; PLAN: Doctor of Occupational Therapy (OTD)

OT 2206 - CLINICAL CONDITIONS 1

Minimum Credits: 3

Maximum Credits: 3

Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2201; PLAN: Doctor of Occupational Therapy (OTD)

OT 2207 - PRINCIPLES OF ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

Examines the principles associated with the evaluation process, including the selection and administration of assessment tools, and the scoring and interpretation of assessment data. Psychometrics are explored and data collection and analysis is practiced using a range of assessment methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2202; PLAN: Doctor of Occupational Therapy (OTD)

OT 2208 - CRITICAL APPRAISAL OF EVIDENCE

Minimum Credits: 2

Maximum Credits: 2

Occupational therapy and rehabilitation research and its application to practice, management, and education is explored. Scientific method, hierarchies of evidence, levels of measurement, and interpretation of findings are examined.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2200; PLAN: Doctor of Occupational Therapy (OTD)

OT 2209 - CLINICAL SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Introduces a model for professional and clinical reasoning to plan, direct, perform, and reflect on occupational therapy services. Explores the various audiences and types of documentation used by occupational therapy practitioners.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2203; PLAN: Doctor of Occupational Therapy (OTD)

OT 2210 - PSYCHOSOCIAL/COGNITIVE THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with psychosocial and/or cognitive dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2207; PLAN: Doctor of Occupational Therapy (OTD)

OT 2211 - ACTIVITY/CONTEXT ADAPTATION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The interface between functional impairment, activity, and societal participation is studied in-depth. Emphasis is on adaptation to compensate for dysfunction in performance of occupations for life activities (self-care, home and community management, rest/sleep, education/work, and play/leisure, and social participation).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2207; PLAN: Doctor of Occupational Therapy (OTD)

OT 2212 - CLINICAL CONDITIONS 2

Minimum Credits: 3

Maximum Credits: 3

Defines and describes neuromuscular, orthopedic, psychiatric, and clinical medicine diagnoses that are leading causes of disability in children, adolescents, adults, and older adults. Etiology, signs and symptoms, clinical course, medical management, morbidity, and prognosis are reviewed, and the influence of pathology on occupational performance is examined. Builds on content in Clinical Conditions 1.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2206; PLAN: Doctor of Occupational Therapy (OTD)

OT 2213 - OCCUPATIONAL THERAPY AND THE HEALTH SYSTEM

Minimum Credits: 2

Maximum Credits: 2

Examines health care trends, reimbursement regulations, legislative policies, and current issues affecting occupational therapy. Strategies for maintaining continued competence and supervisory roles are interpreted and applied to practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2209; PLAN: Doctor of Occupational Therapy (OTD)

OT 2214 - THERAPEUTIC APPROACHES 2

Minimum Credits: 2

Maximum Credits: 2

Examines the dynamic process used by occupational therapists to facilitate a client's or group of clients' engagement in occupations to promote health and participation. Focuses on education and training, self-advocacy, and health literacy for clients, those involved in the care of the clients, and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2202; PLAN: Doctor of Occupational Therapy (OTD)

OT 2215 - FIELDWORK EDUCATION A

Minimum Credits: 1

Maximum Credits: 1

Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with psychosocial and/or cognitive dysfunction and the skills needed for the analysis and adaptation of occupational performance deficits.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2207; CREQ: OT 2210 and 2211; PLAN: Doctor of Occupational Therapy (OTD)

OT 2216 - CLINICAL SEMINAR 3

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Focuses on applying the model for professional and clinical reasoning to practice. Issues explored include traditional and emerging practice settings, collaborative practice, ethics, and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2209; PLAN: Doctor of Occupational Therapy (OTD)

OT 2217 - NEUROREHABILITATION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with neurological and neurobehavioral dysfunction is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2210; PLAN: Doctor of Occupational Therapy (OTD)

OT 2218 - BIOMECHANICAL THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for clients with physical dysfunction involving biomechanical impairments is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2211; PLAN: Doctor of Occupational Therapy (OTD)

OT 2219 - FIELDWORK EDUCATION B

Minimum Credits: 1

Maximum Credits: 1

Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of clients with neurological/neurobehavioral and biomechanical dysfunction.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2215; PREQ: OT 2217 and 2218; PLAN: Doctor of Occupational Therapy (OTD)

OT 2220 - CLINICAL SEMINAR 4

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Issues explored include the application of professional and clinical reasoning in traditional and emerging practice settings, collaborative practice, ethics, licensure,

certification, and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2216; PLAN: Doctor of Occupational Therapy (OTD)

OT 2221 - DEVELOPMENTAL THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The occupational therapy process for children and youth is studied in-depth. Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2217; PLAN: Doctor of Occupational Therapy (OTD)

OT 2222 - PRODUCTIVE AGING THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The role of occupational therapy in productive aging and the promotion of successful aging in older adults is studied in-depth.

Theories, principles, assessments, and interventions focus on performance of activities and routines of daily living and participation in society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2218; PLAN: Doctor of Occupational Therapy (OTD)

OT 2224 - MANAGEMENT OF OCCUPATIONAL THERAPY PRACTICE

Minimum Credits: 2

Maximum Credits: 2

Examines the role of the occupational therapist as a manager of occupational therapy services. Focuses on the application of principles and practices of administration and supervision in diverse practice environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2213; PLAN: Doctor of Occupational Therapy (OTD)

OT 2225 - PROJECT DEVELOPMENT 1

Minimum Credits: 3

Maximum Credits: 3

Focuses on the development of the skills needed to plan, implement and evaluate a project that addresses an important question related to professional practice. In collaboration with and mentorship by faculty and content experts, designs and presents a synopsis of a proposal for a capstone project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2208; PLAN: Doctor of Occupational Therapy (OTD)

OT 2226 - FIELDWORK EDUCATION C

Minimum Credits: 1

Maximum Credits: 1

Enriches didactic coursework through experiential learning. Through directed observation and participation, students apply knowledge to practice and develop an understanding of the needs of children and youth, and older adults.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2219; PLAN: Doctor of Occupational Therapy (OTD)

OT 2227 - CLINICAL SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

Addresses professional issues and the professional development of the occupational therapist. Issues explored include the application

of professional and clinical reasoning in traditional and emerging practice settings, collaborative practice, ethics, fieldwork and professional entry, licensure, certification, and professional sustainability.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2220; PLAN: Doctor of Occupational Therapy (OTD)

OT 2228 - FIELDWORK EDUCATION D

Minimum Credits: 1

Maximum Credits: 10

Provides an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2226; PLAN: Doctor of Occupational Therapy (OTD)

OT 2229 - FIELDWORK EDUCATION E

Minimum Credits: 1

Maximum Credits: 10

Provides an in-depth learning experience in delivering occupational therapy services. The learning experience occurs at an approved clinical education site that offers the opportunity to develop competence in the professional responsibilities of an entry-level occupational therapist.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 2226; PLAN: Doctor of Occupational Therapy (OTD)

OT 2230 - CLINICAL SEMINAR 6

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OT 2231 - CLINICAL SEMINAR 7

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

OT 3000 - ADVANCEMENTS IN FUNCTIONAL ASSESSMENT

Minimum Credits: 4

Maximum Credits: 4

This course focuses on building a concept matrix using (a) the international classification of functioning, disability and health (ICF) assessment levels (condition, impairment, activity, participation) and (b) methods of assessment (self-report, proxy report, clinical judgment, clinic performance, and home performance) to support a comprehensive assessment plan for a specific patient population. Students will also be introduced to item response theory and its utility for functional assessment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

OT 3001 - ADVANCEMENTS IN FUNCTIONAL ASSESSMENT: COLLOQUIUM

Minimum Credits: 3

Maximum Credits: 3

Using the ICF-methods matrix approach, the colloquium focuses on development of an ICF-methods matrix for a specific patient population.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

OT 3100 - EVIDENCE ANALYSIS FOR IMPROVING CLINICAL INTERVENTIONS

Minimum Credits: 4

Maximum Credits: 4

This course uses systematic methods (e.g. Prisma, Pedro, Consort, Strobe, Trend, CASP) and critical thinking to evaluate the rigor of evidence to enable practitioners to evaluate research articles for the purpose of developing clinical protocols and best practice guidelines.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

OT 3101 - EVIDENCE ANALYSIS FOR IMPROVING CLINICAL INTERVENTIONS: COLLOQUIUM

Minimum Credits: 3

Maximum Credits: 3

For a specific population, students will gather and analyze intervention literature that will support development of evidence-based clinical protocols and practice guidelines required by third party payers.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

OT 3200 - EVIDENCE-BASED PROTOCOLS AND PRACTICE GUIDELINES

Minimum Credits: 4

Maximum Credits: 4

This course focuses on the use of evidence checklists for evaluating and developing practice guidelines (e.g., AGREEII). Current professional practice guidelines will be evaluated, generated, implemented, and assessed for follow-through.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

OT 3201 - EVIDENCE-BASED PROTOCOLS: CLINICAL ROTATION

Minimum Credits: 3

Maximum Credits: 3

This clinical rotation will focus on evaluating occupational therapy practice guidelines relevant to a specific patient population, in an assigned clinic, and then working with clinical staff to develop a practice guideline that will meet the requirements of third party payers (e.g., AGREEII)

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

OT 3203 - ADVANCED CONCEPTS IN PROFESSIONAL AND CLINICAL REASONING

Minimum Credits: 3

Maximum Credits: 3

Uses case-based methods, evidence synthesis, and critical thinking to derive evidence-based and sustainable solutions to real-world complex clinical challenges in evaluation and intervention, and to develop clinical protocols and best practice guidelines for the implementation of the solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3204 - ADVANCED CONCEPTS IN HEALTH POLICY AND ADVOCACY

Minimum Credits: 3

Maximum Credits: 3

Focuses on the development and analysis of policy issues, and the engagement in advocacy to address issues affecting occupational therapy and that support health, well-being, and societal participation at the individual and/or systems levels. Addresses strategies for promoting occupational justice and empowering individuals to seek and obtain resources to fully participate in daily life occupations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3205 - LEADERSHIP DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Focuses on leadership skills for promoting the distinct value of occupational therapy, implementing evidence-based occupational therapy services, and advocating for occupational therapy services at the consumer, work environment, and policy levels.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3206 - ADVANCED THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Examines select theoretical perspectives, practice areas, evaluation procedures, intervention protocols, and/or professional issues in-depth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3207 - PROJECT DEVELOPMENT 2

Minimum Credits: 3

Maximum Credits: 3

Focuses on the construction of the protocol of a capstone project, including collaboration with and mentorship by faculty and content experts in developing plans for implementation, evaluation and sustainability of the program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: OT 2229; PLAN: Doctor of Occupational Therapy (OTD)

OT 3208 - EXPERIENTIAL PRECEPTORSHIP

Minimum Credits: 1

Maximum Credits: 12

Provides an in-depth learning experience in clinical practice, research, administration, leadership, program and/or policy development, advocacy, or education at an approved clinical education site that offers the opportunity to develop advanced skills that are beyond the professional responsibilities of an entry-level occupational therapist and collaboration and mentorship with faculty and site experts.

Includes implementation of a capstone project.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 3207; CREQ: OT 3209; PLAN: Doctor of Occupational Therapy (OTD)

OT 3209 - PROFESSIONAL DEVELOPMENT SEMINAR

Minimum Credits: 2

Maximum Credits: 2

Addresses professional issues and the professional development of the occupational therapist related to collaborative practice, ethics, professional entry requirements and responsibilities, and professional sustainability. Includes dissemination of capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: PREQ: OT 3207; CREQ: OT 3208; PLAN: Doctor of Occupational Therapy (OTD)

OT 3300 - DATA-BASED DECISION MAKING FOR CLINICAL PRACTICE

Minimum Credits: 4

Maximum Credits: 4

This course focuses on the application of data analytic strategies (e.g., descriptives, correlations, comparisons, predictions, effect sizes, and single subject design strategies, and qualitative strategies) practitioners can use to analyze clinical data related to patient demographics, patient perceptions, patient outcomes by intervention type, productivity levels, etc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

OT 3301 - DATA-BASED DECISION MAKING: CLINICAL ROTATION

Minimum Credits: 3

Maximum Credits: 3

In this clinical rotation, students will work with staff at an assigned clinic, using data analytic strategies to analyze and synthesize data from relevant clinical cases to assist them in documenting patient progress, satisfaction, and outcomes, and staff productivity.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

OT 3400 - MASTER PRACTITIONER COGNATE SEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on classic, current, and emerging theories relevant to the chosen area of clinical expertise.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3401 - CLINICAL EDUCATOR COGNATE SEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on classic, current, and emerging theories of learning, instruction, and assessment of learning.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3402 - PROFESSIONAL LEADERSHIP COGNATE SEMINAR 1

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on classic, current, and emerging theories of leadership, organizational behavior, and management.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3500 - MASTER PRACTITIONER COGNATE SEMINAR 2

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on analysis and synthesis of research evidence relevant to the student's chosen area of clinical expertise and capstone project. Students will complete a comprehensive oral examination at the completion of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3501 - CLINICAL EDUCATOR COGNATE SEMINAR 2

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on analysis and synthesis of research evidence relevant to the chosen focus of patient or student learning, instruction, or assessment of learning and capstone project. Students will complete a comprehensive oral examination at the completion of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3502 - PROFESSIONAL LEADERSHIP COGNATE SEMINAR 2

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on analysis and synthesis of research evidence relevant to the student's chosen focus of clinical or professional leadership, organizational behavior or management and capstone project. Students will complete a comprehensive oral examination at the completion of this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3600 - MASTER PRACTITIONER COGNATE SEMINAR 3

Minimum Credits: 3

Maximum Credits: 3

Students will collect patient assessment and intervention data for a chosen theoretical model, and compare their results to current research evidence in preparation for their capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3601 - CLINICAL EDUCATOR COGNATE SEMINAR 3

Minimum Credits: 3

Maximum Credits: 3

Students will collect clinical (patient), classroom (college, university), or continuing education (in-person or online) assessment, instruction, and reassessment data for a chosen theoretical model of learning, instruction, or assessment, and compare their results to current research evidence in preparation for their capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3602 - PROFESSIONAL LEADERSHIP COGNATE SEMINAR 3

Minimum Credits: 3

Maximum Credits: 3

Students will collect data relevant for a chosen theoretical leadership model in a chosen organization, and compare their results to current research evidence in preparation for their capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

OT 3700 - MASTER PRACTITIONER COGNATE PRACTICUM AND CAPSTONE

Minimum Credits: 5

Maximum Credits: 5

This course will consist of a practicum along with a capstone project that focuses on analyzing the active intervention mechanisms and assessment - intervention ---outcome linkages for a specific patient population. Students will submit their project findings for presentation at a professional forum (e.g., regional, national, or international conference), or as a continuing education module.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

OT 3701 - CLINICAL EDUCATOR COGNATE PRACTICUM & CAPSTONE

Minimum Credits: 5

Maximum Credits: 5

This course will consist of a practicum along with a capstone teaching project (objectives, content, teaching methods, assessments) that will be implemented in a clinical (patient education), academic (college, university), or continuing education (in-person or online) setting. Students will present the project at a professional forum (e.g., regional, national, or international conference), or as a continuing education module.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

OT 3702 - PROFESSIONAL LEADERSHIP COGNATE PRACTICUM AND CAPSTONE

Minimum Credits: 5

Maximum Credits: 5

This course will consist of a practicum along with a capstone project that will address a current leadership, communication, and/or advocacy need of a health care facility or system. Students will submit their project findings for presentation at a professional forum (e.g., regional, national, or international conference), or as a continuing education module.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Ophthalmology

OPHTH 5385 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of ophthalmology will arrange an individual study or research experience for third year medical students in an area of their interest. These electives are at the junior level and will be four weeks in duration.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OPHTH 5420 - OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective will provide exposure to both general and sub specialty disciplines in ophthalmology. The student will spend time with the full-time staff on specialty services, in the emergency room, operating room, eye clinic, Children's Hospital Clinic, VA Hospital or and eye clinic. Time is also scheduled at the ophthalmology learning center to study programmed sequences dealing with general clinical problems in ophthalmology. Attendance at weekly surgical rounds is encouraged. Ophthalmic library is available to students.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OPHTH 5430 - PEDIATRIC OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective will provide in-depth exposure to the field of pediatric ophthalmology. It is intended for students exploring the possibility of a career in ophthalmology, as well as for those who wish to gain more ophthalmologic experience prior to a career in another, likely pediatric, field.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OPHTH 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of ophthalmology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OPHTH 5815 - OPHTHALMOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Research opportunities are available with appropriate staff members. Call to discuss the various research programs. The individual can then make the necessary arrangements for a research elective with the staff member of his choice.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OPHTH 5899 - INDEPENDENT STUDY IN OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OPHTH 5900 - EXTRAMURAL OPHTHALMOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in ophthalmology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Oral and Maxillofacial Path

OMFP 2111 - SURGICAL ORAL PATHOLOGY 1

Minimum Credits: 1

Maximum Credits: 1

This course will provide training and experience in the full range of oral surgical pathology procedures. The course will train the resident through hands-on experience in describing gross specimens as they arrive from the contributor, proper preparation for embedding, microscopic description, generation of a diagnosis, and decision-making in the need to order special stains and immunohistochemical procedures. This course includes instruction in laboratory administration, contributor relations, and histopathologic methods.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

OMFP 2121 - ORAL AND MAXILFACL HISTOPATH 1

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OMFP 2131 - OMFP JOURNAL CLUB 1

Minimum Credits: 1

Maximum Credits: 1

This course is a conference where departmental faculty and residents meet to discuss current scientific articles of interest to the field. This will serve as a forum to address controversial and evidence-based topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OMFP 2141 - TMJ AND ORAL AND MAXILLOFACIAL PAIN 1

Minimum Credits: 1

Maximum Credits: 1

This course will involve analysis of case histories of patients who have pain in the head and neck region. Students will be provided cases beforehand and will investigate patient medical and dental history, current medications, differential diagnosis, possible treatments, and treatment outcomes. Topics may also include trigeminal neuralgia, multiple sclerosis, migraine headaches, cranial arteritis, and temporomandibular joint surgery.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

OMFP 2151 - OMFP RESEARCH 1

Minimum Credits: 1

Maximum Credits: 3

The resident, with the assistance of the program director, will select a research mentor and research project that exposes him/her to methods of research, critical review of the scientific literature, analysis of data, and presentation of the results before his/her peers. A comprehensive understanding of institutional review board and human subject's committee policies will be required. The research may include, but is not limited to, basic research, clinical trials, epidemiologic studies, and public health issues.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad HSU Basis

OMFP 2161 - ORAL MEDICINE CLINIC 1

Minimum Credits: 1

Maximum Credits: 1

This course has three main components. The first will be observing and assisting faculty members with their clinical oral pathology/oral medicine patients. The second component of the course is the resident's taking responsibility for his/her own clinical patients, under the direct supervision of a faculty member. The third will be the training and evaluation of first professional students in the urgent care clinic rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

OMFP 2171 - CLINICOPATH CORRELATIONS 1

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Oral and Maxillofacial Surgery

ORSUR 5241 - ORAL SURGERY 1

Minimum Credits: 1

Maximum Credits: 1

This introductory course in oral and maxillofacial surgery is an integral part of dental education and clinical practice. It involves reinforcing and correlating the dental student's knowledge of the basic sciences with physical evaluation and risk assessment for patients requiring oral surgery. Basic dentoalveolar surgery techniques, suturing, flap design and extraction of impacted teeth are discussed as well as complications of dentolaveolar surgery.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORSUR 5282 - ORAL SURGERY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will learn about classification and management of impacted teeth. An emphasis will also be paced on the recognition and management of common oral surgical related complications. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORSUR 5313 - ORAL SURGERY 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented with information related to the management of patients with co-existing medical diseases; patients requiring oral surgery in a hospital setting; the treatment of advanced oral and maxillofacial conditions such as odontogenic infections and facial trauma; and medical/legal considerations with an emphasis on the informed consent process. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORSUR 5314 - PHYSICAL DIAGNOSIS AND EVALUATION

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be provided the foundational information for taking a medical history leading to a focused physical examination. Students will gain practical knowledge to assess the patients medical condition and make practical clinical decisions based on the patient's situation and medical history. This course integrates knowledge learned in the basic sciences, specifically pharmacology, histology, physiology and anatomy for clinical application. A physical systems approach to associated disease states will be used. Representative examples of normal and disease states will be presented with emphasis on oral manifestations and implications for patient management in the dental setting including medical emergencies. This course will help prepare the student for the subsequent Spring 3rd year Clinical Medicine (DSANE 5342) and Medical Emergencies (DSANE 5344) courses.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORSUR 5329 - OMFS ROTATION

Minimum Credits: 2

Maximum Credits: 2

This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring reparative surgical procedures on the hard and soft tissues.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5341 - PHYSICAL DIAGNOSIS AND EVALUATION

Minimum Credits: 1

Maximum Credits: 1

This course in physical evaluation provides an introduction to the techniques involved in performing a routine history and physical examination. The lecture format is augmented by clinical laboratory sessions and is intended to inform the student of the use of physical evaluation as a tool in the armamentarium of the health care provider.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORSUR 5344 - ORAL SURGERY 4

Minimum Credits: 1

Maximum Credits: 1

This course is a continuation of dentoalveolar surgery techniques and includes discussion of more complex situations including those pertaining to maxillofacial surgery.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORSUR 5349 - CLINICAL ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to permit the student to be able to evaluate, manage, and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

ORSUR 5369 - OMFS ROTATION

Minimum Credits: 1

Maximum Credits: 1

This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring reparative surgical procedures on the hard and soft tissues.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5379 - CLINICAL ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to permit the student to be able to evaluate, manage, and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

ORSUR 5388 - CLINICAL ORAL SURGERY 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of oral surgery for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with oral surgery needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with oral surgery needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

ORSUR 5389 - OMFS ROTATION 3

Minimum Credits: 2

Maximum Credits: 2

This course will provide the student the opportunity to evaluate, diagnose, treat or manage patients requiring reparative surgical procedures on the hard and soft tissue.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5449 - CLINICAL ORAL SURGERY 2

Minimum Credits: 2

Maximum Credits: 2

This course is designed to permit the student to be able to evaluate, manage and treat conditions requiring basic dentoalveolar surgery techniques in clinical dental practice. It involves the application of the student's knowledge in the basic sciences, physical diagnosis, and risk assessment in the performance of basic oral surgery procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

ORSUR 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 4

This independent study course is designed for the pre doctoral dental student who desires to pursue additional knowledge in specific areas of oral and maxillofacial surgery. The content of the course is specified by the student and approved and monitored by a full-time faculty member. The teaching format is designed to encourage independent student experiences with the faculty acting in an advisory capacity with limited personal interaction.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

ORSUR 5911 - HOSPITAL EXTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

The participant will participate at MUH department of dental medicine for a two week rotation. During this time they will function with the oral surgery residents in the clinic seeing patients presenting with both inpatient and outpatient emergencies. Participants will also rotate in the operating room for an observational experience with oral and maxillofacial surgery staff and residents.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5912 - ADVANCED ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This advanced clinical oral surgery elective is a clinical rotation in oral surgery that is restricted to students who are interested in pursuing advanced training in oral and maxillofacial surgery. Students will have the opportunity to participate in and be exposed to oral surgery patients requiring more difficult surgical procedures along with man aging medically compromised patients.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5913 - BASIC ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This basic oral surgery elective is a clinical rotation in oral surgery where the student has the opportunity to participate in or be exposed to oral surgery patients requiring routine and surgical extractions, minor preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, assisting other students and managing medically compromised patients.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5914 - HOT TOPICS IN DENTISTRY: NEW TREATMENTS, EMERGING TECHNOLOGIES AND CLINICAL DEBATES IN DENTISTRY.

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

ORSUR 5941 - HOSPITAL EXTERNSHIP

Minimum Credits: 3

Maximum Credits: 3

This course will consist of a rotating externship in oral and maxillofacial surgery at the university of Pittsburgh medical center hospitals. Students will participate in emergency room coverage, ward rounds, ambulatory clinical care and operating room coverage.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5942 - ADVANCED ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This advanced clinical oral surgery elective is a clinical rotation in oral surgery that is restricted to students who are interested in pursuing advanced training in oral and maxillofacial surgery. Students will have the opportunity to participate in and be exposed to oral surgery patients requiring more difficult surgical extractions, preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, and managing medically compromised patients.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

ORSUR 5943 - BASIC ORAL SURGERY

Minimum Credits: 3

Maximum Credits: 3

This basic oral surgery elective is a clinical rotation in oral surgery where the student has the opportunity to participate in or be exposed to oral surgery patients requiring routine and surgical extractions, minor preprosthetic surgery, impacted teeth, odontogenic infections, oral pathologic lesions, and managing medically compromised patients.

Academic Career: Dental Medicine

ORBIOL 2191 - PATHOBIOLOGY 1

Minimum Credits: 2

Maximum Credits: 2

This Didactic Conference is designed to introduce graduate students to the basic and advanced concepts on the biological basis of oral diseases and oral manifestations of systemic diseases. Emphasis is given on the molecular basis of diseases. In addition, the control of cell/tissue functions by drugs and host defense during bacterial and viral infections, autoimmune diseases, transplantation, cancer, and immunodeficiency will be discussed. This course will provide an overview of the biological basis of emerging technologies such as genetic engineering, bone remodeling and wound repair, tissue engineering, stem cell technology, as well as genetic basis of human diseases, temporomandibular joint diseases and craniofacial anomalies.

ORBIOL 3404 - COMPOSITION, STRUCTURE, AND FUNCTION OF MINERALIZED TISSUES

Minimum Credits: 2

Maximum Credits: 2

This is a selective course for predoctoral dental medicine students. Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue

structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease. All registrants for the course are expected to attend all lectures and prepare a presentation and discussion on the assigned research paper. Presentation of the research paper and class participation will be the basis for evaluation.

ORBIOL 5112 - DIRECTED STUDY

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Dental Medicine
Course Component: Directed Studies
Grade Component: Grad HSU Basis

ORBIOL 5113 - MOLECULAR AND CELL BIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3

In this course, students will be provided foundational knowledge of molecular structures and the metabolism of biomolecules that underlie normal human health, deviations associated with human disease, and alterations resulting from clinical interventions supporting evidence-based clinical decisions. This course includes lectures with a very pronounced interactive dimension.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5114 - MOLECULAR AND CELL BIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3

This class represents a continued study of the molecular- and cell- biological processes discussed in ORBIOL 5113. In this course, students will be provided foundational knowledge of molecular structures and the metabolism of biomolecules that underlie normal human health, deviations associated with human disease, and alterations resulting from clinical interventions supporting evidence-based clinical decisions. This course includes lectures with a very pronounced interactive dimension.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5115 - MICROBIAL PHYSIOLOGY AND IMMUNOLOGY

Minimum Credits: 3
Maximum Credits: 3

In this course, students will be provided with foundational knowledge of microbiology, focusing on the complex inter-relationships that have evolved between microbes and humans. Topics include the properties of prokaryotic and eukaryotic cells; microbial metabolism; microbial genetics and growth; the control of microbial growth; microbial classification; and the properties of viruses and basic immunology. Emphasis is placed on the role of microorganisms in the development of dental caries and periodontal disease. This course includes lectures and class discussions.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5120 - BODY TISSUES

Minimum Credits: 2
Maximum Credits: 2

This course introduces students to the microscopic anatomy of the various tissues and organs that make up the human body. The course starts with a description of the structural elements of the cell, followed by a discussion of epithelial, glandular, connective,

muscle and nervous tissues. The course continues with coverage of the microscopic features of the cells and tissues that form the various body systems, such as the integumentary, circulatory, respiratory, digestive, endocrine, and urinary systems. The function of the cells found within these tissues and organs is also addressed at an introductory level. Histopathologic correlates are introduced throughout the course, and will help the student understand the link between normal histology and microscopic changes seen in diseased states. The course format is predominantly lecture-based, with an emphasis on histologic slides. This course provides a strong foundation in histology that will be useful for subsequent courses in Oral Tissues and Embryology (ORBIOL 5130), Systemic Human Physiology (ORBIOL 5141), General and Systemic Pathology (DIASCI 5170), and Oral and Maxillofacial Pathology (DIASCI 5212).

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORBIOL 5125 - GENERAL EMBRYOLOGY AND CRANIOFACIAL ORGANOGENESIS

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be introduced to the principles of human development starting from fertilization extending to postnatal growth of the craniofacial skeleton. The goal of the class is to make the students aware of how developmental processes can impact their daily practice, and can be incorporated into evidence-based decision-making. At the completion of the course, the students will be able to describe human fertilization, organogenesis and craniofacial embryology and will be able to integrate the fundamental knowledge about embryonic and postnatal growth and development and use it to describe how congenital anomalies arise. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORBIOL 5130 - ORAL TISSUES

Minimum Credits: 3

Maximum Credits: 3

In this course, students will be provided sufficient information for an in-depth understanding of the developmental and structural features of the oral cavity and face so that the student can understand the scientific basis for oral diagnosis and treatment planning. In this course, the basic principles of development, structure, and function are considered as they relate to craniofacial complex. Students will relate concepts from other disciplines i.e., anatomy, physiology, biochemistry, to oral histology and common clinical procedures. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

ORBIOL 5140 - SYSTEMIC GROSS ANATOMY

Minimum Credits: 4

Maximum Credits: 4

The primary educational goals of this course are to instruct predoctoral dental students in gross anatomy so that they will have a clear and lasting understanding of the anatomical concepts and relationships that are prerequisites for future courses in their education and for the years of practice that will follow. The course will provide a student with an in-depth knowledge and appreciation of the gross anatomy of the human body, particularly those portions directly involved in the practice of dentistry.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

ORBIOL 5141 - SYSTEMIC HUMAN PHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

The goal of the course is to provide an opportunity for the dental students to know the principles of cellular and systemic human physiology, appreciate the significance of normal physiology to understand pharmacology and pathology and ultimately establish a foundation for the practice of dental medicine.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

Maximum Credits: 4
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

ORBIOL 5144 - SYSTEMIC HUMAN PHYSIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
In this coursework, we will discuss the fundamental principles and concepts that govern each organ and organ system functions in the human body and their integration to maintain homeostasis, as well as some clinical aspects of failure of these systems. The organ systems covered in this course include: sensory, gastrointestinal tract and endocrine systems that include pituitary, thyroid, parathyroid, insulin/glucagon/pancreas, male and female reproduction, and metabolism and temperature regulation. The goal of the course is therefore to provide an opportunity for the dental students to know the principles of cellular and systemic human physiology, appreciate the significance of normal physiology, to understand pharmacology and pathology, and ultimately establish a foundation for the practice.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ORBIOL 5171 - IMMUNOLOGY AND INFECTIOUS DISEASES

Minimum Credits: 4
Maximum Credits: 4
In this course, students will focus on the structure and function of the immune system as well as on the major human infectious diseases. Microbial Physiology and Immunology I (ORBIOL 5115) is a required prerequisite. Emphasis is placed on the role of microorganisms in the development of dental caries and periodontal disease. This course includes lectures and class discussions.
Academic Career: Dental Medicine

ORBIOL 5944 - COMPOSITION OF MINERALIZED TIS

Minimum Credits: 2

Maximum Credits: 2

Mineralized tissues such as bones, dentin, and enamel are exceptional materials with their properties uniquely optimized to the function. These functional properties are determined by the tissue structure and composition. The aim of this course is to examine how the composition and structural organization of the mineralized tissues affects their functional properties in norm and disease. All registrants for the course are expected to attend all lectures and prepare a presentation and discussion on the assigned research paper. Presentation of the research paper and class participation will be the basis for evaluation.

BORG 2061 - INDEPENDENT STUDY IN ORGANIZATIONAL BEHAVIOR 2

Minimum Credits: 1
Maximum Credits: 9
Self-designed elective course in organizational behavior
Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BORG 3005 - SEMINAR ON INNOVATION AND ORGANIZATIONAL CHANGE: A MICRO-LEVEL PERSPECTIVE

Minimum Credits: 3
Maximum Credits: 3
This seminar focuses on individual-level and team-level behaviors aimed at innovation and change in organizations. We will be exploring topics such as employee voice and proactive behaviors, team diversity and innovation, innovation implementation, creativity, and barriers to change in organizations. The purpose of this course is to examine theory and empirical research in these areas in order to help you to develop skills in developing conceptual models and research questions, as well as understanding, critiquing, and extending theory and research published in top academic journals. Each week we will cover a topic in depth, review a selected set of readings, discuss critical issues relating to theory and research methods, and discuss ways to extend conceptual and empirical models.

Organiztnl Beh & Human Resrcs

BOAH 2401 - ORG BEH: LEADERSHIP & GRP EFFECT

Minimum Credits: 3
Maximum Credits: 3
The effective management of people is a critical component of organizational competitiveness. This course addresses problems and issues concerning leadership, interpersonal effectiveness, and challenges for managers in the 21st century. The student is prepared to manage him/herself and others in a rapidly-changing global environment. Topics covered include employee empowerment, teamwork, managing diversity, cross-cultural management, and personal effectiveness.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 2409 - ORGANIZATIONAL BEHAVIOR: LEADERSHIP AND GROUP EFFECTIVENESS

Minimum Credits: 2

Maximum Credits: 2

The effective management of people is a critical component of organizational competitiveness. This course addresses problems and issues concerning leadership, interpersonal effectiveness, and challenges for managers in the 21st century. The student is prepared to manage himself or herself and others in a rapidly-changing global environment. Topics covered include leadership, teamwork, power, politics, and influence.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 2411 - HUMN RESORC COMPETITIVE ADVNTG

Minimum Credits: 3

Maximum Credits: 3

This course examines the design and use organizational human resources systems to achieve market advantage. Emphasis is placed on exploring the decisions managers must make to obtain an appropriate number of qualified employees and to motivate them to achieve organizational competitive objectives. Participants examine the influences of managing technologies, public policy directives and international competitive requirements as they affect decisions relating to staffing, compensation, employee relations and human resource development.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PREQ: BOAH 2401; PROG: Katz Graduate School of Business

BOAH 2421 - HUMN RESORC COMPETITIVE ADVNTG

Minimum Credits: 2

Maximum Credits: 2

This course identifies the key role of human resources management in the organization's effort to create value and explores its link with competitive strategy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: BOAH 2401 or BOAH 2409 ; PROG: Katz Graduate School of Business

BOAH 2422 - MANAGING HUMAN RESOURCES IN A GLOBAL ECONOMY

Minimum Credits: 2

Maximum Credits: 2

This course provides an integrative framework for understanding the macro- and micro-level issues that are associated with effective workforce management in a regional and global context. As more and more companies move toward global supply chain management, it is critical to consider the impact that country-level labor factors can have on operating performance and firm competitiveness. Accordingly, the challenges of identifying and integrating pertinent labor-related data for international sourcing decisions will be examined. At the firm level, we will discuss the role of human resources in business strategy formulation and implementation. Emphasis will be placed on best practice in the areas of talent acquisition and development as well as performance management. Relevant topical issues such as succession planning, managing large-scale reductions-in-force, and managing expatriate personnel may be addressed. With a focus on how to best allocate responsibilities for HR within the organization and effectively deliver HR services, the implications of such developments as HR-process outsourcing, EHR, internal restructuring, and the possibility of transforming the HR function from a cost center into a profit center will be discussed. The course is designed to accomplish three fundamental learning objectives: improved understanding of how traditional and contemporary HR practices can impact organizational effectiveness. Enhanced awareness of the substantial labor-market differences that exist across countries (economic, cultural, regulatory); and greater sensitivity to the challenges of managing international value-and operating-chains to enhance competitive advantage.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: Katz Grad School of Business students only.

BOAH 2423 - MANAGING HUMAN CAPITAL

Minimum Credits: 3

Maximum Credits: 3

This course examines the design and use organizational human resources systems to achieve market advantage. Emphasis is placed on exploring the decisions managers must make to obtain an appropriate number of qualified employees and to motivate them to achieve organizational competitive objectives. Participants examine the influences of managing technologies, public policy directives and international competitive requirements as they affect decisions relating to staffing, compensation, employee relations and human resource development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BOAH 2401 or 2409; PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BOAH 2424 - MANAGING HUMAN RESOURCES IN A GLOBAL ECONOMY

Minimum Credits: 2

Maximum Credits: 2

This course will provide an overview of human resource management and development policies and practices in different continents, such as Asia, America, Africa, Europe, and the South Pacific. The course will focus on managing workforce in global setting, human resource management and development in international joint ventures and global corporations. Topics include: hiring and selecting, training and developing, compensating, motivating, performance appraising, retaining in an international setting, cross cultural management, and the development of global managers. We will attempt to: develop a conceptual and critical understanding of human capital and global human resources management; develop familiarity with policies and practices of human resources management around the globe; and develop an agenda of future global managers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BOAH 2456 - MANAGING OFFSHORE OUTSOURCING

Minimum Credits: 2

Maximum Credits: 2

This course provides an in-depth assessment of the operational and legal challenges that must be addressed to effectively outsource a company's business processes to overseas locations. The fundamental learning objective is to enhance students' functional skills across the life cycle of these initiatives from process identification and internal restructuring through contract negotiations and ongoing vendor management. We begin with a review of existing frameworks and tools to identify processes that are viable candidates for external sourcing (e.g., Business mapping notation, business process reengineering principles). The consolidation of business processes into domestic shared-service units or captive centers abroad will be treated as a transition stage to more extensive co-sourcing and outsourcing relationships with third-party vendors. From there, students will examine the challenges of developing and executing an offshoring strategy and structuring effective relationships with foreign-based, outsourcing partners. Special attention will be focused on the performance management and corporate social responsibility aspects of these initiatives. A multifunctional perspective is maintained throughout, examining outsourcing trends and best practice in the areas of finance & accounting, HRM, procurement, call center management/customer support, and it.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BOAH 2517 - INTERPERSONAL SKILLS MANAGERS 1

Minimum Credits: 2

Maximum Credits: 2

Explicit training in interpersonal skills; presenting oneself to others, effective verbal and nonverbal communication, persuasion, and the use of interpersonal resources to become an effective manager and leader.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BOAH 2519 - NEGOTIATIONS 1

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to explore the nature of negotiations so that we might become better bargainers. To be an effective manager, an individual must develop negotiation and bargaining skills. Although the contexts change, managers are regularly involved in bargaining.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BOAH 2401; CREQ: BOAH 2520; PROG: Katz Graduate School of Business

BOAH 2521 - STAFFING ORGANIZATIONS

Minimum Credits: 2

Maximum Credits: 2

Designed to develop an advanced framework for the analysis and understanding of organizational personnel systems. There is an in-depth exploration of human resource planning and related programmatic activity which may include job analysis, performance appraisal, and some aspects of human resources development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BOAH 2409; PROG: Katz Graduate School of Business

BOAH 2522 - COMPENSATION

Minimum Credits: 2

Maximum Credits: 2

In-depth exploration of the personnel selection and compensation elements of the overall human resources system which are examined in the context of a proactive planning system for developing and utilizing organizational human resources.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: BOAH 2521; PROG: Katz Graduate School of Business

BOAH 2527 - CROSS CULTURAL DIMN INT'L MGT

Minimum Credits: 2

Maximum Credits: 2

This course entails the study of the behavior of people in organizations located in different cultures and nations. It focuses on the description and explanation of organization behavior across countries and cultures, and most importantly, the interaction of people from different countries working within the same organization or the same work environment. Relevant topics include the roles of language, education, religion, values, and social organization in influencing human behavior.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BOAH 2401 or BOAH 2409; PROG: Joseph M. Katz Grad Sch Bus

BOAH 2532 - NEGOTIATIONS, TEAMWORK AND CHANGE 1

Minimum Credits: 2

Maximum Credits: 2

We negotiate daily in a variety of contexts: business, family, and social. Negotiation serves several purposes: (1) establishing new or renewing old relationships; (2) changing behaviors and expectations; and (3) resolving disputes. A key goal of this course is to learn the techniques of effective negotiating and collaborative problem solving. Successful negotiations and teamwork reduce costs, improve outcomes, and build constructive relationships. Negotiations are part of a broader set of exchanges that take place within and across organizational contexts. This is the first half of a two-part course on negotiations, teamwork, and change. This course will introduce you to effective techniques for negotiating and collaborative decision making in dyads, as well as in groups. It will further cover the methods for negotiating, facilitating, and leading change in organizational contexts. This is an experiential course and you will be involved directly in negotiating, leveraging team dynamics, and facilitating change in a range of contexts. These experiences will involve a host of tangible and not-so-tangible outcomes, ranging from monetary terms and conditions to matters of goodwill, trust, and information-sharing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BOAH 2401 or 2409; PROG: Katz Graduate School of Business

BOAH 2537 - CONFLICT RESOLUTION IN THE WORKPLACE 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to build on the skills you learned in the prerequisite negotiation course (BOAH 2532 Negotiations, Teamwork and Change) to improve your skills in analyzing and resolving disputes in a variety of settings. Most of the lessons and principles covered in the course are not necessarily specific or unique to business-related or managerial applications, even though that will be the focal setting of study. A basic premise of the course is that while analytic skills are needed to discover optimal solutions to problems,

a broad array of conflict management skills are often needed to get these solutions accepted and implemented. The course will allow participants the opportunity to develop these skills experientially, where considerable emphasis will be placed on learning from simulations and case analysis.

ODO 2021 - CLINICAL PEDIATRIC ORTHODONTICS 1

Minimum Credits: 1

Maximum Credits: 1

The clinical pediatric orthodontics course series is designed to afford the resident in pediatric dentistry the clinical experiences necessary to ensure competency in diagnosis of abnormalities in the developing dentition and treatment of those conditions which can be corrected or significantly improved by early utilization of limited procedures. Residents will be afforded the opportunity to

participate in the provision of comprehensive, multidisciplinary dental care under supervision of faculty from the department of pediatric dentistry and the department of orthodontics and dentofacial orthopedics.

ODO 2041 - BIOMECHANICAL ORTHODONTICS 1

Minimum Credits: 1

Maximum Credits: 1

This course is an introduction to solid mechanics and materials science and emphasis is placed towards the application to orthodontic structure. Also special emphasis is placed upon the application of mechanics principles to the analysis, materials selection, and design of orthodontic elements and orthodontic appliances.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

ODO 2051 - ORTHODONTIC LAB TECHNIQUES 1

Minimum Credits: 5

Maximum Credits: 5

The objective of this course is to train the graduate residents in all phases of arch wire formation and mechanics concerned with the application of any current, acceptable orthodontic mechanics. The clinical manifestations of these appliances are taught. The use and proper construction of extra oral anchorage appliances and the full range of intra oral anchorage elastic systems is taught.

ODO 5242 - INTRODUCTION TO ORTHODONTICS

Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to teach the pre-doctoral student the diagnostic process. How to conduct an extra-oral and intra-oral examination of a patient, how to collect and analyze pertinent patient records and how to produce a comprehensive description of the patient's problem and to synthesize the various elements of the description into a rational problem list will be discussed.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ODO 5245 - ORTHODONTICS 3 LAB

Minimum Credits: 2
Maximum Credits: 2
This laboratory component objective is to teach the pre-doctoral student the diagnostic process, how to conduct an extra-oral and intra-oral examination of a patient, how to collect and analyze pertinent patient records and how to produce a comprehensive description of the patient's problem and to synthesize the various elements of the description into a rational problem list will be discovered.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad Letter Grade

ODO 5274 - ORTHODONTICS 4 (TREATMENT)

Minimum Credits: 1
Maximum Credits: 1
The course objective is to teach; (a) the pre-doctoral student the treatment planning process, based on the collection and analysis of pertinent patient records and a rational problem list, the data base; (b) the use of different orthodontic appliances; and (c) the treatment of patients needing limited orthodontic treatment modalities.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

ODO 5275 - INTRODUCTION TO ORTHODONTICS LAB

Minimum Credits: 1
Maximum Credits: 1
In this course, students will be introduced to the practical knowledge and skills associated with recognizing malocclusions in the mixed dentition, warranting interceptive orthodontic treatment involving space maintenance. Students will become familiar with simple clinical procedures which can be employed for children in the mixed dentition who would benefit from simple space maintenance procedures. Students will also review tracing and landmark identification of a lateral cephalometric radiograph and learn how to perform the following analyses: Steiner, Sassouni, Tweed and Wits appraisal. This course includes laboratory sessions.
Academic Career: Dental Medicine
Course Component: Practicum
Grade Component: Grad Letter Grade

ODO 5319 - CLINICAL ORTHODONTICS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experience in the area of orthodontic dentistry for predoctoral dental students. By the end of this course, students will be able to demonstrate competence in orthodontic dentistry for dental patients at the level of a general dentist. Students will complete a week long hands on clinical orthodontics experience that leads to an understanding of the overall clinical procedures which are undertaken during treatment of malocclusions. Orthodontic treatment of patients in mixed and adolescent dentitions will be addressed, including space management procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

ODO 5349 - CLINICAL ORTHODONTICS

Minimum Credits: 3

Maximum Credits: 3

The objective of this course is to teach the pre-doctoral student the treatment planning process based on the collection and analysis of pertinent patient records and a rational problem list; the use of different orthodontic appliances in patient care. Clinical cases are diagnosed and treatment plans presented by the student to the faculty.

Academic Career: Dental Medicine

Orthopedic Surgery

OSURG 5320 - PEDIATRIC ORTHOPAEDICS

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will allow the student concentrated exposure to all aspects of pediatric orthopaedics with a primary object of gaining an appreciation of the physical examination of musculoskeletal disorders in children. Students will be assigned to one of several specific orthopaedic teams and will be integrated to the service and have close contact with orthopaedic residents. Assignment choices will include concentrations in sports medicine, spina bifida/cerebral palsy and adult spinal disorders and there will also be significant exposure to general pediatric orthopaedics and fracture care. Students will be on the call schedule once a week with the pediatric orthopaedic resident. The student may choose to have operating room exposure.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5325 - SPORTS MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective offers exposure to general sports medicine. Students will be assigned to one of several specific orthopedic teams, which may include concentration in shoulder and elbow disorders or knee disorders. The student will observe orthopedic evaluations in the office as well as become involved in the medical coverage of sporting events depending on the season. While not required, the student may observe surgery if desired. The course objectives are: to understand the mechanism and pathophysiology of sports-related injuries; to become knowledgeable in orthopedic sports medicine physical examination; and to evaluate and monitor rehabilitation following sports-related injuries.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5330 - ORTHOPAEDIC TRAUMA

Minimum Credits: 0

Maximum Credits: 0

This is an intensive 4-week exposure to orthopaedic trauma during which the student will be assigned to the orthopaedic trauma team. Students will take call in the hospital once per week. Students will participate in the real-time evaluation of acutely-injured patients in the emergency department; the initial evaluation to include interpretation of radiographic studies, as well as the pre- and postoperative management of acutely-injured patients with orthopaedic injuries. Course objectives include: appreciate the implications of multiple trauma; understand the role of orthopaedic injuries in the management of the multiply-injured patient; understand the trauma care system of a major tertiary medical care system; and become comfortable with the basic skills required to evaluate a multiply-injured patient with orthopaedic injuries.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5335 - ORTHOPAEDIC FOOT AND ANKLE

Minimum Credits: 0

Maximum Credits: 0

This elective is a four week exposure to foot and ankle orthopaedics. The student will be integrated on to the service and will have close contact with the orthopaedic resident. The student will observe foot and ankle evaluations in an office setting and will have the opportunity to observe surgery. Course objects include: appreciate the clinical and radiographic assessment of the foot and ankle; gain an appreciation and understanding of the evaluation and treatment of foot and ankle injuries; and become knowledgeable in the examination of the foot and ankle.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5340 - ORTHOPAEDIC HAND SERVICE

Minimum Credits: 0

Maximum Credits: 0

This elective is a four week exposure to hand orthopaedics. The student will be integrated on to the service and will have close contact with the orthopaedic resident. The student will observe hand evaluations in an office setting and have the opportunity to observe surgery. Objectives include: appreciate the clinical assessment of the hand and upper extremity; gain an appreciation and understanding of the evaluation and treatment of hand and upper extremity conditions and procedures; and become knowledgeable in the examination of the hand and upper extremity.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5389 - CLINICAL CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

This elective will offer the student early in his/her clinical experience an opportunity to learn more about diseases of the musculoskeletal system, their diagnosis and their treatment. The student will be assigned to a clinical service and will participate in both in-patient and ambulatory care. Teaching by preceptorship and demonstration will recognize the student's limited clinical experience.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5392 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

A student may participate as a member of an existing research team in the orthopaedic research laboratory or pursue independent research interests. Students interested in this elective should plan the rotation well-in advance with both the preceptor and the department's student coordinator. Time periods for this elective are in four week blocks of time.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

OSURG 5410 - OSURG ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

The goal of the four week elective is to meet the needs of a student whose career plans include specialization in orthopaedic surgery. This elective is designed to integrate the student into one of the specialty services at the university hospitals. The student should be highly motivated and will function as an integral part of the house staff team.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5420 - CLINICAL PRECEPTORSHIP

Minimum Credits: 0

Maximum Credits: 0

This rotation is designed for students who are interested in learning about the musculoskeletal system, its disease processes and treatment. The student will be integrated into one of the clinical services at the university hospitals will be involved in the outpatient care of the patients in the emergency room and the orthopaedic ambulatory care clinic. The elective is four weeks in duration.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5451 - OPERATIVE SPORTS MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will integrate the students into the sports medicine orthopaedic services in both an inpatient and an outpatient setting. The course objectives are: to improve the student's musculoskeletal system exam skills; to assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; to develop an appreciation of the roles of surgeons, primary care physicians, athletic trainers, and physical therapists in the sports medicine team approach to the care of athletes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5455 - PRIMARY CARE/SPORTS MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is for the student who is interested in learning more about sports medicine, the musculoskeletal system, its exam and their treatment. Students will be exposed to a variety of sports/musculoskeletal injuries in a multi-provider outpatient sports medicine team approach. Objectives are: improve the student's musculoskeletal system exam skills; assess and manage the various musculoskeletal injuries encountered frequently in a sports medicine/musculoskeletal outpatient setting; develop an appreciation in the sports medicine team approach to the care of athletes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of orthopaedic surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's advisory dean. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OSURG 5881 - ORTHOPAEDIC RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students interested in orthopaedic research may participate as a member of an existing research team in the orthopaedic research laboratory or pursue independent research interests. Students interested in this elective should contact the coordinator and plan the rotation months in advance. Time periods for this elective are in four week blocks.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

OSURG 5899 - INDEPENDENT STUDY ORTHOPAEDIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

OSURG 5900 - EXTRAMURAL ORTHOPAEDIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in orthopaedic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Otolaryngology

OTO 5390 - OTOLARYNGOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Students undertaking this elective may join ongoing basic research projects in the laboratory. The student will be given an opportunity to learn research techniques.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

OTO 5420 - HEAD AND NECK SURGERY

Minimum Credits: 0

Maximum Credits: 0

This four-week course concentrates on the management of patients with tumors of the head and neck. Special emphasis is on oncologic surgery, but the elective includes reconstructive surgery of the head and neck, major inflammatory diseases, and

management of the airway and swallowing disorders. There will be general ear, nose, and throat experience as well. The objectives are to record and interpret a complete medical history, perform and evaluate an examination of the head and neck and to develop an appropriate management plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5425 - COMBINED OTOLARYNGOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective combines two weeks each of the head and neck and pediatric otolaryngology rotations. The course will constitute an intensive rotation as a member of the surgical teams. The focus is on management of patients with tumors of the head and neck and children with a variety of diseases of the ear, nose and upper digestive tract. Each week the student will spend two days in the patient office and three days in the operating room, functioning as an integral member of the teams. Teaching rounds will be conducted twice daily by the house staff and attending staff.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5430 - OTOLARYNGOLOGY PRIVATE PRACTICE

Minimum Credits: 0

Maximum Credits: 0

In this four-week course the student will work as a colleague in a private practice office two days a week seeing patients and working as an assistant in the operating room three days a week. The preceptor is involved in the practice of general ear, nose, and throat to offer experience in recognizing and managing common ENT complaints such as headaches, dizziness, neck mass, trouble swallowing, etc. The objectives are to record a complete medical history, record and evaluate a complete examination of the head and neck and to develop a plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5440 - GENERAL OTOLARYNGOLOGY

Minimum Credits: 0

Maximum Credits: 0

This 4 week course will provide the student an opportunity to observe treatment of patients in a large, diversified private practice. The practice includes head and neck surgery, plastic and reconstructive surgery and post-operative care. This service provides excellent clinical exposure to the disease of head and neck for students. Recommended for primary care physicians and students considering surgical specialties. The objectives are to evaluate and diagnose a patient with a complaint of the head and neck, to diagnose the problem and to develop a plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5450 - PEDIATRIC OTOLARYNGOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective course is designed for the student desiring a career in primary medicine, pediatrics or otolaryngology. The student will attend the pediatric otolaryngology outpatient department, surgery and work rounds with staff and residents. In addition, all department activities, including participation in ongoing research, will be available to the students. The objectives of the course are to record and to interpret a pediatric otolaryngology history, to perform a complete pediatric head and neck exam and to formulate a management plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5460 - NEUROTOLOGY

Minimum Credits: 0

Maximum Credits: 0

This course deals with patients with disorders of the hearing and balance systems. Special emphasis is on evaluation, physical examination and special testing -vestibular and audiological -of patients who present with complaints related to hearing, balance, facial dysfunction and medical and surgical management. In addition, the student will have the opportunity to participate in otologic surgery. The objectives are to learn techniques used in evaluation of hearing and balance disorders, to interpret a medical history and

to outline a plan of management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of otolaryngology to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

OTO 5816 - OTOLARYNGOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This 4 week experience allows a student to participate in a clinical or basic laboratory research project in otolaryngology. The student can select to work with any faculty in the department. Participation in design, data collection and analysis, and manuscript preparation is expected. The actual total participation may extend beyond the 4 week period.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

OTO 5899 - INDEPENDENT STUDY IN OTOLARYNGOLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Pathology

MSPH 5381 - INDIVIDUAL STUDY

Minimum Credits: 0

Maximum Credits: 0

Opportunities are available for third year students to do a variety of electives in the department of pathology. These electives include: anatomic pathology, immunopathology, ob/gyn and perinatal pathology, pediatric pathology, neuropathology, pathology practice, clinical chemistry, and tumor immunology. Independent study is also available in other areas pending consultation with individual faculty.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSPH 5382 - PATHOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Research opportunities are available for third year students within the department of pathology. Research areas include: anatomic pathology, immunopathology, ob/gyn and perinatal pathology, pediatric pathology, neuropathology, clinical chemistry, and tumor immunology. Research opportunities are also available in other areas pending consultation with individual faculty.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSPTH 5420 - ANATOMIC PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

During this four or eight week elective, the student will have the opportunity to study and review normal and pathologic anatomy as provided by surgical and autopsy materials. Under the direction of the staff, the student will process surgical specimens and perform autopsies. The findings will be correlated with the clinical data to provide insight into disease processes and their progression, may participate in ongoing investigations being conducted by the staff.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5421 - BASIC PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This fourth year level elective will conduct a systematic, hands-on review, covering many organ systems, of gross and microscopic pathology. Cpc cases will be studied representing a wide variety of medical, surgical, pediatric and ob/gyn problems. Gross and microscopic specimens will be used. Various pathology facilities will be visited and students will be invited to attend regularly scheduled conferences in anatomic and clinical pathology.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

MSPTH 5425 - INTRODUCTION TO AUTOPSY PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

The autopsy remains an enigma in the medical community. Myths and misconceptions continue to be pervasive. This course will introduce the student to the field of autopsy pathology, teaching them to communicate the benefits and expectations of the autopsy to their clinical colleagues and patient's families. Each student will participate in the UPMC hospital autopsy service, working with pathology residents, attending physicians and pathology assistants as we attempt to answer difficult medical questions, correlate clinical and pathological findings, and present this information to the clinical services. Activities include review of hospital charts and case discussions with clinical services prior to the autopsy; observing autopsy gross dissections; review of histologic slides to make pathologic diagnoses; interpretation of clinical laboratory tests as they relate to the autopsy; and completion of autopsy reports and death certificates. There will also be opportunities for participation in clinical conferences and active presentation at pathology meetings. Objective are to: 1. To learn the policies and procedures for UPMC hospital autopsies. 2. To learn the various myths and misconceptions about autopsies. 3. To learn how to communicate autopsy findings to clinical services and patient's families. 4. To understand how pathologists use clinical information, autopsy gross and microscopic examinations, and clinical testing to conclude a patient's cause of death.

Academic Career: Medical School

Course Component: Workshop

Grade Component: H/HS/S/LS/U

MSPTH 5427 - INTEGRATED ENDOCRINE ELECTIVE THE NODULAR THYROID

Minimum Credits: 0

Maximum Credits: 0

This elective is intended for MSIII and IV level medical students. The student will follow patients through three phases of predominantly outpatient thyroid nodule management including preoperative assessment, operative procedures and postoperative follow-up. Cooperation of the departments of surgery, radiology, endocrine medicine and pathology will be required. The student will maintain a patient log (learning log) and at the conclusion of the rotation will give a 10-15 minute focused presentation on a relevant topic of the student's choice. The student will gain an in depth understanding of the multi-disciplinary approach to thyroid disease. Preoperative phase will include: thyroid interdisciplinary conference; non-gynecologic cytology sign out; molecular anatomic pathology; endocrine clinic; surgery clinic, clinical chemistry; immunopathology; radiologic us guided FNA biopsies; and medical management of non-surgical thyroid disease. Goals of the preoperative phase include: clinical assessment of patients with thyroid nodules and correlation with radiologic, pathologic and molecular data; understanding of thyroid related laboratory values; and

applications and limitations of fna of the thyroid. Operative phase will include intraoperative involvement in thyroidectomies; understanding of indications; and complications and postoperative care. Goals of the operative phase include: understanding of the indications and complications of thyroidectomy; lymph node dissection; follow through of thyroid surgical specimens; gross evaluation; microscopic features of specific thyroid processes; and staging of carcinomas. Postoperative phase will include: surgery clinic; discussion with patients regarding thyroid disease; follow-up of surgical pathology cases; and presentation of a relevant topic. Goals for the postoperative phase include: completion of clinical-radiologic-pathologic-molecular correlation of data as applied to diseases of the thyroid.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5430 - CLINICAL IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week elective is designed to provide a broad exposure to both clinical and laboratory immunology. The student will become familiar with the diagnostic evaluations and clinical management of a variety of patients with immunodeficiency diseases or autoimmune disorders. Daily teaching sessions will be held covering patient and laboratory aspects of immunology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5441 - SURGICAL AND PERINATAL PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

The course meets student current or future career objectives in general surgical, gynecological, obstetrical and perinatal pathology. It includes participation in department activity as patient diagnostic workup, teaching conferences, research project with emphasis on clinico-pathological correlation studies, immunohistochemical, DNA analysis and cytogenetic studies of gynecological tumors, breast tumors, trophoblastic disease, pregnancy loss, placental pathology, perinatal pathology and sexually transmitted disease.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5442 - CLINICOPATHOLOGIC APPROACH TO INTERSTITIAL LUNG DISEASE

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to give students a stronger foundation in interstitial lung disease for internship and residency training. It emphasizes three core concepts: (1) the sine qua non of an interdisciplinary approach to lung disease (during this elective involving physicians from at least four different specialties), (2) the indications, benefits and limitations of laboratory testing including blood tests and histologic examination in the setting of lung disease, and (3) the importance of confirming or excluding interstitial lung disease as the cause of shortness of breath, since some interstitial lung diseases are readily curable with intervention while others are potentially devastating. The lungs possess two noteworthy properties. First, their large surface area forms the most extensive interface between the human organism and the environment. However, this interface with is the one most difficult to protect and often even voluntarily exposed to noxious stimuli. Secondly, the lungs are the only organs that encounter the entire cardiac output of blood, and are theoretically exposed to hematogenous factors of all other tissues in the body. It is therefore not surprising that the lungs are often involved in systemic diseases. Despite its anatomic complexity, histologically the lung only exhibits a rather limited repertoire of reaction patterns to injury. The three most important ones are airspace organization, inflammatory infiltrates and fibrosis. Each one has characteristic radiographic and physical examination correlates. Although most clinical entities of lung disease have well described histopathologic findings, many of these entities show significant histopathologic overlap. It is therefore of high importance to integrate the findings and impressions of primary caregivers, radiologists and pathologists in order to arrive at the correct diagnosis and formulate the most appropriate treatment plan. This constitutes the rationale and strength of this elective. While many medical school rotations emphasize and encourage interdisciplinarity, the primary responsibilities of the student usually lies within a single specialty. This elective, although initiated by pathologists, is meant to be a true multidisciplinary and in-depth experience. Students will be held accountable by faculty from all participating specialties. The focus shall be the need for diagnosis and treatment of a patient with lung disease utilizing pathology, radiology and medicine as tools, rather than teaching pathology, radiology or medicine utilizing patients as ways and means.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5450 - PEDIATRIC PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week course is to introduce the student to a range of procedures used in diagnostic anatomic pathology as well as in research. This includes anatomic, histologic and histochemical techniques. The student would be expected to take full part in the diagnostic work and daily departmental teaching conferences. Each student will be given a defined research or clinically-oriented problem to be completed by the end of the elective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5460 - NEUROPATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week course is offered as an introduction to special aspects of pathology, neurology and neurosurgery. The student will participate in the major academic activities of the unit including multidisciplinary conferences and seminars, brain dissections, microscopic review and investigations in progress within the division.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5471 - HEMATOPATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

An introduction to diagnostic hematopathology introducing a state-of-the-art approach to diagnosing disorders of the hematopoietic/lymphoid system, evaluation of proliferations, in-depth exposure to selected disorders, evaluation of peripheral smears and biopsies, a variety of hematologic laboratory tests, and the utility of bone marrow and lymph node examinations.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5480 - PATHOLOGY PRACTICE

Minimum Credits: 0

Maximum Credits: 0

In this four-week clerkship, the student will become familiar with the activities of both clinical and anatomical pathology. The former will encompass brief tours of duty in the hematology, microbiology and clinical chemistry sections of the laboratory. The student assigned to anatomical pathology will visualize the activities of surgical pathology including frozen section diagnosis. Students will also attend autopsies when performed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5485 - LABORATORY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is designed to provide a broad exposure to the clinical laboratories. The student is exposed to chemistry, hematology, microbiology, immunology, histocompatibility, transfusion medicine, coagulation, point-of care testing, information systems, laboratory administration and quality assurance. The student learns testing basics, result interpretation, clinical correlation and principles of transfusion medicine. The student also has an opportunity to undertake a small research project. Attendance at all teaching sessions is expected.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5487 - MUSCULOSKELETAL ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This medical school elective is intended for MS3 and MS4 levels. The goal of the experience is increased awareness of multidisciplinary modalities in the diagnosis of musculoskeletal disease, particularly oncologic processes. The student will rotate through the three main components of the course each week: outpatient orthopedics, musculoskeletal radiology and bone/soft tissue pathology. The student will evaluate patients in outpatient orthopedic clinics with Drs. Goodman, McGough and Weiss. Opportunities to scrub in and participate in operative procedures will be incorporated. Review of pertinent radiographic imaging will occur both in clinic and in the UPMC Shadyside radiology department with subspecialty musculoskeletal radiologists. The student will participate in evaluation of musculoskeletal imaging and observe procedures performed by interventional radiologists in order to obtain diagnostic tissue for cytologic and/or histologic examination. The student will also attend surgical pathology sign-out in the upmc

department of pathology bone and soft tissue center of excellence. During these exposures to orthopedics, radiology and pathology, the student will maintain a log of patients seen, imaging reviewed and pathology case material reviewed with differential diagnoses and plans for further workup as necessary. Patient follow-up correlation with radiologic and pathologic data and cost effective diagnostic strategies will be emphasized. Experiences in the frozen section laboratory and in the fluorescence in situ hybridization (FISH) laboratory are included. Weekly orthopedic conference is also an important component allowing for complete clinical, radiologic and pathologic correlation. At the conclusion of the rotation, the student will give a 15 minute oral presentation on a relevant topic. The purpose of this course is to outline the diagnostic evaluation of musculoskeletal diseases encountered with attention to cost effective strategies, demonstrate understanding of history and physical examination findings and integrate radiographic and pathologic data where appropriate and demonstrate understanding of the pathologic basis of the disease process and how the pathologic information impacts treatment.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

MSPTH 5860 - IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

The immunology program in the division is oriented toward basic and clinical immunology genetics. These problems focus on the structure and function of the major histocompatibility complex and the genetic and immunological interactions that occur between the mother and the fetus. The student will learn some of the basic principles of transplantation immunobiology and how basic research in this area impinges on a variety of problems in clinical medicine. A minimum of 2 four-week blocks is required.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

MSPTH 5861 - BIOLOGY OF CANCER

Minimum Credits: 0

Maximum Credits: 0

This four or eight week course will stress the investigations relevant to clinical oncology. Subjects include carcinogen target cell interactions, analysis of tumor progression and regression, tumor metastasis, cell differentiation and therapeutic responses. Students will be exposed to various experimental techniques such as electron microscopy, tissue and cell cultures, animal models and selected biochemical studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5862 - BIOCHEMISTRY PATHOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four or eight week elective is to provide students with an experience studying the biochemical basis for both clinical and experimental disease. Students will have a brief rotation through selective areas of the clinical biochemistry laboratory and will then be assigned to work with a staff pathologist, providing review of laboratory data and consultation on unusual clinical problems.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

MSPTH 5863 - TUMOR IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide exposure to basic and clinical aspects of tumor immunology. Students may elect to spend up to four weeks on this rotation. During this elective the student will have the opportunity to investigate various aspects of tumor immunology as it relates to pathophysiology of tumor invasion and metastasis. The student may also have the opportunity of rotating through clinical labs.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

MSPTH 5865 - HEAD, NECK AND ORAL PATHOLOGY

Minimum Credits: 0
Maximum Credits: 0

The student participates in slide sign-out in the morning and afternoon with the attending pathologists. The slide readings offer a focused review of head, neck and oral histology and histopathology as well as integrate the related case histories. The student also takes part in frozen section call for the operating room with the head and neck pathologist to learn evaluation of gross specimens and appropriate margins of resection. A portion of the rotation will also include participation in clinical consultations in the hospital or outpatient clinics, where experience will be gained in assessment and diagnosis of head and neck pathology. The student also plans a review of slides from the pathology case files to ensure a comprehensive review of head, neck and oral histopathology is obtained. The student attends relevant pathology conferences and ENT tumor board as time and schedule permit. The student will also construct an oral presentation on a pertinent head and neck pathology topic agreed upon between the attending and student.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: Grad LG/SU5

MSPTH 5869 - INDEPENDENT STUDY IN PATHOLOGY

Minimum Credits: 0
Maximum Credits: 0

Opportunity for flexible independent study in anatomic, clinical or investigative pathology for a maximum of 3 months. Must be arranged and approved in advance.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

MSPTH 5900 - EXTRAMURAL PATHOLOGY

Minimum Credits: 0
Maximum Credits: 0

A clinical experience in pathology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

Pediatric Dentistry

PEDENT 2010 - GRADUATE PEDIATRIC DENTAL CLINIC 1

Minimum Credits: 1
Maximum Credits: 1

This clinic will provide training and experience in principles of preventive dentistry, cavity preparations and restorative procedures, interceptive orthodontic appliance fabrication, and treatment of the handicapped patient for newly enrolled advanced pediatric dentistry specialty residents.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2020 - GRADUATE PEDIATRIC DENTAL CLINIC 2

Minimum Credits: 1
Maximum Credits: 3

This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PEDENT 2030 - GRADUATE PEDIATRIC DENTAL CLINIC 3

Minimum Credits: 1
Maximum Credits: 3

This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients, patients with handicapping conditions, and patients requiring limited orthodontic therapy.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2040 - GRADUATE PEDIATRIC DENTAL CLINIC 4

Minimum Credits: 1

Maximum Credits: 1

This clinic will provide training and experience for the first year advanced pediatric dentistry specialty resident in the treatment of pediatric dental patients. Patients with handicapping conditions, and patients requiring limited orthodontic therapy.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2050 - GRADUATE PEDIATRIC DENTAL CLINIC 5

Minimum Credits: 1

Maximum Credits: 3

This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate, and orofacial abnormalities, patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2060 - GRADUATE PEDIATRIC DENTAL CLINIC 6

Minimum Credits: 1

Maximum Credits: 3

This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2070 - GRADUATE PEDIATRIC DENTAL CLINIC 7

Minimum Credits: 1

Maximum Credits: 1

This clinic will provide training and experience for the second year advanced pediatric dentistry specialty resident in the dental treatment of patients with cleft lip, cleft palate and orofacial abnormalities. Patients requiring general anesthesia for dental treatment, and pediatric dental patients with advanced restorative and orthodontic treatment needs will be managed in this clinic.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 2110 - GRADUATE PEDIATRIC DENTAL SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to the specialty of pediatric dentistry. Material on preventive principles, restorative techniques, and dental materials will be provided. Seminars on physical and mental handicapping conditions will be given.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDENT 2120 - GRADUATE PEDIATRIC DENTAL SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This course will provide an introduction to advanced pediatric dentistry. Various topics on pediatric dentistry are included for discussion. Diagnosis, case presentation and case review will be included in this seminar.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDEENT 2130 - GRADUATE PEDIATRIC DENTAL SEMINAR 3

Minimum Credits: 1

Maximum Credits: 3

This course will provide material to the first year advanced pediatric dentistry specialty resident on pulp biology. Topics on pulp morphology, response and treatment are discussed. Diagnosis, case presentation and case review will be included in this course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

PEDEENT 2140 - GRADUATE PEDIATRIC DENTAL SEMINAR 4

Minimum Credits: 1

Maximum Credits: 1

This course will provide material to the first year advanced pediatric dentistry specialty resident on the diagnosis and treatment of traumatic injuries. The use of pharmacotherapeutic agents in the management of the pediatric dental patient will also be discussed in this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDEENT 2150 - GRADUATE PEDIATRIC DENTAL SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

This course will provide the second year advanced pediatric dentistry specialty resident material on the dental treatment of patients with cleft lip, cleft palate and/or other craniofacial abnormalities. Topics on genetics, epidemiology, pathogenesis, growth and development, speech, and syndromes will be included in this course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDEENT 2160 - GRADUATE PEDIATRIC DENTAL SEMINAR 6

Minimum Credits: 1

Maximum Credits: 3

This course will provide material to second year advanced pediatric dentistry specialty residents on the maintenance of the dental arch through the use of space maintaining appliances. Additional topics on systemic diseases, fluorides and general anesthesia are discussed.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

PEDEENT 2170 - GRADUATE PEDIATRIC DENTAL SEMINAR 7

Minimum Credits: 1

Maximum Credits: 1

This course will provide material to the third year advanced pediatric dentistry specialty resident on pediatric dental practice management. Office design, practice finance and payment options are discussed in this course. Computer utilization and practice alternatives are also presented.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PEDEENT 2230 - SPECIAL WORK

Minimum Credits: 1

Maximum Credits: 3

This course will provide the opportunity for the advanced specialty resident to pursue the independent study of a topic of interest in pediatric dentistry.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

PEDEENT 5211 - PEDIATRIC DENTISTRY 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented with material specific to the specialty of pediatric dentistry. The goal of the course is to introduce the second year predoctoral student to foundational knowledge in pediatric dentistry and provide information on various topics concerning the pediatric dental patient, including: morphology and eruption of teeth; oral habits; evaluation of the developing occlusion; clinical management of arch length; physical growth and development; prenatal and infant oral health; caries disease prevention and management; adolescent oral health care dentistry; behavior guidance and modification; and advanced behavior management. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PEDENT 5242 - PEDIATRIC DENTISTRY 2

Minimum Credits: 2

Maximum Credits: 2

A preclinical course introducing the second year dental student to current concepts of clinical pediatric dentistry including restorative and space maintenance treatment modalities. A second goal of the course is to present skills and techniques to develop motor coordination in anticipation of clinical care for the pediatric dental patient.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PEDENT 5253 - PEDIATRIC DENTISTRY 3

Minimum Credits: 1

Maximum Credits: 1

A lecture course presenting concepts of pulpal therapy, information regarding child abuse and neglect, and restorations for the pediatric dental patient.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PEDENT 5315 - PEDIATRIC DENTISTRY 4

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be presented material specific to the specialty of pediatric dentistry. The goal of the course is to enhance the foundational knowledge from the two previous didactic courses in pediatric dentistry (PEDENT 5211 and 5253) and to provide information on various topics concerning the pediatric dental patient including trauma to primary and permanent dentitions; oral medicine and oral-facial pathology; patients with special health care needs; and interdisciplinary case management, the theme of the third year curriculum. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PEDENT 5379 - CLINICAL PEDIATRIC DENTISTRY 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of pediatric dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to pediatric dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the pediatric patient.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

