The Honors Degree program requires 24 credits to be completed upon graduation. Of these 24 credits, a minimum of 18 credits of University Honors College approved academic course credits and a minimum of 6 experiential course credits are required. The 18 academic course credits may include courses with the University Honors College course attribute value (honors courses); courses with the Civic Learning course attribute value; graduate-level courses; courses which are used to fulfill the following (including courses which do not have the University Honors College attribute): Leadership and Ethics Certificate; Conceptual Foundations of Medicine Certificate; Engineering for Humanity Certificate; Engineering Science; Gender, Sexuality, and Women Studies Minor; Global Health Certificate; Pitt Business Honors Program; Politics and Philosophy, BA; Public Communication of Science and Technology; Undergraduate Certificate in Sustainability; and any additional course work beyond those used for the 6 credit experiential course work requirement. The 6 experiential credits may include courses with the Civic Learning + Engagement course attribute value, as well as academic research, independent study, study abroad, internships, or co-op programs, all of which require completed credits to appear on the transcript. In addition to the curricular requirements, students are required to complete the Honors Outside the Classroom Curriculum that provides non-credit enhanced experiences for honors students. A minimum cumulative GPA of 3.25 upon graduation is required for completion of the Honors Degree program. Upon successful completion of the program, students receive a degree/diploma jointly-conferred by the UHC and their primary school/college of admission. Students admitted to the Honors Degree program in their first year will be granted priority access to the honors living learning community within the residence halls. Students who remain in good academic standing in the Honors Degree program will also be granted priority registration throughout their time as undergraduate students (priority registration for students admitted to the Honors Degree program as a first-year student begins with spring term enrollment).

*On October 5th & 28th, 2021 the Honors Degree was updated.

Admissions Requirements

The admissions process includes criteria for three categories of students: first-year admits, external transfers, and internal (Pitt) transfers.
Admission for first-year students is conducted by Pitt Admissions and is based on evaluation of high school transcript, extra-curricular activities, and response to an essay prompt.

Admission for external transfer students is conducted by Pitt Admissions and is based on the evaluation of the completion of a minimum of two college semesters (24 credits) that meet the University of Pittsburgh criteria for transfer and review of an essay prompt.

Admission for internal transfer students (current Pitt students in all campuses) is conducted by the University Honors College and is based on an evaluation of a current Pitt transcript with minimum GPA of 3.50 after completion of two semesters (24 credits), review of an essay prompt, and one academic letter of recommendation from an instructor or academic advisor.

Requirements for Students in the School of Social Work*

- Minimum GPA: 3.25
- 18 credits (6 courses) of Honors Courses
- 9 credits from our BASW program. All of our honors courses are required**
- 6 experiential credits (including research, independent study, approved study abroad via Pitt Panther programs; SOCWRK 1025/SOCWRK 1027)***
- Completion of the Pitt Honors OCC***

* On September 20, 2021 University Honors College (UHC) approved to establish a new pathway toward a jointly-conferred degree with the School of Social Work. This option would be in addition to the existing Bachelor of Philosophy option. In order to maintain accurate records the update was made on 9/30/2021.

**The directed study in Research SWRES 2023 can be substituted for either or SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK.

***These are requirements established by UHC

Social Work Course Sequence Options

This presents three ways in which students could complete the 9 credits of Honors-designated BASW classes.

Option 1:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
- SOCWRK 1079 - CHILD WELFARE SERVICES
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH

Option 2:

- SOCWRK 1000 - INTRODUCTION TO SOCIAL WORK
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH
- SWRES 2023 - DIRECTED STUDY IN RESEARCH

Option 3:

- SOCWRK 1079 - CHILD WELFARE SERVICES
- SOCWRK 1020 - INTRODUCTION TO SOCIAL WORK RESEARCH
- SWRES 2023 - DIRECTED STUDY IN RESEARCH

Additional

Students must complete an additional 9 credits of Honors-designated courses (3 courses). At least six (two courses) of the nine credits must satisfy social work co-requisites:

- Africana Studies (3 crs.)**
Anthropology (3 crs.)**
Economics (3 crs.)
English Composition (3 crs.)
Gender, Sexuality, and Women's Studies (GSWS) (3 crs.)** (Any course with a GSWS class attribute)
Human Biology (3 crs.)
Political Science (3 crs.)**
Psychology (3 crs.)**
Religion/Spirituality (3 crs.)** (Any course with a Religious Studies class attribute)
Sociology (3 crs.)**
Statistics (3 crs.)
A maximum of three credits (1 course) can be any other course with an Honors designation.

Total Credits: 24

Global Distinction

The Global Distinction is a new Pitt credential that supports your growth in learning more about the world inside and outside the classroom.

By completing course work across disciplines and participating in global activities and experiences at home or abroad, you can earn official recognition for your work. The credential also brings milestone rewards and, upon completion, a personal Global Distinction URL for use on your résumé and networking sites.

The Global Distinction is a great way to demonstrate your cross-cultural exposure and awareness to potential employers. Follow the steps or check out the Flyer to learn how to enroll now.

Benefits of Earning the Global Distinction

- **Transcript annotation**: Your achievement noted on your academic transcript
- **Personalized digital transcript**: Digital catalog of your work with a unique URL for your résumé and networking sites and sharing with prospective employers and recruiters
- **Rewards and incentives**: Special prizes, networking invitations, and advance notice of or preferred consideration for travel grants or other funding opportunities for achieving competency milestones
- **Graduation honorable mention**: Special recognition during your school's and the University Center for International Studies' graduation ceremonies

Credential Requirements

To earn the Pitt Global Distinction, undergraduate students complete the following:

<table>

**Enroll Now!**

Enroll today to find out how many of your in-progress or completed courses and global activities and experiences qualify. MyPittGlobal on the mobile app Suitable will keep track of everything for you, including the special rewards and incentives you are eligible for along the way. You can start at any time.

- Go to my.pitt.edu.
- Click on the myPittGlobal icon.
- Log in using your Pitt credentials.
- Search: Distinction Enrollment.
- Complete the online form.

Contact information for questions: globaldistinction@pitt.edu

**Honors Distinction**

The Honors distinction offers a lighter credit load than the Honors Joint-Degree program, so you can still earn Honors distinction as transfer student or if your major has strict requirements. The guidelines are rigorous, but flexible, so you can forge your own path.

**Honors Distinction requirements:**

- **Curricular**: 9 academic credits of UHC approved courses; credits within approved school-based honors programs can be applied with course attribute
- **Co-curricular**: 3 experiential credits (can include research, independent study, approved study abroad via Panther Programs’ approved internship for credit; Approved Coop program)
- **Outside of the classroom**: Completion of the Pitt Honors OCC (non-credit).
- **Minimum GPA**: 3.0

Students can declare their intention to pursue the Honors Distinction by completing an online application.

**Honors OCC**

**Build a diverse Honors experience, from scholarly to social**

The Honors Outside the Classroom Curriculum (OCC) is a points-based program to help you broaden your experience at Pitt Honors.

Because Honors programs let you guide your own path, think of the OCC as a roadmap to help you shape it. You'll get points not only for your achievements, but also when you try new things, engage with the community, and apply yourself.
It's also incredibly flexible. There are 10 competencies, each with a breadth options to choose from - or you can even suggest your own.

Requirements

Completing the Honors OCC is required for both the Honors joint degree and Honors distinction.

To complete the Honors OCC, you must:

- Earn **1,200 total points**: at least 100 points in each of the 10 competencies, plus an additional 200 in the category of your choice. (Point values vary.)
- Remain active in the OCC every academic year to stay in good standing for your program.

To stay on track for graduation, you should hit a progress milestone in the app each academic year. The Honors OCC takes about 5-8 semesters to complete, so you should get started as soon as you're admitted to an Honors program. Once you've met the graduation requirements, you can (and should!) still continue to earn points for the leaderboards.

You can browse all the eligible activities, verify your points, and track your progress through the **Pitt OCC Suitable app** (the same app you use for the general Pitt OCC.)

10 competencies

Communication

Sharpen your communication by preparing scholarship application essays, presenting your research at conferences, engaging in interdisciplinary Honors fellowship communities, and more.

Career preparation

Prepare for your future by applying for research programs in your field, engaging in internships, attending networking events, and more.

Art appreciation

Learn to view the world through a more creative lens when you visit museums and Pittsburgh arts events, conduct your own creative research, contribute to Pitt Honors publications, showcase your own creative works, and more.

Global and cultural awareness

Gain a global perspective by pursuing study abroad, attending multicultural events, and more.

Initiative & drive

Take the reins on your academic experience by exploring and striving toward new opportunities.

Leadership

Track your growth as a leader when you take on training, roles, and responsibilities. Gain points for activities like attending seminars, being elected as a student representative, serving as an officer in a campus organization, becoming an Honors RA, and more.

Sense of self
Gain a better awareness of your own personal skills, abilities, values, and beliefs by meeting with Honors mentors and joining programs that foster your self-awareness.

Service to others

Use your talents to impact the world! Volunteer, serve as a mentor, conduct community-based research, join service leadership programs, complete public service internships, and more.

Wellness

Balance your emotional, mental, physical, and financial health with a variety of events and programs, from stress-relief workshops to financial coaching sessions.

Honors pride

Strengthen your commitment to the Honors community's values by joining us for social events, supporting our newer students, serving as an Honors ambassador, and more.

You will gain access to the Honors OCC in the Suitable app once you're admitted to either the Honors joint degree or Honors distinction program.

Sustainability Distinction

The primary goals of the Sustainability Distinction are to provide students with a mechanism to gain recognition and "credit" for their outside-the-classroom endeavors and broaden the number of undergraduate students participating in sustainability activities throughout campus.

Courses

Relevant courses will introduce students to the core principles of sustainability (social, economic and environmental) and provide them with basic competencies related to the broad topic of sustainability.

Sustainability Distinction course requirements:

- Six (6) academic credits including Current Issues in Sustainability (Course #1905)
- One (1) Sustainability-Focused Course as designated in Curriculog. If a student is unable to take the Current Issues course, then three (3) alternative Sustainability-Focused courses can be taken for nine (9) credits.

High-Impact Activities (Minimum of Three Activities)

These activities should enrich the student's academic pursuits and provide opportunities to apply knowledge and skills to pressing social and environmental challenges. Examples of such activities include:

- Leadership role in a Student Office of Sustainability affiliated organization (other student groups will be considered with approval by the committee)
- Long-term campus or community service and/or a Place-Based Engagement Project (at least a two-semester commitment)
- A sustainability-related internship, research project or co-op experience
- A sustainability-related study abroad or alternative break experience
- An innovation competition, experience or startup related to sustainability

Exploration (OCC Sustainability Badge)
These undertakings should broaden a student's personal development through outside-the-classroom (OCC) experiences aimed at expanding sustainability knowledge, skills and networks. The OCC Sustainability badge provides credit for the following types of activities (among others):

- Participation in a minimum of three (3) Green Team service opportunities
- Attendance at the Sustainability Showcase and Fair
- Attending the Student Office of Sustainability First Thursday Meet-up
- Participating in Clutter for a Cause or the Resident Student Association Panther Prowl food drive (benefiting the Pitt Pantry)
- Donating to the University of Thrifsburgh or attending a University of Thrifsburgh fix-it or maker event
- Completing the Pitt Green Resident Program
- Attendance at three (3) Student Office of Sustainability-sponsored events

**Reflection (2,000-word essay)**

Students should reflect upon and share how classes, activities, and experiences collectively contributed to their overall personal and professional development. Students should provide examples of how these experiences enabled them to apply academic knowledge and skills to important sustainability issues.

**Enrollment Information**

Students interested in completing the Sustainability Distinction will declare their intention to pursue by completing an online application form. The form will be available here soon. Students will be able to use the application system to self-track their progress. Some activities may require prior approval for credit. Students can apply for the distinction at any time; however, the deadline to submit the intention to pursue the distinction will be the end of the add/drop period of the semester prior to the semester in which they will graduate.
Special Academic Opportunities

The University of Pittsburgh makes many special academic opportunities available to all of the University's undergraduate students. These opportunities provide students with ways to augment their education and experience with expanded study programs both on campus and off campus, in both University and professional settings.

Area of Concentration (Sub-Plan)

An area of concentration is an approved educational experience that results in concentrated training in or knowledge of a particular area within the discipline of a degree program. For more information about specific areas of concentration, see individual school sections.

Certificate Programs

Students may broaden their educational experience by electing to take an academic interdisciplinary certificate program in the areas listed below. The certificate may partially fulfill the degree requirements of the student's school. The requirements for each certificate vary, and students should contact the certificate program director. For more information about these certificate programs, see their individual listings in the school or center section identified in parentheses.

- Accounting (CGS)
- African Studies (UCIS)
- American Sign Language (A&S)
- Asian Studies (UCIS)
- Assistive Technology in Rehabilitation (SHRS)
- Children's Literature (A&S)
- Civil Engineering and Architectural Studies (ENGR)
- Communications (CGS)
- Community Health Assessment (CGS)
- Conceptual Foundations of Medicine (A&S)
- Corporate/Community Relations (CGS)
- Dental Hygiene (DEN)
- Digital Media (CGS)
- Emergency Medicine in Rehabilitation (SHRS)
- English Writing (CGS)
- European Union Studies (UCIS)
- Gender, Sexuality, and Women's Studies (A&S) (CGS)
- Geographic Information Systems (A&S)
- German Language (A&S)
- Global Studies (UCIS)
- Historic Preservation (A&S)
- History and Philosophy of Science (A&S)
- Information System Design (CGS)
- International Business (CBA)
- International Engineering Studies (ENGR)
- Jewish Studies (A&S)
- Latin American Studies (UCIS)
- Leadership (A&S)
- Leadership and Ethics (CBA)
- Managing Health Services Programs and Projects (CGS)
- Medieval and Renaissance Studies (A&S)
- National Preparedness and Homeland Security (CGS)
- Nonprofit Management (CGS)
- Nuclear Engineering (ENGR)
Cooperative Programs

The University has established some arrangements with industry that permit students to rotate four-month terms between the workplace and the classroom. These programs are administered by the Swanson School of Engineering and available to engineering, computer science, and engineering technology students. The experience normally starts in the sophomore or junior year. Call 412-624-9826 for more information or see www.engineering.pitt.edu/coop.

Cross Registration

Cross-college and cross-university registration is a program designed to provide enriched educational opportunities for undergraduates in any of the following participating Pittsburgh-area institutions: Carlow University, Carnegie Mellon University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, Robert Morris University, and the University of Pittsburgh. For requirements and limitations, see the Cross-Registration section of this catalog or visit www.pchepa.org.

Double And Joint Degrees

Students may simultaneously pursue more than one undergraduate degree (e.g., a BA and a BS within Arts and Sciences, or an undergraduate degree in the Swanson School of Engineering and in Arts and Sciences). Students must be admitted to both schools offering the degrees and fulfill the degree requirements of both schools. For the double degree (whether within or between schools), the student must complete not only the requirements for both degrees, but also a minimum of 30 credits beyond what is normally required for the primary degree (e.g., a student earning two A&S degrees would need at least 150 credits, rather than the usual 120; a student earning an A&S degree as the primary degree and a degree from another University of Pittsburgh school as the secondary degree would need at least 150 credits). Students must maintain a 2.00 GPA in all courses. Check with the individual school for other specific requirements that apply.

Graduate And Professional School Opportunities

Graduate school provides students with the opportunity to enhance their knowledge and qualifications in areas of academic and professional interest. All students can take advantage of being at a major research and graduate institution by exploring the many possibilities for graduate study that exist at the University. For information about specific programs, see the Graduate and Professional Studies Catalog.

University of Pittsburgh undergraduate students with sufficient preparation are permitted to enroll in certain graduate courses at the University following procedures determined by each school. The graduate credits earned may be counted toward the undergraduate degree if approved by the student's school. These may not be counted as credits toward a graduate degree except as noted below.
Undergraduate students who need fewer than 15 credits to complete requirements for the baccalaureate degree and who intend to continue study toward an advanced degree may be permitted during their final term to register for graduate courses that will later apply toward a graduate degree. See the Graduate Catalog - Academic Regulations section “Enrollment in Graduate Courses as an Undergraduate”.

Some schools offer accelerated admission into certain graduate and professional schools through a combined program leading to both a bachelor's and graduate or professional degree. The participating undergraduate schools and their early admissions graduate school partners are listed below:

- Arts and Sciences (A&S)-Communication Science Program (speech, pathology, and audiology) within the School of Health and Rehabilitation Sciences (SHRS)
- A&S-Physical Therapy Program within SHRS
- A&S-School of Dental Medicine
- BS in Computer Science and MA or MS in Computer Science, both from Arts and Sciences
- BS in Statistics and MA or MS in Statistics, both from Arts and Sciences
- BA from Arts and Sciences and JD from Law
- BA or BS (unspecified major, but prerequisites required) from Pitt and MS or MPH in Environmental and Occupational Health, MS or MPH in Infectious Diseases and Microbiology, MS in Human Genetics, MS or MPH in Biostatistics, or BCHS or MHPE in Health services Administration from Graduate School of Public Health
- School of Nursing-RN-Option Program (RN-MSN option)
- SHRS-Health Information Management Program
- BA in Legal Studies from the College of General Studies and Masters of Law from Law
- BSBA from College of Business Administration and JD from Law

**Honors College And Honors Courses**

The University Honors College (UHC) seeks to meet the special academic and cocurricular needs of the University's most able and motivated undergraduate students. The University Honors College offers a variety of carefully designed courses from the humanities, social sciences, and natural sciences, along with special advising opportunities for an academic community of motivated students, and a special baccalaureate degree in any undergraduate school of the University. See the University Honors College section of this catalog for more information. In addition, some schools and departments offer an honors major. Students should see their school for more information on this opportunity.

**Internships**

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either on a volunteer or compensated basis. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

**Minors (Plans)**

A minor provides an option for a student obtaining a degree in a particular discipline to attain knowledge of another discipline. Students may earn minors in schools other than the school in which they are enrolled. After the student lists the official minor on his or her graduation application, the minor appears on the student's academic record and official transcript when the degree is awarded. (See the Academic Programs section of this catalog for available minors.)

**Reserve Officer Training Corps (ROTC)**

ROTC is an educational program designed to provide full-time students an opportunity to become military officers while completing a Bachelor's or a graduate degree. Students may elect to participate in either the Air Force or Army ROTC program at the University of Pittsburgh or the Naval ROTC program at Carnegie Mellon University. Students in the Air Force program have the option of completing a two or a four-year program. Students in the Army ROTC Program and Naval ROTC programs have the option of completing a two, three, or four-year program. Completion of the Air Force ROTC program leads to a commission as a Second Lieutenant in the U.S. Air Force. Completion of the Army ROTC program leads to a commission as a Second Lieutenant in the U.S. Army, the Army National Guard, or the U.S. Army Reserve. Completion of the Navy ROTC
program leads to a commission as an Officer in the Navy or Marine Corps. All three programs offer monthly stipends, a book allowance and tuition scholarships. Call 412-624-6396 or see http://www.afrrotc.pitt.edu/ for more information on the Air Force ROTC program, 412-624-6197 or see www.rotc.pitt.edu for more information on the Army ROTC program, and 412-268-5109 or http://www.cmu.edu/nrotc for more information on the Navy ROTC program.

**Study Abroad**

Students are encouraged to add an international dimension to their undergraduate education through study abroad. Programs of study exist in almost every corner of the world and will fulfill requirements for almost any field of study. Second language proficiency is not a requirement, as most programs offer courses taught in English. Financial aid and scholarships are available. Interested students should come to the Study Abroad Office in 802 William Pitt Union to discover their many options. Call 412-648-7413 to schedule an Essentials of Study Abroad Session or explore www.abroad.pitt.edu. The Engineering Study Abroad Office is in B-80G Benedum, and the College of Business Administration Study Abroad Office is in 2514 Sennott Square.

**Summer Sessions**

The University offers a large selection of courses in a variety of compressed sessions throughout the summer. Current students can register through their school. Several summer sessions are offered, see the Academic Calendar.

During the summer term and summer sessions, most students are charged tuition on a per-credit basis regardless of the number of credits taken. See Financial Information. Additional information is available through the Office of University Summer Sessions at 412-383-8600 or www.summer.pitt.edu.

**Summer Edge**

The University offers intensive summer programs that provide academic and experiential studies delivered in a small cohort. In summer 2017, these programs are the Edge in Public and Global Health and the Edge in Wyoming. All University of Pittsburgh undergraduate students are eligible to apply. A transcript notation stating completion of the specific program will appear on the student's transcript. For more information including program costs, see http://www.summeredge.pitt.edu/.

In the Edge in Public and Global Health (11-12 credits), students learn to analyze and tackle critical world health problems through the integrated application of biological, social, and quantitative sciences. Working individually or in pairs with Public Health faculty, students will have opportunities to experience laboratory, quantitative, policy, or social science research, or field work with community organizations or health agencies. The program is administered through the School of Public Health and is offered over the 12-week summer session.

In the Edge in Wyoming (6 credits), students explore the history and politics of the American West, including issues related to environmental policy. While at the University of Wyoming, students will experience the West and its culture by interacting with local guest speakers and visiting relevant, regional sites. The program is administered through the Dietrich School of Arts and Sciences and is offered during 4-week-2 summer session at the University of Wyoming.

**Academic Standing**

Undergraduate students' academic standing is maintained and monitored each term by the school in which a student is enrolled. Students who are not on academic probation or academic suspension (i.e., students who maintain a cumulative grade point average of 2.00 or higher) are considered to be in good academic standing.

**Dean's List**

Students whose grades indicate outstanding academic achievement are recognized on their school's Dean's List. The following schools have a Dean's List:

- Dietrich School of Arts and Sciences
- College of Business Administration
Other Academic Honors

Schools and programs may have additional ways of recognizing academic achievement by students, such as Phi Beta Kappa, Tau Beta Pi, or a Term Honor List. More information about these opportunities is available through the school.

Probation, Suspension, and Dismissal

Students who fail to make satisfactory progress may be subject to academic probation and/or suspension and dismissal. Students who have completed at least 12 quality point credits and whose GPA falls below 2.00 will be placed on academic probation by the dean of the school. After a certain period of time on academic probation (determined by the student's school), a student is subject to academic suspension and restricted from registering for classes in that school. Details of the undergraduate school's probation system are available through that school.

Effect on Financial Aid

Conditions for financial aid eligibility usually require students to complete a specified number of credits each year and maintain a specified grade point average (GPA: credits counting toward the degree). Questions about the effect of unsatisfactory academic standing on financial aid should be directed to the Office of Admissions and Financial Aid in Alumni Hall at 412-624-7488.

Advising

Academic advising is a key part of every undergraduate's experience at the University of Pittsburgh. An academic advisor helps a student determine the appropriate academic path to further the student's educational and career goals. To be a success, the advising process must work both ways: The advisor will be there to help when the student needs it, and the student must actively seek out an advisor for help. Before signing up for classes each term, students meet with their advisors. Though each school may have different advising requirements, students are generally required to meet with their advisors at least two times per term for an advising appointment and a subsequent registration appointment. The online Schedule of Classes can be a useful advising tool (see www.registrar.pitt.edu/schedule_of_classes.html). Consult with the individual school for school-specific advising services.

Allowable Credits (Credit and Course Limitations)

There are certain limitations on credits, other than those earned as part of regular undergraduate courses taken at the University, that may be applied toward a degree. Those limitations are detailed below.

Advanced Standing Credits

Each school determines whether and under what circumstances the advanced standing credits listed below will be awarded toward a University of Pittsburgh degree or certificate offered by the school. Contact the individual schools for details.

Transfer Credit
Credit may be earned at other appropriately accredited institutions and accepted for transfer to the University of Pittsburgh, subject to University policy and individual school requirements.

## Advanced Placement

Credits may be earned toward a University of Pittsburgh degree or certificate through standardized examinations such as the College-Level Examination Program (CLEP), Occupational Competency, Excelsior College Examination Program, and Advanced Placement (AP) Exams. In addition, some schools give credit for the International Baccalaureate Higher-Level Examinations. Credit is given for the following AP Exam scores:

**Advanced Placement Credit (effective August 2015)**

</tbody>
</table>

- Students will have to check with the department to determine credit or waiver.
- Students wishing to take German language courses must still take the German Placement Exam at their orientation session.

**Credit by Examination**

In some cases, students may earn credits toward a University of Pittsburgh degree or certificate by passing a course examination without registering for the course. Contact the individual department or school for information, as each sets its own policies as to the specific courses for which students may request credit by examination.

**Career Development Courses**

Noncredit, career development courses are not applicable to the bachelor's degree but may be included among the requirements for certain professional certificates.

**Cooperative Programs**

The University has established some arrangements with industries that permit students to rotate four-month terms between the workplace and the classroom. These are paid positions related to the student's field of study. These programs are administered by the Swanson School of Engineering and are available to any student with a science-related major. The experience normally starts in the sophomore or junior year. Students should contact their school or department to determine the maximum number of credits that may be earned toward their degree requirements through cooperative programs. Call 412-624-9826 for more information.

**Duplication of Course Content**

Students may not earn credit for courses that substantially duplicate the content of other courses for which they have already received credit.

**Directed Reading and Research, Independent Study, Internships**

Some schools offer individually designed study other than regular courses. Students are limited by the individual schools as to how many such independent study, directed reading, directed research, and internship credits can be counted among the required credits for the degree. Requirements and procedures may also differ. Contact school for details.

**Directed Reading**

The student undertakes a specified course of study comparable to a regular course under the direct supervision of a faculty member.

**Directed Research**

The student pursues a defined research project on campus under the guidance of a faculty member.

**Independent Study**
Independent study involves an independent program of study, research, or creative activity designed under specified conditions and is usually conducted off campus with less immediate direction by the sponsoring faculty member.

Internships

Some schools provide internship experiences appropriate to the student's academic discipline. An internship is a supervised, work-related experience, either volunteer or compensated. It is intended to be a new experience, not an existing position in which the student is already working. Students will only get internship credit for a current employment situation that has been pre-approved as an internship by the relevant school or department.

English Language Institute Courses

Credit for certain English Language Institute courses may be applied toward the undergraduate degree. See school for details.

Enrollment in Graduate Courses

Undergraduate students with sufficient preparation are permitted to enroll in graduate courses, and credits earned may be counted toward the undergraduate degree following procedures determined by each school. Credits earned in graduate courses taken by an undergraduate student typically cannot be counted subsequently toward a graduate degree. Consult the appropriate graduate or professional school bulletin for rules governing transfer credits for graduate-level courses taken by an undergraduate student.

PittOnline (formerly External Studies)

The PittOnline Program offers most courses to students in a Web-based environment. Most course materials can be accessed through CourseWeb, the University's course management system. Web courses feature Web-based instruction and interaction. Students interact with their instructors and other students through the class Web site. Students complete the course requirements within one term and move through the course materials as a cohort. Hybrid courses combine Web-based interaction and face-to-face instruction. Students are required to attend scheduled workshops and participate in online discussions and activities.

Self-paced courses utilize a flexible format where students move through assigned course materials at their own pace. Workshops and Web-based activities are features of some courses. The course syllabus provides more information about workshops and Web-based activities for these courses. Self-paced courses without CourseWeb are indicated with a SPW designation.

For additional information on PittOnline courses, contact the College of General Studies at 412-624-7210.

Hybrid Courses

All hybrid/blended courses must provide 50% or more of the instruction in a face-to-face modality. For a three credit course this would amount to 22.5 hours of face-to-face contact. The percentage of face-to-face (in-classroom) hours and the percentage of online hours must be stipulated in the course syllabus so that the expectations are clear to students.

Reserve Officer Training Corps (ROTC) Credits

Students may elect to participate in either the Air Force ROTC or Army ROTC Programs at the University of Pittsburgh or the Navy ROTC Program at Carnegie Mellon University. Contact individual schools to determine which credits earned in ROTC courses may be applied toward a degree. (For more information on ROTC, see the Special Academic Opportunities section of this bulletin.)

Grading and Records

For additional grading and records information, visit the University registrar's Web site at www.registrar.pitt.edu.
GPA

The Grade Point Average (GPA) is the numeric indication of a student's academic achievement based on a 4.00 grade point scale. Undergraduates must have a 2.00 GPA in order to graduate from the University of Pittsburgh. The value is the average of total letter grades earned and is available by term or career. Some academic centers may also maintain degree and/or major/departmental GPA values.

Grading System

The University of Pittsburgh has a standard letter grade system (see Letter Grade Option). Some additional grading options are available in some courses as determined by the school and the instructor (see Grading Options below). Finally, undergraduate students may choose to audit a course. Students must complete Grade Option/Audit Request forms to request a grading option available in a particular course.

Grading Options

Individual schools may elect to offer a course with the following grade options:

- LG: Letter grade
- H/S/U: Honors/Satisfactory/Unsatisfactory
- S/NC: Satisfactory/No-Credit (Formerly the S/N Option)

LG and H/S/ULetter grade and Honors/Satisfactory/Unsatisfactory

LG and S/NC Letter grade and Satisfactory/No-Credit

Students may select a grade option for those courses that offer more than one option by submitting a Grade Option/Audit Request form by the established deadline to the school offering the course (generally four weeks from the start of the term, but check with the school for specific deadlines). If the student does not fill out a Grade Option/Audit Request form for a course in which more than one grade option is available, the default option (generally the letter grade option) will automatically apply.

Letter Grade Option

The University's letter grade system identified below will be followed without exception:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.00</td>
</tr>
<tr>
<td>A</td>
<td>4.00 Superior</td>
</tr>
<tr>
<td>A-</td>
<td>3.75</td>
</tr>
<tr>
<td>B+</td>
<td>3.25</td>
</tr>
<tr>
<td>B</td>
<td>3.00 Meritorious</td>
</tr>
<tr>
<td>B-</td>
<td>2.75</td>
</tr>
<tr>
<td>C+</td>
<td>2.25</td>
</tr>
<tr>
<td>C</td>
<td>2.00 Adequate</td>
</tr>
<tr>
<td>C-</td>
<td>1.75</td>
</tr>
</tbody>
</table>
H/S/U Grade Option

Certain courses are offered on the H/S/U (Honors/Satisfactory/Unsatisfactory) grade option. Under this option, students earn an H if they do exceptional work (equivalent to an A- or higher under the letter grade system), an S if they do satisfactory work (equivalent to grades from a C up to a B+), or a U if they do unsatisfactory work (equivalent to a C- or lower). The H and S grades received under this option are counted toward graduation but are not computed in the student's GPA. The U grade is counted toward neither graduation nor the GPA.

S/NC Grade Option (Formerly the S/N Option)

Certain courses are offered on the S/NC (Satisfactory/No-Credit) grade option. This option was designed to encourage students to explore new and potentially difficult subjects without fear of the risks of failure. Under this option, a student who does satisfactory work (a grade of C or better) in a course receives the grade of S. If the student's work is not satisfactory (a grade of C- or lower), the grade of NC (No Credit) is given. Courses for which an S is received are counted toward graduation, but are not computed in the GPA. Courses in which an NC is received are counted toward neither graduation nor the GPA.

Other Grades: Incomplete, Resign, Withdraw

Upon a student's completion of a course, one of the grades listed below may appear on the student's transcript in lieu of one of the options selected by the student and/or instructor (the options are listed under Grading Options). None of these grades carries quality points:

G Grade

The G grade signifies unfinished course work due to extenuating personal circumstances. Students assigned G grades are required to complete course requirements no later than one year after the term or session in which the course was taken. Some schools have a shorter deadline for completion of G grades; see school for details.

Once the deadline has passed, the G grade will remain on the record, and the student will be required to reregister for the course if it is needed to fulfill requirements for graduation.

I Grade

The I grade signifies incomplete course work due to the nature of the course, clinical work, or incomplete research work in individual guidance courses or seminars.

R Grade

The R grade signifies that a student resigned from the University for the term. (See Resigning from the University for more information.)

W Grade
The W grade signifies that a student has withdrawn from a course. (See Monitored Withdrawal from a Course for more information.)

Auditing a Course

To audit a course, a student must register and pay tuition for the course. A Grade Option/Audit Request form must be submitted for undergraduate courses by the established deadline. Students who audit a course are given an N grade.

Repeating Courses

Students may elect to repeat a course, subject to the following stipulations. Students should check with their individual schools for other school-specific rules on repeating courses, including the need to submit appropriate forms.

- A sequence course may not be repeated for credit if the student passes a higher sequence course with a C or better grade.
- A student may not enroll in the same course at another institution and have that grade replace the original grade earned at the University.
- The original course and grade remain on the transcript; however, the grade and credits originally earned are not counted in the calculation of the GPA.
- The grade earned by repeating a course is used instead of the grade originally earned. W, R, or N grades reported for the repeated course will not be identified as a course repeat, and therefore the original grade earned will continue to be counted in the GPA. Incomplete grades (G and I) are not identified as repeated courses until the course work is completed.
- Students are only permitted to repeat a course twice. Any grade earned in the repeated course will be recorded on the academic transcript, even if it is lower than the original grade.

Changing Grades

The instructor of a course may change a student's grade by submitting a Change of Grade Card. All grade changes require the authorization of the dean of the school from which the original grade was issued. Students can verify grade changes for the terms available online via the secure server at my.pitt.edu

Grade Reports

Shortly after the term ends, students can access their grades online via the University Portal at www.my.pitt.edu.

Transcripts

An academic transcript serves as a permanent record of a student's academic progress. The transcript is a cumulative record of the student's GPA, as well as a record of the department, title, and grade for each course in which the student has enrolled and summary advanced standing information. Students may request an official transcript that bears the seal and signature of the University registrar. Currently enrolled students may also receive one unofficial copy of their transcripts per term for personal use. Upon graduation, the transcript reflects a student's degree and date, major, and, if applicable, honors, area of concentration, and minor.

Academic Record

The academic record is not an official University transcript, but a document containing a student's complete University of Pittsburgh academic history. In addition to the information provided on the transcript, the academic record provides students and advisors with admission data, academic events, detailed advanced standing/transfer credit information, and standardized test scores. Students with no outstanding financial obligations to the University can receive one free copy of their academic records each term in G-3 Thackeray Hall.

Graduation
Requirements for Graduation

Graduation requirements differ among schools. However, all undergraduate schools require a minimum of 120 passing credits to graduate, as well as a GPA of at least 2.00. (See specific schools and programs for detailed graduation requirements.)

Application to Graduate

Students must file an application for graduation through their college or school. Generally, students must apply for graduation before the end of the term preceding the one during which they expect to complete all degree requirements. Each school establishes its own deadline by which students must apply for graduation. Students should check with their schools for the deadlines.

Graduation with Honors

Undergraduate members of a graduating class who have attained an outstanding scholastic record may be graduated with University honors. To be eligible, a student must complete at least 60 letter-graded credits at the University of Pittsburgh. All degree-related course work completed at the University is calculated in the grade point average. Receipt of University honors is based on having obtained the following grade point average at graduation:

- Summa Cum Laude 3.75
- Magna Cum Laude 3.50
- Cum Laude 3.25

The honor status achieved by a student will appear on the student's official University transcript and diploma.

Each school may award undergraduate program honors based on the major GPA and other criteria, as determined by the school and department.

Commencement

Candidates for graduation are encouraged to appear in person at commencement, usually held the Sunday after the spring term ends. Although degrees are conferred at commencement for all graduation periods, the official certification for April and May graduates occurs several weeks after the ceremony.

With the exception of students who receive their diplomas at individual school ceremonies, all diplomas are mailed to students approximately four weeks after the official certification date for each graduation period.

Other Policies

Affirmative Action and University of Pittsburgh Nondiscrimination Policy Statement

The University of Pittsburgh, as an educational institution and as an employer, values equality of opportunity, human dignity, and racial/ethnic and cultural diversity. Accordingly, as fully explained in Policy 07-01-03, the University prohibits and will not engage in discrimination or harassment on the basis of race, color, religion, national origin, ancestry, sex, age, marital status, familial status, sexual orientation, gender identity and expression, genetic information, disability, or status as a veteran. The University also prohibits and will not engage in retaliation against any person who makes a claim of discrimination or harassment or who provides information in such an investigation. Further, the University will continue to take affirmative steps to support and advance these values consistent with the University's mission. This policy applies to admissions, employment, access to and
treatment in University programs and activities. This is a commitment made by the University and is in accordance with federal, state, and/or local laws and regulations.

For information on University equal opportunity and affirmative action programs, please contact: University of Pittsburgh, Office of Affirmative Action, Diversity and Inclusion, Carol W. Mohamed, Director (and Title IX, 504 and ADA Coordinator), 412 Bellefield Hall, Pittsburgh, PA 15260 (412) 648-7860.

For complete details on the University's Nondiscrimination Policy, please refer to Policy 07-01-03. For information on how to file a complaint under this Policy, please refer to Procedure 07-01-03.

Drug-Free School and Workplace Policy

The University of Pittsburgh prohibits the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance on University property or as part of any University activity. Faculty, staff, and students of the University must also comply with the laws of the Commonwealth of Pennsylvania on the possession and consumption of alcohol.

Violation of this policy will result in disciplinary action within 30 days, including, but not limited to, a warning, written reprimand, suspension, dismissal, expulsion, and/or mandatory participation and successful completion of a drug abuse assistance or rehabilitation program approved by an appropriate health or law-enforcement agency.

Any University employee paid from federally funded grants or contracts, or any students participating in any federally funded or guaranteed Student Loan Program, must notify the University of any criminal drug statute conviction for a violation occurring at the University or while engaged in University activities. For more information, see www.bc.pitt.edu/policies/policy/06/06-02-01.html.

E-mail Communication Policy

The University of Pittsburgh has established e-mail as an official means of communication with students. For more information, see www.bc.pitt.edu/policies/policy/09/09-10-01.html.

Faculty-Student Relationships

The University's educational mission is promoted by professional relationships between faculty members and students. Relationships of an intimate nature (that is, sexual and/or romantic) compromise the integrity of a faculty-student relationship whenever the faculty member has a professional responsibility for the student. The University prohibits intimate relationships between a faculty member and a student whose academic work, teaching, or research is being supervised or evaluated by the faculty member.

If an intimate relationship should exist or develop between a faculty member and a student, the University requires the faculty member to remove himself/herself from all supervisory, evaluative, and/or formal advisory roles with respect to the student.

Definition note: In this policy, the definition of faculty member refers to anyone appointed by the University as a teacher, researcher, or academic administrator, including graduate and undergraduate students so appointed. For complete text on this policy, see www.bc.pitt.edu/policies/policy/02/02-04-03.html.

Family Educational Rights and Privacy Act (FERPA)

In compliance with the Family Educational Rights and Privacy Act of 1974, the University guarantees that students have the right to inspect all personally identifiable records maintained by the institution and may challenge the content and accuracy of those records through appropriate institutional procedures. It is further guaranteed by the University that student records containing personally identifiable information will not be released except as permitted by the Family Educational Rights and Privacy Act. See www.registrar.pitt.edu/ferpa.html for more information.

Harassment Policies
Harassment

No University employee, student, or individual on University property may intentionally harass or abuse a person (physically or verbally) with the purpose or effect of unreasonably interfering with such person's work or academic performance, or of creating an intimidating, hostile, or offensive work or academic environment.

Sexual Harassment

The University of Pittsburgh is committed to the maintenance of a community free from all forms of sexual harassment. Sexual harassment violates University policy as well as state, federal, and local laws. It is neither permitted nor condoned.

It is also a violation of the University of Pittsburgh's policy against sexual harassment for any employee or student at the University of Pittsburgh to attempt in any way to retaliate against a person who makes a claim of sexual harassment. Any individual who, after thorough investigation and an informal or formal hearing, is found to have violated the University's policy against sexual harassment will be subject to disciplinary action, including, but not limited to, reprimand, suspension, termination, or expulsion.

Any disciplinary action taken will depend upon the severity of the offense. For more information, see www.bc.pitt.edu/policies/policy/07/07-06-04.html.

Immunization Policy

The University requires the immunization of all incoming freshmen against measles, mumps, and rubella as a condition of attendance at the University of Pittsburgh. Incoming freshmen must provide to the University Student Health Service documentation of immunization that includes the month, day, and year that the immunizations were administered. Completed immunization forms must be kept on file in the Student Health Service.

Exemptions may be granted based on a written statement from a physician that the immunization may be detrimental to the health of the student or on a student's objection to immunization on religious grounds or on the basis of a strong moral or ethical conviction similar to a religious belief. However, if an outbreak of measles, mumps, or rubella occurs, the State Health Department may exclude from classes students who do not provide proof of immunity to these diseases. For more information, see www.bc.pitt.edu/policies/policy/06/06-01-02.html.

Patent Policy

A University student, during his or her period of enrollment, may be responsible for new discoveries and inventions that could have commercial value and contribute to scientific, technological, social, and cultural progress. Those accomplishments should be patented in the best interest of the student, the University, the public, and the government. The University's policy on patents determines the rights and obligations of the student and the University in any technology the student may invent while enrolled in the University. Details of this University policy are available from the Office of Technology Management or at www.bc.pitt.edu/policies/policy/11/11-02-01.html.

Research Integrity

The University of Pittsburgh seeks excellence in the discovery and dissemination of knowledge. Excellence in scholarship requires all members of the University community to adhere strictly to the highest standards of integrity with regard to research, instruction, and evaluation. Research misconduct carries potential for serious harm to the University community, to the integrity of science, and to society as a whole. The University's Research Integrity Policy is available online at www.bc.pitt.edu/policies/policy/11/11-01-01.html.

Smoking Policy

Smoking is prohibited in all University-owned and -leased facilities, including residence halls and off-campus housing facilities, and in all University vehicles, including motor pool vehicles, campus buses, and vans, with explicit limited exceptions described in University Policy 04-05-03. For complete policy text, see www.bc.pitt.edu/policies/policy/04-04-05-03.html.
**Student Service Indicators Policy**

Access to many student services including registration and access to grades may be delayed for a number of reasons ranging from financial liability to missing data. Complete information on this policy is available online at www.bc.pitt.edu/policies/policy/09/09-04-09.html.

**Use of Alcohol Policy**

The University of Pittsburgh prohibits use and dispensing of alcohol in compliance with the laws of the Commonwealth of Pennsylvania. For more information, see www.bc.pitt.edu/policies/policy/04/04-05-02.html.

**Registration**

For additional registration information, visit the University registrar's Web site at www.registrar.pitt.edu

**Full-Time and Part-Time Study**

Full-time study is defined as enrollment for 12 to 18 credits per term, and part-time study is defined as enrollment for one to 11 credits per term. Students are charged a flat tuition rate for full-time study in the fall and spring terms. For part-time students, tuition payment is on a per-credit basis. Students may exceed the 18-credit limit with written permission from the dean of their school, but they will be billed on a per-credit basis for each additional credit. University fees and other applicable charges are assessed on student statements. Some schools within the University may also apply academic limitations on the number of credits for which a student is permitted to enroll each term. For instance, students in Arts and Sciences must get permission to enroll for more than 18 credits. During the summer term and summer sessions, all students (except co-op students who are doing an academic rotation) are billed on a per-credit basis regardless of the number of credits taken.

**Registering for Classes**

After being admitted to a school, students may register for classes after consultation with their academic advisors. The registration period for a term or session is published in the University's *Schedule of Classes*, in course descriptions, on calendars (including the University's *Academic Calendar* at www.pitt.edu/calendars.html), and in numerous other publications.

Many students have the convenience of submitting their registration forms online to a school's or advisor's office. Students may also process their registration forms in the Registration Office, G-3 Thackeray Hall. Students are required to have the signature of their academic advisors on the registration form. The student's signature on the registration form creates a financial obligation to the University of Pittsburgh. Once students have registered, they may view their class schedules online via the University Portal at www.my.pitt.edu.

**Adding and Dropping Courses**

Students may add and drop course(s) only during the add/drop period. The dates for the add/drop period are published in University publications, in the University's *Schedule of Classes*, in course descriptions, on calendars (including the University's *Academic Calendar* at www.pitt.edu/calendars.html), and in numerous other publications. Students not enrolled in Arts and Sciences and students who are student athletes or participants in Academic Resource Center programs must have their academic advisors sign all add/drop forms. Students who no longer wish to remain enrolled in a course after the add/drop period has ended may withdraw from the course or resign from the University. See Monitored Withdrawal from a Course and Resigning from the University.

**Cross-Registration**

Cross-registration provides students with the opportunity to enroll in courses at member institutions of the Pittsburgh Council on Higher Education (PCHE). The designated colleges and universities at which undergraduate students may cross-register include Carlow University, Carnegie Mellon
University, Chatham University, Community College of Allegheny County, Duquesne University, La Roche College, Pittsburgh Theological Seminary, Point Park University, and Robert Morris University. Only full-time students may cross-register. Please note that students must maintain a full-time course load (at least 12 credits as an undergraduate) at Pitt while cross-registered. Students who cross-register do not pay tuition to the host institution; however, they are responsible for any additional fees associated with the course such as laboratory fees, books, and the like. Students normally may register for only one course off campus in a given term. The grades and credits earned at the host institution are transferred to the home school. The academic policies of the host institution prevail.

Cross-registration is only available in the fall and spring terms. During the summer, students may attend one of the above colleges as guest students, but they must pay that institution's tuition and fees. Students are discouraged from cross-registering during their term of graduation to avoid any delays in the receipt of course credit needed to graduate. Students should meet with their advisors or a school representative before they cross-register. For more information on cross-registration, visit www.pchepa.org.

Monitored Withdrawal from a Course

After the add/drop period has ended, students may withdraw from a course that they no longer wish to attend by completing a Monitored Withdrawal Request form in the office of the school offering the course. Students must process the Monitored Withdrawal Request form within the first nine weeks of the term in the fall and spring. Because summer sessions vary in length, students should check the summer Schedule of Classes for those deadlines. Students should check with the school offering the course for the last day to submit a Monitored Withdrawal Request form. The grade W will appear on the student's grade report and transcript. There is no financial adjustment to students' tuition or fee obligations involved in withdrawing from courses, but withdrawing may jeopardize satisfactory academic progress, financial aid, and athletic eligibility.

Resigning from the University/Termination of Registration

If students decide to drop all of their courses after the add/drop period has ended and before 60 percent of the term or session has been completed, they must resign from the University for that term. Official resignation from the University requires students to contact the Student Appeals Office. Students have several options. They may resign in person, by mail, or by calling 412-624-7585, where students may leave a message 24 hours a day, including weekends and holidays. An R grade will appear on the student's academic transcript for each course in the term of resignation. Tuition is prorated from the date of the student's notification to the Student Appeals Office of the student's desire to resign, unless 60 percent of the term has been completed, in which case there is no refund.

After the 60 percent point in time of the term or session has passed, students who wish to terminate their registration may process withdrawal from all classes only with the permission of the academic dean. If the reason for withdrawal is medical or psychological in nature, the academic dean may consult with the director of Student Health Service prior to making a determination. There is no financial adjustment associated with this procedure, which results in the assignment of W grades for the courses.

Student Rights and Responsibilities

The University has a number of official policies affecting students. For complete and current text on all University policies, please see http://www.bc.pitt.edu/policies/.

The information that follows summarizes several key University-wide policies affecting undergraduate students, but students are also responsible for being cognizant of those University, school, and departmental regulations relevant to their programs of study.

Academic Integrity Policy

Students have the responsibility to be honest and to conduct themselves in an ethical manner while pursuing academic studies. Students have the right to be treated by faculty in a fair and conscientious manner in accordance with the ethical standards generally recognized within the academic community (as well as those recognized within the profession). Should a student be accused of a breach of academic integrity or have questions regarding faculty responsibilities, procedural safeguards including provisions of due process have been designed to protect student rights. These may be found in Guidelines on Academic Integrity: Student and Faculty Obligations and Hearing Procedures at www.provost.pitt.edu/info/ai1.html

Computing Use Policy

796
Every member of the University community has two basic rights regarding computing: privacy and a fair share of resources. It is unethical for another person to violate these rights. All users, in turn, are expected to exercise common sense and decency with regard to the campus computing resources. Please read Ethical Guidelines for Computing, available in campus computing labs or online at www.technology.pitt.edu/subpages/ethics.html for details.

Students are subject to the rules and regulations as described in the University of Pittsburgh Student Code of Conduct. Students should realize that any misuse of computing resources may result in the suspension of their computing privileges.

**Student Code of Conduct**

The Student Code of Conduct is an outline of the nonacademic rights and responsibilities of University students. The code defines offenses by and against students. A student or University official may file a complaint of violation of the Student Code of Conduct at the University Student Judicial System. For a copy of the code, please contact the judicial system office in 738 William Pitt Union at 412-648-7910 or see www.studentaffairs.pitt.edu/studentconduct.

**Judicial System**

The Office of Student Conduct of the University Student Judicial System coordinates the Campus Judicial Board. It also receives, previews, and acts upon complaints of violations of the Student Code of Conduct. Its purpose is to provide due process and fair treatment in adjudicating charges filed for violations of the code. All complaints about nonacademic student behavior should be filed here.

**Pitt Promise: A Commitment to Civility**

The University of Pittsburgh is committed to the advancement of learning and service to society. This is best accomplished in an atmosphere of mutual respect and civility, self-restraint, concern for others, and academic integrity. Students are asked to accept the obligation to live by these common values and commit themselves to principles of behavior that contribute to a civil campus environment and to support this behavior in others. The Pitt Promise is online at www.studentaffairs.pitt.edu/pittpromise.

**CGS Course Satisfier List**

Please see the CGS General Education Requirements for completion of the Bachelor's degree. You may consult with your academic advisor in preparation for graduation.

Students that are interested in pursuing a second degree must complete all CGS degree and major requirements. These may be completed by combining CGS courses with transfer credits from previous academic course work.

For the second degree, students must complete a minimum of 30 credits in CGS, including at least half of the credits required for the new major (15-18 credits depending on the major).

Current course offerings for the College of General Studies, the Dietrich School of Arts and Sciences, and the College of Business Administration are listed in one location online for easy reference. Please see the Course Description page for more information.

Within PeopleSoft's Class Search, you can identify College of General Studies course offerings at-a-glance by their section number.

Visit the link below for a comprehensive list of courses that satisfy College of General Studies requirements.

Comprehensive Course List (CGS)

- Skills: Oral Communication
- Skills: Writing

For information on how to register, please visit the enrollment page.

Theatre Arts HL 5, 6, 7 THEA 0800 3
Visual Arts HL 5, 6, 7 SA 0000 3

NOTE: Of the six humanities/social science electives that students must take to graduate from the Swanson School of Engineering, only two may be satisfied by AP and/or IB credit.

NOTE: The Swanson School of Engineering only accepts the HL IB scores noted above. No SL scores will be accepted.

Please be aware that IB credits are subject to change at any time and that this list is intended as a guide. IB credit cannot be reviewed and issued until the student is enrolled as a University of Pittsburgh student.

Foundational courses in the First-Year Engineering program are taken in sequence. AP/IB credit may be used for foundational courses (e.g. Math). If a student chooses to repeat a course at Pitt for which he/she has AP/IB credit, then AP/IB credit for subsequent courses in the same sequence is forfeited. Please note that this applies to equivalent courses (e.g. CHEM 0110 and 0120/CHEM 0960 and 0970 are equivalent courses. If a student with AP Chemistry credit chooses to take CHEM 0960 at Pitt, he/she may not then use AP credit for CHEM 0120.) Additionally, if a student with IB credit repeats a class at the University and earns less than the minimum required grade to move forward in the course sequence, he/she may not retroactively use IB credit to earn credit for that course.

UPDATED June 2021

NOTE: The 4 or 8 credits awarded for BIOSC courses may only count toward a degree in some Engineering majors.

NOTE: The 4 credits awarded for CS courses may only count toward a degree in some Engineering majors.

NOTE: Of the 6 humanities/social science electives students must take to graduate from the Swanson School of Engineering, only two may be satisfied by AP and/or IB credit.

The following AP exams are NOT awarded credit in the Swanson School of Engineering:

- AP Statistics
- AP Computer Science Principles
- AP Research
- AP Seminar
- AP Physics B, Physics 1, Physics 2, Physics C-E&M
- AP Human Geography
- AP Environmental Science

Please be aware that AP credits are subject to change at any time and that this list is intended as a guide. AP credit cannot be reviewed and issued until the student is enrolled as a University of Pittsburgh student.

Foundational courses in the First-Year Engineering program are taken in sequence. AP/IB credit may be used for foundational courses (e.g. Math). If a student chooses to repeat a course at Pitt for which he/she has AP/IB credit, then AP/IB credit for subsequent courses in the same sequence is forfeited. Please note that this applies to equivalent courses (e.g. CHEM 0110 and 0120/CHEM 0960 and 0970 are equivalent courses. If a student with AP Chemistry credit chooses to take CHEM 0960 at Pitt, he/she may not then use AP credit for CHEM 0120). Additionally, if a student with AP credit repeats a class at the University and earns less than the minimum required grade to move forward in the course sequence, he/she may not retroactively use AP credit to earn credit for that course.
Grand-parenting and the new School of Computing and Information

Computer Science (CS) undergraduate majors who matriculated into the University of Pittsburgh PRIOR to Fall 2017 received a communication allowing a choice to either remain in the School of Arts & Sciences or transfer to the new School of Computing and Information for completion of their CS degree.

- If a student chose to remain in the School of Arts & Sciences, they should refer to the Arts & Sciences catalog for the regulations, policies, and requirements for their degree.
- If a student applied to transfer to the School of Computing and Information, they should refer to the new school's catalog for the regulations, policies, and requirements for their degree.

*Note: If a student took no action in response to the grand-parenting e-mail, they will remain in the School of Arts & Sciences by default.*

For any students matriculated into the University of Pittsburgh PRIOR to Fall 2017 who have not yet declared a CS major, the student will choose to either declare their Computer Science major in the School of Arts & Sciences or apply to the School of Computing and Information.

Any student matriculating into the University of Pittsburgh AFTER Fall 2017, must apply to the School of Computing and Information in order to pursue an undergraduate degree in either Computer Science or Information Science and should refer to this School's catalog for information.

If you have additional questions or concerns, please contact the School's Office of Student Services at SCIug@pitt.edu.

Course Clusters

Students can choose to group courses that are related to each other in order to create some specialization and depth in writing for specific purposes and audiences. Here are sample clusters:

**Writing to Support Scientific Research**

- ENGCMP 0440 - CRITICAL WRITING
- ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING
- ENGCMP 0530 - WRITING FOR THE SCIENCES
- ENGCMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS
- ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1102 - LANGUAGE OF MEDICINE

**Advertising and PR Writing**

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 1103 - PUBLIC RELATIONS WRITING

**Writing for Government**

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
Writing for Nonprofits

(While it doesn't count toward the major, consider ENGCMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING for your first-year composition course.)

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 0515 - PERSUASIVE WRITING IN ADVERTISING
- ENGCMP 1400 - GRANT WRITING FOR NONPROFITS
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA

Teaching and Composition Studies

(While it doesn't count toward the major, consider ENGCMP 0207 - SEMINAR IN COMPOSITION: EDUCATION course.)

- ENGCMP 0620 - THEORIES OF WRITING AND TEACHING
- ENGCMP 1210 - TUTORING PEER WRITERS
- ENGCMP 1510 - WRITING WITH STYLE
- ENGCMP 1551 - HISTORY AND POLITICS OF THE ENGLISH LANGUAGE
- ENGCMP 1552 - LANGUAGE, LITERACY, LEARNING
- ENGCMP 1901 - UTA IN TEACHING AND TUTORING WRITING

Preparing for Law School

- ENGCMP 0410 - WRITING IN THE LEGAL PROFESSIONS
- ENGCMP 0560 - WRITING ARGUMENTS
- ENGCMP 1510 - WRITING WITH STYLE

Writing for Business

- ENGCMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION
- ENGCMP 1104 - CORPORATE STORYTELLING
- ENGCMP 1112 - PROFESSIONAL USES OF SOCIAL MEDIA
- ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY

Public Engagement

(While it doesn't count toward the major, consider ENGCMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING for your first-year composition course.)

- ENGCMP 0420 - WRITING FOR THE PUBLIC
- ENGCMP 0641 - WRITING FOR CHANGE
- ENGCMP 1551 - HISTORY AND POLITICS OF THE ENGLISH LANGUAGE
- ENGCMP 1552 - LANGUAGE, LITERACY, LEARNING

Composing Digital Media

- ENGCMP 0520 - INTEGRATING WRITING AND DESIGN
- ENGCMP 0425 - DIGITAL HUMANITY
Approved Humanities/Social Science Electives and Requirements

Undergraduate Requirements

All Swanson School of Engineering undergraduates must complete at least six humanities and social science elective courses from the School's list of approved courses in order to satisfy Swanson School of Engineering and ABET accreditation requirements for breadth and depth. In order to meet these standards, all Engineering undergraduate students must fulfill the following requirements when choosing their six elective classes:

Depth Requirement

- Students must complete two or more courses from one of the approved departments or programs in the Dietrich School of Arts and Sciences.
- A student may also satisfy the Depth Requirement by completing two or more courses with a related theme, e.g. courses that focus on a geographic region, historic period, or ideological perspective.
- Only one course below the 0200 level may be used to satisfy the depth requirement, except in the departments of Psychology, Linguistics, and languages.
- Some transfer and AP courses may transfer to the Swanson School under Catalog Number 0000 (e.g. ENGLIT 0000). Multiple courses in the same Subject with Catalog Number 0000 may count toward students' elective requirements, but may not together satisfy the depth requirement.

Breadth Requirement

- Students must select courses from at least three different Dietrich School of Arts and Sciences humanities and social science departments.
- Students must select courses from both the humanities and social science departments.

Departmental Requirements

- It is important to note that some of the Engineering majors have additional guidelines for selecting the six humanities and social science elective requirements. Students are responsible for checking with their departments for any supplemental requirements.
- Notes and Restrictions on Selecting Electives
- No more than two of the required six elective courses can be satisfied via high school Advanced Placement or International Baccalaureate credits.
- Language classes may not be taken in the student's native language, unless placement is deemed appropriate by the language department in question.
Independent Study courses, Study Abroad courses, Directed Study, and Research courses will not satisfy humanities/social science elective requirements unless they have been pre-approved by your department's Undergraduate Coordinator and the Associate Dean for Academics. In the listing below, they are listed as not approved, as are any additional independent study, study abroad, directed study, or research courses. See your department's Undergraduate Coordinator if these courses interest you.

All humanities/social science elective courses must be taken for 3 or more credits. Courses that are offered for fewer than 3 credits may NOT be combined to count as an elective.

Courses that are cross-listed with other departments may be taken under either course number (i.e. ANTH 1524 is equivalent to HAA 1650) and may be used to satisfy the depth requirement in either department.

All Swanson School of Engineering students must also complete at least one "W"-designated course in which the "W" indicates that a course has a substantial writing component as approved by the School of Arts and Sciences. Students should refer to Peoplesoft each term to determine whether a course is being offered as a "W"-designated course. In the Class Search screen, choose "Writing Option" from the Requirement Designation field. Every School of Arts and Sciences department offers "W"-designated courses, which may or may not satisfy Swanson School of Engineering humanities or social science requirements.

Approved Course Listing

Only an officially listed School of Arts and Sciences course may be used to fulfill a humanities and social science requirement. Approved departments may be found below. Courses from the College of General Studies (including External Studies courses), the College of Business Administration, or the School of Information Sciences cannot be used to fulfill the humanities and social science requirements.

These courses may be used to satisfy a free or open elective requirement, though students should always discuss these courses with an Academic Advisor before selecting and registering for such a course.

Only A&S courses are acceptable. CGS courses are not acceptable including Administration of Justice courses. Courses designated as self-paced (self), online (www) or hybrid online (hybrid) in CGS or A&S are not acceptable except by the Associate Dean's permission, as outlined in the Online Courses policy in the SSOE Catalog.

AFRICANA STUDIES (AFRCNA)- SOCIAL SCIENCE
All three-credit courses in AFRCNA below 1760 are approved, including AFRCNA 0000.

AMERICAN SIGN LANGUAGE (ASL) - HUMANITIES
All three- or four-credit courses in ASL below 1900 are approved, including ASL 0000.

ANTHROPOLOGY (ANTH) - SOCIAL SCIENCE
ANTH courses below 0450 are not approved.
ANTH 1164, 1497, 1498, 1499, 1516,1520, 1534 1537, 1602, 1605, 1609, 1613, 1617, 1627, 1712, 1750 are not approved.
Other three-credit courses in ANTH between 0450 and 1899 are approved, as is ANTH 0000.

ARABIC (ARABIC) - HUMANITIES
All three-, four-, or five-credit courses in ARABIC below 1900 are approved, including ARABIC 0000.

ARCHITECTURAL STUDIES (ARC) - HUMANITIES
All three-credit courses in ARC between 0110-0300, 1118-1191, 1310, and 1330 are approved, as well as ARC 0201, 1201, and 1202.

ARTS AND SCIENCES (ARTSC) - SOCIAL SCIENCE
The following are approved courses:
ARTSC 0150 - INTRODUCTION TO GLOBAL STUDIES
ARTSC 1501 - SEMINAR: LATIN AMERICA

CHINESE (CHIN) - Humanities
All three-, four-, or five-credit courses in CHIN below 1900 are approved, including CHIN 0000.

CLASSICS (CLASS) - HUMANITIES
All three-credit courses in CLASS below 1900 are approved, including CLASS 0000.

COMMUNICATION (COMMRC) - SOCIAL SCIENCE
The following COMMRC Courses and COMMRC 0000 are approved:
COMMRC 0300 - COMMUNICATION AND SOCIETY
COMMRC 0310 - RHETORIC & SOCIETY
COMMRC 0320 - MASS COMMUNICATION AND SOCIETY
COMMRC 0500 - ARGUMENT
COMMRC 0530 - INTERPERSONAL COMMUNICATION
COMMRC 0540 - DISCUSSION
COMMRC 1103 - RHETORIC AND CULTURE
COMMRC 1104 - POLITICAL COMMUNICATION
COMMRC 1105 - TELEVISION AND SOCIETY
COMMRC 1106 - SMALL GROUP COMMUNICATION
COMMRC 1111 - THEORIES OF PERSUASION
COMMRC 1122 - MEDIA CRITICISM
COMMRC 1123 - RHETORICAL CRITICISM
COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
COMMRC 1160 - VISUAL RHETORIC
COMMRC 1161 - COMMUNICATION ETHICS
COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION
COMMRC 1731 - SPECIAL TOPICS IN RHETORIC
COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION

ECONOMICS (ECON) - SOCIAL SCIENCE
The following ECON Courses and ECON 0000 are approved:
ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY
ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY
ECON 0120 - INTRODUCTORY ECONOMIC THEORY
ECON 0140 - INTRODUCTION TO POLITICAL ECONOMY
ECON 0160 - INTRODUCTION TO ECONOMETRICS (W sections only)
ECON 0200 - GAME THEORY PRINCIPLES
ECON 0220 - INTRO TO HEALTH ECONOMICS
ECON 0230 - INTRODUCTION TO PUBLIC ECONOMICS
ECON 0280 - MONEY AND BANKING
ECON 0330 - URBAN ECONOMICS
ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS
ECON 0400 - LABOR AND THE ECONOMY
ECON 0430 - WOMEN IN THE LABOR MARKET
ECON 0450 - ECON OF TECHNOLOGICAL CHANGE
ECON 0460 - SPORTS ECONOMICS
ECON 0470 - INDUSTRIAL ORGANIZATION 1
ECON 0480 Consumer Economics
ECON 0490 - TRANSPORTATION ECONOMICS
ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS
ECON 0520 - COMPARATIVE ECONOMIC SYSTEMS
ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS
ECON 0630 - EAST ASIA'S DYNAMIC ECONOMIES
ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION
ECON 0700 Economics of Information Sci. (UHC)
ECON 0800 - INTRODUCTION TO ECONOMICS
ECON 0810 - CONSUMER ECONOMICS
ECON 0820 - REGULATED INDUSTRIES
ECON 1010 - AMERICAN ECONOMIC HISTORY (HIST 1645)
ECON 1030 - INTELLECL FOUNDTNS OF CAPITALISM (HIST 1145)
ECON 1050 - SOCIALISM VERSUS CAPITALISM (HIST 1045)
ECON 1070 - HISTORY OF ECONOMIC THOUGHT 1
ECON 1080 - HISTORY OF ECONOMIC THOUGHT 2
ECON 1100 - INTERMEDIATE MICROECONOMICS
ECON 1110 - INTERMEDIATE MACROECONOMICS
ECON 1200 - GAME THEORY
ECON 1210 - MICROECONOMICS
ECON 1230 - INTERMEDIATE PUBLIC ECONOMICS
ECON 1260 - EXPERIMENTAL ECONOMICS
ECON 1280 - MONETARY THEORY AND POLICY
ECON 1300 - INTRODUCTION TO REGIONAL ECONOMICS
ECON 1320 - URBAN ECONOMICS
ENGLISH COMPOSITION (ENGCMP) - HUMANITIES*

All three-credit courses in ENGCMP between 0400 and 1899 are approved, as are ENGCMP 0000 and 0210. Note that no course may be used as both a humanities/social science elective and as a communication elective in the engineering departments that require one. These requirements must be fulfilled through separate courses.

*On 9/25/2020 this information was approved for change. In an effort to provide accurate information the update was made on 9/28/2020.

ENGLISH LITERATURE/ENGLISH FILM (ENGLIT/ENGFLM) - HUMANITIES

All three-credit courses in ENGLIT between 0300 and 1899 are approved, as is ENGLIT 0000. All three-credit courses in ENGFLM below 1900 are approved, including ENGLIT/ENGFLM 0000.

ENGLISH WRITING (ENGWRT) - HUMANITIES

ENGWRT 0053 is not approved. All other three-credit courses in ENGWRT below 1700 are approved, including ENGWRT 0000.

FILM STUDIES (FLMST) - HUMANITIES

All three-credit courses in FLMST below 1900 are approved, as is FLMST 0000.

FRENCH (FR) - HUMANITIES

FR 0197, 0452, 1494, 1497, 1498 are not approved. All other three-, four-, or five-credit courses in FR below 1900 are approved, as is FR 0000.

GENDER, SEXUALITY, AND WOMEN'S STUDIES (GSWS) - INTERDISCIPLINARY

All three-credit courses in GSWS between 0100 and 1899 are approved, as are GSWS 0000 and 0030.

GEOGRAPHY (GEOG) - SOCIAL SCIENCE

The following GEOG courses and GEOG 0000 are approved:
0210 Physical Geography
0810 Earth and People

GERMAN (GER) - HUMANITIES

GER 0031, 0197, 1104, 1204, 1399, 1531, and 1550 are not approved. All other three-, four-, or five-credit courses in GER below 1900 are approved, as is GER 0000.

GREEK (GREEK) and MODERN GREEK (GREEKM) - HUMANITIES

All three-, four-, or five-credit courses in GREEK and GREEKM below 1800 are approved, including GREEK 0000.
HINDI (HINDI) - HUMANITIES
All three-, four-, or five-credit courses in HINDI below 1900 are approved, including HINDI 0000.

HISTORY (HIST) - SOCIAL SCIENCE
HIST 1000, 1001, 1030, 1449, 1494, 1497, 1498, 1499, and 1745 are not approved.
All other three-credit courses in HIST below 1800 are approved, including HIST 0000.

HISTORY OF ART AND ARCHITECTURE (HAA) - HUMANITIES
All three-credit courses in HAA below 1900 are approved, as are HAA 0000 and HAA 1913.

HISTORY AND PHILOSOPHY OF SCIENCE (HPS) - HUMANITIES
All three-credit courses in HPS below 1700 are approved, including HPS 0000.

HONORS (HON) - INTERDISCIPLINARY
The following HON courses are approved:
HONORS 1110 - COMPARATIVE STUDIES-LEADERSHIP
HONORS 1160 - DISCOURSES IN HUMAN KNOWLEDGE

IRISH (IRISH) - HUMANITIES
All three-, four-, or five-credit courses in IRISH below 1900 are approved, including IRISH 0000.

ITALIAN (ITAL) - HUMANITIES
All three-, four-, or five-credit courses in ITAL below 1900 are approved, including ITAL 0000.

JAPANESE (JPNSE) - HUMANITIES
JPNSE 1494 is not approved.
All other three-, four-, or five-credit courses in JPNSE below 1900 are approved, including JPNSE 0000.

JEWISH STUDIES (JS) - INTERDISCIPLINARY
All three-, four-, or five-credit courses in JS below 1900 are approved, including JS 0000.

KOREAN (KOR) - HUMANITIES
All three-, four-, or five-credit courses in KOR below 1900 are approved, including KOR 0000.

LATIN (LATIN) - HUMANITIES
All three-, four-, or five-credit courses in LATIN below 1800 are approved, including LATIN 0000.

LESS COMMONLY TAUGHT LANGUAGES (LCTL) - HUMANITIES
All three-, four-, or five-credit courses in LCTL below 1900 are approved, including LCTL 0000.

LINGUISTICS (LING) - HUMANITIES
LING 1330, 1340, and 1441 are not approved.
All other three-, four-, or five-credit courses in LING between 0080 and 1799 are approved, including LING 0000.

MEDIEVAL AND RENAISSANCE STUDIES (MRST) - HUMANITIES
All three-credit courses in MRST below 1900 are approved, including MRST 0000.

MUSIC (MUSIC) - HUMANITIES
Music voice and/or instrument lessons may count as a humanities/social science elective if they are taken for three credits in a given semester. One- or two-credit MUSIC courses may not be combined to count as a humanities/social science elective.
MUSIC 1401, 1494, and 1497 are not approved.
All other three-credit courses in MUSIC below 1900 are approved, including MUSIC 0000.

PERSIAN/FARSI (PERS) - HUMANITIES
All three-, four-, or five-credit PERS classes below 1900 are approved, including PERS 0000.

PHILOSOPHY (PHIL) - HUMANITIES
PHIL 0500, 1494, and 1497 are not approved.
All other three-credit courses in PHIL below 1900 are approved, including PHIL 0000.
POLISH (POLISH) - HUMANITIES
All three-, four-, or five-credit courses in POLISH below 1900 are approved, including POLISH 0000.

POLITICAL SCIENCE (PS) - SOCIAL SCIENCE
PS 0700, 1000, 1449, 1494, 1497, 1498, 1499, 1700, 1702, 1800, and 1820 are not approved.
All other three-credit courses in PS between 0200 and 1899 are approved, as well as PS 0000.

PORTUGUESE (PORT) - HUMANITIES
All three-, four-, or five-credit courses in PORT below 1900 are approved, including PORT 0000.

PSYCHOLOGY (PSY) - SOCIAL SCIENCE
The following PSY courses and PSY 0000 are approved:
PSY 0010 - INTRODUCTION TO PSYCHOLOGY
PSY 0015 Introduction to Psychology as Natural Science (cannot also take 0010)
PSY 0035 - RESEARCH METHODS
PSY 0105 - INTRODUCTION TO SOCIAL PSYCHOLOGY
PSY 0160 - PSYCHOLOGY OF PERSONALITY
PSY 0182 - LAW AND SOCIAL PSYCHOLOGY
PSY 0184 - PSYCHOLOGY OF GENDER
PSY 0205 - PSYCHOPATHOLOGY
PSY 0310 - DEVELOPMENTAL PSYCHOLOGY
PSY 0405 - LEARNING AND MOTIVATION
PSY 0422 - COGNITIVE PSYCHOLOGY
PSY 0680 - INTRODUCTION INDUSTRIAL/ORGANIZATIONAL
PSY 1050 - TOPICS IN PSYCHOLOGY
PSY 1051 - TOPICS IN SOCIAL PSYCHOLOGY
PSY 1110 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY
PSY 1112 - PSYCHOLOGICAL ASPECTS OF HUMAN SEXUALITY: RESEARCH WRITING PRACTICUM
PSY 1140 - SOCIAL MOTIVATION
PSY 1155 - PSYCHOLOGY OF SMALL GROUPS
PSY 1205 - ABNORMAL PSYCHOLOGY
PSY 1215 - HEALTH PSYCHOLOGY
PSY 1305 - EXPERIMENTAL CHILD PSYCHOLOGY
PSY 1312 - CHILD DEVELOPMENT & SOCIAL POLCY
PSY 1315 - DEVELOPMENTAL PSYCH: INFANCY
PSY 1330 - DEVELOPMENTAL PSYCHOLOGY: COGNITIVE DEVELOPMENT
PSY 1357 - PSYCHOLOGY OF AGING
PSY 1470 - COGNITION AND THE BRAIN
PSY 1630 - PERSONNEL PSYCHOLOGY
PSY 1635 - ORGANIZATIONAL PSYCHOLOGY

QUECHUA/KICHWA (QUECH) - HUMANITIES
All three-, four-, and five-credit courses in QUECH below 1900 are approved, including QUECH 0000.

RELIGIOUS STUDIES (RELGST) - HUMANITIES
All three-credit courses in RELGST below 1780 are approved, including RELGST 0000.

RUSSIAN (RUSS) - HUMANITIES
RUSS 0211, 0216, 0221, 0226, 0231, 0236, 0241, and 0246 are not approved.
All other three-, four-, or five-credit courses in RUSS below 1900 are approved, including RUSS 0000.

SERBO-CROATIAN (SERCRO) - HUMANITIES
SERCRO 0212, 0213, 0223, 0231, and 0233 are not approved.
All other three-, four-, or five-credit courses in SERCRO below 1900 are approved, including SERCRO 0000.

SLAVIC (SLAV) - HUMANITIES
SLAV 0222, 0223, 0224, 0225, 0232, 1050, 1710, and 1720 are not approved.
All other three-, four-, or five-credit courses in SLAV below 1900 are approved, including SLAV 0000.
SLOVAK (SLOVAK) - HUMANITIES
SLOVAK 0211, 0212, 0221, 0222, and 0232 are not approved.
All other three-, four-, or five-credit courses in SLOVAK below 1900 are approved, including SLOVAK 0000.

SOCIODE (SOC) - SOCIAL SCIENCE
SOC 0197, 0230, 0300, 0710, 0715, 0720, 0725, 0726, 0735, 0750, 1114, 1277, 1416, 1455, 1494, 1497, 1498, 1499, 1500, 1515, and 1700 are not approved.
All other three-credit courses in SOC below 1800 are approved, including SOC 0000.

SPANISH (SPAN) - HUMANITIES
SPAN 0197, 1494 and 1497 are not approved.
All other three-, four-, or five-credit courses in SPAN below 1900 are approved, including SPAN 0000.

STUDIO ARTS (SA) - HUMANITIES
All three-credit courses in SA below 1500 are approved, including SA 0000.

SWAHIIL (SWAHIL) - HUMANITIES
SWAHIIL 0111 is not approved.
All other three-, four-, or five-credit courses in SWAHIIL below 1900 are approved, including SWAHIIL 0000.

SWEDISH (SWE) - HUMANITIES
All three-, four-, or five-credit courses in SWE below 1900 are approved, including SWE 0000.

THEATER ARTS (THEA) - HUMANITIES
THEA 1480, 1481, 1482, 1483, 1484, 1485, 1486, 1487, 1494, 1497, 1498, 1499, and 1733 are not approved.
All other three-credit courses in THEA between 0800 and 1899, as well as THEA 0000 and THEA 0505 are approved.

TURKISH (TURKISH) - HUMANITIES
All three-, four-, or five-credit courses in TURKISH below 1900 are approved, including TURKISH 0000.

UKRAINIAN (UKRAIN) - HUMANITIES
All three-, four-, or five-credit courses in UKRAIN below 1900 are approved, including UKRAIN 0000.

URBAN STUDIES (URBNST) - SOCIAL SCIENCE
The following URNST courses and URBNST 0000 are approved:
URBNST 0140 - CRIME, PUNISHMENT, JUSTICE, REINTEGRATION
URBNST 0408 - GLOBAL CITY - FLORENCE
URBNST 0410 - GLOBAL CITY - LONDON
URBNST 1613 - SUSTAINABLE CITIES 1: THEORIES AND CONCEPTS
URBNST 0114 - URBAN SUSTAINABILITY
URBNST 1615 - SUSTAINABLE CITIES 2: FIELD RESEARCH

VIETNAMESE (VIET) - HUMANITIES
All three-, four-, or five-credit courses in VIET below 1900 are approved, including VIET 0000.

Administration of Justice

ADMJ 1210 - JUVENILE DELINQUENCY

Minimum Credits: 3
Maximum Credits: 3
Provides an overview of the field of juvenile delinquency. Topics covered include theories and research on causes of juvenile delinquency; law enforcement practices encountered in attempts to control delinquency; juvenile treatment under law; correctional philosophy and practices in juvenile justice; and impacts of juvenile criminality upon the rest of society. Students emerge from the course with knowledge of causes, prevention, treatment, and control of juvenile delinquency and should be prepared to move into more detailed study of this subject.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Urban Studies

ADMJ 1246 - FINANCING TERRORISM

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide the student with an understanding of how terrorists and insurgents fund their activities and finance their operations. The course analyzes the relationship between states and non-state actors, U.S. And international responses to terrorist financing, and anti-terror strategies. Selected topics include the political economy of terrorism financing, the 'HAWALA' system, various mechanisms and policy dilemmas associated with terrorism financing, warning indicators, and terrorist organizations' vulnerabilities and inefficiencies.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

LCJS 1400 - THE SYSTEM OF CRIMINAL JUSTICE

Minimum Credits: 3
Maximum Credits: 3
This course examines the criminal justice system as a set of interlocking institutions that have dynamic inter-relationships with one another and the larger society. We explore the history, structure, and function of policing, prosecution, the courts, and corrections. Special attention is given to trends in and contemporary problems of the criminal justice system.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

LCJS 1570 - PRINCIPLES OF HOMELAND SECURITY

Minimum Credits: 3
Maximum Credits: 3
This course examines the challenges facing our domestic public service and justice personnel in the context of a borderless world of globalization and technology. Attention is paid to problems of terrorism, incident management systems, violence incident response procedures, changing federal, state, and local response planning and security issues, mass casualty programs, crime scene operations, the evolving role of the intelligence community, and the balance of security and liberty.
Academic Career: Undergraduate
Course Component: Lecture
LCJS 1599 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Allows advanced students to pursue topics and research of special interest which are not otherwise available.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

Africana Studies

AFRCNA 0025 - YORUBA 1

Minimum Credits: 4
Maximum Credits: 4
The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: African Studies

AFRCNA 0026 - YORUBA 2

Minimum Credits: 4
Maximum Credits: 4
At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language. To recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0031 - INTRODUCTION TO AFRICANA STUDIES

Minimum Credits: 3
Maximum Credits: 3
This is a survey course for Africana studies. An Afrocentric approach will be used to review the eight basic subject areas of the multidisciplinary focus; black history, black religion, black creative productions, black politics, black economics, black social organizations, black psychology and black education. Two alternative views will be pursued; a theoretical review of the literature and a summation of the practical experiences of black life.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0032 - YORUBA 3
Minimum Credits: 3
Maximum Credits: 3
The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a recognition vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: African Studies

AFRCNA 0033 - YORUBA 4

Minimum Credits: 3
Maximum Credits: 3
At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0120 - AFRICAN AMERICAN EXPERIENCE SPORTS

Minimum Credits: 3
Maximum Credits: 3
This course examines blacks in sports. It focuses on sport as a microcosm of the larger society and also addresses sport's relationship to politics, economics, race relations, and South African apartheid. It looks at the history of blacks in sports as well as three aspects of sports that appear to be racially biased; position allocation, performance differentials, and rewards and authority structure.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement

AFRCNA 0127 - INTRODUCTION TO AFRICA

Minimum Credits: 3
Maximum Credits: 3
Multidisciplinary introduction to Africa emphasizing the richness, diversity and dynamism of the African experience and presented through lecture discussions of culture, social structure, history, economy, politics and other aspects of Africa's development.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0150 - AFRICAN AMERICAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Introduction to black American literature from its oral traditions to the written form from the 18th to 20th century interrelated to historical social and political movements. Special emphasis will be placed upon the Harlem Renaissance period, the literature of the 1960's, and a work by the Pulitzer Prize winners (Gwendolyn brooks, James Alan McPherson, Alice Walker, or Toni Morrison).

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Literature General Ed. Requirement
AFRCNA 0212 - WEST AFRICAN DANCE

Minimum Credits: 3
Maximum Credits: 3
To pursue at an introductory level specific ethnic dance forms of West Africa.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0242 - AFRICANA URBAN WOMAN

Minimum Credits: 3
Maximum Credits: 3
Writings by African and Afro-American women writers reveal similar problems inherent in a move from a rural to an urban setting. A look at how the women characters adjust to loneliness, economic, educational, and cultural changes, and the quest for self-fulfillment is to be discussed within the context of the literary works.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0300 - RACIALIZED POLICE VIOLENCE IN GLOBAL PERSPECTIVES

Minimum Credits: 1
Maximum Credits: 1
This class provides students with an opportunity to think about the most recent wave of brutal police violence in the United States in a global perspective. Readings will focus on topics such as racial capitalism, colonialism and settler colonialism, transnationalism, and global police violence. The goal is for students who complete the course to be able to explain how racialized and militarized policing in the USA shape and are shaped by historical and contemporary global connections and processes.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

AFRCNA 0311 - INTRODUCTION TO THE AFRICAN AMERICAN FAMILY

Minimum Credits: 3
Maximum Credits: 3
This course has 2 objectives: (1) it seeks to describe and analyze the organization of black families in American society and changes in them over time, and (2) it brings together the scholarly sources available to students of black families to assess the contribution each makes to a more theoretically and conceptually sophisticated description of the structure and interaction in black families.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0313 - THE BLACK CHURCH

Minimum Credits: 3
Maximum Credits: 3
An introduction to the course and historical development of the black church in America, its contribution to the social and religious progress of black people, black leadership, and struggles including the civil rights movement, black theology and other social movements.
Academic Career: Undergraduate
AFRCNA 0316 - INTRODUCTION AFRICAN AMERICAN THEATER

Minimum Credits: 3
Maximum Credits: 3
This course leads the student through the social and historical development of black theater in North America from pre-Civil War to the present. It traces this development through the writers, performers, companies, institutions and social movements which helped to shape the theater movements. The ultimate goal is to arrive at an understanding and appreciation that black theater is a testament to the life and vitality of a people.

Academic Career: Undergraduate

AFRCNA 0318 - HISTORY OF AFRICA BEFORE 1800

Minimum Credits: 3
Maximum Credits: 3
Surveys history of Africa from earliest times to eve of European colonization. Looks at Africa from the inside out and aims at promoting an appreciation of Africa's contribution to world civilization and an understanding of the historical processes that have shaped modern Africa. Major themes and topics include the ancient kingdoms, Islam, the slave trade and the European contact.

Academic Career: Undergraduate

AFRCNA 0352 - AFRICAN AMERICAN DANCE

Minimum Credits: 3
Maximum Credits: 3
An introduction to African-American dance influence of West Africa and the Caribbean upon the black American experience in a comparative and historical perspective. These two perspectives are based upon those devised by African-American dance artists, such as Katherine Dunham, Alvin Ailey and Bob Johnson. The physical component of African-American dance emphasizes body placement and the relationship of movement to its music.

Academic Career: Undergraduate

AFRCNA 0385 - CARIBBEAN HISTORY

Minimum Credits: 3
Maximum Credits: 3
Examines historical roots of modern Caribbean. Examines major historical developments from period of subjugation of indigenous population through era of slavery to rise of modern nationalism and impact of American intervention. Also analyzes related socioeconomic systems and institutions. Selected country case studies included.

Academic Career: Undergraduate
AFRCNA 0400 - COVID-19, RACISM AND PUBLIC HEALTH

Minimum Credits: 1  
Maximum Credits: 1  
This 1-credit course, offered through the Global Studies Center and co-sponsored by the Department of Africana Studies, offers an opportunity for students to learn about the compounding effects of multiple forms of inequality or disadvantage and how they impact COVID-19 exposure, cases, and deaths. The obstacles that inequalities create may not be easily discernible or understood by looking at or thinking about racism, health and now the impact of COVID-19, among African Americans, in a conventional way. You cannot change outcomes without understanding the causes or how they come about. The pandemic has exposed systemic racial inequalities in the U.S. health delivery system. Why are African American and other minority communities being hit hard by COVID-19? In this class, we will read pertinent literature and discuss racially sensitive issues including what it means to be a minority in the U.S. during a pandemic. We will focus on pre-existing conditions, essential workers, structural inequities, and how social determinants of health are influenced by implicit bias and racial discrimination. 
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Satisfactory/No Credit

AFRCNA 0434 - PSYCHOLOGICAL EXPERIENCE AFRICAN AMERICAN FEMALE

Minimum Credits: 3  
Maximum Credits: 3  
The course examines black female behavior from both psych historical and contemporary perspectives. The model for classroom interaction consists of lecture and group discussions by presenting relevant information and/or conducting specific exercises.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement

AFRCNA 0454 - MAN/WOMAN LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
Through prose and poetic works one will note how black men are viewed and characterized by female writers as well as how black women are treated by male writers. The basis for the difference lies in racial and sexual stereotyping in Afro-American literature.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0202 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  

AFRCNA 0508 - SWAHILI LANGUAGE AND CULTURE IMMERSION

Minimum Credits: 4  
Maximum Credits: 4  
Academic Career: Undergraduate

AFRCNA 0517 - INTRODUCTION TO AFRICAN AMERICAN POETRY

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces the student to an overview of the poetry by focusing on both male and female writers and their works that illuminate the Afro-American poetic tradition and those pivotal moments or transitions within the development of the tradition. The instructor recognizes that black
female poetry especially, is a complex whole that can be analyzed in terms of style, structure and that it has a coherent history.

AFRCNA 0522 - INTRODUCTION TO AFRICAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course will use a comparative approach to modern African creative writing in three major European languages; English, French, and Portuguese; bringing together writers from east, West, South and North Africa.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 0523 - SWAHILI 1

Minimum Credits: 4
Maximum Credits: 4
The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language. Its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: African Studies

AFRCNA 0524 - SWAHILI 2

Minimum Credits: 4
Maximum Credits: 4
At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0501 or AFRCNA 0523 or SWAHIL 0101; MIN GRADE: 'C' FOR LISTED COURSES
Course Attributes: African Studies, DSAS Second Language General Ed. Requirement

AFRCNA 0525 - SWAHILI 3

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0502 or AFRCNA 0524 or SWAHIL 0102; MIN GRADE: 'C' FOR LISTED COURSES
Course Attributes: African Studies

AFRCNA 0526 - SWAHILI 4
Minimum Credits: 3  
Maximum Credits: 3  
At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate

AFRCNA 0536 - 20TH CENTURY AFRICAN AMERICAN WOMAN HISTORY

Minimum Credits: 3  
Maximum Credits: 3  
Using both a chronological and topical format, this course will investigate the history, culture, and activism of African American women in the twentieth century through readings of historical texts and articles, autobiography, and oral testimony. The content of the course includes an exploration of the responses of African American women to racism, sexism, and class and color consciousness within different historical periods.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

AFRCNA 0586 - EARLY AFRICAN CIVILIZATIONS

Minimum Credits: 3  
Maximum Credits: 3  
The course surveys the emergence and growth of early African civilization from the beginnings of the evolution of the human race to the eve of the European colonization of the continent. It introduces students to the multiple disciplines contributing to knowledge about early Africa, and shows the centrality of Africa and Africans for humanity in general. Among the principal themes that the readings and discussions focus on are: pre-history of Africa and the genesis of humankind; the complexity of migration, and state formation; and African and European earlier contact. A fundamental approach will be to look at Africa from the inside out and to analyze African societies from the perspective of their internal development and reaction to external influences. Its basic goal is to promote, first, an appreciation of Africa's contributions to world civilization.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

AFRCNA 0628 - AFRO-LATIN AMERICA

Minimum Credits: 3  
Maximum Credits: 3  
A survey of black history in the countries of Latin America, from the period of European conquest (c. 1500) To the present.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

AFRCNA 0629 - AFRICAN AMERICAN HISTORY 1877

Minimum Credits: 3  
Maximum Credits: 3
This course examines African American history and culture from its inception with the Transatlantic Slave Trade to its transformation during the Civil War. Topics discussed include the African and Native American captivity practices that served as the precursors to African chattel slavery; the origins and rationale behind the creation of the social category of “race;” the differences between African chattel slavery in the French, Spanish, and British colonies; the regional variances in slavery in the southern and northern United States and in Indian nations; methods of resistance used by African American women and men; and the multifaceted ways in which African Americans played a part in the abolitionist movement and in their own emancipations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** African Studies, DSAS Diversity General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

### AFRCNA 0630 - AFRO-AMERICAN HISTORY 2

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course surveys the development of black Americans from the time of the Civil War to the present.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** African Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

### AFRCNA 0639 - HISTORY OF JAZZ

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course focuses on the chronological development of jazz from its beginnings on the plantation to its present state as a world concert music. Various styles such as ragtime, blues, gospel, spirituals, rhythm and blues, rock, soul, etc., are examined.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

### AFRCNA 0787 - BLACK CONSCIOUSNESS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to the growing body of coherent cultural ideas and beliefs which provide a positive framework for study and interpretation of the black experience in North America. The course is pan-African in scope and context. One of the goals is to enable the student to view the African and the African-American struggles as part of the world struggle of human rights.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

### AFRCNA 0805 - BLACK PERFORMANCE AESTHTICS

Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1026 - AFRICAN PRESENCE IN LATIN AMERICAN LIT/CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course is a chronological and topical introduction to afro-Latin American culture, making use of literary texts, historical documents, feature films, etc. It aims at providing students with a concrete frame of reference for the African presence in Latin America.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

AFRCNA 1030 - INTRODUCTION TO AFRICAN POLITICS

Minimum Credits: 3
Maximum Credits: 3
A general introduction to African politics at macro level for freshmen and sophomores with special focus on traditional African political system, European imperialism in Africa, African nationalism, independence and post-independence problems of nation-building and economic development.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
AFRCNA 1033 - AFRICAN AMERICANS AND MASS MEDIA

Minimum Credits: 3
Maximum Credits: 3
This course is a critical analysis of mass media content as it pertains to black Americans. The primary media are newspapers, radio, and television. For comparative purposes, media content related to children, other minorities, and women are used.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1039 - HISTORY OF CARIBBEAN SLAVERY

Minimum Credits: 3
Maximum Credits: 3
Today's sounds and tastes of the Caribbean from reggae and salsa music to dishes like mofongo and jerk chicken have deep historical roots in slavery. The Atlantic slave trade transported over four million Africans to the Caribbean eight times the number that arrived in the United States. How did Africans and their descendants persevere under the colonial slave system? How does the legacy of slavery present itself in the 21st century? This course explores these questions by examining the Caribbean from the perspectives of enslaved women and men from the 17th through the 19th centuries, particularly in Cuba, Haiti, and Jamaica, and their contemporary manifestations in films, policies, and national identities.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1083 - SPECIAL TOPICS: LITERARY PAN-AFRICANISM

Minimum Credits: 3
Maximum Credits: 3
This course is a study of literary texts that survey Pan-Africanism, or unity and mutual cooperation among people of African descent, from many different angles. Writers across Africa and the Diaspora have created a robust genre of storytelling about returns from the Diaspora to Africa that celebrate the awareness of homelands and suggests various ways of reconciling heritage and diversity. We will study the writings of Maryse Conde, Ama Ata Aidoo, Wole Soyinka, Ayi Kwei Armah, George Samuel Schuyler, and more.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: African Studies, Writing Intensive Course (WRIT)

AFRCNA 1108 - AFRICAN AMERICAN FOLK CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course will explore several aspects of African American folk culture being defined as non-elite expressions of art, music, dance, theatre, literature, humor, material culture, and religious beliefs. Particular attention will be given to the role of folklore in the perpetuation and transmission of shared cultural knowledge among blacks in the United States.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1145 - AFRICAN AMERICAN RHETORIC
The purposes of this course are a historical-critical review of scholarship in black American rhetoric; and a theoretical-conceptual framework for the study of black American rhetoric. This course places considerable emphasis on the African roots of black American rhetoric, but the ultimate concern is with black Americans' behavior. The course covers consequences of African and European interactions in America, factors that forged the distinctive aspects of black American rhetoric, the effects of culture, racism, colonialism, and social class on communication.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

### AFRCNA 1150 - CONTEMPORARY AFRICAN AMERICAN WRITING

Minimum Credits: 3  
Maximum Credits: 3  
Writers in the period spanning the civil rights and black nationalist-humanist movements became a vanguard voice for black people. This course explores the written language of the period as an aid to the creation of student writings. As such, this course is a workshop and continuation of black creative writing on a higher level.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

### AFRCNA 1201 - GLOBAL DIASPORAS: CONTEMPORARY AFRICAN AND CARIBBEAN MIGRATION

Minimum Credits: 3  
Maximum Credits: 3  
What do Akon and Rihanna have in common? They are both part of recent diasporas from Africa and the Caribbean. This course focuses on the issues and experiences of people of African descent in contemporary (20th and 21st centuries) migratory diasporas from both Africa and the Caribbean. The course draws on extensive literature on migration, transnationalism, racial and ethnic identity formation, health, and other topics to illuminate the causes for migration and the experiences that migrants have in different host countries. What experiences do migrants from Africa and the Caribbean share? How do their experiences differ? How do migrants define themselves in new host countries? How do they stay connected to their homelands?  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  

### AFRCNA 1240 - AFRICAN LITERATURE AND SOCIETY

Minimum Credits: 3  
Maximum Credits: 3  
Inquiry into significant aspects of contemporary African social, political, cultural and human problems approached through the detailed study of representative African novels, plays and poetry written by African authors.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

### AFRCNA 1245 - STUDIO IN AFRICAN AMERICAN POETRY AND POETICS

Minimum Credits: 3  
Maximum Credits: 3  
Studio in African American Poetry and Poetics is a course in interdisciplinary creating. In this class, we will read, think, and work across genres, mediums, and disciplines, and collapse the walls between presenter and audience, creator and critic, as we work individually and collaboratively.
toward new modes of making. Dawn Lundy Martin, Co-Director of the Center for African American Poetry and Poetics (CAAPP), has said that “like innovators in tech, we want to be open and inclusive as we generate new ideas about what it means to work in the fields of African American poetry and poetics. This seems especially important in these trying and divisive times.” To this end, we are working toward a practice-based poetics, where creating is a way of working through questions to arrive at new ideas. Collaboration, then, the process of creating in partnership, in community, is an expression of the practice of poetics at its most dynamic. In this spirit of collaboration, the Studio will provide students with opportunities to engage with CAAPP's visiting poets and artists in the intimate space of the classroom and to work on CAAPP events.

**AFRCNA 1331 - AFRICAN LIBERATION MOVEMENTS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Undergraduate
- **Course Component:** Lecture
- **Grade Component:** LG/SNC Elective Basis

A course on the theories of revolution and national liberation struggles, decolonization and guerrilla warfare, and their special application to continental African experience since the end of World War II.

**AFRCNA 1334 - MUSIC IN AFRICA**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Undergraduate
- **Course Component:** Lecture
- **Grade Component:** LG/SNC Elective Basis

The historical, social, and cultural background of music in Africa with particular reference to music in community life, performing groups, the training of musicians, instrumental, resources, structures in African music and the interrelations of music and dance. (Slides, films and recordings will be used to illustrate lectures.)

**AFRCNA 1335 - AFRICAN-AMERICAN MUSIC IN THE UNITED STATES**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Undergraduate
- **Course Component:** Lecture
- **Grade Component:** LG/SNC Elective Basis

This course is designed to familiarize the student with various phases of African-American music existing in North America; blues, gospel-spirituals, work songs, children's games songs, and classical compositions of ragtime composers Scott Joplin, J.P. Johnson, etc. Students will conduct field projects centered around "street recordings, locations, interviews of local and visiting artists, etc." A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course.

**AFRCNA 1347 - FRANCOPHONE AFRICANA LITERATURE**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Undergraduate
- **Course Component:** Lecture
- **Grade Component:** LG/SNC Elective Basis

A detailed study of great Pittsburgh performers present and past will constitute a major portion of this course.
AFRCNA 1349 - CONTEMPORARY CARIBBEAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Study the fiction, poetry, and drama of the English Caribbean in chronological order. Exile, liberation, autonomy, the female voice, cultural, and political identity will be examined in writing from Jamaica, Trinidad, Grenada, Antigua, and Guyana with recordings and films.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1353 - COMPARATIVE DANCE EXPRESSION

Minimum Credits: 3
Maximum Credits: 3
This course will examine the cultural patterns of black dance styles and the similarities and differences in the motor behaviors among blacks in dance from South America, the Caribbean islands, Africa, and North America. Contents of the course will be introduced through films, lecture and videotapes.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1397 - MUSIC AND RACE

Minimum Credits: 3
Maximum Credits: 3
This course examines issues of music and race in the United States by focusing on a wide range of American music styles, with extra emphasis on black music genres.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

AFRCNA 1402 - LEARNING PARADIGMS AFRICAN AMERICAN CHILD DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
To examine systemic factors which affect the cultural, social, emotional, and cognitive development of black children.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Diversity General Ed. Requirement

AFRCNA 1415 - RELIGION AND RACE

Minimum Credits: 3
Maximum Credits: 3
This course examines the intersections of religion, race, and racism. Recently, scholars of religion have demonstrated that religious identities are
often racialized as well. In this course, we will discover that religion and race are both modern categories rooted in post-enlightenment ideas about what it means to be human. We will see how the establishment of these religious and racial categories led to new hierarchies and inequalities. We will discuss how post-enlightenment thinkers linked religion and race, and how their ideas played a role in European imperialism. We will also investigate how the discipline of religious studies has developed its analytical tools with a racialized understanding of religion. The course will examine case studies in which religion has been racialized, and consider the political ramifications of these examples. In particular, we will think about the impact of white supremacy on black religion in the United States, the complicated relationship between antisemitism and Islamophobia, and contemporary Islamophobia in the US. Finally, we will explore the possibilities of anti-racism through faith-based scholarship and activism.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** LG/SNC Elective Basis

**Course Attributes:** SCI Polymathic Contexts: Soc/Behav. GE. Req.

**AFRCNA 1418 - FROM VODOU TO SANTERIA: RELIGIONS OF THE WEST AFRICAN DIASPORA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is an introduction to the study of West African Diaspora religions in the Americas. We define "diaspora" as the spread and dispersal of people of African descent both forced and voluntary through the slave trade, imperial and colonial displacements, and postcolonial migrations. In what form do African religious expressions exist in the African Diaspora communities? This course exposes students to the indigenous African foundations of the religious beliefs and religious practices of African communities living in the Diaspora. Students will receive historical, ethnographical, and anthropological approaches to grasp the essence of these non-doctrinaire and non-textual religions focused on a rich memory of African deities, rituals, morality and practices that have been passed from generation to generation.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

AFRCNA 1537 - RACE AND THE CRIMINAL JUSTICE SYSTEM

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the criminal justice system and the over-representation of racial minorities, particularly African Americans. It begins with an exploration of the economic, political, and social context of race and the controlling of Black bodies. It further investigates the interactions between citizens and the police, courts, and correctional institutions. This course will also incorporate an examination of public and news media responses to these interactions, including, but not limited to, the social media reactions to cases of police brutality (i.e. Atatiana Taylor, Ahmaud Arbery, Breonna Taylor, and George Floyd).  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

AFRCNA 1538 - HISTORY OF BLACK PITTSBURGH

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore the role and experiences of black Pittsburghers over the past 200 years of the city's history.  
Academic Career: Undergraduate  
Course Component: Lecture
AFRCNA 1555 - AFRO CARIBBEAN DANCE

Minimum Credits: 3
Maximum Credits: 3
This course will focus on Katherine Dunham as an ethnologist and choreographer politically, socially, and aesthetically. The course discussion will clearly define the contents of Dunham's dance research and life experiences of Haiti.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

AFRCNA 1616 - AFRICAN AMERICAN WOMEN WRITERS

Minimum Credits: 3
Maximum Credits: 3
An inter-or-cross genre study of the African North American experience thru selected readings in novels, poetry, drama, short stories, and the essay (religious, secular and philosophical).
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

AFRCNA 1655 - AFRICAN CINEMAS/SCREEN GRIOTS

Minimum Credits: 3
Maximum Credits: 3
Ousmane Sembene, known as the father of African cinema, popularized the notion of the African director as the modern day griot (oral historian) and traditional storyteller. Therefore, this course is an introduction to a cross-section of post-independence films (1963-2004) as an art form and as a visual space on socio-political, economic and cultural topics by screen griots from Burkina Faso, Cameroon, and chad, the democratic republic of the Congo, Ethiopia, Niger, Nigeria, Senegal, South Africa and Zimbabwe.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
AFRCNA 1656 - HISTORY OF AFRICA SINCE 1800

Minimum Credits: 3
Maximum Credits: 3
Surveys history of Africa from 1800 to the present day. Major themes include African statecraft, European colonization, African nationalism and post-independence problems. Processes of African institutional growth within the perspectives of resiliency, change and adaptation will be emphasized.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1661 - POLITICAL ECONOMY OF AFRICA

Minimum Credits: 3
Maximum Credits: 3
An inquiry into the process of political and economic development in Africa from colonial domination to the present. Problems of economic dependence and integration into the global capitalist economic system are examined.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1704 - AFRICANA WORLD LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Despite their geographical and cultural differences, writers from Africa, the Caribbean, and the United States undergo similar experiences of oppression. Problems of self-identity, and the quest for self-respect. These similarities will be discussed in class along with a comparative approach to the texts with supplementary films, slides, and recordings.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

AFRCNA 1710 - AFRICAN AMERICAN HEALTH ISSUES

Minimum Credits: 3
Maximum Credits: 3
Course will focus on black health issues from analytical, theoretical and practical perspectives. These perspectives will be introduced through cross examination of health topics which are critical to the black population, the developing of health policies and conceptual models for health promotion and disease prevention.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: African Studies, DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement

Grade Component: Letter Grade

AFRCNA 1760 - AFRICANA THEORY & METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Attributes: DSAS Diversity General Ed. Requirement

AFRCNA 1768 - AFRICANA SENIOR RESEARCH SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This course will assist the student in conducting a research project of her choice. The student will select a topic, write a proposal including the statement of a question or hypothesis, a list of the goals and objectives. A design of the methodology and a review of the relevant literature.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Capstone Course, Writing Requirement Course

AFRCNA 1900 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 6
This course offers the student an opportunity to extend his/ her academic training to a practical work experience in the city of Pittsburgh.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Attributes: Capstone Course

AFRCNA 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Students desiring to take an independent study should develop a typed proposal on a specific topic outlining the substance of the work, the objectives, the methodology, and the evaluation by which to determine when the objectives are met.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Letter Grade
Course Attributes: African Studies

AFRCNA 1902 - DIRECTED READING
Minimum Credits: 1  
Maximum Credits: 6  
This course introduces the students to a specific topic which is not normally taught in an Africana studies core course. It is an individual project administered under faculty supervision.  
Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: Letter Grade  

**AFRCNA 1903 - DIRECTED RESEARCH**

Minimum Credits: 1  
Maximum Credits: 6  
This is an individual research project/course under the supervision of a faculty member. Theoretical and conceptual interest in the emerging discipline of Africana studies and the black experience offer students dynamic, creative and intellectual avenues into new areas for discovery.  
Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: Letter Grade  
Course Attributes: African Studies

**AFRCNA 1904 - REBELS AND REVOLUTION**

Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade  

**American Sign Language**

**ASL 0101 - AMERICAN SIGN LANGUAGE 1**

Minimum Credits: 4  
Maximum Credits: 4  
In this course, students are taught American sign language (ASL) vocabulary and grammatical structures. Students will also learn and ASL fingerspelling system, the use of gestural devices and how to appropriately use the signing space in ASL. Further, students will learn about deaf culture in the United States. Out-of-class participation in deaf community events in required.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

**ASL 0102 - AMERICAN SIGN LANGUAGE 2**

Minimum Credits: 4  
Maximum Credits: 4  
Students will learn more difficult vocabulary (signs) and how to use them in one-to-one, small group, and large group communication. Students will also be exposed to classifier constructions. This course is a continuation of ASL I (LING 0471) and it utilizes a similar curriculum.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: LING 0471 or ASL 0101; MIN GRADE: 'C'  
Course Attributes: DSAS Second Language General Ed. Requirement
ASL 0103 - AMERICAN SIGN LANGUAGE 3

Minimum Credits: 3  
Maximum Credits: 3  
This course continues the study of ASL. The students will work on developing intermediate communication skills and will concentrate on production skills. Linguistic and cultural features will be presented in the context of the language learning experiences. This level will also examine and discuss its use and effect on and in the deaf culture.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: LING 0472 or ASL 0102; MIN GRADE: 'C'  
Course Attributes: DSAS Second Language General Ed. Requirement

ASL 0104 - AMERICAN SIGN LANGUAGE 4

Minimum Credits: 3  
Maximum Credits: 3  
This advanced course of ASL concentrates on developing more precise skills and competencies by using appropriate variations of ASL (regional, racial/ethnic, stylistic and age related) vocabulary. Students will also be given the opportunity to use ASL by volunteering in the deaf community.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: LING 0473 or ASL 0103; MIN GRADE: 'C'  
Course Attributes: DSAS Second Language General Ed. Requirement

ASL 0105 - AMERICAN SIGN LANGUAGE 5

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an opportunity for students to formally pursue work on an individual basis. This course also applies knowledge of American Sign Language (ASL) grammar and vocabulary to the description of increasingly complex constructs, processes and situations. Students will: incorporate multiple character role shifting into medium-length stories, narratives and the discussion of hypothetical issues; identify and discuss various controversial issues via debate and presentation; continue to analyze multiple meaning English words and English idioms to express concepts in ASL; have the opportunity to gain knowledge about the Deaf Community as a part of the human diversity including people of color, genders, LGBTQ people, people with disabilities, etc.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: LING 0474 or ASL 0104; MIN GRADE 'C' FOR ALL LISTED COURSES

ASL 0106 - AMERICAN SIGN LANGUAGE 6

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to specific topics and content areas in ASL discourse, including Visual Gestural Communication, International, Deafblind, Mental Health/Medical/Sexual/Drugs/Other Special Topics in sign communication depending on the needs and interests of Pitt Students. This course also provides students with opportunities to expand expressive and receptive use of American Sign Language (ASL), including a variety of special topics at an advanced level. Special emphasis is on increasing spatial use, ASL fluency and non-manual grammar and behaviors. Skills related to research in sign language discourse will be introduced.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: LING 1727 or ASL 1909 or ASL 0105; MIN GRADE 'C' FOR ALL LISTED COURSES

ASL 0111 - INTRODUCTION TO BRITISH SIGN LANGUAGE
Minimum Credits: 3
Maximum Credits: 3
Students will get a basic introduction to British Sign Language (BSL).

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade

### ASL 1615 - DEAF CULTURE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Many deaf people in the U.S. are united by a language (ASL) that differs from English and a culture with characteristics that differ from those of the larger hearing society. This culture is known as deaf culture, and students in this course will be introduced to various facets of American deaf culture through readings, videos, and discussions. Students will also explore other deaf cultures throughout the world. Among the course foci are: issues of accessibility, perspectives of deaf versus hearing individuals, and various examples of deaf literature.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: LING 0472 or ASL 0102 (MIN GRADE 'B'); CREQ: LING 0473 or ASL 0103 (MIN GRADE 'B'); PLAN: American Sign Language (ASL-CS1); LEVEL: Junior or Senior
**Course Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req.

### ASL 1625 - THE DEAF AND SOCIETY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The culture of deaf Americans is distinct from that of mainstream American society. The primary focus of this course is to expose students to the culture of the deaf in the United States and around the world. In addition to teaching students how to interact with the deaf in a culturally appropriate way, the course will help them understand deaf culture as part of human diversity. Among the course foci are: issues of accessibility, perspectives of deaf versus hearing individuals, and various examples of deaf literature.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req.

### ASL 1635 - ANALYSES OF ASL LITERATURE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed for students to explore and analyze American sign language and American deaf culture through ASL literature. Studying ASL literature is a way to examine the linguistic complexity of ASL as well as explore the deaf community's values and traditions as a minority group and a group to which visual depiction of ideas is highly valued. This course is conducted in ASL.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

### ASL 1700 - ASL-BSL COMPARATIVE ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will experience another culture by visiting a country where a different sign language is used. Students will use both their receptive and expressive signing skills to learn about another sign language. Students will learn some BSL, though should not expect to achieve a working fluency. Students will embrace another culture through observation and participation. Students will experience signing with members of the British Deaf
community within an educational setting or community setting. Students will learn about differences and similarities between ASL and BSL as well as American Deaf culture and British Deaf culture. Students will improve their signing ability through intensive practice. Students will be voice off during the trip and will demonstrate the ability to behave appropriately within a Deaf culture.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ASL 1705 - STRUCTURE OF SIGN LANGUAGES

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the linguistic structure of sign languages, drawing examples principally, though not exclusively, from American sign language (ASL). It will also highlight similarities and differences between sign languages and spoken languages. In addition to structural features, the course will cover mechanisms unique to visual/spatial languages, the use of the face and body for grammatical signals, language variation, and acquisition of sign languages.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 1000 or CSD 1020

ASL 1715 - STRUCTURE OF ASL AND ENGLISH

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0473 or ASL 0103 (MIN GRADE 'B') and (LING 1000 or CSD 1020); CREQ: LING 0474 (MIN GRADE: 'B'); PLAN: American Sign Language

ASL 1725 - SOCIOLINGUISTICS OF SIGN LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
There are various sociolinguistic topics that one must consider with respect to signed languages of the deaf. Regarding language contact, ambient languages—either signed or spoken—influence a signed language. Less than 10% of deaf people are exposed to signed language from birth, which results in unique phenomena. Additionally, signed languages exhibit variation based on a myriad of social and geographical factors. These topics, in addition to language planning and language policy, will be addressed in this course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 1000 or CSD 1020

ASL 1800 - INTRODUCTION TO ASL-ENGLISH INTERPRETING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ASL 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
Independent study in American Sign Language (ASL)
ASL 1905 - UNDERGRADUATE TEACHING ASSISTANT IN AMERICAN SIGN LANGUAGE

Minimum Credits: 1
Maximum Credits: 3
Undergraduate Teaching Assistant for ASL Class
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ASL 1909 - TOPICS IN SIGN LANGUAGE STUDIES

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 474 and 1722; PLAN: American Sign Language

Anthropology

ANTH 0112 - TOURISM

Minimum Credits: 3
Maximum Credits: 3
This is a course designed to introduce the students to the many facets of the world's largest industry, tourism. The approach is multidisciplinary focusing on such issues as work and leisure, tradition and modernity, growth and pollution, security and terrorism, privilege and servitude.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0501 - ARCHEOLOGY: AN OVERVIEW

Minimum Credits: 3
Maximum Credits: 3
Designed for non-majors, this course presents a broad introduction to the goals and techniques of today's archeology through readings, videos, and short exercises. The course reviews global human prehistory from the earliest appearances of human ancestors some 4 million years ago through the development of the Ancient Egyptian, Mayan, Chinese, and Inca Civilizations.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0534 - PREHISTORIC FOUNDATIONS OF EUROPEAN CIVILIZATION

Minimum Credits: 3
Maximum Credits: 3
Neanderthals, ice-age art, Indo-European languages, Stonehenge, megaliths, Celts, and more; the major archeological discoveries, from the first traces of human occupation of European soil up to the early middle ages, will be covered through illustrated lectures, films, and perhaps museum visits. Course also offers a basic introduction to the discipline of archeology, thus serving as preparation for other courses in the subject; it also serves as a useful foundation for studies in history, ethnic history, art history, and classics.
Academic Career: Undergraduate
ANTH 0536 - MESOAMERICA BEFORE CORTEZ

Minimum Credits: 3  
Maximum Credits: 3  
When Cortez and his Spanish soldiers arrived in Mexico, they found Indians living in large cities with impressive temples raised on tall pyramids, lavish palaces for rulers, elaborate markets, and skilled craftsmen working in gold, copper, feathers, stone, pottery, and other materials. They were astonished at a civilization so like their own and yet so different (so "barbaric" to European eyes). This course explores the development of this civilization back to its roots several thousand years ago, by reconstructing earlier cultures known only from archeological evidence.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

ANTH 0538 - THE ARCHEOLOGIST LOOKS AT DEATH

Minimum Credits: 3  
Maximum Credits: 3  
Pyramids, tombs, burial mounds, graves, skeletons, mummies; the stuff of gothic romance. But the way people disposed of their dead also tells us an amazing amount about life in the past. We will look at the wide range of burial practices in the world, including the "American way of death", and then concentrate on the physical remains themselves. What do burial practices indicate as to beliefs, rituals, religion and society?

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ANTH 0582 - INTRODUCTION TO ARCHEOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
Examines the nature of modern archaeological research. Lectures look at how archaeologists work in the field, their analytic techniques, and some of the principal methodological and theoretical problems facing the field. Specific examples are used to illustrate these topics.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ANTH 0601 - PHYSICAL ANTHROPOLOGY: OVERVIEW

Minimum Credits: 3  
Maximum Credits: 3  
Designed for undergraduate non-majors, this course will provide a basic introduction to the issues, theories, and methods of physical anthropology. Beginning with a consideration of evolutionary, genetic and geologic principles, the course goes on to consider the diversity of fossil and extant primates, including humans. Issues in anatomy, paleontology and behavior will all be addressed.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis
ANTH 0620 - BIOCULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to general anthropology emphasizing the interaction of human biology and behavior. The course considers what it means to be human by examining the biocultural interface of both present and past human populations. Topics of discussion will include human adaptation to extreme environments, cross-cultural variations in infant sensorimotor development and biological and cultural diversity in general. An understanding and appreciation of the how's and why's of human biological and cultural variation will be stressed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ANTH 0630 - FORENSIC ANTHROPOLOGY: AN INTRODUCTION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0680 - INTRODUCTION TO PHYSICAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce the undergraduate to the issues, theories and methods of physical anthropology. Beginning with a consideration of evolutionary, genetic and geologic principles, the course goes on to consider, the diversity of fossil and extant primates, including humans. Issues in anatomy, paleontology and behavior will all be addressed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0681 - INTRODUCTION TO HUMAN EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
This is an introduction to human evolution and, in general, the evolution of the larger group to which we belong, the order primates. We will survey first the development of evolutionary ideas and modern developments in biology and geology and then review the diversity of living and fossil primates, dwelling especially on the discoveries and controversies surrounding our own evolutionary past.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0701 - CULTURAL ANTHROPOLOGY: OVERVIEW

Minimum Credits: 3
Maximum Credits: 3
Designed for undergraduate non-majors, this course will provide a broad introduction to cultural anthropology. This course examines the behavior and customs of peoples throughout the world and considers what it means to be human. We will consider patterns of marriage, family organization, gender, political behavior, economic systems, rituals, etc., Of other peoples and compare these with American social patterns.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
ANTH 0710 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0711 - THE INTRODUCTION TO THE ANTHROPOLOGY OF SPORT

Minimum Credits: 3
Maximum Credits: 3
Sport captures the minds and money of billions of people everyday, the Olympics, World Cup Soccer, American College Football, and Little League World Series. Television, radio, cell phones, internet keep us updated on the latest scores, highlights and goings on of our favorite and least favorite athletic personalities. Yet despite its overwhelming significance in everyday life it goes largely ignored in Anthropological discussions. This course serves to introduce students to the significance and centrality of sport in understanding and interpreting social life. Sport will be critically examined through major anthropological categories of race, class, ethnicity, gender and power. We will be using sport as the focal point with which to examine varying attitudes, institutions and social dynamics. This will not be a history of sport nor will it be a cross-cultural comparison of different kinds of sport from around the world but rather this course will seek to demonstrate to you how sport figures into the shaping of our worldview and structuring of social institutions.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0713 - ASIA NOW

Minimum Credits: 3
Maximum Credits: 3
The course is innovatively interdisciplinary, reflecting current anthropological theory. The topical focus is on contemporary Asia. It is creatively structured around a series of high-profile, public guest lectures given by leading, internationally recognized Asian Studies and Global Studies Scholars representing a spectrum of disciplines. The class will meet twice a week, once for a lecture and once for a seminar discussion focused on reading assignments chosen to highlight anthropological problems, questions and analytical perspectives that relate to the weekly guest lecture.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Global Issues General Ed. Requirement

ANTH 0714 - ASIA NOW LANGUAGE TRAILER

Minimum Credits: 1
Maximum Credits: 1
This is a one-credit language trailer course connected to ANTH 0713 Asia Now. Asia Now is a hybrid lecture series/seminar course, with a series of weekly public guest lectures every Monday followed by weekly seminar discussion on Wednesday. The additional language trailer course meets once a week for one hour to provide instruction in a target Asian language (Japanese, Korean or Chinese). Students with intermediate and advanced aptitude in the target language meet for one hour to improve their language competency by discussing topics covered in lectures and reading assignments in 0713.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 0715 - ANTHROPOLOGY OF LATIN AMERICA
Minimum Credits: 3
Maximum Credits: 3

The purpose of this course is to offer students a basic yet comprehensive survey of the anthropology (including history, archeology and geography) of Latin America. This survey course will emphasize the development of Latin American societies and cultures since the European conquest, and focus on key issues/themes that have consistently surfaced in Latin American cultural anthropology and that have continuing priority, relevance and interest up to the present. This course is especially tailored to freshmen students with little or no knowledge of Latin America.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 0717 - MAGIC, WITCHCRAFT AND THE SUPERNATURAL BODY

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ANTH 0730 - HIMALAYAN GEOGRAPHY

Minimum Credits: 3
Maximum Credits: 3

The Himalayan region is characterized by a tremendous range of social and cultural diversity that corresponds to climatic, ecological and geographical variation, as well as local and regional geopolitical factors. Historical change from the emergence of early forms of social complexity centered on chiefs and their forts from which the regional designation of ‘Garhwali’ takes its name through the development of kingdoms and larger polities shows the intimate link between geography, environment and socio-political transformation. Similarly, local language patterns, regional religious practices, musical styles, mythology, food culture, sartorial fashion, architectural design, agricultural and transportation technologies and engineering and trade networks have all been shaped by the structure of Muntain barriers, bounded valley communities and bracketed lines of communication that follow river systems. Whereas the political economy of the Himalayas has been structured around agricultural production, and the development of elaborate field terrace systems, there have also been subsidiary economies centered on trans-Himalayan trade and pilgrimage as well as pastoral nomadism and transhumance. Since the colonial period, the Himalayas have increasingly become a place for rest, relaxation, tourism and adventure, and this along with further political transformations since Indian independence has led to the rapid development of urban areas. This course will provide a survey of Himalayan history, society and culture with a focus on the relationship among nature, the environment and geography.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 0768 - HUMAN SEXUALITY IN CROSS CULTURE

Minimum Credits: 3
Maximum Credits: 3

This course explores the expression of human sexuality across a diversity of cultural and social settings using a cross-cultural framework that is based on comparing information on sexuality in other cultures with data from us. It includes how human groups manage sexuality and reproduction; theories of the development of marriage, family, and household systems; differences in values and expectations related to sexuality; the development as sexual expression across the life span; understanding heterosexual and homosexual relationships; and understanding sexual violence.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
ANTH 0780 - INTRODUCTION TO CULTURAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
By examining the behavior and customs of peoples throughout the world, the course considers what it means to be human. We will describe the patterns of marriage, family organization, warfare and political behavior, economic systems, rituals, etc., Of other peoples, especially those of tribal societies, and compare these with American social patterns. Anthropological films and slide presentations will supplement lectures.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1335 - GLOBALIZATION

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of the economic, social, technological, environmental, and ideological impacts of globalization on national communities, with an emphasis on the cultural and political dynamics of the process. Student research and oral presentation skills are emphasized.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1441 - FIELD METHODS IN LINGUISTICS

Minimum Credits: 3
Maximum Credits: 4
This course is meant to simulate the experience of linguistic field work, and raise awareness about the effectiveness of specific interview techniques for acquiring linguistic data. The course will give instruction and experience in eliciting data from a speaker of non (indo) European language. Students will undertake the investigation of the phonology, some aspect of grammar, and the ethnosemantic study of a taxonomically structured semantic field such as plants or animals. Students will make detailed elicitation plans in advance of their administration.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: LING 1578 and 1773 and 1777; LVL: Sr

ANTH 1447 - LANGUAGE, CULTURE, AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Certain cultural concerns are well-labelled linguistically: kinship, plant-names, diseases, colors, etc. The study of how such semantic fields are labelled and organized is ethnosemantics. Much of the way language is used depends on the context of speaking. Different ways of talking to different people is the subject matter of sociolinguistics. Some thoughts that we habitually think seem illogical on reflection, but it seems as if our language predisposes us to think this way. Such phenomena are addressed by the Sapir-Whorf hypothesis.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Writing Requirement Course

ANTH 1450 - GENDER AND SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
ANTH 1490 - CROSS-CULTURAL POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course is a comparative examination of political behaviours in small-scale and large-scale societies through the anthropological holistic lens which sees things political as embedded in, and intertwined with, the likes of kinship, resources, economy, belief systems (religion), etc. The course approaches power as a problematic, and emphasizes agentic strategies at the individual and group levels. One of the continual and major issues in the course will be to address the dynamics between small-scale and local experience, with large-scale (read state and global) forces in some selected instances.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ANTH 1516 - SPECIAL TOPICS IN ARCHAEOLOGY GEOPHYSICS

Minimum Credits: 1
Maximum Credits: 1
This course provides a general introduction to common methods of geophysical prospection being used within archaeology. Classroom lectures will be provided on: (i) integration of geophysics as a tool within broader research programs, (ii) background theory on the methods and their use in field research (fluxgate gradiometry, earth resistance, gpr, magnetic susceptibility, electrical conductivity), and (iii) opportunity to process and interpret actual geophysics datasets. Hands-on training in geophysics survey also will be provided through practical field sessions including: fluxgate gradiometry, earth resistance, and magnetic susceptibility.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit

ANTH 1520 - SEDIMENTOLOGY AND STRATIGRAPHY

Minimum Credits: 4
Maximum Credits: 4
The first part of this course involves the description of sedimentary particles and deposits using the fundamental properties (composition, size, shape, orientation and packing) and derived properties (porosity, permeability and sedimentary structures). Included is a discussion of the processes related to these properties. The second part reviews modern sedimentary environments and their rock products. Finally, principles of stratigraphy are introduced.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 0055

ANTH 1524 - CHINESE ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
An introduction to Chinese Archeology from the earliest known beginnings through the Han Civilization of the second century A.D. Attention will be given to innovations of people in this part of the world -- the agricultural beginnings, the first cities and states, the formation of an empire. Emphasis will be placed on such topics as the role of archeology in the study of history and art as well as in understanding china today.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Asian Studies

ANTH 1525 - EASTERN NORTH AMERICAN ARCHEOLOGY
Minimum Credits: 3
Maximum Credits: 3
This course deals with cultural development in the eastern United States from approximately 20,000 years ago to the period of European contact. Particular attention will be paid to man's adaptation to late pleistocene and holocene environments, the initial occupation of the region East of the Mississippi, the origins of agricultural systems and the rise of complex societies, including the Adena, Hopewell, and Mississippian manifestations.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1526 - WESTERN NORTH AMERICAN ARCHEOLOGY

Minimum Credits: 3
Maximum Credits: 3
The prehistory of Western North America is examined in detail from the initial peopling of the area to the period of historic contact. Special emphasis is given to the Paleo-Indian and archaic techno/subsistence stages in the arid portions of the West.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1527 - ARCHAEOLOGY OF NORTH AMERICAN INDIANS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1528 - SOUTH AMERICAN ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course deals with cultural development in South America from 20,000 B.C. To Spanish contact. Emphasis will be placed on the earliest evidence for man, maritime adaptations, and origins of agriculture, rise of the state in the Central Andes and the rise of complex societies in the tropical forest. Stress will be placed on the evolution of Andean states including the origins and spread of the Chavin, Moche, Nasca, Tiahuanco, Chimu and Inca Empires.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1530 - ORIGINS OF CITIES

Minimum Credits: 3
Maximum Credits: 3
A broad introduction to the process of urbanism and the rise of early pre-industrial cities in both the new and old worlds. Specific cases from Mesoamerica, the Andes, North America, Egypt, and the near East are examined in order to elucidate the varying roles cities played in ancient civilizations.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
ANTH 1534 - ARCHEOLOGICAL DATA ANALYSIS 1

Minimum Credits: 4
Maximum Credits: 4
An introduction to quantitative data analysis in archeology, this course covers basic principles of statistics, including exploratory analysis of batches, sampling, significance, t tests, analysis of variance, regression, chi-square, and estimating universe means and proportions from samples. The approach is practical, concentrating on understanding these principles so as to put them to work effectively in analyzing archeological data. Much of the statistical work is done by computer.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

ANTH 1535 - BASIC ARCHEOLOGICAL FIELD TRAINING

Minimum Credits: 6
Maximum Credits: 6
The university of Pittsburgh field training program in archaeology is conducted at various locations. Features of the excavations include basic training in mapping, archaeological survey, excavation methods, soil analysis, data recording, and preliminary artifact analysis.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

ANTH 1537 - BASIC LABORATORY ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Students will be instructed in basic methods of lab analysis for a range of artifacts, materials and data commonly recovered in archaeological projects.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1540 - SPECIAL TOPICS IN ARCHEOLOGY

Minimum Credits: 3
Maximum Credits: 3
Topics covered vary greatly with instructor and term.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies

ANTH 1541 - CULTURAL RESOURCE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course will cover in an introductory way all aspects of cultural resource management and historic preservation. Major topics include federal historic preservation legislation, cultural resources (historic and prehistoric archaeology, historic structures), the national register of historic places, section 106 and 110 of the NHPA, historic preservation planning, and state historic preservation plans. Course will utilize historic architectural examples as well as prehistoric and historic archaeological sites. Greater emphasis placed on how to evaluate historic properties for national register.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Urban Studies
ANTH 1543 - ANCIENT STATES IN THE NEW WORLD

Minimum Credits: 3
Maximum Credits: 3

Drawing on the fact that the ancient new world was a dazzling treasure house of non-Western political thought and organization, this course uses archaeology and ethnohistory to document and make comparative sense of the rich variety of political arrangements which existed among prehispanic states in MesoAmerica and Andean South America. A special aim is to understand how Amer-Indian concepts about state craft and rulership mesh with anthropological and other theories about ancient states.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1544 - ANCIENT CIVILIZATIONS

Minimum Credits: 3
Maximum Credits: 3

This course examines the rise and fall of several ancient civilizations. It covers the archaeology and earliest history of regions recognized as significant independent centers for the development of early civilization: Mesopotamia, Egypt, Indus Valley, China, South East Asia, MesoAmerica, and Andean South America. Central themes concern: why and how civilizations first emerge and then collapse; relationships among economic, political, social, and ideological factors in early civilizations; generic versus unique qualities of different early civilizations.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1546 - CAVEMAN: ARCHAEOLOGY, POP CULTURE AND THE PRIMITIVE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ANTH 1547 - POTS AND PEOPLE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1548 - AMAZONIAN ARTS: MAKING AND MEANING

Minimum Credits: 3
Maximum Credits: 3

This course introduces students to the arts of the Amazonian region in the context of their function and meaning. The course will be taught as a combination of lecture and hands-on experience working with native potters from the Bobonaza river. Students will learn to make pottery in the Kichwa (Quichua) tradition, and to understand the role of pottery and material culture in the daily lives of people in this region. On a number of occasions, students will accompany the native potters on journeys into the adjacent forest to gather materials and to study the patterns in nature that inspire them. Here students will observe related arts such as face paint patterns, beaded ornaments, ritual singing and storytelling. Carefully selected readings and lectures will use these arts as a window for exploring Amazonian thinking about the natural world behind the designs, and the ways in which the designs can be used to understand patterns of social interaction. Interviews with potters will aid in understanding these arts in the context of daily and ceremonial life. In the process, the arts become a doorway allowing the student to explore Amazonian culture and environment first.
hand. Comparative material from several other world regions will also be discussed.

**ANTH 1549 - WARFARE IN ARCHAEOLOGY AND ETHNOGRAPHY**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

**Course Requirements:**  
PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

**Course Attributes:** Writing Requirement Course

**ANTH 1551 - GIS IN ARCHAEOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis  

This is a "lab" class in GIS (Geographic Information Systems), specifically designed for students interested in archaeology. The course covers the basic background and skills necessary to manage and analyze spatial datasets in archaeology using GIS. We will cover all the basics that any introductory GIS class would cover (and more); however, we will especially emphasize the techniques that are most useful to archaeologists, such as field data acquisition, spatial queries, georeferencing, working with distance, working with DEMs (Digital Elevation Models), and cost-distance and visibility analysis. Over the semester, students will get substantial hands-on practice applying these skills to manage real archaeological data and investigate past social processes in space, especially at the regional scale.

**Course Attributes:** DSAS Social Science General Ed. Requirement

**ANTH 1552 - A HISTORY OF ANTHROPOLOGICAL THOUGHT**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

**Course Attributes:** DSAS Social Science General Ed. Requirement

**ANTH 1556 - ZOOARCHAEOLOGY**

Minimum Credits: 4  
Maximum Credits: 4  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: Letter Grade  

**Course Attributes:** DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.

**ANTH 1557 - ARCHAEOLOGY OF RUSSIA, CENTRAL ASIA, AND MONGOLIA**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade
ANTH 1590 - ARCHAEOLOGY OF ISRAEL-PALESTINE

Minimum Credits: 3
Maximum Credits: 3

Is archaeology in a place like Israel-Palestine an objective science? In this course, we explore how past and present are linked as nation-states and religious communities utilize the archaeological record to mold identities and to forward certain narratives. Our focus will be on the major archaeological sites of Israel-Palestine, particularly in Jerusalem and its environs. We will explore the political and religious issues that have emerged from or surround their excavation. Archaeology in the Holy Land has long been driven by a desire to shed light on - or even authenticate - the Bible, while the "exotic Orient" was explored in the 19th and early 20th centuries through western expeditions and excavations that served to further colonial interests. These religious and political motivations persist even if their manifestations have shifted with time. Through site tours, museum visits, student-led discussions, talks with local experts, and even a day participating in an archaeological excavation, students will gain direct experience with the places that have aroused controversy because of their problematic relationship to biblical and other ancient texts and/or because of their location in politically contested space.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1600 - HUMAN EVOLUTION AND VARIATION

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1601 - STRUCTURE AND FUNCTION

Minimum Credits: 3
Maximum Credits: 3

Students will explore the literature of human biology and develop questions and hypotheses regarding undocumented concepts. Each student's goal will be to design a laboratory study which tests the hypothesis he/she has formulated. Areas which might be investigated include locomotion, feeding adaptations, and adaption to various environmental conditions. Students will learn techniques of experimental surgery used to investigate the relationships between structure and function.

Academic Career: Undergraduate

Course Component: Lecture

Grade Component: LG/SNC Elective Basis

ANTH 1602 - HUMAN SKELETAL ANALYSIS

Minimum Credits: 4
Maximum Credits: 4

This is an introduction to the study and analysis of the human skeleton, which will be based on lectures and lab. Topics include: development of teeth and bone, identification of whole bones and fragments and determination of sex, age, and stature (and other metric analyses), disease, and populational features. Real bony materials will be used in lab.

Academic Career: Undergraduate

Course Component: Practicum

Grade Component: LG/SNC Elective Basis

ANTH 1603 - HUMAN ORIGINS
Minimum Credits: 3  
Maximum Credits: 3  
This will be an in-depth look at the history of study of human evolution and the current theories and controversies surrounding the interpretation of our relatedness to the various apes as well as of the fossils representing our evolutionary past.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ANTH 1605 - PRIMATE ANATOMY  
Minimum Credits: 4  
Maximum Credits: 4  
This course offers a detailed consideration of the anatomy of the primates. It will follow an integrated regional approach (i.e., the back, the upper extremities, the hand, etc.), However, the major focus will be on the musculoskeletal system. Students will dissect human material (cadavers) but emphasis will be on the comparative aspects within the order whenever possible. Other non-human primate skeletal material will also be used.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ANTH 1609 - ADVANCED SKELETAL ANALYSIS  
Minimum Credits: 3  
Maximum Credits: 3  
This course provides the student with an in-depth understanding of the skeletal features used to develop the osteobiographic profile (e.g., age, sex, stature, ancestry, handedness, etc.) Of an individual. This analysis is essential for forensic identification and forms the foundation for the reconstruction of ancient individuals and their life-ways. Each student will select some aspect of skeletal analysis and present an overview of the bone biology, the history of the analytical methods, the problems and advantages of each method, modifications that others have made to address these issues, and the current state of knowledge. In the past, some students have proposed new methods of analysis. This will be complemented by a lab exercise designed by the student that will provide data for interobserver analysis of various techniques. The results of this lab will be presented as posters which will be posted on CW at the end of the term. Prior osteological experience is required.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ANTH 1611 - EVOLUTIONARY THEORY  
Minimum Credits: 3  
Maximum Credits: 3  
Intended as a sequel to ANTH 0011, this course explores modern evolutionary theory in detail. Some coverage is given to the history of debates, but more emphasis is placed on their current status. Both phylogenetic and adaptive components of the evolutionary process are discussed.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ANTH 1613 - PRIMATE BIOLOGY  
Minimum Credits: 3  
Maximum Credits: 3  
This course is a survey of the major groups of living primates (including humans) and of the various hard and soft tissue, as well as physiological and biochemical, systems that distinguish the group as primates and further distinguish the diverse lot of primate subgroups.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis
ANTH 1617 - PALEOPATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1619 - SPECIAL TOPICS IN PHYSICAL ANTHROPOLOGY

Minimum Credits: 3
Maximum Credits: 3
Topics covered vary greatly with instructor and term.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1701 - RELIGION AND RACE

Minimum Credits: 3
Maximum Credits: 3
This course examines the intersections of religion, race, and racism. Recently, scholars of religion have demonstrated that religious identities are often racialized as well. In this course, we will discover that religion and race are both modern categories rooted in post-enlightenment ideas about what it means to be human. We will see how the establishment of these religious and racial categories led to new hierarchies and inequalities. We will discuss how post-enlightenment thinkers linked religion and race, and how their ideas played a role in European imperialism. We will also investigate how the discipline of religious studies has developed its analytical tools with a racialized understanding of religion. The course will examine case studies in which religion has been racialized, and consider the political ramifications of these examples. In particular, we will think about the impact of white supremacy on black religion in the United States, the complicated relationship between antisemitism and Islamophobia, and contemporary Islamophobia in the US. Finally, we will explore the possibilities of anti-racism through faith-based scholarship and activism.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1702 - MUSLIM POLITICS IN REAL TIME

Minimum Credits: 3
Maximum Credits: 3
Media representations and news stories about the 'Muslim world' often project a troubling ahistorical and sensationalist narrative about a region torn by violence, fanaticism, and corruption. This information literacy-driven course will teach you how to place current events in the Muslim world or involving people of Muslim background in their historical context. It will also teach you to discern what constitutes a valid news source and how to find sources you can trust. We'll develop the skills necessary to make sense out of a news landscape that presents conflicting accounts of the same story and that fails to cover some stories altogether. You'll leave this course with a command over how to find news, how to read news, and then how to make sense of it through rigorous historical and social scientific analysis. To that end, you'll learn how to locate and evaluate scholarly sources with the same rigor as you do news sources. You'll be provided with a number of key aspects and developments in the history of the 'Muslim world', so that even if you have no prior knowledge of Islamic history you will be familiar with the key terms and themes. You will be introduced to the long history of problematic media portrayals of Muslims and the Muslim world and efforts to both critique and change these representations. We will work intensively with a librarian to master a set of basic information literacy skills at the start of the semester that we will grow and refine as the class progresses. The remainder of the course syllabus will be determined by the current news cycle, which will generate topics to be considered for further historical analysis.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1703 - THE HISTORY OF GOD
God has a history. In the earliest days of that history, God was worshiped as one of a plethora of deities controlling various spheres of cosmic activity or the human world. Students in this course will learn about this ancient pantheon - how gods functioned in society and how their presence was experienced by those devoted to them. They will then trace the evolution of the God of Israel from a mountaintop deity of the southern Levant in the late second millennium BCE to a supreme deity worshiped by a small group of absolute monotheists based in Jerusalem in the mid-first millennium BCE. Students will become more sophisticated readers of biblical texts in the process. The sources of the Hebrew Bible reflect not a homogeneous monotheism, but rather a diverse set of belief systems tending toward henotheism or even polytheism. By appropriating and reinterpreting the religious myths of their neighbors, the Israelites arrived at a character of the divine that has proven problematic to many contemporary theologians, particularly on issues of LGBT rights, women's rights, and the environment.

**Anthropology 1704 - Ritual: Theories and Cases**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

This course deals rigorously with historical and contemporary topics in the study of ritual and its intersections with religion, politics, medicine, disaster studies, and the study of social relations in general. From being considered peripheral to social science, ritual has re-emerged as a fundamental category of human behavior, relevant across a wide span of domains of actions. While there is a close connection between ritual and religion, ritual action is important outside of the sphere of religion and is now considered fundamental to the workings of society. Students in this course will understand how ritual practices vary cross-culturally while serving basic functions. The course provides case studies from different areas and shows how theory applies to these cases. Instruction methods include lectures and discussion; student work includes presentations, essays, and exams.

**Anthropology 1706 - Taiwan Diaspora**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

To better understand the fundamental thrust and impact of the Taiwanese diaspora, and its connection to globalization, this course is designed to explore the major forces that have shaped Taiwanese diasporic identities and overseas communities primarily during the 20th century. Students will read articles and books as well as journalists' reports to familiarize themselves with the range of concepts and debates that analyze Taiwanese-diasporic issues.

**Anthropology 1708 - Society, Culture, and Power in Post-Conquest Cities**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

**Anthropology 1709 - Activist Anthropology**
Minimum Credits: 3
Maximum Credits: 3
Following the work of activist anthropology this course will teach students that "critical engagement brought about by activist research is both necessary and productive. Such research can contribute to transforming the discipline by addressing knowledge production and working to decolonize our research process. Rather than seeking to avoid or resolve the tensions inherent in anthropological research on human rights, activist research draws them to the fore, making them a productive part of the process. Finally, activist research allows us to merge cultural critique with political action to produce knowledge that is empirically grounded, theoretically valuable, and ethically viable." (Speed 2006). This course will teach students both the importance and value of conducting research that moves outside of the "ivory tower" of academia. "[A]ctivist scholars work in dialogue, collaboration, alliance with people who are struggling to better their lives; activist scholarship embodies a responsibility for results that these "allies" can recognize as their own, value in their own terms, and use as they see fit." (Hale 2008) This course will explore major conceptual work on the role and ethical responsibility of anthropological research and social justice issues. Students will be required to participate in methodological exercises that will require engagement in the Pittsburgh community. While simultaneously learning as a student one will also be producing tangible resources for under-represented, marginalized and underserved communities.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

ANTH 1711 - ETHNOBIOLOGY: AMAZONIAN RELIGION AND NATURE

Minimum Credits: 3
Maximum Credits: 3
The course explores Amazonian cultural knowledge of plant and animal species, comparing it to scientific knowledge, to uncover underlying assumptions that constitute a systematic, if implicit, Amazonian philosophy of nature. It also teaches students how to ask key questions and to carry out qualitative research on ethnobiology. Over generations of hunting and gathering Amazonian cultures gained an intimate knowledge of their rainforest environment, the most bio-diverse on earth. Now, more than ever, preservation of that environment depends on improving understanding and cooperation between environmentalists and the native peoples who live there; and upon integrating traditional Amazonian and scientific knowledge of the natural world. The course addresses key ethnobiological questions such as: how do native Amazonian people classify plant and animal species? How do they understand the extinction or the emergence of new species? How do they understand plant and animal behavior? How is plant and animal ecology believed to serve as a model for understanding human society and vice versa? How should human emotions be regulated so as to better work with nature? What aesthetic, emotional or religious practices were developed to create bonds of empathy or communication between human beings and other species? What are the practical implications of the answers to these questions for collaborative environmental work with indigenous communities?

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1712 - AMAZONIAN ETHNOBOTONY

Minimum Credits: 3
Maximum Credits: 3
This course examines the cultural understanding and uses of plants in the Ecuadorian amazon. How do Amazonian people understand what plants are? How did they originate? How are they classified? How are they similar or different from humans? How are plant foods and medicines believed to work on the human body? How should they be harvested and prepared? What sorts of human moods or attitudes are necessary to work with plants? What ritual techniques are used to achieve empathy required to work successfully with plants?

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1713 - HEALTH, NUTRITION, AND POPULATION 1

Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to the study of the health, population and nutrition concerns of indigenous peoples; provide an understanding of the health concerns of the Kichwa speaking people of the Ecuadorian amazon and provide a grounding for research on the health of Amazonian peoples. It will be taught as a combination of lectures, discussion of readings, site/field visits, interviewing of key actors and analysis of primary
materials derived from interviews and observations of Kichwa people, healers and patients.

**ANTH 1714 - HEALTH, NUTRITION AND POPULATION 2**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will continue the study of the health, nutrition and population of the NAPO Kichwa begun in HPNI. It will specifically address the historical and contemporary food systems of the NAOP Kichwa; the production and management of Chica (manioc beer) as a cultural superfood and dietary staple; the management of pregnancy and childbirth in the Kichwa ethnomedical system; the impact of the intercultural health movement and the millennium development goals for safe motherhood on the provision pregnancy and birth care services in the Ecuadorian national system; and the impact of biomedicine on Kichwa health practice. Hpnii will be taught as a combination of lectures, discussion of readings, site/field visits, interviewing of key actors and analysis of primary materials derived from interviews and observations of Kichwa people, healers and patients. It will have a significant independent research component.

**ANTH 1716 - POLITICS OF GENDER AND FOOD**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Undergraduate
- **Course Component:** Seminar
- **Grade Component:** LG/SNC Elective Basis
- **Course Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**ANTH 1717 - MODERN TAIWAN: 1500-1980**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course teaches students about the social, cultural and economic factors that have shaped modern Taiwan, a critically important nation in the development of globalization in Asia.

**ANTH 1718 - GENDER AND WORK IN CROSS CULTURAL PERSPECTIVE**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
- **Academic Career:** Undergraduate
- **Course Component:** Seminar
- **Grade Component:** LG/SNC Elective Basis

**ANTH 1719 - ANTHROPOLOGY OF RACE AND SCIENCE**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

One of Anthropology's major contributions to the world was the concept of "Race". But after the 1940s it was abandoned and "Culture" became Anthropology's trademark. This course examines why this happened and how our understandings of culture and race are connected. This course takes a critical look at the narratives and discourses in and around race and its relationship to Anthropological and scientific thought. We will examine how
these discourses essentialize and naturalize bodies as well as our understandings of them. We will explore narratives which use the tool and authoritative voice of Anthropology, science, scientific method and genetics. In addition, we will look at some of the historical and contemporary narratives of the biological underpinnings of race discourse and its incorporation into everyday imaginings of social identities. This course will seek to engage both the social and biological framings of race and attempt to demonstrate where these discourses converge and where they divert away from one another. In addition to academic readings we will look at blogs, internet posts and media to view and critique the ways in which science logic becomes racialized logic in everyday discourse.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Diversity General Ed. Requirement, DSAS Social Science General Ed. Requirement

**ANTH 1721 - CYBER CULTURES**

ANTH 1725 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 1726 - GLOBAL PHARMACEUTICALS

Minimum Credits: 3
Maximum Credits: 3
This course examines pharmaceuticals as cultural and social phenomena, following their development, production, marketing, and use around the globe. We will investigate a number of issues, including the growing number of drugs prescribed to Americans each year, the lack of access some populations have to essential medicines, the increasingly global nature of clinical trials, and the role of pharmaceutical companies in the opioid crisis. We will use the study of drugs and medicines to analyze the production of medical knowledge, changing perceptions of health and illness, and the role of the state and the market in the development and distribution of therapeutics. Pharmaceuticals bring together science, clinical practice, marketing, and consumerism, and this course will draw on anthropological research to trace the role they play in global flows of knowledge, capital, commodities, and people.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1727 - HEALTH AND ENVIRONMENT IN PITTSBURGH

Minimum Credits: 3
Maximum Credits: 3
This course examines the relationship between environment and health, with a special focus on the city of Pittsburgh and the surrounding environs as a case study. We will use medical anthropology to systematically investigate the effect of the environment on health and the interplay of natural and human systems. Drawing on research in political ecology, this class will consider the social, political, and economic systems that shaped Pittsburgh and its inhabitants. We will pay particular attention to the way changing industrial and environmental conditions changed incidence of disease, and how exposure to risk and disease are shaped by race, gender, and class. We will examine issues like the histories of air pollution and resource extraction including coal mining, oil and gas drilling and their impacts on the environment and health. The course will examine how knowledge about health is produced and the development of new forms of citizen science that enlist local residents in projects to monitor issues like air quality.

ANTH 1728 - GENDER AND GLOBALIZATION

Minimum Credits: 3
Maximum Credits: 3
Gender is a key structuring principle of difference and inequality in society, while globalization is a condition characterized by time-space compression and ever-expanding connections across national boundaries. Globalization emerged out of such (and often violent) practices of contact as capitalism, colonialism, socialism, the Cold War, and neoliberalism. This course will explore the intersection of gender and globalization asking how gender shapes processes of globalization and how the role of gender is shifting as national/cultural regulatory systems are no longer able to maintain control over what is recognized as "normative" in the context of gender roles and gendered practices. This course will examine various facets of the interface between gender and globalization in such contexts as cross-border marriages, international adoption, sex and colonialism, gender and state violence, women in socialist welfare states, labor migration, the global sex industry, queer identities and activism, as well as gender and technology (especially, the intersection of gender inequality and the idea of technological enabled empowerment). The particular historical
contexts in which we will discuss these themes include colonialism, the Cold War Era, post-socialism, and neoliberalism.

**ANTH 1729 - BRAZIL**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course begins with an overview of Brazilian culture and of the country's enormous resource base. Cultural change is traced through the pre-Columbian, colonial, imperial, and republican periods. A major theme throughout is the evolution of a Portuguese heritage into today's distinctive Brazilian national culture. The country is then divided into five regions as a means of understanding its internal diversity. Popular American ideas about subjects like carnival, the amazon rainforest, coffee, Copacabana Beach, and the huge foreign debt are also dealt with.

**ANTH 1730 - ETHNO-NATIONAL VIOLENCE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  

**ANTH 1734 - GENDER IN EAST ASIA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**ANTH 1737 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**ANTH 1738 - GENDER PERSPECTIVES IN ANTHROPOLOGY**
This course analyzes gender perspectives in anthropology. Students are asked to consider how gender differences relate to women's and men's roles in productive labor, in property rights, and in family and kin relations. Special attention is given to the way gender and sexual difference are represented in culture.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1740 - GENDER, SEXUALITY, AND CHILDHOOD IN A GLOBAL CONTEXT

"Although childhood is often conflated with a biological category based on an immature body, in reality it is much more. Instead, this course examines the ways in which childhood is a discursive and continuously shifting category, one that changes across time and place. This course will introduce students to the study of children and childhood in a cross-cultural context and will pay particular attention to the ways in which notions of childhood, and the experience of being a child, draw from and reproduce understandings of gender and sexuality as they intersect with race, class, ethnicity, etc. Through readings, lectures, and films, we will also consider the meaning of gendered childhoods in light of contemporary forms of conception, children's culture (media, toys and artifacts, stories), child labor and play, and ritual and coming of age ceremonies. An analysis of these contemporary phenomenon highlight local and regional notions of childhood and their intersection with broader global patterns."

Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ANTH 1744 - ANTHROPOLOGY OF THE OLYMPICS

The modern Olympic games have existed for more than 100 years. In that time it has become both a local and global spectacle incorporating now well established traditions and rituals from the lighting of the eternal flame to the medal ceremony. But what do these rituals and traditions mean to athletes, organizers and spectators? The Olympics are often described as an event that brings the people of the world together under the auspices of sports' altruism. However, the Olympics are also known to increase sex trafficking, gentrification of neighborhoods, and incarceration of targeted populations. Do the Olympics mean the same thing to everyone who are directly impacted by it? This course explores the role of ritual and tradition as public spectacle and the contested meanings derived from different parts of communities impacted by the Olympics. Since the Olympics involves the participation of world leaders, global dignitaries, multi-national corporations with their financial and political sponsorship of the Games and the athletes how do global politics and global economies come into play for local people, their economies, and their social life. This course will explore the local impact that hosting the Olympic games has on local populations as well as the ways communities react and respond to the Games. This course will be taught as part of the Pitt at the Olympics summer intensive study abroad program.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ANTH 1746 - THE OLYMPICS & IDENTITY - RACE, GENDER, ETHNICITY & THE NATION STATE

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
The Olympic Games are and have been more than a sporting event that has captured the imagination and dedication of a global audience for over 100 years. This course explores the ways in which the Olympic games have become a venue to not only showcase sport but to teach, inform and establish norms around some of society's core concepts. This course will demonstrate the ways in which our everyday understanding of gender, race, ethnicity, biology, and citizenship have been directly shaped due to the Olympic games. The Olympic games have been a steady partner with the development of nationalism, globalization, modernity and science. Topics such as gender verification testing, biological racism and citizenship will be discussed as part of the Olympic program. This course will be taught as part of the Pitt at the Olympics Summer Intensive Study Abroad Program.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**ANTH 1747 - WRITING CULTURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This class will introduce students to different anthropological and ethnographic writing styles and theoretical approaches while encouraging them to think about what anthropology can contribute to our understanding and appreciation of human diversity in the world today. Students will "try on" different writing styles and theoretical approaches. Throughout the class they will examine the poetics (writing style) and politics (forms of power) associated with different approaches and types of ethnographic writing. Class readings include different types of anthropological writing. This includes empirical writings (e.g., structural-functional ethnographic realist writing) that characterized much anthropological work through the 1960s; interpretive works, influenced by Clifford Geertz; a range of experimental, reflexive, and critical writings of and since the "experimental moment" of the late 1980s; and feminist ethnography and fictional ethnography (or ethnographic fiction). Additional readings provide wider context and writing/study tips.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**ANTH 1750 - UNDERGRADUATE SEMINAR**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar brings together all undergraduate majors in anthropology for a seminar on the methods by which cultures around the world change over time. Defining such methods occupies much of any anthropologist's time, be he or she an ethnographer, archaeologist, physical anthropologist or linguist. The seminar therefore examines this central problem from many perspectives and affords the student ample opportunity for personal expression as well as rewarding discussion and research in a peer group environment.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFILM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Capstone Course, Writing Requirement Course

**ANTH 1751 - PEOPLE AND ENVIRONMENT IN AMAZONIA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces the complexity of relationships among environment, indigenous populations, and Western society in the Amazonian region of South America from historical and ecological perspectives.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**ANTH 1752 - ANTHROPOLOGY OF FOOD**

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course surveys the general subject of culinary anthropology. Topics include food exchanges and the construction of social groups, food and social boundaries, food taboos, symbolism of food, folk conceptions of food, sacrifice and food in religious contexts, world standardization of food preferences. Thus, the focus is on social aspects of food, eating, and exchange.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**ANTH 1755 - URBAN ANTHROPOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course outlines the origins and evolution of cities and explores their roles within their historical, social, and cultural contexts. It examines the nature of life in cities cross-culturally from the perspective of the inhabitants. Features associated with urban life—such as migration, squatter settlements, family organization, ethnicity, social stratification, social networks, and social pathologies—receive special attention.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** DSAS Social Science General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req., Urban Studies, Writing Intensive Course (WRIT)

**ANTH 1756 - ECONOMIC ANTHROPOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course reviews the development of economic anthropology as a special field of study. Emphasis is placed on economic change and the impact of industrialization on the third world. Ethnographic examples are drawn from Latin America, Africa, Asia, Oceania, and Europe. Topics to be discussed include economic theory in anthropology, exchange and the origin/use of money, the development of wage labor, marketing and commodity production, theories of economic development and underdevelopment.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

**ANTH 1759 - CHINESE SOCIETY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course deals with traditional and modern Chinese society, before and after the 1949 communist revolution. Topics covered include: family and kinship, marriage, community organization, agriculture and industry, gender roles, social stratification, religion, land reform and collectivization, and the cultural construction of a new socialist system. Films, slides, and media presentations supplement lectures.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Asian Studies, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**ANTH 1760 - ANTHROPOLOGY OF LAW**

**Minimum Credits:** 3  
**Maximum Credits:** 3
This course examines anthropological analyses of law and law-like phenomena in a number of societies, including the United States. Particular attention is given to the various ways that disputes are resolved in different social and cultural settings, and to the theoretical analyses used to explain these differences.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ANTH 1761 - PATIENTS AND HEALERS: MEDICAL ANTHROPOLOGY 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course surveys the field of medical anthropology and its history within the discipline of anthropology as a whole, from the perspective of social-cultural theory. Topics dealt with include ethnomedicine, ethnographic cases, cross-cultural studies of healing practices and connections between medicine and religion. Reference is also made to applied research in contemporary situations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Asian Studies, Global Studies

**ANTH 1762 - HUMAN ECOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores the ecology of the human species. We will study how humans adapt to their physical and cultural environment, and the interrelationships between people and the environment. Topics discussed include evolution and adaptation, population growth and regulation, foraging and subsistence strategies and production decisions, population interactions and resource management, and energy and human society.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

**ANTH 1763 - FIELD METHODS**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is designed to acquaint students with basic ethnographic fieldwork techniques. Topics addressed include taking and managing fieldnotes on participant-observation, systematic or structured interviews, behavioral observation, and use of archival materials. There will also be some discussion of the relationship between research design, data collection, and data analysis.

**Academic Career:** Undergraduate  
**Course Component:** Lecture

**Course Attributes:** Writing Intensive Course (WRIT)

**ANTH 1764 - CULTURES AND SOCIETIES OF INDIA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to introduce students to the cultural history of India and to the culture and society of the modern country, concentrating on the description and analysis of modern Indian society. Topics to be covered include caste, kinship and marriage, village communities, law and society and politics in modern India.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Asian Studies, DSAS Cross-Cult. Awareness General Ed. Requirement, DSAS Diversity General Ed. Requirement, DSAS
ANTH 1768 - CULTURES AND SOCIETIES OF EASTERN EUROPE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the socialist countries of eastern Europe apart from the soviet union. It is particularly concerned with how the region has developed under socialism and with how the new, socialist societies have affected the different indigenous cultures. Topics include industrialization and transformation of agriculture, kinship and family, among others.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1770 - KINSHIP AND THE FAMILY

Minimum Credits: 3
Maximum Credits: 3
In this course Western and Non-western forms of kinship, family, and marriage will be discussed and analyzed. Special attention will be given to the history of European marriage, to family organization and industrialization, and to women's relation to kinship and family order. The differences in European and Non-European reactions to industrialization will be compared in some detail. Europe, China, India, and Japan will receive special attention.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1771 - RELIGION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
Religion is thought, felt, and acted out in social and cultural contexts. The relationship between religion and culture is the focus of the course. The objectives are to understand religion wherever and whenever found, and to understand the anthropological approach in the cross cultural study of religion. Religious belief, ritual, myth, dogma and religious specialists in industrial and non-industrial societies are compared.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Asian Studies, Global Studies, Russian & East European Studies

ANTH 1773 - CULTURES OF MESOAMERICA

Minimum Credits: 3
Maximum Credits: 3
A general survey of problems and cultures of Mexico and Guatemala from the time of the Spanish conquest to the present. The course will be divided into three parts; MesoAmerica at the time of the arrival of the Spaniards; the colonial transformation of the Indian population; and the contemporary position of the Indians within the Pluri-Ethnic societies of which they are part.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1774 - PERSPECTIVES ON RELIGION

Minimum Credits: 3
Maximum Credits: 3
A serious introduction to the study of religion is undertaken by reviewing the efforts and insights of the principal scholars in the field in the modern period.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Requirement Course

**ANTH 1775 - APPLIED ANTHROPOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Viewing applied anthropology as a possible career choice, this course will define the field, contrast it with basic anthropology, examine the concept of policy analysis, and survey the kinds of applied anthropology conducted within the realm of cultural anthropology (urban, education, community development, etc.). Methods and techniques used in applied anthropology will be reviewed.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ANTH 1776 - MYTH, SYMBOL AND RITUAL**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A comparative examination of the myths, symbols, and rituals of different cultures.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

**ANTH 1778 - CULTURES OF AFRICA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores the traditional cultures and societies of Africa from prehistoric to modern times. Emphasis is on the conditions prior to contemporary changes but some attention is given to modern developments. Concern is with the variety of cultures on the continent, how people make a living, what family life is like, how disputes are settled, and religion. Through lectures, films, and readings, the student gets a feeling for life in this fascinating part of the world.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** African Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**ANTH 1784 - JAPANESE SOCIETY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to contemporary Japanese culture and social institutions. Using scholarly books, essays, fiction and film, it will give students a range of different exposures to various aspects of Japanese society and everyday life: economic miracle, recession, middle class society, gender relations, sexuality, education, consumerism, and mass culture. The special focus of the course will be popular culture in japan. We will review the postwar history of popular culture and consider the reasons for its recent appeal abroad.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture
**Grade Component**: LG/SNC Elective Basis  

**ANTH 1785 - COMPARATIVE HEALTHCARE SYSTEMS**

**Minimum Credits**: 3  
**Maximum Credits**: 3  
Health care systems are having to respond to the number of competing challenges. The pressures of globalization, aging populations, increasing patient demands, and the rising costs of research and medical treatments are forcing us to look more critically at how healthcare is delivered to devise changes for the future. Changes made to health systems are often based on economic and political rationale and with many countries currently experiencing significant changes to the way in which health care systems have historically been funded and delivered. Students will explore a range of key concepts and themes in comparative healthcare from a multidisciplinary perspective. They will develop critical appraisal skills to assess the quality of evidence used to support developments in healthcare policy and practice and help students to look critically at the role that governmental and non-governmental organizations play in healthcare. This course will provide students will a firm grounding in key concepts and themes in comparative healthcare. It adopts a multidisciplinary approach to look at key principles in epidemiology, the way in which healthcare systems are funded and delivered, and health inequality and the social determinants of healthcare. Direct comparisons will be made between the USA and UK to allow students to relate their learning on this course to their own educational and healthcare settings. While this course is designed as part of a Study Abroad program for students in health-related fields: Nursing, pre-Medicine, Public Health, Global Health, Health Administration, etc., it does not have any prerequisites. Any student interested in this topic may enroll.  
**Academic Career**: Undergraduate  
**Course Component**: Seminar  
**Grade Component**: LG/SNC Elective Basis

**ANTH 1786 - CULTURES OF THE PACIFIC**

**Minimum Credits**: 3  
**Maximum Credits**: 3  
This course examines the traditional and contemporary peoples and cultures of the pacific islands. A geographical and historical review of the region is included.  
**Academic Career**: Undergraduate  
**Course Component**: Lecture  
**Grade Component**: LG/SNC Elective Basis  
**Course Attributes**: Asian Studies, DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**ANTH 1787 - SPECIAL TOPICS IN CULTURAL ANTHROPOLOGY**

**Minimum Credits**: 1  
**Maximum Credits**: 4  
This course will be on a topic in the area of specialization of a visiting scholar yet to be determined.  
**Academic Career**: Undergraduate  
**Course Component**: Directed Studies  
**Grade Component**: LG/SNC Elective Basis  
**Course Attributes**: Writing Requirement Course

**ANTH 1789 - AFRICAN AMERICAN FOLK CULTURE**

**Minimum Credits**: 3  
**Maximum Credits**: 3  
This course will explore several aspects of African American folk culture being defined as non-elite expressions of art, music, dance, theatre, literature, humor, material culture, and religious beliefs. Particular attention will be given to the role of folklore in the perpetuation and transmission of shared cultural knowledge among blacks in the United States.  
**Academic Career**: Lecture  
**Course Component**: LG/SNC Elective Basis  
**Course Attributes**: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.
ANTH 1793 - ASIAN MEDICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Using scholarly texts, ethnographic studies and historical documents, this seminar will focus on the medical systems of India, China, Japan, and South East Asia. The primary objective of the course is to understand various Asian medical systems on their own terms, both in theory and in contemporary practice. Primary attention will be given to Ayurveda, Unnani and traditional Chinese medicine. We will look at how so-called traditional medicine in Asia is being modernized in response to political, economic, social, and cultural transformations.

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Asian Studies, Writing Requirement Course

ANTH 1797 - MOUNTAINS AND MEDICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
India is a social, political and economic environment in which a broad range of South Asian medical systems have grown and developed over the course of several years. In the past 150 years these systems have been institutionalized and professionalized within the framework of colonial and national medical and public health policy. Many of these systems are intimately connected to the environment, and to the conceptualization, categorization, production and consumption of natural resources. This course focuses on non-biomedical systems of medicine: Ayurveda, Unani, siddha, Tibetan medicine, yoga and nature cure and homeopathy, as each one of these is supported and regulated by the government of India. The purpose of the course is not to evaluate the effectiveness or medical value of these systems; it is to understand how these medical systems fit into a range of social, political, ecological, botanical and economic contexts. Given that a number of these medical systems are intimately linked to Himalayan botanical and environmental knowledge, the course will focus on the relationship between South Asian medical systems and mountain ecology.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1798 - RELIGION AND ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
The Himalayas have inspired more religious thought, given rise to more forms of religious practice and are more distinctively featured in a spectrum of epic religious literature, than almost any other geographic region in the world, with the possible ' but unlikely ' exception of a small parcel of relatively dry hilly ground between Jerusalem and mecca. In any case, Siddhartha Gautham was born and taught in the shadow of the lower Himalayas, where Buddhism emerged in the 4th century BCE. Many specific mountains, lakes and rivers, as well as the broader geography of the Himalayas ' most notably sacred rivers ' define the landscape of Hindu mythology, pilgrimage and ritual. The practice of yoga as a metaphysical philosophy is intimately linked to the idea of mystical Himalayan masters. The Western watershed of the Punjab, including the iponymous five rivers ' Indus, Jhelum, Chenab, RAVI and Sutlej ' is the heartland of Sikh cultural and religious identity. In addition to being a center of medieval Hindu literary learning, Kashmir and the Western Himalayas, extending through the Hindu Kush, have defined routes of exchange, communication, conversion and confrontation between Greeks, Persians, Buddhist monks, and Mongol armies. More recently ' in terms of centuries ' Tibetan Buddhism has emerged out of a history of development in Lhasa ' relocated to McLeod Ganj in the early 1960s ' that combines elements of tantra from the southeastern Brahmaputra region with transmutations of Buddhism that have taken shape in greater china. Although not inspired by the Himalayas per se, Islam in South Asia has been shaped by geography and the environment in specific ways, and the development of a particular interpretation of the Koran in a small center of learning in the town of Deobandi ' close to where the epic battle of the Bhargava Gita is said to have been waged in Kurukshetra ' implicates the geography and geopolitics of the Himalayas in the emergence of reform oriented, Orthodox Islam.

ANTH 1799 - HIMALAYAN POLITICAL ECOLOGY
Minimum Credits: 3
Maximum Credits: 3
The Himalayan region is characterized by dramatic climatic and geological variation, a tremendous range of biodiversity and a complex ecology. Within the region there is also profound cultural variation. This course seeks to provide a critical perspective on the ecology and environment of the Himalayas by examining how different groups at the village, state, national and international level are implicated in the political ecology of the mountains. We will look at the way in which village farming communities use natural resources, what kind of pressure is put on resources as a result of development and population growth, how the mountain environment shapes the politics and resource distribution at the level of the state and, finally, how environmental and energy issues shape national policy and international relations.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1801 - HIMALAYAN BIODIVERSITY

Minimum Credits: 3
Maximum Credits: 3
Ranging in altitude from several hundred meters above sea level to over seven thousand, from subtropical forests to high altitude meadows and deserts, and from areas with little or no rainfall to regions that are among the wettest in the world, the Himalayas define a geographical region of enormous geological variation and biodiversity. The goal of this course is to gain an understanding of this diversity, with a focus on ecology. More specifically we will examine ecology and ecosystems in terms of biosemiotics - how and why organisms within an ecological niche communicate with one another, and how these patterns and structures of communication define different kinds of interdependence. Within the framework of standard classificatory schemes - mammals, birds, reptiles, insects - we will focus on particular species and specific niche systems for more detailed biosemiotic/behavioral analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ANTH 1803 - HEALTH ISSUES IN WEST AFRICA

Minimum Credits: 3
Maximum Credits: 3
Health as per the World Health Organization is viewed from a bio-psychosocial perspective. This course, which concerns itself with health issues in Africa with special reference to Ghana focuses largely on the social aspects of health. It uses sociological lenses to examine mental disorder. It introduces the student to the major health issues and discourses in Africa with particular emphasis on Ghana. It introduces the student to the ways social theories inform our understanding of health. The course examines how socio-cultural factors contribute to the development of health and ill-health in Ghana and Africa as a whole. This course is suitable for students in Pre-Med, Public Health, Social Work and students in International Development.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ANTH 1804 - RACISM AND CIVIL RIGHTS IN THE UNITED STATES

Minimum Credits: 3
Maximum Credits: 3
To introduce students to the legacy of racism and the social response of the Civil Rights Movement in the United States. Students will be given the opportunity to explore through an eight-day trip to key sites of the freedom struggle, as well as hear personal narratives of foot-soldiers and scholars of this crucial period in our nation's history. This course will be ideally suited for any majors but will be of interest to students in many disciplines in Arts and Sciences but also in other schools and colleges at the university with interest in these topics. Students in anthropology, history, sociology, urban studies, majors in the College of General Studies will also find applicable theories and knowledge for their majors. This course will serve as an elective in the Anthropology major but will also be submitted to satisfy various General Education requirements for all students at the university. To introduce students to the legacy of racism and the social response of the Civil Rights Movement in the United States. Students will be given the opportunity to explore through an eight-day trip to key sites of the freedom struggle, as well as hear personal narratives of foot-soldiers and scholars of this crucial period in our nation's history. The course will be divided into two main parts. The first part will be a seven-week academic curriculum with guest lectures and readings on the era and connected social issues around racism, law and politics. The second part will consist of an eight-day trip visiting sites and hearing from former leaders and current scholars specializing on connected topic. This course is designed to give students a highly experiential in-person experience on the role and impact of racism and its structuring effect on policies, institutions and individuals. The
course will also give students the opportunity to connect current issues and concerns about racism with the Civil Rights era. Enrollment in the course is required for participation in the Study Away program.

Course Component: Lecture
Grade Component: LG/SNC Elective Basis

**ANTH 1805 - BIOARCHAEOLOGY**

Minimum Credits: 3
Maximum Credits: 3

The human skeleton provides the most direct and unchallenged evidence for an individual's past behavior as the skeleton is plastic in its response to stress, much the same as a society responds to social and environmental stress. While the artifacts, architecture and features recovered from an excavation leave a cultural imprint on the landscape, so too does culture and behavior leave an imprint on the deceased. The individual is not just a biological shell to be cleaved from its cultural context, but rather forms a social package contingent upon culture during life and in death. We will examine social change and behavior from the within geographically diverse funerary contexts. We will evaluate factors that may influence the funerary context, such as differential burial practices and taphonomy. We will examine traditional labels to explore the topics of gender, biological vs. chronological age, and life course thresholds. Lectures will be complemented with a practical component.

**ANTH 1900 - INTERNSHIP IN ANTHROPOLOGY**

Minimum Credits: 1
Maximum Credits: 6

Working in consultation with faculty, advanced students wishing to pursue careers in anthropology have the opportunity to extend academic training to a practical work experience in a particular subfield of Anthropology. Students will be required to submit a preliminary proposal to a faculty sponsor preferably sometime during the prior term, or should respond to faculty listings of specific internship projects that will be posted. Examples of projects are: physical anthropology research at the Pittsburgh Zoo; analysis of archeological artifacts; local ethnographic or folklore research.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

**ANTH 1901 - INDEPENDENT STUDY**

Minimum Credits: 1
Maximum Credits: 3

This course allows qualified students to develop highly personalized research projects in conjunction with a faculty sponsor. The student will have to develop a bibliography, outline an approach to the project, and devise a methodology. The project work products are agreed to by the student and the faculty sponsor. Typical products may be a report, paper, or other tangible result of the student's efforts.

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

**ANTH 1902 - INDEPENDENT STUDY**

Minimum Credits: 1
Maximum Credits: 12

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

**ANTH 1903 - DIRECTED RESEARCH-READINGS**

Minimum Credits: 1
Maximum Credits: 3
Not all topics in anthropology can be adequately addressed in formal courses. The reading course allows qualified students to develop a bibliography for a specific topic not covered by other courses in the department. The work is done in conjunction with a faculty sponsor, and the student and faculty sponsor jointly determine the work products for the course, a research paper or annotated bibliography based upon the readings is typical, but other products may be substituted.

Architectural Studies

ARC 0110 - APPROACHES TO THE BUILT ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3
This foundational course for architectural studies majors seeks to acquaint students with contemporary ideas that affect our understanding of the built environment across the globe through a series of units dealing with different architectural issues and building types. The course engages in intensive reading of canonical texts in the field and current studies of issues shaping the built environment today.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 0112 - GLOBAL ARCHITECTURE 1: PREMODERN

Minimum Credits: 3
Maximum Credits: 3
This course offers a global view of architectural and urban history from antiquity (c. 3500 BCE) to the early modern period (c. 1750 CE). The class is organized around three types of historical characters: travelers, believers, and makers and chronicles the built environments that they created or imagined. Each class session will be based around case studies that ask how a certain type of person (a craftsperson, a queen, or a monk) might have constructed and used their physical environments. Through the semester we will also address the concept of global as an environmental response by individuals and communities to connect with people and places that were different from themselves. Sometimes this happened through travel and migration or through trade or conquest. Other times persons remained stationary yet imagined and created worlds that connected the living and dead, the profane and the spiritual, or the mundane and the philosophical. Yet other times people were forced to move as enslaved persons or as nomads--these persons too made their worlds with the resources that were available to them. Studying the built environments of people who thought, lived, and comported themselves differently from "us" will prepare you to live, work, and play in a world increasingly marked by difference rather than homogeneity.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 0114 - ART AND ARCHITECTURE OF THE MUSLIM WORLD

Minimum Credits: 3
Maximum Credits: 3
This course examines the art and architecture of the Muslim world as it developed through centuries of adoption, adaptation, and innovation which emerged as Islam spread throughout Eurasia, and Muslim communities came into contact with other Muslim and non-Muslim societies. Focusing on a number of prominent sites, buildings, and art objects, this course introduces students to the plurality of traditions and artistic practices labeled as Islamic Art and Architecture. Furthermore, students will learn about various sources of influence that came from the center and peripheries of the Muslim world. Exploring these concepts will take the class on a journey through time and space: starting in the 7th-century from the birthplace of Islam in the Arabian Desert, we will move through a vast territory that expands from southern Spain to China, with a final stop in 21st-century Dubai. All along the way, buildings and art objects will serve as snapshots that open a window into the social, cultural, economic, and political life of these Muslim societies.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
ARC 0116 - GLOBAL ARCHITECTURE 2: MODERN

Minimum Credits: 3
Maximum Credits: 3

Major social, political and cultural changes are reflected in ways humans build and shape their environments. Since the Industrial Revolution, the rapid transformation of regimes, the remaking of social classes, the development of new technologies and the emergence of new methods of production have marked a distinctive era of accelerating modernization that ushered in new ways of interacting in and with the world. In this course we will examine buildings and landscapes from about 1750 CE to the present, including the development of infrastructures for transportation, communication and energy production that transformed the ways people live and work, the ways products are made and distributed, the ways territories are planned and resources exploited. The emergence of modern nation-states in the 19th-century and decolonization in the 20th were accompanied by concepts of citizenship, human rights and political ideologies that required new types of buildings, cities and borders. Global organizations including colonial empires, world's fairs, sports associations, and the United Nations required buildings that project and shape identities while accommodating new publics. Countering the effects of relentless modernization, the development of museums, historic preservation and world heritage redefine sites and monuments and how we relate to past and remote cultures. The scale and violence of global wars and on-going regional conflicts necessitate temporary and improvised construction and redefined the idea and purpose of commemorative monuments. Through the lens of the built environment, the priorities, potentials, failures and novelties of the modern world emerge in all their awesome, terrible complexity.

ARC 0150 - INTRODUCTION TO WESTERN ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3

Introduces students to the conscious observation and analysis of architecture and to a broad survey of the major masterpieces of architecture in Western civilization. Formative concepts behind the designs, structural principles involved in the construction, and societal values promoted and reinforced by the formal character of buildings will be considered along with the analysis of style. Required for the architectural studies major and recommended as a beginning course for others interested in architecture.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 0153 - MEDIEVAL ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3

This course will examine the development of architecture in Europe and the Mediterranean from about 300 to 1500 CE, with a focus on the medieval reception and transformation of design elements inherited from the ancient world. It will focus primarily upon buildings designed for Christian rituals, especially churches, cathedrals, and monasteries, but there will also be some attention given to Jewish and Islamic structures, as well as the surviving evidence for secular buildings such as castles and town halls; at the end of the semester we will also devote some time to thinking about the reception of medieval architecture in famous Pittsburgh buildings such as Allegheny Courthouse, Heinz Chapel, and the Cathedral of Learning. Lectures will focus on the social and political background of these structures as well as their ritual and aesthetic purposes; we will also delve into questions about the contemporary care and upkeep of medieval buildings, particularly regarding the ethical management of places that serve as "museums" in some sense and are also active sites of worship.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 0177 - FRANK LLOYD WRIGHT

Minimum Credits: 3
Maximum Credits: 3

This course will deal with the life of the man who was America's greatest architect and one of the principal world figures in the art of building in the Twentieth Century. The lectures will treat his formation as an architect as well as the development of his career and will focus upon a theoretical
Cities have existed all over the world for millennia, and their inhabitants have used these urban conglomerations to connect themselves, their ideas, and their goods to a much wider audience - often well beyond their geographic and political boundaries. Cities have also been sites of dramatic demographic changes throughout human history, leading to productive contact as well as structural inequalities between diverse peoples. In this course, students will explore how cities all over the world and through time have grappled with the potentials and problems of a growing, diversifying, and increasingly interconnected world. We will pay particular attention to the cities' heterogeneous inhabitants, their built and natural environments, their interconnectivity, and their different and changing identities as "world cities." Designed around guest lectures by faculty from the Department of History of Art and Architecture, this course will introduce students to a wide array of world cities. Weekly lectures will explore examples of cities across time and space, including Timbuktu, Mexico City, Beijing, Chicago, Istanbul, Cairo, Paris, and other sites; and through a variety of visual media, including architecture, public sculpture, photography, and film. Class sessions will be specifically devoted to comparing the ideas that formed these cities and how their identities and built environments have changed over time.

In this course we will have the absolute pleasure of studying the city of Rome through time and space. We will start with the city's mythical and legendary founding by Aeneas nearly three millennia ago and work our way through contemporary Rome. Focal points will include: the Augustan principate during the Roman Empire, the building and urban planning of the Baroque popes, Mussolini's "Third Rome," and the contemporary city of Renzo Piano and Zaha Hadid. It is important to note that this course aims to present a fuller and richer examination of the lived experience in the city of Rome through time. Recent archaeological work has shed tremendous light on the living and working conditions within city from antiquity to the present day.

The architectural studies seminar is intended to provide experience working on an advanced level with a specialized topic in architecture. In some years the seminar will deal with history or theory, in others with conceptual issues. For this offering it will focus on several particular problems in the development of Frank Lloyd wright's career in architecture.

Special topics in architecture. Course varies from term to term.
ARC 0300 - INTRODUCTION TO HISTORIC PRESERVATION

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the goals, methods, and practice of historic preservation in the United States through a variety of historical, theoretical, and practical points of view. Through intensive reading, class discussion, field trips, case studies, and guest speakers representing various sectors of the preservation community in Pittsburgh, the course investigates such topics as: (1) the influence of historic preservation in the built environment; (2) philosophies and politics of preservation; (3) 'reading' buildings and landscapes for their cultural meanings; (4) protecting historic places and documenting their significance.*

ARC 1136 - EARLY AMERICAN ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3  
Architecture often serves as a prime document and indicator of America's past and future. The theme of this course is the search for identity in American architecture in the centuries from the colonial settlements to the Civil War. The course studies both the recorded history of American architecture and the unrecorded millennium before that, to show its surprising cohesion in the fact of great cultural and territorial diversity.

Academic Career: Undergraduate
ARC 1137 - AMERICAN ARCHITECTURE SINCE INDUSTRIALIZATION

Minimum Credits: 3  
Maximum Credits: 3  
By 1880 traditional American architectural values had broken down under a barrage of ornament and imported European styles. But at the same moment a new American architecture was taking shape to express the new wealth of post-Civil War America and its new social order. The next hundred years would see a succession of brilliant architects in Sullivan, Wright, Mies, Johnson and the pluralists of today. These individual successes only partially mask some major problems; both constitute the underlying themes of this course.  
Academic Career: Undergraduate  
Course Component: Lecture 
Grade Component: LG/SNC Elective Basis

ARC 1138 - BLACK BUILT AMERICA: ARCHITECTURES OF BLACK RESISTANCE IN THE UNITED STATES

Minimum Credits: 3  
Maximum Credits: 3  
This course offers a critical history of the Black labor, creativity, craftsmanship, engineering, and activism that built the United States of America. It is undeniable that Black Americans and African Americans have been brutally marginalized by the instruments of systemic racism including segregation, redlining, eviction, and more recently gentrification. In this class, however, that very real and continuing history of oppression is studied as the fuel for the creative agency of Black individuals and communities. Appropriating, intervening, and shaping the built environment became one of the many forms of Black resistance to racism and systemic injustices. In doing so, Black hands and Black minds shaped the very fabric of America's landscape. Our class begins and ends in Washington DC, posing important questions about the hidden and overt symbols of Black heritage in the nation's capital.  
Academic Career: Undergraduate  
Course Component: Seminar 
Grade Component: LG/SNC Elective Basis

ARC 1152 - ROMAN ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3  
The course will examine the development of Roman architecture from its origins in Etruria and Central Italy to the Middle Empire (ca. 150 AD). Special attention will be given to the relationship of architectural forms, types and functions to changes in Roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between Roman architectural forms and local traditions in the provinces to create a Roman imperial "Koine" will be treated only in passing.

ARC 1153 - EARLY CHRISTIAN AND BYZANTINE ARCHITECTURE

Minimum Credits: 3  
Maximum Credits: 3  
This course on early Christian and Byzantine architecture balances modern scholarship on the origins and development of church-building with a conceptual study of what worship is and how it has been housed. Individual topics of study vary from Rome and Constantinople, to "underground" churches, to the splendor of the basilicas built for Constantine and Justinian. Field trips to analyze a church and synagogue service complement the lectures and readings.  
Academic Career: Undergraduate 
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis
ARC 1154 - CONSTRUCTING THE GOTHIC

Minimum Credits: 3
Maximum Credits: 3
Treats the development of gothic architecture from the beginning, in 1140, to the death of St. Louis, in 1270, with emphasis on Northern France. Focuses on liturgical requirements, structural rationale, stylistic formulation, and decorative programs. Includes analysis of major documents.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

ARC 1156 - HIGH RENAISSANCE ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
The architecture of the high Renaissance and mannerism (from about 1500 to about 1580 in Rome and other centers of Italy) changed forever the face of architecture. This course focuses on the Roman projects of Bramante, Raphael, Michelangelo and Leonardo da Vinci. It then follows the mutation of high Renaissance ideals into mannerism and the spread of both styles in Northern Italy, particularly in town planning and in the villas and churches of Andrea Palladio around Venice.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

ARC 1158 - ARCHITECTURE AND ENLIGHTENMENT

Minimum Credits: 3
Maximum Credits: 3
This course will examine architecture, city planning, interior design, and gardening in eighteenth-century Europe as the product of social, industrial, administrative, and intellectual transformations that began to radically challenge traditional spatial configurations and conventional approaches to building. In cosmopolitan centers like London and Paris, an unprecedented explosion of print media, rapid rises in literacy, and the development of a public sphere outside official power structures opened debate in the arts to previously marginal figures. A range of new voices thus emerged that impacted policy decisions in the urban realm and proffered advice and guidance in thinking about aesthetics and artistic production. The rise of science held out the possibility that cities and institutions could be reshaped to improve human welfare through better hygiene and the expansion of commerce. Influential new classes defined by wealth or specialized knowledge generated the creation of building types for a range of new activities. Elite domestic space in particular reflects a wholesale transformation of social priorities motivated by the novel concept of privacy. Narrowly defined Renaissance discourses on the arts founded exclusively on the model of ancient Rome collapsed under an avalanche of data gathered in remote sites around the Mediterranean and through contact with more far-flung civilizations around the world. New intellectual paradigms reconfigured the relationship between individual and nature, between modern present and historical past. Consequently, the purpose of architecture mutated in the course of the eighteenth century as a bewildering range of new possibilities for shaping building and reshaping social relations were explored. Well before political revolution rocked European governments and toppled traditional hierarchies, the built environment served as a laboratory for experimentation and as a forum for reimagining society.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 1160 - ARCHITECTURE: IMAGE, TEXT, THEORY

Minimum Credits: 3
Maximum Credits: 3
This course treats the historical development of aesthetic theories employed in the conception of architectural design through the course of Western civilization. It focuses on Vitruvius in antiquity, the re-writings of Vitruvius in the renaissance, and the key theorists - both moralists and rationalists - of the modern era (including Ruskin, Viollet le-Duc, Le Corbusier).

**ARC 1161 - MODERNITY, MODERNISM AND HOUSING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course offers multiple perspectives on architectural modernism and modernity through the perspective of dwelling. We will consider examples of modern architecture from the Americas, Europe, Africa, the middle East and Asia from the late 19th century (starting with the debates regarding tenements in this country and working-class housing in England) and end with the demolition of the Pruitt-Igoe housing projects in St. Louis in 1972. The lens of housing will allow us to consider modernism in different geographic contexts (East and West); under different political conditions (in the colonial periphery, in the heart of empire, as part of state-sponsored redevelopment projects, and as part of the nation-building process in the developing world) and through a range of theoretical vectors (i.e. The modernist house as a manifesto for a new way of living; the attention received by vernacular building traditions and various schemes to replicate them as part of the modern project; the role of post-war technology in prefabricated housing; and the role of museums, such as the MOMA and other institutions such as the united nations in calcifying modernism in various locales around the world). This course is designed to give students a strong foundation in the theoretical, aesthetic and historical expressions of architectural modernism. It is also designed to expand the range of architectural modernism beyond the traditional Euro-Ameri-centric canon to include alternative modernisms across global geographies.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

---

**ARC 1162 - CAMPUS-COMMUNITY WORKSHOP**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Architects and designers have a vital role to play as thinkers and advocates who work with organizations and communities to help imagine ways to reshape the environments in which we live and interact. Over the course of the term, students will investigate the Pitt campus and surrounding Oakland neighborhoods, conduct original research using primary and secondary sources, and think critically and creatively about ways the environment can be shaped to make positive change. Each student will develop an original, written proposal for either [1] an intervention that responds to a need, enhances the experience of being at the university, or improves the quality of life on campus or in an adjacent neighborhood; or [2] a research project that could be continued in a subsequent term for independent study credit.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** Letter Grade

---

**ARC 1181 - PITTSBURGH ARCHITECTURE/URBANISM**
Minimum Credits: 3
Maximum Credits: 3
The course studies the physical environment of Pittsburgh; the topography, early settlement, the expansion of its industrial center, the post-war renewal, and the current shift from production to a service-based economy. A parallel study in the architectural history of Pittsburgh focuses on images of individual buildings from Fort Pitt to the new skyscrapers. Student papers either expand research in building categories (industrial, domestic, etc.) or integrate the physical development of the region with its political and social history.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARC 1182 - PITTSBURGH NEIGHBORHOODS

Minimum Credits: 3
Maximum Credits: 3
Pittsburgh Neighborhoods is a course where students learn about people, culture, history, and current issues that confront under-represented communities and neighborhoods in Pittsburgh. Throughout the semester, with direction from the instructor, students learn about and employ ways to see, document, and interpret a neighborhood by engaging the built environment, historical documents, and community members in storytelling. They approach the built environment as a cultural product, explore place as a fusion of material culture and human perceptions and practices, and frame questions of power around the politics of the built environment. In this class, we will employ methods that help us transcend the realm of the visual and explore the experiential and ephemeral. We will learn to observe with all our senses, listen to community members, and document life when in the field, and excavate and explore visual and textual records when in the archive. In doing so, we will adopt theories and methodologies from multiple fields, including urban/architectural history, cultural geography, anthropology, public history, and material culture studies.

Minimum Credits: 3
Maximum Credits: 3
This course will enable students to investigate the modernization of three important central European cities and the impact of new ideas about design, technology, and social organization on the development of new building types and urban infrastructure in the 19th and 20th centuries.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Russian & East European Studies

ARC 1201 - ARCHITECTURE DESIGN STUDIO 1

Minimum Credits: 6
Maximum Credits: 6
At the core of every nationally accredited school of architecture is the design studio. The design studio integrates skills learned in other architecture courses in the production of a design project. This course prepares students for the rigor of the architectural design process and exposes them to the unique pedagogical experience of a design studio. This course is designed to give students who are majoring in architectural studies and who intend
to pursue a professional degree in architecture at the graduate level exposure to a sophisticated conceptual framework for thinking about three-
dimensional composition and architectural problem solving. The course is also intended to emphasize the necessity of excellent graphic skills and
technical skills in model-making to communicating design ideas. This course is meant to serve as an intermediary step between the /architectural
studies seminar/ (HAA 1913) and the studio arts requirements for the architectural studies major, and the more advanced architectural design work in
HAA 1917.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PREQ: ARC 0201

ARC 1202 - ARCHITECTURE DESIGN STUDIO 2

Minimum Credits: 6
Maximum Credits: 6
This course is designed to give students who are majoring in architectural studies and who intend to pursue a professional degree in architecture at
the graduate level exposure to a sophisticated conceptual framework for thinking about three-dimensional composition and architectural problem
solving known as /system-based design/. The course is also intended to emphasize the necessity of excellent graphic skills and technical skills in
model-making to communicating design ideas. This course is meant to serve as a capstone for the architectural studies major.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PREQ: ARC 1201

ARC 1203 - DESIGN STUDIO 3

Minimum Credits: 6
Maximum Credits: 6
This course is designed to give students who are majoring in architectural studies and who intend to pursue a professional degree in architecture at
the graduate level exposure to a sophisticated conceptual framework for thinking about three-dimensional composition and architectural problem
solving known as /system-based design/. The course is also intended to emphasize the necessity of excellent graphic skills and technical skills in
model-making to communicating design ideas. This course is meant to serve as a capstone for the architectural studies major.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ARC 1202

ARC 1204 - DESIGN STUDIO 4

Minimum Credits: 6
Maximum Credits: 6
This course is designed to give students who are majoring in architectural studies and who intend to pursue a professional degree in architecture at
the graduate level exposure to a sophisticated conceptual framework for thinking about three-dimensional composition and architectural problem
solving known as /system-based design/. The course is also intended to emphasize the necessity of excellent graphic skills and technical skills in
model-making to communicating design ideas. This course is meant to serve as a capstone for the architectural studies major.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ARC 1203

ARC 1310 - PRESERVATION - TEXTS AND THEORY

Minimum Credits: 3
Maximum Credits: 3
This course is the capstone writing seminar for architectural studies majors pursuing the track in preservation planning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

ARC 1320 - DOCUMENTATION AND CONSERVATION STUDIO

Minimum Credits: 6  
Maximum Credits: 6  
This course is intended to provide an intensive foundation in the proper techniques of working in the field of architectural conservation. Primary emphasis is on learning directly from specific buildings and sites, with secondary emphasis on placing these findings within a practical preservation planning context. Background knowledge for analysis and for developing preservation recommendations will come from intensive reading, guest speakers, case studies, class discussions, field trips and exercises in building materials conservation. Concurrent with the development of approaches to conservation, students will also acquire or sharpen a variety of academic skills such as the ability to conduct historical research; graphic representation techniques; and professional writing and public presentation skills.
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

ARC 1330 - GLOBAL PRESERVATION

Minimum Credits: 3  
Maximum Credits: 3  
The late-nineteenth and early-twentieth century debates regarding the role of the architectural monument as a signifier of the past, as a container of memory and more importantly authenticity, were the definitive moment in the institutionalization and professionalization of architectural preservation around the world. In a 1903 essay titled 'The Modern Cult of Monuments,' art historian Alois Reigl claimed that while the creation of monuments (i.e. structures built to memorialize certain events or persons) had a long history that predates modernity, the 'cult of the monument' (i.e. the allocation of the monument as a unique and original object in a pre-ordained historical narrative of social and cultural evolution) came about as recently as the nineteenth-century. It is this coupling of the advent as well as the progress of modernity along with the formalization of systems of historic preservation that this course seeks to explore.
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SU3 Elective Basis

ARC 1340 - HERITAGE SITES

Minimum Credits: 3  
Maximum Credits: 3  
According to the United Nations Educational, Scientific and Cultural Organization (UNESCO), heritage sites encompass sites of "outstanding universal value from the historical, aesthetic, ethnological or anthropological point of view." This course will develop the fundamental themes, ideas, and case studies required to analyze, understand and critically engage with heritage sites in a comparative and global perspective. We will begin charting the European origins of the western understandings of heritage and exploring the development of national and international heritage legislation, charters and organizations. The course will then explore emerging trends that challenge Eurocentric notions of heritage: from critical heritage studies to approaches that specifically focus on minorities, women, and indigenous groups, and the broader issues of human rights and development. Starting from the second third of the semester, case studies from different geographic areas, time periods and themes will be discussed: heritage sites and national identity; heritage sites and tourism; heritage sites and sustainable development; threats to heritage; negative and difficult heritage; heritage and human rights; heritage futures. Finally, we will discuss the increasing interest in bottom-up initiatives that focus on grassroots, people-centered approaches to foster community engagement and participation in the management, programming and interpretation of heritage.
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

ARC 1901 - UNDERGRADUATE TEACHING ASSISTANTSHIP

Minimum Credits: 1  
Maximum Credits: 3
This course enables advanced majors to partner with a faculty member as a teaching assistant in a pre-existing departmental course. This collaborative project will result in the enrichment of the course and improve the teaching-learning enterprise for all parties (faculty, Undergraduate teaching assistants, and students enrolled in the course).

**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** Satisfactory/No Credit

**ARC 1901 - UNDERGRADUATE TEACHING ASSISTANTSHIP**

- **Minimum Credits:** 1  
- **Maximum Credits:** 3

This course enables advanced majors to partner with a faculty member as a teaching assistant in a pre-existing departmental course. This collaborative project will result in the enrichment of the course and improve the teaching-learning enterprise for all parties (faculty, Undergraduate teaching assistants, and students enrolled in the course).

**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** Satisfactory/No Credit

**ARC 1911 - ARCHITECTURE AND DIGITAL MEDIA 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

An introduction to the graphic communication of architectural documents utilizing computer aided drafting (CAD) techniques. This introductory cad course is designed to give students a working knowledge of the AutoCAD drafting system. The course has been designed to better acquaint students with concepts, processes and skills required by professionals in the field to create and modify computer-generated drawings. Students will learn the commands and functions necessary to input, process and output two dimensional working drawings in the form of plans, elevations and sections. Three-dimensional visualization will also be covered as a means to explore massing and proportion. In addition to the fundamental design methods and practices for the creation of architectural drawings, exercises will focus on fundamental concepts such as scaling, dimensioning, annotating as well as maintenance of CAD drawing files through the use of operating system commands.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis

**ARC 1912 - ARCHITECTURE AND DIGITAL MEDIA 2**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

The architecture, engineering, construction and operations industry has well documented inefficiencies stemming primarily from fragmentation in the project delivery process. At the same time, the industry faces significant challenges such as the demand to deliver projects more economically, the desire for more environmentally responsible projects, and the expectation of more predictability in performance -- all of which call for more integration and collaboration throughout a project's lifecycle. New technologies such as building information modeling (BIM) are revolutionizing architecture and construction, providing a platform that allows project information to be captured, structured and analyzed throughout the entire lifecycle of a project, enabling a more integrated, collaborative process that supports more informed decision making and higher levels of efficiency. In this course, students will learn the principles of BIM using Revit software.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PLAN: ARCHST-BA, ARCHST-BPH, or ARCDES-MN

**ARC 1990 - ARCHITECTURAL STUDIES INTERNSHIP**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Academic credit is awarded for practical professional experience gained through a directed internship. The internship is arranged by the student through the university internship office in consultation with the director of architectural studies.

**Academic Career:** Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Requirements: PLAN: Architectural Studies (BA and BS)
Course Attributes: Architectural Studies, Undergraduate Internship

ARC 1999 - SENIOR THESIS

Minimum Credits: 3
Maximum Credits: 3
In this course a senior major in the history of art will research and write a research paper and present it as if for publication. The area and topic will be decided upon in consultation with a specific faculty member.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: ENG 0102 or ENG CMP (0002 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Arts and Sciences

ARTSC 0010 - BEING HUMAN IN THE AGE OF COVID-19

Minimum Credits: 1
Maximum Credits: 1
This 1-credit course, sponsored by the Humanities Center, offers an opportunity for students to work closely with a team of faculty mentors to engage the COVID-19 crisis from a deeply humanistic perspective. Students will join a community of professors from a range of humanistic fields in a semester of discussions about our current pandemic moment. They will work closely with faculty members who bring research expertise in public health and the African diaspora; speculative fiction and imagining apocalypse; modern US History, the history of science, and the history of activism; the history of art as it has been shaped by plagues and epidemics; and the history of pandemic literature. We will read, talk and think deeply together about what it means to be human in this time of pandemic, and faculty will help students realize how historical, humanistic research methods can respond to the challenges of the present.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

ARTSC 0020 - LATIN AMERICA AND CARIBBEAN

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide students with substantial knowledge concerning the geography, history, and culture of Latin America and the Caribbean and to introduce them to how issues related to the region are studied from a variety of disciplinary perspectives.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Latin American Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 0092 - UNIVERSITY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
University Seminar (ARTSC 0092) provides new and/or transfer students with the skills necessary to maximize their potential for academic success at the University of Pittsburgh. During this course students will be exposed to various University resources; explore educational and career planning; gain academic confidence; and will become familiar with and utilize cognitive science research-based skills necessary for college success.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
ARTSC 0101 - FIRST APPROACHES TO RESEARCH

Minimum Credits: 1  
Maximum Credits: 1  
First Approaches to Research is designed to teach students how to connect to research and creative projects across disciplines, interests, and methodologies. Driven by their own curiosities and the search for answers, students will learn the tools needed to launch meaningful undergraduate research careers. 
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Satisfactory/No Credit

ARTSC 0111 - RIGHT START 1

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to enhance the academic skills of new students participating in the student support services project (SSS). The course will use collaborative learning strategies to address such topics as note-taking, problem-solving, time-management, test-taking, and goal-setting. This course is very interactive and will use multiple methods of communication and technology to apprise students of course activities along with upcoming SSS events. 
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade

ARTSC 0112 - RIGHT START TO COLLEGE 2

Minimum Credits: 1  
Maximum Credits: 1  
You must be a part of the trio student support services (SSS) program to take this course. This course is designed to enhance the level of career awareness of students in the student support services (SSS) program. The course will focus on the following topics: academic majors, resume-writing, interview techniques, professional communication, and career investigation. This course is interactive and will use multiple methods of communication and technology to apprise students of course activities along with upcoming SSS events. 
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade

ARTSC 0113 - RIGHT START TO COLLEGE 3

Minimum Credits: 1  
Maximum Credits: 1  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

ARTSC 0120 - FIRST EXPERIENCES IN RESEARCH

Minimum Credits: 1  
Maximum Credits: 2  
First experiences in research allows an undergraduate student to learn about and to participate in research with a faculty member outside of regular course requirements. The student receives orientation and training for the research project, an introduction to the research hypothesis, and learns about previous research conducted on the topic to date. The student participates in relevant training workshops. The student meets regularly with the faculty mentor and every other week with other undergraduate student researchers. 
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Satisfactory/No Credit
ARTSC 0121 - CONTINUING EXPERIENCES IN RESEARCH
Minimum Credits: 1
Maximum Credits: 2
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 0125 - SPECIAL TOPICS IN RESEARCH
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

ARTSC 0500 - INTRODUCTION TO STUDY ABROAD
Minimum Credits: 1
Maximum Credits: 1
This course explores the study abroad experience. It also addresses the issues of cultural diversity, international understanding and the role of the individual in the global community. The course will inform students of the ways in which study abroad complements and augments their academic program, career goals, and overall personal development.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit

ARTSC 0550 - HUMANITIES PROSEMINAR 1
Minimum Credits: 3
Maximum Credits: 3
This course serves as an introduction to humanities research for undergraduate students. The professor will help students to formulate a question and find an archive or set of primary sources that allows them to explore that question. Each student will be connected with a faculty mentor with expertise in the field of inquiry they are exploring. In collaboration with both this mentor and the proseminar professor, each student will then develop a research proposal that includes a plan for using their Humanities Center Undergraduate Fellowship over the summer to undertake a humanities research project.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

ARTSC 0551 - HUMANITIES PROSEMINAR 2
Minimum Credits: 3
Maximum Credits: 3
In this course, students reconvene following Humanities Proseminar 1 and after their summer Humanities Center Undergraduate Fellowships. Students will share the results of their summer research, explore the answers (and the new questions) that emerged in the course of their work, and make a plan for communicating that research more broadly. Building on a semester of intensive writing, discussion, and focused mentorship, students will ultimately present their research in a public session of the Humanities Center colloquium.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

ARTSC 0600 - ESL EDUCATION
Minimum Credits: 3
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 0800 - INTERCULTURAL EXPERIENCES
Minimum Credits: 1
Maximum Credits: 1
This course supports international students through exchange with domestic students prior to arrival at Pitt and throughout their first term on campus.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

ARTSC 0900 - SEMINAR IN PEER TUTORING
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

ARTSC 1000 - UCIS PROFESSIONAL DEVELOPMENT
Minimum Credits: 1
Maximum Credits: 1
This course provides opportunities for students to explore options and establish a career direction in a time of global pandemic. Students will design a strategy for securing a position related to international/global work. Specific focus on developing competencies that include: career selection, job search activities, resume and cover letter development, professional networking techniques, behavioral interviewing skills and workplace ethics in preparation for employment in government, business, and nonprofit sectors.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit

ARTSC 1001 - INTERNATIONAL STUDIES - LONDON
Minimum Credits: 3
Maximum Credits: 3
The course aims to emphasize the interconnections between society, economics, politics and the physical environment. This will involve an analysis of British Society in the 20th century, commencing with a review of post war ideology, politics and economics.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1002 - INTERNATIONAL STUDIES - CUBA
Minimum Credits: 3
Maximum Credits: 3
This course is offered as part of the Pitt in Cuba study abroad program to give students an introduction to Cuban culture, religion, race, art, literature, music and society and to provide them with context for their experiences in Havana, Cuba. This course will also familiarize students with the history of Cuba and its often difficult relationship with the United States.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1004 - GLOBAL DIVERSITY

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
Course Attributes: Study Abroad

ARTSC 1017 - CRITICAL ISSUES IN CRIMINAL JUSTICE

Minimum Credits: 3
Maximum Credits: 3
This course is part of the Study Abroad program and will be taught in London, England.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ARTSC 1018 - GLOBAL WATER POLICY DC STUDY AWAY

Minimum Credits: 1
Maximum Credits: 1
This course is a spring break study away course coordinated by the Study Abroad Office.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ARTSC 1019 - URBAN-RURAL HEALTHCARE IN PITTSBURGH AND BRADFORD STUDY AWAY

Minimum Credits: 1
Maximum Credits: 1
This spring-break study away course is coordinated by the Study Abroad Office.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ARTSC 1020 - LAKOTA PERSPECTIVE PINE RIDGE STUDY AWAY

Minimum Credits: 3
Maximum Credits: 3
This summer study away course is coordinated by the Study Abroad Office.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ARTSC 1021 - PITT IN DC-BRUSSELS STUDY AWAY

Minimum Credits: 3
Maximum Credits: 3
This summer study away course is coordinated by the Study Abroad Office.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ARTSC 1022 - STUDY AWAY: PUERTO RICO

Minimum Credits: 3
Maximum Credits: 15
This course will be used to enroll students in a domestic Study Away program in Puerto Rico
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 1300 - PROJECT BASED TECHNOLOGY DESIGN

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Study Abroad

ARTSC 1400 - STUDY ABROAD: MULTI-COUNTRY

Minimum Credits: 1
Maximum Credits: 18
This course is for students who enroll in a Study Abroad program that takes place in multiple countries throughout the academic term.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 1401 - ELECTIVE AT VERITAS UNIVERSITY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis

ARTSC 1402 - ELECTIVE AT VERITAS UNIVERSITY 2

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis

ARTSC 1403 - ELECTIVE IN CHINA

Minimum Credits: 3
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 1450 - LONDON FIELD STUDIES
ARTSC 1455 - YELLOWSTONE FIELD STUDIES

Minimum Credits: 0
Maximum Credits: 0
This course is part of the Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: No Grade Required

ARTSC 1460 - WYOMING FIELD STUDIES

Minimum Credits: 0
Maximum Credits: 0
This course is part of the Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: No Grade Required

ARTSC 1461 - WYOMING STUDIO ARTS

Minimum Credits: 0
Maximum Credits: 0
This course is part of the Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Non-Graded Component

ARTSC 1462 - VIENNA THEN AND NOW

Minimum Credits: 1
Maximum Credits: 3
This course is part of a Study Abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ARTSC 1498 - PUBLIC AND SOCIAL POLICY IN LATIN AMERICA

Minimum Credits: 3
Maximum Credits: 3
The interest in studying policy in Latin America and the Caribbean (LAC) has grown in recent decades. Public policy refers to the principles and decisions that guide government actions. Social policy, as a component of public policy, focuses on strategies and programs to guarantee and provide protections for the most vulnerable groups in a society with the goal of achieving equality and equity. Policies are influenced and determined by contextual factors such as international trends, the social fabric, political structures, legal systems, interest groups, and particular situations. This lecture explores public and social policy issues in LAC from three fronts/parts: the region as a unit of study, individual countries, and policy topics. At the beginning, the course reviews policy theory and concepts, as well as the historical, societal, cultural, economic, development, and political contexts of LAC policy. The second front looks at policy issues in individual LAC countries to understand specific conditions that make them relevant and to study policy solutions that could serve as examples on policy making and implementation. The third component explores policy areas such as health, social security, education, employment, poverty alleviation, public administration, environment, food security, at-risk groups, and
security. The instructor will offer students a pool of topics to choose from based on their fields of interest and will emphasize those established in the Sustainable Development Goals -- SDGs. In addition to the weekly homework that could be included in their portfolios, students will write final in-depth case-study assignments on a policy issue in a LAC country that could qualify as capstone papers for a LAC Certificate. The Public and Social Policy in Latin America course is mainly intended for advanced undergraduate students interested in careers in international affairs, government, policy analysis, political science, social justice organizations, or related disciplines in LAC. Some Spanish and/or Portuguese reading proficiency would be desirable.

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1571 - STUDY ABROAD: SWITZERLAND

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1572 - STUDY ABROAD: BOLIVIA, MOROCCO, VIETNAM

Minimum Credits: 6
Maximum Credits: 15
This course is for students studying abroad in Bolivia, Morocco, and Viet Nam.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 1573 - STUDY ABROAD: BULGARIA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1574 - STUDY ABROAD: TONGA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1575 - STUDY ABROAD: TAIWAN

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1576 - STUDY ABROAD: TURKEY

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1577 - STUDY ABROAD: TASMANIA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1578 - STUDY ABROAD: UGANDA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1579 - STUDY ABROAD: AUSTRALIA AND NEW ZEALAND

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Pitt Class

ARTSC 1580 - STUDY ABROAD: THAILAND

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1581 - STUDY ABROAD: UKRAINE

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1582 - STUDY ABROAD: VENEZUELA

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Latin American Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1583 - STUDY ABROAD: WALES

Minimum Credits: 3
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1584 - STUDY ABROAD: VIETNAM

Minimum Credits: 3
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1586 - STUDY ABROAD: ZIMBABWE

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: African Studies, Non-Pitt Class, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ARTSC 1591 - STUDY ABROAD: FRANCE AND SENEGAL

Minimum Credits: 6
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Pitt Class

ARTSC 1899 - INTERNSHIP ABROAD

Minimum Credits: 1
Maximum Credits: 12
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

ARTSC 1900 - ARTSC ACADEMIC INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
An academic internship offers students a unique learning opportunity to connect classroom knowledge with real-world settings as they explore careers and gain valuable experience. Students may earn from 1-3 credits for an experience that can be related to an academic field of study. The experience must be pre-professional in nature and must be approved by the Dietrich School Office of Undergraduate Research. Students must seek out and apply for their own internship. Internship can be found through Career Development and Placement Assistance, or students can contact the Office of Undergraduate Research. Students who are earning credit for ARTSC 1900 internships may not receive pay. Students must work at least 120 hours over the course of the term to be eligible for the maximum of 3 credits. In order to earn credit, the student must have a Dietrich School faculty sponsor (full-time only) who will assign related academic work. Internships are graded as S/NC.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

ARTSC 1901 - INDEPENDENT STUDY
Minimum Credits: 1
Maximum Credits: 3
Independent study entails an independent program of study, research, or creative activity with some guidance from a sponsoring faculty member.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ARTSC 1902 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ARTSC 1903 - INTERNSHIP IN LONDON

Minimum Credits: 3
Maximum Credits: 6
An internship is a special type of independent study in which the student works in a non-academic setting. The internship should be directly related to an academic discipline, and the student's learning is evaluated and graded by a faculty member. Internships under this course listing are conducted in London, England, as part of Pitt's London study abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ARTSC 1910 - INSTITUTE OF POLITICS INTERNSHIP

Minimum Credits: 2
Maximum Credits: 2
This course represents the experiential component of the politics institute's undergraduate internship. The purpose of the internship experience is to provide the student with direct exposure to the process of public decision-making. Each student will work with an individual or office directly involved in the policy-making process. Students will be selected through a competitive process.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Attributes: Undergraduate Internship, Urban Studies

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
ARTSC 1920 - REMOTE GLOBAL INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 3  
This Study Abroad course offers students global internships while they remain at home.  
Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: Satisfactory/No Credit

ARTSC 1930 - STUDY ABROAD: ESTONIA

Minimum Credits: 1  
Maximum Credits: 15  
Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: Satisfactory/No Credit  
Course Attributes: Russian & East European Studies, West European Studies

ARTSC 1950 - STUDY LAB: CRLA LEVEL 1 PEER TUTOR SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
This course is a seminar for peer tutors who work with fellow students on behalf of the Study Labs.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Satisfactory/No Credit

ARTSC 1988 - CENTER FOR LATIN AMERICAN STUDIES INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 3  
This course is for internships within the Center for Latin American Studies unit.  
Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: Satisfactory/No Credit

ARTSC 1989 - CENTER FOR LATIN AMERICAN STUDIES COMMUNITY INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 3  
The Center for Latin American Studies will use this course to offer local internships to students. Arrangements for the internship must be made through that office.  
Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: Satisfactory/No Credit

Athletic Training

ATHLTR 1811 - BASIC ATHLETIC TRAINING

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide the student with an introduction to the athletic training profession. Topics to include medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.
ATHLTR 1812 - BASIC ATHLETIC TRAINING LAB

Minimum Credits: 1
Maximum Credits: 1
An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive strappings and paddings for immediate care and competition are presented as well as basic joint evaluation procedures, assessment of vital signs, and crutch fitting.

ATHLTR 1813 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 1

Minimum Credits: 1
Maximum Credits: 1
This course is designed to help prepare students for the demands associated with experiential learning and future clinical placements in the Athletic Training Education Program (ATP). The course will have a combined in-person meetings and associated class assignments that will include field observations at approved clinical education sites through the University of Pittsburgh. This course is a prerequisite for the Practicum I-IV Courses in the ATP.

ATHLTR 1814 - INTRODUCTION TO CLINICAL ATHLETIC TRAINING 2

Minimum Credits: 1
Maximum Credits: 1
This course is designed to help prepare students for the demands associated with experiential learning and future clinical placements in the Athletic Training Education Program (ATP). The course will have a combined in-person meetings and associated class assignments that will include field observations at approved clinical education sites through the University of Pittsburgh. This course is a prerequisite for the Practicum I-IV Courses in the ATP.

ATHLTR 1815 - FOUNDATIONS IN EVALUATION AND TREATMENT

Minimum Credits: 1
Maximum Credits: 1
The objective of this course is to introduce and develop fundamental understanding of the component for evaluation and acute care. Specific objectives are to introduce the student to concepts related to patient interaction in regards to the evaluation process; the components and general principals of the evaluation process (patient observation, history, range of motion, strength, neurovascular, special tests, palpation, and diagnostics); a basic understanding and ability to perform range of motion and strength assessments and apply the appropriate grading tools. This course is a prerequisite for Therapeutic Interventions I-II courses in the Athletic Training Education Program.
ATHLTR 1816 - MEDICAL ETHICS

Minimum Credits: 2  
Maximum Credits: 2  
This course addresses legal and ethical issues encountered by athletic trainers and other healthcare professionals who are part of the Sports Medicine team. Strong emphasis is placed on legal and ethical issues that occur within the realm of direct patient care. Additionally, the course will expose students with legal and institutional positions and examine relevant case studies. Students will also practice developing concrete logical arguments in support of a chosen ethical stance.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: SUBPLAN: Pre-Athletic Training (BSPATH-SP)

ATHLTR 1821 - INJURY EVALUATION AND TREATMENT 1

Minimum Credits: 3  
Maximum Credits: 3  
The course includes anatomy, recognition, and commonly accepted techniques and procedures for clinical evaluation of common athletic injuries to the foot, ankle, leg, thigh, hip, pelvis and lumbar spine.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Athletic Training (BS. BS-H, BPH)

ATHLTR 1823 - ADMINISTRATIVE ASPECTS OF ATHLETIC TRAINING

Minimum Credits: 2  
Maximum Credits: 2  
This course presents current administrative issues in athletic training including training room facility and design, record keeping procedures, personnel management and recruitment, medico-legal considerations and budgetary principles.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1824 - ATHLETIC TRAINING PRACTICUM 1

Minimum Credits: 3  
Maximum Credits: 3  
Designed to supplement first clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on those proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: Letter Grade  
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH)

ATHLTR 1831 - THERAPEUTIC MODALITIES AND LAB

Minimum Credits: 4  
Maximum Credits: 4  
The course presents the theoretical basis for use of superficial heat and cold, ultrasound, electrical muscle stimulation, tens, and other current modalities. Laboratory experiences are included in the use of these modalities.  
Academic Career: Undergraduate  
Course Component: Lecture
ATHLTR 1833 - STRENGTH AND CONDITIONING

Minimum Credits: 2
Maximum Credits: 2
Instruction is provided describing the physiological basis for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and technique of operating contemporary isotonic, isokinetic and isometric strength training equipment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH) with a subplan of BSPATH-SP.

ATHLTR 1834 - SPECIAL TOPICS IN ATHLETIC TRAINING

Minimum Credits: 2
Maximum Credits: 2
The course includes common orthopedic problems encountered by the athletic trainer and orthopedic surgeon. Students are exposed to commonly used techniques of primary and reconstructive surgery through lecture, operating room, clinic, and orthopedic rounds experiences.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH) with a subplan of BSPATH-SP.

ATHLTR 1835 - ATHLETIC TRAINING PRACTICUM 2

Minimum Credits: 3
Maximum Credits: 3
Designed to supplement second clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on those proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH) with a subplan of BSPATH-SP.

ATHLTR 1841 - ATHLETIC TRAINING PRACTICUM 3

Minimum Credits: 3
Maximum Credits: 3
Designed to supplement third clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on those proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PLAN: Athletic Training (BS, BS-H, BPH) with a subplan of BSPATH-SP.

ATHLTR 1842 - ATHLETIC TRAINING PRACTICUM 4

Minimum Credits: 3
Maximum Credits: 3
Designed to supplement fourth clinical experience presented in seminar fashion to address clinical proficiencies published in the 3rd edition of the NATA athletic training educational competencies introduced in the second semester academic courses. Presented by faculty of the AT program then evaluated in clinical setting in live situations when possible or under simulated conditions when narrated. Specific emphasis placed on these proficiencies that can be grouped into modules and which do not receive broad coverage in an academic course.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Athletic Training (BS, BS-H, BPH)  
**Course Attributes:** Capstone Course

**ATHLTR 1843 - ADVANCED ORTHOPEDIC ASSESSMENT**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This course will consist of advanced study in the assessment of orthopedic and other sports related injuries to the extremities and spine to include pathophysiology of skeletal and soft tissue insult, proprioception and neuromuscular control and an evidence-based approach to musculoskeletal evaluation, treatment and rehabilitation of sport-related injuries. The content of this course will be presented by practicing clinicians from various disciplines who are also alumni of the Athletic Training Education Program.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Athletic Training(BS, BPH, or BS-H)

**ATHLTR 1866 - PSYCHOLOGY OF SPORT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Athletic Training (BS, BS-H, BPH)

**ATHLTR 1885 - INTRODUCTION TO EVIDENCE BASED REHABILITATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Provides basic skills in reading, reviewing, and critiquing the research literature in the rehab sciences. These skills will be applied to the relevant literature in diagnosis, prognosis and intervention strategies within the spectrum of rehab science. Students learn to generate relevant research questions, utilize an evidenced based medicine approach, appraisal and synthesis of current articles within the fore mentioned areas. Will culminate in an individual review project aimed at the development and resolution of one research question, using the best, current available literature  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Athletic Training (BS)

**ATHLTR 1899 - INDEPENDENT STUDY FOR ATHLETIC TRAINING STUDENTS**

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
Provides advanced athletic training students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial. An individual contract will be required for each student that outlines objectives and means of achieving stated objectives in order to earn a passing grade. ATHLTR 1899 Independent study can only be taken on a Pass/Fail basis  
**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** H/S/U Basis  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.
Bioengineering

BIOENG 0050 - WORKSHOP IN BIOENGINEERING DESIGN

Minimum Credits: 1  
Maximum Credits: 1  
Students are introduced to Bioengineering design use of the SolidWorks software suite. SolidWorks is one of several computer aided engineering software packages (AutoCAD and ProEngineer are other examples) that is widely used in industry and academia. Skills learned (1) will help with Bioengineering design projects, and (2) are easily translated to other computer engineering packages such as AutoCAD or ProEngineer. The workshop consists of weekly SolidWorks-based practice assignments (tutorials) that must be completed to receive a grade in the course.

Academic Career: Undergraduate  
Course Component: Workshop  
Grade Component: Letter Grade  
Course Requirements: PLAN: Bioengineering

BIOENG 0051 - WORKSHOP IN MEDICAL DEVICES- THE BASICS

Minimum Credits: 1  
Maximum Credits: 1  
"Reverse engineering" of medical devices is used to introduce students to basic terminology in the medical device field, the coupling of design with function, and the processes involved in moving from device conception to product. The course (1) emphasizes the significance of curiosity and information seeking in device development, (2) will help with Bioengineering design projects, and (3) will expand knowledge of devices in general, along with needs assessment. Multiple medical specialties will be covered, along with basic function of devices (diagnostics, treatment, monitoring, etc). The workshop will use "hands on" learning experiences, focusing on devices that can be taken apart. After discussion of device purpose and function, students will be challenged to identify potential design improvements. Students are expected to be active participants in the seminar. Course Objectives: Upon completing the course, the student should be conversant with medical device terminology, be able to state the basic elements involved in needs assessment, and be able to identify hurdles in medical device development.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Satisfactory/No Credit  
Course Requirements: PLAN: Bioengineering

BIOENG 0052 - WORKSHOP IN OPENSIM

Minimum Credits: 1  
Maximum Credits: 1  
Computational models and simulations are tremendously useful tools for understanding human movement control. It is not always straightforward to identify cause-and-effect relationships through experiments alone and computational modeling and simulation techniques can complement experimental approaches - e.g., models can provide estimates of important variables such as muscle forces that are difficult to measure experimentally. OpenSim is an open-source software package that enables users to build, exchange, and analyze computer models of the musculoskeletal system and dynamic simulations of movement (Delp et al., 2007). The purpose of this course is to introduce students to OpenSim by demonstrating the utility of graphics-based modeling and simulation. Specifically, students will learn how to use OpenSim tools, through both the graphical user interface (GUI) and Application Programming Interface (API) that uses Matlab scripting, to analyze and simulate models and motions. Course Objectives: Upon completing the course, the student should be able to use OpenSim to analyze and develop forward dynamic simulations of movement. The course consists of weekly practice assignments that must be completed to receive a satisfactory (S) grade.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: H/S/U Basis  
Course Requirements: PLAN: Bioengineering

BIOENG 0053 - WORKSHOP IN STATISTICAL DESIGN

Minimum Credits: 1  
Maximum Credits: 1  
Engineers use experiments for a variety of reasons, some of which are: determine whether one treatment is better than an alternative; determine parameters in a descriptive model; and determine accurate physical properties of a material. Simply put, experiments take time and can be expensive.
Statistical design of experiments (DOE) is a tool to maximize the amount of relevant information gained while minimizing the amount of experimentation required to obtain that information. After discussion of general experimental design principles, Design-Ease® software is used to introduce students to DOE through a series of workshops that highlight the importance of DOE in engineering practice. The course consists of weekly practice assignments that must be completed to receive a satisfactory (S) grade. Course Objectives: Upon completing the course, the student should be able to design an experiment using statistical design of experiment principles to maximize knowledge gained from the experiment.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Satisfactory/No Credit
Course Requirements: PREQ: ENGR 0020 or BIOENG 1000; PLAN: Bioengineering

BIOENG 0054 - WORKSHOP IN DESIGN FOR MANUFACTURABILITY

Minimum Credits: 1
Maximum Credits: 1
Design for Manufacturability (DFM) provides a systematic methodology that can be used to analyze product design for improvements in assembly and manufacturing. Students will use DFM to redesign current products for changes in manufacture that lead to reduction in production cost and improved operability/customer satisfaction. Students will employ modern software tools that accurately model parts for specific manufacturing operations, model part costs, simplify products, find specific avenues to reduce manufacturing and assembly costs, benchmark products, and quantify improvements. Course Objectives: Students will gain hands-on experience incorporating the DFM concepts in a project. Upon completing the course, the students should be able to describe the utility of DFM in product development and early manufacturing design, be able to quantitatively evaluate the impact of design choices on manufacturing cost, and be able to use modern quality control concepts and approaches.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: Satisfactory/No Credit
Course Requirements: PREQ: (BIOENG 0050 and BIOENG 1024) or MEMS 0024; PLAN: Bioengineering

BIOENG 1000 - STATISTICS FOR BIOENGINEERING

Minimum Credits: 4
Maximum Credits: 4
Bioengineering statistics will present the basic statistical methods that are relevant to engineering and clinical applications. Specifically, students will learn to consider the assumptions inherent to statistical analyses; calculate statistical parameters; automate statistical methods using software; interpret the meaning of statistical parameters; and design experiments conducive to proper statistics. Biological and medical examples will be used to reinforce concepts of the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0230 or 0235, PLAN: Bioengineering

BIOENG 1002 - INTRAMURAL INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
Students employ practical experience, gained from mentored research in an academic environment, which includes project planning, design of experiments, and analysis of results to develop professional quality oral presentation skills. Emphasis is placed on critical analysis of research projects, development of technical abstract writing skills, and development of professional quality visual aids that accompany oral presentations. The course culminates with an oral presentation at a technical symposium. Upon completing the course, the student should be able to prepare a professional quality abstract documenting background, methodology, and results from a research project and make a professional quality oral presentation describing the research.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0020 or BIOENG 1000; PLAN: Bioengineering

BIOENG 1005 - RADIOFREQUENCY MEDICAL DEVICES
Minimum Credits: 3
Maximum Credits: 3

The course will cover topics related to the applications of electromagnetics and RF in medicine and in other devices that can cause thermal safety hazards. Topics such as Maxwell Equations, Wave Equations, Transmission Lines, Electromagnetic Theorems, Introduction to Antennas, and Introduction to Computational Electromagnetics will be presented. The class will include analyses of several RF devices used in medical applications and/or have electromagnetic safety implications such as magnetic resonance imaging (MRI), biological sensors (brain machine interface), RF ablation, and cell phones. Upon completing the course, the student should be able to describe how to apply fundamental electromagnetic principles to set up and solve problems in RF devices used in medical applications.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1310; CREQ: BIOENG 1320; PLAN: Bioengineering

BIOENG 1024 - MEDICAL PRODUCT DESIGN

Minimum Credits: 3
Maximum Credits: 3

This hands-on course presents a spectrum of techniques used in medical product design and prototyping. Techniques that are covered include sketching, foam core-based prototyping, metrology, laser cutting, CNC routing, sewing, molding, vacuum forming, and basic manual machining. The student will learn these techniques in a design studio setting and subsequently apply them to analyze, document, and ultimately fabricate a model of medical product such as a blood pressure monitor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0011 or ENGR 0015 or ENGR 0711 or ET 0011; PLAN: Bioengineering

BIOENG 1050 - ARTIFICIAL ORGANS

Minimum Credits: 3
Maximum Credits: 3

Artificial organs is the first of a three course sequence that explores design, development, and clinical use of artificial organ technology. Each course in the series is stand-alone and, as such, is not a prerequisite for any other course in the series. Students may take one, two, or all three courses. Artificial organs is directed toward artificial heart and vascular prostheses. The basic physiology of each system (heart and vascular) is reviewed with emphasis on identifying the bioengineering design requirements for appropriate organ replacement systems. Commercially available systems are analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanics and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above-mentioned considerations. Upon completing the course, the student should be able to describe the fundamental engineering principles related to heart and vascular physiology and apply the fundamental principles to design improvements and/or new designs for artificial heart and vascular prostheses.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1220; PLAN: Bioengineering

BIOENG 1051 - ARTIFICIAL ORGANS 2

Minimum Credits: 3
Maximum Credits: 3

Artificial organs 2 is the second of a three course sequence that explores design, development, and clinical use of artificial organ technology. Each course in the series is stand-alone and, as such, is not a prerequisite for any other course in the series. Students may take one, two, or all three courses. Artificial organs 2 is focused on artificial blood and artificial lung. The basic physiology of each system (blood and the lungs) is reviewed with emphasis on identifying the bioengineering design requirements for appropriate organ replacement systems. Commercially available systems are analyzed from the point of view (where applicable) of mass transfer efficiency; biomechanics and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above-mentioned considerations. Upon completing the course, the student should be able to describe the fundamental engineering principles related to blood and lung physiology and apply the fundamental principles to design improvements and/or new designs for artificial blood substitutes and artificial lung devices.

Academic Career: Undergraduate
Course Component: Lecture
BIOENG 1052 - ARTIFICIAL ORGANS 3

Minimum Credits: 3
Maximum Credits: 3

Artificial organs 3 is the third of a three course sequence that explores design, development, and clinical use of artificial organ technology. Each course in the series is stand-alone and, as such, is not a prerequisite for any other course in the series. Students may take one, two, or all three courses. Artificial organs 3 is focused upon artificial kidney and artificial liver. The basic physiology of each system (kidney and liver) is reviewed with emphasis on identifying the bioengineering design requirements for appropriate organ replacement systems. Commercially available systems are analyzed from the point of view (where applicable) of mass transfer efficiency, biomechanic and hemodynamic similarity to the host; and size and efficiency of the device. Students will be required to design an artificial organ consistent with the above-mentioned considerations. Upon completing the course, the student should be able to describe the fundamental engineering principles related to kidney and liver physiology and apply the fundamental principles to design improvements and/or new designs for artificial kidney and artificial liver.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1220; PLAN: Bioengineering

BIOENG 1070 - INTRODUCTORY CELL BIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3

Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. Upon completing the two course sequence, BIOENG 1070 and BIOENG 1071, students should be able to (1) demonstrate understanding of the principles of cell structure and function, (2) describe the experimental tools used to understand cellular function such as molecular genetic techniques, biochemical analysis, and microscopy, and (3) use systems approaches to understand how cellular processes are integrated.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: (PREQ: ENGR 0012 and CHEM 0120 and PHYS 0175) (CREQ: ENGR 0016); PLAN: Bioengineering
Course Attributes: Hourly Final

BIOENG 1071 - INTRODUCTION TO CELL BIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3

Continuation of BIOENG 1071. Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. Upon completing the two course sequence, BIOENG 1070 and BIOENG 1071, students should be able to (1) demonstrate understanding of the principles of cell structure and function, (2) describe the experimental tools used to understand cellular function such as molecular genetic techniques, biochemical analysis, and microscopy, and (3) use systems approaches to understand how cellular processes are integrated.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1070; PROG: Swanson School of Engineering

BIOENG 1072 - HONORS INTRODUCTORY CELL BIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3

Principles of cell biology in higher organisms: structure, function, biosynthesis, and macromolecular organization with a focus on macromolecular organization and function from a quantitative systems perspective. This course is accompanied by a weekly one hour seminar in which original research articles pertinent to cell biology are presented and discussed.
BIOENG 1075 - INTRODUCTION TO CELL AND MOLECULAR BIOLOGY LABORATORY TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
An undergraduate laboratory course designed to complement theoretical knowledge learned in BIOENG 1070 & 1071 that covers practical aspects of fundamental cell biology, cell culture, visualization of cellular components, protein biochemistry (isolation, purification, and analysis). Upon completing the course, the student should have acquired 'hands-on' skills in basic techniques in cell biology, biochemistry and molecular biology and be able to apply them in practice. Biology techniques, and functional measurements in cells.

BIOENG 1085 - INTRO TO BIOENGINEERING: SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Seminar is designed to acquaint students with aspects of bioengineering that are not normally encountered in the classroom or extracurricular activity settings. As such, seminar is a vehicle to provide important information and communicate materials that students need to know to maximize their educational experience and develop post-graduation plans. Emphasis is placed on career planning and development and options available in the undergraduate program that will help realize post-graduation goals. Student awareness of opportunities that are available and knowledge about how to utilize the opportunities for their benefit.

BIOENG 1086 - BIOENGINEERING SEM FOR MINORS

Minimum Credits: 0
Maximum Credits: 0
One hour lecture format by members of the bioengineering community of both the University of Pittsburgh and other institutions.

BIOENG 1095 - SPECIAL PROJECTS

Minimum Credits: 1
Maximum Credits: 6
Special Projects provides an opportunity for students to develop an individual research project under the guidance of a faculty member/mentor. Projects can involve laboratory research, engineering design, or instructional development. While the project must be related to bioengineering, the mentor can be a faculty member in any department or hospital affiliated with the University of Pittsburgh. A written report documenting the project and project outcomes is required. Typical report format (abstract, introduction, methods, results, discussion, and references) is expected. The length of the report should reflect the number of credits received. The report must be submitted to both the Undergraduate Coordinator, Department of Bioengineering, and the mentor. The mentor will evaluate the quality of the project and report and submit a letter grade recommendation to the Undergraduate Coordinator.
BIOENG 1096 - UNDERGRADUATE TEACHING EXPERIENCE

Minimum Credits: 1
Maximum Credits: 2
Undergraduate Teaching Experience provides students an opportunity to volunteer as an Undergraduate Teaching Assistant (TA) or Grader. Undergraduates can participate in helping develop and deliver lecture content, managing recitations or laboratories, developing and/or grading quizzes, evaluating homeworks, and general review of course materials.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit
Course Requirements: PROG: Swanson School of Engineering

BIOENG 1150 - BIOENG METHODS AND APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Bioengineering methods and applications uses laboratory experiences to illustrate principles taught in several bioengineering core classes. In addition to being exposed to particular laboratory skills for each of the experimental modules in the course, students are expected to practice previously developed skills in technical writing, creating tables and graphs, data analysis, and statistics to create professional quality laboratory reports that document each module. Upon completing the course, the student should be able to state and describe the basic components of a laboratory report and create well-written archival documents that reflect professional quality work.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: CREQ:(BIOENG 1071 or BIOENG 1072) and BIOENG 1220 and BIOENG 1310 and BIOENG 1630; Plan: Bioengineering

BIOENG 1160 - BIOENGINEERING DESIGN 1

Minimum Credits: 3
Maximum Credits: 3
The two course sequence, bioengineering design 1 & 2, is a mentored opportunity for the student to synthesize and extend skills and knowledge acquired during the undergraduate education experience in design (or redesign) of a biomedical product or equivalent. Students are exposed to key facets of the medical product design process and the unique regulatory requirements for biomedical products. Student teams select a design project, conduct a market/reimbursement analysis, apply design process methodology, maintain a design history file, and create a prototype product. Students will be able to apply appropriate product design-related procedures and tools, maintain design history files, conduct preliminary market/reimbursement studies, and address regulatory affairs in developing a prototype biomedical product or equivalent.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: LEVEL: Senior; PLAN: Bioengineering
Course Attributes: Capstone Course

BIOENG 1161 - BIOENGINEERING DESIGN 2

Minimum Credits: 3
Maximum Credits: 3
The two course sequence, bioengineering design 1 & 2, is a mentored opportunity for the student to synthesize and extend skills and knowledge acquired during the undergraduate education experience in design (or redesign) of a biomedical product or equivalent. Students are exposed to key facets of the medical product design process and the unique regulatory requirements for biomedical products. Student teams select a design project, conduct a market/reimbursement analysis, apply design process methodology, maintain a design history file, and create a prototype product. Students will be able to apply appropriate product design-related procedures and tools, maintain design history files, conduct preliminary market/reimbursement studies, and address regulatory affairs in developing a prototype biomedical product or equivalent.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1160 ; PLAN: Bioengineering (BSE or BEH)
Course Attributes: Capstone Course

BIOENG 1210 - BIOENGINEERING THERMODYNAMICS

Minimum Credits: 3
Maximum Credits: 3
Bio thermodynamics uses an interactive framework in the joint (student and instructor) exploration of thermodynamics as it applies on the biological cellular and systems level. At this most fundamental level, thermodynamics studies the flow of energy, interconversion of energy, maintenance of cellular function and information, and the processes necessary to sustain life itself. Upon completing the course, the student should be able to describe how the three laws of thermodynamics and entropy impact biological systems, and be able to apply fundamental thermodynamics principles to set up and solve problems in physiological systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0290 and (PHYS 0175 or PHYS 0476) and (CHEM 0960 or CHEM 0120 or CHEM 0720); PLAN: Bioengineering

BIOENG 1211 - HONORS BIOENGINEERING THERMODYNAMICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0290 and (PHYS 0175 or PHYS 0476) and (CHEM 0960 or CHEM 0120 or CHEM 0720); PLAN: Bioengineering

BIOENG 1218 - EMERGING BIOMEDICAL TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
Emerging Biomedical Technologies is offered by Rehabilitation Science and cross-listed with Bioengineering. The purpose of this course is to provide the students with an understanding of stem cell biology, tissue engineering, and related applications involved in rehabilitation sciences and regenerative medicine. The course material is designed to aid students considering a future as researchers in biomedical sciences laboratories or biotechnology research and development. It will provide digests of the latest research technologies and clinical applications in these fields. Students will be encouraged to synthesize concepts aimed to test solutions and therapies to improve human health by use of modern biomedical technologies. The lecture and discussion format gives students a broad background and the opportunity to apply critical thinking skills to recent published findings. Students who satisfactorily complete the course should be able to: Describe the emergent life science technologies covered in the course, Describe the biology of stem cells, their unique characteristics, and uses as therapies for disease and injury, Describe different approaches used in gene and cell therapeutic strategies, Describe the complexity of ethical and legal issues involved in this line of biomedical research, Describe the process of moving research into the translational phase with sufficient knowledge of the processes of FDA approval of therapies, Demonstrate an ability to effectively search for, analyze and critique current scientific publications on stem cell biology, cell and gene therapy and tissue engineering, Synthesize concepts aimed to test solutions and therapies to improve human health by use of modern biotechnologies discussed in class

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Bioengineering; PREQ: BIOENG 1210

BIOENG 1220 - BIOTRANSPORT PHENOMENA

Minimum Credits: 3
Maximum Credits: 3
Transport of nutrients and fluid flow is critical for the function of organisms. This course covers transport of momentum (fluid flow) and mass in
The fundamental principles of momentum and mass transfer are developed in the microscopic (differential) and macroscopic (integral) form. These principles are applied to solve transport problems in the biological, biomedical and medical device context.

**Course Requirements:**
- **PREQ:** MATH 0240 and (BIOENG 1210 or BIOENG 1211); **PLAN:** Bioengineering

### BIOENG 1241 - SOCIETAL, POLITICAL AND ETHICAL ISSUES IN BIOENGINEERING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Engineering, as a profession, has ethical obligations to society that go beyond the simple application of technology as learned in science and technology courses. Bioethics seeks to supplement technological aspects of bioengineering by engaging students in an analysis of the effects of bioengineering developments on society, focusing on safety of the public as a primary ethical concern. Students are educated on a variety of ethical tools that enable them to analyze fictional, yet realistic, cases. Students are evaluated individually, as well as in groups, with a particular focus on the ethical issues related to their senior design projects (BIOENG 1160 & 1161). Upon completion of the course, students will be able to recognize, articulate, and resolve ethical issues within the arena of bioengineering.

**Course Requirements:**
- **CREQ:** BIOENG 1160; **PLAN:** Bioengineering; **LEVEL:** Juniors

### BIOENG 1255 - DYNAMIC SYSTEMS: PHYSIOLOGICAL PERSPECTIVE

**Minimum Credits:** 4  
**Maximum Credits:** 4  
A foundation of basic systems concepts is built through combining modeling of dynamic systems with physiological examples. Mathematical models of physiological systems are developed using a combination of systems understanding (analogous thinking, engineering synthesis and analysis, and integrative system approaches in solving problems) and bioengineering design (recognizing the potential applications of both engineering principles to biology and biological principles to engineering). These models are then used to address biological/clinical questions. Upon completing the course, the student should be able to: demonstrate skill and competence in methods of dynamic systems modeling through (a) building dynamic models of bioelectrical, biomechanical, biochemical, and physiological systems, (b) solving systems of equations representing dynamic models including analytical, numerical, and graphical software methods, (c) validating models including descriptive, predictive, and explanatory validation, and (d) applying models to scientific and engineering applications including analysis and synthesis relative to identification and simulation. Describe physiological processes in dynamic system terms.

### BIOENG 1310 - LINEAR SYSTEMS AND ELECTRONICS 1

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Bioinstrumentation covers electronic circuit theory and the practical aspects of building electronic prototypes. The mathematics of complex exponentials and complex impedance are also covered. A series of projects are built by each student individually, using a system of student-owned electronics components and tools called the pittkit. The kit includes a special apparatus, the breadboard laboratory interface processor (blip) which each student constructs, and which acts as a logging voltmeter, a frequency meter, a logic analyzer, a waveform generator, and a pulse duration meter. The blip interfaces to any computer via a USB port, without requiring any special software to be installed on the computer. After completing the course, the student should be able to design and construct prototypes of useful, simple circuits, such as preamplifiers and signal conditioners for sensors, as well as use off-the-shelf modules to construct laboratory instrumentation. They should be able to describe applications to other linear systems such as those found in physiological systems with greater clarity from having worked with circuits.
Grade Component: Letter Grade  
Course Requirements: PREQ: MATH 0240 and (PHYS 0175 or PHYS 0476); PLAN: Bioengineering

**BIOENG 1320 - BIOLOGICAL SIGNALS AND SYSTEMS**

Minimum Credits: 3  
Maximum Credits: 3  
The theory and application of linear time-invariant (LTI) systems is explored, with emphasis on an appreciation of the description and analysis of biomedical signals and systems via LTI methods. After completing the course, the student should be able to state the properties of LTI systems; be able to test whether a system is LTI; know how to obtain, and interpret, the frequency response, impulse response, step response, and transfer function of a system. The student should also be able to demonstrate mastery of the mathematical skills of convolution and integral transform techniques.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BIOENG 1310 and MATH 0240 and MATH 0290; PLAN: Bioengineering  
Course Attributes: Hourly Final

**BIOENG 1330 - BIOMEDICAL IMAGING**

Minimum Credits: 3  
Maximum Credits: 3  
Biomedical imaging introduces the major imaging modalities (x-ray, cat-scan, MRI, ultrasound) used in clinical medicine and biomedical research, as well as the fundamentals of images, from a signals and systems standpoint. After completing the course, the student should be able to use imaging modalities to determine anatomical or physiological function and apply physics and signal processing in medical imaging for particular research applications.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BIOENG 1320; PLAN: Bioengineering

**BIOENG 1340 - INTRODUCTION TO MEDICAL IMAGING AND IMAGE ANALYSIS**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to Medical Imaging and Image Analysis presents the physics of image formation as well as methods for tomographic image reconstruction for major medical imaging modalities, including X-ray Computed Tomography (CT) and Magnetic Resonance Imaging (MRI). Also introduced are fundamentals of digital image processing, with particular emphasis on medical applications, including basic techniques to enhance image quality, image de-noising, methods for extracting, classifying, and tracking features of and objects in images, etc. Students will learn how to implement these techniques in MATLAB (The MathWorks Inc., Natick, MA) to solve practical image processing problems. MATLAB exercises will demonstrate to students how filtering operations applied in the image domain or the Fourier domain affect medical images. In addition to these fundamentals, more advanced algorithmic approaches for image segmentation and image as well as point-cloud registration techniques will also be reviewed.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BIOENG 1320; PLAN: Bioengineering

**BIOENG 1351 - COMPUTER APPLICATIONS IN BIOENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
The objective of this course is to develop data acquisition interfaces that include software and hardware to interact with and sample real world phenomena with bioengineering applications. Students will be expected to have basic MATLAB programming experience before joining this course; basic circuits knowledge is also advantageous. Students will build circuits, and will learn to work with several toolboxes and advanced features in Matlab to build graphical user interfaces (GUIs), communicate with data acquisition systems (DAQs) for measuring signals with sensors and/or...
controlling actuators to interact with the physical world, and perform signal processing and analysis functions to extract meaningful information from electrical and/or biological measurements. Practical applications may include measuring and analyzing bioelectric phenomena related to heart rate or tissue impedance, processing and analyzing neural signals collected from implanted electrodes in the brain, etc. Students will be able to create solutions for real world engineering problems after completing this course successfully.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CS 0441 or (ENGR 0012 or ENGR 0712 or ENGR 0716); PLAN: Bioengineering

BIOENG 1355 - MEDICAL PRODUCT REGULATION AND REIMBURSEMENT

Minimum Credits: 3
Maximum Credits: 3
This course has been created as an introduction to the medical product development requirements of the Food and Drug Agency (FDA). Also included is an overview of medical product reimbursement of the Centers for Medicare and Medicaid Services (CMS). The educational objectives for this course include: 1. How the history of the FDA affects the Agency's perspective and regulatory activities; 2. An introduction to quality systems with a focus on FDA's Quality System Regulation (QSR); 3. An overview of the key elements of the Design Controls subsection of the FDA QSR; 4. How the regulatory requirements in Europe contrast with those of the FDA; 5. How FDA regulatory requirements differ from reimbursement policies of the CMS. A series of case studies will be used to reinforce key lecture topics and prepare you to utilize this knowledge in the future whether that be clinical medicine, research, or industry. A secondary goal of this course is to prepare you to implement some of these practices during Senior Design.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Bioengineering - Sophomore or Junior PLAN: non-Bioengineering - Senior

BIOENG 1370 - COMPUTATIONAL SIMULATION IN MEDICAL DEVICE DESIGN

Minimum Credits: 3
Maximum Credits: 3
Computational simulation is increasingly utilized as a method to assess the performance of medical devices. The course provides students with a hands on learning experience on how to use computational simulation in the modeling and design of medical devices. The course details the important steps in computational simulations from preprocessing to solution to post-processing and data presentation. Commercially available software programs are introduced and used to simulate a variety of physical phenomena (solid, fluid, transport) pertinent to medical device design. Upon completing the course, the student should be able to simulate the solid, fluid, and transport phenomena that are useful in medical device design. Particular attention will be placed on avoiding common mistakes in the preprocessing and interpretation of computational results. Topics covered: geometry creation; discretization; appropriate assignment of material properties; solver management; error mitigation and debugging; postprocessing and data presentation; data interpretation; introduction to design optimization.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1630; PLAN: Bioengineering

BIOENG 1383 - BIOMEDICAL OPTICAL MICROSCOPY

Minimum Credits: 3
Maximum Credits: 3
Optical imaging microscopy techniques have become essential tools to investigate biological processes and diagnose diseases at unprecedented cellular and molecular levels. Biomedical researchers have an increasingly important need both to understand the advantages and limitations of the various types of optical microscopy and to apply the appropriate microscopy technique to solve specific biomedical problems. Biomedical optical microscopy is a comprehensive exploration of the basic principles of optical microscopy and imaging techniques commonly used in biomedical research. Upon completion of the course, the student should be conversant in the basic principles of common optical imaging microscopy techniques, able to apply an optical microscopy technique to address biological questions, and able to perform basic quantitative image analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1075 or (PHYS 0102 or PHYS 0111 or PHYS 0175 or PHYS 0476 or PHYS 1306 or PHYS 1361) PLAN: Bioengineering
BIOENG 1533 - CONTROLLED DRUG DELIVERY

Minimum Credits: 3
Maximum Credits: 3
Controlled drug delivery explores the physics, chemistry, and material science rationale behind the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, the course focuses on topics at the interface between chemical engineering and medicine, such as polymer chemistry, biomaterials, pharmacokinetics, and transport phenomena. Pertinent pharmaceutical examples that are discussed include: transdermal, aerosol, oral, gene, and targeted cellular delivery, with emphasis placed on fabrication considerations and the relevant physiological environment. Upon completing the course, the student should be able to state the constraints on material properties posed by the physiological environment; use the fundamentals of polymers, diffusion, degradation, modeling and pharmacokinetics to solve problems specific to controlled drug delivery; and demonstrate ability to search and summarize primary research literature, write a review article, and deliver a cohesive oral presentation.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1220 and (BIOSC 1000 or BIOSC 1810 or CHEM 1810); PLAN: Bioengineering

BIOENG 1580 - BIOMEDICAL APPLICATION FOR SIGNAL PROCESSING

Minimum Credits: 4
Maximum Credits: 4
The fundamentals of digital signal processing of time series are developed, via applied exercises and projects with a focus on medical and biological signal analysis and interpretation. Depending on data availability, biomedical applications are selected from a variety of areas, such as biomechanics (gait and balance), neural and electrophysiological signals, and animal vocalizations, among others. Upon completion of this course, students should be able to properly acquire data in digital form; perform conventional methods of spectral analysis, for both stationary and non-stationary (or time-varying) signals; implement and apply linear time-invariant discrete-time filters; and demonstrate basic skills in digital signal processing.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1320 and (ENGR 0012 or ENGR 0712 or ENGR 0716); PLAN: Bioengineering

BIOENG 1586 - QUANTITATIVE SYSTEMS NEUROSCIENCE

Minimum Credits: 3
Maximum Credits: 3
Systems neuroscience is the field that attempts to relate the activity of networks of neurons to perception, cognition, and behavior. This HONORS course examines major scientific results in systems neuroscience, and the computational principles of brain function they illustrate. Neuroscience topics include sensory transduction, visual processing, motor control, and neural prosthetics. Students learn to apply techniques from signals and systems, statistics, machine learning, information theory, and control theory to problems in neuroscience. Course format consists of interactive lectures, student-led discussions of important publications in neuroscience, guided analysis of neuroscience data, and designing an original set of experiments. Course Objectives: Upon completing the course, students will be able to: Describe organizing principles of brain function, from biological and theoretical perspectives; Apply statistics, signal processing, and machine learning techniques to the analysis of biological data sets; Design novel experiments, analyses, and data interpretation; Demonstrate critical evaluation of scientific and technical literature.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (BIOENG 1071 or BIOENG 1072) and BIOENG 1320; PLAN: Bioengineering (BSE or BEH)

BIOENG 1615 - INTRODUCTION TO NEURAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This is an introductory neural engineering course for upper level undergraduate and graduate students interested in implantable cortical neural interface technology and research. The course covers two main topics; 1) basic neuroscience principles that govern neural interface engineering (ion channel biophysics, overview of different neuronal and non-neuronal cell types and how they interact with implantable microelectrodes, the basics of cortical organization, simple signal propagation through these neuronal networks, and how these signals can be extracted with implantable microelectrodes). 2) Overview of biological and engineering technologies and methodologies used in neural engineering research as well as their
capabilities and limitations. Students will be provided raw neural recording and histology datasets, and will learn to assemble MATLAB based tools for basic signal processing and analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Bioengineering

BIOENG 1620 - INTRODUCTION TO TISSUE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Tissue engineering (TE) is defined as the development and manipulation of laboratory-grown molecules, cells, tissues, or organs to replace and/or support the function of injured body parts. TE is highly interdisciplinary and therefore crosses numerous engineering and medical specialties. The course introduces students to the fundamentals of TE and the biomaterials, cells and growth factors used in TE through consideration of cell and tissue biology, biomaterials, drug delivery, engineering methods and design, and clinical implementation. Specific applications include skin, nerve, bone, and soft tissue regeneration. Throughout the course ties are made between the topic of study and clinically relevant situations. Upon completing this course, students should be able to: describe basic principles behind human cell and tissue biology and cell; describe the general types of biomaterials used in tissue engineering; describe techniques utilized to design, fabricate, and functionally assess tissue engineering systems; and, apply the combined knowledge of tissue organization and tissue engineering strategies to design a unique, reasonable tissue engineering solution.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1810; PLAN: Bioengineering

BIOENG 1630 - BIOMECHANICS 1-MECHANICAL PRINCIPLES BIOLOGICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Biomechanics 1 is a first course in undergraduate biomechanics that applies and builds on the concepts of statics, dynamics, and mechanics of materials as applied to human activities and tissues. After briefly reviewing equilibrium concepts and free body diagrams as applied to the human body, principles from kinetics are used to develop dynamic descriptions of human motion. Finally, engineering concepts employed in description of the fundamental strength of materials are applied to biological tissues. After completion of the course, students should be able to describe the general characteristics and material properties for tissue and organs studied in the course, analyze the forces at a skeletal joint for various static and dynamic human activities, state and use the concepts of balance and stability in describing human motion, and compute the stresses and strains in biological tissues, given loading conditions and material properties.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0135; PLAN: Bioengineering

BIOENG 1631 - BIOMECHANICS 2: INTRODUCTION TO BIODYNAMICS AND BIOSOLID MECHANICS

Minimum Credits: 3
Maximum Credits: 3
Modern biomechanics is an increasingly diverse field that encompasses the mechanics of the whole body, all the way down to the cellular and molecular levels. Students are introduced to fundamental concepts and techniques of biodynamics and bio solid mechanics which provide the basis for biomechanics 3 and 4. General approaches used in mechanics are introduced throughout the semester and applied in several laboratories. Upon completing the course, the student should be able to demonstrate recall of functional anatomy of musculoskeletal system perform inverse dynamic analyses describe the principles of basic muscle biomechanics perform analyses of deformable bodies (including viscoelastic materials) describe general experimental techniques for rigid and deformable body analyses.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BIOENG 1630; PROG: Swanson School of Engineering

BIOENG 1632 - BIOMECHANICS 3: BIODYNAMICS OF MOVEMENT
Biodynamics, the area of focus in biomechanics 3, is the study of large-scale movements in biologic systems. As such, the course focuses on the analysis of human movement, which is used in clinical and research settings to understand how various pathologies impact movement and how interventions can be implemented to aid those affected by movement disorders. We cover the fundamentals of biomechanics of human movement using mechanical modeling techniques. The major focus is kinematic analyses in three dimensions using matrix techniques. Some fundamentals of kinetics are covered as well, 2d and 3d inverse dynamics. Upon completing the course, the student should be able to describe basic methods of kinematic/kinetic analysis used in multi-link systems and be able to implement the methods in the analysis of human movement. Students should also be able to apply the methods to study common human movements, e.g. gait analyses, eye movement analyses, etc. Finally, students should be able to use the computer programming language, mat lab, to perform computations on kinematic data.

**BIOENG 1633 - BIOMECHANICS 4 - BIOMECHANICS OF ORGANS, TISSUES, AND CELLS**

Minimum Credits: 3
Maximum Credits: 3

Modern biomechanics is an increasingly diverse field that encompasses the mechanics of the whole human body, including all the way down to the cellular and molecular levels. Biomechanics 4 builds upon biomechanics fundamentals learned in BIOENG 1630 and BIOENG 1631 in building a comprehensive application of bio solid mechanics to describe the mechanical behavior of soft and hard biological tissues. The course provides fundamental concepts in the development and application of constitutive models, as well as a foundation for more advanced topics that are covered in graduate school. Mathematica (Wolfram Research, Inc.) Is used both in class and for assignments. Upon completing the course, the student should be able to formulate biomechanics constitutive models that describe soft and hard tissues and use Mathematica as a framework for exploring the impact of model parameters in the model description.

**BIOENG 1680 - BIOMEDICAL APPLICATIONS OF CONTROL**

Minimum Credits: 4
Maximum Credits: 4

The effect of feedback control on analysis and design is explored, with an emphasis on biological and physiological systems. Course Objectives:

- Construct mathematical models of physiological systems
- Analyze temporal dynamics of a physiological system using linear systems concepts
- Characterize the effects of feedback and controller on system performance
- Design linear controllers to meet desired system specifications

**BIOENG 1810 - BIOMATERIALS AND BIOCOMPATIBILITY**

Minimum Credits: 3
Maximum Credits: 3

Undergraduate students are introduced to an advanced understanding of biomaterials and the use of biomaterial in areas such as tissue engineering, artificial organs, and implantable devices. Throughout the course, ties are made between the topic of study and clinically relevant biomaterial performance. The course introduces various biomaterials, such as polymers, metals, and ceramics, with the focus on biomaterial synthesis, characterization, structure-property relationship and surface modification. Biocompatibility issues of biomaterials will be discussed from different aspects such as protein adsorption, foreign body reaction, immune and inflammatory response, and sterilization. Finally, examples of clinical applications are discussed. Upon completing the course, the student should be able to: state the basic principles behind human tissue response to artificial surface implantation, describe the general types of materials used in soft and hard tissue replacements, drug delivery devices, and extracorporeal devices, describe techniques utilized to control the physiologic response to artificial surfaces, and identify various design strategies and clinical applications of biomaterials.
**BIOENG 2150 - MEDICAL PRODUCT IDEATION**

Minimum Credits: 3  
Maximum Credits: 3  
A didactic class that explores the principles and use of "ethnography" as a tool to observe and document clinical activity in order to draft a clear statement of a clinical problem in need of solution and methods for concept generation to identify potential solutions. Students will be able to describe and use ethnographical techniques in identifying workplace problems and be able to describe and use concept generation methods to develop potential solutions. Topics covered: ethnography in the workplace; group brainstorming; brain-writing; affinitization; morphological analysis; basic human factors design.

**BIOENG 2151 - MEDICAL PRODUCT DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
A didactic course that uses principles of system engineering, the stage-gate process for medical product development and engineering and business analysis principles to evaluate the commercial potential of proposed medical devices to further develop feasible solutions to a clinical problem identified in BIOENG 2150. Students will demonstrate use of systems engineering techniques to prioritize a set of feasible device and/or system solutions and ability to use intellectual property (IP) tools to determine suitability for further development. Students will demonstrate use of course principles in development of a commercialization plan for a proposed medical product. Design controls required by fad and international bodies; systems engineering methodologies; intellectual property (IP) and IP search tools; brief market analysis; size by region, growth, competition, barriers to entry, sustainable advantage; reimbursement issues for proposed medical device/system; basic financial analysis ' students will construct spreadsheets typically presented to senior business management. This will include estimates of costs, margins, break-even analysis, NPV, hurdle rates, ROI, IRR; codes, standards, and regulatory processes (FDA, IEC & ISO, UL, ministry of health (Japan), NRC, BRH, notified bodies, obtaining broad indications for use); safety, reliability, product liability considerations, manufacturability considerations (DFM ' design for manufacture, workflows)

**ENGR 2811 - HACKING FOR DEFENSE**

Minimum Credits: 3  
Maximum Credits: 3  
This course will teach students how to build products and services using lean methods. This will be done by solving real-world military and intelligence community problems. The course uses the lean launchpad platform for entrepreneurship. This is a highly customer-centered hypothesis-test approach to developing a mission modes, and is particularly well-suited for technology startups. It incorporates customer needs and user testing to build a minimum viable prototype. At the conclusion of the course, students will be able to understand the problems/needs of searching for product-market fit; understand all the stakeholders, deployment issues, costs, resources, and ultimate mission value; deliver minimum viable products that match customer needs in an extremely short time; produce a repeatable model that can be used to launch other potential technology solutions.

**Bioethics**

**BIOETH 1660 - PHILOSOPHY OF MEDICINE**
Issues in Philosophy of Medicine, with reference to American health care, including concepts of health and disease, normativity, causation, error, clinical diagnosis, prevention, and epidemiological risk.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis

BIOETH 1664 - BIOETHICS

Survey of major topics in bioethics, including informed consent, treatment refusal, transplantation, resource allocation, genetics, and public health.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis

BIOETH 1668 - SUSTAINABILITY IN LATIN AMERICA

Latin America hosts some of the most biologically diverse and productive ecosystems on Earth, yet economic and social development are frequently at odds with efforts to conserve and use these ecosystems sustainably. This upper-level seminar focuses on the issues surrounding environmental sustainability in Latin America from a holistic, interdisciplinary perspective. The course will start with a general introduction to the three legs of sustainability and sustainable development theory, as well as the ecology and evolution of Neotropical biodiversity. We will use published primary literature to explore the particular complexities of Latin American sustainable development, and analyze case studies of moments through history in which environmental issues were either championed or de-emphasized. The course will feature several guest lectures, optional seminars for extra credit, and discussions of current sustainability news. Students will be responsible for a final research project and presentation.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

BIOETH 1669 - DIRECTED READINGS IN BIOETHICS

Students discuss with instructor a set of readings in bioethics. Topics and readings may vary.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis

BIOETH 1698 - SPECIAL TOPICS

Seminar on particular topics in bioethics; topics vary from term to term.

Academic Career: BIOETH
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis

Biological Sciences

BIOSC 0001 - BIOLOGICAL SCIENCES TRANSFER SEMINAR
Minimum Credits: 1
Maximum Credits: 1
This course for transfer students intending to major in biology will include topics such as study skills for biology courses, reading of primary literature, literature searches and citation managers, communicating with faculty, resources on campus, campus engagement, experiential learning opportunities, and career opportunities in biology.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

**BIOSC 0041 - ANATOMY FOR THE HEALTH PROFESSIONS**

Minimum Credits: 3
Maximum Credits: 3
This lecture course is designed to meet anatomy pre-requisites for students who are applying for admission to health profession programs but does not count towards any of the majors in biological sciences. Students will explore human functional and clinical gross anatomy organized by body region. Imaging techniques, disease pathologies, and case studies are utilized to enhance and apply lecture information. Co-enrollment with BIOSC 0042 is required.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: BIOSC 0042 (Min Grade 'C')

**BIOSC 0042 - ANATOMY FOR THE HEALTH PROFESSIONS LABORATORY**

Minimum Credits: 1
Maximum Credits: 1
This laboratory course is designed to meet anatomy pre-requisites for students who are applying for admission to health profession programs but does not count towards any of the majors in biological sciences. This laboratory provides a visual opportunity to learn human anatomy through various tools, including skeletons, organ models, pathology specimens, virtual dissection, and histology slides. Lab modules are organized by body region. Co-enrollment with BIOSC 0041 is required.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: BIOSC 0041

**BIOSC 0050 - FOUNDATIONS OF BIOLOGY LABORATORY 1**

Minimum Credits: 1
Maximum Credits: 1
This is the first course in a two-course sequence on the study of organisms in the laboratory and the field. We will work with techniques that are important in biology and apply these techniques to illustrate basic biological principles, with an emphasis on living organisms. The laboratory exercises focus on cell structure and function, basic cellular processes, plant structure and function, and basic animal anatomy and physiology.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0150 or 0715 or 0170 or 0190 or BIOL 0101 or 0110 (MIN GRADE: 'C' for all courses listed) or CREQ: BIOENG 1070

**BIOSC 0057 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 1**

Minimum Credits: 1
Maximum Credits: 1
This research-focused first-semester introductory biology lab uses real research projects to introduce biology as an experimental science. Students learn current laboratory techniques through an inquiry-based project or set of projects throughout the semester. Experiments can focus on genetics, molecular biology, evolution, and ecology. Topic for each section is listed under Meeting Information.
Academic Career: Undergraduate
**BIOSC 0058 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 1**

Minimum Credits: 1  
Maximum Credits: 1  
This is the first half of a two-part introductory biology lab that uses bacteriophage discovery to introduce biology as an experimental science. Students learn current laboratory techniques through discovery, isolation, and characterization of their own novel virus. Students will be introduced to concepts in microbiology, evolution, and molecular biology through hands-on experiments driven by results obtained during class. Students are expected to continue to the second half of the lab in BIOSC 0068.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis

**BIOSC 0060 - FOUNDATIONS OF BIOLOGY LABORATORY 2**

Minimum Credits: 1  
Maximum Credits: 1  
This one-credit laboratory course is the second in a two-course sequence designed to be an introduction to scientific inquiry in the biological sciences for majors in biology and related fields. You will use genetics, biochemistry, and molecular biology to undertake authentic research exploring the evolution of metabolic pathways in different species.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0050 or 0057 or 0058 or 0070 or 0190 or BIOL 0101 or 0111) and (BIOSC 0160 or 0716 or 0180 or BIOL 0102 or 0120); Min Grade 'C'

**BIOSC 0067 - FOUNDATIONS OF BIOLOGY RESEARCH LABORATORY 2**

Minimum Credits: 1  
Maximum Credits: 1  
This research-focused second-semester introductory biology lab uses real research projects to introduce biology as an experimental science. Students learn current laboratory techniques through an inquiry-based project or set of projects throughout the semester. Experiments can focus on genetics, molecular biology, evolution, and ecology. Topic for each section is listed under Meeting Information.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0050 or 0057 or 0058 or 0070 or 0190 or BIOL 0101 or 0111) and PREQ: (BIOSC 0160 or 0180 or 0165 or 0716 or BIOL 0102 or 0120) or CREQ: (BIOENG 1071 or 1072). Min Grade 'C'

**BIOSC 0068 - FOUNDATIONS OF BIOLOGY SEA-PHAGES LABORATORY 2**

Minimum Credits: 1  
Maximum Credits: 1  
This is the second half of a two-part introductory biology lab that uses bacteriophage discovery to introduce biology as an experimental science. Students learn current computational biological techniques through annotation and characterization of novel viral genomes and current lab techniques through advanced phage biology experiments. Students will be introduced to concepts in bioinformatics, microbiology, evolution, and molecular biology through hands-on experiments driven by results obtained during class.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0050 or 0057 or 0058 or 0070 or 0190 or BIOL 0101 or 0111) and CREQ: (BIOSC 0160 or 0180 or 0165 or 0716 or BIOL 0102 or 0120) or CREQ: (BIOENG 1071 or 1072). Min Grade 'C'
BIOSC 0100 - PREPARATION FOR BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is intended for students who have not had high school biology in the past five years to prepare them for taking Foundations of Biology 1 (BIOSC 0150) and 2 (BIOSC 0160). The lecture will cover a subset of topics from Foundations of Biology 1 and 2, including a discussion of basic chemistry used in biology, cell biology including mitosis and meiosis, an introduction to genetics and molecular biology. The weekly recitations will explore topics covered in lecture in more depth and integrate problem solving and study skills. Some laboratory exercises may also be included in the recitation period to re-enforce the lecture topics by giving students the opportunity to investigate the experimental aspect of biology. The laboratory exercises and assignments will focus on data analysis, problem-solving and writing skills.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BIOSC 0150 - FOUNDATIONS OF BIOLOGY 1

Minimum Credits: 3
Maximum Credits: 3
This introductory course in biology is divided into two parts. The first part covers the cellular basis of life including a discussion of simple chemistry; cells as units of structure and function; and energy transformations. The second part includes an examination of those functions common to all organisms such as nutrition, gas and fluid transport, and hormonal and neuronal control. Throughout, the emphasis is on the mechanisms used to accomplish these basic functions.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Pre-Assessment is required, instructions for completing the pre-assessment are found at: tinyurl.com/BIOSC0150

BIOSC 0155 - HONORS FOUNDATIONS OF BIOLOGY 1

Minimum Credits: 4
Maximum Credits: 4
This course covers biological phenomena at the cellular level: macromolecules, cell structure, photosynthesis, cell respiration, homeostasis, signaling and genetics. The experimental basis supporting our understanding of these processes will be introduced.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: Advanced Placement Biology Test Score equal/greater 4 or International Baccalaureate Biology Score equal/greater 5

BIOSC 0160 - FOUNDATIONS OF BIOLOGY 2

Minimum Credits: 3
Maximum Credits: 3
This introductory course covers the basic principles of genetics, evolution, and ecology. Emphasis will be placed on the experimental and observational basis for our knowledge of these subjects.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0150 or 0155 or 0715 or 0170 or 0190) or (BIOL 0101 or 0110); Min Grade 'C'
BIOSC 0165 - HONORS FOUNDATIONS OF BIOLOGY 2

Minimum Credits: 4
Maximum Credits: 4
This course will cover the cell cycle, DNA replication, transcription, translation, molecular biology, biotechnology, genomics and bioinformatics, plant development, and animal development. The experimental basis supporting our understanding of these processes will be introduced.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0155 (MIN GRADE: ‘C’) or Advanced Placement Biology Test Score equal/greater 5 or International Baccalaureate Biology Score equal/greater 7

BIOSC 0200 - TEACHING BIOLOGICAL SCIENCES

Minimum Credits: 1
Maximum Credits: 3
Teaching biology is a complex and multi-faceted challenge. It requires the integration of deep disciplinary knowledge with a functional understanding of learning theory and the development of practical skills for working with students. Teaching biological sciences is designed to help you explore multiple strategies for effective teaching and learning and refine your own understanding of biology through efforts to become a better science communicator. The course has both seminar and project based components. You are encouraged to coordinate your work in this course with existing teaching opportunities but this is not required.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0716 or 0191 or 0180) or (BIOL 0102 or 0120); Min Grade ‘C’

BIOSC 0350 - GENETICS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to examine the gene in the following dimensions: the gene as a unit of transmission, a unit of function, and a unit of mutation. In addition, the distribution and activity of genes in populations will be considered in the context of current theories of evolution.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOENG 1071 or 1072) or (BIOL 0102 or 0120) and (CHEM 0120 or 0102 or 0112 or 0420 or 0720 or 0770 or 0970); Min Grade ‘C’

BIOSC 0351 - GENETICS LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Laboratory exercises designed to illustrate the major principles of genetics.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121); Min Grade ‘C’; CREQ: (BIOSC 0350 or 0355 or BIOL 0350 or 0203 or 0352); Min Grade ‘C’; LEVEL: Junior or Senior

BIOSC 0352 - INTRODUCTION TO MOLECULAR GENETICS LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Molecular genetics uses precise genome engineering to address increasingly sophisticated biological questions. In this course students will participate in an authentic research project, for example creating new mutations using current recombinant techniques and testing the biological consequences.

Academic Career: Undergraduate
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) and (BIOSC 0350 or 0355 or BIOL 0203 or 0350 or 0352); Min Grade "C"; LEVEL: Junior or Senior

**BIOSC 0355 - UHC GENETICS**

Minimum Credits: 4  
Maximum Credits: 4  
This course is designed to examine the gene as a unit of transmission, a unit of function, and a unit of mutation. The course emphasizes the relationship between classical mendelian genetics and the modern molecular understanding of gene structure and function. Recitations are used for weekly problem sets and discussion of exercises in the virtual flylab, an internet-based simulation of genetic experiments with the fruit fly *drosophila melanogaster*.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0160 or 0716 or 0191 or 0180 or BIOL (0102 or 0120); and CHEM 0120 or 0720 or 0102 or (0112 and 0114); Min Grade 'C' for all classes listed.  
**Course Attributes:** University Honors Course

**BIOSC 0370 - ECOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
The objective of the course is to provide a broad introduction to the study of ecology at the undergraduate level, through the presentation of lectures dealing with organismal, population, community, and ecosystem levels of hierarchical organization. The contributions of laboratory and field investigations to the development of ecological knowledge will be considered.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all classes listed.  
**Course Attributes:** Global Studies

**BIOSC 0390 - ECOLOGY LABORATORY**

Minimum Credits: 1  
Maximum Credits: 1  
The objective of the laboratory course is to provide students with practical experience in ecological methods and in the design, conduct, and analysis of ecological studies. Laboratory exercises are designed to correspond with major lecture topics presented in BIOSC 0370. Exercises will include laboratory and field studies.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0060 or 0067 or 0068 or 0080 or BIOL 0102 or 0121; CREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C' for all classes listed.  
**LVL:** Junior or Senior

**BIOSC 0391 - ECOLOGY LABORATORY WRITING PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
Course is a writing practicum for ecology laboratory, BIOSC 0390. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 0390. The reports and essays will be returned with instructor comments for student revision and resubmission.  
**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 0390; PLAN: Ecology and Evolution (BS)

Course Attributes: Writing Requirement Course

**BIOSC 0715 - UHC FOUNDATIONS OF BIOLOGY 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers biological phenomena at the cellular level: macromolecules, cell structure, photosynthesis, cell respiration, homeostasis, signaling and genetics. The experimental basis supporting our understanding of these processes will be introduced.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** Advanced Placement Biology Test Score equal/greater 4 or International Baccalaureate Biology Score equal/greater 5  
**Course Attributes:** DSAS Natural Science General Ed. Requirement, University Honors Course

**BIOSC 0716 - UHC FOUNDATIONS OF BIOLOGY 2**

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover the cell cycle, DNA replication, transcription, translation, molecular biology, biotechnology, genomics and bioinformatics, plant development, and animal development. The experimental basis supporting our understanding of these processes will be introduced.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0715 (MIN GRADE: 'C') or Advanced Placement Biology Test Score equal/greater 5 or International Baccalaureate Biology Score equal/greater 7  
**Course Attributes:** DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

**BIOSC 0740 - YELLOWSTONE FIELD COURSE**

Minimum Credits: 4  
Maximum Credits: 4  
The honors program of the University of Pittsburgh, in conjunction with the Department of BIOSC, has developed a summer field course in ecology which will be held in and adjacent to the yellow stone region of Wyoming and Montana. Field study opportunities will be emphasized and will comprise approximately 50% of the student contact hours.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

**BIOSC 0805 - THE HUMAN BODY FOR NON-MAJORS**

Minimum Credits: 3  
Maximum Credits: 3  
This is a course in human biology and physiology for students not majoring in biology. The goal is to provide students with an understanding of fundamental principles of life with an emphasis on the human body. The course will cover basic biochemistry and cell biology and then move to the structure and function of human organ systems. An essential part of the course is discussion of current issues, such as infectious, autoimmune and neurodegenerative diseases; asthma and allergy; nutrition and health; stem cells research and cloning; and methods of contraception and reproductive technologies.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req.
BIOSC 0815 - GENES AND DISEASES FOR NON- MAJORS

Minimum Credits: 3  
Maximum Credits: 3

This course is designed to give students not majoring in biology the essential background in genetics and evolution to understand human disease. The material covered includes the fundamental principles of genetics, the role of genes and environment in various diseases, genomics, and the role of evolution. An essential part of the course is the discussion of current issues, such as genetic diseases, genetic screening, reproductive cloning, gene therapy, genetic basis of cancer, and emerging and reemerging diseases.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

BIOSC 0825 - SPECIAL TOPICS IN BIOLOGY FOR NON-MAJORS

Minimum Credits: 1  
Maximum Credits: 3

A major topic in biology will be developed and explored by students.

Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis

BIOSC 0835 - OUR CHANGING WORLD FOR NON-MAJORS

Minimum Credits: 3  
Maximum Credits: 3

This course is an introduction to the evolutionary and ecological forces that change our world. We will consider how organisms change over time (evolution), how they interact with each other and with their environment (ecology), and how they assemble as communities and ecosystems. We will then apply these concepts to understand how human activity is changing the biosphere.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

BIOSC 1000 - BIOCHEMISTRY

Minimum Credits: 3  
Maximum Credits: 3

This course is designed to provide students with a basic understanding of the principles and underlying themes of modern biochemistry. The course includes all the major topics in biochemistry in considerable depth including thermodynamics and enzymology, protein and nucleic acid structure, function, and synthesis, lipids and membranes as well as metabolic pathways. This course will require that you master a new vocabulary including chemical structures, and there is an emphasis throughout on experimental approaches, molecular mechanisms, and problem solving. Although the same topics will be covered as in the two semester biochemistry series (BIOSC 1810-1820), no one topic in BIOSC 1000 will be covered in as much detail.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0102 or 0120 and (CHEM 0120 or 0102 or 0112 or 0420 or 0720 or 0770 or 0970) (Min Grade 'C' for these courses) and (CHEM 0310 or 0350 or 0730 or 0206 or 0231)

BIOSC 1005 - INTRODUCTION TO BIOCHEMISTRY LAB

Minimum Credits: 1  
Maximum Credits: 1

This course will guide students through a common experimental approach that is used in academic and industry research labs. In the first part of the semester, students will clone genes that have been selected because they are new genes of interest to research labs within the department. In the
second part of the semester, students will express their cloned genes and purify the encoded proteins. They will use computer analysis to predict possible functions of their proteins and then test their hypotheses using biochemical techniques.

Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0080 or 0191) or (BIOL 0102 or 0121); CREQ: BIOSC 1000; Min Grade 'C' for all courses listed

**BIOSC 1010 - COMMUNICATING IN THE BIOLOGICAL SCIENCES**

Minimum Credits: 2  
Maximum Credits: 2  
Conventions of scientific communication will be taught in this junior/senior level course as students learn to locate, read, and analyze primary literature in preparation for writing and revising a clear and concise review article. Students also prepare and revise an oral presentation of their review topic. Attention to document design, argument construction, verbal communication, and presenting skills will be taught and practiced. In addition to instructor led workshops, extensive peer review exercises are incorporated to help students develop evaluation skills and learn to incorporate feedback.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0350 or 0355 or 0370 or 0371 or 0000 or 1810 or 1130) or (BIOL 0203 or 0350 or 0352 or 1430 or 1515); Min Grade 'C'; and (PREQ: ENG0102 or ENGCMP 0002 or 006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); LVL: Jr or Sr; PLAN: BIOSC-BS  
Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

**BIOSC 1070 - HUMAN PHYSIOLOGY-UHC**

Minimum Credits: 4  
Maximum Credits: 4  
After a general introduction on cell biology, muscle physiology, and intracellular communication, this course will examine the function of the following systems: cardiovascular, respiratory, renal, gastrointestinal and immune. The systems will be considered in the context of the function of the body as a whole, and how they respond during challenges (e.g. exercise) and pathological states. Current research related to the functioning of these systems will be emphasized throughout the course.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOL 0102 or 0120) or (BIOENG 1071 or 1072) and [CHEM 0120 or 0720 or 0101 or (0112 and 0114)]; Min Grade 'C' for all courses listed  
Course Attributes: University Honors Course

**BIOSC 1080 - HUMAN ANATOMY AND PHYSIOLOGY**

Minimum Credits: 6  
Maximum Credits: 6  
This course is an introduction to the study of human structure and function. We will take a systems approach to study the anatomy of the human body and its normal function and maintenance. Each system will be examined from the perspective of development, tissue structure, adult anatomy and physiology. Lectures will assume that the student has had the equivalent of a major's level college course in introductory biology and introductory chemistry.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0160 or 0716 or 0191 or 0180 or BIOL 0102 or 0120) and [CHEM 0120 or 0720 or 0101 or (0112 and 0114)]; Min Grade 'C' for all courses listed

**BIOSC 1120 - BIOSTATISTICS**
Minimum Credits: 3
Maximum Credits: 3
This course provides students the knowledge on applications of statistical technique to biological problems. The data fit, regression analysis, significance of correlation coefficient and of standard error of estimate will be discussed. The binomial, normal, and Poisson distributions, the student's t-distribution and the chi-squared distribution will be introduced. Hypothesis testing, significance levels, confidence limits for large and small samples and non-para metric statistics will be covered. Basic computer programming (use of BMDP and statview) will be introduced.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120) and (BIOSC 0350 or 0355 or 0370 or 0371 or 1000 or 1810 or BIOL 0203 or 0350 or 1430 or 1515) and STAT 1000; MIN GRADE 'C' for all courses

BIOSC 1130 - EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to biological evolution. The theory, process and pattern of evolutionary change are presented. This course will encompass both micro evolutionary and macro evolutionary concepts. Lecture topics will include inheritance and variation, population genetics, natural selection, speciation, adaptation, the fossil record, and phylogenetic.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0350 or 0355 or BIOL 0203 or 0350 OR 0352; Min Grade 'C' for all courses listed

BIOSC 1131 - EVOLUTION LABORATORY

Minimum Credits: 1
Maximum Credits: 1
This laboratory course is designed to introduce students to the practice of evolutionary biology. Students will design and conduct experiments involving living organisms, as well as perform computer simulations, that demonstrate evolutionary processes.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0080 or BIOL 0102 or 0121; MIN GRADE 'C' CREQ: BIOSC 1130 or BIOL (1165 or 1435)

BIOSC 1140 - BEHAVIORAL ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
Behavior is studied from an evolutionary perspective. Current models of foraging, mating, and social behavior are evaluated through classroom and field work.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1160 - FOREST ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
Study of environmental factors and their influence on reproduction, growth, and development of individual trees and forest stands. Provides the biological basis for forest resources management.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1170 - FRESHWATER ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
A field-oriented study of lakes, reservoirs, and streams as dynamic systems. Emphasis will be placed on the use of quantitative sampling and analytical techniques.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1180 - ECOLOGY OF AMPHIBIANS AND REPTILES

Minimum Credits: 3
Maximum Credits: 3
This course will include the ecology, evaluation, identification techniques, habitats, and life histories of amphibians and reptiles. While emphasis will be on the amphibians and reptiles of western Pennsylvania, those species occurring in the bordering states of Ohio, New York, and west Virginia will also be studied.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0180 or 0191 or 0716 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1190 - AQUATIC ENTOMOLOGY

Minimum Credits: 3
Maximum Credits: 3
An introduction to aquatic insects. Subjects emphasized will include ecology, morphology, evolution, habitats, and identification. Field and laboratory experiences will be supplemented with lectures and selected readings.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOL 0102 or 0120); Min Grade 'C' for all courses

BIOSC 1200 - VERTEBRATE MORPHOLOGY

Minimum Credits: 3
Maximum Credits: 3
A study of the gross anatomy, histology, development, and evolution of the vertebrate body. Topics: vertebrate origin, phylogeny, and classification; basic histology; early embryology; evolutionary morphology; integument; skeletal system; muscular system; sense organs; nervous system; endocrine system; body cavity and mesenteries; digestive system; respiratory system; circulatory system; excretory system; reproductive system. Each system is examined in terms of its embryonic development, histology, functional anatomy, and evolutionary history. General principles of evolutionary morphology are emphasized. The purpose of the course is to provide an understanding of the history and functional anatomy of the body. It is designed as a background for studies in embryology, physiology, systematics, and human anatomy and physiology in professional schools.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

BIOSC 1205 - VERTEBRATE MORPHOLOGY LAB

Minimum Credits: 1
Maximum Credits: 1
This is a laboratory to accompany BIOSC 1200. Students will dissect a shark and a cat, study various skeletons, and examine histology slides. The purposes of the course are to illustrate the structures discussed in the BIOSC 1200 lectures and to give the student the personal experience of learning animal structure through dissection and observation.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0060 or 0067 or 0068 or 0080 or 0191) or (BIOL 0102 or 0121); CREQ: BIOSC 1200; Min Grade 'C' for all courses listed; LVL: Junior or Senior

### BIOSC 1220 - ECOLOGICAL FIELD STUDIES

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides extensive field experience for undergraduates and will focus on developing the skills necessary for any practicing ecologist. Students will be involved in all stages of field projects including both individual and group exercises. Using a combination of lecture, extensive readings from the primary literature and hands-on field projects, the instructor will assist the students in gaining a proficiency with the background knowledge, thinking skills and technological tools necessary to conduct empirical ecological investigations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

### BIOSC 1221 - URBAN ECOLOGICAL FIELD STUDIES

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course provides extensive field experience for undergraduates and will focus on developing the skills necessary for any practicing ecologist. Students will be involved in all stages of field projects including both individual and group exercises. Using a combination of lecture, extensive readings from the primary literature and hands-on field projects, the instructor will assist the students in gaining a proficiency with the background knowledge, thinking skills and technological tools necessary to conduct empirical ecological investigations.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0060 or 0067 or 0068 or 0080 or 0191 or BIOL 0102 or 0121) and (BIOSC 0370 or 0371 or BIOL1430 or 1515 or GEOL 1641); Min Grade 'C' for all courses listed; LVL: Junior or Senior

### BIOSC 1230 - ORNITHOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The study of birds with a field-oriented emphasis revolving around the late spring migrants and the breeding species in a wide variety of habitats. Classroom topics will include study skins, nests, eggs, and the annual cycle.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120); Min Grade 'C' for all courses listed

### BIOSC 1250 - HUMAN PHYSIOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
After a general introduction on cell biology, physiology of nerves and muscle, and intercellular communication, this course will survey the function of the following systems: cardiovascular, respiratory, renal, and gastrointestinal. Each system discussed will be integrated into the larger function of homeostatic and their adaptation during pathology and challenges (e.g., exercise).

**Academic Career:** Undergraduate  
**Course Component:** Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0102 or 0120) and (CHEM 0120 or 0102 or 0112 or 0420 or 0720 or 0770 or 0970); Min Grade 'C' for these courses

BIOSC 1255 - PHYSIOLOGY LABORATORY

Minimum Credits: 1
Maximum Credits: 1
This laboratory course complements BIOSC 1250 human physiology. Students will spend the first half of the semester developing their skills by measuring homeostatic parameters of the human body (blood pressure, blood chemistry, muscle response, etc.). They will then use that knowledge to design and perform experiments modeled after conditions of both eustress (exercise) and distress (disease). In addition to weekly assignments, students will be required to present the results of their research projects.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080) or (BIOL 0102 or 0121); CREQ: (BIOSC 1250 or 1070 or 1080) or (NROSC 1070 or 1250); LEVEL: Junior or Senior

BIOSC 1270 - ECOLOGY OF FISH

Minimum Credits: 3
Maximum Credits: 3
A field course dealing with the interrelationships of fish and the biotic and abiotic environment. Improvements of aquatic habitat and applied aspects of the ecology of fish and fishery biology will be studied.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120); Min Grade 'C' for all courses listed

BIOSC 1275 - GENOMICS

Minimum Credits: 3
Maximum Credits: 3
The sequencing of the human genome has revolutionized the way in which we think about diverse biological topics. This course will explore how advances in our understanding of such subjects have been made possible by innovative sequencing technologies. This course will combine lecture, roundtable discussions and group presentations to explore how such technologies have allowed scientists to analyze genome-wide correlations between species to ultimately provide deeper insight into genome structure and function, the evolution of genomes, and the greater roles of genome analysis and editing in modern medicine.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0350 or 0355) or (BIOL 0350 or 0352); MIN GRADE 'C' for all courses listed

BIOSC 1280 - MICROBIAL GENETICS

Minimum Credits: 3
Maximum Credits: 3
This course will consist of a series of lectures discussing the molecular genetics of prokaryotic and eukaryotic microbes and ways in which they can be genetically engineered. It includes: (1) the genome structures of microbes, (2) classic methods for genetic exchange, (3) current approaches to genetic engineering, (4) applications of genetic engineering to human disease. Visits to the computer lab will introduce web-based analysis of microbial genome sequences.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 1850 and (BIOSC 0350 or BIOSC 0355 or BIOL 0350 or BIOL 0203 or BIOL 0352); Min Grade 'C' for all courses listed
BIOSC 1285 - GENOMICS LABORATORY

Minimum Credits: 1
Maximum Credits: 1
This course guides students through the design and evaluation of a data-driven research project in the area of genomics and metagenomics. In the first half of the course students apply methods of molecular biology to collect data about the studied system that are used as the starting point for scientific questions and hypotheses. In the second half they analyze the data and test their hypotheses using comparative and functional genomics approaches.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) and (BIOSC 0350 or 0355 or BIOL 0203 or 0350); PROG: School of Arts and Sciences (UA-S); Min Grade 'C' for all courses listed; LEVEL: Junior or Senior
Course Attributes: Undergraduate Research

BIOSC 1290 - EXPERIMENTAL GENETIC ENGINEERING LABORATORY

Minimum Credits: 1
Maximum Credits: 1
This is a laboratory course focusing on the genetic engineering of prokaryotic and eukaryotic microbes. During this course, students will isolate novel mutants of a specific microbe and employ both traditional genetic approaches and current methods in molecular microbiology to clone, characterize and sequence the mutant alleles.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 1855 or 1860) and (BIOSC 0350 or BIOSC 0355 or BIOL 1315 or BIOL 0350); Min Grade 'C' for all courses listed

BIOSC 1291 - EXPERIMENTAL GENETIC ENGINEERING WRITNG PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
This course is a writing practicum for experimental genetic engineering. Students will write three short laboratory reports based on work done in the corequisite course BIOSC 1290, and revise these, based on instructor comments, to form a final integrated paper.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006); CREQ: BIOSC 1290 (Min Grade 'C'); PLAN: Microbiology (BS)
Course Attributes: Writing Requirement Course

BIOSC 1310 - WETLAND ECOLOGY AND MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Wetlands are an important transitional habitat from terrestrial to aquatic systems, and they provide services that are critical to the health and functioning of the ecosystem. In this field-oriented course, we will investigate the different types of wetlands, the properties that define wetlands, the identification of characteristic wetland plants and animals, the benefits that wetlands supply to the ecosystem and society, and the history and present status of wetland management.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120); Min Grade 'C' for all courses listed

BIOSC 1320 - POPULATION BIOLOGY
This course focuses on ecological and evolutionary processes at the population level. We will learn how to represent ecological and evolutionary dynamics using increasingly realistic mathematical models. We will first explore population ecology including models of single populations, metapopulations, and interactions between species. We then shift to population and evolutionary genetics studying how the mechanisms of evolution interact with each other. Finally, we will study the explicit interaction between ecological and evolutionary processes that can occur over short timescales.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C' for all courses listed  
CREQ: BIOSC 1130 or BIOL (1165 or 1435)

---

**BIOSC 1330 - FIELD BOTANY**

Minimum Credits: 3  
Maximum Credits: 3  
Identification of native herbaceous and woody plants in terrestrial communities and the methods of quantifying their relative numbers, mass, and ecological relationships.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

---

**BIOSC 1340 - FIELD ENTOMOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This course is offered at the Pymatuning laboratory of ecology field station. An introduction to the amazing taxonomic and ecological diversity of insects and their close relatives in the phylum Arthropoda. Emphasis will be placed on the collection and identification of the adult stages. Field and laboratory exercises will be supplemented with lectures and selected readings.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

---

**BIOSC 1350 - PLANT BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will present an in-depth discussion of plant structure, function, and development in an ecological and evolutionary context. In addition, this course will survey the plant kingdom and related taxa with a focus on the evolution of these groups.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

---

**BIOSC 1360 - ECOLOGY OF FUNGI**

Minimum Credits: 3  
Maximum Credits: 3  
A survey of the fungi and their interrelationships with abiotic and biotic factors in the environment. Adaptations will be studied in the field of laboratory using both aquatic and terrestrial fungi. Special emphasis will be placed on identification of the larger basidiomycetes (mushrooms).  
**Academic Career:** Undergraduate  
**Course Component:** Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0180 or 0191 or 0716 or BIOL 0102 or 0120; Min Grade 'C' for all courses listed

**BIOSC 1375 - TROPICAL BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will provide an introduction to ecological and evolutionary studies of living organisms in the tropics. The course will focus on major themes in ecology and evolution as they play out in the tropics, the most biodiverse region of the globe.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: BIOSC 0160 or 0165 or 0716 or 0180 or 0191 or BIOL 0102 or 0120 (MIN GRADE 'C')

**BIOSC 1380 - GLOBAL ECOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Compelling evidence points to the 1990's as the decade of environmental crisis. Human quality of life, and probably survival, likely depends more on treaties about land, air, and water than on weaponry. This course will examine environmental issues of the decade and the basic concepts of the fundamental environmental science - ecology - that underlie them. The nature of key environmental changes, their extent and rates, will be considered, along with likely consequences and possible solutions.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0160 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120) (MIN GRADE 'C')

**BIOSC 1390 - FIELD TECHNIQUES IN ECOLOGY AND CONSERVATION**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces a variety of field and research techniques used in ecology and conservation, including experimental design, sampling design, and techniques in sampling plants and animals in forests, fields, and aquatic habitats. It will also include an introduction to radio telemetry and the use of GIS and GPS systems. Student projects will be presented at the end of the course. Collectively, these experiences will expose students to important research techniques in biology and prepare them for opportunities to conduct research with researchers in the fields of ecology, evolution, and conservation biology.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120) (MIN GRADE 'C')

**BIOSC 1400 - DISEASE ECOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This field course will take an ecological approach to the study of infectious diseases. We will explore relationships between parasites (pathogens), their hosts and the environment in which they interact, with the objective of developing an understanding of how parasites (pathogens) spread through, persist in, and impact host populations. The course will include lectures, student-led discussions, field work, and lab-based activities.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515; Min Grade 'C'

**BIOSC 1415 - FIELD MAMMOLOGY**
Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to the biology, taxonomy, ecology and diversity of mammals. Students will gain knowledge of the characteristics and members of different orders of class Mammalia with a focus on species found in Pennsylvania, teaching students important techniques and skills in the study of mammals, including field sampling and monitoring techniques, appropriate methods for data collection, methods for collection and preparation of study specimens, taxonomy and species identification using both wild animals and their signs/tracks and preserved specimens, and the ecological role(s) that mammals play.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BIOSC 1420 - WILDLIFE MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This field course will address the principles that guide natural resource professionals in management of wildlife, including those used in management of game animals for harvest, in maintenance and restoration of viable populations, and in ecosystem management. The application of principles to actual problems in management and conservation of wildlife populations is emphasized including the techniques used to reduce, maintain, and increase population densities.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120) (MIN GRADE ’C’)

BIOSC 1430 - ECOPHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
The adaptations of animals to deal with specialized environmental situations are studied across a spectrum of biological levels from biochemical to organismal. Topics such as thermal relations, water balance, and bioenergetics are considered. Biosc 1430 and 1435 are considered course repeats with similar material covered as a field course or a lecture course, respectively

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180) or (BIOL 0102 or 0120) and (CHEM 0120 or 0720 or 0770 or 0970 or 0102 or (CHEM 0112 and 0114)); (Min Grade ’C’)

BIOSC 1435 - ENVIRONMENTAL PHYSIOLOGY OF ANIMALS

Minimum Credits: 3
Maximum Credits: 3
This course in ecophysiology is a physiology course taught from an ecological and evolutionary perspective. The organismal, ecological, and evolutionary significance of physiological function will be emphasized along with molecular and cellular mechanisms. BIOSC 1430 and 1435 are considered course repeats with similar material covered as a field course or a lecture course, respectively.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515: MIN GRADE: C

BIOSC 1440 - ANIMAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
This course examines the diversity of animal behavior from evolutionary and ecological points of view. We will examine how animals decide what to eat, where to live, how to compete with each other, and how to avoid predators. We also will investigate how animals choose who to mate with, when they should offer parental care, the conditions that favor social living, and how to best communicate. The lecture and recitation material is
appropriate for more advanced students that have been trained in introductory biology and ecology.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515 (MIN GRADE 'C')

**BIOSC 1445 - ANIMAL COMMUNICATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This course addresses the extraordinary variety of ways that animals communicate with each other. We explore how animals produce and receive signals using sound, light, chemicals, mechanical pressure, and electricity. We then approach how such signals evolve by considering questions of optimality, decision making, information theory, and economics. We discuss the contexts in which signals are used, including aggression and dominance, mate attraction and courtship, cooperation and social signaling, and foraging. We conclude by extending to humans, plants, and microbes.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0370 or 0371 or BIOL 1430 or 1515 (MIN GRADE 'C')

**BIOSC 1450 - HISTOLOGY**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
- Course is intended to show how embryonic rudiments build or gans and how tissues and cell types interact to produce the functional systems in the adult. The course covers descriptive, comparative, and experimental histology, but emphasizes the diversity of tissues in organs, and the differentiation of cell types.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**BIOSC 1455 - HUMAN ENDOCRINOLOGY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This course will focus on the physiology and anatomy of the human endocrine system. The molecular mechanisms of the synthesis, distribution, action, and regulation of hormones will be covered. Endocrine disorders including diabetes, Cushing's disease, Addison's disease, and parathyroid and calcium diseases will be studied to provide context. Additionally, we will cover the endocrine milieu of the developing embryo to adulthood and developmental disturbances during reproduction.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** (BIOSC 1250 or 1070 or 1080) or (NROSCI 1070 or 1250) or CABIO 0206 or CHBIO 0302 or PHARM 5115 (ALL MIN GRADE 'C')

**BIOSC 1470 - BIOPHYSICAL CHEMISTRY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- This course will deal with fundamental physical chemical principles especially applicable in the study of molecular biology. Topics will include (1) thermodynamics and chemical equilibrium; (2) kinetic theory and transport; and (3) chemical and enzyme kinetics. These subjects will be richly highlighted with numerous examples from biological systems, and techniques for studying these systems will be described. The topics covered will be developed from a physical chemical point of view.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOL 0102 or 0120) and (MATH 0230 or 0231) (MIN GRADE 'C')

**BIOSC 1480 - EMBRYOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The development of some invertebrates' and vertebrates' eggs, embryos, organs and systems is examined in the light of basic concepts and problems of embryology, emphasizing the techniques, critical approaches, and analytic methods of experimental embryology.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** (PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)) and (BIOSC 0160 or 0716 or 0191 or 0180 or BIOL 0102 or 0120 (MIN GRADE 'C'))

**BIOSC 1490 - EMBRYOLOGY LABORATORY**

**Minimum Credits:** 2  
**Maximum Credits:** 2  
The embryological development of the frog, chick and pig are intensively studied in microscopic preparations emphasizing the integration of temporal and spatial events with attention to homology and adaptation.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis

**BIOSC 1500 - CELL BIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will be devoted to a discussion of the current state of our understanding of cell structure and function. Eukaryotic cells will be emphasized with particular attention to animal cells. However, prokaryotic cells will be discussed for comparative purposes. Course material will emphasize the experimental basis for our understanding of cell biology and the relationship between structure and function. Most of the techniques to be considered will involve biochemical and molecular biological approaches used in the study of cell function. Thus the course will assume a familiarity with the principles of biochemistry covered in the prerequisites and will not repeat this material. Topics will include membranes, the nucleus, mitochondria and chloroplasts, the cytoskeleton, cell motility, growth and division, endocytosis and exocytosis, and selected topics on the cellular biological aspects of cancer and the immune system.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 1000 or 1810 (MIN GRADE 'C')

**BIOSC 1510 - CELL BIOLOGY LABORATORY**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This experimental methods course is designed to give upper division majors and opportunity to learn modern techniques used in cell biology research. Students will master the fundamentals of light microscopy (bright field, phase contrast, and dark field) and explore more advanced techniques such as fluorescence, confocal, video, and differential interference contrast microscopy. Students will isolate plasma membranes, mitochondria, nuclei, brush borders, and flagella and characterize these organelles by microscopy, enzyme assays and antibody labeling.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080) or (BIOL 0102 or 0121); CREQ: BIOSC 1500 (MIN GRADE 'C'); PLAN: BIOSC Majors; LVL: Junior or Senior

**BIOSC 1511 - CELL BIOLOGY LABORATORY WRITING PRACTICUM**
Minimum Credits: 1
Maximum Credits: 1
This course is the writing practicum for cell biology laboratory, BIOSC 1510. Students will prepare laboratory reports based on exercises and assignments for the companion course, BIOSC 1510.

**Academic Career:** Undergraduate
**Course Component:** Practicum
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1510 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)
**Course Attributes:** Writing Requirement Course

**BIOSC 1520 - DEVELOPMENTAL BIOLOGY**

Minimum Credits: 3
Maximum Credits: 3
The mechanisms of animal development will be analyzed. The first half of the course will emphasize classic embryological investigations focusing on how the embryonic body plan becomes organized, while the second half will deal primarily with the genetic and molecular regulation of development. The experimental analysis of such processes as fertilization, morphogenetic movements, tissue interactions, pattern formation, and gene expression will be discussed using examples from a variety of animal embryos, and by discussion of the current research literature.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: BIOSC 0350 or 0355 or BIOL 0350 or 0203 or 0352 (MIN GRADE 'C')

**BIOSC 1530 - DEVELOPMENTAL BIOLOGY LABORATORY**

Minimum Credits: 1
Maximum Credits: 1
This laboratory course is designed to provide students with practical experience in the scientific method of experimental research with regard to animal development. Initial labs will stress observational skills, but the goal of each will be to understand the careful and deliberate process of experimental design, execution, and the interpretation of results. The importance of establishing and interpreting controls in experimental procedure will also be emphasized.

**Academic Career:** Undergraduate
**Course Component:** Credit Laboratory
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121; CREQ: BIOSC 1520 (ALL MIN GRADE 'C'); LEVEL: Junior or Senior

**BIOSC 1531 - DEVELOPMENTAL BIOLOGY LABORATORY WRITING PRACTICUM**

Minimum Credits: 1
Maximum Credits: 1
Course is a writing practicum for developmental biology laboratory, BIOSC 1530. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1530.

**Academic Career:** Undergraduate
**Course Component:** Practicum
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: ENGCMP 0200 or ENGR 0012 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or 0020 or ENG 0102); CREQ: BIOSC 1530 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)
**Course Attributes:** Writing Requirement Course

**BIOSC 1540 - COMPUTATIONAL BIOLOGY**

Minimum Credits: 3
Maximum Credits: 3
This course is designed to give students a broad understanding of how computational approaches can be used to solve problems in biology. Both the
biological and computational underpinnings of the methods will be addressed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120) (MIN GRADE 'C')

BIOSC 1542 - COMPUTATIONAL GENOMICS

Minimum Credits: 3
Maximum Credits: 3
This course will explore the use of computer-aided methods to generate and test biological hypotheses at whole-genome scales. Students will gain both a theoretical and practical understanding of working with genomic data typical of high-throughput sequencing technologies.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 1540 and (CS 0008 or 0010 or 0011 or 0012); MIN GRADE 'C'

BIOSC 1544 - SIMULATION AND MODELING

Minimum Credits: 3
Maximum Credits: 3
This course teaches computational structural biology, simulation, and modeling, as seen through the lens of rational, computer-aided drug discovery. Topics will include protein structure and modeling, cheminformatics, virtual small-molecule screening, molecular dynamics simulations, molecular visualization, and online resources for studying proteins and molecules. A class project will allow students to apply the relevant tools and to demonstrate their acquired knowledge.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 1540 and (CS 0008 or 0010 or 0011 or 0012); MIN GRADE 'C'

BIOSC 1545 - THE MATHEMATICS OF BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course uses examples from across biology to illustrate how simple mathematical models can increase our understanding of biological systems. We will focus on several foundational modeling approaches, including systems of difference equations, matrix models, probability, and statistical data analysis. Students will discover how these approaches are used, their strengths and limitations, and how they could be extended to more complex problems. Students should be prepared to use both spreadsheet programs and scripts, written in a language such as Python or R, to explore these models.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 1000 or 1080 or 1250 or 1500 or 1540 or 1810 (MIN GRADE 'C') or MATH 0280

BIOSC 1550 - ECOLOGY AND EVOLUTION SEMINAR

Minimum Credits: 1
Maximum Credits: 1
In this seminar course, a single topic is developed by student presentations of research articles from the original scientific literature as chosen by the instructor. Topics might include, for example, "cladistics controversies", "molecular phylogeny", or "wetlands conservation".
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0370 or 0371 or BIOL 1430 or 1515) and BIOSC 1130; (ALL MIN GRADE 'C') PLAN: Ecology and Evolution (BS)
Course Attributes: Capstone Course
BIOSC 1551 - ECOLOGY AND EVOLUTION SEMINAR WRITING PRACTICUM

Minimum Credits: 1  
Maximum Credits: 1  
This course is a writing practicum for the ecology and evolution seminar. Students will write one paper, with several revisions, based on the topic of their oral presentation in the co-requisite course BIOSC 1550. Topics will be chosen by the instructor for BIOSC 1550.  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1550 (MIN GRADE 'C'); PLAN: Ecology and Evolution (BS)  
Course Attributes: Capstone Course, Writing Requirement Course

BIOSC 1560 - CELL AND DEVELOPMENTAL BIOLOGY SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
In this seminar course, a single topic each term is developed by student presentations of research articles from the original scientific literature, as chosen by the instructor. Possible topics might include genes encoding major developmental switch proteins, the cytoskeletal basis of morphological movements in development, or establishing and subdividing body axes in development.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: BIOSC 1500 (MIN GRADE 'C'); CREQ: BIOSC 1520 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

BIOSC 1561 - CELL DEVELOPMENTAL BIOLOGY SEMINAR WRITNG PRACTICUM

Minimum Credits: 1  
Maximum Credits: 1  
This course is a writing practicum for the cell and developmental biology seminar. Topics will be chosen by the instructor for BIOSC 1560.  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1560 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)  
Course Attributes: Capstone Course, Writing Requirement Course

BIOSC 1570 - MICROBIOLOGY SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
In this seminar course, a single topic each term will be chosen in which the instructor is experienced and knowledgeable, and in which a suitable collection of primary research articles is available for student presentation. The papers to be discussed will be drawn primarily from the recent literature, and will reflect current concepts in microbiology.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: BIOSC 1865 (MIN GRADE 'C'); PLAN: Microbiology (BS)  
Course Attributes: Capstone Course

BIOSC 1571 - MICROBIOLOGY SEMINAR WRITNG PRACTICUM

Minimum Credits: 1  
Maximum Credits: 1  
This course is a writing practicum for the microbiology seminar. Topics will be chosen by the instructor for BIOSC 1570.  
Academic Career: Undergraduate
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0206 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1570 (MIN GRADE 'C'); PLAN: Microbiology (BS)  
**Course Attributes:** Capstone Course, Writing Requirement Course

**BIOSC 1580 - BIOCHEMISTRY SEMINAR**

Minimum Credits: 1  
Maximum Credits: 1  
In this seminar course, a single topic each term is developed by student presentations of research articles from the original scientific literature, as chosen by the instructor. Recent topics have included biosynthesis of peptide hormones, recombinant DNA technology, processing of mRNA precursors, protein folding with emphasis on the molecular biology and biochemistry of chaperonins, and protein translocation within cells.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 1820 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

**BIOSC 1581 - BIOCHEMISTRY SEMINAR WRITING PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
This course is a writing practicum for the biochemistry seminar. Topics will be chosen by the instructor for BIOSC 1580.  
**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0206 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1580 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)  
**Course Attributes:** Capstone Course, Writing Requirement Course

**BIOSC 1590 - SPECIAL TOPICS IN BIOLOGICAL SCIENCE**

Minimum Credits: 1  
Maximum Credits: 3  
A single major topic in biology will be developed and explored by students in the form of student presentations of current and/or historical literature.  
**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0350 or 0355 or BIOL 0203 or 0350 (MIN GRADE 'C'); MIN CUM GPA: 3.25

**BIOSC 1610 - CONSERVATION BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This field course will focus primarily on the applied aspects of conservation biology by examining the degradation and loss of species populations and ecosystems due to human activities and by considering alternatives for avoiding and/or mitigating these impacts. The perspectives of science, management, and policy will be elucidated in the context of historical, current, and future strategies designed to conserve the diversity of life.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0160 or 0165 or 0180 or 0191 or 0716) or (BIOL 0102 or 0120) (MIN GRADE 'C')

**BIOSC 1630 - COMPUTATIONAL BIOLOGY SEMINAR**

Minimum Credits: 2  
Maximum Credits: 2
Topics in computational biology will be explored using primary literature. Students will present research articles orally, as well as complete a series of writing assignments that will culminate in the production of a literature review paper.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 1540 (minimum grade of 'C') and (ENG 0102 or ENGCMP (0002 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); LEVEL: Junior or Senior; PLAN: CBUAS-BS and CBUSCI-BS

**BIOSC 1640 - COMPUTATIONAL BIOLOGY RESEARCH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will use computational biology methods to address an authentic research question.  
**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PREQ: BIOSC 1540 and (CS 0008 or 0010 or 0011 or 0012) and CS 0445; MIN GRADE 'C'; PLAN: Bioinformatics and Computational Biology Majors (BINF-BS and CBUAS-BS and CBUSCI-BS).  
**Course Attributes:** Capstone Course

**BIOSC 1690 - EXPERIENCE IN UNDERGRADUATE TEACHING**

**Minimum Credits:** 0.5  
**Maximum Credits:** 6  
A program to allow qualified undergraduate students to assist in the teaching of one of the BIOSC lecture or laboratory courses that they have successfully completed. Details of the student's responsibility must be worked out with the biological sciences faculty member in whose course the student will be assisting.  
**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** H/S/U Basis

**BIOSC 1691 - UNDERGRADUATE TA TRAINING IN THE BIOLOGICAL SCIENCES**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course trains Undergraduate Teaching Assistants in skills for successful teaching practices. The course may be taken either prior to becoming a UTA or simultaneously with BIOSC 1690 Experience in Undergraduate Teaching.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** Satisfactory/No Credit

**BIOSC 1730 - VIROLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents the concepts and methods of modern molecular virology. Principles of bacteriophage and animal virus replication are covered. Particular emphasis is placed on the use of viruses as model systems to approach basic problems in molecular biology. Applications of virological knowledge to medicine and biotechnology will be discussed.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 0350 or 0355 OR BIOL 0203 or 0350 or 0352) and (BIOSC 1000 and 1850) (MIN GRADE 'C')

**BIOSC 1740 - VIROLOGY LABORATORY**
This course is designed to give each student practical experience with the methods and techniques used in the study of viruses while conducting original research using bacteriophages.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (BIOSC 1855 or 1860) and (BIOSC 0350 or 0355 or BIOL 0203 or 0350); MIN GRADE 'C' for all courses; LEVEL: Junior or Senior

**BIOSC 1741 - VIROLOGY LABORATORY WRITING PRACTICUM**

Minimum Credits: 1  
Maximum Credits: 1  
Course is a writing practicum for virology laboratory, BIOSC 1740. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1740.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFSL 0210 or FP (0003 or 0006); CREQ: BIOSC 1740(MIN GRADE 'C')

**Course Attributes:** Writing Requirement Course

**BIOSC 1760 - IMMUNOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Course will describe the role of the immune system invertebrates. The molecular and cellular basis of immunity will be emphasized. The roles of antigens, antibodies and immunocompetent cells in pathogenesis and immunity will be covered. The applications of immunology in the design of vaccines, immunotherapeutic, immunodiagnostics, organ transplantation, cancer therapy, and immune system diseases will be discussed, as will the use of immunology in biological research.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BIOSC 0350 or 0355 or BIOL 0203 or 0350 or 0352 (MIN GRADE 'C')

**BIOSC 1810 - MACROMOLECULAR STRUCTURE AND FUNCTION**

Minimum Credits: 3  
Maximum Credits: 3  
This course is concerned primarily with the structure and functions of proteins and nucleic acids. These are large polymers where structure and function are determined by the sequence of monomeric units. Topics will include the physical and chemical properties of the monomer units (amino acids/nucleotides); the determination of the linear sequence of these units; analyses of the three-dimensional structures of the macromolecules; kinetics and mechanisms of enzyme catalyzed reactions, including RNA enzymes; regulation of enzyme activity; molecular recognition; and fidelity of protein synthesis. Emphasis throughout will be on experimental methods, molecular mechanisms and problem solving.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ:(BIOSC 0160 or 0165 or 0191 or 0180 or BIOENG 1071 or BIOENG 1072 or BIOL 0102 or 0120 ) (MIN GRADE 'C') and (CHEM 0320 or 0350 or 0740 or 0208 or 0232) PLAN:BIOSC-BS or BINF-BS or ECO-EV-BS or MICRO-BS or MOLBIO-BS or CBUAS-BS or CBUSCI-BS

**BIOSC 1820 - METABOLIC PATHWAYS AND REGULATION**

Minimum Credits: 3  
Maximum Credits: 3
The primary focus of this course will be on the pathways of intermediary metabolism by which all cells and organisms synthesize and degrade carbohydrates, lipids (fats), nitrogenous compounds, and nucleotides. Specifically, we will examine the chemistry of the reactions that constitute these pathways, and discuss how energy is derived from the breakdown of nutrients. A strong emphasis will be placed on how the pathways are regulated by specific molecules and hormones in living systems. Finally, we will consider how several human diseases arise from defects in metabolic pathways, and will review papers in the current scientific literature on new techniques by which the components of metabolic pathways are characterized in the laboratory.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 1810 (MIN GRADE 'C')

BIOSC 1830 - BIOCHEMISTRY LABORATORY

Minimum Credits: 2
Maximum Credits: 2
Course introduces several basic experimental techniques of biochemistry including spectrophotometry, ion-exchange and gel-permeation chromatography, radio-chemical methods, gel electrophoresis, enzyme isolation, and nucleic acid purification. Lecture will concern the techniques under study.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) and BIOSC 1810 (MIN GRADE 'C'); CREQ: BIOSC 1820 (MIN GRADE 'C'); PLAN: Molecular Biology Majors (MOLBIO-BS)

BIOSC 1831 - BIOCHEMISTRY LABORATORY WRITING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
Course is a writing practicum for biochemistry laboratory, BIOSC 1830. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1830.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1830 (MIN GRADE 'C'); PLAN; Molecular Biology (BS)
Course Attributes: Writing Requirement Course

BIOSC 1850 - MICROBIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the basic biology, diversity in types, and survival strategies of microorganisms. We will study basic topics, including microbial growth, metabolism, nutrition and genetics, as well as the relevance of microorganisms to human disease, biotechnology and environmental science.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0160 or 0165 or 0716 or 0191 or 0180 or BIOENG 1071 or 1072 or BIOL 0102 or 0120) and (CHEM 0120 or 0102 or 0112 or 0420 or 0720 or 0770 or 0970);Min Grade 'C' for these courses

BIOSC 1855 - INTRODUCTION TO MICROBIOLOGY LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Students in this course will culture microorganisms from natural samples such as soil, vegetables, and their own skin, and learn various methods in the process of studying the organisms they have cultured. The topics for the course include (a) survey types of microorganisms, including bacteria,
fungi, protozoa, algae, and bacterial viruses, (b) types of methods used to culture and study these microorganisms, (c) some practical applications of microbiology such as microbiological analysis of wastewater, and identification of clinical isolates.

**Academic Career:** Undergraduate

**Course Component:** Credit Laboratory

**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** PREQ: BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121 (MIN GRADE 'C'); CREQ: BIOSC 1850 (MIN GRADE 'C'); LEVEL: Junior or Senior

**BIOSC 1860 - MICROBIOLOGY LABORATORY**

**Minimum Credits:** 2  
**Maximum Credits:** 2

This laboratory course introduces basic techniques used for isolation of microorganisms in pure culture, identification of groups of microorganisms, and study of microbial physiology, genetics, and ecology. Some topics in applied microbiology that are covered include food microbiology, water and waste water analysis, and identification and antibiotic sensitivity-testing of pathogenic isolates. Viruses, archaeabacterial, bacteria, algae, protozoa, and fungi that students isolate from soil, pond water, human skin, and other sources are used to illustrate these methods.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** PREQ: (BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121) (MIN GRADE 'C'); CREQ: BIOSC 1850 (MIN GRADE 'C'); PLAN: Microbiology (BS)

**BIOSC 1861 - MICROBIOLOGY LABORATORY WRITING PRACTICUM**

**Minimum Credits:** 1  
**Maximum Credits:** 1

Course is a writing practicum for microbiology laboratory, BIOSC 1860. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1860.

**Academic Career:** Undergraduate

**Course Component:** Practicum

**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1860 (MIN GRADE 'C'); PLAN: Microbiology (BS)

**Course Attributes:** Writing Requirement Course

**BIOSC 1865 - MICROBIAL PHYSIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course examines the diversity of microbial life from a physiological point of view. We will examine the fundamental processes of microbial metabolism in diverse organisms, and develop a framework for understanding how organisms use different approaches to solve specific needs. Lecture material is appropriate for students trained in introductory microbiology and in biochemistry.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** PREQ: BIOSC 1850 and (BIOSC 1000 or 1810); Minimum Grade 'C'

**BIOSC 1870 - ANIMAL PHYSIOLOGY**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Course is a survey of the current state of our knowledge of how animals work. The emphasis will be on physiological mechanisms for survival in natural environments. A comparative approach will stress the diversity of physiological adaptations throughout the animal kingdom. Topics include nutrition, metabolism, muscle, respiration, circulation, osmoregulation, sensory and neural physiology, and hormones. The material will stress multi-cellular systems of organization at the levels of tissues, organs, and whole animals.

**Academic Career:** Undergraduate
BIOSC 1900 - BIOLOGICAL SCIENCES PEER ADVISING

Minimum Credits: 1
Maximum Credits: 1
Students in the Department of Biological Sciences will be trained as Peer Advisors who are able to share their experiences and offer appropriate advice on scheduling, studying, and extracurricular activities. Peer Advisors will meet with current and prospective BIOSC majors to help with course requirements, career preparation, and work-life balance while also helping to develop a stronger sense of community within our large department. Students must have permission from the Biological Sciences Advising Office to enroll. This course does not satisfy elective credits towards majors within the Department of Biological Sciences.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

BIOSC 1901 - INDEPENDENT STUDY

Minimum Credits: 0.5
Maximum Credits: 6
A program of independent reading with individual tutorials on a topic chosen in consultation with the BIOSC faculty member who will supervise the program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Requirements: BIOSC 0160 or 0716 or 0191 or 0180 or BIOL 0102 or 0120
Course Attributes: Capstone Course

BIOSC 1903 - UNDERGRADUATE RESEARCH

Minimum Credits: 0.5
Maximum Credits: 6
A program of independent laboratory research, with supporting library work, on a topic chosen in consultation with the BIOSC faculty member who will supervise the work.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Capstone Course

BIOSC 1904 - UNDERGRADUATE HONORS RESEARCH

Minimum Credits: 0.5
Maximum Credits: 6
A program of independent laboratory and library research on topic chosen in consultation with the BIOSC faculty member who will supervise the work.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Requirements: BIOSC 0060 or 0067 or 0068 or 0080 or BIOL 0121 and (BIOSC 0160 or 0716 or 0180 or BIOL 0120) or BIOSC 0191 or BIOL 0102 (MIN GRADE 'C')
Course Attributes: Capstone Course

BIOSC 1905 - HONORS RESEARCH WRITING PRACTICUM
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

BIOSC 1906 - RESEARCH COMMUNICATION: COMMUNICATION IN LIFE SCIENCES RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course introduces students to a variety of topics associated with the written, oral, and pictorial communication of scientific hypotheses, data, and results, using personal research experiences of students in the course. Students will read scientific literature, discuss how to present data and models, and complete diverse assignments. Techniques to model presentations for different audiences will be emphasized. It is recommended that students work in a research lab while taking the course. The course is for students enrolled in the research certificate in biological and biomedical sciences.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

BIOSC 1907 - RESEARCH DECONSTRUCTION: UNDER THE HOOD OF LIFE SCIENCES RESEARCH

Minimum Credits: 1
Maximum Credits: 1
This course takes an in depth look into how scientific research is done by studying where research is done, who does it, how questions are developed, how approaches and techniques are chosen, and how data is analyzed and presented. Students listen to a research seminar aimed at an expert audience, and then dissect the work throughout the semester. At the end of term, pieces from studying the research project are reassembled, a video of the seminar critiqued, and the course concludes with a Q+A session with the seminar speaker. The course is for students enrolled in the research certificate in biological and biomedical sciences.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: BIOSC 0160 or 0180 or 0191 or 0716 or BIOL 0102 or 0120 (MIN GRADE 'C'); CREQ: BIOSC 1903 or 1904 or NROSCI 1901 or 1961 (MIN GRADE 'C')

BIOSC 1908 - BIOLOGY ACADEMIC COMMUNITY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Students will be introduced to a broad range of careers in this academic community seminar course, which will include a career series with invited guest speakers from the community and workshops dedicated to researching career options and job searches. Students will prepare documents (CV, cover letter, secure letters of recommendation) for their career applications. This course is restricted to students who have applied and been selected to participate in a biology career exploration academic. This course does not satisfy elective credits towards majors within the department of biological sciences.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

BIOSC 1940 - MOLECULAR BIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Course will examine the molecular basis of life processes, with a primary emphasis on genes (what they are, what they do, how they determine the properties of an organism). Topics covered will include replication of DNA, transcription of DNA into RNA, and translation of RNA into protein. Much of the course will be concerned with how these processes are regulated in response to changes in the environment, and how this regulation
relates to the observed properties and behavior of the organism.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (BIOSC 0350 or 0355 or BIOL 0350 or 0203) and (BIOSC 1000 or 1810) (MIN GRADE 'C')

**BIOSC 1950 - MOLECULAR GENETICS LABORATORY**

Minimum Credits: 2
Maximum Credits: 2
This course will discuss the theories and methodologies that have recently emerged as the central theme of modern molecular genetics. Lectures will emphasize descriptions and applications of techniques such as molecular cloning, restriction site mapping, in vitro mutagenesis, the polymerase chain reaction and DNA sequence analysis that have led to the recent explosion in knowledge about chromosome organization, gene structure, and the regulation of gene expression. Laboratory sessions will emphasize polymerase chain reaction, agarose gel electrophoresis, cloning DNA fragments, bacterial transformation, restriction analysis, and the sanger method of sequencing DNA.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 0060 or 0067 or 0068 or 0191 or 0080 or BIOL 0102 or 0121 (MIN GRADE 'C'); CREQ: BIOSC 1940 (MIN GRADE 'C'); PLAN: Molecular Biology Majors (MOLBIO-BS)

**BIOSC 1951 - MOLECULAR GENETICS LABORATORY WRITING PRACTICUM**

Minimum Credits: 1
Maximum Credits: 1
Course is a writing practicum for molecular genetics laboratory, BIOSC 1950. Students will prepare laboratory reports and write essays based on exercises and assignments for the companion course, BIOSC 1950.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006); CREQ: BIOSC 1940 (MIN GRADE 'C'); PLAN: Molecular Biology (BS)

Course Attributes: Writing Requirement Course

**BIOSC 1999 - MEDICAL MICROBIOLOGY**

Minimum Credits: 3
Maximum Credits: 3
This is an advanced level lecture course educating students in the microbial aspects of human infectious diseases. Students will learn about the microbial basis of infection, the host response, and the nature of specific infections within the human body. The course also will present approaches for the diagnosis of infections and strategies for disease control. The topics of medical microbiology will be presented in a system-based rather than an organism-based approach.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: BIOSC 1850 (MIN GRADE 'C')

**Biological Statistics**

**BIOST 1200 - INTRODUCTION TO BIOSTATISTICAL REASONING**

Minimum Credits: 3
Maximum Credits: 3
This SIBS Pittsburgh program is an introduction to the most commonly used statistical tools in 2-sample comparative studies in medicine and public health, with an emphasis on applications in epidemiology and human genetics.
BIOST 1201 - SEMINAR IN BIOSTATISTICAL COLLABORATION

Minimum Credits: 1
Maximum Credits: 1
The SIBS Pittsburgh program is developed around the collaborative research of the participating faculty and is organized into three components. The seminar component is a paired set of presentations, an overview lecture on a general area and the presentation of a specific study/data set. The journal club component will involve reading and discussion of papers. In the independent study component small groups of students will meet with a study team and develop a small data analysis project.

BIOST 2011 - PRINCIPLES OF STATISTICAL REASONING

Minimum Credits: 3
Maximum Credits: 3
Acquaints students with the concepts of statistical reasoning as applied to the study of public health problems. Students learn the general principles of statistical analysis and acquire the ability to utilize a statistical software package (Minitab) as a tool to facilitate the processing, editing, storing, displaying, analysis and interpretation of health research related data.

BIOST 2012 - BAYESIAN & EMPIRICAL BAYES STAT

Minimum Credits: 3
Maximum Credits: 3
THE THEORETICAL FOUNDATIONS OF BAYESIAN AND EMPIRICAL BAYES STATISTICAL METHODS WILL BE PRESENTED. THE USE OF THESE METHODS IN DATA ANALYSIS WILL BE ILLUSTRATED WITH SPECIFIC EXAMPLES AND WITH DISCUSSIONS OF COMMON DATA ANALYSIS ISSUES CONTRASTS AND SIMILARITIES BETWEEN BAYESIAN, EMPIRICAL BAYESIAN, AND CLASSICAL METHODS WILL BE EVALUATED.

BIOST 2041 - INTRODUCTION TO STATISTICAL METHODS 1

Minimum Credits: 3
Maximum Credits: 3
Discusses techniques for the application of statistical theory to actual data. Topics include probability theory, estimation of parameters, and tests of hypothesis for both the discrete and continuous case.

Business

BUS 0005 - ENTREPRENEURSHIP, SMALL BUSINESS, & ECONOMIC DEVELOPMENT: ANALYSIS BETWEEN EUROPE & THE U.S.
Minimum Credits: 3
Maximum Credits: 3
This course analyses the way in which entrepreneurship and small business assist economic development. It focuses on the interrelationships between these two basic constitutive terms of the development process, and how they shape the process when they overlap. A comparative analysis of the main features of the entrepreneurial process and the development of the small business sector in Europe and the U.S. will be the core of the course.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUS 0010 - YOUR ACADEMIC AND CAREER SUCCESS

Minimum Credits: 1
Maximum Credits: 1
In this course, you will: learn the technical aspects (academic and experiential attributes) pertaining to the majors and certificates offered in CBA; explore paths of self-awareness and career opportunity utilizing assessment models including StrengthsFinder; Utilize Bloomberg Business Week to develop business literacy; explore global opportunities, such as study abroad, and the international internship program; develop networking skills, and relate those skills to establishing your personal and professional network; create a resume that has been reviewed by a professional development consultant; establish a CBA Connect account on which you will post your resume, schedule appointments with CLDC staff, register for events, view internship/job opportunities, and access secure documents; establish a professional profile on social media; and explore basic competency of Excel.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
Course Requirements: PROG: College of Business Admin

BUS 0020 - YOUR CAREER SUCCESS

Minimum Credits: 1
Maximum Credits: 1
In this course, you will: learn and practice a variety of tools used in the exploration of career paths (e.g., StrengthsFinder, Skill Clusters, informational interviewing, job shadowing, etc.); Explore your skills, abilities, and preferred roles and environments; develop and implement a personal strategy for career goal setting and planning; learn the internship and job search processes; learn and practice communication tools necessary throughout the job application process (e.g., resume, cover letter, social media, networking, interviewing, and accepting job offers).
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
Course Requirements: PROG: College of Business Admin

BUS 0600 - CONSULTING FIELD PROJECT

Minimum Credits: 3
Maximum Credits: 3
This course teaches management consulting in a real-world environment. Students are provided a unique opportunity to apply the analytical tools and concepts taught by Katz, and do so in a practical manner. Each project includes three to five students assembled as a team. Each project involves a single "client" organization, which may be a profit, non-profit, or governmental. Each client provides its assigned study team with a project of immediacy and an executive dedicated to working with the team. A faculty advisor is assigned to each team. Students schedule their own time, dovetailing with client schedules and that of their faculty advisor. Students are further supported three Saturday consulting workshops led by consultants from the Pittsburgh office of McKinsey & company, management consultants. An end-of-term competitive competition is also held, the winner being awarded the McKinsey cup.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BUS 1023 - GLOBAL PERSPECTIVES

Minimum Credits: 1
Maximum Credits: 1
This one-credit, one-week international experience is for students who wish to gain valuable experience and exposure to several business sectors and firms within the visited country. The purpose of experience is to focus on four industry-specific business sectors relevant to the historical, cultural, political, and economic background of the country. The sectors will be chosen from the following: healthcare, tourism/hospitality, arts, sports/athletics, human/social services, education, real estate, and banking. As a result of the experience, students will develop a "tool kit" of concepts and information regarding the cultural and business climate of the country in focus, begin developing of a working knowledge of how differences in cultural context affect business activities and develop a basis for critical evaluation of a country-specific, cross-sector business analysis.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**BUS 1027 - DOING BUSINESS IN ASIA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Undergraduate  
- **Course Component:** Lecture  
- **Grade Component:** Letter Grade

**BUS 1028 - DOING BUSINESS IN JAPAN**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The purpose of this course is to provide a broad introduction to business in Japan. Topics covered include: the Japanese economy, from post-war growth, through the 'bubble' and post-'bubble' years, to today; ongoing demographic, social/cultural, and structural change; human resource and production management; women in the workforce; and working with Japanese in a business setting. By the end of the course, students will be more knowledgeable about Japan and Japanese business, and about the opportunities and challenges facing Japanese firms and individuals working in or with Japanese firms.  
- **Academic Career:** Undergraduate  
- **Course Component:** Lecture  
- **Grade Component:** Letter Grade

**BUS 1392 - PERSONAL FINANCIAL PLANNING**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
This course deals with the basics of personal financial planning. Students will create personal financial plans based on projected horizons of 1, 3, and 5 years. The primary focus is on near term planning with emphasis on: initial savings, paying off student debt, judicious use of credit, and investing for short and long term goals. Students will prioritize and codify their plans based on personal, professional, and lifestyle objectives projected over the plans stated horizons.  
- **Academic Career:** Undergraduate  
- **Course Component:** Lecture  
- **Grade Component:** Satisfactory/No Credit

**BUS 1755 - SERVICE LEARNING IN ORGANIZATIONS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed around an experiential learning methodology in an international context that uses an international service project for a community organization to enhance student understanding of a particular content area in leadership and ethics. Students will be challenged to immerse themselves in readings, essays, and discussions in a specific content area that will be operationalized and reviewed throughout the duration of the community service project. Students in this course are required to participate in the international service learning component of the program.  
- **Academic Career:** Undergraduate  
- **Course Component:** Lecture  
- **Grade Component:** Letter Grade

**BUS 1900 - BUSINESS INTERNSHIP**
The business internship provides an opportunity for students to study in depth a particular area of business management in a work setting. An internship is primarily an academic experience, not a part-time or full-time job, in which students work for a firm or organization under a supervisor and faculty sponsor to achieve specific educational objectives.

**BUS 1901 - INDEPENDENT STUDY**

Minimum Credits: 1
Maximum Credits: 3
An independent study course for students desiring to pursue in greater depth a specific set of business problems or functions to which they have been introduced in other business courses. The course involves directed reading and research under guidance of a full-time faculty member.

Academic Career: CBA-DEAN
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Requirements: Restricted for College of Business Administration

**BUS 1904 - CBA FULL-TIME CO-OP**

Minimum Credits: 1
Maximum Credits: 1
CBA students who participate in a full-time career-developing internship experience as an integral part of their CBA academic program may register for this course. Students must have completed at least 60 credits, be in good academic standing, and plan to return to campus the first spring or fall term immediately following the internship term. Internships for this course are designated by the offering organization as full-time and lasting the duration of the term. Internship agreements specifying the academic work to be completed as part of the internship are required.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Requirements: Restricted for College of Business Administration

**BUS 1906 - CAREER EXPLORATION INTERNSHIP**

Minimum Credits: 1
Maximum Credits: 1
This internship course is designed to help students improve self-awareness of personal preferences with respect to career interests in the context of a work experience. Incorporates readings, self-assessment instruments and exercises, job analysis, journal entries and two performance appraisals. May be used for internships, summer jobs, part time jobs and full-time positions that involve work related to a possible career interest. The internship site may be located anywhere in the world.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

**BUS 1910 - BUSINESS INTERNATIONAL INTERNSHIP**

Minimum Credits: 3
Maximum Credits: 6

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

**BUS 1915 - DIRECTED RESEARCH**
BUS 1940 - STUDY ABROAD

Minimum Credits: 1
Maximum Credits: 18
Study abroad represents credits earned in an approved study abroad program.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis
Course Attributes: Non-Pitt Class

BUS 1995 - STUDY ABROAD: INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
The study abroad internship provides an opportunity for students to study in depth a particular area of business management in a work setting outside of the United States. An internship is primarily an academic experience, not a part-time or full-time job, in which students work for a firm or organization under a supervisor and faculty sponsor to achieve specific educational objectives.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

BUS 1997 - STUDY ABROAD: EXCHANGE PROGRAM

Minimum Credits: 1
Maximum Credits: 18
The study abroad exchange program represents credits earned in an approved exchange agreement between the university of Pittsburgh and another educational institution.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

Business Accounting

BUSACC 0030 - FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
Helps students become informed users of firms' external financial accounting reports. The basic structure and contents of such reports and the process by which they are prepared will be studied. Discussion will involve what items are included in financial accounting reports, how such items are measured, and how various economic events affect the reports. An understanding of what can be inferred from the reports about the past performance, present position, and future prospects of the firm will be developed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECON 0100 or 0102 or 0103 or 0105 or 0110 or 0115 or 0120; PROG: College of Business Administration; LVL: So, Jr, Sr

BUSACC 0040 - MANAGERIAL ACCOUNTING
Minimum Credits: 3
Maximum Credits: 3
Introduces students to the basic terminology and concepts of cost accounting, including product costing, budgetary control, responsibility accounting, and the use of cost information in resource allocation and other managerial decisions. Textbook material and various applications in actual organizations are used to engage students in applying the concepts and methods that have been developed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201; PROG: College of Business Administration

BUSACC 1204 - INTERMEDIATE FINANCIAL REPORTING 1

Minimum Credits: 3
Maximum Credits: 3
Covers the conceptual framework of financial accounting and its influence on Generally Accepted Accounting Principles (GAAP), with special emphasis on the valuation of assets and measurement of income.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC0030 or BUSERV1920 or CDACCT6030 or MGMT0022 or BUS0115 or ACCT0201 and (BUSACC0040 or BUSERV1925 or CDACCT6040 or MGMT0023 or BUS1110 or ACCT0202); MINGRADE 'C' for Listed Courses; PLAN: Account, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared, Not Candid for degree-Pre-MACC

BUSACC 1205 - INTERMEDIATE FINANCIAL REPORTING 2

Minimum Credits: 3
Maximum Credits: 3
Topics covered include valuation of liabilities, owners' equity, cash flow statements, and disclosure outside the primary financial statements. Like intermediate financial reporting 1, this course also engages students as active participants in the learning process. Required for all accounting majors.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 1204; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared, Not Candid for degree-Pre-MACC

BUSACC 1210 - FINANCIAL STATEMENT ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSACC 1216 - ADVANCED FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
Covers topics that are of particular interest to financial report preparers and auditors. Special emphasis placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by
fiduciaries. Required for all accounting majors pursuing the CPA track.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 1205; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business
Information Systems, Human Resources Management, Supply Chain Management, Undeclared

BUSACC 1221 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Topics covered include how product cost measurement affects resource allocation decisions; how to design modern cost systems; the strategic role of
cost information and the relationship between process improvement and cost reduction; performance measurement and organizational transformation
for value creation.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (BUSACC0030 or BUSERV1920 or CDACCT6030 or MGMT0022 or BUS0115 or
ACCT0201) and (BUSACC0040 or BUSERV1925 or CDACCT6040 or MGMT0023 or BUS1110 or ACCT0202); MINGRADE 'C''For Listed
Courses; PLAN: Acct, Fin, Gen Mgmt, Gibl Mgmt, Mrktng, Undcldr CBA, BIS, HRM, SCM

BUSACC 1236 - ACCOUNTING INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Focuses on the design and implementation of accounting information systems and their ability to: collect data on the activities of an organization,
accumulate and summarize the data, and make the information available to managers for analysis, decision-making and control.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (BUSACC0030 or BUSERV1920 or CDACCT6030 or MGMT0022 or BUS0115 or
ACCT0201) and (BUSACC0040 or BUSERV1925 or CDACCT6040 or MGMT0023 or BUS1110 or ACCT0202); MINGRADE 'C''For Listed
Courses; PLAN: Acct, Fin, Gen Mgmt, Gibl Mgmt, Mrktng, Undcldr CBA, BIS, HRM, SCM, Not Cand Pre-MACC

BUSACC 1238 - AUDITING

Minimum Credits: 3
Maximum Credits: 3
Introduces auditing process and profession. Main topics include nature and purpose of auditing, auditing standards, professional conduct, auditor
legal liability and approaches in auditing financial statements. Emphasizes a risk-based approach to selecting appropriate auditing techniques.
Examines auditor's decision process relating to internal control assessment, audit decision process relating to internal control assessment, audit
sampling and obtaining audit evidence about financial accounts. Examines extent of auditor's responsibility to uncover fraud.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 1205; CREQ: BUSACC 1236; PLAN: Accounting, Finance, General Management, Global Management,
Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared, Not Cand for Degree-Pre-
MACC

BUSACC 1242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on individual tax return preparation and planning. Students will learn how to calculate the taxes associated with a variety of
personal, investment, property, and sole-proprietorship transactions. Concepts will be reinforced through the preparation of actual tax returns that
reflect different combinations of such transactions. Students will develop tax planning skills by considering how various transactions can be
restructured to minimize the current or future tax liability.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared

**BUSACC 1250 - SURVEY OF INTERNATIONAL ACCOUNTING ISSUES AND THE IASB**

Minimum Credits: 3  
Maximum Credits: 3  
This financial accounting elective focuses on exposing students to the international accounting standards setting process and the study of the application of international accounting issues in business. Learning will take place through a mix of classroom time as well as experienced based learning opportunities, with each weekly class focused on an accounting issue and a related site visit experience with a company working on the accounting issue. Participation requires a good understanding of the accounting process and an interest in the global business environment.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

**BUSACC 1296 - ACCOUNTING INTERNSHIP**

Minimum Credits: 3  
Maximum Credits: 3  
The accounting internship provides business credits for project assignments that augment a professional accounting work experience.

Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: Satisfactory/No Credit  

**BUSACC 1298 - ACCOUNTING INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 3  
An independent study course for students desiring to pursue in greater depth a specific set of accounting issues or problems to which they have been introduced in other accounting courses. The course involves directed reading and research under the guidance of a full-time faculty member.

Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: Letter Grade  

**Business Economics**

**BUSECN 1010 - MANAGERIAL ECONOMICS**

Minimum Credits: 3  
Maximum Credits: 3  
Primarily an applied microeconomics analysis although some applied macroeconomic analysis of relevance to the business firm may also be treated. Emphasizes the development of economic tools and concepts which can be used in the firm's management decision-making process. Builds upon the standard economic analysis of the firm which integrates a company's revenue, cost, output and pricing decisions. Marginal and incremental reasoning is stressed as an important decision making principle.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0120 or 0126 or 0136 or 0140 or 0220 or 0235) and (ECON 0100 or 0102 or 0105 or 0120) and (ECON 0103 or 0110 or 0115 or 0120); PROG: College of Business Administration

BUSECN 1508 - INTERNATIONAL ECONOMICS FOR MANAGERS

Minimum Credits: 3
Maximum Credits: 3
This course introduces the broad field of int'l econ, with emphasis on developing framework for effective management in today's global economy. Key issues and problems are explored in areas of int'l trade, int'l investment & int'l payments, from perspective of manager of enterprises in operating in a cross-border, int'l environment. The approach will be verbal, graphical and non-technical and will draw from actual data sets and late-breaking news items from such business-oriented publications as Financial Times Economist, Wall Street Journal and New York Times.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: International Business (CPIB-CR1) or Global Management (GLMGT-BSBA)
Course Attributes: Global Studies, Russian & East European Studies, West European Studies

Grade Component: Letter Grade

Business Environment

BUSENV 0060 - MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Examines the social, political and legal interfaces between the business institution (especially the corporation) and the environment. Topics typically considered include ethical and value issues in business, the social responsibilities of business, business-government relations, and the management of stakeholder relationships and corporate social policy.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: College of Business Administration; LVL: So, Jr, Sr
Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req.

BUSENV 0061 - CERTIFICATE PROGRAM IN LEADERSHIP AND ETHICS: MANAGERIAL ETHICS AND STAKEHOLDER MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Course examines the social, political and legal interfaces between the business institution (especially the corporation) and the environment. Topics typically considered include ethical and value issues in business, the social responsibilities of business, business-government relations, and the management of stakeholder relationships and corporate social policy. This section is reserved for students pursuing the Certificate Program in Leadership and Ethics.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Leadership and Ethics (CERT)
BUSENV 1701 - ETHICAL LEADERSHIP FUNDAMENTALS

Minimum Credits: 1
Maximum Credits: 1
In this first integrated seminar of the CPLE sequence, students are introduced to ethics concepts and leadership skills - with a particular emphasis on demonstrating how ethics and leadership are complementary areas of emphasis for an effective leader. Ethics and leadership must be considered together in order to produce leaders who have the foresight to consider issues of responsibility, account ability and the full impact of their actions as well as a skill set that will empower them to implement their vision.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1706 - MARKET MANIPULATIONS: CRISIS, BUBBLES, ROBBER BARONS AND CORPORATE SAINTS

Minimum Credits: 3
Maximum Credits: 3
Taking a historical perspective, the course focuses on the major kinds of market manipulations, as well as their impacts. Major topic areas include: the nature of a market and its 'failures,' and how firms as well as governments evolved to compensate for those failures; types of major market calamities, with historical comparisons, examining how they might have been successfully managed; the market manipulators, focusing on the 'robber barons' of the 'gilded age;' and the contexts and consequences of market manipulation, including an overview of factory towns and of worker impacts.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSENV 1750 - LEADERSHIP AND ETHICS INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
Students will complete both social and ethics audits of the organization for which they are working an internship assignment. These exercises are designed to lead students to examine and critique their organization's commitment to ethics and leadership in a critical, yet balanced, manner. The content of the internship course centers around students independently recognizing & identifying how issues related to ethics & leadership are & are not addressed in the organizations that they serve. Students permitted to take any internship approved by CBA's Berg Center for Leadership and Ethics.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Requirements: PLAN: Leadership and Ethics(CERT)

BUSENV 1755 - SERVICE LEARNING IN ORGANIZATIONS

Minimum Credits: 3
Maximum Credits: 3
This course is designed around an experiential learning methodology that uses a service project for a community organization to enhance student understanding of a particular content area in leadership and ethics. Students will be challenged to immerse themselves in readings, essays and discussions in a specific content area that will be operationalized and reviewed throughout the duration of the community service project.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Leadership and Ethics (CERT)

BUSENV 1757 - RACE AND BUSINESS ETHICS
In what ways are corporations responsible for alleviating racial injustice? The Race and Business Ethics course is designed to give students the confidence and ability to address pressing social issues that are affecting corporate decision-making. Corporate leaders are making heavy investments in training and leadership programming to build a deeper understanding of racial injustice with the hope of bringing about a more fair and equitable society. The pressure on leaders to envision social issues as a part of corporate strategy comes from internal and external stakeholders and is consistent with the rise of important business movements that include sustainability and corporate social responsibility. Topics addressed in the course include African-American entrepreneurship, white racial identity, theories of justice, and structural racism, among others. Course assignments include a formal debate concerning front-page issues, leading a conversation about race via social media networks, and reading-based examinations. Students who take the course will be presented with readings, speeches, films, and other media that take a scholarly approach to the issue of race and the variety of ways it continues to exert its force on culture and commerce.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**BUSENV 1760 - BUSINESS LAW**

Minimum Credits: 3  
Maximum Credits: 3  
Provides students with an exposure to the extensive laws and regulations that affect almost all major aspects of business operations. Topics covered are chosen on the basis of their importance to contemporary business.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**Course Requirements:** PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

**BUSENV 1765 - LEADERSHIP IN THE SOCIAL ENVIRONMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course will give CPLE students exposure to in-depth analysis of leadership concepts and techniques in personal, interpersonal, and group skill areas. Students will complete a number of assessment and skill development exercises in topics such as teamwork, motivation, agenda building, power and influence tactics, problem solving and decision-making. The exercises will be grounded in students' real world experiences in internships, leadership roles and campus and community organizations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**Course Requirements:** PLAN: Leadership and Ethics (CERT)

**BUSENV 1770 - BUSINESS ENVIRONMENT INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 3  
An independent study course for students desiring to pursue in greater depth a specific set of business environment issues or problems to which they have been introduced in other business environment courses. The course involves directed reading and research under the guidance of a full-time faculty member.

**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** Letter Grade

**BUSENV 1775 - CPLE CAPSTONE SEMINAR**

Minimum Credits: 3  
Maximum Credits: 3  
In this final course of the CPLE sequence, student will take a capstone seminar that is essentially a graduate-level research seminar on specific
content areas in ethics and leadership. Based on previous exposure to the research process in the integrated seminars, students in the capstone seminar will be challenged to develop a substantial research project on their primary area of interest and expertise.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Leadership and Ethics (CERT)

**BUSENV 1780 - CORPORATE GOVERNANCE**

Minimum Credits: 3  
Maximum Credits: 3  
Corporate governance, the set of policies, process and customs by which an institution is directed, is a topic of increasing importance. How a company is governed influences corporate performance, rights and relationships with its stakeholders. This course aims to provide a deep understanding of the fundamentals of corporate governance from a variety of angles - the board of directors, senior management, investors, media, regulators and society - and from an international perspective. After a highlight on the main issues of corporate governance (e.g. the relationships between owners, management, board and institutional environment), relevant theories and corporate governance practices will be analyzed. Students will gain skills required for understanding corporate behavior and will be introduced to issues in business and government relations through lectures, discussion and case/policy studies.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**BUSENV 1785 - SOCIAL ENTREPRENEURSHIP**

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to introduce students to the complex dynamics of social entrepreneurship. This course covers theory, conceptual frameworks, and tools used to formulate strategies for creating innovative solutions to impact the public good. Topics addressed include defining social entrepreneurship and social initiatives, understanding the differences between traditional and social entrepreneurship, evaluating existing social ventures, and developing a plan for a new social venture. The course will consist of interactive lectures, readings, case discussions, and original research conducted by students.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**BUSENV 1790 - BUSINESS ENVIRONMENT INTERNSHIP**

Minimum Credits: 3  
Maximum Credits: 3  
The business environment internship provides business credits for project assignments that augment a professional business environment work experience.

**Academic Career:** Undergraduate  
**Course Component:** Internship  
**Grade Component:** Letter Grade

**BUSENV 1791 - PROJECTS IN ENTREPRENEURSHIP**

Minimum Credits: 3  
Maximum Credits: 3  
This project course will involve an entrepreneurial incubator called the "Blast Furnace" during which you can learn about bringing an idea to the market and what it means to be an entrepreneur. The first part of the class will educate you on what is a good idea and what it means and takes to start a business. The second part of the course provides access to a rich curriculum, mentor and coaches and co-working space to prepare you to create and grow a business.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade
BUSENV 1795 - BUSINESS AND POLITICS

Minimum Credits: 3  
Maximum Credits: 3

The financial crisis, international negotiations toward a climate change agreement, and crises in such industries as pharmaceuticals and even toy manufacturing have highlighted the increasing interdependence of business and government. Such events often also expose the means by which business gains strategic benefits from government regulation. This course will examine methods and patterns of business influence on government, modern approaches to regulatory design, policy-making on issues affecting business, the performance of regulatory agencies, and the behaviors of groups and trade associations in politics.

Business Information Systems

BUSBIS 1060 - INTRODUCTION TO INFORMATION SYSTEMS

Minimum Credits: 3  
Maximum Credits: 3

IT does not matter it's what you do with IT! Business in the 21st century runs on IT. However, competitive advantage seldom comes from having exclusive or proprietary access to a technology. Rather, it comes from more effectively utilizing technologies to which everyone - including the competition - has access. The implications of this reality are many. First, it is necessary to understand what technologies are available in the marketplace and their capabilities. Next, and far more challenging, is necessary to understand how these capabilities may positively (or negatively) interact with business strategy. Business transformation is the alignment of process, people, and technology such that IT can both support and innovate business strategies. Given that technologies evolve and develop at a rapid pace, IT is necessary for managers to understand what technologies can do (both established and new) and how IT can be leveraged to create real value.

Academic Career: Undergraduate
Course Component: Lecture

**BUSBIS 1625 - ELECTRONIC COMMERCE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will cover: (1) electronic business, defined as the use of internet and related communication technologies for organizational communication, coordination, and management of the firm; (2) electronic commerce, defined as the process of buying and selling goods and services electronically; and (3) societal implications of the new technologies. Students will be evaluated on the basis of class participation, assignments, quizzes, exams, and a business plan where students propose e-commerce solutions to tackle specific organizational or business problems and opportunities.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Accounting(BSB), Finance(BSB), General Management(BSB), Global Management(BSBA), Marketing(BSB), Business Information Systems(BSB), Human Resources Management, Human Resources Management(BSB), Supply Chain Management(BSB) and undeclared CBA Majors

**BUSBIS 1630 - PROJECT MANAGEMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Planning, organizing, staffing, and controlling projects requires traditional management skills as well as an appreciation of the tools, techniques, and practices unique to project management. This course starts with an overview of project management concepts, and then focuses on project planning, estimating, monitoring, and controlling. It also covers topics related to being an effective project leader and managing project teams. The project management institute (PMI), a professional organization for project managers, has produced a guide to the project management body of knowledge, which documents the knowledge and practices needed by today's project managers. This guide, along with current research and management trends related to project management, provide the framework for material covered in this class.

988
BUSBIS 1635 - INFORMATION TECHNOLOGY SYSTEMS IN SUPPLY CHAINS

Minimum Credits: 3
Maximum Credits: 3

This course examines the advantages and complexities of ERP software and demonstrates how the system can improve processes and streamline operations as applied toward a global supply chain. ERP systems provide a competitive advantage for a company by allowing the management of different functions and processes in one single corporate information system, providing access to real-time data within the company, enabling greater business agility and strategic decisions. Accordingly, information technology systems in supply chains has been designed to provide students with: strong knowledge of enterprise resource planning (ERP) systems and how companies leverage ERP software to manage global supply chains. Hands-on experience with the execution of supply chain business processes in sap, an industry leader in ERP business software. Practical skills, acquired through experience-based learning activities, which will make students more effective working in a collaborative, global, virtual business world.

BUSBIS 1640 - IT ARCHITECTURE AND PLATFORMS

Minimum Credits: 3
Maximum Credits: 3

There is no such thing as a technology decision. There are only business decisions. The options and issues affecting the deployment and utilization of business information systems have grown in number and greatly increased in complexity since the internet and concomitant technologies have become the most important de-facto standards for business computing and networking. Business people who are involved in technology selection and deployment decisions need a basic knowledge of these areas as well as an understanding the value, costs and benefits they might offer to a business. They also must be able to find out about and evaluate new or emerging technologies and issues that could have relevance in their business situations. They then need to be able to explain all of this to other business people - in business terms. This course will utilize: lectures and presentations by the instructor and outside speakers to present current and relevant architectures and issues that affect businesses deploying information systems; full-length case studies and class discussion to facilitate the examination of the business implications of and the context in which these system deployment factors are involved; team projects to give the students experience in researching, understanding, evaluating and explaining information technologies and issues within a business context.

BUSBIS 1645 - INFORMATION SYSTEMS ETHICS

Minimum Credits: 3
Maximum Credits: 3

This course provides an overview of ethics concepts and decision-making as they are related to Information Systems and Computing. Emphasis is placed on the study of ethical situations and responsibilities of IS professionals around current and emerging technologies in a global setting. Research papers, Case studies and discussion of current ethical events around technology will be used to facilitate discussions in areas including, but not limited to: Cloud Computing, Data protection, Cyber Security, The Digital Divide, Social Media, Intellectual Property, Whistleblowing, Professional Codes of Conduct, Professional liability, Internet freedom in computing and international laws and governance. Invited Subject Matter Experts will conduct informative sessions on key subject matter areas aligned with the course content.

989
In today's world, businesses rely on Information Systems (IS) to be the key enabler that supports the business processes and decision making. IS catapults businesses to the next level of growth and sustainable competitive advantage. More and more companies are either implementing brand new IS system with cutting edge business tools and technologies, or implementing newer modules like CRM (Customer Relationship Management) or SCM(Supply Chain Management). When businesses undertake a project to implement a new IS solution, they often lack the internal knowledge, expertise and tools necessary to make it succeed. Hence comes the need to look for external expertise from IS Consultancy Firms. MCS or Management Consultancy Services is a line of business that provides consultancy services to their clients for implementation of new IS systems. The tools for business analysis required by a Business Analyst are covered in the course BISBIS 1600 - Technology Enabled Business Transformation. The tools for Project Management are covered in the course BUSBIS 1630 - Project Management. This course has these as preferably prerequisites, else co-requisites and takes the student further to learn the skillsets needed of an IS Consultant. The course begins with a brief recap of fundamental concepts covered in BISBIS 1600 and BUSBIS 1630. It then proceeds to simulate an actual real life, full cycle IS Consultancy Project. The class is divided into groups each of which represent an individual IS Consultancy Firm engaged by a client to implement a full cycle IS solution. The course takes the student through the complete life cycle of an IS Implementation as done by a Consulting Company: 1. Planning 2. Analysis 3. Design 4. Development 5. Testing 6. Deployment The instructor serves as the client and another group as the Development team. Each consulting group works towards the completion of each phase of the Consulting Project and present its deliverables, thereby working towards the final deployment. The student stands to benefit tremendously from the course as it develops all the skillset necessary for a Consultant including hard skills and soft skills. The student becomes tremendously marketable to any company, be it a consulting firm, or a regular company looking to run its own IS project.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

Design thinking refers to a transformation and problem-solving approach that emphasizes strong user orientation and agile iterations with multidisciplinary teams. Aiming to create ideas and solutions that are emotionally meaningful, functional, and economically viable, "design thinking integrates the needs of people, the possibilities of technology, and the requirements for business success." Design thinking is applicable to both startups and mature organizations to design new offerings or re-design existing teams, products, services, business models, or platform ecosystems. Adopting a hands-on and experience-based learning approach, this course introduces design thinking to business undergraduate students. Through lectures and case discussions students will learn about the design thinking process and the applications of design thinking for digital transformation across a variety of industries. Students will also work in teams to participate in a design challenge project.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

Disruptive technologies refer to technological advancements that overturn established business methods and practices. The diffusion of disruptive technologies in an industry prompts a new competitive race among the firms in the industry, resulting in the rise of new firms, demise of mature firms, and/or a reshuffle of leaders and laggards in the industry. In this course, we'll learn about the business and technological conditions in which disruptive innovation materializes, examine historical advancements in technologies that have disrupted industries, survey emerging technologies, such as cryptocurrencies, distributed ledgers, and robotics enabled by artificial intelligence (AI) technologies, and investigate both the designs and applications of these emerging technologies for creating business value. Through lectures, case discussions, and hands-on projects, students will develop an appreciation of the emerging disruptive technologies and their applications in business. Students will also work in teams to participate in a business plan development exercise that leverages an emerging disruptive technology.

Academic Career: Undergraduate
BUSBIS 1665 - IMPROVING THE USER EXPERIENCE

Minimum Credits: 3
Maximum Credits: 3

While many organizations have outsourced the design of production systems, there is still a need to provide high quality specifications for those systems. In addition, the Internet and e-commerce explosion of the late 1990s has created an even wider need to design corporate websites and apps. Designers and developers should take into account what we know about human factors engineering to improve the user experience (UX). This course focuses on how to gather requirements, achieve a usable first draft, and test and improve that draft. A half-dozen course projects include usability critiques, assessments of users' difficulties in understanding systems, and designs of forms, screen layouts, and icons. A running major project in four parts provides a usability critique of a website or app, followed by empirical tests of usability, followed by suggestions for improvement, and finally, empirical tests of prototype screens (using an easy tool) that would implement improvements. A final presentation is a summary of all four stages that is intended to convince management to provide funds to make the changes.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSBIS 1670 - DATA WAREHOUSING

Minimum Credits: 3
Maximum Credits: 3

A data warehouse refers to an enterprise-level, centralized repository that stores current and historical data, which is used for managerial reporting and decision making. A data warehouse differs from a relational database used for facilitating transactions both in architecture and use. In this course, students will learn the architectural concepts of data warehouses such as the star schema and the processes involved in utilizing data warehouses for enterprise data management. Such processes include the extract, transform, and load (ETL) steps of populating data warehouses from disparate data sources, and online analytical processing (OLAP) for querying and managerial reporting. This course will emphasize a hands-on approach and the acquisition of the following skills: Dimensional design process for a data warehouse -Executing ETL steps for data management, OLAP for managerial reporting and decision-making The primary mode of learning will be through hands-on exercises and cases. A major component of the course grade stems from the course project that is done individually. Students should expect intensive out-of-class readings and practice sessions to get the most out of this course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSBIS 1605

Organizational Behavior

BUSORG 1020 - ORGANIZATIONAL BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3

Provides an overview of topics and concepts in the field of organizational behavior. Emphasis is on developing a theoretical grasp of issues and problems as well as an understanding of the practical implications of various theories of human behavior at work. Specific topics include leadership, motivation, teamwork, career issues, work roles, job enrichment, employee participation, and work and non-work integration.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: Restricted for College of Business Administration

BUSORG 1021 - ORGANIZATIONAL BEHAVIOR HONORS +1

Minimum Credits: 1
Maximum Credits: 1
BUSORG 1101 - FUNDAMENTALS OF BUSINESS COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Provides conceptual foundations and training in key communication skills essential for a business professional's effectiveness. Develops skills in oral presentation, interpersonal communication, and communication in teams as applied in business settings.

BUSORG 1640 - THE ENTREPRENEURSHIP PROCESS

Minimum Credits: 3
Maximum Credits: 3
Emphasis will be placed on business principles vital to the entrepreneurship process, including idea generation, feasibility analysis, the integration of the functional areas of business (strategy, marketing, finance and accounting), building a new venture team, securing financing and protecting intellectual property. Through case studies, video clips and visiting entrepreneurs, these principles will be contextualized with real-life entrepreneurial successes and failures.

BUSORG 1645 - CORPORATE ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
The course concentrates around the question: how do companies strategically manage technology & innovation? The goal is to provide theories and methodologies relevant to the management of innovation which will help achieve a sustainable competitive advantage for firms. Students will have to apply ideas, concepts, tools, and frameworks introduced in the course to real world cases. They will be challenged to develop and defend their opinions in matters that are not always straightforward.

BUSORG 1650 - ISSUES IN CAREER MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Focuses on the issue of careers in organizations or the sequences of jobs and occupations that a person will hold over his or her lifetime. Examines a variety of perspectives on career management. Focuses on the individual and organizational factors in career development by addressing issues such as career planning, job choice, work socialization, career stages, mentoring and work and family concerns.

BUSORG 1655 - INTERNATIONAL DIMENSIONS OF ORGANIZATIONAL BEHAVIOR

Minimum Credits: 3  
Maximum Credits: 3  
Provides an introduction to organizational behavior in a global context. Emphasis is on applying core organizational behavior concepts such as leadership, motivation, and group processes, as well as more contemporary topics such as cultural diversity and expatriation to workers in Europe, Asia, and the Americas. Develops an understanding of culture and cross-cultural differences and an awareness of the key skills needed to interact effectively in cross-cultural settings.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSORG 1020; PLAN: International Business (CPIB-CR1) or Global Management (BSBA)  
Course Attributes: Global Studies, West European Studies

BUSORG 1660 - MANAGING DIVERSITY IN ORGANIZATIONS

Minimum Credits: 3  
Maximum Credits: 3  
Examines the similarities and differences in the work experiences of men and women within organizations. Also examines some of the individual and organizational consequences of gender and work. Topics include gender role attitudes, occupational segregation, gender and leadership, sexual behavior within the workplace, career mobility and workforce diversity.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

BUSORG 1665 - LAW, ENTREPRENEURSHIP, AND INNOVATION

Minimum Credits: 3  
Maximum Credits: 3  
This hands-on, practical course is intended to expose students to founders of innovation companies and the legal issues they face. The course will take students through the life cycle of a technology start-up company, from concept and formation to exit (IPO or sale), through careful analysis of relevant legal documents and case studies, as well as participation in lectures, workshops and simulations. The course will cover choice of entity and formation, employee hiring and compensation, evaluation and protection of intellectual property and the development of a comprehensive IP strategy, valuation and financing, licensing and sales, multinational operations, and exit strategies. The course will provide students with the legal framework and tools necessary to launch and grow a successful technology start-up.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

BUSORG 1670 - ORGANIZATIONAL BEHAVIOR INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 3  
An independent study course for students desiring to pursue in greater depth a specific set of organizational behavior issues or problems to which they have been introduced in other organizational behavior courses. The course involves directed reading and research under the guidance of a full time faculty member.  
Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: Letter Grade

BUSORG 1701 - SOCIAL ENTREPRENEURSHIP
BUSORG 1703 - ENTREPRENEURIAL PROCESS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSORG 1705 - MINORITY AND IMMIGRANT ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

This course introduces students to minority and immigrant entrepreneurship. It aims to provide participants with both the intellectual and practical knowledge needed to understand the advantages and hurdles involved in minority and immigrant entrepreneurship. Emphasis is placed on experiential learning through simulations and interviewing an entrepreneur. Participants are also exposed to some of the fundamental writings on entrepreneurship research, documentaries, short articles and business cases to understand the minority and immigrant entrepreneurial process.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

Business Service

BUSERV 1365 - GLOBAL LEADERSHIP CAPSTONE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSERV 1370 - GLOBAL LEADERSHIP FIELD PRACTICUM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit

BUSERV 1910 - INTRODUCTION TO BUSINESS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate

Provides an overview of how American business operates in our economy. Emphasis is given to the study of management, planning, personnel, finance, and marketing, and how these are interrelated within our business system. The activities in each of these functions are discussed, role of the participants analyzed, and underlying theories examined. The student should gain an insight into the primary activities in business and an understanding of their practical applications.
BUSERV 1915 - INTRODUCTION TO MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Introduces the basic roles of managers such as planning, organizing, controlling, staffing, and directing. Aspects of leadership, motivation, organization structure, and the interdependence of functional subsystems will also be covered. Emphasis is placed on management practice.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BUSERV 1920 - FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
A study of accounting and financial concepts pertaining to the business enterprise, with emphasis on the understanding and use of accounting and financial data. This course develops the ability to analyze and interpret internal and external financial developments as they relate to a business enterprise and provides an operational knowledge of the accounting cycle.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

BUSERV 1925 - COST ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
This course has three objectives: (1) to develop an understanding of the broad range of cost accounting concepts underlying cost determination and analysis; (2) to provide familiarity with the controls that are afforded in the application of cost accounting concepts; and (3) to create an awareness of how cost accounting can contribute to decision-making and planning. These objectives are accomplished through analyses of the behavior and economic data within the firm, evaluation of actual and standard cost systems, and the examination of cost measurements.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREG: BUSERV 1920; MIN GRADE 'C'

BUSERV 1940 - MARKETING FUNDAMENTALS

Minimum Credits: 3
Maximum Credits: 3
Provides an understanding of the roles of marketing in the economy and the firm, and develops a rationale for a marketing perspective as a guide to organizational and individual actions.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSERV 1955 - PRINCIPLES OF SELLING

Minimum Credits: 3
Maximum Credits: 3
Examines aspects of personal selling and the links between the seller and the buyer. The establishment of rapport through the development of interpersonal skills and the translation of company or self-objectives into decisions that motivate the sales force are included. Methods of recruiting and selecting the salesperson, training the salesperson, problems of evaluation, establishing personal credibility, handling objections, closing a sale, establishing one's personal goals, and objectives and procedures for self-management are included.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSERV 1985 - SMALL BUSINESS MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Introduces basic principles and practices for successful management of a small business. Topics include the economic environment, development of personal and organization objectives, marketing production, finance, credit, accounting, business law, and records management.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Career Development Accounting

CDACCT 6030 - FINANCIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
Helps students become informed users of firms' external financial reports. The basic structure and contents of such reports and the process by which they are prepared will be studied. Discussion will involve what items are included in the reports, how such items are measured, and how various economic events affect them. An understanding of what can be inferred from the reports about past performance, present position, and future prospects of the firms will be developed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECON 0102 or 0103 or 0110 or 0115 or 0120; MIN GRADE: 'C' For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6040 - MANAGERIAL ACCOUNTING

Minimum Credits: 3
Maximum Credits: 3
Introduces students to the basic terminology and concepts of cost accounting, and provides an introductory coverage of product costing, cost allocation, budgetary control, responsibility accounting, and the use of cost information in resource allocation and other managerial decisions. Textbook material and real world examples are used to engage students in extensive problem solving.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201; PLAN: Accounting (CERT)

CDACCT 6204 - INTERMEDIATE FINANCIAL REPORTING 1

Minimum Credits: 3
Maximum Credits: 3
Covers the conceptual framework of financial accounting and its influence on generally accepted accounting principles (GAAP), with special emphasis on the valuation of assets, and measurement of income. Requirements include reading the original pronouncements on GAAP, making oral presentations, and writing short position papers on various accounting issues of current interest.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or BUS 1110 or ACCT 0202); MIN GRAD: 'C' For Listed Courses; PLAN: Accounting (CERT)
CDACCT 6205 - INTERMEDIATE FINANCIAL REPORTING 2

Minimum Credits: 3  
Maximum Credits: 3  
Topics covered include valuation of liabilities, owners equity, cash flow statements, and disclosure outside the primary financial statements. Like intermediate financial reporting 1, this course also engages students as active participants in the learning process.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSACC 1204 or CDACCT 6204; PLAN: Accounting (CERT)

CDACCT 6210 - FINANCIAL STATEMENT ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
Financial statement analysis focuses on the evaluation of publicly traded company financial statements and related note disclosures as well as the correlation of this historic financial performance to the company's stock prices. This course will assist students' development of a systematic approach to analyzing reported financial data and understanding the underlying risks and possible inconsistencies among comparative companies. Requirements of the course include interim exams and written and oral presentations of analysis.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PLAN: Accounting (CERT)

CDACCT 6216 - ADVANCED FINANCIAL ACCOUNTING

Minimum Credits: 3  
Maximum Credits: 3  
Covers topics that are of particular interest to financial report preparers and auditors. Special emphasis placed on accounting for business combinations and consolidated financial reporting. Other topics include international accounting, accounting for partnerships, and accounting by fiduciaries.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; PLAN: Accounting (CERT)

CDACCT 6221 - STRATEGIC COST MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
Topics covered include how product cost measurement affects resource allocation decisions; how to design modern cost systems; the strategic role of cost information and the relationship between process improvement and cost reduction; performance measurement and organizational transformation for value creation.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or BUS 1110 or ACCT 0202); MIN GRAD: ‘C’ For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6236 - ACCOUNTING INFORMATION SYSTEMS

Minimum Credits: 3  
Maximum Credits: 3  
Deals with the design and implementation of accounting information systems and their ability to collect data on the activities of the organization, to accumulate and summarize it, and to make the information available to managers for analysis, decision making, and control. Special emphasis is
CDACCT 6238 - AUDITING

Minimum Credits: 3
Maximum Credits: 3
Introduces the auditing process and profession. Main topics include the nature and purpose of auditing, auditing standards, professional conduct, auditor legal liability, and approaches in financial statements. Emphasizes a risk-based approach to selecting appropriate auditing techniques. Examines auditor's decision process relating to internal control assessment, audit decision process relating to internal control assessment, audit sampling, and obtaining audit evidence about financial accounts. Also examines extent of auditor's responsibility to uncover fraud.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (BUSACC 0040 or BUSERV 1925 or CDACCT 6040 or MGMT 0023 or BUS 1110 or ACCT 0202); MIN GRAD: 'C' For Listed Courses; PLAN: Accounting (CERT)

CDACCT 6242 - INDIVIDUAL TAX ACCOUNTING AND PLANNING

Minimum Credits: 3
Maximum Credits: 3
This course focuses on individual tax return preparation and planning. Students will learn how to calculate the taxes associated with a variety of personal, investment, property, and sole-proprietorship transactions. Concepts will be reinforced through the preparation of actual tax returns that reflect different combinations of such transactions. Students will develop tax planning skills by considering how various transactions can be restructured to minimize the current or future tax liability.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSACC 1205 or CDACCT 6205; CREQ: BUSACC 1236 or CDACCT 6236; PLAN: Accounting (CERT)

Chemical Engineering

CHE 0035 - INTRODUCTRY CHEMICAL ENGINEERING

Minimum Credits: 4
Maximum Credits: 4
The principles of conservation of mass and energy are applied to the analysis of chemical processes. Included are material balance for multiple unit processes with recycle, p-v-t properties of gases and gas-vapor mixtures, thermochemistry, combined material and energy balances, and vapor-liquid equilibrium.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 0036 - CHEMCL ENGRNG THERMODYNAMICS 1

Minimum Credits: 3
Maximum Credits: 3
Development of the laws of thermodynamics using a macroscopic approach. Fundamental concepts are stressed. Emphasis is placed on chemical engineering applications in problem recitation sessions. Concepts of work, heat, internal energy, potential energy, kinetic energy, enthalpy, entropy, and free energy are developed. Thermodynamic properties and equations of state are defined.
CHE 0100 - FOUNDATIONS OF CHEMICAL ENGR

Minimum Credits: 6
Maximum Credits: 6
This course combines elements of mass and energy balances, thermodynamics, separations, and product design in order to set the foundation for the remainder of the chemical engineering curriculum. This course introduces chemical engineering problem solving techniques from both a (traditional) process-centric viewpoint as well as a product centric viewpoint. The course will span from theoretical (basic thermodynamics) to applied (separations) allowing a simple route to problem-based learning of difficult theoretical concepts.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: Swanson School of Engineering

CHE 0101 - FOUNDATIONS OF CHE LABORATORY

Minimum Credits: 1
Maximum Credits: 1
The lab course associated with CHE 0100. Experiments and lectures will reinforce the content of CHE 0100.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: CREQ: CHE 0100; PROG: Swanson School of Engineering

CHE 0200 - CHEMICAL ENGINEERING THERMODYNAMICS

Minimum Credits: 6
Maximum Credits: 6
This course combines the ideas from both pure and multicomponent thermodynamics. It introduces molecular insight and the tools (including commercial software) for solving both simple and complex problems in phase and chemical equilibria. The course will have a strong focus on multiscale analysis, for example, covering intermolecular potentials (molecular-scale) to aid students in choosing equations of state for novel materials (macro-scale). Advanced topics covered include interfacial behavior, adsorption, and osmotic equilibrium.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CHE 0100 with min grade of C- and (CHEM 0120 or 0420 or 0770 or 0970 or 0102 or 0112) and (MATH 0230 or 0235 or 0150 or 0231) and (PHYS 0174 or 0475 or 0150 or 0201); CREQ: CHE 0201 and 0214; PLAN: Chemical Engineering (CHE-BSE)

CHE 0201 - CHE THERMODYNAMICS LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Laboratory corresponding to CHE 0200.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: CREQ: CHE 0200; PLAN: Chemical Engineering (CHE-BSE)

CHE 0214 - INTRODUCTION TO CHEMICAL PRODUCT DESIGN
Traditionally, chemical product design has focused on a set procedure for product development from conception to development and testing and finally the launching of the product. Unfortunately, this model which does not keep in mind the values or needs of the customer has resulted in a high number of failures for new product launches. What skills are thus needed in order to be entrepreneurial and succeed in the development of new chemical products within industry today? This course examines the initial stages on how to approach chemical product design from an innovation perspective complete with the provision of the necessary technical skills to get the job done while placing an emphasis on the business and entrepreneurial skills required to be successful in the chemical product design business.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** Letter Grade

**Course Requirements:** PREQ: (CHEM 0102 or 0112 or 0120 or 0420 or 0770 or 0970) and (Math 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475); CREQ: CHE 0200; Plan: Chemical Engineering (BSE)

**CHE 0300 - TRANSPORT PHENOMENA**

- **Minimum Credits:** 6
- **Maximum Credits:** 6

Stresses analogies between the three modes of transport phenomena; momentum, mass, and heat transport. Covers from the molecular origins of transport up through continuum descriptions, as well as macroscopic balances. Reynolds and Colburn Analogies in Boundary-Layer Flow as well as direct comparison of linear transport relations, such as fluid drag and mass/heat convection will be a primary focus. Problems ranging from (traditional) packed bed reactors to micro-fluidics or micro-electromechanical systems will also be discussed.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** Letter Grade

**Course Requirements:** PREQ: CHE 0100 and (PHYS 0175 or 0152 or 0202 or 0476) and (MATH 0290 or 0250 or 1270); CREQ: CHE 0301; PROG: Swanson School of Engineering

**CHE 0301 - TRANSPORT PHENOMENA LABORATORY**

- **Minimum Credits:** 1
- **Maximum Credits:** 1

The lab course associated with CHE 0300. Experiments and lectures will reinforce the content of CHE 0300.

**Academic Career:** Undergraduate

**Course Component:** Practicum

**Grade Component:** Letter Grade

**Course Requirements:** CREQ: CHE 0300; PROG: Swanson School of Engineering

**CHE 0314 - TAKING PRODUCTS TO MARKET: THE NEXT STEP IN CHEMICAL PRODUCT DESIGN**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Traditionally, chemical product design has focused on a set procedure for product development from conception to development and testing and finally the launching of the product. Unfortunately, this model which does not keep in mind the values or needs of the customer has resulted in a high number of failures for new product launches. What skills are thus needed in order to be entrepreneurial and succeed in the development of new chemical products within industry today? This course is the next step in the chemical product design sequence and focuses on chemical product design and the development of business plans.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** Letter Grade

**Course Requirements:** PREQ: CHE 0100 and 0214 and (PHYS 0152 or 0175 or 0202 or 0476) and (MATH 0290 or 0250 or 1270); CREQ: CHE 0300

**CHE 0400 - REACTIVE PROCESS ENGINEERING**
This course integrates reactor design, reaction kinetics, and advanced separation processes to allow the comprehensive study of systems ranging from polymerization reactors to enzyme-catalyzed metabolism to (bio-) artificial organs. Coverage includes integrating multiple topics, such as chemistry, physics, biochemistry/medicine and reactor engineering. Furthermore, it addresses all length scales from the molecular level to the reactor level to the full systems level. Both theory and experiment will be highlighted and detailed simulations will be included.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (CHE 0200 with min grade of C-) and (PHYS 0175 or 0475 or 0202 or 0152) and (CHEM 0310 or 0206 or 0231 or 0730) and MATH 0290 or CHE 1290; CREQ: CHE 0401; PLAN: Chemical Engineering (BSE)

CHE 0401 - REACTIVE PROCESS ENGINEERING LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Laboratory corresponding to CHE 0400.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: CREQ: CHE 0400; PROG: Swanson School of Engineering

CHE 0414 - PRODUCT PROTOTYPING FOR CHEMICAL ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
In this course, students working in product teams, will learn how to translate their product ideas to tangible prototypes. Included will be modules on design of screening experiments (including equipment), use of software to aid molecular design, and creation of formulations. Ultimately student groups are expected to create a working prototype by semester's end.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CHE 0314; PLAN: Chemical Engineering (CHE-BSE)

CHE 0500 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING

Minimum Credits: 5
Maximum Credits: 5
The dynamics and modeling class is the first of a two-part systems engineering sequence. This course covers dynamical analysis of process systems, process control fundamentals, feedback, basic process modeling, and optimization. The course covers industrial-style examples from a multi-scale perspective by incorporating molecular insight into process variable calculations and large-scale information through process simulation (computer-aided design) software.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CHE 0300 and 0400 with min grade of C-; CREQ: CHE 0501; PROG: Swanson School of Engineering
Course Attributes: Capstone Course

CHE 0501 - SYSTEMS ENGINEERING 1: DYNAMICS AND MODELING LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Laboratory experience accompanying CHE 0500. Both physical and computational experiments will be performed.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade  
Course Requirements: CREQ: CHE 0500; PROG: Swanson School of Engineering

CHE 0601 - SYSTEMS ENGINEERING 2: DESIGN LABORATORY

Minimum Credits: 1  
Maximum Credits: 1  
The lab course associated with CHE 0600. Experiments and lectures will reinforce the content of CHE 0600.  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SU3 Elective Basis  
Course Requirements: CREQ: CHE 0613; PROG: Swanson School of Engineering

CHE 0602 - CHEMICAL ENGINEERING SAFETY AND ETHICS

Minimum Credits: 2  
Maximum Credits: 2  
This class will provide the student with a thorough understanding of the fundamentals in workplace health and safety with emphasis on chemical industry applications. This will be accomplished through presentation a discussion of critical issues as well as the application of these principles to the senior design project. This course will also cover ethical situations likely to arise in the chemical plant environment.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: 0400; CREQ: CHE 0613; PROG: Swanson School of Engineering

CHE 0613 - SYSTEM ENGINEERING 2: PROCESS DESIGN

Minimum Credits: 5  
Maximum Credits: 5  
This course integrates aspects of previous chemical engineering courses into the design of a complete chemical plant including the use of computer process simulation, pinch technology, and discounted cash flow economic analysis. The detailed design of chemical engineering units/processes is carried out for all aspects of the plant.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CHE 0300 and 0400(MIN GRADE C-); PROG: Swanson School of Engineering  
Course Attributes: Capstone Course

CHE 0614 - SYSTEMS ENGINEERING 2: PRODUCT DESIGN

Minimum Credits: 2  
Maximum Credits: 2  
This course will go through the steps to successful product design and contrast these with traditional process design methods. Good product design incorporates customer needs, manufacturing flexibility, economy, sustainability and molecular design.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CHE 0300 and 0400; PROG: Swanson School of Engineering

CHE 1008 - INTRODCTN TO STAGED SEPARATIONS

Minimum Credits: 3  
Maximum Credits: 3  
Unified treatment of separation processes which are carried out in staged equipment. Computer solutions are emphasized. Binary distillation, calculations using graphical methods, multicomponent distillation of ideal and non ideal mixtures, liquid extraction, and differential distillation are studied.
CHE 1017 - CHEMICAL ENERGY AND THE NATURE OF THE CHEMICAL BOND

Minimum Credits: 3  
Maximum Credits: 3  
An overview of energy transformations arising from chemical bonding in chemical catalysis, electrocatalysis, and combustion. Students will be introduced to qualitative quantum chemistry concepts: potential energy and kinetic energy operators, wave functions, electron correlation, and GVB diagrams for analysis of chemical bonds and molecular structures in energy transformations. Students are expected to have completed Undergraduate physical chemistry course on quantum mechanics or equivalent or have prior consent from the instructor.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SU3 Elective Basis  
Course Requirements: PROG: Swanson School of Engineering

CHE 1018 - INTRODUCTION TO SURFACE ENGINEERING

Minimum Credits: 3  
Maximum Credits: 3  
Surface and interface engineering is critical to many important applications, e.g., coating, composite, biomedical device and membrane. With the fast growth of nanotechnology, understanding the surface properties becomes even more important since nano-sized materials, e.g., graphene, have no bulk phase but surfaces. This course combines elements of physical chemistry and materials of surface and interface in order to serve as the introduction to the surface engineering. The course spans from surface tension, capillary, superwettability to lubrication as well as 2D materials, allowing a comprehensive view to both classic surface science and cutting-edge surface technology. By the end of this class, students will understand both the fundamental principles of surface science and engineering approaches on tailor a given solid surface.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CHE 0200 or BIOENG 1210 or ENGR 0022; PLAN: Swanson School of Engineering

CHE 1085 - DEPARTMENTAL SEMINAR

Minimum Credits: 0  
Maximum Credits: 0  
The departmental seminars are designed to acquaint the student with aspects of engineering which are normally not encountered in classes.

Academic Career: Undergraduate  
Course Component: Colloquium  
Grade Component: H/S/U Basis  
Course Requirements: PROG: Swanson School of Engineering

CHE 1097 - SPECIAL PROJECT

Minimum Credits: 1  
Maximum Credits: 12  
Student develops an individual project under supervision of a faculty member. Project may be experimental, design and oriented, or instructional. A written report is prepared.

Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: Letter Grade

CHE 1290 - DIFFERENTIAL EQUATIONS IN CHEMICAL ENGINEERING
Minimum Credits: 3
Maximum Credits: 3
This class will present an introduction to ordinary differential equations, including Chemical Engineering context. Topics will include linear and nonlinear ordinary differential equations, Laplace transformation, and introduction to Fourier series. This course will balance analytical solution methods and the use of numerical solution tools (Matlab) and techniques to address a range of modeling and engineering problems arising in the context of Chemical Engineering.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0230 OR 0235; MIN GRADE 'C'; PLAN: Chemical Engineering

CHE 1530 - BIOCHEMISTRY FOR ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
The basic principles of biochemistry are presented and discussed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: CHE 0100 and CHEM 0310; PLAN: Chemical Engineering (BSE)

CHE 1533 - CONTROLLED DRUG DELIVERY

Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a basic understanding of the engineering of controlled drug delivery systems, which stands as a 114 billion dollar industry. To this end, we will focus on topics at the interface between engineering and medicine such as biomaterials, pharmacokinetics, polymer chemistry, reaction kinetics, and biological transport phenomena. Design of transdermal, aerosol, oral, bio-mems, gene delivery, and targeted cellular delivery, will be reviewed with emphasis being placed upon us FDA regulatory considerations and the relevant physiological milieu.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: [PREQ: CHE 0300 and 0400 and (1530 or BIOSC 1000 or CHEM 1880); LVL: Sr; PLAN: Chemical Engineering (BSE)] or [BIOENG 1220; LVL: Sr; PLAN: Bioengineering (BSE)]

CHE 1540 - PRACTICAL ELECTROCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This graduate-level elective focuses on the practice of electrochemistry in laboratory analysis and in a wide range of technological applications. We will begin with a brief overview of the fundamentals of electrochemistry in terms of thermodynamics, kinetics, and transport processes. We will then dive immediately into practical concepts with a survey of laboratory methods and technological/industrial applications of electrochemistry.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: LEVEL: Junior and Senior; PLAN: Chemical Engineering Recommended courses: Introductory Thermodynamics, Chemical Kinetics, and Electricity/Magnetism

CHE 1754 - PRINCIPLES OF POLYMER ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course deals with the elements of polymer science and engineering necessary for entry-level understanding of polymer technology. While the chemistry determines macromolecular microstructure, an understanding of polymer manufacture and processing requires the addition of physical chemistry and transport phenomena. The essential material covered in this class includes the elements of polymers thermodynamics, rheology, mechanical behavior, and equipment design.
CHE 1822 - ADVANCED TOPICS IN CHEMICAL ENGINEERING

Minimum Credits: 2
Maximum Credits: 2
This course introduces the fundamentals of capillarity via canonical problems in surface tension and wetting phenomena. Topics include static wetting phenomena (e.g. contact angles, shapes of menisci and drops), dynamic phenomena in which viscosity plays a role (e.g. rupture of menisci, coating operations), and thermodynamics (e.g. capillary condensation, nucleation).

CHE 1870 - SOLIDS PROCESSING AND TRANSPORT

Minimum Credits: 3
Maximum Credits: 3
Particle technology affects as much as 80% of the chemical process industry, yet is often omitted from the undergraduate curriculum of chemical engineers. This course is designed to give advanced undergraduates as well as early-term graduate students an introduction to this rich and diverse field. Topics will range from fundamentals (particle classification, properties, and flow) to applied (hopper design, mixing, etc. Industry related examples and designs with be presented.

CHE 1933 - ENGINEERING A CRAFT BREWERY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the science of brewing and the engineering required to design and operate a craft brewery. Students will apply concepts from mass and energy balances, fluid dynamics and heat transfer, and reaction engineering to study the unit operations required to convert grain, water, yeast, and hops into beer. Students will also develop product analysis and product design skills to justify brewing choices based upon brewing science, engineering, and economic considerations.

Chemistry

CHEM 0100 - INTRODUCTION TO GENERAL CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This non-lab, 3-credit course develops fundamental concepts, basic calculations, and problem-solving skills in General Chemistry. This course is designed for those who seek to gain knowledge and ability as a foundation to subsequently taking General Chemistry 1, or those students desiring to fill a Natural Science GER with a Chemistry experience without plans of taking additional Chemistry courses. Topics typically introduced include Measurement, Matter, Energy, Atoms, Elements, Molecules, Chemical Composition, Chemical Reactions, Stoichiometry, Periodic Properties of the Elements, and Bonding. A background in chemistry is not necessary while a fundamental knowledge of math is required and facility with basic algebraic concepts is recommended. Students concerned about their ultimate success in Chem 0110 are encouraged to talk to their advisor about the benefits of completing the Introduction to Chemistry course prior to enrolling in General Chemistry I.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

Chemistry

CHEM 0100 - INTRODUCTION TO GENERAL CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This non-lab, 3-credit course develops fundamental concepts, basic calculations, and problem-solving skills in General Chemistry. This course is designed for those who seek to gain knowledge and ability as a foundation to subsequently taking General Chemistry 1, or those students desiring to fill a Natural Science GER with a Chemistry experience without plans of taking additional Chemistry courses. Topics typically introduced include Measurement, Matter, Energy, Atoms, Elements, Molecules, Chemical Composition, Chemical Reactions, Stoichiometry, Periodic Properties of the Elements, and Bonding. A background in chemistry is not necessary while a fundamental knowledge of math is required and facility with basic algebraic concepts is recommended. Students concerned about their ultimate success in Chem 0110 are encouraged to talk to their advisor about the benefits of completing the Introduction to Chemistry course prior to enrolling in General Chemistry I.

Academic Career: Undergraduate
CHEM 0110 - GENERAL CHEMISTRY 1

Minimum Credits: 4
Maximum Credits: 4
Chemistry 0110 and 0120 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize applications to industrial and environmental chemistry and biochemistry. CHEM 0110 covers stoichiometry, the properties of solids, liquids and gases, thermochemistry and the electronic structure of atoms and molecules.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CHEM 0110 or 0710 or 0760 or 0960 or 0101) or (CHEM 0410 and 0430) or (CHEM 0111 and 0113)

CHEM 0111 - GENERAL CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
General chemistry 1 and 2 comprise a two-term introduction to the fundamental properties of matter. General chemistry 1 covers stoichiometry, the properties of solids, liquids and gases. Thermochemistry and the electronic structure of atoms and molecules.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CHEM 0120 - GENERAL CHEMISTRY 2

Minimum Credits: 4
Maximum Credits: 4
Chemistry 0110 and 0120 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize applications to industrial and environmental chemistry and biochemistry. CHEM 0110 covers stoichiometry, the properties of solids, liquids and gases, thermochemistry and the electronic structure of atoms and molecules.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0120 or 0720 or 0770 or 0970 or 0102 or (CHEM 0112 and 0114)

CHEM 0250 - INTRODUCTION TO ANALYTICAL CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course is concerned with the rigorous treatment of equilibria that are of analytical importance and with an introduction into electroanalytical methods, emission and absorption spectrophotometry, and modern separation methods, particularly chromatography.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0120 or 0720 or 0770 or 0970 or 0102 or (CHEM 0112 and 0114)

CHEM 0260 - INTRODUCTION TO ANALYTICAL CHEMISTRY LAB
The primary objectives of this course are to introduce the student to current analytical methods and to cultivate sound experimental technique. Laboratory work includes ion exchange separations, complexometric and potentiometric acid-base titrations, and absorption spectrophotometry.

**CHEM 0310 - ORGANIC CHEMISTRY 1**

Minimum Credits: 3  
Maximum Credits: 3  
An introduction to theory and practice of organic chemistry through study of structural principles, reaction mechanisms, and synthesis leading toward end of second term, when complex molecules of biological interest are discussed. Basic goals of course are to develop appreciation and skill in methods of molecular analysis which have made organic chemistry such a powerful intellectual discipline. Course will prepare student for work in advanced topics of organic chemistry, biochemistry, chemical engineering and health related sciences.

**CHEM 0320 - ORGANIC CHEMISTRY 2**

Minimum Credits: 3  
Maximum Credits: 3  
An introduction to theory and practice of organic chemistry through study of structural principles, reaction mechanisms, and synthesis leading toward end of second term, when complex molecules of biological interest are discussed. Basic goals of course are to develop appreciation and skill in methods of molecular analysis which have made organic chemistry such a powerful intellectual discipline. Course will prepare student for work in advanced topics of organic chemistry, biochemistry, chemical engineering and health related sciences.

**CHEM 0330 - ORGANIC CHEMISTRY LABORATORY 1**

Minimum Credits: 1  
Maximum Credits: 1  
Chemistry 0330 is devoted to the purification, characterization, and identification of organic molecules using the techniques of recrystallization, distillation, thin-layer, column and gas-liquid chromatography, melting point determination, and infrared and nuclear magnetic resonance spectroscopy.

**CHEM 0340 - ORGANIC CHEMISTRY LABORATORY 2**

Minimum Credits: 1  
Maximum Credits: 1  
Chemistry 0340 provides an opportunity to carry out important synthetic reactions discussed in the lecture course along with an introduction to the use of the chemical literature. Reactions are analyzed and products characterized using the skills learned in chemistry 0330.
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0330 or 0207 or 0233; CREQ: CHEM 0320 or 0740 or 0208 or 0232

CHEM 0345 - ORGANIC LABORATORY

Minimum Credits: 2
Maximum Credits: 2
This single semester two-credit Organic Laboratory course will provide an introduction to modern organic laboratory techniques used routinely in both industry and academics. The lab will emphasize practical applications of the reactions covered in the Organic 1 and Organic 2 lectures. The goals of the course are to provide students with practical experience in executing and analyzing organic transformations as well as practical experience in modern laboratory techniques.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0310 or 0730 and CREQ: CHEM 0740 or 0320

CHEM 0350 - PRINCIPLES OF ORGANIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
A one-semester course in organic chemistry that will introduce students to fundamental principles including molecular structure, organic reactions, and mechanisms. As rigorous as the traditional two-term organic chemistry course, topics are chosen for their relevance to students entering a biological sciences-oriented career.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: [CHEM 0120 or 0720 or 0770 or 0970 or (0112 and 0114)] and BIOSC 0150

CHEM 0410 - GENERAL CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
See chemistry 0110. This course is for students who need to take lecture without lab.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 0420 - GENERAL CHEMISTRY 2

Minimum Credits: 3
Maximum Credits: 3
See chemistry 0120. This course is for students who must take lecture without lab.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 0430 - GENERAL CHEMISTRY 1 LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Laboratory that accompanies CHEM 0110.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
CHEM 0440 - GENERAL CHEMISTRY 2 LABORATORY

Minimum Credits: 1
Maximum Credits: 1
Laboratory that accompanies chemistry 0120.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

CHEM 0710 - UHC GENERAL CHEMISTRY 1

Minimum Credits: 4
Maximum Credits: 4
Chemistry 0710 and 0720 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize the fundamental principles of chemistry as exemplified by applications to industrial and environmental chemistry. Chemistry 0710 covers stoichiometry, electronic structure of atoms and molecules, periodic behavior, theories of bonding, and spectroscopy.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE.Req., University Honors Course

CHEM 0720 - UHC GENERAL CHEMISTRY 2

Minimum Credits: 4
Maximum Credits: 4
Chemistry 0710 and 0720 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize the fundamental principles of chemistry as exemplified by applications to industrial and environmental chemistry. CHEM 0720 covers the properties of solids, liquids and gases, chemical dynamics and chemical kinetics.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CHEM 0110 or 0710 or 0760 or 0960 or 0101) or (CHEM 0410 and 0430) or (CHEM 0112 and 0113)
Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

CHEM 0730 - UHC ORGANIC CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
An introduction to theory and practice of organic chemistry through study of structural principles, reaction mechanisms, and synthesis leading toward end of second term, when complex molecules of biological interest are discussed. Basic goals of course are to develop appreciation and skill in methods of molecular analysis which have made organic chemistry such a powerful intellectual discipline. Course will prepare student for work in advanced topics of organic chemistry, biochemistry, chemical engineering and health related sciences.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CHEM 0120 or 0720 or 0770 or 0970 or 0420) or (CHEM 0111 and 0113)
Course Attributes: University Honors Course

CHEM 0740 - UHC ORGANIC CHEMISTRY 2

Minimum Credits: 3
Maximum Credits: 3
An introduction to theory and practice of organic chemistry through study of structural principles, reaction mechanisms, and synthesis leading toward end of second term, when complex molecules of biological interest are discussed. Basic goals of course are to develop appreciation and skill in
methods of molecular analysis which have made organic chemistry such a powerful intellectual discipline. Course will prepare student for work in advanced topics of organic chemistry, biochemistry, chemical engineering and health related sciences.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0310 or 0730 or 0206 or 0231
Course Attributes: University Honors Course

CHEM 0745 - ORGANIC LABORATORY: ANTIBIOTIC DISCOVERY

Minimum Credits: 2
Maximum Credits: 2
This two-credit CURE Organic Chemistry Laboratory Course (CHEM 0745) meets the same requirements as the Organic Chemistry Laboratory Course (CHEM 0345). It also serves as an independent research experience. One major goal of this course is to offer undergraduate students an opportunity to perform authentic scientific research in the laboratory course. This course engages students in learning approaches towards antibiotic discovery in order to address the world's current antibiotic crisis. Throughout the semester, students develop strategies for antibiotic compounds isolation and purification using chemical separation techniques, and then characterize these unknown antibiotics using spectroscopic techniques commonly used in organic chemistry.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0310 or 0730; CREQ: CHEM 0320 or 0740 or 0208 or 0232

CHEM 0755 - ORGANIC CHEMISTRY LAB: RESEARCH EXPLORATION

Minimum Credits: 2
Maximum Credits: 2
In this course students will work in teams to write original research proposals. They will then design and carry out appropriate experiments, collect and interpret data and ultimately report results in both oral and written formats.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

CHEM 0760 - UHC GENERAL CHEMISTRY FOR ENGINEERS 1

Minimum Credits: 3
Maximum Credits: 3
Chemistry 0760 and 0770 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize the fundamental principles of chemistry as exemplified by applications to industrial and environmental chemistry. Chemistry 0760 covers stoichiometry, electronic structure of atoms and molecules, periodic behavior, theories of bonding, and spectroscopy.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Natural Science General Ed. Requirement, SCI Polymathic Contexts: Science NonSeq.GE. Req., University Honors Course

CHEM 0780 - UHC GENERAL CHEMISTRY FOR ENGINEERS 2

Minimum Credits: 3
Maximum Credits: 3
Chemistry 0710 and 0780 comprise a two-term introduction to the fundamental properties of matter. The courses emphasize the fundamental principles of chemistry as exemplified by applications to industrial and environmental chemistry. CHEM 0780 covers the properties of solids, liquids and gases, chemical dynamics and chemical kinetics.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CHEM 0110 or 0710 or 0760 or 0960 or 0101) or (CHEM 0410 and 0430) or (CHEM 0111 and 0113)

CHEM 0910 - CHEMICAL PRINCIPLES OF HEALTH PROFESSN

Minimum Credits: 4
Maximum Credits: 4
This is a one term course covering general and biological chemistry designed primarily for students enrolled in the school of nursing or preparing for health related professions. The course covers aspects of general chemistry including atomic structure and bonding and equilibria. A brief introduction to organic chemistry including physical properties and representative reactions of common functional groups and finally the chemistry of the major classes biomolecules and metabolism.
Academic Career: Undergraduate
Grade Component: LG/SNC Elective Basis
Course Requirements: School of Nursing students only.
Course Attributes: DSAS Natural Science General Ed. Requirement

CHEM 0960 - GENERAL CHEMISTRY FOR ENGINEERS 1

Minimum Credits: 3
Maximum Credits: 3
Essentially the same as CHEM 0110, but a total of 3 credits only and has no lab. Enrollment limited to school of engineering students.
Academic Career: Undergraduate
Grade Component: LG/SNC Elective Basis
Course Requirements:

CHEM 0970 - GENERAL CHEMISTRY FOR ENGINEERS 2

Minimum Credits: 3
Maximum Credits: 3
Essentially the same as CHEM 0120, but a total of 3 credits only. Has lab, but only two lectures per week in contrast to CHEM 0120, which has 3.
Enrollment limited to school of engineering.
Academic Career: Undergraduate
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0110 or 0410 or 0710 or 0760 or 0960 or 0101 or (CHEM 0111 and 0113)

CHEM 1000 - MATHEMATICS FOR CHEMISTRY

Minimum Credits: 4
Maximum Credits: 4
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: MATH 0230

CHEM 1010 - SAFETY IN THE CHEMISTRY LABORATORY

Minimum Credits: 1
Maximum Credits: 1
This course will introduce students to currently accepted best practices in chemistry laboratory safety. It will do this via weekly sessions given by both academic and industrial leaders in the field. Hands on activities and discussions on topics such as hazard recognition, risk assessment, accident analysis and prevention, and emergency responses will be presented. When possible, the chemical basis of safety will be emphasized.
Academic Career: Undergraduate
CHEM 1020 - READING THE CHEMICAL LITERATURE

Minimum Credits: 2
Maximum Credits: 2
This course will provide an introduction to understanding the assembly and function of macromolecules and supramolecular assemblies. The course will emphasize literature readings and team activities that require students to integrate concepts from their core chemistry courses. The goals of this course are to provide practical experience (1) in applying concepts from core chemistry courses to understanding complex supramolecular assemblies and (2) in reading the chemical literature. The Learning Objectives include: (1) Develop the ability to recognize and apply the basic principles learned in physical, organic, and general (inorganic) chemistry to understanding the structural and dynamical properties of macromolecules and supramolecular assemblies. (2) Develop the skills needed to design experimental probes of these processes in complex systems. (3) Learn to leverage the expertise of diverse teams to collectively tackle challenging problems. (4) Learn to construct meaningful hypotheses concerning function in complex systems. (4) Learn to design experiments and computations to test critical hypotheses. (5) Develop intuition about the importance of different molecular timescales and the driving forces for arranging molecules into functional machinery.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHEM 1130 - INORGANIC CHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Modern bonding theories are developed to the level that permits some understanding of the effects of structure and bonding on chemical properties. Periodic relationships are discussed and applied to selected families of elements. Emphasis is placed on those aspects of structure, bonding and periodic relationships that are helpful in unifying a large body of chemical knowledge. Selected topics of current interest in inorganic chemistry are discussed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 1410 or 1301 or 1341
Course Attributes: Capstone Course

CHEM 1140 - ADVANCED INORGANIC LABORATORY

Minimum Credits: 2
Maximum Credits: 2
Introduces practical techniques for the synthesis and characterization of inorganic and organometallic complexes and materials. Special emphasis on the preparation and characterization of air- and water-sensitive compounds.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: CHEM 1130 or 1131 or 1401

CHEM 1250 - INSTRUMENTAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
The basic principles and instrumentation of important methods and their application to analysis and research problems. The coverage includes spectroscopic and electrochemical methods and chromatography. Equilibrium and dynamic aspects of each are considered.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0250 or 0201 or 0325
CHEM 1255 - INSTRUMENTAL ANALYSIS LAB

Minimum Credits: 1
Maximum Credits: 1
The laboratory component of CHEM 1250. Students will be introduced to state of the art instrumentation being used in contemporary analytical chemistry.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0260; CREQ: CHEM 1250

CHEM 1260 - INTERMEDIATE ANALYTICAL CHEMISTRY

Minimum Credits: 2
Maximum Credits: 2
This course is about becoming a professional. Students read the current scientific literature on a topic of current interest in analytical chemistry or a related area (spectroscopy, separations, electrochemistry, sensors...). They teach the class about a scientific area, and the class will discuss this area. Finally, we will attend public scientific lectures of famous scientists.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 1250 or 1305 or 1327

CHEM 1281 - INSTRUMENTAL ANAL WRITING PRACT

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

CHEM 1310 - SYNTHETIC ORGANIC CHEMISTRY

Minimum Credits: 2
Maximum Credits: 2
This advanced undergraduate course builds onto sophomore organic I and II courses by applying the learned principles to the synthesis of FDA-approved drug molecules. The emphasis of the course will be on analyzing the molecular structures of drugs in a retrosynthetic fashion, followed by developing suitable synthetic routes to these molecules. The reaction mechanisms of key steps of these syntheses will be discussed in detail. Further discussion will include fundamental functional group interconversions, chemoselectivity, and protecting group use, enantioselective synthesis, and organometallic chemistry. Students will learn about the complexities of modern drug molecules, how their structures can be analyzed, and how they are synthesized.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0320 or 0740 or 0232 or CHEM 0208

CHEM 1380 - TECHNIQUES OF ORGANIC RESEARCH

Minimum Credits: 2
Maximum Credits: 2
A course which serves as a guide to the interpretation of ultraviolet, infrared, nuclear magnetic resonance and mass spectra of organic compounds.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0320 or 0740 or 0208 or 0232

CHEM 1410 - PHYSICAL CHEMISTRY 1

Minimum Credits: 3
Maximum Credits: 3
Basic lecture course dealing with quantum theory, atomic and molecular structure, symmetry, spectroscopy and diffraction methods.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: [CHEM 0120 or 0720 or 0770 or 0970 or (0112 and 0114)] and (PHYS 0175 or 0111 or 0476) and (MATH 0240 or 0201 or 0241 or CHEM 1000)

CHEM 1420 - PHYSICAL CHEMISTRY 2

Minimum Credits: 3
Maximum Credits: 3
Basic lecture course dealing with gases, kinetic theory, chemical thermodynamics, equilibria, and chemical kinetics.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 1410 or 1302 or 1342
Course Attributes: Capstone Course

CHEM 1430 - PHYSICAL CHEMISTRY LABORATORY 1

Minimum Credits: 1
Maximum Credits: 1
Approximately 8 experiments are performed during the term. Experiments are selected to illustrate important principles of physical chemistry and to make the student familiar with important experimental methods. The course is intended to make the student think critically about reliability of experimental results and to attempt to interpret them in the light of his previous chemical experience.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 1302 or 1342 or 1410 or 1480

CHEM 1431 - TOPICS IN PHYSICAL CHEM WRIT PRAC

Minimum Credits: 1
Maximum Credits: 1
This course provides an opportunity for students to explore a current physical chemistry research topic and create a "journal ready" manuscript. The research topic will be chosen during the first two weeks of classes in consultation with the professor. A comprehensive outline and first draft will be prepared then reviewed with the professor. The paper is revised at least once before final submission and is a minimum of 15 pages. Conferences will be by appointment.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

CHEM 1440 - PHYSICAL CHEMISTRY LABORATORY 2

Minimum Credits: 1
Maximum Credits: 1
This course has one four hour lab each week. Approximately 7 experiments are performed during the term, with an emphasis on the macroscopic properties of matter. The course is designed to expand upon the principles and techniques covered in Chem 1430 as well as to introduce the student to other scientific methods for investigating properties of materials. There is a lab fee.

**CHEM 1460 - INTRO MODERN COMPUTATIONAL SCI**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

This course will emphasize the application of microcomputers and numerical methods for solving problems of importance in chemistry. Methods to be studied include solving systems of linear and differential equations, least squares fitting, eigenvalue problems, solution of nonlinear equations.

**CHEM 1480 - INTERMEDIATE PHYSICAL CHEMISTRY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

A lecture course emphasizing application of principles of thermodynamics to solutions of electrolytes and non-electrolytes, electrochemical cells, physical chemistry of surfaces and macromolecules.

**CHEM 1540 - INTRO TO MASS SPECTROMETRY**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

A basic, yet comprehensive, introductory course in mass spectrometry will be offered. The material will include a summary of instrumentation, special interpretation procedures and data handling. The interpretation of spectra of compounds of specific interest in geology and chemistry will be emphasized.

**CHEM 1600 - SYNTHESIS & CHARCTRZTN POLYMERS**

- **Minimum Credits:** 3
- **Maximum Credits:** 3

Synthesis and characterization of polymers is focus of course. Current methods of polymer synthesis will be surveyed, practical implementation of reactions and kinetic consequences of reaction strategies in homopolymer, copolymer and block copolymer synthesis. Techniques for characterization of polymer molecular weight, chemical composition, and stereochemistry (Fi-IR, NMR, other spectroscopic and chemical methods) will be discussed. Brief treatment of polymer solution thermodynamics and selected topics in polymer chemistry will be discussed.

**CHEM 1605 - SYNTH & CHARCTRZTN POLYMERS LAB**

1015
Minimum Credits: 1
Maximum Credits: 1
This course is the laboratory component of CHEM 1600. Students will gain practical experience in the synthesis of polymers and the use of modern techniques used in the characterization of the polymers they synthesize.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0320 or 0740 or 0340 or 0750; CREQ: CHEM 1600

CHEM 1620 - ATOMS, MOLECULES AND MATERIALS

Minimum Credits: 3
Maximum Credits: 3
This course will use qualitative molecular orbital theory to understand the design and performance of new materials. A link will be made between "small molecule" intuition and the solid-state perspective on large molecules. Clusters and solids.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0320

CHEM 1700 - UNDERGRADUATE RESEARCH SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Seminar given by faculty on undergraduate research opportunities in chemistry. Open to all students regardless of departmental affiliation, but is designed especially to help those students who may take chemistry 1710 in their selection of a research project.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

CHEM 1701 - UNDERGRAD RES SEMINAR WRIT PRAC

Minimum Credits: 1
Maximum Credits: 1
This course, in conjunction with chemistry 1700, will allow students to write a major research paper based on a seminar given by a departmental faculty member. Extensive library work will be required. At least one revision of the paper will also be expected. This course will fulfill the CAS Departmental Writing requirement.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); CREQ: CHEM 1700
Course Attributes: Writing Requirement Course

CHEM 1710 - UNDERGRADUATE RESEARCH

Minimum Credits: 1
Maximum Credits: 6
This is an elective course where a research project is carried out under the direction of a member of the chemistry faculty. It is for the serious student who wishes to expand his scholarly interests. Approximately four hours research per week per credit; usually no more than three credits per term.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Attributes: Capstone Course

CHEM 1711 - UNDGR RESEARCH WRITING PRACTICUM
Chem 1711 will require the student to write a report in the form of a major research paper and will include a historical background to the project, an experimental or methods sections and a discussion of the results and their meaning.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFJM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Capstone Course, Writing Requirement Course

**CHEM 1720 - UNDERGRAD TEACHING EXPERIENCE**

Minimum Credits: 1  
Maximum Credits: 4  
Students can gain teaching experience by serving as instructors in one of the undergraduate chemistry lab courses.  
**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Capstone Course

**CHEM 1810 - CHEMICAL BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
Revolutionary transformations in chemistry and biology have led to the merging of these disciplines where contributions from both fields impact our molecular and quantitative understanding of biology. Rapid growth in this area has been driven in part by students and researchers applying synthesis, quantitative analysis, and theoretical reasoning to the study complex cellular processes. This course focuses on enzyme mechanisms in biological pathways, kinetics and thermodynamics, and chemical tools to probe and screen components of the cell. Some other topics include DNA/RNA processing, macromolecular interactions, chemical signaling, posttranslational modifications, chemical syntheses of biomolecules, and development of assays for high throughput drug screening.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: CHEM 0320 and BIOSC 0160

**CHEM 1815 - CHEMICAL BIOLOGY LABORATORY**

Minimum Credits: 2  
Maximum Credits: 2  
This laboratory course will focus on chemical reactions catalyzed by enzymes. Students will learn organic syntheses, DNA mutagenesis and sequencing, protein expression and purification, biochemical assays. Students will be expected to present their findings in a seminar style talk and a poster presentation.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: CHEM 0345

**CHEM 1830 - SYNTHETIC BIOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: CHEM 1810 or BIOSC 1000 or BIOSC 1810
CHEM 1880 - CHEMICAL BIOLOGY FOR ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
PeopleSoft Description: Chemical engineers have made significant contributions towards the development of pharmaceutical research and manufacturing, and there are now also growing opportunities in field of biotechnology. In this course students broadly examine the nomenclature, functions and mechanisms utilized by DNA, RNA and proteins and learn foundation knowledge in order to contribute to these fields. This includes examination of enzyme mechanisms of therapeutic targets and how pathways of enzymes can produce natural products, such as terpenes and polyketides, that are common antibiotic and antifungal agents. Specialized topics will also be considered such as the engineering of proteins with new catalytic functions and metabolic engineering to produce therapeutics and commodity chemicals. Students also learn about the molecular mechanisms involved in the cellular processes of replication, transcription and translation. These topics include recombinant DNA technology and new therapeutic strategies that have emerged in manufacturing such as antisense oligonucleotide technology.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: Pre-req: Chem 0320 ; PLAN: Chemical Engineering

CHEM 1902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
Directed study in a specific area of chemistry to enhance preparation for undergraduate research.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

Chinese

CHIN 0001 - FIRST YEAR CHINESE 1

Minimum Credits: 5
Maximum Credits: 5
This is the first term of first year chin language course intended for those who have no or little experience in this language. This course helps students to develop basic oral and written proficiency and understand the basics of chin language and culture. Students are expected to be able to converse in limited daily life situations and write short paragraphs on personal topics. Class activities will consist of pair work, group work, and presentations on the course materials and other level appropriate authentic materials.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Asian Studies

CHIN 0002 - FIRST YEAR CHINESE 2

Minimum Credits: 5
Maximum Credits: 5
This is the 2nd term of 1st year chin language course intended for those who have completed chin 1001/0001 or its equivalent. This course continues to help students to develop basic oral and written proficiency and understand the basics of chin language and culture. Students are expected to be able to converse in limited daily life situations and write short paragraphs on personal topics. Class activities consist of pair work, group work, and presentations on the course materials and other level appropriate authentic materials.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 0001 (MIN GRADE 'C-')
Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement
CHIN 0003 - SECOND YEAR CHINESE 1

Minimum Credits: 5
Maximum Credits: 5
The course aims to enhance student's abilities for speaking accurately and appropriately in increasingly challenging situations, reading and understanding narrative and descriptive texts and the relevant cultural aspects, writing short narrative paragraphs with proper discourse connectors, and conversing on a wider range of personal topics with some sophistication. This course includes recognition and production of 350 characters presented in both traditional and simplified versions. Students should have control of a cumulative total of 1,000 characters by the end of the term.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 0002 (MIN GRADE 'C-')
Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement

CHIN 0004 - SECOND YEAR CHINESE 2

Minimum Credits: 5
Maximum Credits: 5
The course aims to enhance student's abilities for speaking accurately and appropriately in increasingly challenging situations, reading and understanding a wider range of narrative and descriptive texts and the relevant cultural aspects, writing longer narrative and descriptive paragraphs with proper discourse connectors and idiomatic expressions, and conversing on personal topics with sophistication and some non-personal topics. This course includes recognition and production of 350 characters presented in both traditional and simplified versions. Students should have control of a cumulative total of 1,400 characters by the end of the term.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 0003 (MIN GRADE 'C-')
Course Attributes: Asian Studies

CHIN 0005 - CHINESE FOR HERITAGE SPEAKERS

Minimum Credits: 5
Maximum Credits: 5
CHIN 0005 is a course specifically designed for heritage learners and those whose oral and aural abilities exceed their reading and writing skills. Students with an upbringing or long-term exposure to oral Chinese language use can take this course to develop their literacy skills and to gain a deeper understanding of the Chinese culture. The course also aims to help students further develop their oral and socio-cultural communication skills so that they can conduct communication in all three modes (interpersonal, interpretive, and presentational) at a higher proficiency level. Students will be immersed in Chinese language and culture through integration of cultural content knowledge and language learning. Upon completion of the course students will be able to: - pronounce sounds problematic for a majority of heritage learners - recognize Chinese radicals and use them to guess the meaning of Chinese characters - recognize and write Chinese characters - use reading strategies - make oral presentations in Chinese - write compositions in Chinese
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 0007 - INTRODUCTION TO CHINESE CIVILIZATION AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course is an interdisciplinary introduction to Chinese society and culture from earliest times to the present. We will introduce the development of China in material terms as well as in terms of competing beliefs, and the relationship of these to social groups. The first part of the course explores ancient literature, philosophy, religion, art, architecture, customs, and other aspects of china's rich and diverse heritage. The second part will be devoted to china's transition to a modern society, covering such topics as social changes, urban life, popular culture, and the values and ideas that captivate contemporary Chinese people's attention. Cultural traditions of Hong Kong, taiwan, and tibet will also be employed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 0010 - SPECIAL TOPICS IN EAST ASIAN POP CULTURE

Minimum Credits: 1
Maximum Credits: 1
This 1-credit mini course explores the spread of Asian pop across the world in conjunction with the Asian Studies Center's annual lecture series on Asian pop culture.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 0080 - CITY LIFE AND EAST ASIAN CULTURE

Minimum Credits: 3
Maximum Credits: 3
This is a humanities based modular course designed as an introduction to important areas of East Asian civilization. The student will discover how literature, art and thought has flourished in the urban areas of China and Japan.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 0081 - EAST ASIA IN THE WORLD

Minimum Credits: 3
Maximum Credits: 3
To enhance a greater understanding of East Asian cultures; to explore the interactions and relations between the peoples and cultures of East Asia (China and Japan) and the rest of the world, from ancient times to the present. Literary works, memoirs, autobiographies, diaries, historical records and films will be used. Themes involve such topics as the significance of travel in self-understanding, diaspora, immigration, and changing ideas of the homeland.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

CHIN 0083 - INTERCULTURAL COMMUNICATION BETWEEN CHINESE & OTHER CULTURES

Minimum Credits: 3
Maximum Credits: 3
This course helps undergraduate students to develop an understanding of the cultural dimensions of communication specifically between those with a Chinese ethnicity or heritage and those from other cultures. Through lectures, film (clip) viewing, and discussions, students will be trained to understand interpersonal interactions based on expected Chinese culture norms, and be able to appreciate how cross-culture miscommunication may arise in concrete context. Upon completion of the course, students will (1) be able to critically analyze a communicative event with a crossculture perspective, (2) develop communicative competence while performing in Chinese or English by understanding the target culture norms, and (3) develop better awareness towards issues of globalization in relation to one's evolving cultural and ethnic identity, and have a heightened awareness and sensitivity towards people with diverse cultural and ethnic backgrounds.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement

CHIN 0085 - REVOLUTION, INVOLUTION, AND IDENTITY IN MODERN CHINESE CULTURE
Minimum Credits: 3
Maximum Credits: 3
This course provides an interdisciplinary introduction to Chinese society and culture from the turn of the 20th century to the present. Specifically, it focuses on the notions of revolution, involution, and identity reflected in literary and visual representations. Exploring the dynamic between change and continuity in modern Chinese history, it seeks to examine concepts such as empire, modernity, revolution, and nation, and investigate identity formations in national, ethnic, gender, and individual levels. It will cover such topics as social changes, historical consciousness, urban life, popular culture, and the values and ideas that captivate contemporary people's imagination. Cultural orientations of Hong Kong, Taiwan, and Tibet will also be explored.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CHIN 1009 - THIRD-YEAR CHINESE 1

Minimum Credits: 3
Maximum Credits: 3
The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 0004 (grade C- or higher) or instructor permission

CHIN 1010 - THIRD-YEAR CHINESE 2

Minimum Credits: 3
Maximum Credits: 3
The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 1020 - THIRD YEAR CHINESE 1

Minimum Credits: 5
Maximum Credits: 5
The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 0004 (MIN GRADE 'C-')
Course Attributes: Asian Studies

CHIN 1021 - THIRD YEAR CHINESE 2
Minimum Credits: 5
Maximum Credits: 5
The course aims to enhance student's abilities for speaking accurately and appropriately in challenging situations, reading and understanding original texts of different types, writing short essays on various topics with discourse connectors and idiomatic expressions, and conversing on both personal and non-personal topics with sophistication at discourse level. Students in this course should be aware of relevant Chinese traditions and perspectives and be able to make comparisons and connections with other cultures.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 1020 (MIN GRADE 'C-')
Course Attributes: Asian Studies

CHIN 1025 - ASPECTS OF THE CHINESE LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
Aspects of the Chinese language will offer a linguistic introduction to Chinese. No prior knowledge of linguistics is assumed although familiarity with linguistic analysis is a plus. The Chinese language is substantially different from English or other Indo-European languages. It is also distinct from some other East Asian languages. For instance, it has a logographic writing system and is a tonal language. Its word order is more flexible than English and is a topic-prominent language. It does not have rich grammatical inflections but has a limited number of aspectual markers. The course serves the following purposes: (1) introduce the basic facts of the Chinese language including its development, the phonology, morphology, the semantic and syntactic aspects of Mandarin Chinese, and the interactions of the language with Chinese culture and the society; (2) introduce elementary linguistic concepts relevant to chinese to enable students to use the right tool to describe and critically analyze the features of a language; (3) encourage students to reflect on their language learning experience or knowledge of other languages to conduct reasoning, such as analyzing the sources of difficulty in their studying of chinese; (4) to inspire interest in a range of topics including differences in modern and classical chinese, philosophical belief embodied in the language, chinese culture manifested in the language (such as the notion of politeness, face, etc.), and to lay a foundation for further studies in linguistics as well as in those relevant topics.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 0002 (MIN GRADE 'B-')

CHIN 1027 - CHINESE AS A SECOND LANGUAGE AND BILINGUALISM

Minimum Credits: 3
Maximum Credits: 3
The course introduces students to research methods and findings on Chinese as a Second Language (CSL) and it familiarizes students with pedagogical and issues of learning in CSL. The course content includes (1) linguistic perspectives of CSL and second language learners' grammatical knowledge development, including how key structures are acquired and typically dealt with in language classroom; (2) psycholinguistic experimental methods and cognitive development of bilingual speakers of Chinese and English, including in character recognition/production, vocabulary acquisition, morphological awareness development, etc.; (3) corpus approaches in CSL and applications; (4) pragmatics in L2 Chinese; (5) other CSL topics such as learner motivation, Chinese as a heritage language, proficiency assessment, and technologies in CSL. The course will use a combination of lectures, discussions, and presentations. Class will be conducted largely in English, while enrolled students are expected to have an intermediate or above level Chinese proficiency.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: CHIN 0004 (MIN GRADE B-), OR CHIN 0003 (MIN GRADE B-) AND CREQ: CHIN 0004
Course Attributes: Undergraduate Research

CHIN 1033 - SPECIAL TOPICS: ADVANCED CHINESE ACROSS GENRES

Minimum Credits: 3
Maximum Credits: 3
To develop greater fluency, accuracy and confidence in spoken Chinese. Rhetorical and presentational skills will be introduced and reinforced. Students will narrate and describe an event/situation, maintain sustained discourses, provide structured arguments, develop hypotheses and explain as
well as defend opinions. Through reading news articles on various subjects such as society, finance, politics, technology, sports and entertainment, students will gain deeper understanding of social, cultural, political and economic situations in Chinese speaking regions and will be able to conduct in-depth conversations with native speakers.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: CHIN 1020 (MIN GRADE 'C-')

**CHIN 1040 - LITERARY CHINESE 1 CLASSICAL**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is a course in classical Chinese whose purpose is to acquaint the student with the language and syntax of classical Chinese.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** CREQ: CHIN 1020 or CHIN 1009  
**Course Attributes:** Asian Studies

**CHIN 1041 - LITERARY CHINESE 2 CLASSICAL**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A continuation of Chinese 1040, this course will further develop the student's knowledge of vocabulary and syntactical patterns of classical Chinese.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: CHIN 1040  
**Course Attributes:** Asian Studies

**CHIN 1044 - THE CHINESE WRITING SYSTEM IN EAST ASIA**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The Chinese script is presumed to be difficult to the untrained eye, but much of the myth lies in misunderstandings or misinformation. The course will introduce students to the Chinese writing system through historical and applied linguistic perspectives, and it will provide opportunities of discussion on how the Chinese script influences topics in anthropology, arts, education, and politics in the East Asian region. Students will gain foundational knowledge regarding the linguistic features of the Chinese writing system, including its historical development, and be challenged to apply such knowledge to make critical inquiries on the relationship between the writing system and literacy development, cognitive science, visual arts, and society.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**CHIN 1047 - CHINESE AND WESTERN POETRY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds; China and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
CHIN 1050 - FOURTH YEAR CHINESE 1

Minimum Credits: 3
Maximum Credits: 3
This is an advanced language course which concentrates on reading current journalistic writings such as news reports, periodicals, articles and editorials.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 1021 (MIN GRADE 'C-')

CHIN 1051 - FOURTH YEAR CHINESE 2

Minimum Credits: 3
Maximum Credits: 3
The second term of fourth year reading this course continues the student's advanced language study concentrating on reading journalistic writings.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHIN 1050 (MIN GRADE 'C-')

CHIN 1059 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CHIN 1083 - MASTERPIECES OF CHINESE LITERATURE: PREMODERN

Minimum Credits: 3
Maximum Credits: 3
This course is devoted to the study of Chinese literature from ancient times to the end of the 19th century. Lectures and readings include prose (historical, philosophical and literary texts, legends and myths of the remote past, anecdotes, short stories and fantastic tales of ghosts and love) and poetry (from the book of songs to the poetry of the t'ang and sung periods).
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Asian Studies

CHIN 1084 - MASTERPIECES OF CHINESE LITERATURE: MODERN

Minimum Credits: 3
Maximum Credits: 3
A critical analysis of some of the most representative literary works in modern china from a literary and socio-political perspective.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 1085 - INTRODUCTION TO EAST ASIAN CINEMA
Minimum Credits: 3
Maximum Credits: 3
This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 1086 - LOVE IN CHIN AND WESTERN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
The course will explore and compare expressions of love in Chinese and Western literature. The course will examine a succession of theories and ideas of love such as platonic, religious, courtly, romantic and post-romantic from the Western tradition; love in Confucianism, Monism, Taoism, and Buddhism.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 1087 - INTRODUCTION TO CHINESE NARRATIVE

Minimum Credits: 3
Maximum Credits: 3
The student is introduced to the major forms and important periods of Chinese narrative by reading and discussing a variety of Chinese narratives from the beginning of Chinese literature to the modern period. Texts include philosophical fables, historical records, mythical tales, stories of the supernatural, vernacular stories and novels.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 1088 - NEW CHINESE CINEMA

Minimum Credits: 3
Maximum Credits: 3
Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CHIN 1089 - THE WORLD OF CHINA

Minimum Credits: 3
Maximum Credits: 3
This course will survey the wax and wane of pop culture through disparate phases of social and political developments of modern china. The readings will introduce students to works of literature, art, and film to see how tradition and modernity, elite and mass cultures, East and West conflict and converge; how china absorbs, adapts as well as resists capitalistic modernity while embracing global market economy; how china grapples with urban alienation, social flux, moral laxity and other negative aspects of industrialization and urbanization. The course will make available to students a host of art images, dvd clips and e-texts to enhance and expand their perception of modern china.