PEDENT 5449 - CLINICAL PEDIATRIC DENTISTRY 2

Minimum Credits: 2

Maximum Credits: 2

This course will focus on preventive and restorative procedures for the pediatric dental patient. Clinical experiences in the diagnosis and treatment planning of children and adolescents will be provided.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PEDENT 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 1

This course will provide the opportunity for the first professional dental student to pursue the independent study of a topic of interest in pediatric dentistry.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

PEDENT 5915 - ADVANCED PEDIATRIC DENTISTRY

Minimum Credits: 1

Maximum Credits: 1

The advanced pediatric dentistry elective is a clinical rotation in the graduate pediatric clinic where the student has the opportunity of treating advanced pediatric restorative and management cases. Treatment of children requiring advanced management techniques including, but not limited to, premedication, N₂O/O₂, and general anesthesia will be provided by the dental students under the direct supervision of attending faculty. Advanced treatment planning and restorative procedures will also be undertaken.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

Pediatrics

PEDS 5345 - PEDS CLERKSHIP REPEAT COURSE

Minimum Credits: 0

Maximum Credits: 0

This course will be registered when the necessity to record a student's makeup of an unsatisfactory clerkship is required. This course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PEDS 5351 - PEDIATRIC INPATIENT MEDICINE

Minimum Credits: 0

Maximum Credits: 0

A 4 week inpatient pediatric clerkship in which students will participate in all aspects of patient care and management. Expectations are to read both the current literature and the standard pediatric textbooks in order to understand childhood growth and development and important pediatric disease processes. Attendance at conferences, lectures and rounds is expected. Students are part of the floor medical team and take call every 4 days. Each student will present a clinicopathologic conference (CPC). At the end of the rotation a 3 hour multiple choice exam is given.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5386 - INDIVIDUAL STUDY OR RESEARCH

Minimum Credits: 0

Maximum Credits: 0

The department of pediatrics will arrange an individual study or research experience for third year medical students in an area of their interest.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PEDS 5401 - ADV PEDIATRIC IN-PATIENT (AI)

Minimum Credits: 0

Maximum Credits: 0

Four week acting internship at children's hospital. Students have same responsibility as intern-total patient care including complete history, physical exam, assessment lab data, case formulation, communication with attending and referring physician, formulation of discharge plans, discharge summary. Performance of procedures including lumbar punctures, iv and intra-arterial punctures, bladder tap, bone marrow aspiration, performance and interpretation gram stain of CSF, blood smear for red cell, white cell platelet morphology. Interpret routine films and urinalysis.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5406 - EXTRAMURAL ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will register for this course when participating in a pediatric acting internship at an institution outside of the University of Pittsburgh School of Medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5410 - PRIMARY CARE PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

The general purpose of this elective is to provide students with component experiences of a primary care physician. To this end, the student will 1) examine newborn infants in a neonatal high-risk setting, counsel parents regarding well baby issues and help formulate plans for common newborn problems; 2) develop management plans for children who present for initial neonatal visits, acute illnesses and chronic problems; 3) enhance knowledge of common pediatric behavioral and developmental issues and diagnosis and follow-up of otitis media & 4) learn how to provide telephone advice.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5421 - ALLERGY AND IMMUNOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four week elective offers an opportunity to participate in the clinical evaluation and management of ambulatory patients who present with a large variety of immunologically mediated diseases of either hypersensitivity or deficient immune response origin. Under supervision, students will carry out the initial evaluation and subsequent re-evaluation of patients with asthma, allergic rhinitis, urticaria, drug allergy, insect allergy, immunodeficiency syndromes, as well as a large variety of clinical immunology and/or collagen-vascular diseases.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5425 - PEDIATRIC RHEUMATOLOGY

Minimum Credits: 0

Maximum Credits: 0

The students will get outpatient and inpatient exposure in the field of pediatric rheumatology with a particular emphasis on outpatient clinics. There is in-depth one-on-one teaching through the pediatric rheumatology attending physicians. Students will generally work with one particular attending physician for a clinic section, but will be exposed to different attending physicians throughout the rotation. The student will be directly involved in patient care, assessment and decision-making. Participation in academic conferences and selected lectures is mandatory.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

PEDS 5430 - PEDIATRIC CARDIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital. Diagnosis and management of child with congenital and rheumatic heart disease. Interpret EKG, echocardiograms and chest roentgenograms. Observe cardiac catheterization lab, take pediatric cardiac history, attend cardiac catheterization and cardiac surgery conferences. Pursue basis of selection of patients for cardiac catheterization and cardiac surgery.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5440 - ENDCRNLYG, METBLSM & DIABETES

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital. Out-patient evaluation of children with endocrine or metabolic disease. Participate in clinic and research activities, teaching rounds on endocrine ward and clinical research unit. Clinical diagnostic and management of endocrine disorders, metabolic bone disease, parathyroid and adrenal disorders, diabetes mellitus. Interpret endocrine and metabolic studies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5450 - PEDIATRIC INFECTIOUS DISEASES

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital of consult experience on infectious disease of hospitalized pediatric patients including rounds, lectures, conferences and seminars. Study antibiotic therapy, diagnosis and management of CNS, pulmonary and urinary tract infections. Evaluate gram-stained smear, urine cult results and antibiotic tests.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5455 - PEDIATRIC DERMATOLOGY

Minimum Credits: 0

Maximum Credits: 0

Medical students will be exposed to both common and rare skin disorders seen in both outpatient and inpatient settings. Objectives: 1) develop a familiarity with terminology used to describe primary and secondary skin lesions; 2) develop a familiarity with both the diagnosis and treatment of common skin disorders such as, acne and eczema, lesions, such as hemangiomas and nevi, as well as rare skin conditions such as Geno dermatoses including ichthyoses and epidermolysis bullosa; 3) develop interviewing skills with pediatric patients and their families; 4) obtain experience in performing cutaneous physical exams in pediatric patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

PEDS 5460 - NEONATOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at Magee Women's Hospital neonatal intensive care unit joining residents as acting intern. Experience in all areas of newborn care including recognition and treatment of critical infants. Perform exams, utilize basic lab procedures and x-ray, perform umbilical vessel catheterization, arterial and venous puncture, bladder tap, endotracheal intubation. Discuss dynamics of sick, premature and dying infants.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5465 - BREASTFEEDING ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

This elective will prepare future physicians, especially those pursuing careers in OB/GYN, family physicians, pediatrics and internal medicine, to support women to breastfeed. During this four week elective, students will see mother-infant dyads in the newborn follow-up clinic in primary care center, seeing patients with other providers of lactation services in the hospital and community setting and completing directed readings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5470 - GENETICS

Minimum Credits: 0

Maximum Credits: 0

Four week clinic and laboratory elective at children's hospital. Diagnostic and genetic counseling of common and rare hereditary disorders, syndromes of congenital anomalies, evaluation of in-and-out patients. Lab experience in cytotechnology techniques including interpreting karyotypes.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5480 - NEPHROLOGY

Minimum Credits: 0
Maximum Credits: 0

Four week elective at children's hospital. In- and outpatient rounds and consults, participation in hypertension and pathology conferences. Understanding of urinalysis; evaluation of laboratory studies and radiology of renal disease, electrolyte disorders and pediatric hypertension.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5490 - HEMATOLOGY/ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0

Four week elective at children's hospital. Clinic exposure to pediatric hematology and oncology problems in outpatient chemotherapy unit and various inpatient services. Participate in hematology/oncology clinics and sickle cell clinics. Instruction in peripheral blood and marrow morphology. Participate in rounds and lectures and extensive reading.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5491 - NEONATOLOGY

Minimum Credits: 0
Maximum Credits: 0

The clinical elective in neonatology at Children's Hospital is designed to provide the student with an experience in neonatology that emphasizes the multidisciplinary care of the critically ill newborn. The CHP unit is the region's only level IIIC NICU, and offers the highest level of neonatal care, including surgical services and ECMO. As a referral center, the CHP NICU cares for a unique population of high-acuity, medically-complex infants with a wide variety of problems, including cardiorespiratory failure, infections, surgical issues, genetic disorders and congenital anomalies. Currently, the newborn medicine program only offers an elective in the Magee Women's Hospital NICU, which cares for a very different population of infants, with an emphasis on premature infants and infants with transient problems related to the neonatal transition. The elective rotation in the CHP NICU will offer students exposure to a one-of-a-kind patient population, a full-spectrum of neonatal medicine, and a level of multidisciplinary care not available anywhere else in the region. Students will join the CHP NICU team under the direct supervision of neonatology faculty. The NICU team is made up of attending neonatologists, neonatal-perinatal medicine fellows, neonatal nurse practitioners, pediatric residents, neonatal nurses, and specialized ancillary providers, including pharmacists, nutritionists and therapists. The student will be involved in all aspects of care, including initial assessment, stabilization, diagnostic evaluation and ongoing ICU management. The student will perform procedures such as arterial puncture, umbilical arterial or venous catheterization, lumbar puncture, thoracentesis, paracentesis and endotracheal intubation under the supervision of NICU staff. The student will gain experience in family-centered care. Students will be supervised directly by newborn medicine faculty, with one-on-one precepting throughout the rotation. Newborn medicine fellows and neonatal nurse practitioners will be available as teaching resources. The course director is available in the NICU should the student require additional support. Educational methods will include bedside teaching focused on the student's panel of patients, daily NICU rounds, demonstration of clinical skills and procedures, and didactic sessions (the newborn medicine program's seminars in neonatal medicine, core lecture series, and newborn grand rounds). Key references will be provided. Students may attend sessions of the AAP/AHA neonatal resuscitation program (scheduled bimonthly). The course director will provide an updated schedule of educational activities on the first day of the rotation. This 4 week inpatient rotation takes place in the neonatal intensive care unit at CHP. Students will assume the care of a panel of 2-4 NICU patients, selected according to their interests

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5500 - EMERGENCY PEDIATRICS

Minimum Credits: 0
Maximum Credits: 0

Four week elective at children's hospital in emergency department. Experience in assessment and management of acute illnesses and injuries. Technical skills such as drawing blood, starting IVs, lumbar punctures. Interpret lab studies and x-rays in acute situations. Distinguish mildly acute from serious in emergency situations. Interaction skills with acutely ill and injured child.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

PEDS 5510 - PEDIATRIC GASTROENTEROLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective at children's hospital involves supervised direct patient contact and formal didactic sessions including inpatient consults, outpatient clinics and assisting in all GI procedures. Eight week research elective provides opportunity to gain skills in clinical or basic investigation of bile acid metab, gastroesophageal reflux or GI immunology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5520 - DEVELOPMENTAL PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

Four week elective in child development unit. Focuses on normal child development and development and behavioral disabilities. Includes didactic sessions, reading, field experience and team assessments in outpatient clinic setting. Develop assessments of inpatients at children's hospital and in the ICU at Magee Women's Hospital.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5521 - TRIPLE BOARD PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at Children's Hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5530 - POISON CENTER

Minimum Credits: 0

Maximum Credits: 0

4 week elective at poison center. Basic principles of managing cases of exposure to toxic materials. Under close supervision, manage poison case via the telephone. Exposure to principals of development and operation of a poison center. Includes rounds on toxicology patients at Children's Hospital. 8 week elective includes independent research.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

PEDS 5540 - PEDIATRIC PULMONOLOGY

Minimum Credits: 0

Maximum Credits: 0

4 week elective at Children's Hospital. Includes history taking, physical exam, choice of diagnostic procedures, perform pulmonary lab tests, reading chest radiographs. Inpatient, outpatient and ICU patients seen. Basic review of pulmonary physiology. Observe and participate in lab testing procedures, interpret results with staff. Observe and help in research projects and clinical investigation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5550 - ADOLESCENT MEDICINE

Minimum Credits: 0

Maximum Credits: 0

4 week elective at children's hospital. Includes normal and abnormal adolescent development, reading and discussion. Learn exam skills and lab testing. Diagnosing sexually-related problems. Participate in psychosocial assessments of teens. Work in outpatient clinic and inpatient consults.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5560 - AMBULATORY PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is designed to provide a primary care pediatric experience in a community setting. The hours and specific duties will be determined by each practice. The student is responsible for contacting and setting up the elective and then obtaining approval from the medical student program director in the department of pediatrics. Supervision and evaluation is provided by the primary care physicians in the practice.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5570 - ADOLSCNT AND YOUNG ADULT MEDICN

Minimum Credits: 0

Maximum Credits: 0

This four week elective encompasses a diverse offering in adolescent and young adult medicine. Its clinical content is based at an urban teaching hospital and its college health affiliates. Daily rounds, preceptorships and conferences are part of the rotation with supervision by mercy's full-time pediatric faculty.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5580 - SCHOOL HEALTH

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide a unique school health experience utilizing urban and suburban schools including school based clinics for teaching sites. This specialized experience will include experience with health education, team meetings and school consultation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PEDS 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of pediatrics to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

PEDS 5720 - MOLECULAR MEDICINE (ILS)

Minimum Credits: 0

Maximum Credits: 0

This course is designed to teach the fourth year medical student some basics of molecular biology and how molecular techniques are being employed to diagnose and treat disease. This course will focus on several single-gene diseases. Forensic use of DNA will also be featured. This course will have 3 lectures and 3 clinics per week and each student will be obliged to give a presentation on a topic selected.

Academic Career: Medical School

Course Component: Lecture

Grade Component: H/HS/S/LS/U

PEDS 5845 - PEDIATRIC RESEARCH

Minimum Credits: 0

Maximum Credits: 0

4 week research elective available with individual pediatric faculty members at children's hospital.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PEDS 5899 - INDEPENDENT STUDY PEDIATRIC

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PEDS 5900 - EXTRAMURAL PEDIATRICS

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in pediatrics may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Periodontics

PERIO 2110 - PERIODONTICS SPECIALTY CLINIC 7

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2111 - PERIODONTAL LITERATURE REVIEW 1

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2112 - SPECIAL TOPICS IN PERIODONTICS 1

Minimum Credits: 0

Maximum Credits: 0

This seminar will feature guest lecturers invited to present specific topics related to the practice of periodontics and periodontal therapy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2114 - MINERALIZED TISSUE BIOLOGY

Minimum Credits: 1

Maximum Credits: 1

Understanding the present efforts to elucidate mechanisms for bone healing encompasses study of numerous growth factors and signaling molecules. The role of each factor will be described and related to potential therapeutic products. At the completion of the course the student will be familiar with bone biology; given the opportunity to demonstrate capacity for critical evaluation of a paper on tissue engineering and its foundation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PERIO 2119 - PERIODONTICS SPECIALTY CLINIC 1

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2120 - PERIODONTICS SPECIALTY CLINIC 8

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2130 - PERIODONTICS SPECIALTY CLINIC 9

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2140 - PERIODONTAL TREATMENT PLANNING 1

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2141 - PERIODONTAL TREATMENT PLANNING 5

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, and implants.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2142 - PERIODONTICS JOURNAL CLUB - 1

Minimum Credits: 0

Maximum Credits: 0

This course encompasses a review of the latest dental and medical journals for the most recent information related to the art, science and practice of periodontics. It will focus on correlating and comparing new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2144 - PERIODONTICS ASPECTS OF DENTAL IMPLANTS

Minimum Credits: 1

Maximum Credits: 1

This course is designed to present to the graduate resident the different implants systems, selection criteria of implant cases, and guided tissue regeneration as it applies to implantology. The management of failing implants will be also discussed.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2146 - PERIODONTAL RESEARCH 1

Minimum Credits: 1
Maximum Credits: 3

The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

PERIO 2147 - IMPLANT PROSTHODONTICS SEMINAR 2

Minimum Credits: 2
Maximum Credits: 2

This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2148 - PERIODONTAL RESEARCH 2

Minimum Credits: 1
Maximum Credits: 1

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2149 - PERIODONTICS SPECIALITY CLINIC 2

Minimum Credits: 3
Maximum Credits: 3

This course is the clinical practice of periodontics for the first year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2150 - PERIODONTICS SPECIALITY CLINIC 10

Minimum Credits: 3
Maximum Credits: 3

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PERIO 2151 - PERIODONTAL LITERATURE REVIEW 2

Minimum Credits: 2
Maximum Credits: 2

Literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PERIO 2160 - PERIODONTICS SPECIALTY CLINIC 11

Minimum Credits: 1
Maximum Credits: 1

This course is the clinical practice of periodontics for the second year resident. The residents are trained in the treatment of advanced types of periodontal disease. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration, implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2180 - PERIODONTIC LITERATURE REVIEW 7

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2181 - PERIODONTAL LITERATURE REVIEW 8

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2182 - PERIODONTICS LITERATURE REVIEW 9

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journal. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2190 - ADVANCED PERIODONTAL CONCEPTS

Minimum Credits: 2

Maximum Credits: 2

This advanced periodontal concepts course is designed to familiarize the graduate student with advanced concepts in the science and art of clinical periodontics through intensive study of textbooks and by means of clinical demonstrations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 2199 - INTRODUCTION TO PERIODONTICS SPECIALTY CLINIC

Minimum Credits: 3

Maximum Credits: 3

This course allows the resident to select a special project.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

PERIO 2210 - SPECIAL TOPICS IN PERIODONTICS 4

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2211 - PERIODONTAL LITERATURE REVIEW 3

Minimum Credits: 2

Maximum Credits: 2

The literature review seminars are designed to provide the graduate student with a review of the classical and up-to date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2212 - SPECIAL TOPICS IN PERIODONTICS 2

Minimum Credits: 1

Maximum Credits: 1

This seminar will continue the guest lecture series related to specific topics in periodontics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2213 - HOSPITAL PERIODONTICS - 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA Residents in the periodontal care of VA patients.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2216 - PERIODONTAL RESEARCH 3

Minimum Credits: 1

Maximum Credits: 3

The graduate periodontal program leads to a Master of Science degree. The residents enrolled in this program must do research and write and defend a thesis as part of their degree requirements. This course is designed to help the resident select a research topic, finalize protocols and initiate pilot studies.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PERIO 2219 - PERIODONTICS SPECIALTY CLINIC 12

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for the first year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planing and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2223 - PERIODONTICS JOURNAL CLUB - 3

Minimum Credits: 1

Maximum Credits: 1

This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2230 - SPECIAL TOPICS IN PERIODONTICS 3

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the first year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2240 - PERIODONTAL TREATMENT PLANNING 2

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2241 - HOSPITAL PERIODONTICS 2

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide hospital training in the management of periodontal problems in patients with chronic medical conditions. The graduate periodontics student will interact with VA residents in the periodontal care of VA patients.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2242 - PERIODONTICS JOURNAL CLUB 2

Minimum Credits: 1

Maximum Credits: 1

This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2244 - PERIODONTAL LITERATURE REVIEW 4

Minimum Credits: 2

Maximum Credits: 2

A literature review seminar designed to provide the graduate student with a review of the classical and up-to-date literature in the periodontal journals. The review of the literature also includes basic science literature and its relationship to periodontal disease.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2246 - PERIODONTAL RESEARCH 4

Minimum Credits: 1

Maximum Credits: 1

Continuation of ongoing research to finalize protocols and initiate pilot studies.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2247 - PERIODONTAL TREATMENT PLANNING 3

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2249 - PERIODONTICS SPECIALTY CLINIC 4

Minimum Credits: 1

Maximum Credits: 1

This course is the clinical practice of periodontics for second year residents. It includes training in examination, diagnosis and periodontal therapy which includes scaling and root planning and periodontal surgery.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

PERIO 2250 - SPECIAL TOPICS IN PERIODONTICS 5

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2251 - CONCEPTS OF MODERN SEDATION

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2252 - INTRAOPERATIVE MANAGEMENT OF COMORBIDITIES

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2253 - PERIODONTICS TREATMENT PLANNING 4

Minimum Credits: 1

Maximum Credits: 1

This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2254 - PERIODONTICS JOURNAL CLUB 4

Minimum Credits: 1

Maximum Credits: 1

This course provides a continuing review of current dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2260 - SPECIAL TOPICS IN PERIODONTICS 6

Minimum Credits: 1

Maximum Credits: 1

This course is a treatment planning seminar attended by the second year residents. The residents present all of their cases at the seminar. The presentation includes a medical and dental history, diagnosis, prognosis and a detailed treatment plan.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2280 - SPECIAL WORK

Minimum Credits: 1

Maximum Credits: 3

This course allows the resident to select a special project.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2289 - PERIODONTICS SPECIALTY CLINIC 3

Minimum Credits: 1

Maximum Credits: 1

Continuation of previous periodontics specialty clinic courses involving increasing complexity of case types and treatments.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad LG/SU3 Basis

PERIO 2313 - HOSPITAL PERIODONTICS 3

Minimum Credits: 1

Maximum Credits: 1

This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2314 - PERIODONTICS JOURNAL CLUB 5

Minimum Credits: 0

Maximum Credits: 0

Periodontics journal club 5 provides a continuing review of the recent dental and medical journals.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2315 - PERIODONTICS JOURNAL CLUB 6

Minimum Credits: 1

Maximum Credits: 1

Periodontics journal club 6 provides a continuing review of recent dental and medical literature related to the art, science and practice of periodontics. Discussion will focus on the correlation of new information with established concepts.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2316 - PERIODONTICS RESEARCH 5

Minimum Credits: 1

Maximum Credits: 1

Continuation of ongoing research to finalize and complete the data and start writing a thesis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2317 - PERIODONTICS RESEARCH 6

Minimum Credits: 1

Maximum Credits: 1

Continuation of ongoing research to finalize the research project and complete writing a thesis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2318 - PERIODONTICS SPECIALTY CLINIC 5

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2319 - PERIODONTICS SPECIALTY CLINIC 6

Minimum Credits: 3

Maximum Credits: 3

This course is the clinical practice of periodontics for the third year residents. The resident will be trained in the use of bone grafts, soft tissue grafting, guided tissue regeneration and implants. The course involves increasing complexity of case types and treatments.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 2320 - PERIODONTAL LITERATURE REVIEW 5

Minimum Credits: 2

Maximum Credits: 2

The periodontal literature review 5 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2321 - PERIODONTICS LITERATURE REVIEW 6

Minimum Credits: 2

Maximum Credits: 2

The literature review 6 seminars are designed to provide the graduate student with a review of the classical and current literature in the periodontal journals. The review of the literature also includes basic science literature and its relation to treatment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2322 - PERIODONTAL TREATMENT PLANNING 6

Minimum Credits: 1

Maximum Credits: 1

This is a multidisciplinary didactic and clinical course planned to provide periodontic residents with a systematic approach to diagnosis, treatment planning and management of patients.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PERIO 2341 - HOSPITAL PERIODONTICS 4

Minimum Credits: 1

Maximum Credits: 1

This course is designed to expose the graduate periodontic student to different hospitals and interact residents in periodontal care of Montefiore University hospital patients. The graduate periodontic student will also interact with oral surgery residents and will perform implant procedures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5141 - PERIODONTOLOGY 1

Minimum Credits: 1

Maximum Credits: 1

The 21st century dentist will see a shifting paradigm toward a more significant and possibly dominant role of bioscience in our biochemical profession. The course continuum of periodontology i and ii will review and show application of the relevant basic science principles utilized in the field of periodontology. It will then build upon those basic principles in helping to achieve diagnostic, therapeutic, and preventive skills in the management of periodontal diseases. A major emphasis will be placed on the effect of oral health/disease on the systemic health/disease of our patients. Finally, in light of current, ongoing, and expanding research in the area of oral/systemic relationships, emphasis will be placed on the combined and cooperative roles of both the dentist and physician in providing comprehensive healthcare to our patients.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5149 - PERIODONTAL INSTRUMENTATION 1

Minimum Credits: 0

Maximum Credits: 0

This course is intended to introduce the dental student to the instrumentation utilized in the performance of periodontal procedures via lectures and simulation clinic exercises. Topics such as instrument grasp(s), operator positioning, and an introduction to the proper use of scalers will be covered.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad HSU Basis

PERIO 5172 - PERIODONTOLOGY 2

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5178 - INTRODUCTION TO CLINICAL PERIODONTICS

Minimum Credits: 1

Maximum Credits: 1

This course will provide students with information and training in all phases of periodontal screening and evaluation, basic demonstration of oral hygiene procedures and professional tooth cleaning by polishing teeth and basic supragingival scaling. The teaching methods employed will include lectures and discussion, one-on-one instruction and demonstration and hands-on student participation.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad HSU Basis

PERIO 5210 - PERIODONTAL INSTRUMENTATION 2

Minimum Credits: 0

Maximum Credits: 0

This course is a continuation of PERIO 5149, Periodontal Instrumentation 1. In this course, students will continue to develop skills in the proper use of instrumentation for the performance of scaling and root planing procedures. Topics such as rest position, fulcrums, instrument grasp(s), and operator positioning will be covered. Ultrasonic instrumentation techniques will also be introduced. This course includes lecture and small group simulation clinic exercises.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PERIO 5211 - PERIODONTOLOGY 1

Minimum Credits: 1

Maximum Credits: 1

This course is designed to provide didactic instruction that teaches the student to diagnose periodontal health and to recognize the changes that occur in the transition from health to disease. Major emphasis will be placed on the biology of the healthy periodontium, the epidemiology, etiology, and the clinical radiographic and histological features of periodontal disease.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5212 - PERIODONTOLOGY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will build upon concepts learned in Periodontology 1 to develop foundational knowledge associated with the clinical aspects of periodontology. We begin by exploring various diseases and conditions affecting the periodontium. Students will then begin to understand periodontal defense mechanisms and how different etiologies and risk factors lead to development of periodontal disease. Students will learn the periodontal clinical examination parameters and how they relate to diagnosis, prognosis, treatment planning, and maintenance therapies. Emphasis is placed on both the basic and clinical science knowledge necessary in the diagnosis, treatment, and prevention of periodontal diseases relative to the students introduction to the dental clinics. This course includes lectures, quizzes, and, exams.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5213 - PERIODONTAL CLINIC 1

Minimum Credits: 0

Grade Component: Grad HSU Basis

PERIO 5279 - CLINICAL PERIODONTICS 1

Minimum Credits: 3
Maximum Credits: 3
Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.
Academic Career: Dental Medicine
Course Component: Clinical
Grade Component: Grad HSU Basis

PERIO 5313 - PERIODONTOLOGY 3

Minimum Credits: 1
Maximum Credits: 1
Third year students will receive instruction in clinical examination and charting, occlusion and surgical anatomy. They will be taught to arrive at a diagnosis and treatment plan. Finally, the following periodontal therapy will be discussed: introduction to periodontal surgery, different types of periodontal surgery, suturing, post-operative management, periodontal considerations in restorative, orthodontics, and periodontal treatment, maintenance.
Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

PERIO 5319 - CLINICAL PERIODONTICS 2

Minimum Credits: 2
Maximum Credits: 2
Procedures will include clinical diagnostic methods, treatment decision making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.

Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and

grafts.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PERIO 5376 - PERIODONTOLOGY 6

Minimum Credits: 1

Maximum Credits: 1

This course will introduce the fourth year dental student to some of the more recent advances in periodontics and periodontal research. Topics covered will include mechanisms of bacterial infectious disease, concepts of disease activity, new diagnostic tests, antimicrobial therapies, efficacy of non-surgical vs. Surgical therapy, implantology, and periodontics in the practice of dentistry.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PERIO 5379 - CLINICAL PERIODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of periodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with periodontal needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with periodontal needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 5419 - CLINICAL PERIODONTICS 5

Minimum Credits: 2

Maximum Credits: 2

Procedures will include clinical diagnostic methods, treatment decision making and periodontal treatment planning, patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and grafts.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PERIO 5449 - CLINICAL PERIODONTICS 2

Minimum Credits: 2

Maximum Credits: 2

Procedures will include clinical diagnostic methods, treatment decision-making and periodontal treatment planning. Patient communication, patient home care instructions, subgingival scaling and root planing, instrument sharpening, selective occlusal grinding, assessment of treatment outcomes, and periodontal maintenance procedures. Additionally, the student will have the opportunity to be exposed to periodontal surgical procedures such as gingivectomy, flap procedures, regenerative procedures and soft tissue grafts.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

PERIO 5847 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

This directed study is designed for the undergraduate dental student who desires to pursue research interests in basic science. These areas include any one of the following: immunology, microbiology, nutrition or oral biology. The content of the course is specified by the student and approved by the course director. The teaching format is designed to teach the student specific knowledge or skills of research using enhanced faculty interaction and personal contact.

Academic Career: Dental Medicine

Course Component: Directed Studies

Grade Component: Grad HSU Basis

PERIO 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is designed to provide the student with an opportunity to conduct in-depth study in a particular subject area of their choice.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

PERIO 5910 - ADVANCED PERIODONTICS

Minimum Credits: 3

Maximum Credits: 3

Dental students will have the opportunity to become familiar with periodontal surgical concepts and techniques through study of the periodontal literature and through participation in mentor - resident and faculty supervised periodontal flap procedures.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PERIO 5940 - ADVANCED PERIODONTICS - 2

Minimum Credits: 3

Maximum Credits: 3

This course has an overall goal of allowing hands-on exposure to flap access surgery. The student will participate in pre-surgical evaluation and surgical treatment planning of patients with mild and/or moderate periodontal disease, and patients in need of crown elongation surgery. Through observation and participation with their mentor-resident and faculty, they will learn to apply proper flap design, periodontal flap incisions and reflection, surgical debridement and flap closure.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

Pharmacology

PHARM 2001 - PHARMACEUTICAL ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

Current methods utilized in pharmaceutical research for the analysis and isolation of drugs and their metabolites. Theories of extraction, solvent partition and forms of chromatography (adsorption, partition, gas, liquid, counter current, ion exchange, gel-filtration and electrophoresis) are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Pharmacy students only.

PHARM 2003 - INTRODUCTION TO PHARMACOEPIDEMIOLOGY

Minimum Credits: 2

Maximum Credits: 2

Introduction to the field of pharmacoepidemiology which uses epidemiologic methods to examine the benefits or risks of medications in the population.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 2005 - RESEARCH DISCUSSION COURSE

Minimum Credits: 2

Maximum Credits: 2

Course is designed for students enrolled in the non-thesis MS program. The focus of the course is enhancement of the students' understanding of scientific literature and research methodologies. It will also provide an opportunity for students to learn about and discuss research careers, challenges of clinical vs. Preclinical research, research ethics, and professional development.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 2010 - MASTER OF SCIENCE THESIS

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PHARM 2015 - COMPREHENSIVE EXAM: NON-THESIS MASTER OF SCIENCE

Minimum Credits: 1

Maximum Credits: 3

Students will be assigned several research papers to study and review independently. The research papers will serve as the base for an in-class comprehensive examination to assess the student's critical thinking skills, writing competence, and ability to synthesize and integrate knowledge acquired during the MS program.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 2510 - EXECUTIVE BOARDROOM SERIES 1

Minimum Credits: 1

Maximum Credits: 1

This interactive course brings in top pharmaceutical and health care executives and builds on the business and management concepts and principles learned in previous courses. Students are engaged in a structured understanding of the "business of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course follows the dollar from patient to product and service in the following manner: patient->health insurance pharmacy benefit->PBM->pharmaceutical industry->pharmacies. The selection process requires a one-page narrative on the potential contribution(s) of this course to the student's education and/or career goals.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 2511 - EXECUTIVE BOARDROOM SERIES 2

Minimum Credits: 1

Maximum Credits: 1

This interactive course brings in top pharmaceutical and health care executives and builds on business and management concepts. Students are engaged in a structured understanding of the "businesses of pharmacy in health care" and related fields that impact the profession in an executive boardroom format. This course focuses on "entrepreneurship in medicines and health care" and analyzes the fundamentals of entrepreneurship amongst successful executive finders, binders, and minders.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3000 - TOPICS IN NEUROSCIENCE

Minimum Credits: 1

Maximum Credits: 1

The objectives of the course are to strengthen the abilities of research-directed, pre- and postdoctoral students to understand and evaluate current research and to describe that research to others in a concise and meaningful way and to broaden students' understanding of fundamental workings of the central nervous system so as to increase their understanding and appreciation for the basic science which underlies and supports current research in the therapeutic treatment of behavioral and psychiatric disorders.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3002 - ADVANCED PHARMACOKINETICS

Minimum Credits: 4

Maximum Credits: 4

This course deals with fundamental aspects of pharmacokinetic concepts from model building, data analysis and parameter estimates after various routes of drug administration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3004 - ADVANCED PHARMACOKINETICS 2

Minimum Credits: 2

Maximum Credits: 2

This course deals with application of pharmacokinetic concepts to optimizing dosing regimen of drugs in patient population.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3008 - ADVANCES IN DRUG DELIVERY AND TARGETING

Minimum Credits: 3

Maximum Credits: 3

This course covers current advances in drug delivery and targeting. It is designed for intermediate upper level graduate students. The course will make use of invited speakers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3009 - ADVANCES IN PHARMACEUTICAL SCIENCES

Minimum Credits: 1

Maximum Credits: 1

Discussion series on contemporary topics that have direct or indirect impact in the field of pharmaceutical sciences. Each topic will be presented by a speaker and will serve as the basis for detailed discussion.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

Course Requirements: School of Pharmacy students only.

PHARM 3010 - PHD DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 12

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PHARM 3023 - FOUNDATIONS IN PHARMACEUTICAL SCIENCES

Minimum Credits: 5

Maximum Credits: 5

The development of new drugs and new dosage forms, elucidation of mechanisms underlying drug metabolism, and assessments on drug effects and therapeutic responses have been the cornerstone of pharmaceutical sciences. Future pharmaceutical researchers will need broad knowledge of molecular and cell biology of human diseases, understand the principles of chemistry and biochemistry, and learn enabling technologies to gain reliable information that guides research activities. This course will provide students with an overview at the cellular and molecular level on principles of pharmaceutical sciences and contemporary methodologies. Emphasis is placed on understanding of pharmaceutical research by which drugs are developed, formulated, and evaluated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3024 - PHARMACEUTICAL SCIENCES SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3025 - PHARMACEUTICAL SCIENCES SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Weekly program in which graduate students, faculty and invited speakers present seminars on topics of current interest.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3027 - TOPICS IN BIOPHARMACEUTICS AND PHARMACOKINETICS

Minimum Credits: 1

Maximum Credits: 2

Course involves a discussion of current topics of interest in the area of pharmacokinetics and drug metabolism.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Pharmacy students only.

PHARM 3028 - PHARMACOLOGY AND THERAPEUTICS

Minimum Credits: 4

Maximum Credits: 4

Topics include analgesics, antibiotics, antihistamines, autonomic drugs, CNS drugs, cardiovascular drugs, digestive pharmacology, drug abuse, drug laws, hypoglycemics, principles of drug action and reproductive pharmacology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 3032 - MEDICINAL CHEMISTRY

Minimum Credits: 3

Maximum Credits: 3

The course is designed for graduate students starting the second year of a Ph.D. program in chemistry and pharmacy. It teaches the basics of medicinal chemistry and will endow the students with the necessary skills to understand medicinal chemistry scientific literature and to make meaningful proposals of the design/synthesis of drug-like compounds. Topics include energetics of drug-protein interactions, introduction to different types of target classes, introduction to structure based design, including computational chemistry, as well as optimization of hit into leads compound. The course incorporates an extensive exercising part where students are asked to propose and (virtually) perform small target oriented drug discovery projects. Students are required to verbally present twice during this course. Additionally, students are tested twice in written.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3034 - TOPICS IN TRANSLATIONAL RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course is structured as a journal club focused on translational investigations and is being offered jointly with the universities of Minnesota, North Carolina, and Pittsburgh for 1st and 2nd year graduate students from all three programs who will participate in discussions by live video teleconferencing. Articles emphasizing methods which allow for translation from preclinical to clinical investigation will be discussed in several different therapeutic areas with emphasis on pharmacometrics, genomics, biomarker validation, and drug discovery.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

PHARM 3036 - ADVANCES IN DRUG DELIVERY AND REGENERATIVE MEDICINE

Minimum Credits: 1

Maximum Credits: 1

Course is designed to provide the recent developments in the field of drug delivery and regenerative therapies to graduate students. This course, structured as a journal club, will introduce different concepts in drug/gene delivery research through analyzing recent scientific literature. It will also expose students to novel regenerative therapies under development and their role in personalized medicine. If possible, we will also introduce some clinical examples where such regenerative therapies have been successfully used in patients. The course will use scientific research articles from high impact factor journals to introduce these concepts. The course is

intended primarily for first/second year graduate students enrolled in the MS or Ph.D. program specifically in the pharmaceuticals track. Postdoctoral researchers may participate with prior approval from the course coordinators.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3038 - ESSENTIALS COMPETITIVE GRANT WRITING 1

Minimum Credits: 2

Maximum Credits: 2

Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3039 - ESSENTIALS COMPETITIVE GRANT WRITING 2

Minimum Credits: 2

Maximum Credits: 2

Course teaches basic skills of competitive grant writing. Topics include grant structure, grant writing, and preparation of a grant budget.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3040 - STATISTICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Course is designed to teach graduate students standard and advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze simple as well as complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, homework assignments, and exams. At the end of this course, students will have skills to construct and test statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3042 - RESEARCH PRACTICUM

Minimum Credits: 1

Maximum Credits: 12

Course provides practical training in advanced research methodology and skills. Students will be engaged in active research with a faculty member or designate as approved by the student's doctoral committee or by the graduate program director. Students enrolled in the graduate program may register to earn 1-12 units per term until they have advanced to candidacy for the Ph.D. Degree.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 3043 - TEACH ME TO TEACH YOU

Minimum Credits: 1

Maximum Credits: 1

Course is designed to introduce graduate students to the art and science of teaching. Course will essentially consist of a brief presentation by faculty on different aspects and approaches to teaching followed by a 30 minutes presentation of basic concepts related to individual research carried out by graduate students.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

PHARM 3045 - ADVANCED STATISTICAL METHODS

Minimum Credits: 3

Maximum Credits: 3

Course is designed to teach graduate students advanced statistical methods of data analysis. Where appropriate and consistent with the students' educational background, theoretical foundations for statistical methods will be discussed. Students will obtain skills necessary to analyze complex data sets and to identify and apply methods appropriate for solving statistical problems presented during class sessions, in homework assignments, and in exams. At the end of the course, students will have skills to construct and test complex statistical models and will be able to understand statistical methods used in research articles and critique the methods selected.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3047 - INTRODUCTION TO PATIENT-CENTERED RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed for graduate level clinicians and applied researchers. Patient-centered research methods open unique research opportunities, using data they often already have, that cannot be addressed with traditional nomothetic methods such as randomized clinical trials. The course consists of two segments: idiographic experimental designs and data analysis. By the end of the course, students will acquire and practice the skills needed to design an idiographic patient-centered study, statistically analyze the study data and appropriately interpret the results.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3048 - DRUG DESIGN AND DEVELOPMENT JOURNAL CLUB

Minimum Credits: 1

Maximum Credits: 1

Course is designed to provide an opportunity for the students to informally learn and discuss concepts and applications in the area of drug discovery, design and development.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SU3 Basis

PHARM 3049 - SCIENTIFIC WRITING SKILLS

Minimum Credits: 2

Maximum Credits: 2

Course is designed to provide the systematic approach of reading and writing a scientific paper to graduate students. Writing a review or a research paper in the peer reviewed journals is an integral part of the graduate curriculum. Course will introduce different components of a scientific paper, how to read and summarize a scientific paper, methodical approach towards writing a paper and managing references using endnote software.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3050 - RESEARCH PREPARATION

Minimum Credits: 1

Maximum Credits: 1

Course is designed to provide an opportunity for the students to learn applications, guidelines, regulations, and procedures necessary for safe, ethical, and accountable research. Required course for all non-thesis MS students. Elective for all others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

PHARM 3051 - SOCIAL & BEHAVIORAL THEORIES IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 3062 - ADVANCED METHODS IN PHARMACEUTICAL OUTCOMES & POLICY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Graduate level course designed to develop student understanding and skills related to research designs and analytic methods for conducting population-based studies drawn from large observational survey and claims databases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3063 - GRADUATE RESEARCH ROTATION

Minimum Credits: 3

Maximum Credits: 3

Special research projects are conducted under the supervision of a faculty member to acquaint the graduate student with advanced research techniques.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 3067 - CLINICAL PHARMACY ENVIROMENTS

Minimum Credits: 2

Maximum Credits: 2

The successful completion of clinical research is dependent upon an understanding of how healthcare is delivered in the environment where it is conducted. A significant number of clinical studies involve drugs and/or the acquisition of drug concentrations. This course is designed for students who do not have clinical pharmacy experience within the U.S. Healthcare system. The goal is to improve these students' abilities to design clinical/translational research studies by introducing fundamental concepts of how pharmaceutical care is delivered in a U.S. Academic health system. To meet this objective, students will gain an appreciation of how pharmaceutical care is delivered through didactic lectures and guided exposures to multiple clinical pharmacy environments with experienced clinical pharmacists. During each field observation, students will be expected to identify the application of pharmacy and therapeutics interventions. Students will also learn how clinical data is generated and stored to deliver daily patient care and how databases may be used for research purposes. Additionally, students are expected to gain an appreciation for the privacy regulations that are associated with accessing protected health information (phi) for research and their implications for designing and conducting clinical/translational research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 3140 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2

Maximum Credits: 2

Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) Introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PHARM 4999 - FULL TIME STATUS

Minimum Credits: 0

Maximum Credits: 0

Designed to accommodate summer billing for pharmacy students.

Academic Career: Graduate

Course Component: Clinical

Grade Component: No Grade Required

PHARM 5110 - PHARMACIST PATIENT CARE 1: PROCESS AND SKILLS

Minimum Credits: 3

Maximum Credits: 3

First of six semester sequence of courses that support the students' development of competence in four major areas- clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5111 - PHARMACIST PATIENT CARE 2: SKILLS AND ENVIRONMENTS

Minimum Credits: 4

Maximum Credits: 4

The second of six courses that support the students' development of competence in clinical skills, the psychosocial dimensions of pharmacy practice, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5112 - COMMUNITY HEALTH 1: COMMUNICATION AND WELLNESS

Minimum Credits: 1

Maximum Credits: 1

Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5113 - COMMUNITY HEALTH 2: CULTURAL AWARENESS AND BEHAVIOR

Minimum Credits: 1

Maximum Credits: 1

A continuation of experiential education from term 1. Provides students with field-based experience in which they can examine the role of the pharmacy and pharmacists in a variety of practice settings, develop basic dispensing and counseling skills, collect and interpret data from the practice site.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5114 - ANATOMY AND PHYSIOLOGY 1

Minimum Credits: 3

Maximum Credits: 3

First part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 5115 - ANATOMY AND PHYSIOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

Second part of a two course sequence that provides an integrated presentation of human anatomy and physiology. Information about each system is presented to explain the processes involved in homeostasis so that students will develop an understanding of the working of the entire human body. Wherever appropriate, information about mechanisms of action of selected drugs is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Pharmacy students only.

PHARM 5116 - BIOCHEMISTRY 1

Minimum Credits: 3

Maximum Credits: 3

First of two course sequence that enables students to appreciate the chemical process which govern the function of living systems, the molecular basis of disease, the rationale behind use of certain drug classes, and the biochemical basis of clinical diagnostic procedures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5117 - BIOCHEMISTRY 2

Minimum Credits: 3

Maximum Credits: 3

Course builds on principles introduced in biochemistry 1. First portion of course covers topics in molecular biology and gene regulation, particularly as they relate to the etiology and treatment of disease. Second portion of course covers the intermediary metabolism of carbohydrates, proteins, and lipids. Emphasis is placed on errors of intermediary metabolism responsible for human disease.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5118 - PRINCIPLES OF DRUG ACTION

Minimum Credits: 4

Maximum Credits: 4

To enable students to apply principles of drug-receptor interactions, conceptualize principles of medicinal chemistry with regard to drug design and development, understand the relationship between drug action and chemical structure, understand the relationship between dosage forms and oral bioavailability, understand basic pharmacokinetic and pharmacodynamic concepts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5119 - DRUG DEVELOPMENT 1

Minimum Credits: 4

Maximum Credits: 4

Course examines sources of drugs and the process of drug development and the drug approval process. Since drug metabolites may play an important role in the activity or toxicity of a drug, early phases of the approval process require extensive metabolism studies. Course also covers the biochemistry of drug metabolism and chemical pathways of metabolism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5120 - THE EMERGING PROFESSIONAL

Minimum Credits: 1

Maximum Credits: 1

The emerging professional is designed to stimulate the development of professional attitudes and behaviors and an understanding of the opportunities within the pharmacy profession. Professionalism, ethics, management of self, and the profession of pharmacy are themes of the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5121 - CASE CONFERENCE SERIES 2

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5122 - CASE CONFERENCE SERIES 1

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5210 - NONPRESCRIPTION THERAPIES AND SELF-CARE PRACTICE

Minimum Credits: 3

Maximum Credits: 3

The third of a six course sequence that supports students' development of competence in four major areas: clinical skills, social science in pharmacy, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5211 - DRUG LITERATURE ANALYSIS AND EVALUATION

Minimum Credits: 3

Maximum Credits: 3

The fourth of a six-course sequence that supports students' development of competence in four major areas: clinical skills, psychosocial dimensions of practice, managing as a professional pharmacist, and professional inquiry.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5212 - COMMUNITY PHARMACIST PRACTICE 1: PATIENT-CENTERED CARE AND SILVER SCRIPTS

Minimum Credits: 1

Maximum Credits: 1

Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5213 - COMMUNITY PHARMACIST PRACTICE 2: MEDICATION THERAPY MANAGEMENT-IMMERSION IN PRACTICE

Minimum Credits: 1

Maximum Credits: 1

Provides students with field-based experience in which they can examine the psychosocial dimensions of pharmacy practice as well as principles of organizational management. Students continue to develop proficiency in carrying out the pharmaceutical care process and to practice inquiry skills by generating questions from their practice experiences and using drug information and literature to formulate answers to the questions.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5214 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 1

Minimum Credits: 4

Maximum Credits: 4

Introduces students to the organisms responsible for infectious diseases, the epidemiology and pathophysiology of infection, the immunology of host defenses, the major classes of antibiotics and anti-infectives useful in the therapy and prophylaxis of disease, and the thought process leading to cost-effective and safe antimicrobial drug use. At the end of the course, students are expected to be able to select and monitor treatments of various bacterial, fungal, and viral infections.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5215 - PHARMACOTHERAPY OF INFECTIOUS DISEASE 2

Minimum Credits: 4

Maximum Credits: 4

Introduces students to the organisms responsible for infectious diseases, the epidemiology and pathophysiology of infection, the immunology of host defenses, the major classes of antibiotics and anti-infectives useful in the therapy and prophylaxis of disease, and the thought process leading to cost-effective and safe antimicrobial drug use. At the end of the course, students are expected to be able to select and monitor treatments of various bacterial, fungal, and viral infections.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5216 - PHARMACOTHERAPY OF CARDIOVASCULAR DISEASE

Minimum Credits: 4

Maximum Credits: 4

Provides a comprehensive evaluation of the pathophysiology and treatment of cardiovascular disease. The pharmacology and therapeutic use of cardiovascular drugs is presented in relation to the management of hypertension, coronary artery disease, heart failure, arrhythmia, thromboembolic disorders, and acute myocardial infarction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5218 - PHARMACOKINETICS AND DRUG RESPONSE

Minimum Credits: 4

Maximum Credits: 4

Course provides students with a fundamental understanding of the mathematical relationships that are available to quantify the rate and extent of drug absorption, distribution, metabolism and excretion.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5219 - DOSAGE FORM DESIGN AND DELIVERY

Minimum Credits: 4

Maximum Credits: 4

Course provides students with a fundamental understanding of the physical-chemical properties of various drug dosage forms. Students will compound several different dosage forms in the laboratory portion of the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5220 - CASE CONFERENCE SERIES 3

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5223 - GASTROENTEROLOGY/NUTRITION

Minimum Credits: 2

Maximum Credits: 2

Students demonstrate and apply concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected gastrointestinal diseases and states of nutritional deficiency. Students develop the ability to design, monitor, and refine safe and cost effective treatment plans and provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5225 - ADVANCED PHARMACEUTICAL CARE 1

Minimum Credits: 1

Maximum Credits: 1

Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in 'capstone' experiences to manage pharmaceutical care problems in ambulatory and acute care settings.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5227 - CASE CONFERENCE SERIES 4

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5310 - PROFESSION OF PHARMACY 5

Minimum Credits: 3

Maximum Credits: 3

Course provides knowledge and experience in the major areas of clinical skills, psychosocial dimensions, pharmacy management, and professional inquiry. Specific topics include pharmacy law, pharmacoeconomics, drug use and disease state management, and institutional pharmacy systems and practice. Individual and group presentations will be used to critically examine recent clinical trials and enhance the communication skills of students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5311 - SAFE MEDICATION USE AND PHARMAECONOMICS

Minimum Credits: 2

Maximum Credits: 2

Provides the knowledge, skills and attitudes necessary to practice pharmacy. Will focus on clinical skills, psychosocial dimensions of practice, pharmacy management and professional inquiry. Topics include principles of pharmacoeconomics, pharmacoeconomic decision making, quality improvement and total quality management, and population-based decision making. Individual and group presentations, case analyses and projects will be used to incorporate pharmacoeconomic principles into therapeutic decision-making and enhance the communication skills of students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5312 - HEALTH SYSTEM PHARMACY 1: OPERATIONS AND DISPENSING

Minimum Credits: 1

Maximum Credits: 1

Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5313 - HEALTH SYSTEM PHARMACY 2: ADVANCED PRACTICE & MANAGEMENT

Minimum Credits: 1

Maximum Credits: 1

Students will experience and develop professional skills and abilities in the setting of institutional pharmacy practice through observation and participation in activities such as drug distribution and preparation, evaluation and monitoring of patient-specific therapies, pharmacy system, quality assessment, and formulary control.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5314 - IMMUNOLOGY

Minimum Credits: 2

Maximum Credits: 2

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry, and therapeutics in the evaluation and treatment of selected diseases of the immune system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and provide appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5315 - ONCOLOGY/HEMATOLOGY

Minimum Credits: 2

Maximum Credits: 2

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of various types of cancer and diseases of the blood. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5316 - PULMONOLOGY/RHEUMATOLOGY

Minimum Credits: 2

Maximum Credits: 2

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected pulmonary and rheumatic diseases. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5318 - ENDOCRINOLOGY

Minimum Credits: 3

Maximum Credits: 3

Students will demonstrate and apply core concepts of physiology, pharmacology, chemistry and therapeutics in the evaluation and treatment of selected disorders of the endocrine system. Students will develop their abilities to design, monitor and refine cost-effective and safe treatment plans and appropriate information to patients, caregivers and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5319 - NEUROLOGY/PSYCHIATRY

Minimum Credits: 4

Maximum Credits: 4

Students will demonstrate and apply core concepts of pathophysiology, medicinal chemistry, pharmacology, and therapeutics in the evaluation and treatment of selected neurological and psychiatric disorders. Students will develop the abilities required to design, monitor, and refine effective, safe, and cost-effective treatment plans and be able to provide appropriate information to patients, caregivers, and health professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5320 - POPULATION HEALTH AND MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

The course focuses on the United States health system and its connection to the pharmacist, principles of management and business for the pharmacist, and public health pharmacy. Core concepts addressed will include: health disparities, program development and evaluation, health literacy, health behavior change, access to essential medicines, health care reform, payment structures, business planning, personal and professional management, human resources, advocacy, emergency preparedness, safety nets, cultural competency, and global health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5321 - CRITICAL CARE & NEPHROLOGY

Minimum Credits: 2

Maximum Credits: 2

Students integrate knowledge and skills to design, monitor, assess and refine safe and cost effective treatment plans, as well as design appropriate information materials for patients, caregivers, and health professionals. Expanding on knowledge of disease states and therapies reviewed in previous or concurrent courses, students will be challenged in "capstone" experiences to manage pharmaceutical care problems in ambulatory, acute care, and critical care settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5322 - PHARMACY LAW

Minimum Credits: 2

Maximum Credits: 2

This course is focused on pharmacy law, with a focus on general concepts of constitutional law and an overview of the legal process in the United States. Students will learn by analyzing statutes, regulations, and case law examples. The areas covered will include laws and regulations relevant to pharmacy practice, civil liability including malpractice, and some business-related legal material.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5323 - CASE CONFERENCE SERIES 6

Minimum Credits: 1

Maximum Credits: 1

The Case Conference Series is developed in collaboration with term courses to provide additional opportunities for each student to develop and enhance a cohesive, consistent and comprehensive approach to the patient care process. Knowledge and skills for emphasis include, but are not limited to, retrieval and critical evaluation of quality health care information, patient assessment, clinical decision making, development of pharmaceutical care plans, verbal and written communication with patients and other health care providers, and professional behaviors. Patient case activities reinforce the knowledge and skills introduced in concurrent courses within the term, as well as reinforcing previously-learned scientific and patient care principles, skills, and knowledge.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5324 - CASE CONFERENCE SERIES 5

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad HSU Basis

PHARM 5400 - PHARMD SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Students learn communication and organizational skills necessary to present professional seminars.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5401 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 1

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5402 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 2

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5403 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 3

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5404 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 4

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5405 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 5

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5406 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 6

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5407 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 7

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5408 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 8

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5409 - PHARMD ADVANCED PHARMACY PRACTICE EXPERIENCE 9

Minimum Credits: 5

Maximum Credits: 5

Field-based experiences that provide students with opportunities to develop mastery of the pharmaceutical care process in patient-care settings. Students are required to register for 1 acute care, 1 ambulatory care, an additional acute or ambulatory care, 1 advanced institutional practice, 1 advanced community pharmacy practice, and 2 elective rotations.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

PHARM 5410 - ADVANCED PHARMACY PRACTICE EXPERIENCE 1 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5411 - ADVANCED PHARMACY PRACTICE EXPERIENCE 2 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5412 - ADVANCED PHARMACY PRACTICE EXPERIENCE 3 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5413 - ADVANCED PHARMACY PRACTICE EXPERIENCE 4 - INTERNATIONAL

Minimum Credits: 5

Maximum Credits: 5

Field-based experience that provides students with the opportunity to gain an understanding of how healthcare and pharmaceutical care are delivered in countries other than the United States. Examples of areas that have hosted students include Australia, England, Ghana, Honduras, Ireland, Italy, and Malawi. The school continuously seeks to expand these opportunities. International rotations are considered elective experiences.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: School of Pharmacy students only.

PHARM 5800 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5801 - PHARMACEUTICAL CARE TO UNDERSERVED POPULATIONS

Minimum Credits: 1

Maximum Credits: 6

A sequence of courses that address issues related to providing pharmaceutical care to underserved populations. Topic areas that will be addressed include: psychosocial factors impacting health, political and economic influences on health care access, community advocacy and resources, patient assessment, clinical problem solving skills, pharmacotherapy management, and patient education. Students will have opportunities for interdisciplinary care and educational sessions.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5805 - COMMUNITY PHARMACY MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Discussion of the principles and procedures of management involved in community pharmacy practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5806 - PEDIATRIC PHARMACEUTICAL CARE

Minimum Credits: 2

Maximum Credits: 2

Provides students with opportunities to acquire the knowledge and skills necessary to provide pharmaceutical care to pediatric patients of all ages.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5808 - COMPREHENSIVE DIABETES MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This internet-based course provides students with a multidisciplinary foundation in the principles of diabetes management. Students will develop their knowledge and ability to assess, manage, educate and monitor patients with diabetes. Pathophysiology, monitoring, complications, and treatment including pharmacotherapy, medical nutrition therapy, and exercise therapy will be explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5809 - PRINCIPLES AND TECHNIQUES FOR TEACHING

Minimum Credits: 1

Maximum Credits: 1

Students will explore the art and science of teaching and careers in higher education. After an introduction to the literature in higher education and the principles of instructional design, participants will have opportunities to design and deliver a unit of instruction on a current healthcare topic, facilitate learning in a laboratory setting, and apply principles of assessment to the evaluation of teaching by peers. Students must be able to attend practica sessions on selected dates at the Bidwell Training Center (1650 Metropolitan Street, Pittsburgh, PA 15233).

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5811 - CLINICAL NUTRITION

Minimum Credits: 1

Maximum Credits: 1

Course examines the provision of adequate nutrition and nutritional support to ambulatory and hospitalized patients as well as the relationships between nutrition and disease and drug therapy and nutrition.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5812 - HEALTHCARE INNOVATIONS 1

Minimum Credits: 1

Maximum Credits: 1

Students will be able to effectively participate in a healthcare innovation application team as either a leader or participant that results in the application of an evidence-based healthcare innovation, which leads to improved patient care. Students will be able to develop detailed and effective strategic frameworks from which they can outline and track their progress in implementing a healthcare innovation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5813 - ACUTE CARE PHARMACOTHERAPY SIMULATION

Minimum Credits: 3

Maximum Credits: 3

Course is designed to allow students to apply clinical knowledge, skills and attitudes gained in previous courses to care for patients with advanced cardiovascular diseases and those that are critically ill. Students will expand on the concepts gained throughout the pharmacotherapy of cardiovascular disease course. Course utilizes simulation based learning to enhance clinical decision-making processes. A major component of the course is self-study requiring an adult learning approach to education. The adult learning concept will require students to be responsible for and highly interactive in achieving the objectives of the course. This learning environment will foster clinical decision making and reinforce concepts learned throughout the school's curriculum. Also, it will provide an excellent source for objective assessment of student knowledge and performance.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5814 - GLOBAL HEALTH: DETERMINANTS AND APPLICATION

Minimum Credits: 3

Maximum Credits: 3

This course for third professional year pharmacy students will introduce and discuss important topics in global health, focusing specifically on care of the underserved in a global context. Topics discussed will include health policy and economics, determinants of health, essential medicines, community-oriented primary care, structural violence, malnutrition and tropical medicine. In addition to readings and weekly discussion groups, students will have the opportunity to gain valuable practice-based skills by working in underserved clinics in Pittsburgh.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5815 - CONCEPTS OF MANAGED CARE PHARMACY

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to understand the fundamental concepts in managed care pharmacy and the relation to the healthcare system. This course supports the school's mission by enabling students to better navigate and understand the healthcare system from the perspective of different stakeholders to help optimize pharmaceutical care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5816 - NEPHROLOGY PATIENT CARE

Minimum Credits: 1

Maximum Credits: 1

The purpose of this course is to introduce students to the delivery of pharmaceutical care to end-stage renal disease (ESRD) patients receiving outpatient hemodialysis therapy. The course is structured as a longitudinal patient-centered experience. It integrates nephropharmacology-related concepts and continuous, direct patient care. This is accomplished via critical evaluation of all clinical data and involvement in patient care activities, multidisciplinary patient rounds, case studies, oral presentations, pharmacotherapeutic discussions, literature evaluations, and other selected exercises. Patient and interprofessional communication is a fundamental aspect of this course. Participating students are expected to be self-motivated, self-directed individuals who embrace independent learning and self-assessment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5817 - ADVANCED INFECTIOUS DISEASES

Minimum Credits: 1

Maximum Credits: 1

Students will expand upon and apply knowledge and skills developed in the required Infectious Diseases 1 and 2 course sequence and Advanced Pharmaceutical Care 1 to new and complex infectious disease case scenarios, be introduced to the principles of antimicrobial stewardship, learn basic skills relevant to performing antimicrobial stewardship activities in a health system, and explore

current controversies in infectious diseases to optimize the health of patients with complex infectious diseases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Pharmacy students only.

PHARM 5818 - MEDICAL PARASITOLOGY

Minimum Credits: 1

Maximum Credits: 1

Course offers a concise presentation of the protozoan and helminthic parasites of medical importance, with an emphasis on parasitic morphology and life cycle, disease transmission, pathogenesis, prophylaxis, therapy and epidemiology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5819 - COMMUNITY LEADERSHIP INNOVATION & PRACTICE (CLIP)

Minimum Credits: 3

Maximum Credits: 3

Course is designed especially for students interested in advancing and leading change in community pharmacy practice. The objective is to mentor and support students in effective and meaningful community pharmacy-based patient care research. Students will engage in a combination of on-line lecture content and small group; weekly discussions throughout the summer months. Students will initiate and complete a research project in the community. The purpose of the project is to: 1. Familiarize students with the key components in carrying out a valid research project from conceptualization to final report (abstract; meeting presentation). 2. Develop research problem solving skills through working group discussions and by working research problem solving skills through working group discussions and by working closely with project mentor. 3. Enhance verbal and written communication skills through formal and informal presentations and scientific writing. 4. Contribute to the diversity of the students' expertise through meeting and discussing with experts in community practice and research nationally.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

PHARM 5820 - PHARMACY INNOVATION 1

Minimum Credits: 1

Maximum Credits: 1

The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5821 - PHARMACY INNOVATION 2

Minimum Credits: 1

Maximum Credits: 1

The course provides basic insights into issues that affect the care of patients in the community through discussions of contemporary topics and further develops the student's skills in research by continuing the analysis and reporting of projects from community pharmacy health service research 1. Specifically, students will enhance their critical thinking skills by examining the drivers for specific contemporary issues (e.g. pharmacist role in an accountable-care organization) and by learning to ask testable scientific questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5822 - RESEARCH FUNDAMENTALS

Minimum Credits: 2

Maximum Credits: 2

Course is designed to provide students with a comprehensive survey of research. The topics covered encompass specific topics related to research. Course content includes an introduction to: hypothesis generation, writing the introduction, design of study, report on a technique and various additional topics related to research. The overall goal of the course will be practical applied discussion of the steps involved in the process of generating new knowledge through research. Students completing this course will gain the design,

conduct and report their research in the form of a poster and/or podium presentation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5823 - WOMEN'S HEALTH: GLOBAL AND LOCAL PERSPECTIVE

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5824 - MENTORED RESEARCH 1

Minimum Credits: 1

Maximum Credits: 2

The purpose of this course is to give PHARMD students in the research area of concentration an experiential educational offering within a research laboratory. The general focus of the research by the faculty in the center for clinical pharmaceutical sciences is to determine and evaluate the factors and quantitative relationships that lead to variability in disease progression and drug response in patients. Research is focused on the translational and clinical aspects of scientific research. Ongoing studies include clinically relevant animal models of disease through large population studies in order to bridge the bench to bedside to improved public health through clinical and translational research. Disease state interests include but are not limited to the areas of infectious disease, nephrology, critical care, stroke, psychiatric disorders, liver disease, oncology, and cardiovascular disease.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

PHARM 5825 - HEALTHCARE INNOVATIONS 2

Minimum Credits: 2

Maximum Credits: 2

Course is to provide the students who have successfully completed Healthcare Innovations 1 the opportunity to apply what they have learned by observing successful and unsuccessful innovation applications within the VA health system in Pittsburgh and using the innovation model master in Part 1 of this two-part course to provide evaluative insight as to why the innovations observed may have succeeded or failed to succeed. As part of this course, the students will also learn about the veterans engineering resource center (VERC) program at the VA and how it guides the development and implementation of innovations that aim to improve healthcare quality and outcomes for participating veterans.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5826 - ADVANCED PEDIATRIC PHARMACEUTICAL CARE

Minimum Credits: 2

Maximum Credits: 2

The purpose of this course is to extend knowledge and skills in intensive and/or advanced pediatric specialties, building on previously developed fundamental knowledge of pediatric physiology, pathophysiology, pharmacology and therapeutics, so as to advance pharmaceutical care for infants and children with selected disorders. The course will focus on integration of science and practice to achieve outcomes that enhance patient care and quality of life.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5827 - SMOKING CESSATION IN UNDERSERVED SETTINGS

Minimum Credits: 1

Maximum Credits: 1

This course for third professional year pharmacy students will allow the student real-life practice providing smoking cessation counseling and education in underserved settings. Students generally provide on-site smoking cessation services at either the salvation army harbor light, a 90 day inpatient alcohol and other drug program for homeless and low-income men in Allegheny county, or the Birmingham free clinic, a walk-in clinic on the South Side of Pittsburgh. Students will meet with clients weekly at their site to provide smoking cessation counseling, education, and support, including the provision of nicotine replacement therapy. Students will have monthly debriefs with the course coordinator throughout the semester to supplement experiences on site with a focus on motivational interviewing skills.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5828 - BECOMING A LEADER

Minimum Credits: 1

Maximum Credits: 1

The course addresses the need for additional opportunities for interested students to build a depth of skill and experience in leadership, applicable across all facets of the profession. The purpose of this 5-week course is to expand upon the knowledge of leadership gained during the student pharmacist's first professional year, particularly in the emerging professional (pharm 5120). M.A. Soupios' and P. Mourdoukoutas' the ten golden rules of leadership: classical wisdom of modern leaders and other literature will serve as the primary references. Individual reflections and group discussions will allow students to master self-directed processes to continuously critique and improve their leadership abilities. The course will guide students through evaluating their own strengths and talents, shaping their own leadership styles, and understanding those of others. It will facilitate student preparation for leadership roles.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5829 - SELF-CARE PBL GAME

Minimum Credits: 1

Maximum Credits: 1

Course will serve to reinforce the concepts covered in PHARM 5210 related to safe, effective and appropriate self-care recommendations provided to patients in the community. Students will participate in a game that allows dynamic generation of patient cases in a competitive format that will test the student's knowledge and ability when triaging and assessing patients and ultimately recommending appropriate treatment strategies.

Academic Career: Graduate

Course Component: Workshop

Grade Component: Grad Letter Grade

PHARM 5830 - DISCOVERING SCIENTIFIC INQUIRY (DSI)

Minimum Credits: 2

Maximum Credits: 2

The primary purpose of the course is to adequately prepare learners to execute an outcomes research-based project during the P4 curriculum. As a required component of the pharmacotherapy scholars program, this course will enable P3 students in the spring semester to design a study, submit the required institutional review board documents, and strengthen their data analysis skills.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5831 - HEALTHCARE FOR LGBTQIA COMMUNITY

Minimum Credits: 2

Maximum Credits: 2

This course will prepare the student to assess and guide comprehensive medical treatment for LGBTQIA individuals. Students will learn about cultural competency and inclusive language, screening and diagnosis, gender affirmation, primary and preventative care, and advocacy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5832 - LITERATURE AND FILM TO UNDERSTAND PATIENT-PRACTITIONER EXPERIENCES

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5851 - SPECIAL TOPICS 1

Minimum Credits: 1

Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study
Grade Component: Grad Letter Grade

PHARM 5852 - SPECIAL TOPICS 2

Minimum Credits: 1
Maximum Credits: 3

Student has the opportunity to explore a pharmaceutical research or pharmaceutical care topic on an individual or small group basis with the oversight of a faculty member. Generally, the successful completion of a project is required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

PHARM 5890 - INTERNATIONAL PHARMACY SCHOLARLY EXPERIENCE 1 (IPSE)

Minimum Credits: 1

Maximum Credits: 3

Course allows the student to personalize their pharmd education by proposing, developing, and implementing a mentored scholarly project in an international setting. The goal of these international project experiences is to provide the student with an experience to build specific skills in research and practice while providing opportunities for cross-cultural learning and awareness. Projects will be developed in conjunction with an identified faculty mentor and should be developed to meet a site-specific need. Students will complete their project abroad during the summer and will present their project and experience when they return. Instructor's permission required.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad Letter Grade

PHARM 5891 - INTERNATIONAL PHARMACY SCHOLARLY EXPERIENCE 2 (IPSE)

Minimum Credits: 1

Maximum Credits: 3

Course Component: Independent Study

Grade Component: Grad Letter Grade

PHARM 5892 - GLOBAL HEALTH: INTERNATIONAL PHARMACY EXPERIENCE

Minimum Credits: 1

Maximum Credits: 1

Course will introduce and discuss important topics in global health and pharmacy practice, culminating in a one-week experience over spring break to Lagos, Nigeria. The overarching goal of this course is for students to experience the practice of pharmacy in a global setting and learn ways to strengthen pharmacy systems locally and internationally. The rich multi-cultural patient population in varied settings will expand students' knowledge, skills, and attitudes in working with diverse health beliefs and practices.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PHARM 5910 - US HEALTHCARE SYSTEM

Minimum Credits: 2

Maximum Credits: 2

The aim of this course is to provide students with an overview of the U.S. Health care delivery system. This course covers the structure of health care delivery systems and delivery of health care services including personnel and facilities; organization, financing, and quality assessment with special attention to medication distribution and management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5911 - HEALTHCARE SALES AND MARKETING

Minimum Credits: 2

Maximum Credits: 2

This course educates students on contemporary healthcare sales and marketing as it directly applies to pharmacy. Sales concepts to be covered include understanding management prospects, developing your sales value proposition, finding management and penetrating the no-talk zone, generating leads: marketing to management, generating leads, cold calling management, meeting the prospect for the first time, presenting to prospects ' the executive briefing, preparing a management proposal that works, negotiating with management, selling to targeted key or major accounts, managing your sales cycle and forecasting, managing sales objections; using storytelling as a business sales tool; managing your competition, following up after the sale, and making a difference with business ethics. Health care marketing is undergoing dramatic reinvention and change because of emerging trends, reform uncertainties, the emergence of

social marketing and a renewed focus on quality, outcome and prevention. Executives are demanding higher impact and bigger returns from marketing investments and marketing professionals are more closely aligning their efforts with strategic objectives, customer experience and the integration of communications across multiple platforms and channels. This course offers effective approaches to proactive health care marketing with specific action steps, strategies, techniques and tactics to move markets and increase visibility, awareness, understanding, market share and profitability.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

PHARM 5912 - LEADERSHIP AND ETHICS IN HEALTHCARE

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundational introduction to pharmaceutical/health care leadership and ethics. An analysis of dominant methods in leadership theories and healthcare ethics will be discussed and analyzed from historical, systematic, and religious perspectives. Ethical dilemmas of leadership, the foundation and context of moral choice, the moral implication of decision-making within healthcare organization and the impact on employees, morale, personal integrity, and the patients. Practical issues are engaged to illustrate effective leadership and ethical frameworks for sound decision making. Students will be able to understand and analyze health care leadership and ethics theory and methods as well as major applied topics; critically relate health care leadership and ethics with multi-disciplinary fields in health care as a diverse and national enterprise; integrate academic learning with experiential learning in clinical/organizational experiences; and demonstrate knowledge, skills, competencies and character traits to provide ethical leadership.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

PHARM 5913 - EXPERIENCE ADAPTIVE DESIGN

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide the knowledge and practical skills necessary to become an adaptive design learner/leader/teacher (LLT). LLT's develop the adaptive capacity of people and all other organizational resources to create more access to effective, patient-centered care at continually lower cost. Experience adaptive design (EAD) is a learning-by-doing experience. They will learn to use adaptive design based on the Toyota Production System (TPS) methodology to continually improve services and to introduce new services to their pharmacy. This course requires that students are able to put their learning into practice by doing a work improvement project or by introducing a new service at their worksite. They will be required to submit a written report and make a 10 minute presentation of their final project. Students will use the textbook 'designed to adapt: leading healthcare in challenging times', reading from publications, videos, and case studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin

PHARM 5914 - GRADUATE EXECUTIVE BOARDROOM

Minimum Credits: 2

Maximum Credits: 2

Following the healthcare dollar: this interactive offering will engage students in a structured understanding of the business side of medicines in the health care industry and other related fields. For instance, students will study different leadership styles and corporate cultures in an organization, follow health spending longitudinally and vertically on medicines from consumer to product and service, discover how market conditions affect operations and profitability and learn about the executive's career development path.

Entrepreneurship in healthcare: students will engage in a structured understanding of the business side of medicines in the health care industry and other related fields. This course delves into entrepreneurship in medicines and health. The fundamentals of entrepreneurship medicines and health will be discussed and students will study and contrast the primary entrepreneurship styles including characteristics of those who succeed through discovery, adaptation, and fortitude. Entrepreneurship and intrapreneurship models will be utilized. Students will contrast methods of innovation and supporting business cultures. The impact of market conditions will be analyzed in terms of how they affect success of such endeavors and learn about the executive's career development path. Many past students have used the learning and networking opportunities from this course to shape and propel their careers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

PHARM 5915 - EXECUTIVE HEALTHCARE INNOVATIONS

Minimum Credits: 2

Maximum Credits: 2

This course will give students an understanding of managing change through the lens of complexity theory using the principles of implementation science. They will understand the levers important in change and how to assess an organization for readiness to change. Students will be able to effectively participate in a health care innovation application team as either a leader or participant that results in the application of an evidence-based health care innovation, which leads to improved patient care. They will be able to develop detailed and effective strategic frameworks from which they can outline and track the progress in implementing a health care innovation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

PHARM 5916 - PREDICTIVE ANALYTICS IN PHARMACY AND KNOWLEDGE DISCOVERY FROM BIG DATA

Minimum Credits: 2

Maximum Credits: 2

The overall objective of this course in Predictive Analytics in Pharmacy is to familiarize students with sources of big data, large data analytic techniques, and their wide-applicability in guiding decisions in the areas of patient care, drug research & development, healthcare policy, and cost effectiveness. For the most common techniques, the objective is to acquire sufficient mastery through hands-on analyses of real world data so that students are prepared to apply these techniques in future career positions. For other, more advanced techniques, the objective will be to develop a familiarity about how these methods are used and what questions they can answer.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5921 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. Students will develop a basic understanding of organizational culture and how it affects personnel and performance. The course will cover the basics of human resource management including hiring, training, assessment and development as well as compensation strategies. The course will also cover corporate pharmacy functions as well as multi-site management and control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

PHARM 5923 - SPECIALTY PHARMACY MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This course offers students the first part of a focused learning in specialty pharmacy. The course will address specialty drug and clinical management; specialty pharmacy patient management (intake and outcomes); as well as address relevant accreditation standards (URAC, etc.).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Pharmacy Business Admin (PHARMBA-MS)

PHARM 5924 - HEALTH SYSTEM PHARMACY MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This is the first of two courses designed to provide focused learning in health system pharmacy management/leadership. Students will develop a basic understanding of organizational culture and how it affects personnel and performance, human resource management including hiring, training, assessment and development, and compensation strategies. The course will also address corporate pharmacy management functions; multi-site management and control; relevant accreditation standards (JCAHO, CMS, etc.)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5925 - HEALTH SYSTEM PHARMACY MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This is the second of two courses designed to provide focused learning in health system pharmacy management/leadership. The first course prepares students to plan and manage pharmacy operations in a hospital pharmacy. This course will address health system pharmacy organization quality standards; patient satisfaction; industry specific financial analysis (financial and managerial statements, cash flow, return on investment); health system reimbursement structure, contracting, purchasing and inventory management (supply chain), and finally the impact of health system informatics systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5926 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This is the first of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. Students will develop a basic understanding of organizational culture and how it affects personnel and performance. The course will cover the basics of human resource management including hiring, training, assessment and development as well as compensation strategies. The course will also cover corporate pharmacy functions as well-as multi-site management and control. Students will use the "Pharmacy Management " Essentials for All Practice Settings, textbook, readings from publications, videos, and case studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5927 - ADVANCED COMMUNITY PHARMACY MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of two courses designed to provide an overview of contemporary management issues in pharmacy with a focus on community pharmacy. The first course prepares students to plan and manage pharmacy operations in a community pharmacy. Students will learn to develop a business model and to establish key production and quality metrics. Students will gain an understanding of financial analysis including how to construct and interpret operating statements, key financial measures, cash flow, and return on investment. Special emphasis will be given to understanding various reimbursement models and contracts for services in addition to prescription fulfillment. Students will learn to manage purchasing and inventory. Students will use the "Pharmacy Management - Essentials for All Practice Settings" textbook, readings from publications, videos, and case studies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5928 - SPECIALTY PHARMACY MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

This course offers students the first part of a focused learning in specialty pharmacy. The course will address specialty drug and clinical management; specialty pharmacy patient management (intake & outcomes); as well as address relevant accreditation standards (URAC, etc.).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PHARM 5929 - SPECIALTY PHARMACY MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

This course offers students the second part of a focused learning in specialty pharmacy. The course will address specialty pharmacy organizational quality standards; specialty pharmacy customer service, communications, and disclosure standards; industry specific financial analysis (financial and managerial statements & indices); specialty pharmacy operations; specialty pharmacy contracting, purchasing and inventory management (supply chain), and finally specialty pharmacy informatics management.

Philosophy

PHIL 2021 - STUDIES IN PLATO

Minimum Credits: 3

Maximum Credits: 3

Study of platonic texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2041 - STUDIES IN ARISTOTLE

Minimum Credits: 3

Maximum Credits: 3

Study of selected Aristotelian texts and topics (readings in Greek). Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2050 - TOPICS IN HISTORY OF PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected texts and topics in the history of philosophy. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2070 - ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is a beginning to intermediate level graduate seminar in ancient philosophy, with emphasis on Plato and Aristotle, taken almost exclusively by students in the doctoral program, usually during their first or second year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2071 - STUDIES IN ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics and texts in ancient philosophy (readings in Greek). Course may be repeated for credit if the material is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2075 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

Study of selected topics in the area of ancient philosophy. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2110 - DESCARTES

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Descartes, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2120 - SPINOZA

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Spinoza, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2130 - LEIBNIZ

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Leibniz, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2170 - KANT

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Kant. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2171 - KANTIAN ETHICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in Kantian ethics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2175 - STUDIES IN KANT

Minimum Credits: 3

Maximum Credits: 3

Study of Kantian texts and topics. Course may be repeated for credit if the material covered is different.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2180 - HEGEL

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Hegel, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2200 - FREGE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Frege, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2210 - WITTGENSTEIN

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of Wittgenstein. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2245 - ANALYTIC PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on various topics in analytic philosophy. The subject matter will change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2300 - ETHICS (CORE)

Minimum Credits: 3

Maximum Credits: 3

This is an introductory to intermediate level graduate seminar in ethics, required of all students in the doctoral program in philosophy, and taken in the first or second year of residence.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy (PHD)

PHIL 2305 - TOPICS IN ETHICS

Minimum Credits: 3

Maximum Credits: 3

A study of selected topics in ethics. Course may be repeated for credit if material is different.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2310 - MORAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in moral theory, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2316 - ETHICS AND PUBLIC LIFE

Minimum Credits: 3

Maximum Credits: 3

This course will aid students in making and evaluating normative arguments and analyzing normative concepts as relevant to the formulation and administration of public policy. It will also present and discuss a number of substantive issues of ethical responsibility, rights and justice that are relevant to government officials, both in the U.S. and other countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHIL 2330 - POLITICAL PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in political philosophy, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2335 - TOPICS CONTEMPORARY PHILOSOPHY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on various topics in contemporary philosophy. The subject matter will change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2385 - RATIONALITY

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in philosophical issues related to rationality, taken almost exclusively by students in the doctoral program usually during their second or third year of residence. The exact contents of this course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2400 - METAPHYSICS-EPISTEMOLOGY (CORE)

Minimum Credits: 3

Maximum Credits: 3

This is an introductory to intermediate level graduate seminar in metaphysics and epistemology, required of all students in the doctoral program in philosophy, and taken in the first or second year of residence.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy (PHD)

PHIL 2420 - PHILOSOPHY OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of language, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2421 - TOPICS IN PHILOSOPHY OF LANGUAGE

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in various topics in the philosophy of language taken by students in the doctoral program. The exact content of this course varies from one occasion to another.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2440 - PHILOSOPHY OF MIND

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of mind, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2445 - PHILOSOPHY OF ACTION

Minimum Credits: 3
Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of action taken almost exclusively by students in the doctoral program.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2460 - EPISTEMOLOGY

Minimum Credits: 3
Maximum Credits: 3

This is an intermediate to advanced graduate seminar in epistemology, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2480 - METAPHYSICS

Minimum Credits: 3
Maximum Credits: 3

This is an intermediate to advanced graduate seminar in metaphysics. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2500 - ADVANCED LOGIC (CORE)

Minimum Credits: 3
Maximum Credits: 3

This is the first term of an introductory graduate course in mathematical logic. Topics are completeness of propositional logic and quantification theory and elementary set theory.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Philosophy or History and Philosophy of Science (PHD)

PHIL 2505 - TOPICS IN PHILOSOPHICAL LOGIC

Minimum Credits: 3
Maximum Credits: 3

This is an intermediate to advanced graduate seminar in various topics in philosophical logic, taken almost exclusively by students in the doctoral program. The exact content of this course varies from one occasion to another.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2510 - TOPICS IN LOGIC

Minimum Credits: 3
Maximum Credits: 3

Study of selected topics in logic. Course may be repeated for credit if material covered is different.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2533 - DESCARTES

Minimum Credits: 3
Maximum Credits: 3

An examination of some of the major works of Descartes. Also a look at his precursors, his culture and his influences.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2547 - ARISTOTLE'S PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This seminar explores Aristotle's views on the nature of science, such as explanation, causation, demonstration, and necessity. We will study a number of Aristotle's works, including the analytics and physics.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2555 - ARISTOTLE'S CONCEPT OF NATURAL SCIENCE

Minimum Credits: 3

Maximum Credits: 3

Among theoretical forms of investigation and knowledge, Aristotle distinguishes mathematics, natural science and first philosophy (metaphysics). This seminar explores Aristotle's understanding of the aims, methods and the conceptual and explanatory structure of natural science, and the relationship between it and the other forms of theoretical inquiry.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2565 - THE GENE:TRANSFRM/FRAGMNT CONCP

Minimum Credits: 3

Maximum Credits: 3

The course covers the period from Gregor Mendel to the molecular gene of the 1990s. We explore its status as a hypothetical construct, and as a spatial concept in terms of its localization in the cell. Discussion of its status as a fundamental unit in biology leads to consideration of its place in the theoretical biology, in speculations about the origin of life, and in debates over the levels at which natural selection acts.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2580 - PHILOSOPHY OF MATHEMATICS

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PHIL 2585 - TOPICS IN PHILOSOPHY OF MATH

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on topics in the philosophy of mathematics, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PHIL 2600 - PHILOSOPHY OF SCIENCE CORE SEM

Minimum Credits: 3

Maximum Credits: 3

This seminar is an intensive and advanced introduction to some of the main themes and problems in philosophy of science including the nature of evidence, theory comparison, the theory-observation distinction, the meaning of theoretical terms, scientific explanation and scientific change.

Academic Career: Graduate
Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Philosophy (PHD) or History and Philosophy of Science (PHD)

PHIL 2610 - SPECIAL TOPICS IN THE HISTORY OF THE PHILOSOPHY OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course deals with selected special topics in the history of the philosophy of science. It is an intermediate to advanced graduate seminar, usually taken by students in the doctoral program. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2625 - RECENT TOPICS IN PHIL OF SCIENCE

Minimum Credits: 3

Maximum Credits: 3

In this seminar we will read and discuss recent works in the philosophy of science. The choice of authors and topics will depend on who is doing the most interesting new work in the field.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2626 - TOPICS IN PHILOSOPHY OF PHYSICS

Minimum Credits: 3

Maximum Credits: 3

The course will examine some of the fascinating problems to which the modern physical theories of quantum mechanics and relativity have given rise. No previous formal training in physics or mathematics will be presupposed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2627 - PHILOSOPHY OF QUANTUM MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This course will review the Hilbert space formalism of quantum mechanics, consider interpretations of that formalism, (for instance, hidden variable theories, relative state formulations, stochastic reduction schemes), and the difficulties-empirical, logical, and conceptual- to which interpretations are prone.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2628 - PHILOSOPHY OF PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This seminar investigates philosophical issues in the foundations of fundamental theories of physics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2630 - TOPICS IN HISTORY AND PHILOSOPHY OF BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course aims to examine a variety of philosophical issues that arise in the biological sciences in historical context. Topics that may be covered, depending on which faculty member is teaching it, include: teleological explanation in biology; the nature of selection and/or levels of selection; debates over the gene concept or the species concept; biological individuality; whether there are 'laws of nature' in the biological sciences; mechanistic explanation; biological classification and systematics; biological kinds and natural kinds; integration of development and evolution; etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2633 - PHILOSOPHY OF COGNITIVE SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will survey the main philosophical questions provoked by cognitive science. Students will acquire a comprehensive grasp of the main issues in this field. We will discuss questions such as: is the mind modular? Is the mind embodied and situated? Do we ascribe mental states by simulation or by means of a theory? What is consciousness?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2634 - TOPICS IN PHILOSOPHY OF COGNITIVE SCIENCE

Minimum Credits: 3

Maximum Credits: 3

This class focuses on advanced topics that have been recently debated in the philosophy of cognitive science. Students will acquire an in-depth understanding of these debates.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2652 - PHILOSOPHY OF PSYCHIATRY

Minimum Credits: 3

Maximum Credits: 3

This course examines conceptual, methodological, and some historical issues in psychiatry. General analyses of psychiatric disorders and classifications, and their reliability and validity, will lead to a consideration of the DSM and ICD. The function of etiological, reductive, and mechanical dimensions (including genetic and neuroimaging research) will be discussed. Historical topics include the contrast between and transition from psychoanalytical, narrative approaches to the rise of bio-chemical psychiatry. Extended consideration of schizophrenia and depressive disorder will be course themes. The seminar closes with a discussion of legal and ethical issues in psychiatry.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2657 - PHILOSOPHY OF BIOLOGY

Minimum Credits: 3

Maximum Credits: 3

Central issues in the philosophy of biology from Darwin to the present including essentialism, reductionism, theory structure and explanation. Topics may include debates on units of selection, species concept, relationship between classical and molecular genetics, relationship between developmental and evolutionary biology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2659 - NEUROBIOLOGY, REDUCTION AND EMERGENCE

Minimum Credits: 3

Maximum Credits: 3

This is an introductory level graduate seminar on the relations of the mind and the brain. Recent developments in the neurosciences, in theoretical brain science, and in computer science suggest that powerful new perspectives on understanding the "mind-brain" will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2660 - PHILOSOPHY OF SPACE AND TIME

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar in the philosophy of space and time, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2662 - CAUSALITY

Minimum Credits: 3

Maximum Credits: 3

Consideration of various theories of causality and how the theories relate to questions of metaphysics, epistemology and explanation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2675 - SCIENTIFIC EXPLANATION

Minimum Credits: 3

Maximum Credits: 3

This is a graduate seminar in scientific explanation taken almost exclusively by students in the doctoral programs of philosophy and HPS usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2677 - FOUNDATIONS OF QUANTUM FIELD THEORY

Minimum Credits: 3

Maximum Credits: 3

Quantum theories of systems with infinitely many degrees of freedom face foundational problems without analog in the conventional philosophy of ordinary non-relativistic quantum mechanics. This seminar explicates those problems, along with the technical tools needed to address them.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2681 - REALISM

Minimum Credits: 3

Maximum Credits: 3

What, if anything, makes scientific claims true or false? Is scientific language about anything? If it is, can we know which scientific claims are true, or can we arrange our beliefs to converge towards the truths? If not, what purpose can the enterprise of science serve? This seminar will examine these and related questions.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2687 - THE EPISTEMOLOGY OF EXPERIMENTAL PRACTICES

Minimum Credits: 3

Maximum Credits: 3

Observation and experimentation have long been taken as central to the legitimacy of scientific claims. This seminar examines the assumptions and inferences involved in reasoning about experimental results.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2689 - EXPLANATIONS, CAUSES AND MECHANISM

Minimum Credits: 3

Maximum Credits: 3

A study of theories of explanation and causality as they relate to the recent work on mechanisms. Cases will come from biology and neuroscience. The concept of information will also be considered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2690 - THEORIES OF CONFIRMATION

Minimum Credits: 3

Maximum Credits: 3

This is an intermediate to advanced graduate seminar on the topic of induction and confirmation, taken almost exclusively by students in the doctoral program, usually during their second or third year of residence. The exact contents of the course vary from one occasion to the next.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2695 - PRAGMATISM

Minimum Credits: 3

Maximum Credits: 3

The course focuses on key pragmatic texts from C. S. Pearce to the present. But it will also give some consideration to the historical background of pragmatism and to later critical responses and reactions. Emphasis will be upon those pragmatic teachings, especially in semantics, epistemology, and philosophy of science, that bear on currently controverted issues.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2699 - EXPERIMENT & SCIENTIFIC PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This will be a course on the epistemology of science. An honest way to do epistemology of science is to ask, given a theory and a set of evidence: to what extent does this evidence support this theory? In this course we will not investigate the topography of evidential warrant so directly. We will turn instead to some recent studies of the experimental practices through which particular pieces of evidence emerge as evidence.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PHIL 2900 - TEACHING PHILOSOPHY

Minimum Credits: 1

Maximum Credits: 1

A practicum approach to train as an tfs wherein faculty and senior graduate students train the more junior tas on how to teach philosophy. This course has been approved as an alternative to FACDEV 2200 for philosophy graduate students.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Philosophy (PHD)

PHIL 2902 - PRE-MA DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

PHIL 2950 - DISSERTATION SEMINAR

Minimum Credits: 3

Maximum Credits: 3

The purposes of this seminar (which has very successful counterparts at other top graduate programs in philosophy) are multifold. It gives students working on dissertation projects a community of others in the same boat. It provides them with feedback on work in progress, and practice presenting their work to an audience wider than their committee. (This is important for the impression they make on the job market.) Supposing that each student admitted to candidacy makes a seminar presentation each semester, it hastens time to completion by imposing interim deadlines on the road to a completed dissertation. The seminar gives students who have been comprehensively evaluated but not yet defended a prospectus examples of other students who have successfully negotiated the transition.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

Course Requirements: PLAN: Philosophy (PHD)

PHIL 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

This is a course through which students can receive graduate degree credit in philosophy for work that they undertake largely or

entirely on their own, with little or no faculty supervision.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

PHIL 2999 - PROSPECTUS RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Each doctoral student in philosophy, when he or she is ready to begin working on the doctoral dissertation in earnest, must submit to a prospective dissertation committee a document, called a "prospectus", outlining the proposed dissertation topic, the envisioned treatment of that topic, and a rough plan for how to proceed. This course is a special directed study course for preparing that document.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

PHIL 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 9

This course gives academic credit for research toward and writing of the doctoral dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PHIL 3902 - POST-MA DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

This is a directed study course, taken by one or a few students at a time, on a pre-arranged topic. It involves close supervision by an instructor, including reading, discussion, and written work.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Physical Medicine and Rehabilitation

PMDREH 5410 - REHABILITATION SUB-INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

During this four-week elective for fourth year medical students, participants will function at an intern-level the student will be given intern-level responsibilities to manage inpatient rehabilitation patients. Student will be teamed with one attending and one or more PM&R residents and will be responsible for caring for their own patients, which includes rounding, writing notes, admitting and discharging patients, staffing team conferences with therapists, nurses, and other health care providers, and communicating with families under supervision of the team. Students will also be able to participate in therapy sessions and will gain exposure to prescription of orthoses. The student will be assigned to one team for the entire month to gain experience in the longitudinal care of rehab patients. Teaching will be bedside as well as small didactic sessions at the discretion of the attending. There is no exam and students will be evaluated on their participation and meeting the course objectives.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PMDREH 5450 - REHABILITATION MEDICAL CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will demonstrate to the student the basic problems of patients and basic concepts of care for patients, referred to the division of rehab medicine. The student will be taught physical diagnostic techniques applicable to the disorders of musculoskeletal and neural systems. Students are expected to evaluate inpatients and develop a treatment plan under the supervision of division physicians. Common patient problems include hemiplegia, back pain, cervical spondylosis, arthritis and amputations. Electrodiagnostic studies will also be demonstrated.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PMDREH 5460 - PED PHYSCL MED/REHAB-INPATIENT

Minimum Credits: 0

Maximum Credits: 0

In this four-week elective the student will function in the capacity of an intern and care for hospitalized children with rehabilitation needs. Diagnosis will include cerebral palsy, myelomeningocele and other neuromuscular disorders. Skills in the physical and medical management of pediatric disability and an awareness of the other medical disciplines involved in the care of these children would be stressed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PMDREH 5461 - PED PHYSCL MED/REHAB-OUTPATIENT

Minimum Credits: 0

Maximum Credits: 0

In this four-week elective the student will be involved in clinical evaluations of pediatric patients with multiple neuromuscular problems. This would include the differential diagnosis and physical exam as well as emphasis on electro diagnosis. In addition, some fundamentals of bracing and prosthesis prescriptions will be covered.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PMDREH 5465 - DISABILITIES CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will participate in the medical care of patients in a variety of inpatient clinical settings and in both adult and pediatric outpatient settings. Teams consist of physiatrists, pediatricians, nurse practitioners, physical therapists, occupational therapists, and social workers. The student's role will include serving as liaison to the medical center, assisting in the daily care of individuals with disabilities, providing clients and staff with education about specific medical topics and advocating for the program and its clients within the medical center.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PMDREH 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PMDREH 5810 - PM&R RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will allow the student to gain valuable experience in cutting edge research in physical medicine and rehabilitation (PM&R). The student will be precepted by faculty affiliated with the department of PM&R by meeting the following objectives: identify different sources of research funding; become familiar with effectively formulating grant proposals and budgets; learn to identify obstacles to performing productive research in an academic setting; assist in formulating effective research methodology; publication of an abstract.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PMDREH 5899 - INDEPENDENT STUDY IN PHYSICAL MEDICINE AND REHABILITATION

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PMDREH 5900 - EXTRAMURAL PHYSICAL MEDICINE AND REHABILITATION

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in Physical Medicine & Rehabilitation may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Physical Therapy

PT 2025 - PHYSIOLOGY OF EXERCISE

Minimum Credits: 2

Maximum Credits: 2

Structures and function of muscle, principles of neuromuscular recruitment for physical work, excitation-contraction coupling, contractile biochemistry, including sources of fuel for muscular work, and shifts in energy demands and fuel sources with physical activity under conditions of steady state, fasting, exercise and stress will also be covered. Examples of the impact of structural and physiological change with growth, aging disease, drugs, and performance enhancing substances are reviewed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2026 - CARDIOPULMONARY PT 1

Minimum Credits: 2

Maximum Credits: 2

Students gain a basic understanding of structure and function of cardiovascular and pulmonary systems, cardiorespiratory fitness and pulmonary physiology in both healthy and diseased state. Principles of physical training for persons with and without cardiopulmonary dysfunction are addressed through lecture, demonstrations, and student participation in monitoring and interpreting signs and symptoms of physical work in healthy and disease states. Interactions of skeletal muscle and the cardiovascular and respiratory systems are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2027 - CARDIOPULMONARY PT 2

Minimum Credits: 2

Maximum Credits: 2

Evidence-based study of the application of physiological and clinical sciences to the physical therapy management of individuals with cardio-pulmonary system dysfunction. Learning experiences include weekly literature review and directed professional discussions with colleagues (class mates, instructor and lecturers), and a case-based approach to applying knowledge and decision-making to examination, evaluation, prognosis, and intervention in cardiopulmonary pt.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2028 - HEALTH AND WELLNESS

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2029 - KINESIOLOGY AND INTRO TO

Minimum Credits: 3

Maximum Credits: 3

Introduction to the principles of the causes and treatment of musculoskeletal movement dysfunction. Basic principles of biomechanics and kinesiology of the musculoskeletal system with applications to the treatment of musculoskeletal dysfunction are also included.

This material will be presented in lecture format and will be supplemented by direct laboratory experience.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2030 - ANATOMY

Minimum Credits: 7

Maximum Credits: 7

An overview of the musculoskeletal causes of movement dysfunction concentrating on the upper extremities. Basic principles of musculoskeletal evaluation, biomechanics, kinesiology and treatment are included. In depth study of the musculoskeletal and peripheral nervous system of the human body also included. Directed laboratory experience using prosected cadavers, skeletal material, models and audio-visual tapes. The adaptation of this knowledge and skills to diverse populations in a variety of practice populations emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2031 - MUSCULOSKELETAL PT 1

Minimum Credits: 6

Maximum Credits: 6

An overview of the musculoskeletal causes of movement dysfunctional, concentrating on the lower extremities. Class room, laboratory and clinical sessions are used to facilitate the attainment of competencies in prevention, screening, diagnosing and designing and managing a PT plan of care for patients with physical dysfunction resulting from musculoskeletal causes. The adaption of this knowledge and skills to diverse populations in a variety of practice environments is emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PT 2025 and 2029 and 2030 (All Courses MIN GRADE 'C'); PLAN: Physical Therapy (DPT)

PT 2032 - MUSCULOSKELETAL PATIENT 2

Minimum Credits: 5

Maximum Credits: 5

A continuation of PT 2031.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2033 - MUSCULOSKELETAL PT 3

Minimum Credits: 3

Maximum Credits: 3

A continuation of PT 2032.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2035 - CLINICAL BIOMECHANICS

Minimum Credits: 3

Maximum Credits: 3

Student will be introduced to quantitative methods for biomechanical analysis of gait and other human movement. Equipment and methods to be studied include automated motion analysis, videography, force platform, and kinesiological electromyography. The student will do a project involving the biomechanical analysis of movement using this equipment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PT 2040 - SURVEY OF HUMAN DISEASE 1

Minimum Credits: 2

Maximum Credits: 2

A systematic approach to obtaining a pertinent history and identifying patient problems through interviews or other appropriate methods. Includes the recognition of signs and symptoms of systemic disease, cardiovascular, respiratory and neuromusculoskeletal causes of movement dysfunction. The recognition of patient problems that may require other professional attention in addition to that from a physical therapist is emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2041 - PATIENT MANAGEMENT 1

Minimum Credits: 4

Maximum Credits: 4

Provides an introduction to physical therapy interventions used to help alleviate patients' movement dysfunction and problems with pain that may be caused by a variety of pathologies. Developing knowledge and skills in proper patient and therapist body mechanics, transfer techniques, wheel chair design, patient positioning and draping and use of ambulatory assistive devices are stressed, as are the knowledge and skills of the physical modalities of heat, light, cold, water and massage.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2042 - PATIENT MANAGEMENT 2

Minimum Credits: 3

Maximum Credits: 3

Provides instruction in PT interventions used to help alleviate movement dysfunction and pain in a variety of patient populations. Content includes: upper and lower extremity orthotic and prosthetic intervention, pathological process and PT management for patients with amputations, cancer, wounds, burns and arthritis, and intervention for issues in women's health (prosthetics, osteoporosis).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2045 - SURVEY OF HUMAN DISEASE 2

Minimum Credits: 2

Maximum Credits: 2

An introduction to human diseases that affect the respiratory, hepatic, renal, and gastrointestinal systems. Environmental and psychogenic causes of diseases are also studied.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2050 - ADVANCED MANUAL THERAPY

Minimum Credits: 2

Maximum Credits: 2

This 2-credit elective course will introduce students to a variety of manual therapy techniques that are used to treat musculoskeletal conditions in the clinical practice of physical therapy. The course will include a combination of lecture and hands-on lab. The techniques will span the spectrum from soft tissue procedures such as transverse friction massage and manual trigger point therapy to mobilization procedures for the spine and extremity joints. Participants should have a basic working knowledge of the manual therapy procedures taught within the musculoskeletal tract.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

PT 2052 - PEDIATRIC PHYSICAL THERAPY

Minimum Credits: 3

Maximum Credits: 3

Lecture and laboratory activities focusing on the preparation of the student for a pediatric clinical affiliation and a possible career in physical therapy.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2055 - GROWTH AND DEVELOPMENT 1

Minimum Credits: 2

Maximum Credits: 2

Major emphasis is on the evaluation and treatment of children. General principles of growth and development of the major systems will be reviewed, in addition to common diseases and diagnoses affecting those systems. Students will learn to prioritize appropriate evaluation and treatment strategies for pediatric patients; interpret results of clinical findings; develop and prioritize problem lists; and formulate treatment goals that are functional and age appropriate.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2056 - GROWTH AND DEVELOPMENT 2

Minimum Credits: 2

Maximum Credits: 2

A continuation of PT 2055.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2059 - GERIATRICS

Minimum Credits: 2

Maximum Credits: 2

Course provides information and sources of information to enable students to appreciate changes in physical function (including physical, cognitive and social aspects) of the older adult and consider the potential impact the changes may have on health status and assessment and treatment in pt. An overview of systemic, behavioral and cognitive changes that typically occur with advanced age and the impact of the changes on physical function are also discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2060 - NEUROSCIENCE

Minimum Credits: 4

Maximum Credits: 4

Considers gross and cellular organization of central nervous system and its relationship to peripheral somatic and visceral systems; the physiological properties of neurons, their associated structures; and the problem mechanisms for reception, transmission, and integration of information at spinal, supraspinal and cortical levels. Concepts of normal sensory-motor integration, to include influence of neural centers on motor activity and postural control, and clinical manifestations of dysfunctions of major neural elements will be discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT)

PT 2061 - NEUROMUSCULAR PT 1

Minimum Credits: 3

Maximum Credits: 3

First of a three part series of courses which introduce the student to basic neurological rehabilitation principles. Course intended to provide the student with knowledge and understanding of human movement and function throughout the neuromuscular system. Students will be introduced to a neuromotor evaluation scheme for patients with neurologic impairments. Information presented regarding motor behavior, motor control as it relates to normal/abnormal movement and function. Case studies and problem solving format will be used throughout this course.

Academic Career: Graduate
Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2062 - NEUROMUSCULAR PT 2

Minimum Credits: 5

Maximum Credits: 5

A continuation of PT 2061.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2063 - NEUROMUSCULAR PT 3

Minimum Credits: 3

Maximum Credits: 3

A continuation of PT 2062.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2071 - RESEARCH METHODS IN PT

Minimum Credits: 2

Maximum Credits: 2

Purpose of this course is to instruct students in the basic principles of research in physical therapy. Topics to be covered include research methodology and study design, hypothesis testing, and principles of data collection and outcome assessment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2072 - EVIDENCE-BASED PRACTICE 1

Minimum Credits: 1

Maximum Credits: 1

Course designed to provide an introduction to the concepts of evidence-based practice in physical therapy. Course will integrate classroom lecture and discussion, and small-group forums to help students learn how research evidence impacts the practice of PT. Emphasis of course will be interpreting research evidence on PT interventions and adapting the evidence into clinical practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2073 - EVIDENCE-BASED PRACTICE 2

Minimum Credits: 1

Maximum Credits: 1

Course is to apply principles of evidence-based practice to decisions regarding selection of appropriate physical therapy treatments. Integrate lectures, discussion and research forums to help students learn how to appraise the research literature regarding treatments, and how to apply research evidence to treatment decisions for individual patients. Emphasis on interpreting research evidence on aspects of diagnosis and prognosis related to PT and adapting the evidence into clinical practice. Students will develop a summary data collection form for a specific patient population.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2074 - EVIDENCE-BASED PRACTICE 3

Minimum Credits: 1

Maximum Credits: 1

Primary objective of course will be presentation of the group information collected during the student's first full time clinical internship. Written and oral summaries collected data will be presented by the student groups assembled during PT 2073.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2075 - EVIDENCE-BASED PRACTICE 4

Minimum Credits: 2

Maximum Credits: 2

Primary objective of course will be benchmarking data presented in PT 2074 against anticipated outcomes in the literature. Students will work in groups assembled in PT 2073. Each group responsible for searching the literatures to determine expected outcomes for their particular patient-type. Each group will perform a systematic review of the literature related to interventions for their patient-type and will document the usage of evidence-base interventions in their own data and its relationship to outcomes of care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2076 - EVIDENCE-BASED PRACTICE 5

Minimum Credits: 1

Maximum Credits: 1

Course will run concurrent with student's full-time, yearlong clinical internship. Requirements will be completion of a personal portfolio of clinical outcomes for patients seen during the internship experience. A variety of patient types will be examined by each student depending on the clinical setting. Each student's portfolio will be evaluated by members of the PT faculty at 6 months and after completion of the year-long internship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physical Therapy (DPT)

PT 2077 - EVIDENCE-BASED PRACTICE 6

Minimum Credits: 1

Maximum Credits: 1

PT 2084 - SPECIAL TOPICS IN OSTEOARTHRITIS

Minimum Credits: 1
Maximum Credits: 2

The purpose of this course is to explore the literature on a variety of current issues related to osteoarthritis and the care of individuals with osteoarthritis.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

PT 2085 - ADVANCED THERAPEUTIC EXERCISE IN PT PRACTICE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PT 2088 - SPECIAL TOPICS IN PT

Minimum Credits: 1
Maximum Credits: 1

This course will be divided into 2 separate and distinct modules. The purpose is to provide students with a fundamental understanding of 2 major areas that impact their future practice as physical therapists. The first module covers the clinical innovations and translation of emerging science(s) in the field of rehabilitation. In this portion students will be introduced to an understanding of the role of work being done in regenerative medicine and its impact on rehabilitation of musculoskeletal and neurological conditions. The second module covers the broad topic of psychologically informed physical therapy practice. Students will become familiar with cognitive behavioral therapy approaches as well as motivational interviewing techniques with the goal of enhancing their awareness of psychosocial factors that influence the patient outcomes. The content will also include information and training on the SBIRT model, designed to identify individuals across a continuum of substance abuse. The course will be delivered in a seminar based format with the expectation of students being engaged and interactive during the discussions.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad HSU Basis

PT 2089 - CLINICAL EDUCATION SEMINAR

Minimum Credits: 2
Maximum Credits: 2
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PT 2092 - CLINICAL EDUCATION 2

Minimum Credits: 1
Maximum Credits: 8

Fourteen-week clinical education experiences conducted under the supervision of qualified physical therapists in a variety of practice settings to provide a wide range of professional learning opportunities in the provision of care and in teaching and where possible, opportunities to participate in the administration of services, quality assurance, clinical research activities, and supervision of physical therapist assistants and other supportive personnel.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad HSU Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

PT 2099 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6

Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Graduate
Course Component: Independent Study
Grade Component: Grad LG/SU3 Basis

PT 2102 - PHARMACOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course covers the principles of drug action for drugs related to: central nervous, respiratory, gastrointestinal, renal/cardiovascular, and endocrine systems. The mechanism of action and use of antibiotics will also be covered.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Physical Therapy (DPT or PSTRNS-DPT)

PT 2103 - RADIOLOGY-PHYSICAL THERAPISTS

Minimum Credits: 2
Maximum Credits: 2

This course will introduce the radiologic concepts with an emphasis on musculoskeletal and neurological imaging related to PT practice.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PT 2107 - EVIDENCE BASED PRACTICE

Minimum Credits: 3
Maximum Credits: 3

This course examines best practice patterns in clinical care and emphasizes basic concepts related to research such as reliability, internal and external validity, and study design. Critical appraisal of studies related to various PT interventions will be reviewed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT or PSTRNS-DPT)

PT 2108 - EVIDENCE IN PRACTICE 1

Minimum Credits: 2
Maximum Credits: 2

This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.

Academic Career: Graduate

Course Component: Lecture
Grade Component: Grad LG/SU3 Basis
Course Requirements: PLAN: Physical Therapy (DPT or PSTRNS-DPT)

PT 2109 - EVIDENCE IN PRACTICE 2

Minimum Credits: 2

Maximum Credits: 2

This course will focus on the use of clinical information related to outcome and treatment in a series of patients with a common disorder.

Academic Career: Graduate

PT 2130 - CLINICAL EDUCATION 1

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

PT 2131 - CLINICAL EDUCATION 2

Minimum Credits: 3

Maximum Credits: 3

This part-time clinical is focused on the development of professional skills. It will be a hands-on experience allowing the student to perform patient management skills that they are learning in the classroom. Clinical responsibilities will increase throughout the semester. Students must also regularly attend and participate in departmental clinical rounds. This weekly forum will provide the opportunity for faculty, clinicians, and students to present clinical case reports with an interactive group discussion. Students must meet specific clinical benchmarks in order to successfully pass this course.

Academic Career: Graduate

Physicians Assistant Program

PAS 2101 - INTRODUCTION TO PHYSICIAN ASSISTANT STUDIES

Minimum Credits: 1

Maximum Credits: 1

This course traces the history, development, and current status of the physician assistant profession. Students will explore the role of the physician assistant as part of the healthcare team. The student will research and investigate the state and national legislation that governs the profession. Topics will include a historical perspective of the profession, current trends, and issues of the profession; the PA role in health care delivery, competencies integral to the PA profession; political and legal factors that affect PA practice; importance of biomedical ethics, patient confidentiality, and professionalism, in relation to their role as health care providers; content reviewing the professional organizations, program accreditation, graduate certification, certification maintenance, license application, employment issues and professional liability will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2102 - ANATOMY

Minimum Credits: 4

Maximum Credits: 4

This course with a lab studies the organization of the human body and the way in which anatomical relationships serve as a basis for function. The medical aspects of the structural and functional organization of the human body are also a focus of attention. The lectures are designed to provide guidance or explain difficult or conceptual material. The major learning experience occurs in the laboratory with cadaveric dissection.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2103 - MEDICAL PHYSIOLOGY

Minimum Credits: 4

Maximum Credits: 4

This course is an introduction to the physiology and microanatomy of the human body, and as such its major objectives are to give students an appreciation of both the normal functioning and the structure of tissues and organs. In accomplishing this goal, it is desirable for students to correlate lecture information pertaining to cell and organ system physiology with laboratory exposure to the histology and ultra structure of human tissues and organs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2104 - GENETIC AND MOLECULAR MECHANISMS OF HEALTH AND DISEASE

Minimum Credits: 1

Maximum Credits: 1

This course introduces the student to the understanding of genetic and molecular medicine as it applies to clinical practice. A strong knowledge base of cell structure, genetic variation, inheritance patterns and specific genetic disorders is required. In addition to knowledge, the application of genetic knowledge and molecular medicine involves the development and integration of skills including but not limited to: accurate history taking; creation of precise documentation of and interpretation of the pedigree; integration of genetic understanding into patient assessment; comprehension of the role of genetic testing and counseling; and management and referral of patients with genetic issues. Physician assistant students must be familiar with the most common clinical genetic diseases, as well as the ethical, legal and social issues of genetics. Due to the constantly changing knowledge in this field, pa students must demonstrate the ability to utilize information literacy skills to ensure that as clinicians they are self-directed lifelong learners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2105 - HEALTH POLICY

Minimum Credits: 2

Maximum Credits: 2

This course introduces the student to how the health care system works. The focus is on basic principles of health policy, system failures. Topics include reimbursement, access to health care, workforce, quality assurance, long-term health care. In addition, topics will include public policy, funding issues, healthcare disparities, managed care and the medically underserved. The course will conclude with an opportunity to review and discuss moral and ethical issues in healthcare from the perspective of a physician assistant.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2106 - INTERPRETING AND EVALUATING THE MEDICAL LITERATURE

Minimum Credits: 1

Maximum Credits: 1

This course introduces the basic concepts, terminology and methodology of quantitative and qualitative research as it applies to medical practice. This course will stress the knowledge and skills necessary for locating, interpreting, evaluating and applying quality medical research to clinical practice and professional development; the ability to appropriately critique medical literature; and the basic comprehension needed for participation in research and the development of research and grant proposals. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2107 - PATIENT EDUCATION AND COUNSELING

Minimum Credits: 2

Maximum Credits: 2

This course is a practical approach to understanding how patients present, learn and change based on the research on theories, models and techniques of: personality and learning styles; how to assess patient knowledge, attitude and readiness to change; and the effects of literacy, health literacy, individual coping mechanisms, ecological barriers and culture on patient comprehension and adherence. The use of validated interpersonal skills improves the clinician/patient relationship, demonstrates respect for the patient's well-being and individuality, thereby reducing medical errors and lawsuits, and increasing patient adherence. Self-reflection on the student's own

barriers, biases, stereotypes, culture and assumptions is required. Assessment of understanding and skills will be conducted during the course as well as throughout the didactic program and clinical rotations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2201 - HISTORY TAKING AND PHYSICAL EXAMINATION 1

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the basic interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications. Students will learn the clinical significance of the physical examination, the components of the complete physical exam and will be able to perform these examination techniques. Topics in this course will include: a general overview of history taking and physical examination; clinical reasoning; documentation; interviewing skills; the general survey; skin; the head and neck; the lungs; and the abdomen.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2202 - CLINICAL MEDICINE 1

Minimum Credits: 3

Maximum Credits: 3

This course is the first part of an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes infectious diseases, dermatology, disorders of the head, eyes, ears nose and throat, cardiopulmonary disorders, and endocrinopathies. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2203 - DIAGNOSTIC & THERAPEUTIC PROCEDURES I IN MEDICINE

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include methods of wound care and closure, burns, hyper/hypothermia, assessment of pulmonary function, arterial blood gases, ENT procedures, bioterrorism, radiology. The laboratory component of this course will allow the student to practice the skills and procedures common to PA practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2204 - PHARMACOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course presents a study of drugs and their interactions with and within living tissue. This course introduces the student to general

drug classifications and medicinal agents most likely encountered in primary care settings and the pharmacological principals, dosing, patient education, pharmacodynamics, and therapeutic parameters and indications, about commonly prescribed drugs. Areas covered include drug receptor theory, mechanisms of action, pharmacokinetics, pharmacodynamics, antimicrobial therapy, cardiovascular medications, and drugs affecting the autonomic nervous system, complimentary medicines. Each of these topics will be explored through lecture, class discussions, and case presentations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2101 and 2102 and 2103 and 2105 and 2106 and 2205; Min Grade 'C'; PLAN: Physician Assistant Studies (MS)

PAS 2205 - PATHOPHYSIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines the biological basis of common clinical disease states. Pathophysiology is treated as a disruption of normal homeostatic mechanisms that progresses beyond the normal compensatory capabilities of the human body.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2301 - HISTORY TAKING AND PHYSICAL EXAMINATION 2

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to the interviewing, history taking and documentation skills which will include the chief complaint, history of present illness, past medical, surgical, social, allergy and family history, review of systems and medications as they pertain to the specific organ systems presented. The students will learn the clinical significance of the physical examination, the components of the physical exam and will be able to perform these examination techniques for the material introduced in this course. Topics in this course will include: a general overview of history taking and physical examination as it pertains to course content; clinical reasoning; documentation; interviewing skills; and the cardiovascular, female/male genitalia, musculoskeletal, neurological, and psychiatric systems; and assessment of the pregnant patient.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2302 - CLINICAL MEDICINE 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of Clinical Medicine I and is an intensive study of human disease processes and disorders in the broad scope of clinical medicine. As the course progresses students will explore the epidemiology, etiology, pathophysiology, assessment, management and follow up of disease processes and disorders. The course will approach the condition from the perspective of history and physical examination, ordering and interpreting diagnostic studies, generation of a differential diagnoses and the development and implementation of treatment plans and prognosis. Preventative measures to assist in disease prevention will also be discussed. Content includes disorders of the GI system, obstetrics and gynecology, nephrology, disorders of the urinary tract, musculoskeletal diseases, neurology, behavioral medicine, and hematology/oncology. Presented by physicians from various practice specialties these lectures provide comprehensive instruction that enables the student to understand the nature and problems experienced by both ambulatory and hospitalized patients. The laboratory component of this course focuses on case based learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2303 - DIAGNOSTIC AND THERAPEUTIC PROCEDURES IN MEDICINE 2

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundation of clinical skills and diagnostic procedures that are commonly performed in patient care. Instruction for selected procedures and diagnostic tools will be presented to the student by various methods including theory discussion, rationale for procedure, identification of necessary equipment, principles of appropriate skill technique, demonstration of skill when applicable, skill practice time, identification of special clinical considerations and precautions, documentation aspects and recommended elements of patient education. Opportunities to observe certain procedures and diagnostic tools will be correlated when possible. Topics include GI procedures, NG tube placement, intravenous placement, central line monitoring, bladder catheterization, musculoskeletal

procedures, immobilization, joint injection, lumbar puncture, electrocardiography, transfusion medicine. The laboratory component of this course will allow the student to practice the skills and procedures common to pa practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2304 - PHARMACOLOGY 2

Minimum Credits: 3

Maximum Credits: 3

This course introduces the student to general drug classifications and medicinal agents most likely encountered in primary care settings and the pharmacological principals, dosing, patient education, pharmacodynamics, and therapeutic parameters and indications, about commonly prescribed drugs. Topics include drugs used in gastroenterology, obstetrics and gynecology, immunology, complementary medicine, psychotropic medications, opioid and non-opioid analgesia, chemotherapeutic agents. Each of these topics will be explored through lecture, class discussions, and case presentations.

Academic Career: Graduate

Course Component: Lecture

Course Requirements: PREQ: PAS 2104, 2107, 2201, 2202, 2203, and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2305 - HEALTH ISSUES ACROSS THE LIFESPAN

Minimum Credits: 2

Maximum Credits: 2

This course introduces the physician assistant student to diseases, exam findings and diagnostic evaluations, and treatments common to the pediatric and geriatric populations. Course content will be introduced using a variety of teaching techniques including both traditional lectures as well as cooperative and collaborative group work. Case studies will be presented to reinforce course content and form the discussion in class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PAS 2104,2107,2201,2202,2203,and 2204; PLAN: Physician Assistant Studies (MS)

PAS 2306 - FUNDAMENTALS OF SURGERY

Minimum Credits: 1

Maximum Credits: 1

A series of lectures introduces fundamental principles of peri-operative medicine, procedure oriented patient evaluations, preoperative assessment, prevention of post-operative complications, surgical instrumentation, operative techniques, anesthesia, pre- and post-operative management of patients, post-operative complications, co-morbid states, and documentation. The history of the physician assistant in surgery, including surgical reimbursement issues will be discussed. Selected topics will include the most commonly performed surgical procedures as well as issues relevant to various surgical sub-specialties.

PAS 2701 - CLINICAL ROTATION 1

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week clinical rotation focuses on the evaluation and management of the ambulatory and hospitalized patient on an internal medicine service. Students learn how to take an accurate and pertinent history, conduct a physical examination, recognize patterns of illness, and acquire approaches to disease management. The student participates in the full range of inpatient care, formulating a problem list, taking part in daily rounds, performing technical skills, participating in the management of patient problems, and planning for discharge and follow-up care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2702 - CLINICAL ROTATION 2

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week clinical rotation focuses on the evaluation and management of the ambulatory patient in a primary care

setting. The student participates in the full range of outpatient care through the life span, including collecting patient data and information from diagnostic studies, developing a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care. This clinical rotation encompasses the comprehensive and longitudinal care of patients with a special emphasis on care of individuals in the context of families and communities.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2703 - CLINICAL ROTATION 3

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week clinical rotation focuses on the evaluation and management of patients in the emergency department setting. The student participates in the appropriate triage, stabilization, diagnosis and management of patients with urgent and emergent problems and develops skills in working with the pre-hospital emergency medical team and secondary referral systems.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2704 - CLINICAL ROTATION 4

Minimum Credits: 4

Maximum Credits: 4

This 4-credit, five-week rotation focuses on the evaluation and care of infants and children in an ambulatory setting. The student participates in well-child preventative care, the evaluation and management of common pediatric problems, and the patient education of children and their care-givers.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2705 - CLINICAL ROTATION 5

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week rotation focuses on the evaluation and management of surgical patients and become familiar with the clinical presentations and management of common surgical problems. The student is involved in pre-operative, intra-operative and post-operative patient care and develops an understanding of the patient as a member of the surgical team. The student will learn to develop skills necessary in evaluating patients in the perioperative period and to optimize patients' medical conditions in preparation for surgery. Students learn the natural history of common surgical diseases and the proper operative management and their postoperative treatment. The student will participate in developing the correct diagnoses and management of the surgical patient. The student will also participate in the management of acute pain and postoperative complications.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2706 - CLINICAL ROTATION 6

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week rotation focuses on the evaluation and management of patients with psychiatric and behavioral health problems in ambulatory and/or inpatient settings. The student participates in psychiatric evaluations, monitoring of therapy, and appropriate referral to other health care professionals and facilities.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2707 - CLINICAL ROTATION 7

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week rotation focuses on the evaluation and management of women patients, including prenatal care and

gynecologic problems. The student participates in the collection of patient data and information from diagnostic studies, development of a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Physician Assistant Studies (MS)

PAS 2708 - CLINICAL ROTATION 8

Minimum Credits: 4

Maximum Credits: 4

This 4 credit, five-week rotation focuses on the evaluation and management of geriatric patients, including experience in a long-term care setting. The student participates in the collection of patient data and information from diagnostic studies, development of a differential diagnosis, oral and written case presentations, and formulating management plans including patient education, appropriate referral and follow-up care.

PAS 2712 - SUMMATIVE EVALUATION

Minimum Credits: 1

Maximum Credits: 1

The summative evaluation is designed to assure that each student has met ARC-PA and the program's defined cognitive and clinical

skills performance objectives prior to graduation. In addition to assessing the student's proficiency by individual competencies we will be assessing student performance through the interaction of the program specific competencies. The summative evaluation includes measurement of the dimensions of cognition, technical skill, integration, rapport, behavior and attitude. The evaluation is comprised of an objective examination of medical knowledge, procedural skill through clinical skills evaluation, and objectively structured clinical examinations to evaluate interactions between the student and patient (history taking, physical examination and clinical reasoning) assessment of critical thinking and professional behavior. Students are required to pass this course in order to graduate from the program.

PHYS 2541 - THERMODYNAMICS AND STATISTICAL MECHANICS

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a 2-term course with emphasis on statistical mechanics. Discussion of microcanonical, canonical, and grand canonical ensembles, the passage to quantum mechanics, and the use of density matrix. The Gibbs approach to the second law. Fermi-Dirac and Bose-Einstein statistics, in both weak and strong degeneracy approximations. Transport phenomena including the fluctuation dissipation theorem and the master equation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2555 - ADVANCED CLASSICAL ELECTRICITY AND MAGNETISM

Minimum Credits: 4

Maximum Credits: 4

This is the first term of a two-term study of Maxwellian electromagnetism. Both the physical concepts involved and the mathematical formulation of the theory will be explored. The theory will be applied to a variety of physical systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2565 - NON-RELATIVISTIC QUNTM MECHANC 1

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a two-term course. Subjects covered include the general principles of wave mechanics and matrix mechanics, Dirac notation, the solution of bound state problems, especially the central force problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2566 - NON-RELATIVISTIC QUNTM MECHANC 2

Minimum Credits: 3

Maximum Credits: 3

The second term of this course applies the previously developed abstract form of quantum mechanics to more complicated systems. Angular momentum and permutation symmetries are discussed. Approximation methods for multiparticle and scattering problems are developed. Finally the theory of electromagnetic radiation by atoms is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 2900 - GRADUATE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 1

This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment.

Statistical physics typically deals with the thermal properties of systems with large numbers of interacting dynamical variables, i.e., With many degrees of freedom, and the special techniques used to determine those properties. As such, the ideas, methodologies and results from the study of statistical physics inform virtually all fields of physics, from condensed matter and solid state to astrophysics and cosmology. This course is aimed at a wide audience of primarily second year (and more senior) graduate students with interests in experimental or theoretical physics and astrophysics/cosmology. The aim is to provide a broad perspective of the concepts and techniques of statistical physics, which, as noted, cut across many areas of active research. Depending on the composition of the class, an attempt will be made to include some examples from different disciplines. Topics to be covered (depending somewhat on the background and interests of individuals in the class) include: a review of ideal quantum gases (Sommerfeld model of a metal; Bose-Einstein condensation; magnetism in Fermi systems (Landau levels, Hall effect); white dwarf stars); fluctuations and response; phase

transitions and critical phenomena (experimental survey; criticality = a new state of matter?); Phenomenology (mean field theories, Landau theory, classification); order parameters, scaling, fluctuations, response, universality, broken symmetry; renormalization group overview as a mechanism; interacting systems (brief introduction to second quantization; weakly interacting Bose gas (broken symmetry, excitation spectrum, superfluidity); BCS as a mean field theory; nonequilibrium, stochastic processes (Brownian motion and diffusion; fluctuation/dissipation; Markov processes, master equation; Boltzmann equation and fluid mechanics).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3705 - ATOMIC AND OPTICAL PHYSICS

Minimum Credits: 3

Maximum Credits: 3

Descriptions are given of experimental and theoretical methods of investigating atomic collision processes involving electrons, positive and negative ions, excited atoms/molecules, ground state atoms/molecules and photons. The processes include elastic and inelastic scattering, ionization, recombination, reactive collisions, etc. Both historical and modern state-of-the-art approaches to the problems are covered. Applications to areas as widely different as lasers, fusion plasmas, planetary upper atmospheres and interstellar clouds are touched upon.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3707 - INTRODUCTION TO MANY-BODY PHYSICS

Minimum Credits: 3

Maximum Credits: 3

It is difficult to find a current topic in physics that doesn't deal with many interacting degrees of freedom. The universe of such problems is conveniently divided into ones in which quantum descriptions are essential and others in which a classical description will suffice. Despite this seeming division, the ideas and concepts cross over; an example is the idea of a field description. Very similar effective field theories describe a superconductor at low temperatures, a quantum system, and a classical system like a quantity of liquid argon coexisting with its vapor. Concepts, for example, of broken symmetry and gauge invariance are portable. Many of the same general concepts and techniques carry over from one subfield to another; a number of examples can be cited and will be mentioned at appropriate points during the course. This is a one-term nuts-and-bolts introduction to the quantum physics of interacting, many-particle systems. The course includes second quantization, many body physics and a brief introduction to relativistic quantum mechanics. The approach will generally be intuitive and hands-on. The course typically will begin with second quantization for fermionic and bosonic systems, with examples typically involving electrons, phonons and photons, arising from the quantization of the electromagnetic field. Applications will typically include (i) the interacting electron gas and plasmons (ii) the interaction of the radiation field and matter, (iii) electron phonon interaction, dressed electrons and the polaron problem. There will typically be some discussion of condensation phenomena and superfluidity (typically Bogoliubov theory, broken symmetry and Goldstone bosons); superconductivity (pairing, BCS and Landau-Ginzburg theories). There will generally be some exposure to Green's functions and Feynman diagrams. In addition the course will include a brief introduction to relativistic quantum mechanics and the Dirac equation. Throughout there will be discussion of applications of the techniques and concepts in various subfields of physics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3715 - SOLID STATE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is a one-term course on the ideas of solid-state physics, emphasizing the special ways one must think about crystalline materials. This is a mature subject, but continuously, over more than seven decades, new ideas and phenomena have emerged. In one term we can only consider the basic ideas along with a few more recent developments to enable students working in solid state physics, condensed matter, nanoscience and related fields to approach the voluminous literature and enhance their own research efforts, and also to allow other students to have an appreciation for an extremely large part of current research activity in physics. Roughly speaking, there will be three parts to the course: some variation on emphasis can be expected depending on the instructor and on the interests of the class. (I) phonons: crystal lattices; diffraction and scattering; reciprocal lattice; lattice vibrations, quantization; thermal properties. (II) electrons: free electron model; density of states; thermal properties; Bloch's theorem, electron states and energy bands; semiconductor statistics; quasi-classical electron dynamics; Boltzmann equation and transport. (III) additional topics: electron-electron and electron-phonon interactions; Hall effect; Landau levels; superconductivity; electromagnetic response.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3716 - ADVANCED SOLID STATE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is a second, graduate level solid state course. The topics could be adjustable given the cross section of the department and topical developments in the field. Depending on the makeup of the department, the scope (and title) could be broadened. Topics suitable for this course include: a brief exposure to 'practical' group theory (1-2 weeks maximum); optics and spectroscopy relevant to the solid state (including linear and non-linear response and complex dielectric constant); coherence and correlation (including the density matrix, Bloch equations, optics); introduction to NMR (e.g. Two-level system, rotating reference frame, characteristic times); superconductivity ii (e.g. Type ii, magnetic effects) beyond the Ginsburgh-Landau theory (done in statistical physics ii); magnetism ii (more advanced topics: using model and phase transitions done in statistical physics ii, spin waves and Landau levels in solid state physics i); transport theory ii (i.e. Beyond the basic Boltzmann equation examples in solid state physics i).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3717 - PARTICLE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is the first term of a two term sequence exposing the student to basic methods and recent developments in high energy physics. Particle physics involves completely relativistic phenomena and requires the generalization of non-relativistic quantum concepts to the relativistic regime in order to develop the phenomenological and calculational methods suitable for relativistic processes in which the number and type of particles can change. The student will be taken out of the realm of the Schroedinger equation and into relativistic quantum fields. The first term is suitable as a one semester course for students not specializing in high energy physics. The course examines experimental and phenomenological foundations of particle physics. The known particles and fundamental interactions are investigated. Modern experimental techniques of particle physics are discussed (including basic properties of particle interactions with matter). General features of electromagnetic, weak, and strong interactions, and their associated symmetries, are explored.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3718 - ADVANCED PARTICLE PHYSICS

Minimum Credits: 3

Maximum Credits: 3

This is the conclusion of the 2-term sequence PHYS 3717/3718. This course covers the standard model in detail and includes: the phenomenology of weak interactions; group theory and the quark model; the parton model for deep inelastic scattering and other high energy processes; an introduction to gauge theories of electroweak and strong interactions. Various topics of current interest in particle physics beyond the standard model will also be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3725 - GENERAL RELATIVITY 1

Minimum Credits: 3

Maximum Credits: 3

This course will cover the basic conceptual foundations of general relativity, calculational techniques, and current observational probes. Topics include the equivalence principle, geodesic deviation, tidal forces, the description of gravitation as spacetime curvature, and Einstein's equations. These ideas will be applied to current observations, including post-Newtonian parameters and solar system probes, the Schwarzschild metric and black holes, gravitational wave generation and detection, gravitational lensing, and gravitational explanations for dark energy phenomenology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3726 - GENERAL RELATIVITY 2

Minimum Credits: 3

Maximum Credits: 3

This is the second term of a two-term survey of general relativity. Subjects to be treated during the year include conservation laws, equations of motion, gravitational radiation, gravitation collapse, and cosmology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3730 - INTRODUCTION TO BIOPHYSICS

Minimum Credits: 3

Maximum Credits: 3

The post genomic age presents many new challenges and opportunities to physicists. This course will prepare the students to face those challenges and to work in this exciting multidisciplinary area of science. In this course we will review useful physical ideas and techniques that have contributed significantly to the recent development in biophysical research. This includes the use of statistical approaches for understanding gene regulation and signal transduction in biological and chemical networks; nonlinear dynamics for understanding biological pattern formation, ecology, and population dynamics; hydrodynamics for understanding cell motility and taxis; and information theory for signal processing in neuronal networks. The study of biophysics thus requires a broad range of physics knowledge and techniques. The course will also introduce basic concepts in biology that range from molecular to cellular biology. Topics to be covered include: introduction to biology; microscopy techniques; basics of cell biology; genetics (the genetic code, gene replication, gene expression, genetic networks); molecular biology techniques; energy in biological systems and the statistical view of biological dynamics; entropy and free energy in biology; two-state models in biology and neurobiology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3765 - FIELD THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This is the first semester of a graduate course in quantum field theory. The assumed prerequisites are a basic graduate course in quantum mechanics, and familiarity with the rudiments of special relativity. The course develops the perturbative approach to relativistic field theory. It begins with a study of the Lorentz group and the method of second quantization. Scalar and spin-1/2 field theories are discussed, including an elementary introduction to renormalization (at the one-loop level). The theory of interacting electrons and photons (qed) is constructed, with applications to a number of physical processes. In more detail, the topics covered will be: Lorentz and poincare groups; free scalar field theory; free spin-1/2 field theory; field quantization; symmetries and conservation laws; interacting scalar field theories, Yukawa theory; perturbation theory and Fynman rules; elementary renormalization theory; quantum electrodynamics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PHYS 3766 - FIELD THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This is the second semester of a graduate course in quantum field theory. It builds on the material covered in phys 3765 (field theory 1). The course further develops the techniques of relativistic quantum field theory, covering the path integral approach to field theory, additional topics in quantum electrodynamics, symmetry breaking, non-abelian gauge theories, and the standard model. In more detail, the topics covered will be: green's functions, asymptotic scattering theory, and the lsz formalism; functional integration and the path integral; quantization of abelian (qed) and non-abelian (yang-mills) fields; the renormalization group; spontaneous symmetry breaking of global and local symmetries; the standard model.

Plastic Surgery

PLSSURG 5450 - PLASTIC RECONSTRUCTIVE SURGERY

Minimum Credits: 0

Maximum Credits: 0

Four-week elective. Student participates in clinical care of patient on plastic surgical service, in acute management of facial and hand injuries in ER or OR. Also involved in pre- and post-operative care. Act as assistant in elective plastic surgery operations in wide variety of conditions. Instruction given in biology of wound healing and fundamental techniques of plastic surgery. Emphasis on scope and interaction of plastic surgery with other specialties and various methods of reconstruction available for various deformities.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PLSSURG 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PLSSURG 5883 - SURGICAL RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PLSSURG 5899 - INDEPENDENT STUDY PLASTIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under

the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PLSSURG 5901 - EXTRAMURAL PLASTIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in plastic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

Political Science

PS 2000 - THE PROFESSION OF POLITICAL SCIENCE

Minimum Credits: 1

Maximum Credits: 1

This course is a professionalization seminar in which first-year graduate students meet weekly with various faculty members to discuss various issues surrounding political science as a profession. Topics will include writing a dissertation, the publication process, teaching, work-life balance, and other issues.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2010 - FOUNDATIONS OF QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce the beginning graduate student to the major conceptual and theoretical issues of contemporary political science. During the term, focus will be in three basic areas of inquiry; a) political science as a science; b) paradigms, frameworks, approaches; and c) examination of contemporary examples of applications of the above in various substantive fields of political science.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2020 - EMPIRICAL METHODS OF RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This seminar is the second in a three-course methodological sequence required for graduate students in political science. It introduces students to techniques of research design and analysis, and is designed to enable students to read and understand empirical social science research. Problems of scientific method, concept formation, measurement, and statistical inference are explored; students learn to use some of the statistical techniques common in political research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2030 - POLITICAL RESEARCH AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course aims to provide the student with (1) the ability to read, interpret, and criticize virtually any piece of political science research using quantitative methods and (2) the ability to design and carry out original research applying quantitative methods to relevant data.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2040 - CORE POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar in political thought forms one of the core requirements of the graduate program in political science. Its aim is to introduce graduate students to the traditional concerns of the subfield of political theory and to explore the relevance of this subject matter even to political scientists who do not choose to specialize in it.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2060 - QUALITATIVE RESEARCH: DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.

Academic Career: Graduate

PS 2116 - COMPARATIVE PUBLIC ADMINSTRTN

Minimum Credits: 3

Maximum Credits: 3

The public bureaucracy is a political institution and must be understood as a key factor in the policymaking process. At the same time it is a formal structure charged with the legal implementation of policy. These two competing understandings of administration will be examined from a variety of theoretical and analytical perspectives. The principal geographical focus will be on Europe, but there will also be discussions of administration in other areas.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2118 - GENDERAND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2200 - AMERICAN GOVERNMENT AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides an opportunity to analyze selected aspects of government and politics in the United States through a program of intensive reading, seminar discussions, and written essays. Some prominent interpretations of American government and politics are

identified and examined. Readings on and discussion of topics such as political leadership and mass behavior provide a basis for consideration of the seminar's major theme, leader-follower interaction.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2211 - AMERICAN LEGISLATIVE PROCESS

Minimum Credits: 3

Maximum Credits: 3

Focus is on the journal literature of the last decade- involving representation, legislators and their behavior, legislative structures, legislative parties, interest groups, executive-legislative relations, legislative reform, national and subnational legislative systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2212 - US EXECUTIVE BRANCH POLITICS

Minimum Credits: 3

Maximum Credits: 3

This Ph.D. seminar course examines both the theoretical and empirical literature on the U.S. Executive branch. The focus of this course is strictly centered on the study of political institutions and organizations' political behavior related topics (e.g. presidential popularity; presidential elections; presidential nominations) will be covered in other courses. Although the primary focus of this course will be at the U.S. federal level, some attention will be given to the U.S. subnational level (i.e. American states). The course is broken down into three sections. The first section provides an overview of interdisciplinary research on institutions and organizations from both economics and sociological theoretical traditions. The second section of this course focuses on the internal functioning of the executive branch, including, but not limited to, president-agency relations. The final section focuses on analyzing executive branch actors' external relations with other institutional actors (i.e. legislative, judiciary, organized interests) within a separation of powers constitutional framework. The aim of the final section is to integrate insights from both institutional and organizational perspectives.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2213 - JUDICIAL PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course examines courts and judges as political actors. It emphasizes the non-legal factors that affect the decisions judges make and that influence judicial interactions with other political actors and institutions. Most material will focus on the US court system, but there will be some work of a comparative nature. Students will be responsible for critically analyzing reading materials and producing an independent research project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2221 - ECONOMIC INEQUALITY AND AMERICAN DEMOCRACY

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2230 - MASS POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the political beliefs, attitudes, values, and behaviors of citizens in modern democracies. Because most of the theories and models were initially designed to analyze U.S. citizens, we will primarily examine the literature in American political behavior, though we will also discuss the degree to which such theories and models 'travel' to other contexts, leading us to some of the comparative behavior literature, as well. Much attention will be paid to the structure and content of citizen belief systems; additionally, we will examine the sources of such beliefs, including the media, political elites, and other citizens.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Political Science (MA or PHD)

PS 2235 - AMERICAN ELECTORAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This seminar complements PS 2230: Mass Politics. Like 2230, this seminar examines the American micropolity. But while 2230 focuses primarily on what happens in citizens' proverbial heads when they think about politics, this course will emphasize the practical applications and consequences of those thoughts - what people do in the electoral arena, what factors influence that behavior, and how electoral outcomes can be predicted or explained.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2265 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3

Maximum Credits: 3

This course will combine multi-disciplinary environmental topics in an introductory level course. The concept of environmental policy and its impact on environmental management will be introduced. It will focus on the various scientific, technical and social disciplines including the basic sciences as well as law, engineering, public health and economics. Attention will also be given to the effects of developing and changing environmental policy on selected industries as well as natural resources.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2301 - THEORY & CONCEPTS COMP POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytic frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytic tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state and to making policy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2303 - POLITICS, ISLAM, AND THE STATE

Minimum Credits: 3

Maximum Credits: 3

This course provides an accessible and comprehensive account of political Islam over the span of the past century. Drawing on insights from comparative politics and Islamic studies. It explains the complex interaction between Islam, society, the state, and progresses of globalization. The course demonstrated that political Islam, far from being monolithic phenomenon, varies considerably from country to country depending on its position in relation to society, the state, and the broader political environment. The course provides a portrait of Islam and politics through a combination of detailed case studies and country overviews that span the globe, with a focus on the Middle East, central Asia, and south Asia. It also provides a detailed account of the global Jihadist movement.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

PS 2310 - POLITICS OF THE EUROPEAN UNION

Minimum Credits: 3

Maximum Credits: 3

Over 180 sovereign states now participate in the international economic system. The risks and opportunities that each state faces in the international economy have been shaped by the givens of geopolitics and by the decisions and conflicts that make up its economic history. Each country faces some dilemmas that are recurrent and intractable, and others that are unfamiliar and fluid. In the first half of the semester, we will examine how governments have historically coped with these dilemmas, usually by trying to reconcile the expectations of foreign governments with those of domestic interests. Such reconciliation has created distinctive strategies (such as mercantilism and import-substitution industrialization) that combine policies for domestic economic development with (hopefully

compatible) policies for economic exchange with other countries. In the second half of the course, we will focus on international economic issues currently facing the governments and citizens of selected advanced industrial and developing societies. Each student will write an extended research and policy paper, with recommendations, on a topic in ONE of the following categories:(1) The most important issues in the international economic relations of a particular state (for instance, Sri Lanka); or(2) The economic problems associated with trade in specific commodities (say, sugar or nuclear power generation equipment); or(3) The implications and consequences for individuals and particular social groups of a selected national strategy for managing international trade and investment. In order to receive credits for this course, students will take and pass an in-class final exam as well as submitting a satisfactorily drafted and revised research and policy paper.