Academic Career: Undergraduate
CHIN 1090 - GREAT MINDS OF CHINA

Minimum Credits: 3  
Maximum Credits: 3  
First segment on Confucianism, including the Analects and Menicus, will be studied with relevant commentaries, stressing implications for Chinese culture, especially in ethical and socio-political dimensions. Second segment on Taoism, lao Tzu and Chuang Tzu, will be studied with emphasis on impact on the arts and literature. Final segment on Buddhism will concentrate on representative sutras of the tradition, diamond sutra and texts from the Chan (Zen) master's.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Asian Studies

CHIN 1700 - TRANSLATION THEORY AND PRACTICE

Minimum Credits: 3  
Maximum Credits: 3  
This course is intended for speakers of English who possess advanced Chinese proficiency. It is an overview of theory and practice of translation from Chinese to English, including the training on hands-on translation practices. Students will use real-life translation materials such as news articles, legal documents, commercial flyers, financial reports, and technical manuals to simulate a professional translation process. Basic techniques and strategies that are practiced commonly in the translation field will be introduced and further reinforced through lectures, and research and analysis of Chinese-English bilingual websites.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CHIN 1021 (MIN GRADE 'B-')  

CHIN 1800 - SPECIAL TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

CHIN 1901 - INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 6  
Individual study under the guidance of a department faculty member. For the student whose topic is not covered by regular course work.  
Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Asian Studies

CHIN 1906 - CHINESE INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 3  
Academic Career: Undergraduate
**Course Component:** Internship  
**Grade Component:** LG/SNC Elective Basis

**CHIN 1908 - DIRECTED WRITING FOR MAJORS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
In addition to whatever written assignments are required of those enrolled in the course, this directed writing practicum provides students with an opportunity to contribute writing designed in terms of the intellectual strategies of the course.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:**  
PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Asian Studies, Writing Requirement Course

**CHIN 1909 - FLAC STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
FLAC stands for Foreign Language Across the Curriculum. This course adds a 1-credit Chinese language component to an existing course that is taught in English. For students that enroll in this 1-credit course, content that is studied in the main course in English is reviewed and/or expanded upon in Chinese.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**CHIN 1999 - SENIOR PROJECT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
As a summative project for all Chinese majors, the course provides students with guidelines to complete the senior project through integrating culture and language (speaking & writing), traditional & modern Chinese culture as well learning experiences acquired both at Pitt and abroad in china and/or Taiwan. They are to prepare proposals, formulate essay themes in both the English senior essay and the Chinese essay, and determine other formats that can be accepted as supplements: audio-visual, electronic, etc. Also instructs students how to find appropriate resources.  
**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** Letter Grade  
**Course Attributes:** Asian Studies, Capstone Course

**Civil & Environmental Engineer**

**CEE 0085 - SOPHOMORE SEMINAR**

**Minimum Credits:** 0  
**Maximum Credits:** 0  
Required of all new students in their first year after transferring into the civil and environmental engineering department from freshman engineering or other colleges, the sophomore seminar acquaints the students with the departmental programs in the various civil engineering sub disciplines. It is conducted on weeks alternating with the departmental seminar.  
**Academic Career:** Undergraduate  
**Course Component:** Colloquium  
**Grade Component:** H/S/U Basis  
**Course Requirements:** PROG: Swanson School of Engineering

**CEE 0109 - COMPUTER METH IN CIVIL ENGRG 1**
This course emphasizes the mathematics and problem-solving skills necessary to be an intelligent user of a variety of computational tools for engineering analysis. The first portion of the course focuses on linear algebra within the context of engineering problems. Concepts of numerical linear algebra are then introduced, followed by a brief introduction to additional discrete analysis tools such as numerical approximation and signal processing. Lastly, through the introduction of cad software and an individual term project, students are taught how to independently gain familiarity and confidence with engineering software.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** CREQ: (ENGR 0012 or 0712 or 0715 or 0718 or 0016 or ET 0023) and MATH 0240 or 0201 or 0241; PROG: Swanson School of Engineering

### CEE 1085 - DEPARTMENTAL SEMINAR

**Minimum Credits:** 0  
**Maximum Credits:** 0  
The departmental seminars are designed to acquaint the student with aspects of the civil engineering profession which are not normally encountered in classes and school activities.  
**Academic Career:** Undergraduate  
**Course Component:** Colloquium  
**Grade Component:** H/S/U Basis  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 1101 - DYNAMICS AND STABILITY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a basic course in dynamics. The course covers kinematics and kinematics of particles, kinetics of systems of particles, work and energy, introduction to vibration, and single-degree-freedom systems. This course also introduces the basic concepts of elastic stability and the approaches used in solving stability problems. Students will learn how to pose the dynamic problems into equations, and solve the problem in different ways. The course will provide the student with a clear and thorough understanding of the applications of dynamics in civil engineering problems.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### CEE 1105 - MATERIALS OF CONSTRUCTION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The nature, physical properties, including environmental aspects of civil engineering construction materials are discussed. Experimentation, where applicable, is utilized.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** CREQ: ENGR 0141 or 0145 or ET 0051 or 0052; PROG: Swanson School of Engineering

### CEE 1200 - CONSTRUCTION MANAGEMENT

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces undergraduates to the construction management processes including planning, financing, contract administration, and project scheduling and controlling. It is a practical course that provides a broad knowledge of managerial decision-making for young engineers. This is the basic course for all follow-on construction courses.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture
Grade Component: Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 1203 - CONSTRUCT PROFSSN DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3

This course teaches the student how construction-related organizations (owner, designer, contractor) are organized and managed. The course covers such topics as marketing, TGM, ethics, risk management, and personnel management. The course emphasizes a professional perspective to the practice of construction management and incorporates lectures by practitioners of various professions.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Civil and Environmental Engineering  
Course Attributes: Global Studies

**CEE 1206 - CONSTRUCTION & COST OF ELECTRICAL SUPPLY**

Minimum Credits: 3  
Maximum Credits: 3

This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 1207 - CONSTRUCTION AND COST OF MECHANICAL SYSTEMS**

Minimum Credits: 3  
Maximum Credits: 3

This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 1210 - ENGR AND SUSTAINABLE DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3

This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

**CEE 1217 - GREEN BUILDING DESIGN AND CONSTRUCTION**

Minimum Credits: 3  
Maximum Credits: 3

Understanding the design and construction of green buildings are key elements in green and sustainable engineering. This course teaches all of the
major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The United States green building council’s leadership in energy and environmental design green building rating system is used to demonstrate one possible green building rating system. Life cycle thinking will be discussed to expand the focus from not only design and construction, but also use, operations, and decommissioning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CIEE 1218 - DESIGN FOR THE ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3

DESIGN FOR THE ENVIRONMENT (DFE) IS A SPECIFIC SET OF DESIGN PRACTICES AIMED AT CREATING ECO-EFFICIENT PRODUCTS AND PROCESSES. INCORPORATING SUSTAINABILITY INTO PRODUCT AND PROCESS DESIGN AS A DESIGN CONSTRAINT IS CLEARLY A NECESSITY, AS ALL ENGINEERS MUST UNDERSTAND THE LIMITS ON NATURAL RESOURCES. STUDENTS WILL BE INTRODUCED TO THE DFE TOOLBOX WHICH INCLUDES DESIGN FOR DEMANUFACTURE, LIFE CYCLE ASSESSMENT, AND ECOFRIENDLY MATERIALS SELECTION. STUDENTS WILL ALSO BE EXPOSED TO REAL WORLD INDUSTRY SUSTAINABILITY CHALLENGES AND HANDS ON LAB EXPERIENCES DESIGNED IN CONJUNCTION WITH LOCAL INDUSTRY AND ORGANIZATION PARTNERS. THE COURSE IS ALSO INTENDED TO BE INTER-DISCIPLINARY BETWEEN ENGINEERING AND BUSINESS STUDENTS TO FOSTER A BALANCE BETWEEN SUSTAINABILITY DESIGN EFFORTS AND BUSINESS PLANS AND STRATEGIES. STUDENTS CAN EXPECT THAT LABS WILL CONSIST OF A MIX OF FIELD TRIPS TO PARTNER COMPANIES AND LABS AT THE UNIVERSITY. A MAJOR ASPECT TO THE COURSE WILL INVOLVE STUDENT PARTNERSHIPS WITH LOCAL COMPANIES; STUDENTS WILL BE CHALLENGED TO APPLY THEIR DFE SKILLS TO PROJECTS THAT ADDRESS SUSTAINABILITY CHALLENGES. ADDITIONALLY, STUDENTS WILL HAVE THE OPPORTUNITY TO PARTICIPATE IN A SUMMER RESIDENCY TO IMPLEMENT THEIR PROJECT WITH THEIR SPONSOR COMPANY AT THE END OF THE COURSE.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CIEE 1233 - CONSTRUCTION DESIGN PROJECT

Minimum Credits: 3
Maximum Credits: 3

Consists of comprehensive projects with emphasis on the nature of engineering problem solving and creative aspects of design in managerial decision-making of construction in such areas as estimating, scheduling, methods, risk management, and finance.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1200 or CET 1152; PROG: Swanson School of Engineering
Course Attributes: Capstone Course

CIEE 1323 - PRACTICAL DATA SCIENCE AND MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3

This course will introduce data science and machine learning concepts to engineering students and professionals with emphasis on practical engineering applications. Key approaches and techniques for working with applied data science and machine learning with many step-by-step engineering examples, illustrations, and exercises will be presented. The course will cover a range of machine learning methods for classification, clustering and regression including k-nearest neighbors, logistic regression, Naive Bayes, support vector machines, decision trees, neural networks, support vector machines, genetic programming, and deep learning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
CEE 1330 - INTRODUCTION TO STRUCTURAL ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
An introduction to linear analysis of statistically determinate, and indeterminate, elastic structural systems.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (MATH 0250 or 0290 or 0202 or 1035) and (ENGR 0141 or 0145 or ET 0053); PROG: Swanson School of Engineering

CEE 1333 - STRUCTURAL DESIGN PROJECT

Minimum Credits: 3  
Maximum Credits: 3  
Comprehensive (capstone) structural design project for a building or a bridge, emphasizing conceptual design, design of footings and superstructure, and preparation of cad drawings, a final written and a final oral report.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (CEE 1340 or 1341) or (CET 1111 or 1112) and (ENGR 0151); PROG: Swanson School of Engineering  
Course Attributes: Capstone Course

CEE 1335 - DESIGN OF STRUCTURES

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce students to the design of building and bridge structures focusing on structural theory, flow of forces, materials selection and selection of structural systems. Structural analysis concepts for a variety of structural types (trusses, frames, plates, membranes and shells) will be introduced or reinforced. Introduction to fundamental structural design in concrete, steel and timber will be affected through design projects.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1330- Introduction to Structural Analysis  
Course Attributes: Capstone Course

CEE 1340 - CONCRETE STRUCTURES 1

Minimum Credits: 3  
Maximum Credits: 3  
An introductory concrete design course based on the ACI 318 code. Fundamental topics relating to behavior, strength and design of reinforced concrete beams, one-way slabs, short columns, and footings are presented.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (CEE 1105 or CET 1151) and (CEE 1330 or CET 1111); PROG: Swanson School of Engineering

CEE 1341 - DESIGN OF STEEL STRUCTURES

Minimum Credits: 3  
Maximum Credits: 3  
A course on the design of steel structures based on the load and resistance factor design (LRFD) philosophy. Fundamental topics related to the design of tension members, columns, beams, beam-columns, floor systems, plate girders and steel connections are treated. Issues in stability, fracture and fatigue are also introduced. Prerequisite: CEE 1335  
Academic Career: Undergraduate  
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1335; PROG: Swanson School of Engineering

CEE 1370 - INTRODUCTION TO NONDESTRUCTIVE EVALUATION AND STRUCTURAL HEALTH MONITORING

Minimum Credits: 3
Maximum Credits: 3
The course aims at providing an overview of the different techniques for the nondestructive evaluation (NDE) and the structural health monitoring (SHM) of civil and aerospace structures. Techniques such as electrical resistance strain gauges, fiber optic sensing and ultrasonics will be described within the framework of the NDE. Applications to materials characterization and defect detection will be discussed with emphasis on steel and composite structures. Global and local methods for SHM will be introduced with emphasis on vibration and ultrasonic methods, respectively. The course will also provide the essential tools necessary for the digital signal processing of ultrasonic data. Matlab and laboratory exercises on recent researches will be investigated.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 1401 - OPEN CHANNEL HYDRAULICS DESIGN

Minimum Credits: 3
Maximum Credits: 3
Review of the basic principles of open channel flow. Design of flood control channels, riprap, gravity sewer, storm water sewer, grass-lined and natural streams are covered. Design of such hydraulic structures as spillways, stilling basins, drop structures and culverts. Other topics include the hydraulic impact from various encroachments such as from bridges, sediment discharge, scour and the utilization of the HEC-RAS computer program.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1402; PROG: Swanson School of Engineering

CEE 1402 - FLUID MECHANICS

Minimum Credits: 3
Maximum Credits: 3
A first course in fluid mechanics discussing basic principles and methods for studying static and dynamic behaviors of fluids. In the laboratory the students conduct experiments on fluid flow in pipes and open channels.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0141 and MATH 0240; LVL: Jr or Sr; PROG: Swanson School of Engineering (UENGR)

CEE 1410 - WATER RESOURCES ENGINEERING DESIGN

Minimum Credits: 3
Maximum Credits: 3
Basic principles of hydrologic analysis and design. Estimation of missing/bad hydrologic data for analysis. Hydrologic design using the probable maximum flood, reservoir design floods, reservoir storage allocation and reallocation. Climate variability and impacts on hydrologic design. Hydrologic design using SCS methods, detention pond design, and design of dams. Reservoir reliability for water supply, and reservoir sedimentation. Emergency action plans and response to extreme hydrologic events, ice engineering, and groundwater well design. Dam safety, hydrologic design memorandums and manuals, and portfolio risk assessment for dams and levees. Labs focus on the utilization of various water resources engineering software, i.e. HEC-HMS, TR-55, TR-20, and SWMM; PROG: Swanson School of Engineering

Academic Career: Undergraduate
Course Component: Lecture
CEE 1412 - INTRODUCTION TO WATER RESOURCES ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Introduction to the basic concepts of surface water hydrology, meteorology, and fields of water resources engineering. Topics include: hydro-meteorological field measurement and computational methods, historical floods and droughts, flood and drought forecasting, groundwater hydrology, statistical analysis of hydrologic data, urban storm water management, irrigation, urban water supply, operational hydrology, water resources projects, water quality as it relates to hydrology, economic aspects of water resources, and introductions into open channel hydraulics and coastal engineering.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (CEE 1002 and 1402 or CET 1140); PROG: School of Engineering

CEE 1433 - WATER RESOURCES DESIGN PROJECT

Minimum Credits: 3
Maximum Credits: 3
Consists of comprehensive projects with emphasis on the nature of engineering problem solving and the creative aspects of design.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1001 or 1401 or 2000 or 2401 or 2405 or 2410; PROG: Swanson School of Engineering

CEE 1503 - INTRO TO ENVIRONMENTAL ENGRNG

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of environmental science and engineering as applied to water and wastewater treatment, air quality control, and solid and hazardous waste management.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CHEM 0102 or 0112 or 0120 or 0420 or 0720 or 0770; PROG: Swanson School of Engineering

CEE 1504 - CHEMISTRY IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course will build on fundamentals introduced in CHEM 0960/0970 (chemistry for engineers), applying chemical concepts in the context of environmental science and engineering. Topics covered include chemical kinetics, thermodynamics, and equilibria, organic chemistry, and biochemistry. These concepts will be explored within the primary environmental media, water, soil, and air. Students will be expected to work independently and in groups to tackle problem sets, in-class problems, and a class term project. Further, this course serves as a bridge to advanced courses in the environmental engineering curriculum where the concepts introduced will be further applied to understanding important environmental phenomena in CEE 1520 (mass and energy balances in environmental engineering) and CEE 1522 (fate and transport in environmental engineering), and techniques used to analyze environmental samples in CEE 1523 (environmental engineering laboratory).

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
CEE 1505 - WATER TREATMENT AND DISTRIBUTION SYSTEM DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for water treatment, storage and distribution systems.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (CEE 1503 and 1402) or CET 1141; PROG: School of Engineering  
Course Attributes: Hourly Final

CEE 1511 - ENVIRONMENTAL ENGINEERING PROCESS LABORATORY

Minimum Credits: 3  
Maximum Credits: 3  
Chemical and biological laboratory procedures and techniques for instrumental analysis applied to evaluation of liquids and gases for environmental assessment and operation and control of environmental quality control systems  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1503; PROG: Swanson School of Engineering

CEE 1513 - ENVIRONMENTAL ENGRNG PROCESSES

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to basic design concepts applied to water and wastewater treatment, air quality control, and solid and hazardous waste management.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1503 or CET 1141; PROG: Swanson School of Engineering

CEE 1514 - ENVIRONMENTAL IMPACT ASSESSMENT

Minimum Credits: 3  
Maximum Credits: 3  
Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1503 or CET 1141; PROG: School of Engineering

CEE 1515 - WASTEWATER COLLECTION AND TREATMENT PLANT DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
Stepwise development and process design, equipment selection, economic evaluation, layout, and operating guidelines for wastewater collection and treatment systems.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (CEE 1503 and 1402) or CET 1141; PROG: School of Engineering
CEE 1520 - MATERIAL AND ENERGY BALANCES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Introduces students to engineering calculations involving material and energy balances around environmental and chemical processes.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Civil & Environmental Engineering; PREQ: CEE 1503 and MATH 0240 and CHEM 0970

CEE 1522 - FATE AND TRANSPORT IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
An introduction to the thermodynamic and kinetic drivers of chemical fate in the environment. Processes governing the diffusion, advection and transformation of chemicals in air, water and soil. Inter-media exchange, environmental degradation and uptake into biotic systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1503; PROG: Swanson School of Engineering

CEE 1523 - ENVIRONMENTAL ENGINEERING LAB

Minimum Credits: 3
Maximum Credits: 3
Chemical and biological laboratory procedures for environmental assessment and operation and control of environmental quality control systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1503 or CET 1141; PROG: Swanson School of Engineering
Course Attributes: Global Studies

CEE 1531 - AIR POLLUTION AND CONTROL

Minimum Credits: 3
Maximum Credits: 3
This course covers terminology, scientific principles, control options, regulatory requirements, permitting procedures, testing/modeling techniques and current topics associated with air pollution and control. This course requires quantitative understanding and covers design considerations associated with air pollution and control. It also covers environmental issues and requires an appreciation of the non-technical aspects of air quality management.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CEE 1533 - ENVRL ENGR DESIGN PROJECT

Minimum Credits: 3
Maximum Credits: 3
Group design of an engineered system for environmental quality control.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1505 or 1507 or 1513 or 1515 or (CET 1141 and 1142); PROG: School of Engineering
Course Attributes: Capstone Course
CEE 1609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3
Maximum Credits: 3
This class will introduce students to life cycle thinking and provide engineers with tools to assess the sustainability and environmental impact of a product, process, or activity. Life cycle assessment (LCA) principles, methods, tools, and challenges will be explored throughout the course. Topics include material and energy flow analysis, environmental indicators and metrics for sustainability, case studies of LCA applications, and impact assessment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0140 or 0220 or 0221; PROG: Swanson School of Engineering

CEE 1610 - ENGINEERING AND SUSTAINABLE DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course is intended as an introductory interdisciplinary engineering course. Topics include principles of sustainable design in engineering, manufacturing, infrastructure, communications, and community development; overview of environmental issues for engineers; design for the environment; models of environmental processes; introduction to the use of life cycle assessment; and case studies examining the relationship of green design and the field of engineering.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CEE 1617 - GREEN BUILDING DESIGN AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Understanding the design and construction of green buildings are key elements in green and sustainable engineering. This course teaches all of the major aspects of green building design and construction, including sustainable sites, water efficiency, energy and atmosphere, materials and resources, indoor environmental quality, innovation, and design process. The united states green building council's leadership in energy and environmental design green building rating system is used to demonstrate one possible green building rating system. Life cycle thinking will be discussed to expand the focus from not only design and construction, but also use, operations, and decommissioning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CEE 1618 - DESIGN FOR THE ENVIRONMENT

Minimum Credits: 3
Maximum Credits: 3
The course begins with an introduction to sustainability, design frameworks, the design process and the role of innovation, followed by how to assess toxicity and risk, systems thinking, and metrics to evaluate and quantify the sustainability of alternatives. The second half of the course will introduce students to designing appropriate technologies within the context of the developing world as well as a series of relevant case studies (e.g., energy, water, agriculture, nanotechnology). Throughout the semester, students will apply what they learn in class to the development of an innovative solution to a real-world sustainability challenge. The course integrates active learning components that provide students the opportunity to exercise the engineering design process, work effectively in a group, and practice written and oral presentation skills.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 1700 - TRAFFIC MANAGEMENT AND OPERATIONS
Minimum Credits: 3
Maximum Credits: 3
Introduction to traffic flow theory and characteristics. Highway capacity analysis. Basic traffic management and control.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**CEE 1703 - TRANSPORTATION ENGINEERING**

Minimum Credits: 3
Maximum Credits: 3
Introduction to the design, planning, operation, management, and maintenance of transportation systems. Transportation planning inter-modal transportation systems (highway, air, rails, etc.). Transportation planning of highways, airports, and railroads with traffic flow models, capacity analysis, and safety. Concepts for designing facilities and systems area study with life cycle costing procedures and criteria for optimization.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: MATH 0240 or 0201 or 0241; PROG: Swanson School of Engineering

**CEE 1704 - LAND DATA ANALYTICS**

Minimum Credits: 3
Maximum Credits: 3
An Introduction to Land Surveying and Development for Civil Engineers. Topics include property and construction surveying plus land development and highway engineering. Students will learn how to utilize Surveying and other Land Data for all design disciplines in Civil Engineering.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0240; PLAN: Civil & Environmental Engineer

**CEE 1710 - TRAFFIC CONTROL SYSTEMS**

Minimum Credits: 3
Maximum Credits: 3
A range of traffic control systems including the analysis and design of traffic signals are discussed along with traffic signal systems. Other topics covered include data collection for traffic control systems, optimization software and models; traffic signal hardware design; traffic signal systems selection (adaptive traffic signal systems versus traditional systems) and design and implementation. Pre-requisite CEE 1703 for 1710 and CEE 2700 for 2710
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

**CEE 1711 - ADVANCED TRANSPORTATION MANAGEMENT STRATEGIES**

Minimum Credits: 3
Maximum Credits: 3
This is a management-oriented course that covers key aspects of how government transportation agencies operate their transportation systems. Focus is on the strategies that are used to improve public safety and mobility, including traffic incident management, traffic management, traveler information and pricing. Emphasis is also placed on processes, including planning, performance management and systems engineering, that agencies apply in advancing programs and projects. The course concludes with a look at the future, including the effects that automated vehicles and Smart City concepts will have on the future of transportation.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

CEE 1714 - PAVEMENT DESIGN AND ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Concepts and principles in the structural design of pavements for highways and airfields including: traffic loads, climatic factors, soil and material characterization. Application of current pavement design practices and procedures. Economic evaluation of highway and airport pavements.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1105 and 1811; PROG: Swanson School of Engineering

CEE 1715 - PAVEMENT MAINTENANCE AND REHAB

Minimum Credits: 3
Maximum Credits: 3
Engineering concepts and information needed to maintain and rehabilitate pavements. Project evaluation, testing and analysis. Design of rigid and flexible overlays, and other methods of rehabilitation. Selection of rehabilitation alternatives. Analysis of the effects of maintenance activities on pavement performance. Initial and life cycle cost analysis of various rehabilitation alternatives.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1105 or CET 1151; PROG: Swanson School of Engineering

CEE 1716 - PAVEMENT CONSTRUCTION

Minimum Credits: 3
Maximum Credits: 3
This course teaches the students the theory and practice of constructing highway and airfield pavements and associated construction management responsibilities. The students will learn how pavements are constructed, including earthwork, base and subbase construction, and the paving of the concrete and asphalt surface layers. The course also covers the impact of construction quality on long-term pavement performance and modern methods utilized for construction quality control.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CEE 1717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

Minimum Credits: 3
Maximum Credits: 3
Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CEE 1105 or CET 1151; PROG: Swanson School of Engineering

CEE 1718 - ADVANCED CONSTRUCTION AND BITUMINOUS MATERIALS

Minimum Credits: 3
Maximum Credits: 3
Advanced construction and bituminous materials soils, soil stabilization, aggregates, bituminous materials and mixtures. Advanced topics in selection and design of bituminous materials. Asphalt cement, rheology, emulsions, chip seals, hot-mix asphalt design, visco-elasticity characterization
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1105 or CET 1151; PROG: School of Engineering

**CEE 1720 - URBAN TRANSPORTATION PLANNING**

Minimum Credits: 3  
Maximum Credits: 3  
All aspects of the transportation planning process including transportation planning and decision making, transportation modeling, demand and supply analysis, transportation studies, environmental issues and project implementation.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

**CEE 1725 - PUBLIC TRANSPORTATION SYSTEMS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to give seniors and graduate students a basic background in the planning, operations and development of public transportation systems within the context of the overall transportation system.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

**CEE 1730 - HIGHWAY ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
Highway administration, classification, planning and programming. Geometric design of highways. Traffic characteristics and capacity analyses. Traffic operations and control. Highway design project.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1703; PROG: Swanson School of Engineering

**CEE 1733 - TRANSPORTATION DESIGN PROJECT**

Minimum Credits: 3  
Maximum Credits: 3  
Consists of comprehensive projects with emphasis on the nature of engineering problem solving and the creative aspects of design.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 2700; PROG: Swanson School of Engineering  
Course Attributes: Capstone Course

**CEE 1750 - PROJECT DEVELOPMENT AND IMPLEMENTATION**

Minimum Credits: 3  
Maximum Credits: 3  
Project development and implementation - 3 credits: this course provides overview of the process used in project programming and planning, design, construction and operation. The course will emphasize the process used for implementation of major projects with emphasis on construction management and how that task interfaces with other aspects of project development. Students will be involved in a team effort to conceptualize the
project, plan alternatives, determine the environmental impact, examine design alternatives, prepare the project for construction documents, recommend award of the contract, manage the contract during construction and determine operational needs of the project.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: CEE 1703; PROG: Swanson School of Engineering

### CEE 1800 - ENGINEERING GEOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Review of basic geologic principles with emphasis on the importance and influence of geology and geologic processes on engineering projects such as dam sites, foundations, tunnels, mine subsidence, landslides, highways, groundwater problems, and seismic studies.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

### CEE 1802 - GEOTECHNICAL ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### CEE 1809 - HYDRAULIC FRACTURING MECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This class will prepare students to wisely and critically design hydraulic fracturing treatments as well as make informed recommendations to employers, governments, and communities about the risks and benefits of hydraulic fracturing methods. Upon completion of this course, students will be equipped to use engineering formulae to estimate hydraulic fracture dimensions, evaluate strengths and weaknesses of various modeling approaches, characterize subsurface conditions from wellbore pressure analysis, make sound recommendations for monitoring, and compare and contrast approaches and risks for a range of application domains.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: CEE 1330 and 1402; PROG: Swanson School of Engineering

### CEE 1811 - PRINCIPLES OF SOIL MECHANICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Basic soil properties, permeability, capillarity and frost action, compaction, stresses in soil masses, two-dimensional seepage, compressibility, stress-strain-time behavior, and shear strength.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ENGR 0141 or 0145 or ET 0053; PROG: Swanson School of Engineering

### CEE 1821 - FOUNDATION ENGINEERING
Minimum Credits: 3  
Maximum Credits: 3  
Application of the principles of soil mechanics to the analysis and design of foundations, the stability of slopes and retaining structures.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (CEE 1811 or CET 1131) and CEE 1330; PROG: School of Engineering

**CEE 1833 - GEOTECHNICAL DESIGN PROJECT**

Minimum Credits: 3  
Maximum Credits: 3  
Consists of comprehensive projects with emphasis on the nature of engineering problem solving and the creative aspects of design.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CEE 1714 or 1715 or 1821 or 2814 or CET 1124 or 1131; PROG: Swanson School of Engineering  
Course Attributes: Capstone Course

**CEE 1996 - SPECIAL PROJECTS**

Minimum Credits: 1  
Maximum Credits: 4  
Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: Letter Grade

**CEE 2201 - CONSTRUCTION COST ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
This course teaches the methodology for estimating construction costs. The course covers all types of costs and all types of construction. The student is introduced to standard reference materials and to computerized estimating systems. The course teaches methods and procedures for developing accurate estimates and the basis for follow-on cost control.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering

**CEE 2202 - CONSTRUCTION SCHEDULING**

Minimum Credits: 3  
Maximum Credits: 3  
This course teaches the student the theory and practice of planning, scheduling, and controlling the time and cost of construction projects. The course covers various advanced techniques such as cost duration analysis, critical resource analysis, stochastic modeling, and cost control. The course teaches the use of contemporary computerized software systems with hands-on application.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering

**CEE 2203 - CONSTRUCTION METHODS AND EQUIPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This course teaches the student how to plan, organize, and execute construction operations. The course includes typical operations in both building
construction and engineering construction. The course describes how to properly construct in order to achieve quality and productivity objectives.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2204 - CONSTRUCTION LAW AND RISK MGMNT**

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the legal and risk management issues in construction. The course covers the principles of contract law and various legal areas affecting construction such as environmental regulations, insurance, bonds, tort liability, dispute resolution, and professional services.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2205 - CONSTRCT FINANCE & COST CONTROL**

Minimum Credits: 3
Maximum Credits: 3
This course introduces the student to the company level financial and accounting systems which are used in the construction industry, and to project control systems which are used to manage cost and time. The course includes such topics as financial accounting, cost accounting, financial statements, and variance analysis.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2206 - CONSTRCT & COST OF ELEC SUPPLY**

Minimum Credits: 3
Maximum Credits: 3
This course teaches basic construction and cost estimating methodologies for single and three-phase electrical distribution systems that include wiring, power, and controls. The course uses commercial estimating systems and the national electrical code.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

**CEE 2207 - CONSTRCT & COST OF MECHL SYSTEMS**

Minimum Credits: 3
Maximum Credits: 3
This course teaches the student how to plan, organize, and execute mechanical construction operations; and the methodologies for estimating their costs. The course covers mechanical systems such as water (supply and waste), HVAC, fire protection, and their controls.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PROG: Graduate School of Engineering

**CEE 2230 - BUILDING INFORMATION MODELING**

Minimum Credits: 3
Maximum Credits: 3
The goal of this course is to introduce the students to building information modeling (BIM) and other new and evolving technologies which are revolutionizing the building and horizontal infrastructure construction industry. Students will learn how BIM and other innovative technologies are being adopted currently by progressive builders to streamline the construction process through enhanced coordination, visualization, logistical planning, cost estimation and analysis. They will also learn how these new tools are enabling (and in some instances requiring) new highly integrated processes that are redefining architecture, engineering, construction and operations (AECO) business relationships and delivery contracts.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

CEE 2320 - ADVANCED MECHANICS OF MATERIALS

Minimum Credits: 3  
Maximum Credits: 3  
The fundamentals of elasticity are introduced and related to various problems such as beams and bars on elastic foundations, unsymmetrical bending, torsion of thin walled members, curved bars, failure theories, and stability.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering

CEE 2330 - ADVANCED STRUCTURAL ANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering

CEE 2333 - INTRODUCTION TO FINITE ELEMENTS

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to the finite element method and its application to various problems of elastic elements and structures. Both physical and variational approaches are used.

Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Swanson School of Engineering

CEE 2340 - CONCRETE STRUCTURES 2

Minimum Credits: 3  
Maximum Credits: 3  
Advanced behavior, strength and design of reinforced concrete structures, including column and frame stability effects, two-way slabs, and serviceability criteria. Introduction to earthquake design concepts.

Academic Career: GRAD  
Course Component: Lecture  
Grade Component: Grad LG/SNC  
Course Requirements: PROG: Graduate School of Engineering

CEE 2341 - STEEL STRUCTURES 2
Minimum Credits: 3
Maximum Credits: 3
Advanced design criteria for steel structures, including composite beams, columns, and frames; member and system stability; first- and second-order analysis of frames; and serviceability criteria.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Graduate School of Engineering

CEE 2343 - PRESTRESSED CONCRETE

Minimum Credits: 3
Maximum Credits: 3
Design of prestressed concrete beams and slabs, including shear and torsion effects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LG/SNC
Course Requirements: PROG: Graduate Engineering Students

CEE 2346 - REPAIR AND RETROFIT OF STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
Introduction and use of performance-based design concepts. Analysis and modeling techniques for existing and repaired structures. Gravity and lateral load retrofit procedures. Selection, modeling and design of repair and/or retrofit measures for a variety of structures and building materials. Retrofit for blast loads.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2347 - BRIDGE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Introduce concepts of bridge engineering by providing the students with the necessary knowledge and skills to apply the AASHTO IRFD specifications for the analysis and design of highway bridge superstructure components.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2360 - DYNAMICS OF STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of free and forced vibration of one and multi degree of freedom structures, including damping. Matrix formulation of multi-degree of freedom structures. Analytical and numerical methods for determining response; deflection and stress evaluation including damping effects.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis
Course Requirements: PROG: Swanson School of Engineering

CEE 2401 - OPEN CHANNEL HYDRAULICS
Basic theories and principles of open channel flows (including flows in rivers and streams). Methods of calculating uniform flow, gradually varied flow, rapidly varied flow, and unsteady flow. Design of open channels.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Graduate Engineering Students

### CEE 2500 - ENVRNMNTL ENGRG MICROBIOL

Minimum Credits: 3  
Maximum Credits: 3  
Biological fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2501 - ENVIRONMENTAL ENGINEERING CHEMISTRY

Minimum Credits: 3  
Maximum Credits: 3  
Chemical fundamentals as applied to the description and evaluation of natural environments and environmental quality control systems.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2502 - PHYSICAL-CHEMICAL PRINCIPLES IN ENVIRONMENTAL ENGINEERING

Minimum Credits: 3  
Maximum Credits: 3  
Basic principles and applications of thermodynamics, reaction kinetics, equilibria, diffusion, and mass transfer.

**Academic Career:** Graduate

**Course Component:** Lecture

**Grade Component:** Grad LG/SNC Basis

**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2507 - INDUSTRIAL WASTE MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
Problems and approaches to industrial waste treatment and disposal, pollution prevention and sustainability, waste minimization, process selection, control, and resource recovery.

**Academic Career:** GRAD

**Course Component:** Lecture

**Grade Component:** Grad Letter Grade

**Course Requirements:** PROG: Graduate School of Engineering

### CEE 2513 - ENVIRONMENTAL IMPACT ASSESSMNT

Minimum Credits: 3  
Maximum Credits: 3  
Technical and procedural aspects of environmental impact analysis and assessment with emphasis on regulatory framework, characterization of impacts and their remediation, and the decision process when applied to engineering systems.
CEE 2609 - LIFE CYCLE ASSESSMENT METHODS AND TOOLS

Minimum Credits: 3
Maximum Credits: 3
Life cycle assessment (LCA) is a tool for evaluating the environmental impacts of a product or process by documenting energy and material flows from inception to ultimate disposal. This course teaches framework, methods, and tools that can be applied to decision making in the design, construction, operation, and maintenance of the built environment. Topics include the principles of life cycle assessment, case studies of applications of life cycle assessment, methods for life cycle inventory, and methods for life cycle impact assessment. The course aims to encourage systems thinking and to facilitate life cycle applications to graduate students' individual research topics. Students can expect to develop a project and paper applying LCA to their research topic. In most cases, students will produce a publishable journal article at the end of the semester.

CEE 2717 - COMPONENTS, PROPERTIES AND DESIGN OF PORTLAND CEMENT CONCRETE

Minimum Credits: 3
Maximum Credits: 3
Examines the influence of constituent materials (cements, aggregates and admixtures) on the properties of fresh and hardened concrete, mix design handling and placement of concrete; and behavior of concrete under various types of loading and environment; test methods, designing concrete mixes for specific applications.

CEE 2801 - ADVANCED SOIL MECHANICS

Minimum Credits: 3
Maximum Credits: 3
Mathematical and graphical operations on stress and strain, seepage analysis and flow net, consolidation theory, upper and lower bound analysis, earth pressure theory, bearing capacity, and plasticity based soil models.

CEE 2802 - GEOTECHNICAL ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Fundamentals of the analytical and numerical methods in geotechnical engineering are explored. Emphasis will be placed upon implementation and verification of various formulations into basic programs. Seepage, stress distribution, settlement, consolidation, sheet piling wall, and beams on elastic foundations are some of the topics covered.

CEE 2814 - SLOPES & EARTH RETAINING STRUCT
Minimum Credits: 3  
Maximum Credits: 3  
Conventional methods and recent advances in slope stability analyses; classical and modern earth pressure theories; design of rigid and flexible retaining structures; earth dams, their design and stability.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PROG: Graduate School of Engineering

**CEE 2818 - ADVANCED FOUNDATION ENGINEERING**

Minimum Credits: 3  
Maximum Credits: 3  
Subsurface exploration and control of groundwater; current procedures for the analysis, design, and construction of waterfront structures and shallow and deep foundations.  
Academic Career: Graduate  
Course Component: Lecture  
Grade Component: Grad LG/SNC Basis  
Course Requirements: PREQ: CEE 2801; PROG: Swanson School of Engineering

**Classics**

**CLASS 0010 - GREEK CIVILIZATION**

Minimum Credits: 3  
Maximum Credits: 3  
A general introduction to the culture and society of Ancient Greece, with emphasis on the Archaic Period and the fifth and fourth centuries B.C.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

**CLASS 0020 - ROMAN CIVILIZATION**

Minimum Credits: 3  
Maximum Credits: 3  
A general introduction to the culture and society of the Roman world, with emphasis on the period of the republic and the early empire.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

**CLASS 0030 - MYTHOLOGY IN THE ANCIENT WORLD**

Minimum Credits: 3  
Maximum Credits: 3  
This course examines in cultural context the traditional stories--myth, legend, and folktale--of the ancient Greeks and Romans. Theories drawn from various disciplines are critically evaluated. Attention to connections with ritual practice and to expression in daily life, art, architecture, etc.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Childrens Literature, DSAS Geographic Region General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies
CLASS 0032 - ATHLETICS OF THE ANCIENT WORLD

Minimum Credits: 3
Maximum Credits: 3
This course examines athletic competition, popular games, gladiatorial and other exhibitions of the ancient Greeks and Romans. Much emphasis on the social/cultural context and underlying values. Attention to relevant artistic archaeological, and historical settings.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CLASS 0034 - WOMEN AND MEN IN ANCIENT MEDITERRANEAN

Minimum Credits: 3
Maximum Credits: 3
An examination of ancient Mediterranean society, particularly that of Greece and Rome, from the perspective of male and female gender roles.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 0035 - WOMEN AND MEN ANCIENT MEDITERRANEAN/Writing Practicum

Minimum Credits: 1
Maximum Credits: 1
Writing practicum for students taking class 0034 as a writing course.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: West European Studies, Writing Requirement Course

CLASS 0037 - MYTH IN ANCIENT WORLD/Writing Practicum

Minimum Credits: 1
Maximum Credits: 1
Writing practicum for students taking class 0030 as a writing course.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

CLASS 0040 - SEX AND LOVE IN ANCIENT LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course investigates representations of sex and romantic love in ancient Greece and Rome, considering how ancient literature treats issues like marriage and infidelity, sex work and slavery, homosociality and homosexuality, and consent and rape. We will engage with a variety of genres of ancient literature, from epic and lyric poetry, to drama and philosophy, to funerary epitaphs, handbooks, and novels. We will read the canonical literature of "dead white men," alongside women writers like Sappho and Sulpicia, as well as documentary texts, especially curse tablets and funerary monuments, that paint a picture of lived experiences in the ancient world. We will also read selections from post-classical literature to explore how modern ideas about love, sex, beauty, and desire have been shaped by their representation in ancient texts.
CLASS 0100 - MASTERPIECES GREEK AND ROMAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
An introduction to the critical analysis of literary works through the medium of selected masterpieces of Greek and Roman literature in English translation.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

CLASS 0300 - HISTORY OF ANCIENT PHILOSOPHY

Minimum Credits: 3
Maximum Credits: 3
The aim of this course is to introduce students to some of the main achievements and leading ideas of Greek philosophy up to classical times. Emphasis will be on understanding and evaluating the arguments and ideas of the Greek philosophical tradition.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req., West European Studies, Writing Intensive Course (WRIT)

CLASS 0302 - HISTORY ANCIENT PHILOSOPHY/Writing Practicum

Minimum Credits: 4
Maximum Credits: 4
The aim of this course is to introduce students to some of the main achievements and leading ideas of Greek philosophy up to classical times. Emphasis will be on understanding and evaluating the arguments and ideas of the Greek philosophical tradition. Special writing component for CLASS 0300, "History of Ancient Philosophy".

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Requirement Course

CLASS 0330 - MYTH AND SCIENCE

Minimum Credits: 3
Maximum Credits: 3
The Greeks in the sixth to fourth century B.C. Initiated forms of thinking we have from then on called "scientific" and "philosophical". This course examines the question of how science is distinguished from "non-science" by studying the role of myth and science in ancient Greece. The aim is to understand what distinguishes the ideas of the first scientists and philosophers from those earlier beliefs called myth.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies
CLASS 0400 - ANCIENT EMPIRES

Minimum Credits: 3
Maximum Credits: 3
Empires dominate and control resources over broad geographical areas, establishing systems (administrative, religious, and intellectual) to perpetuate and justify that control. The course will survey the archaeological remains of the principal empires of the ancient near East and Mediterranean, emphasizing both the modes of control and the themes or messages used to justify it.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CLASS 0500 - ANCIENT ART

Minimum Credits: 3
Maximum Credits: 3
The Mediterranean Sea is a lake and its shores have produced many important cultures and artistic traditions. The course will survey the artistic traditions of Turkey and the near east, Egypt, Greece and Rome. Special attention will be paid to (1) the relationship between the artistic traditions of individual areas and the societies which produced them, and (2) the way in which influences from one culture were transformed by another.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CLASS 0600 - INTRODUCTION TO MEDITERRANEAN ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CLASS 0618 - DEATH IN THE ANCIENT WORLD

Minimum Credits: 3
Maximum Credits: 3
The death of a loved one is an emotional and powerful occurrence that provokes a variety of human responses. In addition to writings describing their funerary practices, the civilizations of the ancient Mediterranean region have left artistic representations of death and dying, built tombs, and objects associated with funerary rituals. The study of these texts, images, structures, and objects allows us to better understand ancient attitudes and reactions to death. This undergraduate lecture focuses on the visual and material evidence of funerary practices and beliefs in ancient Egyptian, Greek, and Roman societies. The subject will be approached thematically. First, we will explore how archaeologists discover death-related artifacts and how scholars approach the study and reconstruction of ancient death rituals. Ancient practices and beliefs regarding the mummification, the funeral, commemorative strategies, visits to the grave, and the afterlife will be explored, and images found on specific media (vases, sculpture, built tombs, paintings) will be discussed in depth. The course will conclude with discussions of the roles that sensational topics, like fear of the undead (zombies, vampires, and ghosts) and spectacles of death (gladiatorial contests and public executions), played in ancient Mediterranean civilizations.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CLASS 0650 - ARCHAEOLOGY OF THE BODY
This interdisciplinary undergraduate course explores the archaeological evidence of the human body in various Mediterranean civilizations. 

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**CLASS 0700 - ENVIRONMENTAL CLASSICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The ongoing degradation and destruction of our natural environment, driven to a large extent by human factors, is often defined in terms of the loss of biodiversity, the collapse of ecosystems, and climate change. This course will focus on the attitudes and views espoused by human agents that led to these phenomena. We will study the history of human relationships with the natural environment in antiquity (ca. 2800 BCE–400 CE) to ask how we may usefully approach ancient thinkers and ideas in a way that allows us to gain a thorough understanding of our present situation, and to evaluate contemporary perspectives and strategies. Ancient readers of King Gilgamesh's conquest of nature, of the Old and New Testament, and of the various treatises, poems, and stories by Greek and Roman writers like Plato, Aristotle, Pliny, and Virgil, could not have envisaged the scale of human impact on the earth in the twenty-first century. Nevertheless, they were acutely aware that they existed as a part of an ecological system. Trying to make sense of the environment in which they found themselves led to broader questions about our human identity and its role in the natural world. We find in the writings of ancient thinkers many questions that are resurfacing in the current debate on environmental ethics: To what extent does true human flourishing require the consumption of material resources? Should a sense of community extend to the land in which we live? What happens if we envisage our natural environment as an independent moral agent? Are we justified in controlling and dominating parts of our environment, or specific types of living creatures? What are the connections between the well-being of the land and social justice? We will examine these questions against their historical background and explore strategies to negotiate current perspectives in a meaningful way.  

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**CLASS 1022 - THE AUGUSTAN AGE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A survey of the political, intellectual, literary, and artistic achievements of Rome in the time of Augustus.  

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**CLASS 1050 - COMPUTER METHODS IN THE HUMANITIES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces students to the use of computational modeling and programming to conduct the text-based research in the humanities. Course goals include 1) learning how to identify research questions in the humanities that are amenable to computational systems to explore those questions. No prior programming experience or knowledge of foreign languages required.  

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**CLASS 1060 - GREEK AND LATIN ELEMENTS IN ENGLISH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on the semantic elements which have come into English from the classical languages, Greek and Latin. In addition, it provides a
general introduction to the history of English and its relationship to other Indo-European languages.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** Letter Grade

---

**CLASS 1130 - CLASSICAL MYTHOLOGY AND LITERATURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines how authors of classical antiquity used the traditional figures and stories of their culture's mythology as material for works of literature.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Childrens Literature, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

---

**CLASS 1140 - GREEK TRAGEDY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Study of representative plays by the three great tragic dramatists of ancient Greece; Aeschylus, Sophocles, and Euripides. All readings are in English translation.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

---

**CLASS 1142 - ANCIENT EPIC**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Study of selected Greek and Roman epics in English translation. Among the works that may be read are Homer's Iliad and Odyssey, Apollonius' Argonautica, Virgil's Aeneid, and Ovid's metamorphoses.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

---

**CLASS 1144 - GREEK AND ROMAN LYRIC POETRY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Study of selected poems and fragments of the Greek and Roman lyric poets in English translation. Among the poets that may be read are Archilochus, Sappho, Pindar, Catullus, and Horace.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

---

**CLASS 1151 - DEATH IN THE MEDITERRANEAN WORLD**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In many cultures, people sometimes ask fundamental questions about their existence, including, "what happens after we die?" This course will focus
on the evolution of beliefs and rituals related to death and the afterlife in and around the ancient Mediterranean basin, including Egyptian, Greek, Etruscan, and Roman cultures. Using an interdisciplinary approach, we will combine methodologies from anthropology, classics, history, and religious studies. Topics to be covered include myths of the afterlife, books of the dead, magic and death rituals, funeral practices and paraphernalia (disposal of the dead), cults of the dead, divinization, heaven and hell, judgment, and the impact of Christianization on the ancient understanding of death.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req.

**CLASS 1164 - GREEK TRAGEDIES AND MODERN RESPONSES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Undergraduate  
- **Course Component:** Seminar  
- **Grade Component:** Letter Grade  
- **Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

**CLASS 1210 - GREEK HISTORY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- **Academic Career:** Undergraduate  
- **Course Component:** Lecture  
- **Grade Component:** LG/SNC Elective Basis  
- **Course Attributes:** DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

CLASS 1240 - FROM PANDORA TO PSYCHOPATHY: CONCEPTIONS OF EVIL FROM ANTIQUITY TO THE PRESENT

Minimum Credits: 3  
Maximum Credits: 3  
This lecture course introduces students to the ways in which humanity has struggled to comprehend and explain the existence of evil. The focus lies not on natural evils (such as earthquakes and epidemics) but on moral evil: Why are human beings at time so manifestly wicked? In this course we will look at the many theories and explanations given by poets, philosophers, and theologians over the course of our intellectual history and critically examine their explanatory value as well as their unintended consequences. The course is highly interdisciplinary. It will take into account the literature of various periods, beginning from early bronze age to the 21st century, but also invite students to engage with texts from such different genres as poetry, ancient and modern philosophy, theology, and modern psychology. The aim of the class is to empower students better to evaluate and critique facile contemporary views and prejudices concerning the nature and origin of moral evil.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

CLASS 1250 - LAW & SOCIETY IN GREECE & ROME

Minimum Credits: 3  
Maximum Credits: 3  
This advanced undergraduate course examines the legal systems of ancient Greece and Rome with particular attention to interrelations with contemporary society.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

CLASS 1312 - PLATO

Minimum Credits: 3  
Maximum Credits: 3  
This is an advanced undergraduate course examining Plato's main views both in their historical context, and as they influence our own thinking today; the relations between Socrates and the sophists are also studied.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CLASS 0300 or PHIL 0200  
Course Attributes: West European Studies

CLASS 1314 - ARISTOTLE

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine the basic concepts of Aristotle's metaphysics, physics, ethics, and logic.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

CLASS 1390 - TOPICS IN ANCIENT PHILOSOPHY

Minimum Credits: 3  
Maximum Credits: 3  
Study of selected topics in ancient philosophy. All readings are in English translation.  
Academic Career: Undergraduate
CLASS 1402 - GRECO-ROMAN RELIGIONS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to religious texts and traditions in a formative era of Western civilization and culture. Our focus will be on the variety of religious expression in Greco-Roman culture, which flourished in the geographical area of the Mediterranean basin during the first five centuries of the common era. By considering such topics as debates about the nature of the gods and access to them (through oracles, ritual and magic), the emergence of the idea of the holy person, and a variety of religious traditions as expressed in prayer, ritual and art, students will encounter a rich religious imagination that is truly different from contemporary understandings of religion and yet strangely familiar as well. We will also explore the complete integration between religion politics in the ancient world.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 1430 - ORIGINS OF CHRISTIANITY

Minimum Credits: 3
Maximum Credits: 3
This course presents a historical-critical investigation of Christian origins. Special attention is paid to varieties of 1st century Hellenistic and Palestinian Judaism within the Greco-Roman world. Primary readings include selected Biblical passages and apocrypha, 1st century historians and philosophers (Josephus, Tacitus, Suetonius, and Philo), the New Testament corpus (including Paul and the Pastorals), and selected readings from the Dead Sea Scrolls. In addition there will be assignments from various modern New Testament critics, historians, and theologians.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Historical Analysis General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

CLASS 1432 - VARIETIES OF EARLY CHRISTIANITY

Minimum Credits: 3
Maximum Credits: 3
An examination of the diverse strands of Christianity as developed both in the Christian bible and outside of it.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Historical Analysis General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

CLASS 1510 - GREEK ART

Minimum Credits: 3
Maximum Credits: 3
The study of Greek art begins ca. 3000 B.C. In the so-called "age of bronze" and traditionally ends in 30 B.C. With the completion of the roman conquest of the eastern Mediterranean. The course will trace the development of architecture, sculpture and painting in mainland Greece and to a lesser extent in the Greek colonies of Asia minor and Italy, emphasizing the changes in style and taste which took place over this period.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
CLASS 1520 - ROMAN ART

Minimum Credits: 3
Maximum Credits: 3
Roman art served as the funnel through which the principles of Greek art passed into European culture, but the principles were transformed in the process of transmission. The course will trace the beginnings and subsequent development of the arts of painting, sculpture, and architecture in Italy from the period of the kings, and the middle years of the empire (ca. 150 A.D.).
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CLASS 1524 - ROMAN ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
The course will examine the development of Roman architecture from its origins in Etruria and central Italy to the middle empire (ca. 150 A.D.). Special attention will be given to the relationship of architectural forms, types and functions to changes in Roman politics and society and the significance of materials and outside influences on the development of local Italian traditions and forms. The interaction between roman architectural forms and local traditions in the provinces to create a Roman imperial "koine", will be treated only in passing.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

CLASS 1610 - GREEK ARCHAEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the archaeologist's task of bringing lost societies back to light through the study of their physical remains and material culture. By examining ancient Greek art, architecture, inscriptions, burials, coins, and the many everyday objects that survive from antiquity, archaeologists are able to shine light on details of Greek society that are often totally inaccessible from the surviving literary and historiographical record. The course begins with an examination of the archaeology of the bronze age, and presents a survey of the archaic, classical, and Hellenistic periods, as well as a history of the archaeological discipline itself from the nineteenth century to today.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

CLASS 1630 - MARGINALITY IN THE ANCIENT GREEK WORLD

Minimum Credits: 3
Maximum Credits: 3
This undergraduate course surveys the literary and material evidence of marginality in the ancient Greek world. This course includes an introduction to Greek culture, a discussion of common terms associated with marginality. Different groups who were marginalized, such as those of low socioeconomic status, those of differing ethnicity and race, the disabled and deformed, the mentally ill, slaves and other marginalized individuals will be discussed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements

CLASS 1640 - THINK LIKE A ROMAN

Minimum Credits: 3
Maximum Credits: 3
The course explores the ancient world through the lens of cognition, examining a variety of socio-historical topics, like emotion, spatial and temporal perception, color cognition, and memory and mnemotechnics, as viewed through ancient literature and modern research in cognitive psychology. Through written assignments and group discussion, students practice interpreting psychological research and Classics scholarship that looks at ancient texts through the lens of cognitive science. In addition to studying ancient cognition, students reflect on their own learning, while engaging with research on metacognition to develop evidence-based practices for improving their writing and study habits. This course is designated as a Writing Intensive course, and students will conduct an independent research project that applies cognitive methods to ancient literature, history, or art.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLMF 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

**CLASS 1650 - WARFARE: ANCIENT MEDITERRANEAN**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Since the dawn of civilization, warfare has been a constant threat to society. Although the material remains of ancient warfare survive in the archaeological record, the literary accounts of Greco-Roman authors provide us with additional evidence to reconstruct developments in, and attitudes toward, armed conflict in the ancient Mediterranean region. This undergraduate course surveys the literary and material evidence of Greco-Roman warfare. Significant battles, developments, strategies, and attitudes are presented chronologically, and special attention is paid to issues of biological and chemical warfare, votive dedications and war trophies, casualties and commemoration, civilian impact, and the effects of post-traumatic stress disorder. This class is a designated W-course, so considerable attention will be paid to developing critical reading, writing, and oral presentation skills.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLMF 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

**Course Attributes:** DSAS Geographic Region General Ed. Requirement, SCI Polymathic Contexts: Global&Cross Cul GE. Req., Writing Requirement Course

**CLASS 1710 - SANSKRIT 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
An introduction to the basic structure and vocabulary of Sanskrit. Approximately half of the course is devoted to an intensive survey of Sanskrit grammar and half to the reading of a selection from the Mahabharata.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Asian Studies

**CLASS 1720 - SANSKRIT 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A continuation of Sanskrit 1, this course is devoted to the reading of selected Sanskrit texts. Grammar presented in Sanskrit 1 is reviewed as necessary and some additional grammatical material is introduced.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Asian Studies, DSAS Second Language General Ed. Requirement

**CLASS 1800 - HONORS COURSE/MAJORS**
Minimum Credits: 3
Maximum Credits: 3
In this course undergraduate majors in classics who wish to graduate with honors (and are otherwise qualified) write an honors paper, usually in conjunction with an upper-level classics course.
Academic Career: Undergraduate
Course Component: Thesis Research
Grade Component: Satisfactory/No Credit

CLASS 1810 - ANCIENT MEDICINE

Minimum Credits: 3
Maximum Credits: 3
This course offers an introduction to ancient Greek and Roman medical thought, theory, and practice. Though many of their teachings and techniques might seem bizarre, gross, or even dangerous, Hippocrates, Galen, and their successors shaped the foundational principles of western medical culture for over a thousand years. From William Harvey's invocation of the "divine Galen" in his treatise on the circulatory system to the citation of the "Hippocratic Oath" by the prosecution during the Nuremberg Trials, the tradition of Greek and Roman medicine has continued to influence modern medicine and culture in profound ways. A close examination of the theories and practice of medicine in antiquity therefore not only deepens our understanding of Classical Greek, Alexandrian, and Roman cultures, but also illuminates a vital chapter in the development of today's clinical practice. CLASS 1810 is an advanced research seminar in Classics. To be eligible, participants should have completed at least one of the following courses in the Classics Department at the University of Pittsburgh: CLASS 0010, CLASS 0020, CLASS 0032, CLASS 1210, or CLASS 1220. Others may request instructor approval. Please e-mail the instructor if you have questions about these prerequisites.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

CLASS 1900 - INTERSHIP IN CLASSICS

Minimum Credits: 1
Maximum Credits: 3
Students may complete an internship for 1-3 credits to gain practical experience in a supervised training environment. Permission from a faculty advisor is required to enroll.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Attributes: Undergraduate Internship

CLASS 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes independent study in the field of classical civilization in consultation with a member of the faculty.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

CLASS 1902 - DIRECTED STUDY FOR UNDERGRADS

Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes directed study in the field of classical civilization under the close guidance of a member of the faculty.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

CLASS 1903 - DIRECTED RESEARCH FOR UNDERGRADS
Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes directed research in the field of classical civilization under the close guidance of a member of the faculty.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Attributes: Capstone Course

CLASS 1904 - UNDERGRADUATE RESEARCH ASSISTANT

Minimum Credits: 1
Maximum Credits: 3
This course enables advanced majors to receive academic credit for serving as assistants to faculty members who are conducting research projects (e.g., compiling bibliography for a new class, preparing a work for publication, creating a conference presentation). This collaborative project will result in a meaningful experience that will provide the student with a foundation in the mechanics of research and publication. Given the variable aspects of this learning experience, there is not official syllabus. However, students and faculty who participate in this course are required to submit a signed contract prior to the start of the semester in which the assistantship will occur. This contract is subject to the approval of the undergraduate committee.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit

CLASS 1908 - DIRECTED WRITING FOR MAJORS

Minimum Credits: 1
Maximum Credits: 1
In addition to whatever written assignments are required of those enrolled in the course, this directed writing-practicum provides students with an opportunity to contribute writing designed in terms of the intellectual strategies of the course.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

CLASS 1950 - CLASSICS CAPSTONE

Minimum Credits: 3
Maximum Credits: 3
This course is designed to encompass, evaluate, and interpret evidence from the ancient world that is commonly left behind in surveys of canonical or traditional works: legal inscriptions, epitaphs, papyri fragments, curse tablets, graffiti, and even human remains are all detritus left behind by the cultures of the Mediterranean, and while they constitute a considerable portion of the ancient evidentiary corpus. We will engage with these "extra-canonical" bodies of evidence through rigorous application of interdisciplinary methodologies in order to complicate our view of the ancient world. Study of these ancient witnesses will reveal the ancient Mediterranean as a vibrant, transcultural, and transchronological environment, filled with the lived experience of more than just the male elite whose works frequently compose literary and cultural histories. The course is meant to serve as a "capstone" applicable for all Classics majors and minors.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Attributes: DSAS Cross-Cult. Awareness General Ed. Requirement

CLASS 1990 - UNDERGRADUATE TEACHING ASSISTANTSHIPS IN CLASSICS

Minimum Credits: 1
Maximum Credits: 5
This course allows students to earn credits for serving as undergraduate teaching assistants in courses listed under the 'classics' subject code.
Admission requires permission of the department chair. Students may repeat for credit.

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Letter Grade

Co-Ed Physical Education

**PEDC 0001 - BEGINNING SWIMMING**

- Minimum Credits: 1
- Maximum Credits: 1
For students who are unable to swim or who can swim very little. Opportunities are presented to learn basic functional aquatic skills and basic strokes. Students are permitted to set their own achievement goals. Instruction is on an individual basis.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

**PEDC 0002 - INTERMEDIATE SWIMMING**

- Minimum Credits: 1
- Maximum Credits: 1
For students who have learned the mechanics of basic aquatic strokes and are interested in the development of proper rhythm and timing necessary for good performance in swimming. Students are permitted to set their own achievement goals. Instruction is on an individual basis.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

**PEDC 0010 - WATER AEROBICS**

- Minimum Credits: 1
- Maximum Credits: 1
Improve your fitness in the enjoyable aquatic environment. This program is designed for all ages. Each enrollee will be permitted to participate at their own level gradually improving their muscle tone, cardiac, and respiratory fitness levels. This program will be conducted in shallow water so that the non-swimmer may participate.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

**PEDC 0022 - AEROBIC DANCE**

- Minimum Credits: 1
- Maximum Credits: 1
Improve your fitness levels with this aerobic dance to music course. One of America's most popular ways to exercise. This program is for all ages. Each enrollee will be permitted to participate at his/her own level, gradually improving muscle tone, cardiac, and respiratory fitness.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

**PEDC 0023 - WEIGHT TRAINING**

- Minimum Credits: 1
- Maximum Credits: 1
A coeducational class designed to provide the student with the opportunity to develop and practice basic weight training techniques. With the guidance of the instructor, the student will be encouraged to develop an individualized self-designed program. The emphasis of this course will be placed on progressive-resistive exercises.
PEDC 0025 - AEROBICS-CROSS COUNTRY RUNNING

Minimum Credits: 1
Maximum Credits: 1
Primarily involves a training program of light to moderate intensity with increased cardiovascular fitness and improved quality of life as a goal. In support of the instruction on cross-country running, students will receive some background information on aerobics in the form of handouts and mini lectures.

PEDC 0026 - AQUATIC CONDITIONING

Minimum Credits: 1
Maximum Credits: 1
Good swimmers who want to learn how to use swimming to maintain or improve their physical fitness should register for this course. Students may determine their capacity for exercise, and they may learn how to apply this effort in the water.

PEDC 0031 - MODERN DANCE 1

Minimum Credits: 1
Maximum Credits: 1
Introduces the college student to modern dance as a point of view, rather than a particular technique. There will be exercises to increase strength, and flexibility, as well as to teach techniques of movement, exploration and improvisation. Emphasis is on developing a sensitive awareness of one's own body movement in time and space.

PEDC 0032 - MODERN DANCE 2

Minimum Credits: 1
Maximum Credits: 1
This course is designed for those students who have mastered beginning dance technique and wish to gain more advanced skills. Advanced technique and compositional work is stressed. Course objectives include increased technical skills, awareness and appreciation of modern dance as an art form, ease in phrasing rhythmical movement and skill in improvisational movement.

PEDC 0033 - BALLET 1

Minimum Credits: 1
Maximum Credits: 1
For absolute beginners introducing them to basic fundamentals of the classic ballet technique.
PEDC 0034 - BALLET 2
Minimum Credits: 1
Maximum Credits: 1
An intermediate class, taught as a continuation of ballet 1. Also a class for students who may have some ballet training before coming to college. Audition for class eligibility at the first class session or permission of instructor.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0040 - CHOREOGRAPHY
Minimum Credits: 1
Maximum Credits: 1
The art of making dances. Studies dealing with timing, grouping, energy, quality, etc., Lead to the creation of dances. Designed for students who wish to explore the creative process or for those wanting more advanced dance training.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0041 - JAZZ 1
Minimum Credits: 1
Maximum Credits: 1
Fundamentals of jazz dance for beginning dance students. Class includes warm-up, center floor, and cross floor movement combinations, contemporary jazz and pop music is emphasized.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0042 - JAZZ 2
Minimum Credits: 1
Maximum Credits: 1
A continuation of the basic fundamentals learned in jazz 1. More emphasis is placed on longer routines and more complicated movement sequences. It is an intermediate jazz class.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

PEDC 0044 - DANCE PRODUCTION
Minimum Credits: 2
Maximum Credits: 2
This course is designed to familiarize students with both the technical and production aspects of dance and to increase appreciation of dance in all its forms.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

PEDC 0048 - RACQUETBALL 1
Minimum Credits: 1
Maximum Credits: 1
This course is designed to introduce the beginner to the significant components of racquetball. Three types of racquetball games, singles, doubles,
and cut throat, will be introduced in conjunction with individual skill development. The grip, ready position, racquet swing, service, return of service, and shot making will be covered. Game strategies and rules and regulations will be reviewed.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

**PEDC 0049 - BADMINTON**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed to introduce the beginner to the significant components of badminton. The following basic strokes will be presented in class; forehand and backhand, overhead clear, high singles service, low doubles service, smash and drop. Rules and regulations and strategies for doubles and singles games will be presented.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

**PEDC 0050 - RACQUETBALL 2**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course provides basic stroke mechanics, practice drills, and winning strategies for advanced players with a knowledge of the game of racquetball. Class time will deal in depth with the drive, lob, overhead z-serves, serve returns, back wall play, and training aids. Developing strategies for winning in singles and doubles will be dealt with extensively in class.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis

**PEDC 0065 - VOLLEYBALL**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed to introduce the beginner to the significant components of volleyball. Basic skills to be taught will include the overhead volley, forearm pass, service, spike, individual block and defensive recovery skills. A 4-2 right-side-setter offensive system will be introduced with a 6-back and a 6-up defensive system. All rules and regulations will be reviewed during the course.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis

**PEDC 0068 - JUDO 1**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
An intensive study of the basic physics and principles governing the art of judo. It is no longer an oriental mystique. Today, judo is practiced worldwide by men and women of all ages. The "judoka" (student) will acquire confidence as well as improved physical endurance. In addition to this, the student will begin to grasp the true meaning of judo and find how it can apply to life in general. Judo gi is required.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

**PEDC 0069 - JUDO 2**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
A continuation of Judo 1 including mat techniques such as strangle, joint lock, and pinning. New students must have a yellow belt.

**Academic Career:** Undergraduate
**PEDC 0087 - PERSONAL DEFENSE**

Minimum Credits: 1  
Maximum Credits: 1  
Offers physical conditioning and self-defense through the application of judo. Emergency self-defense from various attacks will be taught utilizing basic throwing, grappling, and striking techniques. Students develop a deep respect for others, inner security, and self-confidence. The purpose of this course is to defeat an opponent through the most efficient use of mind and body, but doing so on the principle of "giving away" under his attack or effort.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

**PEDC 0090 - VARSITY SPORTS 1**

Minimum Credits: 1  
Maximum Credits: 1  
Students may earn four credits in physical education by participating in a varsity sport. One credit only per term. Student must be a varsity athlete.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade  
Course Requirements: STDNT GRP: Student Athlete or Cheer / Dance  
Course Attributes: UPB Physical Education General Ed. Requirement

**PEDC 0091 - VARSITY SPORTS 2**

Minimum Credits: 1  
Maximum Credits: 1  
Students may earn one credit in physical education by participation in a varsity sport for his/her second term.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade  
Course Requirements: PREQ: PEDC 0090; STDNT GRP: Student Athlete or Cheer / Dance

**PEDC 0099 - BASIC ROCK CLIMBING**

Minimum Credits: 1  
Maximum Credits: 1  
Beginning with bouldering, the course will deal primarily with rope handling and moving on vertical rock planes in a safe manner. Covered in this course are bouldering, friction and balance climbing, 3-point suspension, use of ropes, knot craft, body rappelling, free rigging climbs, mountain safety, basic belaying, use of webbing (slings and harnesses), chimney techniques and natural protection.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: LG/SNC Elective Basis

**PEDC 0133 - LIFE GUARDING 1**

Minimum Credits: 1  
Maximum Credits: 1  
For the intermediate level or above swimmer who wishes to gain national red cross lifeguard certification. Training is specifically designed to prepare enrollers for lifeguarding pools and openwater beaches. Advanced lifesaving, community first aid, and CPR certifications are required if not already obtained before course completion.  
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

**PEDC 0135 - BASKETBALL 1 - CO-EDUCATIONAL**

Minimum Credits: 1  
Maximum Credits: 1  
Supervised competition follows a conditioning period in which individual skills and team strategy are stressed. Opportunity to improve on previously acquired skills and become a team member is provided.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

**PEDC 0146 - FIRST AID AND CPR**

Minimum Credits: 1  
Maximum Credits: 1  
A laboratory-lecture course in which American Red Cross techniques of cardiopulmonary resuscitation (CPR) and standard first aid are presented. All students who meet the American Red Cross standards will receive American Red Cross certification.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: LG/SNC Elective Basis

**PEDC 0147 - WATER SAFETY INSTRUCTOR**

Minimum Credits: 2  
Maximum Credits: 2  
The water safety instructor course is designed to earn certification to teach American Red Cross swimming and water safety courses. The course focuses on planning, organizing, sequencing, skill development, and Red Cross operational policies and procedures.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

**PEDC 0153 - VARSITY SPORTS 3**

Minimum Credits: 1  
Maximum Credits: 1  
Students may earn one credit in physical education by participation in a varsity sport for his/her third term.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade  
Course Requirements: PREQ: PEDC 0091; STDNT GRP: Student Athlete or Cheer / Dance

**PEDC 0154 - VARSITY SPORTS 4**

Minimum Credits: 1  
Maximum Credits: 1  
Students may earn one credit in physical education by participation in a varsity sport for his/her fourth term.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade  
Course Requirements: PREQ: PEDC 0153; STDNT GRP: Student Athlete or Cheer / Dance

**PEDC 0158 - WEIGHT TRAINING - BEGINNER**
A coeducational class designed to provide the student with the opportunity to develop and practice basic weight training techniques. With the guidance of the instructor, the student will be encouraged to develop an individualized self-designed program. The emphasis of this course will be placed on progressive-resistive exercises.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0162 - DANCE BASICS

For those people who always had a desire to learn to dance but were intimidated by a formal class. Break your own stereotype! If increasing your flexibility, strength, coordination and rhythmic awareness is a goal, you can do it in an enjoyable atmosphere of sound and movement. Learn dance fundamentals that are used in ballet, jazz, and modern dance. Some social dance and folk dance movements are included. Barre and floor warm-up and movement sequences are contained in each class.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

PEDC 0164 - PARTY DANCE

This class will focus on generic dance movements that you can use in social dance situations. Hip-hop, line dances like electric slide and ache-y-breaky, and free form styles will be highlighted. Understanding rhythm and moving rhythmically will also be included. Learn how to learn dance so you can feel confident at weddings, house parties and clubs. This is strictly for non-dancers that want to become dance confident.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0171 - FITNESS KICK BOXING

Our exercise program is based on the concepts of boxing, karate, muay thai kick boxing, and total fitness accompanied by rhythmic music. Conditioning is focused on the areas of endurance, strength, and flexibility; all of which can bring about positive physical changes in participating students. Aerobic and anaerobic power training with speed bag and heavy bag is part of the training module.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0175 - AEROBIC FITNESS BOXING

Our exercise program is based on the concepts of boxing, karate, muay thai kick boxing, and total fitness accompanied by rhythmic music. Conditioning is focused on the areas of endurance, strength, and flexibility; all of which can bring about positive physical changes in participating students. Aerobic and power training are a part of the enduring comprehensive training module.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0177 - WEIGHT TRAINING - INTERMEDIATE/ADVANCED
A class designed for the student who is engaged in resistance exercise and is interested in advancing their weight training techniques. With the guidance of the instructor, the student will engage in an individualized self-designed intermediate-to-advanced resistance training program. The emphasis of this course is placed on progressive-resistive exercises, and is designed for the intermediate/advanced-level weight training exerciser.

**Academic Career:** Undergraduate
**Course Component:** Credit Laboratory
**Grade Component:** Letter Grade

**PEDC 0180 - VOLLEYBALL 1**

This course is designed to introduce the beginner to the significant components of volleyball. Basic skills to be taught will include the overhead volley, forearm pass, service spike, individual block and defensive recovery skills. A 4-2 right-side-setter offensive system will be introduced with a 6-back and a 6-up defensive system. All rules and regulations will be reviewed during the course.

**Academic Career:** Undergraduate
**Course Component:** Credit Laboratory
**Grade Component:** Letter Grade

**PEDC 0187 - HIIT & CONDITIONING: AN INTRO COURSE TO APPLY HIIT & OTHER CONDITIONING PRINCIPALS**

An introductory course to apply HIIT (high-intensity interval training) and other conditioning principals to enhance physical fitness. HIIT is a form of interval training that alternates short periods of intense anaerobic exercise with less intense recovery periods. This course will also include other conditioning opportunities to enhance total physical fitness.

**Academic Career:** Undergraduate
**Course Component:** Credit Laboratory
**Grade Component:** Letter Grade

**PEDC 0188 - PADDLE BOARD YOGA**

An introductory course on the practice and theory of the basic principles of paddle board yoga. This includes learning basic paddle boarding skills to allow for performance of yoga-based exercise while on the paddle board that progresses to the water in a pool. This unique class will provide students with a plan to focus on their particular bodies' strengths and weaknesses plus increase flexibility.

**Academic Career:** Undergraduate
**Course Component:** Credit Laboratory
**Grade Component:** Letter Grade

**PEDC 0193 - PERSONAL FITNESS**

An organized approach to health related fitness with diagnostic and prescriptive assessment. The emphasis is on an individual, self-designed program based on scientific principles with the goal of personal improvement and fitness knowledge of primary importance. Various types of exercise will be incorporated into class times.

**Academic Career:** Undergraduate
**Course Component:** Credit Laboratory
**Grade Component:** Letter Grade

**PEDC 0194 - SPORTS CONDITIONING**
Minimum Credits: 1
Maximum Credits: 1
This course includes sport specific training for a multitude of sports including plyometric, speed and agility training, resistance training and will incorporate different modes of aerobic training. This course focuses on how to train different types of athletes and how each specific type of training is related to the sport/event involved. This is a high intensity exercise course and should not be taken if the student is not apparently healthy and has not already had at least some experience in sport and/or fitness related fields.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0196 - FIRST AID AND CPR

Minimum Credits: 2
Maximum Credits: 2
A 2-credit lab/lecture discussion course in which American red cross techniques of cardiopulmonary resuscitation (CPR) for the professional rescuer and community first aid and safety are presented. In addition to these skills, current methods of management and treatment of emergency illnesses and injuries are also taught. American red cross certification available to all students who meet the standards.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0197 - BOOTCAMP FITNESS

Minimum Credits: 1
Maximum Credits: 1
If you want to increase your fitness level, burn fat, look great and feel fantastic, then take your workout to the next level in boot camp fitness! A typical class will include cardio exercise such as jump rope, jumping jacks, jogging as well as muscular endurance exercises such as push-ups, squats, lunges, etc. Everyone will be encouraged to excel to their very best but will not be pushed to the point of injury or pain. All exercises can be modified to suit each participant's needs.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0206 - BODY SCULPTING 1

Minimum Credits: 1
Maximum Credits: 1
Exercise to music in this non-impact class designed to develop muscular definition, firming, toning, and strength. Weights and other resistive devices will be incorporated into workout routines.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0207 - PILATES

Minimum Credits: 1
Maximum Credits: 1
The pilates method of body conditioning strengthens and tones muscles, improves posture, provides flexibility and balance, unites body and mind, and creates a more stream lined shape. Pilates is great for people of all ages and fitness levels, as it uses your body's own natural resistance to define and elongate the muscles.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0209 - "ON THE BALL"
Minimum Credits: 1
Maximum Credits: 1
A 60 minute resistance training workout using stability balls, hand weights, and resistance tubing. This class will focus on increasing core strength, as well as overall muscle tone, balance, and coordination. A nice compliment to your cardio workout!
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

PEDC 0211 - WATER FITNESS

Minimum Credits: 1
Maximum Credits: 1
Improve your fitness in an enjoyable environment! This program is designed for all ages allowing the student to participate at his or her own level. Students will gradually improve muscle tone and cardiac fitness levels. The program is conducted in shallow water so that non-swimmers may participate.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

PEDC 0222 - CYCLE EXERCISE

Minimum Credits: 1
Maximum Credits: 1
This class if for anyone that wants a killer cardiovascular workout without being bored on a traditional cardio machine. Spinning bikes simulate an outside ride by allowing you to change positions on the bike as well as resistance to simulate hills. This class will incorporate sprints, seated climbs, standing climbs, jumps and more for an anything-but-boring workout! During the class, you can work at your own intensity level whether it is light to moderate or vigorous. Spinning is great for anyone and everyone including cyclists as well as those of you that aren't the best of cyclists. No bike riding experience is necessary for this class.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0225 - BUDO

Minimum Credits: 1
Maximum Credits: 1
An overview of martial arts which combines the practice of kobudo, ancient weaponry-bo (long stick), jo (short stick), sia, aiki, sumo jujitsu & karate do. Class will incorporate the use of ancient weaponry and the art of ju-jitsu, which is composed of falling, throwing, pressure points, disarming skills against the weapon, the art of restraining, and ground grappling. This course will cover the history and philosophy of these activities and also physically using tactical application. Budo will provide student insight on how different disciplines are combined and used.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0226 - FITNESS BOXING 1

Minimum Credits: 1
Maximum Credits: 1
For students who want a high level of fitness achieved through learning various beginning, non-contact boxing skills and techniques. Skills include: shadow boxing, defensive techniques, non-contact sparring, heavy bag workout, speed bag techniques, rope jumping, and strength and conditioning exercises.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0231 - SOCCER 1
Minimum Credits: 1
Maximum Credits: 1
For the beginner who wishes to develop competence in the skills, rules, and strategies required for participation in soccer.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0232 - TOUCH FOOTBALL 1

Minimum Credits: 1
Maximum Credits: 1
A co-educational course designed to provide the student with an opportunity to develop the fundamental skills of football, along with experimenting with organized competition in touch football games.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0236 - AEROBIC MIX

Minimum Credits: 1
Maximum Credits: 1
This is a great class for anyone who loves variety! This course provides a mixture of various types of cardiovascular exercise including, but not limited to, hi-lo floor aerobics, step aerobics and cardio kickboxing. In addition, resistance training, yoga and/or pilates may be incorporated into the exercise sessions. Classes will vary at the instructor's discretion.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0237 - AEROBIC EXERCISE

Minimum Credits: 1
Maximum Credits: 1
This class is for those who prefer floor aerobics to step aerobics. The class will include predominantly hi-lo floor aerobics. Other forms of exercise may include resistance training, yoga and pilates.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

PEDC 0242 - AMER RED CROSS LIFEGUARD INSTRC

Minimum Credits: 2
Maximum Credits: 2
American red cross lifeguard training for instructors will certify the student to teach various components of American red cross classes, i.e. Lifeguard training, adult and child, CPR for the professional rescuer, and community first aid and safety classes. This certification enables students to teach the above mentioned classes in any state authorized by the American red cross.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

PEDC 0243 - AMER RED CROSS FIRST/CPR INSTRC

Minimum Credits: 2
Maximum Credits: 2
American red cross standard first aid and CPR for instructors will certify the student to teach various components of American red cross classes, i.e. Adult, infant and child, and CPR for the professional rescuer, as well as community first aid and safety classes. This certification enables students to teach the above mentioned classes in any state authorized by the American red cross.
PEDC 0244 - DANCE PRODUCTION 2

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to familiarize students with both the technical and production aspects of dance in all its forms. The students will have experiences with lighting, costume, choreography, public relations, and stage management.

PEDC 0246 - POOL OPERATIONS/EVENT MANAGEMENT

Minimum Credits: 1  
Maximum Credits: 3  
Course will cover all aspects of pool operations including safety requirements, scheduling, emergency action plan, lifeguard rotations and filtration. Section on event management will include scheduling, set up and break down of competition pool including lane ropes, touchpads, flags, blocks, and timing system. Attendance at pre-determined pool events will be required. Total number of credits earned will be based on minimum number of hours worked.

PEDC 0263 - YOGA 2

Minimum Credits: 1  
Maximum Credits: 1  
An intermediate level course on the theory of basic principles of yoga.

PEDC 0266 - PILATES FUSION

Minimum Credits: 1  
Maximum Credits: 1  
Pilates fusion is based on the Pilates system, but is more movement centered, as we transition from one form to the next through movement stretches taken from release methods. These release methods are designed to lengthen and to soften the muscles. The movements are constant, so there is flow and connection rather than a static approach. There is a focus on proper form, finding center through the pelvis, core strengthening and its relation to the back. Techniques from yoga practice are also incorporated into this class.

PEDC 0267 - BEGINNING KARATE

Minimum Credits: 1  
Maximum Credits: 1  
An introduction on the principles and techniques of traditional shotokan karate. Students will begin training with physical conditioning and basic blocking, striking, punching, and kicking techniques.
PEDC 0287 - PERSONAL DEFENSE 1

Minimum Credits: 1
Maximum Credits: 1
The purpose of this course is to teach students how to defeat an opponent through the most efficient use of mind and body, but doing so on the principle of "giving away" under his/her attack or effort. Emergency self-defense from various attacks will be taught utilizing basic judo techniques and the "byam" method.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0340 - KETTLE BELL AND CONDITIONING

Minimum Credits: 1
Maximum Credits: 1
This class is designed to provide the student with a total body strength and cardiovascular workout utilizing kettle bell equipment and various strength conditioning techniques. Emphasis is on circuit style or continuous training with the goal of progressively increasing the intensity and difficulty of the workout throughout the semester.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0361 - FITNESS DANCE

Minimum Credits: 1
Maximum Credits: 1
This class, set to contemporary music, is designed to get your moving while learning fun and exciting dance movements! The class begins with a warm-up consisting of fundamental dance principles and techniques that will prepare you to move into dance phrases and choreographed movement. The class cools down with a series of stretches and muscle relaxing exercises. No previous dance training is required.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

PEDC 0362 - TOTAL BODY FUSION

Minimum Credits: 1
Maximum Credits: 1
This class is for anyone looking to increase cardiovascular fitness, firm and tone muscles, increase flexibility and de-stress. A typical class starts with cardiovascular exercise such as step aerobics, kickboxing and/or hi-lo aerobics, moves to body sculpting using free weights, bands and balls and finishes up with core work and stretching exercises. If you like a little of everything, this is definitely the class for you!
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

PEDC 0363 - ZUMBA

Minimum Credits: 1
Maximum Credits: 1
Zumba is a one of kind combination of dance and exercise, designed to put "Fun" back into fitness. The zumba workout maximizes caloric output, fat burning, and total body toning. The routines feature aerobic interval training with a combination of fast and slow rhythms that tone and sculpt the body. Exotic and explosive Latin rhythms create a party like atmosphere that delivers results, as well as a "Feel happy" workout. No previous experience in dance is needed to have fun with zumba.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
PEDC 0367 - BALLROOM 1

Minimum Credits: 1  
Maximum Credits: 1  
Beginners course: professional instruction in the smooth dances: waltz, fox-trot, tango and Viennese and Latin dances, cha cha, rumba, samba, mambo, etc.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

PEDC 0368 - LATIN RHYTHM AND SWING

Minimum Credits: 1  
Maximum Credits: 1  
Call it mambo, call it rock-n-roll.....Beginner, learn the basic footwork, turns and combination figures to these fiery dances. Learn to lead a partner. And partner, learn to follow the leader. Leading and following emphasized. Floor craft and dance etiquette will be taught. Styling and technique added to complete all dances. Also, special attention to timing and music recognition.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

PEDC 0380 - CARDIO PILATES

Minimum Credits: 1  
Maximum Credits: 1  
This class begins with aerobic exercise of various formats including: hi-lo, step and kickboxing to get your heart rate elevated and body moving. It then progresses to a short cool-down period and finishes with pilates mat exercises to sculpt your muscles and stretch your body. This class is great for anyone looking to increase cardiovascular fitness as well as strengthen, stretch and tone the muscles.  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: Letter Grade

PEDC 1002 - TAE KWON DO 1

Minimum Credits: 1  
Maximum Credits: 1  
An ancient Korean martial art that is a free-fighting, self-defense sport in which the athlete's entire body is a weapon. Tae kwon do requires physical training, coordination, and a high degree of mental discipline.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

PEDC 1003 - TAE KWON DO 2

Minimum Credits: 1  
Maximum Credits: 1  
A continuation for students in Tae Kwan Do 1. Learn to compete olympic style. Competition and advanced style defense techniques will be taught. New students must have a yellow belt.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade

PEDC 1006 - JIU JITSU
Jiu jitsu is a method of defense without weapons using hand, foot, and hip techniques combined with grappling and choke holds designed to render your attacker helpless and to help you gain more self-confidence. Jiu jitsu is not a contest of muscular strength. When practiced properly a smaller person can easily defend themselves against a larger person.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

**PEDC 1141 - FITNESS FOR INSTRUCTORS**

Minimum Credits: 2  
Maximum Credits: 2  
Fitness for instructors will teach the student the major elements of fitness. How to assess fitness levels, determine fitness goals, design fitness programs and facilities. The course will be a combination of classroom, exercise, and practical experiences.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** Letter Grade

**PEDC 1211 - ATHLETIC INJURY PREVENTION**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to provide the student with an introduction to the athletic training profession. Topics include medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** CREQ: PEDC 1212

**PEDC 1212 - ATHLETIC INJURY PREVENTION LAB**

Minimum Credits: 1  
Maximum Credits: 1  
An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive strappings and paddings for immediate care and competition are presented as well as basic joint evaluation procedures, massage, and crutch fitting.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** Letter Grade  
**Course Requirements:** CREQ: PEDC 1211

**PEDC 1233 - PRIN OF STRENGTH AND CONDITIONING**

Minimum Credits: 2  
Maximum Credits: 2  
Instruction is provided describing the principles for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and techniques of operating strength training equipment.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** Letter Grade

**PEDC 1300 - NUTRITION IN EXERCISE AND SPORT**

Minimum Credits: 1  
Maximum Credits: 1  
This course will provide the student with basic nutritional information as it pertains to sport and exercise performance. Topics of discussion include
weight reduction and management, nutritional requirements for athletic performance and maintenance of a healthy lifestyle, proper eating habits, diet fads, disordered eating, and supplementation.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

PEDC 1488 - WEIGHT MANAGEMENT AND PHYSICAL ACTIVITY

Minimum Credits: 2
Maximum Credits: 2
This course is designed for students who meet the clinical criteria for being overweight (body mass index \(> 25\) kg/m\(^2\)) and who desire to lose weight, improve their nutrition, and increase their exercise. This course will combine instruction on behavioral techniques to lose and maintain weight loss along with supervised cardiovascular and resistance exercise. Students will be assessed at the beginning and end of the course to monitor changes in weight, body composition, fitness and other factors.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

College of General Studies

CGS 0092 - UNIVERSITY SEMINAR

Minimum Credits: 1
Maximum Credits: 1
University Seminar (CGS 0092) provides new and/or transfer students with the skills necessary to maximize their potential for academic success at the University of Pittsburgh. During this course students will be exposed to various University resources; explore educational and career planning; gain academic confidence; and will become familiar with and utilize cognitive science research-based skills necessary for college success.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit

CGS 0093 - FROM CLASSROOM TO CAREER: ACADEMIC AND CAREER EXPLORATION 2

Minimum Credits: 1
Maximum Credits: 1
As the second course of a two course series on academic and professional development, this course asks students to further examine the ways that their academic plans and career goals align. Students will identify their current competencies and those they still need to acquire in order to succeed in identified careers. Building on their new understanding of their competencies and interests, students will develop strategies to reach their identified career goals, such as obtaining the internships, informational interviews, and job shadowing experiences necessary to attract prospective career opportunities and build their professional network. Ideal for career launchers and career changers, no prerequisites needed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit

CGS 0095 - CAPSTONE COURSE: IMPLEMENTING YOUR CAREER PLAN

Minimum Credits: 1
Maximum Credits: 1
This is primarily an on-line course, requiring weekly on-line participation, in addition to three in-person workshops. This course will provide students the opportunity to connect their academic competencies with their career goals. Students will utilize professional communication skills in order to effectively position themselves for appropriate career opportunities. Students will master career development techniques such as: practicing interviewing skills, writing professional documents, developing networking contacts, identifying job/graduate school opportunities and compiling a professional career plan, in order to conduct a well-organized job search or prepare for graduate school.

Academic Career: Undergraduate
CGS 1900 - CHOOSING YOUR PATH: INTERNSHIP SEMINAR

Minimum Credits: 1
Maximum Credits: 6
This is an undergraduate course offered through the College of General Studies for student interns in CGS majors such as Humanities, Social Sciences, Natural Sciences, Media and Professional Communications, Dental Hygiene, and Health Services, as well as several CGS certificate programs. Students enrolled in this internship engage in formal and reflective writing, journaling, and analysis about their work experience and how it relates to their academic and career pursuits. Class workshops and group discussions provide further opportunities for debriefing and consolidation of ideas and skills. This is a hybrid course with one in-person workshop and faculty authorization is required. Students must be registered for the internship course at the time they are completing the internship in order to earn credit.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

CGS 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Allows advanced students to pursue topics and research of special interest which are not otherwise available.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

Comm Science and Disorders

CSD 1020 - NATURE OF LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of linguistics and psycholinguistics including phonologic, morphologic, syntactic, semantic, and pragmatic aspects of linguistic theory and behavior. Topics may also include neurolinguistics, developmental psycholinguistics, and the relationship between cognition and language.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PSY 0010 or 0200 and must be Sophomore level or higher to enroll

CSD 1021 - LANGUAGE DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
Students in this course become acquainted with current models and empirical evidence concerning the process of language acquisition.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CSD 1020 or LING 1000; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

CSD 1022 - TRANSCRIPTION PHONETICS

Minimum Credits: 3
Maximum Credits: 3
The study of the phonemics of American English and of broad and narrow phonetic transcription, utilizing the international phonetic alphabet.
Attention will also be paid to the transcription of abnormal speech patterns.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Communication Science (BA, BPH)

### CSD 1023 - ANATOMY AND PHYSIOLOGY OF SPEECH

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- An overview of the anatomy and physiology of the system involved in speech production including respiration, phonation, articulation, resonance, and nervous system.  
  **Academic Career:** Undergraduate  
  **Course Component:** Lecture  
  **Grade Component:** Letter Grade  
  **Course Requirements:** PLAN: Communication Science (BA, BPH)  

### CSD 1024 - ANATOMY AND PHYSIOLOGY OF HEARING

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Study of the anatomy of the outer and middle ears, the middle ear transformer action, and acoustic reflex. Review of cochlear anatomy and theories of the transducer function of the inner ear. Study of central auditory pathways and binatural hearing.  
  **Academic Career:** Undergraduate  
  **Course Component:** Lecture  
  **Grade Component:** Letter Grade  
  **Course Requirements:** CREQ: CSD 1029

### CSD 1025 - HEARING SCIENCE

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- Fundamental concepts in normal audition. Review of acoustics, anatomy, and physiology of auditory system, psychophysical methods and subjective correlates to auditory stimulus.  
  **Academic Career:** Undergraduate  
  **Course Component:** Lecture  
  **Grade Component:** Letter Grade  
  **Course Requirements:** PREQ: CSD 1024 and CSD 1029; CREQ CSD 1028; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

### CSD 1026 - SPEECH SCIENCE

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
- An introduction to speech physiology, acoustics, perception, models of speech production, research methodology and current topics in the area of speech science.  
  **Academic Career:** Undergraduate  
  **Course Component:** Lecture  
  **Grade Component:** Letter Grade  
  **Course Requirements:** PREQ: CSD 1023 and CSD 1027; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree CDS

### CSD 1027 - LAB IN ANAT/PHYSIOLOGY OF SPEECH

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
- This is a one credit required experience for all students enrolled in the CSD 1023: Anatomy and physiology of speech. Includes opportunities to
review and enhance understanding of lecture material, utilizing additional drawings, anatomical models and actual specimens.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: CREQ: 1023

CSD 1028 - LAB IN HEARING SCIENCE

Minimum Credits: 1
Maximum Credits: 1
This is a one credit required experience for all students enrolled in "Hearing Science".
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PREQ: CSD 1024 and 1029; CREQ: CSD 1025; PLAN: Communication Science (BA, BPH) or Not Candidate for Degree

CSD 1029 - LAB IN ANAT/PHYSIOLOGY OF HEARING

Minimum Credits: 1
Maximum Credits: 1
This is a one credit required experience for all students enrolled in the "Anatomy and Physiology of Hearing" course (1024).
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: CREQ: 1024

CSD 1030 - LAB IN SPEECH SCIENCE

Minimum Credits: 1
Maximum Credits: 1
An introduction to speech physiology, acoustics, perception, models of speech production, research methodology and current topics in the area of speech science.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PLAN: Communication Science (BA,BPH)

CSD 1031 - GUIDED CLINICAL OBSERVATION

Minimum Credits: 1
Maximum Credits: 1
In this course guided clinical observations will be used as the context for students acquiring skills in describing and summarizing behaviors relevant to the study of communication disorders. Observation time earned in this course can be applied towards hours of clinical observation required by many graduate programs in audiology and speech-language pathology.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: H/S/U Basis
Course Requirements: PLAN: NCDCSD-ND; or Senior Academic Level

CSD 1099 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1101 - INTRO TO CLINICAL PROCESSES

Minimum Credits: 3
Maximum Credits: 3
This course overviews the clinical processes employed in the diagnosis and treatment of speech, language and hearing disorders. Videotaped observations of clinical sessions will be reviewed and discussed, with students preparing detailed observational reports.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CSD 1232; CREQ: CSD 1230

CSD 1102 - INTRODUCTION TO PROFESSIONAL AND CLINICAL ISSUES IN COMMUNICATION SCIENCE & DISORDERS

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to professional issues related to clinical practice in speech-language pathology and audiology. It includes an introduction to issues that affect service delivery across settings, incorporating guided observation and learning activities to facilitate integration and application of knowledge.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only and Sophomore Level or Higher

CSD 1111 - AURAL REHABILITATION

Minimum Credits: 3
Maximum Credits: 3
Principles and practices of aural habilitation and rehabilitation of children and adults. The effects of hearing loss on communication, social and emotional well-being, cognition, and participation in life activities will be addressed. Basic knowledge of treatment approaches and methods, as well as, resources (including technology) to help clients/patients and their family members, will be discussed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: CSD-BA, CSD-BPH or NCDCSD-ND PREQ: CSD 1232 Introduction to Audiology

CSD 1230 - INTRODUCTION TO SPEECH LANGUAGE PATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to the field of communication disorders, by acquainting them with the major disorder types as well as the major activities conducted by speech-language pathologists.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CSD 1231 - EVALUATION AND TREATMENT OF COMMUNICATION DISEASES

Minimum Credits: 3
Maximum Credits: 3
This course provides students with information concerning identification, assessment, and treatment of clients exhibiting various communication disorders.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1232 - INTRODUCTION TO AUDIOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
A pre-professional course that introduces elements of the basic audiometric/impedance test battery, advanced tests of diagnostic utility, evaluation of special populations, and the role of the clinical audiologist in aural rehabilitation.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1233 - INTRODUCTION TO RESEARCH

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an introduction to research methods in speech, language, and hearing sciences and communicative disorders. Students will learn how to read and critique research articles more effectively. They will also learn to generate research questions and to develop strategies for collecting data and evaluating experimental effects.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1234 - WRITTING PRACTICUM FOR CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS

Minimum Credits: 1  
Maximum Credits: 1  
A one-hour recitation section will be held weekly that will be dedicated to developing writing skills. Students will be required to produce samples of writing in many formats (article summaries and reviews, diagnostic reports, progress reports, and research reports) to prepare them to be effective communicators in the field of communication science and disorders. Students will be required to critique their own products as well as those of their peers.  
Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: Letter Grade  
Course Requirements: PLAN: Communication Science (BA, BPH)

CSD 1235 - CLINICAL METHODS IN COMMUNICATION SCIENCE & DISORDERS

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an introduction to clinical approaches and methods reflected in the management of communication and swallowing disorders across the lifespan. Emphasis is placed on diagnostic and treatment processes and the use of an evidence-based framework to guide clinical decisions.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: CSD-BA, CSD-BPH or NCDCSD-ND
CSD 1237 - INTRO TO NEUROSCIENCE OF COMMUNICATION

Minimum Credits: 3  
Maximum Credits: 3

This course describes the fundamentals of human brain structure and function as relevant to human communication. Methods used to probe the neural bases of speech, language, and hearing function along with current research findings are addressed. An understanding of how the brain processes speech and language provides insight into neurological disorders that affect communication.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1902 - DIRECTED STUDY

Minimum Credits: 1  
Maximum Credits: 3

This course is designed to enable students to explore an area of particular interest in depth. The student(s) and instructor agree on the topic area, method of study, requirements and evaluation procedure at the outset of the course.

Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1903 - USA IRELAND: SURVEY OF HEALTH, SOCIAL SERVICES, EDUCATION AND CULTURE

Minimum Credits: 2  
Maximum Credits: 2

This a required course for students who have been offered a place in the summer SHRS multi-disciplinary study abroad program in Ireland, CSD 1904. In this seminar-based course, students will explore the history of Ireland and the political and economic structure of Northern Ireland and the Republic of Ireland. This will serve as a foundation for further study of the health, educational and social service policies of each country and a basis for comparison with the US. Students will also review the medical, rehabilitation and educational sites to be visited during the summer program and become familiar with the conditions and disorders of the individuals served at each of these facilities.

Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: Satisfactory/No Credit  
Course Requirements: School of Health and Rehabilitation Sciences students only.

CSD 1904 - SHRS STUDY ABROAD IN IRELAND

Minimum Credits: 6  
Maximum Credits: 6

This an interdisciplinary study abroad opportunity offered through the department of communication science and disorders.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: CSD 1903  
Course Attributes: Pitt Class

CSD 1905 - SOCIAL AND HEALTH ISSUES IN EAST AFRICA

Minimum Credits: 3  
Maximum Credits: 3

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade  
Course Requirements: School of Health and Rehabilitation Sciences students only.
Communication: Rhet & Comm

COMMRC 0300 - COMMUNICATION AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to basic theories, models, and concepts in interpersonal, small group, organizational and intercultural communication.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Social Science General Ed. Requirement

COMMRC 0310 - RHETORIC & SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This is an introductory course designed to give students a sense of the role rhetoric plays in the construction of our social, political, and cultural worlds, and to introduce students to traditional and contemporary approaches to the analysis of rhetorical discourse. Students will prepare a series of short performances for presentation in the recitation sections.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req., SCI Polymathic Contexts: Humanistic GE. Req., Undergraduate Research

COMMRC 0311 - RHETORICAL PROCESS HONORS RECITATION

Minimum Credits: 1
Maximum Credits: 1
The honors recitation section is an extension of the COMMRC rhetorical process course, with special emphasis on 1) the formulation of productive questions, 2) deliberate, informed invention, and 3) the conception of student-driven projects that leverage students' academic expertise and lived experience for the generation of collaborative analyses and solutions to social, political, economic, and cultural problems. In pursuing these goals, students will examine and, through their individual coursework, enact the dialectic of Aristotelian and sophistic understandings of rhetoric: the discernment of the means of persuasion available to them and the capturing of possibilities in opportune moments.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

COMMRC 0320 - MASS COMMUNICATION AND SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to the basic concepts of mass communication research and to the history and development of various media (TV., Radio, newspapers, magazines, etc.).
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMRC 0500 - ARGUMENT

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to fundamental principles of argument, and develops argumentative skills through practice analysis and criticism.
COMMERC 0501 - ARGUMENT HONORS RECITATION

Minimum Credits: 1
Maximum Credits: 1

Students taking the three-credit COMMRC Argument 0500 course in fall term 2014 can enroll in this supplemental one-credit honors section that will meet separately for 75 minutes each week. The honors sidecar will provide high-achieving and motivated students the opportunity to explore class content in extra depth, through seminar-style discussions and assignments, such as public debate and advocacy projects, designed to cultivate and apply advanced argumentation skills and develop capacity for independent critical thinking. The one-credit sidecar is open to students with honors course eligibility (3.25 GPA or instructor permission).

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

COMMERC 0510 - DEBATE

Minimum Credits: 3
Maximum Credits: 3

This course offers academic credit for preparation for, and participation in, intercollegiate debate.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: SCI Expression: Communication General Ed. Req.

COMMERC 0520 - PUBLIC SPEAKING

Minimum Credits: 3
Maximum Credits: 3

This course is designed to help students develop increased skill in public speaking by means of theory and practice. This course covers research, organization, style, delivery, and criticism of informative, deliberative, and ceremonial speeches.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMERC 0530 - INTERPERSONAL COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3

The purpose of this course is to introduce students to theories and models of human communication in the face-to-face communication context. Focus of learning is on skill development; lecture, discussion, and practice of communication skills are used to facilitate student learning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMERC 0540 - DISCUSSION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to increase skills in critical thinking, decision making, and small group discussion. Students are introduced to theories of group process and practice step-by-step group problem solving related to contemporary issues.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**COMMRC 0550 - SPEECH COMPOSITION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course deals with the theory and practice of preparing manuscript speeches. Students will focus on several principles of speech composition, including stages of speech development, general analysis of the occasion, maintaining attention, sources of persuasion through argument and qualities of effective style.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Requirement Course

**COMMRC 0575 - INTRODUCTION TO RADIO PRODUCTION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to cover basic theory and techniques of radio and audio production as well as some basic radio station practices. The course consists of lectures as well as studio sessions featuring equipment demonstrations and production exercises in a professional environment.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**COMMRC 1013 - RELIGION RIGHT NOW: MEDIA AND RELIGIOUS NEWS IN CONTEMPORARY AMERICA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
It is apparent that Americans devote enormous media attention to the coverage of celebrities, movies and sports, but deal much less skillfully with news coverage of religion. Yet, a glance at any daily news source, print or digital, reveals the pervasiveness of news that involves religious beliefs, conflicts, and practices, and that requires basic knowledge of religious traditions. The purpose of this course is to develop student skills at reading and interpreting current news stories about religious topics in print and visual media (newspapers, journals, blogs, polls, and television) in order to increase understanding of important religious issues in the contemporary United States, including American coverage of international religious events and leaders. Instruction will include lecture, discussion, film, and small group exercises to report on current events.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**COMMRC 1067 - GLOBAL AND US WOMEN'S RHETORIC**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course informs students of how global and US women use rhetoric (speeches, writings, symbols and images) to advance their rights and agenda. Students will first read about feminist foremothers' writings as touchstones for understanding how contemporary US women in sports, medicine, science and law negotiate gender equality and rights. Then students will learn about global women's rhetoric. For example, they will examine how women in Africa mobilize for liberation, how Chinese women mediate feminism in a market economy and how women in the Middle East wage everyday resistance against male dominance and clamor for self-autonomy. In addition to reading feminist critical theories and testimonial narratives, a variety of interdisciplinary objects of study such as theater, feature and documentary films, webinar, guest lecture, folk songs and poetry will be incorporated into the course.
COMMRC 1070 - UNDERGRADUATE RESEARCH PROSEMINAR

Minimum Credits: 3
Maximum Credits: 3
The Undergraduate research experience opens horizons for students to envision pursuing scholarship as a profession. What does it mean to be a professional scholar? How have such conceptions changed through time, and what might the future hold for those who aspire to a 'life of the mind'? The academic research profession increasingly calls on scholars to explain their work to researchers from other fields, frame their research findings as useful contributions to society, and interact with public audiences. Hence a communication-based perspective provides a useful point of departure for students from the natural sciences, social sciences, and humanities alike to explore these opportunities and challenges in a collaborative, interdisciplinary seminar setting.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

COMMRC 1101 - EVIDENCE

Minimum Credits: 3
Maximum Credits: 3
This course examines the nature and structure of evidence and reason-giving in everyday discourse. Students develop critical skills in evaluating argument and reasoning by examining the evidential requirements of argument in specific rhetorical contexts; science, philosophy, and politics.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMRC 1102 - ORGANIZATIONAL COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Students in this course are provided with an overview of the relationship between communication and organizing processes. The course emphasizes theories, principles, and concepts of organizational communication. Students learn to analyze the communication which occurs in organizations to recognize sources of communication breakdown and develop an awareness of strategies for prevention and/or resolution of communication on breakdown.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMRC 1103 - RHETORIC AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course explores the constitutive role that rhetoric plays in the formation of culture. Cultural texts and events will be examined both as reflecting and signifying practices. The course focuses on rhetoric's relation to ideology, power, and desire, as well as to class formations and sexual divisions. Selecting two of the above perspectives, students will examine how cultural practices constitute and are constituted by rhetoric.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 0101 or 7300) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]
Course Attributes: SCI Expression: Communication General Ed. Req.

COMMRC 1103 - RHETORIC AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course explores the constitutive role that rhetoric plays in the formation of culture. Cultural texts and events will be examined both as reflecting and signifying practices. The course focuses on rhetoric's relation to ideology, power, and desire, as well as to class formations and sexual divisions. Selecting two of the above perspectives, students will examine how cultural practices constitute and are constituted by rhetoric.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Writing Intensive Course (WRIT)
COMMRC 1104 - POLITICAL COMMUNICATION

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the way methods of symbol use are employed in the political arena. Persuasive techniques will be studied as they are used in public debates over issues of policy. Rhetorical criticism will be the primary mode of analysis.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]  
Course Attributes: University Honors Course

COMMRC 1105 - TELEVISION AND SOCIETY

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the relationship between television and society. It familiarizes students with the history of the broadcast industry along with related legal, political, and economic issues. The course focuses on analyzing various television programs as constitutive of and constituted by social relations (class, gender, and race).  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]  
Course Attributes: Children's Literature

COMMRC 1106 - SMALL GROUP COMMUNICATION

Minimum Credits: 3  
Maximum Credits: 3  
Principles of small group communication are examined in this course. In particular, the examination will reveal the principles of group entry, group formation, group cohesiveness, group verbal and nonverbal message exchanges, group leadership, group problem solving and discussion, and group performance and satisfaction. Individual beliefs, attitudes and behaviors will be compared and contrasted with group beliefs, attitudes and behaviors.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 7300 or COMM 0101) and [ENGCMP 200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or 0210 or 0212 or 0213 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]  
Course Attributes: Urban Studies

COMMRC 1109 - NONVERBAL COMMUNICATION

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to examine the ways we communicate nonverbally. By nonverbal communication is meant that form of communication wherein messages are sent by virtue of an agent's physical characteristics, adornment, eye behavior, design and selection of environment, spatial relationships, utilization of time, touching behavior, body movements, the choice of objects to fill space, and vocal behavior. Principles and applications of nonverbal communication are discussed.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0300 or 0030 or 7300 or COMM 0101) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1110 - THEORIES OF INTERPERSONAL COMMUNICATION
Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to introduce students to the ways in which researchers conceptualize and study interpersonal communication. Emphasis is upon the various issues which different conceptualizations raise in the study of human relationships. Students will have the opportunity to test the relevancy of insights each conceptualization provides for understanding the communication practices found in natural interactions and personal experience.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 7300 or COMM 0101) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1111 - THEORIES OF PERSUASION

Minimum Credits: 3  
Maximum Credits: 3  
This course surveys theories of persuasion that have been articulated during the twentieth century. It seeks to compare and contrast research about how the spoken word and the visual image influence public belief and action.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and (COMMRC 0520 or 0052 or COMM 0104) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or 0210 or 0212 or 0213 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: Global Studies

COMMRC 1112 - THEORIES OF RHETORIC

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of this course is to introduce students to major theories of rhetoric ranging from the sophists to some modern theorists.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0081) and (COMMRC 0520 or 0052 or COMM 0104) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0021 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006)

Course Attributes: Writing Requirement Course

COMMRC 1114 - FREEDOM OF SPEECH AND PRESS

Minimum Credits: 3  
Maximum Credits: 3  
The purpose of the course is to provide students with a critical understanding of the historical themes and contemporary issues involved in the debate over free speech. This course examines philosophies of expression from Plato through the most recent supreme court decisions. Study focuses on cases, major doctrines, and competing interpretations of the first amendment to explore the freedoms and limits of individual expression and regulation of communication industries.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]

Course Attributes: West European Studies

COMMRC 1115 - AFRICAN AMERICAN RHETORIC
Minimum Credits: 3
Maximum Credits: 3

The purposes of this course are; a historical-critical re view of scholarship in African American rhetoric; and a theoretical-conceptual framework for the study of African American rhetoric. This course places considerable emphasis on the African roots of African American rhetoric, but the ultimate concern is with African Americans' behavior. The course covers consequences of African and European inter actions in America, factors that forged the distinctive aspects of African American rhetoric. The effects of culture, racism, colonialism, and social class on communication.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMRC 1116 - RHETORIC OF THE AMERICAN COUNTERCULTURE

Minimum Credits: 3
Maximum Credits: 3

This course is concerned with social protest and the modern conception of the outsider, people and groups who choose to separate themselves, or are unwillingly separated, philosophically and ideologically from the society within which they live. One of the most recognizable examples of living the life of the outsider was embodied in the beat generation of the 1940's and 1950's, who embraced self-indulgence as well as literary themes of disenchantment and disengagement. A second example is the counterculture of the 1960's, the hippie generation, who tended to express themselves more in mass countercultural themes like student anti-war activism, popular, socially activist music, and film. Requirements include: discussion participation, 3 short papers (3 pages), 3 longer papers (8 pages), and one class presentation.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

COMMRC 1117 - 21ST CENTURY PUBLIC ARGUMENT

Minimum Credits: 3
Maximum Credits: 3

The course examines selected moments in American public rhetoric in the 21st century by examining artifacts, speakers and social movements that characterize the U.S. During this period.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1119 - PRESIDENTIAL RHETORIC 2

Minimum Credits: 3
Maximum Credits: 3

This course focuses on the rhetorical analysis of presidential addresses as well the communication styles and methods of U.S. Presidents from Dwight Eisenhower through and including George W. Bush it is important to understand that while the primary focus of the course is on the analysis of the political communication style of the presidents, in order to be able to analyze and evaluate the complex nature of both style and content of the addresses and comments, it is necessary to have an awareness of the background, history and events of the day as each may have impacted and/or precipitated the addresses/comments. Thus, an overview of those critical areas as well as basic communication theory and audience analysis will be an integral part of the course. Course components will include two written projects, speech analyses, one of which will serve as the basis for an individual oral presentation; one group project, a midterm and a final exam.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]
COMMRC 1120 - RHETORIC OF COLD WAR

Minimum Credits: 3
Maximum Credits: 3
Course examines selected moments in rhetorical aspects of the cold war with a focus on language, perceptions, arguments and the formation of public policy.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COMMRC 0310 or 0320 or 0081 or COMM 0102) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFSLM 0210 or FP (0003 or 0006)
Course Attributes: Russian & East European Studies, Writing Requirement Course

COMMRC 1121 - HISTORY OF MASS MEDIA

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth historical examination of U.S. Media (newspapers, magazines, radio, television and/or advertising). Emphasis is placed on the media's technological, political and cultural impact. Topics may vary depending on the particular historical period to be examined.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0210 or 0213 or 0250 or FP 0003 or 0006 or ENGFSLM 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1122 - MEDIA CRITICISM

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce students to major trends in media criticism (e.g., Psychoanalysis, genre analysis, feminist theory, and cultural studies). Course readings and discussions will focus primarily on television texts.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0210 or 0213 or 0250 or FP 0003 or 0006 or ENGFSLM 0004 or 0006 or 0020 or ENG 0102)]
Course Attributes: Childrens Literature, DSAS Diversity General Ed. Requirement, Global Studies, SCI Diversity General Ed. Requirements, Writing Requirement Course

COMMRC 1123 - RHETORICAL CRITICISM

Minimum Credits: 3
Maximum Credits: 3
The course on rhetorical criticism focuses on the history, methods, and practice of rhetorical criticism in American universities during the twentieth century. The course has been designed to help the student become acquainted with contemporary methods of rhetorical criticism through a combination of lectures, discussions, and practical applications. In addition, the course has been designed to help the student improve his or her writing abilities.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COMMRC 0310 or 0520 or 0052 or 0081 or COMM 0104) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFSLM 0210 or FP (0003 or 0006)
Course Attributes: Writing Requirement Course

COMMRC 1125 - MEDIA THEORY
Minimum Credits: 3  
Maximum Credits: 3  
This course examines the major theoretical approaches in contemporary media studies. Emphasis is placed on understanding the basic tenets of these theoretical models and how they are applied in analyses of media texts.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0210 or 0212 or 0213 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]

COMMRC 1126 - MEDIA AND CONSUMER CULTURE

Minimum Credits: 3  
Maximum Credits: 3  
This course will examine consumer culture in the twentieth and twenty-first century us. It examines advertising, the rise of the brand, and their roles in the commercialization of mass media. Of particular importance will be the role that race, class, and gender have played in shaping consumer culture (and vice versa), as well as the significance of the shift from a society based on an understanding of citizens based on democratic practices to one based on consumerist practices.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and [ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102)]; MIN GRADE 'C' for all listed courses  
Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements

COMMRC 1143 - KNOWLEDGE, POWER, AND DESIRE

Minimum Credits: 3  
Maximum Credits: 3  
This course examines issues of power, desire and knowledge in the work of Michel Foucault, and contrasts them with ideas of knowledge production in contemporary Anglo-American philosophy of science.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213) or ENGLFLM 0210 or FP (0003 or 0006)  
Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1147 - THE RHETORIC OF SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
The course examines how scientists persuade and dissuade each other and broader publics in the creation and dissemination of knowledge. It addresses such topics as: rhetoric and the production of scientific findings, communication of scientific knowledge to various publics, persuasive influences on funding decisions, how the public might better understand or influence scientific processes, and the intersection of science and public policy. These will be studied in the context of major science-related controversies of the recent past.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213) or ENGLFLM 0210 or FP (0003 or 0006)  
Course Attributes: Global Studies, Writing Requirement Course

COMMRC 1148 - RHETORIC AND HUMAN RIGHTS
COMMERC 1149 - ENVIRONMENTAL RHETORIC

Minimum Credits: 3
Maximum Credits: 3

The primary purpose of this course is to introduce upper division undergraduates to some of the most important rhetorical resources utilized by various participants in contemporary American environmental controversies. The first unit of the course is devoted to various historical and contemporary cross-cultural conceptions of the natural world and the place of humans within what to those in our culture is called the natural 'environment.' In this unit we compare briefly European, Asian and native-American conceptions and the various rhetorics used in each in the attempt to persuade those with differing views. The second unit quickly reviews the development of American environmental rhetorics from the early European settlement of the new world, through the colonial period, the early national era and into the late 19th century, by which time many of the signal concepts and rhetorical resources which continue to inform 21st century American discourse on wildness, nature, environment and ecology were first elaborated. Unit three examines some of the most significant and contention environmental disputes of the 20th century; including wilderness preservation, the human causes of the great 'dust bowl' devastation of farmland in the 1930s, the sudden relevance of the old science of 'ecology,' the huge influence of Rachel Carson's rhetorical masterpiece, silent spring, exposing the dangers of wide scale use of the pesticide DDT, and the growth of new movements against nuclear, chemical, and biological contamination as well as air, water, oceanic, solid waste, and many other forms of pollution, including even the at first ridiculed dangers of noise and light pollution. Unit four then looks at the environmental movement as it becomes truly global, beginning symbolically with the first 'earth day' activities, protests and teach-ins in 1970, which have continued annually to this day. Unit five will look at the acrimonious 1980s dispute between the new 'deep ecology' movement and the more mainstream environmental lobbying organizations like the sierra club, the nature conservancy etc. which focus primarily on lobbying congress for environmental reforms, rather than advocating a complete revolution in the way each individual human lives. Unit six will then treat some of the many enormous new environmental challenges of the 21st century, from still unrestrained global warming, to ozone depletion, to the depletion of fish stocks, to deforestation and desertification, to increasing human population, to widespread species extinctions, to the depletion of natural resources, from oil, to arable land, and even potable water, and so forth. Students should leave the course with a rigorous understanding of where contemporary environmental rhetorical resources come from and how they continue to operate in all manner of contemporary environmental and ecological controversies.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMERC 1151 - BRITISH BROADCASTING TODAY

Minimum Credits: 3
Maximum Credits: 3

To examine the variety and range of programme genres broadcast on British TV and radio. Reference will be made to the philosophy and industry structures which nurture them. New developments in technology, regulation and international markets will be considered as will scheduling issues. The cultural underpinnings of the system will be analyzed and internal industry and political debates will be addressed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: West European Studies

COMMERC 1156 - ETHICS AND MEDIA

Minimum Credits: 3
Maximum Credits: 3
This course will address the principal ethical issues facing print and broadcast journalism. It will consider the practical dilemmas reporters and editors have to deal with and relate them to a moral framework. The focus will be on the real time arguments that arise almost daily in media coverage of matters of public controversy - crime, war, privacy and the like. The course objectives are to learn how to evaluate the performance of the media and to help students develop their own ethical philosophy. Problems of regulation and codes of practice will also be examined. Students will be able to take advantage of London's global importance as a media hub and the distinctive media culture of the UK through a program of case studies, visits and guest lectures by practitioners.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

COMMRC 1160 - VISUAL RHETORIC

Minimum Credits: 3
Maximum Credits: 3
This course centers on research concerning visual rhetoric. It will concentrate primarily on a range of interpretive and critical approaches for studying instances of visual communication. Students will write three papers demonstrating their ability to analyze and interpret visual texts. The method of instruction includes lecture, discussion, film and practice workshops. Considerations of gender, sex, race, sexuality, and class will be interwoven throughout the course materials and discussions.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) and (COMMRC 0310 or 0081)
Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Writing Intensive Course (WRIT)

COMMRC 1161 - COMMUNICATION ETHICS

Minimum Credits: 3
Maximum Credits: 3
Contemporary society offers a wide variety of topics for ethical consideration: deception, lying, fidelity in relationships, hate speech, harassment, privacy, intellectual property, pornography and many others. This class examines the ethical dimensions of communication through the prism of case studies. Students are introduced to traditional forms of ethical reasoning as well as emerging concerns raised by the internet and digital media. One major question that the course addresses is the following: do the internet and new information technologies represent qualitatively new ethical challenges or are these versions of traditional ethical dilemmas? The bulk of class time uses discussion and case studies to emphasize the practice of ethical deliberation and the ability to reason about ethical issues and problems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1162 - INVENTION: WHERE DO GOOD IDEAS COME FROM?

Minimum Credits: 3
Maximum Credits: 3
This course helps us investigate questions that will be crucial for tomorrow's communities of inquiry. How should we understand creativity, imagination, and invention? What are the conditions most conducive to innovation? What can histories of creative individuals and creative groups tell us about the origins of, to use the TED lingo, "ideas worth spreading"? This course examines creativity in a variety of contexts, both scientific and artistic. It draws on the best work in a number of disciplines, principally rhetoric but also philosophy of science, literary theory, economics, and intellectual history. And students will have the opportunity to develop projects on case studies of their choosing. The course satisfies three credit hours toward the interdisciplinary core seminar coursework requirement in the Honors College Certificate in Undergraduate Studies. Students without the GPA or course prerequisites designated by the UHC may also enroll with the permission of the instructor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212 or 0213) or ENGFLM 0210 or FP (0003 or 0006)
COMMRC 1170 - CROSS CULTURAL COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
The world seems to be in constant flux: ideological dissimilarities, ethnic strife and intercultural conflicts. One poses the question: are there any common grounds peoples from different traditions, cultures and society can seek? The answer is yes. It will require us to develop cross-cultural communication competence - respect differences, listen compassionately, be empathetic, cooperate and have an open mind. This class attempts to help students establish these skills. Examining an array of cross-cultural issues, it helps students establish cross cultural competence, an instrument that resolves conflicts and achieves understanding. Students will have an opportunity, in addition to attending lectures and reading books and articles, listen to guest lectures, write and present book reports, watch multimedia materials and design diversity posters. This class fulfills DAS General Education Cross-Cultural Awareness requirement. It is a 1000-level upper level communication course counting toward a major in communication. It is cross-listed with Global Studies program, earning credits toward a certificate in global studies or global health.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

COMMRC 1175 - COMMUNICATION AND GLOBAL COMPETENCE

Minimum Credits: 3
Maximum Credits: 3
With the rise of global mobility and communication, encountering people from a variety of cultures, and the need for effective communication, is commonplace. This course explores the interaction between culture and communication and introduces students to the knowledge and skills necessary to attain global competence. In addition, this course introduces the construct of global competence; creates the opportunity to analyze and evaluate how our own cultural identity influences communication with others; engages interaction with the host culture; and prepares the students with knowledge and skills to be effective and ethical intercultural communicators. This class is held in Dublin and will include lectures, class discussions, simulations, interactive examples, case studies, media presentations cultural encounters, and field experiences.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Study Abroad

COMMRC 1520 - ADVANCED PUBLIC SPEAKING

Minimum Credits: 3
Maximum Credits: 3
This course teaches students advanced skills needed in the preparation, delivery, and evaluation of formal public address. Advanced public speaking extends what was learned in the introductory public speaking course by examining more advanced theories and strategies of public address, critically evaluating public discourse in a variety of settings and sharpening the extemporaneous delivery skills of the student.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

COMMRC 1710 - SENIOR THESIS IN COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
Research on a special project in rhetoric, communication, or media. The study will be embodied in a thesis supervised by the instructor and approved by additional departmental faculty.

Academic Career: Undergraduate
Course Component: Thesis Research
Grade Component: Satisfactory/No Credit
COMMRC 1730 - SPECIAL TOPICS IN COMMUNICATION

Minimum Credits: 3  
Maximum Credits: 3  
This course covers a specialized topic in communication. Topics vary every semester.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0300 or 0030 or 0100 or 7300 or COMM 0101) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006)  
Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1731 - SPECIAL TOPICS IN RHETORIC

Minimum Credits: 3  
Maximum Credits: 3  
This course covers a specialized topic in rhetoric. Topics vary every semester.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0310 or 0081) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006)  
Course Attributes: African Studies, Writing Intensive Course (WRIT)

COMMRC 1732 - SPECIAL TOPICS IN MASS COMMUNICATION

Minimum Credits: 3  
Maximum Credits: 3  
This course covers a specialized topic in mass communication. Topics vary every semester.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (COMMRC 0320 or COMM 0102) and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006)  
Course Attributes: Writing Intensive Course (WRIT)

COMMRC 1900 - COMMUNICATION INTERNSHIP

Minimum Credits: 1  
Maximum Credits: 3  
Internships provide practical work experience related to the student's course of study.  
Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: Satisfactory/No Credit

COMMRC 1901 - INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 3  
Independent study is a program of academic reading and research taken under the direction of a faculty sponsor.  
Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: LG/SNC Elective Basis

COMMRC 1904 - UNDERGRADUATE TEACHING EXPERIENCE IN COMMUNICATION
Minimum Credits: 1
Maximum Credits: 3
Provides an opportunity for qualified Undergraduate students, under the guidance of a classroom teacher, to have a first-hand experience with peer mentoring and classroom instruction as a UTA. Participation is by instructor invitation only.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit

COMMRC 1905 - DIRECTED RESEARCH

Minimum Credits: 1
Maximum Credits: 3
A course for upper level students who have completed at least 45 credits (12 credits in COMMRC) who wish to conduct field research in communication. The course is an opportunity for students to create a semester-long self-designed project resulting in a body of advanced work. Regular progress reports and critiques are scheduled with the instructor individually.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

Computer Engineering

COE 0031 - LINEAR CIRCUITS AND SYSTEMS 1

Minimum Credits: 4
Maximum Credits: 4
The analysis of linear circuits. Electric variables and circuit elements; kirchoff's and ohm's law; mesh and node equations; thevenin and norton equivalent circuits; first and second-order circuits; time domain analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 00150 or 0230 or 0231 or 0235) and (PHYS 0152 or 0175 or 0202 or 0476); PLAN: Computer Engineering (BSE)

COE 0035 - LINEAR CIRCUITS AND SYSTEMS LAB FOR TRANSFERS STUDENTS

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0152 or 0175 or 0202 or 0476); PLAN: Computer Engineering (BSE)

COE 0041 - LINEAR CIRCUITS AND SYSTEMS 2

Minimum Credits: 3
Maximum Credits: 3
Sinusoidal steady-state analysis, network functions, real and reactive power, three-phase circuits, laplace transform method, two-port networks, and fourier series.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0031 or COE 0031; PROG: Swanson School of Engineering

COE 0132 - DIGITAL LOGIC
Minimum Credits: 3
Maximum Credits: 3
Introduction to digital systems, boolean algebra, minimization of logic functions, combinational and sequential circuit design.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 00150 or 0230 or 0231 or 0235) and (PHYS 0152 or 0175 or 0202 or 0476); PLAN: Computer Engineering (BSE)

COE 0147 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
This course provides a detailed introduction into the basics of computer design common to most computer architectures including topics of digital computer data representation, arithmetic and logic units, instruction formats, control, microprocessor architecture, and memory systems. This course includes a heavy focus on MIPS assembly language and its interaction with a RISC computer architecture. This course satisfies the prerequisite to CS/COE 1541 computer architecture.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: COE 0132 or ECE 0132; CREQ: COE 0445 or CS 0445; PLAN: Computer Engineering (BSE)

COE 0257 - ANALYSIS AND DESIGN OF ELECTRONIC CIRCUITS

Minimum Credits: 3
Maximum Credits: 3
Diode circuits, power supply design; analysis and design of bipolar junction transistor and field effect transistor amplifiers. Bias stability analysis, power amplifiers. Ideal operational amplifiers. CMOS inverters.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: COE 0031 or ECE 0031 and PLAN: Computer Engineering

COE 0401 - INTERMEDIATE PROGRAMMING USING JAVA

Minimum Credits: 4
Maximum Credits: 4
This course is a rigorous introduction to the fundamental concepts and techniques of computer programming using the java programming language. This is a first course for students who intend to major in computer science or computer engineering.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Computer Engineering

COE 0445 - DATA STRUCTURES

Minimum Credits: 3
Maximum Credits: 3
This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using the java language. Included in this study are programming techniques which use recursion, reference variables, and dynamic memory allocation. Students in this course are also introduced to various searching and sorting methods and are expected to develop an intuitive understanding of the complexity of these algorithms.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: COE 0401 or CS 0401; PLAN: Computer Engineering
COE 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to study the components of computing systems common to most computer architectures. In particular, this class is meant to introduce data representation, types of processors, memory types, and hierarchy, and device drivers. The students will learn MIPS assembly language, the design of arithmetic and logic units, and basic designs for RISC processors.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: COE 0445 or CS 0445; PLAN: Computer Engineering

COE 0449 - INTRODUCTION TO SYSTEMS SOFTWARE

Minimum Credits: 3
Maximum Credits: 3
This course covers topics related to the interface of hardware and software. It covers device interface and hardware synchronization at the lowest level of the operating system, the linkage of operating system services to application software, and the fundamental mechanisms for computer communications.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COE 0132 or ECE 0132) and (COE 0445 or CS 0445); CREQ: COE 0142 or 0147 or 0447 or ECE 0142 or CS 0447; PLAN: Computer Engineering

COE 0501 - DIGITAL SYSTEMS LABORATORY

Minimum Credits: 3
Maximum Credits: 3
This course and laboratory introduces students to the basic concepts of digital circuits, simulation and instrumentation, systems composed of discrete devices, logic gates, combinatorial and sequential circuits are designed, simulated, built and tested.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECE 0031 or COE 0031) and (ECE 0132 or COE 0132); PLAN: Computer Engineering (BSE)

COE 1161 - EMBEDDED COMPUTER SYS DESIGN 2

Minimum Credits: 3
Maximum Credits: 3
Organized as a full term project carried out by student design groups. A complex embedded system will be designed, implemented and tested using Altera and other cad tools. Grade will be based on project reviews and the final project report. Proper design process will be emphasized.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1160 or COE 1160; PROG: Swanson School of Engineering; PLAN: Computer Engineering

COE 1170 - SPECIAL TOPICS: COMPUTER

Minimum Credits: 1
Maximum Credits: 1
An undergraduate course dealing with special topics of current interest in computers.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
COE 1186 - SOFTWARE ENGINEERING

Minimum Credits: 4
Maximum Credits: 4
This course and laboratory introduce classical and object-oriented software engineering. Software requirements, specification, object-oriented analysis, design, implementation, integration, and maintenance are covered. Each of these phases is examined on a practical level through a semester long, formal design project that involves the creation of a java-based internet application. Additional java-related topics are taught, including java applets, custom networking, remote database access, SQL, and multimedia extensions.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (ECE 0142) or (COE 0142 or 0147 or 0447) or (CS 0447) and (COE 0401 or CS 0401); PLAN: Computer Engineering (BSE)

COE 1188 - CYBER-PHYSICAL SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
The arrival of the internet-of-things (IOT) has brought about a world where the everyday objects we interact with, ranging from health monitoring devices to appliances and automobiles, are embedded with intelligence, the ability to communicate over a network and act on information stored in the "cloud". In this intensive laboratory course, students, by way of a series of projects, follow the journey data takes from a sensor, to a microcontroller, through a network and then to the cloud (and back!). Along the way students are exposed to a broad range of electrical and computer engineering topics including electronic design, embedded programming, digital signal processing, networking and information theory, wireless communications, antenna theory and big data analytics.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (COE 0142 or ECE 0142) or (COE 0147 or COE 0447 or ECE 0142) and (COE 0401 or CS 0401); PLAN: Computer Engineering

COE 1192 - INTRODUCTION TO VLSI DESIGN

Minimum Credits: 4
Maximum Credits: 4
Introduction to the concepts and techniques of modern integrated circuit design. Use of Computer Aided Design (CAD) tools for circuit design and simulation. Senior design course. Includes a laboratory.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (COE 0147 or 0447) or CS 0447 or ECE 0142; PROG: Swanson School of Engineering

COE 1193 - ADVANCED VLSI DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is organized as a full semester project in conjunction with a small amount of lecture material on advanced CMOS digital design techniques, as well as the group design process itself. Students form groups of 3 to 5 per group that design and implement different VLSI projects which are then fabricated by MOSIS and returned for testing. Focus is on teamwork with frequent oral/written reports.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: Swanson School of Engineering
COE 1501 - ALGORITHM IMPLEMENTATION

Minimum Credits: 3
Maximum Credits: 3
This course covers a broad range of the most commonly used algorithms: some examples include algorithms for sorting, searching, encryption, graph searching, pattern matching, geometric intersection, compression, and local search. The students will implement and test several algorithms. The course is programming-intensive.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COE 0132 or ECE 0132) and (COE 0445 or CS 0445); PLAN: Computer Engineering

COE 1502 - ADVANCED DIGITAL DESIGN CONCEPTS

Minimum Credits: 3
Maximum Credits: 3
This course and laboratory builds on the student's knowledge of digital design, computer architecture principles, and assembly language. It covers both theoretical and practical considerations in the design of modern computing systems using computer aided design tools and programmable logic devices.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: COE 0501 or ECE 0501; CREQ: COE 1541 or CS 1541; PLAN: Computer Engineering (BSE)

COE 1520 - PROGRAMMING LANGUAGES FOR WEB APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Various programming paradigms will be studied using java and scripting languages. The use of java in programming web based applications, network applications, and the use of the extensive java libraries will be studied. The programming paradigm of building software by gluing components will be explored through the use of scripting languages such as PERL and JavaScript. Applications include developing guis and internet programming.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: COE 0445 or CS 0445; PLAN: Computer Engineering (BSE)

COE 1530 - SOFTWARE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide a general survey of software engineering. Some of the topics covered include: project planning and management, design techniques, verification and validation, and software maintenance. Particular emphasis is on a group project in which a group of students implement a system from its specification.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: COE 0445 or CS 0445; PLAN: Computer Engineering (BSE)

COE 1541 - INTRODUCTION TO COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
Examination of computer architecture and hardware system organization. Topics include: CPU organization, sequential and microprogrammed control, instruction set implementation, memory organizations, input/output structure, peripherals and computer communications.
Academic Career: Undergraduate
COE 1550 - INTRODUCTION TO OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An introduction to basic concepts of operating systems common to most computer systems, which interfaces the machine with upper-level programs. This course will introduce processes as processing unit, process management, concurrency, communication, memory management and protection, and file systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COE or 0147 or 0447 or CS 0447) and (COE 0449 or CS 0449); PROG: Computer Engineering (BSE)

COE 1622 - INTRODUCTION TO COMPILER DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course will introduce the basic concepts of compiler design and implementation. Topics include lexical analysis, various types of parsers, intermediate and object code generation and code optimization. The material will be presented from an implementation point of view rather than a formal approach. The impact of language design on compilers will also be examined.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COE 0142 or 0147 or 0447 or ECE 0142 or CS 0447) and (COE 0449 or CS 0449); PLAN: Computer Engineering (BSE)

COE 1631 - SOFTWARE DESIGN METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
Construction of large computerized systems proceeds through the stages of requirements analysis, specification, and implementation. This course deals with requirements analysis and specification, in particular, methodologies for improving the reliability of specifications (executable specifications and system phototypes).
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (COE 0132 or ECE 0132) and (COE 0445 or CS 0445); PLAN: Computer Engineering (BSE)

COE 1651 - ADVANCED SYSTEMS SOFTWARE

Minimum Credits: 3
Maximum Credits: 3
To discuss in depth some advanced features of fundamental importance in the design of operating systems. The subjects discussed include interprocess communication, real-time scheduling, advanced file systems, security and protection mechanisms. The objective of the course is to provide an awareness of the known solutions to these problems and to the limitations of these solutions.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PROG: Swanson School of Engineering

COE 1885 - DEPARTMENTAL SEMINAR
Minimum Credits: 0
Maximum Credits: 0
Seminars are designed to acquaint the student with aspects of engineering that are not normally encountered in classes and school activities and include a wide range of topics such as the significance of engineering as a profession, ethical problems in engineering, and skills required for a successful engineering career.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: H/S/U Basis
Course Requirements: PROG: Swanson School of Engineering

COE 1896 - SENIOR DESIGN PROJECT

Minimum Credits: 3
Maximum Credits: 3
A full-term engineering project involving definition, literature search, prototype design, and construction, with written and oral reviews. Senior design course.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: (COE 0257 or ECE 0257) or (COE 0041 or ECE 0041) and (COE 0445 or CS 0445); PLAN: Computer Engineering (BSE)

COE 1898 - ENGINEERING PROJECT

Minimum Credits: 1
Maximum Credits: 3
An investigation of an approved engineering subject under the supervision of a faculty monitor. Must be approved in advance by the faculty monitor and the department chair.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

Computer Science

CS 0004 - INTRODUCTION TO COMPUTER PROGRAMMING-BASIC

Minimum Credits: 3
Maximum Credits: 3
This is a first course in computer science. It is designed to be of special interest to students majoring in one of the social sciences or humanities. Objectives of this course include use of the computer in an interactive environment; problem analysis and the development of algorithms; learning the basic language; designing; coding; and documenting programs using techniques of good programming style.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CS 0007 - INTRODUCTION TO COMPUTER PROGRAMMING

Minimum Credits: 3
Maximum Credits: 3
This is a first course in computer science programming. It is recommended for those students intending to major in computer science who do not have the required background for cs 0401. It may also be of interest to students majoring in one of the social sciences or humanities. The focus of the course is on problem analysis and the development of algorithms and computer programs in a modern high-level language.
Academic Career: Undergraduate
CS 0008 - INTRODUCTION TO COMPUTER PROGRAMMING WITH PYTHON

Minimum Credits: 3
Maximum Credits: 3
This course is designed as a first course in computer science programming. It is recommended for those students majoring in one of the natural sciences, social sciences, or humanities who wish to learn the fundamentals of programming. It is also useful to students intending to major in computer science who do not have the required background for CS 0401. The focus of this course is on problem analysis, the development of algorithms and computer programs in python. Instruction will be provided to students interested in taking CS 401 in converting python programs to Java.