Academic Career: Graduate

PS 2311 - WESTERN EURPN GVRNMNT & POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar is designed to provide a survey of the major questions related to the governance of Western European nations. Topics such as political competition, political participation, and institutional processes will be covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2313 - COMPARATIVE POLITICAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course is an introduction to the study of comparative mass political behavior. It is designed to emphasize cross-national similarities and differences in public opinion, voting behavior and political participation, and thus will complement the U.S.-dominated material presented in PS 2701 'American Electoral Behavior' and PS 2230 'Mass Political Behavior.' The course will first cover the comparative perspective on traditional subjects in the behavior field, such as turnout, the structure and sophistication of mass opinion, media impact, partisanship and models of voting behavior. It will then turn to more specialized areas such as political protest, the development and impact of democratic values, trust and "social capital" in new democracies, and the analysis of public opinion and participation in ethnically, religiously and linguistically divided societies.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2319 - THE EUROPEAN UNION IN POLITICS AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is an intensive introduction to the history, organization, and politics of the European Union (EU). An historical overview of the immediate post-World War II period will be provided, but the major emphasis will be on the EU's governing institutions, its key political actors, and the fundamental issues they confront in EU politics and policymaking. The European Union today is among the most significant actors in international politics and economy; but its quality as a "democratic system" and the degree to which it represents the people of Europe remains hotly debated. This course therefore dedicates special attention to the European Union's influence as a global power and its legitimacy as a political system.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PS 2320 - HUMAN SECURITY

Minimum Credits: 3

Maximum Credits: 3

Because of Civil Wars in several parts of the world, especially in sub-Saharan Africa, the international organizations have reshaped their development agenda by emphasizing the importance of security and peace as preconditions for development. This approach has been explicitly mentioned among the aims of the United Nations by Secretary General Kofi-Annan in his roadmap for the implementation of the U.N. Millennium summit. In parallel, the concept of human security has been promoted by several Western governments, N.G.O.S and independent commissions in order to take into account the need to address not only state security needs but also human individuals' vulnerability in crisis situations. Aid policies have taken into account these evolutions, though the concept of human security itself has been discussed in a controversial way. The European union is progressively integrating it into its security agenda and has started 'securitizing' its development agenda and African policy, including instruments like the Cotonou convention

with African, Caribbean and Pacific states. The course explores the reasons for the merging of security and development policies in the European Union and its member states and the emergence of a European human security agenda, within the wider context of the United Nations, World Bank and OECD. The focus will be European policies towards crisis areas in Africa and Asia. Potential cases to be discussed are: regulations about antipersonnel landmines, small arms and light weapons, conflict timber and conflict diamonds; policies of conditionality and sanctions; assistance to transitional justice; peace building, security governance, security sector reform in fragile states.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2321 - LATIN AMERICAN POLITICS

Minimum Credits: 3

Maximum Credits: 3

The course is a readings seminar designed to introduce graduate students to the basic international literature on political questions and problems in the Latin American context. The course will focus primarily on the topic of "regime transition" in Latin America.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2322 - SOCIOLOGY OF REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

An inquiry into various theories, frameworks and models elaborated by social scientists to explain the origins, dynamics and outcomes of this most complex matrix of social change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2323 - EXPERIMENTAL RESEARCH IN POLITICAL BEHAVIOR

Minimum Credits: 3

Maximum Credits: 3

This course is an advanced seminar focusing on how experimental methods can inform research in political behavior. The first part of the course will focus on experimental design. Students will learn how to design and implement lab experiments, survey experiments, and field experiments. We will cover various aspects of experimental design - including where to get funding, how to get IRB approval, subject recruitment, subject compensation, randomization, identifying an appropriate control group, internal and external validity, ethical considerations, deception, and methods for analyzing experimental results. Students will also learn how to program surveys and experiments in Z-tree, MTURK, and Qualtrics. The second part of the course will focus on applied topics. We will study how experimental methods are useful for investigating special topics in political behavior, including voter mobilization, public opinion, racial attitudes, ethnic identity, group identity, gender issues, asking about sensitive topics, and methods for estimating both attitudinal and behavioral responses to experimental treatments. Students will propose and design their own experiments throughout the course, and will fully develop one experimental design as a final project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2327 - ISSUES IN DEVELOPMENT MANAGEMENT & POLICY

Minimum Credits: 3

Maximum Credits: 3

Provides an introduction to the theories and practice of development administration and planning and their relationship to the political and policy process.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2337 - TOPICS IN CHINESE POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar begins with a critique of the theory of socialism, the examination of the performance of central planning in China, and the

political, social and economic origins of reform. The course then proceeds with detailed studies of the various economic, political and social reform programs; decentralization of planning, ownership, investment, productivity and efficiency, price, equality, workplace, agriculture, political democratization and participation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2341 - GOVERNMENT/POLITICS OF THE RUSSIAN FEDERATION

Minimum Credits: 3

Maximum Credits: 3

A reading seminar dealing with the alternative interpretations of the soviet political system since the death of Stalin.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2342 - EAST EUROPE: COMMUNISM, TRANSITION, POST-COMMUNISM

Minimum Credits: 3

Maximum Credits: 3

The main purpose of this course is to introduce students to the political systems and dynamics, history, economics and cultures that have shaped contemporary East Europe. The focus of the course is the analysis of current and possible future developments in this region. Literature will be covered that focuses, inter alia, on the history of the countries of the region, on the nature of state and society relations, elite dynamics and political culture and institutions during the communist, transition and post-communist periods and on the international setting of these states. Though overwhelmingly concerned with political developments, we will of necessity touch on historical, sociological and economic changes that have affected and will affect this region. In the process of exploring these dimensions we will also examine the variety of concepts, theories and explanatory approaches that have been utilized to examine political developments in the region. We will assess their validity for analyzing politics both before and after the extraordinary changes that swept the region in 1989. We will consider to what extent approaches taken from the study of other regions have or might be utilized to study this region. Attention will also be devoted to consideration of the phenomena of transition and "post-communism" and whether and how these are useful for analyzing political developments in the region.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2351 - GENDER & DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PS 2370 - RESEARCH TOPICS ON THE POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This is a PH.D level course that explores the causes and effects of poverty, under-provision of public goods, bad governance, and conflict in low-income countries. We will look at the role of institutions, historical legacies, state capacity, regime type, corruption and clientelism, natural resources, ethnic divisions, and international aid in explaining under-development. While this is primarily a substantive course, it will also expose students to cutting-edge methods at the forefront of research on the political economy of development, including experimental and quasi-experimental methods.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2374 - THE POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to

income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2379 - ECONOMICS OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Focuses on development theories; classical, neo-classical, Marxian, dualistic (economic and non-economic) as well as models of agricultural development and administration, productivity enhancement, saving and investment and the foreign sector. Students are expected to apply development models to current problems, analyze and construct policy approaches to issues of current importance in less developed countries.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2380 - SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

This seminar will take up current issues in the study of social movements: the historical development of forms of contention; the interactions of plebeian disruption and elite reform; transnational aspects of social movements; rational-action models of individual participation and movement tactics; movements as sources of identity; new frontiers in research methods.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2381 - SEMINAR POLITICAL INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2384 - TOPICS IN COMPARATIVE POLITICS

Minimum Credits: 3

Maximum Credits: 3

Special topics in comparative politics will be discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2385 - COMPARATIVE LEGISLATURE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on theories that relate to legislative organization, executive-legislative relations, and legislator behavior, and party politics from a comparative perspective. We frequently use literature on the US congress to frame the discussions, but read and analyze literature on Western and eastern Europe, Latin America, Asia, and other parts of the world.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (PHD or MA)

PS 2401 - BEHAVIOR THEORY & EXPERIMENTS

Minimum Credits: 3

Maximum Credits: 3

This is a doctoral course that surveys theoretical models and corresponding experimental methods relevant to the study of political behavior. Topics will include voting, accountability, information processing, risk and social preferences, trust, cooperation, and leadership, drawing from rational choice, cognitive psychology, and behavioral economics. Class sessions will include seminar discussions, lectures, and workshops. Familiarity with formal models is helpful, but not required, we will review the basics as needed for the class.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2501 - THEORY OF INTERNATIONAL RELATION

Minimum Credits: 3

Maximum Credits: 3

This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical question areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2502 - INTERNATIONAL ORGANIZATION

Minimum Credits: 3

Maximum Credits: 3

This course examines the contemporary structures of governance within international policies as they are found at national, regional and international level, and the challenges and stresses to which such structures are vulnerable. It also considers major traditions and theorizing about sources of conflict, order and integration in international politics and reviews current evaluations of major international organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2512 - RUSSIAN FOREIGN POLICY

Minimum Credits: 3

Maximum Credits: 3

A reading course focusing on alternative interpretations of Russian foreign policy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2518 - SECURITY & INTELLIGENCE STUDIES

Minimum Credits: 3

Maximum Credits: 3

Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war ' and especially since 9/11 ' are notably different from those of the past and, at times, they seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment ' past and present ' and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2521 - CONFLICT THEORY

Minimum Credits: 3

Maximum Credits: 3

This course will examine armed struggle, resistance, insurgency, terrorism and actions by non-state actors in the Middle East. We will consider the politics and actions of different groups, as well as the way people live during situations of conflict involving such non-state actors. We will explore meanings of violence, the logics of armed groups, and the implications of killing in warfare. We will also analyze the role of the state vis-a-vis these actors and the part the state plays in violent confrontation. Case studies will include Hizballah, the Palestinian liberation organization, including Hamas, the Algerian liberation movement and others.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2534 - CIVIL WARS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce graduate students to the Civil Wars literature. In the first part of the course, we will examine theoretical debates about why groups sometimes resort to violence against the state or other domestic groups. We will consider grievances, opportunities, informational asymmetries, and commitment problems as plausible mechanisms explaining the onset of Civil Wars. We will also discuss terrorism as one of the strategies of political violence. In the second part of the course, we will discuss possible solutions to Civil Wars and evaluate the relative merits of these solutions. Mechanisms such as intervention, peacekeeping and power sharing will be emphasized.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2540 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2563 - PEACEMAKING AND PEACEKEEPING

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce graduate students to the literature on conflict resolution and post-conflict recovery. In the first part of the course, we will examine the process by which belligerents in Civil Wars reach cease-fires and negotiate peace, why peace sometimes lasts and sometimes falls apart and what can be done to make peace more stable. Next, we will explore the longer-term prospects for economic and democratic rebuilding as well as reconciliation after Civil Wars. We will end the course by considering the consequences of Civil Wars for the regional and international peace and focus on terrorism, refugees, and weak states as destabilizing factors.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2607 - DEMOCRATIC THEORY & DEMOCRATIZATION

Minimum Credits: 3

Maximum Credits: 3

The course has three objectives for students: 1) to develop a broad knowledge of the main currents in modern and contemporary democratic theory and a familiarity with their main problems; 2) to study how normative theories of democracy inform or might inform processes of democratization; 3) to apply this knowledge in solving some puzzle or problem by comparing cases, assessing

claims, developing arguments, etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2701 - ADVANCED METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course aims to provide students with an overview of statistical methods appropriate for the analysis of longitudinal data, or data collected on multiple units (individuals, states, dyads, countries) at more than one point in time. The course will focus on models for the analysis of 'panel data,' which (by convention) is used to describe data with relatively large number of units and relatively few time points. We will cover different approaches to the analysis of panel data, including structural equation models, fixed and random effects models, dynamic econometric models, and longitudinal hierarchical growth ("multi-level") models.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2702 - METHODS: CAUSAL INFERENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the challenge of causal inference in the social sciences. We will begin by approaching causal inference from the standpoint of experimental analysis. We will then study several non-experimental methods that aim to recover causality using observational data, including matching, instrumental variables, difference-in-differences, and regression discontinuity. The class will combine methodological training with exposure to important recent research in the social sciences that employ these methods. The goal of the class is not only to convey the concepts and math central to causal inference but also to help students develop their capacity for research design.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PS 2703 - FORMAL POLITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

This seminar introduces students to formal modeling of political and economic phenomena. It has a social choice and a game-theory component. The former explores issues involved in the aggregation of individual preferences through majority and other voting rules. The latter-larger of the two components-surveys non-cooperative game theory and explores its applications to various questions of interest to political scientists.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2704 - FORMAL POLITICAL THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This is the second course in the department's graduate formal theory sequence. We will survey game theoretic models in political science with two goals in mind: (1) students will become critical and competent consumers of formal theory and (2) they will be prepared to begin using formal theory in their research. Topics include bargaining, coalition formation, lobbying delegation, reputation, and signaling. We will also discuss the connection between formal models and empirical tests (both observational and experimental) as well as survey alternatives to rational choice (behavioral and experimental) as well as survey alternatives to rational choice (behavioral, computational, and evolutionary models). Students must be familiar with basic game theoretic concepts and analysis (at the level of PS 2701).

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2730 - ADVANCED METHODOLOGY: MAXIMUM LIKELIHOOD ESTIMATION

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to maximum likelihood estimation.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2740 - TIME SERIES ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This is a course in advanced methodology in political science. The class will focus on topics related to time series.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PHD)

PS 2900 - COMPREHENSIVE EXAM PREPARATION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Requirements: PLAN: Political Science (MA or PhD)

PS 2901 - QUALIFYING PAPER PREPARATION

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Requirements: PLAN: Political Science (MA or PhD)

PS 2902 - DIRECTED READING

Minimum Credits: 1

Maximum Credits: 6

Individual reading programs are provided in those areas in which no course or seminar is scheduled during an academic year of three trimesters. They also may be taken by those students who have elected the courses and seminars dealing with a particular subject matter and who wish to do additional work in these areas.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PhD)

PS 2903 - DIRECTED RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course allows a student to develop a research topic and a plan of analysis over the course of a term.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Political Science (MA or PhD)

PS 2904 - DISSERTATION OVERVIEW PREP

Minimum Credits: 3

This course is for students who have passed their dissertation overview and are currently working on their Ph.D. dissertation.
Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

Prosthodontics

PROSTH 2020 - GRADUT REMOVABLE PROSTHODONTICS

Minimum Credits: 2
Maximum Credits: 2
This course examines in detail the mechanics of RPD function and its application to design. Complex RPD situations and their relationship to a complicated occlusion, with or without fixed partial dentures, is explored.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 2030 - GRADUATE FIXED PROSTHODONTICS

Minimum Credits: 2
Maximum Credits: 2
This course exposes the student to concepts of tooth preparation and their relationship to total rehabilitation of the patient. Emphasis is placed on diagnostic preparation, dental materials knowledge, esthetics and the total relationship to occlusion. Modification of design for integration with RPD, is stressed. Laboratory skills are emphasized.
Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade

PROSTH 2040 - DENTAL MATERIAL PROSTHODONTICS 1

Minimum Credits: 1
Maximum Credits: 1
This course presents an introduction to biomaterials. Application of biomaterials in removable and fixed prosthodontics will be emphasized.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PROSTH 2050 - DENTAL MATERIAL PROSTHODONTICS 2

Minimum Credits: 1

Maximum Credits: 1

Demonstrations of different clinical applications of BIO materials, as well as laboratory fabrication of appliances for active cases currently being treated in the prosthodontic department will be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2070 - ADVANCED PROSTHODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

During this course, the students become more experienced in treating difficult cases with medical complications and cases which need multi-disciplinary approaches.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2080 - ADVANCED PROSTHODONTICS 2

Minimum Credits: 2

Maximum Credits: 2

Emphasis is placed on the clinical, laboratory, and technical skills necessary to treat the partially edentulous patient using a removable appliance. Coordination with fixed appliances is mandatory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2090 - ADVANCED PROSTHODONTICS 3

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2100 - ADVANCED PROSTHODONTICS 4

Minimum Credits: 2

Maximum Credits: 2

This course emphasizes the total treatment of the geriatric patient. Considerations are given to prosthodontic rehabilitation with implants, orthognathic treatment planning and the difficult prosthodontic patient.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2101 - ADVANCED PROSTHODONTICS 5

Minimum Credits: 2

Maximum Credits: 2

Clinical and laboratory skills necessary to treat the patient with fixed prosthesis are emphasized along with principles of oral rehabilitation. Knowledge of porcelain and its handling qualities are stressed.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2110 - ADVANCED MAXILLOFACIAL PROSTHODONTICS 1

Minimum Credits: 1

Maximum Credits: 1

This course exposes the graduate resident to the principles of radiation oncology and the management of the cancer patient. Emphasis is placed on the oral biological changes that occur with treatment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 2117 - IMPLANT PROSTHODONTICS SEM 1

Minimum Credits: 2

Maximum Credits: 2

This is a didactic course designed to review all aspects of implant dentistry at the in depth level. Diagnostic and treatment planning procedures, selection of implants to include biomechanical and biomaterials considerations, surgical procedures for implant placement, prosthodontic procedures to include provisional and definitive implant restorations, and maintenance procedures will be presented and illustrated.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2147 - IMPLANT PROSTHODONTICS SEMINAR 2

Minimum Credits: 2

Maximum Credits: 2

This is a multidisciplinary didactic course planned to address advanced topics in oral and maxillofacial implant procedures; guided tissue regeneration in implant dentistry, management of failing implants, and advanced implant reconstructive procedures.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2150 - PROSTHODONTICS SEMINAR 1

Minimum Credits: 2

Maximum Credits: 2

This course is an introductory review of basic prosthodontic principles and their application to advanced prosthodontic procedures. Thorough understanding of this course is essential to comprehensive treatment planning.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2160 - PROSTHODONTICS SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This course is a description of the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2170 - PROSTHODONTICS SEMINAR 3

Minimum Credits: 2

Maximum Credits: 2

This course discusses the special considerations given to the geriatric and the handicapped prosthodontic patient. Maxillofacial patients and those undergoing immune suppression and cancer therapy are discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2180 - PROSTHODONTICS SEMINAR 4

Minimum Credits: 2

Maximum Credits: 2

This course is the final in a series that entails the review of advanced graduate procedures, including TMJ and implant ology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2181 - PROSTHODONTIC SEMINAR 6

Minimum Credits: 2

Maximum Credits: 2

This course is another part of a series that entails the review of advanced graduate procedures, including TMJ and implantology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

PROSTH 2182 - PROSTHODONTICS SEMINAR 5

Minimum Credits: 1

Maximum Credits: 1

Continuation course for the factors necessary for detailed and comprehensive treatment planning of the fixed and removable partial denture patient. The dental material and psycho-social aspects of treatment planning is discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2200 - OCCLUSION

Minimum Credits: 1

Maximum Credits: 1

This is an introductory course in physiologic, gnathologic and denture occlusion. The basic principles and techniques are covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2210 - SPECIAL PROSTHODONTICS CLINIC

Minimum Credits: 1

Maximum Credits: 9

This course provides the resident with experience providing special clinical care of multi-disciplinary cases involving dental and medical treatment under direct faculty supervision.

Academic Career: Graduate

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 2211 - COMPREHNSV TREATMENT PLANNING 1

Minimum Credits: 2

Maximum Credits: 2

This is a multidisciplinary course in comprehensive/diagnosis and treatment planning for graduate students/residents in endodontics, orthodontics, periodontics, prosthodontics, oral and maxillofacial surgery, maxillofacial prosthetics and advanced education in general dentistry.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

PROSTH 2230 - TEMPOROMANDIBULAR JOINT DYSFNCTN

Minimum Credits: 1

Maximum Credits: 1

This course exposes the student to the etiology, diagnosis, and treatment of TMJ and myofascial pain dysfunction syndromes.

Radiology and drug therapy are reviewed. Various treatment modalities involving electronic instrumentation and splint therapies are reviewed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2240 - LITERATURE REVIEW 1

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas: bone resorption, articulators, face-bow, hinge axis, and immediate dentures.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad Letter Grade

PROSTH 2250 - LITERATURE REVIEW 2

Minimum Credits: 1

Maximum Credits: 1

This course covers classic and current literature review in the following areas: color, splinting, porcelain, crown preparation, impression materials, dies and pontics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2260 - LITERATURE REVIEW 3

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2270 - LITERATURE REVIEW 4

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas: maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2272 - LITERATURE REVIEW 6

Minimum Credits: 2

Maximum Credits: 2

This course covers classic and current literature review in the following areas. Maxillofacial prosthodontics, removable partial dentures, complete dentures, diagnosis and treatment planning of the partially edentulous mouth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PROSTH 2273 - LITERATURE REVIEW 5

Minimum Credits: 1

Maximum Credits: 1

Continuation course that covers classic and current literature review in the following areas: occlusion, vertical dimension, centric relation, temporomandibular joint dysfunction, and occlusal equilibration.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PROSTH 2305 - CEREC BASIC TRAINING

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

PROSTH 2400 - REMOVABLE PARTIAL DENTURES

Minimum Credits: 1

Maximum Credits: 1

A seminar/case based course where advanced students (prosthodontic residents) will gain experience in surveying and designing a variety of clinical removable partial dentures. The majority of cases will involve clinical cases which will include the various Kennedy classes and modification while some simulated models may be used. The assessment of partial edentulism encompasses everything

from the loss of a single tooth to the loss of all teeth but one. All disciplines of dentistry may be involved. The integration of all considerations is where the specialty of prosthodontics has the most to offer a patient. The management of the many variables in partially edentulous conditions is the essence of specialty-level prosthodontic therapy.

Academic Career: Graduate

Grade Component: Grad Letter Grade

PROSTH 5142 - DENTAL MATERIALS

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5171 - PRINCIPLES OF DENTAL OCCLUSION

Minimum Credits: 3

Maximum Credits: 3

This course is clinically-oriented and employs preclinical laboratory exercises to teach the students the basic principles of occlusion. The importance of the relationship between the temporomandibular joint, occlusion and incisal guidance is emphasized. The students use semi-adjustable - class III - articulators and face bows. Students will learn how to perform an anatomic diagnostic mounting, occlusal analysis, diagnostic equilibration, bite splint fabrication, and functional occlusal waxing.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5211 - FIXED PARTIAL DENTURES 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will develop an understanding of the process involved in successfully treating a patient indicated for the placement of crowns. Topics include: 1) the preliminary work up, including diagnostic waxing on prepared casts; 2) template fabrication for provisionalization; and 3) the sequencing involved in the development of the art and skill of proper tooth preparation for single crowns, including a full cast crown preparation (FCC), a porcelain fused to metal crown (PFM), and an all ceramic crown (ACC). Provisionalization of the crown preparations will be discussed. Students will develop an understanding of the principles of final impression making for a fixed partial denture (FPD), pouring and pindexing of the impression casts, face-bow transfer registration, jaw relation records and mounting of the case on a semi-adjustable articulator. In the accompanying lab course, PROSTH 5215, students will have an opportunity to develop and practice skills in a small group laboratory setting. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Grade Component: Grad Letter Grade

PROSTH 5215 - FIXED PARTIAL DENTURES 1 LAB

Minimum Credits: 3

Maximum Credits: 3

In this course, students will apply concepts learned in PROSTH 5211 and will develop the skills necessary to treat a fixed prosthodontic patient. An emphasis will be placed on the preliminary work up as well as the art of proper tooth preparation for single

crowns. Students will complete crown preparations for a full cast crown (FCC), porcelain fused to metal crown (PFM), and all ceramic crowns (ACC). Provisionalization of the crown preps will also be required. Students will also develop skills in making final impressions for a fixed partial denture (FPD) and in the laboratory techniques required to produce acceptable results. Laboratory procedures such as pouring and indexing of casts, facebow transfer registration, jaw relation records, and mounting of the case on a semi-adjustable articulator will be accomplished by the student. This course includes small group laboratory sessions.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

PROSTH 5217 - COMPLETE DENTURES 1 LAB

Minimum Credits: 2

Maximum Credits: 2

In this course, students will be prepared for the complex task of complete denture fabrication for the edentulous patient. Students will apply concepts learned in the didactic course (PROSTH 5213) in order to fabricate complete dentures in a simulated clinical environment. The student will also participate in the fabrication of complete dentures in the continuing education clinic for a selected patient. This course includes small group laboratory sessions.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

PROSTH 5241 - REMOVABLE PARTIAL DENTURES

Minimum Credits: 1

Maximum Credits: 1

Didactic introduction to the treatment of totally edentulous patients with removable complete dentures begins with terminology, patient examination and ridge and arch classification. Continues with the oral anatomy, pertinent bio materials and the mechanical and physiologic principles utilized in edentulous impression making. Concludes with jaw relation records, the use of artificial denture teeth and the steps required to fabricate, insert, adjust and maintain complete dentures.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5245 - REMOVABLE PARTIAL DENTURES LABORATORY

Minimum Credits: 2

Maximum Credits: 2

An introductory laboratory course in which the student utilizes a variety of biomaterials to fabricate a technique set of maxillary and mandibular complete dentures for a dental typodont. Provides experience in material handling while making impressions, dental casts and baseplates and wax occlusion rims. Concludes with the performance of sequential laboratory procedures-tooth articulation, waxing, flasking, boil-out, packing, processing and finishing dentures.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

PROSTH 5251 - FIXED PARTIAL DENTURES 2

Minimum Credits: 1

Maximum Credits: 1

During this course the preparation of posterior teeth for a fixed partial denture along with making an impression, fabrication of an all metal cast fixed partial denture and provisionalization of the prepared teeth are introduced.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5256 - FIXED PARTIAL DENTURES 2 LAB

Minimum Credits: 3

Maximum Credits: 3

This is the laboratory component of the didactic course fixed partial dentures 2. Students perform the procedures necessary to fabricate an all metal cast fixed partial denture and the provisionalization of the prepared teeth.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

PROSTH 5271 - DIGITAL DENTISTRY 1

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be introduced to CAD/CAM (CEREC) technology and will be properly trained in its use. This course blends theoretical foundations with practical applications. Students will learn how to prepare teeth for all-ceramic, CEREC crowns and will make digital impressions using the CEREC 4.24 machines. Students will also learn how to design and edit these crowns prior to milling them. Proper block selection and finishing/inserting these final restorations will also be addressed. This course includes lecture and small group laboratory/simulation sessions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5273 - FIXED PARTIAL DENTURES 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be prepared for the complex task of fabricating post and cores on anterior and posterior endodontically treated teeth. Students will learn the procedures involved for the placement of retraction cord into the sulcus of a patient prior to impression making. Students will also be exposed to contemporary provisional materials and CAD/CAM technology. This course includes lectures and class discussion. An opportunity to apply principles learned in this course will be provided in the accompanying lab course, PROSTH 5276 (Fixed Partial Dentures 3 Laboratory).

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5276 - FIXED PARTIAL DENTURES 3 LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The goal of this fixed prosthodontic course is to prepare the student for the complex task of fabricating post and cores on endodontically treated teeth. Students will have an opportunity to apply concepts learned in PROSTH 5273 (Fixed Partial Dentures 3) in a small group laboratory setting. Students will prepare porcelain veneers on anterior teeth, practice the procedures involved in the placement of retraction cord into the sulcus of a patient, and evaluate a completed fixed partial denture case to prepare for insertion. A practical exam on single crowns and provisionals will also be included.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

PROSTH 5282 - COMPLETE DENTURES 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will learn the basic principles for the classification system of edentulism as well as dental procedures related to topics such as denture repair; relines or rebases to current removable appliances; interim or transitional appliances; overdentures; and immediate dentures. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5311 - IMPLANTOLOGY 1

Minimum Credits: 2

Maximum Credits: 2

In this course, students will be introduced to implantology as a progressive field that requires a comprehensive knowledge of dentistry. This course prepares students for introductory level treatment of implant dentistry, including examination of implant-bone interface, preoperative patient evaluation, use of cone beam CT scanning to image bone, construct surgical guides and virtually treatment plan cases. Other topics covered include: treatment planning involving surgical techniques and prosthetic therapies; surgical instrumentation and procedures for effective implant placement; temporization of the patient during the implant therapy; and implant impression making techniques. This course also serves as preparation for Implantology 2, where the student will begin with the reconstructive phase of implantology. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

PROSTH 5346 - IMPLANTOLOGY 2

Minimum Credits: 2

Maximum Credits: 2

This course in implant dentistry is a multidisciplinary teaching program, structured to provide basic learning didactic experience. It presents an approach to historical and biological basis for implantology, patient evaluation and treatment planning, implant surgery and provisionalization, definitive Prosthodontic procedures, and maintenance protocols.

PROSTH 5367 - CLINICAL REMOVABLE PROSTHODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of removable prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with removable prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with removable prosthodontic needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 5369 - CLINICAL FIXED PROSTHODONTICS 1

Minimum Credits: 2

Maximum Credits: 2

This course is designed to provide clinical experiences in the area of fixed prosthodontics for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in providing care to dental patients with fixed prosthodontic needs at the level of a general dentist and will participate in a variety of additional experiences to increase skills in caring for the patient with fixed prosthodontic needs.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad Letter Grade

PROSTH 5373 - SIMULATED PATIENT TREATMENT

Minimum Credits: 3

Maximum Credits: 3

In this course, students will focus on the preparation of a single unit porcelain crown and a three-unit porcelain-fused-to-metal fixed partial denture, utilizing several preparation designs and materials, in a simulated treatment environment. The student will complete their 3-unit fixed bridge experience and clinical simulation competency examination at the end of this 8-week course. The goal of this course is to develop the skills needed to restore teeth to proper form, function and esthetics using didactic knowledge and preclinical simulation to practice and refine skills learned in fixed prosthodontics. This preclinical experience is designed to improve the technical, laboratory communication, and digital dentistry skill set of dental students preparing single and multiple units. Progress is assessed through a series of self-evaluations, digital software, and faculty review of the restoration.

Academic Career: Dental Medicine

PROSTH 5900 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is intended to direct first professional students in research projects in prosthodontics.

Academic Career: Dental Medicine

Course Component: Independent Study

Grade Component: Grad HSU Basis

PROSTH 5910 - ADVANCED PROSTHODONTIC TREATMENT PLANNING

Minimum Credits: 1

Maximum Credits: 1

This course is structured to develop the student's ability to plan and implement treatment for patients with complex prosthodontic problems, including but not limited to fixed, implant, and removable prosthodontics, geriatric prosthodontics, TMJ problems, re-establishment of vertical dimension, surgical prosthodontics and other prosthetic procedures.

Academic Career: Dental Medicine

Course Component: Seminar

Grade Component: Grad HSU Basis

PROSTH 5915 - DENTAL IMPLANT SELECTIVE

Minimum Credits: 1

Maximum Credits: 1

A hands-on approach is offered for the surgical and restorative phases of implant dentistry. Students will surgically place implants and assist with cases. Each student will restore one Prosthetic case. Advanced seminars will be given on implant dentistry.

Academic Career: Dental Medicine

Course Component: Clinical

Grade Component: Grad HSU Basis

PROSTH 5916 - COMPLETE DENTURE FABRICATION - VA

Minimum Credits: 1

Maximum Credits: 1

This externship permits the fourth year dental student working one-on-one with a hospital staff dentist to complete one full denture in a hospital setting on medically compromised geriatric patients. In addition the student will understand the operation of a dental clinic within a hospital setting.

Academic Career: Dental Medicine

Grade Component: Grad HSU Basis

Psychiatry

PSYC 5345 - CLINICAL NEUROSCIENCE REPEAT

Minimum Credits: 0

Maximum Credits: 0

This course is registered when the clinical neuroscience clerkship is failed and all or part of it must be repeated. If less than the full clerkship is taken, the transcript should reflect the specific number of weeks repeated.

Academic Career: Medical School

Course Component: Clinical

Grade Component: Grad LG/SU5

PSYC 5365 - CLINICAL NEUROSCIENCES

Minimum Credits: 0

Maximum Credits: 0

The neurosciences clerkship integrates psychiatry and neurology. NSURG, neuropath and neurorad experiences are also provided. The block is five weeks psych and three weeks neurology. Clinical teaching includes INPT and OPT settings. Field trips, NSURG or neuropath brain cutting, emergency room, and one aa meeting are required. Integrated teaching on two afternoons utilizes interactive lectures, case conferences, neurorad rounds, and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5366 - PSYCHIATRY CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

The psychiatry clerkship is five weeks of clinical psychiatry. Focus in on common psychiatric conditions: presentation, diagnosis, treatment and prognosis. Clinical teaching includes INPT and emergency room settings. Field trips, and one aa meeting are required. Didactic teaching on two afternoons include interactive lectures, case conferences and critical reviews of literature. Performance-based evaluations and NBME shelf exams are main modes of student evaluation.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5410 - ACTING INTERNSHIP IN PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four/eight week elective in a number of AI's available in psychiatry. Assigned to a clinical module at WPIC of their choice that will provide experience in diagnostic and management of psychiatric patients; enhance ability to conduct a psychosocial and clinical interview; proficiency in gathering clinical data relevant to a psychiatric evaluation, arriving at a correct diagnosis of psychiatrically ill patients; plan and carry out a treatment approach towards a psychiatric patient; effectively utilize the resources and skills of related mental health professions.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5411 - ADOLESCENT PSYC ACTING INTERN

Minimum Credits: 0

Maximum Credits: 0

Four week elective. Students will observe the assessment and treatment of hospitalized adolescents and their families. Patients are treated in therapeutic milieu along with individual group and family therapy sessions. Students attend team meetings, in-service

sessions among other activities. Participate in establishing psychiatric diagnosis. Individual or informal seminar instruction cover normal and atypical developmental stages.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5412 - TRIPLE BOARD ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

This elective is designed to provide an exposure to the interface of pediatrics and child psychiatry. This four-week internship will focus on the psychiatric consultation-liaison service at children's hospital of Pittsburgh. Students will participate in clinical activities specific to either pediatrics, medicine or psychiatry with attendance at pediatric outpatient continuity clinic for the triple board residents and the child psychiatry outpatient continuity clinic. Attendance at the pediatric noon conference and the didactic psychiatry sessions and both the pediatric and psychiatry grand rounds series is required.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5415 - INTRODUCTION TO CLINICAL PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is for those students interested in getting experience in clinical psychiatry outside of the core clinical neurosciences clerkship. Students will develop basic skills in the interviewing and assessment, diagnosis and management of psychiatric patients in the inpatient units. Course objectives include: conduct comprehensive psychiatric interview and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and management treatment; plan and implement a biopsychosocial treatment plan for patients with psychiatric illnesses; and utilize the resources and skills of related mental health professionals.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5420 - PSYCHIATRIC EMERGENCY SERVICES

Minimum Credits: 0

Maximum Credits: 0

Twenty-four hour psychiatric assessment center and emergency room where students may participate for one to 3 months in the assessment, diagnosis and disposition planning of patients. Students also participate in a comprehensive course covering diagnostic interviewing, lethal assessment and specific methods for interviewing efficiently under time constraints. This course consists of didactic presentations, role playing, interviewing of patients in class and a bibliography of required and suggested readings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5425 - MANAGEMENT OF PSYCHIATRIC ILLNESSES

Minimum Credits: 0

Maximum Credits: 0

Four week elective designed to allow students to learn in a service-learning model. Students will participate at non hospital sites interacting with social workers, nurse practitioners, primary care physicians, and psychiatrists. Primary goal of this elective is to learn to identify and manage psychiatric illness in the primary care setting.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5430 - PEDIATRIC PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Assessment of children and families referred to behavioral science program, children's hospital and consult liaison. Help consult in abuse and neglect problems at hospitals and special settings. Acquainted with community resources. Skills in behavioral syndromes assessment principles of consultation and liaison activity.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5441 - OUTPATIENT ADOLESCENT PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four week elective in which the student will observe and participate in complete evaluations of children, adolescents, and their families. Expected to rotate in a general clinic and through some of the specialty child psychiatry clinics as well. There will be an opportunity to observe group therapy sessions. Teaching will be in individual, group and conference settings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5442 - ADV OUTPATIENT CHILD & ADOLSCNT

Minimum Credits: 0

Maximum Credits: 0

Four/eight week for those individuals who are considering a career in behavioral pediatrics, or general or child psychiatry. Active role demanded of student. Those interested will serve as a co-clinician with shared and supervised responsibility for assessment and treatment of children and adolescents. Literature-intensive, assigned texts and articles. Students will learn clinical skills as part of a multi-disciplinary approach to outpatient treatment, working with other mental health professionals. Student will spend time in general clinic and varied specialty clinics.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5443 - SEX ABUSE OF CHILDREN & ADOLSCNT

Minimum Credits: 0

Maximum Credits: 0

Four week elective, clinical and research aspects of child sexual abuse will be examined from a variety of perspectives. Discussions with instructors and selected readings. Clinical aspects of child sexual abuse including how to identify and gather information from children, methods of reporting abuse to the proper authorities. Legal and child protective aspects. Psychiatric and physical problems will be addressed.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5448 - INTRODUCTION TO GERIATRIC PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This course will provide an introduction to psychiatric care of the geriatric patient. Experiences will include new assessments, interviewing, psychotherapy and pharmacotherapy, collaboration with geriatricians and other related issues. Experiences will be in both inpatient units and in-home visits. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, formulate working diagnosis and manage treatment; plan and implement biopsychosocial treatment plan for patients with elders with psychiatric illnesses; utilize the resources and skills of related mental health professionals, learning how to collaborate with other providers and agencies; understand how family and community contents affect mental health of the elderly; summarize the assessment and treatment of a patient with dementia; employ a cognitive screening evaluation to assess and follow patients with cognitive impairment and state the limitations of these instruments; summarize the special considerations in prescribing psychotropic medications of the elderly, especially toxicity risks; appreciate the role of loss in the etiology of psychiatric disorders in the elderly.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5450 - GERIATRIC PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four/eight week elective provides the students the opportunity of being involved in all aspects of care of elderly inpatients and outpatients. Involvement in individual, couple, family and group programs. Function as members of the multi-disciplinary team. Assume increasing responsibility for individual patients as their rotations proceed. Attend a weekly case conference. Supervised by a resident and faculty member of the team to which they are assigned.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5455 - EMERGENCY PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Student will learn clinical interviewing, the mental status examination, basic psychiatric diagnosis, basics of evaluation of suicidal and homicidal potential, emergency therapeutics, and basic aspects of psychiatry and the law.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5458 - PSYCHIATRIC ASSESSMENT

Minimum Credits: 0

Maximum Credits: 0

This elective experience will develop skills at psychiatric interviewing as well as assessment of new patients. Forty (40%) percent time will be spent in the psychiatric emergency room doing evaluations with faculty and resident preceptors, 40% rotating at other sites (child, adult, geriatric) doing assessments of new ambulatory patients, plus a full day of didactics and supervision. Course objectives: conduct comprehensive psychiatric interviews and mental status examinations; gather clinical data, generate differential diagnoses, and formulate working diagnosis using the dsm-iv multi axial system; elicit, describe and record the key components of a mental status examination; make a clear and concise psychiatric case presentation; learn different approaches to assessment across the lifespan; understand the indications and procedures for involuntary mental health commitment; develop a collaborative, multi-disciplinary and biopsychosocial approach to patient care; demonstrate empathy, facilitative approaches and sensitivity to diversity.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5459 - NEUROSCIENCE AT THE BEDSIDE: EXPLORING PERSONALIZED MEDICINE IN PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Personalized medicine is the new catchphrase for the role of cutting edge translational science on routine clinical care. Can we use an imaging result to predict treatment response? How will a person's genetic make-up inform choice of medication? How does awareness of risk affect management? In psychiatry, personalized medicine remains somewhat of a 'holy grail' ' elusive but hotly pursued by neuroscientists and clinicians. In this elective experience, students will get a taste of that pursuit through a mixture of scientific and clinical activities that will be individualized by students in particular areas ranging from neuroimaging, pharmacotherapy, genomics, ethics and service research. Students will investigate a particular area of interest through a literature review and specific directed experiences, presenting a capstone project to a scientific audience at the end. Overall supervision will be conducted by the course director.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5460 - CONSULTATION & LIAISON PSYCH

Minimum Credits: 0

Maximum Credits: 0

Four/eight week elective focuses on psychiatric problems in medical and surgical patients. Under the supervision of full-time faculty and chief resident. Respond to requests for psychiatric evaluation of patients on inpatient units. Conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patient's family in the clinical problem, makes treatment recommendations and provides appropriate follow-up during the patient's hospital stay. Multi-disciplinary team integrates the biological with psychosocial perspective to achieve view.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5462 - COMBINED PSYCHIATRY AND FAMILY MEDICINE

Minimum Credits: 0

Maximum Credits: 0

This four-week elective focuses on psychiatric and general medical problems in a variety of patients. Student will work on the consultation/liaison service at St. Margaret's hospital where the student will respond to requests from physicians for psychiatric evaluation of patients on inpatient units. The student conducts the clinical evaluation, investigates any ward management difficulties, assesses the role of the patients family in the clinical problem, makes treatment recommendations and when appropriate does follow up during the patient's hospital stay. The multi-disciplinary team on the service attempts to integrate the biological with the psychosocial perspective to achieve a comprehensive view of patient care. Students will participate in family medicine case conferences, attend outpatient experiences at primary care clinics, participate in palliative care interventions and work on the medical care of the psychiatry patient (MCP) service at WPIC. Learning opportunities include: supervised clinical assessments; hospital

rounds; case conferences and seminars. This elective can prepare a student for combined family medicine/psychiatry residency programs.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5465 - COMMUNITY PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective intends to teach students how to care for seriously and persistently mentally ill adults and adolescents who are in community-based psychiatric treatment programs. Students will precept with team psychiatrists, get exposure to group and individual therapy, and follow one or two patients for continuing care over the month. Home visits and other community outreach will be an integral part, along with collaboration with a variety of team members and other providers. Students will be involved in case management, treatment teams, and systems liaising (e.g., Assisting patients leave state hospitals and return to the community). The course objectives are: to build basic skills in psychiatric interviewing, assessment, and patient management; to learn how to work with "challenging" clients, situations, and systems; to plan and implement biopsychosocial treatment plans for patients with psychiatric illnesses; to utilize the resources and skills of related mental health professionals, working collaboratively with multiple disciplines and agencies; to understand how continuity of care can be achieved and how it can help improve patient outcomes; and to learn how the funding of mental health care affects service delivery and patient outcomes.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5471 - MAYVIEW STATE HOSPITAL

Minimum Credits: 0

Maximum Credits: 0

Eight week elective at Mayview State Hospital. Become aware of the social and community programs of the chronic mentally ill and participate in the supervised group therapy experience. Participate in ongoing research at Mayview depending on the student's ability and interest. Interview and assessment techniques for psychiatric inpatients. Prescription practice for psychotropic medications. Treatment of non-responsive schizophrenic patient. Drug metabolism, conduct a neurological evaluation of psychotic and depressed individuals.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5481 - ADDICTIONS TREATMENT PROGRAM

Minimum Credits: 0

Maximum Credits: 0

Four/eight week placement providing the opportunity of being included in all aspects of care both in and outpatient, for chemical dependency. Participation and involvement in all medical-psychological aspects; detoxification and rehabilitation, individual, family and group counseling; evaluation/ assessment, treatment planning; working with adult, adolescent, elderly and pregnant patients in various modalities. Function as an integral part of the clinical multi-disciplinary team. Recognize how to avoid prescribing inappropriately for chemically-dependent patients.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5482 - DUAL DIAGNOSIS: MENTAL AND SUBSTANCE ABUSE

Minimum Credits: 0

Maximum Credits: 0

Experience treatment of patients with both mental illness problems and substance abuse problems at the Western psychiatric institute and clinic. Full member of interdisciplinary treatment team as primary therapist for two patients. Some time will be spent at off-site locations within the community.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5483 - ADDICTION MEDICINE AND DUAL DIAGNOSIS

Minimum Credits: 0

Maximum Credits: 0

This elective will provide the student with experiences in addiction medicine and psychiatry, with a special focus on patients with dual diagnosis of substance use and other psychiatric disorders. Various rotation sites will be available including outpatient and inpatient

detoxification services, treatment of opiate dependence (including methadone and buprenorphine maintenance programs), individual and group dual diagnosis treatment, and specialized perinatal addiction treatment for pregnant women and women with young children. Optional rotation sites in the HIV clinic and center for liver disease may also be available (depending on availability), as patients with addiction frequently engage in risky behaviors such as needle-sharing or unprotected sex that can lead to transmissible diseases such as HIV and hepatitis. Patients with psychiatry and substance use disorders often have a history of trauma, and thus the student will have ample opportunity to learn how to diagnose post-traumatic stress disorder (PTSD) and deliver trauma-informed care. Evidence-based treatments for addiction will be demonstrated with a special focus on motivational interviewing (MI), a collaborative, patient-centered technique for facilitating behavioral change. Supervision will be provided by medical directors of the various sites. The student participating in this elective will have the opportunity to: 1) assess patients in need of detoxification and provide appropriate treatment; 2) manage opiate dependence utilizing opioid-replacement therapies; 3) perform assessments and intakes on new patients referred for dual diagnosis treatment; 4) observe and interview patients during individual pharmacotherapy management sessions; 5) participate in individual and group dual diagnosis sessions; 6) interact with and provide education to family members when possible; 7) observe and assist with current substance abuse research within the department.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5485 - ADULT INTENSIVE OUTPATIENT PROGRAM

Minimum Credits: 0

Maximum Credits: 0

Elective introduces student to acutely ill psychiatric patients. Partial serves as a step-down for hospitalized patients with a mix of mood and psychotic disorders, frequently with significant comorbidities. Treatment occurs in group, individual and family sessions by multidisciplinary treatment team. Student participates in variety of clinical experiences: running group psychotherapy sessions; carrying small case load of individual patients for individual psychotherapy and pharmacotherapy; conduct family sessions; perform assessments and intakes on new patients; participate in treatment team meetings.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5500 - NEUROBEHAVIORAL PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four week elective to learn different diagnosis of neuropsychiatric disorders in developmentally disabled population; neurology principles and treatment pertaining to developmental disabilities; behavioral neurology principles and treatment pertaining to developmental disabilities; to work on a treatment team and learn inpatient case formulation and therapeutic management skills. John Merck multiple disabilities program for children/adolescents/adults and their families in and outpatient clinic and community liaison program. Reasons for admission is acute psychiatric symptomatology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5510 - SLEEP AND ITS DISORDERS

Minimum Credits: 0

Maximum Credits: 0

Eight week elective to provide a basic knowledge of sleep, regulation of a relationship of sleep stages to other physiobiological process; to develop basic skills and apply them to comprehensive assessment of patients with complaints of disturbed sleep. Assist in the evaluation of patients with disorders. Participate in history taking and in the administration of structured interview to patients and their bed partners. Learn principles and procedures of polysomnography and will participate in the processes of data interpretation, treatment recommendation and formulate a treatment plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5520 - BIOLOGICAL RHYTHMS

Minimum Credits: 0

Maximum Credits: 0

Eight week elective in understanding more the interrelationships between the sleep-wake cycle and the circadian rhythms of core body temperature and different neuroendocrine axes; to participate in the evaluation of subjects and patients including history taking and recruitment. Provide as opportunity to learn about polysomnography and clinical neuroendocrinology including hormone assay procedures; participate in data collection and subsequent analysis. Material will be provided; expected to critically review relevant literature. Design a research study.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PSYC 5531 - WOMEN'S MENTAL HEALTH

Minimum Credits: 0

Maximum Credits: 0

A four week elective that provides students with the opportunity to assess and treat psychiatric disorders in women, both within inpatient and outpatient settings. Students will have the opportunity to assess up to five patients per day. Issues addressed include: pregnancy, postpartum, breast and gynecological oncology as well as other problems such as premenstrual dysphoric disorder and long term care of patients with cancer. Weekly breast or gynecologic conferences and student involvement in special projects are also encouraged.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

An individualized course of study may be arranged with the department of psychiatry to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5890 - CHILD & ADOLSCNT DEPRESSION RES

Minimum Credits: 0

Maximum Credits: 0

Four week elective to understand the manifestations of affective disorder in childhood and adolescence; to learn structured assessment techniques for children axis 1 psychiatric disorders; to become familiar with several different research methodologies used in this population including neuroendocrine and pharmacological of childhood depression and safety side effects. Conduct structured interview of both parent and child with use of techniques appropriate to age and development of child. Formulate a specific treatment plan.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5892 - PSYCHOPHYSIOLOGY

Minimum Credits: 0

Maximum Credits: 0

Eight week elective provides an introduction to basic noninvasive electrophysiological techniques and psychophysiological responses used to study autonomic nervous system responsivity to psychological influences on physiology and pathophysiology will be taught and basic research. Readings will supplement lab work. Students will successfully collect at least one type of electrophysiological data; effectively critique a published article in psychophysiology; design a feasible psychophysiological experiment.

Academic Career: Medical School

Course Component: Practicum

Grade Component: H/HS/S/LS/U

PSYC 5893 - NEUROPHARMACOLOGY

Minimum Credits: 0

Maximum Credits: 0

Four week elective on various central neurotransmitter systems will be described and their possible role processes will be analyzed in relation to pharmacological effects. Catecholamines, serotonin, GABA, acetylcholine and receptors will be discussed and existing experimental evidence regarding their role. Independently conduct a thorough library search; effectively critique and evaluate published research papers and write a comprehensive document based on a critical literature review.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PSYC 5894 - PSYCHOPHARMACOLOGY OF MOOD DISORDERS

Minimum Credits: 0

Maximum Credits: 0

Eight week elective that offers the opportunity to conduct lab studies of cell membrane function in patients with mood disorders. Blood components are used to study ion transport phenomena and other aspects of membrane function, and membrane structural components such as phospholipids. Orientation is to ward off the biological foundations of major mood disorders, and the mechanisms underlying the therapeutic actions of psychopharmacological agents; to design an experiment that employs basic lab methods to investigate clinical phenomena; to analyze and interpret data from experiments.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PSYC 5895 - INDEPENDENT RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Four week interdisciplinary work, combining research and clinical work, involving areas of overlap between psychiatry and other disciplines or institutions, i.e. psychophysiology, behavioral approaches in psychiatry, research design in the treatment of chronic psychiatric disease, research literature and psychopharmacology, neuroendocrinology of major psychiatric disorders, somatopsychiatric factors in human disease.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PSYC 5896 - LAW AND PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

Four week elective to conceptualize issues and perform law medicine consultations in general areas of mental health law, medical ethics and professional responsibility with specific projects on patient's rights, informed consent, medical experimentation, legal guidelines effecting patient care and other areas of medicine where legal, social and ethical issues predominate. An experience as a jail psychiatrist providing psychiatric examination, as an advocate for patient's rights in a state hospital or as a consultant to lawyers at neighborhood legal service could be arranged.

Academic Career: Medical School

Course Component: Internship

Grade Component: H/HS/S/LS/U

PSYC 5897 - BEHAVIORAL MEDICINE

Minimum Credits: 0

Maximum Credits: 0

Four week elective aimed at familiarizing the student with theory and practical applications within the programs of one or two of participating faculty members. Techniques include behavioral assessment, nutritional intervention for diabetes and obesity, and interventions for enhancing coping with chronic disease or pain such as relaxation and biofeedback therapy. Develop an assessment and treatment plan for a representative case; conduct a behavioral treatment session of a selected case; critically evaluate the clinical behavioral medicine literature.

Academic Career: Medical School

Course Component: Internship

Grade Component: H/HS/S/LS/U

PSYC 5898 - INTRO TO CLINICAL PSYC RESEARCH

Minimum Credits: 0

Maximum Credits: 0

Eight week elective exposure to clinical research projects. Variety of research projects available. Each student will be assigned a faculty mentor or mentors based on his/her particular interests. Current projects involve clinical, biochemical, neuropsychological, neuroanatomic and electrophysiology studies in schizophrenia. Experiences range from "bench-top" lab assays to patient interviewing techniques; data collection, basic computer skills and basic lab skills; basic knowledge of current psychiatric nomenclature and diagnostic instruments.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

PSYC 5899 - INDEPENDENT STUDY

Minimum Credits: 0

Maximum Credits: 0

Four week elective wherein the students are welcome to do an independent study or the possibilities of other studies besides the

following ones: anorexia nervosa and bulimia nervosa; epidemiology of major psychiatric disorders; out patient management of cognitive disorders; outpatient behavioral treatment of neurotic disorders; behavioral techniques in the management of general medicine disease; genetic factors in major psychiatric disorders; outpatient drug and alcohol valid disorders and their management.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

PSYC 5901 - EXTRAMURAL PSYCHIATRY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in psychiatry may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

PSYC 5903 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

This course is intended for the nonmedical graduate student. It provides the opportunity to participate in ongoing clinical or laboratory research under the direction of a departmental faculty preceptor. The student, in collaboration with the faculty member, will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and time table for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

Psychology

PSY 2000 - RESEARCH AND THESIS MS DEGREE

Minimum Credits: 1

Maximum Credits: 9

Students who are planning, conducting or completing the master's thesis may register for this course.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2005 - STAT ANAL 1/ADV STATS-UG

Minimum Credits: 3

Maximum Credits: 3

This course is the first of a two course sequence to provide the knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Students will learn techniques to conduct a variety of statistical tests; the appropriate interpretation of results will be emphasized. Topics include descriptive statistics, graphing data, sampling distributions, hypothesis testing (including power, effect sizes, and confidence intervals), t-tests, correlations, multiple regression, and polynomial regression. Students use SAS for statistical computations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2010 - STATISTICAL ANALYSIS 2

Minimum Credits: 3

Maximum Credits: 3

This is the second of a two-course sequence to provide knowledge and skills needed to plan and conduct analyses using a uniform framework based on the general linear model. Topics covered include one-way and factorial analysis of variance, analysis of covariance, repeated measures and mixed model analysis of variance, mixed model analysis of covariance, outlier detection, and transformations. Students will continue to use SAS for statistical computing.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2110 - TOPICS IN SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Course focuses on a single topic within social psychology, such as group formation and development, victimization, social comparison, or the self. Choice of topic varies from one instructor to another.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2111 - FOUNDATIONS OF SOCIAL PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

The goal of this course is to provide graduate students with an overview of theory and research in social psychology. Topics covered include social cognition, social perception, the self, attitudes and attitude change, close relationships, prosocial behavior, aggression, group processes and performance, and stereotyping, prejudice, and discrimination. A seminar format is used, in which students are expected to read and comment on papers, participate actively in class discussions, and write a final paper.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2130 - INTERPERSONAL RELATIONS

Minimum Credits: 3

Maximum Credits: 3

Survey of theories and empirical research from social psychology and personality relevant to the study of close interpersonal relationships. Topics covered include empathy, altruism, affiliation, aggression, sexuality, and interpersonal power.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2155 - PSYCHOLOGY OF SMALL GROUPS

Minimum Credits: 3

Maximum Credits: 3

This course surveys theory and research dealing with small group processes. Topics include formation and development of groups, group composition effects, social influence in groups, group structure and group performance. This course is useful for students in various areas of psychology and such related disciplines as sociology, social work, business and health-related professions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2200 - CLINICAL PSYCH RESEARCH METHODS

Minimum Credits: 3

Maximum Credits: 3

Graduate level examination of major research methods used in clinical psychology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2205 - PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

Provides a critical background in research strategies, phenomena, empirical research, & models of adult psychopathology. Emphasis on etiological & pathological research, with both psychological & biological findings to be discussed. Concentration will be on the major psychopathologies with clinical onset in adulthood, including schizophrenia, affective disorders, anxiety, addictions, & eating disorders. Conceptual & methodological issues that cross diagnostic categories will be stressed. Treatment approaches and differential diagnosis will be covered but not emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2210 - CLINICAL PROGRAM RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This monthly graduate seminar series serves as an introduction to ongoing research relevant to the field of clinical psychology through research presentations by students and faculty from the clinical psychology program, department of psychology, and other departments.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

PSY 2220 - CLINIC PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This graduate course involves supervised experience in interviewing, assessment and psychotherapy within the clinical psychology center. This course is open only to graduate students in the clinical psychology program.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2225 - EXTERNSHIP PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This graduate course involves supervised experience approved by the clinical psychology center in interviewing, assessment and psychotherapy at any of several specialty clinics in the university and community. This course is open only to graduate students in the clinical psychology program.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2230 - CLINICAL COGNITIVE ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This graduate course focuses on the intellectual assessment of adults and children. Following a discussion of the history of theories of intelligence, the major instruments for assessing intellectual functioning will be reviewed, with a focus on the Wechsler Scales. Students will administer, score, and interpret several measures. The communication of assessment results will be emphasized. A brief introduction to the assessment of brain diseases and learning disability will also be provided.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2235 - CLIN PSYCHOPATHOLOGY ASSESSMENT

Minimum Credits: 3

Maximum Credits: 3

This graduate course covers psychometric theory and major methods for assessing psychopathology with an emphasis on objective tests such as the MMPI-2 and structured interviews. Both theoretical and practical issues of administration and interpretation are addressed. Open only to graduate students in the clinical psychology program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2245 - DEVELOPMENTAL PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This graduate course reviews models of social development and considers several theoretical issues with implications for both normal social development and for the emergence of psychopathology. Social experiences that are seen as crucial for normal development or which may set the stage for later problems are discussed. Both theoretical formulations and empirical findings are critically reviewed with an emphasis on attachment, peer relationships and family relationships.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2250 - PSYCHLGCL TRMNT: SYSTEMS & PRIN

Minimum Credits: 2

Maximum Credits: 2

This graduate course covers the history and systems of psychotherapy, with a particular focus on psychotherapy process and outcome research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2251 - PSYCHLGCL TRMNT: COGNTV & BEHVRL

Minimum Credits: 2

Maximum Credits: 2

This graduate course covers the history and theoretical foundations of cognitive and behavioral therapies as well as evidence on their effectiveness for a range of psychopathology in adulthood. Students will be exposed to basic principles of operant conditioning, behavioral analysis, counter-conditioning, strategies and case material will be introduced, but the class will focus on critical evaluation of treatment research.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2252 - PSYCHLGCL TRMNT: BEHVRL MEDICINE

Minimum Credits: 2

Maximum Credits: 2

This graduate course examines history and current status of psychological therapies designed for health risk prevention and management of physical disease. Areas emphasized are risk factor modification, secondary prevention/rehabilitation, coping with medical illness and procedures, and community/public health interventions. Critical evaluation of research on these topics will be stressed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2253 - PSYCHLGCL TRMNT:FAMILIES & CHILD

Minimum Credits: 2

Maximum Credits: 2

This graduate course provides an overview of family systems theory and family interventions with children. The history and conceptual underpinnings of family systems approaches will be introduced along with a background in normal family development. Specific orientations, including structural, functional/behavioral, and strategic approaches will also be presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2280 - ETHICS AND PROFESSIONAL ISSUES 1

Minimum Credits: 1

Maximum Credits: 1

This course introduces first-year clinical students to some of the core issues in professional psychology, including an overview of ethics and diversity issues and some orientation to the clinic and the team process. The largest part of the course will be devoted to the development of fundamental clinical skills.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2281 - ETHICS AND PROFESSIONAL ISSUES 2

Minimum Credits: 1

Maximum Credits: 1

This course provides information for first-year clinical students regarding core issues in professional psychology, including a series of lectures on psychopharmacology, followed by a summary of process research in psychotherapy. There will be additional presentations in the areas of ethics, diversity, and several empirically supported treatment models. This course will be offered annually in the summer term.

Academic Career: Graduate

Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2282 - ETHICS AND PROFESSIONAL ISSUES 3

Minimum Credits: 1
Maximum Credits: 1

This course addresses a number of topics of relevance for second-year clinical students, including ethics and diversity, as well as information regarding specific empirically supported treatment models and more general therapy techniques, such as relaxation skills training and emotional self-regulation. This course will be offered each year in the fall term.

Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2310 - FOUNDS: DEVELM PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3

A survey of theories and current research problems in developmental psychology.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2315 - DVLPMNTL PSYCH: INFANCY

Minimum Credits: 3
Maximum Credits: 3

This course will focus on the development of basic cognitive processes such as sensation, perception, memory, and thought during the first 18 months of life.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PLAN: Psychology (PHD)

PSY 2325 - DVLPMNTL PSY: SOCIAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3

This course covers the central theory and research concerning social and emotional development. Topics covered include: interpersonal relations with peers and family; aggression and pro-social behavior; sex-role development and moral development.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SU3 Basis

PSY 2330 - DEVELM PSYCH: COGNITV DEVELP

Minimum Credits: 3
Maximum Credits: 3

This course examines children's cognitive development in areas such as perception, language, memory and learning skills. Several theoretical perspectives, including Piagetian theory and the information-processing approach are discussed.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2335 - DEVELM PSY: SOCL-COGNTV DEVELP

Minimum Credits: 3
Maximum Credits: 3

A survey of recent research problems and techniques in the development of perception with an emphasis on theoretical controversies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSY 2376 - TOPICS SEM IN DEVELM PSYCHOLOGY

Minimum Credits: 2

Maximum Credits: 3

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in developmental psychology.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

PSY 2402 - COGNITIVE PROGRAM RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This series of presentations serves as an introduction to ongoing research relevant to the field of cognitive psychology. Presentations are made by graduate students and faculty of the cognitive psychology program, the department of psychology, and other departments.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

PSY 2410 - FOUNDATIONS OF COGNITIVE PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course will introduce core issues, theories, and experimental findings in cognitive psychology. Topics to be covered include history of cognitive psychology, sensory perception, attention, memory, imagery, language, reasoning, learning and expertise, problem solving, decision making, and individual differences in cognition. The goal is to understand foundational theories and issues as well as the research methods used in this area, in other words, how human cognition can be studied scientifically, and why the results of experimental investigations support particular theories.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2470 - HUMAN COGNITION: SKILL ACQUISITION

Minimum Credits: 3

Maximum Credits: 3

A course in the human cognition graduate core sequence dealing with the learning of cognitive skills, such as technical job skills and professional problem solving skills. Emphasis is on the acquisition of facility, the nature of effective practice, and the representation of knowledge that contributes to skilled performance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2471 - MAPPING HUMAN BRAIN CONNECTIVITY

Minimum Credits: 3

Maximum Credits: 3

This class will cover background and technical methods of mapping high definition fiber tracking of brain connectivity for basic research and clinical imaging. Students will learn to map/quantify anatomical connections of the human brain. These techniques are used to study brain systems, disorders, and development, and to assist in planning neurosurgery. Students may take an optional one-credit laboratory in which they will learn to use advanced computation software to execute research projects including developing technical methods, mapping brain networks, or clinical analysis of data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2475 - BEHAVIORAL NEUROSCIENCE

Minimum Credits: 3

Maximum Credits: 3

This course will explore the links between behavior (normal and abnormal) and the brain. Cognitive and affective processes will be emphasized. Throughout the course, students will be exposed to research involving humans and animals at a variety of levels: e.g., Analysis of behavior, neuroimaging studies of whole brain activity, recordings from single brain cells, examinations of brain chemistry, and manipulations and study of genetic information. No prior knowledge of biology or neuroscience is required. The format of the course will include both lectures and discussions of scientific papers. The lectures will introduce basic facts and methods of cognitive, systems, cellular, and molecular neuroscience, and they will provide overviews of topics in cognitive and affective neuroscience, considering both normal and clinically-impaired behavior and brain function. The readings will provide an opportunity to consider different methods in the context of the primary literature, permit selected topics to be explored in greater depth, and

provide a foundation for self-exploration and evaluation of cognitive and affective neuroscience literatures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2476 - TOPICS SEMINAR IN COGNITIVE PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 4

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in cognitive psychology.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

PSY 2477 - DESIGN OF EDUCATIONAL SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Students will work in teams to enact an innovative educational design process with real projects and real clients. The educational systems being (re)designed may include a museum exhibit, a high school robotics unit, a college lab course, or a professional development sequence for mathematics teachers. Throughout the process we will be learning about and addressing constraints from (1) organizational and policy contexts; (2) learning sciences; and (3) disciplinary content. The course will be interdisciplinary in that it will draw students with diverse backgrounds to form the design teams.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSY 2502 - HEALTH FUNDAMENTALS

Minimum Credits: 3

Maximum Credits: 3

This is a 3-credit proseminar intended for graduate trainees in biological and health psychology. Key conceptual and methodological issues in several major areas of concentration will be presented and discussed in a seminar format, in the context of current research. Requirements include active class discussion, brief presentations, and several papers involving summary and critique of current issues in each area of concentration. Areas of concentration will include cardiovascular behavioral medicine, psychoneuroimmunology and behavioral oncology, addictions and health behavior, and health cognition.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 2505 - HEALTH PROGRAM RESEARCH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Review of current research and topics in biopsychology.

Academic Career: Graduate

Course Component: Colloquium

Grade Component: Grad SN Basis

PSY 2520 - PSYCHONEUROIMMUNOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course provides a general background in the new interdisciplinary area of research dealing with effects of physical and psychological stress on the ability of the immune system to withstand illness and disease. Emphasis is on experimental studies which demonstrate ways in which environmental factors alter immunocompetence of animals and humans and on neural and endocrine factors that may mediate such effects. The possible significance of nervous system immune system interactions for development of disease states such as cancer is discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2560 - HUMAN CARDIOVSLR PSYCHPHYSLGY

Minimum Credits: 3

Maximum Credits: 3

Cardiovascular psychophysiology examines the influence of psychological processes on cardiovascular function. The course examines evidence supporting three perspectives on psychological processes related to cardiovascular function; a stress-arousal perspective, an

information processing perspective and a metabolic need perspective.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2575 - TOPICS IN PSYCHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in psychology.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2576 - TOPICS SEMINAR IN HEALTH PSYCH

Minimum Credits: 2

Maximum Credits: 3

This seminar will vary from term to term. It is designed to offer a graduate level seminar in specialized topics in biopsychology.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

PSY 2945 - PSYCHOLINGUISTICS

Minimum Credits: 3

Maximum Credits: 3

This course is a general introduction to psycholinguistics, which will look at processes of language understanding, language production, and language acquisition. Throughout the course, we will consider the relationship between theoretical linguistic concepts and constructs, and psycholinguistic data. We will also touch on related areas, such as processes of reading, language and the brain, and language and thought.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 2970 - TEACHING OF PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 3

This course is required of all graduate students fulfilling the departmental teaching requirement. This requirement involves full responsibility for teaching an undergraduate course in psychology during one term.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 2990 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 9

Independent research project developed under the supervision of a faculty advisor.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 3000 - RESEARCH AND DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 9

Students who are planning, conducting or completing the Ph.D. dissertation may register for this course.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology (PHD)

PSY 3205 - SEMINAR IN BEHAVIOR GENETICS

Minimum Credits: 3

Maximum Credits: 3

This is a survey of recent topics in the field of experimental psychopathology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 3245 - SEMINAR IN ADDICTION

Minimum Credits: 3

Maximum Credits: 3

Seminar will explore addictive behaviors. The primary focus will be on opiate addiction, alcohol use, tobacco smoking and relevant eating disorders. Focus is on the commonalities and differences among the addictions. A major theme is self-control process in control of addictive behavior. Theories on physiological and behavioral basis of dependence, advances in treatment and relevant issues will be discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSY 3290 - RESEARCH CHILD PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on major research problems in the field of child psychopathology. Issues of classification, differential diagnosis, course, and outcome of disorder are addressed. Particular disorders are used to illustrate the issues, trends and methodological problems which characterize current research in child psychopathology. These include attention deficit disorder, conduct disorder, childhood depression and anxiety disorders.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSY 3902 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 9

Specific research topics carried out under the direction of a particular member of the faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Psychology (PHD)

Psychology in Education

PSYED 2001 - INTRO TO RESEARCH METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

Introduces basic language and concepts of empirical research with emphasis on the applicability of research methodology (statistics, measurement, design, and evaluation) for improvement of professional practice in education.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSYED 2018 - STATISTICS 1: DESCRIPTIVE AND INFERENTIAL STATISTICS

Minimum Credits: 3

Maximum Credits: 3

Introduction to descriptive and inferential statistics. Topics include frequency distributions, graphs, stem-and-leaf displays, boxplots, scatter diagrams, measures of central tendency, measures of variability, correlation, sampling distributions, point estimation, introduction to hypothesis testing, introduction to interval estimations, chi-square analysis, one-sample and two-sample tests of hypothesis for means, variances, proportions, and correlation coefficients.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2019 - STATISTICS 2: ANALYSIS OF VARIANCE

Minimum Credits: 3

Maximum Credits: 3

Topics include one- and two-way analysis of variance, multiple comparisons for main effects and interactions, analysis of covariance, multiple comparisons for adjusted means, randomized block designs, nested designs, repeated measures designs, non-orthogonal designs and linear regression. SPSS for Windows will be used.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2018

PSYED 2030 - EXPERIMENTAL DESIGN

Minimum Credits: 3

Maximum Credits: 3

Topics include characteristics of experimental research, steps for implementing an experiment, internal and external validity, classification of experimental designs, and design techniques such as random sampling, random assignment, blocking, analysis of covariance, and gain scores.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 2019

PSYED 2072 - EDUCATIONAL AND PSYCHOLOGICAL MEASUREMENT

Minimum Credits: 3

Maximum Credits: 3

Introduction to basic principles of measurement and a survey of educational and psychological testing. Topics include the role of testing in decision-making, proper and improper uses of tests, test score interpretations (norm-referencing and criterion-referencing), ascertaining the validity and reliability of test scores and interpretations, classroom assessment and item analysis, and an overview of the different types of tests: standardized achievement and ability tests, intelligence tests, personality tests, and other non-cognitive tests (e.g. attitude surveys, interest inventories).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 2001 and (2014 or 2018)

PSYED 2073 - CONSTR ACHIEV/ABILITY TESTS

Minimum Credits: 3

Maximum Credits: 3

A basic course in the construction of measures of cognitive achievement and ability. Topics include test planning, item writing, test tryout, item analysis, reliability, validity, criterion-referencing, norm-referencing, item banking, and aptitude test design. Students write items, critique items written by others, construct tests, try out and revise tests, and develop test manuals to document the process of test development and the quality of their tests.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 2072

PSYED 2113 - DEVELOPMENTAL PSYCHOPATHOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course examines emotional and behavioral disorders of childhood and adolescence in terms of current conceptual models. Through an examination of current prevention, treatment, and intervention research, students develop an understanding of problems as well as principles of prevention, treatment and intervention. The format includes lectures film illustrations, small group exercises, and case-based learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2127 - HUMAN LEARNING

Minimum Credits: 3

Maximum Credits: 3

Presents students with an understanding of various learning theories and their application in a wide variety of settings. Consideration is given to current research focusing on biological aspects of learning, classical and operant conditioning, social cognitive theory,

information processing and selected cognitive concepts in learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2141 - CHILD AND YOUTH WORK 1 - INTRODUCTION

Minimum Credits: 3

Maximum Credits: 3

This course introduces contemporary issues in the vibrant and growing field of positive youth development. Our developmental-ecological perspective emphasizes both individual growth and the impact of systems on children and youth. Class topics include: settings where child and youth development occurs (e.g. community-based programs, religious and cultural institutions, residential treatment); the impact of popular media, social media, and other technology on youth development; and issues of diversity and privilege. We investigate efforts to support the development of thriving and other positive outcomes, as well as traditional prevention approaches. The course is benchmarked to the child and youth work competencies of the North American competency project and to the certification program of the child and youth care certification board, inc.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2143 - CHILD AND YOUTH DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course expands and deepens on themes introduced in Child and Youth Work I. Topics include the challenges of ecological approaches to learning and development; the roles of decision-makers at multiple levels (government, program directors, youth workers, youth themselves); and the benefits and challenges of youth-adult partnership approaches to child and youth work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2197 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 6

Independent study for students in psychology in education.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

PSYED 2198 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Student pursues study of various topics under the direction of faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

PSYED 2233 - COMMUNITY-BASED ACTION RESEARCH 1

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PSYED 2234 - COMMUNITY-BASED ACTION RESEARCH 2

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PSYED 2261 - ADOLESCENT DEVELOPMENT 1

Minimum Credits: 1

Maximum Credits: 1

The adolescent development course sequence for teacher education students covers developmental pathways from middle childhood through adolescence across multiple contexts (e.g. Individual, family, peers, school, community, and cultural) and the important considerations and relationships in these contexts. This first course in the sequence for teacher education students focuses on the importance of and considerations for forming authentic, meaningful relationships with all adolescents and the vital role such relationships play in promoting positive outcomes. Students will learn about developmental theories and concepts that are important in forming such relationships and will apply the concepts in their work with adolescents in educational settings. Key developmental tasks for adolescents are introduced in the context of understanding adolescent thinking and behavior. In addition to reading about development from a variety of sources, students will have the opportunity to apply the new information in their practice settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2262 - ADOLESCENT DEVELOPMENT 2

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Instruction and Learning (MAT, MED, MA, or ND)

PSYED 2263 - ADOLESCENT DEVELOPMENT 3

Minimum Credits: 1

Maximum Credits: 1

The adolescent development course sequence for teacher education students covers developmental pathways from middle childhood through adolescence across multiple contexts (e.g. individual, family, peers, school, community, and cultural) and the important considerations and relationships in these contexts. This class is the third course in the sequence for teacher education students. The course focuses on the nature and types of atypical development, especially as they relate to educational settings. Topics covered include learning, emotional, developmental, and behavioral disabilities, as well as psychological difficulties, with a continuing focus on the importance of positive relationships and the particularly vital role such relationships play in promoting positive outcomes for youth with disabilities. Students will learn about the ways in which 'typical' development is impacted by a disability and the potential implications of these impacts on adolescents' educational, social, and psychological functioning and development. Using a developmental framework, students will analyze and evaluate current interventions and/or teaching methods and apply knowledge of development to improve these approaches. Students will have the opportunity to apply the concepts in their work with adolescents in applied settings

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2265 - ATTENTIONAL TEACHING PRACTICES 1

Minimum Credits: 1

Maximum Credits: 1

Attentional teaching practices (ATP) aims to train pre-service teachers to cultivate a safe psychological space for learning, so students can make the greatest academic gains possible. In ATP I, preservice teachers will (1) learn to recognize the psychological dynamics that occur in classrooms and that may enhance the effectiveness of instruction, will (2) learn principles of adolescent development to improve their ability understand adolescent perspectives, and will (3) begin to build a toolbox of strategies to improve their psychological competence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PSYED 2266 - ATTENTIONAL TEACHING PRACTICES 2

Minimum Credits: 1

Maximum Credits: 1

Attention teaching practices (ATP) aims to train pre-service teachers to cultivate a safe psychological space for learning, so students can make the greatest academic gains possible. In APT II, preservice teachers will (1) learn how to shift the psychological dynamics in the classroom when needed, will (2) practice interacting with adolescents in ways that build on knowledge of adolescent development, and will (3) continue to strengthen their toolbox of strategies to improve their psychological competence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PSYED 2316 - ADP PROFESSIONAL SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

This course, taken concurrently with Community-Cased Practice Learning I, engages students across all specializations in their practice learning placements. The ADP professional seminar will develop students' sense of identity as an applied developmental scientist and will help them to actively develop professional ethics and standards in this process. As part of the ADP professional seminar, students will collaborate with faculty, agency supervisor, and master student colleagues to progress with completion of the master's written capstone project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PSYED 2317 - ADP PROFESSIONAL SEMINAR 2

Minimum Credits: 1

Maximum Credits: 1

This course, taken concurrently with community-based practice learning ii, engages students across all specializations in their practice learning placements. The ADP professional seminar will develop students' sense of identity as an applied developmental scientist and will help them to actively develop professional ethics and standards in this process. As part of the ADP professional seminar, students will collaborate with faculty, agency supervisor, and master student colleagues to progress with completion of the master's written capstone project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2349 - CHILD LIFE PRACTICE IN HOSPITALS

Minimum Credits: 3

Maximum Credits: 3

This seminar identifies important concepts and practices to working as child life specialists in medical/hospital settings. Given the complex interdisciplinary nature of the child life specialist's role, and the need for ongoing consultation and collaboration with a variety of professionals involved in a child's care, this course will cover a range of practical and professional topics. These topics include family coping strategies, hospital policies and practices (e.g. charting, notes, supervision, etc.), death and dying, medical terminology, and interdisciplinary consultation and communication. Students will gain an understanding of the theories and concepts underlying practices, the necessary and important day-to-day practices in hospital settings, and strategies for successful collaborations with medical professionals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2410 - APPLIED REGRESSION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Study of topics related to simple and multiple linear regression, including model specification and assumptions, methods of estimation, significance tests of model parameters and various types of multiple regression and predictor-selection techniques. The relationship of partial and semi partial correlation to regression is covered as well as the use of interaction terms and dummy variables in regression. SPSS and SAS are used to illustrate the correct interpretation of regression results.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSYED 2416 - APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course will emphasize understanding, implementation, and interpretation of multivariate statistical methods. The course will involve both lecture and lab work. These methods are manova, mancova, profile analysis, doubly manova, discriminant function analysis, logistic regression, principal components and factor analysis. SPSS will be emphasized with an introduction to SAS.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: PSYED 2410 and 2422

PSYED 2422 - DATA ANALYSIS USING COMPUTER PACKAGES

Minimum Credits: 3

Maximum Credits: 3

Introductory course in using SPSS and SAS for data analysis. The course focuses on quantitative methods where specific attributes or variables are measured according to different scales of measurement. Statistical procedures are then applied to study relationships between the variables. The course addresses all stages to data analysis: reviewing research questions and identifying variables of interest; reviewing protocols used to collect data; coding data and creating data codebooks; reading data, screening data, transforming data, and performing file manipulations; and analyzing data using descriptive and basic inferential methods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 2001 and (2014 or 2018)

PSYED 2490 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 18

The student demonstrates ability to apply research skills by planning and completing a research project under direction of an appropriate faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

PSYED 2491 - SUPERVISED RESEARCH IN RES METH

Minimum Credits: 1

Maximum Credits: 9

The student demonstrates ability to apply research skills by planning and completing a research project under the guidance of an appropriate faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

PSYED 2494 - M.A. PROJECT IN RSRCH METHODLGY

Minimum Credits: 1

Maximum Credits: 9

Student prepares a library-based research paper that reviews, organizes, synthesizes, and critiques previously conducted research and scholarly discussion pertaining to quantitative research methodological issues and/or techniques in the areas of statistics, research design, and/or measurement.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PSYED 2498 - DIRECTED STUDY IN RES METH

Minimum Credits: 1

Maximum Credits: 3

Student pursues study of various topics under the direction of faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

PSYED 2499 - THESIS RES IN RSRCH METHODOLOGY

Minimum Credits: 1

Maximum Credits: 9

Under the guidance of the thesis advisor, the student plans and completes a theoretical or empirical study on a quantitative research methodology topic and prepares a thesis in the form stipulated in the university style and form manual.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PSYED 2503 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD

Minimum Credits: 3

Maximum Credits: 3

Focuses on developmental pathways from conception through early childhood within contexts of family, daycare/school, community and culture. Pathways are considered with regard to developmental changes in transactions between individuals and social life

conditions, with focus on patterns of change in participation in social-cultural practices. Besides a review of current literature, students will be engaged in qualitative investigations of the social lives of young children.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PSYED 2504 - DVLP: MIDDLE CHLHD/ADOLESCENCE

Minimum Credits: 3

Maximum Credits: 3

Course focuses on developmental pathways from middle child hood through adolescence (ages 7-18) within the contexts of family, school, community and culture. Pathways are considered in regard to developmental changes in transactions between individuals and social life conditions, with regard to patterns of change in participation in social cultural practices. Students will be engaged in qualitative investigations of the social lives of children and adolescents.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Psychology in Education (MS or PHD)

PSYED 2510 - ASSESSMENT OF CHILDREN'S DEVELOPMENT IN REAL WORLD CONTEXTS

Minimum Credits: 3

Maximum Credits: 3

The course is intended for interdisciplinary graduate students (masters and doctoral) from such programs as applied developmental psychology, developmental psychology, social work, early childhood special education, health and rehabilitation sciences, and nursing. The course content and applied group activities will help prepare graduate students as emerging leaders to understand 'best practices' in the measurement of both children's development and the quality and impact of services and interventions that are applied to them and to their families. These 'best practices' are both professionally sanctioned by the major national early childhood professional organizations and many also have a research evidence-base that supports their use. Thus, this course will help students to understand and use various applied assessment strategies that can: (1) describe the development and progress of children (birth to adulthood) and families in functional ways; (2) sensitively monitor children's progress in intervention programs; (3) be applied by teachers and other direct care professionals; (4) collect evidence of children's daily functioning in natural everyday settings; (5) be selected to conduct applied program evaluation research for schools, agencies, and human service programs; and (6) document the impact and outcomes of intervention programs. The course will help students who are interventionists, but is not primarily clinical in orientation. Rather, it is designed to prepare future leaders-researchers, program administrators, program evaluators, and policy specialists-in best practices and their implications. It is a required course in the ADP MS course sequence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSYED 2519 - QUALITATIVE METHODS: PARTICIPANT OBSERVATION

Minimum Credits: 3

Maximum Credits: 3

This research methods course introduces one of the main methods of qualitative research participant observation. Special attention is paid to the naturalistic study of child and youth development in context. Students will gain competence in key areas of ethnographic research including: establishing access to a site, writing ethnographic field notes capable of supporting rigorous research, articulating research questions, determining a unit of analysis, developing conceptual categories, coding, and writing up findings. Students conduct seven weeks of fieldwork in order to complete a pilot study of their choosing. Please note that the use of data analysis software such as NVIVO and ALTAS/TI is not permitted.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2520 - INTRODUCTION TO COUNSELING

Minimum Credits: 3

Maximum Credits: 3

This course will include theoretical models of counseling; units on crisis intervention, family support and intervention, home based models of support and intervention, the reflective practitioner; and counseling skills for child and youth care practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2521 - THEORY, MEANING AND PRACTICE OF PLAY AND ACTIVITY

Minimum Credits: 3

Maximum Credits: 3

This course provides a comprehensive overview of the role of play and activity in human development, with a particular focus on ways of utilizing play and activity to promote positive growth in social, emotional, physical, and cognitive domains; and on interpreting the meaning of individual and group play and activity. Play and activity in the lives of persons of all ages will be considered with some emphasis on the early and school years. While academic learning is essential in this course, the focus will be on hands-on, real play as the ideal way to learn about it, and encouragement of a life-long playful spirit.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2524 - BEHAVIORAL ASSESSMENT AND INTERVENTION

Minimum Credits: 3

Maximum Credits: 3

This course helps graduate students respond to the needs of K-12 students with emotional and behavioral problems in school settings. These problems include disruptive, oppositional and aggressive behaviors, limited interpersonal and study skills, and behaviors caused by learning difficulties, mental illness and stressful life events. The emphasis of the course is on research-based positive behavioral supports and interventions. In addition, students learn consulting strategies to assist those who teach challenging youth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2530 - APPLIED DEVELOPMENTAL PSYCHOLOGY (ADP): PROFESSIONAL IDENTITY AND LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to introduce the field of applied developmental psychology (ADP). This course focuses on helping students to develop a professional identity, ethical reasoning skills, and leadership skills that align with ADP. Students will gain knowledge of the overall field, reading an advanced textbook and related literature, while getting to know how developmental thinking is being applied in our local community of practice. Attention will focus on the relations and partnerships that are necessary for the development, implementation, and evaluation of programs and policies that effectively support the positive biopsychosocial & spiritual development of children and youth in contexts of their families, schools and communities. The course introduces students to local experts who apply developmental thinking in different systems of practice, including education, juvenile justice, child welfare, and behavioral health. In this process, students will frame their own professional development, considering their goals in relation to needed competencies and opportunities in the field, and think critically about ethical principles and their applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2532 - PSYCHOSOCIAL ASPECTS OF ILLNESS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to enable students to understand the nature of and dynamics of pediatric illness, appreciate the impact an acute or prolonged health care experience may have upon children throughout the developmental process, better understand a family health care philosophy and gain an understanding of the multi-faceted role child life specialists play in today's health care environment.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

PSYED 2538 - ADVANCED COUNSELING SKILLS

Minimum Credits: 3

Maximum Credits: 3

Course will teach indirect communication techniques, methods for dealing with secondary gains, methods to help clients develop a sense of empowerment and the therapeutic use of visual imagery. The course will emphasize hands-on practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: PSYED 2520

PSYED 2540 - METHODS AND PRACTICES OF ADP RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to ways of thinking like an applied developmental psychologist. This class teaches the fundamentals of how to investigate applied developmental questions, from how to read scholarly articles, why and how to connect research and practice, and how to begin to explore questions relevant to both students' own specific applied developmental interests and the field at large. To these ends students will study text on how to think and know in ADP, as well as participate in activities to develop practical investigative skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Psychology in Education (MA or MS or PHD)

PSYED 2542 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS I

Minimum Credits: 3

Maximum Credits: 3

Evidence-based interventions (EBIS) are the foundation of effective and high-quality prevention and intervention programs in education, human services, and healthcare. Both pre-service and continuing education of interdisciplinary professionals must emphasize the acquisition of knowledge and applied competencies about diverse ebis in this continuously evolving area. Many forms of prevention and intervention are used in education, human services, and healthcare, but few such practices have 'practice-based evidence' conducted in real-world settings which validate their continued use. Thus, in this course, students will gain knowledge and skills in evidence-based contextual and individual interventions, their content, methodology, implementation, and evaluation. The course will help students who are interventionists but is not primarily clinical in orientation. Rather, it is designed to prepare future leaders ' practitioners, researchers, program administrators/directors, program evaluators, and policy specialists - in best practices and their implications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2543 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS 2

Minimum Credits: 3

Maximum Credits: 3

Evidence-based interventions (EBIS) are the foundation of effective and high-quality prevention and intervention programs in education, human services, and healthcare. In this second part of a 2-course sequence, students will: learn about and apply qualitative and quantitative data-based decision-making techniques and measures to collect evidence of child/youth daily performance and to assess the dimensions of various home, school, and community contexts which hinder or promote progress; create EBI plans for individuals and groups to promote progress in real-world settings; apply a short-term EBI in a real-life case situation; and evaluate the quality, impact, or outcomes of the data-based decision making methods and process.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2557 - COGNITIVE-BEHAVIOR THERAPY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the theory and practices of cognitive-behavioral therapy (CBT) to help students develop a basic therapeutic skill set. The CBT approach applies to a variety of clinical problems and practice settings. CBT is a flexible approach and is used in diverse settings such as inpatient, outpatient and partial hospital programs as well as in schools and community-based programs. Students will learn about how CBT may be used to address issues such as depression, anxiety, attention-deficit/ hyperactivity disorder, and other emotional and behavioral disorders. In addition to clinical practice, many people find the principles of the cognitive-behavioral model useful in maintaining a healthy emotional outlook in their own lives. This course will emphasize both theory and practice of cognitive-behavioral skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2560 - PROFESSIONAL SEMINAR IN SCHOOL-BASED BEHAVIORAL HEALTH

Minimum Credits: 3

Maximum Credits: 3

This course addresses critical contemporary issues in designing, implementing, and evaluating school-based behavioral health programs and services. Through a partnership with experienced mentors practicing in the field of school-based behavioral health, students will create new resources that reflect best practices. Using in-class and on-line discussions, problem-based learning, and simulations, students will explore real-life situations they are likely to encounter in future supervisory and administrative positions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2562 - PLAY THERAPY AND FIELD WORK

Minimum Credits: 3

Maximum Credits: 3

Supervised experience in direct interaction with children on an individual basis in play interviews with concomitant consideration of children's developmental dynamics as revealed in a one-to-one relationship. An ongoing weekly seminar is a part of the course.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2503 and 2520

PSYED 2565 - PROGRAM DESIGN AND EVALUATION

Minimum Credits: 3

Maximum Credits: 3

An integration of child development theory and research in the design of programs for children, youth, and families. Focus is on skills in designing developmentally appropriate and interventive programs, structure of service models, and program evaluation. The major paper for the graduate program will be part of this course's requirements.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2540

PSYED 2567 - PROFESSIONAL LEADERSHIP

Minimum Credits: 3

Maximum Credits: 3

Professional leadership focuses on empowering practitioners in applied developmental psychology, education, and related human service professions to use a knowledge base to recognize and develop their leadership potential, to identify and solve professional problems and issues, and to have the knowledge background, thinking, and practical skills to enable them to function in leadership positions. The course will be divided into three sections designed to address specific areas pertinent to leadership: leadership theory, leadership thinking, and leadership applications. Applications include effective personal presentation and specific leadership skills, such as strategic planning, marketing, and grantsmanship.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

PSYED 2588 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

This advanced course focuses on selected topical areas of special importance for child care and child development. Each time it is offered a different topic is addressed from theoretical, research, intervention, and professional practice perspectives.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2590 - MASTER'S RESEARCH TEAM

Minimum Credits: 1

Maximum Credits: 1

This weekly course is designed for students who are pursuing a research project as their option for their master's program. Topics include discussions and hands-on support for how to design, conduct and write-up results for a research project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

PSYED 2596 - INTERNSHIP IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 6

A university-approved agency based supervised internship in developmental/interventive practice with and/or for children, youth and families.