Academic Career: Undergraduate

CS 0010 - INTRODUCTION TO COMPUTING FOR SYSTEMS ENGINEERS

Minimum Credits: 4
Maximum Credits: 4
All of the CS 001X courses will introduce students to the concepts of computing and computer programming. Students in these courses will learn how a computer works and how to write programs in order to use the computer as a problem solving tool. A major focus of the class will be on developing problem-solving skills (e.g., how to decompose a problem into more manageable parts and how to combine those parts into an overall solution). CS 0010 in particular will focus on problems related to IoT and engineering. Students will be required to purchase a Raspberry Pi and sensors in order to complete the projects and labs assigned throughout the course.

Academic Career: Undergraduate

CS 0011 - INTRODUCTION TO COMPUTING FOR SCIENTISTS

Minimum Credits: 4
Maximum Credits: 4
All of the CS 001X courses will introduce students to the concepts of computing and computer programming. Students in these courses will learn how a computer works and how to write programs in order to use the computer as a problem solving tool. A major focus of the class will be on developing problem-solving skills (e.g., how to decompose a problem into more manageable parts and how to combine those parts into an overall solution). CS 0011 in particular will focus on problems related to the natural sciences with an emphasis on computational biology. Domain-specific projects and labs will be assigned throughout the course to encourage students in the natural sciences to apply computing to their field of study.

Academic Career: Undergraduate

CS 0012 - INTRODUCTION TO COMPUTING FOR THE HUMANITIES

Minimum Credits: 4
Maximum Credits: 4
All of the CS 001X courses will introduce students to the concepts of computing and computer programming. Students in these courses will learn how a computer works and how to write programs in order to use the computer as a problem solving tool. A major focus of the class will be on developing problem-solving skills (e.g., how to decompose a problem into more manageable parts and how to combine those parts into an overall solution). CS 0012 in particular will focus on problems related to the humanities and allied social sciences. Domain-specific projects and labs will be assigned throughout the course to encourage students in these fields to apply computing to their studies.

Academic Career: Undergraduate
CS 0090 - SUSTAINABILITY AND COMPUTING

Minimum Credits: 3  
Maximum Credits: 3  
What is the environmental impact of websites such as Facebook or Amazon? How is society affected by throwing away old computers? The purpose of this course is to introduce the intersection of computers and society. Sustainability will be used as a concept to bridge the tradeoffs between technological and ecological forces. Topics include but are not limited to: energy production, e-books, telecommuting and e-waste. No computer programming or math background required.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

CS 0131 - SOFTWARE FOR PERSONAL COMPUTING

Minimum Credits: 3  
Maximum Credits: 3  
An intermediate-level course in computer science for students majoring in areas other than computer science. Objectives include a non-technical study of the windows NT operating system; development of applications using software selected from the principal areas of applications for personal computing. These include word-processing (MS Word), spreadsheets (MS Excel), and relational databases (MS Access).  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

CS 0134 - WEB SITE DESIGN AND DEVELOPMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course will provide a basic understanding of the methods and techniques of developing a simple to moderately complex web site. Using the current standard web page language, students will be instructed on creating and maintaining a simple web site. After the foundation language has been established, the aid of an internet editor will be introduced. A second web-based language will be included to further enhance the web sites.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

CS 0155 - DATA WITCHCRAFT

Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to data science, designed as a first course in computer science, for non-CS majors and CS minors within the honors college, aiming to introduce students to basic data management technologies and data analytics skills. The course will consist of about 1/3 of introduction to computer programming, 1/3 of introduction to data management technologies, and 1/3 of introduction to data analytics. The course will adopt the point of view of a user of data (e.g. who is just combining data and analyzing it using tools) and not a provider of data (e.g. who would be implementing a database-driven web site), as is typically the case for related courses for CS majors.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Quant.-Formal Reason General Ed. Requirement

CS 0334 - INTERMEDIATE WEB SITE DESIGN AND DEVELOPMENT

Minimum Credits: 3  
Maximum Credits: 3  
The course will consist of advanced implementations of both markup as well as scripting languages. In addition, students will be introduced to a
graphical interface application that will allow them to explore concepts of server side web development. A reflective programming language and database application will be used to introduce the server side web development concepts.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: CS 0007 or 0134 or 0401 or INFSCI 0017 (Min Grade 'C' or Transfer)

**CS 0401 - INTERMEDIATE PROGRAMMING USING JAVA**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4  
This course is a rigorous introduction to the fundamental concepts and techniques of computer programming using the java programming language. This is a first course for students who intend to major in computer science.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Quant.-Formal Reason General Ed. Requirement, DSAS Quant.-Formal Reason General Ed. Requirement

**CS 0441 - DISCRETE STRUCTURES FOR CS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The purpose of this course is to understand and use (abstract) discrete structures that are backbones of computer science. In particular, this class is meant to introduce logic, proofs, sets, relations, functions, counting, and probability, with an emphasis on applications in computer science.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** CREQ: MATH 0220 or 0230 or 0235 or 0140 or 0221 or 0231 (Min Grade 'C' or Transfer) or (Plan: CSCI-MN and MATH 0120)

**CS 0445 - ALGORITHMS AND DATA STRUCTURES 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course emphasizes the study of the basic data structures of computer science (stacks, queues, trees, lists) and their implementations using the java language. Included in this study are programming techniques that use recursion, reference variables, and dynamic memory allocation. Students in this course are also introduced to various searching and sorting methods and also expected to develop an intuitive understanding of the complexity of these algorithms.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: CS 0401 or COE 0401 or 0422 or CIST 0150 (MIN GRADE 'C' or Transfer)

**CS 0447 - COMPUTER ORGANIZATION AND ASSEMBLY LANGUAGE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The purpose of this course is to study the components of computing systems common to most computer architectures. In particular, this class is meant to introduce data representation, types of processors, memory types and hierarchy, and device drivers. The students will learn MIPS assembly language, the design of arithmetic and logic units, and basic designs for RISC processors.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** CREQ: CS 0445 or COE 0445 or 0458 (Min Grade 'C' or Transfer)

**CS 0449 - INTRODUCTION TO SYSTEMS SOFTWARE**
Minimum Credits: 3
Maximum Credits: 3
This course covers topics related to the interface of hardware and software. It covers device interfaces and hardware synchronization at the lowest level of the operating system, the linkage of operating system services to application software, and the fundamental mechanisms for computer communications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0445 or CS 0455 (Min Grade 'C' or Transfer); CREQ: CS 0447 or CS 0456 or COE 0447 or COE 0147

**CS 0590 - SOCIAL IMPLICATIONS OF COMPUTING TECHNOLOGY**

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0002 or 0003 or 0004 or 0007 or 0008 or 0015 or 0101 or 0401 or COE 0401 or CMPINF 0401 (Min Grade 'C' or Transfer for All Listed Courses)
Course Attributes: SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Intensive Course (WRIT)

**CS 0699 - SPECIAL TOPICS IN COMPUTER SCIENCE**

Minimum Credits: 3
Maximum Credits: 3
Various topics in Computer Science will be introduced and discussed. This course in not part of the Computer Science major.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

**CS 1501 - ALGORITHMS AND DATA STRUCTURES 2**

Minimum Credits: 3
Maximum Credits: 3
As the second in a two-course sequence on algorithms and data structures, this course covers a broad range of the most commonly used algorithms. Some examples include algorithms for searching, encryption, compression, graphs, and dynamic programming. The students will implement and test several algorithms. The course is programming intensive.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0441 or CS 0406) and (CS 0445 or CS 0455 or COE 0445) ; (MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED)

**CS 1502 - FORMAL METHODS IN COMPUTER SCIENCE**

Minimum Credits: 3
Maximum Credits: 3
The course is an introduction to the theory of information and computation as a physical phenomenon. The course covers standard formalizations of computational concepts and proofs of noteworthy implications of these formalizations. Typical topics include: finite automata, computability, reducibility, and complexity.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0441 or CS 0406) and (CS 0445 or CS 0455 or COE 0445) ; (MIN GRADE C' or Transfer FOR ALL COURSES LISTED)
CS 1510 - ALGORITHM DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course will cover methods and strategies that are useful for the design of nonnumeric algorithms. Students are expected to design their own algorithms.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: [(CS 1501 or COE 1501) and CS 1502] or (CS 0458 and CS 1710); MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED

CS 1511 - THEORY OF COMPUTATION

Minimum Credits: 3
Maximum Credits: 3
Understanding the theory of computation provides deeper insights into various topics in computer science. This is an introductory level theory course. The aim of this course is to study the power (or lack of it) of various models of computation. Topics to be covered include automata, formal languages, computability, and computational complexity.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1502; (MIN GRADE 'C' or Transfer FOR ALL COURSES LISTED)

CS 1520 - PROGRAMMING LANGUAGE FOR WEB APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
Various programming paradigms will be studied using java and scripting languages. The use of java in programming web based applications, network applications, and the use of the extensive java libraries will be studied. The programming paradigm of building software by gluing components will be explored through the use of scripting languages such as perl and JavaScript. Applications include developing guis and internet programming.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0445 or COE 0445; (MIN GRADE 'C' or Transfer)

CS 1530 - SOFTWARE ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to provide a general survey of software engineering. Some of the topics covered include: project planning and management, design techniques, verification and validation, and software maintenance. Particular emphasis is on a group project in which a group of students implement a system from its specification.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0445 or COE 0445; (MIN GRADE 'C' or Transfer)

CS 1538 - INTRODUCTION TO SIMULATION

Minimum Credits: 3
Maximum Credits: 3
The course introduces students to the concepts, definitions, techniques applicable to the simulation of systems. Both continuous and discrete modeling are covered, with emphasis on the latter. The objective of this course is to familiarize the students with several modern discrete simulation languages, and their use in modeling. Topics include: systems characterization, classification, and modeling; pertinence of probability and statistics...
theory for stochastic processes and model measurement; discrete systems simulation viewpoints; software modeling techniques.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0447 and (STAT 1000 or 1100 or 1151 or MATH 1153) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1541 - INTRODUCTION TO COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
Examination of computer architecture and hardware system organization. Topics include: CPU organization, sequential and microprogrammed control, instruction set implementation, memory organizations, input/output structure, peripherals and computer communications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0447 and (STAT 1000 or 1100 or 1151 or MATH 1153) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1550 - INTRODUCTION TO OPERATING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An introduction to basic concepts of operating systems, common to most computer systems, which interfaces the machine with upper-level programs. This course will introduce processes as processing unit, process management, concurrency, communication, memory management and protection, and file systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0447 or COE 0447) and (CS 0449 or COE 0449) ; (MIN GRADE 'C' or Transfer)

CS 1555 - DATABASE MANAGEMENT SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide an in-depth knowledge of database systems design. Thus, the emphasis is on how to model one's own data and how to use available database management systems effectively. Towards this end, the relational and the object-relational models are discussed in great detail and object-oriented and other data models are also presented. Commercial database management systems are examined and students get practical experience through the use of such systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1501 (Min Grade 'C')

CS 1566 - INTRODUCTION COMPUTER GRAPHICS

Minimum Credits: 3
Maximum Credits: 3
This course offers an in-depth exploration of fundamental concepts in 2d and 3d computer graphics. The bulk of the course is devoted to 3d modeling, geometric transformations, and 3d viewing and rendering.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0447 or 0456 or COE 0447 or COE 0147); (MIN GRADE 'C' or TRANSFER FOR ALL COURSES LISTED)

CS 1567 - PROGRAMMING SYSTEM DESIGN ON A MOBILE ROBOT PLATFORM
Minimum Credits: 3  
Maximum Credits: 3
Students will be introduced to a variety of programming techniques and paradigms, for implementing medium- to large scale software systems. System integration is done on a mobile robot platform rather than a traditional desktop system. However, this is not a course in robotics. It is a course about building systems in a real-world environment.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CS (0441 and (0445 or COE 0445)) or (0406 and 0455) (MIN GRADE 'C' or Transfer), MIN GPA: 3.25  
Course Attributes: University Honors Course

CS 1571 - INTRODUCTION TO ARTIFICIAL INTELLIGENCE

Minimum Credits: 3  
Maximum Credits: 3
This course will provide an introduction to the fundamental concepts and techniques underlying the construction of intelligent computer systems. Topics covered in the course include: problem solving and search, logic and knowledge representation, planning, reasoning and decision-making in the presence of uncertainty, and machine learning.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (CS 1501 or COE 1501) and CS 1502 (Min Grade 'C' or Transfer for All Listed Courses)

CS 1621 - STRUCTURE PROGRAMMING LANGUAGES

Minimum Credits: 3  
Maximum Credits: 3
An analytical examination of modern high-level programming language structures; including design specification and implementation. Advanced forms of data types, expressions, and control primitives. Relationship of storage management techniques and language design.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: (CS 0441 and 0445) or (0406 and 0455); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1622 - INTRODUCTION TO CompILER DESIGN

Minimum Credits: 3  
Maximum Credits: 3
This course will introduce the basic concepts of compiler design and implementation. Topics include lexical analysis, various types of parsers, intermediate and object code generation and code optimization. The material will be presented from an implementation point of view rather than a formal approach. The impact of language design on compilers will also be examined.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: CS 0441 and ((CS or COE 0447) or (CS 0406 and 0456)); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1631 - SOFTWARE DESIGN METHODOLOGY

Minimum Credits: 3  
Maximum Credits: 3
Construction of large computerized systems proceeds through the stages of requirements analysis, specification, and implementation. This course deals with requirements analysis and specification, in particular, methodologies for improving the reliability of specifications (executable specifications and system phototypes).

Academic Career: Undergraduate  
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0441 and (CS or COE 0445)) or (CS 0406 and 0455); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1632 - SOFTWARE QUALITY ASSURANCE

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a broad understanding of modern software testing and quality assurance. Although it will cover testing theory, the emphasis is on providing practical skills in software testing currently used in industry. To that end, it will cover: manual and automated tests, test-driven and behavior-driven development, performance testing, and understanding and developing a testing process.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: Pre-requisites: (CS 0445 or COE 0445 or CS 0455) and (CS 0449 or COE 0449) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1635 - INTERFACE DESIGN METHODOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: CS 0445 (MIN GRADE 'C' or Transfer)

CS 1637 - INTRODUCTION TO HUMAN-COMPUTER INTERACTION

Minimum Credits: 3
Maximum Credits: 3
The focus of the course is on the design of human-centered systems that people find usable, desirable, and useful. The course will introduce students to user-centered practices in Human Computer Interaction. The course will cover the theory and practical application of Human-Computer Interaction concepts and ideas. Students will gain knowledge on diverse methods and tools to understand, improve, and create technology that harmonizes with and improves human capabilities, goals, and social environments.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: CS 1501: Algorithm Implementation; MIN GRADE: C or Transfer

CS 1640 - BIOINFORMATICS SOFTWARE DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course will develop software for bioinformatic applications.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: CS 1501 or COE 1501 or BIOSC 1540 (Min Grade 'C' or Transfer); PLAN: Bioinformatics or Computational Biology
Course Attributes: Capstone Course

CS 1645 - INTRODUCTION TO HIGH PERFORMANCE COMPUTING SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the architecture of and software techniques for parallel and high performance computing systems. The content
includes fundamental aspects of vector processing, shared-memory, and distributed-memory systems. Specific applications in parallel processing paradigms will be covered.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0447 and 0449 and 1501; (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1651 - ADVANCED SYSTEMS SOFTWARE

Minimum Credits: 3
Maximum Credits: 3
To discuss in depth some advanced features of fundamental importance in the design of operating systems. The subjects discussed include interprocess communication, real-time scheduling, advanced file systems, security and protection mechanisms. The objective of the course is to provide an understanding of these advanced issues, as well as to bring awareness of the known solutions to these problems and to the limitations of these solutions.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1550 or 1312 or 1792; (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1652 - DATA COMMUNICATION AND COMPUTER NETWORKS

Minimum Credits: 3
Maximum Credits: 3
This course will include basic principles and topics of computer communications. An overview of interfaces that interconnect hardware and software components, describing the procedures and rules involved in the communication process and the software which controls computers communication. Discussion on network architectures, design principles, basic protocol suites, and the concept of internetworking.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0447 or COE 0447) and (CS 0449 or COE 0449); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1653 - APPLIED CRYPTOGRAPHY AND NETWORK SECURITY

Minimum Credits: 3
Maximum Credits: 3
This course will provide the necessary conceptual background and hands-on experience to understand the most common cryptographic algorithms and protocols and how to use them to secure computers networks and distributed applications. Topics include: cryptographic algorithms for data confidentiality, authentication, and integrity, user authentication methods (secure tokens and biometrics), internet security protocols, security in local area networks, firewalls, and intrusion detection systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (CS 0449 or COE 0449) and (CS 1501 or COE 1501) or (CS 0458 or CS 1750); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1655 - SECURE DATA MANAGEMENT AND WEB APPLICATIONS

Minimum Credits: 3
Maximum Credits: 3
The main objectives for this course are: (1) to study in more depth query optimization and security, (2) to study advanced topics; data mining, information retrieval, and web data management, and (3) to expose students to advanced data and information management technologies, while gaining hands-on experience. These include mobile data management, continuous queries and their applications in areas such as biomedical informatics and e-commerce.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0441 and (CS 0445 or COE 0445); (MIN GRADE 'C' OR TRANSFER FOR ALL COURSES LISTED)

CS 1656 - INTRODUCTION TO DATA SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course aims to expose students to different data management, data manipulation, and data analysis techniques. The class will cover all the major data management paradigms (relational/SQL, XML/Xquery, RDF/SPARQL) including NOSQL and data stream processing approaches. Going beyond traditional data management techniques, the class will expose students to information retrieval, data mining, data warehousing, network analysis, and other data analysis topics. Time permitting, the class will include big data processing techniques, such as the map/reduce framework.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1501 or COE 1501 (MIN GRADE 'C' or Transfer For All Listed Courses)

CS 1657 - PRIVACY IN THE ELECTRONIC SOCIETY

Minimum Credits: 3  
Maximum Credits: 3  
Privacy is an increasingly significant concern in our modern, connected society. We all share personal information on a daily basis with a wide range of organizations. Although at times such sharing can be intentional and beneficial for the user, other times information is shared against the user's will, used for purposes that the user did not expect, revealed to entities other than those approved by the user, or used to infer additional information that the user did not intend to reveal. In this course, students will learn to reason about what information is revealed through the use of computer systems. They will study several different scenarios in which information sharing is either unavoidable or to some extent desirable, and discuss the balance between the benefits and costs of sharing. Finally, students will learn about several privacy-enhancing technologies (PETs), and how these can be put to use by software developers to defend the privacy of their users.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0441 and CS 1501 with a minimum grade of C or TRANSFER

CS 1660 - INTRODUCTION TO CLOUD COMPUTING

Minimum Credits: 3  
Maximum Credits: 3  
Cloud computing has emerged as a new paradigm for efficient and highly elastic delivery of computing services over the Internet to achieve economies of scale. The course will explore the concept of Cloud Computing, considering both its benefits and challenges. The course will also cover the basic design principles and architectures of Cloud Computing, including its usability and utility to deliver efficiently and flexibly infrastructure, platform and software as a service. Topics include types of public, private and hybrid cloud computing services, data centers architecture and deployment, cloud computing programming models, virtualization and virtual networking and storage, and large-scale distributed processing framework to manage, process and store big data applications running in clustered systems. The course will also include hands-on projects focused on developing applications on a MapReduce and Hadoop cluster. Upon successfully completing the course of the course, students will gain understanding of the goals, benefits and models of cloud computing, and how storage, processing and services are designed and managed in a virtualized environment. Through hands-on projects, students will demonstrate proficiency in deploying and evaluating cloud computing applications and services. They will be able to design and deploy data-centered applications and services, and efficiently use frameworks and tools for data analytics.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 0441 and CS 1501 with a minimum grade of C or TRANSFER

CS 1666 - PRINCIPLES OF COMPUTER GAME DESIGN AND IMPLEMENTATION
Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to give an introduction and insight into designing and implementing video games. This course questions the nature, intent, and motivation of games and how to construct a compelling experience for users. It is a project-based course, with a final project being to make a game with a small team.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CS 1501 or COE 1501; (MIN GRADE 'C' or Transfer)

CS 1671 - HUMAN LANGUAGE TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to the field of natural language processing (NLP) - the creation of computer programs that can understand, generate, and learn languages used by humans. It will expose students to real-world applications such as speech recognition, information retrieval, dialogue agents, question answering systems, and machine translations by means of computational techniques including search algorithms, dynamic programming, hidden Markov models, probabilistic context free grammars, and related machine learning algorithms.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1501; (MIN GRADE 'C' OR TRANSFER)

CS 1674 - INTRODUCTION TO COMPUTER VISION

Minimum Credits: 3
Maximum Credits: 3
In this class, students will learn the basics of modern computer vision. The course will cover topics such as image filtering, edge detection, feature extraction, description and matching, grouping and clustering, object detection, activity recognition, and recognition with a human in the loop.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1501 or COE 1501 (MIN GRADE 'C' OR TRANSFER)

CS 1675 - INTRODUCTION TO MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
This introductory machine learning course will give an overview of many models and algorithms used in modern machine learning, including linear models, multi-layer neural networks, support vector machines, density estimation methods, bayesian belief networks, clustering, ensemble methods, and reinforcement learning. The course will give the student the basic ideas and intuition behind these methods, as well as, a more formal understanding of how and why they work. Through homework assignments students will have an opportunity to experiment with many machine learning techniques and apply them to various real-world datasets.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CS 1501 or COE 1501 and (STAT 1000 or 1100 or 1151 or ENGR 0020) (Min Grade 'C' or Transfer for All Listed Courses)

CS 1678 - INTRODUCTION TO DEEP LEARNING

Minimum Credits: 3
Maximum Credits: 3
This undergraduate course will cover the basics of modern deep neural networks. The first part of the course will introduce neural network architectures, activation functions, and operations. It will present different loss functions and describe how training is performed via backpropagation. In the second part, the course will describe specific types of neural networks, e.g. convolutional, recurrent, and graph networks, as well as their
applications in computer vision and natural language processing. The course will also briefly discuss reinforcement learning and unsupervised learning, in the context of neural networks. In addition to attending lectures and completing bi-weekly homework assignments, students will also carry out and present a project.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: Pre-requisites: MATH 0230 and (MATH 0280 or MATH 1180) and CS 1501 with a minimum grade of C or TRANSFER.

CS 1699 - SPECIAL TOPICS IN COMPUTER SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This is a special topics course that allows the computer science department to test run a course before deciding whether to permanently add it to our curriculum.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CS 1900 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 6
This course places the student in an "on-the-job" setting in which he/she receives practical experience in a supervised training environment.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Attributes: Capstone Course

CS 1901 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 3
This course places the student in an "on-the-job" setting in which they receive practical experience in a supervised training environment. This course does not satisfy the Computer Science capstone requirement.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

CS 1902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This course is designed to give students the opportunity to design a plan of study to be agreed upon by the student and a supervising faculty member. This course does not satisfy the computer science capstone requirement.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

CS 1906 - COMPUTER SCIENCE COOPERATIVE PROGRAM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: H/S/U Basis
Course Attributes: Capstone Course
CS 1950 - DIRECTED RESEARCH

Minimum Credits: 1
Maximum Credits: 3
This course is designed to give students the opportunity to design a plan of study to be agreed upon by the student and a supervising faculty member.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis
Course Attributes: Capstone Course

CS 1980 - TEAM PROJECT DESIGN AND IMPLEMENTATION

Minimum Credits: 3
Maximum Credits: 3
Students will choose a project from proposals provided by our faculty and industry partners. Teams will consist of 3 or 4 students and they will be supervised by a project mentor. This course satisfies the capstone requirement.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit
Course Requirements: PREQ: CS 1550; PLAN: Computer Science (CS-BS, CSCI-BS); (MIN GRADE ‘C’ OR TRANSFER FOR ALL COURSES LISTED)

Computing and Information

CMPINF 0000 - COMPUTING AND INFORMATION TRANSFER

Minimum Credits: 0
Maximum Credits: 99
This course is to be used for the transfer of non-articulated courses in the area of Computing and Information.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

CMPINF 0001 - SCI FIRST-YEAR SEMINAR

Minimum Credits: 1
Maximum Credits: 1
The first-year seminar will provide students with an introduction to SCI and the University of Pittsburgh. The format of this course will be mixed between large group informational sessions, and small group discussions and activities. The small group sections will be led by members of our advising staff, undergraduate peer mentors, and/or faculty. The course will be split approximately evenly between large-group informational sessions and small-group discussions.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit
Course Requirements: PROG: School of Computing and Information

CMPINF 0010 - BIG IDEAS IN COMPUTING AND INFORMATION

Minimum Credits: 4
Maximum Credits: 4
Computing and information systems underlie nearly every facet of life in today's highly-networked societies. Accordingly, there are many paths through the degree programs offered by the School of Computing and Information, each focusing on different aspects of the theories, practices, and applications of computing and information. This course will introduce students to a variety of core principles and important themes that cross-cut this array of computing- and information-oriented disciplines, as well as explore the types of work that individuals educated in these disciplines engage in.
**CMPINF 0035 - SAB EXCHANGE: MAJOR EQUIVALENT**

- **Minimum Credits:** 1
- **Maximum Credits:** 5
- Students participating in an exchange program where in-major equivalents have been determined by their undergraduate director will be enrolled in this course.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**CMPINF 0036 - INTERNATIONAL EXCHANGE PROGRAM**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0
- Used to adjust tuition and fees for Study Abroad Exchange programs

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** No Grade Required

**CMPINF 0070 - STUDY ABROAD: SCIENCE SEQ**

- **Minimum Credits:** 1  
- **Maximum Credits:** 5

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**CMPINF 0401 - INTERMEDIATE PROGRAMMING**

- **Minimum Credits:** 4  
- **Maximum Credits:** 4
- This is an intermediate programming course that focuses on programming via an object-oriented paradigm. Students entering CMPINF 0401 are expected to have some previous concepts and then focus on object-oriented programming, including classes, encapsulation and abstraction, inheritance, polymorphism and interfaces. Some introductory data structures and algorithms will also be covered in this course. This class is a programming-intensive course, and students will be expected to complete several non-trivial programming projects throughout the term.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** Enrollment not permitted if currently or previously completed CS 0401 or INFSCI 0017  
**Course Attributes:** DSAS Quant.-Formal Reason General Ed. Requirement

**CMPINF 0999 - SPECIAL TOPICS IN COMPUTING AND INFORMATION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3
- Various topics in computing and information will be covered.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**CMPINF 1061 - FOUNDATIONS OF DATA SCIENCE**
Minimum Credits: 4
Maximum Credits: 4
This course is designed to provide a general introduction to the rapidly growing field of data science. Topics will include data summarization and visualization, data distributions, the scientific and statistical inference process, confidence intervals, hypothesis testing, sampling, regression, and classification. The course will be very hands-on with students actively carrying out the techniques and procedures being taught on real datasets in order to foster the ability to reason with data. As part of this process, students will be taught the basics of programming (coding) in R and these skills will be reinforced through weekly lab sessions. In developing the core concepts, students will also be exposed to ancillary topics such as data ethics, simulation basics, and best practices in programming. No previous programming experience nor any background in statistics will be assumed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CMPINF 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Minimum Credits: 3
Maximum Credits: 3
How are computational artifacts currently designed, and how can they be designed differently? What stories can be told by collaborating with computers? What stories can't be told? This project-based course will enable students to engage with and create computational narratives and interactive projects with data, hardware and algorithms. Each collaboratively taught iteration of the course will include 3-4 of these units, such as: fabrication, interactive hardware, computational narrative, interactive data, and prototyping. Students will consider what it means to compose with computers for human audiences, and with humans for computer audiences. Designed for Digital Narrative and Interactive Design (DNID) majors to take midway through the major, it will help students consolidate the interdisciplinary knowledge they have obtained in their prerequisite courses, introduce them to examples of interdisciplinary work that will inform their later capstone projects, and give them practice in working on collaborative projects that span the humanities and information/computing fields.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (ENGCMP 0425, OR HAA 0425, OR ENGLIT 0512) AND (CS 0010, OR CS 0011, OR CS 0012, OR CS 0007, OR CS 0008, OR INFSCI 0419)

CMPINF 1205 - COMPARATIVE DIGITAL PRIVACIES

Minimum Credits: 3
Maximum Credits: 3
This course will offer a broad survey of significant issues relating to privacy in the digital age. It investigates privacy in the digital world from cultural, social, communication, and policy perspectives. Taking a comparative approach, privacy related to digital communication is compared across several global regions in an attempt to understand the distinctiveness of privacy in those regions. The course will first introduce students to the concepts of privacy, the digital age, and the relation between privacy protections and the state. Students will understand the significance of the issue of digital privacies and why we need to employ a comparative approach to examine it. The course will then look at selected case studies of digital privacy in several global regions, including the United States, Canada, Europe, China, and South East Asia. Issues related to digital privacies such as Internet laws and policies, media regulations and public interest, data protection, state control, and commercial interests in the digital age, surveillance, copyright, and privacy advocates will also be included.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

CMPINF 1981 - PROJECT STUDIO

Minimum Credits: 3
Maximum Credits: 3
This course is designed as a practicum for the joint degree programs offered by the School of Computing and Information in conjunction with other units on campus. Students will apply skills learned during their studies in SCI to problems existing at the confluence of computing, information, and other disciplinary studies. This course is meant to help satisfy the Capstone requirement for joint programs allowing team-based project Capstone options.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Satisfactory/No Credit

CMPINF 1999 - ADVANCED SPECIAL TOPICS IN COMPUTING AND INFORMATION

Minimum Credits: 3
Maximum Credits: 3
Various advanced topics in computing and information will be covered.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Cross-Registration

CARLOW 0001 - CROSS-REGISTRATION

Minimum Credits: 0.5
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh Council of Higher Education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the 10 participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

CCAC 0001 - CROSS-REGISTRATION

Minimum Credits: 0.5
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate and graduate full-time students at any of the 10 participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

CHATHM 0001 - CROSS-REGISTRATION

Minimum Credits: 0.5
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the ten participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

CMU 0001 - CROSS-REGISTRATION

Minimum Credits: 0.5
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate and graduate full-time students at any of the 10 participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
DUQU 0001 - CROSS-REGISTRATION

Minimum Credits: 0.5
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate and graduate full-time students at any of the 10 participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

LAROCH 0001 - CROSS-REGISTRATION

Minimum Credits: 0.5
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the 10 participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

PNTPRK 0001 - CROSS-REGISTRATION

Minimum Credits: 0
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the ten participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

PTSEM 0001 - CROSS-REGISTRATION

Minimum Credits: 0
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the ten participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

RMC 0001 - CROSS-REGISTRATION

Minimum Credits: 0
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh council of higher education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the ten participating colleges and universities to take courses at any other PCHE institution.
Academic Career: UGRD
STVC 0001 - CROSS-REGISTRATION

Minimum Credits: 0
Maximum Credits: 12
The purpose of cross-registration through the Pittsburgh Council of Higher Education (PCHE) is to provide opportunities for enriched educational programs by permitting undergraduate full-time students at any of the 10 participating colleges and universities to take courses at any other PCHE institution.

Academic Career: UGRD
Course Component: Lecture
Grade Component: No Grade Required

Dental

DENT 1917 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis

Dental Hygiene

DENHYG 1000 - FULL-TIME DENTAL HYGIENE STUDY

Minimum Credits: 0
Maximum Credits: 0
Students who are working full-time toward the Associate of Science Degree in Dental Hygiene may register for this course.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: No Grade Required
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1017 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the dental hygiene student who desires to pursue interests in specific area(s). The content of the course is specified by the student and approved by the course director and program director. The teaching format is designed to teach the student specific knowledge or skills using enhanced faculty instruction and personal contact.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1047 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This directed study is designed for the dental hygiene student who desires to pursue interests in specific area(s). The content of the course is specified by the student and approved by the course director and program director. The teaching format is designed to teach the student specific knowledge or
skills using enhanced faculty instruction and personal contact.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1077 - DIRECTED STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  
This directed study is designed for the dental hygiene student who desires to pursue interests in specific area(s). The content of the course is specified by the student and approved by the course director and program director. The teaching format is designed to teach the student specific knowledge or skills using enhanced faculty instruction and personal contact.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1110 - BIOLOGICAL SCIENCES 1**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
This introductory level course is the first of 3 sequential courses in the biological sciences, each of which represents an interdepartmental integration of gross and neuroanatomy, histology and physiology. Through lectures and assigned readings, students will gain insight into structure-function relationships of cells, tissues, organs, and organ systems of the body. This course deals with the cell, epithelium, connective tissue, the skeletal system, myology, blood, the lymphatic system, neural histology, and introductory neural physiology.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1112 - INTRODUCTION TO DENTAL HYGIENE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course is designed to introduce dental hygiene students to the techniques and information necessary for comprehensive patient care.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1113 - INTRODUCTION TO DENTISTRY**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course provides an overview of the activities of each dental specialty; also, it may include oral anatomy, dental materials and dental charting. The lectures introduce the student to the content and scope of each specialty area; the services delivered with emphasis on dental hygiene interaction.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1114 - DENTAL ANATOMY**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2
This course is designed to help students identify the normal structures with the oral cavity. The use of correct terminology is stressed in order to effectively communicate with members of the dental profession. The student will be able to differentiate normal formation of teeth from abnormalities.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1116 - DENTAL HYGIENE PRECLINIC

Minimum Credits: 2  
Maximum Credits: 2  
Dental hygiene preclinic is established as the preclinical time for students to observe, discuss, and practice the skills required to perform the oral prophylaxis. Each student works and progresses at his/her own rate and must demonstrate consistent mastery of the skills taught.

Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: Letter Grade  
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1117 - CHEMISTRY, BIOCHEMISTRY AND NUTRITION

Minimum Credits: 5  
Maximum Credits: 5  
The course is designed to give the students the fundamental principles and concepts of chemistry, biochemistry and nutrition as they are related to physiological and pathological aspects of oral health and the practice of dental medicine. The course is not designed to make the student an expert in chemistry, biochemistry and nutrition but rather to provide the basic principles of these sciences which will enable the student to more effectively manage oral disease.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1241 - PRINCIPLES OF MICROBIOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
An introductory course in microbiology for dental hygiene students with no previous background in microbiology. Major areas included are microorganisms, immune mechanisms of the host and the interaction of the host and the microorganisms in disease and homeostatis. Major emphasis is placed on diseases with oral manifestations and infection control in dental medicine. The laboratory component is devoted to microbiological methods, infection control and oral ecology.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1242 - BIOLOGICAL SCIENCES 2

Minimum Credits: 3  
Maximum Credits: 3  
This introductory level course is the second of three sequential courses in the biological sciences. Through lectures and assigned readings, students will gain insight into structure-function relationships of cells, tissues, organs, and organ systems of the body. This course deals with the gross anatomy, neuroanatomy and physiology of the nervous system, including the eye and ear, the cardiovascular system, and the oral cavity with emphasis on the formation and structure of the teeth.

Academic Career: Undergraduate  
Course Component: Lecture
DENHYG 1244 - COMMUNICATIONS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to increase the student's proficiency as a public speaker, through learning organization of material, delivery and criticism of speeches.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1245 - DENTAL HYGIENE RADIOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
This course provides the student with the theoretical knowledge required to achieve a working knowledge of the radiologic sciences as they apply to dental hygiene. Also included will be concepts of radiation safety and radiation biology. An introduction to normal radiographic anatomy and the radiographic aspects of dental pathology will be included.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1246 - MICROBIOLOGY LAB

Minimum Credits: 0
Maximum Credits: 0
Content is devoted to the development of student's basic laboratory skills, application of microbiological methods and will emphasize performance, scientific investigation and safety.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: No Grade Required
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1247 - DENTAL HYGIENE SEMINAR 1

Minimum Credits: 1
Maximum Credits: 1
This course is an extension of the introduction to dental hygiene course. The focus of this course is the special needs and medically compromised patient. It combines lectures, guest presentations and clinical experiences. The students will acquire greater understanding of the psychological and physiological needs of these patients and how to better meet those needs to provide the best patient care.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1248 - DENTAL MATERIALS

Minimum Credits: 2
Maximum Credits: 2
This course introduces the dental hygiene student to the field of dental materials. The methods of instruction include didactic and laboratory components. Lectures will cover basic properties of dental materials; gypsum products, waxes, rigid and elastic impression materials and restorative materials. Laboratory sessions give each student practical experience in the proper manipulation of these materials.
DENHYG 1249 - DENTAL HYGIENE CLINIC 1

Minimum Credits: 2
Maximum Credits: 2
This course is scheduled as clinical sessions in which students utilize the skills necessary to perform an oral prophylaxis on individual patients, and to provide patient education.

DENHYG 1370 - INTRODUCTION TO CLINICAL PERIODONTICS

Minimum Credits: 3
Maximum Credits: 3
This course concerns the healthy periodontium, changes with aging, and changes to disease. Classification of periodontal diseases, etiology, histopathology and prevention are discussed. This course teaches the student the role of the hygienist in clinical management, treatment and control of periodontal disease.

DENHYG 1372 - GENERAL AND ORAL PATHOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course in general and oral pathology is designed to give the dental assistant and oral hygiene student as broad a background as possible in both general and systemic diseases, as well as special emphasis on the oral manifestations of these conditions. Additional emphasis is placed on those diseases which are specifically related to the Oro Dental complex. Primary emphasis is placed on the clinical and behavioral manifestations of disease as they relate to pathological processes. Moreover, the radiologic aspects of specific diseases are emphasized where appropriate.

DENHYG 1373 - BIOLOGICAL SCIENCES 3

Minimum Credits: 3
Maximum Credits: 3
This introductory level course is the third of three sequential courses in the biological sciences, each of which represents an interdepartmental integration of gross and neuroanatomy, histology, and physiology. Through lectures and assigned readings, students will gain insight into structure-function relationships of cells, tissues, organs and organ systems of the body. This course deals with the gross anatomy, histology, and physiology of the respiratory, digestive, urinary, and endocrine systems. Wound healing is covered.

DENHYG 1375 - ANESTHESIA FOR DENTAL HYGIENIST
This course introduces the student to the entire spectrum of pain and anxiety control techniques currently in use in dentistry. Emphasis is placed on the basic physiology of the pain phenomena and the relevant clinical pharmacology of local anesthetics. The general topic of preoperative patient assessment is integrated with a practical and systematic approach to the recognition, management, and prevention of specific medical emergencies that may occur in a dental office.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1376 - DENTAL HYGIENE RADIOLOGY 2**

This course is designed to increase the radiographic interpretation skills of the second year dental hygiene student through the use of critical thinking exercises and an in depth exposure to radiographs illustrating caries, periodontal diseases, trauma and pulpal involvement. Radiographic case formatted questions and exercises will be reviewed to enable students to correlate the pathology content of the curriculum as well as the interpretation of normal and abnormal oral structures.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1377 - DENTAL HYGIENE SEMINAR 2**

This course is an extension of the introduction to dental hygiene course. The focus of this course is the special needs and medically compromised patient. It combines lectures, guest presentations and clinical experiences. The student will acquire greater understanding of the psychological and physiological needs of these patients and how to better meet those needs to provide the best patient care.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1379 - DENTAL HYGIENE CLINIC 2**

This course is scheduled as clinical sessions in which the student integrates and applies knowledge and concepts learned in previous courses to provide comprehensive dental hygiene care to individual patients.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1411 - DENTAL PHARMACOLOGY**

This course provides oral hygiene students with the opportunity to become familiar with pharmacotherapeutics as utilized by all health professionals. All drug groups are considered in order to familiarize students with the dental patient's therapeutic status. The therapeutics and adverse effects of the drugs are discussed.

**Academic Career:** Undergraduate  
**Course Component:** Lecture
DENHYG 1412 - PUBLIC HEALTH DENTISTRY

Minimum Credits: 3
Maximum Credits: 3
Public health dentistry is that portion of the dental hygiene curriculum which prepares students to promote oral health and prevent oral disease in the community through organized community based programs. It provides students with a broad understanding of the social, political, and economic forces directing the system. The approach taken within this course provides students with knowledge and skills necessary to meet specific dental health needs of community groups as distinct from the traditional clinical approach which is designed to meet the needs of individuals.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1414 - GERONTOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with an introduction to the phenomenon associated with our aging society. It will also familiarize the student with the special needs of the elderly patient. It will provide background information as to why these needs will be important to the health care professionals of the future. The methods used will be lecture, discussion, partner and group exercise, awareness assignments and simulations.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1417 - DENTAL HYGIENE SEMINAR 3

Minimum Credits: 1
Maximum Credits: 1
This course is designed to compliment the dental hygiene 3 clinical experience. Students will be exposed to various traditional and non-traditional dental therapeutic techniques including, but not limited to subgingival irrigation with antimicrobial agents, an update of new dental products and devices as well as the presentation of case studies for analyses. The goal of the course is to enhance the clinical and didactic skills of the dental hygienist.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1419 - DENTAL HYGIENE CLINIC 3

Minimum Credits: 4
Maximum Credits: 4
This course provides clinical sessions in which the student's integrate and apply knowledge and concepts learned in previous courses to provide comprehensive dental hygiene care to individual patients.

Academic Career: Undergraduate
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

DENHYG 1420 - ETHICS HEALTH CARE PROFESSIONAL

Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce health-care professionals to the principles of ethics. Various aspects of ethics will be discussed including the decision making process on which evaluation is based.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1421 - SPECIAL NEEDS DENTISTRY**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The goals of this course are to introduce the dental/dental hygiene student to common developmental and acquired disabling conditions and issues related to the dental care of patients with special needs. The material presented will aid the student in assessing, planning, implementing and monitoring treatment for the patient with special needs.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1422 - HEALTH PROMOTIONS THROUGH THE LIFE SPAN**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will examine common health issues found throughout the human lifespan with the intention of helping students gain a holistic perspective of the clinical patient experience. The course content is designed to provide the student with relevant issues affecting the various physical stages of the human life cycle, with special emphasis on the most under-served populations of pediatrics and geriatrics. The content will be developed using the following themes: biological, psychological, social, environmental, and medical aspects of different age populations and their relationship to dental hygiene care. While there are not specific prerequisites for this course, it is recommended that enrolled students have successfully completed 45 college credits prior to course enrollment. Students not within the Dental Hygiene Program must obtain permission from the course instructor to enroll. Hybrid course format including weekly online synchronous course meetings.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1544 - INTRODUCTION TO RESEARCH ANALYSIS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to make students aware of important aspects of research in the dental profession. Statistical principles necessary for reading and evaluating research articles will be closely examined. This course provides the knowledge and critical thinking skills necessary to analyze and evaluate research articles.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1545 - DENTAL HEALTH EDUCATION, METHODS AND PRACTICUM**

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is an introduction to classroom teaching for the dental hygienist. It involves the acquisition of knowledge and skills for classroom instruction in dental health education. Emphasis is placed on preparation, implementation and evaluation of lesson plans and the design and selection of effective audio-visual aids. It includes six weeks of dental health presentations in the community exhibiting the skills acquired the first half of the course.

**Academic Career:** Undergraduate
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1547 - DENTAL HYGIENE SEMINAR 4**

Minimum Credits: 1  
Maximum Credits: 1  
This course was designed to synthesize pertinent clinical and basic science information. In addition, students will be required to analyze and present a periodontal case study for peer review.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1549 - DENTAL HYGIENE CLINIC 4**

Minimum Credits: 5  
Maximum Credits: 5  
This course was designed to facilitate the synthesis and application of information using a multidisciplinary approach for patient treatment. The clinical environment stimulates and prepares students for a private practice dental setting. All students are afforded the opportunity to participate in internal and external clinical rotations in the capacity of a dental auxiliary. Each student's clinical competency level is assessed and evaluated during all phases of patient treatment.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1682 - BASIC PSYCHOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This course is an intensive introduction to the application of behavioral theory and intervention for health professionals. Topics include learning theory, assessment, respondent and operant behavior modification, theories of anxiety, stress, and fear, and behavior change strategies for these responses.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1689 - ADVANCED CLINICAL DENTAL HYGIENE PRACTICE**

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to increase the proficiency and self-direction of the dental hygiene student. The assessment of patient's oral health status, planning and provision of preventive services and the identification of the need for referrals will be stressed. This will enable the student to develop fundamental skills which are necessary for various career options in the dental profession.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** H/S/U Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1901 - ALLIED HEALTH EDUCATION**

Minimum Credits: 3  
Maximum Credits: 3
His course provides the student with knowledge and experience in classroom and clinical dental education. Emphasis is placed on the development of objectives and instructional units, teaching methods, learner characteristics, learning styles and conditions, instructional resources, utilization of media, and the evaluation process.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1902 - ALLIED HEALTH EDUCATION PRACTICUM

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course provides the student with practical experience in both the dental hygiene classroom and clinical settings.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1903 - DIRECTED STUDY

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1904 - DIRECTED STUDY

- **Minimum Credits:** 1  
- **Maximum Credits:** 3  

This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1915 - INTRODUCTION TO PEER TUTORING IN DENTAL HYGIENE EDUCATION

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This selective course will allow participants to develop the skills necessary to provide peer tutoring as part of the School of Dental Medicine Peer Tutoring Program. The course is open to second year dental hygiene and bachelor's degree completion students. The course is the first of two consecutive courses to fulfill credits towards the B.S. Degree Completion Program in Dental Hygiene and is highly recommended for those pursuing the education track.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** H/S/U Basis

### DENHYG 1916 - PEER TUTORING IN DENTAL HYGIENE EDUCATION

- **Minimum Credits:** 1  
- **Maximum Credits:** 1
This selective course will allow participants to develop the skills necessary to provide peer tutoring as part of the School of Dental Medicine Peer Tutoring Program. The course is open to second year dental hygiene students. The course is the second of two consecutive courses to fulfill credits towards the B.S. Degree Completion Program in Dental Hygiene and is highly recommended for those pursuing the education track.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** H/S/U Basis

### DENHYG 1921 - HEALTH MANAGEMENT SEMINAR

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This seminar course is designed to provide the student with a broad based understanding of the health care delivery system. Emphasis will focus on leadership, management, quality assurance, development of dental health programs, and current health care delivery issues.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1922 - HEALTH MANAGEMENT PRACTICUM

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides the student through a variety of field experiences with the opportunity to apply the knowledge gained in the health management seminar.  
**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1923 - DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.  
**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** H/S/U Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1924 - DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects to be determined by the student and approved by the advisor.  
**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** LG/SU3 Elective Basis  
**Course Requirements:** PROG: School of Dental Medicine (Undergraduate)

### DENHYG 1945 - DIRECTED STUDY

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This course allows the student in conjunction with their advisor to expand their knowledge and experience in the identified area of interest. Projects
to be determined by the student and approved by the advisor.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

**DENHYG 1947 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 3  
This course allows the student in conjunction with their faculty advisor to expand their knowledge and experience in the area of dental hygiene education. Projects to be determined by the student and approved by the advisor.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: School of Dental Medicine (Undergraduate)

**Dental Pharmacology**

**DSPHL 1010 - DENTAL PHARMACOLOGY**

Minimum Credits: 2  
Maximum Credits: 2  
This course provides oral hygiene students with the opportunity to become familiar with pharmacotherapeutics as utilized by all health professionals. All drug groups are considered in order to familiarize students with the dental patient's therapeutic status. The therapeutics and adverse effects of the drugs are discussed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

**Economics**

**ECON 0100 - INTRODUCTION TO MICROECONOMIC THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
Introduction to principles of economic analysis as applied to the study of prices and markets. The course builds a theoretical basis for understanding producer and consumer behavior, and prepares students to appreciate the importance of markets in our economic system.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

**ECON 0110 - INTRODUCTION TO MACROECONOMIC THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
An introductory course which develops the basic tools needed to analyze the behavior of various macroeconomic phenomena including inflation, gross domestic product, and unemployment. In addition, these tools are used to study how and whether the government can impact the behavior of the overall economy. Finally, the course looks at the role various institutions such as banks and the stock and bond markets play in affecting the economic environment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.
ECON 0150 - ECONOMIC DATA ANALYSIS

Minimum Credits: 3
Maximum Credits: 3

An introduction to economic data and statistical concepts. Topics covered include: measures of location and dispersion and introduction to probability theory; characteristics of probability distributions; sampling theory, point estimation and hypothesis testing. Correlation analysis and the linear regression model are treated with special emphasis placed on the construction, estimation, and interpretation of economic models. Emphasis is placed on understanding and using statistical concepts rather than on proving theorems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 0160 - INTRODUCTION TO ECONOMETRICS

Minimum Credits: 3
Maximum Credits: 3

Develop an understanding of basic econometrics. Teaches use of the computer for econometric and statistical analysis, and how to acquire information about published data on basic economic activity. Attempts to develop an understanding of the difficulties inherent in collecting and interpreting actual data. The heart of the course is the development of basic econometric skills. Learning about data sources and computer software will be included as the basic econometric theory is developed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

ECON 0200 - GAME THEORY PRINCIPLES

Minimum Credits: 3
Maximum Credits: 3

This course introduces the basic concepts of game theory. The emphasis is on the unifying perspective that game theory offers to questions in economics, other disciplines, and everyday life. The course draws on a wide range of substantive and intellectually stimulating applications of game theory across areas in economics, other disciplines, and beyond. It will enable students to view social interactions as strategic games, to use game theoretic concepts to predict behavior in these interactions and to conceive of ways in which altering the game affects social outcomes.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 0220 - INTRO TO HEALTH ECONOMICS

Minimum Credits: 3
Maximum Credits: 3

This course applies microeconomic analysis to the allocation of resources and consumption of products within the health care economy. It will allow students to develop an understanding of microeconomic theory, in particular as it is applied to real world problems. Also it will provide students with knowledge of the economic aspects of health care in the US and related policy. Unique features of health care which interfere with competitive market allocation and pricing will be emphasized.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100; MIN GRADE 'C' for all courses

ECON 0230 - INTRODUCTION TO PUBLIC ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
The objectives of this course are to illustrate how basic economic principles can be used to determine the economic effects of government expenditure and tax policies; to develop the students' ability to analyze issues and to recognize the value judgments which lie behind various positions taken in current policy debates.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100 or 0800
Course Attributes: Urban Studies

ECON 0280 - MONEY AND BANKING

Minimum Credits: 3
Maximum Credits: 3
The course is directed toward giving the student an insight into the role that monetary policy and financial markets play in the economy. It will cover both the theoretical and institutional aspects of banking necessary to function successfully in the business world. One object of the course is to give the student the ability to analyze and appraise critically the monetary policy of federal reserve system.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0110 or 0800 (MIN GRADE 'C')
Course Attributes: Urban Studies

ECON 0290 - FINANCIAL MARKETS AND INSTITUTIONS

Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with a strong foundation in financial market analysis and the roles of non-bank financial institutions in the modern economy. The course covers financial markets such as debt markets, equity markets, and derivatives markets and non-bank financial institutions, including mutual funds, pension funds, securities firms, and insurance companies.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0110 AND (STAT 0200 OR STAT 1000 OR STAT 1100 OR STAT 1152 OR ECON 0150 OR ECON 1150)

ECON 0360 - INTRODUCTION TO ENVIRONMENT AND RESOURCE ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
Basic economic theory applied to issues involving joint interaction of economic activity, the environment, and use of natural resources. Debate over the sustainability of economic development, renewability and/or depletion of natural resources, and effects of pollution on environmental quality will be surveyed. The issues of ozone depletion, loss of biodiversity, and greenhouse gas emissions and global warming will be considered.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0110 or 0800
Course Attributes: Global Studies

ECON 0400 - LABOR AND THE ECONOMY

Minimum Credits: 3
Maximum Credits: 3
An introductory survey of contemporary labor developments and issues. Readings and lectures have a more historical and institutional perspective and less emphasis on analytical techniques than other labor offerings.
Academic Career: Undergraduate
ECON 0410 - ECONOMICS OF DIVERSITY

Minimum Credits: 3
Maximum Credits: 3
This course aims to strengthen students' understanding of how race, class, gender, disability, ethnicity, nationality, culture, sexuality, religion, and age interact with public policies to influence various economic outcomes. We analyze the evolution of economic consequences on populations that have been historically disadvantaged. Specifically, we discuss how governments (especially the U.S. government) and societies deal with diversity and their level of discrimination vs inclusivity of different groups over time and across space.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100 or 0800 (Min Grade 'C')

ECON 0430 - WOMEN IN THE LABOR MARKET

Minimum Credits: 3
Maximum Credits: 3
The empirical evidence suggests that women earn lower income than men, and that the wage rates earned by women are lower than those of men --- even when they have similar job classifications. This course examines the role of women in the labor market; the nature of their decision to invest in education, their labor force participation, and the demand for their labor services. In this way, a framework for policy analysis is developed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100

ECON 0460 - SPORTS ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is for students to understand and apply the concepts of microeconomics that are relevant for the business and practice of sports. Areas of study include labor economics, public economics, industrial organization, the economics of information, and the economics of sports betting markets. Examples of questions addressed within these fields include: how have owners in professional sports leagues coordinated to limit player salaries? How much are players worth, in an economic sense? What pricing strategies can teams employ to maximize profits?

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100 or 0800

ECON 0500 - INTRODUCTION TO INTERNATIONAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
Provides an introduction to international economics. Half the topics are pure theory, half international monetary economics. Topics from the real world are analyzed. Topics include alternative pure trade theories; effects of trade barriers; U.S. commercial policy; forms of regional integration; balance of payments; elimination of balance of payments disequilibrium; international monetary system.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (ECON 0100 and 0110) or 0800 (MIN GRADE 'C')
ECON 0501 - INTRODUCTION TO INTERNATIONAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
An introduction to the basic issues of international economics and to the historical evolution and institutional structure of the international economy. Topics include mercantilism, comparative advantage as a basis for trade, the impact of trade on income distribution, the evolution of the international financial system, and the working of the international gold standard.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

ECON 0530 - INTRODUCTION TO DEVELOPMENT ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
An introductory description and analysis of the economic systems of countries commonly referred to as less developed countries. Alternative development policies with respect to international trade, agriculture, industry, health, and education will be outlined. The roles played by government, population growth, environmental degradation, income distribution, and foreign aid will be discussed. The economic aspects of development will be stressed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (ECON 0100 and 0110) or ECON 0800 (MIN GRADE 'C')

ECON 0630 - EAST ASIA'S DYNAMIC ECONOMIES

Minimum Credits: 3
Maximum Credits: 3
An introductory survey of several East Asian economies. The primary objective is to equip students with a clear understanding of major elements of recent Asian economic history and current economic conditions, and of implications of Asian economic gains for the United States economy, particularly U.S. Trade relationships with this region and their dynamically changing patterns. A secondary objective is to use case studies and empirical materials as vehicles to appreciate how economic principles can be used in real world analysis.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECON 0100 and 0110) or ECON 0800; MIN GRADE: 'C' for all listed Courses; PLAN: Economics (ECON-BA), Economics (ECON-BS), Economics-Statistics (ECNSTC-BS), Mathematics-Economics (M-ECON-BS)

ECON 0640 - ECONOMIC DEVELOPMENT OF THE MIDDLE EAST AND NORTH AFRICA (MENA) REGION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to expose students to current views by academics and policy makers on past practices and future challenges facing the economies of the Mena region. The course will be taught with an interdisciplinary emphasis on political, social, and cultural, as well as economic aspects. Assignments will include a research paper in addition to a group project presentation. Students will gain an overall understanding of the economic problems of the region, and will be able to effectively analyze changes in the economic climate of the region.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 0800 - INTRODUCTION TO ECONOMICS
Minimum Credits: 3
Maximum Credits: 3
A one-term course designed primarily for the non-major. The main goals are to create interest in the study of economics and introduce some basic tools economists use to analyze social issues. Issues range from farm subsidies to changes in income tax rates to changes in spending on crime reduction.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Social Science General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 0900 - PROFESSIONAL DEVELOPMENT FOR ECONOMISTS

Minimum Credits: 1
Maximum Credits: 1
In this course, students will 1) understand the range of career and advanced degree options for which their studies in Economics will make them eligible. 2) develop professional skills in presentation and communication. 3) maximize progress within the major by setting broader academic and career goals and exploring learning opportunities.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
Course Requirements: RESTRICTED TO ECON PLANS: ECON-BA; ECON-BS; ECNSTC-BS; M-ECON-BS

ECON 0905 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Current topics of particular interest to economics majors are discussed and analyzed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100; MIN GRADE: C or better

ECON 1010 - AMERICAN ECONOMIC HISTORY

Minimum Credits: 3
Maximum Credits: 3
The course presents a survey of the strategic factors in the economic development of the United States from colonial times to the great depression. The topics covered include the record of economic growth, the process industrialization and its major phases, British mercantilism, the role of technological change, demographic history, the slave economy, distribution of income, urbanization, and the financial sector.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100 or 0800 (MIN GRADE 'C')
Course Attributes: DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

ECON 1030 - INTELLCL FOUNDTNS OF CAPITALISM

Minimum Credits: 3
Maximum Credits: 3
This course explores the salient features of European economic development from the black plague of the middle ages to the great depression of the 1930's. The emphasis will be to understand how social, demographic, and economic processes interacted and ultimately culminated in one of the most momentous events in the history of mankind, the industrial revolution. We shall venture an explanation for why Europe was the first continent and England the first country to industrialize. The social changes in the aftermath of the revolution will also be covered.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
ECON 1050 - SOCIALISM VERSUS CAPITALISM

Minimum Credits: 3
Maximum Credits: 3
The course covers the economic changes that produced capitalism; the attempts to understand capitalism which culminated in the theories of Adam Smith; the problems of communist societies and their attempts to return to some form of capitalism.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies, Russian & East European Studies, West European Studies

ECON 1100 - INTERMEDIATE MICROECONOMICS

Minimum Credits: 3
Maximum Credits: 3
An intermediate-level course in resource allocation theory emphasizing the origins and uses of theoretical reasoning in economic analysis. Topics covered include the methodology of economic analysis; theories of consumer behavior; demand and supply analysis; production theory; the theories of the firm and market behavior; income distribution theory; and general equilibrium theory.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0100 and ECON 0110 and [MATH 0120 (with a B or higher) or 0220 or (0125 and 0126) or 0230 or 235]; MIN GRADE: 'C' For All Listed
Course Attributes: Global Studies

ECON 1110 - INTERMEDIATE MACROECONOMICS

Minimum Credits: 3
Maximum Credits: 3
A systematic treatment of macroeconomic analysis including such topics as policy analysis, inflation-unemployment tradeoffs, business cycles, budget deficits, and the balance of payments.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 0110 and ECON 0110 [Math 120 or {0125 and 0126} (with a B or higher) or 0220 or 0230 or 0235] MIN GRADE: "C" for all listed courses
Course Attributes: Global Studies

ECON 1150 - APPLIED ECONOMETRICS 1

Minimum Credits: 3
Maximum Credits: 3
Introduces basic tools in applied econometrics that are commonly employed in government, business, and academic research. The main emphasis is on application of various econometric methods. Students are expected to become familiar with standard computer programs that are frequently used in quantitative economic research. Topics covered are a review of basic statistics, classical linear regression models, and associated inferential problems, and generalized linear regression models and associated inferential problems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: [MATH 0120(with a B or higher) or 0220 or (0125 and 0126) or (0230 or 0235)] and (STAT 0200 or 1000 or 1100 or 1152)
Course Attributes: Global Studies

ECON 1160 - FINANCIAL ECONOMETRICS
Covers important advanced techniques and models frequently used in quantitative economic research in government, business, and academic institutions. Emphasis is on application. Among the subjects to be covered are distributed lag models, seemingly unrelated regression models, error components models, simultaneous equation models, and an introduction to the use and analysis of econometric models.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ECON 1150 OR STAT 1221

**ECON 1180 - MATHEMATICAL ECONOMICS**

Minimum Credits: 3  
Maximum Credits: 3  
An initial course for graduate students or for undergraduates with a strong math background. Topics will include nonlinear and linear optimization models and simulation applications to economic problems. The optimization topics will include an introduction to activity analysis and Kuhn Tucker Theory. To facilitate the study of these, some topics concerning linear inequalities and convex functions will be discussed. Application of each topic to economic theory and policy will be stressed. The computer will be used for solving problems.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ECON 1100 (MIN GRAD 'C') and [MATH 0120 or 0220 or (0125 and 0126) or 0230 or 235]  

**ECON 1200 - GAME THEORY**

Minimum Credits: 3  
Maximum Credits: 3  
The aim of the course is to introduce the main elements of game theory, in a manner which emphasizes the connections between the "cooperative" and "non-cooperative" traditions. Students will be expected to develop understanding sufficient to construct proofs as well as to perform computations, and there will be emphasis on modelling issues.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: MATH 0120(with a B or higher) or 0220 or (0125 and 0126) or 0230 or 235 and (STAT 0200 or 1000 or 1100); MIN GRADE: 'C' FOR LISTED COURSES

**ECON 1230 - INTERMEDIATE PUBLIC ECONOMICS**

Minimum Credits: 3  
Maximum Credits: 3  
Fundamentals of policy analysis will be reviewed and then applied to a small set of current policy questions.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ECON 1100 (MINGRADE: 'C')

**ECON 1250 - BEHAVIORAL ECONOMICS**

Minimum Credits: 3  
Maximum Credits: 3  
This course will expose students to how insights from psychology and experiments have been incorporated into economic models. We will discuss how the insights have changed our understanding of markets and auctions, strategic interactions (game theory), individual decision making under uncertainty and over time, political behavior and more. We will also explore the welfare and policy implications of the findings from behavioral economics.

**Academic Career:** Undergraduate  
**Course Component:** Lecture
ECON 1260 - EXPERIMENTAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This course will expose students to the methodology and practice of experimental economics, where economic theories and hypotheses are tested and evaluated using data collected from controlled experiments. We will read and discuss a variety of different experiments that have been conducted including those examining markets and auctions, strategic interactions (game theory), individual decision making, political institutions and more.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 1280 - MONETARY THEORY AND POLICY

Minimum Credits: 3
Maximum Credits: 3
Course focuses on financial system and important role it plays in facilitating growth in the U.S. Economy. Financial intermediaries are discussed with emphasis placed on the banking system and its regulator, the federal reserve system, the federal reserve's influence on money supply and interest rates and nonbank public's demand for money is discussed. Role of monetary policy in promoting price stability and economic growth discussed in the context of a U.S. Economy that is growing more integrated with worldwide economic events.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1110 (MIN GRADE 'C')

ECON 1290 - MONETARY POLICIES AND FINANCIAL MARKETS

Minimum Credits: 3
Maximum Credits: 3
The main goal of this course is to understand credit markets and monetary policy. Why are credit markets organized in a particular way? What forces shape financial contracts and the behavior of asset markets? Why do we need financial regulation? What is the role of central banks? How do they conduct monetary policy? How does monetary policy affect financial markets and the real economy? We will study how monetary policy influences interest rates and asset markets, such as the bond market and the stock market. We will analyze the effect of asymmetric information in corporate finance, and on the design of financial contracts. We will study the role of financial intermediaries, such as banks, in the economic system and study the economic rationale behind domestic and international banking regulation. Finally, we will discuss monetary policy. We will review evidence and theory on how monetary policy affects real economic activity and financial markets. We will study the instruments and goals of monetary policy, focusing in particular on credibility and expectations management for central banks, the connection with fiscal policy and international cooperation in monetary policy.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1110; MIN GRADE: C

ECON 1360 - ENVIRONMENTAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
Basic economic theory is applied to issues involving the joint interaction of economic activity, the environment, and use of natural resources. The debate over the sustainability of economic development, the renewability and/or depletion of natural resources, and the effects of pollution on environmental quality will be surveyed, including the issue of greenhouse gas emissions and global warming. Benefit-cost analysis, optimal tax and regulatory schemes, public goods, property rights, emission rights markets, and other economic policy instruments/concepts will be studied.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')
Course Attributes: Global Studies

ECON 1420 - LABOR ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
This is an advanced elective course on labor economics for undergraduate students. The purpose of the course is to apply the analytical tools from intermediate microeconomic theory to analyze how society develops, allocates and rewards human resources, and to study a wide range of labor-related issues, such as labor supply; household production and labor force participation; labor demand; minimum wages; labor market discrimination; compensating wage differentials; schooling and earnings; wage inequality, and immigration. Emphasis will also be given to the empirical evidence on those topics.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1440 - ECONOMICS OF CORPORATION FINANCE

Minimum Credits: 3
Maximum Credits: 3
The course is intended as an analysis of the investment valuation and financing of the corporation. Attention will be focused on the application of economic theory to the solution of financial problems. The interrelations between investment and financing policies and their dependence on security valuations will be stressed. The institutional background necessary to analyze these problems will be examined, and practical cases drawn from personal and business situations will be used along with more theoretical materials.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1460 - FINANCIAL MARKETS & INSTITUTIONS

Minimum Credits: 3
Maximum Credits: 3
The objective of this course is to provide the student with a strong foundation in financial market analysis and the roles of nonbank financial institutions in the modern economy. This course will commence with the necessary background for financial market analysis, including methods of valuation and the role of interest rates and monetary policy. The course will then cover three broad types of financial markets: debt markets, equity markets and derivatives markets. Each section will focus on the types of instruments and the markets in which they are traded, as well as methods of valuation of these asset classes. The course then investigates nonbank financial institutions, including mutual funds: pension funds, securities firms and insurance companies, paying close attention to their role in the previously-discussed markets.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 1470 - MARKET STRUCTURE AND COMPETITION

Minimum Credits: 3
Maximum Credits: 3
The course is a survey of the behavior of firms, the structure of industrial markets, and market performance. The survey will cover both theoretical models and empirical analyses.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 (MINGRADE: 'C')

ECON 1480 - ECONOMICS OF INNOVATION
Minimum Credits: 3
Maximum Credits: 3
This course will engage undergraduate students in the discussion of new innovative technological solutions in finance and economics. The course will focus on the economics of blockchain and cryptocurrencies. We will cover the basics of blockchain such as the technology underlying blockchain, decentralized consensus, cryptography, smart property contracts, emerging regulation of blockchain and cryptocurrencies, and potential macroeconomic implications of these new technologies. The first part of the course will explore the economics of the incentives behind the functioning of blockchain. The second part will consider new economic and business applications that can be enabled by blockchain and cryptocurrencies as well as the challenges for the regulators of the financial industries. The course offers undergraduate students the opportunity to explore real-world challenges created for the governments and financial regulators by emerging financial and economic technology driven solutions and innovations, to understand the potential economic and business applications of blockchain and cryptocurrencies, and to study the mechanics and incentives behind security of blockchain. Students will have an opportunity to interview (via skype) economic policy makers and business innovators who work in the areas of blockchain and cryptocurrency. The students will also be able to chose a project of their interest and propose a design of an economic application on blockchain.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 1500 - INTERMEDIATE INTERNATIONAL TRADE

Minimum Credits: 3
Maximum Credits: 3
This course is an intermediate level survey of the theory of international trade and related evidence. Topics include causes and consequences of international trade, trade and income distribution, commercial policy, political economy aspects of trade policy, preferential trading arrangements (NAFTA, European Union, etc.), Trade and development, and others. While no one geographic area is singled out, examples will come from most areas of the world economy.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 (Min Grad 'C')
Course Attributes: Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ECON 1510 - INTERMEDIATE INTERNATIONAL FINANCE

Minimum Credits: 3
Maximum Credits: 3
This course provides an in-depth analysis of international monetary economics and related topics in the area of international finance. Topics to be covered include exchange rate determination, balance of payments, exchange market efficiency, forward exchange rates, effects of devaluation, the international monetary system.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1110 (MIN GRADE: 'C')
Course Attributes: DSAS Global Issues General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies

ECON 1540 - ECONOMIC GROWTH: INNOVATION & POLICY

Minimum Credits: 3
Maximum Credits: 3
In this course, we will seek to understand both the causes and effects of long-term economic growth. We will study how industrial organization, intellectual property policy, education, knowledge diffusion, cultural and political institutions, international trade, productivity, health, welfare, and inequality impact economic growth. We will document the broad trends in growth and development in a global context, first historically, then with greater emphasis on the experience of the US in the 20th century and beyond. We will study a variety of models that have been proposed over the years to explain the observed facts.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
**Course Requirements:** PREQ: ECON 1110 (MINGRADE: 'C'); PROG: School of Arts & Sciences

**Course Attributes:** Capstone Course, Global Studies

---

**ECON 1580 - ECON GROWTH PBLC HLTH DEMOGRAPHY**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Surveys the principle elements of demographic science, particularly within the context of developed and developing economies. Focuses on causes and consequences of changes in mortality, natality, migration and immigration as they apply to such current problems as (1) sufficient saving; (2) physical capital accumulation; (3) productivity changes; (4) the distribution of wealth and income, and (5) changes in population dependency ratios.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ECON 1100 or 1110 (MINGRADE: 'C')  
**Course Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req.

---

**ECON 1610 - LATIN AMERICA ECON DEVELOPMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (ECON 0100 and 0110) or ECON 0800; MIN GRADE: 'C' For All Listed Courses

---

**ECON 1630 - ECONOMIC DEVELOPMENT OF CHINA**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course surveys the development of China's economy since 1800 with particular emphasis on studying China's experience under different forms of economic organization (market economy, central planning, reformed system combining plan and market) and comparing China's development with that of other nations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ECON 1100; MIN GRADE: C

---

**ECON 1680 - ECONOMICS OF THE EUROPEAN UNION**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Introduction to economy of Europe, including theory and institutions of European community as they relate to economic systems, its economic relations with other European states and the world, its economic problems and policies. Elementary economics will be reviewed, but no specialist knowledge is required. European economic policies are examined in a critical manner. Some study of breakdown of eastern bloc and the implications of eastern European crisis for European community and the United States.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (ECON 0100 and 0110) or ECON 0800; MIN GRADE: 'C' FOR ALL COURSES LISTED  
**Course Attributes:** DSAS Geographic Region General Ed. Requirement, Russian & East European Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req., West European Studies
ECON 1700 - CAPSTONE SEMINAR IN MICROECONOMICS

Minimum Credits: 3
Maximum Credits: 3
In this seminar, students will study in-depth a current topic in Economics. Their work will include a research paper or other culminating project which requires them to apply economic concepts and theories to analyze issues and situations in the real world.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 (Min Grade 'C') and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Capstone Course, Global Studies, Writing Intensive Course (WRIT)

ECON 1701 - GREEN INFRASTRUCTURE IMPLEMENTATION: A CASE STUDY OF THE PITTSBURGH REGION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to exercise the student's academic knowledge, passions, and skills to facilitate real-world problem solving in a collaborative setting. It will improve the students' skills in these areas: analytical; collaborative work; project management; communication; experimentation; and decision analysis. Differences in baseline skills and interests will be recognized in assignments and grading.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ECON 1710 - CAPSTONE SEMINAR IN INTERNATIONAL ECONOMICS

Minimum Credits: 3
Maximum Credits: 3
In this seminar, students will study in-depth a current topic in International Economics. Their work will include a research paper or other culminating project which requires them to apply economic concepts and theories to analyze issues and situations in the real world.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1100 and ECON 1110 (Both Min Grade: 'C') and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006); PLAN: ECON-BA, ECON-BS, EC-STAT Math-ECON-BS

ECON 1720 - CAPSTONE SEMINAR IN MACROECONOMICS

Minimum Credits: 3
Maximum Credits: 3
In this seminar, students will study in-depth a current topic in Economics. Their work will include a research paper or other culminating project which requires them to apply economic concepts and theories to analyze issues and situations in the real world.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ECON 1110 (Min Grade: 'C') and ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Capstone Course, Writing Intensive Course (WRIT)

ECON 1730 - SEMINAR EXPERIMENTAL ECONOMICS
Minimum Credits: 3  
Maximum Credits: 3  
There is a small, but rapidly growing literature in which behavioral experiments are used to test central propositions of various economic theories. This course will review the experimental literature that exists in several areas of economics, including industrial organization, social choice and preference revelation, behavior of decentralized markets, and bargaining.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ECON 1100 (Min Grade 'C') and ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006)

Course Attributes: Writing Intensive Course (WRIT)

**ECON 1750 - ECONOMIC RESEARCH METHODS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is the first in a two-course series in which students learn the process of economic research and carry out a research project. In this course students will learn to formulate a feasible economic research question, review the related literature, identify or create an appropriate economic model with a testable hypothesis, and identify appropriate data and methods to test the hypothesis. Students will write and present a research proposal which includes the introduction, literature review, model, and methods sections of their research paper.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

**ECON 1760 - ECONOMIC RESEARCH CAPSTONE**

Minimum Credits: 3  
Maximum Credits: 3  
This course is the second in a two-course series in which students learn the process of economic research and carry out a research project. In this course students will learn to collect the appropriate data, perform the appropriate hypothesis testing, and analyze results. Students will present their research and write a publishable academic journal article.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

**ECON 1901 - INDEPENDENT STUDY**

Minimum Credits: 1  
Maximum Credits: 12  
Student designed project of study in a particular area of economics. Supervised closely by a faculty member.

Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: Letter Grade  
Course Attributes: Writing Intensive Course (WRIT)

**ECON 1902 - DIRECTED STUDY**

Minimum Credits: 1  
Maximum Credits: 12  
A course of directed study on an economic topic under the direction of a faculty mentor.

Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Writing Intensive Course (WRIT)

**ECON 1903 - DIRECTED RESEARCH**
Minimum Credits: 1
Maximum Credits: 12
Student participates in an economics research project directed by a faculty member.

**Academic Career:** Undergraduate
**Course Component:** Directed Studies
**Grade Component:** LG/SNC Elective Basis
**Course Attributes:** Capstone Course

**ECON 1905 - SPECIAL TOPICS**

Minimum Credits: 3
Maximum Credits: 3
Special Topics

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Attributes:** Capstone Course

**ECON 1906 - INTERNSHIP**

Minimum Credits: 1
Maximum Credits: 3

**Academic Career:** Undergraduate
**Course Component:** Internship
**Grade Component:** Satisfactory/No Credit

**ECON 1907 - UNDERGRADUATE TEACHING ASSISTANT**

Minimum Credits: 1
Maximum Credits: 3

**Academic Career:** Undergraduate
**Course Component:** Independent Study
**Grade Component:** Satisfactory/No Credit

**ECON 1910 - SEMINAR IN CURRENT ECONOMIC RESEARCH**

Minimum Credits: 1
Maximum Credits: 1

This course features research by Pitt faculty exploring the current frontier of a selected topic in economics. Students will learn to read and evaluate research papers in economics. Students will understand how research in the field builds on prior work and how multiple studies with different approaches, methods, data, and cases contribute to consensus in the field.

**Academic Career:** Undergraduate
**Course Component:** Seminar
**Grade Component:** Satisfactory/No Credit
**Course Requirements:** PREQ: ECON 1100

**ECON 1921 - ECONOMIC RESEARCH & DATA SKILLS 1**

Minimum Credits: 1
Maximum Credits: 1

This course teaches students hands-on skills for conducting and presenting economic research and data analysis. Topics vary each semester, reflecting current software and new techniques.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
ECON 1922 - ECONOMIC RESEARCH & DATA SKILLS 2

Minimum Credits: 2
Maximum Credits: 2
This course teaches students hands-on skills for conducting and presenting economic research and data analysis. Topics vary each semester, reflecting current software and new techniques.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ECON 1923 - ECONOMIC RESEARCH & DATA SKILLS 3

Minimum Credits: 3
Maximum Credits: 3
This course teaches students hands-on skills for conducting and presenting economic research and data analysis. Topics vary each semester, reflecting current software and new techniques.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Education

EDUC 1011 - CULTURALLY RESPONSIVE PEDAGOGY

Minimum Credits: 3
Maximum Credits: 3
Instructional practices that respond to the social context in which they (will) work. The course covers general principles and approaches to culturally responsive teaching such as how teachers develop meaningful relationships with students, how teachers learn from and about a school and local community, how teachers develop and implement culturally responsive classroom management, and how teachers develop expectations for students that maximize their capacity. In addition, the course will assist students in learning about and developing culturally responsive curriculum and pedagogy in their different content/subject matter areas (such as mathematics, science, art, language arts, and social studies). A recurrent and central question of the course is: how do teachers develop culturally responsive instructional practices in their particular disciplinary domain to maximize students learning opportunities?
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

EDUC 1015 - FROM CLASSROOM TO COMMUNITY: INTER-AND INTRA-PERSONAL SKILLS DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course provides an introduction to intervention and prevention efforts designed to improve educational, mental health, and socio-behavioral outcomes for first-year students with various backgrounds and lived experiences. The transition to college presents students with a unique set of challenges. With rapid assimilation into an institution of higher learning, an athletic department, and a varsity athletic team, Pitt student-athlete's particular transitional needs differ from nearly all other student populations. This course is therefore designed to assist them with skills acquisition and practice necessary for everyday wellness and resilience in the classroom and the community. The focus of the class will be on skills for thriving and improving their lives, and the lives of others, rather than just surviving in life. By the end of the course, you should be able to: (1) Directly practice a variety of wellness and resilience skills, habits, and routines in different areas of your life to minimize stress and optimize well-being, (2) Describe why intentionally 'practicing' wellness and resilience skills is critical to developing the fluency to use and reap the benefits from them, (3) Develop a wellness and resilience toolbox of skills, strategies, and resources that serves as the vehicle on your road map for your future as a student and in the workplace, (4) Plan for how to use these skills to be your own and others' advocates in your future careers and communities.
Academic Career: Undergraduate
Course Component: Lecture
EDUC 1067 - FREEDOM SEMINAR

Minimum Credits: 1  
Maximum Credits: 1  
The Freedom Microseminar courses attend to a range of freedom projects, theories, pedagogies, and praxes. Each course is a focused engagement with a specific set of questions, ideas, and topics relevant for understanding education within social, cultural, and political movements, systems, and structures. Students study both the what and how of freedom through insurgent knowledge traditions.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: H/S/U Basis

EDUC 1089 - SPECIAL TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
The content of this course will change from term to term to allow School of Education faculty to address emerging issues and specialized content that is not represented in the established curriculum.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

EDUC 1110 - GENDER AND EDUCATION

Minimum Credits: 3  
Maximum Credits: 3  
This seminar examines the role that gender plays in the lives of students, researchers, educators, and policy makers. Major topics may include: changing trends of participation and success in k-16 schooling; childhood and professional socialization; media and curricular bias; coming of age; embodiment, sexuality, and sexual harassment; gender and the educational professions; feminist and ant-bias teaching; leadership and transnational communities of practice; activism and engaged feminist scholarship.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

EDUC 1998 - DIRECTED STUDY

Minimum Credits: 1  
Maximum Credits: 3  
Student pursues study of various topics under the direction of a faculty member.  
Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: LG/SU3 Elective Basis

EDUC 2201 - INTRODUCTION TO RESEARCH METHODOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
Introduces basic language and concepts of empirical research with emphasis on the applicability of research methodology (statistics, measurement, design, and evaluation) for improvement of professional practice in education.  
Academic Career: Graduate  
Course Component: Lecture

Ed Foundations, Org, & Policy

EFOP 1001 - SOCIAL FOUNDATIONS OF EDUCATION

Minimum Credits: 3
Maximum Credits: 3

Students in the course have the opportunity to develop a foundational understanding of the dynamics of schooling in society by addressing the cultural aspects that underlie society's educational ideas and practices. Through an interdisciplinary approach, readings and activities are designed for school practitioners, or those contemplating careers in education, to engage in the study of those cultural aspects and consequences. The general intent of foundational study is to introduce students to interpretive uses of knowledge germane to education and to establish a basis for lifelong learning through normative and critical reflection on education within its historical philosophical, cultural and social contexts. Special emphasis is focused on the role of schooling in cultivating the habits necessary for democratic citizenship which include ongoing efforts to secure equitable and just social relations, and to advance the common good.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: African Studies

EFOP 1359 - GENDER, EDUCATION, AND INTERNATIONAL DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3

In this course, we look at gendered dimensions of education and development in international contexts. We look cross-culturally, across space, and across "development" continua and paradigms. We examine gendered issues through three modules that represent diverse levels of educational practice - basic education, higher education, and non-formal and informal education. In order to provide focus in this rich and complex field, we hone in on key policy orientations that build sequentially, starting with the most fundamental issues of access and equity, continuing with capacity building, and extending to sustainability and creating social change. Since this class is feminist by design, we explicitly link policy with agency, theory with advocacy, and reflection with action. Each course section also contains a strand on advocacy and action, through which students are able to create a synthesis of module lessons through a personal, analytical standpoint piece.

Electrical and Computer Engineering

ECE 0031 - LINEAR CIRCUITS AND SYSTEMS 1

Minimum Credits: 4
Maximum Credits: 4

The analysis of linear circuits. Electric variables and circuit elements; Kirchhoff's and Ohm's Law; Mesh and Node Equations; Thevenin and Norton equivalent circuits; first and second-order circuits; time domain analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0150 or 0230 or 00231 or 0235) and (PHYS 0152 or 0175 or 0202 or 0476); PROG: Swanson School of Engineering

ECE 0035 - LINEAR CIRCUITS AND SYSTEMS LAB FOR TRANSFERS STUDENTS

Minimum Credits: 1
Maximum Credits: 1

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SU3 Elective Basis
ECE 0041 - LINEAR CIRCUITS AND SYSTEMS 2

Minimum Credits: 3
Maximum Credits: 3
Sinusoidal steady-state analysis, network functions, real and reactive power, three-phase circuits, laplace transform method, two-port networks, and Fourier series.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0031 or COE 0031; PLAN: Electrical Engineering or Computer Engineering

ECE 0101 - LINEAR CIRCUITS AND SYSTEMS

Minimum Credits: 4
Maximum Credits: 4
This course covers the fundamentals of linear electric circuit analysis used throughout the electrical and computer engineering curricula. Students learn basic concepts and terminology of electrical engineering and develop knowledge and skills to analyze, evaluate, and design electrical circuits in class and in an accompanying laboratory where they build prototyping and analysis skills using modern test equipment. Primary topics include electric variables and circuit elements, Kirchhoff's and Ohm's Laws, mesh and node equations, Thevenin and Norton equivalent circuits, first- and second-order circuits, time- and frequency-domain analyses, ideal transformers, and AC power. PREREQUISITES: PHYS 0175 and ENGR 0012 or ENGR 0016 COREQUISITE: ECE 0401
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PHYS 0175; COREQ: ECE 0401; PLAN: EE-BSE, COE-BSE, UNDENG-UNK

ECE 0102 - MICROELECTRONIC CIRCUITS

Minimum Credits: 4
Maximum Credits: 4
This course covers the fundamentals of microelectronic circuits, specifically operational amplifiers, diode and rectifier circuits, analysis and design of MOS field-effect transistor and bipolar-junction transistor amplifiers, and CMOS digital-logic circuits. In this course, the students will integrate their knowledge of linear circuits and will learn how to analyze, evaluate, and design electronic circuits. This course includes a laboratory section in which the students will gain prototyping, design, and testing skills using conventional equipment.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0101 or ECE 0031 or COE 0031; PLAN: Electrical Engineering or Computer Engineering

ECE 0111 - LINEAR CIRCUITS TRANSFER LAB

Minimum Credits: 1
Maximum Credits: 1
Linear Circuits Transfer Lab
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

ECE 0112 - MICROELECTRONIC CIRCUITS TRANSFER LAB

Minimum Credits: 1
Maximum Credits: 1
Laboratory section of Microelectronic Circuits for transfer students
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
ECE 0132 - DIGITAL LOGIC

Minimum Credits: 3
Maximum Credits: 3
Introduction to digital systems, Boolean algebra, minimization of logic functions, combinational and sequential circuit design.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0152 or 0175 or 0202 or 0476); PROG: Undergraduate Swanson School of Engineering

ECE 0142 - COMPUTER ORGANIZATION

Minimum Credits: 3
Maximum Credits: 3
Digital computer data representation, instruction formats, control, memory and input-output units, microprocessors, minicomputers.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0132 or COE 0132; PROG: Swanson School of Engineering

ECE 0201 - DIGITAL CIRCUITS AND SYSTEMS

Minimum Credits: 4
Maximum Credits: 4
In this course, students study the fundamental building blocks used in the design of modern digital electronics and computers. Students learn how to use and combine digital components to create circuits that perform fundamental computing tasks such as arithmetic and storage of information. Primary topics covered include Boolean algebra and binary arithmetic, combinational and sequential logic circuits, Finite-State Machine (FSM), Hardware Design Language (HDL), and Register Transfer Level (RTL) for digital design. Students extend their knowledge to practice by way of hands-on laboratory exercises where various software and hardware tools are used to design and test solutions for real-world applications. After completing this course, students understand the design of digital computing systems at their most fundamental level and are able to craft such systems using modern tools and techniques.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PHYS 0175 AND ENGR 0012 AND ENGR 0712; PLAN: EE-BSE, COE-BSE, UNDENG-UNK

ECE 0202 - EMBEDDED PROCESSORS AND INTERFACING

Minimum Credits: 4
Maximum Credits: 4
This course covers the fundamentals of embedded processors and interfacing, including microprocessor structure and instruction sets, programming using C and assembly languages, memory and peripherals, interfacing, and embedded system design. Detailed studies of microprocessor I/O and interrupt techniques as applied to analog-to-digital, digital-to-analog, timers, and parallel and serial interfaces are also included. Laboratory activities provide the student with experience in developing and testing the hardware and software required to incorporate embedded computers into systems that solve real-world problems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECE 0201 and ECE 0301) or (COE or CS 0447) or COE 0147 and (COE 0501 or ECE 0301); PLAN: Electrical Engineering or Computer Engineering

ECE 0211 - DIGITAL CIRCUITS AND SYSTEMS CREDIT LAB

Minimum Credits: 1
Maximum Credits: 1
Digital Circuits and Systems Credit lab for transfer students. Associated with ECE 0201.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

ECE 0212 - EMBEDDED PROCESSORS AND INTERFACING CREDIT LAB

Minimum Credits: 1
Maximum Credits: 1
Embedded Processors and Interfacing Credit Lab for transfer students. Associated with ECE 0202.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

ECE 0257 - ANALYSIS AND DESIGN OF ELECTRONIC CIRCUITS

Minimum Credits: 3
Maximum Credits: 3
Diode circuits, power supply design; analysis and design of bipolar junction transistor and field effect transistor amplifiers. Bias stability analysis, power amplifiers. Ideal operational amplifiers. Cmos inverters.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0031 or COE 0031; PROG: Swanson School of Engineering

ECE 0301 - ECE PROBLEM SOLVING WITH C++

Minimum Credits: 3
Maximum Credits: 3
This course covers fundamental concepts and techniques in software design for solving problems in electrical and computer engineering (ECE) using C++. Students learn procedural and object-oriented program development, as well as basic control structures, data structures, and algorithms. Students apply these skills in crafting and testing structured programs to solve problems of interest in ECE, such as linear circuits and systems, digital circuits and systems, and linear algebra and differential equations, through assignments that are tied to concepts covered in these other core sophomore courses of ECE.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0012 or 0016 or 0711; PLAN: EE-BSE, COE-BSE, UNDENG-UNK

ECE 0302 - DATA STRUCTURES AND ALGORITHMS

Minimum Credits: 3
Maximum Credits: 3
This course covers the fundamentals of data structures and algorithms. Topics include stacks, queues, trees, lists, heaps, and other widely used abstract data types. Students will learn how to implement these data structures using C++ and techniques for analyzing algorithms that contain them. Advanced applications of recursion, sorting, and searching algorithms and other algorithms that incorporate data structures will also be discussed. This course will also introduce topics in parallel computing, and students will learn how to solve problems using modern application programmer interfaces (API) for parallel programming.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0301, or with special permission; PROG: Swanson School of Engineering; PLAN: Electrical Engineering or Computer Engineering

ECE 0401 - ECE ANALYTICAL METHODS
ECE 0402 - SIGNALS, SYSTEMS, & PROBABILITY

Minimum Credits: 3
Maximum Credits: 3
This course provides the fundamental mathematical background to solve problems in electrical and computer engineering (ECE). The main objective is to cover topics from calculus, linear algebra, differential equations, and complex analysis most relevant to electrical and computer engineering. Primary topics include matrices, vectors, systems of equations, determinants, double integrals, first- and second-order ordinary differential equations, complex numbers, Eulers identity, phasor analysis, signal waveforms, Laplace transform, transfer functions, frequency response, and an introduction to the Fourier transform. Students also learn to solve mathematical problems based upon these topics, both analytically and using the MATLAB programming environment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0230; COREQ: (ENGR 0012 or ENGR 0016 or ENGR 0711); PLAN EE-BSE, COE-BSE, UNDENG-UNK

ECE 0501 - DIGITAL SYSTEMS LABORATORY

Minimum Credits: 3
Maximum Credits: 3
This course and laboratory introduces students to the basic concepts of digital circuits, simulation and instrumentation, systems composed of discrete devices, logic gates, combinatorial and sequential circuits are designed, simulated, built and tested.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECE 0031 or COE 0031) and (ECE 0132 or COE 0132); PROG: Swanson School of Engineering

ECE 1110 - COMPUTER ORGANIZATION AND ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
This course provides a detailed introduction into the basics of computer design common to most computer architectures including topics of digital computer data representation, arithmetic and logic units, instruction formats, control, microprocessor architecture, and memory systems. This course includes a heavy focus on assembly language and its interaction with a RISC computer architecture.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0202; PLAN: Electrical Engineering or Computer Engineering

ECE 1120 - HARDWARE DESIGN METHODOLOGIES 1

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (COE 0501 or ECE 0501) and (COE 0147 or COE 0447 or CS 0447 or ECE 0142); PLAN: Computer Engineering or Electrical Engineering

ECE 1140 - SYSTEMS AND PROJECT ENGINEERING

Minimum Credits: 4
Maximum Credits: 4
This course covers system and software engineering processes, tools, and common practices through lectures and labs. Both the waterfall model and agile methods, specifically Extreme Programming and Scrum, are presented and used in developing a term-long group project. Students experience firsthand each of the concepts covered throughout the term by specifying, designing, and building an integrated working hardware/software system with equal contribution from each of the 5 or 6 team members. During the group project, full lifecycle documentation is created, UML is used for designing the system and a fully working system is developed, tested, and publicly presented. During the course students will use an IDE, UML, code repository, defect tracking, testing, scheduling, and documentation tools.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREREQS: ECE 0202 and ECE 0302 PLAN: Electrical Engineering or Computer Engineering

ECE 1145 - SOFTWARE CONSTRUCTION AND EVOLUTION

Minimum Credits: 3
Maximum Credits: 3
In this course, students will learn about software engineering principles related to software construction, maintenance, and evolution, focusing on standards and techniques for developing maintainable, flexible software. Topics covered include: version control and branching, test-driven development, design patterns, coding standards and documentation, exception handling, refactoring, and code review. Students will apply knowledge of these topics in assignments, peer code reviews, and a course project with multiple iterations.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ECE 1150 - COMPUTER NETWORKS

Minimum Credits: 3
Maximum Credits: 3
The course covers a theoretical understanding of technology involving, as well as problem solving skills for, interconnected devices where potential methods of interconnection are fundamental to the system design. Fundamentals related to wireless network systems and networks of computers or embedded digital devices, especially the lower levels of the stack, are emphasized. Coverage includes data link protocols, medium access control, addressing, routing, and transport protocols.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECE 0142 or (COE 0147 or COE 0447 or CS 0447); or (ECE 0302 and ECE 0402); PLAN: Electrical Engineering or Computer Engineering

ECE 1155 - INFORMATION SECURITY

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to information security at the computer system level, the network level, and the human level. Students will first learn general computer security technology and principles such as cryptographic tools, user authentication, access control, malicious software and attacks, and defending techniques. Then, we will delve into the details of software and system security, including buffer overflow vulnerability, operating system security, and Cloud and Internet-of-Things (IoT) security. The latter units of the course cover cryptographic and message authentication algorithms and their application in security network protocols, as well as human factors and legal and ethical issues.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECE 0202 and ECE0302), or (COE 0147 or COE 0447 or CS 0447), or (ECE 0142 or ECE 1770); PLAN: Electrical Engineering or Computer Engineering

ECE 1160 - INTRODUCTION TO EMBEDDED SYSTEM DESIGN

Minimum Credits: 3
Maximum Credits: 3
Introduction to the concepts and techniques of embedded system design including requirements, specifications, design implementation and testing. The laboratory is centered around the Altera Excalibur system and the NIOS core processor. Senior design course.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0142 or (COE 0147 or 0447) or CS 0447 or ECE 0202 ; PLAN: Electrical Engineering or Computer Engineering

ECE 1161 - EMBEDDED COMPUTER SYSTEM DESIGN 2

Minimum Credits: 3
Maximum Credits: 3
Organized as a full term project carried out by student design groups. A complex embedded system will be designed, implemented and tested using Altera and other cad tools. Grade will be based on project reviews and the final project report. Proper design process will be emphasized.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1160 or ECE 2160 or ECE 1175 or COE 1160; PROG: Swanson School of Engineering; PLAN: Electrical Engineering or Computer Engineering

ECE 1165 - DEPENDABLE COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
The field of dependable computing has recently emerged as one of the most important areas of study in computer and electrical engineering. Modern computer systems are susceptible to a broad range of potential faults, errors, and failures, and increasing chip density and design complexity exacerbate the problem. Novel methods in hardware, information, network, software, and time redundancy are now available to mitigate these threats in the form of resilient computer architectures, apps, and systems. The focus of studies here is the design and analysis of dependable machines, from small embedded systems to space-based platforms to high-end supercomputers, in terms of reliability, availability, performability, testability, and safety metrics, and more.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0290 and ECE 0142 or (COE 0147 or 0447) and ENGR 0020; LEVEL: Senior; PROG: Swanson School of Engineering; PLAN: COE or ECE/EE

ECE 1166 - PARALLEL COMPUTER ARCHITECTURE

Minimum Credits: 3
Maximum Credits: 3
Introduction to fundamental and newly developing hardware and software topics in parallel computer architecture (pca) including concepts, models, methods, metrics, systems, and applications. Pca has become one of the most challenging and important areas of cce, and it is now a dominant theme throughout computer architecture, systems, and programming, from low-power embedded systems to high-end supercomputers, and featuring various forms of fixed-logic (e.g., cpu, dsp, gpu), reconfigurable-logic (e.g., fpga), and hybrid (e.g., cpu+dsp, cpu+fpga, cpu+gpu, cpu+fpga+gpu) processing devices.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0142 or (COE 0147 or COE 0447) and (COE 0401 or CS 0401 or strong programming skills and experience in C or C++); and LVL: Senior; PLAN: Computer Engineering or Electrical Engineering

ECE 1170 - SPECIAL TOPICS: COMPUTER

Minimum Credits: 3
Maximum Credits: 3
An undergraduate course dealing with special topics of current interest in computers.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0302; PLAN: Electrical and Computer Engineering

ECE 1175 - EMBEDDED SYSTEMS DESIGN

Minimum Credits: 4
Maximum Credits: 4
This course introduces the fundamental challenges, methodologies, and techniques for designing different components of embedded computing systems, including microprocessors, I/O, memory and caches, and external sensors and actuators. Various system design issues including power management, real-time operating system design and system scheduling will also be discussed. Laboratory activities provide the students with the opportunities of gaining hands-on project experiences with modern embedded and mobile computing platforms such as microcontrollers, smartphones, sensors and wearables, as well as practicing these programming platforms over real-world embedded computing applications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ECE 0142) or (COE 0142 or 0147 or 0447) or (CS 0447)), or ECE 0202; PROG: Undergraduate Swanson School of Engineering; Plan: Computer or Electrical Engineering

ECE 1180 - COMPUTATIONAL MODELING AND SIMULATION FOR ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
In this course students will develop several software programs to model and simulate a range of different physical systems. The course will focus on building software simulations of systems in terms of underlying model objects, world representations, interactions between objects, and a variety of models for time. Some experience in c/c++ programming is assumed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0302; PROG: School of Engineering

ECE 1186 - SOFTWARE ENGINEERING

Minimum Credits: 4
Maximum Credits: 4
This course and laboratory introduces classical and object oriented software engineering. Software requirements, specification, object-oriented analysis, design, implementation, integration, and maintenance are covered. Each of these phases is examined on a practical level through a semester long, formal design project that involves the creation of a java-based internet application. Additional java-related topics are taught, including java applets, custom networking, remote database access, SQL, and multimedia extensions.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1140; PROG: Undergraduate Swanson School of Engineering

ECE 1188 - CYBER-PHYSICAL SYSTEMS
The arrival of the internet-of-things (IOT) has brought about a world where the everyday objects we interact with, ranging from health monitoring devices to appliances and automobiles, are embedded with intelligence, the ability to communicate over a network and act on information stored in the "cloud". In this intensive laboratory course, students, by way of a series of projects, follow the journey data takes from a sensor, to a microcontroller, through a network and then to the cloud (and back!). Along the way students are exposed to a broad range of electrical and computer engineering topics including electronic design, embedded programming, digital signal processing, networking and information theory, wireless communications, antenna theory and big data analytics.

**ECE 1192 - INTRODUCTION TO VLSI DESIGN**

Minimum Credits: 4  
Maximum Credits: 4  
Understand basic concepts and introductory techniques of modern integrated digital circuit design using Complementary Metal-Oxide-Semiconductor (CMOS) transistors. Learn how to design/simulate essential CMOS circuits for digital Very Large Scale Integration (VLSI) designs using state-of-the-art Computer Aided Design (CAD) tools.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ECE 0201 and ECE 0102; PROG: Undergraduate Swanson School of Engineering

**ECE 1193 - ADVANCED VLSI DESIGN**

Minimum Credits: 3  
Maximum Credits: 3  
This course is organized as a full semester project in conjunction with a small amount of lecture material on advanced CMOS digital design techniques, as well as the group design process itself. Students form groups of 3 to 5 per group that design and implement different VLSI projects which are then fabricated by MOSIS and returned for testing. Focus is on teamwork with frequent oral/written reports.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ECE 1192 or ECE 2192; PROG: Swanson School of Engineering

**ECE 1195 - ADVANCED DIGITAL DESIGN**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed to teach both the theoretical and practical considerations in the design of computing systems. It introduces the students to modern computer aided design (CAD) tools, languages, and techniques. The student is exposed to a variety of design experiences that complement their knowledge of digital circuits and microprocessors. Students will complete a series of laboratory assignments and learn how to implement large-scale, complex digital systems with commercial CAD tools. Designs will be prototyped using Field Programmable Gate Arrays (FPGA) and verified using electronic test equipment.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ECE 0202; PLAN: Electrical Engineering or Computer Engineering

**ECE 1201 - ELECTNC MEASURMNTS & CRCTS LAB**

Minimum Credits: 3  
Maximum Credits: 3  
Electronic measurements and circuits including experiments on use of electronic test equipment, a variety of linear circuits; non-linear device
characteristics, operational amplifier basics, and transistor amplifier characteristics and design. Time and frequency domain methodologies are covered.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** CREQ: ECE 0257; PROG: Undergraduate Swanson School of Engineering

**ECE 1212 - ELECTRONIC CIRCUIT DESIGN LAB**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
An electronic circuits laboratory experience with emphasis on circuit applications and design. Topics include: multi stage amplifier design; operational amplifier applications; analog-digital conversion applications, active filters.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: (ECE 1201 or ECE 0102) and ECE 0402; Plan: Electrical Engineering or Computer Engineering

**ECE 1215 - ELECTROACOUSTICS AND AUDIOELECTRONICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Topics covered include: Electroacoustics (SPL, microphones, loudspeakers) Design of audio-specific small-signal circuitry (OP amp design, JFETs, vacuum tubes, noise) Power amplifier topologies (class A, AB, D) Audio effects circuitry (distortion, delay, tremolo, wah). This is a lab-based course in which students will complete a lab assignment on a different topic every week, concluding with the design, construction, and characterization of a custom audio circuit using the DIYRE Colour module system.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ECE 0102 and ECE 0402 ; PLAN: Electrical Engineering or Computer Engineering

**ECE 1232 - INTRO LASERS & OPTCL ELECTNC**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Introduction to and applications of basic laser and optical electronic principles; optical modulation and detection systems.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ECE 0101 and (ECE 1259 or PHYS 1351); PROG: Swanson School of Engineering

**ECE 1237 - ANALOG CIRCUIT DESIGN**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The objectives of this course are: to understand the operation of essential CMOS analog circuits and learn how to design them. To design the analog circuits using a 45nm CMOS process and verify their performance by SPICE simulation using a commercial EDA tool (Cadence Spectre). Topics include: comparators; two-stage amplifiers; folded-cascade amplifiers; voltage and current references; oscillators; linear regulators; switched-capacitor circuits; digital-to-analog converters, analog-to-digital converters; SAR ADCs; delta-sigma ADCs; second order effects & noise assignment; sensor interfaces. Prerequisites: ECE 1286 or equivalent

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**ECE 1238 - DIGITAL ELECTRONICS**
Minimum Credits: 3
Maximum Credits: 3
Switching behavior of semiconductor devices; logic circuit families; DTL, TTL, Schottky, Ecl, CMOS, i2l; regenerative logic circuits; semiconductor memories; spice circuit simulation.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0201 and ECE 0102; PROG: Swanson School of Engineering

ECE 1247 - SEMICONDUCTOR DEVICE THEORY

Minimum Credits: 3
Maximum Credits: 3
Electrical properties of solids, energy levels, semiconductor theory, diodes, bipolar junction transistors, field effect transistors.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1212 and (ECE 0402 or ECE 1552); PLAN: Electrical Engineering or Computer Engineering

ECE 1250 - NANOTECHNOLOGY & NANO-ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
The course introduces nanoscale devices created from a range of nanomaterials including carbon nanotubes (CNTS), nanoparticles (NPS), and nanowires (NWS). Theories of operation, fabrication techniques and applications of Nano devices will be discussed. The course combines lecture, laboratory work, and web-supported project-based learning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0230 or 0235 or 0150 or 0221) and [PHYS 0175 or 0476 or (0210 and 0203) or (0150 and 0151)]; PROG: Swanson School of Engineering

ECE 1251 - MICRO AND NANO DEVICE FABRICATION LABORATORY

Minimum Credits: 3
Maximum Credits: 3
Micro/Nano fabrication area in science and engineering has already produced remarkable results in understanding and controlling matter and is expected to make a tremendous impact on electronics and society by facilitating breakthroughs for tomorrow's electronic devices. Micro and Nano Device Laboratory will introduce students to device fabrication and design methodology for fundamental fabrication processes. In addition, this course will provide an understanding of the scientific and technical aspects of microtechnology/nanotechnology and will enable students to contribute to this rapidly developing new technology field. This course comprises laboratory work and accompanying lectures that cover cleanroom introduction, wafer cleaning, silicon oxidation, mask design, photolithography, thin film deposition, wet and dry etching, and other nanofabrication processes. This elective course is designed for junior and senior level undergraduate students.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (CHEM 0970 or CHEM 0420) and PHYS 0175 and (ENGR 0240 or ECE 1250) or instructor approval. PROGRAM: Swanson School of Engineering

ECE 1259 - ELECTROMAGNETICS

Minimum Credits: 3
Maximum Credits: 3
Vector calculus, gradient curl, divergence theorem and stokes' theorem, coulomb's law gauss's law, Laplace equation, poisson equation, dielectrics, BIOT-Savart Law, vector potentials, ampere's law, faraday's law, inductance, magnetic materials, Lorentz force, Maxwell's equation, electromagnetic radiation.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0240 or ECE 0402; PLAN: Electrical Engineering or Computer Engineering

ECE 1266 - APPLICATIONS OF FIELDS AND WAVES

Minimum Credits: 3
Maximum Credits: 3
Plane waves, the wave equation, poingt vector, transmission lines, wave guides, antennas and radiation applications.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0402 or ECE 1552; PROG: Undergraduate Swanson School of Engineering; PLAN: Electrical Engineering Students Only

ECE 1270 - SPECIAL TOPICS: ROBOTICS STUDIO

Minimum Credits: 1
Maximum Credits: 1
An undergraduate course dealing with special topics of current interest in electronic devices, lasers, and optical electronics.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Requirements: PREQ: ECE 0402 or ECE 1552; PROG: Undergraduate Swanson School of Engineering; PLAN: Electrical Engineering Students Only

ECE 1286 - ANAL & DSGN ANLG INTGRTD CRCT

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0102; PROG: Swanson School of Engineering

ECE 1390 - INTRO TO IMAGE PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Introductory subjects in image processing include image spaces and image representation, image enhancement, edge detection, edge and region based segmentation, and feature extraction and object recognition. Spatial and frequency domain approaches will be addressed with emphasis on spatial domain approaches. Some problems are solved on the computer in the c programming language.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0102; PROG: Swanson School of Engineering

ECE 1395 - INTRODUCTION TO MACHINE LEARNING

Minimum Credits: 3
Maximum Credits: 3
Machine Learning methods are at the core of many recent advances in "intelligent computing". Current applications include machine perception (vision, speech recognition), control (process control, robotics), data mining, time-series prediction (e.g. in finance), natural language processing, text
mining and text classification, bio-informatics, neural modeling, computational models of biological processes, and many other areas. This is an introductory undergraduate course on machine learning and its applications in different areas. The course will briefly cover techniques for visualizing and analyzing multi-dimensional data along with algorithms for projection, dimensionality reduction, regression, clustering, classification and neural networks, and deep learning. A main course objective is to present various approaches to classifier design so that students can make judicious choices when confronted with real pattern recognition problems. However, it is important to emphasize that the design of a complete pattern recognition system for a specific application domain requires domain knowledge, which is beyond the scope of this course. Students will use available tools and libraries to implement some algorithms using MATLAB.

ECE 1472 - ANALOG COMMUNICATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Analysis of modern analog communication systems, including the theory underlying their design and practical implementation issues. Various forms of amplitude and angle modulation. Amplifiers, mixers, detectors, phase-lock loops, and the design of transmitters and receivers. Probability, random signals, optimal receivers, noise and performance analysis. Case studies including telephone, commercial radio, and television.

ECE 1473 - DIGITAL COMMUNICATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3

ECE 1552 - SIGNALS AND SYSTEMS ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Signal representation, continuous time systems, Fourier series, Fourier transform, laplace transform, discrete time systems, Fourier analysis of discrete time systems, z transform, the discrete Fourier transform.

ECE 1560 - DIGITAL SIGNAL PROCESSING

Minimum Credits: 3
Maximum Credits: 3
This course provides students with theoretical background and practical experience in data acquisition and digital signal processing related to computer-based measurements. The course addresses the representation, analysis, and design of discrete time signals and systems. Topics covered include implementation of discrete systems, discrete-time Fourier analysis and the FFT algorithm, analysis of discrete systems in terms of poles and zeros, and design of infinite and finite impulse response filters.
ECE 1562 - DIGITAL AND ANALOG FILTERS

Minimum Credits: 3
Maximum Credits: 3
Active filter design; operational amplifier circuits; cascade design with first-order and biquad circuits; Butterworth and Chebyshev low pass filters; sensitivity and frequency transformations. Digital filter design; IIR filter design using bilinear transformation; window design of fir filters; realization of IRR and fir filters.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1552 or ECE 0402; PROG: Swanson School of Engineering

ECE 1563 - SIGNAL PROCESSING LABORATORY

Minimum Credits: 3
Maximum Credits: 3
Data acquisition and computer based measurements. Recursive and fir filters. Frequency response and filter implementations using FFT's.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1201 and 1552; PROG: Undergraduate Swanson School of Engineering

ECE 1570 - SPECIAL TOPICS

Minimum Credits: 1
Maximum Credits: 3
An undergraduate course dealing with special topics of current interest in control, signal, and image processing, speech processing, and telecommunications.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0202 or ECE 0302; PROGRAM: Swanson School of Engineering

ECE 1673 - LINEAR CONTROL SYSTEMS

Minimum Credits: 4
Maximum Credits: 4
Introduction to feedback control systems, mathematical models, second order systems response and identification, system types, steady-state errors, root locus analysis and design, bode plots, nyquist theory and frequency domain compensation techniques. Includes a laboratory.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1552 or ECE 0402 Plan: Electrical Engineering or Computer Engineering

ECE 1674 - MECHATRONIC SYSTEMS

Minimum Credits: 4
Maximum Credits: 4
This course covers Mechatronic system design providing an understanding of each of the basic engineering disciplines and their interactions involved: controls (control laws, analytic tools and error budgets), mechanical systems (motors, bearings, ballscrews, gears etc.), electrical systems (controllers, power amplifiers, sensors, cable management), and software engineering (embedded computing & PLCs). This course will emphasize designing mechatronic systems from a control system perspective.
ECE 1675 - ROBOTIC CONTROL

Minimum Credits: 4
Maximum Credits: 4
This course focuses on the application of control theory in robotics. Topics to be covered include: review of classical and modern control design methods such as PID control, state feedback, optimal control, adaptive control, and hybrid system control; control of mobile robots; control of robot manipulators; reinforcement learning; cognitive robotics.

ECE 1701 - FUNDAMENTALS OF ELECTRIC POWER ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This is a first course in electric power engineering for electrical and computer engineers. The course provides the fundamental background to solve some common problems in electric power engineering, and to design power systems using engineering assumptions based on this background. The main objective is to cover topics in AC single phase and three phase power, transformers, transmission lines and electric machinery by integrating their knowledge of linear circuit analysis, electricity, and magnetism to these power systems topics. Students will also gain knowledge of power systems simulation using the PowerWorld simulator. This course will provide the prerequisite knowledge for the study of load flow, symmetrical components, and fault analysis which will be covered in a later course.

ECE 1710 - POWER DISTRIBUTION SYSTEMS ENGINEERING AND SMART GRIDS

Minimum Credits: 3
Maximum Credits: 3
Review of power engineering fundamentals, load characteristics and distribution transformers, design of distribution substations, design considerations of primary and secondary systems, substation grounding, voltage drop and power loss, application of capacitors to distribution systems, distribution system voltage regulation and system software, smart grid technologies, energy management.

ECE 1750 - POWER ELECTRONICS CONVERSION THEORY

Minimum Credits: 3
Maximum Credits: 3

ECE 1769 - POWER SYSTEM ANALYSIS 1
ECE 1770 - SPECIAL TOPICS: ELECTRONIC MICROPROCESSOR SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
An undergraduate course dealing with special topics of current interest in power.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0031 or COE 0031; PROG: Swanson School of Engineering

ECE 1771 - ELECTRIC MACHINERY

Minimum Credits: 3
Maximum Credits: 3
Application of magnetostatics to the design of magnetic circuits, actuators, sensors and rotating electric machines. Performance characteristics of transformers, induction machines, synchronous machines and DC machines. Includes a laboratory.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0302; PROG: Swanson School of Engineering

ECE 1773 - POWER GENERATION, OPERATION, AND CONTROL

Minimum Credits: 3
Maximum Credits: 3
Area control error (ACE), automatic generation control (AGC), characteristics of power generation units, economic dispatch of generators, unit commitment, hydrothermal coordination and storage, interchange power, limited energy supply, optimal power flow, power system security, production cost modeling, state estimation, transmission system effects, unit commitment.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1673 or 1769; PROG: Swanson School of Engineering

ECE 1774 - ADVANCED POWER SYSTEMS ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
Steady state phenomena, matrix transformations, system parameters, system unbalances, digital methods, and numerical analysis techniques applied to load flow, state estimators, and fault studies in the large power systems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 1769

ECE 1775 - POWER QUALITY
Minimum Credits: 4
Maximum Credits: 4
An introductory power systems laboratory course providing hands-on experience covering various electric power topics. The course will be conducted in the Electric Power Systems Laboratory and will include lectures, analytical and simulation assignments, and laboratory procedures. Topics include: familiarization with lab equipment and safety, power system equipment, power conversion equipment, and electric machinery.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0402

ECE 1776 - MICROGRID CONCEPTS & DISTRIBUTED GENERATION TECHNOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course describes fundamental concepts related with the development of microgrids and the integration of distributed generation. Technical topics are divided into three modules. The first module introduces microgrid components and discusses the main types of microsources. The second focuses on energy storage technologies. The third includes system integration topics, such as power electronics interfaces; dc and ac architectures; economics, operation, stabilization, and control; reliability aspects; grid interconnection, and microgrids as part of the "smart" grids. This course also aims at preparing students to conduct research or helping them improve their research skills.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ECE 0402

ECE 1885 - DEPARTMENTAL SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Seminars are designed to acquaint the student with aspects of engineering that are not normally encountered in classes and school activities and include a wide range of topics such as the significance of engineering as a profession, and ethical problems in engineering and skills required for a successful engineering career.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: H/S/U Basis
Course Requirements: PROG: Swanson School of Engineering

ECE 1890 - ECE PROTOTYPING FUNDAMENTALS

Minimum Credits: 1
Maximum Credits: 1
In this course students will learn fundamental prototyping techniques used in the design of electronic systems. This includes Printed-Circuit Board (PCB) Design, soldering, manufacturing and various other hands-on skills. The learning objective of this course is to prepare students with practical skills that are often needed in design-oriented electrical and computer engineering courses and projects.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: H/S/U Basis

ECE 1893 - ECE UNDERGRADUATE RESEARCH PROJECT

Minimum Credits: 1
Maximum Credits: 3
Undergraduate research experience involves students in an original research project. Using one or a variety of methods, students will collect original data and contribute to problem solving in ECE. As a first research experience, emphasis will be placed on the process of scientific research, including formulation of a research plan, data collection, assessment of data quality, and interpretation based on available data. Students are required to present their results to an audience outside of the department.

Academic Career: Undergraduate
ECE 1894 - ECE UNDERGRADUATE INDUSTRY PROJECT

Minimum Credits: 1
Maximum Credits: 3
In this course, students work in a team to solve real world engineering problems via an industry sponsored design project. Students will be provided design requirements and be charged with the development and testing of a functional prototype. In addition to technical skills, students will also learn various professional skills, such as the importance of professionalism and good communication, by way of regular interaction and meetings with industry mentors.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

ECE 1895 - JUNIOR DESIGN FUNDAMENTALS

Minimum Credits: 3
Maximum Credits: 3
This course teaches students the engineering design process. Emphasis is placed on the development of fundamental hands-on-skills commonly used in the design of modern electrical and computer engineering technologies. Students participate in a series of mock design experiences, culminating in the participation of an actual design project. After completion of this course, students will be able to design a system that meets specifications and satisfies a stakeholder's needs and requirements. Students will also learn how to create functional design prototypes and verify them.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQS: ECE 0102, and ECE 0202, and ECE 0302, and ECE 0402; PLAN: Electrical Engineering or Computer Engineering

ECE 1896 - SENIOR DESIGN PROJECT

Minimum Credits: 3
Maximum Credits: 3
This is a rigorous, capstone design course where students apply the analytical and synthesis skills they have developed during undergraduate coursework to the design of a working prototype. Students work in teams to identify and analyze a real problem, design a hardware/software solution, and construct, test and then evaluate the effectiveness of the prototype. The primary goal of this course is to provide students with a culminating, major design experience that incorporates engineering standards and realistic constraints, preparing them for professional engineering practice.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade
Course Requirements: PREQ: [(ECE 0031 or COE 0031) and (ECE 0257 or COE 0401 or CS 0401)] or ECE 1895; LEVEL: Senior; PLAN: Electrical Engineering or Computer Engineering
Course Attributes: Capstone Course

ECE 1898 - ENGINEERING PROJECT

Minimum Credits: 1
Maximum Credits: 6
An investigation of an approved engineering subject under the supervision of a faculty monitor. Must be approved in advance by the faculty monitor and the department chair.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis

ECE 2295 - SPECIAL TOPICS: ELECTRONICS
Minimum Credits: 3
Maximum Credits: 3
An MS level course in special topics of current interest in electronics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Engineering students only.

ECE 2521 - ANALYSIS STOCHASTIC PROCESSES

Minimum Credits: 3
Maximum Credits: 3
Probability theory, random variables, sums and limits of random variable sequences, time and frequency domain, modeling of continuous and
discrete random signals, lease square estimation.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Letter GRD
Course Requirements: School of Engineering students only.

ECE 2523 - DIGITAL SIGNAL PROCESSING

Minimum Credits: 3
Maximum Credits: 3
Discrete time-signal processing, discrete fourier transform and fft implementation, design and stability considerations of fir and iir filters, filter
implementation and finite register effects.
Academic Career: GRAD
Course Component: Lecture
Grade Component: GradLG/SU3
Course Requirements: School of Engineering students only.

Emergency Medicine

EM 1102 - EMERGENCY MEDICINE TECHNICIAN

Minimum Credits: 4
Maximum Credits: 4
This course provides learners with the cognitive knowledge and values to develop as an emergency medical professional at the basic life-support
level. This course meets all minimum training requirements as established by the U.S. Department of Transportation in the EMT, National
Education Standards. This course provides the learner with the opportunity to develop basic life-support psychomotor skills. Successful completion
of this course makes the learner eligible to become certified by the National Registry of EMT's and the Pennsylvania Department of Health.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs

EM 1104 - EMT CLINICAL

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Clinical
EM 1111 - FOUNDATIONS OF EMERGENCY CARE

Minimum Credits: 3
Maximum Credits: 3
This course focuses on pre-hospital assessment and therapeutic intervention of adult and pediatric patients with acute traumatic injury and includes advanced airway assessment and procedural intervention for patients with acute respiratory pathophysiology. Students will explore emergency medical services systems and appreciate their role and responsibility as pre-hospital practitioners. Learning strategies include scenario-based case presentations with a focus on critical thinking and decision making. This course is paired with a required lab component.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1112 - PATHOPHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Introductory course in pathophysiology for entry-level health care providers. This course focuses on human responses to illness expressed at the physiologic, pathophysiologic, experiential, and behavioral levels. Human responses are examined in terms of assessments appropriate to selected problems, rationale for medical interventions, and therapeutic effectiveness. Topics include: general principles of pathophysiology.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1113 - PHARMACOLOGY

Minimum Credits: 3
Maximum Credits: 3
Introduces students to the categories of pharmacological agents and the application of pharmacological concepts to clinical practice. Emphasis will be placed on understanding physiologic medication action. A separate medication lab is offered.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1114 - MEDICATION ADMINISTRATION

Minimum Credits: 1
Maximum Credits: 1
Practical skills lab designed to allow students to develop the psychomotor skills of medication administration. Skills include: phlebotomy, intramuscular and subcutaneous injections, IV cannulation, IV medication administration, inhalation, endotracheal and sublingual administration, and pharmacology math. This course also provides students with the practical skills needed for Advanced Cardiac Life Support (ACLS) care.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1115 - INTRODUCTION TO PHYSICAL ASSESSMENT

Minimum Credits: 3
Maximum Credits: 3
Designed to introduce students to the principles and techniques of physical examination. Students will be taught an organized systemic approach to
assessment.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS)

**EM 1116 - PHYSICAL EXAM LAB**

Minimum Credits: 1  
Maximum Credits: 1  
Practical skills lab designed to assist in the development of psychomotor skills of patient assessment, airway management, ventilation, and trauma care skills.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS)

**EM 1117 - EMS OPERATIONS**

Minimum Credits: 3  
Maximum Credits: 3  
Designed to expose the paramedic student to various field operations procedures. Topics include: medical incident command, rescue awareness and operations, hazardous materials awareness and operations, and crime scene awareness.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1122 - CARDIOLOGY AND RESPIRATORY**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers the specific pathophysiology, assessment, and management of the cardiac patient. Topics include: 3-lead and 12-lead ECG interpretation, cardiac anatomy and physiology, patient assessment and management, ACLS, pharmacological, and other therapies. This class is offered with a required lab course.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS)

**EM 1123 - CARDIOLOGY LAB**

Minimum Credits: 1  
Maximum Credits: 1  
This lab section, in conjunction with the Assessment-Based Management Lab, provides case-based learning for the students related to general adult emergencies. Students will participate in case-based sessions that allow them to work on a simulated patient that is suffering from a specific illness or injury and allows the students to develop strong patient, resource, and scene management skills that they can take with them into their field practice. This lab helps to promote strong clinical decision-making skills that will allow the students to function as a strong clinical provider in the field.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS or BPH or BS-H)

**EM 1124 - ADULT MEDICAL EMERGENCIES**
Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on pre-hospital assessment and therapeutic intervention of acute and chronic adult pathophysiology. Students will explore the different processes of patient care for special populations across the life span. Learning strategies include scenario-based case presentations with a focus on critical thinking and decision making. This course is paired with a required lab component.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1125 - OB/GYN, NEWBORN, AND PEDIATRIC CARE**

Minimum Credits: 3  
Maximum Credits: 3  
This course covers the specific pathophysiology, assessment, and management of common medical and trauma conditions in pediatric patients. Additional information regarding obstetrics, neonates, and gynecologic patients will be presented.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1126 - ASSESSMENT-BASED MANAGEMENT**

Minimum Credits: 1  
Maximum Credits: 1  
This lab section, in conjunction with the Cardiology Lab, provides case-based learning for students related to general adult emergencies. Students will participate in case-based sessions that allow them to work on a simulated patient that is suffering from a specific illness or injury and allows the students to develop strong patient, resource, and scene management skills that they can take with them into their field practice. This lab helps to promote strong clinical decision-making skills that will allow the students to function as a strong clinical provider in the field.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: Letter Grade  
Course Requirements: PLAN: Emergency Medicine (BS or BPH or BS-H)

**EM 1131 - CLINICAL 1**

Minimum Credits: 4  
Maximum Credits: 4  
Designed to accompany the fall semester courses, these clinical rotations focus on the development and documentation of history taking and assessment skills. Additionally, psychomotor skill development in a clinical setting is emphasized.  
Academic Career: Undergraduate  
Course Component: Clinical  
Grade Component: Letter Grade  
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1132 - CLINICAL 2**

Minimum Credits: 4  
Maximum Credits: 4  
Designed to accompany the spring semester courses, these clinical rotations focus on the integration of psychomotor skills with assessment and history taking. In addition to scheduled rotations students will spend the last weeks completing a summative field evaluation. This evaluation consists of 80 field hours with the student functioning as a primary care provider.  
Academic Career: Undergraduate  
Course Component: Clinical  
Grade Component: Letter Grade  
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)
EM 1135 - CRITICAL CARE CLINICAL EXPERIENCE I

Minimum Credits: 1
Maximum Credits: 1
The sequential critical care courses offered within the EM Program provides a solid foundation for understanding the principles of critical care. Students with only out of hospital clinical practice have little foundation to understand the in hospital critical care environment. The addition of diagnostic testing and hemodynamic monitoring provides for a more tailored and timely response to the patient's clinical needs. Students can gain an appreciation for these interactions while in an observational role through case study and with the support of a critical care preceptor.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
Course Attributes: Undergraduate Internship

EM 1152 - ISSUES IN HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
This course is designed to engage students in current aspects of health care impacting patients and health care practitioners. Topics are extremely diverse in assuring all possible domains of health care are addressed. Various methods of presentation are utilized in this course. Health care delivery at national and international models is explored.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1153 - ISSUES IN HEALTH CARE EDUCATION

Minimum Credits: 2
Maximum Credits: 2
Survey course designed to teach the principles of adult education, classroom management skills, selection of teaching aides, and development of lesson plans. Students will function as teaching assistants in EMS education programs.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1154 - HEALTH CARE RESEARCH

Minimum Credits: 2
Maximum Credits: 2
This course provides an overview of basic concepts of research, including statistics, measurement, and design. This course emphasizes the ability of the student to read and evaluate research papers.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1155 - LEGAL ISSUES IN HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
This course is meant to provide students with a survey of some of the major legal issues facing emergency medical services providers and administrators, and those who aspire to those positions. This course will focus on the practical issues confronting EMS organizations. Major areas to be addressed include the law of negligence and medical malpractice; consent and refusal of emergency care; "do not resuscitate" issues; the legal aspects of documentation; confidentiality and HIPAA; EMTALA and ER diversions; fraud and abuse; personnel management; OSHA; legal issues
for non-profit EMS organizations; and the basics of EMS reimbursement.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS)

**EM 1158 - FINANCE AND ACCOUNTING FOR HEALTH CARE**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
Finance and Accounting provides an introduction to the basic concepts of accounting and financial management in health care. The course is geared for professionals who do not anticipate serving primarily in a financial management role. The concepts will be studied in the context of their practical application.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS, BS-H, BPH)

**EM 1160 - PROFESSIONAL ISSUES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will provide the student with the tools necessary to promote the long-term viability of an EMS service. This course has been designed to prepare the student to be a leader of traditional or entrepreneurial EMS opportunities. Guest speakers will be utilized for their expertise in the administration of EMS agencies.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1166 - SENIOR INTERNSHIP**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
The senior internship is designed to allow students to gain valuable experience in an educational, clinical, or administrative aspect of health care. Students are asked to find internships in their specific area of health care interest. The internship can take place domestically or internationally.

**Academic Career:** Undergraduate  
**Course Component:** Internship  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1168 - LEADERSHIP IN HEALTH CARE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Through reading, review, and discussion of germane reference materials, this class will explore the components of leadership for industry, organizations, and individuals as applicable to U.S. health care in general, and more specifically, to emergency medical services as part of the health care system.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: Emergency Medicine (BS, BPH, BS-H)

**EM 1169 - CRITICAL CARE MANAGEMENT**
Minimum Credits: 4
Maximum Credits: 4
This course focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows the ASTNA core curriculum outline, the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines, and is approved for continuing education by the IBSC. Topics highlighted include intra-aortic balloon pump management, hemodynamic monitoring and pharmacology, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lectures with integrated, scenario-based case presentations and a focus on critical thinking and decision making.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1170 - CRITICAL CARE MEDICINE 1

Minimum Credits: 3
Maximum Credits: 3
This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include body systems assessment, analysis of laboratory diagnostics, hemodynamic monitoring and pharmacology, and chemically facilitated management of the crash airway. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1171 - CRITICAL CARE MEDICINE 2

Minimum Credits: 3
Maximum Credits: 3
This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include intra-aortic balloon pump management, advanced shock management, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making. EM 1170 is a prerequisite course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS)

EM 1172 - ISSUES IN HEALTH CARE - WEB

Minimum Credits: 2
Maximum Credits: 2
This course is designed to engage students in current aspects of health care impacting patients and health care practitioners. Topics are extremely diverse in assuring all possible domains of health care are addressed. Various methods of presentation are utilized in this course. Health care delivery at national and international models is explored.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1173 - ISSUES IN HEALTH CARE EDUCATION - WEB
Minimum Credits: 2
Maximum Credits: 2
Survey course designed to teach the principles of adult education, classroom management skills, selection of teaching aides, and development of lesson plans. Students will function as teaching assistants in EMS education programs.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1174 - HEALTH CARE RESEARCH - WEB

Minimum Credits: 2
Maximum Credits: 2
This course provides an overview of basic concepts of research, including statistics, measurement, and design. This course emphasizes the ability of the student to read and evaluate research papers.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1175 - LEGAL ISSUES IN HEALTH CARE - WEB

Minimum Credits: 2
Maximum Credits: 2
This course is meant to provide students with a survey of some of the major legal issues facing emergency medical services providers and administrators, and those who aspire to those positions. This course will focus on the practical issues confronting EMS organizations. Major areas to be addressed include the law of negligence and medical malpractice; consent and refusal of emergency care; "do not resuscitate" issues; the legal aspects of documentation; confidentiality and HIPAA; EMTALA and ER diversions; fraud and abuse; personnel management; OSHA; legal issues for non-profit EMS organizations; and the basics of EMS reimbursement.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1176 - SENIOR INTERNSHIP - WEB

Minimum Credits: 1
Maximum Credits: 1
The Senior Internship is designed to allow students to gain valuable experience in an educational, clinical, or administrative aspect of health care. Students are asked to find internships in their specific area of health care interest. The internship can take place domestically or internationally.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
Course Attributes: Undergraduate Internship

EM 1177 - SENIOR SEMINAR

Minimum Credits: 1
Maximum Credits: 1
Senior Seminar requires students to create a scholarly paper and presentation. Students are permitted to utilize the information gained during their internship if they desire. Students can also develop new materials based upon an approved topic in any health care area of interest to them.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)
EM 1178 - LEADERSHIP IN HEALTH CARE-WEB

Minimum Credits: 3
Maximum Credits: 3
Through reading, review, and discussion of germane reference materials, this class will explore the components of leadership for industry, organizations, and individuals as applicable to US health care in general, and more specifically, to Emergency Medical Services as part of the health care system.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1179 - HEALTH CARE MANAGEMENT - WEB

Minimum Credits: 2
Maximum Credits: 2
The purpose of the course is to provide an introduction to the basic concepts of managing in organizations with a particular focus on health care organizations. The concepts will be studied in the context of their practical application.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1180 - HEALTH CARE MANAGEMENT

Minimum Credits: 2
Maximum Credits: 2
The purpose of the course is to provide an introduction to the basic concepts of managing in organizations with a particular focus on health care organizations. The concepts will be studied in the context of their practical application.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Emergency Medicine (BS, BPH, BS-H)

EM 1181 - PROFESSIONAL ISSUES - WEB

Minimum Credits: 3
Maximum Credits: 3
This course will provide the student with the tools necessary to promote the long-term viability of an EMS service. This course has been designed to prepare the student to be a leader of traditional or entrepreneurial EMS opportunities. Guest speakers will be utilized for their expertise in the administration of EMS agencies.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1182 - CRITICAL CARE MANAGEMENT - WEB

Minimum Credits: 4
Maximum Credits: 4
This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include intra-aortic balloon pump management, hemodynamic monitoring and pharmacology, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lecture with case presentations and a focus on critical thinking and decision making.
Academic Career: Undergraduate
EM 1183 - FINANCE AND ACCOUNTING FOR HEALTH CARE - WEB

Minimum Credits: 2
Maximum Credits: 2
Finance and Accounting provides an introduction to the basic concepts of accounting and financial management in health care. The course is geared for professionals who do not anticipate serving primarily in a financial management role. The concepts will be studied in the context of their practical application.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1184 - SENIOR SEMINAR - WEB

Minimum Credits: 1
Maximum Credits: 1
Senior Seminar requires students to create a scholarly paper and presentation. Students are permitted to utilize the information gained during their internship if they desire. Students can also develop new materials based upon an approved topic in any health care area of interest to them.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
Course Attributes: Undergraduate Internship

EM 1185 - BEYOND THE BODY - WEB

Minimum Credits: 3
Maximum Credits: 3
This course was designed to introduce clinicians and health administrators to variables that influence health beyond behaviors, genes, and germs. This course will introduce the "social ecology" model that addresses the broader social, environmental, and policy factors (known as "health determinants") that influence our health.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1186 - CERTIFIED AMBULANCE CODER - WEB

Minimum Credits: 1
Maximum Credits: 1
This course is designed to provide the student with a comprehensive understanding of the complex rules and requirements related to effective and compliant ambulance billing. The course focuses on a baseline of critical knowledge and commitment to excellence necessary to be a well-informed, conscientious, and compliant ambulance billing professional.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1187 - ORGANIZATIONAL THEORY - WEB

Minimum Credits: 3
Maximum Credits: 3
Through didactic and practical sessions, students will have the opportunity to discover organizational theory and to evaluate an EMS agency. Through this course students will learn about the 11 components of an EMS system and how to use them to evaluate an EMS system.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**EM 1190 - CRITICAL CARE MEDICINE 1 - WEB**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course, deployed in a web-based format, provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and elements of the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include body systems assessment, analysis of laboratory diagnostics, hemodynamic monitoring and pharmacology, and chemically facilitated management of the crash airway. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**EM 1191 - CRITICAL CARE MEDICINE 2 - WEB**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course provides a foundational review and focuses on advanced assessment and therapeutic intervention common in the critical care setting for both adult and pediatric patients. Emphasis is placed on continuum of critical care interventions during inter-facility transport. The course follows elements of the ASTNA core curriculum outline and the PA DoH Pennsylvania Air Ambulance Transport Educational Program guidelines. Topics highlighted include intra-aortic balloon pump management, advanced shock management, and initiation and maintenance of the mechanically ventilated patient. Learning strategies include lectures with case presentations and a focus on critical thinking and decision making. EM 1190 is a prerequisite course.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.  
**Course Attributes:** Online

**EM 1199 - INDEPENDENT STUDY**

- **Minimum Credits:** 1  
- **Maximum Credits:** 6  
Provides students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**EM 1250 - INTRODUCTION TO COMMUNITY HEALTH**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  
The role of paramedics in the health care system is evolving in many parts of the country to include helping patients avoid unnecessary 911 calls and hospitalizations. This introductory course will prepare the paramedic to function as a community paramedic. This course will describe the difference between traditional EMS and community paramedic assessments; introduce therapeutic communication techniques; describe mental and behavioral
health issues and their effect on chronic disease management; review professional boundaries and provider wellness techniques; and review potential patient populations that could be helped through these new services.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1251 - MOBILE INTEGRATED HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
Part two of the community paramedic introductory course will introduce therapeutic communication techniques that are essential for chronic disease management and the coordination of services needed to avoid the unnecessary utilization of EMS and hospital services. This course will discuss the business models used across the country for community paramedicine programs and the documentation methods used, as well as, how to design a program, and how to effectively become a patient advocate to help navigate the patient through the changing health care system.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: EM 1250; MIN GRADE: C or better

EM 1260 - COGNITIVE PSYCHOLOGY OF DECISION MAKING

Minimum Credits: 2
Maximum Credits: 2
Health care providers make dozens of clinical decisions every day. Errors in cognitive processes have been determined to be one of the most common causes of preventable death and disability in this country. The goal of this class is to examine the current science of decision making and the barriers to optimal decision making. Students will learn to recognize System I and System II thinking and the benefits and limitations of each. Unconscious cognitive biases and heuristics that are commonly relied upon in everyday thinking, as well as professional decisions, will be analyzed. The class will be taught in seminar fashion with active learning and discussion.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

EM 1271 - MOBILE INTEGRATED HEALTH CARE - WEB

Minimum Credits: 2
Maximum Credits: 2
Part two of the community paramedic introductory course will introduce therapeutic communication techniques that are essential for chronic disease management and the coordination of services needed to avoid the unnecessary utilization of EMS and hospital services. This course will discuss the business models used across the country for community paramedicine programs and the documentation methods used, as well as, how to design a program, and how to effectively become a patient advocate to help navigate the patient through the changing health care system.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

Engineering

ENGR 0005 - INTRODUCTION TO TECHNOLOGY IN INTERNATIONAL CONTEXT

Minimum Credits: 3
Maximum Credits: 3
Often engineering and science are considered to be culturally independent. This, however turns out not to be the case. This course examines the constructs of science and engineering education, the practice of engineering, and industry and their underlying cultural bases. When offered off-campus in a foreign country, this course will also include site visits and field work.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PROG: Swanson School of Engineering

ENGR 0011 - INTRO TO ENGINEERING ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to Excel and an introduction to design and entrepreneurship. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to solve problems and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: CREQ: ENGR 0081 or ENGR 0181; PROG: School of Engineering

ENGR 0012 - INTRO TO ENGINEERING COMPUTING

Minimum Credits: 3
Maximum Credits: 3
In this course, we will learn basic programming skills using MATLAB and C. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to develop programs, solve problems, and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0011; CREQ: MATH 0220 or 0230 or 0240 or 0280 or 0290; and ENGCMP 0412. PROG: School of Engineering

ENGR 0015 - INTRODUCTION TO ENGINEERING ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course will provide an introduction to Excel and an introduction to design and entrepreneurship. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to solve problems and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: CREQ: (MATH 0220 or 0235) and (PHYS 0174 or 0475)

ENGR 0016 - INTRODUCTION TO ENGINEERING COMPUTING

Minimum Credits: 3
Maximum Credits: 3
In this course, we will learn basic programming skills using MATLAB and C. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to develop programs, solve problems, and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ENGR 0011 or 0015) and (MATH 0220 or 0235) and (PHYS 0174 or 0475) and PREQ or CREQ: (ENGCMP 0200 or 0203 or 0205 or 0207 or 0212 or 0250 or 0004 0006 0020) or (FP 0003 or 0006) or ENG 0102; CUM GPA 2.0 or greater

ENGR 0020 - PROBABILITY AND STATISTICS FOR ENGINEERS 1
Minimum Credits: 4
Maximum Credits: 4
An introductory course in statistics. Topics covered include: data analysis, probability, random variables, selected discrete and continuous probability distributions, one sample and two sample estimation, hypothesis testing, experiments with two factors and introduction to regression analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0150 or 0230 or 0231 or 0235; PROG: Swanson School of Engineering
Course Attributes: SCI Quantitative: Statistics GE. Req.

ENGR 0022 - MATERIALS STRUCTURE AND PROPERTIES

Minimum Credits: 3
Maximum Credits: 3
An introduction to the basic concepts of materials science and engineering. The concepts of atomic, crystal, micro- and macro-structure, their control and effects on chemical, electrical, magnetic, optical, and mechanical properties. Modification of properties by heat treatment and control of processing. Fundamental considerations in materials selection.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475); PROG: School of Engineering

ENGR 0023 - PLUS 3 COSTA RICA

Minimum Credits: 3
Maximum Credits: 3
The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Latin American Studies, Pitt Class

ENGR 0024 - INTERNATIONAL FIELD PROJECT - CHINA

Minimum Credits: 3
Maximum Credits: 3
The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Pitt Class

ENGR 0025 - INT'L FIELD PROJ-CZECH REPUBLIC

Minimum Credits: 3
Maximum Credits: 3
The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Russian & East European Studies

ENGR 0026 - INTERNATIONAL FIELD PROJECT - GERMANY
ENGR 0027 - INTERNATIONAL FIELD PROJECT- FRANCE

Minimum Credits: 3
Maximum Credits: 3
The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Pitt Class

ENGR 0028 - ENGR+2: INT'L FIELD PROJ - CHILE

Minimum Credits: 2
Maximum Credits: 2
Engr+2 is an optional two-credit study abroad opportunity offered. In 2003 the course will involve a field study trip to Santiago Chile. The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Latin American Studies

ENGR 0029 - INT'L FIELD PROJECT - CHILE

Minimum Credits: 1
Maximum Credits: 1
This one-credit project is for students who participated in the Chile summer program. Students will work in small groups to design, coordinate and create web pages. The project entails video processing and editing, source searching on the internet, and interviewing university experts on Chile. A short paper connecting the interviews and the special trading status that the US gave to Chile recently will also be required.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Attributes: Latin American Studies

ENGR 0031 - PLUS 3 ITALY

Minimum Credits: 3
Maximum Credits: 3
The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering
Course Attributes: Latin American Studies, Pitt Class
ENGR 0033 - PLUS 3 VIETNAM

Minimum Credits: 3
Maximum Credits: 3
Plus 3 Vietnam
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Pitt Class

ENGR 0034 - ENGINEERING PERSPECTIVES OF THE RENAISSANCE AND SUSTAINABILITY: FLORENCE & VENICE

Minimum Credits: 3
Maximum Credits: 3
Engineering Perspectives of the Renaissance and Sustainability: Florence & Venice
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Pitt Class

ENGR 0035 - PLUS 3 KOREA

Minimum Credits: 3
Maximum Credits: 3
The course involves lectures, company visits and sightseeing, and culminates in a research paper and presentation that focuses on a global industry and its value chain.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Letter Grade

ENGR 0036 - PLUS3: NETHERLANDS

Minimum Credits: 3
Maximum Credits: 3
Plus3 Netherlands first year course
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 0037 - PLUS3: JAPAN

Minimum Credits: 3
Maximum Credits: 3
Plus3 Japan first year course
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 0081 - FRESHMAN ENGINEERING SEMINAR 1

Minimum Credits: 0
Maximum Credits: 0
An in-depth orientation in the various areas of engineering and the related fields of employment. Includes small group meetings with departmental representatives and special freshman academic advisors. A formal departmental choice is made at the conclusion of these courses.
ENGR 0082 - FRESHMAN ENGINEERING SEMINAR 2

Minimum Credits: 0
Maximum Credits: 0
An in-depth orientation in the various areas of engineering and the related fields of employment. Includes small group meetings with departmental representatives and special freshman academic advisors. A formal departmental choice is made at the conclusion of these courses.

ENGR 0087 - TRANSFER SEMINAR

Minimum Credits: 0
Maximum Credits: 0
A 9 week seminar course for first semester regional and external engineering transfer students. The course discusses the transition to the Swanson School of Engineering and resources available to students at the University of Pittsburgh.

ENGR 0088 - LEARNING AND COUNSELING

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: H/S/U Basis
Course Requirements: PROG: Swanson School of Engineering

ENGR 0089 - COUNSELING

Minimum Credits: 0
Maximum Credits: 0
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: H/S/U Basis
Course Requirements: PROG: Swanson School of Engineering

ENGR 0090 - SWANSON SUCCESS PROGRAM: A FRAMEWORK FOR ACADEMIC SUCCESS

Minimum Credits: 0
Maximum Credits: 0
The Swanson success class provides students with a series of academically-focused workshops critical to success within the Swanson School of Engineering and at the University of Pittsburgh. In this course, students will explore a variety of personal development topics including goal-setting, time prioritizing, motivation, and learning strategies. Students who invest the time and energy into this course, which is just one component of the student retention program, can expect to enhance their academic and personal efficiency as well as their performance in the classroom.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: H/S/U Basis
ENGR 0131 - STATICS FOR CIVIL AND ENVIRONMENTAL ENGINEERS

Minimum Credits: 3
Maximum Credits: 3

A basic course in statics. Utilizing the free-body diagram, the course covers forces and equilibria of particles, rigid bodies, surfaces, trusses, beams, cables, and other basic structural elements. Use is made of computers for problem solving.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PHYS 0104 or 0150 or 0174 or 0201; PROG: Swanson School of Engineering

ENGR 0135 - STATICS & MECHC OF MATERIALS 1

Minimum Credits: 3
Maximum Credits: 3

First of a two course sequence covering statics and strength of materials. Topics covered include: concurrent force systems, equilibrium, axial loading, stress, strain, deformation, moments, equivalent systems, centroids, centers of mass, and distributed loads, free-body diagrams, equilibrium of rigid and deformable bodies, plane trusses, frames and machines, equilibrium in 3D, torsion and friction. Use is made of computers for problem solving.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0150 or 0230 or 0231 or 0235) and (PHYS 0150 or 0174 or 0201 or 0475); PROG: School of Engineering

ENGR 0141 - MECHANICS OF MATERIALS CIVIL AND ENVIRONMENTAL ENGINEERS

Minimum Credits: 3
Maximum Credits: 3

An introductory course in the mechanics of deformable bodies, with special application to the range of topics needed by civil engineers. The course material covers internal strains, stresses and deformations which occur when a structure is subjected to applied loads. Problems with tie-in to practical design issues will be covered.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0131 or 0135 or ET 0051; PROG: Swanson School of Engineering

ENGR 0145 - STATICS & MECHC OF MATERIALS 2

Minimum Credits: 3
Maximum Credits: 3

Second of a two course sequence covering statics and strength of materials. Topics include: flexure; second moment of areas, shear force and bending moment diagrams, composite beams, shearing stresses, beam deflections, energy methods, Castigliano's methods, moment area method, combined static loading and columns.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ENGR 0135 or ET 0051); PROG: School of Engineering

ENGR 0151 - DYNAMICS CIVIL & ENVRN ENGNRS

Minimum Credits: 3
Maximum Credits: 3

A basic course in dynamics. Utilizing the Newtonian mechanics of particles, the course covers kinematics and kinematics of particles, kinetics of systems of particles, work and energy, introduction to vibration, single-degree-freedom systems, and two-degrees-of-freedom systems. Applications of dynamics in civil engineering problems. Use is made of computer solution to a two-story building vibration.

Academic Career: Undergraduate
ENGR 0240 - NANOTECHNOLOGY AND NANO-ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This research-oriented course is a multidisciplinary course taught by a faculty team including a professor of electrical engineering and a professor of chemistry. The course introduces nanoscale devices created from a range of nanomaterials including carbon nanotubes (CNTS), nanoparticles (NPS), and nanowires (NWS). Theories of operation, fabrication techniques and applications of Nano devices will be discussed. The course combines lecture, laboratory work, and web-supported project-based learning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (ENGR 0141 or 0145 or ET 0053) and (MATH 0250 or 0290 or 1035 or 0202); PROG: Swanson School of Engineering

ENGR 0241 - FABRICATION AND DESIGN IN NANOTECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
This overview course examines approaches to top-down and bottom-up nanofabrication and device manufacture; engineering design with nanomaterials, components, and systems; case studies of cutting-edge nanotechnologies (e.g., The 'ipod' microdrive, nanoparticle drug delivery, etc.), Commercialization, intellectual property, and venture capital; seminar series.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (MATH 0230 or 0235 or 0150 or 0221) and [PHYS 0175 or 0476 or (0201 and 0203) or ( 0150 and 0151)]; PROG: Swanson School of Engineering

ENGR 0501 - MUSIC ENGINEERING LABORATORY

Minimum Credits: 1
Maximum Credits: 1
A course directed toward development of basic skills in recording engineering through expanded understanding of the science and engineering of music. The course will use the music engineering laboratory (MEL) located in Benedum hall. The MEL is a state of the art sound recording facility with research and educational capabilities for sound recording and music engineering. Students are expected to have prior musical experience, working knowledge of Fourier transforms, and working knowledge of basic electronics. Topics covered: recording engineering (microphones, amplifiers, and mixing, filtering, special effects). Physics, mathematics, and psychophysics of sound and music (acoustics, speech and singing, hearing, pitch, stereo perception). Musical instrument function (mechanical and electronic)

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 0711 - HONORS ENGINEERING ANALYSIS AND ENGINEERING COMPUTING

Minimum Credits: 3
Maximum Credits: 3
In this course, we will learn basic programming skills using MATLAB and C. In addition, we will address teamwork and professional integrity, both important aspects of engineering. This is a team-based, hands-on course, in which most of our class time will be spent working in teams to develop programs, solve problems, and participate in discussions, using what we learn in the course.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: MATH 0220; COREQ: (MATH 0230 or 0235 or 0240 or 0290) and ENGR 0081; PROG: Swanson School of Engineering; Minimum GPA 3.25
Course Attributes: University Honors Course

ENGR 0712 - ADVANCED ENGINEERING APPLICATIONS FOR FRESHMAN

Minimum Credits: 3
Maximum Credits: 3
This is an honors course and a continuation of ENGR 0711. Students will be introduced to engineering research and various special topics.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0711; PROG: Undergraduate Swanson School of Engineering

ENGR 0715 - ENGINEERING APPLICATIONS FOR SOCIETY

Minimum Credits: 3
Maximum Credits: 3
This service learning course will initially focus on applications in medicine and rehabilitation treatment. Students will work in teams as they address a critical clinical problem, examining issues from both the patient and physician perspectives. Future years will introduce environmental and sustainability problems.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0711; PROG: Undergraduate Swanson School of Engineering

ENGR 0716 - ART OF HANDS-ON SYSTEM DESIGN AND ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Engineering is fundamentally a creative process in which ideas are generated and transformed into new systems and devices in the world to meet human needs. The term engineer shares its origins with ingenious: one definition of engineer is 'a skillful inventor.' In this course, we will explore tools and techniques for inventing, designing and prototyping systems. Through discussion, small-team activities, workshops and hands-on projects, students will obtain an introduction to design thinking, 'maker culture' and systems engineering. We will explore user-centric design principles; sketch modeling; basic building elements for systems such as sensors, computer controllers, actuators and displays; materials and methods for prototyping; and ways to analyze and troubleshoot systems. Students will gain an introduction to 'smart systems': automated systems that can sense the world and automatically respond in useful ways. We will also focus on the user interface: how to create control and display interfaces that enhance users' ability to operate systems effectively and efficiently.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENGR 0711; CREQ: ENGR 0082; PLAN: Undeclared

ENGR 1000 - LAB EXPERIENCES

Minimum Credits: 0
Maximum Credits: 0
Provide opportunities to students to volunteer in a research lab to determine if undergraduate research is an area that the student would like to further engage in for course credits, for payment from a PI, or for summer research experience.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Requirements: LEVEL: Undergraduate; PROG: Swanson School of Engineering

ENGR 1010 - COMMUNICTN SKILLS FOR ENGINEERS
Minimum Credits: 3
Maximum Credits: 3
Utilizing a variety of spoken, written, and audio-video activities, the students learn how to give instructions, use feedback, listen, conduct the job and appraisal interview. Run meetings, use groups, make presentations, manage crises...Most of the skills they need to strengthen their personal, interpersonal, group and organizational communicative skills. The instructing-learning process emphasizes motivation, concentration, participation, organization, comprehension, repetition, articulateness, and confidence.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering
Course Attributes: Global Studies

ENGR 1011 - MODERN MACHINING PROCESSES

Minimum Credits: 2
Maximum Credits: 2
This course is designed to introduce the student to modern machining processes and engineering materials through theory and active learning.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1012 - MODERN MACHINING PROCESSES BASIC LAB

Minimum Credits: 1
Maximum Credits: 1
This introduction lab is designed to introduce the student to machining processes through theory, active learning and hands-on training on industry grade machine tools.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

ENGR 1013 - MODERN MACHINING PROCESSES ADVANCED LAB

Minimum Credits: 3
Maximum Credits: 3
This advanced lab is designed to train students in modern machining processes through theory, active learning and hands-on training on industry grade machine tools.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade

ENGR 1014 - CNC THEORY AND OPERATION

Minimum Credits: 2
Maximum Credits: 2
This course is designed to introduce the student to the theory, programming and operation of computer controlled manufacturing machines. Course will cover topics using active learning and hands-on training projects.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1015 - CNC THEORY AND OPERATION - BASIC LAB

Minimum Credits: 1
Maximum Credits: 1
This introduction lab is designed to introduce the student to the programming and operation of computer controlled manufacturing machines with
industry grade machine tools.

**ENGR 1016 - CNC THEORY AND OPERATION - ADVANCED LAB**

Minimum Credits: 3  
Maximum Credits: 3  
This advanced lab is designed to train students in extensive programming and operation of computer controlled manufacturing machines with industry grade machine tools.

**ENGR 1017 - MANUFACTURING FOR THE FUTURE: FLEXIBLE, GREEN, AND DIGITAL**

Minimum Credits: 3  
Maximum Credits: 3  
What is flexible device manufacturing? What is green manufacturing? What is cybermanufacturing? Importantly, how do these emerging "types" of manufacturing differ from traditional manufacturing? It is important to recognize that global manufacturing is undergoing major transformations nowadays. The confluence of new advanced materials, emerging fabrication technologies, and connected cyber-physical systems is creating paradigm shifts for the ways products are conceived, made, distributed, used, and disposed. In the ever-increasing competition of "making things" of value to consumers, many industries are now reinventing themselves to cope with this new reality. This class covers the fundamentals behind major global trends, and their implication for the future of manufacturing from an engineering perspective. Topics covered include the following: (1) How the need for flexible and wearable devices is driving innovation in new materials and fabrication processes beyond the traditional microfabrication techniques adopted in the semiconductor industry. (2) How protein-based materials, degradable polymers, and novel recycling technologies are paving the way for more sustainable manufacturing of consumer products. (3) How data analytics and internet of things (IoT) technologies are enabling a new generation of digital manufacturing systems referred to as Industry 4.0, and beyond.

**ENGR 1029 - INTRODUCTION TO ENGINEERING FOR HUMANITY**

Minimum Credits: 3  
Maximum Credits: 3  
Engineering is commonly perceived as being impartial, providing purely technical solutions to defined problems for the good of all. In reality, most engineering solutions have greatly benefited the wealthiest of peoples of the world while hundreds of millions continue to live in extreme poverty. This course will consider the central role engineering must play in sustainable human development. It will introduce the practical frameworks that have been developed for small-scale, community level engineering projects that directly address poverty. These frameworks include aspects of community development, planning, project management and assessment necessary for engineers to apply their technical skills. In addition, the course will introduce appropriate technologies with examples for: water and sanitation, energy and shelter.

**ENGR 1030 - ENGINEERING FOR HUMANITY SERVICE LEARNING PROJECT**

Minimum Credits: 1  
Maximum Credits: 3  
A service learning project in which social and/or environmental sustainability is a core thrust. The project is guided by an approved member of faculty from the Swanson school of engineering and satisfies a requirement of the engineering for humanity certificate program. The project can be international or based within the US and is subject to pre-approval.
ENGR 1050 - PRODUCT REALIZATION

Minimum Credits: 3  
Maximum Credits: 3  
This interdisciplinary course will focus on product analysis, product redesign and product development. Student teams will work with industrial sponsors to develop product plans for emerging and existing products.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Attributes: Capstone Course

ENGR 1060 - SOCIAL ENTREPRENEURSHIP- ENGINEERING FOR HUMANITY

Minimum Credits: 3  
Maximum Credits: 3  
The course will explore the concepts of social entrepreneurship through the three tenets of sustainability: environment, economy, and equity in the context of complex or 'wicked' problems. An introduction will provide a foundation in sustainability and social entrepreneurship while exploring the impact of innovative business models, such as disruptive innovation and Prahalad and Hart's fortune at the bottom of the pyramid. Additional class time will explore different examples and challenges in the developed and developing worlds. Through weekly readings, the course will focus on classroom discussions about the tenets of sustainability and the relevance of engineering in crafting 'solutions'. The course project will provide students with an opportunity to work with a multi-disciplinary team to design an engineering-based business plan targeting a specific challenge either locally or in the developing world.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PROG: Swanson School of Engineering

ENGR 1061 - INTRAPRENEURSHIP: ENTREPRENEURSHIP WITHIN THE CORPORATION

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the developing practice of intrapreneurship which is defined as the application of entrepreneurial principles in a corporate environment for the creation of new products and businesses. The focus will be on providing the student with the needed awareness of cultural and political barriers while providing a specific tool set targeted at maximizing new business as well as career success. The course is designed for junior and senior engineering students who have already had some work experience.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

ENGR 1062 - START UP FUNDAMENTALS

Minimum Credits: 3  
Maximum Credits: 3  
This course is offered within the Swanson School of Engineering to undergraduate and graduate students. At the undergraduate level, the class is part of the new Certificate in Innovation, Product Design and Entrepreneurship. The class is designed to introduce the student to the core business concepts behind innovation and entrepreneurship. The class is highly interactive, and students will be required to participate in groups and individually. Grading is heavily weighted around participation in the group project which will be ongoing throughout the semester. The class is taught by Babs Carryer, Director of Education & Outreach, Innovation Institute at Pitt. Guest speakers, who are experts in their fields, will supplement the core teaching. Topics covered will include: ideation, problem/solution, market opportunity, competitive analysis, customer discovery, pitching, funding, finance, legal issues, team building, and innovation within existing companies.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade
ENGR 1066 - INTRODUCTION TO SOLAR CELLS AND NANOTECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
Introduction to solar cells and nanotechnology this course aims to prepare Undergraduate students in the design and development of low-cost, high-efficiency solar cells. Students will learn the basics of solar cells, introduce themselves to nanotechnology and how this may enable next-generation solar cells, learn how to use instruments for synthesis and characterization of nanomaterials and solar cells, examine the social implication of nanotechnology and solar cells, and practice problem solving and engineering design skills within a collaborative team. Portions of the class will be flipped (video lectures at home and assignments in class) in order to facilitate an active and engaged learning process.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PHYS 0175; PROG: Swanson School of Engineering

ENGR 1075 - ENERGY DEVELOPMENT, USE, AND IMPACT

Minimum Credits: 3
Maximum Credits: 3
This course will serve as an overview of energy engineering for both non-engineers and engineers and will be taught in a combined lecture/seminar format. While the course is broadly based it does not cover all aspects of energy harvesting and use. Topics include the history of energy use, the types of energy used (fossil fuel, nuclear, renewables, energy efficiency, energy economics, and climate change). Because of the seminar format, some topics can be covered more fully than others.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: Instructor Consent Required; PROG: Swanson School of Engineering

ENGR 1080 - LEAN LAUNCHPAD: EVIDENCE-BASED ENTREPRENEURSHIP

Minimum Credits: 3
Maximum Credits: 3
Conventional wisdom regarding starting a business is dead wrong. This conclusion led Steve Blank and others to develop the lean startup method, an approach for systematically exploring the business model needed to make an idea into a success. In Blank's own words: 'existing companies execute a business model, startups search for one. This distinction shapes the lean definition of a startup: a temporary organization designed to search for a repeatable and scalable business model.' In this course, we discuss the basic elements of the lean startup method and apply them to the domain of engineering product and customer development. Students are expected to come to the class with their own idea(s) for potential product offering(s), which they will then test using the lean startup approach over the course of the term.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1090 - ENGINEERING COOPERATIVE PROGRAM

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SU3

ENGR 1090J - ENGINEERING COOPERATIVE PROGRAM - UPJ

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SU3 Basis

ENGR 1090P - ENGINEERING COOPERATIVE PROGRAM - PITTSBURGH

Minimum Credits: 1
Maximum Credits: 1

Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SU3
Course Attributes: Capstone Course

ENGR 1097 - INTERNATIONAL SPECIAL PROJECT

Minimum Credits: 3
Maximum Credits: 3
This course involves an individual project done under the supervision of a university of Pittsburgh engineering faculty member and a faculty member of a foreign university. The project is done on site at the foreign university and involves an experimental study, a design project, a literature review of a special topic, or instruction.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Letter Grade

ENGR 1098 - INTERNATIONAL SENIOR DESIGN EXPERIENCE

Minimum Credits: 1
Maximum Credits: 1
This one credit course is focused on understanding globalization and technology with a particular emphasis on sustainability design and international experience. By the end of this course, students should understand the basic history, government, and economic strategies, related to their country; produce a final design that is the most cost-effective design possible, as funding for construction is limited and repairs in the future would be
undertaken by members of the community; be able to define 'globalization' and 'sustainability' and identify how it is impacting their respective fields of study and future employment; gain awareness of differences in the business environments of the U.S. In relationship to the rest of the world.

**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** Letter Grade

**ENGR 1099 - SPECIAL PROJECT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
  
  Student develops an individual project under supervision of a faculty member. Project may be experimental, design oriented, or instructional. A written report is prepared.  
  
  **Academic Career:** Undergraduate  
  **Course Component:** Directed Studies  
  **Grade Component:** LG/SU3 Elective Basis

**ENGR 1150 - ENGR STUDY ABROAD RETURNEE PROFESSIONAL DEVELOPMENT**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  
  
  This one-credit course is designed for engineering students who have recently returned from a global experience. In addition to strategies for enhancing intercultural perspectives and coping with re-entry challenges, students will learn how to translate skills learned abroad into professional competencies and build on their academic, professional, and personal development as future global engineers. Through comparative discussion and analysis, project-based learning, and professional development workshops, students will break down and learn to frame experiences abroad in a contemporary context. Mastery will be demonstrated through written and oral communication.

ENGR 1213 - ENGR SERVICE LEARNING: BRAZIL
Minimum Credits: 6
Maximum Credits: 6
This course examines the development and practice of science and engineering in the context of their underlying cultural bases (social, political, religious, and organizational). The goal of the course is not just to understand the practice of technology in one country versus another, but to develop analytical skills for analyzing technology in any international setting. The course is designed for students from a wide variety of backgrounds and majors; engineering background is useful but not necessary.
Academic Career: Undergraduate

ENGR 1281 - CLEAN ENERGY GRID ENGINEERING: SCANDINAVIA UG

Minimum Credits: 3
Maximum Credits: 3
The course will cover the application of various grid technologies from power generation through power consumption including transmission networks, grid automation, power electronics systems, communications and control, protection, grid operations, grid connectivity, renewable energy resource integration, cyber security, micro grids, DC technologies, and other emerging areas, as well as a brief introduction to power utility markets,
business processes, and policy/regulation. Through classroom discussion and an assortment of group exercises, you learn to frame contemporary energy production and utilization issues in societal and global contexts, and demonstrate mastery of the issues through written and oral communication.

**Academic Career:** Undergraduate

**Course Component:** Independent Study

**Grade Component:** Letter Grade

**ENGR 1282 - GERMAN ENGINEERING CULTURE UG**

**Minimum Credits:** 3

**Maximum Credits:** 3

This course focuses on the day-to-day business issues facing German engineers. The course will cover service businesses in Germany, workplace culture, digital factories, engineering law in Germany and a project that will tackle solving real engineering problems. Students learn to analyze typical German cultural aspects in order to understand differences in the social system of a company and use the knowledge to improve the processes and structures. Students work with appropriate analytical methods and apply their knowledge on real business examples, given by experienced international Managers.

**Academic Career:** Undergraduate

**Course Component:** Independent Study

**Grade Component:** Satisfactory/No Credit

**ENGR 1285 - STUDY ABROAD: NEW ZEALAND**

**Minimum Credits:** 1

**Maximum Credits:** 18

**Academic Career:** Undergraduate

**Course Component:** Independent Study

**Grade Component:** H/S/U Basis

**Course Attributes:** Non-Pitt Class

**ENGR 1290 - STUDY ABROAD: SPAIN**

**Minimum Credits:** 1

**Maximum Credits:** 18

**Academic Career:** Undergraduate

**Course Component:** Independent Study

**Grade Component:** H/S/U Basis

**Course Attributes:** Non-Pitt Class

**ENGR 1291 - VIRTUAL GLOBAL COURSE: ENSEA**

**Minimum Credits:** 3

**Maximum Credits:** 3

Virtual global course for Swanson School of Engineering

**Academic Career:** Undergraduate

**Course Component:** Independent Study

**Grade Component:** Satisfactory/No Credit

**ENGR 1292 - VIRTUAL GLOBAL EXPERIENCE: CEA**

**Minimum Credits:** 1

**Maximum Credits:** 3

Virtual Global Experience: CEA

**Academic Career:** Undergraduate

**Course Component:** Independent Study

**Grade Component:** Satisfactory/No Credit
ENGR 1295 - STUDY ABROAD: SWEDEN

Minimum Credits: 1
Maximum Credits: 18
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: H/S/U Basis
Course Attributes: Non-Pitt Class

ENGR 1296 - STUDY ABROAD: ICELAND

Minimum Credits: 1
Maximum Credits: 18
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: H/S/U Basis
Course Attributes: Non-Pitt Class

ENGR 1300 - ENERGY TOMORROW

Minimum Credits: 6
Maximum Credits: 6
This course explores energy efficiency and renewable energy technologies. Areas addressed are: world energy, energy and environmental implications, energy storage, wind and solar thermal applications, energy and the built environment, biomass and liquid fuels, photo voltaic devices and systems, energy management and energy and transport.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1350 - SUMMER EDGE: MUNICH

Minimum Credits: 1
Maximum Credits: 15
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit

ENGR 1351 - SUMMER EDGE: AUSTRALIA

Minimum Credits: 1
Maximum Credits: 15
Summer edge: Australia

Grade Component: H/S/U Basis

ENGR 1430 - PORTUGUESE 3 FOR ENGINEERS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

This third semester of Brazilian Portuguese is specifically designed for engineering students who will be doing research and/or studying in Brazil. The course covers technical and educational terminology through examination of Brazilian sustainable engineering case studies while further advancing the students' knowledge and ability in Brazilian Portuguese. The course will further enhance the cognitive skills of engineering students, and give them an appreciation of the interrelation of career paths, language skills, and cultural awareness. This course is required for all IGERT fellows.

ENGR 1450 - ENGINEERING- THE GERMAN WAY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Satisfactory/No Credit
Course Attributes: Pitt Class

This course highlights the German approach to engineering from various perspectives. It is designed as mixture of in-class lectures and industrial experience in the form of factory tours. Four broad topics are addressed from the German perspective: (1) R&D; management, (2) production and manufacturing systems, (3) digital factory layout and factory simulation, and (4) product-ergonomics and ergonomic aspects in manufacturing. In addition students select one of two additional options dealing with unique aspects of the German business economy: (1) the nature of cooperation between trade unions and employers or (2) the impact on technology law and harmonization on engineering in Europe.

ENGR 1451 - EXPLORATORY DATA SCIENCE
In this course, we will learn data science and analysis approaches to identify statistically significant relationships and better model and predict the behavior of these systems. We will assemble and explore real-world datasets, perform clustering and pair plot analyses to investigate correlations, and logistic regression will be employed to develop associated predictive models. Results will be interpreted, visualized and discussed. We will introduce basic elements of statistical analysis using R Project open source software for exploratory data analysis and model development. R is an open-source software project with broad abilities to access machine-readable open-data resources, data cleaning and munging functions, and a rich selection of statistical packages, used for data analytics, model development and prediction. This will include an introduction to R data types, reading and writing data, looping, plotting and regular expressions, so that one can start performing variable transformations for linear fitting and developing structural equation models, while exploring for statistically significant relationships.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1453 - DATA SCIENCE: STATISTICAL LEARNING, MODELING & PREDICTION

In this course, we will use an open data science tool chain to develop reproducible data analyses useful for inference, modeling and prediction of the behavior of complex systems. In addition to the standard data cleaning, assembly and exploratory data analysis steps essential to all data analyses, we will identify statistically significant relationships from datasets derived from population samples, and infer the reliability of these findings. We will use regression methods to model a number of both real-world and lab-based systems producing predictive models applicable in comparable populations. We will assemble and explore real-world datasets, use pair-wise plots to explore correlations, perform clustering, self-similarity, and logistic regression develop both fixed-effect and mixed-effect predictive models. We will introduce machine-learning approaches for classification and tree-based methods. Results will be interpreted, visualized and discussed. We will introduce the basic elements of data science and analytics using R Project open source software. R is an open-source software project with broad abilities to access machine-readable open-data resources, data cleaning and assembly functions, and a rich selection of statistical packages, used for data analytics, model development, prediction, inference and clustering. With this background, it becomes possible to start performing variable transformations for linear regression fitting and developing structural equation models, fixed-effects and mixed-effects models along with other statistical learning techniques, while exploring for statistically significant relationships. The class will be structured to have a balance of theory and practice. We'll split class into Foundation and Practicum a) Foundation: lectures, presentations, discussion b) Practicum: coding, demonstrations and hands-on data science work.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1474 - SCUPI - PITT ON LOCATION

Joint Program Course offered through Sichuan University - University of Pittsburgh Institute (SCUPI).

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ENGR 1500 - ETHICAL DILEMMAS BALANCING COST, RISK, AND SCHEDULING

Students will explore the interfaces among engineering ethics, design, schedules, costs and risk assessment. Teamwork, communications and management skills will also be developed. Students will analyze a series of well-known cases, as well as discussing current ethical situations involving engineers and engineering managers. Students will learn to recognize and resolve the types of ethical dilemmas that they could encounter in the workplace. A term paper serves to integrate and extend the entire course material.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering
ENGR 1600 - INTERNATIONAL TECHNOLOGY: INNOVATION AND LEADERSHIP

Minimum Credits: 3
Maximum Credits: 3
Globalization and innovation will be studied with a particular emphasis on China in conjunction with the Innovate 2012 conference. As such the course provides both the preparation for the conference and the post-conference synthesis of what was learned during the conference. The course will be jointly taught by University of Pittsburgh and Rice University faculty exclusively for those students who will be delegates to the Innovate Conference. Guest lecturers will be invited from the two participating universities who will discuss the history, government, religion, business climate and culture of China. This course requires participation in the Innovate 2012 Symposium that will visit Beijing, Suzhou, and Shanghai, China from March 1 - 11.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1601 - INTERNATIONAL TECHNOLOGY: INNOVATION AND LEADERSHIP (NON-PITT)

Minimum Credits: 3
Maximum Credits: 3
Globalization and innovation will be studied with a particular emphasis on China in conjunction with the Innovate 2012 conference. **Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** No Grade Required

**ENGR 1620 - PRODUCT DESIGN AND DEVELOPMENT**

- Minimum Credits: 3
- Maximum Credits: 3
- The focus of product design and development is integration of the marketing design and manufacturing functions of firms in creating new products in a diverse economy that is experiencing rapid growth. Students will analyze several case-studies within the Indian context to study the multiple stages involved with new product creation, design, engineering, and production. The importance of creating new products suited for rural-agricultural settings which are eco-friendly and satisfy sustainable economic communities will be addressed throughout the course. Topics include: discuss the set of tools and methods for product design and development; develop abilities to create a new product; awareness of the role of multiple functions in creating a new product (e.g. Marketing, finance, industrial design, engineering, production); ability to coordinate multiple, interdisciplinary tasks in order to achieve a common objective (examine local conditions, needs and constraints; case studies (to be gathered from various sources).
**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade

**ENGR 1625 - ENGINEERING BUSINESS COLLABORATIONS IN INDIA**

- Minimum Credits: 3
- Maximum Credits: 3
- This course will focus on the studying modern engineering and business principles, methods, and tools, within the context of the Indian environment. The three focal areas of study are: manufacturing systems, service engineering operations, and call centers. A visit to India will showcase challenges
and opportunities available at the corporate level and at the individual level in this rapidly growing economy. It will also focus on the societal impacts of new technologies and rapid expansion of engineering industries in India. Students can utilize this forum to analyze and visualize service manufacturing engineering challenges and opportunities around the world. Plant visits and interfaces with engineering students and practicing engineers will allow students to appreciate the following professional characteristics: ethics, the ability to work with others, an appreciation for other disciplines, adaptability, and an appreciation for life-long learning.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**ENGR 1627 - CHINA TODAY: INDUSTRY, INNOVATION, EDUCATION**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This short course will educate students on the impact of modern china on engineering solutions in a global and societal context, improve student's knowledge of contemporary issues relating to the engineering and business profession. At the end of the course, students will have a general understanding of the corporate, geo-political, cultural and social factors that define the Chinese landscape at the present time. An in-depth paper exploring one of these factors will be required. This short course will explore how these three factors interact in china and in the perceived position of china as a world economy.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** Letter Grade  
**Course Requirements:** PROG: Swanson School of Engineering

**ENGR 1628 - BRAZIL TODAY**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This introductory course, offered jointly by Pitt and CMU, explores how current thematic factors interact to influence brazil's position in the world today and into the future. The 3-day, weekend course will touch upon issues including: education, industrial growth, economic development, business influence, exports and socio-economic shifts. Course requirements include attendance, brief written reflections, and a final paper.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** Letter Grade

**ENGR 1631 - INTRODUCTION TO MINING ENGINEERING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course introduces students to: 1) the history and importance of mining, 2) the exploration and development of surface and underground mines, 3) modern mining methods and operations, 4) common mining equipment, 5) fundamentals of mine ground control and ventilation, 6) elements of coal preparation and mineral processing plants, and 7) mine health and safety management. It is designed to provide students with basic understanding of the primary elements of a mining operation and the engineering issues associated with operating a mine in a safe, effective, and sustainable manner. The mining industry is replete with technical jargon and specialized processes and machinery that require mastery by students prior to exploration of more technically complex engineering coursework. Introductory lectures and field trips help to prepare students for the rigors of studying the other mining engineering courses offered within the Swanson School of Engineering.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** (PROG: Swanson School of Engineering) or (PLAN: Geology (BS or BPH))

**ENGR 1632 - SUSTAINABLE DEVELOPMENT AND THE MINERAL INDUSTRY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The course begins by examining the needs of society and commercial entities engaged in mineral production. Well conceived and designed mineral or solid fuel projects exercise a balance between economic prosperity, environmental health, and social equality. These concepts are then integrated
into a case study, where the feasibility of a proposed mining project is analyzed. This examination forms the underpinnings of a course project report.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1633 - MINERALS INDUSTRY RISK MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Explores the concepts, models and methods used to create and support the implementation of risk management within minerals industry organizations. Models and methods include life cycle model, work process model, risk analysis methods and risk assessment methods used to implement a minerals industry risk management framework.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1634 - ENVIROMENTAL CONTROLS IN MINING

Minimum Credits: 3
Maximum Credits: 3
The course is designed to study the environmental impact of coal, stone, and other mining operation and examine the engineering controls used to mitigate these impacts. The examination begins with the exploration and permitting of the mine site, emphasizing important environmental issues. Next, the impacts of active mining on land and water use are outlined. Most of these issues are related to subsidence impacting surface structures and water movement both at the surface and underground. To complete the mine's life cycle, closure and remediation issues are investigated. Lastly, a detailed examination of the issues associated with abandoned mined-lands, i.e. Acid-mine drainage, mass-wasting, fires, etc., Are studied. Throughout the course, engineering controls that focus on mitigating the environmental impacts of mining are acknowledged and assessed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1635 - MINE VENTILATION ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course provides the skills needed to analyze and design ventilation systems for underground mines based on 1) regulatory requirements, 2) health concerns for workers, 3) levels of dusts and toxic or explosive gases present, 4) mining methods used, and 5) splitting and delivery of different quantities of air to various workplaces.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1637 - STRATA CONTROL ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
This course provides the skills needed to analyze and design ground control systems for underground mines based on 1) regulatory requirements, 2) safety concerns for workers, 3) stress and displacement characteristics, 4) proposed mining methods, and 5) local geologic conditions.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1638 - MINING HEALTH AND SAFETY
Minimum Credits: 3
Maximum Credits: 3
Presents an overview of the health and safety issues within the mining industry and to examine current efforts to address these issues. In-depth discussion of health issues affecting mining include: diesel control, noise induced hearing loss, silicosis, coal mine dust monitoring and control, toxic substances, and toxic fumes. In-depth discussion of safety issues affecting mining include: explosives, falls of ground, mine inundation's, fire prevention, mine explosions, ventilation, methane control, emergency response and rescue, training, ergonomics, machine safety, and electrical safety.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1700 - INTRODUCTION TO NUCLEAR ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Introduction to nuclear science and technology; applications of nuclear engineering; careers in nuclear industry; nuclear history; reactor types; elementary nuclear and reactor physics; nuclear radiation and safety; fuel cycle; regulations and sustainability.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (PHYS 0152 or 0175 or 0202 or 0476) and (CHEM 0102 or 0112 or 0120 or 0420 OR 0720 or 0770 or 0970); PROG: School of Engineering

ENGR 1701 - FUNDAMENTALS OF NUCLEAR REACTORS

Minimum Credits: 3
Maximum Credits: 3
Nuclear physics, fission and fusion; cross-sections; neutron flux and slowing-down; diffusion and transport; criticality condition and calculations; reactor kinetics and shielding; heat generation, transfer and cooling; reactor materials; reactor structure.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (PHYS 0152 or 0175 or 0202 or 0476) and (CHEM 0102 or 0112 or 0120 or 0420 or 0720 or 0770 or 0970); PROG: Undergraduate School of Engineering

ENGR 1702 - NUCLEAR PLANT TECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
Current and future reactor systems; nuclear power plants; balance of plant configuration; fuel cycle management; reactor operation principles; reactor plant economics; analysis and design of nuclear systems; design projects.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (PHYS 0152 or 0175 or 0202 or 0476) and (CHEM 0102 or 0112 or 0120 or 0420 or 0720 or 0770 or 0970); PROG: Undergraduate School of Engineering

ENGR 1713 - RADIATION DETECTION AND MEASUREMENT

Minimum Credits: 3
Maximum Credits: 3
This combined lecture and laboratory course will proved students with an introduction to the principles of radiation detection and measurement and experimental techniques. The lecture material will provide students with an understanding of the theoretical bases of detector operation, radiation interactions with matter, signal conditioning and processing electronics, measurement techniques, and statistical considerations. Laboratory work will emphasize the practical aspects of radiation detection using an array of radioactive sources, detectors, and associated signal processing electronics. Through a series of laboratory experiments, students will learn to configure and operate instrumentation used in a wide range of radiation detection
applications that are of interest to nuclear power, nuclear medicine, radiochemistry, and other scientific disciplines.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1716 - THE ART OF MAKING: AN INTRODUCTION TO HANDS-ON SYSTEM DESIGN AND ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Engineering is fundamentally a creative process in which ideas are generated and transformed into new systems and devices in the world to meet human needs. The term engineer shares its origins with ingenious: one definition of engineer is 'a skillful inventor.' In this course, we will explore tools and techniques for inventing, designing and prototyping systems. This course is based on experiential learning: through interactive discussions, small-team exercises, maker assignments, workshops and hands-on projects, students will obtain an introduction to design thinking, 'maker culture' and systems engineering. ENGR 1716 is an upper division version of freshman honors ENGR 0716. It is for sophomore, junior and senior level students. We will explore user-centric design principles, low-resolution prototyping and experience prototyping, basic building elements for systems such as sensors, computer controllers, actuators and displays, materials and methods for prototyping, and ways to analyze and troubleshoot systems. Students will gain an introduction to 'smart systems': automated systems that can sense the world and automatically respond in useful ways. We will also focus on the user interface: how to create control and display interfaces that enhance users' ability to operate systems effectively and efficiently.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1770 - ENGINEERING FOUNDATIONS OF MUSIC

Minimum Credits: 3
Maximum Credits: 3
Since Paleolithic times, engineering has been applied to the production of music, but advances in the past few centuries, including sound recording, the introductions of electronics, and a greater understanding of the physics, mathematics, and psychology of sound, have greatly expanded what a student can learn in the field of music engineering. This is a lecture course about the engineering aspects of music, including the following general topics: the physics of sound and the mathematics of harmony; the means of creation through mechanical musical instruments, including the human voice, as well as electronic instruments; recording, reproduction, and enhancement though signal processing; interaction with human perceptual, cognitive, and motor systems. Assuming knowledge of differential and integral calculus, the course will develop (or review) a basic understanding of convolution and Fourier Analysis through examples in the engineering aspects of music. Starting with an historical perspective on technology, we will extrapolate a look into the future of music engineering. Students will be able to describe engineering aspects of musical instruments, reproduction, and processing and apply the mathematical and physical basis for sound and the theory of harmony in understanding the system of interaction between human and machine that constitutes music. Topics covered include: convolution and Fourier Analysis; physics of sound; mathematics of harmony; physics of mechanical instruments; recording and reproduction of music; electronic processing of sound; electronic synthesis of music; psychophysics of music.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGR 1869 - INTRO ELEC ENGRG FOR NON EE'S

Minimum Credits: 3
Maximum Credits: 3
Linear electric circuits, circuit elements and sources, mesh and node equations, the venin equivalent circuits, sinusoidal steady state analysis, three phase circuits, power concepts.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering

ENGR 1870 - SOLIDS PROCESSING AND TRANSPORT
Particle technology affects as much as 80% of the chemical process industry, yet is often omitted from the undergraduate curriculum of chemical engineers. This course is designed to give advanced undergraduates as well as early-term graduate students an introduction to this rich and diverse field. Topics will range from fundamentals (particle classification, properties, and flow) to applied (hopper design, mixing, etc.). Industry related examples and designs will be presented.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### ENGR 1900 - INTRODUCTION TO SUSTAINABLE WATER TECHNOLOGY & DESIGN

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course, students will be introduced to the complex and global interactions that make up the human-water interface and learn to design for water applications. Beginning with the physical/chemical and biological significance of water, this course will analyze the development of water technologies within their historical, cultural, and geopolitical contexts. This introduction will serve as the foundation for quantitatively evaluating: 1) the present day water challenges that face communities, cities, and nations & 2) the state-of-the-art technologies currently deployed to manage these needs. The second half of the course will be used to explore innovative examples, examine current water research and technology and work on a course project in which students will have the opportunity to create and design sustainable methods and technologies to meet local and/or global water challenges.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### ENGR 1905 - CURRENT ISSUES IN SUSTAINABILITY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce the core principles of sustainability (i.e. social, economic, and environmental) from the perspective of several disciplines and research fields. Covering a variety of topics such as urban infrastructure, energy policy and the environment, sustainable water-use, habitat sustainability and biodiversity, the curriculum and schedule are updated annually to reflect advancements in the field of sustainable engineering and science, and to continually incorporate current topics. While the course is primarily taught by the sustainability faculty fellows it will also consist of various guest lectures by sustainability faculty and senior practitioners working throughout the Pittsburgh region. Course assignments will consist of a series of essays and assignments and culminate in a team term project. This is a required course for the undergraduate sustainability certificate and the M.S. in Sustainable Engineering.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### ENGR 1907 - SUSTAINABILITY CAPSTONE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Building upon students' previous experience and skills, this course will focus on enabling interdisciplinary student teams to synthesize comprehensive solutions to complex real-world Sustainability challenges. This is a project-based course. Project topics will be developed in consultation with instructors and sustainability stakeholders. Innovative solutions will require the application of critical thinking and collaboration to resolve. By the end of the course the students will have a deeper understanding of 1) the multi-faceted nature of Sustainability solutions 2) approaches to problem solving across fields and 3) how to communicate sustainable solutions and concepts in an interdisciplinary team environment. This course serves as a capstone course for the Sustainability certificate and M.S. in a Sustainable Engineering degree and is a required course for these two programs.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Attributes:** Capstone Course
ENGR 1909 - SUSTAINABLE FOOD SYSTEMS

Minimum Credits: 3  
Maximum Credits: 3

Our food system is a multifaceted network of interconnected systems and relationships. In order to be able to feed ourselves well into the future, it must be sustainable. A sustainable food system is a system in which healthy food is provided to people while balancing the environmental, social and economic impacts. These dynamics force stakeholders to confront synergies and tradeoffs in agricultural practices, harvesting, transportation, manufacturing and distribution, healthy diets, and a reduction in wasted food.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

ENGR 1920 - ENGINEERING CRAFT BREWERY - INTERNATIONAL OPPORTUNITY

Minimum Credits: 1  
Maximum Credits: 1

This course provides the opportunity to explore and learn about the Craft Brew process in Europe. You will be able to describe and analyze the entire brew process as you are traveling to local breweries, malteries and Yeast manufactures in an European city. The program abroad occurs during spring break. Students must have taken ENGR 1933 or be taking ENGR 1933 in order to qualify for this course. Students must apply and be accepted by Engineering International Programs in order to be registered.

Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: Letter Grade  
Course Requirements: PREQ or CREQ: ENGR 1933

ENGR 1925 - ENGINEERING SUSTAINABILITY IN ISLAND NATIONS

Minimum Credits: 3  
Maximum Credits: 3

Studying abroad in island nations provides a great learning opportunity to examine the complexity of sustainability because the scale of processes are more easily traced and the network of connections more readily tracked. In this course, students will explore the challenges/opportunities for sustainability in Jamaica with a broad consideration of industry, socio-economics, environmental impacts, history, contemporary culture and demographics. Through hands-on projects, immersions with local organizations, academic tours in country and, a collaborative research project with the University of West Indies, the students learn to frame contemporary engineering sustainability issues for island nations in societal and global contexts and, demonstrate a mastery of these through written and oral communication. The course is presented in preparation for the extended trip to Jamaica, ensuring that students have the requisite preparation to identify and discuss engineering, development and sustainability issues during site-visits in Jamaica. Each session, guest speakers will address topics intended to provide the necessary background for the trip. The presentations will serve as the basis for comparative discussion and analysis.

ENGR 1933 - SCIENCE, TECHNOLOGY, & CULTURE OF CRAFT BREWING

Minimum Credits: 3
Maximum Credits: 3

This course will introduce students to the science of brewing and technology needed to design and operate a craft brewery. Students will learn and apply biology, chemistry, and foundational engineering concepts and equipment needed to convert grain, water, yeast, and hops into craft beer. Students will also develop product analysis and product design skills to justify brewing choices based upon brewing science, technology, economic, and cultural considerations. Judging craft beer quality is a sensory experience that draws upon technical, cultural, and geographic aspects of each beer style; different styles will be highlighted throughout the course. Student must be 21 years of age with government-issued photo ID by the first day of class in the term taken.

Academic Career: Undergraduate

ENGR 2210 - UNDST BRAZIL-PREP RES & STUDY

Minimum Credits: 2
Maximum Credits: 2

This seminar is specifically designed for students who will be doing research and/or studying in Brazil. It introduces the economic, political, social, and cultural aspects of Latin America in general and Brazil in particular. The seminar is organized and conducted by the center for Latin American studies, and features guest lectures from on brazil, readings from current popular literature and news sources (available from the Eduardo Lozano Latin American collection, a library resource of over 340,000 volumes spanning 30 years), and contemporary films (such as decade of destruction: killing for land and Brazilian populations: stories and myths). The first half of the course will introduce students to day-to-day life in brazil, as well as its current socio-economic situation, the influence of politics and ethnic relations, and the many aspects of Brazilian culture. The second half will focus on disciplinary perspectives that allow students to explore regional issues from a variety of viewpoints. The final seminars in the semester will be used for the presentation of individual student reports on a topic related to Brazilian life, such as the governmental structure, university system, or integration of technology with indigenous lifestyles and traditions. This course is required for all Igert fellows.

Engineering Science
ENGSCI 1085 - ENGINEERING SCIENCE SEMINAR

Minimum Credits: 0
Maximum Credits: 0
Seminars are designed to acquaint the student with aspects of engineering not normally encountered in classes and include a wide range of topics such as the significance of engineering as a profession and the relation of engineering to current social problems.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit
Course Requirements: PLAN: Engineering Science (BSE)

ENGSCI 1801 - ENGINEERING DESIGN 1

Minimum Credits: 3
Maximum Credits: 3
A major project involving literature search, planning, experimentation, analysis, an oral presentation and a final technical report. The project may be sponsored by the engineering physics program, one of its participating departments, or a local company. The project is conducted under the direction of a faculty advisor(s).

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering; PREQ: MEMS 1043 or ECE 1896

ENGSCI 1802 - ENGINEERING DESIGN 2

Minimum Credits: 3
Maximum Credits: 3
The continuation of ENGRPH1801, engineering design 1.

Academic Career: Undergraduate

Grade Component: Letter Grade
Course Requirements: PROG: Swanson School of Engineering; PREQ: ENGSCI 1801 and (MEMS 1043 or ECE 1896)

English Composition

ENGCMP 0150 - WORKSHOP IN COMPOSITION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to give students who have had limited experience with writing an opportunity to increase their control of written language and their confidence in performing academic inquiry, analysis and argument. Students write in response to weekly assignments, and instruction focuses on helping students to extend, revise, and edit their work.

Academic Career: ENGLISH
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Workshop in Comp. General Ed. Requirement

ENGCMP 0151 - WORKSHOP TUTORIAL

Minimum Credits: 2
Maximum Credits: 2
This course provides support for students who are taking ENGCMP 0150 workshop in composition. Students meet weekly with a writing center consultant to work on understanding and addressing writing assignments. Students can also expect to learn how to strengthen their writing at the sentence- and paragraph-levels. Students work one-on-one with a consultant, using the papers they produce in ENGCMP 0150 as materials for discussion.
**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** Satisfactory/No Credit  
**Course Requirements:** CREQ: ENGCMP 0150 or 0152

**ENGCMP 0152 - ESL: WORKSHOP IN COMPOSITION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course is designed to give students learning English as a foreign language an opportunity to develop their ability to write in English and their confidence in performing academic inquiry, analysis and argument. Students write in response to weekly assignments, and instruction focuses on helping students to extend, revise, and edit their work.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: LING 0007 or LING 0009  
**Course Attributes:** DSAS Workshop in Comp. General Ed. Requirement

**ENGCMP 0200 - SEMINAR IN COMPOSITION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This introductory course offers students opportunities to improve as writers by developing their understanding of how they and others use writing to interpret and share experience, affect behavior, and position themselves in the world. Specific reading and writing assignments may vary from section to section, but student writing will be the primary focus in all sections. The course is designed to help students become more engaged, imaginative, and disciplined composers.

**Academic Career:** ENGLISH  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** International Students required to take ENGCMP 0002 or 0003 or 0005 or 0010 or 0100 or 0150 or 0152 or ENG 0101 prior to enrollment; Enrollment not permitted if currently enrolled in ENGCMP 0200-level courses, FP 0003, or FP 0006.  

**ENGCMP 0201 - COMPOSITION TUTORIAL**

- **Minimum Credits:** 1  
- **Maximum Credits:** 1

This course is a series of tutorial sessions designed to help students with their writing at the sentence and paragraph levels. Students work one-on-one with a consultant in the writing center, using the papers they produce in ENGCMP 0200 as materials for discussion.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** Satisfactory/No Credit  
**Course Requirements:** CREQ: (ENGCMP 0200 or 0205 or 0207 or 0208 or 0210 or 0212) or (FP 0003 or 0006)  
**Course Attributes:** DSAS Workshop in Comp. General Ed. Requirement

**ENGCMP 0203 - SEMINAR IN COMPOSITION: GENDER STUDIES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Like other seminars in composition, this introductory course offers students opportunities to improve as writers by developing their understanding of how they and others use writing to interpret and share experience, affect behavior, and position themselves in the world. This particular seminar will include readings and writing activities that comment on gender difference and consider the ways in which language and culture construct socially acceptable gender and sexual norms.

**Academic Career:** ENGLISH  
**Course Component:** Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: International Students required to take ENGCMP 0002 or 0003 or 0005 or 0010 or 0100 or 0150 or 0152 or ENG 0101 prior to enrollment; Enrollment not permitted if currently enrolled in ENGCMP 0200-level courses, FP 0003, or FP 0006.

ENGCMP 0205 - SEMINAR IN COMPOSITION: FILM

Minimum Credits: 3
Maximum Credits: 3
Like other seminars in composition, this introductory course offers students opportunities to improve as writers by developing their understanding of how they and others use writing to interpret and share experience, affect behavior, and position themselves in the world. This particular seminar will include a series of films, along with discussions that focus on how films and other media shape the ways we view and understand the world.

Academic Career: ENGLISH
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: International Students required to take ENGCMP 0002 or 0003 or 0005 or 0010 or 0100 or 0150 or 0152 or ENG 0101 prior to enrollment; Enrollment not permitted if currently enrolled in ENGCMP 0200-level courses, FP 0003, or FP 0006.

ENGCMP 0207 - SEMINAR IN COMPOSITION: EDUCATION

Minimum Credits: 3
Maximum Credits: 3
Like other seminars in composition, this introductory course offers students opportunities to improve as writers by developing their understanding of how they and others use writing to interpret and share experience, affect behavior, and position themselves in the world. This particular seminar will include readings that consider issues of teaching and learning in American education and may be of interest to those who plan to become teachers.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGCMP 0002 or 0003 or 0005 or 0010 or 0100 or 0150 or 0152 or ENG 0101; TEST SCORE: SAT Verbal 560 or Higher or ACT English 24 or Higher. Enrollment not permitted if currently enrolled in ENGCMP 0200-level courses, FP 0003, or FP 0006.

ENGCMP 0208 - SEMINAR IN COMPOSITION: SERVICE-LEARNING

Minimum Credits: 3
Maximum Credits: 3
Students will engage in service-learning, pairing meaningful service in the community with academic work. Discussions will focus on students' experiences and their reflections as guided by critical readings and short essay assignments. Essays will comprise the central course texts, and weekly work will include reading and discussing the essays that students produce for this course.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: International Students required to take ENGCMP 0002 or 0003 or 0005 or 0010 or 0100 or 0150 or 0152 or ENG 0101 prior to enrollment; Enrollment not permitted if currently enrolled in ENGCMP 0200-level courses, FP 0003, or FP 0006.

ENGCMP 0210 - SEMINAR IN COMPOSITION: ENGINEERING

Minimum Credits: 3
Maximum Credits: 3
Seminar in Composition is a course taken by almost all undergraduates at the University of Pittsburgh. Seminar in Composition: Engineering undertakes the goals of Seminar in Composition within a first-year (and beyond) engineering context. First-year Swanson School of Engineering (SSOE) students in Seminar in Composition: Engineering will explore engineering disciplines, practices, methods, ethics, and education and will analyze their own views and goals as engineering students and as future engineers as they are learning about and practicing writing as a rigorous, disciplined form of critical inquiry and a responsible form of communication. In Seminar in Composition: Engineering, students will strengthen their knowledge and practice of the textual conventions required of university- and professional-level writing and will, via drafting and revision, regularly reexamine the clarity and effects of their writing processes and outcomes. Writing instruction will take place in the ENGR 0011 or 0711 classroom, so students won't have a separate class meeting for ENGCMP 0210; be sure that your ENGR and ENGCMP courses meet at the same day and time in the same classroom.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis
Course Requirements: CREQ: ENGR 0011 or 0711

ENG CMP 0212 - SEMINAR IN COMPOSITION: TOPICS IN DIVERSITY

Minimum Credits: 3
Maximum Credits: 3
Seminar in Composition is a course taken by almost all undergraduates at the University of Pittsburgh. Its goals are to help you engage in writing as a creative, disciplined form of critical inquiry; compose thoughtfully crafted essays that position your ideas among other views; write with precision, nuance, and awareness of textual conventions; and revise your writing by rethinking the assumptions, aims, and effects of prior drafts. This seminar will include readings and writing activities that explore concepts and practices relating to diversity and its established and emerging definitions. Your section may address, for example, issues like race, gender, sexuality, ethnicity, religious difference, differences in abilities, and economic disparities. You can expect to identify and analyze assumptions about difference, study how texts can generate and perpetuate such assumptions, and explore the consequences of such assumptions. You will also learn how to research and compose with attention to difference. We will read a challenging set of essays to frame our work in the course, but the key texts will be your own writings and those of your classmates. Your focus on student writing will be detailed: you will work closely with the papers that you and your fellow classmates have written, trying to think of ways to make them more precise, interesting, organized, complex, and reflexive. This course is an opportunity to learn how to use reading (published texts, the papers of your classmates, and readers' comments) to help you work on your writing and how to use writing to help you strengthen ways of reading and thinking. Like other seminars in composition, this introductory course offers students opportunities to improve as writers by developing their understanding of how they and others use writing to interpret and share experience, affect behavior, and position themselves in the world. This seminar will include readings and writing activities that explore concepts and practices relating to diversity and its established and emerging definitions. Your section may address, for example, issues like race, gender, sexuality, ethnicity, religious difference, differences in abilities, and economic disparities. You can expect to identify and analyze assumptions about difference, study how texts can generate and perpetuate such assumptions, and explore the consequences of such assumptions. You will also learn how to research and compose with attention to difference.

ENG CMP 0213 - SEMINAR IN COMPOSITION: DISABILITY STUDIES

Minimum Credits: 3
Maximum Credits: 3
This composition course will engage students in formal and informal writing that fosters critical thinking on the topic of disability. Drawing on theoretical writing in disability studies as well as creative and critical literature by writers with disabilities, the course will introduce students to ways of identifying and questioning certain sociocultural assumptions about ability, sensory experiences of the world, and mental as well as physical health. The nature of the writing assignments and writing processes will vary in order to recognize a diversity of abilities and ways of thinking. In exploring disability as a diversity issue, the course aims at intersectionality, a concept introduced in 1989 by legal scholar Kimberlé Crenshaw. Intersectionality is the recognition that none of us can be said to inhabit a single identity; for example, our racial identity is always complicated by our socioeconomic class, gender and sexuality, as well as by our identities as abled/disabled. Anyone may become disabled at any point in time, and according to the Center for Disease Control, 61 million Americans identify as disabled, so it's safe to say that disability impacts every identity.

Course Requirements: PREQ: ENGCMP 0002 OR 0003 OR 0005 OR 0010 OR 0100 OR 0150 OR 0152 OR ENG 0101; TEST SCORE: SAT Verbal 560 or Higher or ACT English 24 or Higher.; Enrollment not permitted if currently enrolled in ENGCMP 0200-level courses, FP 0003, or FP0006

ENG CMP 0400 - WRITTEN PROFESSIONAL COMMUNICATION

Minimum Credits: 3
Maximum Credits: 3
This course explores the methods of inquiry, analysis and composition characteristic of written communication in professional settings. The course will examine such writing's specialized use of language, conventions and formats, premises, motives, and purposes. By preparing letters, resumes, proposals, reports, etc. Students will get a feel not only for what "professional" communication is, but also for how and why it does, or can, or should function.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

ENG CMP 0401 - WRITTEN PROFESSIONAL COMMUNICATION: TOPICS IN DIVERSITY

Minimum Credits: 3
Maximum Credits: 3
This course explores the methods of inquiry, analysis and composition characteristic of written communication in professional settings. The course will examine such writing's specialized use of language, conventions and formats, premises, motives, and purposes. By preparing letters, resumes, proposals, reports, etc., students will get a feel not only for what "professional" communication is, but also for how and why it does, or can, or should function. This Topics in Diversity section of WPC will invite students to expand and complicate their understanding of the benefits of workplace diversity and of the problems arising from the unequal distribution of power and privilege across positions (including race, gender, sexuality, ethnicity, ability, religion, and class) in the professions. Students will explore the dynamics of power and hierarchy in their chosen field as they observe daily operations and interactions during work-site field visits, and they will consider how these dynamics perpetuate or diminish inequities and marginalization. Among the topics considered are discrimination in hiring and on the job in terms of employment training, responsibilities, pay, and promotions. Students gain practice articulating their individual diversity as job candidates in resumes and cover letters, and in composing professional documents that address a complaint, seek a remedy, and establish new policies to address hypothetical discriminatory issues that they may experience in the future.

Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Writing Requirement Course

ENG CMP 0410 - WRITING IN THE LEGAL PROFESSIONS

Minimum Credits: 3
Maximum Credits: 3
This course is especially useful for students preparing for classes in the legal professions. Students will be trained to understand the nature of assumptions and assertions, to examine the pertinence of evidence, to judge the appropriateness of tone to subject matter and audience, and to test the validity of an argument through an analysis of its components.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

Course Attributes: Writing Intensive Course (WRIT)
ENGCMP 0412 - ENGINEERING COMMUNICATION IN A PROFESSIONAL CONTEXT

Minimum Credits: 3
Maximum Credits: 3

ENGCMP 0412 Engineering Communication in a Professional Context, is a required course for all Swanson School of Engineering first-year students enrolled in ENGR 0012. In ENGCMP 0412 students write a significant research paper for the Swanson School of Engineering's Annual Conference on Sustainability, held near the end of the spring term. Students compose this paper in teams of 3; students also compose individual papers reporting and reflecting on their experience with teamwork and with researching, composing, assessing, and presenting written work within a context of maximum personal and professional responsibility and integrity. In ENGCMP 0412 students undertake intensive research into a current engineering innovation/technology. Students expand upon that research as they move through a multi-step process of writing and revising a conference paper that includes considerable technical content as well as intensive analyses of the social value and ethical applications of that technology. Through ENGCMP 0412, students will continue to increase their experience and success with major teamwork projects, will practice best policies and procedures for professional communication and presentation, will continue to learn about and practice communication modes and expectations in engineering, science, and technology, and will continue with an academically and intellectually rigorous process (begun in ENGCMP 0210, Seminar in Composition: Engineering), of understanding and communicating what it means personally, educationally, professionally, socially, and globally to "be an engineer."

Academic Career: Undergraduate

ENGCMP 0415 - WRITING AND ANXIETY

Minimum Credits: 3
Maximum Credits: 3

This course is designed for students who are interested in learning about ways of navigating anxiety and apprehension about writing and for those who expect to teach or support other writers in business, education, and other nonprofit, public health and service institutions. Writing can be an anxiety-provoking process for many people who nevertheless have to write because of academic or professional responsibilities. The course will explore ways of theorizing the writing process and will identify and share strategies for navigating roadblocks (such as writing apprehension, writing anxiety, and blocking) as they arise. Students can expect to learn essential terms from the rhetorical tradition in order to become more aware of the choices they make as thinkers and writers, and they will analyze the rhetoric of a variety of texts from a disability studies perspective. In addition to learning about writing theory, students can expect to read and write about anxiety and about how the idea of disability functions in our culture.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

ENGCMP 0420 - WRITING FOR THE PUBLIC

Minimum Credits: 3
Maximum Credits: 3

This course explores the theory and practice of writing that serves the public interest, including writing for the nonprofit and the governmental sectors of American society. The course will explore the ethics of writing for the public, the impact of rhetorical contexts on writing, and the ways in which writing and revision can allow us to understand a problem or issue in a new way. Students can expect to read examples of writing for the public, conduct significant research, and write in different genres.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718) or ENGR 0716
Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 0425 - DIGITAL HUMANITY
Minimum Credits: 3  
Maximum Credits: 3  
This course prepares students to critically examine the intersections between digital devices and human life. Covering topics such as the relationship between computers and humans, surveillance, big data, and interactivity and games, we question what it means to be human in a space of pervasive digitality.  
Academic Career: Undergraduate

**ENGCMP 0430 - PUBLIC COMMUNICATION OF SCIENCE AND TECHNOLOGY**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the theory and practice of writing that serves the public interest. We will focus on writing about science, technology, and the environment areas that influence our daily lives in innumerable ways. By composing in a variety of genres, students will gain a deeper understanding of the ethics of writing about science and technology for public audiences, the interaction of communication and rhetorical context, and how writing and revision can facilitate new ways of thinking. Students will study academic articles, professional examples, news coverage, and student work.  
Academic Career: Undergraduate

**ENGCMP 0432 - WRITING FOR ENVIRONMENTAL ADVOCACY**

Minimum Credits: 3  
Maximum Credits: 3  
This course focuses on writing in response to the natural environment, primarily as a tool to raise awareness of environmental challenges and to advocate for sustainable ways to meet those challenges. We'll read a variety of voices and styles of advocacy writing, including public documents, always with a strong focus on the craft of language: How does the writing reach its target and accomplish its goal? What makes the writing persuasive? Through varied assignments including blog posts, op-eds, and a researched project for a specific audience, you'll increase familiarity with approaches to and niches for environmental writing and with the historical and political context of the environmental sustainability movement. We will investigate the concept of environmental justice: who feels the greatest impacts of environmental degradation and who feels the greatest economic impacts of sustainable solutions. You'll hear from at least one guest speaker about writing for a local environmental organization, and we will likely take a field trip off campus. You'll devote the second half of the semester to an individual writing project and presentation focusing on a specific environmental challenge of your choice.  
Academic Career: Undergraduate

Course Attributes: MCSI - Sustainability Related, Writing Intensive Course (WRIT)

**ENGCMP 0435 - THE PUBLIC ATHLETE**

Minimum Credits: 3  
Maximum Credits: 3  
Sport is a ripe avenue for public meaning-making, as athletes have used their platforms to bring awareness to various societal issues throughout history. In US contexts, athletes, like Serena Williams, Muhammad Ali, Simone Biles, Lebron James, Megan Rapinoe, Colin Kaepernick, John Carlos, and Tommie Smith (among many others), have taken public stands against various injustices. The ways in which sports data and narratives—in journalism, on social media, in film, or local communities, for example—are crafted also make meaning for a variety of genres and purposes. Thinking deeply about this subject offers participants ways to construct and deconstruct sport-writing to understand how these messages are made. In this course, we will engage with public writing about sports—both by and about athletes. Participants will not only study histories of sports-writing but will also consider how today's technologies can shape representations of the public athlete. We will read and write in a variety of rhetorical,
journalistic, informational, creative, and research-based genres, while thinking carefully about the role of sports and athletes in shaping notions of racial, gender, and class-based identities.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

**ENGCMP 0440 - CRITICAL WRITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students in this course will be trained in the responsible development and articulation of written opinions. Material drawn from various media will be used to help students increase their powers of observation and analysis that they may learn the art of making discriminating evaluations of situations, events, issues, controversies, artifacts and objects.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar

**Course Attributes:** Writing Requirement Course

**ENGCMP 0450 - RESEARCH WRITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course trains students in the techniques of responsible library research. Students will learn how to locate and utilize the resources of a library. Students will also learn how to take notes and document, use primary and secondary sources, and write paraphrases, summaries and abstracts. Each student will write a major research paper on a topic of his/her choice, one which may legitimately serve as a term paper for another course.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  
**Course Attributes:** SCI Expression: Tech/Bus/Res writing Gen. Ed. Req., Writing Intensive Course (WRIT)

**ENGCMP 0500 - TOPICS IN COMPOSITION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
These courses are offered as alternatives to meet the general writing requirement. Each section will use a specific theme or problem to develop students' facility with the sorts of inquiry and discursive practices that characterize academic work. Topics courses require regular reading, at least 35 pages of writing, and regular revision.  
**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  
**Course Attributes:** Writing Requirement Course

**ENGCMP 0510 - NARRATIVES OF THE WORKPLACE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Narratives of the workplace builds on the work of general writing and 400 level course offerings such as written professional communication, writing in the legal professions, and writing for the public by providing students with the opportunity to diversify their writing skills through critically
examining workplace narratives and creating an archived presentation based upon workplace experiences or histories.

---

**ENG CMP 0520 - INTEGRATING WRITING AND DESIGN**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course allows students to explore the rhetorical implications of design and invites students to consider design and writing as an integral process. The class will alternate lecture/discussion sessions with studio sessions, so that students can learn how to use Adobe InDesign to create both single- and multi-paged documents for particular rhetorical contexts. Student will create a number of designed pieces of writing, including a longer multi-page document for a specific audience.  
**Academic Career:** Undergraduate

---

**ENG CMP 0521 - WRITING WITH DATA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to allow students to engage with data in their writing and learn how to effectively write with numbers. This course is for anyone: those who love to write but are sometimes less confident working with numbers, those who love numbers but want to improve their writing, for people who love numbers and writing rather equally, for scientists, for artists, for people who anticipate working with a lot of data in their career, etc. Students will work with a dataset of their choosing and develop several pieces reliant on quantification for both lay and specialized audiences. Through these writing projects and through classroom activities, students will learn about how to find data to use for their writing, how to plan effective utilization of this data in a broader argument, how to responsibly and effectively use word choice and syntax to convey quantified material, how to organize writing reliant on data for both lay and specialized audiences, and how to incorporate data visualization for purposes of understanding and persuasion. There is no need to know anything about statistics; throughout the term we will learn how mathematical encounters with writing can be engaging, exciting, and something we can work on together. We will be going over a handful of statistical concepts in the second half of the course so we can write about them, but the emphasis here will ultimately be on proficiency for the purposes of a given concepts use in writing. By the end of the course, both traditional and quantitative literacy will be improved to serve student development as competent quantitative writers and readers in future PPW courses, courses across different majors at Pitt, in their writing as professionals, and as more discerning consumers and producers of knowledge as global citizens.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**Course Attributes:** Writing Intensive Course (WRIT)

**ENGCMP 0530 - WRITING FOR THE SCIENCES**

Minimum Credits: 3  
Maximum Credits: 3  
This course invites students to explore the purposes and conventions of writing within the sciences. Students will read and analyze examples of professional scientific documents' including abstracts, literature reviews, research proposals, graduate school papers, journal articles, and correspondence. They will learn to craft scientific research into engaging written material, using information drawn from publicly available studies or their own research. They will consider their audience's needs and tailor their writing for both expert and general readers in different rhetorical contexts. Students will also learn strategies for document design, including how to effectively use visuals to represent data and findings. Throughout the course, students will learn how to write clear, powerful sentences and paragraphs. Finally, to develop their professional collaboration skills, students will practice providing each other with effective feedback on works-in-progress.  

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212)  

**ENGCMP 0535 - WRITING IN THE HEALTH SCIENCE PROFESSIONS**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for students who are interested in learning about the kinds of writing typically done by clinicians, researchers, and others working in health science contexts. The course focuses on developing the skills needed to write and communicate effectively in health and medical contexts, from writing essays for graduate and professional program applications and documenting research to communicating with patients and staff, writing professional reports and correspondence, and giving conference presentations. Students will gain familiarity with the formal requirements of biomedical abstracts, literature reviews, and research papers, and they will learn effective strategies for conducting secondary research using health science databases and search engines. The course will also introduce techniques for improving documents, structure and style, so that readers can easily grasp, follow, and absorb the significance of the information presented. Students will be introduced to expectations and challenges they are likely to encounter in other common writing scenarios, such as explaining complex information to patients, writing reports for administrators or regulatory agencies, and communication policies or procedures to staff. Different approaches to writing graduate and professional school personal statements will be discussed, and students will draft and revise either personal statements for applications or mission statements articulating their professional visions within a larger ethical framework. Through the course of the term students will work towards completion of a final paper on a medical communication issue, and they will present their findings in a conference-style format, at the end of the semester.  

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  

**ENGCMP 0540 - INTRODUCTION TO DISABILITY STUDIES**

Minimum Credits: 3  
Maximum Credits: 3  
This course provides students with a foundation for using writing to understand, apply, and critically engage with key concepts and histories that have been crucial to the experiences of people with disabilities, and perceptions and treatment of those with disabilities. Students can expect to explore and write theoretical pieces, first-person accounts, and representations of people with disabilities. They will learn various models of understanding and discussing disability (including the social, medical, individual model, and identity models) and the histories that have shaped the lives, experiences, and perceptions of people with disabilities. Students in the course will have the opportunity to compose rhetorical analyses of popular, public, and professional representations of disability. Historically, disability has been viewed as a deficiency or defect through the lens of religious and, most prominently, medical discourses, locating disability within an individual's body and mind. Seeing disability as a problem to be solved has resulted in significant barriers to access and representation for people with disabilities within all areas of the public sphere. Students will
develop their own written critical inquiries into concepts such as normalcy, disability, and barriers to access (including physical, social, attitudinal, legal barriers). This course will not only offer critical interrogations of disability as a construct, but also center the lives and experiences of those with disabilities, viewing disability as a locus of identity and culture. To that end, students will watch documentaries and television media, and read memoir, personal essays, and poetry that present the pride, struggles, and everyday experiences of people with disabilities. Students will also study the Disability Rights Movement and inquiries into identity politics as related to disability as an identity category. The course will invite students to use composition to increase accessibility for those with disabilities and to consider the potentials and limitations of universal design.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

**ENGCMP 0550 - TOPICS IN PUBLIC/PROFESSIONAL WRITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This topics course is intended for students beginning the public and professional writing certificate, and as a writing-intensive course for students fulfilling general education requirements or interested in writing as a subject as well as a mode of instruction. The course will focus on varied topics, addressing different forms and environments for public and professional writing.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Requirement Course

**ENGCMP 0560 - WRITING ARGUMENTS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course has two goals: to help students become more adept at understanding and critically analyzing arguments, and to help students become better arguers themselves. Students in "Writing Arguments" will practice composing arguments across a variety of forms, genres, and technologies (written, visual, oral, digital) in order to develop and hone their persuasive language skills. As part of this practice, students will have the opportunity to design and participate in written and oral debates on topics of present interest and to compose their own examples of public persuasive communication. Writing Arguments would be especially appropriate for students headed to law or graduate school.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Requirement Course

**ENGCMP 0565 - WRITING PLACES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
A. Can place make meaning? What roles do spaces, ecologies, or geographies play in shaping how we experience people, rooms, buildings, communities, regions, or the world? How do others, based on our placings, see us within these multiple frames? Writing Places introduces participants to cultural and rhetorical exchanges with places, and to constructions of place and community by thinking and moving through them. We'll consider what it means to construct, to be responsible for, to be culturally aware of, and to live place in local ecologies and/or digital/virtual environments. Unpacking current social in/justice issues and the communities they affect, participants may explore issues of racism, environmental and otherwise, land-based social in/justice, environmental sustainability, disability in/justice, im/migration, community-based_ACTIVISMS, and more. Through this process, we may be challenged to reorient our place/identity/orientation through various genres of writing places.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or
ENGLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 0570 - TOPICS IN BLACK RHETORIC AND PUBLIC WRITING

Minimum Credits: 3
Maximum Credits: 3
This course will focus on varied topics as developed by the instructor. The course will explore both rhetorical theory and rhetorical practice, and it will center Black experiences, criticism, rhetoric, and public writing. Students can expect to study different critical approaches to Black rhetoric.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: DSAS Diversity General Ed. Requirement, SCI Diversity General Ed. Requirements, Writing Intensive Course (WRIT)

ENGCMP 0600 - INTRODUCTION TO TECHNICAL WRITING

Minimum Credits: 3
Maximum Credits: 3
This introductory course is for students in various technical fields. Representative technical reports will be studied, as well as abstracts, the presentation of visuals and oral communication. Writing assignments will emerge from case studies reflecting on-the-job challenges.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

ENGCMP 0610 - COMPOSING DIGITAL MEDIA

Minimum Credits: 3
Maximum Credits: 3
This course requires students to compose digital media while exploring the rhetorical, poetic, and political implications of multiple writing platforms. Students will learn how to compose a range of critical media objects using web-authoring languages, text, sound, images, and video in proprietary and open-source software. Classes will focus on theories of writing, composing, design, critique, delivery, and networked distributions; critique and analysis of digital media produced by professional and amateur digital media practitioners; and analysis and revisions of digital media composed by the students themselves.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

ENGCMP 0620 - THEORIES OF WRITING AND TEACHING

Minimum Credits: 3
Maximum Credits: 3
This course explores theoretical and practical questions regarding how we understand the practice of writing and how we teach it. Thus the goal of the course will be for students to engage various debates regarding literacy theories and experiment with different approaches to literacy instruction. The work of the class will be analytical, inventive, and experimental, as students will have the opportunity not only to study literacy theories and pedagogues but also to create imaginative responses to these theories by considering how teachers might translate theoretical understandings about literacy into classroom practice.

Academic Career: Undergraduate

Course Attributes: Writing Requirement Course

ENGCMP 0641 - WRITING FOR CHANGE

Minimum Credits: 3
Maximum Credits: 3
This course is an opportunity for students to examine and produce writing that engages in advocacy, solidarity, social critique, and/or social justice. Students will explore theories of persuasive writing for public audiences, as well as argumentative strategies more broadly. Students will define the subject of a core project for the term, and move beyond understanding an issue to understanding various discourse communities that generate writing on that topic, how those organizations represent themselves, and how they define an audience. Our theoretical discussion will be balanced by a more pragmatic look at the language of social change, and how various writing forms, produced by nonprofits, activist groups, international organizations and coalitions, as well as socially engaged journalism, inform, persuade, and engage the public. Students in Writing for Change can expect to compose traditional essays as well as public writing in print, digital, visual, and a variety of other forms of persuasive communication.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Intensive Course (WRIT)

Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 1099 - THE LANGUAGE OF POLICY AND POWER: TOPICS IN DIVERSITY

Minimum Credits: 3
Maximum Credits: 3
This course invites students to deepen and expand their understanding of public policy writing and to build the skills necessary to address the unequal distribution of power and privilege influencing policy in the public sphere. The course provides students with the opportunity to develop a portfolio of practical and analytical policy-related writing by grounding our work in current discussions about diversity (including race, gender, LGBT+, ethnicity, ability, religion, and class). In this writing-intensive class, students will write a variety of documents, such as a history memo, a set of responses to the readings, a letter of public comment, an op-ed, a polemical essay, and a final policy memo, related to a specific and properly-scaled diversity policy issue. The course will address the specialized use of language, conventions and formats, premises, motives, and purposes related to policy documents and arguments in light of diversity. By preparing both reflective academic and professional policy documents, students will master not only the basics of policy writing, but, through their own research and writing, the rhetorical and critical thinking skills necessary to create effective policy. Students will learn to employ methods of inquiry, analysis, and composition characteristic of written and oral policy discussions as they relate to diversity questions, concerns, and legal requirements. We will read broadly and deeply, and engaged, informed class discussion responding to reading and current policy questions is a cornerstone of the class. We will explore how the explicit and implicit history and applications of public and private policies have created long-standing outcomes that are often taken for granted, and address ways to change and improve those outcomes.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
ENGCMP 1100 - LANGUAGE OF BUSINESS AND INDUSTRY

Minimum Credits: 3
Maximum Credits: 3
This course concentrates on how professional people in business and industry communicate among themselves and with the rest of the world. We will both analyze written material from professional areas and practice forms and languages of successful communication in those areas. This course is primarily for students who plan to enter or now hold positions in business and industry.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

ENGCMP 1101 - LANGUAGE OF SCIENCE AND TECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course analyzes the rhetorical character of scientific writing and examines the role of writing and the use of language in the scientific process. The course permits students to assess professionally prepared texts as well as texts produced by other students, to write and re-write their own text and to develop a critical awareness of the resources of language employed in science and technology.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)

ENGCMP 1102 - LANGUAGE OF MEDICINE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 1103 - PUBLIC RELATIONS WRITING

Minimum Credits: 3
Maximum Credits: 3
This course studies the ways an organization communicates with its public through news releases, speeches, brochures, feature stories, annual reports, etc. The course examines the stylistic choices each writer makes and develops a critical language to describe how meaning is created through the way information is arranged. Issues of the media, ethics, propaganda and the uses of ambiguity will also be addressed.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006)
Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 1104 - CORPORATE STORYTELLING
Corporate writers play key roles in defining and developing the communications landscape for organizations and their audiences. But what exactly is corporate writing? How do we, as writers, ensure we are effectively advancing the goals of our companies and clients? In this course, students will explore the conventions of content marketing, search engine optimization, writing for the web, and the other forms of business writing in order to craft inventive and accessible messages. We will also examine corporate storytelling as a tool used to construct and maintain strong company personas. Assignments will incorporate written, visual, and oral components as students launch their own companies to simulate real world projects and dynamics. This course will help you strengthen and flex your creative communication skills to engage and influence readers in a variety of channels within the corporate setting.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)
Course Attributes: Writing Intensive Course (WRIT)

ENGCM 1111 - PROFESSIONAL WRITING IN GLOBAL CONTEXTS

In order to create effective and powerful documents for diverse global audiences, students need to be able to negotiate the expectations, assumptions, conventions, and professional practices of different cultures. This course will help advanced undergraduate students better understand what is at stake in writing for international audiences, how to research issues relating to communication (and especially the use of English) in global contexts, and how to write professional publications for particular international audiences.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) or ENGR 0012

ENGCM 1112 - PROFESSIONAL USES OF SOCIAL MEDIA

As philosopher George Santayana once said, Those who cannot remember the past are condemned to repeat it. But how do history and ethics intersect to inform our decisions as writers? How do we serve the roles of advertiser and PR specialist simultaneously? What do the answers of these questions look like in the context of a real-world campaign? In this course, students will learn how pivotal ethical moments in advertising and PR history changed the face of these professions and influence our creative choices even now. Students will use the four-step planning process of research, strategy, implementation, and evaluation to construct innovative campaigns and tackle common ethical issues these professions face today. Topics to be explored may include manipulation and misrepresentation of facts, privacy concerns in the technology age, sensitivity to diversity and appropriation, responsible interaction with vulnerable populations, subliminal messaging tactics, and more. By the end of this course, students will produce a multi-faceted PR and advertising campaign that navigates a complex ethical issue and showcases their professional writing skills.

ENGCMP 1130 - PROJECTS IN DIGITAL COMPOSITION

Minimum Credits: 3  
Maximum Credits: 3  
This course builds upon Composing Digital Media (ENGCMP 0610) by requiring students to compose original projects in a particular focal area digital media while exploring the rhetorical, poetic, and political implications of that focal area. Where students in Composing Digital Media typically learn how to compose a range of critical media objects using web-authoring languages, text, sound, images, and video, Projects in Digital Composition will give students the opportunity to focus closely on a particular theme or category of multimodal composition. As with Composing Digital Media, theories of writing, composing, design, critique, delivery, remediation, and revision are central to the coursework. The course also emphasizes the importance of self-guided skills acquisition.

Academic Career: Undergraduate

ENGCMP 1200 - ADVANCED TOPICS IN COMPOSITION

Minimum Credits: 3  
Maximum Credits: 3  
Each course will use a specific thematic or methodological focus to enact, reflect on, and criticize a specialized mode of academic or professional discourse. Topics courses require regular reading, writing, and revision.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)  
Course Attributes: Writing Requirement Course

ENGCMP 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN

Minimum Credits: 3  
Maximum Credits: 3  
How are computational artifacts currently designed, and how can they be designed differently? What stories can be told by collaborating with computers? What stories can't be told? This project-based course will enable students to engage with and create computational narratives and interactive projects with data, hardware and algorithms. Each collaboratively taught iteration of the course will include 3-4 of these units, such as: fabrication, interactive hardware, computational narrative, interactive data, and prototyping. Students will consider what it means to compose with
computers for human audiences, and with humans for computer audiences. Designed for Digital Narrative and Interactive Design (DNID) majors to
take midway through the major, it will help students consolidate the interdisciplinary knowledge they have obtained in their prerequisite courses,
introduce them to examples of interdisciplinary work that will inform their later capstone projects, and give them practice in working on collaborative
projects that span the humanities and information/computing fields.

Academic Career: Undergraduate

ENGCMP 1210 - TUTORING PEER WRITERS

Minimum Credits: 3
Maximum Credits: 3
This course prepares students to be effective tutors for peer writers by introducing them to issues and scholarship in teaching, writing and working as a tutor. Students from any discipline who are interested in careers in teaching, or students who recognize the importance and difficulty of responding well to drafts written by others will find this course of interest. The course is a prerequisite for those students wishing to work as peer interns in the writing center.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or
ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)
Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 1220 - THE ART OF THE ESSAY

Minimum Credits: 3
Maximum Credits: 3
This course offers students who have fulfilled the introductory composition requirement an opportunity to develop more advanced strategies as writers and a deeper understanding of how "effective" writing gets defined in various contexts. As they work on their own writing, students will read and discuss work by writers whose prose has received acclaim. Weekly writing assignments and exercises will provide the occasion to explore different styles and approaches to an audience.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or

**ENGCMP 1400 - GRANT WRITING FOR NONPROFITS**

Minimum Credits: 3  
Maximum Credits: 3  
This course allows students to study the practices related to proposing change, requesting funds, and defining projects.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGL 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)  
**Course Attributes:** SCI Expression: Tech/Bus/Res writing Gen. Ed. Req., Writing Intensive Course (WRIT)  

**ENGCMP 1401 - WRITING FOR FUNDRAISING AND DEVELOPMENT**

Minimum Credits: 3  
Maximum Credits: 3  
This class focuses on Writing for Fundraising and Development. "Development" is the work of cultivating relationships between an organization and its community of supporters in order to sustain the organization and advance its work. All nonprofits do development work; large nonprofits likely have an entire development team. Those who work in development may run major campaigns, communicate with donors, write for social media, organize events, solicit corporate giving and corporate sponsorships, and write everything from newsletters to direct mail pieces to thank you letters to reports. This class focuses on the writing that supports development work and teaches you the landscape of development work today. We will study real-world examples from both local and national nonprofits. You can expect to identify an organization to write for this term and to create a series of documents (in various forms) that will constitute your development portfolio by the end of the term. Some Pitt alumni who work in or run development offices will visit class to talk about their experiences.  
**Academic Career:** Undergraduate

**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGL 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Intensive Course (WRIT)  

**ENGCMP 1402 - GRANT WRITING FOR RESEARCH**

Minimum Credits: 3  
Maximum Credits: 3  
Grant Writing for Research invites students to study practices related to researching and requesting federal funds for a specific project. This course is for those interested in learning: how funding supports projects and research in their aspirant discipline or area of study; the interest areas and differences amongst notable grant-making agencies; how to read requests for proposals; proposal formats; logic models; and how to write and collaborate within a team. Research experience is not needed to enroll, but students should be interested in federal grants, either for their own (future) work or to gain valuable writing knowledge to support others. By the end of the course, students will understand the nature of public-sector grants, their lifecycles, where to find them, and application requirements. Students will also practice writing parts of a proposal (individually and within teams), engage in peer review, and deliver pitches to other teams in the class.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

ENGCMP 1410 - ADVANCED RESEARCH/DOCUMENTARY WRITING

Minimum Credits: 3  
Maximum Credits: 3

This course offers students the opportunity to study and use techniques of research that are used by writers in a range of professional settings.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 1420 - WRITING PROPOSALS FOR BUSINESS

Minimum Credits: 3  
Maximum Credits: 3

Successful business proposals have great potential; they can jumpstart businesses, build a strong client base, create change in the workplace, foster professional relationships, and facilitate projects that meet the needs of specific audiences. But what is a business proposal? How does it differ from a grant proposal or a business plan? What should a business proposal look like? How do we make our proposals stand out from the rest? This course will enable students to understand the functions and conventions of business proposals, the types of research that they require, and the processes that generate them and lead to approval. Coursework will help students develop an understanding of business proposal writing from an initial idea through final submission. Students will complete a variety of written pieces leading up to the final proposal, which may be valuable in their employment portfolios. Upon completion of this course, students will have acquired the research and writing skills necessary to write successful proposals for real-world for-profit contexts.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFML 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
Course Attributes: Writing Intensive Course (WRIT)

ENGCMP 1430 - USABILITY TESTING IN TECHNICAL WRITING

Minimum Credits: 3  
Maximum Credits: 3

This course prepares students for the creative and technical demands of the professional and technical writing workplace, ensuring each student possess the hard skills of usability testing and the soft skills required to best communicate those results. It introduces students to design theories and principles alongside practical applications on measuring usability and user experiences for products and services. Ethical and practical questions of accessibility and disability necessarily inform our discussion and practice. This course also incorporates aspects of product consulting, providing students with an opportunity to apply their theoretical and practical understanding of usability testing to the benefit of stakeholders.

ENGCMP 1452 - DISCIPLINING ENVIRONMENTAL EDUCATION: USING DIGITAL STORYTELLING TO UNPACK ENVIRONMENTAL ISSUES

Minimum Credits: 1  
Maximum Credits: 1

In other parts of the world, such as Finland, environmental education is infused throughout the curriculum in history, science, technology, and math. This pop-up course serves as one way to provide a platform for Pitt students to experience Finnish nature schools in their backyard. The goal of the pop-up classes will be to provide a space for developing student projects at both the undergraduate and graduate levels. This course is geared for
students interested in authoring visual content and testing the productive tensions of this new media. During the pop-up classes, we will establish a student-led AR/VR authoring club, training sessions for students, and work to amplify and circulate our content across our local and global communities.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

### ENGCMP 1510 - WRITING WITH STYLE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Designed with the writer in mind, this advanced-level, workshop-style course explores the sentence in its many forms and seeks to deepen students' understanding of grammar, syntax, punctuation, and style as opportunities for creative endeavor. Through the use of imaginative exercises, revisions, and discussion of texts written by students, poets, and essayists, we will immerse ourselves in the practice of writing compelling sentences that best express our thoughts and motives. The course involves a weekly workshop of works-in-progress and the creation of a chapter-length (20-25 pages) prose revisionary project by the end of semester.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Requirement Course

### ENGCMP 1551 - HISTORY AND POLITICS OF THE ENGLISH LANGUAGE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces students to both historical and present use and descriptions of the English language. Students also learn techniques for analyzing and understanding the language.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)  
**Course Attributes:** DSAS Diversity General Ed. Requirement, Medieval & Renaissance Studies, SCI Diversity General Ed. Requirements, West European Studies, Writing Intensive Course (WRIT)

### ENGCMP 1552 - LANGUAGE, LITERACY, LEARNING

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines how individuals and societies acquire, develop, and make use of literacy. Students engage in questions concerning the social and personal consequences of literacy, and they explore various theories and practices of reading, writing, and schooling. The dual focus on how literacy functions in the development of individuals and societies makes this course especially appropriate for advanced students considering careers in elementary and secondary education.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)  
**Course Attributes:** Children's Literature, Writing Intensive Course (WRIT)

### ENGCMP 1900 - INTERNSHIP: PUBLIC/PROFESSIONAL WRITING

**Minimum Credits:** 3  
**Maximum Credits:** 3
This internship is intended for juniors and seniors who are pursuing the public and professional writing certificate. The internship is designed to give students a productive, substantive writing experience where they will learn from and contribute to the sponsoring agency or project. Students will consult with an advisor to arrange for internships and to construct the plan of work, writing, and oversight.

Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: LG/SNC Elective Basis

**ENGCMP 1901 - UTA IN TEACHING AND TUTORING WRITING**

Minimum Credits: 1  
Maximum Credits: 3  
This experience is intended for students who wish to engage with the theory and practice of teaching writing under the mentorship of an English department faculty member. The undergraduate teaching assistantship is designed to give students a productive, substantive experience in which they will learn from and contribute to students’ learning in a classroom or in the writing center. Students will consult with a faculty mentor to arrange the undergraduate teaching assistantship and to construct the plan of work, writing, and supervision.

Academic Career: Undergraduate  
Course Component: Directed Studies  
Grade Component: LG/SNC Elective Basis

**ENGCMP 1902 - INDEPENDENT STUDY PUBLIC PROFESSIONAL WRITING**

Minimum Credits: 1  
Maximum Credits: 6  
This course will allow PPW students to define special projects and a course of study to explore over the course of a term.

Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: LG/SNC Elective Basis

**ENGCMP 1903 - SERVICE-LEARNING SEMINAR IN PUBLIC AND PROFESSIONAL WRITING**

Minimum Credits: 1  
Maximum Credits: 1  
This course is open to students who are enrolled in public and professional writing courses. It is taken concurrently with these anchor courses as a voluntary, one-credit add-on. The service-learning seminar pairs meaningful and sustained service activities in a professional non-profit organization with investigation of professional writing.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Satisfactory/No Credit

Grade Component: LG/SNC Elective Basis
ENGCMP 1906 - PROFESSIONAL EXPERIENCE: WRITING, EDITING, OR PR

Minimum Credits: 3
Maximum Credits: 3
This course offers an exciting opportunity for students who have taken at least a couple of PPW or Writing courses: Professional Experience at Sampsonia Way, the literary journal of City of Asylum/Pittsburgh. http://www.sampsoniaway.org The PPW program is teaming up with City of Asylum to produce the magazine. The course is for responsible students who are interested in writing for this journal or running social media to promote the journal. The team will work with a teacher who will serve as managing editor and also faculty member in charge of the project. The group will learn about writing, editing, and PR while producing the online literary magazine. You can also expect to learn more about free speech and social justice while working with writers who are under threat in their home countries. Weekly meetings on campus will focus on learning about the context for the work, learning good practices for professional writing, editing, and PR, reading work by writers in exile, and workshopping your articles for publication. Interviews for articles will be in-person or via Skype. Expect to spend 10-12 hours a week working on this project. You will also need to attend class. A monthly meeting will be held at City of Asylum on the Northside (easily accessible by bus).

English Film Studies

ENGFLM 0355 - VISUAL LITERACY

Minimum Credits: 3
Maximum Credits: 3
This is an online course. Visual literacy is an emerging area of study which deals with the growing importance of visual culture in our contemporary world and how we interpret what is seen. This course will emphasize the process of critically viewing specific media artifacts and provide tools to students that will allow them to comprehend and evaluate information presented by a variety of forms of visual media, including television, video, film, photography, and the internet. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0400 - INTRODUCTION TO FILM

Minimum Credits: 3
Maximum Credits: 3
This is a basic course on the visual arts that offers the student abroad introduction to the medium of film. As part of this overview, the class will consider such issues as: the process of contemporary film production and distribution; the nature of basic film forms; selected approaches to film criticism; comparisons between film and the other media.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0401 - INTRODUCTION TO VISUAL CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course develops skills to interpret visual culture in contemporary life. Using a wide variety of media, including film, television, advertisements, fashion magazines, museum exhibits, comic books, painting, graffiti, video games, the web, and photography, the course focuses on understanding how conceptions of visuality, gender, race, and politics shape definitions of high and low culture as well as questions of knowledge and being. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 0520 - FILM THEORY

Minimum Credits: 3
Maximum Credits: 3
This course is designed as a survey of film theory as a historical practice. Film Theory gives students both a firm grasp on the major topics of film theory from its origins to new media, and an understanding of how those theories developed in relation to their historical contexts. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis
Course Attributes: Childrens Literature, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0532 - INTRODUCTION TO FILM GENRES

Minimum Credits: 3
Maximum Credits: 3
This course surveys major film genres, which may include Westerns, musicals, horror, film noir, screwball comedy, etc. We will trace the history of film genres from the studio era to the present, including European transformations. The course seeks to relate film genres to the culture that created them. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Film Studies, Writing Requirement Course

1239
ENGFLM 0540 - WORLD FILM HISTORY

Minimum Credits: 3
Maximum Credits: 3
This course both introduces students to techniques of film analysis and acquaints them with major works and movements in international cinema. The course pays particular attention to the evolution of film narrative and visual style through landmarks in film development--European avant-garde films, British documentary, Italian neo-realism, etc. This is a Critical Studies course and is a required course for the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Historical Analysis General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req., West European Studies

ENGFLM 0570 - INTRODUCTION TO NEW MEDIA

Minimum Credits: 3
Maximum Credits: 3
In this course we will look at how new media -- ranging from television, computers, digital image production, video games, to social media platforms and smart phones -- have begun to supplant the social and cultural prominence of film and other traditional media. We'll look at how these media work: at the history and theory of their development, at the changes they have brought about in a broader media culture, and at their social status and significance (e.g., The place they occupy in culture, the kinds of interactions they make possible). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 0585 - TECHNOLOGIES OF THE BODY

Minimum Credits: 3
Maximum Credits: 3
This course considers how we learn new technologies by looking at the treatment of the body in cinema and television, as well as animation, sports, gaming, and VR. In addition to analyzing media examples, students will experiment with low-tech and high-tech adaptations of optical toys and smart phone cinema to explore how movement and the body have been imagined in science and entertainment. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGFLM 0590 - FILMMAKING: PRODUCTION AND CRITICISM

Minimum Credits: 3
Maximum Credits: 3
This course introduces filmmaking practices as related to cinematic expression, aesthetics, criticism, and ethics. Working in groups, students will produce short film projects. All aspects of production are viewed as a creative extension and continuation of the film writing, directing, and producing process. Through lectures and a range of readings, the class will explore craft, aesthetic, production and storytelling issues. This is an introductory Production course and counts for Category III towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGFLM 0712 - CRITICAL MAKING
Minimum Credits: 3
Maximum Credits: 3

The Maker movement is an emerging social and media form that is at once highly networked and post-digital. Making is situated at the intersection of social media, the online gift economy, and a participatory, interventionist engagement with one's physical environment. Drawing on open source ideals and innovation structures -the free sharing of code to enable collaborative development - making has become an attempt to democratize material culture through networked access to tools. MakerSpaces and MakerHubs have become critical nodes in efforts to materialize the virtual gift economy of the Internet. In this course we will engage the intellectual and practical roots of this new medial and social form and engage in our own critical making projects, utilizing scanning, modeling, and 3D printing technologies. We will begin by looking at the history and philosophy of open source software development, and then the political, social, cultural, and technological developments that have together given rise to critical maker culture. We will then learn some of the basic tools of scanning, modeling, and 3D printing. After initial modeling and printing assignments, students will form groups and develop collaborative final projects that involve materializing complex conceptual relationships from a topic of your choice and in a medium of your choice. The aim of this course is to "close the circuit" between creative conceptual production, social networking, and materialized object relationships. Critical making is about critically engaging and creatively remaking the world around us. By the end of the semester, you will become a critical maker! This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGFLM 0812 - MEDIA/ECOLOGY

Minimum Credits: 3
Maximum Credits: 3

From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems and the technological assemblages with which they are intertwined. This course will explore both media that interface with natural ecosystems and works that engage contemporary media systems at different scales. The secret life of information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment. Students will have the option to produce collaborative media projects that explore the themes of the course. These can take the form of simulations, games, network graphing, film or video projects, local ecosystem analysis and/or visualization, or the mapping and analysis of a media ecosystem that interfaces with the environment. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGFLM 1190 - BRITISH FILM

Minimum Credits: 3
Maximum Credits: 3

This course explores the status of British film as a national cinema. It examines the forms and styles indigenous to British cinema; the relationship of British cinema to British social reality; the changes in film language, production and forms as they relate to the development of British cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies, West European Studies

ENGFLM 1192 - IRISH FILM

Minimum Credits: 3
Maximum Credits: 3

Irish Film will consider what it means to think about films in terms of being a national cinema or part of the transnational cinema during the global Hollywood era. We will also consider how the UK and USA imagine Ireland as well as what effect Irish cinema has had on other cinemas due to
immigration and the increasing visibility of Irish directors, locations, and actors in the international industry. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor, and also counts for the Irish minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ENGFLM 1226 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

After the 1917 revolution in Russia, Lenin famously said: "to us film is the most important of all the arts." Communists were to use cinema for propaganda purposes, in order to carry out massive state-wide campaigns aiming to bring radical social change. However, Soviet avant-garde filmmakers were also concerned with revolutionizing filmmaking itself. Some three decades after Lenin's remarks, the leaders of the countries of Eastern Europe which had become "Soviet satellites" after World War II, attempted to use censorship and control over the arts and cinema to produce effective propaganda for their own political campaigns. Writers, artists, and filmmakers were coveted allies of these new communist regimes that came to power in the 1940s. Again, however, filmmakers and actors did not always toe the Party line. Some were able to use film to craft complex works with subtle messages portraying aspects of daily life as it was experienced by ordinary people under the new regimes. Films that we will watch and analyze, released in Hungary, Romania, Yugoslavia, Poland, and Czechoslovakia in the decades before the fall of communism in 1989 managed to depict, evoke, and criticize "really existing communism." This course will trace the history of East European communism and of East European film-making from 1944 to 1990, acquainting students with examples from an exceptional body of cinematographic work together with the broad outlines of East European history. Students will learn to "read" films from 20th century Eastern Europe in their cultural, political, and historical context. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**ENGFLM 1290 - AMERICAN FILM 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course explores the development of American film from 1895 to 1939. Though the course will emphasize the evolution of American film style and genre, attention will also be paid to the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. The course will provide the student with the historical and aesthetic background with which to better appreciate the American cinema of today and yesterday. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**ENGFLM 1291 - AMERICAN FILM 2**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course explores the development of American film from 1940 to the present. The course examines the evolution of American film style and genre, the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**ENGFLM 1390 - CONTEMPORARY FILM**
Minimum Credits: 3
Maximum Credits: 3
Surveys international film from 1970 to the present and the major film movements of the period. It also demonstrates the stylistic and cultural interrelationships between the international film schools. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGL10 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

ENGFLM 1391 - TOPICS IN CONTEMPORARY CINEMA

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course deals with issues related to contemporary cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1400 - SUPERHEROES ON FILM AND TELEVISION

Minimum Credits: 3
Maximum Credits: 3
This course explores a wide range of issues relevant to the superhero genre in popular media, including: the origins of the genre; various cultural critics' responses to it; the intersections between superhero narratives, audiences, and the cultural and historical contexts that produce them; and the ever-changing form and structure of the genre itself. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGFLM 1410 - BOLLYWOOD AND INDIAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course will offer an overview of various Indian cinema traditions in their historical, aesthetic, and cultural contexts. Students will learn how to analyze Indian films from the 1920s to the present in terms of formal techniques, narrative conventions, and viewing contexts and also in terms of broader historical contexts such as colonialism and the independence movement. The history and formal conventions of Mainstream Bombay Cinema will be counterpointed with other kinds of Indian film. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 1420 - TRANSGNATIONAL EAST ASIAN CINEMAS

Minimum Credits: 3
Maximum Credits: 3
This survey course comparatively studies the forms and histories of East Asian cinemas in the context of transnationalism, post-colonialism,
regionalism, and globalization. This course, therefore, will explore the transnational connections among different film cultures in China, Taiwan, Hong Kong, Japan, and South Korea. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGFLM 1460 - GLOBAL STARDOM AND CELEBRITY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the analysis of the "star text" of individual stars/celebrities, which involves the interrelationship of screen-mediated roles, off-screen appearances and information, publicity material, and cultural context. Students will research a specific star/celebrity as a nexus of global circulation and fandom, while addressing some core methodological questions: what is the difference between star biography and star analysis? How do we read the "star/celebrity text" in different local contexts and ideas about the public and the private? How does stardom presume and shape norms of identity pertaining to gender, sexuality, social class, race/ethnicity, bodily norms, and other cultural values? This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1470 - FILM DIRECTORS

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific director. This course looks at the mode of production of films and works to understand the interweaving contributions of directors, producers and screenwriters. It will also consider less personal forces--social climate, studio style, genre and audience taste. It examines the films of particular directors for signs of personal style, theme, or personal preoccupation. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1471 - ORSON WELLES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the screen career of Orson Welles. In considering his films, the course explores the evolution of Welles' cinematic style; the thematic concerns of his work; the ideological implications of his fictional universe; and his contribution to the development of American narrative cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1472 - HITCHCOCK'S FILMS

Minimum Credits: 3
Maximum Credits: 3
This course will look at the development of Hitchcock's cinema as a way of touching upon issues central to the study of film as a cultural force; the relationship between art and entertainment; the social origins of suspense and fear; the role of the director in creating a film's meaning; the role and function of genre and cross-generic influence. We will closely look at films from all phases of Hitchcock's career and examine what their style, tone,
and subject matter reveal about the powers of cinema and Hitchcock's influence on a new generation of directors. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Film Studies, West European Studies, Writing Requirement Course

**ENGFLM 1473 - SPIKE LEE**

Minimum Credits: 3  
Maximum Credits: 3  
Spike Lee's films, videos, and TV work have been both provocative and groundbreaking, challenging the structures of American filmmaking at the level of production, reception, and film style. Including feature films, documentaries, music videos, and mini-series, his work has a diversity that discourages the restrictive labels of African-American director or independent director. This course will cover most of this body of work in terms of Lee's cinematic style and cultural concerns, and also in terms of the cultural debates his work has triggered or participated in. By the very nature of these films, a Spike Lee course has to engage with much more than directorial style and vision alone, and will thus also be an opportunity to consider various approaches to the study of film. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ENGFLM 1476 - THE FILMS OF STANLEY KUBRICK**

Minimum Credits: 3  
Maximum Credits: 3  
This course aims to discover the extent to which Kubrick's films are unified in style and theme. We will explore their sources in other films, reputed novels and short stories. Special attention will be paid to themes commonly found in Kubrick; a satirical view of society, the links between violence and sexuality, etc. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**ENGFLM 1479 - CHILDREN AND MEDIA**

Minimum Credits: 3  
Maximum Credits: 3  
This course examines contemporary children's media from social, cultural, and historical perspectives, with a focus on media in the United States produced by and for children ages 0-13. Video games, the internet, and emerging digital and portable technologies for communicating and consuming media are often tailored specifically to children, who, as "digital natives," are increasingly early adopters of new technologies. This course asks how children's media fits into contemporary debates about children's role in families, schooling, and the public sphere. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGFLM 1480 - TOPICS IN FILM**

Minimum Credits: 3  
Maximum Credits: 3  
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. Explores selected issues in the production, reception, themes, or theory of film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies
major and minor.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1481 - TEEN FILM

Minimum Credits: 3
Maximum Credits: 3
This course will look at a type of film that has been prominent in Hollywood and international cinema since 1955: the youth film or teen film or teenpic. The teenpic has been variously defined as films targeted at a teenage market and as films about teenagers (and sometimes both). In considering the teenpic as a genre, we will attempt to break it down into subgenres such as the juvenile delinquent film, the teen musical, the teen horror film, nostalgic teen films, postmodern youth cult films, African American teen films, "girl" teenpics, and LGBTQIA+ teenpics. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1482 - THE STAR SYSTEM AND THE MOVIES

Minimum Credits: 3
Maximum Credits: 3
This course will deal with all aspects of the phenomenon of stardom in film: the production of stars, film acting, and fandom. This is not a course on any particular star, but we will use case studies of individual stars for our weekly focus. We will draw on film examples from the old Hollywood studio system as well as from post-studio films and popular culture. A particular emphasis of the course will be gendered differences between star images. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Film Studies, Writing Intensive Course (WRIT)

ENGFLM 1483 - FILM SOUND

Minimum Credits: 3
Maximum Credits: 3
In this course, we will shift the way we think about films and learn to listen to films, using the language and tools of audio analysis to analyze the aural environment produced by films. Topics include the history of film sound, the relation of sound and image, aural and visual pleasures, sound and narrative meaning, soundscapes and theories of shock and modernity, the aesthetics of analog and digital sound in cinema, the 'realism' of recorded sound, film sound and space, sound in documentary cinema, and culturally specific theories of sound. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1485 - FILM AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course examines film production, economics and forms of representation as reflections of political attitudes. We will study a variety of narrative and non-fiction films which reveal differing political points of view, ranging from those that legitimize the dominant culture to those which criticize, if not challenge, dominant attitudes. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and
ENGFLM 1487 - FILM CENSORSHIP AND AMERICAN CULTURE

Minimum Credits: 3  
Maximum Credits: 3  
This course considers some of the most important censorship battles in American history. As the first mass medium to pose a serious threat to the cultural hegemony of the genteel middle class, the movies initiated both a debate about the place of media in our society and a series of struggles over the control of commercialized leisure. This course seeks a deeper appreciation of the complexities of contemporary media politics through an engagement with the history of motion picture regulation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

ENGFLM 1489 - CULT FILM

Minimum Credits: 3  
Maximum Credits: 3  
This course will interrogate the criteria by which a film is identified as cult. A cult movie is not made; a film only becomes cult through the consumption patterns of an audience. This course explores how the nature of cult viewership shifted in response to technological innovation: at first VCRs, then DVDs, and now the internet. This course also looks to how cult has shifted now that unavailable films or banned films are increasingly accessible due to shifts in new media and the dominance of internet commerce (international shopping, eBay, bootlegs, downloads). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

ENGFLM 1490 - POLITICAL MEDIA: FILM AND POWER IN THE 20TH CENTURY

Minimum Credits: 3  
Maximum Credits: 3  
This is a study abroad course taught at the Pittsburgh-London Film Program. This class examines the way media has been constructed and used by elite institutions to advance broad and specific goals for the management of populations and the establishment of political and economic conditions beneficial to those institutions. It also looks at the use of media by progressive and radical groups to challenge those conditions and institutions, beginning in the early twentieth century and expanding in the era of digital media. It includes particular focus on cinema and imperialism, making use of the resources in London and online at the Colonial Film Project. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

ENGFLM 1493 - CITY MADE STRANGE: LONDON ON SCREEN IN HORROR AND SCIENCE FICTION CINEMA

Minimum Credits: 3  
Maximum Credits: 3
This is a study abroad course taught at the Pittsburgh-London Film Program. This course aims to explore the deep funds of strangeness and otherness that permeate London's places and spaces, through examining films and television series that show the city as a brimming reservoir of past and future shocks. The course will examine science fiction, horror and noir/neo-gothic cinema and television from all eras, with a particular emphasis on works that take London itself as a major part of their story. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGFLM 1495 - CITY SYMPHONY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a study abroad course taught at the Pittsburgh-London Film Program. The city has been an integral part of the filmmaker's vocabulary since cinema's genesis in the late nineteenth century. The urban environment and the craft of film grew up together in the twentieth century, seasoned by various convergences of technology, one notable one in the 1920s and another over the last fifteen years. This course bridges these two periods, drawing on history and theory to interrogate the form of the city symphony film essay, and develop an urban filmmaking practice that allows students to gather and formulate their own reflections on London. The course is made up of two strands, City Symphony and Urban Scavenger, taught by the same team in double sessions. Students will be strongly encouraged to bring ideas from one to the other, and to combine critical analysis with practical filmmaking. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ENGFLM 1497 - URBAN SCAVENGING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students a critical look at the writing, development, and production of film in the 21st century. Using case studies and examples from the masters of filmmaking in both the United States and the United Kingdom, students will gain in-sight into the nature of production, the economics of making a film, and the potential avenues through which film can be distributed to an audience. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGFLM 1499 - INDUSTRY INSIDER: FROM SHOWRUNNER TO FINAL CUT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students the opportunity to learn about screenwriting from a professional screenwriter and producer. The scope of the course will take students through the process of writing for screen based on the very simple stages of concept, story, outline, draft, and the revision and development process. Students will also learn about the pitch process and be given opportunities to practice the pitch based on their own individual stories. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**ENGFLM 1533 - DISABILITY IN FILM AND TELEVISION**
Minimum Credits: 3
Maximum Credits: 3
This course explores disability in media through representational tropes and trends as well as how political activism has focused on mainstream media as a site for protest, a site for education, and a site for self expression. We will explore trends in film and television while engaging with the important roles of social media and online communities. This is a Critical Studies course and counts for Category II for the Film and Media Studies major and minor. It (will be) part of the Disability Studies Certificate.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 1545 - AMERICAN FILM AND TELEVISION HISTORY

Minimum Credits: 3
Maximum Credits: 3
This American Film and Television Industry course is designed to demystify the film and television business, and give students a sense of the process and structures in which films and television shows are made and brought to market. They will explore the roles of the key personnel on a movie or television show from conception to completion including cinematographers, editors, writers, producers and directors. They will also examine the roles of agents, managers, lawyers and executives and learn how decisions are made from greenlight to distribution. Students will learn about the history of the entertainment industry from the studio system to present day and consider the disruptions of the films business today in that context. In order to truly understand this industry, students will read first-hand accounts of life in the industry and watch documentaries and narrative films that shed light on the film business. They will read texts that give overviews of how the industry works, its history, and how it has changed. Students will do their own research on various aspects of entertainment from production to distribution, and work in groups to present this research to the class. They will also be asked about how modes of production inform content. Guest speakers will speak to the class periodically to talk to their own experiences in the business. Ultimately, students will focus an area they are passionate about to complete a mid-term and a final project that will reflect their comprehensive knowledge of various aspects of the American film industry.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 1549 - INDUSTRIES AND FESTIVALS

Minimum Credits: 3
Maximum Credits: 3
This Film and Media Studies Program topics course serves as an overview of film histories historically and today, and it will explore the crucial ways that film industries have shaped contemporary production, exhibition, and distribution practices. Within the course, there will be a specific emphasis on film festival as a crucial element in global cinema. Film industries, be they free market giants such as Hollywood or national industries funded in part or in whole by the state, are crucial factor in the ways that films are made and shown, influencing aesthetics, politics, and the cultures of filmmaking. Explorations of film industries have shown how distinct market forces, technologies, national politics, and globalization have affected all aspects of cinema. This course will examine these elements, focusing on the Classical Hollywood era, the 1970s New American Cinema, and contemporary transnational film industries. Moreover, the course will focus specifically on the role of film festivals in the film industry. Since the pre-WWII era, film festivals have played a crucial role in a myriad of industries and markets, developing alternatives to Hollywood, promoting national cinemas, legitimizing colonialism, advocating anti-colonialism, and imagining a space for art in the cinematic industry. The course will examine festival history, theory and methods, allowing students to learn about how festivals have impacted industry history and how festivals are produced and executed.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 1585 - CINEMA AND REVOLUTION

Minimum Credits: 3
Maximum Credits: 3
This course investigates the relationship between Black power era, Black American cinema, and the third cinema movement, which are traditionally understood to be distinct movement/moments only loosely related through overlapping politics. In the course, our primary focus will be third world and Black American film making, and the postcolonial, pan-national and militant theoretical texts and movements that influenced the directors. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
ENGFLM 1610 - TOPICS IN GENRE

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course considers genres that are not commonly offered. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1613 - TOPICS IN FILM GENRE AND THEME

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course seeks to provide a forum for new issues that might arise in the area of film genre and/or the thematic of film representation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1615 - THE WAR FILM

Minimum Credits: 3
Maximum Credits: 3
This course will consider stable and changing elements of the war film genre, while remaining attentive to specific cultural moments, beginning with World War I. Although the main emphasis of the course will be on the war film as genre, part of the semester will be devoted to documentary and non-fiction approaches to war in cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1670 - GLOBAL ANIME

Minimum Credits: 3
Maximum Credits: 3
This course introduces the arts, history, and culture of Japanese animation (anime) in a global context. We will focus on analyzing the forms and idioms of anime in relation to changing technological conditions and the media environment. Students are expected to relate the aesthetic and cultural characteristics of anime with their own experience of digital technologies, and to expand their interest in anime to wider theoretical questions about techno-culture and new media. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 1671 - MAKING THE DOCUMENTARY

Minimum Credits: 3
Maximum Credits: 3
This is a production course in which students will research, define, and schedule their own projects. The class covers all stages of producing a documentary from the idea through development, preproduction, production and postproduction and will examine the fundamentals of the art of documentary making: artistic identity, point of view and storyteller, form and style, and light and sound etc. Students will develop and produce original documentary short film in a collaborative learning environment, working in small groups (of two or three students). They will write, develop, and shoot their own short documentary project (8 to 10 minutes). While those interested in writing or filmmaking will find practical uses for their skills in this course, students from all disciplines - writing, science, film studies, or general liberal arts - are welcomed, and will find benefit in the acquisition of skills for presenting, representing, and persuading via sound and image. No filmmaking experience is necessary. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1672 - VISITING FILMMAKER: PRODUCTION AND CRITICISM

Minimum Credits: 3
Maximum Credits: 3
This course allows students to experience the full process of making a professional micro-budget feature, experimental, or documentary film. Students work on a visiting filmmaker's film from conception to final shooting, while learning about the different jobs/tasks/departments needed to realize a completed work. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

ENGFLM 1680 - ANIMATION STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course surveys the history of animation, both American and international. Providing an understanding of animation's history, technologies, and stylistic possibilities across national and international boundaries, the course will consider early animators through to contemporary uses of digital technologies with their fully realized characters inhabiting three-dimensional space. It will also have a thematic organization, focusing at times on specific techniques (e.g., cel animation) and styles (e.g., abstract). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis
Course Attributes: SCI Polymathic Contexts: Humanistic GE. Req.

ENGFLM 1681 - FILM COMEDY

Minimum Credits: 3
Maximum Credits: 3
This course surveys film comedy from the silent period through the contemporary moment. It focuses on major comic performers and directors as well as on comic forms, traditions and their relation to politics. In addition the course considers a number of comedy subgenres, such as slapstick, romantic comedy, gross-out comedy, and the buddy film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1683 - DOCUMENTARY FILM

Minimum Credits: 3
Maximum Credits: 3
This course explores the nature and impact of the non fiction film, its changing forms, strategies for movies, and claims to veracity and objectivity. It
is concerned with identifying types of documentary, the "motives" of such films, their audience and the problems posed by "documenting reality."

This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS The Arts General Ed. Requirement, Film Studies, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGFLM 1684 - MOCKUMENTARY: PRODUCTION AND CRITICISM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

The mockumentary - a fictional film made to "look like" a documentary - became popularized as a term to describe a distinct genre in coverage of Rob Reiner's 1984 film This is Spinal Tap. Since then, the genre has evolved to treat a variety of subjects through a range of styles - including straightforward hoaxes, social parodies, and sharp criticisms of nonfictional form. In addition to readings, lectures and discussions, students in this class will produce short mockumentary projects. Previous production experience is not required. This is a Production course with Critical Studies elements and counts for Category III towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ENGFLM 1685 - FILM MUSICAL**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course studies the musical as an example of a popular art in the age of mass culture, looking at the aesthetics and history of this genre as it relates to the culture that produced it. We will be looking at musicals with the goal of analyzing and understanding our reactions, and those of the mass audience. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**ENGFLM 1688 - FILM WESTERN**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course examines the meaning of the Western to a mass audience. More specifically we will explore the genre's popularity, the way it represents the past, the concept of the mythic hero, changes in the genre over time, and the contributions of specific directors. We will consider how the Western adapts to changing concepts of America. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**ENGFLM 1694 - THE AUSTRALASIAN NIGHTMARE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This is a study abroad course taught at Pitt in Sydney. The classic American horror is derived from a gothic heritage, an inheritor of a European context and its tropes; the falling apart of civilization through wars, disease, economic collapse, and a deconstruction of society. The horror that the current, post 9/11 generation has produced is inherently different; it plays upon central themes that pull from an Australasian context, driven from the horror films of Australia, Japan, and Korea. These films have been made and distributed outside of an American context but then repackaged to the west in remakes and revisits that awaken an American audience to themes of horror that are decidedly non-European in identity. This course will examine these films, comparing and contrasting European and Australasian tropes for horror as well as their reflection and impact on society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
ENGFLM 1695 - HORROR FILM

Minimum Credits: 3
Maximum Credits: 3
This course will investigate the key films and critical discussions surrounding the horror genre from its silent film beginnings to the present. We will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film and media studies. This course examines horror subgenres, the ways that producers and directors have developed the genre, and the ways horror film exploits social attitudes and values to generate audience involvement. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Study Abroad

ENGFLM 1696 - FILM NOIR

Minimum Credits: 3
Maximum Credits: 3
This course will explore film noir from its classical period 1941-1958 (e.g. Double Indemnity), to contemporary films considered to be 'neo-noir' since the 1970s (e.g. Taxi Driver, Blade Runner, Fight Club, Memento, etc.), and the international films described as 'global noir' from Japan, Hong Kong, Europe, and many other places throughout the world. We will look at these films and media objects from the perspective of film art and history, of their relationship to wider socio-cultural contexts, and of their exploration of gender and sexuality. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1699 - SCIENCE FICTION FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines the development of science fiction as a cinematic form, its relationship to genres such as horror and melodrama, its structure, images and style. We will trace linkages between the films and social, political, scientific and aesthetic attitudes within the culture. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1703 - GENDER AND FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines and questions aspects of gender and sexuality in international cinema. While the course considers the intersectional realities affecting masculinity and femininity on-screen, it will also consider who is behind the camera and ideas of "authentic" representation. Attention will also be paid to the social and historical context in which these films were made, in an attempt to understand the relationship between art and ideology. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or
ENGFLM 1705 - QUEER CINEMAS

Minimum Credits: 3
Maximum Credits: 3
While sexuality in the cinema has been subjected to various ideological and regulatory constraints, the same has also been true of lived sexuality. Likewise, and despite appearances, the history of sexual representation in the media is just as dynamically diverse as the history of sexualities as lived in the twentieth and twenty-first centuries. This course is both a general introduction to queer theory-especially as it relates to visual culture-and an investigation into queer theory's impact on media history, media criticism, and/or film and video production. A portion of the course will be devoted to reevaluating the history of the dominant media's narrative representation and regulation of queer bodies and subjectivities. The course will also serve as a brief survey of contemporary LGBTQ media practices. Course screenings and readings are occasions for pleasure, as well as occasions to think through the implications and problems of different, queer, and deviant representational strategies.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGFLM 1750 - CREATIVE PRODUCTION WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
Creative Production Workshop is a projects-based course in which students will research, define, schedule, budget, and workshop their own independent projects. The primary goal of the course is to design and execute a self-directed, self-designed, creative project in a collaborative environment. This process can be broken down into a series of smaller goals, including: pre-production, treatment, pitching, project design, and peer workshopping. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

ENGFLM 1752 - TELEVISION ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course studies television as a visual medium, an industry, and as a cultural force by examining the forms television programming takes and the way these structures influence viewer response. We will examine specific television genres from longstanding series types (sitcoms, cop shows, serials, etc.) to the gendered forms of "quality" television. This is a Critical Studies course with Production elements and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Children's Literature, DSAS The Arts General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGFLM 1760 - CINEMA AND VIDEO GAMES

Minimum Credits: 3
Maximum Credits: 3
This course introduces a comparative study of cinema and video games, exploring their historical, cultural, aesthetic, technological and industrial intersections. Combining film screenings with game plays, we will try to understand how cinema and video games inform, influence and converge with each other. We will focus on race, gender, and ethical issues of visual representations in both cinema and video games. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
ENGFLM 1790 - FILM AND LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
Cinema has enjoyed a close relationship with literature, borrowing from literary source texts and forms. Yet this relationship is not uncomplicated, nor is it unidirectional: the cinema offers new possibilities for novelistic source texts, poses interesting problems for literature's authors and readers alike and provokes a reconsideration of age-old debates of the divide between words and images. Thus this course examines film's convergence with, and divergence from, literary forms. Poised at the intersection of the study of film and the study of literature, it enables us to explore what is most unique -- and perhaps most interesting -- about each of the media as we consider their overlap. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

ENGFLM 1901 - INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 6  
The independent study option permits students to design courses of their own with approval of a department faculty member. Students are required to submit a proposal to a faculty member; usually, this faculty member is one that the student has worked with before and is comfortable with the subject matter of the study. Specific forms for requesting faculty approval are available in the department advising office. The forms require a description of the project, a list of the requirements and readings that the student and the faculty sponsor have agreed upon, the signature of the faculty sponsor, and the signature of the department adviser. A student must have earned at least 6 credits in film studies courses and the study proposed must not duplicate the content of regularly offered courses.

ENGFLM 1904 - UTA IN FILM STUDIES

Minimum Credits: 1  
Maximum Credits: 3  
Undergraduate Teaching Assistants are arranged with individual faculty members and require special permission. A range of credit hours and grading options are available.

ENGFLM 1920 - ADVANCED SEMINAR IN FILM STUDIES

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for Film and Media Studies majors and can be taken only when all other major requirements are satisfied. It will focus on issues of film history (either as an historical survey or through an examination of particular themes and/or problems that have arisen in the critical literature). The class will be organized as a seminar, and will involve considerable writing and/or class presentation on the part of students. This Category II course is a required capstone in the Critical Studies track of the Film and Media Studies major.
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Capstone Course, Film Studies, Global Studies, Writing Intensive Course (WRIT)

**ENGFLM 1930 - INTERNSHIP IN FILM**

Minimum Credits: 1
Maximum Credits: 3
Internships can be taken for credit with special permission from the Internship Coordinator in Film and Media Studies. One internship can count for Category III towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

**English Language Institute**

**ELI 0001 - ELI: ONE COURSE**

Minimum Credits: 0
Maximum Credits: 0
The ELI offers English classes in speaking, listening, reading, writing, and grammar at three proficiency levels: low intermediate, high intermediate, and advanced. Eli students register for ELI 0001 when they are taking only one ELI course in any given semester.
Academic Career: Undergraduate
Course Component: Clinical
Grade Component: No Grade Required
Course Requirements: PROG: English Language Institute

**ELI 0002 - ELI: TWO COURSES**

Minimum Credits: 0
Maximum Credits: 0
The ELI offers English classes in speaking, listening, reading, writing, and grammar at three proficiency levels: low intermediate, high intermediate, and advanced. Eli students register for ELI 0002 when they are taking only two ELI courses in any given semester.
Academic Career: Undergraduate
Course Component: Clinical
Grade Component: No Grade Required

**ELI 0003 - ELI: THREE COURSES**

Minimum Credits: 0
Maximum Credits: 0
The ELI offers English classes in speaking, listening, reading, writing, and grammar at three proficiency levels: low intermediate, high intermediate, and advanced. Eli students register for ELI 0003 when they are taking only three ELI courses in any given semester.
Academic Career: Undergraduate
Course Component: Clinical
Grade Component: No Grade Required
Course Requirements: PROG: English Language Institute

**ELI 0004 - ELI: FOUR COURSES**

Minimum Credits: 0
Maximum Credits: 0
The ELI offers English classes in speaking, listening, reading, writing, and grammar at three proficiency levels: low intermediate, high intermediate, and advanced. Eli students register for ELI 0004 when they are taking only four courses in any given semester.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** No Grade Required  
**Course Requirements:** PROG: English Language Institute

**ELI 0005 - ELI: FIVE COURSES**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
The ELI offers English classes in speaking, listening, reading, writing, and grammar at three proficiency levels: low intermediate, high intermediate, and advanced. Eli students register for ELI 0005 when they are full-time ELI students in any given semester. Full-time students always register for five courses.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** No Grade Required  
**Course Requirements:** PROG: English Language Institute

**ELI 0006 - ELI: SIX COURSES**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
The eli offers English classes in speaking, listening, reading, writing, and grammar at three proficiency levels: low intermediate, high intermediate, and advanced. Eli students register for ELI 0006 when they are taking six courses in any given semester.

**Academic Career:** Undergraduate  
**Course Component:** Clinical  
**Grade Component:** No Grade Required  
**Course Requirements:** PROG: English Language Institute

**ELI 0007 - PROFESSIONAL AND ACADEMIC ENGLISH PROGRAM**

- **Minimum Credits:** 0  
- **Maximum Credits:** 0  
This is an intensive, 6-week program for international students planning to attend graduate programs in the US. Students must already be accepted to a US graduate program or have a TOEFL 550/80 IBT score. Classes meet for five hours a day, four days a week. Class content will help students develop both language and academic/professional skills, including giving oral presentations, developing reading and listening strategies and understanding the educational culture of us graduate schools.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** No Grade Required

English Literature

ENGLIT 0300 - INTRODUCTION TO LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course examines the definitions, functions, and values of literature by reading across a range of genres, styles, historical periods, and cultures. It will also introduce various reading strategies for making sense of plays, poems, novels, short stories, and essays.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

ENGLIT 0305 - IMAGINING SOCIAL JUSTICE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 0310 - THE DRAMATIC IMAGINATION

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the major dramatic forms and compares the ways playwrights from several centuries use ideas, characters and dramatic techniques. We will consider how social, historical, and dramatic contexts influence our interpretations and evaluation, or may lead to
alternative understandings of a play.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

**ENGLIT 0315 - READING POETRY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Poetry is usually the first literary form to evolve in a culture. Yet many today reject it as artificial, overly refined and removed from ordinary human experience. By studying various kinds of poetry, this course aims to help students break down the barriers between classic poems, contemporary poetry, and a more general lyric impulse. As the most highly condensed literary experience, poetry invites very close reading, so we will explore various techniques for making sense of poems.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

**ENGLIT 0318 - WRITING IN PARIS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will study the American writers who lived in Paris during the 1920s "the lost generation" and the ways they were influenced by Paris and its culture.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**ENGLIT 0321 - ESSAYS AND MEMOIRS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines different uses of prose narrative in both fiction and non-fiction. Texts include memoir, essay, novels, short stories, travelogue, and biography.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  
**Course Attributes:** DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

**ENGLIT 0325 - THE SHORT STORY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course studies short stories that explore a variety of themes. It seeks to define the short story as a specific literary genre and to distinguish it from earlier forms of short narrative literature. It then goes on to examine the effects of literary, cultural and historical traditions on these stories and their reception.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

ENGLIT 0330 - GREAT BOOKS: A SEMINAR IN THE MODERN HUMANITIES (PART 1)
Minimum Credits: 3
Maximum Credits: 3
The course centers on classic texts of world literature, from homer, to the Koran, to Emerson and Woolf. This course is meant for all students who have an intellectual interest in the complex resources of some of our shared traditions as well as a healthy curiosity about the history of our present. In other words, this seminar is intended to make available a demanding, but still selective encounter with works of high aesthetic, intellectual, and indeed even political importance. (Part 1 of a 2-semester course)
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 0331 - GREAT BOOKS: A SEMINAR IN THE MODERN HUMANITIES (PART 2)
Minimum Credits: 3
Maximum Credits: 3
The course centers on classic texts of world literature, from homer, to the Koran, to Emerson and Woolf. This course is meant for all students who have an intellectual interest in the complex resources of some of our shared traditions as well as a healthy curiosity about the history of our present. In other words, this seminar is intended to make available a demanding, but still selective encounter with works of high aesthetic, intellectual, and indeed even political importance. (part 2 of a 2-semester course)
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 0333 - PARIS THROUGH THE AGES
Minimum Credits: 3
Maximum Credits: 3
The readings will introduce students to French writers who were influenced by Paris and who influenced the city and its intellectuals, from the Middle Ages through the twentieth century. This study abroad course includes excursions through the streets and museums of Paris. Taught in English.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGLIT 0354 - WORDS AND IMAGES
Minimum Credits: 3
Maximum Credits: 3
This interdisciplinary course explores the relationships between language and the diverse kinds of images that often accompany it (film, video, photography, book illustration, painting, etc.). The goal is to study the parallels and differences between images and words (as systems of communication) and to understand how they can productively interrelate within creative works such as literature, films, videos, and photographic studies.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or
ENGLIT 0365 - IMAGINING SOCIAL JUSTICE

Minimum Credits: 3  
Maximum Credits: 3
This course questions the relationship between present and/or "contemporary" literature and past literary traditions. It is not a course solely in contemporary literature but a course that compares contemporary texts with texts from other periods. It investigates the contemporary as both a complex reworking of past narratives and traditions and as the production of the experimental and the new.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLIT 0365 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

ENGLIT 0367 - CRIME STORIES: COURTROOM DRAMAS & PSYCHOLOGICAL THRILLERS

Minimum Credits: 3  
Maximum Credits: 3
This course will examine literary representations of the law, legal issues, punishment, and legal ethics, using works that range from, "Twelve Angry Men" to "Soul on Ice" to "The Indian Lawyer."