Academic Career: Graduate

Course Component: Practicum
Grade Component: Grad HSU Basis

PSYED 2598 - DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 6

Directed study provides an opportunity for focused work with faculty supervision. The student must present a plan for the independent study for approval by the supervising faculty member prior to registration for the course.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

PSYED 2599 - THESIS

Minimum Credits: 1

Maximum Credits: 6

Designed to help the student to carry out his or her research or creative project and to write an acceptable thesis. This course is subject to repeated registration.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PSYED 2605 - CHILD AND YOUTH CARE BASIC COURSE

Minimum Credits: 3

Maximum Credits: 3

This strategy-based course, offered in partnership with the Allegheny partners for out-of-school time (APOST) of the united way, is attended by both University students and local youth workers. Hands-on, interactive sessions introduce essential concepts and skills in professional child and youth care, geared towards settings including early childhood education, after-school programming, foster parenting, residential treatment, basic care, emergency shelters, recreation, corrections, community youth services, and developmental disabilities. The course prepares participants for child and youth care certification with topics such as professional ethics, assessment, developmentally-based programming, and activity development. University students taking this course for credit will complete reading and writing assignments to accompany the practice-focused sessions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2622 - CHILD LIFE PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

Credits for approved hospital-based child life practicum experience.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

PSYED 2632 - APPLIED RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

This introductory methods seminar focuses on applied research design including developing conceptual definitions, applying models of theory testing and theory building, and developing relevant policy and practice research questions. This course will cover key debates occurring in the field of applied research in terms of producing evidence to support policy, practice, and program development, and is designed to encourage practical skill development; experiential learning opportunities are integrated into course content. Students will gain an understanding of applied research design and an improved skill set in proposing, designing, and evaluating applied studies of interventions and programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2722 - CHILD LIFE INTERNSHIP

Minimum Credits: 1

Maximum Credits: 6

Credits for approved hospital-based child life internship placement.

Academic Career: Graduate

Course Component: Internship
Grade Component: Grad HSU Basis

PSYED 2765 - COMMUNITY-BASED PRACTICE LEARNING 1

Minimum Credits: 2

Maximum Credits: 2

This course provides students with the opportunity to participate in an individual community-based practice learning experience with a partner agency. As part of the placement, students engage in activities that lead to the production of an agreed-upon, tangible product to meet an identified need for the agency. This product will also meet the requirements for the student written capstone project for the master's program and will serve as the presentation topic for the master's comprehensive exam. This course is taken concurrently with the ADP Professional Seminar I & II.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 2766 - COMMUNITY-BASED PRACTICE LEARNING 2

Minimum Credits: 2

Maximum Credits: 2

This course provides students with the opportunity to participate in an individual community-based practice learning experience with a partner agency. As part of the placement, students engage in activities that lead to the production of an agreed-upon, tangible product to meet an identified need for the agency. This product will also meet the requirements for the student written capstone project for the master's program and will serve as the presentation topic for the master's comprehensive exam. This course is taken concurrently with the ADP Professional Seminar 1 & 2.

PSYED 3190 - RES SEM IN PSYCHOLOGY IN EDUC

Minimum Credits: 3

Maximum Credits: 3

Advanced seminar in research for doctoral students in psychology in education.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSYED 3197 - INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Independent study for doctoral students in psychology in education.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

PSYED 3408 - HIERARCHICAL LINEAR MODELING

Minimum Credits: 3

Maximum Credits: 3

This course is on hierarchical models for continuous and discrete outcomes. Hierarchical models are used when the units of observation are grouped within clusters. Observations in a cluster typically are not mutually independent for given covariate values as required by conventional linear and logistic regression models. Longitudinal or repeated measures data can also be thought of as clustered data with measurement occasions clustered within subjects. The focus of the course is on hierarchical linear models and their assumptions, as well as practical aspects of developing models to address research questions and interpreting the findings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: PSYED 2410 or PSYED 3410

PSYED 3410 - REGRESSION ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Various types of regression analyses will be covered such as simple linear regression, multiple regression, nonlinear regression, and logistic regression. Model selection, validation, residual analysis, diagnostics, and remedial measures of regression analyses will be discussed. Some of the remedial measures that will be covered are robust regression, ridge regression and bootstrapping. Regression

analyses of qualitative and quantitative predictors as well as interaction effects of these variables will also be covered. These topics will use matrix algebra which will be introduced in class. SAS will be used.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 2016 or 2019

PSYED 3412 - GENERAL LINEAR MODELS

Minimum Credits: 3

Maximum Credits: 3

Various types of analysis of variance will be introduced from the general linear models framework. One-way, two-way, higher-order ANOVA and ANCOVA using within-subjects, between-subjects, and mixed designs will be covered. Simple effects (simple main effect, simple comparisons, marginal comparisons, and interaction contrasts) analyses will also be discussed. Issues related to equal and unequal sample sizes as well as ANOVA diagnostics and remedial measures (e.g., transformation and weighted least square) will be covered. Some of the advance topics include incomplete design, fractional factorial, Latin Square, and nested designs. These topics will use matrix algebra.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2016 or 2019

PSYED 3416 - MULTIVARIATE STATISTICS

Minimum Credits: 3

Maximum Credits: 3

Topics include an introduction to the multivariate normal distribution, q-q plots, and box-cox transformations and assumptions for applying multivariate linear models. The analysis of two group designs, manova, mancova mixed models, repeated measurement designs and seemingly unrelated regression (sur) models are analyzed in the course. Also included are the exploratory data analysis techniques of principal component analysis, discriminant analysis, canonical correlation analysis, cluster analysis, and multidimensional scaling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 3410

PSYED 3417 - STRUCTURAL EQUATION MODELING

Minimum Credits: 3

Maximum Credits: 3

This course will introduce structural equation modeling (SEM). Some fundamental materials necessary for SEM will be reviewed; i.e. Matrix algebra, covariance algebra, multiple regression; and factor analysis. SEM is a family of techniques. Some of the different SEM techniques that will be discussed include path analysis, confirmatory factor analysis, general SEM, and mediation/moderation models. Advance SEM techniques will also be discussed, e.g. Mean and covariance SEM, latent growth curve models, multi-sample/multi-group SEM, dealing with missing and non-normal data, and mixture modeling.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2410 or PSYED 3410

PSYED 3419 - MEANING-CENTERED APPROACHES TO STUDYING DEVELOPMENT: PARTICIPATION OBSERVATION IN THE FIELD

Minimum Credits: 3

Maximum Credits: 3

Course introduces one of the main methods of qualitative research, participant observation. Students will learn by doing and are, therefore, required to conduct fieldwork in order to complete a pilot study of their choosing. The primary purpose of course is to provide a hands-on, in-depth understanding of the epistemological and methodological aspects of qualitative data analysis. Course includes a project that requires you to spend time in youth-serving organizations. Clearances are required prior to first site visit: (a) federal criminal history record, (b) Pennsylvania criminal record check, and (c) Pennsylvania child abuse history clearance. Clearances less than 3 years old will be accepted. Outcome objectives include: 1. Understand reciprocal relationship between generating & using theory in participant observation studies. 2. Write ethnographic fieldnotes capable of supporting research studies. 3. Identify and resolve ethical issues that arise during fieldwork. 4. Gain knowledge of components of qualitative data analyses including: articulating conceptual definitions, developing research questions, using existing research and theory, determining the unit of analysis, developing conceptual categories, coding, displaying data and findings. 5. Identify sources of invalidity in qualitative research. 6. Develop a basic understanding of apa style of writing up a research study.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3420 - COMPUTER APPLICATIONS TO RESEARCH METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

Course in advanced computer-based applications. Topics include design and conducting Monte Carlo studies, computer adaptive testing, and application of Bayesian methods to education. Students will learn the required steps for conducting a monte Carlo study or a computerized experiment: how to design the study, how to simulate data, and how to evaluate results. Procedures in SAS as well as other programs will be considered. Students will also design and implement a small monte Carlo study. For the computer adaptive testing (CAT) component, students will be introduced to cat and issues related to cat assessments: developing and maintaining item pools, selecting items, estimating ability, and validity of scores from cat assessments. Students will be introduced to the theory of Bayesian methods, application of Bayesian methods in educational measurement and statistics, and software that is available to implement Bayesian methods.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

PSYED 3450 - INTRO TO EDUCATIONAL EVALUATION

Minimum Credits: 3

Maximum Credits: 3

Issues relevant to doing evaluation and utilizing results are addressed. Both evaluation "theory" and practical experience are utilized to prepare people who will be providing or using evaluation information. Special emphasis is given to: a) differences between evaluation and research; b) problems in using quantitative or qualitative methods when assumptions are not met; and c) issues that affect the usefulness of information in decision making.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PSYED 3471 - CONSTRUCTING QUESTIONNAIRES AND CONDUCTING SURVEYS

Minimum Credits: 3

Maximum Credits: 3

Introductory course in survey research methodology. The course considers practical considerations in the construction of questionnaires including determining questionnaire content, selection of item types and wording of items, selection of an administration method, piloting questionnaires, and locating existing questionnaires. Discussion about conducting survey research considers sample selection, analyzing information obtained from questionnaires using SPSS, evaluating questionnaires, sources of error and how to reduce measurement error in survey research.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2001 and (2014 or 2018)

PSYED 3475 - PSYCHOMETRIC THEORY

Minimum Credits: 3

Maximum Credits: 3

Basic course in classical and modern psychometric theory. Topics include basic formulations, composite tests, validity and reliability, test length, factors affecting precision, estimation, prediction, item parameters, test construction, and test equating. Both criterion-referencing and norm referencing applications are included.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 2072 and (2014 or 2018)

PSYED 3477 - ITEM RESPONSE THEORY

Minimum Credits: 3

Maximum Credits: 3

Continuation of PSYED 3475. Advanced measurement topics in item response theory models and their applications to achievement, aptitude, and attitude measurement. Includes one-, two-, and three-parameter models; item and test information functions; test characteristics curves; test design; item fit and selection; tests for unidimensionality and model fit; IRT equating; adaptive testing strategies; item banking; and Bayesian, maximum likelihood, and EM estimation. Reviews major computer packages for IRT parameter estimation.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PREQ: PSYED 3475

PSYED 3484 - ADV TOPICS IN MEASUREMENT

Minimum Credits: 3

Maximum Credits: 3

Seminar on specialized topics in educational and psychological measurement organized around faculty and student interests. Students may request a specific seminar series on topics not covered by ordinary course offerings.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: PSYED 3475

PSYED 3485 - ADV TOPICS IN RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

Includes new strategies in research design, and application of mathematical and behavioral design models for educational research. Topics vary each term around interests of the students enrolled.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PSYED 3491 - SUPERVISED RESEARCH IN RES METH

Minimum Credits: 1

Maximum Credits: 18

The student demonstrates ability to apply research skills by planning and completing a research project under direction of an appropriate faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

PSYED 3495 - TEACHING INTERNSHIP IN RES METH

Minimum Credits: 3

Maximum Credits: 3

Provides students with training in teaching a section of a research methodology course. It includes the development of course lectures, assignments, and part of the midterm or final exam and the delivery of the lectures.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

PSYED 3498 - DIRECTED STUDY IN RES METH

Minimum Credits: 1

Maximum Credits: 3

Student pursues study of various topics under the direction of faculty.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

PSYED 3499 - DISSERTATION RESEARCH IN RESEARCH METHODOLOGY

Minimum Credits: 1

Maximum Credits: 18

Student registers for this course while conducting research for a doctoral dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad LG/SNC Basis

PSYED 3531 - FAMILY INFLUENCE ON CHILD DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course provides an analysis of the multiple pathways through which parents, siblings, and families shape child development. Each of several pathways--the determinants of parenting, parental influences, marital influences, and sibling influences--is examined and discussed across three developmental periods: infancy, early childhood, and middle childhood. Primary attention will be paid to the unique impact of parental care on early development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2503 or 2504

PSYED 3532 - FAMILY RESEARCH METHODS AND ISSUES

Minimum Credits: 3

Maximum Credits: 3

This course is designed to introduce students to research methods relating to human relationships and families. Students survey a variety of research methodologies including experimental, correlational, and qualitative designs and observational and self-report measurement. Assessment techniques and instruments currently used in family research will be illustrated and discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PSYED 2016 or 2019

PSYED 3535 - CULTURE AND COGNITION

Minimum Credits: 3

Maximum Credits: 3

This course will examine cultural influences on children's cognition. Students will be introduced to thinking and research in cross cultural psychology. The implications of this work for the assessment of children's learning and development will be discussed. A multicultural perspective on the education of minority children in the United States will be presented and evaluated.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PSYED 3587 - SPECIAL TOPICS 2

Minimum Credits: 3

Maximum Credits: 3

This course has two aims: (1) to understand how risk and resilience processes and competence develop in social contexts and (2) to explore how preventions and interventions based on this developmental information can enhance competence. The course will emphasize how developmental processes of risk and resilience are affected by social contexts. Contexts to be studied range from the small-group, organizational, and community contexts up to the level of public policy and culture. The course will review strategies and systems of prevention and intervention that target change in these social contexts, and thereby reduce risk or increase adaptation. The course will also draw on multidisciplinary content from the fields of human development, education, developmental and community psychology, psychiatry, public health, and public policy. The first part of the course will focus on developmental theories relevant to a contextual approach to risk, resilience, and competence. The second part will explore, in depth, a range of strategies for prevention, intervention, and social change that show evidence of positive impacts on child and youth development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Psychology in Education (PHD)

PSYED 3589 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 1

This course will provide a psychologically safe place to develop professional writing skills that are specific to our field. We will work on refining writing that students are working on already (manuscripts, conference proposals, revise and resubmit letters, CVS, dissertation proposals, etc.). This will include self-reflection and analysis, peer-review, and whole group discussion. Weekly topics will include grammar/APA style, tone, and flow, integrating evidence, and staying motivated and engaged in your writing. Students will have many opportunities to give and receive feedback.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad SN Basis

Course Requirements: PLAN: Psychology in Education (PHD)

PSYED 3591 - SUPERVISED RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 18

Students will pursue selected topics under the guidance of a faculty member.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad SN Basis

PSYED 3592 - PRACTICUM IN COLLEGE TEACHING

Minimum Credits: 3

Maximum Credits: 3

The practicum in college teaching allows doctoral students the opportunity to teach, or assist in teaching, a course in educational psychology. Students may be assigned to assist a faculty member with a course, or be assigned a course as primary instructor, under faculty supervision. In addition to a full range of responsibilities involving course preparation, planning, classroom instruction, testing student progress, assigning grades and course evaluation, students are expected to attend an accompanying seminar in college teaching.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

PSYED 3598 - DIRECTED STUDY IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 6

Federal and state reforms in recent decades have focused on the establishment of standards and assessments as means of improving teaching and learning and closing the achievement gap between more and less privileged students. Reforms such as no child left behind, the common core state standards, and the federal race to the top competition have resulted in a proliferation of standards and high-stakes tests, and have been accompanied by both desirable and undesirable changes in school and district practices. In this course we will explore the debates surrounding these various standards and assessment reforms. The topics this course will address include the use of assessments to lever instructional change, the assumptions about learning that underpin different types of assessments and test-based accountability, and research investigating the influence of high-stakes testing on instruction and learning. This course also will consider research pertaining to high-stakes teacher evaluation including value-added models, pay for performance, and direct assessment of teaching quality.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

PSYED 3599 - DISSERTATION RESEARCH IN APPLIED DEVELOPMENTAL PSYCHOLOGY

Minimum Credits: 1

Maximum Credits: 18

Student registers for this course while conducting research for a doctoral dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

PSYED 3632 - APPLIED RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

This introductory methods seminar focuses on applied research design including developing conceptual definitions, applying models of theory testing and theory building, and developing relevant policy and practice research questions. This course will cover key debates occurring in the field of applied research in terms of producing evidence to support policy, practice, and program development, and is designed to encourage practical skill development; experiential learning opportunities are integrated into course content. Students will gain an understanding of applied research design and an improved skill set in proposing, designing, and evaluating applied studies of interventions and programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Public & International Affairs

PIA 2003 - SEMINAR IN RESEARCH DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term "mixed method."

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2011 - MANAGING INTERNATIONAL ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course, designed for students in all GSPIA masters programs, examines the challenges of management of international organization, that is, organizations that are comprised of states. It approaches management at three levels: at the macro level, we will explore the political environment and governance structures of international organizations; at the micro level, we will look at how individual managers cope with the standard management tasks, including managing staff and budgets, in an international environment, and at a Meso level, we will study the challenges of project management and of inter-organization coordination. We will also look at cross-cutting issues, including the problem of corruption, the continued attempts to reform international organizations, and the relationships between management and policy in an international environment. Students will select a specific international organization for in-depth analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2020 - ADMINISTRATION OF PUBLIC AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

We are in the middle of a revolution transforming public administration and government to a new dynamic built on public management and governance. Government, politics, and bureaucracy are replaced with networks, partnerships, and interrelationships between the public, nonprofit, and private sectors. Governments continue to be critical players, but, that's not "the whole story." Government actors, both elected and appointed, now spend most of their time engaged in intersectoral relations and intergovernmental relations. Modern management is no longer simply the effective utilization of personnel, but the effective negotiation and linkages of partnership relations external to the organization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2021 - GLOBAL GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

This is an introductory course in the field of International Affairs (IA). It is designed to give students knowledge of the major theoretical approaches and issues in international politics. The course introduces students to basic concepts and schools of thought in IA and examines major institutions and processes through which foreign policies are made and implemented. A major objective is to relate theories and models to major national and international policy debates through the close examination of case studies. Reference will be made throughout to contemporary developments. The interlocking objectives of this course are: 1) to provide a grounding in the nature and characteristics of International Affairs; 2) to develop a broad understanding of the outstanding features of today's world and how it differs from other periods; and 3) to learn the key concepts for categorizing and analyzing the dynamics of international politics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2022 - QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Introduction to quantitative methods is a foundation course that provides an overview of statistical methods and hands-on applications to managerial decision-making in the public sector. Understanding statistical analysis and being able to work with data are important competencies of professionals in public policy and administration. Course topics include program evaluation, data collection and measurement in public policy and administration, descriptive statistics, hypothesis testing, processes for selecting statistical tests and assessment of statistical assumptions, measures of association and other bivariate statistics, index variable construction, regression analysis, and an overview of selected other statistical and quantitative methods applied to problems of public administration. Students get hands-on experience through the use of a statistical analysis tool. Recognizing the social, political, and economic context of data collection, analysis, and reporting practices in the public sector, this course also discusses the ethics of data analysis and information technology policy and management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2023 - INTERMEDIATE QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Whether in a private firm, a think tank, or a government agency, the ability to leverage data to clarify an issue and support an argument is extremely useful. This class lays the theoretical and practical foundations for you to develop data and statistical skills that can distinguish you from other job applicants or colleagues. This introduction to econometrics is designed to give you a working knowledge of the techniques used to analyze economic data. You will also gain a familiarity with working with data using the statistical analysis package Stata.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2024 - ECONOMICS FOR PUBLIC AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

The course covers the economics principles necessary to understand economic policy debates. In addition to demand-supply and the consumer theory, students are explained how firms pricing and output decisions depend on market structures and behavior of competitors. The course also covers macroeconomics topics such as national production, employment, prices, monetary and fiscal policy. After completion of this course, students will have a better understanding of how government policy affects macroeconomics outcomes.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2025 - MICROECONOMICS 1

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to equip future public policy professional with the tools and ability to evaluate the economics of complex microeconomic scenarios. It goes beyond decision making by firms and households and presents microeconomic tools of analysis useful of policy makers and implementers, such as discounting externalities, project ranking criteria, efficient pricing, and cost benefit analysis. Real world cases and projects are analyzed in detail using the tools presented in the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2027 - MACROECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This course applies tools from PIA 2024 economic of public affairs course (or equivalent) to examine current economy-wide challenges. These topics include economic development, environment, energy, health, international trade, and recent financial crisis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PIA 2024 or PIA 2008; PROG: Graduate School of Public and International Affairs

PIA 2028 - PUBLIC POLICY ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
How can we improve the ability of society to choose between alternative policies? This course provides a framework to assess alternative policies on the dimensions of efficiency, equity, and political feasibility. The comparative institutional framework requires an interdisciplinary perspective which draws on economics, political science, and political economy. Throughout the course, we will consider how insights from these disciplines provide insight into the choices confronting policymakers seeking to bring society closer to their conception of the good life. The course is organized into three parts: an introduction to policy analysis; a framework for comparative markets and governments; and applications of the framework. One of the main goals of the course, besides mastering the material (as evidenced by an in-class midterm), is a series of papers applying these concepts as well as an original research paper conducting a policy analysis.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PREQ: PIA 2001 or 2008 or PIA 2022 or PIA 2024; PROG: Graduate School of Public and International Affairs

PIA 2029 - PROFESSIONAL COMMUNICATION IN MANDARIN 1

Minimum Credits: 2
Maximum Credits: 2
This language course is offered by the International Business Center (IBC) and the graduate school of public and International affairs (GSPIA) and is specifically designed for graduate students in business, public administration, and international affairs.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad LG/SNC Basis

PIA 2030 - PROFESSIONAL COMMUNICATION IN ARABIC 1

Minimum Credits: 2
Maximum Credits: 2
This course is intended to provide a solid foundation for both spoken and written Arabic with an emphasis on the mastery of Arabic phonics and communication skills. The student will be introduced to the basic grammatical structure of Arabic, and a vocabulary of at least 800 basic words. Many of these words open up varieties of word families, so the student's effective vocabulary should be well in excess of 2000 words. While the concentration is on speaking Arabic, there will be also a major exposure to reading and writing, which builds up vocabulary as well as encourages students to learn about the dialects, the customs and traditions of the Arab world. Students' participation and group activities engaging conversation in Arabic are vital to the course. The course is conducted entirely in Arabic.
Academic Career: Graduate

The intent of the capstone seminars is to provide students with a focused experience in working on a real world problem of policy and management in a team setting under expert faculty guidance. Each seminar is focused on a prescriptive question - what should a specified public official or institution do about a specified problem?

Academic Career: Graduate**Course Component:** Seminar**Grade Component:** Grad LG/SU3 Basis**Course Requirements:** PREQ: PIA 2009 or PIA 2028; PROG: Graduate School of Public and International Affairs**PIA 2097 - INDEPENDENT STUDY****Minimum Credits:** 1**Maximum Credits:** 6**Academic Career:** Graduate**Course Component:** Independent Study**Grade Component:** Grad HSU Basis**Course Requirements:** Graduate School of Public and International Affairs students only.**PIA 2098 - INTERNSHIP****Minimum Credits:** 0**Maximum Credits:** 6**Academic Career:** Graduate**Course Component:** Internship**Grade Component:** Grad HSU Basis**PIA 2099 - THESIS****Minimum Credits:** 1**Maximum Credits:** 3**Academic Career:** Graduate**Course Component:** Thesis Research**Grade Component:** Grad HSU Basis**PIA 2101 - MANAGING EMERGENCIES AND DISASTERS****Minimum Credits:** 3**Maximum Credits:** 3

Emergency managers perform their work often in chaotic, complex, political and rapidly changing environments and events. How well they have prepared for those events can often, literally, make the difference between life and death to those impacted by these situations. The risk of disasters and emergencies threaten all individuals, communities and governments. The administrator at all levels of government or within Non-Governmental Organizations (NGOS) will face the need to prepare for, respond to and recover from such events, but how do you do that? Emergencies are events that strike at communities and create needs that are usually met by local responders and resources typically available. This can include private, governmental and NGO resources from within the community and the ready assistance from neighboring jurisdictions. The responders are familiar with one another through training and daily interactions. They typically share similar risks and understand local geography, demographics and politics. Emergencies commonly involve what are described as emergency responders-fire, police, emergency medical services, 911, public works and Emergency Management Agencies (EMAS). Disasters are larger in scale, impact and need. Disasters require assistance from the state and federal governments, which bring financial, material, and human resources but also new challenges to organizing, communicating and succeeding. The responders may be a blend of local and far-away individuals, who often lack local knowledge and sensitivities that can present difficulties beyond those presented by the disaster itself. These responders may be from a wide array of agencies and various fields of expertise, not commonly thought of as emergency responders but critical to the success of the response and recovery effort. The ability to prepare for, respond to and recover from and mitigate against the effects of disaster on the social, natural and built environments is needed by all public organizations. Residents, organizations and businesses play a vital role in making the community more disaster resilient. The preparedness activities of planning, training and exercising involve more than the emergency responders, they require a 'whole community' approach to preparedness.

PIA 2103 - MANAGING PEOPLE IN THE PUBLIC AND NON-PROFIT SECTOR

Minimum Credits: 3

Maximum Credits: 3

This course, designed for students in all GSPIA Master's programs, provides a broad overview and hands-on practice in the skills needed for successful supervision and management of people in public and non-profit organizations. Skills covered include effective hiring, training, motivation, and direct supervision of staff; evaluation and reward systems; effective communication in a multicultural or international environment; labor management relations and participative approaches to management. It places the challenges of managing people within the broader context of political or board control, budgeting, planning, and information management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2104 - FINANCIAL MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Financial management plays a central, if not strategic and controlling role in public administration. It is the one element that can, and does, most easily shape and condition administrative behavior patterns. It involves the allocation and management of scarce resources. This course introduces the students to the basic financial management concepts and practices in the public and non-profit sectors. The purpose of the course is to familiarize potential administrators with the elements of financial management and how these various elements are (or can be) used to help accomplish organizational goals and objectives. The ability to read and understand basic financial statements used in the public and nonprofit sectors will be emphasized. One does not need to be an accountant to take this course. The course will focus on understanding the financial world of governments, how they are financed; the major expenditure elements; how to read and understand the major financial documents and financial statements. Several classes will focus on the non-profit sector. A significant amount of time will be spent reviewing the major taxes used to finance governments as well as understanding the significant tax policy issues surrounding the use of these taxes. Major items impacting upon the financial conditions of governments including the funding of public pension systems; capital budgeting; and debt management will also be reviewed.

PIA 2108 - MATCHING MONEY WITH MISSION

Minimum Credits: 3

Maximum Credits: 3

This course traces the historic origins and contemporary expressions of philanthropy to offer an overview of the multiple dimensions of this growing and increasingly global source of capital and innovation in the nonprofit sector. Students become familiar with who gives, why, and how they structure their philanthropy. The course assesses different strategies and how new approaches like ephilanthropy and giving circles open and diversify the field. Global, faith-based, and venture philanthropy are among the topics covered. Market-based approaches like social enterprise and corporate social responsibility, along with accountability, impact

measures, transparency, and their public policy implications are explored. The course draws on case studies and guest speakers. Students participate in GSPIA's student philanthropy project, gaining hands-on grant-making experience throughout the semester by awarding funds to area nonprofits. This exercise links philanthropic theory to practice. At the end of this course students are able to articulate a robust definition of philanthropy's goals and the structures that advance them; demonstrate a range of hands-on grant-making skills; connect applied learning in grant-making to policy and practice issues examined in the course; model effective team work and decision-making practices that enhance grant-making; incorporate knowledge gained from practitioners and course work into personal philanthropic practices; recognize how contemporary issues in philanthropy intersect with the nonprofit, public and civic sectors; develop a research topic that contributes to peer learning; better assess community needs through an enhanced understanding of the Pittsburgh nonprofit sector.

PIA 2117 - PROGRAM EVALUATION

Minimum Credits: 3

Maximum Credits: 3

This course provides knowledge and skills in program evaluation. The course is organized in three parts: part 1: theory of program evaluation; part 2: designs for program evaluation; and part 3: methods for collecting and analyzing data. Program evaluation is a form of applied social research which draws on multiple social science disciplines to answer practical questions about the effectiveness, efficiency, fairness, and impact of programs in the public, nonprofit, and private sectors. Program evaluations are carried out at local, national, and international levels in areas of housing, education, counseling, nutrition, job training, health care, immigration, peacemaking, and counter terrorism. Program evaluation is an essential aspect of public administration, international affairs, and international development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2119 - POLICY DESIGN/IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

Uses concepts, models and strategies for developing new and more appropriate solutions for public policy problems. Analyzes constraints and opportunities surrounding the implementation of public policies and programs. Emphasis on strategies of planned change, dissemination of innovations, and knowledge utilization in the public sector.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2121 - HOUSING POLICY: REVITALIZING METROPOLITAN REGIONS

Minimum Credits: 3

Maximum Credits: 3

This course will frame housing policy in the context of changing demographics in metropolitan housing markets. We will give particular attention to the role of housing policy in revitalizing metropolitan regions. This course will also examine key policies towards fair housing, affordable housing, and economic development. This course will address housing policy and housing markets from two perspectives: person-centered (housing mobility, household migration, and tenure choice) and unit centered (housing markets and zoning). We will address issues of tenure type (renter-occupied and owner-occupied housing), housing subsidies, and market type (Urban vs. Rural, City vs. Suburban, U.S. vs. Non-U.S.) Used in housing policy formulation and housing market evaluation. The course will conclude with linkages to other policy areas related to the cost, quality, and spatial distribution of housing: transportation, crime, education, employment, and environmental concerns.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2122 - MANAGING AND FINANCING URBAN SERVICES

Minimum Credits: 3

Maximum Credits: 3

This course examines issues related to the public economy of local government taxation and spending. The problems facing central cities and metropolitan areas are highlighted using the Pittsburgh and Allegheny County region as context. The course is designed to maximize the student's participation while making the learning environment as "real world" as possible. To accomplish those goals students select either a city to develop a financial plan, a particular coping strategy to deal with fiscal stress, or an analysis of a nationally recognized best practice for the budget process. Students learn how to finance public services, infrastructure, and economic development (a model is discussed early in the course).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2124 - COMPARATIVE METROPOLITAN GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

This course is about the governing of metropolitan regions in the United States. The concepts of metropolitan region is relatively new. Faced with rapid growth of suburbs, the creation of satellite cities, new modes of transportation, an academic roundtable of regional planning proposed that a "new political or administrative entity" at the metropolitan level needed to be created that was different from the precinct, ward, municipality, county, or state. The year was 1926. Seventy-one years later, Anthony Downs lamented, "as congress shifts many federal powers to lower levels of government it is missing a unique opportunity to resolve a fundamental flaw in America's government structure; the absence of any authority at the metropolitan regional level. Metropolitan regions have become the most important functional units of economic and social life in almost all modern societies" (Downs, 1997). The road to the metropolitan region takes us through the land of local government. Local governments are the building blocks of the metropolitan regions. The American system of governing and government is best understood as a territorial based distribution of power and responsibility. It is steeped in both law and popular culture. Over 40 years ago, Arthur Maas (1959) defined the structure of local government in the United States as an "areal" division of power wherein the territorial bounded local governments were by culture and practice, an integral part of the system of organizing the divided power between the federal, state, and local governments. With this background, we will compare and contrast governance strategies that have been or are being considered in regions throughout North America. These strategies will be analyzed through lectures, discussions, innovation presentations, brief policy memos and the use of formal debates between teams of students organized early in the semester.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2125 - CITY AND REGION THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

This course is about the current challenges faced in cities and regions, nearby and around the world - and how those challenges might be met. The majority of the world's citizens live in cities, and therefore one cannot talk about human progress without thinking about progress in cities. As "mega-regions" consolidate, small cities grow rapidly, and older industrial cities shrink, the managerial, policy, and planning capacities of governments come under increasing stress. How can cities meet these challenges? To facilitate understanding of these dynamics and issues, this course is divided into two parts. The first part provides a general background necessary for the second part. We define the general concepts of "city" and "region," and we talk about measurement issues involved in understanding what is happening to them. We also learn about the policy and planning process involved in addressing any issue in a

city or region. The second part focuses on the challenges cities and regions face, and how to solve them. Solving them implies having a theory about what causes them, so this part will begin with a discussion of what urban scholars define as an ideal city and region. It will then move on to cover specific urban policies such as transit oriented development, the use of eminent domain for urban projects, community development, etc. Emphasis will be placed on understanding the practical issues of implementing urban and regional policies, and learning about actual experiences with such policies in particular places.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2126 - STATE AND METROPOLITAN POLITICS AND POLICY

Minimum Credits: 3

Maximum Credits: 3

The course will review the decision process in state government. It will provide an overview and an insider analysis of the diverse strategies used by political officials, lobbyists, community activists, media and local governments to produce policy outcomes to their liking. The course is a seminar that will review and analyze theory; provide practical knowledge through case studies and presentations by elected officials, lobbyists, media, and citizen groups.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2129 - LAW AND CIVIL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course is designed to acquaint students with the maintenance or creation of civil society in conditions of political instability prompted by such things as security threats, disasters, or political upheaval. In particular, the course will explore the rule of law and the protection of rights and liberties as a bulwark of civil society and consider the requirements for their continued preservation. Upon completing this course students should be able to critically assess the concept of civil society and its requisite components from a historical, philosophical, and legal perspective and understand the role of rights, liberties, political processes, organizations, institutions, and norms to preserve civil society even in periods of conflict. The course is divided into (1) historical and theoretical foundations of civil society; (2) management of political, economic, and natural disasters and rights and liberties; (3) analysis of public policy solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2133 - ADVANCED SEMINAR: IN SYSTEMS THINKING AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Based on general theories of systems with a strong emphasis on cybernetics. It aims at laying the foundations for "social systems' cybernetics" -- a contemporary, not-yet conventional mode of thinking about socio-cultural systems for purposes of analysis and synthesis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2140 - FINANCIAL PRACTICES FOR ECONOMICS AND ENVIRONMENTAL SUSTAINABILITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the financial practices and processes required to promote economic and environmental sustainability (both public and private comparisons). Emphasis is put on how the economic component husbands the wise use of resources to effectively achieve specific organizational successes, promoting societal or external long-term prosperity, enhancing the opportunity for living things in the environment. On the environmental and social sides stress is put on respecting things and people both in particular organizational and external community. Next focus is put on financial indicators (both early warning and long term) that have been developed and applied to predict potential financial problems before they arise. Attention is focused on financial indicators (the financial monitoring trend system-ftms) that have been developed to promote stable and sustainable financial management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2144 - PUBLIC SECTOR ACCOUNTING

Minimum Credits: 3

Maximum Credits: 3

This course assumes minimal accounting background. Participants may use the course as an option to familiarize themselves with the fundamental operations of the uses and potential of private and public sector accounting in public and not-for-profit management. Alternatively, the course serves as an introduction to other financial management courses in GSPIA. Though it includes basic theory and mechanics of accounting, great effort will be devoted to applications and practices in everyday public administration. A major operating premise is that public administrators can better understand accounting only as they fully grasp how public and not-for-profit organizations operate. This requires grounding in accounting used to measure performance and decision making, as well as an understanding of reporting rules and standards. Additionally, emphasis is placed on the relationship between accrual modified and cash flow measures in order to interpret accounting information. Sufficient coverage is provided to give students a clear understanding of the utility of information contained in financial statements. The course presents financial accounting as an important system for investor, creditor, and public management decision making. Assignments emphasize applications of conceptual issues in financial accounting that public administrators will encounter. Materials are designed to develop student's analytical and critical thinking skills.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2145 - BENEFIT COST ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course is intended to give the students a grounding in the concepts and tools of benefit-cost effectiveness analysis. In determining whether or not to undertake a program or project, which of several possible projects should be undertaken, or how to evaluate an ongoing or completed project, benefit-cost analysis is a widely used method. The advantages or and limitations of benefit-cost analysis will be covered in order to give a perspective on public vs. private considerations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2156 - INFORMATION, LAW & SECURITY

Minimum Credits: 3

Maximum Credits: 3

Information technology and the information that it generates has increasingly become part of our daily lives shaping our practices, discourses, and institutions in fundamental ways. Personal information is used by consumers, professionals, and organizations to a variety of ends and in a number of different settings. The growing reliance on personal information not only challenges long standing demarcations between public and private institution in terms of responsibilities, obligations, and limits, but also calls for a reconsideration of how to ensure the protection of long standing civil liberties and civil rights. This course will consider the impact of emerging technologies within existing constitutional, statutory, and international guidelines and will then explore a range of policy solutions for managing the use of personal information in our public and private sectors.

Course Component: Directed Studies
Grade Component: Grad Letter Grade

PIA 2164 - NATURAL RESOURCES GOVERNANCE AND MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course considers how institutions influence resource and environmental outcomes. In particular, this course will focus on how the design of property rights influences prospects for effective management of resources such as energy, water, and biodiversity. Although the problem of resource management is complex, we will study how the structure of property rights, the rules governing ownership in society, provides a framework to understand when societies succeed and fail in their effort to manage resources effectively. In a general sense, the course will show why property rights, and the political institutions within which property rights are specified and enforced, are the key to understanding the extent to which societies are able to manage natural resources effectively.

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2170 - MANAGEMENT NON-PROFIT ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

Nonprofit organizations and nongovernmental organizations are a part of what is generally referred to as civil society. While this course is primarily an introduction to leadership, management and policymaking in nonprofit organizations, it will, however, briefly, cover nongovernmental organizations. In the main, the readings, assignments, and course materials are designed to enhance your understanding of the nonprofit sector in the U.S. and to build conceptual and practical skills needed to perform effectively in positions of significant management responsibility in nonprofit organizations/nongovernmental organizations. Students who have substantial experience in the nonprofit/nongovernmental sector will relate the course materials to their own experiences and perspectives. But students who have no prior managerial experience (or limited experience) will also find the course to be valuable and instructive.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2185 - STRATEGIC MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course deals primarily with the concept of organizational strategy ' how organizations position themselves to succeed in an ever changing environment. Secondly, it deals with managerial strategy ' how leaders and managers in organizations make important decisions under conditions of uncertainty. Strategic management consists of a set of tools to help organizations thrive in dynamic and (sometimes) competitive environments. The essence of strategic management is the ability to leverage the organization's strengths and 'comparative advantages' to respond to emerging opportunities and challenges in its external environment. In government and nonprofit organizations, the practice of strategic management is complicated by the need to work effectively within the political system and to collaborate with other agencies for the delivery of goods and services. Purely competitive strategies must be tempered by a broader view of what is in the best interests of society at-large, not just the organization's self-interests. This course will help you to understand and apply the concepts and methods of strategic management in public and nonprofit organizations. Strategic planning is one of the many tools of strategic management. Strategic planning is a step-by-step process, usually undertaken every 3-5 years, to help an organization develop its strategy for the future. The strategic plan might, for example, highlight opportunities for the organization to grow by offering its services in new locations, add new services to its portfolio, alter its mission statement, or even merge with another organization. Alternatively, a strategic plan might identify ways for the organization to reduce its size, cut programs and staff, or even go out of business in an orderly way.

Academic Career: Graduate

PIA 2187 - AMERICAN PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This course will concentrate primarily on policy processes within and between American political institutions. Literature will be reviewed and assessed for its contribution to our understanding of conceptual approaches, institutional roles, public opinion/policy linkages, cross-institutional and inter-level policy processes, new techniques in policy analysis, budgetary politics, and the ethical bases of policy choice.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2188 - ECONOMIC DEVELOPMENT STRATEGIES AND PRACTICES

Minimum Credits: 3

Maximum Credits: 3

This course focuses on sub-national, local economic development. This course will encompass theory, policy, process and practice in state and local economic development. Our focus will be largely in the North American urban context over the post-World War II period, with international comparisons. We will also use examples from Pittsburgh in furthering our understanding of local economic development practice. We will find that in the U.S. Context, there are different interpretations and meanings to economic development, both in theory and practice. These certainly differ at the international scale, as well. Specific topics include: equity issues in economic development, economic cluster analysis, tax increment financing, brownfields revitalization, retail, and regional governance. The purpose of the course is to provide the student with knowledge of the approaches to economic development in theory and practice, techniques and methods of analysis, and debates ongoing in the field. Students will select one economic development policy or case to analyze in depth over the course of the term.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2189 - SEMINAR POLITICAL INSTITUTIONS

Minimum Credits: 3

Maximum Credits: 3

The basic question of this seminar is "what difference do institutions make"? The first part of the seminar attempts to focus on that question, while defining it more precisely, through comparative, formal, and evolutionary analyses of institutions. The second part of the seminar examines proposals for reform of institutions, particularly in the American context. Seminar participants will be asked to analyze particular proposals for institutional reform and evaluate them.

Academic Career: Graduate

PIA 2204 - GRANT WRITING AND FUNDRAISING

Minimum Credits: 3

Maximum Credits: 3

Grant writing and fundraising are critical skills for people working in the nonprofit sector. 'Grants' are funds donated by an organization such as a foundation or government agency, while other fundraising strategies are used to obtain donations from individuals. This course aims to provide an introduction to grant writing and fundraising for Nonprofit Organizations (NPOS) and Nongovernmental Organizations (NGOS), the term more commonly used for International Nonprofits. No matter what role or position you may have ' as a program coordinator, executive director, corporate/community liaison, or a development professional ' all Nonprofit and Public Sector professionals need to be familiar with how Nonprofit Organizations obtain funding from a variety of donors. Moreover, the writing, planning, analysis, and collaboration skills required to prepare fundraising plans and grant proposals are applicable and useful in every profession.

PIA 2215 - SYSTEMS THEORY

Minimum Credits: 3

Maximum Credits: 3

Increasingly, the social, economic, and political context in which public organizations function is characterized by interdependent, evolving systems of individuals, organizations, and systems of systems. Understanding this complex world of interacting organizations and systems presents a challenging, fascinating, difficult, but always interesting task. In this seminar, we will follow the evolution of this process over the last six decades and assess how these theoretical frameworks have changed our conception of public policy and the operational context for public organizations. Since systems theory is strongly interdisciplinary, we will also explore basic concepts as they were borrowed from physics, mathematics, biology, engineering, and computer science to inform current organizational frameworks of complex adaptive systems and their application to policy and practice in current public and international affairs. Students will write five short papers assessing the evolving state of complex systems and the impact of theoretical framework in analyzing public policy issues today.

Minimum Credits: 3

Maximum Credits: 3

This course in advanced methods of policy analysis focuses on four types of methods: -structured analytic techniques used in the intelligence community to make intelligence estimates and to identify national security threats; -problem structuring techniques used to solve ill structured or 'wicked' problems in areas of technology assessment, development planning, intelligence analysis, and economics; -forecasting techniques based on expert judgment which are appropriate when quantitative data are unavailable to make estimates of future states of energy, environment, technology, and related areas; -argument mapping techniques used to assess the quality of scientific and policy reasoning and to enhance critical thinking capabilities among professional policy analysts and planners. The seminar will feature short (30-45 minute) presentations by members of the Security and Intelligence Studies (SIS) program and professional analysts, researchers, and trainers in the Intelligence Community (IC) and elsewhere. Students should note that the methods covered in this course are part of a current analytic reform movement among intelligence analysts and elsewhere in the wider public, private, and nonprofit sectors. The course is open to qualified masters and doctoral students.

PIA 2231 - CONTEMPORARY US ENERGY POLICY

Minimum Credits: 3

Maximum Credits: 3

This class examines the energy policy choices facing U.S. policymakers. The choices involve myriad issues, including: allowing fuel exports, regulating greenhouse gas emissions, subsidizing renewable fuels and energy efficiency investments, allowing drilling on public lands, and allocating funds for research across energy sources and technologies. Broader issues include: understanding and evaluating the justifications used to support energy policies; making policy when costs and benefits are uncertain, occur in long term, and are hard to quantify; what's the 'right' price of energy; market and government failures ' what are they and how do we address them?

PIA 2290 - TOPICS IN PUBLIC ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 3

This course traces the historic origins and contemporary expressions of philanthropy to offer an overview of the multiple dimensions of this growing and increasingly global source of capital and innovation in the nonprofit sector. Students become familiar with who gives, why, and how they structure their philanthropy. The course assesses different strategies and how new approaches like ephilanthropy and giving circles open and diversify the field. Global, faith-based, and venture philanthropy are among the topics covered. Market-based approaches like social enterprise and corporate social responsibility, along with accountability, impact measures, transparency, and their public policy implications are explored. The course draws on case studies and guest speakers. Students participate in GSPIA's student philanthropy project, gaining hands-on grantmaking experience throughout the semester by awarding funds to area nonprofits. This exercise links philanthropic theory to practice. At the end of this course students are able to articulate a robust definition of philanthropy's goals and the structures that advance them; demonstrate a range of hands-on grantmaking skills; connect applied learning in grantmaking to policy and practice issues examined in the course; model effective team work and decision-making practices that enhance grantmaking; incorporate knowledge gained from practitioners and course work into personal philanthropic practices; recognize how contemporary issues in philanthropy intersect with the nonprofit, public and civic sectors; develop a research topic that contributes to peer learning; better assess community needs through an enhanced understanding of the Pittsburgh nonprofit sector.

PIA 2301 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on institutions, policies and political relationships that have shaped international economic affairs. The course will explore relations between economic processes and political processes in the context of international politics, with particular reference

to the dilemmas that such relations present to policy-makers. The questions to be asked include: 1. What analytic challenges arise in trying to understand the interaction between the exercise of power and the pursuit of wealth? How do different 'schools' of International Political Economy (IPE) depict this relationship? 2. What are the most influential such schools, what are the assumptions, key concepts and values of each and what are the implications of each for public policy? 3. Historically, what are the main economic and political forces that have shaped the international economy? 4. What domestic and external strategies have states adopted in order to develop their own economies and to benefit from exchanges with other countries (while minimizing their vulnerability)? 5. For what purposes have states sought to cooperate with each other in the management of the international economy? How successful have their efforts been? What kinds of institutions have they created so as to protect their national interests while cooperating with others? What have been the strengths and weaknesses of particular international organizations, and what might be done to strengthen them? 6. To what extent has the ability of states to direct their own economies been weakened by the advent of 'globalization'? 7. What are the major challenges currently facing policy-makers in the management of the international economy?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2302 - INTERNATIONAL FINANCIAL POLICY

Minimum Credits: 3

Maximum Credits: 3

The course focuses on the international financial system and its significance for policy-making. Topics include: the balance of payments, foreign exchange markets, fixed and flexible exchange rates, purchasing power parity, the eurocurrency markets and alternative monetary regimes. The course is designed to give students a command of the basic theoretical tools used in analyzing international financial issues and the ability to apply this theory to the real world. A team project on a current or historical international financial issue is a course requirement.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2303 - SECURITY AND INTELLIGENCE STUDIES

Minimum Credits: 3

Maximum Credits: 3

Many argue that the 21st century security environment is fundamentally different from and more dangerous than that which existed in previous eras. There is some evidence to suggest that this claim might be true; the security challenges absorbing the majority of states' time, money, and military efforts since the end of the cold war ' and especially since 9/11 ' are notably different from those of the past and, at times, they seem more pervasive. However, it does not necessarily follow that such proximate differences are symptomatic of a deeper shift in the nature of the inherently dangerous international arena. This course explores the nature of the international security environment ' past and present ' and considers whether and to what degree the logics for coping with security challenges have changed over time. In doing so, students will be introduced to the arguments and debates in the academic literature on security and intelligence issues and learn to apply them to contemporary challenges. We will spend the first third of the semester examining traditional security studies concepts and issues like war, coercion, effectiveness in nuclear and conventional warfighting, and the effects of regime type on security policies and achievements. The second third will then be dedicated to considering the utility of traditional concepts in understanding the nature of and strategically-preferable responses to security challenges pervasive in the current international arena like asymmetric warfare, nuclear proliferation and missile defense, terrorism, and space and cyber warfare. The last third of the course examines the nuts and bolts of the United States national security apparatus to better understand how theory is (or should be) transformed into policy. We conclude by considering the costs and benefits of different American grand strategies moving forward.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2305 - FOREIGN POLICY AND DIPLOMACY

Minimum Credits: 3

Maximum Credits: 3

This course examines how the United States government makes foreign policy and conducts its diplomatic relations with foreign governments and international organizations. It is designed for students who want to pursue a career in foreign affairs. It's main focus will be the state department and embassies, but it will also look at the role of the president and the national security council, the pentagon and other government agencies, congress, the media and think tanks. Key concerns will be the interagency process and the interaction of Washington with overseas missions. The course will acquaint students with how the state department and embassies are organized and function. It will discuss how recent secretaries of state have used the department's machinery, and it will introduce students to key diplomatic activities: working with allies, dealing with Russia, negotiating treaties, conducting shuttle diplomacy. Students will be introduced to the relevant functions of foreign service officers. There is a strong emphasis on drafting: press

guidance, briefing memos, reporting cables, etc. Students will also assume the role of 'desk officer' and manage an issue of their choice throughout the course. Normally there will be a field trip to Washington to meet people working at state, on the hill, at think tanks and in foreign embassies. At the conclusion of the course, students will participate in a crisis management exercise that they design and execute. The goal is to develop the professional drafting, reporting, briefing and policymaking skills required to function effectively in Washington's foreign affairs community.

Academic Career: Graduate

PIA 2306 - COMPETING PERSPECTIVES ON GLOBAL ENERGY: FROM WESTERN PA TO EASTERN EUROPE

Minimum Credits: 3

Maximum Credits: 3

This course provides professional school students in the fields of business, law, engineering, public policy and other areas with a first-hand experience of the global impact of contemporary developments in the natural gas and other energy sectors. Participants will first witness the effect that Marcellus shale has had in Western PA and then see how these developments are impacting the US's foreign policy and trade practices. After this, students will be familiarized with a very different side of the global natural gas and energy equation by travelling to Moscow, where they will see the kremlin's view of global and regional gas and energy markets. The course ends with an exploration of the role that transit states like Bulgaria play in global energy markets and efforts by these players to use their territory and energy alternatives to bargain with larger states at both ends of energy pipelines. Throughout this exploration, students will be exposed to a variety of stakeholders and gain an understanding of energy's impact on domestic and international politics, economics, societies and the environment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2307 - HUMAN SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course introduces the core concepts of human security, examines the institutions that promote them, and probes the advantages and limitations of human security as a means of addressing difficult policy issues. Human security treats individuals and communities, rather than states and institutions, as the fundamental units of analysis. It calls for an integration of individuals' security and integrity with state security and sovereignty. Analyzing security at the level of individuals instead of states raises important challenges and opportunities for observers and practitioners of development, conflict and peace, human security, and investigate substantive policy agendas affecting human security on a range of global issues. We grapple with both direct and structural violence especially among vulnerable populations, and with debates about prioritizing or narrowing human security threats and referents. And we explore how a diverse set of actors develop global public policy responses by articulating new policy agendas and defining policy recommendations. Throughout the term we assess the advantages and drawbacks of the human security.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2308 - COVERT ACTION IN WORLD POLITICS

Minimum Credits: 3

Maximum Credits: 3

What is covert action? How does it differ from other hidden tools of statecraft? What are the common drivers of covert action across time and space? What are some of the major successes and failures of covert action over the past 70 years and what can these episodes teach us about secret operations in the 21st century? How has the proliferation of new technologies impacted the ways in which states think about and use covert action today? At present, there exists a mismatch between the relatively high frequency with which states turn to covert action to achieve foreign policy objectives and popular understanding of the subject, which is oftentimes limited and sometimes sensationalist. In this course, we will take a deep dive into the secret world of covert action, exploring the many faces of, and dispelling the many myths surrounding, this unique tool of statecraft. In order to accomplish these goals, we will examine the theoretical, historical, and contemporary research on covert action.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2310 - STATES BETWEEN MARKETS

Minimum Credits: 3

Maximum Credits: 3

Over 180 sovereign states now participate in the international economic system. The risks and opportunities that each state faces in the international economy have been shaped by the givens of geopolitics and by the decisions and conflicts that make up its economic history. Each country faces some dilemmas that are recurrent and intractable, and others that are unfamiliar and fluid. We will examine how governments have historically coped with these dilemmas, usually by trying to reconcile the expectations of foreign governments with those of domestic interests. Such reconciliation has created distinctive strategies (such as mercantilism and import-substitution industrialization) that combine policies for domestic economic development with (hopefully compatible) policies for economic exchange with other countries. We will also focus on international economic issues currently facing the governments and citizens of selected advanced industrial and developing societies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2311 - ADVANCED INTELLIGENCE ANALYTICAL TECHNIQUES

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students who have already gained skill in writing intelligence analytical pieces from Introduction to American Intelligence, Terrorism as an Intelligence Problem, or Intelligence Perspectives on the Cold War Era. We will review some of the basic literature on intelligence analysis, study some of the more-advanced analytical writing techniques, and then will put them into practice in writing and orally briefing analyses on topics of current intelligence interest. During the course, each student will develop and research a topic -- chosen in consultation with the instructor -- of interest to the student and drawing on the student's own knowledge and expertise. The instructor and other students in the course will act as policymakers to critique the analyses for their insights and value to the policymaking process. Each student will produce a medium-length analytical product suitable for use as a professional writing sample of value in their career search.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2317 - LAWS OF WAR

Minimum Credits: 3

Maximum Credits: 3

This course examines the historical development and current role of international humanitarian law - conventionally known as the laws of war. War, despite its often chaotic appearance, is a highly regulated affair. Understanding the rules can facilitate the creation of better, and more effective strategy, operations, and tactics. Starting with early thinkers seeking to develop common understandings about access to shipping lanes and ending with contemporary debates about topics like torture and the regulation of artificial intelligence on the battlefield, students will grapple with the political, legal, and moral questions of developing, applying, and enforcing rules in wartime.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2319 - INTERNATIONAL TRADE

Minimum Credits: 3

Maximum Credits: 3

This course will consider the economic analysis of international trade and as well as what that analysis has to say about international economic conditions and trade policy. We will discuss a few basic models, their assumptions, and how those assumptions relate to current trade issues. The goal of the course will be to enable students to evaluate the pros and cons of specific trade policy by assessing the impact on economic conditions. As a result, the course requirements will include student analysis of current trade issues using real world data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2323 - INTELLIGENCE PERSPECTIVES ON THE COLD WAR ERA

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the Cold War era, 1947 - 1991, from the perspective of the major intelligence services of the two main

protagonists, the Soviet Union's KGB and the United States Central Intelligence Agency. Rather than a detailed history of the era, we will focus on piecing together the understandings -- and more importantly the fundamental misunderstandings -- of the two opposing superpowers' intelligence services, in an effort to explain the erratic and dangerous geopolitics of the cold war. By looking closely at the cold war from the KGB perspective, we should get some insights into the decision-making process, as well as the evolution of the thinking and deep fears of the soviet leadership. These insights may well yield a clearer understanding of the beliefs and behavior of current senior Russian leaders, who for the most part came of age and matured during the cold war. After gaining some historical context to the cold war era from the first two assigned texts, we will discuss in detail the Mitrokhin archives' historical record of the KGB's intelligence operations against the West and its profound influence over the thinking and decisions of the soviet leadership throughout the cold war and to the present day. As part of the students' professional development, the instructor also will teach the students to write brief intelligence analytical-style memoranda, a skill that will be useful in any professional career.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2324 - PEACEMAKING AND PEACEKEEPING

Minimum Credits: 3

Maximum Credits: 3

This course offers case studies of multilateral peacekeeping and peacemaking efforts in relation to regional and ethnic conflicts, such as those in Bosnia, Kosovo, Rwanda and Somalia. It looks at the underlying rationale for intervention in such conflicts and the problems and dilemmas that arise.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2327 - TERRORISM AND COUNTER TERRORISM

Minimum Credits: 3

Maximum Credits: 3

This course will deepen our understanding of the post-9/11 security environment by examining contemporary terrorist groups and the history from which they spring. We will address a number of questions, including, what is terrorism and how has the terrorist threat changed over time? What are the data that we use to understand terrorist behavior and the patterns of terrorism? What motivates terrorists to engage in political violence against non-combatants? At what point does violent militancy cross over into terrorism? Does terrorism ever succeed, and, if so, under what circumstances? How does terrorism end? While much of our focus will be on so-called 'Islamist terrorism,' we will also explore other types of terrorism, including secular and sacred groups active in the United States, Western Europe, and elsewhere. Time permitting, we will also consider a number of other topics, including 'cyber-terrorism,' deradicalization, and state terrorism. As befitting the complex nature of terrorism, we will draw on numerous academic disciplines in studying these topics, including political science, sociology, psychology, history, anthropology, and economics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2328 - ETHICS AND NATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This graduate seminar focuses on the ethical quandaries confronting principals who make decisions on national security policy. Students practice articulating foreign policy arguments, paying attention to the political, ethical, and social scientific aspects of those arguments. Issues covered include just war, humanitarian intervention, counterintelligence, counterterrorism, immigration, economic sanctions, foreign aid, and distributive justice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2329 - INTELLIGENCE & FOREIGN POLICY

Minimum Credits: 3

Maximum Credits: 3

As societies have become more reliant on information technologies, so they have become more vulnerable to disruption through attacks on information systems. This course examines the national information infra-structure, highlights its vulnerabilities to both criminal exploitation and attacks by terrorists or hostile nations, and look at what can be done to enhance security in this area.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2335 - APPROACHES TO CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

The resolution of disputes at national and international levels requires creative approaches to conflict resolution. Resolving disputes through successful negotiation has become a valued skill and could even be considered a "fine art" Of course, some disputes cannot be completely resolved, especially those which have evolved into violent conflict. In these cases, successful negotiation can lead to a more peaceful and productive situation which could eventually evolve into a permanent settlement. This course first examines the nature of conflicts: how they begin and can sometimes lead to violence or even war. We then analyze the role of negotiation and its potential for mediation to defuse disputes. This course covers both the theory and the practical application of conflict resolution using case studies and role playing. The course objective is to provide students with both the theory of conflict resolution as well as the skills involved in successful negotiation. In relation to the negotiation process, the course focuses on the following questions: when is negotiation feasible and desirable as an approach to conflict resolution? What format (bilateral/multilateral) and procedure is appropriate for a given negotiation? What are the main issues in setting up a negotiation? How can negotiation "formulas" be devised and evaluated?

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2336 - STRATEGIC INTELLIGENCE IN INTERNATIONAL SECURITY STUDIES

Minimum Credits: 3

Maximum Credits: 3

This course seeks to make students familiar with the challenges the United States confronts in adapting its intelligence community in ways appropriate to the security challenges of the twenty first century. Phenomena such as terrorism, transnational organized crime, humanitarian disasters, environmental degradation, emerging and re-emerging diseases and cyber-threats have replaced soviet military power and political expansionism as key items on the national security agenda. This poses new and demanding requirements for United States intelligence collection and analysis. Consequently, the course not only elucidates the nature of these challenges, but also gives particular emphasis to the kinds of skills and ways of thinking that are relevant to meeting them. In addition, it is designed to provide opportunities for students to use the skills they obtain in a practical manner that is relevant to contemporary national security challenges and problems. Consequently, several sessions will introduce the class to analytic methods and software tools that are used in intelligence analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2338 - SOCIAL DEVELOPMENT IN INTERNATIONAL ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course aims to provide a comprehensive understanding of social development policies and practices undertaken by leading international development agencies, such as the world bank, the united nations, and the department for international development. It builds on the growing recognition among development practitioners that economic development alone cannot ensure sustainable development nor eradicate poverty. In so doing, it introduces multidisciplinary research perspectives and analytical tools for studying social dimensions of contemporary development problems. Upon completing this course students will be able to read and critically evaluate the utility of social development strategies put forth for various development agencies, understand the use and sequence of social analysis tools in development project cycles, and gain experience in writing policy memos and papers that effectively utilize social analysis and assessments. Part i (theories of social policy and development) introduces the theoretical foundations of conventional social policy and recent challenges to these foundations from the 'development context.' It compares the goals and institutions of 'social policy' with those of 'social development.' Part ii (applied policy case studies) examines a number of policy and program cases on education, health, rural and urban development, and gender, as it compares and contrasts best social development practices in the field. Analytically, the focus remains on institutions, decision-making processes, and the relationship between economic policy and social policy as we inquire how development policies promoted by major international organizations can be made socially more effective and economically productive.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2340 - SPACE AND NATIONAL SECURITY

Minimum Credits: 3

Maximum Credits: 3

This course examines how space-based services provide critical support to military and intelligence operations and contribute to national security more broadly. The course is designed to investigate several interrelated themes, weaving together relevant aspects of technology, strategy, and policy. The material is approached from both functional and historical perspectives, exploring the basics of military and intelligence space operations and ending with an examination of the space-related technical, strategic, and political challenges facing the nation today and in the foreseeable future. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. Upon completion of this course students should be able to understand and evaluate policy proposals for national security space and intelligence systems, strategies, and operations. Students should be able to perform competent policy analyses, develop well-reasoned positions, and communicate those positions in concise, persuasive professional papers. The course is taught in three phases. Phase 1 focuses on the fundamentals of satellite operations. Here students explore, at a non-engineering level, the basic principles of orbit and learn what kind of military and intelligence missions are flown in space, at what orbit each mission is flown, and why. Phase 2 surveys key developments in space operations and national policy in the cold war. Students examine how military satellite programs developed during that period and what missions they came to support. Phase 3 examines America's dependence on space today, surveys emerging threats to the nation's space infrastructure, and considers the implications of these developments for U.S. National security policy. Students weigh the pros and cons of such controversial programs and concepts as ballistic missile defense, anti-satellite weapons, space control, and orbital weapons designed to attack targets on earth.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2346 - INTRODUCTION TO AMERICAN INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course will focus on how the U.S. intelligence community collects and analyzes information to support U.S. national security and foreign policy objectives. Students will examine the historical foundations of the intelligence community and consider how the role of intelligence has changed over time, particularly after the attacks of September 11, 2001. Students will also consider the legal, moral, and ethical factors that influence the roles and conduct of the U.S. intelligence community. Finally, this course will take a closer look at selected current intelligence topics, such as Russia, China, terrorism, weapons of mass destruction, and cyber security.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2347 - GLOBAL HOT SPOTS

Minimum Credits: 3

Maximum Credits: 3

This course integrates gender as a category of analysis with conventional and critical approaches to the study of international security. It draws on feminist theories to consider: 1) ways in which gender hierarchies underpin the traditional war system and inform the mainstream security discourses; 2) what gender can add to conventional understandings of security; and 3) how gender lens enables us to think more broadly about the meaning of security in the new century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2349 - ISSUES IN AMERICAN INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on issues of U.S. Intelligence clandestine operations, intelligence analysis, and how U.S. Policymakers use them, as well as selected current intelligence topics, such as terrorism, weapons of mass destruction, North Korea, and China. We consider these issues against a backdrop of traditional American views on the ethics, morality, and the proper roles of U.S. Intelligence. As part of the students' professional development, the instructor also teaches the students to write brief analytical-style memoranda, which is useful in any professional career. By the end of the course, the students are conversant with the structure and functions of the U.S. Intelligence community and selected foreign intelligence services. Students are also proficient at writing short intelligence-style analytical memos, and at presenting short oral briefings on analytical topics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2350 - THE POLITICS OF INTERNATIONAL TRADE

Minimum Credits: 3

Maximum Credits: 3

This new course, designed as an elective for students majoring in International Political Economy, will examine in seminar format some of the current and most persistent controversies in the field of global trade, at both domestic and international levels. At the domestic level, we shall consider such questions as: What are the arguments for and against government intervention in the form of industrial policy (including subsidies to particular industries and regional aid)? In what circumstances is protectionism justifiable or likely to be self-defeating? Should states include non-trade subjects such as environmental conservation and different forms of human rights in their agendas for international trade negotiation? At the international level, we will examine such questions as: In what circumstances have schemes for regional economic integration been most effective? Do they necessarily conflict with the goals of global bodies such as the WTO? In what circumstances and for what purposes have collective economic sanctions worked in changing the behavior of targeted governments? What does "fair trade" mean? How far does, notably, the WTO promote "fair trade" and what problems have arisen in defining and promoting it? In what respects do the organization and procedure of the WTO and similar multilateral bodies provide equitable representation of all member states and their interests? What are the cases for and against extending the membership of such organizations to non-governmental "civil society" bodies such as Oxfam, labor unions and/or organizations representing particular industries?

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2351 - ESPIONAGE, COVERT ACTION, AND COUNTERINTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

Few aspects of intelligence are as misunderstood or wrongly portrayed as human intelligence (HUMINT). Movies, books, television, and even scholarly works do not address the nuances of the oldest profession: stealing secrets. This course will provide an in-depth examination of the role, impact, and conduct of HUMINT espionage, covert action, and counterintelligence. Emphasis will be placed on gaining as complete of an understanding of these three disciplines as is possible in an unclassified setting. Case studies and readings taken from actual events will form the basis of students conducting operational role-playing, target analysis exercises, agent recruitment, handling, debriefing, and report writing. Extensive practical tradecraft exercises will give these classes added realism. Readings will also be drawn from published memoirs of recently retired CIA operations officers and historical studies of modern us intelligence operations. The course grade will derive from a mid-term essay exam, but the majority of the grade will come from class practical exercises where students will learn and demonstrate tradecraft skills.

Course Requirements: PREQ: PIA 2346; PROG: Grad Sch of Pub & Int'l Affrs

PIA 2352 - STRATEGY AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course examines the nexus of military strategy and national policy, exploring the development and use of military power for political ends. In short, it is about how states make war. The course is designed to investigate several interrelated themes. First is the role of military theory as a foundation for doctrine and strategy. The second explores the relationship of military strategy to national objectives and political decision-making. The context in which the foregoing issues are examined is provided in the third theme: the social, technical, and intellectual evolution of warfare from the early nineteenth century to the present. The course is taught in a relaxed atmosphere, combining lecture and discussion, and is aimed at achieving a deep understanding of the material and a vibrant exchange of ideas. The course is taught in five phases; the first is foundational and the four that follow are historically oriented. The course phases are: (1) basic concepts and theory; (2) the 19th century through the first World War; (3) the interwar period through the Second World War; (4) the Cold War; and (5) the post-cold war era and beyond. Phase 1 lays a theoretical foundation that students apply in analyzing historical developments presented in each of the four subsequent phases. Additional theories are introduced in phases 2 through 5 in context of the technological and intellectual developments that inspired them. In each of those phases, students also explore the evolving nature of civil-military relations and the impacts of social, intellectual, and technological developments on military strategy and national policy. At the end of the course, students are invited to synthesize their knowledge of military theory, strategy, and policy to assess the strengths and weaknesses of current U.S. Strategic thought and discuss prospects for more effective strategies and policies in the future.

PIA 2353 - CREATIVE APPROACHES TO INTELLIGENCE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Modern diplomatic thought is a survey course in diplomatic history. While emphasis is on the history of the Western world (U.S.-Europe), their relations with Asia, Africa, and their developing countries are also covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2354 - HISTORY OF AMERICAN INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This course is a survey of the history of U.S. Intelligence agencies and their roles in defense, foreign, law enforcement, and commercial policy. We focus on historical U.S. Trends in intelligence collection, analysis, covert operations, and how U.S. Policymakers have used them. We compare U.S. Approaches to intelligence in times of both peace and war. We contrast U.S. Intelligence methodologies with those of both our allies and our opponents. We spend some time examining the historical arguments in the U.S. Over ethics, civil liberties, resources, and the proper roles of U.S. Intelligence. Finally, we consider how these historical trends inform and influence the current evolution of the U.S. Intelligence community. The course is taught by a serving CIA operations officer with over three decades of experience in intelligence and diplomacy. He has served in East Asia, Europe, Latin America, the U.S., In CIA headquarters, and most recently in South Asia.

PIA 2355 - WWII, THE COLD WAR, AND THEIR IMPACT ON DEVELOPING NATIONS

Minimum Credits: 3

Maximum Credits: 3

This is a policy-relevant history course that examines the international relations of the 20th century, as well as the lasting legacy of the cold war today. After discussing the causes, conduct, and consequences of World War II, students study the rise of the Soviet Union and iron curtain, postwar trusteeships, and the process of decolonization by which large swaths of Africa and Asia obtained their independence. Class lectures cover just war theory, the geopolitics of war, the rise of NATO, and the major cold war conflicts in Cuba, Afghanistan, Iran, and Vietnam. Using historical case studies, students learn important practical skills useful for a career in diplomacy, international negotiation, or statecraft, as seen through the eyes of master practitioners.

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2356 - MODERN IRAN

Minimum Credits: 3

Maximum Credits: 3

This course covers the contemporary political structure and the recent historical development of the middle eastern state of Iran from the pre-revolution period forward to the modern day. Historical themes emphasized in this course include political Islam and theocratic government, US-Iranian relations (both pre-1979 and post-1979), oil and politics, the nuclear question, sectarian politics and political violence, and Palestine-Israel in the contemporary political setting. Course topics to be delivered focus on the modern epistemology of Iranian politics, history, and culture and use as the fulcrum of this analysis the 1979 revolution and its impact upon both regional and global societies. A common theme running through this course will be the relationship between Iran and the West, specifically the relationship between the current Iranian government and the United States since the 2008 presidential election. Students will access these and other topical themes through weekly class readings and authorship of original academic reviews, as discussed below. In addition students will author an original research paper of substantial length at the conclusion of the semester which will be based upon individually designed and instructor-approved research questions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2358 - POLITICAL ECONOMY OF THE INTERNATIONAL FINANCIAL SYSTEM

Minimum Credits: 3

Maximum Credits: 3

Why do states select the economic financial policies that they do, and with what effects? This elective course introduces students to

the interplay of politics and economics within international financial system. Topics include the trilemma (fixed exchange rates, free capital movement, and independent monetary policy), and how reputation and perception 'distinct from policy choices' have real effects in areas as diverse as credit ratings, sovereign debt, and political risk. We will analyze large, rising powers within the international financial system, and explore the strength of financial and monetary policy special interests. Group presentations throughout the semester will address current events, touching upon each of the BRICS countries Brazil, Russia, India and China. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policy-makers who are non-experts in the specific topic under consideration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2359 - CIVIL WAR & CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2360 - CYBER SECURITY POLICY

Minimum Credits: 3

Maximum Credits: 3

In our increasingly interconnected world, nearly everyone is reliant upon information technology as they go about their daily lives. This reliance on technology and people's related desire for immediate access to information, provides an opportunity for various actors to advance their personal goals, whether it be for political purposes, financial or other criminal endeavors, or as a platform to advance their social causes. As such, the need for solutions to this ever-growing problem goes beyond just technical solutions. In the course, students will learn how to approach cyber security from a policy and planning perspective. Students will be introduced to various threats and learn how to develop 'plans' at the operational and strategic level to mitigate them. Students will be introduced to various governmental policies, strategies and directives from both the US and non-US perspective that have been crafted to address the cyber threat. Finally, students will learn about the various governmental and non-governmental organizations that are working to deal with the daily challenges of cyber warfare.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2363 - INTERNATIONAL HISTORY

Minimum Credits: 3

Maximum Credits: 3

This course examines how history can inform policymaking. It does this by looking at key watersheds in international history - watersheds that continue to shape the world in which we live. One immediate goal of the course is to acquaint you with these watersheds, to increase what one might call your historical literacy - your knowledge of these key points in time - and your understanding of how these times continue to affect us. But the course does not stop with understanding, but tackles the question of how to act on that understanding. Unlike graduate history courses that focus on the "how" of history (how to research and write history - how we learn what happened), this course focuses on the "what" of history...And specifically what we do in light of what has happened. The idea is not just that history teaches lessons or that history can repeat itself or that "those who cannot remember the past

are condemned to repeat it," but that an appreciation of how events have unfolded in the past may make us better able to deal with the complexity of what is going on at present.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2365 - TRANSNATIONAL CRIME

Minimum Credits: 3

Maximum Credits: 3

Since the end of the cold war, threats to national and international security have become more varied and diffused. Some of these threats are subtle and insidious rather than overtly military in character. Transnational organized crime has this character. The course is intended to provide substantive knowledge about major transnational criminal organizations and the threats they pose to domestic and global governance and to international security and stability. Accordingly, it places the challenge posed by transnational organized crime in the context of broader issues of globalization, governance, and disorder. The purpose of this course is to examine the phenomenon of transnational organized crime, in all its variations and manifestations, to identify major transnational criminal organizations and activities, to assess the threat posed to national and international security and stability, and to evaluate the policy implications of this threat. Attention is given to the initiatives governments have taken in response to the transnational crime challenge, and an assessment made of the adequacy of these initiatives. Throughout the course students will be encouraged to become familiar with analytical techniques that are used by intelligence and law enforcement agencies in understanding, assessing, and responding to organized crime.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2366 - INTERNATIONAL ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course examines multilateral diplomacy and international cooperation, paying special attention to the role that institutions play in shaping the modern world. Students learn practical skills relevant to a career in a multilateral setting, as well as information about the history of major institutions and some important political science theories on the nature of cooperation. The class is divided into three parts: part 1 examines the role institutions play in international politics and covers the various theoretical debates surrounding their efficacy. Part 2 covers the history, structure, and function of major international organizations like the United Nations, NATO, the European Union, African Union, Organization of American States, and others. Part 3 examines some managerial techniques important to working in a multilateral setting, and is designed to give students concrete skills that will be important in a career in multilateral diplomacy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2370 - TERRORISM AS AN INTELLIGENCE PROBLEM

Minimum Credits: 3

Maximum Credits: 3

This course will focus on the important and topical issue of international terrorism and how the U.S. intelligence community responds to demands from U.S. policymakers and allies to detect terrorist threats, to collect intelligence on terrorist groups, and to analyze and assess their intentions, plans and capabilities. Rather than examining international terrorism from a theoretical point of view, we will look at the tactical and strategic issues of most concern to the U.S. intelligence community. As part of the students' professional development, the instructor also will teach the students to write brief intelligence analytical-style memoranda, a skill that will be useful in any professional career.

Academic Career: Graduate

Course Component: Lecture

PIA 2372 - POLITICAL ECONOMY OF CHINA

Minimum Credits: 3

Maximum Credits: 3

This course is a graduate seminar designed to explore the content, process, and consequences of China's institutional reforms from a comparative perspective. Through a detailed examination of the literature on property rights, markets, and the role of the state in economic development, it is hoped that broader comparative insights may emerge about reform in China that distinguishes it from the experience of regimes in Eastern Europe, the former Soviet Union and developing and developed nations worldwide. The overarching

question is what explains the course of China's institutional change. Specific questions include the following: Who were the key political actors involved? What was the role of the central state and its agents? What incentives motivated their particular responses to the reforms? What role did changes in property rights play in the success of China's reforms? Why were some reforms easier to implement than others? Who were the winners and losers in the different reforms? What major new problems have emerged as a consequence of piecemeal reform? How have those been handled?

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2373 - INTERNATIONAL POLITICAL ECONOMY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores in eclectic fashion a number of major conceptual thrusts and policy problems in the international political economy. Some of the work deals with system level properties of international political economy, while other work compares how various advanced industrial states deal with similar foreign and domestic economic challenges.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2374 - THEORY OF INTERNATIONAL RELATION

Minimum Credits: 3

Maximum Credits: 3

This course will survey a broad range of literature dealing with international relations theory. The course will view the literature in terms of the critical questions areas in international relations and will be designed to describe each approach and to evaluate the utility of the approach in terms of bringing understanding to some of these question areas.

Academic Career: Graduate

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2379 - INTRODUCTION TO CYBER CRIMES

Minimum Credits: 3

Maximum Credits: 3

Traditionally, crime has taken place in the physical world. Since the dawn of the internet, criminal activities on the web have been continually increasing. Crime is no longer restricted to a town, city, state or even country because internet crime transcends all different types of jurisdictions. In this course, students will learn the types of crimes that occur online, as well as receiving an overview of how these crimes are conducted. Since this course focuses on computing technologies, students will be given the basic necessities needed to understand the technologies they will be utilizing throughout this course, as well as future courses. Students will learn safe computing practices and how to gather the necessary data to help track down criminals on the web. Topics covered will include introduction to various technology topics, distributed denial of service attacks, ecommerce fraud, counterfeiting, 0-day exploits, discussion on various cyber criminals and nation state threats, etc. Lastly, students will learn about the different organizations, both public and private, and the various policies and laws that are intended to counter the increase in cybercrime.

Academic Career: Graduate

Course Component: Lecture

PIA 2380 - HUMAN TRAFFICKING

Minimum Credits: 3

Maximum Credits: 3

This course examines the domestic and international dynamics of human trafficking with a focus on evaluating anti-trafficking policies. According to some estimates, there are at least 10 times as many girls now trafficked into brothels annually as African slaves

were transported to the New World in the peak years of the trans-Atlantic slave trade. More children, women and men are held in slavery right now than over the course of the entire trans-Atlantic slave trade. Human trafficking is the third largest international criminal industry in the world after illegal drug and arms trafficking, and it is the fastest growing. Assignments: short writing assignments; group research-based project; group practical service-learning project.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2382 - THEORY & CONCEPTS COMP POLITICS

Minimum Credits: 3

Maximum Credits: 3

This seminar focuses on theories of the modern state, especially in capitalist societies. The relationship of the state concept to various ideo-analytical frameworks and assumptions will be explored at some length as a way of evaluating the state concept as an analytical tool. These explorations form the basis for examining alternative images of the state in relation to society, to the role of leadership and statecraft in guiding the modern state, to alternative modes of organizing the state aid to making policy.

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2383 - POLITICS OF THE EUROPEAN UNION

Minimum Credits: 3

Maximum Credits: 3

This course will investigate the formation and development of the European economic community although some emphasis will be on the history of its formation, the major emphases will be on the functioning of the institutions of the community and the impact of community policies on national policy.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2385 - COMPARATIVE LEGISLATURE

Minimum Credits: 3

Maximum Credits: 3

This course focuses on theories that relate to legislative organization, executive-legislative relations, and legislator behavior, and party politics from a comparative perspective. We frequently use literature on the US congress to frame the discussions, but read and analyze literature on Western and Eastern Europe, Latin America, Asia, and other parts of the world.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2387 - NATO AND ALLIANCE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course introduces students to the organization and operation of history's most successful alliance, the North Atlantic treaty organization, as a key forum for international cooperation. In today's world nations are working together more intensely than ever and on a wider range of challenges. Thus, students who want to work in any branch of government are likely to find themselves working with their counterparts in other countries, particularly if they work in military and security related areas. Moreover, even if they are working in non-military fields, they may find themselves working alongside NATO-led forces, where an understanding of how the alliance works would also help. Throughout the course, students will follow and analyze current developments at nato, and they will also be introduced to its history since 1949. Special attention will be paid to nato's crisis management missions in Bosnia, Kosovo and Afghanistan, as well as to nato's relations with partners, including russia, and with other international organizations, including the European union and the un. There will also be an emphasis on negotiations among allies at nato. Normally the course will include a field trip to washington to meet people working on nato issues today. At the conclusion of the course, students will also participate in a nato crisis management exercise that they design and execute. The goal of the course is to develop the knowledge and skills necessary to function effectively in a key international organization.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2388 - INTERNATIONAL LAW AND POLICY

Minimum Credits: 3

Maximum Credits: 3

This course begins with an exploration of the history and sources of international law. We then survey the legal process and the application of international law to explore laws governing relations among states, and its expansion to non-state actors (e.g., the private individual, international organizations, NGOS, and multinational corporations). Students will learn about how and why international law is created and develop an understanding of the mechanisms and institutions of its enforcement. The enforcement of international law, its successes and difficulties, will require students to learn about, inter alia, the nature of international disputes, the subjects of international law, and the forums in which disputes are settled. Throughout the course, we will consider the emerging challenges faced in an international law paradigm including, organized violence, global markets, cultural coherency and conflict, identity and citizenship, technological evolution, and environmental regulation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2389 - CRIMINAL OPERATIONS IN THE CYBERWORLD

Minimum Credits: 3

Maximum Credits: 3

This class will focus on how criminals conduct business in the online world. It will introduce students to various topics such as carding, transnational cybercrime, and web mobs. The class will explore specific communication channels and money transfer systems that are utilized by online criminals. Students will be exposed to criminal methodologies that have become popular in the cyber world. Students will also have the chance to analyze a criminal target and will present intelligence findings at a mock briefing as part of the final project.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2390 - TOPICS IN INTERNATIONAL AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

Topics in international affairs will explore specific current issues in international affairs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2394 - ISSUES IN GLOBAL ECONOMIC AND FINANCIAL SECURITY (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course will discuss trends in global economic and financial security and ways to enhance it. The focus will be on ways to ensure global monetary and financial stability, including through appropriate regulation to reduce the incidence of financial crises and asset price bubbles. Other critical issues, including food and energy security and the role of finance in promoting development, will also be discussed. Although this is a policy course, students should expect to learn a good deal of economics and finance in the process of learning about these issues. These will be important intellectual tools as the future policy discussions on economic security and development will likely continue to focus more and more on finance and thus require more knowledge of finance than in the past. This course will be less narrowly technical, more policy and political economy oriented, but nonetheless appropriate for students concentrating in global markets, development, finance and trade.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2397 - INTERNATIONAL ECONOMIC NEGOTIATIONS (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course looks at a variety of different types of negotiations concerning economic issues, including multilateral trade and investment negotiations, bi- and pluri-lateral trade negotiations, and negotiations aimed at the settlement of specific disputes. We will discuss the influence of domestic politics, and the role of international organizations and non-governmental stakeholders such as NGOs, labor, multinational corporations, and domestic interest groups. The course is particularly useful for those considering careers

in international trade, business, markets and finance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: Grad Sch of Pub & Int'l Affrs

PIA 2399 - INTERNATIONAL ECONOMIC ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This elective course examines international organizations, with emphasis on institutions that govern countries' international economic policies and that affect international economic flows. We will study the Bretton woods institutions (the GATT/WTO, the IMF, the world bank) in-depth, along with regional economic arrangements (the EU), the OECD, the foreign aid regime (DAC), the system of bilateral investment treaties (BITS), international financial regulatory bodies (such as the BCBS, the FSB, and the FSF), and OPEC. Students will learn about international economic dilemmas that arise within an anarchic international system, and arrangements among countries to mitigate and govern such issues. Students will study how power and political processes work within and outside of international institutional arrangements. At the end of the course, students will be able to analyze the role of international economic organizations as both amalgamations of states that hold varying preferences, and as autonomous actors, within the international system within current events. Students develop transferable, professional skills as they engage with the above topics. The course will provide opportunities to practice business writing, verbal communication of complex ideas, and the creation of effective visuals (charts/graphs/figures) to organize and present information as a basis for policy analysis and evaluation. Students will engage in group presentations and will select a course-relevant, individual topic of interest to learn about throughout the semester. At the end of the course, each student will have developed a set of documents that reflect deep knowledge of his or her topic, communicated in simple, clear language that includes compelling evidence to establish a knowledge base and to support claims about cause and effect. For all exercises, the intended audience is a group of policy-makers who are non-experts in the specific topic under consideration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2403 - JUDICIAL PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course examines courts and judges as political actors. It emphasizes the non-legal factors that affect the decisions judges make and that influence judicial interactions with other political actors and institutions. Most material will focus on the US court system, but there will be some work of a comparative nature. Students will be responsible for critically analyzing reading materials and producing an independent research project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2408 - DEMOCRATIC THEORY & DEMOCRATIZATION

Minimum Credits: 3

Maximum Credits: 3

This course has three objectives for students: 1) to develop a broad knowledge of the main currents in modern and contemporary democratic theory and a familiarity with their main problems; 2) to study how normative theories of democracy inform or might inform processes of democratization; 3) to apply this knowledge in solving some puzzle or problem by comparing cases, assessing claims, developing arguments, etc.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2410 - AMERICAN LEGISLATIVE PROCESS

Minimum Credits: 3

Maximum Credits: 3

This course will focus is on the journal literature of the last decade- involving representation, legislators and their behavior, legislative structures, legislative parties, interest groups, executive-legislative relations, legislative reform, national and subnational legislative systems.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2411 - AMERICAN FOREIGN POLICY

Minimum Credits: 3

Maximum Credits: 3

For students who already have some knowledge of this subject who wish to broaden or deepen their understanding. The course deals with major issues of U.S. foreign policy mainly through readings and discussions. Topics such as domestic sources, trade deficits and protectionism, nuclear and conventional arms control, deficit spending and U.S. strategy, soviet-American relations, China and its triangle, and vulnerable authoritarian regimes will be examined.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2412 - ANALYZING CRITICAL INTERNATIONAL SECURITY CHALLENGES

Minimum Credits: 3

Maximum Credits: 3

This course consists of three 15-hour weekend workshops 'meeting Friday 6-9pm, Saturday 9am-5pm (1-hour lunch break), and Sunday 9am-1pm' each of which explores a critically important international security topic in the news today. The topics planned for 2015 include: the pros and cons of nuclear abolition; assessing the need for missile defenses; and analyzing China's military capabilities. Using films, lectures, discussion and debate, and group simulations, these workshops will expose students to the key factors shaping each security challenge. The objective is to promote balanced and critical thinking in assessing threats and evaluating choices facing security and intelligence practitioners. In addition to a reading list of articles and monographs' all downloadable or available via the university's digital library' and two books (both provided courtesy of the instructor), the syllabus also provides students with a bibliography of books, journal articles, and major monographs for those wishing to pursue more advanced study. Grades will be determined on the basis of classroom participation and three take-home essays.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2416 - PROLIFERATION ISSUES AND UNITED STATES STRATEGY CHOICES

Minimum Credits: 3

Maximum Credits: 3

This course will examine US approaches to the Weapons of Mass Destruction (WMD) nonproliferation problem (and alternative strategies for dealing with it), using the current cases of North Korea, India/Pakistan and Iran. The course will begin with a review of U.S. Nonproliferation strategies and the choices available to the US and the international community in addressing the proliferation problem. The group project will develop the overall strategy and the individual assignments will develop the objectives and policies. The two assignments may overlap slightly.

Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2426 - SPECIAL INTELLIGENCE TOPICS

Minimum Credits: 3
Maximum Credits: 3

This course is designed to expose students to the key factors shaping three critical special intelligence topics that together are emblematic of the variety of major challenges facing intelligence practitioners and policymakers over the next decade. Case studies will be employed to illustrate each of the three special intelligence topics dealing with such issues as the intelligence/policymaker relationship, coping with the "politicization" of intelligence, recognizing the limitations of intelligence collection and analysis, and confronting tradeoffs between national security and personal liberties. Each workshop will commence with a film on Friday evening that is germane to the topic at hand. We then discuss and debate the film's implications, setting the stage for Saturday's lectures, class discussions, and possible group work or a guest speaker. On Sunday, we conclude with a national security simulation during which the class breaks down into smaller teams to address a challenging topic. Grading is based on class participation and the successful completion of a take-home essay due two weeks after each workshop.

PIA 2429 - THE WAR ON DRUGS

Minimum Credits: 3
Maximum Credits: 3

The War on Drugs examines the history of drug control policy in the United States and the internationalization of drug prohibition. Topics include: the history of drug control policy in the US and internationally; the nature of drug abuse and addiction and current drug use patterns, the different components of drug control policy, including crop eradication, drug interdiction, leadership decapitation, law enforcement, and drug treatment and prevention; the structure of the drug trade in the Andes, Mexico, Afghanistan, and the US; and alternatives to drug prohibition, including legalization and harm reduction. The course highlights similarities and differences between the war on drugs and the war on terror with an eye towards understanding how our experience with the first can better inform our response to the second.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

PIA 2430 - ETHNIC POLITICS

Minimum Credits: 3
Maximum Credits: 3

This seminar introduces students to the comparative study of ethnic politics. It provides an overview of theoretical questions and methodological innovations across four main topics: the sources of ethnic mobilization and cleavage choice; the consequences of ethnic mobilization for democratization; the impact of ethnicity on redistributive politics; and the relationship between ethnicity and patterns of political violence. Readings for each topic are drawn from various political science subfields as well as from other disciplines. They also reflect a range of regional contexts, including the United States, Eastern and Western Europe, Latin America, South Asia, and sub-Saharan Africa. The purpose of the course is to provide graduate students with the background necessary for analyzing and developing policy responses to these issues, and for undertaking original research on questions relating to ethnic politics. It should enable them to critically engage recent scholarship, understanding which theories have yet to be adequately tested and which theoretically interesting questions have yet to be asked. Master's students may produce a written paper that analyzes a question in ethnic politics and proposes a policy response. Doctoral students should ultimately be able to produce a research paper that serves as the basis for a prospectus, dissertation chapter, or publishable article.

Maximum Credits: 3
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

PIA 2434 - CIVIL-MILITARY RELATIONS

Minimum Credits: 3
Maximum Credits: 3

This course explores the relationship between militaries and the polities they serve. Militaries remain crucial institutions in the modern world, serving as the guardians of sovereignty and safety. However, militaries also possess the tools and capability to threaten the very people and polities they are meant to protect. Striking the proper balance between military capability and civilian control of the armed forces is therefore an essential task for all states. But how is this delicate balancing act to be achieved? What factors make success and failure in this venture more or less likely? In exploring these questions, we examine classical theories of civil-military relations and the direct rebuttals they spawned. We also consider some of the key issues in the study and practice of civil-military relations, including coups, the influence of civilians on battlefield performance, challenges raised by the increasing presence of civilian contractors on modern battlefields, the 'gap' between military and civilian values and beliefs, and the impact of the military's presence on college campuses. We conclude by examining the confluence of the various facets of the civil-military relationship and their manifestation in the George W. Bush and Barack Obama administrations.

PIA 2437 - TOPICS IN CHINESE POLITICS

Minimum Credits: 3
Maximum Credits: 3

This seminar begins with a critique of the theory of socialism, the examination of the performance of central planning in China, and the political, social and economic origins of reform. The course then proceeds with detailed studies of various economic, political and social reform programs; decentralization of planning, ownership, investment, productivity and efficiency, price, equality, work place, agriculture, political democratization and participation.

Academic Career: Graduate

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2439 - ARAB REVOLUTIONS AND SOCIAL MOVEMENTS

Minimum Credits: 3
Maximum Credits: 3

In this course, students will study the 2011 Arab revolutions as politics in process, and consider the factors that led to the current uprisings as well as the path that each continues to take. During the course, we will pay particular attention to the issues, conflicts and questions people face every day in volatile times. Was this a media-inspired revolution? What are the class and sectarian dynamics of the Arab spring? How can we begin to think critically about gender issues in the region? What are the specificities of each revolt? As the events are ongoing and unfolding, this course needs to remain flexible so as to react and respond to the most current events. Therefore, the course will largely be driven by student research that will be the basis for class discussions.

PIA 2440 - RUSSIAN FOREIGN POLICY

Minimum Credits: 3
Maximum Credits: 3

A reading course focusing on alternative interpretations of Russian foreign policy.
Academic Career: Graduate
Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2441 - GOVERNMENT/POLITICS OF THE RUSSIAN FEDERATION

Minimum Credits: 3

Maximum Credits: 3

A reading seminar dealing with the alternative interpretations of the soviet political systems since the death of Stalin.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2442 - EAST EUROPE: COMMUNISM, TRANSITION, POST COMMUNISM

Minimum Credits: 3

Maximum Credits: 3

This course explores the origins, structure evolution and collapse of the communist states of East Europe. The states are studied from the standpoint of their elites, society, political culture, economic systems, history and international relations. A major focus of the course will be the dynamics of the revolutionary end of communist dominance of the states and the political and economic changes since 1989. The aim of the course will be to develop both knowledge about the region and effective analytical and conceptual tools for studying its politics.

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2448 - THE POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2458 - POLITICAL ISLAM

Minimum Credits: 3

Maximum Credits: 3

In the past several decades and especially since September 11, 2001, societies and policymakers around the world have debated the compatibility of Islam and democracy, the growth of violent Islamist movements, and the relations of such movements to terrorism and suicide bombings. In many instances, such debates seem to boil down to a 'clash of civilization.' To explore these issues we will examine a diverse body of literature drawing on literature in political science, anthropology, economics, sociology, and history. The empirical focus on the course will be Muslim-majority countries in the Middle East as well as Central and South Asia. This course begins by investigating the nature of the state in Islamic history and thought. We will explore the interaction between religion and the state prior to the rise of 20th century Islamist movements, focusing on the case of the Ottoman Empire. We then explore the rise the origins of contemporary Islamist movements, beginning with the Muslim brotherhood in Egypt. We then consider a range of country case studies from around the Muslim world and explore several key questions: what are the intellectual origins of such movements? What impact do they have upon domestic politics in the countries where they emerge? Are islamist movements compatible with democratic forms of governance? When do such groups engage in violence? How have governments responded to such violence and to what result? The course will explore these and other pressing questions by examining a broad range of movements (both violent and non-violent) in authoritarian and democratic settings, as well as in failed or persistently weak states.

Grade Component: Grad Letter Grade

PIA 2459 - POLICY APPLICATIONS OF GAME THEORY

Minimum Credits: 3

Maximum Credits: 3

This course is aimed at introducing game theory to graduate students in public policy. Game theory is a mathematical methodology for theory building, the use of which has ballooned within several disciplines, including political science and economics. As with any methodology, the ability to use game theory well comes only after much practice and exposure, more than can be achieved in one semester. However, the course has two goals, both of which are aimed at providing a foundation for understanding scholarly work in a policy context and for going on to future training in game theory if you desire. The first goal of the course is for students to understand some of the main types of strategic settings (games), and how to predict what strategies actors (players) will choose in those settings. In the first part of the course we will cover games of perfect information, which are games in which the players know all the relevant information about the strategic interaction in which they find themselves, including the other players' preferences. This is only one type of strategic setting. The final part of the course will touch on games of imperfect information, in which players are not certain of key aspects of the strategic environment. Other extensions of game theory are left for future classes. The second goal of the course is to give students a perspective on theory (in general) and how it is relevant to making policy prescriptions. We will of course be focused only on one type of theoretical argument'game theoretic ones'but some of the ways we use game theory will hopefully illustrate the importance of theory of any kind. Like any methodology, game theory has limitations, and like most, it can often be useful if employed properly. During the course, the goal is that students will gain an understanding of how game theory can be helpful for thinking about policy.

PIA 2460 - LATIN AMERICA SOCIAL & PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This seminar explores contemporary issues of social and public policy in Latin America through complexity, systems, glonacal, policy diffusion, comparative, and case-study approaches. In the first section participants review general policy concepts and theories, to be followed by the historical, economic and political context of public and social policy in the region. The second section examines several policy areas such as education, employment, poverty alleviation, public administration, social security, health, minorities, and violence. Using complexity and systems perspectives it is possible to understand how social and public policy influences the development and practice of fields like education and it could be also influenced by those fields. Disciplines such as economics, history, health, political science, anthropology, and sociology shape and help to make sense of educational issues and vice versa. This seminar is an opportunity for students in education and other disciplines to engage in interdisciplinary deliberation on policy issues in this region and fulfills the requirements for certificates in Latin American studies. Materials for the class include current news, scholarly publications, videos and other material published in English, Spanish, and possibly Portuguese (students must be able to read at least basic Spanish).

Academic Career: Graduate

Grade Component: Grad Letter Grade

PIA 2461 - THE U.S. IN THE MIDDLE EAST

Minimum Credits: 3

Maximum Credits: 3

This course investigates the recent history of political, economic, and cultural interaction between the United States and the Middle East. The course will be conducted as a text-based, investigative seminar as opposed to a traditional, chronological history. Themes to be explored throughout the semester include the politics of oil, interactions between Islam and the West, American culture and politics post-9/11, Iranian-US relations, Iraq since 2003, and the ongoing Palestinian-Israeli conflict. Students will access these and other topical themes through weekly class readings and authorship of original academic reviews, as discussed below. In addition students will author an original research paper of substantial length at the conclusion of the semester which will be based upon individually designed and instructor-approved research questions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2501 - DEVELOPMENT POLICY AND ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

This is a survey of development policies, issues, institutions, and resources for professionals working in development. Lectures, discussions, and presentations in class focus on analysis of development policies, and on new and significant policy issues, skills, methodologies, and resources. The course helps students develop the ability to analyze development issues from several perspectives, understand the breadth of international development as a field of professional service and academic study, and clarify their priorities for acquiring skills in preparation for that service. Students completing the course will be able to grasp the history of approaches and experiences with development, identify and critically analyze major institutions involved, assess political and institutional environments of development, employ some key social science and administrative tools, and recognize and understand principles of other significant skills and emerging methodologies in development practice. The course is organized in three parts: 1) dynamics of

development and social change; 2) development management: who's in charge; And 3) contemporary issues and skills. Throughout the course we will introduce, discuss, and return to case studies that illuminate key issues and themes: the global HIV/AIDS pandemic, microfinance programs in development, the chad-cameroon oil pipeline project, water system privatization, and the global and local food prices and production.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2502 - GLOBAL ENVIRONMENTAL POLICY

Minimum Credits: 3

Maximum Credits: 3

The 1992 Rio Declaration on environment and development states that 'to achieve sustainable development, environmental protection shall constitute an integral part of the development process.' We discuss the linkages between development and the environment, and the role of women, indigenous peoples, and the poor in achieving equitable development and environmental protection. Using tools from economics and policy analysis, we explore the conceptualization of environmental problems (market or government failure); various policy instruments to rectify environmental problems (regulations, voluntary programs, taxes, tradable permits, payments for environmental services and international treaties such as the Basel Convention, the Montreal Protocol, and the Kyoto Protocol), and the link between trade and the environment. Students' case presentations illustrate the challenges of environmental management in developing countries and the roles of civil society, NGOs, corporations, and international institutions such as the world bank, world trade organization, and united nations environmental program. Over the course of the semester, students are responsible for several policy memos and PowerPoint presentations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2503 - CIVIL WAR & CONFLICT RESOLUTION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide you with a framework for understanding and analyzing ethnic conflicts and Civil Wars, the most pervasive forms of armed conflict in the world. These intrastate conflicts killed millions of people, destabilize governments and entire societies, usually involve neighboring states and often undermine regional stability. Some conflicts engage the interests of distant international powers; many draw in international organizations. For these reasons, ethnic conflicts and Civil Wars are major security problems. The first part of the course is a brief overview that distinguishes conflict (an everyday occurrence) from violent conflict (a relatively uncommon event) and separates ethnic conflict from Civil War. The second part of the course analyzes the causes of violent conflict, ranging from psychological explanations to international factors. The third part of the course examines domestic strategies for dealing with ethnic and political differences, from accommodative strategies to violent ones. The fourth and final part of the course examines international responses to intrastate conflict, including the use of economic, political and military policy instruments.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2507 - HUMAN RIGHTS: POLITICS AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

In this course students examine global human rights as an evolving social and political institution, analyze human rights violations and the challenges of human rights practice, and learn how serious threats to human security may be addressed. We examine key human rights concepts, theories and laws, and related controversies that often obstruct international action on human rights (e.g. origins and nature of rights, universality and cultural relativity claims, conflicting rights, state sovereignty, and notions of obligations and accountability). We then examine the field of international action for human rights (e.g. states, inter-governmental actors, non-governmental actors and civil society) and the core dimensions and challenges of human rights work. Throughout the course, human rights target groups (such as women, children, and refugees) and current topics (such as genocide, child soldiering, gender violence, and peacekeeping) are examined as case studies, illustrating key principles and challenges, and providing insight into the range and depth of current human rights and their practice across fields. Students also select a specific human rights topic for major assignments, including a human rights issue brief and a comparative case study of international action on human rights.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2508 - NGOS ADVOCACY IN INTERNATIONAL POLITICS

Minimum Credits: 3

Maximum Credits: 3

Ngos are increasingly respected and visible as political actors influencing a wide range of human security and international development issues. To what extent do they influence politics and policy globally, and what kind of impact do they have? How do they become influential, how do they get the work done? What are the challenges they both face and pose? In what ways is NGO advocacy changing international politics and institutions? In this course we examine NGOS as political actors whose influence extends to the global level. We begin by analyzing the nature of NGOS as political actors and their relationship to broader social movements, political institutions, and social goals in international settings. We examine how NGOS shape themselves and their work in relation to such broader contexts, and how they coordinate with other political actors to achieve change. We then learn how NGOS develop comprehensive and effective international advocacy plans, and we study core NGO tactics and their coordination in political actions. Throughout the course case studies demonstrate how theory, context, and practice are linked. Students also select their own case study for assignments, which are inter-linked as part of a term-long simulation in which the political strategies of real NGOS are evaluated, an original international coalition is formed, and a convincing global strategy of action on common political goals is developed. Students therefore learn to effectively analyze NGOS' international political action while gaining practical skills for international NGO influence. The course engages with theoretical concepts but is heavily skills-oriented. It will enable students to (a) analyze and assess the work of nongovernmental actors in international politics, and (b) construct a comprehensive NGO political strategy through simulated governance of real-life NGOS. In the course of the simulation, we will develop specific skills in activities key to NGO political influence, such as analyzing lobbying opportunities, ensuring ethical responsibility, building an international coalition, and working with global mass media. Importantly, all NGOS, whether based locally, nationally, or internationally, can and often do have an influence on international politics, therefore the course does not focus exclusively on international nongovernmental organizations but rather adopts a framework for exploring any NGOS' international influence, for example through their participation in larger networks and coalitions. Examples of international NGO advocacy include: the international campaign to ban landmines, international child soldier campaign, jubilee and debt relief campaigns, campaign for an international criminal court, and many other human rights campaigns for example on health issues and gender issues. The inclusion of NGO advocacy in international politics is important for issues across a range of fields, from development to security to political economy and human rights. Ngo advocacy is core to the very idea of human security, which is intended not only to address people's needs over those of states, but to make people's participation essential in addressing those needs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2509 - PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Translating classroom theory into innovative field-based practice remains a project manager's most difficult challenge. The purpose of this course is to provide students with practical strategies and tools that can be used in the design and implementation of successful development projects. The course will be a highly interactive exploration of field-based development strategies and real-world projects that suffered lethal and catastrophic setbacks yet ultimately achieved solid and sustainable outcomes as a result of their innovative design. Students will be introduced to the basics of the project cycle, given specific management tools for project design and, working in groups, asked to develop project initiatives addressing a problem in a developing country of their choice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2510 - ECONOMICS OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

We use basic conceptual frameworks from economics and quantitative methods to examine economic development issues. We begin by discussing Amartya Sen's concept of 'development as freedom' and measures of development such as the Human Development Index. We examine when the market and government can serve as appropriate mechanisms to allocate resources within the economy. We discuss the institutions that are needed to ensure that markets function well. We study innovations, such as disclosure programs, that reduce corruption. We examine gender-sensitive pro-poor strategies, such as micro-credit programs, the granting of property rights to women, investment into girls' schooling and women's reproductive health. We study World Trade Organization provisions that assist or impede poor countries' access to drugs in combating AIDS and other public health crises. We review the rules of the WTO that attempt to balance free trade and countries' ability to protect public health and the environment. We discuss the role of international trade (e.g., OECD subsidies for agriculture), foreign aid and debt in encouraging or impeding economic development. Students will be graded on policy memos that are well written, based on quantitative and qualitative evidence, and oral briefings that recommend solutions to development challenges faced by governments, international organizations, non-governmental organizations or corporations.

Academic Career: Graduate

PIA 2513 - RELIGION AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Religious ideas, beliefs, and institutions are influential almost everywhere development practitioners work. This course engages students actively in understanding the roles of religion and culture in economic, social, and political change; the varieties of religious institutions and movements in poor societies; and the significance of religion in several key policy areas. The approach draws on sociology, economics, political science, and anthropology to understand the practical implications of religion for development work. Students completing the course will be able to use and critically assess major approaches to the study of religion and social change, recognize key doctrinal and institutional features of major world religions, incorporate religious institutions and thought into an analysis of civil society, assess the roles of religious actors in conflict situations, evaluate options and strategies for working with faith-based organizations, and apply diverse ethical perspectives to major development policy issues. The course is organized into three parts: (1) an introduction to religion, culture, and development; (2) a comparative survey of major issues and case studies including each of the major "world religions" and key issues such as gender, inclusion and exclusion, human rights, religion and social movements, and faith-based organizations; and (3) religion and the policy and practice of development, including conflict, HIV/aids, and topics determined by the class.

PIA 2519 - COMPARATIVE GOVERNANCE

Minimum Credits: 3

Maximum Credits: 3

This is a graduate-level course in comparative governing institutions. It is a course that focuses on the political incentives and constraints faced by policymakers as they seek to develop and implement public policy. Our goal in this class is to understand the institutional environment in which politicians and policymakers operate. The most important objective will be to develop the ability of policy practitioners to understand the nature and transformations taking place in political institutions around the world as they seek to improve them. This course is part of a two-course sequence that is strongly recommended for students (both MA and PhD students) in the Governance and International Public Management concentration.

Academic Career: Graduate

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

PIA 2522 - GLOBAL ENERGY

Minimum Credits: 3

Maximum Credits: 3

The global energy policy course applies tools from economics, science, and policy analysis to address energy issues. We examine various energy sources in the us/eu/developing countries including oil, gas, nuclear, hydro, biofuels, solar and wind. We discuss how

market failures and government policies influence the gaps between private and social costs of energy. We examine incentive policies for the adoption of renewable energy and overall benefits from restructuring towards a greener economy. We examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2523 - GLOBAL ENERGY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course addresses global energy issues. First, we examine energy sources globally including oil, gas, nuclear, hydro, biofuels, solar and wind. Specifically, we explore methods to estimate the benefits and costs/risks (economic, environmental, health, political) from various energy sources. We discuss how market forces, market failures, lobbying, and government policies influence the gaps between private and social costs of energy. Second, we examine incentive policies for the adoption of renewable energy (e.g. carbon pricing, cap & trade, renewable portfolio standards, pull-push innovation policies), barriers to their adoption (infrastructure, storage, and intermittency), and overall benefits from restructuring towards a greener economy. Third, we address incentive policies to increase energy efficiency (e.g. fuel economy standards, rebates, leed certification). Fourth, we examine the role of international trade, investment, technology transfer and climate policy in increasing energy efficiency and renewable energy worldwide. Fifth, we examine the geopolitics of energy sources (e.g. US, EU/Russia, China/Africa, Central Asia & Middle East). We discuss the growing recognition that investment in energy efficiency and renewable energy can mitigate national security concerns stemming from fossil fuel dependency.

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 2524 - FINANCING NGOS FOR DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Examines approaches used to generate and manage the finances of nongovernmental organizations (NGOs) involved in developed activities. The financing of a variety of these organizations will be analyzed, including those involved in sectoral initiatives in health care, environmental protection, rural development, transnational religious charities and democratization. The application of pertinent management issues to the financing of nongovernmental organizations will be a major component of the course.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2526 - NGOS CIVIL SOCIETY AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course explores the range of non-state actors in developing/transition countries that are important to promoting socioeconomic and political change. We will examine the origins, evolution and multiple roles played by this diverse group of non-state actors, including business and professional associations, trade unions and political movements, policy advocacy groups and civic education/democracy-building organizations. Among the issues preoccupying practitioners and researchers, and this course, are: what factors influence the presence and vibrancy of civil society in different countries? How has the state 'in various times and places -- determined the context in which civil society organizations pursue their goals? With what strategies and with what success have civil society organizations been able to influence or change state policies? What autonomy and accountability issues arise in state-civil society relations, and how does the international donor community facilitate or complicate these relationships? In the process we will introduce specific tools from the social disciplines and development practice for working with civil society organizations, including assessing the strength of civil societies, measuring social capital, and assessing 'partner' organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2527 - FINANCIAL MANAGEMENT FOR NGOS AND NON-PROFITS

Minimum Credits: 3

Maximum Credits: 3

This skills course covers various accounting methods in both private sector organizations as well as Nongovernmental Organizations (NGOs). Upon completing this course students should be able to read and understand annual reports of profit and nonprofit

organizations, analyze the published financial statements within the reports to ascertain the well-being of the organization, and to make managerial decisions based upon the results of this analysis. This course is divided into (1) understanding basics of accounting for all organizations; (2) measurements and analysis of financial statements using accounting tools such as common-size statements, liquidity and profitability analysis, debt vs. equity; and (3) budgeting and cost-benefit analysis using contribution margin.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2528 - GOVERNANCE, LOCAL GOVERNMENT AND CIVIL SOCIETY

Minimum Credits: 3

Maximum Credits: 3

It is not possible to divorce development issues from issues of governance and civil society. Nor can the debate and selection of policy choices be detached from the capacity of institutions to implement policy. This course attempts to define this balance by looking at issues of local government, governance and civil society in Latin America, eastern Europe, Asia and Africa. It focuses on the dynamics of governance with primary attention being the grass roots base of democracy. Focus is on the nexus between theories of governance and the practical implications of that theory on political behavior. The institutional state can be defined as the set of structures and processes- including the public service, the nature of social relationships, and internal organizational dynamics- that though it evolves over time, is a permanent part of the dynamics of government. Formal institutions are organizationally or socially based units that have effective authority over aspects of policy and implementation, are based on formal rules, common values, and standard modes of behavior as well as regulations that are widely accepted.

PIA 2542 - PEOPLE-CENTERED DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2551 - GENDER AND DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course seeks to critically examine how development processes affect women and men and gender relations. By doing so it aims to contribute to an ongoing discussion on the meaning and operationalization of inclusive and equitable development. The course has two sections: the first provides a theoretical and conceptual grounding by reviewing how debates around women/gender and development have evolved. This section surveys leading approaches to gender and development, development theory, and feminist critiques. The second and more applied part of the course explores the gendered impact of development policies and projects by examining substantive issues within the realms of health, work, violence, climate change and globalization. Select development projects are utilized from different regional, institutional and cultural contexts to highlight the diversity of approaches, actors, as well as intended and unintended impacts. After completing this course, the students will have a nuanced understanding of the main perspectives and debates in gender and development; be able to evaluate their strengths and weaknesses; be able to develop a critical awareness of issues facing women and men as actors within national and global development practices; and accumulate professional competence (reading, writing, presenting) in gender based project development and evaluation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2552 - MANAGING ORGANIZATIONS IN DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course examines the management of organizations working in international development and humanitarian assistance with a focus on NGO management. This course has three key objectives. The first is to introduce students to the work and environment faced by development organizations. The second is to provide theoretical and practical frameworks for the analysis of management challenges and generation of relevant recommendations. Big questions we investigate include: why are NGOs fundamental for development? How can NGOs improve their accountability and effectiveness? How to best approach a complex decision problem? What are the key opportunities and dangers in organizational "partnerships" between governments and NGOs, northern and southern

organizations, etc.? How can NGOs leverage community participation? The third objective is to help students develop transferable management skills, which will help them get a job in international development. Assignments emphasize primary research and focus on building critical writing, analytical, and presentation skills that demonstrate a broad understanding of the key management challenges facing development organizations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2553 - GLOBAL HEALTH POLICY

Minimum Credits: 3

Maximum Credits: 3

This course covers the millennium development goals prioritize investment in health for human welfare. We examine underlying economic problems and proposed policy solutions to address major diseases health issues such as AIDS, TB, malaria, diarrhea, and respiratory illnesses. We examine challenges in addressing children's and women's health issues, including child labor and trafficking. We study World Trade Organization (WTO) provisions that assist or impede poor countries' access to drugs. We study WTO cases on health protection (e.g., US-EU beef hormone debate). We discuss the costs and benefits of genetically modified organisms in our food supply. Students' case presentations examine cases of successful global health interventions (e.g., Small pox eradication, arresting AIDS in Thailand) and new challenges (SARS, avian flu, health-related impacts of climate change), as well as the roles of the world bank, the world health organization, corporations, NGOs, and civil society in improving public health in developing countries.

PIA 2571 - THE ECONOMICS OF THE MIDDLE EAST AND NORTH AFRICA REGION

Minimum Credits: 3

Maximum Credits: 3

The focus of this course is on the countries of the Middle East and North Africa (MENA), the area comprising the Arab states, Iran, Israel, and Turkey. They face enormous economic challenges in the twenty-first century: stagnant real wages, deteriorating competitiveness, and rapidly growing populations and labor forces. Why after years of negative per capita income growth, has the region been unable to accumulate sufficient reform momentum to sustain economic growth? Do important differences across countries hold lessons for the future? What are the social consequences of economic stagnation, and how might future adjustment costs be managed to protect the poor? How have individual countries in the region defined the challenges ahead? And what issues must be addressed to realize a more prosperous future?

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2572 - EARNINGS AND EMPLOYMENT IN THE THIRD WORLD

Minimum Credits: 3

Maximum Credits: 3

Labor markets play a significant role in the development process. While growth rate indicators are still used to track the progress of an economy, development scholars distinguish between economic growth and 'job-generating' economic growth. This is a policy oriented course on how labor markets work in developing countries and how they compare to labor markets in the developed world. The course starts with developing an understanding on how wage and employment levels are determined in the labor market and if different labor markets behave differently. What is the role of education and why highly educated workers are unable to find jobs? Some of the topics discussed in this course are: 1) Brain drain and migration of the educated; 2) the role of microcredit in employment generation; 3) the consequences of government policies such as minimum wages and public sector guaranteed job schemes; 4) the role of institutions in the labor market: why institutions exist? How to rectify inefficient institutions? 5) Income inequality and poverty and their role in accelerating the growth of the informal sector; 6) Discrimination and the impact on the economy. Students are required to write a policy paper relevant to labor markets in a 'developing' country of their choice.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2574 - AFRICAN DEVELOPMENT SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course explores development issues in Sub-Saharan Africa. It facilitates multidimensional considerations of these issues and

examines the very meaning of "development" as a concept for Africa. Historical and contemporary paths of development in Africa are examined. Important analytical focuses of the course include the roles of both internal and external factors influencing development policy and management. This includes African regional organizations, nation states, and traditional societies; external factors such as, international regimes; as well as European, North American, Middle Eastern, and Asian state participants in African development activities. Students completing this course are expected to have: a better background for understanding Africa, African peoples and civilizations; knowledge of the social and cultural issues affecting development in Africa; alternative frames of reference for interpreting information about Africa; appreciation of various challenges facing Africa; and the capacity to develop and defend a well-designed policy position on an African development issue. The course is divided into: part 1 (the underdevelopment of Africa: scale and sources); part 2 (the non-development of Africa, 1960-present); part 3 (contemporary approaches to African development); part 4 (emerging challenges and opportunities for African development); and part 5 (African policy debates: where do we go from here?)

PIA 2575 - POLITICS, ISLAM, AND THE STATE

Minimum Credits: 3

Maximum Credits: 3

The course provides an accessible and comprehensive account of political Islam over the span of the past century. Drawing on insights from comparative politics and Islamic studies, it explains the complex interaction between Islam, society, the state, and processes of globalization. The course demonstrates that political Islam, far from being a monolithic phenomenon, varies considerably from country to country depending on its position in relation to society, the state, and the broader political environment. The course provides a portrait of Islam and politics through a combination of detailed case studies and country overviews that span the globe, with a focus on the Middle East, Central Asia, and South Asia. It also provides a detailed account of the global jihadist movement.

PIA 2602 - NATIONAL SECURITY AND DEFENSE TRANSFORMATION (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

U.S. National security strategy and policy face great challenges in the 21st century. Political, military, legal, and economic factors will affect both strategy and policy. This course will assess those factors and their effects on possible solutions to those challenges. The course approaches national security from both military and government-wide perspectives and addresses the executive branch, the congressional, and the global environments. The professor will emphasize a practitioner's approach to issues and will use lectures, readings and original source documents, class discussions, and guest speakers from the national security community. Students will deliver short written papers, mostly in the form of one-page memos, and will undertake group assignments leading to oral class presentations. The primary focus is on contemporary issues and events, but the instructive value of history is also prominent throughout the course. For students who wish to take this course, prior knowledge of or study in national security is strongly recommended but not required. This course will help students with foreign policy and security studies concentrations prepare for the evolution and challenges of coming years.

PIA 2603 - AFRICAN CONFLICTS: CAUSES AND CONSEQUENCES (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

A half-century after most African nations gained their independence, the continent continues to be a disproportionate generator of conflict and instability. Simultaneously its global importance grows, due to external preoccupations with energy security, anti-terrorism efforts, emigration, and disease. Despite these complex dynamics, the international community's engagement with Africa continues to be largely focused on crisis management and humanitarian assistance. This course will explore the underlying reasons: historic, political, economic and cultural -- for Africa's chronic weakness and dependency, as well as the West's often myopic response to these pressing problems. It will take a close look at some of the most destructive developments in the post-colonial period, including state collapse, genocide, and HIV/AIDS. We will then seek to better understand the manifestations of crisis in Africa and how to more effectively tailor our responses. To that end, we will delve into the world of humanitarianism, from its traditional charitable manifestations to more recent trends such as humanitarian intervention, r2p, and reconciliation.

PIA 2604 - GEOPOLITICS OF SOUTH ASIA (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course will look at the region against the historical backdrop of its relations with the world. But the major focus will be on the dramatic developments within South Asia during and since the 90's and the region's evolving relations with the US, China, Russia, Japan, Iran the middle East and central Asia. Especially how the US is helping India in realizing its aspirations for a big power status, and a factor of stability in the region, and Pakistan in its salvation from chronic weakness by building its capacity to reform itself. Pakistan, both as a partner and potential target, in the war against religious extremism and terrorism, has become a major foreign policy challenge for the us and is likely to occupy an important place in the national security and foreign interests of America for some time. The course will look at these threats and challenges specially the US war against extremism, more particularly the Taliban and Al Qaeda, being fought with the help of two critical allies, Pakistan and Afghanistan.

PIA 2607 - STATE CRAFT AND SMART POWER IN THE DIGITAL ERA (DC SEMESTER)

Minimum Credits: 3

Maximum Credits: 3

This course examines new approaches to the practice of statecraft in an era of rapid global change. Globalization, including accelerating digital communication, is upsetting traditional international order and institutions, and changing the pace and intensity of decision making. Nation-state governments, while still the primary actors, must adjust to new sub-national, regional and transitional forces and players in a far more complex global arena. As digital communication brings publics into politics and policy far more than ever before, this course helps participants better understand and prepare for these and other current challenges for smart power.

Features guided classroom discussion, presentations by officials and outside experts, and in-class exercises such as a resource allocation/strategic planning session (somewhat akin to one of the major elements of the PMF and FSO oral exams) as well as policy simulations. The course's emphasis on policy, institutional and professional concerns, will be particularly relevant to those seeking employment in public service, NGOs, public policy think tanks and consulting firms.

PIA 2705 - NEIGHBORHOOD AND COMMUNITY DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course focuses on neighborhood and community development in urban areas. We will study characteristics of neighborhood development and the policies that have affected change over time. Students will learn to analyze neighborhood data, measure change, and understand the impacts neighborhood organizations play in their communities. The first part of the course will focus on urban

theory, urban history and policy, particularly regarding housing and urban renewal, and data analysis. Students then study community revitalization planning and the rise of community development. Students will work on issues related to accessibility to parks and recreation for disadvantaged neighborhoods and populations in Pittsburgh and will work with the Pittsburgh Parks Conservancy on linking people and parks. This will include work on sustainability, transportation, and urban schools.

PIA 2707 - URBANZ & SUSTNBL DVLP INT'L CNTXT

Minimum Credits: 3

Maximum Credits: 3

This course examines the relationship between economic development and urbanization, with an emphasis on understanding how the process of growth is associated with urbanization and its consequences. The course is divided into three sections. The first is a general overview of global trends of urbanization and development, as well as an introduction to principal development debates. The second section covers the principal theories relating urbanization and development. The last section of the course focuses on key issues that have emerged during the rapid urbanization of the developing world, ranging from growing income inequality, poverty, and socio-economic exclusion, to the informal economy and rising violence. We examine the policies and processes that have attempted to address these issues, such as participatory community planning, antipoverty programs, etc. Though the course takes a broad theoretical perspective on these processes, there is a focus on Latin America when looking at examples.

PIA 2715 - GIS FOR PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

A geographic information system (GIS) is a powerful tool for the public sector and used in a variety of disciplines. GIS builds on existing methods while offering new dimensions. This course provides students with a solid foundation of the principles and applications of GIS, an introduction to the desktop software ArcGIS, and demonstrates its uses in the public sectors. Students utilize ArcGIS to analyze and display spatial and demographic data. The construction of policy is then predicated on analysis. Skills learned in core courses can be brought to this course and built upon. Students have the flexibility to focus on their particular area of interest within the public sector through project work. The course is taught via lecture and hands-on experience using the ArcGIS software.

Academic Career: Graduate

Course Component: Lecture

PIA 2730 - COMMUNITY DEVELOPMENT AND FOCUS GROUPS

Minimum Credits: 2

Maximum Credits: 2

This eight-week workshop introduces students to the focus group as a data-gathering tool and prepares them to use focus groups in their work. Critical components of the class observation of and hands-on experience with facilitating discussions, taking notes and analysis for report preparation. By the end of this workshop students are expected to describe the theoretical underpinnings and processes of focus groups; identify situations in which focus groups are an appropriate methodology; design all aspects of focus groups, including sampling and writing questions; conduct focus groups; record focus groups; and analyze and report on focus groups' data. The workshop uses lectures, discussions, and interactive exercises to familiarize students with all aspects of focus groups,

including the theoretical basis of focus groups, formulating questions, recruiting participants, facilitating the discussion, taking notes, and applying the data.

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2740 - PLN & ANAL SUSTAINABLE REGIONS

Minimum Credits: 3

Maximum Credits: 3

Regional governance is the unifying theme in this course but without some dedication to meaningful economic, social, and environmental development principles, it constitutes only a mechanism for re-engineering traditionally inefficient political institutions into more business-like and potentially less responsive. The course will advocate principles of responsive metropolitan governance that are linked to sustainable development principles, by reviewing the literature and its association with urbanism, green design, smart growth and comprehensive planning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 2742 - HUMANITARIAN CRISIS

Minimum Credits: 3

Maximum Credits: 3

This course examines more than a dozen major humanitarian crises from around the world during the past 25 years. It analyzes key cross-cutting themes and how response and recovery efforts have been managed, while giving additional attention to reducing disaster risks. Through readings, class discussions and negotiation exercises we will consider the performance and respective roles of primary actors such as United Nations agencies, Non-governmental Organizations (NGO's), international organizations, military forces and the official authorities of affected countries. The course has a strong experiential emphasis as reflected by visiting speakers with first-hand field experience, and contact with disaster management graduate students and practitioners in other countries. Students will participate in three simulated negotiations by agencies working in Haiti, Darfur, and Pakistan. They will also work together in comparative research teams, engaging with selected overseas partners, and prepare a joint presentation. Two short papers also will be assigned. Broader themes will include the role of leadership, ethical dilemmas, state-NGO-military relations, policy advocacy by NGOs, the growth of local and national capabilities, the evolution of the international system of humanitarian response, and programmatic ideals such as 'do no harm' and 'disaster risk reduction'. By the end of the course, participants will acquire a deeper understanding of political, military, and humanitarian responses to major humanitarian crises, as well as current initiatives that seek to reduce people's exposure to future threats. This fifteen week course is designed for graduate students interested in working in humanitarian or international crisis activities, whether on behalf of host governments, institutional donors, civilian international or local agencies, military forces, or the media.

PIA 3002 - SEMINAR IN ORGANIZATION THEORY

Minimum Credits: 3

Maximum Credits: 3

An advanced seminar in organization theory; covers in-depth analyses of current issues, research, and conceptual questions associated with the field of administration.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3003 - ADVANCED SEMINAR IN THE POLICYMAKING PROCESS

Minimum Credits: 3

Maximum Credits: 3

Integrates theoretical, conceptual and methodological foundations of modern policy research analysis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3004 - SEMINAR IN RESEARCH DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This seminar provides knowledge and skills in designing quantitative and mixed methods research. The term research design refers to a strategy or plan for getting the best possible answers to research questions. When we want to conduct research that helps solve practical problems, these questions tend to be about causal inferences linking policy and management interventions to socially valued outcomes. In a policy and management context, research designs usually answer the question: 'what works?' Research in policy and management is often based on inadequate research designs, that is, research designs that fail to provide plausible answers to research questions. In an effort to address these inadequacies there has been a movement toward experimental and quasi-experimental research designs in areas of health, education, welfare, security, energy, and the environment. Indeed, in the past two decades we have seen a virtual explosion of experiments, quasi-experiments, and natural experiments in the social sciences and social professions. The term mixed methods refers to the concurrent use of quantitative and qualitative methods for collecting, analyzing, and interpreting data. 'Qualitative' methods do not refer merely to non-quantitative methods, for example, methods of case study analysis or small-n research. The term 'qualitative' properly refers to methods for making sense of, or interpreting, actions in terms of the meanings people bring to them. Ethnography is a qualitative method; case study research, when it fails to uncover the meanings of actions to persons other than ourselves as researchers, is qualitative only in the limited sense that it involves small nonrandom samples which prohibit the use of common quantitative procedures such as correlation and regression analysis. When genuine qualitative methods such as ethnographic interviews and focus groups are used in conjunction with quantitative modeling techniques we usually use the term 'mixed method.'

PIA 3005 - FIELD SEMINAR IN PUBLIC ADMINISTRATION

Minimum Credits: 3

Maximum Credits: 3

This is the doctoral field course in public administration. This course reviews major developments in the field of public

administration, beginning with its historical origins and then focusing on its current research frontiers. The purpose of the course is to prepare students to teach and conduct research in the field of public administration. To that end, students will be expected to turn in weekly reviews of the readings (3 to 4 pages each week) and a research paper of sufficient quality for submission to an academic journal. The format of the course will involve some lecturing (for about an hour) followed by discussion (for about an hour). Students are expected to read thoroughly before the seminar and to come prepared to critically discuss the readings. This course is open to doctoral students in any field. Master's students with sufficient background, as judged by the instructor, may enroll with the permission of the instructor.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3010 - THEORIES IN SOCIAL SCIENCE AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This course has two purposes. The first is to engage the student with the central themes and boundaries of public and international affairs including an awareness of the differences and similarities among various "specialisms" within this category of knowledge. The second is to encourage the student to reflect on pivotal theoretical issues which cut across specialisms and to apply these theoretical concerns to specific policy questions. Such knowledge and intellectual skills are essential for a career as a scholar of public and international affairs.

PIA 3014 - THE POLITICAL ECONOMY OF DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

This course seeks to help you understand the causes of international inequality in the distribution of wealth. In simple terms, the course seeks to answer the question, "why are there rich nations and poor nations and rich people and poor people"? To answer this question we will need to understand something about the factors related to economic development and how those factors are tied to income distribution. The course will expose you to some of the major theoretical and empirical literature on the political economy of development.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

PIA 3015 - SYSTEMS THEORY

Minimum Credits: 3

Maximum Credits: 3

Increasingly, the social, economic, and political context in which public organizations function is characterized by interdependent, evolving systems of individuals, organizations, and systems of systems. Understanding this complex world of interacting organizations and systems presents a challenging, fascinating, difficult, but always interesting task. In this course, we will follow the evolution of this process over the last six decades and assess how these theoretical frameworks have changed our conception of public policy and the operational context for public organizations. Since systems theory is strongly interdisciplinary, we will also explore

basic concepts as they were borrowed from physics, mathematics, biology, engineering, and computer science to inform current organizational frameworks of complex adaptive systems and their application to policy and practice in current public and international affairs. Students will write five short papers assessing the evolving state of complex systems and the impact of theoretical framework in analyzing public policy issues today.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3016 - ADVANCED SEMINAR: ECONOMICS AND POLITICS OF COUNTER INSURGENCY

Minimum Credits: 3

Maximum Credits: 3

This co-taught course will examine five broad topics in the economics and politics of counterinsurgency (coin): (1) the causes of insurgency and Civil War, (2) patterns of recruitment and participation, (3) the organization of insurgent groups, (4) violent strategies used by warring factions, and (5) development policy targeted at reducing the ability of insurgent groups to produce violence.

PIA 3017 - ADVANCED SEMINAR: INTERNATIONAL PUBLIC MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3019 - INTEGRATED SEMINAR IN INTERNATIONAL AFFAIRS

Minimum Credits: 3

Maximum Credits: 3

This course will introduce GSPIA Ph.D. students to the various approaches to the study of international affairs as well as a few broad areas of inquiry in the field. It covers 'great books' in the study of international affairs, concentrating each week on a classic or important new work. This approach will provide a stable platform from which international affairs students may delve deeper into the literature while apprising non-international affairs students of the general structure and large debates in the field. Given the vastness of the field, there are many topics that we will not be able to cover. However, familiarity with the arguments covered is essential for navigating and making sense of the sprawling literature. By the end of the semester, students will possess the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on the topics we do and do not cover.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PIA 3020 - ADVANCED SEMINAR: EVIDENCE AND INFERENCE IN POLITICAL SCIENCE AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

This seminar examines methodological disputes in the policy sciences. We will use a structural model of argument based in large part on the work of Stephen Toulmin, the English-born philosopher and applied philosopher of science who spent the latter part of his career working with well-known international relations and public policy specialists at the University of Southern California. Much of Toulmin's structural model of argument was built into the computer program we will use this term. The program is called rationale and it was developed by a Pitt philosophy of science Ph.D., Tim Van Gelder, who also gained significant expertise in computer science. He is at the Melbourne University in Australia. We will use rationale to study the methodology of the policy sciences. By using the structural model of argument to study methodology we will expand the range of research methods available to us as policy-oriented social scientists. Hopefully, this will protect us from the dogma that there is one set of 'approved' methods and from the despair that comes from believing that 'anything goes.' In addition, it will alert us to the dangers of winding up in one or another methodological cul-de-sac in which orthodoxy reigns.

PIA 3050 - QUALITATIVE RESEARCH: DESIGN AND METHODS

Minimum Credits: 3

Maximum Credits: 3

This is a core doctoral course organized as a practicum aimed at giving doctoral students hands-on qualitative research experience. Explicit in the organization of the course is teaching doctoral students "when" and under what conditions researchers use qualitative methods. While there are numerous qualitative methods that can be used, in this practicum students conduct interviews as the primary method for collecting data. Upon completing this course, doctoral students should be able to carry out a qualitative study using interviewing as the method of data collection. By the end of the term, students should be able to articulate a rationale for a qualitative study through a literature review; formulate researchable questions to be answered by interview data; develop an interview protocol; conduct face-to-face interviews; prepare and code text data for analysis; analyze text data; and use text data as the basis for answering the questions posed in the study. The course is divided into five parts: Part 1 reviews the basic assumptions underlying a qualitative approach to social research. Part 2 focuses on the steps involved in doing research in the applied social sciences. Part 3 is hands-on and involves collecting data by interviewing informants. Part 4 involves the preparation and analysis of text data. Part 5 is the presentation of each student's study to the class. The final product in this class is a paper that summarizes the study's findings. Assignments consist of a mix of reading; going out into the field to interview; preparing and analyzing data; organizing and presenting research findings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3090 - ADVANCED SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This is a master's-level course open to doctoral students.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3096 - COMPREHENSIVE EXAMINATION PREPARATION

Minimum Credits: 1

Maximum Credits: 9

This course is an independent reading course for Ph.D. students who are actively preparing for their comprehensive exams. The student will work under the supervision of a faculty advisor. The advisor and student agree on bibliographies in advance, and the student is encouraged to discuss the readings on a regular basis with his or her advisor and other division faculty.

Maximum Credits: 6

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3098 - DOCTORAL TEACHING PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

In an increasingly competitive academic job market, teaching experience can be a decisive factor in doctoral students' ability to secure an academic job after graduation. This practicum provides an opportunity for doctoral students to develop teaching skills by creating and delivering a course to members of the community. The practicum will begin with pedagogical and teaching policy training. Under the supervision of the course instructor, doctoral students will then be responsible for all elements of teaching a course in one of GSPIA's doctoral fields (creating a syllabus, delivering lectures, leading class discussions, creating and evaluating course work). After every class delivery, doctoral students will have a rare and invaluable opportunity to receive instant feedback on their performance. At the end of the practicum, students will put together a teaching portfolio which includes a statement of teaching philosophy, the

teaching materials developed during the practicum, student feedback and a reflection upon the feedback received.

Academic Career: Graduate

PIA 3099 - DISSERTATION PHD

Minimum Credits: 1

Maximum Credits: 6

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad HSU Basis

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3119 - POLICY DESIGN/IMPLEMENTATION

Minimum Credits: 3

Maximum Credits: 3

Uses concepts, models and strategies for developing new and more appropriate solutions for public policy problems. Analyzes constraints and opportunities surrounding the implementation of public policies and programs. Emphasis on strategies of planned change, dissemination of innovations, and knowledge utilization in the public sector.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3227 - ADVANCED METHODS OF POLICY RESEARCH ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course in advanced methods of policy analysis focuses on four types of methods: -structured analytic techniques used in the intelligence community to make intelligence estimates and to identify national security threats; -problem structuring techniques used to solve ill structured or 'wicked' problems in areas of technology assessment, development planning, intelligence analysis, and economics; -forecasting techniques based on expert judgment which are appropriate when quantitative data are unavailable to make estimates of future states of energy, environment, technology, and related areas; -argument mapping techniques used to assess the quality of scientific and policy reasoning and to enhance critical thinking capabilities among professional policy analysts and planners. The seminar will feature short (30-45 minute) presentations by members of the Security Intelligence Studies (SIS) program and professional analysts, researchers, and trainers in the intelligence community (IC) and elsewhere. Students should note that the methods covered in this course are part of a current analytic reform movement among intelligence analysts and elsewhere in the wider public, private, and nonprofit sectors. The course is open to qualified masters and doctoral students.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3242 - ADVANCED SEMINAR: IN SYSTEMS THINKING AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Based on general theories of systems with a strong emphasis on cybernetics. It aims at laying the foundations for "social systems' cybernetics" -- a contemporary, not-yet conventional mode of thinking about socio-cultural systems for purposes of analysis and synthesis.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3303 - ADVANCED SEMINAR: IN SECURITY AND INTELLIGENCE

Minimum Credits: 3

Maximum Credits: 3

This field seminar is designed to guide graduate students through the large and complex security studies literature. It is intended primarily to help prepare GSPIA Ph.D. students for the foreign and security policy comprehensive exam, but other students are welcome. Students in this seminar will master the foundations of the academic literature on questions like theories of international relations, the balance of power and its effects, causes of war and peace, coercion, foreign policy decision making, nuclear and conventional warfighting, security institutions, terrorism, violent non-state actors, military and humanitarian intervention, the future of

power, and intelligence studies. Due to the vast nature of the security and intelligence studies fields and the limited timeframe of a single semester, we will not be able to cover many of the topics and debates in the literature. By the end of the semester, however, students will have the theoretical frameworks and analytical toolkit necessary to identify, read, and assess the quality of divergent positions on security and intelligence topics we do not cover.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Graduate School of Public and International Affairs students only.

PIA 3317 - LAWS OF WAR

Minimum Credits: 3

Maximum Credits: 3

This course examines the historical development and current role of international humanitarian law ' conventionally known as the laws of war. War, despite its often chaotic appearance, is a highly regulated affair. Understanding the rules can facilitate the creation of better, and more effective strategy, operations, and tactics. Starting with early thinkers seeking to develop common understandings about access to shipping lanes and ending with contemporary debates about topics like torture and the regulation of artificial intelligence on the battlefield, students will grapple with the political, legal, and moral questions of developing, applying, and enforcing rules in wartime.