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

ENGLIT 0370 - LITERATURE AND IDEAS

Minimum Credits: 3  
Maximum Credits: 3
This course studies invention and interpretation, and explores the various ways writers produce texts and readers make them make sense. Though texts may change from section to section and instructor to instructor, they always stimulate investigation into reading and writing as ways of knowing.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLIT 0370 or FP (0003 or 0006) *Applies to all WRIT Courses*

ENGLIT 0375 - INTRODUCTION TO OPERA

Minimum Credits: 3  
Maximum Credits: 3
This course, offered jointly in collaboration with the artistic and educational staff of Pittsburgh opera, provides an interdisciplinary introduction to the multimodal and synthetic art form of opera. Over the course of the semester, we will explore the essential literary, musical, and dramatic elements that have shaped the development of opera throughout the past four-hundred years. We will study a variety of historically significant operatic works, each representing a different style in the evolution of this art form. Every semester, the class as a whole will also attend two current opera productions staged by Pittsburgh opera.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

ENGLIT 0380 - SLOVAK TRANSATLANTIC CULTURES
Minimum Credits: 3
Maximum Credits: 3
Slovak European history and the interaction of Slovak and American cultures during the 120-year history of Slovak immigration is conveyed through readings in Slovak and Slovak-American literature, and through issues in literary theory that concern this theme. The course is structured around the history of Slovak, and in a broader cultural sense central European immigration to the U.S. With a special focus on Pittsburgh. Students are encouraged to investigate Pittsburgh's rich ethnic heritage and to research and write on topics tailored to individual interests.

Academic Career: Undergraduate

Course Component: Lecture

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

ENGLIT 0500 - INTRODUCTION TO CRITICAL READING

Minimum Credits: 3
Maximum Credits: 3
This course studies three to five significant literary works in conjunction with influential criticism on each text. Students explore the uses and limits of different critical methods. The course seeks to develop a critical understanding of both classic literary texts and dominant modes of reading as changing cultural practices.

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

ENGLIT 0505 - HOW TO DO THINGS WITH LITERATURE 1

Minimum Credits: 3
Maximum Credits: 3
We explore the historical, generic, and transnational range of literature in English as an object and field of study. A variety of lecturers introduce the concepts of periods and "key moments".

Academic Career: Undergraduate

Course Component: Seminar

Grade Component: LG/SNC Elective Basis

ENGLIT 0506 - LITERARY FIELD STUDIES

Minimum Credits: 3
Maximum Credits: 3
In this course, students will learn about and practice the various activities central to literary studies. Students will learn how to frame interesting critical inquiries and conduct original research, which could include historical research or contemporary cultural study. Students will engage with books as historical objects, which will include learning about the history of books and other print media and studying the ways that material factors shape writers' work. This could include visiting the library's Special Collections and/or a creative project around bookmaking. Students will engage in a variety of interpretive practices, including taking creative and inventive approaches to critical work and adapting texts for new purposes. Students will attend live performances and readings by diverse contemporary writers, gaining insight into the process of how great literature is made. Students will have the opportunity to find new intersections between literature and other disciplines. Finally, students will be invited to approach a range of writing projects as active makers, attending carefully to the formal elements of their own writing as well as that of others.

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Requirement Course

ENGLIT 0572 - INTRODUCTION AFRICAN LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
Examining major works by contemporary African writers in various genres, including fiction, poetry and drama. Some preliminary reading and discussion of social context of the works. Principal focus on recurring themes in African literature.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0573 - LITERATURE OF THE AMERICAS

Minimum Credits: 3  
Maximum Credits: 3  
Literature of the Americas introduces students to important issues in the study of literature and culture by focusing on colonial and postcolonial traditions in regions of the Americas beyond the United States. Beginning with the European "discovery" of the "new world", it examines comparatively literary and other texts from Britain, the West coast of Africa, the US, Canada, the Caribbean and Latin America, tracing the emergence of distinctive literary traditions and preoccupations of the Americas through to significant modern incarnations.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  

ENGLIT 0580 - INTRODUCTION TO SHAKESPEARE

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on a number of Shakespeare's major plays from all phases of his career. Class discussion will consider the historical context of the plays, their characterization, theatrical technique, imagery, language and themes. Every attempt will be made to see the plays both as poems and as dramatic events.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis
**ENGLIT 0590 - FORMATIVE MASTERPIECES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will study in some detail eight or nine of those masterpieces which form the largest part of what we now regard as the Western tradition of literature. The works chosen will come from various genres--epic poetry, drama, the novel, and satire. They will span the centuries from the classical periods of ancient Greece and Rome through the Renaissance and into the nineteenth century.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  

**ENGLIT 0597 - BIBLE AS LITERATURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This introductory course acquaints students with what is in the bible and provides background information drawn from various disciplines about the elements and issues that give it its distinctive character. Attention is necessarily given to its religious perspectives, since they govern the nature and point of view of the biblical narratives, but no specific religious view is urged.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGLIT 0601 - PROTESTS, POLITICS, AND BLACK LYRICAL TRADITIONS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Black poetic traditions span print, the spoken word, song lyrics, especially, the Blues, and rap. This course considers the history of Black lyrical traditions in the context of various moments of protest and various political movements. The course examines the mutual influences of Black music-sound, rhythm, voice, and orchestration-and Black poetry-verse, spoken word, and song and rap lyrics. Extending the analytical practice of "close reading," this course asks students to also engage in practices of "close listening" to the Blues and rap as well as to the sounds of the written word. Practicing these together, students will gain an intricate understanding of the mutual influences between sonic and print forms of Black lyrical traditions. Additionally, this course will examine the role that Black lyrical traditions play in the cultural movements that address anti-Black racism in American culture.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 0610 - WOMEN AND LITERATURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
An exploration of writings by and about women. Through our reading of various literary forms -- poetry fiction, autobiography -- we will explore the aspirations and realities of women's lives. We will consider how social issues -- class, race, etc. -- affect women writers.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)  
**Course Attributes:** DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)
ENGLIT 0612 - LITERATURE AND SCIENCE

Minimum Credits: 3  
Maximum Credits: 3  
This course aims to restore and improve the dialogue between scientific and critical-humanistic ways of understanding the world. It examines the share both ways of knowing have had in shaping our culture and our ideas by studying (and developing critical perspectives on) both scientific and literary texts. Its goal is to produce an understanding of the common history of literature and science. The course usually focuses on a theme, issue, or topic that has historical range and contemporary relevance. Different versions of the course might focus on social, literary, and scientific understandings of gender; the social, literary, and scientific attitudes toward death and the dead; or the social, literary, and scientific definitions and theories about the "human." Though works of science fiction may be studied, this is not a course in science fiction. This course should be of particular interest to students in the sciences, students of literature, students of philosophy, and students of history.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: CREQ: ENGLIT 0699  

ENGLIT 0613 - ASIAN AMERICAN LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  

ENGLIT 0616 - EXILES, NOMADS, AND MIGRANTS

Minimum Credits: 3  
Maximum Credits: 3  
The course reads various reflections on the immigrant's experience of separation or exile, the problems of encountering a new society, and the processes of acculturation.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., Urban Studies

ENGLIT 0617 - CHANGING FAMILIES

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore varying literary representations of unconventional families including families made by adoption, foster families resulting from migration, multiracial families, and families involving gay, lesbian, or transgender parents or children. Considering different points of view, it will examine plots involving search for family, search for identity, construction of family, loss, conflict, poverty, prejudice, and reconciliation. The course will explore how these works portray and relate to changing attitudes toward childhood, parenthood, heredity, nurture, race, class, nation, and sexuality. As a literature course, it will train students in close reading and critical analyses of texts.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0618 - WAR
ENGLIT 0619 - THE LITERATURE OF THE GREAT WAR

Minimum Credits: 3
Maximum Credits: 3
This course focuses solely upon the literature that most poignantly depicts the experiences and perspectives of the soldiers who fought on the battlefields of World War I and the civilians who suffered its destruction. It will allow students to explore the most significant memoirs, poetry, and works of fiction that emerged from the ravaged battlefields of the western front and the ravaged homes destroyed by what some called "war to end all wars".

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

ENGLIT 0620 - THE GRAPHIC NOVEL

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGLIT 0621 - AFRICAN-AMERICAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGLIT 0625 - DETECTIVE FICTION

Minimum Credits: 3
Maximum Credits: 3
This course examines detective fiction in terms of its history, its social meaning and as a form of philosophizing. It also seeks to reveal the place and values of popular fiction in our lives.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SU3 Elective Basis

ENGLIT 0626 - SCIENCE FICTION

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the major ideas, themes, and writers in the development of science fiction as a genre. Discussions will help students to understand and use critical methods for the analysis of science fiction. The topics covered include problems describing and defining the genre, contrasting ideologies in soviet and American science fiction, the roles of women as characters, readers and writers of science fiction, etc.

Academic Career: Undergraduate
ENGLIT 0628 - WORKING CLASS LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
This course explores writing produced by working-class men and women. It traces its textual traditions and explores questions of the status of the "working class", its relation to self-understandings in ethnic or gender terms as well as the effect of class on social experience, social vision and cultural production. It explores as well the relation between worker-writers and the dominant literary tradition.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0629 - THE WILD WEST

Minimum Credits: 3  
Maximum Credits: 3  
This course examines Westerns, the most popular and characteristic of American genres. We will read works by both "popular" and "literary" (or "serious") writers, as well as viewing movie Westerns.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Urban Studies

ENGLIT 0630 - SEXUALITY AND REPRESENTATION

Minimum Credits: 3  
Maximum Credits: 3  
This course will explore the relations between cultural texts and the shifting conceptualizations and figurations of sexuality and sexual politics over the past 150 years. The main objective of this course will be to understand the necessary but problematic relations between sexuality, cultural expression, and the social.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0636 - THE GOTHIC IMAGINATION

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the genre of gothic fiction, in Britain and the U.S., From its origins in the late 18th century until the present.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 0637 - HORROR LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Seminar
Grade Component: LG/SNC Elective Basis  

ENGLIT 0638 - STEAMPUNK

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0640 - ALLEGORY

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce students to the subject of allegory.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

ENGLIT 0642 - COMEDY

Minimum Credits: 3  
Maximum Credits: 3  
This course studies comedy, both its deep structural patterns and its surface humor. We will read works from many periods (from the Greeks through the 20th century) and genres to understand the literary and cultural meanings of comedy.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 0643 - SATIRE

Minimum Credits: 3  
Maximum Credits: 3  
This course studies satire in general, the techniques of certain satires in particular and the expression of satiric attitudes. We will examine satires from various times and countries so that we can better understand what satire is, how it differs from other literary forms and its function within the culture that produces it.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0644 - MYTH AND FOLKTALE

Minimum Credits: 3  
Maximum Credits: 3  
This course examines myths, legends and folktales. It explores contemporary views of such works as cognitive categories, models for behavior, "agents" for mediating "world" views, mirrors of culture, projections of sub conscious desires. In short it considers the connection between myth/folktales and the culture/intelligence that produced them.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis
ENGLIT 0645 - FANTASY

Minimum Credits: 3  
Maximum Credits: 3  
Focusing on works that offer fantastic alternations to the world of ordinary experience, this course examines works produced from the middle ages to the present day. It raises questions about our perceptions of "reality", and the effects of conscious or unconscious wishes, desires and fears on literary representations.  
Academic Career: Undergraduate

Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

ENGLIT 0648 - NARRATIVE AND GRAPHIC PERSPECTIVES IN HEALTH HUMANITIES

Minimum Credits: 3  
Maximum Credits: 3  
This course emphasizes the narrating and understanding of difference as central to the education of those engaged in/with the healthcare field. Students will examine how narratives of neuro-diversity; gender barriers; racial inequities in education and health services, are all crucial issues for providers and receivers of medical care. By studying literature about medicine/the health professions from diverse perspectives, students in the course will learn to "observe, parse, appreciate, critique, and creatively reimagine points of contact between individuals in healthcare sphere." Through a series of readings including Paul Kalanithi's When Breath Becomes Air; and a mixed-media biography such as Lauren Redniss's Radioactive; Damon Tweedy's Black Man in a White Coat; Danielle Ofri's What Patient Say, What Doctors Hear; and the Graphic Medicine Manifesto, this course will introduce students to an exciting new field that erases the boundaries between authoritative "medical discourse" and what is commonly assumed to be a non-serious genre, graphic novel/comics; between physicians and patients' modes of accessing information and exchanging knowledge; between academic "essays" and Critical Creative Work that engages rigorously with knowledge and experience. Through this series of readings, students will consider issues such as: What kind of health practitioner do you wish to be? What models exist for asking important questions about the nature of human empathy though knowledge of Other's stories? and how is awareness of identity and difference nurtured in the education of the healthcare providers? How can you begin to articulate or represent your own in rigorous but creative ways?  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

ENGLIT 0655 - REPRESENTING ADOLESCENCE
Minimum Credits: 3
Maximum Credits: 3
This course focuses on the question of how adolescence gets represented in a variety of genres, including young adult and children's literature; novels, plays and poetry aimed at adults that take adolescence as a theme; films and television programs; scientific, journalistic, or autobiographical commentaries on the nature of adolescence; and so on. This is one of the core courses for the children's literature certificate program, but all interested students are welcome.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 0670 - QUEER AND TRANSGENDER LITERATURE

Minimum Credits: 3
Maximum Credits: 3
"Queer and Transgender Literature" will examine the changing relationship between queer and transgender identities in literature, science and culture from the early twentieth century to the present. Students will learn to read literature in its historical context, pairing it with primary sources from relevant scientific and medical discourses, as well as locating it in competing literary criticism traditions in queer theory and transgender studies. The weekly course meetings will revolve around discussion of key works in queer and transgender literature, paired alternately with important literary criticism and primary sources. Classroom discussion and in-class writing assignments will focus on building these historicist and critical skills in sequence, so as to prepare students for their main assignment sequence, which asks them to apply the skills they are learning to generate their own contributions to debates in criticism about the proper boundaries between queer and transgender identities.

Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
ENGLIT 0710 - CONTEMPORARY ENVIRONMENTAL LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the ways in which contemporary writers in English have engaged with the natural environment. We will read a range of authors, from the 1960s to the present day, to consider how they have looked critically at the human effects on ecosystems, and we will also study the interdisciplinary scholarly field of ecocriticism and its responses to such writings. Throughout, we will be attentive both to the literary qualities of writings about the environment and to their historical and political contexts.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade  

ENGLIT 0712 - CRITICAL MAKING

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., Writing Intensive Course (WRIT)

ENGLIT 0717 - FAIRY TRADITION

Minimum Credits: 3  
Maximum Credits: 3  
Fairies go by many names: the Folk, the Good People, the Other Crowd, Sidhe, fey. Usually beautiful, ethereal, and morally ambiguous, fairies are a staple of western folklore and legend. Once associated with the realm of the dead and lost magic, fairies are now creatures of children's literature and fantasy. The fairy tradition encompasses vital cultural questions about the work of imagination, magic, and vision in our understanding of ourselves and the world around us. Either elusive or non-existent, depending on perspective, fairy lore evokes issues related to: the reliability of witness and of the senses; privileged and discounted perception; the interplay of the imagination and knowledge; and the role of cultural authority. Students will consider the significance of these themes through aspects of fairy folklore, book history, portrayals of childhood, reception studies, and an end-of-term creative project.

Academic Career: Undergraduate

ENGLIT 0800 - WEATHER, CLIMATE, LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
ENGLIT 0812 - MEDIA/ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems and the technological assemblages with which they are intertwined. This course will explore both media that interface with natural ecosystems and works that engage contemporary media systems at different scales. The secret life of information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment. Students will have the option to produce collaborative media projects that explore the themes of the course. These can take the form of simulations, games, network graphing, film or video projects, local ecosystem analysis and/or visualization, or the mapping and analysis of a media ecosystem that interfaces with the environment.

Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 0850 - THE FEMALE HERO

Minimum Credits: 3
Maximum Credits: 3
This course studies heroism as a gendered concept as it has evolved over time. The hero is a commonly understood archetype across genres but is most often associated with masculinity. This course seeks to define, authenticate, and analyze the female hero as a powerful figure in her own right. This course will take into account the tropes of classical heroism but consider modern and contemporary texts in which the image of the hero is redefined in line with the concept of the "female hero." Issues we will investigate include: the role of the masculine gaze in the construction of female heroes; feminist versions of heroism and strength; and the role race, class, and gender play in the making of a hero. We will also consider the ways that the female hero inflects or alters traditional feminine roles. And we will consider how the binary constructions of masculinity and femininity are impacted by stories with female heroes. Through analysis of fiction, film, and criticism, we will begin to define the female hero.

Course Attributes: Children's Literature, DSAS Literature General Ed. Requirement, Gender, Sexuality & Women's St

ENGLIT 0880 - SHAKESPEARE AND SOCIAL JUSTICE

Minimum Credits: 3
Maximum Credits: 3
When Shakespeare's King Lear finally turns his attention to the plight of "poor naked wretches" who have no clothing to protect them from a "pitiless" storm, he realizes he has taken "too little care" of human suffering in his kingdom. Departing from scenes such as this one, this course explores the work of artists and critics who have used Shakespeare's plays to confront a range of social injustices, including US persecution of Native Americans, the legacies of white settler colonialism across the globe, and intimate partner violence. Examining adaptations, remediations, and appropriations of Shakespeare plays, such as Toni Morrison's Desdemona or Aimé Césaire's A Tempest, students will be invited to consider what
Shakespeare signifies in different cultural contexts and to examine related contests of cultural authority and ownership. Focusing on scholarship, performances, poetry, and art by people from various marginalized groups, students will explore the histories and futures of Black Shakespeare, Indigenous Shakespeare, Trans Shakespeare, Chicano Shakespeare, and many others. Several short writing assignments will build students’ skills in a range of critical and creative practices that can contribute to social justice and diversity: archival research, critical fabulation, social network mapping, oppositional reading, comparative analysis of two or more productions, and personal reflection.

**Academic Career:** Undergraduate

**Course Component:** Seminar

**Grade Component:** LG/SNC Elective Basis

**ENGLIT 1000 - INTRO TO TRANSLATION STUDIES**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This class introduces students to translation studies, an emerging discipline critical to an understanding of world literature. The focus is on English versions of literary texts in other languages and the theory underlying the transformation. The course examines translation as a form of writing which possesses a complex relationship to an earlier text to which it is similar but not equivalent. Students will consider the ways in which talented translators render influential literary works. We grapple with the following questions: how do English translations of the same text differ and what is the result? How does one evaluate a translation?

ENGLIT 1009 - J.R.R. TOLKIEN AND COUNTERCULTURE

Minimum Credits: 3
Maximum Credits: 3
This course studies the persona, work, and critical and popular reception of J.R.R. Tolkien (1892-1973) from his initial publication of The Hobbit in 1937 through today. In the 1960s and '70s, people were scribbling "Frodo Lives" on subway walls and getting married dressed like Aragorn and Arwen. Less than a half century later, The Lord of the Rings repeatedly beat out the Bible as "best-loved" book in British polls, and Peter Jackson's adaptations made history both for their box-office earnings and for their groundbreaking contributions to film-making. Widely recognized as the father of modern fantasy and touted as the "Author of the [Twentieth] Century" by scholars, Tolkien continues to exert a panoramic influence on culture, particularly in his ability to speak to and for the marginalized. From Comic Con to Elder Scrolls to Game of Thrones, his sub-creation of Middle-earth embodies and fuels "nerd" culture now just as it did for the hippies of the previous century. Yet, Tolkien " war veteran, Oxford professor of Medieval languages and literature, devout Catholic " was a man of his time and quite conservative, at least publicly. While he famously said that his wife "should be satisfied by devotion to her children" and not "enter the intellectual side of life," the female characters in his stories, while small in number, are arguably great in power, assertiveness, and heroism. Tolkien's writing argues for the importance of a community where all cultures coexist: Elves, Dwarfs, Men, Hobbits go to war against Sauron and the "One Ring" designed to "rule them all." In this course we will read Tolkien's major works, The Hobbit and The Lord of the Rings in their entirety, as well as excerpts from what he considered to be his master work, The Silmarillion. We will explore Tolkien materials housed in Special Collections at Hillman Library and online. Our reading list will include reviews and scholarship on Tolkien's life and work, as well as on the ways in which his mythology continues to resonate and be reimagined in the twenty-first century. Ultimately, we will analyze the relationship between Tolkien and the counterculture as a way of understanding the ways in which myth, fantasy, and literature more broadly represent, shape, and interrogate complex social and political systems.

ENGLIT 1010 - MAGICAL NATURE BEFORE THE MODERN WORLD

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

ENGLIT 1011 - MILTON TO MINECRAFT: ART, NATURE, AND TECHNOLOGY

Minimum Credits: 3
Maximum Credits: 3
In this course, we will examine literature pertaining to the long history of relations among humans, technical devices, and the natural world, situating changing views of nature within larger cosmic and socioeconomic contexts.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGLIT 1015 - UNRULY BODIES

Minimum Credits: 3
Maximum Credits: 3
This course studies the body as a phenomenon of cultural construction, as a product and process of lived experience, as the object of societal techniques of control, and as the subject of radical liberation. This course will examine the body in literature and other forms of representation. It will examine the ways that demands of "unruly bodies" to conform to normative body images intersect with gender, sex, sexuality, age, race, and other identity categories.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
ENGLIT 1020 - HISTORY OF LITERARY CRITICISM

Minimum Credits: 3  
Maximum Credits: 3  
This course considers influential critical theorists ranging from Plato and Augustine to Nietzsche and Freud. Neither the readings nor the approach of the class fall under the narrow definitions of literary criticism; our focus instead will be on texts from several disciplines that offer powerful models of reading and writing and that raise interesting questions about the foundations of literature, culture, and interpretation.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 1028 - LITERATURE AND PSYCHOANALYSIS

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces students to psychoanalytic contributions to understanding the processes of artistic creation and aesthetic response. It demonstrates how familiarity with psychoanalytic methodology enhances the alertness, subtlety and power in reading literary texts.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 1100 - MEDIEVAL IMAGINATION

Minimum Credits: 3  
Maximum Credits: 3  
This course explores some of the ways people in the middle ages saw the world around them. We will try to understand those perceptions by reading a variety of literary works, by comparing those works to other art forms and by examining similar kinds of experience in the modern world.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1101 - INVENTION OF ENGLISH

Minimum Credits: 3  
Maximum Credits: 3  
The English language and its literatures are in constant flux, but this was especially true in medieval England as waves of foreign invaders and immigrants shaped the language, and political, religious, and mercantile contact with other regions of Europe contributed new aesthetic and poetic ideals. Beginning with old English riddles, this course helps you discover the linguistic and literary DNA of English. You will discover the multiple "Englishes" and other languages that remain present in modern English and prefigure the global diversity of the anglophone world. Along the way, you will develop familiarity with old English and multiple dialects of middle English. You will begin to chart the continuities and ruptures involved in the transitions from tribal heroic culture to a growing sense of common identity as English people of an English kingdom. And on a parallel trajectory, you will track how the notion of a specifically English literature written by the English, in English, for the English, emerges from adaptations and negotiations with other European vernaculars. This focus forms a bridge to further study in early modern or Renaissance English literature. The tools of philology, historical language study, rhetorical analysis, and manuscript studies, lend themselves to this course's emphasis on language and history, and in developing facility with them, you will be better prepared for the study of any area of literature.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
ENGLIT 1103 - INTRODUCTION TO OLD ENGLISH

Minimum Credits: 3
Maximum Credits: 3
The purpose of this course is to learn the fundamentals of old English as quickly as possible, in order to be able to read some of the very best old English poetry by the end of the term. While the course is not linguistically oriented, it can serve as a background to courses in middle English or old Norse, as well as leading to further study in old English literature.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1115 - CHAUCER

Minimum Credits: 3
Maximum Credits: 3
This course closely examines major works by Chaucer—the Canterbury tales and Troilus and Cressida. Though most of the reading will be in modern English translations, some will be in the original middle English. We will view Chaucer's work in its historical, social, artistic and intellectual contexts.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1125 - MASTERPIECES OF RENAISSANCE LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course studies prose, poetry and drama written in England between 1550 and 1660—an age of religious reformation, economic and social instability, intellectual revision and political revolution. It seeks to make sense of the renaissance in terms appropriate both to that time and to our own.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1126 - ADVANCED SHAKESPEARE

Minimum Credits: 3
Maximum Credits: 3
This upper level course in Shakespeare assumes some prior work with his writings. It seeks to develop a more detailed appreciation of his writing by examining selected texts in relation to some historical, cultural or critical issue.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1127 - SHAKESPEARE ON FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines how Shakespeare's works have been adapted to film and television. In this study, we will be concerned with Shakespeare as a cultural icon and with the expectations surrounding both high art and popular entertainment. Central to this examination are the relationships between a film and a text.
ENGLIT 1128 - SHAKESPEARE'S SEXUALITIES

Minimum Credits: 3
Maximum Credits: 3
This course explores the roles of Shakespeare's female characters as they relate to cultural ideas about gender and sexuality. We will examine beliefs about "proper" behavior of both women and men and the relationship of representations of gender to social power.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1135 - LITERATURE, MEDIA, AND SCIENCE IN THE AGE OF SHAKESPEARE

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the broad range of styles, genres, and concerns of literature written in English in the early modern period, particularly the 17th century. The designation "early modern" is capacious enough to straddle the renaissance as well as the early enlightenment. Readings could include English writers, writers from the Americas, and writers who composed in English but wrote about countries other than England, Ireland or new England.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1142 - ANCIENT EPIC

Minimum Credits: 3
Maximum Credits: 3
Study of selected Greek and Roman epics in English translation. Among the works that may be read are Homer's Iliad and Odyssey, Apollonius' Argonautica, Virgil's Aeneid, and Ovid's metamorphoses.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGLIT 1150 - ENLIGHTENMENT TO REVOLUTION

Minimum Credits: 3
Maximum Credits: 3
This course focuses on literature and culture of the late 17th and 18th centuries--a period of revolutionary changes in the way writers and readers viewed their world. We will read widely in the important texts of the period in order to explore the interplay of enlightenment and revolution.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1170 - ROMANTIC NATURE

Minimum Credits: 3
Maximum Credits: 3
This course concentrates on writings from 1790 through the 1830's that have come to be associated with romanticism. It explores the social,
intellectual and aesthetic concerns of this movement and its relationships with its British and European cultural contexts.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1175 - 19TH CENTURY BRITISH LITERATURE

Minimum Credits: 3
Maximum Credits: 3
A study of the major writers and cultural issues of 19th century Britain situated in relation to the social and intellectual developments of the time.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1180 - HUMANS, ANIMALS, MACHINES IN VICTORIAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course studies the poetry and prose produced during the reign of queen Victoria, and places these works in relation to changing practices of science, industry, empire and culture.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1181 - VICTORIAN NOVEL

Minimum Credits: 3
Maximum Credits: 3
This course will analyze the emergence and development of the victorian novel--careful reading and focused discussion of such writers as Dickens, Eliot, Trollope, Thackeray, Hardy and Meredith will attempt to define the social, moral, and political concerns of their work as well as their narrative technique.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1199 - TOPICS IN BRITISH LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Explores thematic, formal, historical or cultural topics in British literature. It ties these issues to critical and social concerns in the development of British literature and culture.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1200 - AMERICAN LITERATURE TO 1860

Minimum Credits: 3
Maximum Credits: 3
This course surveys literature produced in America before the Civil War. In the process it explores the historical, political, social and cultural factors that affected the development of that literature. It examines the work of writers who saw themselves as powerful framers of the national experience yet fearful they would have little effects on a culture confronting problems of slavery, divisiveness, literacy, economic change, immigration, etc.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Historical Analysis General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

**ENGLIT 1201 - DIGITAL NARRATIVE AND INTERACTIVE DESIGN**

 Minimum Credits: 3  
 Maximum Credits: 3  
 How are computational artifacts currently designed, and how can they be designed differently? What stories can be told by collaborating with computers? What stories can't be told? This project-based course will enable students to engage with and create computational narratives and interactive projects with data, hardware and algorithms. Each collaboratively taught iteration of the course will include 3-4 of these units, such as: fabrication, interactive hardware, computational narrative, interactive data, and prototyping. Students will consider what it means to compose with computers for human audiences, and with humans for computer audiences. Designed for Digital Narrative and Interactive Design (DNID) majors to take midway through the major, it will help students consolidate the interdisciplinary knowledge they have obtained in their prerequisite courses, introduce them to examples of interdisciplinary work that will inform their later capstone projects, and give them practice in working on collaborative projects that span the humanities and information/computing fields.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: (ENGCMP 0425 or HAA 0425 or ENGLIT 0512) AND (CS 0007 or CS 0008 or CS 0010 or CS 0011 or CS 0012 or INFSCI 0419)  
**Course Attributes:** DSAS Creative Work General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGLIT 1210 - THE AMERICAN RENAISSANCE**

 Minimum Credits: 3  
 Maximum Credits: 3  
 This course surveys the flowering of American literature during the first half of the nineteenth-century. It analyzes the struggle of American writers to develop a new national literature.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SU3 Elective Basis

**ENGLIT 1220 - CIVIL WAR TO WORLD WAR 1 IN AMERICAN LITERATURE**

 Minimum Credits: 3  
 Maximum Credits: 3  
 An examination of changing literary practices from the civil war to the beginning of World War I. The course explores the interactions of economic and social developments on American culture.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Historical Analysis General Ed. Requirement, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., SCI Polymathic Contexts: Soc/Behav. GE. Req.

**ENGLIT 1225 - 19TH CENTURY AFRICAN AMERICAN LITERATURE**

 Minimum Credits: 3  
 Maximum Credits: 3  
 This course will cover a wide range of materials, beginning with the late eighteenth-century poetry and prose of authors such as Phillis Wheatley and Olaudah Equiano and ending with Civil War, reconstruction, or gilded-age authors such as William wells brown, Frances Harper, Pauline Hopkins,

1286
or Paul Laurence Dunbar. Readings will include a variety of different genres of writing (slave narratives, poetry, drama, fictive and non-fictive prose) as well as pay passing attention to the significant African American intellectual and cultural movements that had a role in shaping these various literary productions.

**Academic Career**: Undergraduate  
**Course Component**: Seminar  
**Grade Component**: LG/SU3 Elective Basis  

**ENGLIT 1227 - HARLEM RENAISSANCE**

- **Minimum Credits**: 3  
- **Maximum Credits**: 3  
- **Academic Career**: Undergraduate  
- **Course Component**: Lecture  
- **Grade Component**: LG/SNC Elective Basis  

**ENGLIT 1230 - 20TH CENTURY AFRICAN AMERICAN LITERATURE**

- **Minimum Credits**: 3  
- **Maximum Credits**: 3  
- **Academic Career**: Undergraduate  
- **Course Component**: Seminar  
- **Grade Component**: LG/SU3 Elective Basis  

**ENGLIT 1247 - AUGUST WILSON**

- **Minimum Credits**: 3  
- **Maximum Credits**: 3  
- **Academic Career**: Undergraduate  
- **Course Component**: Seminar  
- **Grade Component**: LG/SNC Elective Basis  
- **Course Attributes**: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

**ENGLIT 1258 - ISRAELI AND PALESTINIAN LITERATURE**

- **Minimum Credits**: 3  
- **Maximum Credits**: 3  
- **Academic Career**: Undergraduate
ENGLIT 1261 - SPECULATIVE FICTION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1262 - AFRICAN AMERICAN SCIENCE FICTION

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1272 - THE ROARING 20'S: FROM FARMERS TO FACTORY WORKERS, FROM FLAPPERS TO FINANCIERS

Minimum Credits: 3
Maximum Credits: 3
A reading of influential literary texts from the American 1920's. The course explores changing literary techniques in relation to new views of the past, war, youth, class, politics, etc.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Urban Studies

ENGLIT 1280 - CNTMPRY AMERICAN WOMEN WRITERS

Minimum Credits: 3
Maximum Credits: 3
This course examines writings by American women from the 1950's to the present. It draws upon feminist literary criticism to explore issues such as the symbolic significance of gender, power relations between the sexes, and differences in representation across race, class and ethnicity.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

ENGLIT 1305 - GREAT BOOKS 1

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Attributes: SCI Polymathic Contexts: Global&Cross Cul GE. Req.

ENGLIT 1306 - GREAT BOOKS 2
ENGLIT 1325 - MODERNISM

Minimum Credits: 3
Maximum Credits: 3
This course examines major works in the modernist tradition poetry, fiction, drama--to determine the role these texts have played in creating the world that seems so familiar to us now.

ENGLIT 1345 - DOCUPOETRY

Minimum Credits: 3
Maximum Credits: 3
Docupoetry (also known as investigative poetry, creative nonpoetry, research-based poetry) is a form of creative writing that relies on a considerable amount of research. To explore various topics or issues, and to pursue new ways of knowing, poets incorporate historical documents, visual artifacts, scientific data, and other materials. The poems that emerge from the process are artistically and intellectually daring, as they interact with other genres (such as essay, memoir, testimony, reportage) and disciplines (history, ethnography, philosophy, geology, environmental science, among others). In this course students will gain familiarity with major forerunners of the practice and examine a diverse set of contemporary examples. In addition, they will spend most of the semester designing and developing their own research-based poems. Previous creative writing experience is welcome but not necessary. Workshop opportunities and instructor feedback will be provided.

ENGLIT 1350 - POSTMODERN LITERATURE

Minimum Credits: 3
Maximum Credits: 3

ENGLIT 1355 - VIRTUAL REALITY

Minimum Credits: 3
Maximum Credits: 3
Can there be more than one reality? Is there even one? What relationship do the senses and the mind bear to the physical environment? From the dawn of human society, no topic has been more fiercely debated than the nature of reality. In narrative, philosophy, and media, virtual reality has always been with us. This course dives deep into the rabbit hole of the real and the virtual, an adventure that includes philosophy, literature, film, and, of course, VR headsets aplenty! In addition to exploring the history of the real and the virtual, we will consider the relationship of virtual reality to the body, to space, to human gesture and communication, and to code. We will also explore the role of the imagination and creativity in the generation of new worlds. You will learn to think historically, theoretically, and critically about VR. You will have the option of either writing critical papers or creating your own virtual environment or game as your final project. This course assumes no prior experience with VR or coding, but those skills can optionally be put to use in final projects. Come prepared to question your reality!
ENGLIT 1360 - TOPICS IN 20TH CENTURY LIT

Minimum Credits: 3
Maximum Credits: 3
Considers thematic, formal historical or cultural topics in late 19th and 20th century literature. It ties these issues to critical and social concerns in international modernism and post modernism.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, Global Studies, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1380 - WORLD LITERATURE IN ENGLISH

Minimum Credits: 3
Maximum Credits: 3
This course examines contemporary literature, primarily in English, written in eastern Europe, Africa, Latin America, etc. It pays particular attention to its depiction of social, political and moral concerns.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1382 - PRIZED BOOKS

Minimum Credits: 3
Maximum Credits: 3
How do metropolitan taste and recognition affect dominant and emergent literatures and nations? How do particular contexts and award-winning texts exert pressure on existing criteria and values? How does the category "prized books" also implicitly constitute and comment upon a body of literature that is "unprized"? How do prized books redefine notions of readership and citizenship in the world of globalization and electronic access? Such questions will open up the idea of "world literature" not as an afterthought to the canon of "English" literature, but as an integral and definitive part of it. Students will read literature, speeches, and essays by winners of the nobel and other global literary prizes such as the booker and the commonwealth.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: MIN CUM GPA: 3.25

ENGLIT 1384 - BANNED BOOKS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
ENGLIT 1406 - U.S. LATINX LITERATURE

Minimum Credits: 3  
Maximum Credits: 3

This course will focus on U.S. Latino literature. While Mexican-Americans have roots in North America that go back to colonial times, the Latino explosion has happened mainly in the last thirty years, giving rise to new processes and forms of cultural expression, including an emerging literature that is neither a subset of U.S. Literature nor an extension of modern Latin American literature, though it has connections to both. To get an idea of what this literature involves and where it is going, we will look at some representative novels, poetry, memoirs, plays and films.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 1412 - SECRET PITTSBURGH

Minimum Credits: 3  
Maximum Credits: 3

How much do you know about the city outside Pitt? Have you explored a hillside neighborhood using stairways instead of streets? Visited the church with the largest collection of relics outside Europe? Eaten a macaroon prepared by a transplanted French baker? Pittsburgh has a rich cultural history, from labor disputes to a vibrant arts scene. It's also a city with secrets. Students in this course will explore Pittsburgh's most unusual sites and locales; learn about the city's history and the literature it has inspired; and research and write entries for a public guide to secret Pittsburgh.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 1413 - HUMANITIES IN THE CITY

Minimum Credits: 3  
Maximum Credits: 3

This course will explore the way the arts and humanities work through institutions (museums, journals, cultural organizations, etc.) to shape Pittsburgh. Each week, students will engage with people and institutions- such as City of Asylum, the Center for PostNatural History, and the Andy Warhol Museum - that contribute to Pittsburgh's cultural landscape. Readings and discussions will encourage students to think about the contributions that various institutions make to the city, as well as broader connections between the humanities and public concerns such as housing, transportation, diversity, and social justice. Through discussions and assignments (see Student Responsibilities, below), the course aims to help students achieve a deeper understanding of the city and inspire them to be active forces in shaping their surroundings by engaging with the arts and humanities in institutional settings.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

ENGLIT 1510 - KAFKA AND THE MODERN WORLD

Minimum Credits: 3  
Maximum Credits: 3

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

ENGLIT 1552 - HISTORY OF THE ENGLISH LANGUAGE

Minimum Credits: 3  
Maximum Credits: 3
A survey of the linguistic development of English from Anglo-Saxon times to the present. Attention given to basic linguistic structures and discursive practices and to the social and historical conditions under which they change.

**Academic Career:** Undergraduate
**Course Component:** Seminar
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 1600 - COMPUTATIONAL METHODS IN THE HUMANITIES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces students to the use of computational modeling and programming to conduct text-based research in the humanities. The goals of this course are to learn how to identify research questions in the humanities that are amenable to computational analysis and processing, along with designing and implementing xml-based computational systems to explore those questions.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 1611 - DEVELOPMENT OF THE NOVEL**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course studies the development of the novel as a literary practice. Readings will reveal significant contributions to the definition of the novel; the characteristics that identify the novel, historical developments that led to its creation, and its dominant subjects.

**Academic Career:** Undergraduate
**Course Component:** Seminar
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 1635 - CHILDREN IN PITTSBURGH**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate
**Course Component:** Seminar
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 1640 - LITERATURE FOR CHILDREN**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines literature that has been and is being read by children. There are units on fairy tales, myths and legends, poetry and fiction as well as more "realistic" fiction. The approach is historical, critical and creative.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis

**ENGLIT 1645 - CRITL APPRCH TO CHILDREN'S LIT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines a variety of children's books from a number of theoretical perspectives; historical, feminist, transactional, structuralist, etc. The implications of theory will be emphasized. We will place children's books and reading in the wider context of the emotional, cognitive, and moral development of the child, the popular culture of childhood, and contemporary multicultural society.

**Academic Career:** Undergraduate
**Course Component:** Seminar
**Grade Component:** LG/SNC Elective Basis
Course Requirements: PREQ: ENGLIT 0560 and 0562 or 0655
Course Attributes: Childrens Literature, DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

ENGLIT 1647 - LITERATURE FOR ADOLESCENTS

Minimum Credits: 3
Maximum Credits: 3
This course will read classics as well as modern works written specifically for an adolescent audience. We will also read and discuss sociological and psychological constructions of adolescents and books on pedagogy.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1701 - TOPICS IN WOMEN'S STUDIES

Minimum Credits: 3
Maximum Credits: 3
Investigates issues raised by the woman's movement in literature written by and about women. It ties these issues to critical and cultural concerns both at the time the text was written and to the present day.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1704 - WOMEN NOVELISTS

Minimum Credits: 3
Maximum Credits: 3
This course explores the important role women have played in the development of the novel and how they have used and transformed its generic traditions. We will place novels in the contexts of issues important to their own time and discuss questions raised by recent feminist criticism.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

ENGLIT 1705 - WOMEN AND DRAMA

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the work of playwrights who came of age during the feminist movement in the 1970s and won critical and/or popular acclaim. Students will choose one of the playwrights to research for a class presentation and term paper.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

ENGLIT 1715 - GLOBAL BLACK LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Despite their geographical and cultural differences, writers from Africa, the Caribbean, and the United States undergo similar experiences of oppression. Problems of self-identity, and the quest for self-respect. These similarities will be discussed in class along with a comparative approach to the texts with supplementary films, slides, and recordings.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies, Latin American Studies
ENGLIT 1719 - INTRO TO HOLOCAUST LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course surveys the central texts of the literature of the holocaust, while introducing students to the main issues and preoccupations of holocaust testimony in literature and film.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGLIT 1730 - CHINESE AND WESTERN POETRY

Minimum Credits: 3
Maximum Credits: 3
A comparative study of Chinese and Western lyric poetry. This course explores the world of feeling as expressed in the poetry of two vastly different worlds: China and the West and focuses on the language of feeling in a poetic medium. The purpose of this course is to appreciate how differences between the two poetic traditions is essential to a better understanding of the two cultures.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGLIT 1738 - IRISH LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course samples the work of major figures in Irish literature. It seeks to define its national character through careful reading of selected texts.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

ENGLIT 1756 - BALLADS AND BLUES

Minimum Credits: 3
Maximum Credits: 3
This course acquaints students with folk and literary aspects of ballads and blues in the Anglo-American and Afro-American traditions. It surveys both forms from their separate beginnings to contemporary examples. Organized both historically and topically, the course explores influences on these forms as well as their historical, social and cultural context.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1760 - TOPICS IN POPULAR CULTURE

Minimum Credits: 3
Maximum Credits: 3
Focuses on the emergence of popular culture, the relationship of modern social and economic practices, mass audiences, and modes of cultural representation, or specific popular forms.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies
ENGLIT 1797 - BIBLICAL IMAGINATIONS

Minimum Credits: 3
Maximum Credits: 3
This course continues the bible as literature and it provides an opportunity to consider more carefully books read in the earlier course as well as to consider other books that were entirely neglected. This second semester will permit us to address some fascinating problems; what happens to narratives as they pass from an oral tradition to written form; problems of translation; the formation of a canon; the ways the bible influences later literature. The generally historical approach will permit the student to understand the time and culture of the bible.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGLIT 1900 - PROJECT SEMINAR

Minimum Credits: 3
Maximum Credits: 3
The junior seminar, required for English literature majors, offered in varied versions, will investigate methods and goals of literary historical study by directing attention to broad historical and theoretical issues and to long-durational developments and transformations of literacy cultural practices. Will include a range of literary, theoretical and historical texts selected to enable exploration of issues and problems that cut across traditional designations of literary historical periods.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0202 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Capstone Course, West European Studies, Writing Requirement Course

ENGLIT 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
This option permits students to design their own course with the approval of a department faculty member.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ENGLIT 1903 - DIRECTED RESEARCH IN LITERATURE

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

ENGLIT 1904 - UTA IN LITERATURE

Minimum Credits: 1
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

ENGLIT 1907 - LITERATURE INTERNSHIP
ENGLIT 1910 - SENIOR SEMINAR

Minimum Credits: 3
Maximum Credits: 3
Intensive study of a single topic or figure that assumes previous work in related literary historical and critical areas. Each seminar moves toward a final paper that integrates earlier literary study with the specific critical perspective developed in this course.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Capstone Course, Writing Requirement Course

ENGLIT 1913 - ADVANCED RESEARCH IN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Working closely with faculty members on her/his senior thesis committee to do the primary reading, foundational research, and exploratory writing for the senior thesis, the student will read a majority of the primary literary works and a significant amount of criticism and complete a minimum of 20 pages of exploratory writing or a draft of the thesis.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

ENGLIT 1914 - SENIOR HONORS THESIS

Minimum Credits: 3
Maximum Credits: 3
In this course, the student will complete all remaining research for the senior thesis and will work closely with the faculty members on his/her committee to plan, write, and revise the senior thesis.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

ENGLIT 1925 - UNDERGRAD TEACHING IN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
Students enrolled in this course will work with an instructor as an assistant to any upper-level course being offered to English majors. They will help with course materials and generate class discussion.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit
Course Attributes: Capstone Course

English Writing

ENGWRT 0400 - INTRODUCTION TO CREATIVE WRITING
Minimum Credits: 3
Maximum Credits: 3
This course offers the opportunity to experiment with forms of poetry and fiction and to read and discuss from a writer's point of view contemporary writing in these genres.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 0411 - INTRODUCTION TO CREATIVE NONFICTION

Minimum Credits: 3
Maximum Credits: 3
This course will introduce undergraduates to creative nonfiction, a genre that often borrows from fiction writer's techniques while sticking to the facts. Genre includes personal essay, new journalism, memoir and quality feature writing.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102) or ENGR 0012

ENGWRT 0520 - INTRODUCTION TO FICTION WRITING

Minimum Credits: 3
Maximum Credits: 3
This first course in the fiction sequence introduces students to aspects of prose fiction--plot, point of view, characterization, conflict, etc. Students may write exercises on these aspects of fiction, write one or more short stories and revise frequently. Students will also read representative stories and explore their use of particular fictional techniques.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 0530 - INTRODUCTION TO POETRY WRITING

Minimum Credits: 3
Maximum Credits: 3
Through writing exercises, analysis of modern and contemporary poetry and frequent revision of their own poetry, students learn the basic elements of poetry writing.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 0540 - WRITING YOUTH LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course will introduce undergraduates to the art of writing for young people. It may focus on a single genre in depth (for instance, the young adult novel) or invite students to read and write broadly across a range of genres (picture books, children's poetry, nonfiction for the young, etc.). This course serves as an approved category 1 elective for the children's literature certificate program, but all interested students are welcome.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGCMP 0200 or (ENGCMP 0203 or 0205 or 0207 or 0208 or 0250 or FP 0003 or 0006 or ENGCMP 0004 or 0006 or 0020 or ENG 0102) or (ENGR 0012 or 0712 or 0715 or 0716 or 0718)
ENGWRT 0550 - FUNDAMENTALS OF NEWS REPORTING

Minimum Credits: 3
Maximum Credits: 3
The internet has led newspapers, corporations and non-profit agencies to create websites that dispense news and information 24 hours a day, seven days a week, and these agencies need people who can write efficiently in that style. This makes clear, concise, accurate writing - the basis of all news reporting - more important than ever. In fundamentals of news reporting, students will learn to identify news, write effective summaries of the information, structure stories well, conduct research, and identify sources of reliable facts and informed opinions. Students will write about their surrounding communities: the University, Oakland, the city of Pittsburgh. The course will also include lectures and discussions about media law and ethics.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)
Course Attributes: Writing Requirement Course

ENGWRT 0560 - SCREENWRITING AND NARRATIVE

Minimum Credits: 3
Maximum Credits: 3
This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write rigorously building from idea to outline with great attention to structure and character development. Students will develop writing abilities, critical facilities in approaching work, and an understanding of principles of storytelling common in narrative forms.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) or (ENGR 0012 or 0712 or 0715 or 0718)
Course Attributes: Writing Intensive Course (WRIT)

ENGWRT 0610 - INTRODUCTION TO JOURNALISM AND NONFICTION

Minimum Credits: 3
Maximum Credits: 3
This course is designed to develop your skills as a nonfiction writer. Through a combination of required readings, creative exercises, peer critiques and critical discussions, you will develop an understanding of the fundamentals of journalism as well as an introduction to the wide-ranging possibilities of nonfiction writing as a genre: narrative long form, the personal essay, immersion journalism and forms of creative nonfiction. This class will be divided into two components; gathering information and shaping stories.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 0650 - READINGS IN JOURNALISM

Minimum Credits: 3
Maximum Credits: 3
This course is intended to introduce journalism students to news, feature, and column/op-ed writing as practiced by the best papers - and the best writers - nationally. The course will focus on the methods for obtaining the information needed to create solid news stories, and strategies ranging from extensive, in-depth interviewing, background reading, and the journalistic "legwork" and "digging" that produces incisive, accurate accounts and the very best "investigative reporting".

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
ENGWRT 0710 - INTRO TO AUDIO STORYTELLING

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 1010 - INTERMEDIATE FICTION

Minimum Credits: 3
Maximum Credits: 3
Students work on writing short stories and read a wide range of stories. Students can expect to revise their work regularly. Class sessions will address problems in fiction writing -- from plot to characterization, from point-of-view to style.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0520; MIN GRADE: 'C'

ENGWRT 1050 - The Lyric Essay

Minimum Credits: 3
Maximum Credits: 3
In this class, students will be invited to experiment with the boundaries between nonfiction, fiction, and poetry. They will read and write a wide variety of Lyric Essays—including mosaics, prose poems, and double-portraits—as well as compose a short audio monologue.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGWRT 1090 - MASTERING POINT OF VIEW

Minimum Credits: 3
Maximum Credits: 3
This course acquaints the student with a variety of first and third person points of view. Through readings, class discussions and written work, students develop a mastery of the internal monologue, dramatic monologue, letter, diary and other forms.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0520 or 0530 or 0550 or 0610

ENGWRT 1091 - AUTOBIOGRAPHY AND CREATIVE IMPULSE

Minimum Credits: 3
Maximum Credits: 3
This advanced level, mixed-genre course will explore various ways autobiographical material might be generated, structured, modified, and revised. In addition to frequent in-class writing and a final project, students will read and respond to published essays, poetry, and fiction.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0520 or 0530 or 0550 or 0610

ENGWRT 1092 - WRITER'S JOURNALS

Minimum Credits: 3
Maximum Credits: 3
This course studies the journal as an art form. It also questions the purpose and value of journal keeping for a writer.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 0520 or 0530 or 0550 or 0610

### ENGWRT 1094 - READINGS IN CONTEMPORARY FICTION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course acquaints students with a variety of contemporary writers. This study helps students raise questions about their own developing aesthetics as they are reflected in form and take into account their dual roles as creative writers and critics.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 0520

### ENGWRT 1095 - TOPICS IN FICTION

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course concerns itself with matters of interest in fiction writing; form and technique, contemporary production, and the relation of the fiction writer to his/her society.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

### ENGWRT 1097 - TOPICS IN FICTION

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course concerns itself with matters of interest in fiction writing; form and technique, contemporary production, and the relation of the fiction writer to his/her society.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

### ENGWRT 1098 - THE CONTEMPORARY BESTSELLER

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will read books in a variety of genres that have all appeared on the New York Times' bestseller list. We will examine the elements of craft that play a role in making a book a bestseller, such as suspense, characterization, world-building, and plot. A series of assignments will allow students to put these elements into practice in their own writing.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

### ENGWRT 1101 - SENTENCE SHOP: EXPERIMENTS IN TIME AND SPACE

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis
ENGWRT 1132 - ELEMENTS OF SCREENWRITING

Minimum Credits: 3
Maximum Credits: 3
This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings, including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write a completed 1st Act for a 3 to 5 part screenplay, building from idea to outline with particular attention to structure and character development.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 1133 - INTERMEDIATE SCREENWRITING

Minimum Credits: 3
Maximum Credits: 3
This advanced course will help you develop your feature film idea into a full treatment. Weekly discussions and writing assignments focus on creating the plot, scene, sequences, setting, and subplots. By the end of the semester, you will have completed a scene-by-scene treatment of your original work. Considerable outside work is required. Grading is based on weekly assignments, the quality of the written treatment and class participation.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 1200 - WRITING THE CITY

Minimum Credits: 3
Maximum Credits: 3
The course's goal is to encourage your personal recording of experiences through which you gain insight and self-discovery. Journal entries reflect the significance of travel experiences that others can share and expand. Travel narratives and oral presentations are evaluated.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0208 or 0210 or 0212) or ENGFILM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Writing Requirement Course

ENGWRT 1210 - POETRY WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
For this advanced poetry writing course, the central text will be the student's own writing. Students will read recently published poetry, regularly write their own poetry and frequently rewrite it.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0530; MIN GRADE: 'C'

ENGWRT 1245 - STUDIO IN AFRICAN-AMERICAN POETRY AND POETICS

Minimum Credits: 3
Maximum Credits: 3
Intended for graduate students and advanced undergraduates, Studio in African American Poetry and Poetics will be a course in interdisciplinary making, as we investigate the evolving fields of African American poetry and poetics through a critical and a creative lens.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0400 or ENGWRT 0530 or ENGLIT 0315 or ENGLIT 0515

ENGWRT 1290 - READINGS IN CONTEMPORARY POETRY

Minimum Credits: 3
Maximum Credits: 3
This course focuses on American poets who have come to prominence since 1963. We will read widely in the poetry of this period to understand its unique contribution to the development of poetic form and its relationship to the culture that produced it.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0530; ; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0212 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)

ENGWRT 1293 - TOPICS IN POETRY

Minimum Credits: 3
Maximum Credits: 3
This course concerns itself with matters of interest in poetry writing; form and technique, contemporary production, and the relation of the poet to his/her society.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 1310 - NEWSPAPER 1

Minimum Credits: 3
Maximum Credits: 3
Students in this course learn how to profile individuals, report trends, take polls and write about a community. The course provides hands-on practice in feature writing and a workshop approach to critiquing students' and professionals' work.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0550; MIN GRADE: 'C'

ENGWRT 1330 - INTERMEDIATE NONFICTION: SCENE AND POINT-OF-VIEW

Minimum Credits: 3
Maximum Credits: 3
Students in this course will study, practice, produce and revise short pieces of literary nonfiction while examining basic structures of the essay, the profile, and long form narratives. We will study the anatomy of a scene and explore techniques of scene-by-scene construction. Students will be expected to master the basics of point-of-view, and to begin experimenting with voice. We will develop research techniques including the art of the interview and immersion research. This course will place emphasis on digital forms of publishing. Students will develop personal blogs. Workshopping of student work will be limited.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0550 or 0610; MIN GRADE: 'C'

ENGWRT 1350 - AUDIO JOURNALISM AND REPORTING

Minimum Credits: 3
Maximum Credits: 3
This course is designed for emerging journalists and reporters looking to explore their craft in audio form. Students will learn to produce interviews
and reported audio stories, while gaining concrete skills necessary for finding work in the radio or podcasting industry. Through instructive lectures, craft-based discussions, and hands-on production activities, students will experiment with a variety of audio journalism genres, including news and short features, using professional-grade recording equipment and editing software. You will learn to identify what makes for compelling sources and subjects and how to ethically and effectively navigate a range of interviewing and field reporting settings. We will cover stylistic conventions for scriptwriting and tracking narration and consider strategies for pitching story ideas to real-world media outlets. And you will fine-tune your ear for the craft through collaborative story edits and workshops, coming away with a portfolio of short reported stories, including at least one short broadcast-worthy feature.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENGWRT 0610

**ENGWRT 1360 - THE ART OF THE INTERVIEW**

Minimum Credits: 3  
Maximum Credits: 3  
In this course, we'll explore the interview as an essential tool for nonfiction storytelling across forms. We'll consider approaches to interviewing practice from across subfields and genres or example, print journalism, memoir, oral history, radio, and documentary film, and consider how different techniques yield different materials suited to a range of purposes and stories. What makes a good question tick? How can you get through to a challenging or resistant subject? What habits of mind and body can help you transform an answer into an image or an opinion into a story? Through focused case studies and discussions, you'll learn from the craft of master interviewers across fields. And through hands-on exercises, you'll gain experience planning, conducting, and making meaning from real-world interviews in a range of styles and contexts. You'll come away with a toolkit of adaptable skills and techniques to continue your work in the world, wherever you choose to take it.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: ENGWRT 0610 or ENGWRT 0710

**ENGWRT 1370 - JOURNALISM BOOT CAMP: WRITE NOW**

Minimum Credits: 3  
Maximum Credits: 3  
The course is a journalism boot camp-like experience where students will work closely with the instructor and editors on the Pitt news to prepare for the real world of journalism.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

**ENGWRT 1377 - MEDIA LITERACY: WRITING AND READING YOUR WAY THROUGH THE DIGITAL LANDSCAPE**

Minimum Credits: 3  
Maximum Credits: 3  
This course will teach you how to be media literate and understand the role of media in a democracy. You will learn how to identify and verify news, and how to understand news gathering and sourcing. You will learn how to distinguish between the demands of real journalism as you do your own writing and the realities of the digital world.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

**ENGWRT 1378 - WOMEN IN JOURNALISM**

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate

1303
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENGWRT 1390 - READINGS IN CONTEMPORARY NON-FICTION

Minimum Credits: 3
Maximum Credits: 3
This course familiarizes students with a number of different forms of and approaches to contemporary non-fiction writing.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0550 or 0610

ENGWRT 1391 - WRITING THE REVIEW

Minimum Credits: 3
Maximum Credits: 3
This course explores various types and styles of reviews. Students read a variety of critics as well as write original reviews of film, television, theatre, music, books, etc.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (ENGCMP 0004 or 0006 or 0020 or 0200 or 0203 or 205 or 207 or 208 or 0250) or (FP 0003 or 0006) or ENG 0102 or ENGR 0012

ENGWRT 1393 - SPORTS WRITING

Minimum Credits: 3
Maximum Credits: 3
The course affords students the opportunity of studying modern sports writing techniques, with an added goal of improving their writing skills. It deals with the differences between sports reporting and writing and news reporting and writing. Ideally, a student with an interest in sports writing will complete the course with an idea of how best to collect information, organize it and disseminate it in an appealing manner. Clear, entertaining prose will be stressed.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0550 or 0610

ENGWRT 1394 - SCIENCE WRITING

Minimum Credits: 3
Maximum Credits: 3
The emphasis of this introductory science writing course will be two fold: you will learn to find, read, assess, and interpret scholarly scientific writing; you'll also read books and articles that use creativity, imagination and poetic acuity to make scientific ideas clear to the lay reader. Through the deep study of pieces of science writing and the completion of a series of short exercises, you will gain the skills you need to write and revise feature-length articles.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (ENGCMP 0004 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0250) or (FP 0003 or 0006) or ENG 0102 or ENGR 0012

ENGWRT 1399 - TOPICS IN NON-FICTION: NEWSPAPER

Minimum Credits: 3
Maximum Credits: 3
This course examines the history, lives and livelihoods famous female journalists who made exceptional contributions to journalism despite institutional and gender obstacles. Starting with the turn-of-the century, we look at women and their writing who covered domestic and international beats such as Nellie Bly, Martha Gellhorn, Gloria Steinem, and Lara Logan who have left their mark on women's history.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**ENGWRT 1403 - TOPICS IN NON-FICTION: ELECTRONIC MEDIA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course concerns itself with the varieties of writing for the electronic media, and with related matters of interest; form and technique, contemporary production, ethical and legal matters, and the general relation of the writer in this field to his/her society.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 0520 or 0530 or 0610

**ENGWRT 1430 - LITERARY AND ONLINE PUBLISHING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will introduce students to the art and craft of literary and online publishing. Students will research independent literary magazines and small presses, both online and in print. They will learn the basics of literary publishing from both an editorial and an authorial perspective. They will use what they learn to produce an online site featuring the work of Pitt-Greensburg writing program graduates, as well as individual print chapbook-length collections from the English writing program capstone.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 0520 or 0530 or 0610

**ENGWRT 1435 - LITERARY PUBLISHING IN PRINT AND ONLINE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 0520 or 0530 or 0610

**ENGWRT 1450 - AUDIO STORYTELLING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 0400, or 0410, or 0520, or 0530, or 0610

**ENGWRT 1451 - MULTIMEDIA ESSAY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
**Academic Career:** Undergraduate  
**Course Component:** Seminar
ENGWRT 1490 - LISTENING TO NARRATIVE AUDIO

Minimum Credits: 3
Maximum Credits: 3

With podcasts on the rise, audio is an increasingly vibrant platform for storytelling across genres, from narrative journalism, to the audio essay, to serial (non)fiction. What can we, as writers learn from close encounters with these forms? How can born-audio narratives help us approach questions of style, structure, scene, and voice in unexpected ways? And how can we take inspiration from these forms to reimagine the possibilities of our writing, whether it's for the ear or for the page? Just as a "Readings" course teaches you to read like a writer, in this course, you'll be challenged to listen like an audio producer, attuning yourself to the craft of audio stories in order to inform and enrich your own creative work. Throughout the semester, you'll produce focused responses to weekly listening assignments, engage in rigorous discussions on craft, and generate some of your own creative work in response to the stories we encounter. While no formal technical training in audio production will be provided or required, students interested in exploring their writing in audio forms will be encouraged to do so.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0400 or 0410 or 0520 or 0530 or 0610

ENGWRT 1501 - TOPICS IN CREATIVE WRITING

Minimum Credits: 3
Maximum Credits: 3

Topics in Creative Writing will explore writing that crosses boundaries in a variety of ways, between traditional genres (fiction, nonfiction, poetry, drama) or that is interdisciplinary (between writing and, for instance, studio arts, photography, music, or dance). Writers of all genres have been influenced, challenged, and enriched by other kinds of artists' productions and practices (and vice versa), and this class will examine those engagements and influences especially in but not limited to contemporary work.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

ENGWRT 1514 - WRITING AND MAKING COMICS

Minimum Credits: 3
Maximum Credits: 3

This course is designed as an introduction to making comics. The class will focus primarily on writing scripts: pitching, outlining, drafting, and editing. Students need not have skills as illustrators. However, students will gain a basic understanding of drawing comics, collaborating with artists, and comic layout and design.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

ENGWRT 1515 - THE BOOK AS ART: TEXT AND IMAGE

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: Pre-requisite: ENGWRT 0520 or ENGWRT 0530 or ENGWRT 0610 (or instructor permission)

ENGWRT 1540 - WRITING YOUTH LITERATURE 2

Minimum Credits: 3
Maximum Credits: 3
Expanding on the fundamentals of writing youth literature, students will aim to complete the first draft of a novel-length piece for either a young adult or middle grade audience. Incoming students must have an approved idea and roughly sixty consecutive pages of writing already completed.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

### ENGWRT 1650 - PLAYWRITING 1

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A beginning course in writing for the stage. Starting with short scenes, students will work towards understanding the craft and art of constructing theatre stories to be performed by actors. The final project will be a one-act play. Throughout there will be emphasis on the stage effectiveness of the writing and opportunity for informal performance of student scripts.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENG 0102 or ENGCMP (0002 or 0020 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*  
**Course Attributes:** Writing Requirement Course

### ENGWRT 1651 - PLAYWRITING 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is an advanced course in the study of playwriting. The goal is to create performable plays.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: THEA 1365 or ENGWRT 1650

### ENGWRT 1710 - SENIOR SEMINAR IN FICTION

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
In this seminar students are expected to criticize student work intelligently and constructively. It is designed for students familiar with the craft of writing who wish to refine their writing skill and make their stories more subtle, original and meaningful. Analysis of student writing will be supplemented by the reading of professionally written stories.  
**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 1010  
**Course Attributes:** Capstone Course

### ENGWRT 1730 - SENIOR SEMINAR IN POETRY

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
A fairly broad knowledge of 20th century poetry in English is assumed. Most class hours will be devoted to workshop critiques; a portion of class time will be spent discussing the work of younger contemporary poets.  
**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: ENGWRT 1210  
**Course Attributes:** Capstone Course

### ENGWRT 1750 - SENIOR SEMINAR IN NONFICTION
ENGWRT 1760 - ADVANCED REPORTING

Minimum Credits: 3
Maximum Credits: 3
This course will stress in-depth-interpretive reporting in specialized areas such as science, business, and politics.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0550 or 0610

ENGWRT 1770 - STUDIO IN AUDIO FICTION

Minimum Credits: 3
Maximum Credits: 3
Audio fiction has undergone a kind of renaissance, reimagining the possibilities and forms of classic radio drama for contemporary podcast audiences. In this advanced production course, we will take up this growing genre as a platform for experimentation. Drawing inspiration from focused listening assignments and from creative exchange with your peers you will work in a collaborative studio setting to produce an original, sound-rich work of audio fiction, aiming to come away with a polished, broadcast-worthy story by the end of the semester. This is a workshop-intensive course. You will be asked to provide detailed feedback on your peers, work and to offer up your own work-in-progress for critique at regular intervals, using this feedback to inform your story's development at every stage. Class discussions and activities include techniques for story structure, character development, dialogue, and directing, as well as hands-on instruction in mixing and sound design. This course assumes prior experience in narrative audio production and/or a self-directed approach to the technical elements of audio recording and editing. Your active contributions to the collaborative working environment of this class are key to its success.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0710 OR ENGWRT 1132 or FILMST 1132 ; AND ENGWRT 1490 OR BY PERMISSION OF INSTRUCTOR

ENGWRT 1780 - STUDIO IN AUDIO DOCUMENTARY

Minimum Credits: 3
Maximum Credits: 3
In this advanced production course, we will explore the craft of audio documentary in a hands-on studio setting. Over the course of the semester, you will dedicate yourself to producing a single sound-rich work of audio documentary, which you will pitch, research, record, script, edit, and revise, aiming to come away with a polished, broadcast-worthy story by the end of the term. This is workshop-intensive course. You will provide detailed feedback on your peers, work and to offer up your own work-in-progress for critique at regular intervals, using this feedback to inform your story's development at every stage. Class discussions include strategies for generating and pitching stories, planning and conducting interviews, scripting and structuring tape, and working with music and field recordings. While our primary texts will be your own stories, we will also engage with a variety of forms of audio documentary through focused listening assignments, which will serve as models and inspiration for your work. This course assumes prior experience in narrative audio production and a self-directed approach to the technical elements of audio recording and editing.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0710 OR ENGWRT 1350 AND ENGWRT 1490 OR BY PERMISSION OF INSTRUCTOR
ENGWRT 1900 - INTERNSHIP: WRITING

Minimum Credits: 3  
Maximum Credits: 3  
This course offers students an opportunity to work as interns for local media, including newspapers, magazines and television stations. The internships are complemented by close supervision and seminars dealing with some of the ethical, legal, and practical issues facing the working professional.  
Academic Career: Undergraduate  
Course Component: Internship  
Grade Component: LG/SNC Elective Basis

ENGWRT 1901 - INDEPENDENT STUDY

Minimum Credits: 1  
Maximum Credits: 6  
This option permits students to design their own course with the approval of a department faculty member. Students must submit a proposal to the faculty member. Note: the proposed study must not duplicate the content of regularly offered courses.  
Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: LG/SNC Elective Basis

ENGWRT 1904 - UTA IN WRITING

Minimum Credits: 1  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Independent Study  
Grade Component: LG/SNC Elective Basis

Environmental Studies

ENVSTD 1310 - HIMALAYAN GEOGRAPHY

Minimum Credits: 3  
Maximum Credits: 3  
The Himalayan region is characterized by a tremendous range of social and cultural diversity that corresponds to climatic, ecological and geographical variation, as well as local and regional geopolitical factors. Historical change from the emergence of early forms of social complexity centered on chiefs and their forts from which the regional designation of Garwhali takes its name through the development of kingdoms and larger polities shows the intimate link between geography, environment and socio-political transformation. Similarly, local language patterns, regional religious practices, musical styles, mythology, food culture, sartorial fashion, architectural design, agricultural and transportation technologies and engineering and trade networks have all been shaped by the structure of mountain barriers, bounded valley communities and bracketed lines of communication that follow river systems. Whereas the political economy of the Himalayas has been structured around agricultural production, and the development of elaborate field terrace systems, there have also been subsidiary economies centered on trans-Himalayan trade and pilgrimage as well as pastoral nomadism and transhumance. Since the colonial period, the Himalayas have increasingly become a place for rest, relaxation, tourism and adventure, and this along with further political transformations since Indian independence has led to the rapid development of urban areas. This course will provide a survey of Himalayan history, society and culture with a focus on the relationship among nature, the environment and geography.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

ENVSTD 1311 - HIMALAYAN BIODIVERSITY

Minimum Credits: 3  
Maximum Credits: 3
Ranging in altitude from several hundred meters above sea level to over seven thousand, from subtropical forests to high altitude meadows and deserts, and from areas with little or no rainfall to regions that are among the wettest in the world, the Himalayas define a geographical region of enormous geological variation and biodiversity. The goal of this course is to gain an understanding of this diversity, with a focus on ecology. More specifically we will examine ecology and ecosystems in terms of biosemiotics - how and why organisms within an ecological niche communicate with one another, and how these patterns and structures of communication define different kinds of interdependence. Within the framework of standard classificatory schemes - mammals, birds, reptiles, insects - we will focus on particular species and specific niche systems for more detailed biosemiotic/behavioral analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

ENVSTD 1350 - UNDERGRADUATE SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This seminar brings together all undergraduate majors in anthropology for a seminar on the methods by which cultures around the world change over time. Defining such methods occupies much of any anthropologist's time, be he or she an ethnographer, archaeologist, physical anthropologist or linguist. The seminar therefore examines this central problem from many perspectives and affords the student ample opportunity for personal expression as well as rewarding discussion and research in a peer group environment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Grad LG/SNC Basis

ENVSTD 1399 - HIMALAYAN POLITICAL ECOLOGY

Minimum Credits: 3
Maximum Credits: 3
The Himalayan region is characterized by dramatic climatic and geological variation, a tremendous range of biodiversity and a complex ecology. Within the region there is also profound cultural variation. This course seeks to provide a critical perspective on the ecology and environment of the Himalayas by examining how different groups at the village, state, national and international level are implicated in the political ecology of the mountains. We will look at the way in which village farming communities use natural resources, what kind of pressure is put on resources as a result of development and population growth, how the mountain environment shapes the politics and resource distribution at the level of the state and, finally, how environmental and energy issues shape national policy and international relations.

Film Studies

FILMST 0001 - FILMMAKING 1: FUNDAMENTALS

Minimum Credits: 3
Maximum Credits: 3
Filmmaking is a creative process that combines art, science, craft, and collaboration. This course is a hands-on introduction to the process, starting with the building blocks of motion pictures: light and cameras, composition, editing, and visual storytelling. You will complete two short videos over the course of the semester, shooting video with DSLR cameras and editing using Adobe Premiere Pro. In-class exercises will provide a deeper understanding of making moving images. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.
Minimum Credits: 3
Maximum Credits: 3
This course introduces you to the world of digital photography. During the semester, you will develop your unique photographic style through hands-on practice with camera controls, print quality, composition, and subject matter. You will explore different facets of what makes a quality photograph: exposure, quality of light, Photoshop, and digital printing. Lectures will examine the work of important contemporary and historical photographers. Grading is based on assignments, written exams and a final portfolio. All enrolled students will be responsible for paying a course fee for the use of equipment.

FILMST 0121 - ANIMATION 1

Minimum Credits: 3
Maximum Credits: 3
This course in frame-by-frame motion picture production is designed for both beginners and seasoned animators. Over the course of the semester, you will be encouraged to experiment with a variety of media and techniques including digital 2D, hand-drawn 2D, clay, cutouts, puppets, time-lapse, and pixelation. Through lectures and demonstrations, you will explore storyboarding, animation history, character development, acting, and the principles of animation. While drawing is one approach to animation, drawing skills are not required to succeed. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate

Course Requirements: PREQ: FILMST 0001
Course Attributes: Film Studies

FILMST 0221 - PHOTOGRAPHY 2

Minimum Credits: 3
Maximum Credits: 3
Expanding on the skills learned in Photography 1, this course will have you developing your photographic vision while honing your digital processing skills. Shooting assignments and lectures involve using Lightroom for image editing and adjustments, basic color management, monochrome, and color digital printing. You will also incorporate Photoshop, HDR, images for the web, contact sheets, and file archiving into your photographic workflow. Upon finishing the course, you will have a final project that is exhibition ready. Grading is based on class participation, written exams and assignments. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FILMST 0225 - STUDIO LIGHTING

Minimum Credits: 3
Maximum Credits: 3
This is a production course in studio photography. The emphasis will be on lighting techniques. Assignments will include portraiture, tabletop set ups and synchronizing flash units with daylight. Considerable outside time is required to complete assignments. This course is taught at Pittsburgh Filmmakers' School of Filmmaking and Photography, located at 477 Melwood Avenue. All enrolled students will be responsible for paying a course fee for the use of Pittsburgh Filmmakers' facilities and equipment.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FILMST 0250 - BUSINESS OF PHOTOGRAPHY AND MULTIMEDIA
Minimum Credits: 3
Maximum Credits: 3
In this class students learn the basics of professional practices as they relate to various photography markets including, Editorial, Advertising, Weddings, Portraits and Fine Art Photography. Students will learn to research and apply basic marketing principles so that they can successfully promote their work and skills as a professional photographer. Students will create business cards, letterhead and promotional pieces to use in the day-to-day dealings of their business. They will learn to sequence and format their portfolio (created in Advanced Photographic Production) for both print and online viewing. Other topics include branding, blogs, SEO - analytics, artist statements, and production proposals, copyright, licensing and professional business practices and etiquette.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FILMST 0400 - POST-PRODUCTION

Minimum Credits: 3
Maximum Credits: 3
This course introduces students from film, video and photography to the desktop Macintosh computer—the preferred interface when dealing with graphics-related applications. Students will first become acquainted with and proficient in the Mac operating system. The course will survey the most popular applications for manipulating photographic images, combining text with images, and doing simple video and audio editing on a Mac. Students will integrate readings, lecture and in-class lab sessions to complete their own projects.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

FILMST 0410 - PHOTOGRAPHY 3

Minimum Credits: 3
Maximum Credits: 3
This course offers advanced Photoshop techniques. Learn to make complex selection and color correction, texture maps, advanced layering and masking principles. Learn to make custom color profiles along with essentials of digital color management. Emphasis is on the development and exploration of a personal vision and the creation of a digital portfolio.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PROG:College of General Studies
Course Attributes: Film Studies

FILMST 0430 - AUDIO PRODUCTION

Minimum Credits: 3
Maximum Credits: 3
This course explores sound as a fundamental element of human experience and media. Audio production - the recording and editing of sound - is the focus of the class, leading to the creation of an original sound file and podcast file as a final project. Emphasis is on creating a "soundscape": a rich, multi-layered production constructed from audio sources such as interviews, narration, ambience, live events, sound effects, and music. Class demonstrations cover how various microphones work and how to use them, as well as the physics, history, and theory of sound recording. All enrolled students will be responsible for paying a course fee for the use of equipment.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FILMST 0601 - FILMMAKING 2: SIGHT AND SOUND

Minimum Credits: 3
Maximum Credits: 3
In this hands-on course, you will continue to acquire the skills required to design, shoot and edit HD video. Demonstrations and in-class exercises
introduce more professional camera operation, lighting, sound, special effects, and editing workflows. You will apply this new knowledge and facility to several out-of-class assignments of increasing sophistication over the course of the semester. All enrolled students will be responsible for paying a course fee for the use of equipment.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FILMST 0001 or ENGFLM 0590  
**Course Attributes:** DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

**FILMST 0610 - DIGITAL EFFECTS 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course covers digital methods of combining video, photographs, graphics, text and other visual elements, and manipulation of those elements to tell a story. Course includes software such as Adobe After Effects, Adobe Photoshop and Illustrator. Topics include gaining an understanding of the structure of digital images, transparency and masking, Chroma keying, using layers and depth, key frame animation, image processing, effects and their use, formats, input and output of imagery and workflow methods.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: FILMST 0601  
**Course Attributes:** Film Studies

**FILMST 1001 - BROADCASTING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
FILMST 1000 Broadcasting introduces students to television production through academic and hands-on experience, utilizing the University of Pittsburgh's new state-of-the-art television studios and equipment. In addition to students learning how to produce a live broadcast event for collegiate teams and a news broadcast, guest lecturers will talk about the industrial realities of the profession. Students will understand how to format and make a show rundown, apply graphics, utilize replay, work a television camera, comprehend audio application and mixing, produce and direct live events and news broadcast, as well as gain experience in front of the camera as news anchors, reporters and on-air talent for live events.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis

**FILMST 1002 - BROADCASTING 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
The unique and dynamic Broadcasting 2 course will utilize every aspect of the state-of-the-art Pitt Studios, offering students a challenging and stimulating curriculum. Students will produce a Live Event Show Open (incorporating all pre-production elements), a Newscast, and a Podcast, incorporating video and animation marketing support. Students' projects will be crewed by classmates.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FMST 1885 or FILMST 1001

**FILMST 1120 - DIRECTING ACTORS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores the communication between directors and actors and how a director's vision translates into playable action on the screen. Class sessions will provide examples and practical experience in successful director/actor collaboration. Students will learn how to judge a good performance and will practice directing techniques that lead to better performances by actors. It is a laboratory class and students will direct each other. The format combines hands-on exercises, taping, screening and lecture. Grading is based on exercises, homework, taped scenes and
participation.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FILMST 1130  
**Course Attributes:** Film Studies

**FILMST 1130 - DIRECTING MOTION PICTURES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course addresses some of the basic problems of designing and directing scenes for motion pictures. Some of the problems discussed are the relationship of film to reality, the meaning of cinematic techniques, continuity, shot selection, cut selection and visualization techniques. The format is a combination of lecture, screening and interactive group exercises. Extensive outside work is required. All enrolled students will be responsible for paying a course fee for the use of equipment.
  
**Academic Career:** Undergraduate

**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FILMST 0001 or ENGFLM 0590  
**Course Attributes:** Film Studies

**FILMST 1132 - ELEMENTS OF SCREENWRITING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings, including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write a completed 1st Act for a 3 to 5 part screenplay, building from idea to outline with particular attention to structure and character development.
  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**FILMST 1133 - INTERMEDIATE SCREENWRITING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This advanced course will help you develop your feature film idea into a full treatment. Weekly discussions and writing assignments focus on creating the plot, scene, sequences, setting, and subplots. By the end of the semester, you will have completed a scene-by-scene treatment of your original work. Considerable outside work is required. Grading is based on weekly assignments, the quality of the written treatment and class participation.
  
**Academic Career:** Undergraduate

**FILMST 1135 - WRITING THE ORIGINAL SERIES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
Episodic stories can be traditional TV sitcoms or drama series, serialized narratives meant to be binged on streaming networks, independent web series, even stories told through a series of Snapchat stories. As different as they are structurally, they all have similar challenges - the writer must create a rich, interesting world and populate it with compelling characters in order to keep an audience watching from episode to episode. In this course students with basic screenwriting skills will apply those skills to the creation of an episodic series, from pitching the series through developing
the story arc to writing the pilot episode.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FILMST 1132 or ENGWRT 0560

---

**FILMST 1140 - ACTING FOR THE CAMERA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed for actors who would like to improve their craft by better understanding the differences between acting for the stage and acting for the camera. The course will describe and demonstrate the contrasts between stage and screen acting in specific shooting scripts and follow that with appropriate script study, character analysis and exercise in film acting techniques. Each class will include lecture, videotaped examples of performances for analysis and critique and the practical experience of working in front of the camera.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PROG: College of General Studies  
**Course Attributes:** Film Studies

---

**FILMST 1145 - SOUND FOR MOTION PICTURES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will enable students to convert sound to a digital analog, recording, processing, storing and mixing sounds to varied effects in relation to visual media. Particular emphasis will be placed on the special requirements of sound for narrative film: intelligibility in voice reproduction, achieving and maintaining synchronism, and the relationship between voice, music, sound effects and story. All enrolled students will be responsible for paying a course fee for the use of equipment.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FILMST 0500 or 0601  
**Course Attributes:** Film Studies

---

**FILMST 1157 - LIGHTING FOR MOTION PICTURES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course allows students from both the film and video disciplines to expand their aesthetic boundaries by overcoming technical limitations. Students will learn theories of lighting to create a particular emotional, psychological, or physiological effect in the viewer, and will participate in lighting and shooting a variety of situations in class. Differences between lighting for film and video, light metering, and various lighting tools are among the topics covered. Contemporary film examples will be examined and discussed in class. All enrolled students will be responsible for paying a course fee for the use of equipment.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PROG: College of General Studies  
**Course Attributes:** Film Studies

---

**FILMST 1235 - EXPERIMENTAL CAMERA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This will be a workshop course dealing with a variety of techniques utilizing the camera as a tool for visual information outside of its normal use and function. The course will look at the history of cameras and the many image making devices that were invented to date.

**Academic Career:** Undergraduate
FILMST 1580 - DIGITAL CINEMATOGRAPHY

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover advanced video technology and professional techniques of videography. Emphasis will be placed on high image quality and meeting broadcast specifications for video and audio. Professional-quality video cameras will be covered extensively. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FILMST 0601
Course Attributes: Film Studies

FILMST 1600 - FILMMAKING 3: STORY TO SCREEN

Minimum Credits: 3  
Maximum Credits: 3  
Building on your experiences in Filmmaking 1 and 2, you will continue to develop your style as a filmmaker while creating more ambitious work and improving your technical skills. Demonstrations cover HD video cameras and lenses, advanced lighting and sound techniques, creating a pre-production binder, and advanced post-production workflows using Adobe Creative Cloud software. In addition to creating short projects in class, significant outside work is required, as you will take a short film from concept to a polished final version. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FILMST 0601 or ENGFLM 1497 or SA 1380
Course Attributes: Film Studies

FILMST 1901 - INDEPENDENT STUDY

Minimum Credits: 3  
Maximum Credits: 3  
Under certain circumstances students may elect to study film production on an independent basis. Such independent study will be closely supervised by an instructor and will entail the writing of a contract prior to beginning the course. Independent study will involve a minimum of eight meetings (between student and teacher) per term. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

FILMST 1921 - FILMMAKING 4: CAPSTONE

Minimum Credits: 3  
Maximum Credits: 3  
This is a capstone course in motion picture production. You should arrive with a script for a short film which you will work on throughout the semester. The film can be any genre, and should represent the culmination of your studies in filmmaking, meeting high standards of technical and aesthetic quality. Through script workshops, pre-production reviews, and critique of rough cuts, your instructor will mentor you through the filmmaking process. All enrolled students will be responsible for paying a course fee for the use of equipment.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FILMST 1130 and 1600 and (ENGWRT 0560 or FILMST 1132)

Film and Media Studies

FMST 0100 - VISUAL LITERACY

Minimum Credits: 3
Maximum Credits: 3
Visual literacy is an emerging area of study which deals with the growing importance of visual culture in our contemporary world and how we interpret what is seen. This course will emphasize the process of critically viewing specific media artifacts and provide tools to students that will allow them to comprehend and evaluate information presented by a variety of forms of visual media, including television, video, film, photography, and the internet.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 0120 - INTRODUCTION TO FILM

Minimum Credits: 3
Maximum Credits: 3
This is an entry-level course on the visual arts that offers the student a broad introduction to the medium of film. As part of this overview, the class will consider such issues as: the process of contemporary film production and distribution; the nature of basic film forms; selected approaches to film criticism; comparisons between film and the other media. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies

FMST 0130 - INTRODUCTION TO VISUAL CULTURE

Minimum Credits: 3
Maximum Credits: 3
This course develops skills to interpret visual culture in contemporary life. Using a wide variety of media, including film, television, advertisements, fashion magazines, museum exhibits, comic books, painting, graffiti, video games, the web, and photography, the course focuses on understanding how conceptions of visuality, gender, race, and politics shape definitions of high and low culture as well as questions of knowledge and being. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies

FMST 0150 - FILM ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the art of the cinema, and to the techniques for its formal analysis. It examines the nature of shot composition and visual framing, the use of color, the role of lighting as a pictorial element, the potentials of camera movement, the modes of editing and the nature of image/sound montage. It also introduces students to dominant cinema forms--narrative, experimental, documentary, etc. This is a Critical Studies course and is a required course for the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies
FMST 0170 - WORLD FILM HISTORY

Minimum Credits: 3
Maximum Credits: 3
This course both introduces students to techniques of film analysis and acquaints them with major works and movements in international cinema. The course pays particular attention to the evolution of film narrative and visual style through landmarks in film development--European avant-garde films, British documentary, Italian neo-realism, etc. This is a Critical Studies course and is a required course for the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective

FMST 0280 - HISTORY OF FRENCH CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the history of cinema in France from the beginnings of cinema to the present day. We will examine films from all periods and consider a diversity of forms and genres, including mainstream narrative films, art films, avant-garde experiments, blockbusters, and documentaries. No previous course experience with cinema is presumed as we will learn the basics of how to watch, discuss, and write about films and the film industry. The course will be taught in English; readings will be available in English; and all films will have English subtitles. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective

FMST 0300 - ITALIAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
The course will present Italian movies from the forties to the present time. The films will provide us not only with the pleasure afforded by outstanding works of art but also with a means of assessing the central intellectual, historical, political, and economic phenomena that have shaped todays Italy.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective

FMST 0301 - HISTORY OF ITALIAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
Taught in English, this course will introduce students to the history of cinema in Italy from the era of silent films to the present day. We will analyze films from all periods and consider a diversity of forms and genres, including mainstream narrative films, art films, avant-garde experiments, and documentaries. In our century-long journey from the silent blockbuster movies of the 1910s to the Italian super-hero films of the 2010s, we will get to know world-class directors such as Federico Fellini and genre masters such as Dario Argento. We will see what Italian cinema has borrowed from other traditions, and what it has given in return. We will appreciate how Italian b-movies would not exist without American blockbusters, and how a director such as Quentin Tarantino would not exist without Italian b-movies. We will learn about Italy and about how much of its history and of its culture can be seen â€” hidden or deliberately displayed â€” through the frames of Italian films. No previous course experience with cinema is presumed, as we will learn the basics of how to watch, discuss, and write about films and the film industry. Readings will be available in English and all films will have English subtitles. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective
FMST 0302 - ITALIAN AMERICA ON SCREEN

Minimum Credits: 3
Maximum Credits: 3
Italian America on Screen
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 0303 - ITALIAN CINEMA ICONS

Minimum Credits: 3
Maximum Credits: 3
Rotting zombies, evil witches, and merciless cowboys meet superstar directors, iconic actors, and award-winning composers in ITAL0085: Italian Cinema Icons. This course moves through the genres of Italian cinema and focuses on the most influential artists and on the most representative films. We are going to go from the war film masterpieces of the 1940s to the gory exploitation horror of the 1970s, from Sergio Leone's re-invention of western films to Mario Bava's rip-off of The Exorcist: this class really has something for everyone. So come enjoy what you love already and discover what you are going to love next. No previous course experience with cinema is presumed. The course will be taught in English; readings will be available in English; all films will have English subtitles. This would count as a Category 1 course for the FMS major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement

FMST 0310 - CONTEMPORARY POLISH CINEMA: LITERATURE ON FILM

Minimum Credits: 3
Maximum Credits: 3
This course presents contemporary Polish cinema from 1945 to the present. Concepts will be studied in their historical, political, philosophical, and aesthetic perspective. The main trends (schools, movements) in Polish cinema, such as the so-called Polish school and the cinema of moral concern, and the works of most important modern polish filmmakers will be examined.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 0320 - RUSSIAN FILM: EISENSTEIN AND COMPANY

Minimum Credits: 3
Maximum Credits: 3
The course presents the history of Russian and Soviet films, filmmaking, and the film industry from the coronation of Tsar Nicholas II to the death of Stalin.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies, Writing Requirement Course

FMST 0321 - RUSSIAN FILM STALIN TO PUTIN

Minimum Credits: 3
Maximum Credits: 3
The course traces the history of Russo-Soviet cinema from the death of Stalin to the present. Particular attention is paid to the four major periods in Russo-Soviet history since the death of Stalin.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS The Arts General Ed. Requirement, Writing Intensive Course (WRIT)

FMST 0335 - SLOVAK, CZECH, AND CENTRAL EUROPEAN FILM

Minimum Credits: 3
Maximum Credits: 3
The course presents central European filmmaking in its cultural context, and central European (Czech, Slovak, Hungarian, etc.) Culture through film. The students learn to discuss them in their cultural context against the panorama of life in central Europe, as well as from the American perspective. The focus is both on film aesthetics, and on the social implications of the content of the films, which was considered crucial by central European directors, screenwriters, and audiences.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 0430 - FILM THEORY

Minimum Credits: 3
Maximum Credits: 3
This course is designed as a survey of film theory as a historical practice. Film Theory gives students both a firm grasp on the major topics of film theory from its origins to new media, and an understanding of how those theories developed in relation to their historical contexts. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 0500 - INTRODUCTION TO FILM GENRES

Minimum Credits: 3
Maximum Credits: 3
This course surveys major film genres, which may include Westerns, musicals, horror, film noir, screwball comedy, etc. We will trace the history of film genres from the studio era to the present, including European transformations. The course seeks to relate film genres to the culture that created them. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Writing Intensive Course (WRIT)

FMST 0505 - INTRODUCTION TO NEW MEDIA

Minimum Credits: 3
Maximum Credits: 3
In this course we will look at how new media -- ranging from television, computers, digital image production, video games, to social media platforms and smart phones -- have begun to supplant the social and cultural prominence of film and other traditional media. We'll look at how these media work: at the history and theory of their development, at the changes they have brought about in a broader media culture, and at their social status and significance (e.g., The place they occupy in culture, the kinds of interactions they make possible). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: DSAS The Arts General Ed. Requirement, Film Studies

FMST 0700 - SCREENWRITING AND NARRATIVE
Minimum Credits: 3
Maximum Credits: 3
This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings including original screenplays, related prose, and texts which reinforce basic tenets of good storytelling. Students will write rigorously building from idea to outline with great attention to structure and character development. Students will develop writing abilities, critical facilities in approaching work, and an understanding of principles of storytelling common in narrative forms.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

**FMST 0710 - FILMMAKING: PRODUCTION AND CRITICISM**

Minimum Credits: 3
Maximum Credits: 3
This course introduces filmmaking practices as related to cinematic expression, aesthetics, criticism, and ethics. Working in groups, students will produce short film projects. All aspects of production are viewed as a creative extension and continuation of the film writing, directing, and producing process. Through lectures and a range of readings, the class will explore craft, aesthetic, production and storytelling issues. This is an introductory Production course and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Creative Work General Ed. Requirement, DSAS The Arts General Ed. Requirement, Film Studies

**FMST 0760 - CRITICAL MAKING**

Minimum Credits: 3
Maximum Credits: 3
The Maker movement is an emerging social and media form that is at once highly networked and post-digital. Making is situated at the intersection of social media, the online gift economy, and a participatory, interventionist engagement with one's physical environment. Drawing on open source ideals and innovation structures - the free sharing of code to enable collaborative development - making has become an attempt to democratize material culture through networked access to tools. MakerSpaces and MakerHubs have become critical nodes in efforts to materialize the virtual gift economy of the Internet. In this course we will engage the intellectual and practical roots of this new media and social form and engage in our own critical making projects, utilizing scanning, modeling, and 3D printing technologies. We will begin by looking at the history and philosophy of open source software development, and then the political, social, cultural, and technological developments that have together given rise to critical maker culture. We will then learn some of the basic tools of scanning, modeling, and 3D printing. After initial modeling and printing assignments, students will form groups and develop collaborative final projects that involve materializing complex conceptual relationships from a topic of your choice and in a medium of your choice. The aim of this course is to "close the circuit" between creative conceptual production, social networking, and materialized object relationships. Critical making is about critically engaging and creatively remaking the world around us. By the end of the semester, you will become a critical maker! This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

**FMST 0762 - MEDIA/ECOLOGY**

Minimum Credits: 3
Maximum Credits: 3
From the late twentieth century to the present, ecology as a scientific discipline and set of cultural narratives has risen to the forefront of knowledge production as a way to study and understand complex biological systems, their environments, and their internal dynamics. During the same period, media systems have grown exponentially in complexity until they too have begun to exhibit some of the behaviors of ecological systems, including self-organization, feedback, evolution, and emergent properties. The term "media ecology" captures both this new, nonlinear systems approach to understanding media itself as well as the intersection between natural ecosystems and the technological assemblages with which they are intertwined. This course will explore both media that interface with natural ecosystems and works that engage contemporary media systems at different scales. The secret life of information, contagious media, and the post-natural ecologies of our present and future will challenge us to conceive of Media and Ecology as a single coupled system: the emblem of our contemporary environment. Students will have the option to produce collaborative media
projects that explore the themes of the course. These can take the form of simulations, games, network graphing, film or video projects, local ecosystem analysis and/or visualization, or the mapping and analysis of a media ecosystem that interfaces with the environment. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**FMST 0780 - INTRODUCTION TO AUDIO STORYTELLING**

Minimum Credits: 3  
Maximum Credits: 3  
Created for cross-listing with ENGWRT 710. Podcasts are growing as an industry and an art form. There has never been a better time to tell stories in sound. In this introductory production course, we'll explore the craft of narrative audio across genres, including live storytelling, profiles, and flash fiction. Through a series of short creative projects, you'll learn the foundations of interviewing, field recording, scripting, structure, and sound design, while gaining basic technical competency in professional audio editing software. Class sessions will include a blend of discussions, workshops, and hands-on production, preparing you for more advanced work in the medium. This is a writing- and production-intensive course. You should expect to invest significant time and energy planning, scripting, recording, and editing your projects outside of class and significant time in class discussing your peers' work through both written and oral critiques. This course welcomes writers from all backgrounds and genres. No previous experience with audio production is expected or required.

**FMST 0790 - TECHNOLOGIES OF THE BODY**

Minimum Credits: 3  
Maximum Credits: 3  
This course considers how we learn new technologies by looking at the treatment of the body in cinema and television, as well as animation, sports, gaming, and VR. In addition to analyzing media examples, students will experiment with low-tech and high-tech adaptations of optical toys and smart phone cinema to explore how movement and the body have been imagined in science and entertainment. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

**FMST 0800 - FILMMAKING 1: FUNDAMENTALS**

Minimum Credits: 3  
Maximum Credits: 3  
Filmmaking is a creative process that combines art, science, craft, and collaboration. This course is a hands-on introduction to the process, starting with the building blocks of motion pictures: light and cameras, composition, editing, and visual storytelling. You will complete two short videos over the course of the semester, shooting video with DSLR cameras and editing using Adobe Premiere Pro. In-class exercises will provide a deeper understanding of making moving images.

**FMST 0802 - PHOTOGRAPHY 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces you to the world of digital photography. During the semester, you will develop your unique photographic style through hands-on practice with camera controls, print quality, composition, and subject matter. You will explore different facets of what makes a quality photograph: exposure, quality of light, Photoshop, and digital printing. Lectures will examine the work of important contemporary and historical
photographers. Grading is based on assignments, written exams and a final portfolio.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**FMST 0805 - ANIMATION 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course in frame-by-frame motion picture production is designed for both beginners and seasoned animators. Over the course of the semester, you will be encouraged to experiment with a variety of media and techniques including digital 2D, hand-drawn 2D, clay, cutouts, puppets, time-lapse, and pixelation. Through lectures and demonstrations, you will explore storyboarding, animation history, character development, acting, and the principles of animation. While drawing is one approach to animation, drawing skills are not required to succeed.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis

**FMST 0816 - STUDIO LIGHTING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is a production course in studio photography. The emphasis will be on lighting techniques. Assignments will include portraiture, tabletop set ups and synchronizing flash units with daylight. Considerable outside time is required to complete assignments.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis

**FMST 0826 - POST-PRODUCTION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course introduces students from film, video and photography to the desktop Macintosh computer-the preferred interface when dealing with graphics-related applications. Students will first become acquainted with and proficient in the mac operating system. The course will survey the most popular applications for manipulating photographic images, combining text with images, and doing simple video and audio editing on a mac. Students will integrate readings, lecture and in-class lab sessions to complete their own projects.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**FMST 0827 - ADVANCED EDITING**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
"Advanced Editing" offers students engaged in film and media production the unique opportunity to focus and expand their editing skills through the process of appropriating and repurposing pre-existing audiovisual materials. Students will work with materials from a range of sources, including popular Hollywood movies, digitally archived "orphan" films, television commercials, and propaganda films. The act of transforming already existing creative works into newly created short film projects will allow three key learning objectives to be met: (i) students will further hone their awareness of the ideological and formal functions of their source media as they decontextualize and recontextualize it for alternative purposes; (ii) students will develop a better awareness of their own critical and creative orientations as they are required to position their own projects in relation to others; (iii) students will develop their competence with multiple professional NLEs like Avid Media Composer, Adobe Premiere and DaVinci Resolve. By focusing on nonfiction and experimental editing practices, where the meaning and purpose of available footage is open for interpretation, students enrolled in the course will experience the transformative power of editing to shape and understand media.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SU3 Elective Basis
FMST 0830 - BUSINESS OF PHOTOGRAPHY AND MULTIMEDIA

Minimum Credits: 3  
Maximum Credits: 3

In this class students learn the basics of professional practices as they relate to various photography markets including, Editorial, Advertising, Weddings, Portraits and Fine Art Photography. Students will learn to research and apply basic marketing principles so that they can successfully promote their work and skills as a professional photographer. Students will create business cards, letterhead and promotional pieces to use in the day-to-day dealings of their business. They will learn to sequence and format their portfolio (created in Advanced Photographic Production) for both print and online viewing. Other topics include branding, blogs, SEO - analytics, artist statements, and production proposals, copyright, licensing and professional business practices and etiquette.

Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis

FMST 0833 - PRODUCING: FILM, TELEVISION AND OTHER MEDIA

Minimum Credits: 3  
Maximum Credits: 3

Producing: Film, Television, and Other Media is a production Film and Media Studies course designed to give students a breadth of knowledge of what is entailed from taking an idea from conception to completion in various forms of media production. Students will read texts and articles with producers in film, television, websseries and podcasts and examine case studies in each of these. At the mid-term, students will do a detailed proposal on a project they would like to bring to fruition, and by the end of the term, either produce a short production piece, a pitch deck, or a detailed production plan for their project. This is a Category III production course.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SU3 Elective Basis

FMST 0835 - ELEMENTS OF AUDIO PRODUCTION

Minimum Credits: 3  
Maximum Credits: 3

This course explores sound as a fundamental element of human experience and media. Audio production techniques are the primary focus of the class. Hands-on training prepares students to record broadcast-quality audio across a range of contexts; including interviews, narration, field recordings, and live events, and to edit and mix those recordings for various media using industry standard software. Class discussions cover how various microphones work and how to use them, as well as the physics, history, and theory of sound recording. This course welcomes students looking to deepen their understanding of audio production, as well curious beginners. This course fulfills a Technical Elective requirement in the Film and Media Studies Production Track.

Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Film Studies

FMST 0845 - FILMMAKING 2: SIGHT AND SOUND

Minimum Credits: 3  
Maximum Credits: 3

In this hands-on course, you will continue to acquire the skills required to design, shoot and edit HD video. Demonstrations and in-class exercises introduce more professional camera operation, lighting, sound, special effects, and editing workflows. You will apply this new knowledge and facility to several out-of-class assignments of increasing sophistication over the course of the semester.

Academic Career: Undergraduate  
Course Component: Practicum  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: FILMST 0001 or ENGFLM 0590 or FMST 0800 or FMST 0710  
Course Attributes: DSAS Creative Work General Ed. Requirement, Film Studies

FMST 0850 - DIGITAL EFFECTS 1
Minimum Credits: 3
Maximum Credits: 3
This course covers digital methods of combining video, photographs, graphics, text and other visual elements, and manipulation of those elements to tell a story. Course includes software such as Adobe After Effects, Adobe Photoshop and Illustrator. Topics include gaining an understanding of the structure of digital images, transparency and masking, Chroma keying, using layers and depth, key frame animation, image processing, effects and their use, formats, input and output of imagery and workflow methods.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

FMST 0855 - TOPICS IN PRODUCTION

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course introduces students to production practices and techniques relevant to specific cinematic traditions or topics, such as horror film, comedy, science fiction, or other genres or type of media topics such as film movements or politics. Students will work individually and in groups on film and media projects. The course may be repeated for credit if topics vary. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis

FMST 1190 - CITY SYMPHONY

Minimum Credits: 3
Maximum Credits: 3
This is a study abroad course taught at the Pittsburgh-London Film Program. The city has been an integral part of the filmmaker's vocabulary since cinema's genesis in the late nineteenth century. The urban environment and the craft of film grew up together in the twentieth century, seasoned by various convergences of technology, one notable one in the 1920s and another over the last fifteen years. This course bridges these two periods, drawing on history and theory to interrogate the form of the city symphony film essay, and develop an urban filmmaking practice that allows students to gather and formulate their own reflections on London. The course is made up of two strands, City Symphony and Urban Scavenger, taught by the same team in double sessions. Students will be strongly encouraged to bring ideas from one to the other, and to combine critical analysis with practical filmmaking. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1191 - CITY MADE STRANGE: LONDON ON SCREEN IN HORROR AND SCIENCE FICTION CINEMA

Minimum Credits: 3
Maximum Credits: 3
This is a study abroad course taught at the Pittsburgh-London Film Program. This course aims to explore the deep funds of strangeness and otherness that permeate London's places and spaces, through examining films and television series that show the city as a brimming reservoir of past and future shocks. The course will examine science fiction, horror and noir/neo-gothic cinema and television from all eras, with a particular emphasis on works that take London itself as a major part of their story. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1192 - POLITICAL MEDIA: FILM AND POWER IN THE 20TH CENTURY
Minimum Credits: 3
Maximum Credits: 3
This is a study abroad course taught at the Pittsburgh-London Film Program. This class examines the way media has been constructed and used by elite institutions to advance broad and specific goals for the management of populations and the establishment of political and economic conditions beneficial to those institutions. It also looks at the use of media by progressive and radical groups to challenge those conditions and institutions, beginning in the early twentieth century and expanding in the era of digital media. It includes particular focus on cinema and imperialism, making use of the resources in London and online at the Colonial Film Project. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Attributes:** DSAS Historical Analysis General Ed. Requirement, SCI Polymathic Contexts: Soc/Behav. GE. Req.

**FMST 1193 - URBAN SCAVENGING**

Minimum Credits: 3
Maximum Credits: 3
This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students a critical look at the writing, development, and production of film in the 21st century. Using case studies and examples from the masters of filmmaking in both the United States and the United Kingdom, students will gain in-sight into the nature of production, the economics of making a film, and the potential avenues through which film can be distributed to an audience. This is a Critical Studies course with Production elements and counts for Category III towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Attributes:** DSAS Creative Work General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Humanistic GE. Req.

**FMST 1194 - INDUSTRY INSIDER: FROM SHOWRUNNER TO FINAL CUT**

Minimum Credits: 3
Maximum Credits: 3
This is a study abroad course taught at the Pittsburgh-London Film Program. This course will give students the opportunity to learn about screenwriting from a professional screenwriter and producer. The scope of the course will take students through the process of writing for screen based on the very simple stages of concept, story, outline, draft, and the revision and development process. Students will also learn about the pitch process and be given opportunities to practice the pitch based on their own individual stories. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate
**Course Component:** Seminar
**Grade Component:** LG/SNC Elective Basis

**FMST 1195 - DIVERSITY IN BRITISH CINEMA: RACE, GENDER AND CLASS**

Minimum Credits: 3
Maximum Credits: 3
This course considers race, gender and class in close dialogue with the underlying cultural phenomena that shape the British cinematic landscape. The course is designed to introduce students to British cinema whilst engaging in theory, practice and analysis. It intertwines historical accounts with film screenings and lectures as well as discussions with filmmakers and curators. This is a Category I course in the FMST major and minor for the Pittsburgh London Film Program study abroad.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis

**FMST 1196 - DIGITAL MEDIA PRACTICE**

Minimum Credits: 3
Maximum Credits: 3
This intensive and comprehensive course will allow students to create their own portfolio, including a selection of digital media techniques used in a wide range of settings, from marketing videos to audio-visual essays. Quickly and efficiently students will learn how to produce videos for social media, conduct interviews and present themselves in front of the camera. The course will offer basic skills in digital photography, camerawork, editing and podcast production. Students will also be able to choose one of the four specialised areas which include VR production, social media advertising, audiovisual essay filmmaking and digital journalism. The content of the students' portfolios will be produced as part of weekly assignments throughout the course, as students develop their skills, with a final project in their area of specialisation.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**FMST 1197 - MOVING IMAGE EDITING**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Moving image editing: theory and practice is based on an innovative approach to editing techniques that sees them in a close dialogue with the underlying cultural phenomena that shape the current media landscape. The course is designed to introduce students to the theory, practice and art of editing. It intertwines historical accounts of editing practice with media analysis and hands-on exercises. This is a Category III course in the Film and Media Studies major and minor.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**FMST 1199 - THE AUSTRALASIAN NIGHTMARE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a study abroad course taught at Pitt in Sydney. The classic American horror is derived from a gothic heritage, an inheritor of a European context and its tropes; the falling apart of civilization through wars, disease, economic collapse, and a deconstruction of society. The horror that the current, post 9/11 generation has produced is inherently different; it plays upon central themes that pull from an Australasian context, driven from the horror films of Australia, Japan, and Korea. These films have been made and distributed outside of an American context but then repackaged to the west in remakes and revisits that awaken an American audience to themes of horror that are decidedly non-European in identity. This course will examine these films, comparing and contrasting European and Australasian tropes for horror as well as their reflection and impact on society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**FMST 1200 - INTRODUCTION TO EAST ASIAN CINEMA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course investigates the ways in which film addresses and treats the major socio-cultural issues in modern society through a critical study of the works of Chinese and Japanese master filmmakers. The course focuses on changes in marriage and family patterns, women's roles and the plight of youth.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**FMST 1215 - ADAPTED FOR THE SCREEN: CHINESE LITERATURE AND FILM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Adapted for the Screen: Chinese Literature and Film  
**Academic Career:** Undergraduate
Course Component: Lecture  
Grade Component: Letter Grade  

**FMST 1220 - NEW CHINESE CINEMA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Students will study Chinese films made by filmmakers of mainland China and Taiwan. They will learn about origins, development, themes, and styles with major directors and important films of new Chinese cinema being studied. Students will have an opportunity to understand contemporary Chinese culture and society.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

**FMST 1225 - TRANSNATIONAL EAST ASIAN CINEMAS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This survey course comparatively studies the forms and histories of East Asian cinemas in the context of transnationalism, post-colonialism, regionalism, and globalization. This course, therefore, will explore the transnational connections among different film cultures in China, Taiwan, Hong Kong, Japan, and South Korea. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

**FMST 1230 - GLOBAL ANIME**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces the arts, history, and culture of Japanese animation (anime) in a global context. We will focus on analyzing the forms and idioms of anime in relation to changing technological conditions and the media environment. Students are expected to relate the aesthetic and cultural characteristics of anime with their own experience of digital technologies, and to expand their interest in anime to wider theoretical questions about techno-culture and new media. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

**FMST 1235 - JAPANESE CULTURE AND SOCIETY THROUGH CINEMA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course provides a critical study of selected international prize winning Japanese films and compares these films with Western films dealing with similar themes. The student learns to analyze and interpret films; becomes familiar with particular genres of Japanese films compared with Western; studies the history of Japanese cinema and its place in international cinematography and exposes the inter cultural benefits of judging the content of the films from oriental and Western aesthetic perspectives.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

**FMST 1236 - JAPANESE LITERATURE ON SCREEN**
This course will investigate how literature and film treat some major ideological and socio-cultural issues in Japanese society. Readings of pre-modern tales, modern fiction and contemporary novels. Film adaptations will represent the best of Japan's postwar cinematic tradition. The course is designed for the student interested in Japanese society, culture and intellectual currents through film and literature.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

**FMST 1240 - INTRODUCTION TO KOREA THROUGH FILMS**

Minimum Credits: 3
Maximum Credits: 3
Introduces Korean cinema to students in broader (and at times narrow) cultural, social, and aesthetic contexts to investigate transnational media production and circulation, globalization, consumer culture, commercialization, and construction of national, ethnic and gender identities. Through this course, students will learn more about specific issues pertaining to Korea and its people, as well as gain familiarity with some prominent film directors of Korea’s. They will develop a critical and historical consciousness of Korean visual culture, assessing the worth and content of the films.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

**FMST 1250 - BOLLYWOOD AND INDIAN CINEMA**

Minimum Credits: 3
Maximum Credits: 3
This course will offer an overview of various Indian cinema traditions in their historical, aesthetic, and cultural contexts. Students will learn how to analyze Indian films from the 1920s to the present in terms of formal techniques, narrative conventions, and viewing contexts and also in terms of broader historical contexts such as colonialism and the independence movement. The history and formal conventions of Mainstream Bombay Cinema will be counterpointed with other kinds of Indian film. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

**FMST 1260 - BRITISH FILM**

Minimum Credits: 3
Maximum Credits: 3
This course explores the status of British film as a national cinema. It examines the forms and styles indigenous to British cinema; the relationship of British cinema to British social reality; the changes in film language, production and forms as they relate to the development of British cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

**FMST 1261 - IRISH FILM**

Minimum Credits: 3
Maximum Credits: 3
Irish Film will consider what it means to think about films in terms of being a national cinema or part of the transnational cinema during the global
Hollywood era. We will also consider how the UK and USA imagine Ireland as well as what effect Irish cinema has had on other cinemas due to immigration and the increasing visibility of Irish directors, locations, and actors in the international industry. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor, and also counts for the Irish minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FMST 1270 - AMERICAN FILM 1**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course explores the development of American film from 1895 to 1939. Though the course will emphasize the evolution of American film style and genre, attention will also be paid to the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. The course will provide the student with the historical and aesthetic background with which to better appreciate the American cinema of today and yesterday. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**FMST 1271 - AMERICAN FILM 2**

**Minimum Credits:** 3  
**Maximum Credits:** 3

This course explores the development of American film from 1940 to the present. The course examines the evolution of American film style and genre, the history of the American film industry, and the relationship between Hollywood cinema and the broader cultural context of American society. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Film Studies

**FMST 1275 - CONTEMPORARY FILM**

**Minimum Credits:** 3  
**Maximum Credits:** 3

Surveys international film from 1970 to the present and the major film movements of the period. It also demonstrates the stylistic and cultural interrelationships between the international film schools. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS The Arts General Ed. Requirement, Film Studies, Writing Requirement Course

**FMST 1292 - NAZI CULTURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3

In an era of Alt-Right and growing neo-Nazi movements, this course takes us to the past to understand our present. We will rely on the films and other primary sources of the Third Reich to understand the conditions in Germany and what motivated the Germans to make the choices they did. We will examine anti-Semitism, racism, gender and sexuality, mass culture, the cult of the leader, propaganda, and more.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Diversity General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Soc/Behav. GE. Req.
FMST 1293 - NEW GERMAN CINEMA

Minimum Credits: 3  
Maximum Credits: 3
Devastated after World War II, starting in the 1960s a number of German directors like Herzog, Fassbinder, Wenders, Kluge, Annders-Abrahms managed to bring international attention back to German cinema. They competed against the film industry of Hollywood under difficult conditions of production, and in many instances made the difficult transition out of the art house and into the mainstream movie theater. Yet these names only represent a small portion of those directors active in the new German cinema. This class will examine the aesthetic and technical contributions of new German cinema as well as the historical and social context of its production. The technological, financial, and intellectual destruction caused by the experience of national socialism and World War II required creative responses that have led to a solid and symbolically rich body of work. In examining the themes and experimental forms of various filmmakers, students will gain insight into the issues that occupied the German public sphere from the 1960s onward.

FMST 1321 - EASTERN EUROPEAN COMMUNISM AT THE MOVIES

Minimum Credits: 3  
Maximum Credits: 3
After the 1917 revolution in Russia, Lenin famously said: "to us film is the most important of all the arts." Communists were to use cinema for propaganda purposes, in order to carry out massive state-wide campaigns aiming to bring radical social change. However, Soviet avant-garde filmmakers were also concerned with revolutionizing filmmaking itself. Some three decades after Lenin's remarks, the leaders of the countries of Eastern Europe which had become "Soviet satellites" after World War II, attempted to use censorship and control over the arts and cinema to produce effective propaganda for their own political campaigns. Writers, artists, and filmmakers were coveted allies of these new communist regimes that came to power in the 1940s. Again, however, filmmakers and actors did not always toe the Party line. Some were able to use film to craft complex works with subtle messages portraying aspects of daily life as it was experienced by ordinary people under the new regimes. Films that we will watch and analyze, released in Hungary, Romania, Yugoslavia, Poland, and Czechoslovakia in the decades before the fall of communism in 1989 managed to depict, evoke, and criticize "really existing communism." This course will trace the history of East European communism and of East European film-making from 1944 to 1990, acquainting students with examples from an exceptional body of cinematographic work together with the broad outlines of East European history. Students will learn to "read" films from 20th century Eastern Europe in their cultural, political, and historical context. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  

FMST 1331 - JEWS AND THE AMERICAN CINEMA

Minimum Credits: 3  
Maximum Credits: 3
This course will introduce students to: the prominent roles of Jews in the American cinema (as producers, directors and performers); the manner in which issues of Jewish identity (including the negative aspect of ethnic stereotypes) and topics such as anti-Semitism and the holocaust have been treated in the American cinema; and the way in which film genre intersects with issues of Jews in American film (e.g. Comedy and so-called "Jewish humor", the appeal to Melo drama in the social problem film, etc.).

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

FMST 1340 - U.S. LATINO FILM

Minimum Credits: 3  
Maximum Credits: 3
The major purpose of the course consists of illustrating and analyzing the role of the audiovisual media film (fiction and documentary) and video
(and television, to a certain degree) for an understanding of the socio-cultural and conceptual status that Latina/o identities have acquired in today's society. Thematically, the course will focus on themes of modernity vs. tradition in U.S. Latino culture. The course uses a selection of audiovisual materials which is fairly innovative in its variety. Chicano films and videos will constitute the major part of the material.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FMST 1341 - LATIN AMERICAN FILM & MEDIA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course focuses on the study of Latin American film and media by both engaging in critical viewing/reading of Latin American film and media production, as well as an exploration of relevant topics and theoretical frameworks. We will engage with questions of film and representation, art and politics, and culture and economy.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**FMST 1346 - DRUGS, MONEY AND VIOLENCE: NARCO-CULTURE IN LATIN AMERICAN FILM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course explores the complex, multi-layered, and often contradictory world of transnational narcotics traffic particularly as it is configured in and through contemporary Latin American cinema. Departing from the contention that the relations between drug trafficking networks, governmental responses to the drug trade, drug production and consumption, are not clear and transparent as depicted in dominant discourses exemplified by the narrative of the War on Drugs, this course analyzes narco-culture not as a simplistic response centered merely on the idolization of drug lords or drug culture, but as a dynamic creative current that tries to make sense of the complexity and violence of the world of drugs. Why do official narratives of capitalist enterprise disavow the capitalist foundation of the drug trade? How are discourses of security and protection ironically embodied in violent militarized actions and neo-imperial ventures? How does the criminalization of certain cultural practices and symbols - particular languages, dress codes, music - relate to the racialization and sexualization of certain peoples and bodies? Moreover, how can we understand the (global) commercial success of narco-culture as exemplified by recent mainstream media and popular culture? In this course, we will address these questions by engaging in close reading/viewing of contemporary Latin American films that center on representations and (re)productions of narco-culture. These primary works will be examined in conjunction with secondary readings that discuss topics relevant to our analysis of narco-culture, such as globalization, neoliberal capitalism, immigration, femicides, cultural appropriation, and racial and gender construction.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**FMST 1350 - FILM DIRECTORS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific director. This course looks at the mode of production of films and works to understand the interweaving contributions of directors, producers and screenwriters. It will also consider less personal forces--social climate, studio style, genre and audience taste. It examines the films of particular directors for signs of personal style, theme, or personal preoccupation. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis
FMST 1352 - ORSON WELLES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the screen career of Orson Welles. In considering his films, the course explores the evolution of Welles' cinematic style; the thematic concerns of his work; the ideological implications of his fictional universe; and his contribution to the development of American narrative cinema. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1355 - HITCHCOCK'S FILMS

Minimum Credits: 3
Maximum Credits: 3
This course will look at the development of Hitchcock's cinema as a way of touching upon issues central to the study of film as a cultural force; the relationship between art and entertainment; the social origins of suspense and fear; the role of the director in creating a film's meaning; the role and function of genre and cross-generic influence. We will closely look at films from all phases of Hitchcock's career and examine what their style, tone, and subject matter reveal about the powers of cinema and Hitchcock's influence on a new generation of directors. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Writing Intensive Course (WRIT)

FMST 1357 - THE FILMS OF STANLEY KUBRICK

Minimum Credits: 3
Maximum Credits: 3
This course aims to discover the extent to which Kubrick's films are unified in style and theme. We will explore their sources in other films, reputed novels and short stories. Special attention will be paid to themes commonly found in Kubrick; a satirical view of society, the links between violence and sexuality, etc. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1360 - SPIKE LEE

Minimum Credits: 3
Maximum Credits: 3
Spike Lee's films, videos, and TV work have been both provocative and groundbreaking, challenging the structures of American filmmaking at the level of production, reception, and film style. Including feature films, documentaries, music videos, and mini-series, his work has a diversity that discourages the restrictive labels of African-American director or independent director. This course will cover most of this body of work in terms of Lee's cinematic style and cultural concerns, and also in terms of the cultural debates his work has triggered or participated in. By the very nature of these films, a Spike Lee course has to engage with much more than directorial style and vision alone, and will thus also be an opportunity to consider various approaches to the study of film. This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1410 - FILM AND POLITICS

Minimum Credits: 3
Maximum Credits: 3
This course examines film production, economics and forms of representation as reflections of political attitudes. We will study a variety of narrative
and non-fiction films which reveal differing political points of view, ranging from those that legitimize the dominant culture to those which criticize, if not challenge, dominant attitudes. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**FMST 1411 - FILM AND LITERATURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will examine film's convergence with, and divergence from, the literary arts. From this discussion will emerge an understanding of film's debt to literary models, as well as its own unique and innovative contributions to narrative, poetic and essay form.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS The Arts General Ed. Requirement, Film Studies, Writing Requirement Course  

**FMST 1411 - FILM AND LITERATURE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Cinema has enjoyed a close relationship with literature, borrowing from literary source texts and forms. Yet this relationship is not uncomplicated, nor is it unidirectional: the cinema offers new possibilities for novelistic source texts, poses interesting problems for literature's authors and readers alike and provokes a reconsideration of age-old debates of the divide between words and images. Thus this course examines film's convergence with, and divergence from, literary forms. Poised at the intersection of the study of film and the study of literature, it enables us to explore what is most unique -- and perhaps most interesting -- about each of the media as we consider their overlap. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS The Arts General Ed. Requirement, Film Studies, Writing Intensive Course (WRIT)  

**FMST 1412 - CINEMA AND VIDEO GAMES**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course introduces a comparative study of cinema and video games, exploring the historical, cultural, aesthetic, technological and industrial intersections between these two media forms. Combining film screenings with game plays, we will try to understand how cinema and video games inform, influence and converge with each other, as well as how the interrelations between these two media may have affected visual cultures at large. We will focus on race, gender, and ethical issues of visual representations in both cinema and video games, discussing the political questions of identity, power and representation in popular culture. The class also intends to provide students with analytical frameworks in film and media studies to guide their critical interpretations of the technology, history, and forms of video games. Through writings of game designers, film scholars and media theorists, we will consider the foundational role of the discipline of film studies in the formation of critical game studies. Students will be introduced to some key theoretical questions and concepts, such as realism, affect, hypertext, interactivity, post-humanism, media convergence and participatory culture, which are crucial for understanding the technological, cultural and social conditions of both cinema and video games in the digital age.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

FMST 1415 - FILM CENSORSHIP AND AMERICAN CULTURE

This course considers some of the most important censorship battles in American history. As the first mass medium to pose a serious threat to the cultural hegemony of the genteel middle class, the movies initiated both a debate about the place of media in our society and a series of struggles over the control of commercialized leisure. This course seeks a deeper appreciation of the complexities of contemporary media politics through an engagement with the history of motion picture regulation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Historical Analysis General Ed. Requirement, Film Studies, SCI Polymathic Contexts: Soc/Behav. GE. Req.

FMST 1416 - GENDER AND FILM

This course examines and questions aspects of gender and sexuality in international cinema. While the course considers the intersectional realities affecting masculinity and femininity on-screen, it will also consider who is behind the camera and ideas of "authentic" representation. Attention will also be paid to the social and historical context in which these films were made, in an attempt to understand the relationship between art and ideology. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Diversity General Ed. Requirement, Writing Intensive Course (WRIT)

FMST 1420 - THE STAR SYSTEM AND THE MOVIES

This course will deal with all aspects of the phenomenon of stardom in film: the production of stars, film acting, and fandom. This is not a course on any particular star, but we will use case studies of individual stars for our weekly focus. We will draw on film examples from the old Hollywood studio system as well as from post-studio films and popular culture. A particular emphasis of the course will be gendered differences between star images. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies, Writing Intensive Course (WRIT)
FMST 1421 - GLOBAL STARDOM AND CELEBRITY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce students to the analysis of the "star text" of individual stars/celebrities, which involves the interrelationship of screen-mediated roles, off-screen appearances and information, publicity material, and cultural context. Students will research a specific star/celebrity as a nexus of global circulation and fandom, while addressing some core methodological questions: what is the difference between star biography and star analysis? How do we read the "star/celebrity text" in different local contexts and ideas about the public and the private? How does stardom presume and shape norms of identity pertaining to gender, sexuality, social class, race/ethnicity, bodily norms, and other cultural values? This is a Critical Studies course and counts for Category I towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Film Studies

FMST 1440 - FILM SOUND

Minimum Credits: 3
Maximum Credits: 3
In this course, we will shift the way we think about films and learn to listen to films, using the language and tools of audio analysis to analyze the aural environment produced by films. Topics include the history of film sound, the relation of sound and image, aural and visual pleasures, sound and narrative meaning, soundscapes and theories of shock and modernity, the aesthetics of analog and digital sound in cinema, the 'realism' of recorded sound, film sound and space, sound in documentary cinema, and culturally specific theories of sound. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1450 - TOPICS IN FILM

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. Explores selected issues in the production, reception, themes, or theory of film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FMST 1508 - TELEVISION ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course studies television as a visual medium, an industry, and as a cultural force by examining the forms television programming takes and the way these structures influence viewer response. We will examine specific television genres from longstanding series types (sitcoms, cop shows, serials, etc.) to the gendered forms of "quality" television. This is a Critical Studies course with Production elements and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS The Arts General Ed. Requirement, Writing Intensive Course (WRIT)

FMST 1510 - ANIMATION STUDIES
Minimum Credits: 3  
Maximum Credits: 3  
This course surveys the history of animation, both American and international. Providing an understanding of animation's history, technologies, and stylistic possibilities across national and international boundaries, the course will consider early animators through to contemporary uses of digital technologies with their fully realized characters inhabiting three-dimensional space. It will also have a thematic organization, focusing at times on specific techniques (e.g., cel animation) and styles (e.g., abstract). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SU3 Elective Basis

FMST 1520 - FILM COMEDY

Minimum Credits: 3  
Maximum Credits: 3  
This course surveys film comedy from the silent period through the contemporary moment. It focuses on major comic performers and directors as well as on comic forms, traditions and their relation to politics. In addition the course considers a number of comedy subgenres, such as slapstick, romantic comedy, gross-out comedy, and the buddy film. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

FMST 1522 - FILM MUSICAL

Minimum Credits: 3  
Maximum Credits: 3  
This course studies the musical as an example of a popular art in the age of mass culture, looking at the aesthetics and history of this genre as it relates to the culture that produced it. We will be looking at musicals with the goal of analyzing and understanding our reactions, and those of the mass audience. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

FMST 1523 - FILM WESTERN

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the meaning of the Western to a mass audience. More specifically we will explore the genre's popularity, the way it represents the past, the concept of the mythic hero, changes in the genre from 1939 to 1981, and the contributions to the genre of specific directors. Every effort will be made to connect changes in the Western to new concepts of America.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis

FMST 1523 - FILM WESTERN

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the meaning of the Western to a mass audience. More specifically we will explore the genre's popularity, the way it represents the past, the concept of the mythic hero, changes in the genre over time, and the contributions of specific directors. We will consider how the Western adapts to changing concepts of America. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis
FMST 1525 - HORROR FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines the kinds of narratives produced, the ways producers and directors have developed the genre, and the ways horror film exploits social attitudes and values to generate audience involvement.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1525 - HORROR FILM

Minimum Credits: 3
Maximum Credits: 3
This course will investigate the key films and critical discussions surrounding the horror genre from its silent film beginnings to the present. We will use horror as a lens to ask wide-ranging questions about spectatorship, theory, history, aesthetics, and politics that have shaped and continue to transform film and media studies. This course examines horror subgenres, the ways that producers and directors have developed the genre, and the ways horror film exploits social attitudes and values to generate audience involvement. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1526 - THE WAR FILM

Minimum Credits: 3
Maximum Credits: 3
This course will consider stable and changing elements of the war film genre, while remaining attentive to specific cultural moments, beginning with World War I. Although the main emphasis of the course will be on the war film as genre, part of the semester will be devoted to documentary and non-fiction approaches to war in cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1527 - SCIENCE FICTION FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines the development of science fiction as a cinematic form, its relationship to genres such as horror and melodrama, its structure, images and style. We attempt to trace linkages between the films and social, political, scientific and aesthetic attitudes within the culture.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1527 - SCIENCE FICTION FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines the development of science fiction as a cinematic form, its relationship to genres such as horror and melodrama, its structure, images and style. We attempt to trace linkages between the films and social, political, scientific and aesthetic attitudes within the culture.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
FMST 1530 - FILM NOIR

Minimum Credits: 3
Maximum Credits: 3
This course will explore the notion of ‘film noir’ in a trans-national and trans-medial context. We will examine the classic films noir of the period 1941-1958 (e.g. Double Indemnity, The Killers and The Naked City), the films considered to be 'neo-noir' since the 1970s (e.g. Taxi Driver, Blade Runner, Fight Club and Memento), and the international films described as 'global noir' from Japan, Hong Kong, Europe, and many other places throughout the world (e.g. Better Tomorrow, Branded to Kill, Sonatine, and Oldboy). We will also explore how the generic modes and conventions of film noir have been incorporated into other media such as comics, animations, and video games (e.g. Ghost in the Shell, Cowboy Bebop, LA Noir and Heavy Rain). We will look at these films and media objects from the perspective of film art and history, of their relationship to wider socio-cultural contexts, and of their exploration of gender and sexuality. The course will explore debates as to whether film noir is a style, a genre, an idea in criticism, or a marketing category. We will examine the roots of film noir in German expressionism and hard-boiled detective fiction. We will examine the work of significant directors of these films, in both Hollywood and beyond, including Billy Wilder, Robert Siodmak, Fritz Lang, Orson Welles, Nicholas Ray, Guy Ritchie, Takashi Beb, Seijun Suzuki, John Woo, Johnnie To, and Park Chang-wook.
Academic Career: Undergraduate
Course Component: Seminar

FMST 1531 - CULT FILM

Minimum Credits: 3
Maximum Credits: 3
This course will interrogate the criteria by which a film is identified as cult. A cult movie is not made; a film only becomes cult through the consumption patterns of an audience. This course explores how the nature of cult viewership shifted in response to technological innovation: at first VCRs, then DVDs, and now the internet. This course also looks to how cult has shifted now that unavailable films or banned films are increasingly accessible due to shifts in new media and the dominance of internet commerce (international shopping, eBay, bootlegs, downloads). This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1532 - SUPERHEROES ON FILM AND TELEVISION

Minimum Credits: 3
Maximum Credits: 3
This course explores a wide range of issues relevant to the superhero genre in popular media, including: the origins of the genre; various cultural critics' responses to it; the intersections between superhero narratives, audiences, and the cultural and historical contexts that produce them; and the ever-changing form and structure of the genre itself. This is a Critical Studies course and counts for Category II towards the Film and Media Studies
**FMST 1533 - DISABILITY IN FILM AND TELEVISION**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores disability in media through representational tropes and trends as well as how political activism has focused on mainstream media as a site for protest, a site for education, and a site for self-expression. We will explore trends in film and television while engaging with the important roles of social media and online communities. This is a Critical Studies course and counts for Category II for the Film and Media Studies major and minor.

**FMST 1535 - WESTERNS AND SAMURAI FILMS**

Minimum Credits: 3  
Maximum Credits: 3  
A focus on the critical comparative study of two filmic genres—the samurai representing Japanese cinema and the Western representing American cinema. The course demonstrates the analytical processes of the film leading to its structural unity; shows the significance of both genres with respect to the history of Japanese, American and European cinema; compares approaches to films of different countries and provides the overall benefits of approaching films from an intercultural standpoint.

**FMST 1540 - DOCUMENTARY FILM**

Minimum Credits: 3  
Maximum Credits: 3  
This course explores the nature and impact of the non fiction film, its changing forms, strategies for movies, and claims to veracity and objectivity. It is concerned with identifying types of documentary, the "motives" of such films, their audience and the problems posed by "documenting reality." This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.

**FMST 1545 - THE AMERICAN FILM AND TELEVISION INDUSTRY**

Minimum Credits: 3  
Maximum Credits: 3  
The American Film and Television Industry is a critical studies Film and Media Studies course is designed to give students an extensive view of the various roles involved in the making of film and television and a sense of how these roles have changed over as the entertainment business itself have changed. In addition to learning about the history of the industries as well as the responsibilities of different jobs above and below the line, students will do their own research towards two major projects for the course. This is a Category II critical studies course.
FMST 1546 - EXPERIMENTAL CINEMA

Minimum Credits: 3
Maximum Credits: 3
This course examines the development of experimental cinema beginning in Europe in the 1920s with dada and surrealist films by Marcel Duchamp, Luis Bunuel and others, and continuing in the U.S. and elsewhere after World War II. The films, many of which are non-narrative and some of which are "abstract", will be examined for the ways in which cinema is used for the filmmakers' personal expression. Consideration will be given to the artistic and cultural contexts in which the films were made, and comparisons will be made with other media, especially painting and sculpture.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1548 - AMERICAN INDEPENDENT FILM

Minimum Credits: 3
Maximum Credits: 3
This course examines the development in the U.S. Of independently produced film as an art form, and the filmmaker as an artist, from World War II to the present. Filmmakers to be considered include Maya Deren, Kenneth Anger, Stan Brakhage, Bruce Baillie, Hollis Frampton and others. An examination will be made of the relationships between the films studied and other forms of modern art, such as "abstract expressionism", "structuralism" and "postmodernism". This course does not include "independent" Hollywood and other commercial feature filmmaking.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1549 - INDUSTRIES AND FESTIVALS: FILM AND MEDIA

Minimum Credits: 3
Maximum Credits: 3
This course explores how film industries have shaped contemporary production, exhibition, and distribution practices with focus on the role of film festivals in the film industry. We will examine festival history, theory, and methods to learn how festivals have impacted industry history and how festivals are produced and executed. This is a Critical Studies course and counts for Category II for the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FMST 1550 - TOPICS IN GENRE

Minimum Credits: 3
Maximum Credits: 3
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course considers genres that are not commonly offered. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1585 - CINEMA AND REVOLUTION

Minimum Credits: 3
Maximum Credits: 3
This course investigates the relationship between Black power era, Black American cinema, and the third cinema movement, which are traditionally understood to be distinct movement/moments only loosely related through overlapping politics. In the course, our primary focus will be third world and Black American film making, and the postcolonial, pan-national and militant theoretical texts and movements that influenced the directors. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
**FMST 1610 - TEEN FILM**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will look at a type of film that has been prominent in Hollywood and international cinema since 1955: the youth film or teen film or teennic. The teennic has been variously defined as films targeted at a teenage market and as films about teenagers (and sometimes both). In considering the teennic as a genre, we will attempt to break it down into subgenres such as the juvenile delinquent film, the teen musical, the teen horror film, nostalgic teen films, postmodern youth cult films, African American teen films, "girl" teennics, and LGBTQIA+ teennics. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.  
**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**FMST 1615 - CHILDREN AND MEDIA**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines contemporary children's media from social, cultural, and historical perspectives, with a focus on media in the United States produced by and for children ages 0-13. Video games, the internet, and emerging digital and portable technologies for communicating and consuming media are often tailored specifically to children, who, as "digital natives," are increasingly early adopters of new technologies. This course asks how children's media fits into contemporary debates about children's role in families, schooling, and the public sphere. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS The Arts General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req.