PUBHLT 2015 - PUBLIC HEALTH BIOLOGY

Minimum Credits: 2

Maximum Credits: 2

This core course will provide an introduction to the biological foundations of many systems that are important in public health. The major determinants of human disease will be considered from an integrated ecological perspective that brings together molecular and population-based approaches to the study of infectious disease (with particular focus on HIV/AIDS, polio, emerging infections, and disease outbreaks following natural disasters) and genetically-determined diseases including "simple" genetic diseases such as cystic fibrosis and "complex" diseases such as hypertension). The host response to infection will be considered, as will the disorders that result from defects in this system, including allergy and asthma. Current developments in genomic science will be covered, including the ethical, legal and social implications of the increased capability to detect and predict disease outcome in individuals and populations. On completion of this course, students will have an understanding of the biological bases of many conditions that are important to public health, and that they will encounter as public health students and practitioners.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 2016 - CAPSTONE COURSE: PROBLEM SOLVING IN PUBLIC HEALTH

Minimum Credits: 2

Maximum Credits: 2

This is the final course in the public health core curriculum. Students will learn and apply a problem solving methodology to analyze current public health issues from local, national, and global perspectives. Working in interdisciplinary groups, students will recommend interventions and evaluation methods to address specific problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: EPIDEM 2110 and (BIOST 2011 or 2041) and BIOST 2042 and PUBHLT 2015 and 2022 and BCHS 2509 and EOH 2013 and HPM 2001

PUBHLT 2018 - OVERVIEW OF LESBIAN, GAY, BISEXUAL AND TRANSGENDER HEALTH DISPARITIES

Minimum Credits: 2

Maximum Credits: 2

Students will review the historical development of lesbian, gay, bisexual and transgender health focus area. The impact of stigma and disparity on the health of populations will be explored. An overview, by systems, of conditions of greater prevalence among lesbian, gay, bisexual and/or transgender populations will be presented and discussed. Students will develop a greater understanding of the health disparities among lesbian, gay, bisexual and transgender populations and develop critical thinking skills regarding the impact of marginalization on the health and wellbeing of subpopulations, using lesbian, gay, bisexual and transgender populations as a model. Course will include lectures and active participation in class discussions. This course will serve as the introductory overview course for the lesbian, gay, bisexual and transgender health and wellness certificate program.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: EPIDEM 2110; PLAN: Graduate Sch of Public Health (CERT-4)

PUBHLT 2019 - PUBLIC HEALTH SPECIAL STUDIES

PUBHLT 2022 - THE DEAN'S PUBLIC HEALTH GRAND ROUNDS

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to socialize our students to the broader profession of public health through engaging them in substantive programs on a wide range of topics that reflect the breadth of public health. This course will enable them to interact with researchers and practitioners from other settings and universities around the world. The course will help to build their capacity to work in interdisciplinary teams to address challenging and complex public health problems. This course requires that all GSPH students (with the exceptions noted below) participate in GSPH sponsored lectures, symposiums, and other events, outside of the classroom, during the first fall and spring terms for which they are enrolled and in residence in Pittsburgh. Two terms are required for graduation. Joint degree students, certificate only students and non-degree students are exempt from this requirement.

Academic Career: Graduate

Course Component: Colloquium
Grade Component: Grad SN Basis

PUBHLT 2023 - PARTICIPATORY MODELING AND SIMULATION IN PUBLIC HEALTH

Minimum Credits: 3

Maximum Credits: 3

Computational modeling and simulation has become central to public health policy design and decision-making at all levels, from local to international. Overwhelmingly, model-building has become an interdisciplinary team effort, in which domain experts (e.g., Physicians, public health professionals, epidemiologists, infectious disease modelers, policy makers, and computer programmers) all participate in constructing models. Unlike courses in modeling proper--where mathematical or programming techniques are taught--this course equips students to be "participatory" modelers (working with programmers and other modelers), and offers hands-on experience in working with programmers, and in evaluating one's collaborative model, through sensitivity analyses and appropriate visualization. Other topics will include how to present model results, how to consume them, and how to match the technique to the problem in public health.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: BIOST 2041; PROG: Graduate School of Public Health; PLAN: Excluded Plans = Epidemiology (PHD, DPH, MPH, MS)

PUBHLT 2024 - GLOBAL HEALTH SEMINAR

Minimum Credits: 1

Maximum Credits: 1

This course explores the field of global health, including the roles and agendas of key actors; ethical and human rights aspects of global health disparities and research and service programs designed to address these disparities; socio-cultural considerations for global health research and service programs; and the rewards and challenges of working in a resource-poor setting or with an underserved population. Students will also be exposed to resources for internships, field placements, and career opportunities in global health. Health and safety issues r/t working abroad will also be covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad HSU Basis

Course Requirements: PLAN: Global Health (CR4) or Peace Corps (TR); LVL: Graduate Year 1

PUBHLT 2025 - CONCEPTS AND METHODS IN GLOBAL HEALTH

Minimum Credits: 2

Maximum Credits: 2

This course is designed for students who plan to work in global health and is required for students enrolled in the GSPH global health certificate and peace corps master's international tracks. The course focuses on public health in low- and middle-income countries and also covers issues related to globalization. The course will provide students with the theoretical knowledge and practical skills needed to 1) identify, collect and interpret health and economic data, 2) produce a report on public health priorities at the country level, and 3) propose a course of action (including activities, partners, and measureable indicators) for a priority health issue.

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PLAN: Global Health (AC or CR4); or SUBPLAN: Peace Corps (PCORPS-TR)

PUBHLT 2026 - GLOBAL HEALTH PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

The practicum provides an opportunity for certificate students to integrate and apply knowledge in global health through a structured, supervised field experience. Learning objectives, assignments, and site are based on the learning needs and career goals of the student and determined in consultation with the certificate director.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

PUBHLT 2027 - TRANSFORMING GLOBAL HEALTH EDUCATION INTO ACTION

Minimum Credits: 2

Maximum Credits: 2

This course is a capstone experience for students in the global health certificate. It is designed to give students the opportunity to apply what they have learned in their training to the challenge of real-world problem-solving in collaboration with individuals and organizations in the developing world. Students will form two teams, and each team will collaborate with experts from a developing

country on a significant health issue in that country. The final product will be a policy paper analyzing the problem and proposing relevant, timely and actionable interventions. This course is different from typical courses that follow a prescribed syllabus. It is a hands-on experience, and for the most part the activities and content of each week will be determined as the course goes along, as students, working in their groups, pursue the background research, consultation, and brainstorming necessary to produce their policy papers. Accordingly there is a great emphasis on independent work (in teams), self-motivation, and active learning.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PREQ: PUBHLT 2025; PLAN: Global Health (CR4)

PUBHLT 2028 - PEACE CORPS MASTERS INTERNATIONAL INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

This course is restricted to students in the graduate school of public health peace corps masters international track and is to be used by students during the peace corps field experience portion of the PCMI program.

Academic Career: Graduate

Course Component: Internship

Grade Component: Grad SN Basis

Course Requirements: SUBPLAN: Peace Corps (PCORPS-TR or PC-TR) or Peace Corps Master's Intl (PCMI-TR)

PUBHLT 2029 - MMPH PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

This course is designed to build and expand upon the experience of the individual student in the MMPH program. The practicum will blend the students existing clinical and/or professional work with additional practical experience with a major public health focus.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad HSU Basis

PUBHLT 2030 - RESEARCH ETHICS AND THE RESPONSIBLE CONDUCT OF RESEARCH

Minimum Credits: 1

Maximum Credits: 1

This course provides an introduction to topics in research ethics and the responsible conduct of research particularly pertinent to basic and non-clinical, population-based research employing a variety of methods. Students will learn key concepts and methods of ethical reasoning and requirements of human subjects' protection and nonhuman animal research, and will analyze historical and contemporary examples of research misconduct, as well as ethical concerns arising in their own work. Using lecture and small group discussion of assigned readings and participants' research, the course will develop students' skills requisite to design and conduct ethical research, avoid research misconduct, and ethically negotiate the tasks and milestones of academic education and careers (e.g. issues of mentorship and publication). Students will be evaluated (by letter grade) on the basis of the quality of their discussion contributions and quiz/exam responses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 2031 - TECHNIQUES FOR PROFESSIONAL WRITING

Minimum Credits: 1

Maximum Credits: 1

This course offers practical experience in a variety of writing styles encountered by professionals. The focus is on communication with general professional and lay audiences rather than on scientific or academic writing. You will learn to recognize communication issues and challenges, understand how they may be addressed in writing, and improve your ability to write effectively within your profession. This course is intended for students who are native and/or confident English writers.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

PUBHLT 3000 - INTRODUCTION TO TRANSLATIONAL RESEARCH IN THE HEALTH SCIENCES

Minimum Credits: 2

Maximum Credits: 2

Course will provide students with a comprehensive survey of the processes involved in translating research discoveries into practices that promote health and prevent disease. The specific topics to be covered include five goals: 1) Introduce students to the NIH roadmap and to discuss the conceptual framework for multidisciplinary and interdisciplinary research. 2) Provide perspectives on objectives outlined at the national level in healthy people 2010/2020 and at the global level by organizations such as the world health

organization. 3) Provide an understanding of the models of translational research. 4) Introduce students to the methods of clinical and translational research. 5) Interpret and explain the drug and therapeutic development process. Also, topics include the implementation of new therapies as standards of care and the application of innovative preventive services. Various research methodologies, including those encompassed in the drug development process will be discussed. Course will offer lectures via electronic media and will use a collaborative learning approach to classroom activities.

BQOM 2039 - SIX SIGMA: THEORY, PRACTICE AND CERTIFICATION

Minimum Credits: 3

Maximum Credits: 3

A wide range of companies have found that when six sigma and lean thinking philosophies are fully embraced, the enterprise thrives. Several definitions have been proposed for six sigma and lean thinking. The threads common to these definitions are: use of teams that are assigned well-defined projects that have direct impact on the organization's bottom line training in "statistical thinking" at all levels and providing key people with extensive training in advanced statistics and project management emphasize the dmaic approach to problem solving: define, measure, analyze, improve, and control. A management environment that supports these initiatives as a business strategy. The purpose of this course is to provide the in-depth knowledge behind six sigma and lean thinking. Also there will be an emphasis on the ability of the students to "transform" the knowledge to solve/do real life projects also based on the performance of the students (projects and the written test), we are exploring the possibility of the students getting a green belt certification from Katz and/or partner companies.

BQOM 2139 - SIX SIGMA THEORY AND PRACTICE

Minimum Credits: 3

Maximum Credits: 3

Six Sigma theory and practice has been designed to provide the student with: "strong theoretical knowledge of the six sigma green belt body of knowledge. Practical, hands-on, experience with the Six Sigma methodology. A Katz Six Sigma green belt certificate, for students earning a grade of "B" or better. Six Sigma is a disciplined, data-driven approach to process improvement aimed at the near-elimination of defects from every product, process, and transaction. Lean topics will be included in this course. Six Sigma utilizes the following five-phase problem solving methodology known by the acronym DMAIC: 1. Define the projects, the goals, and the deliverables to customers (internal and external). Describe and quantify both the defect and the expected improvement. 2. Measure the current performance of the process. Validate data to make sure it is credible and set the baseline. 3. Analyze and determine the root cause(s) of the defects. Narrow the causal factors to the vital few. 4. Improve the process to eliminate defects. Optimize the vital few and their interrelationships. 5. Control the performance of the process. Lock down the gains. To integrate theory and practice, students will be grouped in teams and work under the mentorship of a Six Sigma black belt on an industry client field project.

Course Requirements: CREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2501 - ENTERPRISE SYSTEMS AND INTEGRATION OF BUSINESS PROCESSES

Minimum Credits: 3

Maximum Credits: 3

This course introduces concepts in ERP and integrated nature of business processes. Students are introduced to all the major components of SAP ERP. The course participants in enterprise systems and integration of business processes will gain extensive theoretical foundations of the enterprise resource planning (ERP) using the SAP ERP software. The theoretical knowledge is practically implemented and deepened during the course by the use of case studies and hands-on exercises using the SAP ERP system. After completion of the course, students have a comprehensive, theoretical and practical knowledge of the central SAP ERP modules. This includes the organizational and data structure and the integration of a variety of business processes and functional areas. This course is designed to prepare the student for the SAP ERP10 certification exam. The certification - as completion of the course - will be held at the University of Pittsburgh and is a three-hour, 80 multiple-choice questions based knowledge test. Passing the exam leads to a sap certification widely acknowledged in business: the SAP certified business associate with SAP ERP 6.0. The course addresses the following functional areas of the SAP ERP systems: logistics, finance, controlling and human capital management. Furthermore, the integration with the SAP systems SAP business intelligence (BI) and SAP strategic enterprise management (SEM) is presented.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2511 - REVENUE MANAGEMENT AND PRICING ANALYTICS

Minimum Credits: 2

Maximum Credits: 2

Increasingly, due to shortening product life cycles and capital-intensive capacity decisions, companies are being forced to place greater emphasis on managing constrained, but perishable inventory and capacity. In this course, we study quantity and pricing strategies to improve profitability. The main goals of this course are to provide the insights and tools that will enable students to: (1) be able to identify pricing and revenue opportunities; (2) understand the critical differences among different types of opportunity and the approaches needed to address them; (3) understand key concepts including the impact of constrained capacity, opportunity costs, customer response, demand uncertainty, and market segmentation; and (4) be able to formulate and solve pricing and revenue optimization decisions as constrained optimization problems at the level necessary to estimate potential benefits. The focus of the course will be on imparting a broad understanding and grasp of basic techniques rather than the technical nuances of a particular algorithm.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or BQOM 2411); PROG: Joseph M. Katz Grad Sch Bus

BQOM 2512 - ADVANCED DECISION TECHNOLOGY

Minimum Credits: 2

Maximum Credits: 2

While contemporary decision technologies are increasingly important in today's competitive environment for dealing with complex problems, they can also yield wrong or misleading solutions. The course will consider current applications of these technologies in these areas and students will analyze a variety of cases in these areas using commercial software packages. Emphasis in the course will be given to the potential and limitations in using decision technologies and to alternative approaches to dealing with complex problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2401 and (BQOM 2421 or 2411); PROG: Joseph M. Katz Grad Sch Bus (PKATZ)

BQOM 2516 - PROJECT MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

Project management is a team planning tool that makes use of computer software to support the planning and coordination of a project, or projects. In the course, we introduce the basic concepts of project management and demonstrate the utilization of these concepts using Microsoft project (as well as other software packages).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: CREQ: BQOM 2411 or 2421; PROG: Katz Graduate School of Business

BQOM 2521 - DECISION MAKING COMPLEX ENVRNMNT

Minimum Credits: 2

Maximum Credits: 2

Examines in detail the thought processes of the decision maker when faced with social, personal, business or contemporary political problems. Through the analytic hierarchy process, decision makers use a framework to organize thoughts in a consistent way and to compare elements and criteria which weigh most heavily in arriving at the best alternative among given options.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2523 - PROCESS ENGINEERING

Minimum Credits: 2

Maximum Credits: 2

This course studies the design and engineering of the business processes - the way businesses organize "work" in service as well as manufacturing operations.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2411 or 2421; PROG: Katz Graduate School of Business

BQOM 2524 - PROD MGT & PROCESS IMPROVEMENT

Minimum Credits: 2

Maximum Credits: 2

This course is concerned with the continuous improvement principles involved in the production of goods and services.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2523; PROG: Katz Graduate School of Business

BQOM 2531 - GLOBAL SUPPLY CHAIN MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

A continuation of distribution networks (BQOM 2530).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2411; PROG: Katz Graduate School of Business

BQOM 2533 - GLOBAL SUPPLY CHAIN MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course will consider multi-facility supply and demand network management from all three perspectives: operational, tactical and strategic. We will emphasize the creation and maintenance of value in the supply network, an activity critical to the survival of all organizations. Value creation can be accomplished by increasing revenue (e.g., By making the delivery system more flexible and responsive to the customer) and/or by decreasing cost (e.g., By eliminating unnecessary activities, and efficiently managing the others, from the distribution channel). Topics covered will include those in the shorter version of the course but in more detail. In addition, network design in uncertain situations, inter-organizational partnerships for effective inventory control, and revenue management will

be covered. Using real-life case studies and software packages, we will examine these intricacies of supply and demand network management, learning about the underlying tools, methodologies and decision support systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: CREQ: BQOM 2411 or 2421; PROG: Katz Graduate School of Business

BQOM 2534 - STRATEGIC PROCUREMENT AND SOURCING MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2537 - FORECASTING

Minimum Credits: 2

Maximum Credits: 2

This course will cover traditional forecasting methodologies along with an overview of the state-of-the-art of forecasting with methodologies ranging from judgmental to statistical knowledge sources.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2544 - PROCESS MANAGEMENT AND CONTINUOUS IMPROVEMENT

Minimum Credits: 2

Maximum Credits: 2

This course is intended to study the interactions that govern the efficiency of the process, process of converting raw material in the most efficient way- products and services - resulting in a "satisfied" customer. The course first will focus on the study of process fundamentals. We will then illustrate complementary and contradictory relationships among the non-financial measures of process performance, thereby suggesting ground rules for value based process architecture. We will examine some of these interactions, and discuss general principles and concepts managers need to know to understand the impact of their decisions on the organization as a whole. We will present 'what if' scenarios to facilitate the continuous improvement in the business enterprise.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2546 - PROJECT MANAGEMENT FUNDAMENTALS AND ANALYTICS

Minimum Credits: 2

Maximum Credits: 2

Project management fundamentals and analytics

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: BQOM 2411 or 2421; PROG: Joseph M. Katz Grad Sch Bus

BQOM 2549 - STRATEGIC COST ANALYSIS

Minimum Credits: 2

Maximum Credits: 2

This course deals with strategic implications of alternative methods of product cost measurement. The discussions will primarily be case-based and will cover cost measurement issues in both conventional and modern manufacturing environments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BACC 2401 AND 2528; PROG: Katz Graduate School of Business

BQOM 2578 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is the process of extracting useful information and knowledge from a set of data. Mining is typically done on data sets too

large to be analyzed by hand, but the same techniques are applicable to small, complex data. This course is an introduction to the most popular methods used in managerial data mining, and provides you with experience in using commercial software to explore real data sets. Models considered include those from statistics, machine learning, and artificial intelligence, such as discriminant analysis, logistic regression, clustering, neural nets, tree/rule induction, and association rule modeling. The course is methods oriented, as opposed to being methodology oriented, so you will learn about when and how to use techniques and how to interpret their output rather than the details about how those techniques work. A laptop computer is required.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BQOM 2401; PROG: Katz Graduate School of Business

BQOM 2700 - SUPPLY/VALUE CHAIN MANAGEMENT PROJECT

Minimum Credits: 2

Maximum Credits: 2

This project course is an opportunity for students to apply their management skills and develop their understanding of the challenges of supply/value chain management. In this course a select group of students will work closely with a faculty member to create a specific deliverable that meets the needs of a client organization. This course allows students to engage in experiential learning through a project course that specializes in a topic that may touch one or several of these areas: supply chain management, value chain management, supplier diversity and global sourcing.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2801 - STATSTCL ANAL: UNCERT

Minimum Credits: 3

Maximum Credits: 3

Provides students with a set of integrated statistical tools and methodologies useful in a managerial environment. The emphasis is on the use of real data for modeling and solving problems in the areas of marketing, finance, human resources and operations management. Topics covered include data analysis and modeling, simple and multiple regression (estimation, testing and prediction), analysis and design of experiments, nonparametric statistics and statistical quality control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2811 - DCSN TECHNLOGY IN MFG & OPERATNS

Minimum Credits: 3

Maximum Credits: 3

This course provides a foundation in the use of decision technologies for solving complex management problems in a variety of functional areas. Emphasis is given to the utilization of optimization and simulation. Particular attention is devoted to problems in manufacturing and operations management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 2904 - PROBLEM SOLVING AND CREATIVITY

Minimum Credits: 2

Maximum Credits: 2

There are numerous books and articles written on creativity and problem solving nowadays. Reading them provides information on how other people were able to do their things and be successful. The course will attempt to help students enhance their creativity which will be done by participation and full involvement by the members of the class for the duration of the term.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 3005 - STATISTICS

Minimum Credits: 3

Maximum Credits: 3

Basic stochastic processes and their underlying mathematical theory. Areas covered include the poisson process, renewal theory and

their applications, Markov Chains, regeneration processes, and Markov decision processes.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BQOM 3010 - INDEP STUDY OPERATIONS RESEARCH

Minimum Credits: 1

Maximum Credits: 9

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad HSU Basis

BQOM 3011 - LINEAR PROGRAMMING

Minimum Credits: 3

Maximum Credits: 3

An in-depth coverage of the mathematical properties and algorithms of linear programming including the simplex and revised simplex algorithms, duality theory together with economic interpretations, and the dual simplex algorithm. Discusses special computational techniques for solving large-scale linear programs.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BQOM 3016 - CURRENT TOPICS IN OPERATIONS

Minimum Credits: 3

Maximum Credits: 3

This course is intended to acquaint doctoral students with some of the most important current foci in MS/or by reading papers and listening to outside speakers. Students will be expected to write reviewer-like reports, to develop their own research proposals, and to defend their proposals in a group setting.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 3020 - SIMULATION

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to give an up-to-date treatment of the important aspects of simulation methodology. The topics covered include: modeling and generating stochastic inputs, output data analysis, variance reduction techniques, experimental design and model validation. Application of the simulation techniques in manufacturing, finance, marketing and other functional areas will be explored. An overview of the simulation languages including arena will be given.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BQOM 3023 - DATA MINING SEMINAR

Minimum Credits: 3

Maximum Credits: 3

This course is a primarily methodological and secondarily computational treatment of data mining topics of recent, current, and developing interest in the management science literature. Three subsets of the literature will be covered in depth: (1) data mining papers that have appeared in the KGSB a-journal list; (2) ensemble methods; and (3) optimization-based approaches to data mining. Grading in the course will be based on presentations and a term project. Familiarity with data mining topics and tools at least to the level of BQOM 2578 or equivalent or permission.

Academic Career: GRAD

Radiology

RAD 5330 - IMAGING CLERKSHIP (3 WEEKS)

Minimum Credits: 0

Maximum Credits: 0

Three-week course designed to increase experience in radiology and imaging. Will be accomplished by lectures, seminars and student case presentations. All lectures are at a senior medical student level emphasizing clinical applicability. By course end students are expected to understand basic uses and limitations of anatomic and physiologic imaging modalities in diag. rad., nuc. med., and MRI. Students will be expected to acquire basic understanding of common radiographic studies and understand indications and limitations of different imaging methods used in evaluating common clinical problems.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

RAD 5384 - EXPERIMENTAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students undertaking this elective may join ongoing basic research projects in the laboratory or, with permission, initiate their own projects. Students will be expected to participate in all aspects of their segment of the ongoing research; experimental design, data collection, data analysis and reporting.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5421 - DIAGNOSTIC RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week elective in diagnostic radiology offered to those who wish to gain additional exposure to the field. Students may choose a broad based curriculum which will expose the individual to all areas of radiology or may choose to do a focused radiology elective in angio/interventional radiology, ultrasound, or neuroradiology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

RAD 5422 - ADVANCED RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week intensive elective course in advanced diagnostic radiology for fourth year medical students. The course will include didactic lectures and demonstrations that will be presented by members of the radiology faculty. Students will also gain clinical exposure to radiology in some of the following assignments: thoracic imaging/musculoskeletal imaging/pediatric radiology/abdominal imaging/nuclear medicine/women's imaging/neuroradiology. Students will also have access to the radiology learning lab, teaching files, and other educational materials for individual study. Participants are required to present a comprehensive clinical case with an emphasis on the radiology features pertinent to their case presentation. The case should be of a patient the student encountered in prior clinical rotations. A written examination will be required at the end of the elective.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

RAD 5425 - VASCULAR/INTERVENTION RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A four-week clinical elective. Service covers all aspects of angiographic and interventional procedures below the neck. Diagnostic procedures and common interventional procedures are performed. The medical student will scrub into interventional cases with radiology staff, fellows and residents, attend daily case review sessions, and perform clinical rounds on patients being followed by the interventional radiology service.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

RAD 5430 - NUCLEAR MEDICINE

Minimum Credits: 0
Maximum Credits: 0

Nuclear medicine involves the formulation and use of radioactive substances used as tracers of metabolic processes. They may be used in vitro or in vivo in patients for therapy or for diagnosis where radioactivity is quantified and displayed by various instruments. Students are brought into the service for hands-on demos of the various procedures exemplified by clinical material. The principle routine clinical studies include functional imaging of brain, heart, bones, kidneys, liver, thyroid, adrenal and various neoplasms by means of monoclonal antibodies.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

RAD 5435 - CLINICAL RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0

A four-week elective designed to increase understanding of diagnostic radiology. Students will be assigned to one-week rotations in four different areas: thoracic imaging, musculoskeletal imaging, pediatric radiology, abdominal imaging, nuclear medicine, women's imaging, and neuroradiology.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

RAD 5440 - INDEPENDENT STUDY IN RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0

Elective (4 weeks) is available to senior students with a particular interest in a subspecialty area of radiology. Student will design an intensive, independent study elective with a staff radiologist in the interest area. A written proposal is required to be submitted to the director of undergraduate medical education in radiology outlining the goals and objectives of the elective which has been approved by the faculty advisor. The prospectus is required a minimum of one month in advance of beginning project for credit.

Academic Career: Medical School
Course Component: Independent Study
Grade Component: H/HS/S/LS/U

RAD 5450 - CARDIOVASCULAR RADIOLOGY

Minimum Credits: 0
Maximum Credits: 0

This four-week clerkship allows a student to become involved in the clinical and experimental activities of an active cardiovascular radiology section. Patient evaluation, treatment, and follow-up are stressed and experimental invasive therapies are evaluated.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

RAD 5620 - CLINICAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0

This four week elective offers the student instruction and experience in clinical radiation oncology and an intro to radiotherapy physics at the joint radiation oncology center. Facilities will be at the university medical center, Magee Women's Hospital and Shadyside Hospital. The student will spend time with faculty members in consult, exam, treatment and follow-up of the particular subgroups of malignant disease managed by the individual physician. Student will attend department conference, treatment planning sessions, operative radioactive isotope insertion, etc.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

RAD 5630 - INTRODUCTION TO CLINICAL RADIATION ONCOLOGY

Minimum Credits: 0
Maximum Credits: 0

This four-week clinical elective offers the student instruction and experience in clinical radiation oncology and an introduction to radiobiology and radiation therapy physics in the Department of Radiation Oncology. The student will spend time with faculty

members in consultation, examination, treatment, management and follow-up of the particular subgroups of malignant disease managed by the individual physician. The student will attend departmental conferences, treatment planning sessions, radiosurgery planning and treatment, operative radioactive isotope insertions, etc. The student will be introduced to the physics aspects of radiation therapy. The elective is planned so that each student will have the opportunity to obtain an overall view of the field of radiation oncology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

RAD 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5651 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5826 - EXPERIMENTAL RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

Students undertaking this four week elective may join ongoing basic research projects in the lab or with permission, initiate their own related projects. This lab is involved in evaluating the role of biologic response modifiers on hematopoietic recovery after treatment of tumors in mice. In addition, we are inserting genes into hematopoietic stem cells that contain them. Objectives are experimental design, cell collection and counting, sizing and culture and DNA isolation. Involvement expected in ongoing research, experimental design, data collection, analysis and report.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5827 - EXPERIMENTAL DIAGNOSTIC RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This 4 week elective is designed for the student interested in a career in radiology and who wishes to pursue a research project. The student needs to find a radiology faculty member who is willing to collaborate in a research project. These research projects can vary according to the combined interest of the student and the faculty preceptor. The student and faculty preceptor need to submit a written research proposal before this elective can be approved.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5840 - RADIATION ONCOLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This elective provides research project opportunities in radiation oncology to interested and motivated students. Project areas include clinical studies, prospective or retrospective clinical studies, creating a database, evaluating outcomes of solid tumors. The objective is to teach the basic approach to research in the specialty.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

RAD 5841 - RESEARCH IN RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

This elective is available to interested and motivated students. This elective provides opportunities to learn basic research methodology which may include approach to experimental design, protocol development, data analysis and evaluation of results. Student may participate in ongoing research in the lab and on patients.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

RAD 5899 - INDEPENDENT STUDY IN RADIATION ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

RAD 5900 - EXTRAMURAL RADIOLOGY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in radiology may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School

REL 2366 - RELIGION IN INDIA: STORYTELLING AS A RELIGIOUS FORM

Minimum Credits: 3
Maximum Credits: 3
This seminar, subtitled storytelling as a religious form, focuses on the religious life of India as expressed through storytelling. Central to this life are rich and diverse narrative traditions, both oral and written, some of which have their roots in the ancient Vedic literature, in the famous epics of the Mahabharata and the Ramayana, in popular folk tales or philosophical debates.
Academic Career: Graduate
Course Component: Seminar
Grade Component: Grad Letter Grade

REL 2400 - EAST ASIAN BUDDHISM

Minimum Credits: 3
Maximum Credits: 3
The transmission of Buddhism to East Asia was a momentous development in the history of world cultures and religions. Not only did it precipitate major changes in the cultures of China, Korea and Japan, it also was attended by a transformation within Buddhism itself. Beginning with an introduction to the basic concepts of Buddhism, this course examines the major doctrinal, meditative, devotional, and institutional traditions and themes within Chinese and Japanese Buddhism in historical perspective. Particular attention is paid to the problems of transmission of thought from one culture to another and to the ways in which Buddhism changed to meet those challenges and make itself relevant to the members of East Asian traditions. This seminar is offered in conjunction with RELGST 1550: East Asian Buddhism.

REL 2410 - RELIGIONS OF CHINA

Minimum Credits: 3
Maximum Credits: 3
This course examines the major traditions and themes that constitute religion in China. The origins and development of Confucianism, Daoism, Buddhism, popular and family religion, and religion and the state are presented within an overall historical framework. In addition to the study of religious ideas, practices, and institutions in pre-modern China, contemporary beliefs and practices and issues of politics, class, and gender are also examined in relationship to, and as reinterpretations of, older themes. This seminar is offered in conjunction with RELGST 1560: Chinese religious traditions

REL 2420 - JAPANESE RELIGIOUS TRADITIONS

Minimum Credits: 3

Maximum Credits: 3

This course provides an historical overview of religion in Japan from the 3rd century BCE up to the present. It introduces many of the events, texts, doctrines, institutions, personalities, and practices in the history of religion in Japan and examines issues related to myth, shamanism, ritual, art, and politics. This seminar is offered in conjunction with RELGST 1570: Japanese religious traditions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

REL 2422 - POPULAR RELIGION IN A CHANGING JAPAN

Minimum Credits: 3

Maximum Credits: 3

The majority of Japanese today claim not to have any religious faith but most participate in religious activities. Why is this? Those Japanese who do espouse religious faith often pray at both Buddhist temples and Shinto Shrines without feeling conflicted. How is this possible? To answer these and other questions, religion in contemporary Japan is examined primarily on the basis of ethnographic studies. This seminar is offered in conjunction with RELGST 1572: popular religion in a changing Japan.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

REL 2705 - MYTH, SYMBOL AND RITUAL

Minimum Credits: 3

Maximum Credits: 3

Myths, symbols and rituals of different cultures are explored comparatively as to their significance, role and overall relationship to one another.

REL 2805 - SAINTS EAST AND WEST

Minimum Credits: 3

Maximum Credits: 3

A Russian monk once observed that "each saint is a unique event." Indeed, in various religious traditions we encounter men and women who are recognized and venerated as particularly holy and unique witnesses to the divine. Just as each saint is unique within his or her tradition so is each tradition of saints unique in its articulation and expression of the overall religious culture. By looking cross-culturally at materials on saints and problematizing the notion of sainthood itself, we examine religious themes, ideas and symbols found in them. These diverse writings are often marked by a very personal tone, a deeply felt relation with the divine (sometimes reflecting a saint's inner struggles, sometimes his/her mystical experience of union), but also by pleas and calls for social and/or religious reforms. Our examples of devotional literature include Hindu, Muslim and Christian sources, medieval as well as modern. This seminar is offered in conjunction with RELGST 1540: Saints East & West.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

REL 2807 - MYSTICISM EAST AND EAST

Minimum Credits: 3

Maximum Credits: 3

Mysticism, understood as a living experience of theological doctrines, constitutes an unexpected point of convergence between such different religious traditions as Hinduism and Eastern Orthodox Christianity. We look into how this spiritual kinship is forged from distinct practices in India and in the traditions of Orthodox Christianity by examining the selected mystical writings of the Hindu sages and holy men and women of the orthodox church, past and present. The course is structured around three central themes: god as mystery: negative theology (Hindu and orthodox ways of unknowing the divine), god as person: the Hindu notion of avatar and orthodox understanding of incarnation, and god as prayer: two selected methods of contemplation (Hindu yoga and Orthodox Hesychast prayer). This seminar is offered in conjunction with RELGST 1545: Mysticism East & East.

RESTD 5111 - DENTAL ANATOMY AND MORPHOLOGY

Minimum Credits: 2
Maximum Credits: 2

In this course, students will develop a practical understanding of tooth anatomy, structure, function, and related terminology; the relevance of these anatomic features to the practice of clinical dentistry will be emphasized. This course includes lectures and class discussions. The accompanying laboratory course, RESTD 5115, provides an opportunity for hands-on experiences in a preclinical setting.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

RESTD 5115 - DENTAL ANATOMY AND MORPHOLOGY LAB

Minimum Credits: 1
Maximum Credits: 1

In this course, students will be presented with the anatomy of the primary and permanent teeth on a practical level, focusing particularly on the size, shape, contours, and anatomic features of the individual permanent teeth, and teaches the student how to visualize and reproduce the contours clinically. The primary goal of this course is for the student to be able to identify the primary and

permanent teeth, and to be able to visualize the size, shape, contours, and anatomic features of the individual permanent teeth both radiographically and in person. A secondary goal is to develop and practice manual dexterity skills that are essential to later courses and in the profession of dentistry. This course includes small group lab sessions.

Grade Component: Grad Letter Grade

RESTD 5143 - PRINCIPLES OF OPERATIVE DENTISTRY 1

Minimum Credits: 2

Maximum Credits: 2

This amalgam restorations course considers the terminology, principles and procedures of the following basic concepts in clinical operative dentistry: 1. Moisture control and soft tissue management of the operating field, 2. Rotary and hand instrumentation, 3. Dental caries, 4. Cavity preparation and restoration of all teeth using amalgam alloy, 5. Pulpal protection - varnished, liners and bases, 6. Occlusion, and 7. Dental biomaterials amalgam.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

RESTD 5147 - PRINCIPLES OF OPERATIVE DENTISTRY 1 LABORATORY

Minimum Credits: 2

Maximum Credits: 2

This course provides the opportunity to develop psychomotor skills in the following operative procedures: 1. Rubber dam isolation, 2. Instrumentation, 3. Dental caries detection, 4. Preparation of various amalgam cavity preparations, 5. Placement of pulpal protection, 6. Restoration and various cavity preparations with amalgam, and 7. Occlusal adjustments.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Grad Letter Grade

RESTD 5172 - PRINCIPLES OF OPERATIVE DENTISTRY 2

Minimum Credits: 1

Maximum Credits: 1

In this course, students will be prepared with the operative dentistry knowledge and techniques to successfully restore the dentition utilizing composite resin materials. Additionally, the student will learn adjunctive esthetic information and alternative treatment modalities. This course will provide the foundational knowledge to allow the student to understand and apply the basic principles of preparation design, adhesion, and finishing of composite restorations in the pre-clinic environment. This course includes lectures and class discussions.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Letter Grade

RESTD 5176 - PRINCIPLES OF OPERATIVE DENTISTRY 2 LAB

Minimum Credits: 2

Maximum Credits: 2

This pre-clinical lab course is given in conjunction with the lecture course for composite resin restorations, RESTD 5172 Principles of Operative Dentistry 2. In this course, students will acquire the psychomotor and instructional skills in treating Class I, II, III, IV, V lesions using bonded composite restorative materials. Students will also learn to restore cuspal fractures and place sealants using bonded resin materials. The student will learn how to properly evaluate their finished restorations for form, function and esthetics.

Academic Career: Dental Medicine

Course Component: Practicum

Grade Component: Letter Grade

RESTD 5244 - GERIATRICS

Minimum Credits: 1

Maximum Credits: 1

Students will be introduced to the concepts of geriatrics and the multidisciplinary approach to the treatment of the geriatric patient in traditional and non-traditional settings. Guest lecturers will be invited to provide information germane to their specific fields.

Academic Career: Dental Medicine

Course Component: Lecture

Grade Component: Grad Letter Grade

RESTD 5281 - PRINCIPLES OF OPERATIVE DENTISTRY 3

Minimum Credits: 1

Maximum Credits: 1

In this course, students will continue to develop their skills in operative dentistry by reviewing the amalgam and composite preparations and restorations, which were taught in the first year curriculum, and completing them on assigned typodont teeth. This course is primarily a pre-clinical lab course. Students will continue to develop psychomotor skills to properly prepare and restore teeth using both amalgam and composite restorative materials.

RESTD 5375 - ESTHETIC RESTORATIVE DENTISTRY

Minimum Credits: 1
Maximum Credits: 1

According to a report published in the Journal of Health Affairs, consumer spending in dentistry, which was \$60 billion in 2002, surpassed \$84 billion in 2005, and government actuaries predict annual increases of 6.3 to 6.9% in expenditures to reach \$146.9 billion by 2014. It is now estimated that nearly 70% of the total consumer spending in dentistry is spent on esthetic dentistry. New concepts in esthetic dentistry involve more than merely providing porcelain veneers, they encompass a broad approach to the total esthetic needs of patients. "Esthetic Restorative Dentistry" builds on the sound principals of restorative dentistry presented through the student's first three years. This course introduces the student to the basic knowledge, materials, armamentarium, and clinical procedures that constitute the modalities of esthetic restorative dentistry. Students will understand how in combination each modality builds the foundation for interdisciplinary patient management. Students graduating from dental school in 2014 and beyond must have the opportunity to learn and explore the special methods of esthetic restorative dentistry as today's esthetic dentistry is supported by new developments, innovative techniques, and a wealth of new scientific data.

Academic Career: Dental Medicine
Course Component: Lecture
Grade Component: Grad Letter Grade

RESTD 5379 - CLINICAL RESTORATIVE DENTISTRY 1

Minimum Credits: 2
Maximum Credits: 2

This course is designed to provide clinical experiences in the area of restorative dentistry for predoctoral dental students. By the end of the fourth year of the curriculum, students will be able to demonstrate competence in restorative dentistry for dental patients at the level of a general dentist and will participate in a variety of additional experiences to increase skills in restorative dentistry.

RUSS 2105 - DEVELOPING ENHANCED RUSSIAN READING PROFICIENCY 2

Minimum Credits: 3

Maximum Credits: 3

Through guided intensive reading of authentic primary and secondary texts in Russian culture, enrolled graduate students will further develop their ability to read such texts comfortably and use them effectively in their academic and professional careers. This is the second course in the sequence.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad SN Basis

RUSS 2110 - INTRODUCTION TO THE STUDY OF LITERATURE 1

Minimum Credits: 3

Maximum Credits: 3

Open to all graduate students of literature. A certain emphasis will be placed on Russian literary history, criticism and theory but all readings will be available in Russian and English. Includes a variety of approaches to literature analyzed both in terms of historical perspective and underlying perceptions of human nature, and in terms of their methodological and theoretical contributions to the systematic study of literature.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2113 - BAKHTINIAN CRITICISM

Minimum Credits: 3

Maximum Credits: 3

Aimed at graduate students with an interest in literature. Literary criticism and theory, communication, and philosophy, this course introduces them not only to Bakhtin's major works on language and the novel, but also to contemporary Bakhtinian readings of well-known Russian works of fiction.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2210 - STRUCTURE OF RUSSIAN

Minimum Credits: 3

Maximum Credits: 3

Required of Russian teaching assistants, this course approaches Russian inflectional and derivational morphology from two points of view simultaneously: how to describe it linguistically, and how to describe it to an English speaking elementary learner of Russian. Finer points of Russian sound and word structure are examined. The concepts of basic linguistic analysis are elaborated on the

example of Russian material. This course is preparatory for the departmental comprehensive examination section on descriptive Russian linguistics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2230 - HISTORICAL GRAMMAR

Minimum Credits: 3

Maximum Credits: 3

A course required of graduate specialists in linguistics. This course traces the history of Russian grammatical structure from its state in common Slavic to the present day, concentrating particularly on the development of the verbal and nominal inflectional systems, and on the phonological system. To the extent possible, the course traces dialectical differences among the East Slavic languages, and among the major dialects of Russian.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2300 - PUSHKIN

Minimum Credits: 3

Maximum Credits: 3

This course studies the biography and all major works of the greatest Russian author (1799-1837). This graduate seminar is conducted in Russian.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2302 - GOGOL

Minimum Credits: 3

Maximum Credits: 3

This is a graduate course conducted in Russian. It involves a chronological study of Gogol's life and works, and an analysis of Gogol's themes, characters, and artistic devices as well as his world outlook.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2306 - DOSTOEVSKY

Minimum Credits: 3

Maximum Credits: 3

This is a graduate course conducted in Russian which covers the life and major works of Fyodor Dostoevsky.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2307 - CHEKHOV

Minimum Credits: 3

Maximum Credits: 3

The three major aspects of Chekhov's art will be examined the humoristic stories and sketches of his youth, the typical Chekhovian story of his middle period, and his plays. Chekhov's place in the context of Russian literature and his importance as an original and modern playwright, as well as his lasting contribution to the understanding of modern characters and situations will be assessed. This is a graduate seminar conducted in Russian.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2308 - TOLSTOY

Minimum Credits: 3

Maximum Credits: 3

This is a graduate seminar on the literary works of Russian author Leo Tolstoy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2310 - NABOKOV

Minimum Credits: 3

Maximum Credits: 3

A survey of the major writings of Vladimir Nabokov, including novels and short stories from both the Russian and American periods. Discussion topics will include: the semiotics of life-creation, art as perversity, author-hero dynamics, exile and nostalgia, bilingualism and translation, the violence of linguistic play, the manipulation of narrative desire; modernism and postmodernism.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

RUSS 2410 - LATE 17TH AND 18TH CENTURY LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course covers the history of Russian literature, beginning with the prepetrine reforms and ending with the reign of Alexander I. Includes discussion of the problems of Russian baroque, sentimentalism, classicism, and pre-romanticism. This is a graduate course conducted in Russian.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2464 - SPECIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2473 - EMPIRE AND NATION

Minimum Credits: 3

Maximum Credits: 3

Empire and nation examines selected literary and visual texts over four centuries with a concern for their engagement with social crises, specifically multiple collapse of the imperial structure and the so-called emergence of the nation state. Secondary texts include Gellner, Hroch, Anderson and Jameson.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2600 - RUSSIAN POETRY 19TH CENTURY

Minimum Credits: 3

Maximum Credits: 3

This graduate course will survey rich and vital poetic traditions of 19th century Russia, beginning with the verse of late Derzhavin, Zhukovsky, and Pushkin, reviewing the work of Baratynsky, Tiutchev, and Lermontov, and concluding with readings of Nekrasov and Fet.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2621 - RUSSIAN DRAMA

Minimum Credits: 3

Maximum Credits: 3

Covers the history and development of Russian drama from the 17th century to symbolism, including analysis of the best Russian plays of Pushkin, Gogol, Chekhov et al.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2623 - RUSSIAN DRAMA BEFORE GORKY

Minimum Credits: 3

Maximum Credits: 3

The course will trace the history of drama and theatrical performance in Russia from the establishment of serf theaters on Russian estates in the 18th century to the rise of public and professional theaters. Starting with neo-classicism (Sumarokov), the course will

examine satire (Fonvizin, Kniazhnin, Griboedov, Gogol), romantic and realistic tragedies (Pushkin, Ostrovskii, Turgenev, Chekhov), and end with the rise of naturalism (Gorky).

Academic Career: Graduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

RUSS 2624 - RUSSIAN LITERATURE IN MUSIC

Minimum Credits: 3

Maximum Credits: 3

This course explores Russian literature as interpreted in music. Students will read works of Russian poetry and prose, then examine the "transposition" of the works into media such as opera, ballet, and song cycle. The syllabus includes (among others) such authors as Mussorgsky, Tchaikovsky, Rimsky-Korsakov, and Desiatnikov.

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2638 - RUSSIAN AND SOVIET CINEMA 1896-1934: LUMIERE TO LENIN

Minimum Credits: 3

Maximum Credits: 3

Although the Russian film industry does not begin to take shape until Aleksandra Drankov's Sten'ka Razin (1907), moving images were first introduced to the Russian empire in May 1896, when the Lumiere brothers both screened the first films in the empire and arranged to shoot the first film footage in the country - the coronation of Tsar Nikolai II. The course will examine the history of the russo-soviet film from 1896 through the displacement of the cult of Lenin by Stalin's image in the late 1930s. Films to be screened include Chardynin's and Protazanov's adaptations of queen of spades (1910 and 1917), Bauer's the revolutionary (1917), room's bed and sofa (1927), Alexandrov's circus (1936), and Kalatozov's Chkalov (1941). Special emphasis will be placed on the work of the soviet directors associated with "soviet expressive realism": Kuleshov, Eisenstein, Pudovkin, Vertov, and Dovzhenko.

RUSS 2639 - SOVIET CINEMA 1934-1953: STALIN AT THE MOVIES

Minimum Credits: 3

Maximum Credits: 3

The imposition in 1934 of socialist realism as the exclusive method available to soviet cultural producers and the release of the "Vasil'ev brothers", Chapaev later that year permanently transformed the soviet film industry. Stalin established total control of the industry both by appointing his personal representatives to control all stages of film production and by consolidating himself as "spectator number one," not only prescreening all films prior to their release, but eventually by establishing himself as a dominant presence on the silver screen. Films to be screened include Alexandrov's circus (1934), Kozintsev and Trauberg's "maxim trilogy" (1934-38), Dovzhenko's Aerograd (1935), Dzigan's we are from Kronstadt (1936), Rmm's Lenin in October (1937), Lukov's two soldiers (1943), Eisenstein's Alexander Nevsky (1938) and Ivan the terrible (1944-46), pyr'ev's cossacks of the Kuban (1949), and Chiaureli's trilogy devoted to comrade Stalin (1946, 1949, and 1951).

RUSS 2640 - POST STALINIST CINEMA

Minimum Credits: 3

Maximum Credits: 3

Stalin's death (1953) and the start of Khrushchev's destalinization campaign (1956) not only disrupted the stability of the pre-existing interdependence between the ruling political elite and the national film industry, but also fundamentally altered the interrelationship between the film industry and the Russo-Soviet viewing public. The course will examine the changes in this triangular model through the four major periods in Russo-Soviet history since the death of Stalin: 1953-64 (the thaw), 1964-1985 (stagnation), 1986-1991 (perestroika), and post-1991 (the re-emergence of the Russian national state). Films to be screened include Kalatozov's The Cranes are

Flying (1957), Chukhrai's Ballad of a Soldier (1959), Tarkovskii's Ivan's Childhood (1962), Askol'Dov's Commissar (1967; 1987), Pichul's Little Vera (1988), Lungin's Taxi Blues (1990), Mikhalkov's Burnt by the Sun (1994), and Balabanov's Cargo 200 (2007).

RUSS 2700 - MEDIEVAL RUS'

Minimum Credits: 3

Maximum Credits: 3

This graduate course is a survey of old Russian literature beginning with the primary chronicle and concluding in the late 16th and early 17th centuries. Readings will include both primary materials and modern Russian translations of old Russian texts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

RUSS 2780 - STALINIST CULTURE IN THE 1930'S

Minimum Credits: 3

Maximum Credits: 3

This course surveys the aesthetics, politics, thought, and everyday life of the Soviet 1930s. The course explores the conceptual foundations of Stalinist culture through the period's art, literature, film, journalism, and ruling ideology. A major focus of the class is Stalinism's frenzied, often contradictory construction of cultural identity. Examining both official discourse and the everyday realities of Soviet life, the course investigates how representations of the utopian project of building socialism were interconnected with Soviet citizens' actual experience. Graduate students are required to complete additional assignments for full credit.

SLAV 2451 - FILM HISTORY/THEORY I

Minimum Credits: 3

Maximum Credits: 3

This seminar will focus on the history and theory of cinema up to 1960, taking up such topics as: the origins of cinema; the development of narrative; the rise of Hollywood and its global appeal; national and international cinemas; the relation between film and the other arts; the coming of sound; arguments between realist and modernist movements; the avant-garde; and the technological and social history of cinema. These topics will be addressed through consideration of major film movements and significant films. Students will also be introduced to key theorists from this time, including Kuleshov, Vertov, Eisentein, Balzs, Mnsterberg, Lindsay, Epstein, Kracauer, Benjamin, Arnheim, Bazin, and others.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SLAV 2452 - FILM HISTORY/THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This seminar will focus on the history and theory of cinema from 1960 to the present. While individual theorists and historians will be discussed (e.g., Cavell, Deleuze, Frampton, Kluge), there will be special attention paid to historical and theoretical arguments within film studies: psychoanalysis and theories of spectatorship; apparatus theory; historicism and archival research; film and philosophy; theories of genre, adaptation, and performance; neo-formalism and cognitive theory; and the rise of new media, from television to digital cinema and from IMAX to video games. These arguments will be explored through major film movements and film-makers, taking up topics such as international art cinema, the changing Hollywood studio system, the role of political cinema, and the growing importance of documentaries.

SLAV 2802 - IMAGINATIVE GEOGRAPHIES IMAGINATIVE GEOGRAPHIES IMAGINATIVE GEOGRAPHIES

Minimum Credits: 3

Maximum Credits: 3

Traced from Said's orientalism (part two, chapter one), this term alternates in academic discourse with "imagined geographies" and "imaginary geographies." Relatively indifferent to these distinctions, the seminar moves from Said, to (in all likelihood) in Derek Gregory (geographical imaginations), O.R. Dathorne (imagining the world), Michel de Certeau ("walking in the city"), Michel Foucault (on heterotopias), then to Samuel Huntington (clash of civilizations) and Halford Mackinder ("the geographical pivot of history"). Some primary/secondary readings will be specific to Slavic (the Petersburg text; Iurii Lotman's semiosphere); other primary/secondary readings will be tailored to the participants' disciplinary expertise. The seminar's key questions concern the ways in which apparently inert and straightforward accounts of geography are marshalled for projects of social coordination, ideological division, and narratives of belonging.

SLAV 2905 - FILM STUDIES PROSEMINAR

Minimum Credits: 1

Maximum Credits: 1

All students in the Ph.D. in film studies program are required to complete a one credit proseminar in film and media studies prior to taking their comprehensive examinations. Enrolled student attend a designated lecture by an invited scholars, as well as an associated ninety-minute seminar conducted by a film studies faculty member and concerning the work of the speaker or the topic addressed. The faculty member conducting the seminar will typically choose pertinent readings to be completed prior to the lecture and seminar. The proseminar is usually offered twice a year: once during the fall term and once during the spring, with a lecture and its associated seminar scheduled each term. Invited scholars may or may not participate in the seminar meetings. Dates and times of visiting speakers and the associated seminars will be announced well in advance so that students may plan their schedules accordingly. A student in the program may repeat the proseminar for up to three credits. The proseminar in film and media studies seeks to expand and enhance our graduate students' experience of the critical exchange of ideas, by involving them more fully in the contemporary research being conducted by film and media scholars from around the world.

Course Requirements: PREQ: SWRES 2021 and SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWWEL 2056 - HEALTH SYSTEMS AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Building on a background knowledge in social welfare, this course focuses on issues and problems in the U.S. healthcare system including the historical development of health care, the structure and function of the healthcare system, current and proposed financing mechanisms and the social, political and ethical issues which shape healthcare policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2057 - MENTAL HEALTH AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Historical development of mental health policies and the structure of the mental health delivery system and the policies and legal base that guide it. Special emphasis is given to how policies affect the care of persons with chronic mental illness.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2059 - CHILD AND FAMILY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course reviews the life of children in the U.S. From 1600 to present. It is based on the work of Robert Bremner and an analysis of early legislation and legal actions. It also deals with children in their problems of maturing, and the state of Pennsylvania's laws which deal with children. Each student is assigned to visit and report on a home, i.e. day care, emotionally disturbed, mentally retarded, foster care.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: Direct Practice (Social Work-MSW)

SWWEL 2081 - SOCIAL WELFARE

Minimum Credits: 3

Maximum Credits: 3

The course focuses on the historical development of the field of social welfare including major legislation. Current issues of poverty and related problems, the health care delivery system, and criminal justice are discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWWEL 2087 - ORGANIZATIONS AND PUBLIC POLICY

Minimum Credits: 3

Maximum Credits: 3

Introduced as a new course in the COSA concentration in community practice, this seminar emphasizes and examines relationships between public policy and organizational behavior. Particularly attentive to the influence of political and economic variables on human service institutions. The course examines selected historical phenomena in order to better understand future prospects.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWWEL 2081; SBPLAN: COSA (Social Work-MS)

SWWEL 3030 - EVAL OF AMERICAN SOCIAL WELFARE

Minimum Credits: 3

Maximum Credits: 3

Emphasizes a conceptual and analytical approach to the study of American social welfare. Extending from the Elizabethan poor laws to the 1930s new deal, and to the present, it deals with social welfare in relation to a number of central themes in American society, including the interaction among the ideologies of individualism, voluntarism, and collectivism; the conflict between opportunity-mobility and security objectives; and the nature of the social reform and social control processes in a pluralistic society.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: School of Social Work students only.

SWWEL 3037 - SOCIAL POLICY ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course provides students with a basic understanding of the dimensions of public social policy and the acquisition of the skill required to use a conceptual model to analyze policy. Particular attention is paid to the value and ideological dimensions of social welfare policy.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWWEL 3059 - CHILD AND FAMILY POLICY

Minimum Credits: 3

Maximum Credits: 3

This course reviews the life of children in the U.S. From 1600 to present. It is based on the work of Robert Bremner and an analysis of early legislation and legal actions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWWEL 3060 - CHILD AND YOUTH POLICY

Minimum Credits: 3

Maximum Credits: 3

This course addresses key issues in child and youth policy through the critical analysis and application of social, cultural, philosophical, psychological, and biological theory. Starting from work of John Rawls, students will develop an understanding of various philosophical frameworks pertaining to issues of equality, distribution, and liberty and will use these principles to articulate a conception of social justice to guide child and youth policy. The class will then move to consider the role of psychological and biological theories and their relationship to and meaning for child and youth policy. Following this discussion, the class will turn to

critical social and cultural theories and will debate the implications of these perspectives for the ways in which we think about and treat young people.

Social Work Continuing Educ

SWCED 2004 - INTRODUCTION TO INTERGENERATIONAL PROGRAMS

Minimum Credits: 2

Maximum Credits: 2

This course is an on-line, interactive experience based on the 13-year success of generations together intergenerational training program at the University of Pittsburgh. The on-line course is designed to help you develop the skills needed for success in the intergenerational field. Students read course materials, do on-line assignments, discuss the content with fellow students and instructors, and follow step-by-step procedures to complete the individual units. After you have completed the course, you will have a better understanding of skills needed to develop intergenerational programs and how to apply them and be able to: explain the rationale for intergenerational programs as a social intervention model. Formulate a design/plan for an intergenerational program. Develop a process to engage community support for intergenerational programming. Develop the basic skills to implement intergenerational program components. Recruit, train, and manage participants and staff in intergenerational programming. Evaluate an intergenerational program.

SWGEN 2005 - POVERTY & INCOME INEQUALITY: SOCIAL RESPONSES

Minimum Credits: 3

Maximum Credits: 3

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

SWGEN 2007 - SOCIAL WORK AND THE LAW

Minimum Credits: 3

Maximum Credits: 3

This course will provide students with a basic understanding of the law, legal processes, and legal systems as they relate to social work practice and an introduction to the field of forensic social work. The course will challenge students to think about the variety of ways that social work practice, social policy, and law intersect. In particular, it will focus on specific aspects of the intersection between law, policy, and practice, including: the significance of courts and case law to issues of social justice, the intersection of social work and law on issues of significance to social workers, models of legal reasoning/decision making, the role of social workers in legal proceedings, the role of social workers in using the law for social reform or protection of civil rights, the use of social science by courts, legal regulations and case law that influence social work practice, and tensions between the law and social work values and ethics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2034 - SOCIAL WORK PRACTICE WITH DIVERSE POPULATIONS

Minimum Credits: 3

Maximum Credits: 3

This course focuses on issues of cultural diversity and oppression. Students are prepared to practice with, and on behalf of, diverse populations using empowerment as a guiding frame of reference.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWGEN 2058 - FEMINIST SOCIAL WORK

Minimum Credits: 3

Maximum Credits: 3

This course focuses on gender and social work, beginning with a critical examination of the concept of feminist practice, with attention to oppression, power, and privilege in helping relationships and in women's lives more broadly. It explores meanings of gender as it intersects with race/ethnicity, class, sexuality, age, and ability in the lives of women in general and specifically as social workers and clients. Taught in a seminar format, this course examines topics such as work, welfare, family, violence, justice system involvement, health, mental health, and women as agents of change and is appropriate for students concentrating in micro or macro levels of practice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2062 - ADVOCACY AND LOBBYING

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of how a nonprofit organization can engage in effective public policy advocacy and lobbying on behalf of its mission and the people it serves. Advocacy includes a broad range of activities, which attempt to influence a specific policy, legislative, regulatory or implementation outcome. Social workers play critical roles in the advocacy process, policy analysis, issue development, public education, constituency organizing, lobbying, voter engagement, and creating an entire advocacy campaign. This course will focus on the best practices to deepen your understanding of advocacy tools, processes, and models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWGEN 2080 - RACE AND SOCIAL PROBLEMS

Minimum Credits: 3

Maximum Credits: 3

Students will learn about race-related social problems, explanations for the problems, and possible solutions. Readings and class discussions will cover race as an issue in relation to economic and education disparities, intergroup relations, mental health, families, and criminal justice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: SWGEN 2098 and SWBEH 2063 and SWWEL 2081

SWGEN 2088 - SPECIAL TOPICS

Minimum Credits: 1

Maximum Credits: 3

Given the changing nature of social work practice and social welfare policy, the MSW program occasionally offers courses in new and/or unique content. When offered, this course is designed to provide skill and knowledge content not covered in other MSW courses.

Academic Career: Graduate

Course Component: Directed Studies

A doctoral course in which the student defines the topic area and obtains approval for it from a member of the faculty who serves as his/her mentor.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SU3 Basis

SWGEN 3039 - COMPREHENSIVE STUDY

Minimum Credits: 1
Maximum Credits: 9

This would be limited to students who have completed all courses but have not yet passed the exam, or have two or fewer courses to take and need to be full-time. Students may register for up to nine credits, and may register twice at most. The advisor will serve as faculty of record.

Academic Career: Graduate
Course Component: Thesis Research
Grade Component: Grad SN Basis

SWGEN 3044 - THEORY 1

Minimum Credits: 3
Maximum Credits: 3

The general issues involved in applicability of social science theory provides a framework for an exploration of selected social psychological theories. Concepts from role theory, interrelated with socialization and behavioral theories, are presented and analyzed. Students will then apply selected theoretical concepts to a social problem area of their choice, in order to assess the theory's contribution to an understanding of the problem.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWGEN 3053 - THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This course covers macro social science perspectives relevant to social work: economic, organizational and social control aspects of society. Classical theories (Marx, Weber, and Durkheim) are studied and applied to particular social problems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWGEN 3066 - SEMINAR IN SOCIAL WORK EDUCATION

Minimum Credits: 3

Maximum Credits: 3

History of social work education, accreditation, and design of foundation curriculum. Selecting educational objectives, teaching methods, evaluation of student performance, and careers in social work education.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWGEN 3077 - MULTICULTURAL GROUPS IN CONTEXT: A RESEARCH PERSPECTIVE

Minimum Credits: 3

Maximum Credits: 3

This seminar presents relevant theory and research describing the ethno cultural context of multicultural families, groups, and individuals; and the way in which culture, diversity, sexual and racial identity impacts the social strata of different groups in our society. Consistent with the mission of professional social work, emphasis is placed on bi-racial, Hispanics, native Americans, and other diverse population in our society. The course examines societal issues which impact race, cultural, class, and sexual orientation. The course is designed to increase student awareness of the multidimensional aspects of race/ethnicity, gender, sexual orientation, and socioeconomic status and other multicultural issues in research with individuals, families, and groups.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Social Work Research

SWRES 2009 - ORGANIZATIONAL AND COMMUNITY DEVELOPMENT RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is the second level, required research course for all COSA students. Examination of variables which influence organizational development and maintenance, adaptation and change, integration and innovation, and goal setting and planning will provide the focus for the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWCOSA 2099; SBPLAN: COSA (Social Work-MS)

SWRES 2021 - GENERALIST SOCIAL WORK RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is designed to familiarize students with the basic elements of research and their implication for social work practice. Students will gain knowledge of the various components of research methodology, including the formulation of a researchable question, strategies of research design, questionnaire construction, and data analysis and interpretation. Lab sessions will allow students to develop their skills in the various topics covered in lecture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 2023 - DIRECTED STUDY IN RESEARCH

Minimum Credits: 3

Maximum Credits: 3

A supervised experience in designing, implementing, and reporting an individually defined empirical research project. This course provides research experience for advanced research students.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWRES 2033 - EVALUATIVE RESEARCH SOCL SERVS

Minimum Credits: 3

Maximum Credits: 3

This course explores major issues and knowledge needed for evaluating the effects of social programs. Links to practice issues of accountability, program monitoring, and program planning will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2045 - QUALITATIVE RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course will introduce students to selected methods of qualitative research. These methods are applicable to investigating questions which arise in social work practice situations and can be used to evaluate interpersonal practice. Qualitative designs, data acquisition strategies, and analytic techniques, including the use of computers, will be examined through both formal descriptions and studies that exemplify their use.

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2047 - COMMUNITY BASED PARTICIPATORY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students primarily focused on community organizing who want to better understand theories, principles and methods of applied, action research with communities and community partners, as well as how Community-based Participatory Research (CBPR) is used in community planning and organizing to address local issues and social needs. This course is proposed to be coordinated with COSA field placements in the east end of Pittsburgh, especially Homewood, and will serve as an integrated field seminar for these students.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 2051 - SINGLE SUBJECT RESEARCH

Minimum Credits: 3

Maximum Credits: 3

This course examines the feasibility of using single-subject methodology to evaluate effectiveness in social work practice. Single-subject research designs are examined in terms of self-monitoring and external monitoring approaches. Different social work contexts are illustrated in order to demonstrate contextual situations to which single-subject designs may be applied. Each student is expected to carry out a self-monitoring project or use single-subject research in work with a client.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: SWRES 2021; CREQ: SWINT 2099 or SWCOSA 2099; PROG: School of Social Work

SWRES 3020 - RESEARCH METHODS 1

Minimum Credits: 3

Maximum Credits: 3

Basic design issues are explored and related to specific survey research skills, such as sampling, questionnaire construction, and measurement, issues, and data collection. Alternative research designs will also be explored. The relationship of research design and

methods of casual inference will be emphasized.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 3021 - MULTIVARIATE ANALYSIS

Minimum Credits: 4

Maximum Credits: 4

A class research project will be designed and implemented. Alternative data analysis strategies will be learned and applied to the project data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 3022 - RESEARCH METHODS: CAPSTONE SEMINAR 1

Minimum Credits: 1

Maximum Credits: 1

Research Capstone 1 involves instruction in the developmental process and refining of a research question and conceptualization attached to (1) data collected as part of the students' GSA experience, or (2) secondary data available to the student. If neither of these sources of data is relevant, the student should register for 2-3 credits of directed study to enable the collection of new data that will be the basis for later data analysis and manuscript preparation to be conducted in research capstone 2 (SWRES 3023, 3 credits, Spring term). The Capstone 1 experience involves implementation of skills in the preparation and writing of an introduction section for an APA-style empirical research paper. The end product for this term is a well-written introduction for the study that will be completed in the Capstone 2 course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: School of Social Work students only.

SWRES 3023 - RESEARCH METHODS: CAPSTONE SEMINAR 2

Minimum Credits: 3

Maximum Credits: 3

In the Spring term of the capstone sequence, the student will complete the data analysis and write the method, results, and discussion sections of the manuscript. Included in this will be instruction in the preparation of tables and figures in APA style and format. Some lecture time may be devoted to statistical and psychometric procedures. Some instruction will be individualized to address the specific methodological and analytic issues raised within each student's study purpose. Each section of the manuscript will be reviewed and evaluated with feedback guiding subsequent drafts resulting in a submission-ready paper. The goal of Capstone 2 is to have a final paper ready for submission to a peer-review journal by the end of the term.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWRES 3024 - DIRECTED STUDY-RESEARCH PRACTCM

Minimum Credits: 3

Maximum Credits: 3

Provides students an opportunity to work with faculty on research projects carrying out specific research skills leading to publication of findings.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SU3 Basis

SWRES 3029 - INFERNTL STAT SOCL WORKERS

Minimum Credits: 3

Maximum Credits: 3

This course deals with bivariate statistical procedures (e.g. t-tests, one-way analysis of variance, correlation and regression) applied to social work and social research problems. Solutions to the research/statistical problems are achieved by use of both mainframe computer (primarily SPSSX) and microcomputer programs.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: School of Social Work students only.

SWRES 3040 - DISSERTATION RESEARCH

Minimum Credits: 1

Maximum Credits: 9

The doctoral dissertation represents a new, creative effort at a level higher than that expected in the competency paper. A doctoral student may register for dissertation research credits after successful completion of the competency, during any semester in which he/she is working on a dissertation and has completed course requirements.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Sociology

SOC 2031 - GENDER, RACE, AND CLASS

Minimum Credits: 3

Maximum Credits: 3

This seminar examines gender, race and social class as interconnected dimensions of structured social inequality and axes of social stratification. We will examine empirical social and historical research on the dynamics of race, class and gender and as well as theories of class analysis, theories of racialization and feminist/gender theories. The course will cover these issues in the contemporary United States, as well as drawing upon comparative and historical research. Students will be expected to read, discuss and lead class presentations on books and articles.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2035 - RACE & ETHNICITY

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to race and ethnicity. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2102 - SOCIOLOGICAL THEORY POST CLASSICAL

Minimum Credits: 3

Maximum Credits: 3

This course surveys the major works of post-classical and contemporary sociological theory. These are discussed from the standpoint of how they built upon, revised and extended the classics and how they are relevant to us today. Relevant selections from classical sociological theory are also covered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2202 - QUANTITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

Complementing courses on qualitative methods, computer methods and statistics, this course will provide an overview of quantitative research methods in the social sciences. Topics will include specification of researchable questions, experimental and quasi-experimental research designs, and will concentrate on survey research issues such as sampling, measurement, questionnaire construction and item writing, and collection and organization of data. The issues will be illustrated by sociological literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2203 - QUALITATIVE METHODS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the methods of qualitative social inquiry. Students study specific qualitative techniques, such as the interview. Participant observation, analysis of documents, and unstructured observation, problems of doing research in natural settings are also considered.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Sociology (MA or PHD)

SOC 2205 - RESEARCH DESIGN

Minimum Credits: 3

Maximum Credits: 3

Sociology uses many forms of research methods. These range from large scale quantitative surveys to in depth qualitative participant observation studies. Designing a research project involves selecting methods appropriate for the research problem, taking account of resources, what is already known, and other factors. This course will cover the conceptual, philosophical, and technical issues that sociologists must deal with to design a research project.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2251 - THEORIES OF GENDER AND SEXUALITY

Minimum Credits: 3

Maximum Credits: 3

This course will provide an overview of important tendencies and controversies in gender and sexuality studies, emphasizing emerging directions in scholarship as well as foundational readings. Gender and sexuality studies are interdisciplinary fields in conversation with feminist theory and queer theory as well as a host of academic disciplines. Drawing on readings from a variety of disciplines (including anthropology, history, law, economics, philosophy, and literary studies) and sampling a range of methodologies, this course will work through some of the key movements and problems that have shaped and continue to shape contemporary thinking about gender and sexuality. Readings are likely to include works by Lila Abu-Lughod, Judith Butler, Nancy Chodorow, Patricia Hill Collins, R.W. Connell, Michel Foucault, Nancy Fraser, Linda Gordon, Judith Halberstam, Chandra Mohanty, Uma Narayan, and Joan Scott.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SU3 Basis

SOC 2301 - ENVIRONMENTAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

The course seeks an understanding of the evolution of human societies in their physical environments and resource bases. The ways in which humans use energy and matter is crucial. The time frame for the course is that of human history. Harsh and benign environments will be considered as well as the rise and fall of civilizations. Throughout, the role of technology will be kept central in an understanding of the interface between a society and its environment.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2306 - SOCIOLOGY OF REVOLUTION

Minimum Credits: 3

Maximum Credits: 3

An inquiry into various theories, frameworks and models elaborated by social scientists to explain the origins, dynamics and outcomes of this most complex matrix of social change.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2311 - POLITICS AND CULTURE

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to politics and culture. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2313 - RACE AND THE CITY

Minimum Credits: 3

Maximum Credits: 3

Race in the city is a seminar based writing/research intensive course focusing on the study of current and historical race relations in urban areas with a special interest in Pittsburgh. The course will examine how race in the city is related to economic, political and cultural forces. Students will complete projects using both qualitative and quantitative methods. This course is a practical introduction to theoretical and methodological issues in urban sociology and race theory. Contemporary and traditional literature will be discussed.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2314 - SOCIOLOGY OF EDUCATION

Minimum Credits: 3

Maximum Credits: 3

This course surveys the classic and contemporary literature on schools and socialization. The relevance of sociological theory and research to education policy debate is also highlighted. Students will increase their understanding of the forces shaping learning and development that are beyond the classroom and are embedded in the larger social context.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

SOC 2321 - SOURCES AND METHODS IN EAST ASIA

Minimum Credits: 3

Maximum Credits: 3

This course is designed to train students in research on original source material, as part of the graduate studies training in Chinese history.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

SOC 2341 - SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

Various theories and models to study social movements are examined. Emphasis is placed on structural conditions that contributed to the emergency of the movements, their development over time and what changes, if any, are brought about to the social system in which the movements occurred.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2342 - CULTURAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course involves discussion of the main trends in the sociological consideration of systems and patterns of beliefs, values and symbols and the social vehicles in terms of which culture is produced, sustained and interrupted. It is particularly concerned with the theoretical issue of the place of culture in sociological analysis, on the one hand, and interpretations of contemporary cultural phenomena, on the other. Thus the course has both theoretical and empirical components.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2350 - GENDER AND POLITICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to the study of gender and politics. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2402 - ORGANIZATIONS

Minimum Credits: 3

Maximum Credits: 3

This course introduces graduate students to organizations. Students will be exposed to theories and empirical research in the field. The course will also encourage students to refine and extend their thinking on a series of important topics in the recent literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2406 - MEDICAL SOCIOLOGY

Minimum Credits: 3

Maximum Credits: 3

This course provides an overview of the sociology of health, illness and medical care as a major specialty area of scholarly activity and empirical research. Three competing conceptual frameworks in medical sociology will be examined, compared and then used to analyze issues in public health, health policy, medical care and clinical medicine on the basis of recent research.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2408 - SPACE, POWER, AND INEQUALITY

Minimum Credits: 3

Maximum Credits: 3

This course examines the intersections of spatiality, power, and social inequality. Place will be examined as a site of social interaction and the exercise of power. Topics will range from considerations of the micro-scale of personal life and the body, to mid-scale questions about group boundaries and the negotiation of spatial dimensions of social life, to macro-scale issues of built environments, territorial organization, ecosystems, and the global economic political order.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 2465 - SOCIOLOGY OF GLOBALIZATION

Minimum Credits: 3

Maximum Credits: 3

The course is designed as a broad overview of sociological analysis that extends beyond traditionally accepted national and local boundaries. It provides a perspective on the discipline that portrays human society as a nested collection of interdependent societies. In particular, the course draws from world-systems analysis, world society, and other relevant approaches as well as from related disciplines such as anthropology, geography, and political science to consider how the 'development project' of the 20th century has evolved over time. The impacts of global economic integration on cultural and institutional change, gender relations, inequality, climate change, and on changing identities and forms of collective action (including social movements) are phenomena we explore in the course. The course is designed for students who simply want to learn how globalization and global institutions like the world bank, IMF, and united nations are impacting the experiences of people around the world as well as for those who expect to do further research in the field.

Academic Career: Graduate

Course Component: Seminar

This course explores selected topics in political sociology.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 3397 - TOPICS IN SOCIAL MOVEMENTS & CULTURE

Minimum Credits: 3

Maximum Credits: 3

Humor in politics and protest: this graduate seminar will take an interdisciplinary, comparative, and historical approach to examine the role of humor in politics and protest. We will look at three broad categories of humorous expression: street theater and performance, commentators and satire, and social psychological functions of humor for developing group cohesion and collective identity. Specific cases are likely to include the impact and import of the Colbert Report and John Stewart show on U.S. politics, political cartoons in NYC history, carnival in Brazil and the Caribbean, the Orange Revolution in Poland, contemporary activist actions and groups in the global justice movement, and sexist jokes and sexual harassment. The course will contextualize humor within a theoretical framework of social psychology and sociology of emotions through a critical lens sensitive to issues of power and control.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SOC 3398 - TOPICS IN SOCIAL MOVEMENTS

Minimum Credits: 3

Maximum Credits: 3

The specific content of this course will vary from term to term. This course will focus on intensive study of important areas of social movement research and theory. Examples of such content are strategic action in social movements; the structure-agency debate in social movements; new theorizing in social movements; gender and social movements; and race and social movements. Background requirements, if any, will be announced with each offering of the course.

Academic Career: Graduate

Spanish

SPAN 2224 - SPECIAL TOPICS IN CULTURAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course allows students to do in-depth research in various aspects of contemporary culture.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2226 - READINGS IN CRITICAL THEORY

Minimum Credits: 3

Maximum Credits: 3

Readings in critical theory concerns contemporary discourses about ideology, rhetoric, cultural institutions, power/ knowledge, desire and the subject. Each year a different area or topic is chosen.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2307 - METHODS OF TEACHING SPANISH

Minimum Credits: 3

Maximum Credits: 3

A course designed for those who plan to teach Spanish. Main focus is on practical information of how best (method and technique) to teach the language. Topics include: theory of learning, approaches, activities, dialogs and drills, the role of grammar, the lab, testing, vocabulary, and the like. Practice teaching, including videotaping.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2404 - PRE-COLUMBIAN TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with specific topics on various aspects of the Mayan, Aztec and Quechuan cultures.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2410 - DISCOVERY AND CONQUEST

Minimum Credits: 3

Maximum Credits: 3

This course offers an introductory survey of the Spanish and Latin American literature of the sixteenth and early seventeenth centuries through some of the main texts of the period.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2422 - COLONIAL TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the basic texts of the Cronistas and other writers of the Colonia, concentrating on an in-depth study of their ideological points of view.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2425 - FORMATION OF NATIONAL LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will attempt to discern the major aspects of the process of formation of "national literatures" in Latin America, during the nineteenth century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2428 - LATIN AMERICAN 19THC TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with various topics ranging from romanticism to positivism to modernism, in an attempt to develop a concept of the changing cultural and economic climates in which literature was produced in the second half of the nineteenth century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2429 - SEM LATIN AMERICAN 19THC TOPICS

Minimum Credits: 3

Maximum Credits: 3

This seminar offers students the opportunity to do original research in the various areas of romanticism, positivism and modernism, in an attempt to develop a better understanding of the various ideological currents in which Latin American literature developed in the second half of the nineteenth century.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2444 - VANGUARD TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals in depth with specific aspects of vanguard literature such as formal and linguistic innovation, poetic theory and imagery, movements and tendencies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2445 - SEMINAR: VANGUARD

Minimum Credits: 3

Maximum Credits: 3

This course offers students the opportunity to do research in various aspects of vanguard literature and thought.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2450 - CONTEM LATIN AMERICAN NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

This course deals with Latin American narrative since 1945, treating in depth the narrative production of the boom and the post-boom periods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2452 - CONTEM LATIN AMERICAN FILM

Minimum Credits: 3

Maximum Credits: 3

This course surveys a representative sampling of recent Latin American film, primarily feature films made for commercial distribution, but also socio-political documentary.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2460 - LATIN AMERICAN DRAMA

Minimum Credits: 3

Maximum Credits: 3

This course studies representative examples of contemporary Latin American drama from a literary as well as a sociocultural point of view.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2461 - LATIN AMERICAN NOVEL

Minimum Credits: 3

Maximum Credits: 3

This course deals with the theory and development of the novel as seen through various exemplary texts of several periods, with emphasis on the boom and post-boom periods.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2462 - LATIN AMERICAN POETRY

Minimum Credits: 3

Maximum Credits: 3

This course will deal with representative contemporary poets of various Latin American countries as well as specific movements and tendencies of the twentieth century.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2464 - LATIN AMERICAN 20THC TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course will deal with specific topics of contemporary Latin American culture, using primarily literary but also other types of texts, including periodicals, film and television productions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2465 - SEMINAR: 20TH CENTURY TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course will allow students to do research in topics of interest to them, involving primarily literary texts but not necessarily restricted to these types of documents.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2466 - U.S. LATINO LITERATURE

Minimum Credits: 3

Maximum Credits: 3

This course will focus on U.S. Latino literature. While Mexican-Americans have roots in North America that go back to colonial times, the Latino explosion has happened mainly in the last thirty years, giving rise to new processes and forms of cultural expression, including an emerging literature that is neither a subset of U.S. Literature nor an extension of modern Latin American literature, though it has connections to both. To get an idea of what this literature involves and where it is going, we will look at some representative novels, poetry, memoirs, plays and films.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2467 - TESTIMONIO AND ETHNOGRAPHIC NARRATIVE

Minimum Credits: 3

Maximum Credits: 3

This seminar will deal in depth with the question of testimony (testimonial narrative) and other forms of what is sometimes called ethnographic literature. We will interrogate these texts from a set of theoretical problems about subalternity and representation developed in the work of subaltern studies and postcolonial studies, feminist criticism and the concern in recent cultural anthropology with the problem of "writing culture".

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2623 - DON QUIJOTE

Minimum Credits: 3

Maximum Credits: 3

This course involves a close reading of Don Quijote, an overview of the criticism on it, the relations between Cervantes' work and earlier work and the importance for later novelistic development.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2634 - BAROQUE TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals in-depth with various Baroque topics and builds on a prior survey of baroque literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2635 - SEMINAR: BAROQUE

Minimum Credits: 3

Maximum Credits: 3

This seminar deals in-depth with various Baroque topics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

SPAN 2657 - 19TH CENTURY TOPICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with various nineteenth century topics, including romanticism, positivism and early modernism, with special emphasis on national and continental movements and tendencies.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

SPAN 2902 - MA DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Students work individually with faculty members on projects or areas defined by them in consultation with their director.

Academic Career: Graduate
Course Component: Directed Studies
Grade Component: Grad LG/SNC Basis

SPAN 2910 - COMPREHENSIVE EXAMINATION MA

Minimum Credits: 3

Maximum Credits: 3

This course is intended for students taking the ma comprehensive/Ph.D. preliminary examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

SPAN 2950 - SPANISH TEACHING PRACTICUM

Minimum Credits: 1

Maximum Credits: 6

This practicum provides graduate students in the department of Hispanic languages and literatures the opportunity to gain teaching experience at another institution of education. In addition to teaching, the student will evaluate the approach/method used at the institution in question and meet at regular intervals with the Spanish language coordinator at the University of Pittsburgh to discuss his/her experiences and observations.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

SPAN 2990 - MA COMPREHENSIVE INDEPENDENT

Minimum Credits: 1

Maximum Credits: 3

Students work independently on projects or areas of their own definition in preparation for the ma comprehensive examination and the PhD preliminary examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

SPAN 3000 - PHD DISSERTATION

Minimum Credits: 1

Maximum Credits: 12

Students work individually under the guidance of their dissertation director in preparation for and during the writing of the dissertation.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

SPAN 3902 - PHD DIRECTED STUDY

Minimum Credits: 1

Maximum Credits: 3

Students work individually with faculty members on projects or areas defined by them in consultation with their director.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

SPAN 3910 - COMPREHENSIVE EXAMINATION, PH.D

Minimum Credits: 1

Maximum Credits: 6

This course is intended for Ph.D. candidates the term they present themselves for their Ph.D. comprehensive examination.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

SPAN 3990 - PHD INDEPENDENT STUDY

Minimum Credits: 1

Maximum Credits: 3

Students work independently on projects or areas of their own definition to develop their dissertation topic and in preparation for the

dissertation overview.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad SN Basis

Statistics

STAT 0200 - BASIC APPLIED STATISTICS

Minimum Credits: 4

Maximum Credits: 4

This course teaches methods of descriptive and inferential statistics. Topics include data collection and description, hypothesis testing, correlation and regression the analysis of variance, and contingency tables. Students will learn how to use a statistical computer package.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

STAT 1000 - APPLIED STATISTICAL METHODS

Minimum Credits: 4

Maximum Credits: 4

This course is an intensive introduction to statistical methods. It is designed for students who want to do data analysis and to study further ideas in applied statistics beyond this course. The topics covered include descriptive statistics, elementary probability, random sampling, controlled experiments, hypothesis testing, regression and the analysis of variance. Emphasis will be placed on the statistical reasoning underlying the methods. Students will also become proficient at the use of a statistical software package.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

STAT 1151 - INTRODUCTION TO PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course presents at both a theoretical and applied level the basic probability concepts required for statistical inference. Topics include set theory and basic probability, independence and Bayes' theorem, discrete random variables and their distributions--Bernoulli, Binomial, Poisson, and geometric, continuous random variables and their distributions--uniform, exponential, gamma, beta, and normal, transformation of random variables, moment and moment generating functions, multivariate discrete distribution, marginal and conditional distribution and independent variables.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: MATH 0230 or 0235 or 0240 or 0245

STAT 1152 - INTRODUCTION TO MATHEMATICAL STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course introduces the elementary concepts of statistical inference. Topics include functions of random variable, sampling distributions, decision criterion, estimation, hypothesis testing, regression, analysis of variance, and non-parametric methods.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: STAT 1151

STAT 2001 - RESEARCH AND THESIS FOR MS DEGREE

Minimum Credits: 1

Maximum Credits: 6

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Minimum Credits: 1

Maximum Credits: 1

Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad LG/SNC Basis

STAT 2131 - APPLIED STATISTICAL METHODS 1

Minimum Credits: 3

Maximum Credits: 3

This introductory graduate level course on applied statistics covers a wide variety of problems. We begin with simple data description and go on to standard estimation and testing problems. We then study various types of linear models. We make extensive use of the computer; the student will learn BMDP and Minitab.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2132 - APPLIED STATISTICAL METHODS 2

Minimum Credits: 3

Maximum Credits: 3

This course is a continuation of STAT 2131.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2131

STAT 2200 - APPLIED NONPARAMETRIC STATISTICS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course will be to prepare students to use standard nonparametric tests for problems that frequently occur in applications. The Wilcoxon, Fisher (sign), Ansari-Bradley, Miller (jackknife), Kruskal-Wallis, Kendall, and Kolmogorov-Smirnov tests will be discussed. Minitab subroutines will be used to facilitate computation. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2210 - APPLIED CATEGORICAL DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

The purpose of this course is to provide contingency table techniques for research workers in the social sciences, medical sciences and other areas where it is necessary to investigate relationships between qualitative variables. Course deals with the Chi-square test and standard 2x2 and RXC contingency tables, as well as log-linear and other special types of contingency tables analysis. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2211 - CATEGORICAL DATA ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course presents techniques for analyzing categorical data such as contingency tables and log linear models.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2220 - APPLIED REGRESSION

Minimum Credits: 3

Maximum Credits: 3

This course covers simple linear regression (one variable) and one way analysis of variance followed by more complicated regression models. More complex ANOVA models are treated if time permits. Some computer applications will usually be considered. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2221 - ADVANCED APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course is concerned with statistical methods for describing and analyzing multivariate data.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2230 - APPLIED EXPERIMENTAL DESIGN

Minimum Credits: 3

Maximum Credits: 3

This course teaches students to design valid statistical experiments and to analyze them. Among the designs considered are: completely randomized designs, randomized block designs, Latin lemmas, factorial designs, and complete block designs. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 0200 or 1000 or 1100 or 1152; MIN GRADE: STAT 0200 B-

STAT 2250 - STATISTICAL QUALITY CONTROL

Minimum Credits: 3

Maximum Credits: 3

This course is involved with statistical methods for quality and process control. It is intended for all students who will use statistics in an industrial setting. Introductory topics include probability models and statistical estimation for quality. The main focus will be on control charts and tolerances. Acceptance sampling will also be discussed. A final but quite important topic will be Taguchi methods. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2261 - SURVIVAL ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course is designed to cover the design and analysis of clinical trials.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2270 - DATA MINING

Minimum Credits: 3

Maximum Credits: 3

Data mining is a collection of tools to discover patterns and relationships in data, often large observational databases. This course covers some of the main methods of data mining.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2291 - META - ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course deals with quantitative methods for synthesizing information from various studies. Topics include combining p-values, random and fixed effects (regression) models for effect sizes, reporting or other selection bias, tests for homogeneity, and sensitivity analysis and diagnostics. Examples from medical applications are used to illustrate methods throughout the course.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2300 - STATISTICAL PACKAGES

Minimum Credits: 3

Maximum Credits: 3

This course will cover a variety of topics concerning computing and statistics. Basic statistical analysis packages such as BMPD, SPSS, Minitab, and IMSL will be discussed and compared. Other computational issues that will be discussed include simulation, graphics, elementary database management, and certain stand-alone statistical programs. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2310 - APPLIED MULTIVARIATE ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

We start with the basic concepts of regression and correlation. After developing the necessary linear algebra, we will study the multivariate normal and then go on to do one or more of the following: cluster analysis, discriminant analysis, directional data, and factor analysis. We will make use of the Minitab and BMDP computer packages. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2320 - APPLIED TIME SERIES

Minimum Credits: 3

Maximum Credits: 3

The objective of the course is to present at the elementary level, a unified and reasonably complete exposition of statistical methods used in time series analysis. Serious consideration is given to both time and frequency domain approaches. Real data from a number of subject fields will be analyzed as they occur in the exposition. Students will additionally be doing data and other projects utilizing course techniques.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2220

STAT 2321 - APPLIED ADVANCED TIME SERIES

Minimum Credits: 3

Maximum Credits: 3

This course is an attempt to provide a uniform coverage of both time domain and frequency domain time series methods which can be easily understood by students with varied backgrounds.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2381 - SUPERVISED STATISTICAL CONSULTING

Minimum Credits: 1

Maximum Credits: 6

In this course students will consult with clients in the consulting center. The consulting will be under the supervision of experienced consultants. Students will be taught how to provide statistical methods in conjunction with real problems and how to analyze and report the results.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: STAT 2132

STAT 2391 - ADVANCES IN APPLIED STATISTICS 1

Minimum Credits: 3

Maximum Credits: 3

Foundations as well as recent developments in applied statistics will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2392 - ADVANCES IN APPLIED STATISTICS 2

Minimum Credits: 3

Maximum Credits: 3

Foundations as well as recent developments in applied statistics will be discussed.

Minimum Credits: 3

Maximum Credits: 3

Foundations as well as recent developments in applied statistics will be discussed.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2521 - TIME SERIES 1

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the theoretical aspects of time series analysis. In this course we discuss the probabilistic foundations of time series in both the time and frequency domains. Students should have a strong background in mathematical statistics, but the course does not assume a prior knowledge of time series analysis.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2630 - INTERMEDIATE PROBABILITY

Minimum Credits: 3

Maximum Credits: 3

This course is the first half of a two term sequence in mathematical statistics intended for undergraduate students and graduate applied statistics majors. Topics to be covered include probability concepts, random variable, discrete and continuous variables, joint distributions, functions of random variables, and some sampling distributions

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2631 - THEORY OF STATISTICS 1

Minimum Credits: 3

Maximum Credits: 3

This is an introductory graduate course in the theory of statistical estimation. The following topics will be covered. The use of orthogonal transformations in statistical distribution theory, distribution of quadratic forms, the theory of linear estimation, the general theory of estimation and estimation from a decision theoretic point of view.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2640 - INTERMEDIATE MATHEMATICAL STATISTICAL

Minimum Credits: 3

Maximum Credits: 3

This course is the second half of a two term course. Topics to be covered include estimation, inference, linear models, and an introduction to bayesian estimation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2641 - ASYMPTOTIC METHODS IN STATISTICS

Minimum Credits: 3

Maximum Credits: 3

This course deals with the concepts and technical tools that are useful for the study of asymptotic approximations in statistics. Topics include Laplace and saddle point methods, the limiting behavior of maximum likelihood and Bayes estimators and likelihood ratio test statistics, Edgeworth and Cornish-fisher expansions, efficiency, influence functions, the jackknife and the bootstrap.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2661 - LINEAR MODELS THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This course will follow a co-ordinate free approach to the general linear model. As much as possible proofs will be done from a geometric perspective. Topics include matrix theory for statistics, estimation, hypothesis testing, distribution theory, generalized inverses.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2691 - NONPARAMETRIC THEORY

Minimum Credits: 3

Maximum Credits: 3

This course focuses on the statistical analysis of data when no parametric assumptions are made.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2711 - PROBABILITY THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This course begins with an introduction to Lebesgue integral. Then distribution functions, probability measures and random variables are introduced. Convergence concepts and topics from the laws of large numbers and random series are also covered.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2712 - PROBABILITY THEORY 2

Minimum Credits: 3

Maximum Credits: 3

This is the continuation of STAT 2711.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: 2711

STAT 2751 - RELIABILITY THEORY 1

Minimum Credits: 3

Maximum Credits: 3

This course will cover basic concepts in reliability theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

STAT 2900 - INTERNSHIP

Minimum Credits: 1

Strategic Planning & Policy

BSPP 2013 - ACQUISTN AND DIVESTMENT ANALYS

Minimum Credits: 2

Maximum Credits: 2

Based on current concepts of corporate business portfolios, this course analyzes the reasons for shifting the portfolio mix and the resulting implementation issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 2016 - STRATEGIC VISIONING FOR A GLOBAL FUTURE

Minimum Credits: 2

Maximum Credits: 2

As globalization gathers pace across the business landscape, senior managers must learn to cope with increasing levels of strategic uncertainty. Globally contestable markets, radical technological and business process innovation, and shifting consumer preferences combine to stress-test corporations' strategic planning and execution capabilities. In particular, there is a need for new models of strategy and competition--incorporating concepts such as real options, scenario thinking, non-market factors, and "new game" strategies (e.g., "bottom of the pyramid" approaches). Accordingly, this course provides participants with a set of rigorous tools and frameworks for making sense of today's high-ambiguity global environment.

Academic Career: Graduate

Self designed elective course in strategic planning.

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 2111 - COMMERCIALIZING NEW TECHNOLOGIES

Minimum Credits: 3

Maximum Credits: 3

This course covers theory, conceptual frameworks, and tools used to formulate strategies for commercializing new technologies. The analytical frameworks cover elements of commercialization strategy that are equally critical to start-ups and to corporate technology ventures. In addition, we discuss some of the key challenges that differ for start-ups versus established firms. The primary deliverable in the course is a professional quality project which evaluates the commercialization alternatives for an emerging technology. Your project team will be paired with a local inventor, unless you prefer to evaluate a technology of special interest to your team. Experienced entrepreneurs and experts in financing new technology ventures will also address the class.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 2112 - LEADING ORGANIZATIONS TO INNOVATE SMARTER

Minimum Credits: 2

Maximum Credits: 2

This course addresses the critical role of a firm's top management in guiding a firm toward more positive innovation outcomes. We specifically focus on the role of executive leadership in developing a firm's capability for breakthrough innovation ' a primary source of sustained competitive advantage and economic growth. We distinguish between what leaders need to do during invention and innovation, and emphasize barriers that hinder established firms' capabilities to produce breakthrough innovations. We examine how strategic leaders can augment a firm's ability to 'innovate smarter' by better utilizing the diversity of expertise that resides within the

organization and within the firm's partnerships. The concepts we'll discuss are grounded in decades of research on creativity and technological innovation, as well as strategic management, leadership, and teams. We'll discuss how strategic leaders apply these concepts today.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 2328 - THE BUSINESS OF HUMANITY - STRATEGIC MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

This course focuses on strategic management in business contexts of high uncertainty and extreme complexity created by the interaction of (i) the inevitability of increasing globalization, (ii) the importance of innovation to ensure sustainable competitive advantage and (iii) the emerging social and economic imperative of building business models that focus on shared value. The business of humanity project at the KATZ graduate school of business has researched the responses of businesses across the world to these challenges. The course will cover (i) the radically different strategic planning processes and analytical techniques, (ii) the new rules of strategy, (iii) the dynamic organizational structures and (iv) the new leadership models that are responsive to the imperative and potential of meeting fundamental human and societal needs. These processes, rules, techniques and models have been demonstrated to be effective in dealing with technological disruptions, extreme price-point pressures in growth sectors, rising societal expectations and wicked problems

Academic Career: Graduate

Academic Career: Graduate

Course Component: Lecture

Grade Component: No Grade Required

Course Requirements: Katz Grad School of Business students only.

BSPP 2409 - STRATEGIC MANAGEMENT

Minimum Credits: 2

Maximum Credits: 2

"Strategy" in the context of management, focuses on creating a harmonious relationship between separate units within an organization, and between a firm and its environment. The core strategic management course explores this classic concept of strategy and how it can be adapted to today's changing and turbulent environments. While the course adopts the perspective of a general manager (e.g. Head of a strategic business unit), it provides critical insight to functional managers who must align their departments' activities with the firm's overall objectives and approach to creating and capturing value (i.e. Its competitive strategy). The strategic management course employs a multi-method pedagogy. Students learn a set of perspectives, conceptual frameworks, and tools - drawn from industrial organization economics and the behavioral sciences and sociology, with which to understand the opportunities and challenges involved in developing world-class capabilities for competing effectively in globally-linked economies. Through case studies, we explore how a firm's competitive strategy shapes the way it engages customers, suppliers, competitors, and others comprising its value net. Through project assignments, we investigate how competitive advantage can be quantified using publicly available data. Together, the multiple modes of inquiry will provide insight into why competitive advantage is fundamental to a firm's long-term success; how the various activities in a firm's value chain can contribute to competitive advantage; and why, although industries support many competitive strategies, each firm tends to employ only one at a time.

BSPP 3011 - STRATEGIC PLANNING SYSTEMS

Minimum Credits: 3

Maximum Credits: 3

Analyzes the strategic planning process in terms of the varying combinations of subsystems which may be required for different organizational purposes. Research regarding both the design and evaluation of planning systems will be studied with the objective of developing improved models of the underlying processes.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BSPP 3012 - RESEARCH IN COMPETITIVE STRATEGY

Minimum Credits: 3

Maximum Credits: 3

This course draws on a growing body of theoretical and empirical research which examines relationships between an organization's environment, its strategy, and performance outcomes. Topics include theoretical concepts of the environment and their empirical counterparts, market definitions, strategic alliances, competitive information flows, competitive interactions and responses, industry evolution, and the role of environmental analysts. Special attention is given to competitive intelligence processes. There is an explicit balance of theoretical and practitioner material. The course complements the research in corporate strategy seminar by focusing on business level competitive dynamics.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 3013 - FOUNDATIONS OF STRATEGY RESEARCH

Minimum Credits: 3

Maximum Credits: 3

Examines various streams of research which have contributed to our understanding of competitive behavior at both the business unit and corporate levels of diversified organizations. Prior studies are critiqued as a means of developing proposals for improved research designs.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSPP 3014 - RESEARCH IN CORPORATE STRATEGY

Minimum Credits: 3

Maximum Credits: 3

In this course we will focus on a core sub-field of strategy, corporate strategy, which has the following defining question: "what businesses should the firm compete in, and how should resources be allocated across those businesses?" Corporate strategy comprises an inter-related set of three key phenomena and associated research; value creation (e.g., Diversification and vertical integration), scope (e.g., Mergers and acquisitions), and execution (e.g., Role of the corporate office). While corporate strategy is often studied purely as a "content" field, we will adopt an integrative content-process orientation in this course. Our approach will also be evidence-based, in that we'll make a conscious attempt to understand and use systematic review tools, such as meta-analyses, to arrive at a sophisticated understanding of the corporate strategy literature.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

Strategy Envirmt & Organiztns

BSEO 2000 - STRATEGY SEMINAR

Minimum Credits: 2

Maximum Credits: 2

This seminar covers practical frameworks for strategic problem solving and develops analytical and communication skills for addressing complex projects in consulting and other industry contexts. Using projects to tackle complex strategy or performance-improvement challenges shouldn't just be the domain of a few thousand highly-paid strategy consultants. Projects are increasingly at the center of problem-solving and innovation for all executives. This seminar will focus on key fundamentals of the end-to-end consulting (project) process. Students will be exposed to a variety of cutting edge analytical tools and techniques. Particular emphasis will be put on best practices in structured problem-solving, work planning, and executive communication - capabilities that are at the core of the top strategy houses' own internal training and development programs. This course will be of interest to future management consultants, but also more broadly to professionals who might expect future internal strategic projects or task force assignments.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2012 - SOCIAL ENTREPRENEURSHIP

Minimum Credits: 2

Course Requirements: Katz Grad School of Business students only.

BSEO 2033 - MANAGING THE NATURAL ENVIRONMENT

Minimum Credits: 2

Maximum Credits: 2

This course focuses on the management of strategic and compliance issues related to the natural environment of the business firm.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2034 - SUSTAINABILITY AND CORPORATE RESPONSIBILITY

Minimum Credits: 2

Maximum Credits: 2

This course will address such topics as managerial approaches to the ESG issues and opportunities that occur across business processes, sustainability and social responsibility as business opportunities, environmental management systems (the 14001 standards), social responsibility guidance (ISO 26000) and reporting, and methods of dealing with stakeholders concerned about the firm' ESG performance. It introduces students to sustainable business management practices and to the role of the private sector in global sustainability development and environmental initiatives. Throughout the course, the emphasis will be on real-world managerial experience and guidance, based on numerous current cases.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

BSEO 2315 - BUSINESS LAW

Minimum Credits: 3

Maximum Credits: 3

The primary objectives of this course are: (1) to identify the many types of business actions which require decision makers to analyze ethical issues; and (2) to teach students when, why, and how ethical issues should be made a part of the decision-making process.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: Katz Grad School of Business students only.

BSEO 2316 - BUSINESS LAW

Minimum Credits: 3

Maximum Credits: 3

The primary objective of this course is to discuss key topics of business actions and topics central to the objective of today's executive.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2401 - BUSINESS ETHICS & SOCIAL PERFORM

Minimum Credits: 2

Maximum Credits: 2

This course examines concepts, issues, and tools related to the management of ethics and social responsibility in business. Students learn how to recognize and respond to ethical problems, to understand their personal responsibilities as business managers, to evaluate various ethical frameworks, to apply a process of moral decision making to ethical problems, to grasp relationships between ethical behavior and organizational structure and processes and to manage the ethical and social problems and opportunities arising from dimensions of the business environment.

Course Requirements: PREQ: BACC 2401 and BMKT 2411 and BECN 2401 and BFIN 2006; PROG: Katz Graduate School of Business

BSEO 2500 - BENCHTOP TO BEDSIDE

Minimum Credits: 3

Maximum Credits: 3

This 10-week course is designed to teach research scientists how to navigate the path necessary to bring a basic science discovery out of the university and into the clinic. Participants will learn the criteria used by the private sector to assess the potential of discoveries

that have therapeutic or diagnostic applications. They will understand how proof-of-concept and validation experiments define the application, increase value, and reduce risk. The course will focus on the importance of intellectual property protection as the engine that creates a barrier to entry for competition and also enables investment from the private sector to fund the climb over regulatory and reimbursement hurdles to reach patients. This course is open to all scientific researchers and those interested in gaining knowledge of the commercial development process. The core faculty for the course will include OED staff members, and numerous guest speakers and panelists from the scientific and entrepreneurial community.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2506 - COMPETING EMERGING ECONOMIES

Minimum Credits: 2

Maximum Credits: 2

This course will introduce students to concepts and frameworks designed to help managers make decisions critical to formulating and implementing global strategies, such as Ghemawat's cage model and 3a global strategy framework, porter's national diamond model, and Khanna's work on institutional voids. Through a combination of case studies and country overviews, students will analyze specific companies, industries, and countries in order to develop recommendations pertaining to whether, when, and how to enter a particular country, and how to prepare for management challenges associated with implementing a firm's competitive strategy in a new country. The course will specifically introduce students to the opportunities and challenges associated with transferring competitive strategies established in developed markets to emerging economies, such as Brazil, China, India and Russia. Hands-on homework assignments will assure that students become familiar with valuable sources of information on emerging markets.

Academic Career: Graduate

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2509 - BUSINESS AND POLITICS

Minimum Credits: 2

Maximum Credits: 2

The financial crisis, international negotiations toward a climate change agreement, and crises in such industries as pharmaceuticals and even toy manufacturing have highlighted the increasing interdependence of business and government, as well as the means by which business gains strategic benefits from government regulation. This course will examine methods and patterns of business influence on government, policy-making on issues affecting business, the performance of regulatory agencies, and the behaviors of groups and trade associations in politics. The course begins with an extended case study that asks, what caused the current financial crisis that some call "the great recession"? The crisis had multiple, often interacting causes, and involved both public sector and private sector failures. Besides examining the bases of the crisis, we will ask what institutional reforms, and what critical decisions, might have ameliorated the crisis, and might prevent a future crisis. The course will examine both regulatory failure patterns and the means by which firms gain strategic, competitive advantage through shaping government decisions and programs. In examining techniques of lobbying, the course will focus on the U.S. setting and identify both effective and ineffective methods of lobbying. By the end of the course, students should have obtained a good working knowledge of the U.S. regulatory system, the major instruments of regulation, and the typical interactive patterns of regulators and regulated parties.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2511 - MGMNT OF STRATEGIC ALLIANCES 1

Minimum Credits: 2

Maximum Credits: 2

Strategic alliances and cooperative relationships between two or more firms is rapidly becoming a common feature of a firm's competitive environment. The purpose of this course, therefore is to examine the nature of both domestic and international alliances, the reasons behind their formation, and the issues related to their management.

BSEO 2543 - ACQUISITION & DIVESTMENT ANALYS

Minimum Credits: 2

Maximum Credits: 2

Based on current concepts of corporate business portfolios, this course analyzes the reasons for shifting the portfolio mix and the resulting implementation issues.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SU3 Basis

Course Requirements: PREQ: BIND 2401; PROG: Katz Graduate School of Business

BSEO 2549 - THE EFFECTIVE GLOBAL MANAGER

Minimum Credits: 2

Maximum Credits: 2

This course examines the management practices of effective global managers. In many ways, global managers and domestic managers approach their jobs similarly.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2553 - STRATEGIC MANAGEMENT OF ACQUISITIONS AND DIVESTMENT

Minimum Credits: 2

Maximum Credits: 2

Given the frequency and magnitude of mergers and acquisitions (M&A) activity, most Pitt MBAs can expect their careers to be impacted by M&A transactions sooner or later - whether as analysts in the pre-merger, phase, as managers or consultants in charge of implementing the merger, or simply as professionals whose career trajectories are inevitably shaped by the event. In order to help you prepare for these roles, acquisitions and divestment will address the strategic and organizational challenges of integrating companies so as to realize the promise of value creation. Building on the premise that the real work of M&A begins after the deal is signed, this course will utilize current research findings, case studies, and practitioner experiences to equip you with a working knowledge of effective post-merger integration. At a time that most companies realize that M&A's have a poor track record of success precisely due to poor post-merger integration, the educational experience in this course will provide you with a valuable skill set. The course should be of special interest to students interested in management consulting careers, or who expect to have significant general management responsibilities in their jobs, or who want to be knowledgeable about M&A events that are likely to affect their careers sooner or later.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: Katz Grad School of Business students only.

BSEO 2578 - SUSTAINABLE BUSINESS

Minimum Credits: 2

Maximum Credits: 2

This course is designed to enhance your ability to understand current challenges and opportunities in sustainability worldwide. Sustainability is of great interest to multiple stakeholders including customers, employees, investors, regulators and activists. Much of the recent attention to sustainability is attributable to its "business case" or the notion that when done right, sustainability initiatives can not only affect positive social or environmental change but also contribute to competitive advantage, reputational gains, etc., and overall to a company's bottom line in the process. Although this kind of - triple bottom line - thinking is powerful and would benefit both businesses and society immensely, achieving this symbiotic relationship between business, society and the environment requires a strategic understanding of when, why and how sustainability initiatives create value. The Sustainable Business course will provide you with the requisite knowledge so that you emerge as leaders who will leverage the power of business to create social and environmental value. The course will blend theory and practice in a way that emphasizes both critical thinking and experiential learning. This will be accomplished through multiple components. First, through case studies and articles, you will be exposed to theories and principles that can be applied to formulate, implement and evaluate sustainability initiatives through the entire value chain - from procurement to disposal. The second, interrelated component will highlight experiential learning. Via a series of projects and mini-workshops, you will analyze the sustainability performance of companies to discover firsthand the mechanisms by which sustainability initiatives yield both business and social returns.

Surgery

SURG 5100 - MD-OMS RESIDENCY (7 MONTHS)

Minimum Credits: 0
Maximum Credits: 0
This program is multi-disciplinary incorporating basic physiology, pharmacology, microbiology, histology, anatomy and physical diagnosis. This rotation permits the medical student oral and maxillofacial surgery resident to gain insight as to how the basic sciences effect the overall body with emphasis on the head and neck region. Early exposure to ambulatory patients stresses the underlying pathophysiologic process of the presenting disease. Student evaluation is based on several written examinations and participation in small group problem-based conferences.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5323 - PLASTIC SURGERY PRECEPTORSHIP

Minimum Credits: 0
Maximum Credits: 0
This four-week elective will provide the student with a preliminary exposure to the specialty of plastic and reconstructive surgery. This preceptorship allows an opportunity to observe and have minor involvement in the clinical care of patients on the service. In addition to direct attending and resident interaction, education is obtained from weekly teaching conferences. Emphasis will be placed on the scope and interaction of plastic surgery with other specialties and the various methods of reconstruction available for each type of deformity. Areas to be experienced will include reconstructive techniques in traumatic, congenital, neoplastic and cosmetic deformity as well as the basic biology of wound healing and wound management
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5345 - SURGERY CLERKSHIP REPEAT

Minimum Credits: 0
Maximum Credits: 0
This course will be registered when the necessity to record a student's unsuccessful makeup is required. The course will be used only in those instances when the clerkship is repeated in a shorter or longer time frame than the previous course taken and failed. The specific title given the course will reflect the number of weeks repeated.
Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5360 - ORAL-MAXILLOFACIAL SURGERY

Minimum Credits: 0
Maximum Credits: 0

Four-week junior clerkship conducted as a resident in oral- maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, first surgical assist, primary management of post-operative care, emergency room call for mf trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conferences held by the department of plastic and oral-maxillofacial surgery.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5371 - SURGERY AND PERIOPERATIVE CARE

Minimum Credits: 0

Maximum Credits: 0

Eight-week rotation with students participating in general surgery and anesthesiology. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5372 - SURGERY AND PERIOPERATIVE CARE CLERKSHIP

Minimum Credits: 0

Maximum Credits: 0

Six-week rotation with students participating in general surgery. Goals of clerkship include developing skills to evaluate patients in the perioperative period and optimize their medical conditions in preparation for surgery. Students will learn natural history of common surgical diseases and proper operative management and post-operative treatment. The utilization of pathology and radiology services will be used to help determine correct diagnoses and therapeutic methodology. A brief exposure will be provided to pediatric and plastic surgery specialties. Registration must accompany registration in MSANE 5372

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5375 - SURGICAL SPECIALTIES

Minimum Credits: 0

Maximum Credits: 0

Four-week course designed to teach the essentials, knowledge and skills in the management of common diseases in the specialties of otorhinolaryngology, orthopedics, ophthalmology and urology. Learning accomplished through didactic lectures, prepared written syllabi, case reports, multi-media computerized instruction and clinical experience in offices of university faculty. Assessment of student performance accomplished through a multiple-choice examination, objective evaluation of clinical skills, and estimation of clinical expertise in the ambulatory setting.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5401 - SURGERY ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Four-week clerkship, conducted as an acting internship in general surgery. Responsibilities: patient evaluating, primary management of pre- and postop care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. Daily rounds with house staff and attendings. Attend postgrad teaching rounds and conferences held by the department of surgery.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5402 - EXTRAMURAL ACTING INTERNSHIP

Minimum Credits: 0

Maximum Credits: 0

Students will register for this course when participating in a surgery acting internship at an institution outside of the university of Pittsburgh school of medicine. This experience will not fulfill the required acting internship experience to meet graduation requirements.

Academic Career: Medical School

Course Component: Clinical
Grade Component: Grad LG/SU5

SURG 5403 - SURGERY ACTING INTERNSHIP FOR MD/ORAL MAXILLOFACIAL PROGRAM

Minimum Credits: 0
Maximum Credits: 0

This four-week course is conducted as an acting internship on the endocrine service. Students eligible to register for this course will be participants in the professional medicine/oral maxillofacial surgery combined program (md/oms). Participants will have responsibility for patient evaluating, primary management of pre- and post-op care, night call for unit with primary responsibility for assessment of acute clinical problems and extensive daily operating room experience. There will be daily rounds with housestaff and attendings. Attendance at the postgrad teaching rounds and conferences held by the department of surgery is expected.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5410 - GENERAL SURGERY ELECTIVE

Minimum Credits: 0
Maximum Credits: 0

Four-week clerkship offered at a private area medical facility student works directly with a surgical resident and attending surgeons. Responsibilities: preoperative diagnosis, intraoperative surgical assisting and post-op care. Daily rounds with house staff and attendings. Attend surgical conference and is requested in advance to participate by way of case presentation or prepared problem discussion. Student "night call" approximately every fourth night corresponding to the surgical resident on service.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5411 - SURGERY INTERNSHIP PREPARATION COURSE

Minimum Credits: 0
Maximum Credits: 0

This 4-week rotation was developed especially for 4th-year medical students matching into surgical specialties, including general surgery, vascular surgery, cardiothoracic surgery, plastic surgery, OB/GYN, and urology. Participants will have the opportunity to work with surgical specialists and residents in order to develop skill sets that are necessary for successful matriculation into a surgical internship. The course consists of interactive didactics, simulation, and technical skills practice. A wide range of topics will be covered, including management of emergencies on the surgical ward, discharging patients, dosing common medications, wound care, suturing, use of radiologic tests, placement of chest tubes and central lines, and many others. This course provides a unique opportunity for students to attain the tools needed for the transition into surgical internship with confidence, with the intention of improving patient safety, decreasing surgical intern anxiety, and improving surgical resident efficiency.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5420 - COMMUNITY HOSPITAL CLERKSHIP

Minimum Credits: 0
Maximum Credits: 0

Four-week elective provides student with exposure to general surgery as practiced outside the university environment, in suburban or rural community hospital. Elective is structured as a preceptorship. Student will evaluate patient problems, be involved in daily patient management, assist in operating room, and attend outpatient office hours with precepting surgeon. Room and board is provided at hospital outside Pittsburgh.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5430 - NEOPLASTIC DISEASE ELECTIVE

Minimum Credits: 0
Maximum Credits: 0

Four-week elective in oncology. Through the national surgical adjuvant breast project headquartered at Scaife Hall, student will study in depth, contemporary theories of tumor biology from clinical and laboratory perspective. Outpatient clinics and/or exposure, but major focus is conducting cooperative clinical studies regarding the management of patients with breast or colon cancer.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5440 - PEDIATRIC SURGERY ELECTIVE

Minimum Credits: 0

Maximum Credits: 0

Four-week elective tailored to fully integrate a student into a specific position of the house staff. Student serves as an intern, with participation in all clinics, rounds, conferences and capabilities. Time spent each week seeing patients. Special adaptations of program to particular requests can be made, including part pediatric medicine and part pediatric surgery. Will learn differences between childhood and adult diseases, take pediatric history and do complete physical.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5482 - RENAL, PANCREATIC AND LIVER TRANSPLANTATION

Minimum Credits: 0

Maximum Credits: 0

This is a four (4) week elective for medical students interested in learning about renal, pancreatic or liver transplantation. The student will have an opportunity to participate as a member of a busy transplant team. They will be involved in the evaluation and treatment of a large number of patients referred here with hepatic or renal disease for consideration of resection or transplantation therapy, or patients with type i diabetes mellitus for pancreas transplantation. They will attend the various conferences and, if possible, pre-and post-transplant clinics. Students will be offered the opportunity to scrub in the operating room on both living and deceased donor transplants. There will be no mandatory call; however, students should be aware of the fact that many transplantations occur at night or on the weekends. The student can participate in the post-operative care of transplant patients, including experience in the surgical ICU. Both through selected reading materials that offer an introductory exposure to transplantation, and through participation in patient care and rounds, students will learn the basic principles of evaluation and management both pre- and post-transplantation, immune-suppression, and infectious prophylaxis.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5485 - BIOLOGICAL AND GENE THERAPY

Minimum Credits: 0

Maximum Credits: 0

This 4-week elective will provide an opportunity to study contemporary theories of tumor biology and tumor immunology both from a clinical and laboratory perspective. While outpatient clinics will be part of the experience, the major focus will be the rewards and challenges of conducting clinical studies regarding the management of patients with various tumors managed with biologic therapies.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5486 - SURGICAL SPECIALTIES

Minimum Credits: 0

Maximum Credits: 0

This is a four week course. The student may select two areas of special interest, and will spend two weeks on each selected specialty. Available specialties are; cardiothoracic surgery, orthopedics, neurological surgery, plastics & reconstructive surgery, urological surgery, vascular surgery, and maxillofacial surgical oncology. The student will gain clinical exposure through attending clinics, participating in daily inpatient rounds, and in the operating rooms. Instruction will be by the residents and attending surgeons on the selected services. Performance will be evaluated on a number of criteria including knowledge, patient evaluation and management planning, motivation, responsibility, and interpersonal actions. The purpose of this course is to allow students to explore possible areas of interest for which they might not get exposure in the standard curriculum. The student is expected to learn to perform a basic history and physical evaluation of patients as required by each specific service. Each student should be able to discuss the service specific approach to patient management.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

SURG 5490 - ORAL-MAXILLOFACIAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

Four-week clerkship conducted as a resident in oral-maxillofacial surgery available only to the oral-maxillofacial surgical resident who is a student in the school of medicine. Responsibilities include: admission, evaluation, first surgical assist, primary management of postoperative care, emergency room call for mf trauma, daily rounds with house staff and attending physicians, attendance at all postgraduate teaching rounds and conference held by the department of plastic and oral-maxillofacial surgery.

Academic Career: Medical School

Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5650 - SURGICAL SPECIAL STUDIES

Minimum Credits: 0
Maximum Credits: 0

An individualized course of study may be arranged with the department of surgery to fit the student's needs. The student will meet with a department faculty person to design a clinical course of study for a four-week period of time. A written proposal must be approved by the faculty member as well as the student's scheduling advisor. When approvals have been received, the school registrar will schedule the course and notify the department student coordinator.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5700 - SURGICAL LIFE SCIENCES

Minimum Credits: 0
Maximum Credits: 0

A four week elective combining anatomic dissection, imaging modalities, and clinical pathology in a systematic manner. The course will be divided into four areas, each lasting one week. Thoracic anatomy, digestive tract anatomy, musculoskeletal and gynecological/genitourinary anatomy. The course includes lectures in anatomy, pathology and imaging modalities and precepted anatomical dissections. Exposures will vary and include seeing patients and follow their evaluation and treatment.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5884 - HISTORY OF MEDICINE

Minimum Credits: 0
Maximum Credits: 0

Four-week elective. Student examines various aspects of the history of medicine, from the beginning of medical practice into the 1980s, read selected group of historical monographs and participate in in-depth discussions with members of a group of interested senior faculty, and write a short research paper.

Academic Career: Medical School
Course Component: Directed Studies
Grade Component: H/HS/S/LS/U

SURG 5885 - SURGICAL RESEARCH

Minimum Credits: 0
Maximum Credits: 0

Student will be given the opportunity to learn research techniques and to participate in research in progress in surgical laboratory or in special circumstances, to carry on an independent project. Attendance at seminars and discussion groups is encouraged.

Academic Career: Medical School
Course Component: Clinical
Grade Component: H/HS/S/LS/U

SURG 5900 - EXTRAMURAL GENERAL SURGERY

Minimum Credits: 0
Maximum Credits: 0

A clinical experience in general surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.

Academic Career: Medical School
Course Component: Lecture
Grade Component: H/HS/S/LS/U

SURG 5902 - INDEPENDENT STUDY

Minimum Credits: 0
Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Telecommunications

TELCOM 2000 - INTRODUCTION TO TELECOMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Introduction to telecommunications for non-TELCOM majors. Top-down orientation relates networking technologies to organizational goals and needs. Data communications and internet technologies and basic system performance analysis. TCP/IP, LANs, WANs, internetworking, and signals and communications media.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PLAN: Information Science (MSI) or Telecommunications (MST)

TELCOM 2010 - COMPUTER NETWORKING LABORATORY

Minimum Credits: 3

Maximum Credits: 3

The objective of this lab-based course is to gain knowledge of fundamental computer networking issues through hands-on experiments with network equipment and services. The sequence of labs start at the physical layer and progress up the protocol stack to the application layer. Topics covered are signal generation and analysis at the physical layer, ethernet and wlan performance and management, ip address planning and management, ip router configuration including RIP, OSPF, BGP, MPLS protocols, TCP connection control, stateful packet filtering, network monitoring and management, signaling protocols for voip services, and web-based services configuration.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2011 - TELECOMMUNICATIONS SEMINAR

Minimum Credits: 1

Maximum Credits: 1

Exposure to the latest issues in the telecommunications industry and research through talks by invited experts.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2012 - COMPUTER NETWORKING LABORATORY 2

Minimum Credits: 3

Maximum Credits: 3

The objective of this lab-based course is to complement TELECOM 2010 through hands-on experiments with other network equipment and services. This lab will be modular with lab modules in internet telephony, network security, network management, application development, and wireless communications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2100 - FUNDAMENTALS OF TELECOMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Fundamentals of network technology based on a layered protocol stack. Telephone network and internet architecture. Summary of upper layer protocols (HTTP, SMTP), transport protocols (UDP, TCP), and network protocols (IP). Analysis of link layer protocols and their performance. Overview of local area networks (CSMA/CD and CSMA/CA). Introduction to cables and signals.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2110 - NETWORK DESIGN

Minimum Credits: 3

Maximum Credits: 3

Methods and techniques for the design of computer/telecommunication networks. Management and business perspectives on network design, estimation of traffic demand and application requirements, network cost analysis, topological design, capacity assignment, graph theory and optimization based design algorithms, virtual network design, network design tools, wireless network design issues, availability analysis and survivable network design.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications TELCOM-MST/TCOMM-MST or Telecommunications Certificate TELCOM-AC/TCOMM-AC or Info Science PHD w/TELE option PHDTEL-TR)

TELCOM 2120 - NETWORK PERFORMANCE

Minimum Credits: 3

Maximum Credits: 3

Introduction to techniques for performance modeling and analysis of computer systems and communication networks. Analysis of measurements, discrete event simulation and queuing theory.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2121 - NETWORK MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Techniques of planning, controlling, organizing and decision making for a telecommunications network; accounting, security, fault management, configuration, and maintenance. Protocols and architectures for network management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: TELCOM 2000 or 2100 or INFSCI 1070 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2125 - NETWORK SCIENCE AND ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

This course explores networks as a primary metaphor and mechanism for a variety of information-related phenomena. The advancement of interconnected information and communication technologies has made networks one of the dominant ways of analyzing the use and flow of information among individuals, institutions, and societies. The course starts with the basics of graph theory and moves to understand network structures such as social networks, ecological webs, it and infrastructure systems, telecommunications networks, and market distribution and allocation structures. As a prerequisite, students should have a command of mathematics through linear and matrix algebra at the Undergraduate level.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2210 - PHYSICAL LAYER OF COMMUNICATIONS 2

Minimum Credits: 3

Maximum Credits: 3

Electronic communications sequel to TELCOM 2200. Bandwidth, spectrum, noise, and channel capacity, and covers practical issues such as link power budgets and bit-error rates. Broad scope of physical-layer technologies, fundamental concepts, and techniques used in transmitting information over wire-line, optical, and wireless networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: [(TELCOM 2000 or 2100 or INFSCI 1070) and TELCOM 2200] or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2215 - UNIFIED COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

After describing how humans communicate orally and visually, this course goes on to describe the technology and network architectures that provide audio and video telecommunications using conventional circuit-switched telephony, newer packet-switched "internet telephony" (VOIP), and streaming video over the internet. Basic knowledge of the physical layer is helpful, but students must be familiar with TCP/IP.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2222 - PHOTONIC COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Overview of optics. Fiber-optic transport including optical fiber, sources and photo-detectors, optical couplers and switches, photonic signal transport principles for the practical design of fiber-optic links, and an in-depth discussion of the limits of wavelength multiplexing. Review of switching theory and photonic switching including photonic switching devices and corresponding architectures for switching fabrics, photonic switching in space, time, wavelength, and all combinations, and optical packet and burst switching.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information ; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2223 - DIGITAL SPEECH PROCESSING

Minimum Credits: 3

Maximum Credits: 3

The application of digital signal processing techniques in the representation, analysis and synthesis of speech signals. Topics include digital modeling of speech signals, waveform coders, time and frequency methods in speech processing, linear predictive coding of speech, and discussion of speech processing systems in the area of human-machine communication by voice.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2227 - INTERNET TELEPHONY

Minimum Credits: 3

Maximum Credits: 3

Technology for offering telephony over an internet including: voice-over-IP end points and protocols, end-to-end delay, telephony signaling protocols, gateways and network components, telephone service provision, multi-point, network issues, and the future. Presents market, policy, and economic issues; differentiates VoIP on public or private internets.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) and 2200 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2235 - DIGITAL COMMUNICATIONS 2

Minimum Credits: 3

Maximum Credits: 3

Binary and m-ary computer based communications. Representation theory and the geometric interpretation of the communication channel, maximum likelihood decisions, multicarrier modulation, spread spectrum techniques. (Prerequisites: ECE 2521) (stochastic processes or equivalent)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2236 - INFORMATION THEORY

Minimum Credits: 3

Maximum Credits: 3

Markov source statistics, the theory of information, channel capacity for noise-free and noisy channels, Huffman codes and other source coding techniques, introduction to error correcting channel codes. (Prerequisites: ECE 2521) (stochastic processes or equivalent)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2237 - CHANNEL CODING THEORY

Minimum Credits: 3

Maximum Credits: 3

Introduction to algebraic coding theory based error correction coding theory; techniques of linear block codes, cyclic codes, Reed-Solomon codes, low density parity check codes, and turbo codes. (Prerequisite ECE 2429 or digital communications i)

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2310 - APPLICATIONS OF NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Foundational principles, architectures, and techniques employed in computer networks. Protocols and mechanisms used in the internet TCP/IP protocol suite, including the operation of both wide-area and local-area networks. Special emphasis on analysis of network and transport layer protocols.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070); or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR)) or (SUBPLAN: Telecommunications (TELCOM-TR))

TELCOM 2315 - NETWORK ANALYSIS

Minimum Credits: 3

Maximum Credits: 3

Analysis of network traffic and flows and network management. Methods and tools for monitoring and analyzing network traffic and performance including data mining and visualization. Techniques of planning, controlling, organizing, and decision making for a communications work; accounting, security, fault management, configuration, and maintenance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2321 - WIDE AREA NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Basic principles of broadband networks. Protocols suitable for broadband networks, with emphasis on ATM. Other technologies, such as frame relay and SMDS. Design issues for high speed networks including network characterization, application performance

guarantees, traffic policing and congestion control.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (NFSCI 1071 or TELCOM 2310) and TELCOM 2100; CREQ: TELCOM 2120; PROG: School of Information Science or Sch Computing and Information

TELCOM 2326 - ADVANCED TOPICS IN DATABASE MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Advanced graduate course on database systems. Key issues that typically arise in the context of large-scale enterprise database management in heterogeneous wide-area environments including distributed and non-relational database systems, network-centric data management, web-based information systems, heterogeneous databases, information integration, and wireless data management.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: INFSCI 2710 or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2420 - PROJECT MANAGEMENT

Minimum Credits: 3

Maximum Credits: 3

Techniques and tools to assist in the managing process. Uses case study approach.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2700 - INTRODUCTION TO WIRELESS NETWORKS

Minimum Credits: 3

Maximum Credits: 3

For students with a basic background of telecommunications who are not for telecom majors. Principles of wireless communications and how they differ from wired communications. Fundamental concepts including: transmission and mitigation techniques (e.g., Modulation and coding, propagation, interference and antennas) for wireless systems, multiplexing techniques, wireless system architectures, mobility management, security, protocols and location technology. Systems include: cellular phone networks (e.g., Cdma2000, umts), wireless local area networks (e.g., IEEE 802.11G), personal area networks (e.g., Bluetooth), fixed point broadband wireless (e.g., WiMAX) and satellite systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2710 - FOUNDATIONS OF WIRELESS COMMUNICATIONS

Minimum Credits: 3

Maximum Credits: 3

Radio propagation and multipath fading, antennas, digital modulation with emphasis on techniques being used in current wireless systems including pi/4 DQPSK, GMSK, error control coding in wireless systems, spread spectrum and CDMA, OFDM, MIMO, and spectrum issues. Mathematical and qualitative treatment of existing systems as examples rather than as abstractions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Sch Computing and Information or School of Information Sciences; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2721 - MOBILE DATA, AD HOC AND SENSOR NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Review of mobile data networks. Personal area and mobile ad hoc networks. Self-organization, topology control, and routing in ad hoc networks. Sensor/actuator applications, systems and networks. Protocols to support sensor and mobile ad hoc networks.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: Sch Computing and Information or School of Information Sciences; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2727 - APPLICATION DEVELOPMENT FOR MOBILE DEVICES

Minimum Credits: 3

Maximum Credits: 3

Focus on information system applications that run on top of wireless infrastructure such as multimedia messaging, mobile inventory control, location aware services including wireless technologies (gsm, cdma2000, umts, 802.11, Bluetooth), mobile information systems and applications (m-business, location-based services, wireless crn), wireless information system challenges and architectures (security, reliability, mobility, power conservation, gateways, proxies), mobile application protocols (SMS, ems, mms, wap), thin and thick client mobile application development (wml, vxml, Java, j2me, j2ee, .Netcf, c#), and business case studies of mobile applications.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: [(INFSCI 0017 or 0015 or CS 0401) and INFSCI 1052] or [PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Information Science PHD (ISCI-PHD)]

TELCOM 2810 - INFORMATION SECURITY AND PRIVACY

Minimum Credits: 3

Maximum Credits: 3

Fundamental issues and first principles of security and information assurance (confidentiality/privacy, integrity, authentication, identification, authorization, availability, access control). Business issues of risk analysis and management of resources. Issues in information systems security; analysis, design, and coding of information systems/ networks for security; techniques for building secure organizational systems; e-commerce related security issues; policy, legal and ethical issues in security.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2811 - HACKING FOR DEFENSE

Minimum Credits: 3

Maximum Credits: 3

This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad Letter Grade

TELCOM 2813 - SECURITY MANAGEMENT AND COMPUTER FORENSICS

Minimum Credits: 3

Maximum Credits: 3

Security management in information systems and networks. Intrusion detection systems, anomaly detection, network forensics, application logging, auditing and data management, contingency planning, digital immune systems; alarm and responses; security standards; ethical and legal issues in information; cyber-evidence.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2810 or 2821 or INFSCI 2150) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2820 - CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Principles of number theory, cryptographic algorithms and cryptanalysis. Steganography, block and stream ciphers, secret key encryption (des, res, re-n), primes, random numbers, factoring, and discrete logarithms. Public key encryption (rsa, Diffie-Helman, elliptical curve cryptography, n'tru); key management, hash functions (md5, sha-1, ripemd-160, HMAC).

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or INFSCI 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2821 - NETWORK SECURITY

Minimum Credits: 3

Maximum Credits: 3

Principles of network security and management. Review of network vulnerabilities, security at the link, network and transport layers; dial-up security (pap, chap, radius, diameter), ipsec, ssl, and vpns. Email security (PGP, S/MIME); Kerberos; x.509 Certificates; AAA and Mobile IP; SNMP security; firewalls; filters and gateways; policies and implementation of firewall policies; state full firewalls; fire wall appliances.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2810 or 2820 or INFSCI 2150) and (TELCOM 2000 or 2100 or IS 1070) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2825 - INFORMATION SYSTEMS AND NETWORK INFRASTRUCTURE PROTECTION

Minimum Credits: 3

Maximum Credits: 3

Techniques for the protection and survivability of information systems and networks. Critical infrastructure definition, risk management, vulnerability and risk analysis, fault and attack trees, availability analysis, traffic restoration schemes and survivable network design and management techniques; critical infrastructure simulation, CIP policy and legal issues, SCADA systems.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2000 or 2100 or 2810 or INFSCI 1070 or 2150) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2829 - ADVANCED CRYPTOGRAPHY

Minimum Credits: 3

Maximum Credits: 3

Algorithm complexity, advanced number theory (Galois fields, quadratic residues, zero knowledge schemes, one-time signatures), efficient implementation of encryption schemes in hardware and software and other advanced topics in cryptography.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2820 or INFSCI 2170) or (PLAN: Telecommunications (TELCOM-MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2830 - CAPSTONE IN SECURITY

Minimum Credits: 3

Maximum Credits: 3

Integrative class for master's students in their final semester of the SAIS track. Combination of business and technical case studies and group projects. Case studies focus on business/economics aspects of providing information assurance and how this service impacts technology. Group projects involve design and development of a prototype secure and survivable information system including application development, system deployment, system optimization and system economics.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PREQ: (TELCOM 2810 or INFSCI 2150) and TELCOM 2821 or (PLAN: Telecommunications (TELCOM-

MST/TCOMM-MST) or Telecommunications Certificate (TELCOM-AC/TCOMM-AC) or Info Science PHD w/TELE option (PHDTEL-TR))

TELCOM 2921 - INDEPENDENT STUDY IN NETWORKING

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2922 - INDEPENDENT STUDY IN COMMUNICATION SYSTEMS

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2923 - INDEPENDENT STUDY: COMPUTER COMMUNICATION

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2924 - INDEPENDENT STUDY: TELECOMMUNICATIONS ADMINISTRATION

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2925 - INDEPENDENT STUDY: TELECOMMUNICATIONS ECONOMICS AND POLICY

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2926 - INDEPENDENT STUDY: HUMAN COMMUNICATION

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2927 - INDEPENDENT STUDY IN WIRELESS COMMUNICATION

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2928 - INDEPENDENT STUDY SECURITY ASSURED INFORMATION SYSTEMS

Minimum Credits: 1

Maximum Credits: 3

Academic Career: Graduate

Course Component: Independent Study

Grade Component: Grad LG/SNC Basis

TELCOM 2931 - SPECIAL TOPICS IN NETWORKING

Minimum Credits: 3

Maximum Credits: 3

Selected relevant subjects in networking, either as a traditional course or as a survey of new literature. Content varies depending on student and instructor interest.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science or Sch Computing and Information; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2937 - SPECIAL TOPICS IN WIRELESS NETWORKS

Minimum Credits: 3

Maximum Credits: 3

Selected relevant subjects in wireless telecommunications, either as traditional course or as survey of new literature. Content varies depending on student and instructor interest.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

Course Requirements: PROG: School of Information Science; PLAN: Excluded Plans = Library & Information Science (MLIS, PHD, CERT-Advanced)

TELCOM 2940 - PRACTICUM

Minimum Credits: 1

Maximum Credits: 3

For students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum with a business or organization.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad SN Basis

TELCOM 2941 - MASTER'S THESIS

Minimum Credits: 3

Maximum Credits: 6

The thesis is a report of original, theoretical, or laboratory work suitable for publication.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

Theatre Arts

THEA 2000 - RESEARCH AND THESIS MASTER'S DEGREE

Minimum Credits: 1

Maximum Credits: 12

Individual research designed by the MA students in connection with their Master's Degree Thesis.

Academic Career: Graduate

Course Component: Thesis Research

Grade Component: Grad SN Basis

THEA 2110 - SECONDARY EMPHASIS - PEDAGOGY

Minimum Credits: 1

Maximum Credits: 3

The student will focus on an area of specialization designed to supplement foundational performance pedagogy. Under supervision and advisement from faculty, the student will choose an area of specialization (which may include voice, movement, advanced acting techniques, stage combat, directing, etc.) Based on their own present experiences and create a strategy and timeline for completion of chosen goals. The quantity of knowledge and experience to be achieved will be discussed between the advisor and student at the beginning of the course. The student will meet with their advisory on a regular basis and write a research or response paper summarizing and analyzing their experience.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2120 - PRODUCTION MENTORSHIP

Minimum Credits: 1

Maximum Credits: 6

The student will serve as actor, director, coach or other supportive function of a main-stage production at the University of Pittsburgh. This role will include active mentorship and teaching of undergraduate performers. Under supervision and advisement from faculty, the student will create a syllabus outlining their own research questions for their mentorship role on the production and how it may inform their own pedagogical practices. The student will write a research or response paper summarizing and analyzing their experience.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2135 - COURSE DEVELOPMENT

Minimum Credits: 3

Maximum Credits: 3

Course content to be decided between teacher and student.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

THEA 2147 - TECHNIQUES PERFORMANCE PEDAGOGY

Minimum Credits: 3

Maximum Credits: 3

Techniques in Performance Pedagogy is designed for graduate students to address the unique needs of teaching theatre performance at the college level. Students will examine various Stanislavski-based training methods and compare those methods with physical and/or ensemble-based methodologies as they apply to university training programs (in a BA, BFA or MFA program). Students will formulate their own style and teaching philosophy as they develop lesson plans, create innovative pedagogical exercises, conduct warm up sessions, coach acting scenes and develop methods of grading performance work. In addition, students will create a sample master class in order to be competitive on the academic job market.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad LG/SNC Basis

THEA 2149 - PROFESSIONAL ORIENTATION

Minimum Credits: 1

Maximum Credits: 3

Experimental learning credits based outside of the university. Focus on some aspect of performance that substantiates the pedagogical experience.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2150 - DIRECTED STUDY-ACTING

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the theory, preparation and execution of acting in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2155 - DIRECTED STUDY - PEDAGOGY

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the theory and practice of education in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad Letter Grade

THEA 2160 - DIRECTED STUDY-DIRECTING

Minimum Credits: 1

Maximum Credits: 3

Faculty directed supervision in the study of the theory, preparation and execution of directing in the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2161 - GRADUATE DIRECTING

Minimum Credits: 4

Maximum Credits: 4

This course will include a review and diagnostic to determine the level of the student's work.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2168 - NEW PLAY PRACTICUM

Minimum Credits: 3

Maximum Credits: 3

The New Play Practicum is an advanced course designed for theatre artists (playwrights, directors, actors, mainly though there is room for stage management duties) to try the new scripts produced by students in Playwriting 2 and in some cases from Playwriting 1. The scripts will be assigned in class, table-workshopped at first, and then assigned to teams. Most rehearsals will take place outside of class with the aim of presenting seated readings or staged readings as we can in lunchtime venues throughout the term. Teamwork is key. Each student will have several practical assignments; written assignments will be tailored to each student's needs.

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad LG/SNC Basis

THEA 2170 - DIRECTED STUDY-SET, COSTUME, LIGHTS

Minimum Credits: 1

Maximum Credits: 9

Faculty directed supervision in the study of theory, preparation, and execution of design for the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2180 - SCENE DESIGN 1

Minimum Credits: 3

Maximum Credits: 3

This will provide a study of scenery design as it applies to productions utilizing realistic, interior settings.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2185 - SCENE PAINTING

Minimum Credits: 3

Maximum Credits: 3

This course will include study of the small size and large scale painting techniques used for proscenium-style theatres.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2190 - STAGE LIGHTING 1

Minimum Credits: 3

Maximum Credits: 3

This course will entail a study of stage lighting equipment and design practices for the typical proscenium and arena theatres.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2191 - STAGE LIGHTING 2

Minimum Credits: 3

Maximum Credits: 3

This includes more advanced lighting plots and special effects devices for theatre, dance and film.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

THEA 2193 - STAGE MANAGEMENT 1

Minimum Credits: 3

Maximum Credits: 3

A practical introduction to the theory and execution of stage management for the theatre.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2200 - DIRECTED STUDY-HISTORY,LITERATURE,CRITICISM,THEORY

Minimum Credits: 1

Maximum Credits: 12

Faculty directed supervision in the study of history, literature, criticism and theory of the theatre.

Academic Career: Graduate

Course Component: Directed Studies

Grade Component: Grad LG/SNC Basis

THEA 2201 - MATERIALS AND METHOD RESEARCH FOR THEATRE

Minimum Credits: 3

Maximum Credits: 3

Materials and Methods aims to introduce the research methods and tools appropriate for scholarly work in theatre and performance studies. Throughout the semester, students will be introduced to several of the primary genres of scholarly writing in the field and significant theoretical orientations current and controversial.

Academic Career: Graduate

Course Component: Seminar

Grade Component: Grad Letter Grade

THEA 2202 - THEORIES OF THEATRE AND DRAMA

Minimum Credits: 3

Maximum Credits: 3

This graduate seminar will address theories and methods of performance studies through a) foundational texts in the field; b) the scholarly, pedagogical and critical implication of the history and relationship between performance studies and theatre studies artistically and in the academy; c) recent publications in the field, and d) concerted engagement with intersections between performance studies, border studies, Latin American and Latinx theatre and performance.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2204 - THEORIES OF ACTING AND DIRECTING

Minimum Credits: 3

Maximum Credits: 5

Students hone, diversify and/or solidify their directing craft through tude staging assignments and personalized, practical projects designed in consultation with the instructor. Students will engage with foundational director-driven, directing and devising texts in our field, from Brecht, Artuad, and Growtoski to Aikalitis, Bogart, and others, with particular attention to both practical and pedagogical application as well as critical evaluations of methods, cultural institutions, and representation. Students will gain facility with expectations of academic institutions and programs including, but not limited to: moving between roles of director, coach and acting teacher in production; scaffolding connections between rehearsal, performance and studio work; collaborating within an academic department; mobilizing community-academic and/or interdisciplinary engagement through production work; practice as research; and standards for documenting, narrating and framing directorial work across institutional environments and positions (ie, as an MFA, a PhD, an MFA-PhD; at R1, liberal arts and/or community colleges).

Academic Career: Graduate

Course Component: Practicum

Grade Component: Grad Letter Grade

THEA 2205 - WORLD THEATRE: 500 BCE TO 1640

Minimum Credits: 3

Maximum Credits: 3

World Theatre 500 BC to 1640 investigates histories of theatre and performance (scripts, embodiment, design, audiences, conventions, cultural functions, etc.) Within local and global social, artistic and political contexts, from classical Athens to Edo Japan, colonial

Mexico city to Shakespeare's globe. The course focuses on evidence and interpretation as well as historical causation.

Academic Career: Graduate

Course Component: Lecture

Grade Component: Grad LG/SNC Basis

THEA 2206 - WORLD THEATRE: 1640 TO 1890

Minimum Credits: 3

Maximum Credits: 3

This course is the second in a world theatre history sequence designed to explore the development of dramatic forms and theatre practices from the 5th century B.C.E. to the present. In World Theatre: 1640 to 1890 we will discuss the history of theatre arts 'which includes looking at drama, design, performance traditions and audiences--from the comedies of Restoration England to emerging realism of Buchner, Zola and Ibsen. Framed by questions of documentary interpretation and historical causation, the course will analyze the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. In addition, we will discuss some contemporary scholarship examining these theatrical events.

THEA 2207 - WORLD THEATRE: 1890-Present

Minimum Credits: 3

Maximum Credits: 3

This is the third in a world theatre history sequence designed to explore the development of dramatic forms and theatre practices from the 5th century B.C.E. to 1970. In world theatre: 1890 to 1970, we will discuss the history of the theatrical arts which includes looking at drama, design, performance traditions and audiences' from the late dramas of Ibsen to the plays of Beckett and Pinter. Framed by questions of documentary interpretation and historical causation, the course will analyze the larger contexts of theatrical events, including social and political history, as well as the development of non-theatrical art forms. Our focus will be on western theatre with occasional references to non-western forms of performance and production. In addition, we will discuss some contemporary scholarship examining these theatrical events.

Grade Component: Grad LG/SNC Basis

THEA 2216 - ADVANCED THEORY AND METHODOLOGY

Minimum Credits: 3

Maximum Credits: 3

This graduate level course explores the status of cultural memory as an object of investigation in critical theory, as a contested form of social, cultural, and political practice, and its multiple manifestations in varied forms of performance. We will engage with the existing dialogue and debate of what Andrew Hoskins describes as, --theoretical, empirical, and methodological issues central to a collaborative understanding of memory today; in multiple contexts. These studies will be coupled with an exploration of memory-based practices as well as history and responses to instances of cultural trauma as lenses into the viewing of culturally charged narratives of both social and theatrical performance. We will also analyze how social practices of remembering and forgetting arise and gesture towards the construction and maintenance of community, group, and individual identities. Along with theoretical and methodological readings case studies will be drawn from multiple sources which engage varying narrative structures specifically as sites of memory. (Ex: Narratives of Atlantic and African American slavery, Japanese internment narratives, the Jewish, Bosnian and Rwandan War Genocide narratives, forms of culturally based representation, and political forgetting.)

THEA 2272 - THEORY/TECHNOLOGY/MEDIA FROM PLATO TO VIDEO GAMES

Minimum Credits: 3

Maximum Credits: 3

This course will examine a number of key theoretical debates in the history of visual and verbal media, beginning with the technology of writing itself and moving into the invention of the codex, the printing press, and 19th and 20th century forms of imagistic production. Of particular concern will be modes of competition and symbiosis among various technologies of representation at particular historical moments, such as the relations between speech and print, poetry and theater, painting and photography, and cinema and digital media. Although case studies will be drawn from a number of historical periods, special attention will be paid to the Renaissance and to recent decades, when media of all kinds have come under increasing technological and theoretical pressure. Students will have the opportunity to extend the seminar's concerns to their own areas of research.

Urology

URLGY 5321 - UROLOGIC ONCOLOGY

Minimum Credits: 0

Maximum Credits: 0

This four-week elective is intended for the less experienced medical student to provide a hands-on experience in a surgical specialty. Students will be exposed to the urology service working closely with both attending and resident staff. Time will be spent in the outpatient clinic, operating room, and on the inpatient floors to provide exposure to all aspects of the practice of urologic surgery. The focus is on urologic oncology but students will also have exposure to patients with a wide range of general urologic diseases. The course objectives are: to learn to take a urologic history and perform a focused urologic physical examination; to develop experience in the performance of basic urologic procedures, possibly even to include cystoscopy; to become familiar with the proper evaluation and treatment of common urologic diseases such as prostate cancer, bladder cancer, benign prostatic hyperplasia, and urolithiasis; and to develop expertise in the role and interpretation of a wide array of imaging studies utilized in urology.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

URLGY 5470 - UROLOGICAL SURGERY (ADULT)

Minimum Credits: 0

Maximum Credits: 0

Four-week clinical clerkships in urology. Rotations through more than one hospital may be elected. The clerkship stresses inpatient and outpatient experience as an acting intern.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

URLGY 5471 - PEDIATRIC UROLOGICAL SURGERY

Minimum Credits: 0

Maximum Credits: 0

Four-week clinical elective. Student closely involved in evaluation and care of both inpatient and outpatient. Weekly pediatric urology/pediatric surgery/radiology conference will be attended in addition to weekly conferences. Student may participate in lab research.

Academic Career: Medical School

Course Component: Clinical

Grade Component: H/HS/S/LS/U

URLGY 5650 - INDIVIDUALIZED CLINICAL COURSE

Minimum Credits: 0

Maximum Credits: 0

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

URLGY 5810 - UROLOGY RESEARCH

Minimum Credits: 0

Maximum Credits: 0

This four-week elective will allow the student to gain valuable experience in urological surgery. The student will be given the opportunity to learn research techniques and to participate in research in progress.

Academic Career: Medical School

Course Component: Directed Studies

Grade Component: H/HS/S/LS/U

URLGY 5899 - INDEPENDENT STUDY IN UROLOGY

Minimum Credits: 0

Maximum Credits: 0

The purpose of this course is to provide the student with the opportunity to participate in ongoing clinical or laboratory research under the direction of a faculty preceptor. The student in collaboration with the faculty will develop a learning contract which includes objectives for the independent study method for student/faculty evaluation and timetable for completing the experience.

Academic Career: Medical School

Course Component: Independent Study

Grade Component: H/HS/S/LS/U

URLGY 5900 - EXTRAMURAL UROLOGIC SURGERY

Minimum Credits: 0

Maximum Credits: 0

A clinical experience in urologic surgery may be arranged at an institution other than the University of Pittsburgh School of Medicine. Arrangements must be made in accordance with the process set out in the upset course catalog with all appropriate approvals to be received before the course may be added to the student schedule for credit.