**FMST 1630 - PHOTOGRAPHY AND ART**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This introductory course is intended to provide a thorough familiarity with the history of photography from its development in the 19th century to the present day, and to link that history to major trends in the history of modern art, such as realism, impressionism, cubism, surrealism, abstract art, etc.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**FMST 1650 - TOPICS IN FILM GENRE AND THEME**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course seeks to provide a forum for new issues that might arise in the area of film genre and/or the thematic of film representation. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FMST 1655 - TOPICS IN CONTEMPORARY CINEMA**
Minimum Credits: 3  
Maximum Credits: 3  
This is a course that changes topics every term; please see the Topic title and/or Class Notes for the specific focus. This course deals with issues related to contemporary cinema. This is a Critical Studies course and counts for Category II towards the Film and Media Studies major and minor.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

FMST 1699 - ADVANCED SEMINAR IN FILM STUDIES

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for Film and Media Studies majors and can be taken only when all other major requirements are satisfied. It will focus on issues of film history (either as an historical survey or through an examination of particular themes and/or problems that have arisen in the critical literature). The class will be organized as a seminar, and will involve considerable writing and/or class presentation on the part of students. This Category II course is a required capstone in the Critical Studies track of the Film and Media Studies major.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Film Studies, Writing Intensive Course (WRIT)

FMST 1715 - MOCKUMENTARY: PRODUCTION AND CRITICISM

Minimum Credits: 3  
Maximum Credits: 3  
The mockumentary - a fictional film made to "look like" a documentary - became popularized as a term to describe a distinct genre in coverage of Rob Reiner's 1984 film This is Spinal Tap. Since then, the genre has evolved to treat a variety of subjects through a range of styles - including straightforward hoaxes, social parodies, and sharp criticisms of nonfictional form. In addition to readings, lectures and discussions, students in this class will produce short mockumentary projects. Previous production experience is not required. This is a Production course with Critical Studies elements and counts for Category III towards the Film and Media Studies major and minor.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

FMST 1720 - VISITING FILMMAKER: PRODUCTION AND CRITICISM

Minimum Credits: 3  
Maximum Credits: 3  
This course allows students to experience the full process of making a professional micro-budget feature, experimental, or documentary film. Students work on a visiting filmmaker's film from conception to final shooting, while learning about the different jobs/tasks/departments needed to realize a completed work. This is a Production course and counts for Category III towards the Film and Media Studies major and minor.  
Academic Career: Undergraduate  
Course Component: Workshop  
Grade Component: LG/SNC Elective Basis

FMST 1740 - MAKING THE DOCUMENTARY

Minimum Credits: 3  
Maximum Credits: 3  
This is a production course in which students will research, define, and schedule their own projects. The class covers all stages of producing a documentary from the idea through development, preproduction, production and postproduction and will examine the fundamentals of the art of documentary making: artistic identity, point of view and storyteller, form and style, and light and sound etc. Students will develop and produce original documentary short film in a collaborative learning environment, working in small groups (of two or three students). They will write, develop, and shoot their own short documentary project (8 to 10 minutes). While those interested in writing or filmmaking will find practical uses for their skills in this course, students from all disciplines - writing, science, film studies, or general liberal arts - are welcomed, and will find benefit in the acquisition of skills for presenting, representing, and persuading via sound and image. No filmmaking experience is necessary. This is a Production course with Critical Studies elements and counts for Category III towards the Film and Media Studies major and minor.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis
course and counts for Category III towards the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis

**FMST 1750 - CREATIVE PRODUCTION WORKSHOP**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Creative Production Workshop is a projects-based course in which students will research, define, schedule, budget, and workshop their own independent projects. In a collaborative learning environment, students develop and produce original digital projects while conducting critical investigations into their role as participants in and products of digitally mediated culture. The primary goal of the course is to design and execute a self-directed, self-designed, 14-week creative project. This process can be broken down into a series of smaller goals: Students will gather and create materials for the preliminary (treatment) stage of a project; conduct creative research to develop a project design; define the goals of a project and the areas of study; identify and address technical/logistical issues of the project; organize project materials; schedule and plan use of time; create a written description of a project; and make an oral/visual presentation of their project at different stages of its development. The methods of instruction will include discussion of assigned readings, in- and out-of-class viewings of assigned films, production instruction in the film editing lab, and workshop-style peer review and feedback at all stages.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis

**FMST 1765 - VIRTUAL REALITY**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Can there be more than one reality? Is there even one? What relationship do the senses and the mind bear to the physical environment? From the dawn of human society, no topic has been more fiercely debated than the nature of reality. In narrative, philosophy, and media, virtual reality has always been with us. This course dives deep into the rabbit hole of the real and the virtual, an adventure that includes philosophy, literature, film, and, of course, VR headsets aplenty! In addition to exploring the history of the real and the virtual, we will consider the relationship of virtual reality to the body, to space, to human gesture and communication, and to code. We will also explore the role of the imagination and creativity in the generation of new worlds. You will learn to think historically, theoretically, and critically about VR. You will have the option of either writing critical papers or creating your own virtual environment or game as your final project. This course assumes no prior experience with VR or coding, but those skills can optionally be put to use in final projects. Come prepared to question your reality!

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis
FMST 1770 - DIGITAL STUDIO: IMAGING

Minimum Credits: 3  
Maximum Credits: 3

Digital Studio: Imaging is a studio designed to immerse students in the investigation of digital art practices. Emphasis will be on the history and aesthetics of art and digital technology, including screen-based imaging practices, creative coding, and digital fabrication. Throughout the course, you will acquire and enhance technical skills, but the emphasis will be on the use of the computer as an art-making tool for your creative expression. Thoughtfulness, experimentation and curiosity is encouraged.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

FMST 1775 - DIGITAL STUDIO: VIDEO

Minimum Credits: 3  
Maximum Credits: 3

This is an advanced studio designed for students to intensely experiment and explore the moving digital image in an art context. Students will explore the concepts and skills involved in working with digital video, from pre to post-production. Each student will propose and undertake a final, self-designed project during the final four weeks of the term. Major effort, time, research, imagination, productivity, and involvement are expected throughout the term.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

FMST 1777 - DIGITAL STUDIO: ANIMATION

Minimum Credits: 3  
Maximum Credits: 3

This is an advanced course designed for students to intensely experiment and explore the moving digital image in an art context. Students will explore the concepts and skills involved in working with digital animation - from pre to post-production. Each student will propose and undertake a final, self-designed project during the final four weeks of the term. Major effort, time, imagination, productivity, and involvement are expected throughout the term.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: (SA 0110 and 0180) or ENGFLM 0590 or FILMST 0001 or FMST 0800

FMST 1781 - LISTENING TO NARRATIVE AUDIO

Minimum Credits: 3  
Maximum Credits: 3

With podcasts on the rise, audio is an increasingly vibrant platform for storytelling across genres, from narrative journalism, to the audio essay, to serial (non)fiction. What can we, as writers learn from close encounters with these forms? How can born-audio narratives help us approach questions of style, structure, scene, and voice in unexpected ways? And how can we take inspiration from these forms to reimagine the possibilities of our writing, whether it's for the ear or for the page? Just as a "Readings" course teaches you to read like a writer, in this course, you'll be challenged to listen like an audio producer, attuning yourself to the craft of audio stories in order to inform and enrich your own creative work. Throughout the semester, you'll produce focused responses to weekly listening assignments, engage in rigorous discussions on craft, and generate some of your own creative work in response to the stories we encounter. While no formal technical training in audio production will be provided or required, students interested in exploring their writing in audio forms will be encouraged to do so.

Academic Career: FILMST  
Course Component: Lecture  
Grade Component: LG/SU3 Elective Basis

FMST 1817 - LIGHTING FOR MOTION PICTURES
Minimum Credits: 3
Maximum Credits: 3
This course allows students from both the film and video disciplines to expand their aesthetic boundaries by overcoming technical limitations. Students will learn theories of lighting to create a particular emotional, psychological, or physiological effect in the viewer, and will participate in lighting and shooting a variety of situations in class. Differences between lighting for film and video, light metering, and various lighting tools are among the topics covered. Contemporary film examples will be examined and discussed in class.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FMST 1828 - PHOTOGRAPHY 3

Minimum Credits: 3
Maximum Credits: 3
This course offers advanced Photoshop techniques. Learn to make complex selection and color correction, texture maps, advanced layering and masking principles. Learn to make custom color profiles along with essentials of digital color management. Emphasis is on the development and exploration of a personal vision and the creation of a digital portfolio.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FMST 1846 - FILMMAKING 3: STORY TO SCREEN

Minimum Credits: 3
Maximum Credits: 3
Building on your experiences in Filmmaking 1 and 2, you will continue to develop your style as a filmmaker while creating more ambitious work and improving your technical skills. Demonstrations cover HD video cameras and lenses, advanced lighting and sound techniques, creating a pre-production binder, and advanced post-production workflows using Adobe Creative Cloud software. In addition to creating short projects in class, significant outside work is required, as you will take a short film from concept to a polished final version.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FILMST 0601 or ENGFLM 1497 or SA 1380 or FMST 0845 or FMST 1193 or FMST 1775

FMST 1852 - DIRECTING ACTORS

Minimum Credits: 3
Maximum Credits: 3
This course explores the communication between directors and actors and how a director's vision translates into playable action on the screen. Class sessions will provide examples and practical experience in successful director/actor collaboration. Students will learn how to judge a good performance and will practice directing techniques that lead to better performances by actors. It is a laboratory class and students will direct each other. The format combines hands-on exercises, tapping, screening and lecture. Grading is based on exercises, homework, taped scenes and participation.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1855 - DIRECTING MOTION PICTURES

Minimum Credits: 3
Maximum Credits: 3
This course addresses some of the basic problems of designing and directing scenes for motion pictures. Some of the problems discussed are the relationship of film to reality, the meaning of cinematic techniques, continuity, shot selection, cut selection and visualization techniques. The format is a combination of lecture, screening and interactive group exercises. Extensive outside work is necessary.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1860 - ELEMENTS OF SCREENWRITING

Minimum Credits: 3
Maximum Credits: 3
This course will explore developing character-based stories in the screenplay form. Students will be exposed to a variety of readings, including original screenplays, related prose, and texts which reinforce basic tenets of good story telling. Students will write a completed 1st Act for a 3 to 5 part screenplay, building from idea to outline with particular attention to structure and character development.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1862 - INTERMEDIATE SCREENWRITING

Minimum Credits: 3
Maximum Credits: 3
This advanced course will help you develop your feature film idea into a full treatment. Weekly discussions and writing assignments focus on creating the plot, scene, sequences, setting, and subplots. By the end of the semester, you will have completed a scene-by-scene treatment of your original work. Considerable outside work is required. Grading is based on weekly assignments, the quality of the written treatment and class participation.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENGWRT 0560 OR FMST 0700 OR ENGWRT 1132 OR FILMST 1132 OR FMST 1860 OR ENGFLM 1499 OR FMST 1194 OR ENGWRT 0520

FMST 1865 - WRITING THE ORIGINAL SERIES

Minimum Credits: 3
Maximum Credits: 3
Episodic stories can be traditional TV sitcoms or drama series, serialized narratives meant to be binged on streaming networks, independent web series, even stories told through a series of Snapchat stories. As different as they are structurally, they all have similar challenges - the writer must create a rich, interesting world and populate it with compelling characters in order to keep an audience watching from episode to episode. In this course students with basic screenwriting skills will apply those skills to the creation of an episodic series, from pitching the series through developing the story arc to writing the pilot episode.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

FMST 1870 - ACTING FOR THE CAMERA

Minimum Credits: 3
Maximum Credits: 3
This course is designed for actors who would like to improve their craft by better understanding the differences between acting for the stage and acting for the camera. The course will describe and demonstrate the contrasts between stage and screen acting in specific shooting scripts and follow that with appropriate script study, character analysis and exercise in film acting techniques. Each class will include lecture, videotaped examples of performances for analysis and critique and the practical experience of working in front of the camera.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

FMST 1875 - SOUND FOR MOTION PICTURES
This course will enable students to convert sound to a digital analog, recording, processing, storing and mixing sounds to varied effects in relation to visual media. Particular emphasis will be placed on the special requirements of sound for narrative film: intelligibility in voice reproduction, achieving and maintaining synchronism, and the relationship between voice, music, sound effects and story.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FILMST 0500 or 0601 or FMST 0845

**FMST 1880 - DIGITAL CINEMATOGRAPHY**

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover advanced video technology and professional techniques of videography. Emphasis will be placed on high image quality and meeting broadcast specifications for video and audio. Professional-quality video cameras will be covered extensively.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** LG/SNC Elective Basis

**FMST 1883 - EXPERIMENTAL CAMERA**

Minimum Credits: 3  
Maximum Credits: 3  
This will be a workshop course dealing with a variety of techniques utilizing the camera as a tool for visual information outside of its normal use and function. The course will look at the history of cameras and the many image making devices that were invented to date.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis

**FMST 1885 - BROADCASTING**

Minimum Credits: 3  
Maximum Credits: 3  
Broadcasting introduces students to television production through academic and hands-on experience, utilizing the University of Pittsburgh's new state-of-the-art television studios and equipment. In addition to students learning how to produce a live broadcast event for collegiate teams and a news broadcast, guest lecturers will talk about the industrial realities of the profession. Students will understand how to format and make a show rundown, apply graphics, utilize replay, work a television camera, comprehend audio application and mixing, produce and direct live events and news broadcast, as well as gain experience in front of the camera as news anchors, reporters and on-air talent for live events.

**Academic Career:** Undergraduate  
**Course Component:** Practicum  
**Grade Component:** LG/SNC Elective Basis

**FMST 1886 - BROADCASTING 2**

Minimum Credits: 3  
Maximum Credits: 3  
The unique and dynamic Broadcasting 2 course will utilize every aspect of the state-of-the-art Pitt Studios, offering students a challenging and stimulating curriculum. Students will produce a Live Event Show Open (incorporating all pre-production elements), a NewsCast, and a Podcast, incorporating video and animation marketing support. Students' projects will be crewed by classmates.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: FMST 1885 or FILMST 1001

**FMST 1890 - THE BUSINESS OF BROADCASTING**
The Business of Broadcasting teaches students how business is incorporated into every form of television broadcasts, including newscasts, documentaries, live event, magazine, interview, Network series, social media and streaming services, from ethics, copyright, "back of house" (payroll, crew call, work-flow) to social media. This is a Category III course that combines critical studies and production elements. It counts for the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FMST 1893 - HUMAN INTEREST STORIES FOR BROADCAST**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Human Interest Stories for Broadcast will teach students how to present and tell a compelling story about a person, place, or thing in the confines of television broadcast, streaming, or social media platform. Writing techniques for television, research techniques, interview techniques, adding graphics, mixing sound and music, video, tracking and voice-over will be required for the feature packages ranging from :45 seconds in length to 3:00 minutes in length. This is a Category III class that combines critical and production elements. This course counts for the Film and Media Studies major and minor.

**Academic Career:** Undergraduate  
**Course Component:** Workshop  
**Grade Component:** LG/SNC Elective Basis

**FMST 1898 - TELEVISION NEWS PRACTICUM: PITT TO THE POINT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Television News Practicum: Pitt to the Point is a hands-on course practicum that produces one live hour-long, television news/magazine program per week, incorporating every facet of broadcast television. The course incorporates news writing, feature writing, research, formatting, pre-production, live production, as well as public speaking and direct interaction with broadcast industry professionals. The course covers news, sports, entertainment and politics across the University of Pittsburgh campuses, as well as the city of Pittsburgh. This is a production course and counts for a Category III for the Film and Media Studies major and minor. It is part of the Television and Broadcast Arts Certificate and the Media and Creative Industries certificate.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SU3 Elective Basis

**FMST 1900 - INTERNSHIP IN FILM AND MEDIA STUDIES**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
Working in consultation with faculty, advanced students wishing to pursue careers in film and media have the opportunity to work with independent media artists or production companies. This course offering is designed to give students valuable experience in their chosen field of study outside the college and classroom environment.

**Academic Career:** Undergraduate  
**Course Component:** Internship  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Undergraduate Internship

**FMST 1901 - INDEPENDENT STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
Under certain circumstances students may elect to study film and media on an independent basis. Such independent study will be closely supervised by a faculty member and will entail the writing of a proposal prior to beginning the course.

**Academic Career:** Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

FMST 1904 - UTA IN FILM AND MEDIA STUDIES

Minimum Credits: 1
Maximum Credits: 3
Undergraduate Teaching Assistants are arranged with individual faculty members and require special permission. A range of credit hours and grading options are available.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

FMST 1921 - FILMMAKING 4: CAPSTONE

Minimum Credits: 3
Maximum Credits: 3
This is a capstone course in motion picture production. Each student will have the option to create an individual project of their choice, which can be any genre of narrative, documentary, or experimental. Students who choose to work on their own personal project should be prepared to pitch the project to the class and the instructor during the first class session. Through script workshops, preproduction reviews, and critique of rough cuts, the instructor will mentor you through the filmmaking process. Depending on class size, students may have the option to instead work together on a collaborative project, with different students filling the roles of producer, writer, director, and editor, and taking on multiple roles in the production crew. This course is a requirement for Film and Media Studies students taking the Production Track.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: (FILMST 1600 or FMST 1846) and (ENGWRT 0560 or FMST 0700 or FILMST 1132 or FMST 1860)

FMST 1930 - INTERNSHIP IN FILM AND MEDIA

Minimum Credits: 1
Maximum Credits: 3
Internships can be taken for credit with special permission from the Internship Coordinator in Film and Media Studies. One internship can count for Category III towards the Film and Media Studies major and minor.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: LG/SNC Elective Basis

Finance

BUSFIN 1030 - INTRODUCTION TO FINANCE

Minimum Credits: 3
Maximum Credits: 3
Provides a survey and analysis of the problems and tools of financial decision-making by individuals and firms. The firm's role in the market system and the nature of its objective with reference to the welfare of investors and society is also treated. An analysis of the implications of this role to decisions regarding choice among alternative investment projects and capital budgeting decisions as well as an introduction to the structure of capital asset prices and the implications for financial policies of firms and individuals are also included.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (BUSACC 0030 or BUSERV 1920 or CDACCT 6030 or MGMT 0022 or BUS 0115 or ACCT 0201) and (STAT 1000 or 1100 or MGMT 0024 or STAT 1040 or ECON 0204 or STAT 1131); PROG: College of Business Admin; LVL: So, Jr or Sr

BUSFIN 1031 - INTRODUCTION TO FINANCE HONORS + 1
Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: Restricted to College of Business Admin Students Only.

BUSFIN 1311 - CORPORATE FINANCE

Minimum Credits: 3
Maximum Credits: 3
Investigates the investment and financing decisions of firms from the perspective of the corporate manager. The pedagogical format combines conceptual and case analyses so as to provide both a theoretical and practical foundation. Specific topics to be considered include the following: capital budgeting, cost of capital determination, capital structure decisions and dividend policy.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSFIN 1316 - ADVANCED CORPORATE FINANCE

Minimum Credits: 3
Maximum Credits: 3
Examines a variety of applied topics in corporate finance, including mergers and acquisitions, corporate restructuring, leasing, pensions, short term financial management, and the use of derivatives in corporate finance.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: BUSFIN 1311; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

BUSFIN 1321 - INVESTMENT MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
Emphasizes the development of tools required for investment decision-making. Reviews various financial instruments, examines their historical performance for evidence of risk return trade-off, presents basic portfolio theory and its implications for diversification, discusses the capital asset pricing model, and empirical estimation of beta riskiness. Other topics include mutual fund performance and the theory of efficient markets.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

BUSFIN 1326 - EFFICIENCY OF CAPITAL MARKETS

Minimum Credits: 3
Maximum Credits: 3
This course covers a central issue in finance: the Efficient Market Hypothesis (EMH). The EMH states that security prices reflect all relevant information and implies that investors cannot earn excess profits. Evidence in support of the EMH and contrary to it is studied. The implications of efficiency impact all financial managers and individuals in their financial decisions. Topics include: what actions can a financial manager take to maximize shareholder wealth, why do prices fluctuate, and technical versus fundamental analysis. The course focuses on valuation methods like DCF and CAPM.

Academic Career: Undergraduate
Course Component: Lecture
BUSFIN 1327 - RISK MANAGEMENT

Minimum Credits: 3  
Maximum Credits: 3  
This course examines financial risk management from the perspective of the corporate manager. The overarching goal is to learn about why and how managers can create value for shareholders by way of risk management. In doing so, we will explore different sources of financial risk faced by managers and how these risks can be measured, quantified, and managed. The first part of the class focuses on the basics of forwards and options. The second part focuses on applications, including Monte Carlo simulation techniques.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

BUSFIN 1328 - CAPITAL MARKETS

Minimum Credits: 3  
Maximum Credits: 3  
This course provides an in-depth analysis of stock and bond valuation. The analysis of bonds covers bond pricing principals, the term structure of interest rates, and fixed income portfolio management. The analysis of stocks focuses on earnings and dividend-based valuation models, and a discussion of "value investing" and indexing.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

BUSFIN 1329 - FIXED-INCOME SECURITIES

Minimum Credits: 3  
Maximum Credits: 3  

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

BUSFIN 1331 - FINANCIAL INSTITUTIONS AND MARKETS

Minimum Credits: 3  
Maximum Credits: 3  
Analysis of the behavior of financial intermediaries in the capital market. The performance of capital markets and examination of the role of regulations of financial markets, and the effects of decision-making by individuals and firms are covered. Sources of short-term and long-term financing will also be analyzed.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  

BUSFIN 1341 - INTERNATIONAL FINANCE
**BUSFIN 1345 - MARKETS AND TRADING**

Minimum Credits: 3  
Maximum Credits: 3  
This course gives participants a broad understanding of the operations of various financial markets with special focus on liquidity, market structure and trading. The course concentrates on the operations of exchanges, trading systems and broker-dealer intermediaries. Students will be exposed to range of issues regarding the formulation of trading decisions and market structure design and regulation. Simulation software will be used to provide experience making tactical trading decisions in different market structure environments. Students will manage equity portfolios using OTIS.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSFIN 1030 (MIN GRADE 'C') and 1311 and 1321; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors  
Course Attributes: Global Studies

**BUSFIN 1347 - MERGERS, ACQUISITIONS AND CORPORATE STRUCTURES**

Minimum Credits: 3  
Maximum Credits: 3  
This course examines the major structural transactions that corporations experience from an internal perspective, based on sound financial analysis conducted with an understanding of corporate governance, firm strategy, law, accounting, and organizational behavior. Particular emphasis will be on mergers and acquisitions (M&A), and include topics in venture capital, initial public offerings, buyouts, divestitures, and bankruptcy. Readings, case study analysis, and active class discussion are emphasized. Teams of students will put the M&A process into practice by searching out and analyzing potential target firms for a major corporation and presenting their analyses and recommendations.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSFIN 1311 and 1321; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

**BUSFIN 1351 - FINANCIAL MODELING**

Minimum Credits: 3  
Maximum Credits: 3  
The course applies economic theories to solve various problems in financial management and investments. Using a hands-on approach in building financial spreadsheet models, the student will gain knowledge of numerical and graphical practices. These include but are not limited to asset return calculations, portfolio theory, index models, and the capital asset pricing model, option pricing models, bond pricing and investment performance analysis. MS Excel is the primary tool to implement these financial models, however the course will also make use of statistics and probability.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Requirements: PREQ: BUSFIN 1030 (MIN GRADE 'C') and 1311 and 1321; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

**BUSFIN 1355 - VALUATION**
This course examines the topic of value: what it is, how to measure it, and how to use it to guide managerial decisions. This is done by accomplishing three objectives: 1) provide students with a conceptual framework for thinking about value; 2) provide students with tools for estimating value and measuring value creation and destruction; and 3) teach students how to apply valuation models in different settings.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: BUSFIN 1311 and 1321; PLAN: Accounting, Finance, General Management, Global Management, Marketing, Business Information Systems, Human Resources Management, Supply Chain Management, Undeclared CBA majors

### BUSFIN 1360 - REAL ESTATE FINANCE

- **Minimum Credits:** 1.5  
- **Maximum Credits:** 1.5  
This course provides an introduction to real estate with a focus on the valuation and financing of real estate. The following topics are expected to be covered as the course focuses on income producing properties: economic theory of real estate, valuation technique (including pro-forma cash flow projections), financing strategies, risk analysis, taxation, and the securitization of real property interests. No prior knowledge of the industry is required, but students are expected to rapidly acquire a working knowledge of real estate terminology and real estate markets. Classes are conducted in a standards lecture format with discussion required.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### BUSFIN 1365 - VALUATION 2

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This is a continuation of valuation 1.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### BUSFIN 1380 - GLOBAL FINANCIAL SYSTEMS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
This course will examine the history and development of the global economy. It will examine the structure and principal operations of the global financial system. In doing so it will explore the impact of these operations in terms of trade, financial assets, capital movements and economic growth, putting into evidence the new global processes and its impact especially over the Brics and European markets.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### BUSFIN 1390 - FINANCE INTERNSHIP

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  
The finance internship provides business credits for project assignments that augment a professional finance work experience.

**Academic Career:** Undergraduate  
**Course Component:** Internship  
**Grade Component:** Satisfactory/No Credit  
**Course Requirements:** PREQ: BUSFIN 1030 (MIN GRAD 'C'); PLAN: Finance (BSB)

### BUSFIN 1395 - FINANCE INDEPENDENT STUDY

1354
An independent study course for students desiring to pursue in greater depth a specific set of finance issues or problems to which they have been introduced in other finance courses. The course involves directed reading and research under the guidance of a full-time faculty member.

**Academic Career:** Undergraduate  
**Course Component:** Independent Study  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: BUSFIN 1030 (MIN GRAD: ‘C’); PLAN: Finance (BSB)

### French

**FR 0001 - ELEMENTARY FRENCH 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course will introduce the student to the oral-aural and reading-writing skills in the language. From the outset, students learn to use the spoken language and begin to work on good pronunciation, while at the same time developing the listening comprehension, reading, and writing skills.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FR 0002 - ELEMENTARY FRENCH 2**

Minimum Credits: 3  
Maximum Credits: 3  
This course introduces the students to the oral-aural and reading-writing skills in the language. From the outset, students learn to use the spoken language and begin to work on good pronunciation, while at the same time developing the listening comprehension, reading, and writing skills. This course is a logical continuation of elementary French 0001.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FR 0003 - INTERMEDIATE FRENCH 1**

Minimum Credits: 3  
Maximum Credits: 3  
This course is a logical continuation of the first-year sequence. Emphasis continues to be placed on the oral aural skills, but the reading and writing skills become increasingly stressed.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FR 0004 - INTERMEDIATE FRENCH 2**

Minimum Credits: 3  
Maximum Credits: 3  
This course is a continuation of French 0003. Reading skill is emphasized even more than in FR 0003 but continues to be accompanied by oral-aural and written work.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FR 0006 - SPECIAL TOPICS IN CONVERSATION AND CULTURE**
Minimum Credits: 1
Maximum Credits: 6
Designed for students at the second-year level of proficiency (French 3 or French 4), this course will treat topics in French and/or francophone cultures, with a focus on oral communication.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

FR 0008 - INTENSIVE FRENCH FOR READING 2

Minimum Credits: 4
Maximum Credits: 4
This course consists of translation and discussion in English of a variety of non-literary readings. It is a logical continuation of French 0007.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FR 0007 (MIN GRADE: 'C')
Course Attributes: DSAS Second Language General Ed. Requirement, West European Studies

FR 0012 - FRENCH KISS: LOVE, SEX, FRANCE

Minimum Credits: 3
Maximum Credits: 3
Taught in English. From kissing to romantic escapades, from Paris to the Riviera, from Tahiti to Marrakesh, France and the Francophone world have a highly recognizable profile in matters of sex and love. Sexual behavior is always culturally inflected, and it evolves through time in its creation of emotions, attachments, families and institutions. In this class, we will adopt a historical lens to retrace the cultural transformations of sex and love in the French cultural and social landscape. We will study contemporary visual and textual materials (especially film), and a variety of historical documents from the Middle Ages to the present day. We will address controversial issues such as virginity, adultery, same-sex relationships, women's sexual agency, gender definitions through sexuality, the shifting boundaries of pornography and other related matters. This course is open both to incoming and more advanced students. It will count toward the French major and minor as a course in English.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 0014 - INTRODUCTION TO FRENCH-SPEAKING CANADA

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to French-speaking Canada as a linguistic and cultural geopolitical entity. While principal focus will be on Quebec, we will also examine French-speaking areas contiguous with Quebec and various isolates and extensions of this sociocultural area. We will begin chronologically with a historical presentation of the province's history as part of various geopolitical entities, and then focus on more contemporary Quebec, the bid for independence and the quiet restlessness of a "distinct society" concerned with its survival.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 0016 - HISTORY OF FRENCH CINEMA

Minimum Credits: 3
Maximum Credits: 3
History of French Cinema: From Technological Marvels to Ubiquitous Screens French cinema is recognized the world over for its artistic daring, its sophisticated style, and its inimitable sense of cool. Indeed, the French like to say that they invented cinema. Whether true or not, moving images have been a central way through which the French understand themselves, their place in the world, and the impact that new forms of media technology have on everyday life. This course will take a historical perspective to French cinema and to our sense of what French cinema is. We'll
track how French society has changed along with its cultures of making and consuming images, and we'll see how French films of the past can help us better understand the media-saturated present in which we live. Along the way, we'll look at silent films, classical-era sound films, films from the New Wave period, and contemporary films in a variety forms, including documentary, the musical, horror, art cinema, the essay film, postcolonial cinema, digital media, and much more. No previous course experience with cinema is presumed. This course will be run like a traditional French ciné-club in which students are introduced to some of the most important French films that we still talk about today and to the varied ways we watch, discuss, and write about films in general. The course will be taught in English; all readings will be available in English; and all films with have English subtitles.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 0017 - PARIS: URBANISM PAST AND PRESENT

Minimum Credits: 3
Maximum Credits: 3
This course embarks on a study of Paris as an ever-evolving urban center in time and space. A two-pronged approach sees the City of Light as both a geopolitic entity with a history of great importance and an idea that has influenced politics, society and the arts all over the world. The syllabus features both the diachronic evolution of Paris from Gallo-Roman times to the present day as well as the synchronic weight of Paris as place and notion both in and out of France.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 0031 - ELEMENTARY FRENCH 1 FOR MBAS

Minimum Credits: 1.5
Maximum Credits: 1.5
French 0031 is designed for business students who have no previous knowledge of French. It is an elementary language acquisition course and aims to teach students how to carry out basic functions likely to be necessary in dealing with others in the target language. The course aims to develop very basic abilities in all four language skills--speaking, listening, reading, and writing and deals with culture as an integral part of each skill.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 0070 - KINGS & QUEENS: FROM VIKINGS TO THE GUILLOTINE

Minimum Credits: 3
Maximum Credits: 3
French Vikings. A wicked Italian queen. Art, sex, and politics. Guillotines. The history of the French monarchy has it all. Join us as we study the art, palaces, gender performances, laws, ideas and people who created, and undid, the French monarchy. Explore historical artifacts and art objects from medieval France to the French and Haitian Revolutions. And then put your historical and cultural skills to work in understanding why monarchy is having such a moment now, in television series, music videos, art, pop culture and politics. Course taught in English. No prerequisites. Counts toward the French studies minor and as an English-language course substitute for 1000-level course in the French major and as a course in English for the French minor.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 0075 - GLOBAL FICTIONS OF CLIMATE CHANGE

Minimum Credits: 3
Maximum Credits: 3
Scientists have been saying it for a while: humans have forever changed the Earth's climate. We know that glaciers are melting, seas are rising,
wildfires are raging, and hurricanes are destroying shorelines. But how do we imagine the future? As the planet gets hotter, a new genre has emerged to inspire action: climate fiction (or cli-fi). In this course - taught in English with no prerequisites - you will read literature and watch television series and films that deal with the global impact of climate change. Explore a variety of creative work from around the French-speaking world: the Caribbean, sub-Saharan and East Africa, Canada, and the Mediterranean. Joins us as we learn about the Anthropocene, environmental racism, slow violence, petrofiction, and Afrofuturism. Counts toward the Environmental Studies major, the French studies minor, the French major (as an English-language course substitute for a 1000-level course), and the French minor (as a course in English).

**FR 0080 - MODERN FRENCH NOVEL**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
What makes a great read? Is it plot? Characters? Breaking literary conventions? Immersing yourself in different times and different voices? Playing with your emotions? This course explores some of the great reads of modern and contemporary French literature to find out what defines "the modern French novel." We will focus on developing your skills as discerning, attentive, feeling readers as we practice different ways to study, and enjoy, novels. This course is about you as a reader; it's also about you as a writer. As part of this W course, you will learn ways to troubleshoot common writing difficulties (finding a topic, formulating a thesis, revising). Together, we practice a process approach to writing that includes informal and formal writing, a variety of revision activities, and developing competence in critical writing functions and formats. Come for the great reads, and stay to create great writing!

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FR 0088 - AILING BODIES: NARRATIVES OF HEALTH AND ILLNESS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
How can disease or illness be put into fictional form? Taught in English for a general audience, this course focuses on literary and cultural representations of disease from the perspective of the humanities. Topics may include Alzheimer's, anorexia, organ transplant, HIV-AIDS, and others. The novels that we will study all translate pain into language, and they rethink the doctor-patient relation and what an ailing body can do, as consequences of accident, illness, or disability. We will focus on contemporary literary texts from the French-speaking world and examine historical and cultural differences between France and the United States on medical issues such as organ donation, surrogacy, or vaccination. The French literary context is especially rich in the areas of medicine and health. Our approach will be informed by European philosophies of medicine, and we will investigate the narrative and aesthetic dimensions as well as the ethical stakes presented by a variety of types of texts. We will also examine how medicine interacts with, and redefines, notions of class, race, gender, and disability, and how science influences fictional, social, and political discourses on bodies. The course's focus on health and medicine should be of interest to premed/health/science students and anyone who wishes to study health topics from an interdisciplinary perspective. All texts will be read in English translation.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**FR 0090 - EURO CHIC: THE INVENTION OF FASHION**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Since the Renaissance, Italy and France have occupied a fundamental role in the establishment and development of fashion as a creative and commercial enterprise deeply rooted in cultural mores. The course address the historical shifts in the cultural understanding of gender roles, class belonging, consumption habits and expectations, the international circulation of craftmanship and celebrities, and technological innovation. We will start addressing the anthropology of body ornamentation, gender markings and the difference between costume and fashion. Our historical point of departure is the grand arrival of Catherine De Medici from Florence to Paris in 1547, following her marriage to King Henry II of France. We then follow the progressive establishment of Paris as the capital of European (and eventually international) fashion, together with Italian cities like Florence, Venice and Milan. We also take a significant detour through London during the "dandy" era of the early 19th century and the "mod" and "punk" trends of the decades between 1960 and 1980. Punk leads us into a discussion of current international "anti-fashion" trends, such as the
politics and economics of privilege, cheap labor and environmental concerns about "fast fashion." This course is taught in English. *This course may be used for the Italian Studies major (whether listed as FR 0090 or ITAL 0090), but does not count for the Italian major or the Italian minor.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  

**FR 0100 - FRENCH FOR THE PROFESSIONS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course is designed for students interested in learning French for professional purposes. As an introductory course, students will learn the language practices necessary to initiate, carry out, and conclude basic professional transactions in the geographic and virtual French-speaking worlds.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PROG: (College of Business Admin) or (School of Nursing) or (Swanson School of Engineering)

**FR 0101 - ELEMENTARY FRENCH 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

A study of the grammar and vocabulary of elementary spoken and written French. Stresses grammatical structure and its correct application.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** UPB Global General Ed. Requirement, UPB Language General Ed. Requirement

**FR 0102 - ELEMENTARY FRENCH 2**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

A continuation of elementary French 1. A study of the grammar and vocabulary of elementary spoken and written French. Stresses grammatical structure and its correct application.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** DSAS Second Language General Ed. Requirement, UPB Global General Ed. Requirement, UPB Language General Ed. Requirement

**FR 0103 - INTERMEDIATE FRENCH 1**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course is a logical continuation of the first-year sequence. Emphasis continues to be placed on the oral aural skills, but the reading and writing skills become increasingly stressed.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** College in High School - UGRD - students only.  
**Course Attributes:** DSAS Second Language General Ed. Requirement, DSAS Second Language General Ed. Requirement

**FR 0104 - INTERMEDIATE FRENCH 2: FRENCH IN A GLOBAL CONTEXT**
What does it mean to speak French in today's globalized world? Find out in French 0104! This second-year course in French language and Francophone cultures approaches French or rather "Frenches" as an umbrella term for the spoken and written conventions of multiple French-speaking spaces that go well beyond the borders of modern France. We explore the global use of the French language as a cognitive and communicative vehicle that spans six continents and is now official in 29 countries. Emphasis is on communicative, cultural and cognitive competencies in the various Frenches of the world. The course integrates the study of pronunciation, grammar, and vocabulary with the topics of the course. By the end of the semester, students will be able to identify the salient features of different Francophone accents (sounds, words, and structures), all while engaging in spontaneous conversation or written communication on familiar topics using dialect-appropriate vocabulary and grammar. Though class discussions and the study of primary visual, written and sung texts, we will consider questions such as: How precisely is French "global"? How is the French spoken in one part of the world different from that spoken in other parts of the world? How do different Frenches reflect different cultural values? How does migration function between Francophone cultures? Prerequisite: FR 0103, placement, or equivalent. Fulfills DSAS General Education Requirement in Global Issues. Language of instruction: French.

FR 0106 - CONVERSATION HOUR

This course is a one-hour weekly conversation workshop taught at the level of French 0103/0104. It is open to all students who have taken French 0102 at Pitt or equivalent elsewhere or who have the same proficiency level as would be expected after completion of such courses. We will approach oral skills in a relaxed and low-stakes environment. Based on the interests of the class, we will engage in various types of "conversation," including, but not limited to, current events in various Francophone polities, cultural products, practices and perspectives as well as speaking practice through debate and role-play. This course is meant to provide an arena to practice French and extra practice for students in 3-credit French language courses (especially 0103 and 0104) desirous of increasing their accuracy and fluency in the spoken language. It also serves students who want to maintain their French skills in order to enroll in a French course in a future semester. Grades will be calculated based on attendance and active participation in class. This course does not satisfy the Dietrich School language requirement.

FR 0200 - FRENCH FOR THE PROFESSIONS 2

Who are the French today? What role have historical events played in defining the country and its people? What perceptions do the French have of themselves? How do geography, urbanism, and regionalism define the French? Are Parisians really snobs? What do the French have to say about current social and political movements and ideologies related to democracy, capitalism, socialism, globalization, post-colonialism, multiculturalism, far-right nationalism, racism, Islamophobia, feminism, and sexuality? This course investigates these questions and more, while delving into the habits and behaviors of the French in their daily lives. To this end, students will study recent articles, videos, and other media. Recommended prerequisite: FR 0004 or 0104 or 0221 or 0227 or 0055/0255 or 0056/0256.

FR 0220 - FRANCE IN THE 21ST CENTURY

Who are the French today? What role have historical events played in defining the country and its people? What perceptions do the French have of themselves? How do geography, urbanism, and regionalism define the French? Are Parisians really snobs? What do the French have to say about current social and political movements and ideologies related to democracy, capitalism, socialism, globalization, post-colonialism, multiculturalism, far-right nationalism, racism, Islamophobia, feminism, and sexuality? This course investigates these questions and more, while delving into the habits and behaviors of the French in their daily lives. To this end, students will study recent articles, videos, and other media. Recommended prerequisite: FR 0004 or 0104 or 0221 or 0227 or 0055/0255 or 0056/0256.
FR 0221 - READING FRENCH: LITERATURE, MEDIA, CULTURE

Minimum Credits: 3  
Maximum Credits: 3  
How do French-speakers today experience media such as video games, graphic novels, literature, film, YouTube, medieval manuscripts, pre-modern books, and others in the digital age? This course examines how stories get told in French across different kinds of media; in illuminated manuscripts and graphic novels, in novels and films, in video games and fan fiction. You'll encounter some of the "classics" of French literature; and you'll explore how these classics have been rethought, remediated, and revitalized for new media and new audiences in exciting ways. This course practices a supportive, structured approach to language acquisition, with a focus on boosting and enhancing your reading skills in French. Taught entirely in French. Recommended prerequisite: FR 0004 or 0104 or 0027/0227 or 0055/0255 or 0056/0256.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: DSAS Literature General Ed. Requirement, SCI Polymathic Contexts: Humanistic GE. Req., West European Studies

FR 0227 - THE FRENCH ATLANTIC

Minimum Credits: 3  
Maximum Credits: 3  
This course is a study of the history of French colonization of the "New World" of the Americas from the sixteenth to mid-twentieth centuries, just after the second World War. By adopting an "Atlantic" approach, we will examine Europe, Africa and the Americas as interconnected regions. The course explores several themes: Voyages et Rencontres; les Français en Amérique du Nord; la Traite des Noirs; les Lumières et le Nouveau Monde; et Révolution à Saint-Domingue. Although each theme treats a different region and highlights a different time period, our approach will allow us to follow the writings of explorers, philosophers, administrators, generals, merchants, and former slaves around the Atlantic, from the coasts of France and West Africa, to the eastern United States, and south to the Caribbean and South American mainland. The course will be conducted in French.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: FR 0004 or 0104 or 0020 or 0021 or 0055 or 0056 (MIN GRADE: 'C' for all listed Courses)  

FR 0255 - SPEAKING FRENCH: ATELIER D'EXPRESSION ORALE

Minimum Credits: 3  
Maximum Credits: 3  
As an oral skills course, French 0255 approaches speaking French in real life contexts. Focus is on speech acts. Students will learn how to present, narrate, describe, and speak French in various registers (from very informal to very formal) and with tact. We will continue to work on vocabulary building and grammatical mastery so that students are able to use French as needed to carry out various daily, professional and personal functions. Some examples of the speech acts we will learn to execute include: how to present oneself and one's peers, how to describe in detail people, places and things, how to narrate in the present, past and future, how to express and support points of views. These various speech acts will serve a larger framework of real life scenarios students may encounter later on in their studies or careers, for example when interviewing for a job, when interviewing others for a job, when speaking in front of a group, when speaking with colleagues, when running a meeting, when providing consulting services. The study and practice of spoken French is thus concentrated on the social turn and use in context. This course is taught entirely in French. Recommended prerequisite: FR 0004 or 0104 or 0021/0221 or 0027/0227 or 0055/0255.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: West European Studies

FR 0256 - WRITING FRENCH: ATELIER D'EXPRESSION ECRITE
Question: What do Samuel Becket, Edith Philips, and Oscar Wilde have in common? Answer: they are all exophonic writers, writers who wrote in languages that were not their native tongues. And they were all English-speakers who wrote some or most of their work in French. You can too! What are the secrets to writing well in a language that is not your first? How can you leverage all you know about writing in your native language to improve your written expression in French? "Writing French: Atelier d'expression Ecrite" will teach you how to cultivate exophonic writing skills through a writing-as-process approach that is keyed to the challenges of foreign language composition. Class work and written assignments will include writing effective professional and personal correspondence, composing a CV or job resume, writing journal articles and critiques as well as creative pieces (such as fables, poems, or song lyrics for a Francophone audience). Through textual modeling, cooccurrence analysis (words that go "together"), and comparative vocabulary and grammar review, you will learn techniques needed to write in a variety of genres and to "sound French." Recommended prerequisite: FR 0004 or 0104 or 0021/0221 or 0027/0227 or 0055/0255.

FR 0258 - ADVANCED FRENCH CONVERSATION

An advanced conversation course in French for majors and non-majors who wish to maintain or improve their command of the French language through a discussion of contemporary topics. This one-unit class at once builds on and complements French 0055/0255. It is designed to improve students' oral proficiency and sociolinguistic competence through contextualized simulated immersion. The course is divided into four sections, each demanding different, but complementary social and linguistic skills, to wit 1) getting to know people and places; 2) current events; 3) debate and disagreement; 4) cultural comparisons. Emphasis is on acquiring the authentic oral communication skills, in the widest sense of the term, necessary to navigate expertly French-speaking environments. This course can be repeated, but can only be counted toward the French major/minor once.

FR 0530 - FILM ANALYSIS

This course introduces students to major films and film movements from the origins of cinema in 1890s to the present. We will focus on the impact of technological and social changes on cinema, while placing such film-specific events as the invention of cinema, the coming of sound, or the use of color, in broader historical and cultural contexts. We will consider how major film movements have in turn influenced other national or international cinemas around the world, including mainstream Hollywood cinema.

FR 0540 - WORLD FILM HISTORY

This course introduces students to major films and film movements from the origins of cinema in 1890s to the present. We will focus on the impact of technological and social changes on cinema, while placing such film-specific events as the invention of cinema, the coming of sound, or the use of color, in broader historical and cultural contexts. We will consider how major film movements have in turn influenced other national or international cinemas around the world, including mainstream Hollywood cinema.
FR 1001 - POETRY

Minimum Credits: 3
Maximum Credits: 3
The study of poetry cannot be divorced from the special requirements of versification, we shall begin by examining the general aspects of French prosody. Then, the regular work of the class will be devoted to the close reading of poems by a number of poets, including Ronsard, Victor Hugo, Baudelaire, Rimbaud, Mallarme, Verlaine and Apollinaire.

Academic Career: Undergraduate

FR 1012 - 17TH CENTURY TOPICS

Minimum Credits: 3
Maximum Credits: 3
This course will treat some aspect of the literature of the 17th century in France.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1016 - 19TH CENTURY TOPICS

Minimum Credits: 3
Maximum Credits: 3
This course will treat some aspect of the literature of the 19th century in France.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1018 - 20TH CENTURY TOPICS

Minimum Credits: 3
Maximum Credits: 3
This course will treat some aspect of the literature of the 20th century in France.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: African Studies, Global Studies, West European Studies

FR 1022 - CREATIVE WRITING WORKSHOP

Minimum Credits: 3
Maximum Credits: 3
In this workshop, you will create your own texts in French. We will work on the prose poem, the short story, the fairy tale, and creative nonfiction, while exploring the boundaries between these different genres and the stakes of reading and creating literature in today's digital world. The workshop format includes presentation of your work and guided peer critique in a collaborative and supportive environment, as well as discussions of textual “intermediality” and of literary models as inspiration for your own work. This course will focus on guided production of written work in French and on the language choices that writers make within the conventions of certain literary genres. You will organize and host a “book club” in French on a recently published novel from the French-speaking world. A public reading of a selection of your work, followed by a Q&A session with the audience, will be organized at the end of the semester. No previous experience in creative writing is required or expected. Taught entirely in French.

Prerequisite: at least one of the following: FR20, FR21, FR27, FR55, FR56, or permission of the instructor.

Academic Career: Undergraduate
Course Component: Workshop
Grade Component: LG/SNC Elective Basis
FR 1023 - FRENCH THEATRICAL WORKSHOP

Minimum Credits: 3
Maximum Credits: 3

In "French Theatre Workshop," the class behaves as a performing troupe, with every student being involved in every stage of a theatre production. Students refine their communication skills by memorizing lines, delivering them, and interacting in a foreign language. They craft characters with the goal of conveying their own reading of L'Ecole des femmes in an artistic performance. In the first sessions, students analyze a classical French play written by Molière, familiarizing themselves with the history of theatre and the types of characters displayed in European traditions. In L'Ecole des femmes, the playwright makes fun of Arnolphe, an insecure old man so afraid of being cheated on by his wife that he prefers to educate a girl from the countryside and mold her through his principles in order to marry her. In their staging of the play, students transform the early modern text into contemporary French and make it resonate in our post #MeToo era, giving their own interpretation of what is considered "traditional,""modest," or "daring" today. To that end, students are introduced to different acting techniques, from repeating alexandrins, movement work with Commedia Dell'Arte masks, and improvising in French around situations depicted in the play. Later in the semester, students either work on their acting, or help design the set, build the props, arrange the costumes, produce the flyers, and contribute to the overall staging of the performance that will be open to the general public, including all French majors and minors. The class weaves acting and digital creation, as the performance will also include short videos projected on the set. All students are expected to reflect on their experience and experiments with French Theatre by writing in a logbook throughout the semester, to participate in a collective brainstorm on the class forum, and to design a moodboard on Tumblr.

Grade Component: Letter Grade
Course Requirements: PREQ: FR 0020, 0021, 0027, 0055 or 0056.

FR 1025 - THE IDEA OF FRANCE

Minimum Credits: 3
Maximum Credits: 3

In this course, students will examine the question of how France, the French nation, and Frenchness (francité) have been imagined. What is the "idea of France" throughout different historical periods? How do modern notions of what France is imagined to be relate to pre-modern notions? What have different time periods (such as the Middle Ages, the Renaissance, the Enlightenment, colonization) contributed to the concept of France? What role does language play in Frenchness? How do concepts of race, gender, and ethnicity factor in to all these questions? This course will investigate what France was/is thought to be, how it is constructed through words, images, and acts. To treat this topic, we will take an interdisciplinary cultural studies approach. This means we will examine many types of "texts", including literature, philosophy, manifestos, historical documents, film, video, music, webpages, architecture, newspaper and magazine articles, essays, works of art, maps, encyclopedias, and dictionaries. We will investigate the concept of "citizenship" in challenging texts and relate it to current events and the news. This course is also about you sharing your knowledge and passion for things French with the general public, through research in the French Nationality Room archives and the organization of an event during the Week of Francophonie. You will also write formally and informally in French in several genres (academic paper, op-ed piece, rationale, podcast script). This course will be taught in French.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FR 0256 OR two of the following: FR 0220, FR 0221, FR 0227, FR 0255.

FR 1031 - FRENCH PHONETICS

Minimum Credits: 3
Maximum Credits: 3

A systematic study of the sounds and sound patterns of French in theory and in practice. Emphasis is placed on oral work designed to perfect the student's pronunciation of the language.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

FR 1032 - ADVANCED GRAMMAR AND STYLISTICS
FR 1033 - BUSINESS FRENCH: LE FRANCAIS DES AFFAIRES

Minimum Credits: 3
Maximum Credits: 3
This course is a course in French language and francophone culture with a focus on business. Students will continue to perfect their general language skills and cultivate those special skills necessary to carry out commercial activities in French-speaking places.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: FR 0004 or 0104 and (FR 0020 or 0021 or 0055 or 0056); PROG: School of Arts and Sciences (UA-S) or College of Business Admin (UCBA)

FR 1036 - GREEN FRANCE: SITUATED ECOLOGIES

Minimum Credits: 3
Maximum Credits: 3
This course focuses on reading and writing as complementary communicative acts. Students engage in practical and theoretical study of French grammar, the analysis and imitation of stylistic and grammatical features found in selected French prose texts, and comparative stylistic analysis of English and French. Writing assignments include original compositions in French and short translations from French to English and English to French. Conducted in French.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

FR 1038 - STRUCTURE OF MODERN FRENCH

Minimum Credits: 3
Maximum Credits: 3
This course will offer a problem-solving approach to the syntax of modern French and will focus on rule discovery and methods of syntactic argumentation.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1039 - VARIETIES OF WORLD FRENCH(ES)

Minimum Credits: 3
Maximum Credits: 3
Dans ce cours, nous retracerons l'évolution de l'espace francophone (la « Francophonie ».) Bien que la sociolinguistique historique fasse partie de notre programme, nous privilégierons davantage les questions synchroniques. Nous analyserons donc les caractéristiques des français différents (en
Amérique du Nord, en Amérique du Sud, en Afrique, en Asie et en Europe) en tenant compte des distinctions phonétiques, phonologiques, morphologiques, lexicales, sémantiques, syntaxiques et pragmatiques de ces variétés socio-géolectales. À la fin du semestre, vous serez capables de distinguer les variétés du français en vous rapportant à l'interface de ces caractéristiques linguistiques et les milieux sociaux dans lesquels elles se manifestent. Une telle appréciation vous aidera également à mieux maîtriser le français et donc à mieux vous exprimer, car vous aurez acquis des connaissances plus approfondies de la langue telle qu'elle s'emploie-à l'oral, à l'écrit et en tant que symbole culturel-partout dans le monde. COURS PRÉALABLES: FR 0104 + au moins deux cours de la série suivante: 0220, 0221, 0227, 0255, 0256 ou la permission du professeur.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1040 - FRENCH LANGUAGE PAST AND PRESENT

Minimum Credits: 3
Maximum Credits: 3
This course is designed to show how the language, as we know it today, has emerged, after two thousand years of change and reconstruction, from the language once known as Latin in the area once known as Gaul.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1052 - SPECIAL TOPICS IN FRENCH CIVILIZATION

Minimum Credits: 3
Maximum Credits: 3
This course, offered infrequently, will treat some aspect of French civilization.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

FR 1053 - GLOBAL FRENCH

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*

FR 1059 - 20TH CENTURY FRENCH CIVILIZATION: SPECIAL TOPIC

Minimum Credits: 3
Maximum Credits: 3
This course will treat some aspect of 20th century French civilization.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

FR 1065 - GENDER, SEXUALITY, AND FRENCH THOUGHT

Minimum Credits: 3
Maximum Credits: 3
This course is taught in English. Some of the most important thinkers about gender and sexuality are French. In this course, you will study French philosophical thought about both gender and sexuality. We will discuss and evaluate the theoretical claims made by key French thinkers, including ethical relations between men and women that they posit or critique. Questions of language, discourse, and representation are central to this tradition, and we will evaluate to what extent this focus affects (positively or negatively) gender and sexual politics. How can language be political? To what extent can it promote gender equality? Questions of gender essentialism and the "nature" of men and women will also be central to the course. Gender and sexuality will be taken in the broad sense, and we will consider thought on women, equality, and feminism as well as queerness, homosexuality, intersex, masculinity, trans*, and race/gender intersections. We will also consider the transatlantic reception of French thought in American gender theory. This interdisciplinary course is open to all students. As the French have been deeply influential in gender theory, this course will help students understand a key Western intellectual tradition. This course is taught in English, and all readings will be in English. No knowledge of French is required.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1070 - GENDER AND SEXUALITY IN 21ST CENTURY FRANCE

Minimum Credits: 3
Maximum Credits: 3

French culture has always had much to say about questions of gender and sexuality. In this course, we will consider key cultural products, perspectives, and practices around the concept of gender broadly conceived, including masculinity, feminism, hetero/homosexuality, transgenre, and others. Questions of nation, race, and ethnicity will factor into our discussions as well, and we will think often about the words or language that texts employ to talk about gender. We will also engage in cross-cultural comparison between France and our own cultural context(s) to give us comparative insight into the world we live in. We will treat questions such as: What is the current "crisis" in French masculinity? What does it mean to be a man today in France? What is the current state of feminism in France, and how does it differ from previous incarnations? How does the discourse of homosexuality and queerness compare to the US context? What does transgenre signify? When and how did transgenre appear as a category in France? How are French constructs of gender inflected with Arab or North African identities? What other recurring forms of intersectionality are there? And how is all this represented in cultural texts? Our focus will be French culture since the turn of the century. Taking an interdisciplinary cultural studies approach, this is not a literature course per se (though we will read some literature). To aid us in our task, we will discuss and analyze a wide variety of recent texts in French from the 21st century: comic books (BD), films, documentaries, YouTube videos, music, webpages, journalistic prose, manifestos, political and government tracts, school textbooks, autofiction, novels, children's literature, pop psychology, etc. As the course is taught entirely in French and all written work is in French, you will increase your linguistic proficiency in reading, writing, speaking, and listening. You will also acquire the semantic tools you need to talk and write about gender and sexuality in French. Prerequisite: at least six credits above French 104, or permission of the instructor.

FR 1076 - FRENCH INTELLECTUALS

Minimum Credits: 3
Maximum Credits: 3

From environmental issues to gender politics, from the culture of capitalism to universal human rights, from media encroachment to esthetic values, French intellectuals had something to say about it all! In this class, we will discuss the tradition and the contemporary practice of public intervention on the part of writers, artists, sociologists and philosophers in modern France. The class starts with the contemporary figure of French economist Thomas Piketty, and then goes through a chronological review of the significance of enlightenment thinkers such as Voltaire and Rousseau, early critics of capitalist society such as the writers Balzac and Stendhal, Emile Zola's famous denunciation of anti-Semitism in the French military establishment at the turn of the 19th/20th century, 20th-century French existentialist Jean-Paul Sartre, feminist thinkers such as Simone de Beauvoir and Monique Wittig, environmental critics such as the un-growth advocate Serge Latouche and postmodern sociologist Jean Baudrillard.

Academic Career: Undergraduate
Course Component: Lecture
FR 1077 - THINKING THE EARTH: THEORIES OF THE ENVIRONMENT FROM THE FRENCH-SPEAKING WORLD

Minimum Credits: 3
Maximum Credits: 3
Climate change is forcing us to radically rethink the human position in our environment. In this class (taught in English with all reading in translation), students will benefit from the important contributions that French-speaking thinkers have made to our conceptual arsenal in the field of environmental ethics and philosophy. Some of our questions will include: Why are we still reading and debating Jean-Jacques Rousseau's evocation of a state of nature and his critique of Western social and political development? Why did French philosophers and cultural scholars recast Martin Heidegger's understanding of the Umwelt (the World Around Us) and his critique of technology? How did Rousseau and Denis Diderot critique the French colonial enterprise already in the 18th century? How do post- and decolonial thinkers reframe the debate about the Anthropocene today? And finally, how do philosophy and ethics offer us the tools to take a stand in today's political debates about the future of the human environment? In short, how can we "think the Earth"? Open to any student (no prerequisite), the course may be of particular interest to students in areas such as the humanities, the natural sciences, history, environmental studies, political philosophy, global/international studies, public health, and the sustainability program.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1079 - CINEMA AND THE POSTCOLONIAL

Minimum Credits: 3
Maximum Credits: 3
This course draws on films from areas formerly colonized by France to explore the complex and frequently contested notion of the postcolonial. Through theoretical readings and analysis of films from North and sub-Saharan Africa, we will explore the shift from a binary model of colonizer/colonized to a recognition of the uneven, unsettled relations both within and between former colonies and the metropole. Introduction to concepts of film analysis and critical writing practice will encourage interrogation of your own viewing expectations along with the films on view.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1085 - WOMEN'S VOICES IN FRENCH LITERATURE

Minimum Credits: 3
Maximum Credits: 3
We will read texts written by women authors in France from the middle ages to the 20th century. By following the evolution of the issues faced by women writers we will discover how a good number of the current claims were already clearly expressed several centuries ago. We will also be able to understand better what is specific to our period, and to reflect upon what it means today for a woman to inscribe her voice in a male dominated society.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1088 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Period and literary topics are determined by the instructor.

Academic Career: Undergraduate
Course Component: Lecture
FR 1090 - INTRODUCTION TO TRANSLATION STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course serves as a foundation course for the professional translation certificate program, and for related fields. It deals with translation theory and the general problematics of the translation process, providing a theoretical framework for translation and systematically linking theory and practice.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

FR 1095 - FRENCH PROFESSIONAL TRANSLATION 1

Minimum Credits: 3
Maximum Credits: 3
Dans ce cours, nous nous concentrerons sur la structure du françois en privilégiant une approche descriptiviste (plutôt que normalisatrice). Alors, nous analyserons la langue françoise en tant que système qui s'impose aux locuteurs d'âme de s'en servir. Outre les analyses traditionnelles (phonétiques, phonologiques, morphologiques, syntaxiques, etc.) nous étudierons également la stylistique comparée. Car ce n'est qu'en maîtrisant les réalisations linguistiques des matrices de la langue française que nous éviterons les erreurs pragmatiques et sociolinguistiques que font la plupart des apprenants anglophones.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

FR 1098 - FRENCH LANGUAGE RIDER

Minimum Credits: 1
Maximum Credits: 3
Designed to accompany a main course taught in English with an FR designation, this 1-3 credit rider course provides students the opportunity to engage with principal course material in French. Students will read and study authentic documents in the target language pertinent to the main course subject matter. They will also have the chance to practice spontaneous and planned production skills in spoken French. Students must be enrolled in the main course to be eligible for the rider.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis

FR 1902 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 3
This course enables the student who has completed, or nearly completed, the French major to do research under the direction of a faculty member, on a topic of mutual interest.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

FR 1903 - HONORS DIRECTED RESEARCH: FRENCH MAJORS

Minimum Credits: 1
Maximum Credits: 3
This course is offered to French majors who have high academic achievement, both in French and in general. These students are invited by the French faculty to engage in a research project under the direction of a faculty member with whom they have previously studied at the advanced
undergraduate level.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies  
**Grade Component:** Letter Grade  
**Course Attributes:** West European Studies

**FR 1905 - INTERNSHIP IN FRENCH**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
The student will work in a job setting in which knowledge of French language and/or culture is useful.

**Academic Career:** Undergraduate  
**Course Component:** Internship  
**Grade Component:** LG/SNC Elective Basis  
**Course Attributes:** Undergraduate Internship, West European Studies

**FR 1907 - FRENCH UNDERGRADUATE TEACHING ASSISTANTSHIP**

**Minimum Credits:** 1  
**Maximum Credits:** 3  
This applied course in pedagogy is designed to provide advanced French majors the opportunity to share their knowledge, experience and passion for the French language and French-speaking cultures with underclassmen and students newer to the major. In concert with the faculty member teaching the course for which the French major will be the UTA, a list of duties will be discussed, among which may include: facilitating discussion groups or other collective fora, organizing tutorials and holding consultatory office hours, assisting faculty member in lesson planning, material(s) development and maintaining course Canvas sites and/or online document repositories for the course. Per the guidelines set by the Dietrich School of Arts and Sciences, French UTAs may not substitute teach for the faculty member, nor grade papers, quizzes or exams, nor assign any midterm or final grades, nor perform any work for the faculty member unrelated to the course in question. Faculty members under whom a French Major UTA works will meet regularly with said UTA throughout the term and provide guidance and support while articulating expectations clearly to the UTA. Attribution of credits (1-3) should be commensurate with the work to be performed and should be communicated to the UTA before the start of the term. Further details of the guidelines can be found on the Dietrich School's site.

**Academic Career:** Undergraduate  
**Course Component:** Internship  
**Grade Component:** LG/SNC Elective Basis

**FR 1909 - UNDERGRADUATE RESEARCH ASSISTANTSHIP**

**Minimum Credits:** 1  
**Maximum Credits:** 2  

**Freshman Program**

**FP 0001 - ACADEMIC FOUNDATIONS**

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Academic Foundations is designed especially for first-term students as an academic orientation to the Dietrich School of Arts and Sciences. Through class work and out-of-class activities, students will gain knowledge of the educational opportunities at the University, the cultural events on and off campus, and an understanding of what it means to be a college student.

**Academic Career:** Undergraduate  
**Course Component:** Seminar  
**Grade Component:** Satisfactory/No Credit  
**Course Requirements:** Enrollment will be blocked if currently enrolled in, or previously enrolled in FP 0002, 0003, 0004
FP 0002 - ACADEMIC FOUNDATIONS - ACADEMIC COMMUNITY

Minimum Credits: 1
Maximum Credits: 1
Academic Foundations - Academic Community is designed especially for first-term students enrolled in an Academic Community (AC). The course is an academic orientation to the Dietrich School of Arts and Sciences with a focus on the theme of the Academic Community. Through class work and out-of-class activities, students will gain knowledge of the educational opportunities at the University, the cultural events on and off campus, and an understanding of what it means to be a college student.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit
Course Requirements: Enrollment will be blocked if currently enrolled in, or previously enrolled in FP 0001, 0003, 0004

FP 0003 - FIRST-YEAR SEMINAR

Minimum Credits: 4
Maximum Credits: 4
First-Year Seminar (FP 0003) fulfills the Seminar in Composition requirement and includes Academic Foundations (FP 0001). Academic Foundations is designed especially for first-term students as an academic orientation to the Dietrich School of Arts and Sciences. Through class work and out-of-class activities, students will gain knowledge of the educational opportunities at the University, the cultural events on and off campus, and an understanding of what it means to be a college student. Additional meetings and activities will occur outside of class time.
Academic Career: FS
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: International Students required to take ENGCMP 0002 or 0003 or 0005 or 0010 or 0100 or 0150 or 0152 or ENG 0101 prior to enrollment; and Enrollment will be blocked if currently enrolled in FP 0001, 0002, 0004, or FP 0006

FP 0004 - ACADEMIC FOUNDATIONS - BRIDGES

Minimum Credits: 1
Maximum Credits: 1
Academic Foundations - BRIDGES is designed especially for first-term students participating in the BRIDGES program. Through class work and out-of-class activities, students will gain knowledge of the educational opportunities at the University, the cultural events on and off campus, and an understanding of what it means to be a college student.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit
Course Requirements: Enrollment will be blocked if currently enrolled in, or previously enrolled in FP 0001, 0002, 0003

FP 0006 - FIRST-YEAR SEMINAR

Minimum Credits: 3
Maximum Credits: 3
First-year Seminar (FP 0006) fulfills the seminar in composition requirement in the School of Arts and Sciences. This course uses readings, writing assignments, and discussions to explore a focused topic and examine ways in which high school and college-level writing differ.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: ENGCMP 0002 or 0003 or 0005 or 0010 or 0150 or 0152 or ENG 0101; TEST SCORE: SAT Verbal 560 or Higher or ACT English 24 or Higher; and Enrollment will be blocked if currently enrolled in FP 0003.

Gender, Sexuality, and Women's Studies
GSWS 0001 - GENDER AND LEADERSHIP

Minimum Credits: 1
Maximum Credits: 1

Students residing in the women lead LLC enroll in this course, which is a one-credit experiential course in the fall term. This seminar will expose students to information about women leaders and the challenges they experience during their ascension to, and acceptance of, various leadership positions. The course will include discussion, reflection, and attendance at speakers and events within the Pitt and Pittsburgh community.

Grade Component: Satisfactory/No Credit

GSWS 0100 - INTRODUCTION TO GENDER, SEXUALITY, AND WOMEN'S STUDIES

Minimum Credits: 3
Maximum Credits: 3

What is sex? What is gender? What is sexuality? How are these concepts related to culture? To nature? To help you answer these important questions, this course will introduce you to the exciting field of gender and sexuality studies. We will use a range of interdisciplinary concepts, tools, and methods to understand and analyze sex, gender, femininity, masculinity, and sexuality. Through readings, multimedia, and class discussion, we will study how gender and sexuality are socially and culturally constructed. In addition, we will consider how gender intersects with other identity categories such as race, class, ethnicity, nation, age, ability, and sexuality. Because we all have a gender and a sexuality, this course is crucial for any profession and for understanding the world around us. Taught in discussion-based sections, it is also a great opportunity for you to develop your written and oral skills. Also, you will learn to apply the critical vocabulary used in gender studies to other fields of study. The course is open to all students regardless of background and has no pre-requisite. As a prerequisite for more advanced courses in the GSWS program and as the intro course for current or future students in the GSWS major and minor, this course will prepare you for more advanced coursework. Check the individual section to determine whether the section is a 'W' section.

GSWS 0150 - GENDER IN THE PROFESSIONS

Minimum Credits: 3
Maximum Credits: 3

How are the goals and concerns of feminism relevant in a variety of workplaces? Why haven't women achieved equal pay for equal work, compared to men? What is unpaid labor, and why does it matter? Why should my organization create policies that support individuals regardless of gender identity, gender expression, and sexuality (and what do those terms mean, anyway)? To help you answer these important questions, this course will take an introductory, intersectional approach to gender in the professions. We will use a range of interdisciplinary concepts, tools, and methods to understand and analyze sex, gender, and sexuality as they relate to the world of work. Through readings, multimedia activities, and class discussion, students will develop tools to critically analyze the ways in which social and cultural forces shape us as gendered individuals and influence our career aspirations, professional interactions, and service experiences. In addition, we will consider how gender and sexuality intersect with other identity categories such as race, class, ethnicity, nationality, age, and ability. Because we all have a gender and a sexuality, this course is crucial for any profession and for understanding the world around us.

Academic Career: Undergraduate
Popular culture is often defined as a collection of ideas, images, beliefs and practices that have become an essential component of peoples' daily lives. While popular culture is dismissed by some as merely a mass consumer culture, others acknowledge that contemporary popular cultural forms may, in keeping with a history of once contemporary popular art, culture, and literature (e.g. Dickens, Warhol, etc.) Come to be understood as essential, canonical and elite. Ultimately, these materials may be read as texts that inform our understanding of culture and social life and prompt such questions as: how does popular culture (re)construct our sense of "ordinary" life as something extraordinary? Why are some cultural forms dismissed and others more readily accepted? What social processes bring cultural forms into the public domain? This course will examine popular culture in a variety of forms such as: music, art, television, collectibles, internet, and social media. Students will consider examples from Western, non-Western, and "global" culture, but will use sex and sexuality, gender, and ideas of race to understand the relationship between popular culture, material culture, representation, and consumerism, and power and resistance. It will also address these phenomenon over time. This course will make especially strong use of contemporary and popular media such as video clips, internet media and images, and music.

GSWS 0230 - INTRODUCTION TO LGBTQ STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to Lesbian, Gay, Bisexual, Trans and Queer (LGBTQ) Studies. Course readings will explore LGBTQ Studies from an interdisciplinary and intersectional perspective with a focus on how sexual orientation and gender shape human experience and access to privilege. Our work will foster a critical understanding of a range of issues in LGBTQ Studies, including LGBTQ as it relates to questions of sexual diversity, the legal history of LGBTQ lives, LGBTQ social movement, LGBTQ health, LGBTQ literature/art, LGBTQ history, global approaches to LGBTQ Studies, and theories and methods in LGBTQ studies. Students will choose a research topic in LGBTQ Studies and will develop a final paper that explores this topic using key concepts, theories, and methods in LGBTQ Studies. Final papers will also reflect on LGBTQ contributions to our understanding of human variation and diversity.

GSWS 0300 - SPECIAL TOPICS
Minimum Credits: 3
Maximum Credits: 3
This course will treat a specific topic in gender, sexuality, and/or women's studies.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: Gender, Sexuality & Women's Studies

GSWS 0400 - GENDER AND SCIENCE

Minimum Credits: 3
Maximum Credits: 3
This course focuses on the interaction of gender and sexuality with science, medicine, and technology. The goal of this course is to assist students in developing an understanding of the ways in which science has constructed our understanding of gender and sexuality since the nineteenth century, as well as the lived experiences of people within the scientific community who shape and navigate these concepts. To accomplish this goal, we will apply feminist theory, including feminist critiques of the history of medicine, psychology, and science, and gender theory, to an investigation of the evolution of scientific knowledge regarding gender and sexuality, as well as race, disability, and health. We will also explore the ways in which people, especially women, people of color, and transpeople have interacted with technology, shaped scientific discourse. In each course lecture and discussion, we will focus on a broad range of scientific fields, discourses, and narratives to construct a comprehensive understanding of the scientific knowledge and identity in the modern world. While the readings focus largely on American and Western examples and experiences, class discussions and presentations will expand the scope of this class considerably, allowing students to understand the global relationship of gender and science.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GSWS 0500 - INTRODUCTION TO FEMINIST THEORY

Minimum Credits: 3
Maximum Credits: 3
This course is an interdisciplinary introduction to the feminist ideas and debates concerning gender, women and men, and their political, social and economic positions over the last two hundred years. While we will focus on the United States, there will be some engagement with global feminist perspectives on gender, race, class, and sexuality. In keeping with the activist nature of feminist theory, this course will approach 'theory' as attempts to answer fundamental questions about the power relations that structure our everyday lives and consciousness. Theory in this sense is a tool for thinking systematically about how the world works, and for constructing arguments about how it should work. Consequently, we will pay particular attention to the (de)construction of power in both public and private relations as we critically analyze texts, discuss and present ideas in class, and complete written analyses. Students will have opportunities to apply feminist theories to their work in their home disciplines.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: DSAS Diversity General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement, Gender, Sexuality & Women's Studies, SCI Diversity General Ed. Requirements, SCI Polymathic Contexts: Ethical/Policy GE. Req., Writing Requirement Course

GSWS 0550 - SEX AND SEXUALITIES

Minimum Credits: 3
Maximum Credits: 3
How and why did sex and sexuality become subjects of study? How are our experiences of sex and sexuality shaped by a history of 'scientific' explorations of desire? Why has sexuality become so central to our understandings of identity? What was sex like before 'sexuality' was invented? This seminar explores these questions by approaching sex and sexuality as socially, historically, and culturally contingent concepts. We will consider sex and sexuality as they are related to other categories of identity, including race, class, ethnicity, nation, and ability. Our theoretical and historical investigations will create the groundwork for understanding and rethinking how sexuality is understood in culture today.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
GSWS 0600 - GLOBAL LGBTQ LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course will survey global LGBTQ literature. We will read novels, short stories, poetry, and/or plays from a variety of different locations with a strong focus on non-Western texts. We will also read key works in literary analysis, LGBTQ theory, postcolonial theory, critical race studies, and global studies. The variety of reading will allow us to engage with different approaches to LGBTQ literature, and it will introduce you to the various ways that nation and culture shape literary production. Students will be able to identify key methods in literary analysis upon completion of the course. Seminar discussions will focus on the use of key terms and theories as well as the development of research skills so that students will be prepared to produce written research on global LGBTQ literature.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

GSWS 1130 - GENDERED BODIES

Minimum Credits: 3
Maximum Credits: 3
For centuries, the biological sciences have embraced the human body as a product of nature in need of study, measurement, and treatment. Much of this knowledge has contributed to discourses of "normal" and "healthy" bodies. However, contemporary social science and feminist perspectives offer alternative readings of the human body as a social construction based upon cultural conventions and perceptions of gender, race, class, and sexuality. As Lorber and others have argued, "the result is a gendered body, produced for a gendered social world." This class will examine a wide variety of gendered social constructions of the human body at work, in sports, and in media images that reflect standards and ideals of "beauty," "health" and "deviance." We will also consider the meaning of gendered bodies in light of contemporary technologies - such as plastic surgery, steroids, infertility treatments - that help to reveal the ways in which males, females, and "others" become "men" and "women."

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GSWS 1140 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
This upper-level course addresses a current topic in gender, sexuality, or women's studies. Topic varies by instructor.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GSWS 0100 or 0200 or 0500 or 0550; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Gender, Sexuality & Women's Studies, Writing Requirement Course

GSWS 1141 - SPECIAL TOPICS IN GENDER, SEXUALITY, AND WOMEN'S STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course will treat a specific topic in gender, sexuality, and/or women's studies.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Gender, Sexuality & Women's St
GSWS 1150 - TRANSNATIONAL FEMINISMS

Minimum Credits: 3  
Maximum Credits: 3  
This class will look at the situation of women in international perspective. We will examine how feminist organizations operate in difficult national and local contexts and how women's rights have been addressed through international organizations such as the United Nations and the World Court. Through case studies, we will consider a number of contentious issues in global feminism, including sexual assault, sex tourism, and the global assembly line, and the role of feminism in national liberation movements.

Academic Career: Undergraduate

Course Attributes: Asian Studies, Gender, Sexuality & Women's Studies, Global Studies, SCI Polymathic Contexts: Global&Cross Cul GE. Req.

GSWS 1170 - QUEER THEORY

Minimum Credits: 3  
Maximum Credits: 3  
This course is an introduction to theories of how people think about and enact genders and sexualities. The course edits both the assumption that people are naturally or normally heterosexual and the idea that being seen as "normal" should be the political or personal goal of sexual minorities. The course calls into question the idea of normal exploring how gender aims to "normalize" people by categorizing them. In recognizing the ruse of normality, the course examines sexual practices and gender expressions not attempting to dignify, deny or apologize for them.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Gender, Sexuality & Women's Studies

GSWS 1180 - POLITICS OF GENDER AND FOOD

Minimum Credits: 3  
Maximum Credits: 3  
Food is sustenance and absolutely essential to life. But food is never simply about nutrition. Because it is fundamental to the human experience, food is also a medium for the expression of culture and social identity. Moreover, food relays complex social messages about gender, sexuality, and family. Consequently, food is also a means for expressing the social and symbolic use of power and control in which social inequalities are expressed in culinary forms. This course will examine food from the vantage point of gendered systems of production, distribution, and consumption as we consider: How does your food come to your table (or not) and what are the political implications of personal tastes? By the end of this course, students will be able to: 1) apply anthropological and feminist theories to food and eating in a cross-cultural perspective; 2) understand how gender, race and class influence our access to and perspective on food; and 3) make connections between eating and cultural identities and beliefs.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  

GSWS 1190 - MASCULINITIES

Minimum Credits: 3  
Maximum Credits: 3  
An interdisciplinary examination of theories and select cultural constructs of masculinity, as related to and distinct from male bodies. Masculinity will be considered in its relation to race, ethnicity, nation, class, ability, and sex. Readings will likely come from literary studies, film studies, cultural studies, sociology, anthropology, linguistics, history, and other fields.

Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: GSWS 0100 or GSWS 0500 or GSWS 0550 or Instructor Consent  
Course Attributes: DSAS Diversity General Ed. Requirement, Gender, Sexuality & Women's Studies, SCI Diversity General Ed. Requirements
GSWS 1200 - TRANSGENDER STUDIES

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the interdisciplinary field of transgender studies. The course is first and foremost about trans contributions to our shifting understandings of sex, gender, identity, and the body in theory, culture, art, psychology, science, and activism. Some of the topics we will examine include: the history and emergence of transgender theory, global understandings of trans issues, feminist/queer encounters with trans theories, the politics of trans visibility, and trans lives in film and literature. The course will cover major topics within the discipline, including queer/trans "border wars," intersectional approaches in trans theory, the various meanings and uses of "trans" in different disciplines, and the relationship between trans theories and existing models of sex, gender, and sexuality. We'll pay close attention to how transgender studies has challenged and/or enhanced thinking in feminist and queer theory.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GSWS 0100 or GSWS 0200 or GSWS 0500 or GSWS 0550 or Instructor Consent

GSWS 1210 - GENDER AND THE DIGITAL

Minimum Credits: 3
Maximum Credits: 3
This course will explore the relationship between identity, media, and digital culture, specifically how gender is constructed and contested through forms of media. Students will consider how media also informs notions of race, class, sexuality, religion, and ethnicity, among other identity markers. This course will rely on thoughtful and academically stimulating analyses of media, such as television, film, music, advertising, online spaces, video games, among others, and in various combinations.
Academic Career: Undergraduate

GSWS 1220 - WOMEN OF COLOR FEMINISM

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

GSWS 1230 - GENDER AND MEDICINE

Minimum Credits: 3
Maximum Credits: 3
In this course, we will explore the ways in which modern, western medicine creates, and organizes, and studies gender, sex, race, and class, as well as the historical and theoretical/philosophical concepts that underpin these categories. We will also consider how identity and privilege shape the relationship between medical professionals and those seeking care, and how the study of medical humanities can improve and enrich those relationships. Using historic texts, medical resources, and feminist critiques of science and medicine, we will query how notions of health and illness have evolved over time and in specific historic moments, questioning the construction of medical diagnoses, research methods and ethics, and the implications of data gaps in medicine. Each class will be structured around a series of questions that provide students an opportunity to apply prior knowledge and developing research skills to describe the evolution of medical knowledge, the medical profession, and its impact on culture, activism, and feminist theory.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

GSWS 1280 - TRANSTATIONAL SEXUAL POLITICS
Minimum Credits: 3
Maximum Credits: 3
This course develops students' understanding of diversity and global issues in relation to sexuality and sexual identities in a transnational context. More than just assuming that sexuality and sexual identities are stable across different historic periods and geo-political contexts, this course approaches sexuality and sexual politics from the perspective that there are diverse ways that people express their sexuality across time and place, and that these expressions are embedded in politics of contestation, resistance, and liberation connected to histories of colonialism and contemporary conditions of globalization. Looking at social movements, global conflicts, violence, activism, and socio-legal frameworks, the course investigates how sexuality, sexual identities, and sexual politics are much more diverse across the globe than popularly understood. Looking specifically at the relationship between sexuality and colonialism, race and racialization, gender identity, ethnicity, globalization, neoliberalism, and citizenship, the course introduces students to texts that interrogate the assumption that sexuality is stable, coherent, or universal; instead, these texts argue that sexuality is diverse across history and geography, and a key facet of both human self-expression and global politics.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

GSWS 1300 - WANDERLUST: SEX & GENDER IN GLOBAL TOURISM

Minimum Credits: 3
Maximum Credits: 3
Tourism is among one of the world's largest industries, generating trillions of dollars in revenues and employing millions. It is heavily relied upon as an economic strategy for developing countries. This course will examine the gendered cultural practices of travel and the impact tourism has on both host and guest communities. Leisure activities were once deemed unimportant topics for study. However, tourism has been a central dimension of globalization, and it can be used as a lens to reflect on many questions about identity and heritage, commoditization, historical and cultural representation, authenticity and ownership, neoliberalism, inequality, gender relations, environmental sustainability, and more. We will examine various forms of tourism, including, but not limited to: ethnic, historical, regional, and ecotourism. We will pay close attention to health and medical tourism, a growing phenomenon in today's global world. Themes of the gaze, authenticity, identity, consumption, ritual, borders, and pilgrimage will be considered throughout the term especially with regard to the ways in which they simultaneously draw upon and reconstruct notions of the "Other" that are built upon social constructions of gender, race, class, sexuality, age, ability, etc. There are no prerequisites for this course, although GSWS 0100: Introduction to Gender, Sexuality, and Women's Studies; GSWS 0500: Introduction to Feminist Theory; or another course on gender is recommended.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

GSWS 1450 - GENDER AND SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
This course will critically analyze sustainability from gendered perspectives. It will take a three-pronged approach to the study of sustainability and gender, engaging with the economic, social, and environmental components that contribute to our understandings of sustainability and sustainable development. Through readings, written assignments, and class discussions, students will examine the intersectionality of gender and sustainability with class, race, ability, age, nationality, religion, power, politics, social movements, and health from local and global perspectives. Students will critique practical applications of sustainable development and the role of gender in creating a more sustainable future. Taking an interdisciplinary approach, this course will draw on perspectives from anthropology, sociology, environmental studies, gender and development, human geography, public and international affairs, political science, economics, engineering, geology, business, urban studies, and a range of health sciences. Students will have the opportunity to learn about gender and sustainability through case study analyses stemming from a variety of geographic regions. There are no prerequisites for this course, although GSWS 0100 Introduction to Gender, Sexuality and Women's Studies, GSWS 0500 Introduction to Feminist Theory or another course on gender is recommended.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
GSWS 1460 - GENDER, SEXUALITY, AND CHILDHOOD IN A GLOBAL CONTEXT

Minimum Credits: 3
Maximum Credits: 3
Although childhood is often conflated with a biological category based on an immature body, in reality it is much more. Instead, this course examines the ways in which childhood is a discursive and continuously shifting category, one that changes across time and place. This course will introduce students to the study of children and childhood in a cross-cultural context and will pay particular attention to the ways in which notions of childhood, and the experience of being a child, draw from and reproduce understandings of gender and sexuality as they intersect with race, class, ethnicity, etc. Through readings, lectures, and films, we will also consider the meaning of gendered childhoods in light of contemporary forms of conception, children's culture (media, toys and artifacts, stories), child labor and play, and ritual and coming of age ceremonies. An analysis of these contemporary phenomenon highlight local and regional notions of childhood and their intersection with broader global patterns. In addition to lectures, a portion of each class will be devoted to group discussions in which students are encourage to engage with the course readings. Students will give presentations and assist with discussion facilitation. We will also view films. Evaluations will be based on the student's participation in these discussions, as well as two exams, and a series of four writing assignments.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis

GSWS 1470 - GENDER & CITIZENSHIP IN EUROPE

Minimum Credits: 3
Maximum Credits: 3
This Study Abroad course analyses women's claims for citizenship throughout twentieth and early twenty-first century Europe from a variety of perspectives. By 1945, the majority of women in Europe had been enfranchised, yet as women demanded to exercise the rights of citizenship, they frequently faced limitations upon their rights as citizens based on gender. This course charts the ways in which women have adapted to and attempted to challenge the ideological, political and material conditions of citizenship in modern Europe. Topics to be examined include: women's political activism; citizenship and warfare; consumer citizenship; sexuality and reproductive rights; and citizenship within the context of multicultural society. Classes are arranged both chronologically and thematically, and will combine contextual lectures, seminars, and presentations in order to facilitate discussion. The course is organized around three key themes: Women, Regulation and the State; Gender Discourses; and Citizenship and Women's Activism. Each of these themes is designed to allow students to engage with a wide array of historical and contemporary sources including: personal narratives, political essays, representations of women in art, fiction, and the contemporary media, and a variety of field studies based in London.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GSWS 1610 - QUEER AND FEMINIST MEDIA ART

Minimum Credits: 3
Maximum Credits: 3
This course develops students' understanding of diversity and will build that understanding through the production of creative work relating to media art that is focused on gender and sexuality. Looking at the different ways that people express their gender and sexuality using media - including but not limited to: video and film, digital media, images, analog media, etc. - this course surveys the diverse ways that people express their sexuality and gender through creative expressions that are also connected to social change, resistance, and difference. Surveying a wide range of queer and feminist media, the course asks students to examine the relationship between gender, sexuality and colonialism, race and racialization, ethnicity, globalization, religion, and nationalism through the formats of creative expression. The course draws heavily on building creative assignments on topics relating to gender and sexuality, including self-reflexive projects that ask students to think about their own relationship to these categories through creative mediums. Class assignments are designed to connect analytic tools from readings and class analysis of media objects to the creative process of making media art works. Students will also create art works in the class, such as making their own animated GIF, a performance video, and a final media project, all paired with reflexive writing assignments.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

GSWS 1692 - LGBTQ IN THE USA
Minimum Credits: 3
Maximum Credits: 3
With growing contemporary interest in LGBTQIA issues and student activism surrounding gender identity and sexuality, this course provides necessary historical context for understanding such political and cultural phenomena in 20th-century U.S. history. It charts the trajectory of different identities and sexualities (too often classified as transgressive or deviant) from the beginning of the century through post-World War II efforts to seek greater freedom and inclusion in American society.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GSWS 1715 - FEEDING THE SOUL: FOOD, GENDER AND RELIGION

Minimum Credits: 3
Maximum Credits: 3
Food is sustenance and absolutely essential to life. But food is never simply about nutrition. Because it is fundamental to the human experience, food is also a medium for the expression of culture and social identity. Moreover, food relays complex social messages about gender, sexuality, and family. This course will examine and reflect upon these aspects of culture by exploring the particular relationship between religion, gender, and food in cross-cultural perspective as we investigate the role of feasting, fasting, food taboos, diets, etc. and their relationship to notions of spirituality. We will pay particular attention to regions of Asia, the Middle-East, Latin America, the Caribbean, and indigenous and marginalized peoples.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

GSWS 1900 - INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
An opportunity to extend academic training to a practical work experience in an area where the student has gained some expertise.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Requirements: PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006) *Applies to all WRIT Courses*
Course Attributes: Gender, Sexuality & Women's Studies, Writing Requirement Course

GSWS 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 3
A variety of individual research and reading projects may be undertaken under the supervision of a core faculty member.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: Letter Grade
Course Attributes: Gender, Sexuality & Women's Studies

GSWS 1902 - UNDERGRADUATE RESEARCH

Minimum Credits: 1
Maximum Credits: 3
Undergraduate students engage in research projects under the direction of a core faculty member. Consent of instructor required.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

GSWS 1910 - CAPSTONE
Minimum Credits: 3
Maximum Credits: 3
Designed as a capstone, this course is a seminar that allows students to explore feminist theory and methodology in greater depth. We will pay particular attention to the current state of feminist theory as we consider future directions and challenges, and address the ways in which feminist theories and methodologies can inform research in other disciplines. Students will respond to a series of intense readings that focus on the intersections of feminist theory with other theoretical approaches, such as queer theory, environmental ethics, and critical race theory, among others. Using this theoretical foundation, students will construct a research project of their own design that will apply academic work to a "real world" setting and prepare students for careers and/or graduate study.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GWS 0100 or 0500
Course Attributes: Capstone Course, Gender, Sexuality & Women's Studies

Geology

GEOL 0008 - ENVIRONMENTAL SCIENCE, FRENCH TRAILER

Minimum Credits: 1
Maximum Credits: 1
A one credit French Language Trailer where we'll discuss the UN sustainability development goals related to GEOL 0840: Environmental Science topics. We'll focus on French vocabulary related to sustainability, air pollution, water pollution, environmental justice, and climate change. Class discussion/activities will be primarily in English. Readings for discussion will be in French with a target audience of policymakers or the public. Students should have taken the equivalent of two-years of high school French or of French 102 at Pitt, or have permission of the instructor to enroll.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit

GEOL 0055 - GEOLOGY LABORATORY

Minimum Credits: 2
Maximum Credits: 2
The course consists of a laboratory structured to give students an overview as well as hands-on experience with the methodology used by earth scientists to study geologic processes.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: CREQ: GEOL 0800 or 0820 or 0860 or 0840

GEOL 0060 - HISTORY OF THE EARTH

Minimum Credits: 4
Maximum Credits: 4
This course surveys the evolution of the earth and its inhabitants from its origins to the present. Lectures and lab emphasize the identification and interpretation of rocks, geologic features, and geologic maps. Lab work also includes fossil identification, stratigraphic correlation, and sedimentary facies analysis.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 0055

GEOL 0800 - GEOLOGY
Geology is the study of how the earth works. This class covers the classification and origin of basic rocks and minerals; examines the role of plate tectonics in shaping the earth and producing such hazards as earthquakes and volcanoes; and examines the forces that shape beaches and rivers and sometimes threaten our lives and property. We also survey the evidence for changing climate and the future of such resources as groundwater, fossil fuels, and ores.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 0802 - GEOLOGY OF THE NATIONAL PARKS

The magnificent scenery of the national parks provides a backdrop to an exploration of the basic geological principles that govern the creation and development of landscapes. The geological history of the North American continent will be explored in order to provide a framework in which to understand the development of the landscapes of our country.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 0820 - NATURAL DISASTERS

The geologic, hydrologic and atmospheric processes that impact the human environment in catastrophic ways are examined in this course. Natural disasters surveys energy cycles, plate tectonics with an emphasis on how they produce earthquakes, volcanic eruptions, tornadoes, hurricanes, tsunamis, wildfires, flooding, landslides, climate change and mass extinctions. Students will get hands on experience in recitation. This course serves as an introductory course for three majors in geology and planetary science.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 0840 - ENVIRONMENTAL SCIENCE

This class is an interdisciplinary introduction to the science underlying environmental issues. Focusing on the principles of geology, biology, and chemistry and in their application to human impacts on the environment, strategies for sustainable management of environment and natural resources, and global change.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 0850 - NATURAL SCIENCES 1

This 2-semester course will present non-science majors with a comprehensive picture of the natural world. Topics will include: the solar system; laws of motion; energy; structure of matter; the earth; cosmology; the science of living things; the living cell; genetics; evolution. Emphasis will be on fundamental concepts that underlie our present understanding. Connections will be made to historical developments and to scientific and technological issues that impact individuals and society.
GEOL 0860 - ENVIRONMENTAL GEOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course takes an integrated earth systems approach to understanding our planet and its resources. We will investigate geologic processes and hazards (e.g., earthquakes, volcanoes, landslides, and weather hazards), geologic resources (water, soil, minerals, energy) and the local and global ramifications of human interaction with the earth (e.g., air, soil and water pollution, ozone depletion, and climate change). This course also serves as an introductory course for three majors in the department of geology and planetary science.

GEOL 0870 - THE PLANETS

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the worlds of our solar system. We will make extensive use of the most recent and dramatic images to discuss the nature, origin, and history of the planets and moons of our solar system.

GEOL 0871 - INTELLIGENT LIFE IN THE UNIVERSE

Minimum Credits: 3
Maximum Credits: 3
This course attempts to answer the question of whether intelligent life exists elsewhere in the galaxy by considerations of the origin and subsequent evolution of the universe, our solar system, terrestrial life, and the human species.

GEOL 0890 - OCEANOGRAPHY

Minimum Credits: 3
Maximum Credits: 3
The oceans play a central role in global climate and supporting a stunning diversity of life. This survey of oceanography examine the major physical, chemical, and biological processes that shape the modern oceans and the life they contain.

GEOL 1001 - MINERALOGY

Minimum Credits: 4
Maximum Credits: 4
Physics and chemistry of minerals. Includes physical properties, crystal chemistry, crystal structure and symmetry, mineral identification using a petrographic microscope, and the processes of mineral formation and breakdown.
GEOL 1002 - HUMAN DRIVEN GLOBAL CHANGE

Minimum Credits: 3
Maximum Credits: 3
This course is an introduction to the quantification of human activities and human environmental impacts that form the basis for scientific inquiry in the ‘Anthropocene.’ The course will emphasize both reconstruction of early human activities from environmental records (e.g., the advent of soil erosion or mining from sediment records) and analysis and interpretation of modern ‘big-data’ resources (e.g., transformation of census records to chemical fluxes). Class examples and problems will focus on policy relevant facets of human activities, ranging from nutrient budgets to carbon dynamics to water and sediment fluxes.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: CHEM 0110 and GEOL 0055

GEOL 1003 - IGNEOUS & METAMORPHIC PETROLOGY

Minimum Credits: 4
Maximum Credits: 4
A lecture and laboratory course concerned with a study of the origin, occurrence, identification, and classification of igneous and metamorphic rocks. The primary purpose of the course is to familiarize the student with the physical and chemical processes that control the formation of the main igneous and metamorphic rock types.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 1001

GEOL 1006 - ENVIRONMENTAL MODELING

Minimum Credits: 3
Maximum Credits: 3
Models allow scientists and others to represent features and behaviors of environmental systems in order to promote inquiry, develop insight, test hypotheses, and consider solutions to problems. The class will use primary literature and hands on experiences with computer models to introduce environmentally relevant modeling tools. Topics covered will include process-based models of disease, climate, ice, ecosystems, ecosystem services, hydrology, predator-prey systems, and competition among species for resources. Students will have the opportunity to conduct original research projects either by developing their own environmental model or by using existing models. No programming experience is required. Students should have some upper level undergraduate coursework in environmental studies, science, biology, geology, physics or chemistry and be comfortable thinking quantitatively.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: GEOL 1001

GEOL 1015 - GEOLOGY COLLOQUIUM

Minimum Credits: 1
Maximum Credits: 1
Geology colloquium is open to undergraduate students in geology and planetary science. It is a formalization of the seminar series with weekly guest speakers from industry, academia and government. Each seminar will focus on a different research topic in earth sciences describing on-going projects of interest to students. The course may be taken multiple times.

Academic Career: Undergraduate
GEOL 1020 - SEDIMENTOLOGY AND STRATIGRAPHY

Minimum Credits: 4
Maximum Credits: 4
Sedimentology is the study of the processes that produce modern and ancient sedimentary deposits. The lectures will focus on a variety of modern sedimentary systems (rivers, deltas, beaches, etc.) As well as their ancient equivalents. The class culminates with an exploration of how long-term changes in sediment supply and sea level act to shape regional-scale sedimentary sequences. The lab focuses on rock identification and interpretation and on a variety of stratigraphic problems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 0055 or 1001

GEOL 1030 - THE ATMOSPHERE, OCEANS AND CLIMATE

Minimum Credits: 3
Maximum Credits: 3
This course will examine the atmospheric and oceanic interactions that determine the nature of the global climate system. Specifically, the course will explore the origin, evolution, and structure of the earth's oceans and atmosphere, the earth's energy balance, atmospheric circulation patterns, and surface and deep ocean currents. The course will also consider records of past climate, evidence for recent warming, climate change projections, and climate change policy.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies

GEOL 1045 - STATISTICS FOR EARTH SCIENCE

Minimum Credits: 3
Maximum Credits: 3
A statistics course geared toward environmental science and geology majors with an emphasis on applying data analysis and statistical techniques to environmental data. Topics will include: visualizing data, summary statistics, correlation, selected parametric statistics (t-tests, general linear models), selected non-parametric methods, statistical inference, and experimental design.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: STAT 0200 or STAT 0800 or STAT 1000 or STAT 1100

GEOL 1050 - SURFACE WATER HYDROLOGY

Minimum Credits: 4
Maximum Credits: 4
This course shall provide an Earth systems science overview of the processes that govern the hydrologic cycle including precipitation, evapotranspiration, runoff and discharge, infiltration, and groundwater. The course shall emphasize the movement of water through the atmosphere, over the land surface, and within the unsaturated and saturated zones.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: (GEOL 0800 or 0820 or 0840) and (MATH 0120 or 0220)

GEOL 1051 - GROUNDWATER GEOLOGY

1385
This course focuses on physical and chemical processes controlling water movement and composition in sub-surface environments. The lab focuses on practical field methods for the characterization of groundwater.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: GEOL 0055 and CHEM 0110 and (MATH 0120 or MATH 0220)

### GEOL 1052 - PALEOCLIMATOLOGY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents the different types of data used to study the earth's climatic history and long-term climatic variability. Particular emphasis is given to the climatic changes during the late Cenozoic -- the so called glacial ages. Topics of discussion include time scales of climatic change, types of paleoclimatic records and their limitations, numerical climate models, the causes of climatic change, and the importance of paleoclimatic research in forecasting the future.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PREQ: GEOL 0055

### GEOL 1055 - ENVIRONMENTAL ETHICS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course asks students to evaluate environmental decision-making, land-management, and use of natural resources by investigating the underlying assumptions of discussions with in the fields of science, management, economics, law, religion and public policy on the environment. Throughout the semester, we will discuss our historical and current day evolution toward Land Ethic.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)  
**Course Attributes:** SCI Polymathic Contexts: Global&Cross Cul GE. Req.

### GEOL 1056 - UHC ENVIRONMENTAL ETHICS, SCIENCE AND PUBLIC POLICY

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course examines the interrelationships among environmental science, ethics, and policy. It covers such topics as origin and development of the environmental movement, environmental values and attitudes, enactment and mechanics of environmental regulations and statutes, environmental economics and politics, and future environmental scenarios.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis  
**Course Requirements:** PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)  
**Course Attributes:** Capstone Course, University Honors Course

### GEOL 1060 - GEOMORPHOLOGY

**Minimum Credits:** 4  
**Maximum Credits:** 4  
This course is a survey of the major landform features found on the earth's surface. Each landform type is first described qualitatively and then examined in terms of the processes, such as stream flow or glacial activity, which cause its development. The purpose of the course is to familiarize
students with geomorphic principles.

GEOL 1062 - GEOMORPHOLOGY: DYNAMIC EVOLUTION OF EARTH'S SURFACE

Minimum Credits: 4  
Maximum Credits: 4  
This course aims to introduce students to the geomorphologic processes that shape the surface of Earth, the physical mechanisms by which they operate, and the landforms they create. It will combine qualitative and quantitative descriptions of land-shaping processes such as river erosion, glaciers motion, and landslides. The course builds on in class discussions and assignments to train students in applying basic physical and mathematical tools to explore geomorphological processes.

GEOL 1100 - STRUCTURAL GEOLOGY

Minimum Credits: 4  
Maximum Credits: 4  
A course devoted to the study of folded, faulted, flowed, sheared, and jointed rocks with the aim of preparing a student to recognize and interpret deformed rocks. The evolution of mountain belts and deformation related to this process are emphasized.

GEOL 1240 - VERTEBRATE PALEONTOLOGY

Minimum Credits: 3  
Maximum Credits: 3  
This class focuses on the evolution and extinction of the vertebrates. We will first examine the normal processes of evolution and extinction and how they are reflected in the fossil record. We will then begin a tour of the fossil record supplemented as necessary with insights from living organisms. We will begin our deep dive into the past by examining what is known about the origin of our phylum. We will then survey the amazing diversity of fishes, amphibians, mammal-like reptiles, dinosaurs, and mammals over the next half billion years. We will focus throughout on transitional fossils and the various processes that have driven evolution and extinction over time.

GEOL 1300 - ENVIRONMENTAL EDUCATION FOR SOCIAL CHANGE

Minimum Credits: 3  
Maximum Credits: 3  
Earth's human population has reached 7.5 billion and continues to grow rapidly. As concerns heighten over the ability of the planet to support and sustain life, it is becoming ever more important that we understand the crucial relationship between nature and society. This course seeks to use South Africa, one of the most culturally and environmentally diverse countries in the world, as an outdoor classroom to highlight the challenges, solutions and negotiations that are central to sustaining life on Earth. By immersing students in diverse communities that showcase unique perspectives, facilitating real-world experiences, actively engaging with South African citizens including students, this course will provide participants with skills, experiences and diverse perspectives that are crucial to supporting innovative problem solving and decision-making long after the course is over. By taking this course, students will have the opportunity to use one of the most culturally and environmentally diverse countries in the world, South Africa, to: o Actively engage with a variety of South African communities to enhance critical assessment of globally-relevant social and environmental challenges Examine the multiple ways in which socio-environmental challenges impact different cultures Reflect upon how culture and traditions impact environmental education and social change in urban spaces (e.g. Cape Town, South Africa and Pittsburgh,
GEOL 1307 - SUSTAINABLE FOOD SYSTEMS

Minimum Credits: 3
Maximum Credits: 3

Our food system is a multifaceted network of interconnected systems and relationships. In order to be able to feed ourselves well into the future, it must be sustainable. A sustainable food system is a system in which healthy food is provided to people while balancing the environmental, social and economic impacts. These dynamics force stakeholders to confront synergies and tradeoffs in agricultural practices, harvesting, transportation, manufacturing and distribution, healthy diets, and a reduction in wasted food.

GEOL 1308 - SUSTAINABLE AGRICULTURE AND FOOD SYSTEMS

Minimum Credits: 3
Maximum Credits: 3

This is an interdisciplinary course that examines the environmental, social, and economic dimensions of agriculture, and relevant emerging challenges involving climate change, and resource depletion and degradation, particularly in tropical environments. It treats the Green Revolution, capital intensive/high-input practices, and corporate agriculture. Students will learn about the implications of "conventional" agriculture for the environmental protection, and food systems, security, and sovereignty. Additionally, students will explore the principles and practice of alternatives, including integrated crop and pest management, agroforestry, permaculture, plus organic, sustainable, and "climate smart" agriculture. Using a framework of "systems thinking", and drawing analogies between agricultural and ecological systems, the course explores the multiple drivers, inputs, and outputs of agricultural production and trade. Students will have firsthand, immersive experiences with production systems that are wide-ranging, and will explore the costs and benefits of each, through the lens the environment, economy, and society.

GEOL 1309 - LIMNOLOGY

Minimum Credits: 3
Maximum Credits: 3

This course will explore the physicochemical and geological aspects of inland waters (lakes, rivers, springs, and wetlands). Specifically, the course will examine the origin and evolution of lakes, the physical and chemical properties of fresh and saline waters, watershed hydrology, and the biogeochemical cycling of major elements and nutrients.

GEOL 1312 - ENVIRONMENTAL LAW AND POLICY

Minimum Credits: 3
Maximum Credits: 3

The survey course will examine the role of law and policy in regulating human impact on the environment. Topics include the history and development of U.S. environmental law; theoretical approaches to environmental protection; mechanisms employed in environmental laws and regulation; the roles of the legislative, executive, and judicial branches of government in developing and implementing environmental law and
policy; an overview of the principal environmental laws at the federal and state levels; the role of citizens in development and enforcement of environmental law; and constitutional constraints on government authority.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 1313 - COM ENVIRONMENTAL PROFESSIONALS

Minimum Credits: 3
Maximum Credits: 3
This course serves as a w-course for environmental studies. We will sample various tools and methods (typical "professional" tasks such as memos and letters, building into comprehensive assignments such as case studies), all while concentrating on how audience and purpose affect communication.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 1314 - PEOPLE, PLACE AND CULTURE: ENVIRONMENTAL DEBATES IN AUSTRALIA, NEW ZEALAND AND THE PACIFIC

Minimum Credits: 3
Maximum Credits: 3
This course explores the multi-faceted dimensions of human interaction with diverse environments in Australia, New Zealand and the Pacific to illuminate the origins of environmental concerns and current debates in these regions from pre-European contact to now. From the peopling of the Pacific to the challenge of climate change, this course is broad in its scope while concentrating on selected issues such as the impact of mining, clean energy futures, our vulnerability to 'natural' disasters and increasing urbanization. In so doing, the intersection of culture and nature is explored. The course is embedded in the environmental humanities, but uses the approaches of environmental history, as well as insights from the disciplines of science, politics, sociology and cultural studies.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Study Abroad

GEOL 1315 - COMMUNICATION IN GEOSCIENCES/WRIT REQUIREMENT

Minimum Credits: 3
Maximum Credits: 3
This class is perfect preparation for undergraduate research or graduate school. It will introduce students to the main scientific journals, how to read and assimilate the scientific literature, discuss how to give oral presentations, and address how to write clear scientific papers. Students will also explore topics of potential interest that they either propose or select from a provided list.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: GEOL 0060 or 1003 or 1020 or 1030 or 1051 or 1060 or 1515 or 1100 or 1641; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGLFM 0210 or FP (0003 or 0006); PLAN: Environ-Geology (BS, BPH) or Environ-Studies (BA, BPH) or Geology (BS, BPH) or Environ-Science (BS)
Course Attributes: Writing Requirement Course

GEOL 1330 - SUSTAINABILITY FLASH LAB

Minimum Credits: 3
Maximum Credits: 3
Sustainability involves a systems approach. By exploring the inputs and outputs of energy and resources, we will ask broad questions: How do we
measure production and consumption? How do geographical and socio-economic environments affect these things? How do we go beyond traditional measurements to quantify more comprehensive impacts and life-cycles? Answering these larger questions begins on a smaller, very specific, and personal scale: Where you live, and how you live. By examining and measuring resource use (including electricity, water and sewage, garbage and recycling, energy use, and transportation), we trace inputs and outputs to their source/destination, and begin to unravel and understand the complex web of production, distribution, delivery, and environmental consequences. We will investigate how these metrics change due to location and societal practices, as well as changes created through conservation and public policy. Eventually, it is the aim of this course to also reflect, at cultural and philosophical levels, on our energy/resource usage and underlying causalities thereof.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 1331 - HEALTH AND SAFETY (HAZWOPER)

Minimum Credits: 3
Maximum Credits: 3
Hazwoper (hazardous waste operations and emergency response) is a 40-hour course that promotes awareness of safety and response plans for those who may work with chemical and other hazards in the work-site. Students will learn how hazardous materials are handled and identified; human responses to exposure; learn what to do in case of site emergencies; use appropriate safety methods and work practice controls; and understand labels that are used to alert personnel of danger involving hazardous material. (Many employers in environmental consulting firms and other industries require 40-hour osha training.) The course will count as an elective in the environmental studies major.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1332 - ENVIRONMENTAL ADVOCACY AND ACTION

Minimum Credits: 3
Maximum Credits: 3
Environmental Advocacy is much more than simply advocating. To be effective, you must also take Action, and although "enthusiasm" goes a long way, volunteers and professionals alike need a wide range of skills in order to make a lasting impact. This includes planning successful events, running effective meetings, communicating science, writing grants, accounting & mind-numbing IRS paperwork, avoiding burn-out, and dealing with the media, volunteers, government and people who don't agree with you. It can be overwhelming even to those who know what to expect! And don't forget about the actual goal: Making a difference. This course covers the "inner workings" of environmental advocacy. We go beyond the slogans, logos, direct mail, and big events to study what's behind the nonprofit world, what it takes to succeed at the grassroots. Speakers from the Pittsburgh environmental community will share their experiences, concerns, and perspectives most weeks, and a wide range of readings and assignments are designed not only to have students take a deep look, but to experience some of this world, too.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1333 - SUSTAINABILITY

Minimum Credits: 3
Maximum Credits: 3
Sustainability is a term that has many meanings, depending on who's using it, and we will cover most of them in this class, from green campuses to green-washing. The class features guest speakers from the academic, governmental, nonprofit and business sectors to offer as many perspectives as possible on sustainability topics. The real focus of the class, though, is the development of sustainability projects on campus and in the Pittsburgh community. Students also participate in sustainability-related events and field trips with the opportunity to present their work to a larger audience at the end of the semester.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
**Course Requirements:** PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1335 - ENVIRONMENTAL ISSUES: AIR QUALITY

Minimum Credits: 3  
Maximum Credits: 3  
Pittsburgh has had a checkered past when it comes to air quality issues, and faces an uncertain future. Once known as "hell with the lid off" due to industrial emissions, Pittsburgh and its environs once had some of the worst air in the nation. In 1948, a noxious cloud killed 22 in nearby Donora and sickened thousands. But Pittsburgh also became one of the first American cities to pass legislation aimed at cleaning its air. Today it faces a new threat from emissions from coal-burning utilities in Ohio and west Virginia. This course is one in a series that focuses on the history, progress and current events of environmental issues in southwestern Pennsylvania that also have application throughout the region and U.S. emphasis is on a balanced presentation of the issues, discussions of various approaches to solving problems and development of writing skills. To accomplish this, the course will (1) focus on a single environmental issue, (2) structure individual classes around a single aspect of that issue, (3) feature guest lectures and presentations by government regulators and policymakers, interest groups, corporate leaders and experts.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

GEOL 1336 - ENVIRONMENTAL ISSUES: AIR QUALITY (W)

Minimum Credits: 3  
Maximum Credits: 3  
This course is the same as GEOL 1335, but it fulfills the University Writing Requirement. Pittsburgh has had a checkered past when it comes to air quality issues, and faces an uncertain future. Once known as "hell with the lid off" due to industrial emissions, Pittsburgh and its environs once had some of the worst air in the nation. In 1948, a noxious cloud killed 22 in nearby Donora and sickened thousands. But Pittsburgh also became one of the first American cities to pass legislation aimed at cleaning its air. Today it faces a new threat from emissions from coal-burning utilities in Ohio and west Virginia. This course is one in a series that focuses on the history, progress and current events of environmental issues in southwestern Pennsylvania that also have application throughout the region and U.S. emphasis is on a balanced presentation of the issues, discussions of various approaches to solving problems and development of writing skills. Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

GEOL 1337 - ENVIRONMENTAL ISSUES: WATER QUALITY

Minimum Credits: 3  
Maximum Credits: 3  
This course will focus on environmental issues related to water quality, including the effects of Marcellus Shale waste water on public and private drinking water supplies. The emphasis will be on southwestern Pennsylvania, but we'll look at the effects of Marcellus Shale industry operations on a state and regional basis too. Emphasis is placed on a balanced, in depth presentation of the issues that must be addressed to realistically solve modern environmental problems. This will be accomplished by (1) focusing on a single environmental issue of relevance to southwestern Pennsylvania (2) structuring weekly sessions around a single aspect of that issue, and (3) giving students an opportunity to learn about the issues from local professionals and community leaders active in these fields.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)
GEOL 1338 - ENVIRONMENTAL ISSUES: WATER QUALITY (W)

Minimum Credits: 3
Maximum Credits: 3
This course is the same as GEOL 1337, but it fulfills the University Writing Requirement. This course will focus on environmental issues related to water quality, including the effects of Marcellus Shale waste water on public and private drinking water supplies. The emphasis will be on southwestern Pennsylvania, but we'll look at the effects of Marcellus Shale industry operations on a state and regional basis too. PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: Writing Requirement Course

GEOL 1339 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES

Minimum Credits: 3
Maximum Credits: 3
This term's focus is on mining issues. Mining and oil and gas extraction has a long, important and sometimes dark history in Pennsylvania. Almost since the first black chunk was pried from the first mine, coal has been king in the keystone state. It has fueled industries, heated homes, and powered trains and river tugs. It has been politically powerful. It has also colored streams, creeks and rivers orange and left them dead. It has scarred the rolling Allegheny hills, first with strip mines and now with "valley fills." how is mining's environmental legacy being addressed? How effective are current laws in regulating the industry? What's the latest, best, mining technique, and what is its public impact? What has been industry's response? What impacts,"

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1340 - ENVIRONMENTAL ISSUES: MINING AND GAS DRILLING ISSUES (W)

Minimum Credits: 3
Maximum Credits: 3
This course is the same as GEOL 1339, but it fulfills the University Writing Requirement. This term's focus is on mining issues. Mining and oil and gas extraction has a long, important and sometimes dark history in Pennsylvania. Almost since the first black chunk was pried from the first mine, coal has been king in the keystone state. It has fueled industries, heated homes, and powered trains and river tugs. It has been politically powerful. It has also colored streams, creeks and rivers orange and left them dead. It has scarred the rolling Allegheny hills, first with strip mines and now with "valley fills." how is mining's environmental legacy being addressed? How effective are current laws in regulating the industry? What's the latest, best, mining technique, and what is its public impact? What has been industry's response? What impacts, what's different and the same about the latest extractive industry in the state: Marcellus Shale natural gas development. Guest speakers from industry will be scheduled."

Academic Career: Undergraduate

Course Attributes: Writing Requirement Course

GEOL 1341 - ENVIRONMENTAL ISSUES: PARKS AND FORESTS
Minimum Credits: 3
Maximum Credits: 3
This course is one in a series that focuses on environmental issues in southwestern Pennsylvania. Forests are made up of trees. "Timber" is what they yell when the trees are cut and fall. With maturing forests scraping the sky in Pennsylvania and other parts of the northeastern United States, and controversial restrictions on national forest timbering in the Pacific Northwest, there is tremendous pressure to cut the local hardwood forests. But unlike the turn of the century when all of Penn's woods was clear-cut, there is a growing ethic that believes trees are more valuable growing than cut-for recreation and environmental reasons. This course on forest and parks issues is the fourth in a series that focuses on environmental and public policy issues in southwestern Pennsylvania. Through newspaper articles, field trips and guest speakers, the course will explore the issues and conflicts that abound in our wildlands and urban woods. Emphasis is on a balanced presentation of the issues, discussions of various approaches to solving problems and development of writing skills through a number of short assignments based on readings and presentations of guest speakers.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1342 - ENVIRONMENTAL ISSUES

Minimum Credits: 3
Maximum Credits: 3
This course will cover a range of issues in our environment including but not limited to air quality, water quality, mining and gas, and parks and forests. The focus of the class will be on researching, preparing, and revising written assignments on environmental issues. To accomplish this, the class will help students (1) identify environmental issues of interest, (2) organize around a single aspect of the chosen issue, and (3) prepare written assignments that will be reviewed and edited to meet standards of publication (e.g. traditional research paper, a proposal, or long-form journalism).

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Environ-Geology (BS, BPH) or Environ-Studies (BA, BPH) or Geology (BS, BPH) or Environ-Science (BS);

Course Attributes: Writing Intensive Course (WRIT)

GEOL 1344 - ARCHAEOLOGICAL EXCAVATION FIELD SCHOOL

Minimum Credits: 3
Maximum Credits: 6
This is a 3-6 credit Maymester course that will introduce the student to archaeological survey and archaeological data collection and analysis. The field school will survey and excavate at the Old Economy Village in Ambridge, PA. Old Economy Village is a National Historical Landmark, founded in 1804 and, as it exists today, consists of 20 buildings and a large green space. The field school will present several archaeological field and analysis techniques to students, providing hands-on experience with each. We will conduct a geophysical survey (fluxgate gradiometry, earth resistance, ground penetrating radar, magnetic susceptibility, electrical conductivity) of the green space. The survey will also introduce students to setting up survey transects and the mapping areas with GPS technology and total stations. The geographic, geophysics, and archaeological data will be incorporated into a GIS. Students will process and interpret geophysics datasets, artifacts, and GIS analyses. Students will also receive training on basic artifact curation. The first two weeks will take place at a hands-on field setting at an archaeological. The final week will be at the University of Pittsburgh's campus in the archaeology laboratories within the Department of Anthropology Laboratory.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 1410 - EXPLORATION GEOPHYSICS

Minimum Credits: 3
Maximum Credits: 3
An introduction to the theory, methods, and instrumentation used in exploration geophysics. Topics include gravity, magnetics, electromagnetics, and seismic.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 1413 - GEOPHYSICAL WELL LOGGING

Minimum Credits: 3
Maximum Credits: 3
An introduction to the interpretation of well logs derived from various geophysical measurements of down-hole rock properties. Students will learn to infer lithology, fluid characteristics, production zones, and other features useful to both geologists and petroleum engineers. A class in sedimentology and stratigraphy is recommended but not required.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

GEOL 1445 - GIS, GPS, AND COMPUTER METHODS

Minimum Credits: 3
Maximum Credits: 3
The goals of this course are to gain expertise in spatial analysis and geographical information systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Global Studies, Urban Studies

GEOL 1446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM

Minimum Credits: 3
Maximum Credits: 3
Using advanced geographical information systems technologies and geospatial analysis techniques students will extend their knowledge of geographical information systems to include raster, geostatistical, network, model, and 3d/4d based analysis completing complex analysis of real world data sets.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 1445

GEOL 1460 - INTRODUCTION TO REMOTE SENSING

Minimum Credits: 3
Maximum Credits: 3
This course provides a foundation in the theory, techniques and applications of remote sensing and geospatial data visualization spanning the electromagnetic spectrum. Topics include light/matter interaction, optics and sensor design, image analysis, as well as current applications of remote sensing to science and engineering problems facing local and global populations. The course and integrated image-processing laboratory are designed to provide the student with a strong foundation of remote sensing science.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GEOL 1510 - AQUATIC AND SEDIMENTARY GEOCHEMI

Minimum Credits: 3
Maximum Credits: 3
This course will examine the chemistry and geochemistry of modern and ancient aquatic and sedimentary systems, including oceans and fresh waters. Students will gain an understanding of the biogeochemical processes occurring in aquatic systems, and the geochemical signatures they leave in the sedimentary record.

Academic Career: Undergraduate
GEOL 1701 - GEOLOGY OF THE PLANETS

Minimum Credits: 3
Maximum Credits: 3
An introduction to the geological processes and resulting landforms occurring on the surfaces of the planets of our solar system. We will make extensive use of recent spacecraft imagery and data.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GEOL 0055

GEOL 1853 - WATERSHED HYDROLOGY AND BIOGEOCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: CHEM 0110 and GEOL 1641

GEOL 1900 - INTERNSHIP

Minimum Credits: 1
Maximum Credits: 4
This course places the student in an "on-the-job" setting in which he/she receives practical experience in a supervised training environment.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit
Course Attributes: Capstone Course

GEOL 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 4
This course permits undergraduates to explore specific topics in the geological sciences. The course is designed in a more flexible format than a directed study, stressing a higher degree of independent library research.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

GEOL 1903 - UNDERGRADUATE RESEARCH

Minimum Credits: 1
Maximum Credits: 4
This course provides the opportunity for undergraduates to obtain "hands on" experience in geology by actively interacting with faculty members on research projects.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis
Course Attributes: Capstone Course
GEOL 1904 - DIRECTED READING

Minimum Credits: 4
Maximum Credits: 4
This course explores in-depth topics in geology and environmental studies. Topics and structure vary from term to term.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Environmental Geology (BS, BPH) or Environmental Studies (BA, BPH) or Geology (BS, BPH) or Environmental Science (BS)

GEOL 1907 - EXPERIENCE IN UNDERGRADUATE TEACHING

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

GEOL 1908 - UNDERGRADUATE FIELD STUDY EXPERIENCE (NON-TRADITIONAL)

Minimum Credits: 1
Maximum Credits: 4
This course provides the opportunity for Students to obtain field experience in environmental studies. The course is designed to be primarily self-guided but within a supervised training environment. Students must receive permission (and number of credits) through advisor. Offered every term. Off-site field experience and regular meetings with advisor are required.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit

GEOL 1910 - UNDERGRADUATE THESIS

Minimum Credits: 1
Maximum Credits: 3
This course is the culmination of an undergraduate research project. Students will write a formal thesis under the supervision of a faculty mentor and give an oral presentation on their research.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis
Course Attributes: Capstone Course

GEOL 1930 - YELLOWSTONE FIELD CLASS

Minimum Credits: 4
Maximum Credits: 4
This class uses a month of day hikes to examine the relationships between geology, biology, and how people make a living in the greater Yellowstone area. The first third of the class focuses on how the deep geologic past has generated the resources that plants, animals, and humans need to make a living. The ecology section focuses on the diverse ecosystems that exist in the dry basins, the relatively wet mountains and plateaus, and the near-arctic highest elevation areas. Finally, the public policy hikes highlight how people should best use the natural resources of the area. Students will see abundant wildlife, spectacular geology, and come to appreciate the many ways in which the West is culturally quite distinct from the East.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
GEOL 1950 - WYOMING FIELD STUDIES IN ECOLOGY AND PALEONTOLOGY

Minimum Credits: 3
Maximum Credits: 3
This 6-week course is a unique introduction to the practices of paleontology, ecology, and archaeology, with a strong emphasis on field techniques. This program focuses on the rich resources of Pitt's Spring Creek Preserve outside Laramie, WY, which includes pristine beds of dinosaur fossils, Native American artifacts, and an intact, mixed-grass prairie. We explore ecological systems ranging from prairie basins to alpine forests to mountain snowfields; we study mammals, birds, insects, and stream ecosystems; we excavate dinosaurs and find and document Native American artifacts; we reconstruct ancient environments revealed by rock outcrops and the fossils they contain; we discuss water rights, cattle grazing, wind farms, and economic development; and we experience a spectacular array of natural wonders while on a hiking and camping trip around the state that includes Yellowstone and the Tetons. This class seeks to develop an understanding of the complex geological, biological, and historical processes that shape the landscape, habitats, and natural and human communities we see today. These lessons apply both to Wyoming and the world at large.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: CREQ: GEOL 1951

GEOL 1951 - WYOMING FIELD STUDIES IN GEOLOGY AND PALEONTOLOGY

Minimum Credits: 3
Maximum Credits: 3
This class is one-half of a 6-week field course that, in conjunction with GEOL 1950, provides a spectacular, in-depth introduction to the practices of ecology, paleontology, and (to a lesser extent) archaeology. There is a strong emphasis on field techniques and applying what you have learned to understand how nature works. This program focuses on the rich resources of Pitt's Spring Creek Preserve outside Laramie, WY, which includes pristine beds of dinosaur fossils, Native American artifacts, and an intact, mixed-grass prairie. We explore ecological systems ranging from prairie grasslands to alpine pine forests to rushing streams to mountain snowfields; we study the abundant and diverse mammals, birds, insects, and aquatic organisms of the region; we excavate dinosaurs and find and document Native American artifacts; we reconstruct ancient environments revealed by rock outcrops and the fossils they contain; we discuss water rights, cattle grazing, wind farms, and economic development; and we experience a amazing array of natural wonders while on a hiking and camping trip around Wyoming that includes Yellowstone and the Tetons. You will develop a deep understanding of the complex geological, biological, and historical processes that shape the landscape, habitats, and natural and human communities that we see today, and you will be able to apply the principles and techniques of this class to gradually reveal the deep history of any place you visit. Students must enroll in GEOL 1950 and GEOL 1951 concurrently.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: CREQ: GEOL 1950

GEOL 1960 - FIELD CAMP

Minimum Credits: 4
Maximum Credits: 8
A geology summer field camp is four to eight weeks long and includes a substantial component of geologic mapping and report writing. Field camp is the traditional capstone experience for geology and environmental geology majors. You should enroll at any accredited field camp offering at least four semester units of credit and transfer the credits to the University of Pittsburgh.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Attributes: Capstone Course

GEOL 2054 - SOILS: GEOBIOCHEMICAL LANDSCAPES

Minimum Credits: 4
Maximum Credits: 4
An overview of soils with a strong emphasis on landscape scale process. The course consists of lecture and laboratory/field work. The lecture will
include description of physical and chemical soil properties and processes, discussion of major soil classifications and description of ramifications at the landscape scale.

Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LGSNC

GEOL 2446 - ADVANCED GEOGRAPHICAL INFORMATION SYSTEM

Minimum Credits: 3
Maximum Credits: 3
Using advanced geographical information systems technologies and geospatial analysis techniques students will extend their knowledge of geographical information systems to include raster, geostatistical, network, model, and 3d/4d based analysis completing complex analysis of real world data sets.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC
Course Requirements: PREQ: GEOL 2449

GEOL 2449 - GIS, GPS, AND COMPUTER METHODS

Minimum Credits: 3
Maximum Credits: 3
The goals of this course are to gain expertise in spatial analysis and geographical information systems
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC

GEOL 2460 - APPLIED REMOTE SENSING AND GPS TECHNIQUES

Minimum Credits: 3
Maximum Credits: 3
Designed as a follow on to the introduction to remote sensing course this advanced class emphasizes field-oriented problems, data collection, and validation. The ultimate goal is to explore the connection between remotely-gathered imagery and the real-world factors which influence those data. Students taking the course should have had at least 1 semester of high school or college physics.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad LG/SNC

GEOL 2525 - STABLE ISOTOPE GEOCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
This course will provide students with a thorough introduction to the stable isotope systematics of light elements (hydrogen, carbon, nitrogen, oxygen, and sulfur). The course examines the fundamental concepts of isotope equilibrium and kinetics, physiochemical and biogenic mechanisms of isotope exchange, and the principles of mass spectrometry and stable isotope extraction techniques.
Academic Career: GRAD
Course Component: Lecture
Grade Component: Grad LGSNC
Course Requirements: PREQ: GEOL 2520

GEOL 2853 - WATERSHED HYDROLOGY AND BIOGEOCHEMISTRY

Minimum Credits: 3
Maximum Credits: 3
Understanding the science of watersheds is critical to improving water quality. This course will examine surface water hydrology, biogeochemistry, and management of watersheds. In addition, we will focus on how varying land uses influence the dynamics of hydrology and biogeochemistry
across these systems. Student will develop an understanding of the biogeochemistry of various major elements in watersheds, including nitrogen, carbon, sulfur, and mercury, and how these elemental fluxes are exchanged through atmospheric-terrestrial-aquatic interactions. Students will be expected to demonstrate critical thinking, communication, and analytical skills through student-led lectures, journal discussions, and projects.

German

**GER 0001 - ELEMENTARY GERMAN 1**

Minimum Credits: 5  
Maximum Credits: 5  
This is an elementary language acquisition course and aims to teach students how to carry out various functions likely to be necessary in dealing with others in the target language. The course aims to develop all four language skills--speaking, listening, reading, and writing, and deals with culture as an integral part of each skill. The language acquisition exercises are supplemented by an integrated and systematic presentation of grammar.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

**GER 0002 - ELEMENTARY GERMAN 2**

Minimum Credits: 5  
Maximum Credits: 5  
This course completes the introduction of the basic structures of German begun in German 0001. It emphasizes all four language skills--speaking, listening, reading, and writing and deals with culture as an integral part of each skill. The language acquisition exercises are supplemented by an integrated and systematic presentation of grammar.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: GER 0001 or GER 0101, or Equivalent; MIN GRADE: B-, or Online Test Score equal/greater 281 or Paper Test Score equal/greater 6  
Course Attributes: DSAS Second Language General Ed. Requirement

**GER 0003 - INTERMEDIATE GERMAN 1**

Minimum Credits: 3  
Maximum Credits: 3  
Conducted entirely in German, this course provides structured practice in understanding, speaking, reading (unedited texts), and writing. The language-acquisition exercises are supplemented by an integrated and systematic review of grammar, emphasizing those structures that are needed for practical communication in authentic German.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: GER 0002 or GER 0102 or Online Test Score equal/greater 381 or Paper Test Score equal/greater 22

**GER 0004 - INTERMEDIATE GERMAN 2**

Minimum Credits: 3  
Maximum Credits: 3  
Conducted entirely in German, this course enables students to describe in past, present, and future time, and to initiate and sustain a conversation. They discuss contemporary texts and topics, participate in small group activities, and strengthen their writing skills through journal writing.

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis
Course Requirements: College in High School - UGRD - students only.

GER 0012 - CONVERSATION 2

Minimum Credits: 3
Maximum Credits: 3
Like its companion course, German 0011, this course emphasizes oral proficiency. The course enables students to converse in formal and informal situations, resolve problems, deal with unfamiliar topics, provide explanations, describe in detail, offer supported opinions, and hypothesize. Areas of context are practical, social, professional, and abstract topics, particular interests, and special fields of competence.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0021 - GERMAN READING 1

Minimum Credits: 4
Maximum Credits: 4
The objective of this course is to develop a basic reading knowledge of German. It is a beginning course which introduces all the structures of German grammar. German 0021 is designed for students who wish to acquire basic reading skills in the shortest possible time.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

GER 0022 - GERMAN READING 2

Minimum Credits: 4
Maximum Credits: 4
This course is designed to help students obtain an intermediate reading knowledge of German. Students read unedited texts from general fields and from their own areas of specialization. The course includes a systematic review of grammar.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Second Language General Ed. Requirement, West European Studies

GER 0058 - MUNICH: HISTORY, CULTURE, SOCIETY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0070 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY

Minimum Credits: 3
Maximum Credits: 3
This course is explores the state of the European union today with respect to the issue of collective identity formation by integrating the historical development of the EU with studying its evolving institutional structure. The course examines how culture which was originally only an afterthought of European integration has gained in importance since the overarching permissive consensus with which European populations passively supported the integration process began to crumble with the Maastricht treaty of 1992. Through a variety of sources from across the social sciences, political theory and social philosophy, the course elucidates how EU cultural policy aims to engender a transnational European identity.
GER 0101 - BEGINNING GERMAN 1

Minimum Credits: 3
Maximum Credits: 3
This is the first part of our elementary language course sequence. In these proficiency-oriented courses students begin to learn how to communicate in German. The course emphasizes all four skills - speaking, listening, reading, and writing - and introduces students to the culture of the German-speaking countries. Students will be working towards the A1-level of the Common European Framework of Reference. Students should plan to take German 0102 during the following semester.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Geographic Region General Ed. Requirement

GER 0102 - BEGINNING GERMAN 2

Minimum Credits: 3
Maximum Credits: 3
This is the second part of our elementary language course sequence. In these proficiency-oriented courses students begin to learn how to communicate in German. The course emphasizes all four skills - speaking, listening, reading, and writing - and introduces students to the culture of the German-speaking countries. Students will be working towards the A2-level of the Common European Framework of Reference. Students should plan to take either German 0103 or German 0203 during the following semester.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0103 - BEGINNING GERMAN 3

Minimum Credits: 3
Maximum Credits: 3
This is the third part of our elementary language course sequence. In these proficiency-oriented courses students begin to learn how to communicate in German. The course emphasizes all four skills - speaking, listening, reading, and writing - and introduces students to the culture of the German-speaking countries. Students will continue to work towards the A2-level of the Common European Framework of Reference. Students should plan to take German 0201 during the following semester.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Second Language General Ed. Requirement

GER 0201 - INTERMEDIATE GERMAN 1

Minimum Credits: 3
Maximum Credits: 3
This is the first part of our intermediate language course sequence. These courses will provide students with opportunities to further develop their listening, speaking, reading and writing skills, to strengthen their grammatical knowledge and expand their vocabulary. Students will begin to work towards the B1-level of the Common European Framework of Reference. Students should plan to take German 0202 during the following semester.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
GER 0202 - INTERMEDIATE GERMAN 2

Minimum Credits: 3
Maximum Credits: 3
This is the second part of our intermediate language course sequence. These courses will provide students with opportunities to further develop their listening, speaking, reading and writing skills, to strengthen their grammatical knowledge and expand their vocabulary. Students will continue to work towards the B1-level of the Common European Framework of Reference.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0203 - INTENSIVE INTERMEDIATE GERMAN 1

Minimum Credits: 5
Maximum Credits: 5
This is the first part of our intensive intermediate language course sequence. The class meets every day and thus allows students to develop their listening, speaking, reading and writing skills, to strengthen their grammatical knowledge and expand their vocabulary at a faster pace than in the regular courses. Students will begin to work towards the B1-level of the Common European Framework of Reference.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0204 - INTENSIVE INTERMEDIATE GERMAN 2

Minimum Credits: 5
Maximum Credits: 5
This is the second part of our intensive intermediate language course sequence. The class meets every day and thus allows students to develop their listening, speaking, reading and writing skills, to strengthen their grammatical knowledge and expand their vocabulary at a faster pace than in the regular courses. Students will continue to work towards the B1-level of the Common European Framework of Reference.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0205 - CONVERSATION 1

Minimum Credits: 3
Maximum Credits: 3
This course is intended to assist novice level students to strengthen their communicative proficiency. Students learn to handle their needs adequately for travel in Germany or a German-speaking country. In order to encourage oral communication, there is extensive use of audio-visual teaching aids.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 0206 - CONVERSATION 2

Minimum Credits: 3
Maximum Credits: 3
Like its companion course, German 0011, this course emphasizes oral proficiency. The course enables students to converse in formal and informal situations, resolve problems, deal with unfamiliar topics, provide explanations, describe in detail, offer supported opinions, and hypothesize. Areas of context are practical, social, professional, and abstract topics, particular interests, and special fields of competence.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
GER 0207 - INTENSIVE INTERMEDIATE GERMAN

Minimum Credits: 6  
Maximum Credits: 6  
Course Description: This accelerated 6-credit course covers two semesters of Intermediate German (GER 0201 and GER 0202) in a single semester and counts as two courses towards the German Minor, Certificate, or Major. In the course you will continue to develop your German language skills and learn about a variety of cultural topics and themes, from major historical events to modern German city planning. Building on the grammar you have learned in previous semesters and expanding your vocabulary, you will further develop your reading, speaking, writing and listening skills. The course emphasizes meaningful communication and comprehension, and it is held in German. In order to succeed in this course, active and dedicated participation in the classroom and the online module, careful and consistent completion of all homework assignments, as well as independent study will be necessary. That is true for all language courses, but especially for this intensive version, which will have the workload of two courses.  
Prerequisite: Beginning German 3 (GER 0103), or equivalent. If you did not take GER 0103 at the University of Pittsburgh, please talk to the Director of Language Studies in German.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

GER 0226 - INTRODUCTION TO YIDDISH LANGUAGE AND CULTURE

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Attributes: Russian & East European Studies

GER 1000 - READING LITERARY TEXTS

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: GER 0202 or 0204 or 0004 (MIN GRADE: B-) or Online Test Score equal/greater 550  
Course Attributes: West European Studies

GER 1001 - GERMAN WRITING

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: GER 0004 (MIN GRADE: B-) or Online Test Score equal/greater 550 or Paper Test Score equal/greater 55; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)  
Course Attributes: West European Studies, Writing Requirement Course

GER 1003 - PROFESSIONAL GERMAN
This is an advanced language acquisition course and aims to familiarize students with specialized vocabulary and practices of German-speaking countries in professional environments of such areas as communications, advertisement, international trade, engineering, and law. The course will focus on oral and aural proficiency, appropriate written discourse and reading. The course integrates economic geography the legal and political system of German-speaking countries.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** PREQ: GER 0202 or 0204 or 0004 (MIN GRADE: B-) or Online Test Score equal/greater 550

**Course Attributes:** West European Studies, Writing Requirement Course

### GER 1004 - THE GERMAN BUSINESS (ECO)SYSTEM

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Subject-oriented, authentic texts and videos serve as the vehicle for an efficient and accelerated introduction to business German. The course emphasizes both receptive (reading and listening) and productive (speaking and writing) skills.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** LG/SNC Elective Basis

**Course Requirements:** PREQ: GER 0004, 0202 or GER 204 (MIN GRADE: B-); Online Test Score 550 or better

### GER 1005 - GERMAN MEDIA

**Minimum Credits:** 3  
**Maximum Credits:** 3  
In this course, students will strengthen their knowledge of existing grammatical structures and will examine the specific aspects of daily life in Germany via contemporary electronic and print genres. The latter will include online articles and hard copy news sources and a range of daily and weekly news sources. Class discussions, debates, oral reports, and short written assignments will also be based on topics derived from current podcasts, social networking sites, television advertisements and online series, and from new documentary and feature films.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** Letter Grade

**Course Requirements:** PREQ: GER 0004 (MIN GRADE: B-) or Online Test Score Equal/Greater 550 or Paper Test Score Equal/Greater 55

**Course Attributes:** DSAS Creative Work General Ed. Requirement

### GER 1010 - COFFEE AND THE NEWS: ADVANCED GERMAN CONVERSATION

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This is a 1-credit conversation class for post-intermediate students of German who would like to practice their German and familiarize themselves with current events in German-speaking lands. You will practice advanced conversational German while discussing current issues in German-speaking Europe. You will meet with an instructor one hour each week and discuss issues from a variety of media (newspapers, magazines, podcasts, etc.). Prerequisites: GER 0202, GER 0205, or equivalent. Please speak with the Director of Undergraduate Studies in German if you have not taken either of these courses.

**Academic Career:** Undergraduate

**Course Component:** Lecture

**Grade Component:** Satisfactory/No Credit

### GER 1051 - INTRODUCTION TO LITERARY ANALYSIS

**Minimum Credits:** 3  
**Maximum Credits:** 3  
Competing methods of literary investigation are analyzed in terms of (1) their underlying assumptions about the nature of art and the relationship between literature and reality and (2) their usefulness as tools for practical criticism. Each approach is examined as a coherent model and then
evaluated with reference to actual critical practice.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Course Requirements: PREQ: GER 0004 (MIN GRADE: B-) or Online Test Score equal/greater 550 or Paper Test Score equal/greater 55; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)

Course Attributes: SCI Polymathic Contexts: Humanistic GE. Req., West European Studies, Writing Requirement Course

GER 1101 - GERMAN MEDIA 2

Minimum Credits: 3
Maximum Credits: 3

Intended to be a challenging upper-level language course, advanced German 1 strengthens students' linguistic skills primarily in speaking and listening, but also in reading and writing. We examine specific aspects of daily life (for example, work, housing, leisure, education, youth, and family) via contemporary print, audio, and video media.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any 1000-level German class
Course Attributes: West European Studies

GER 1102 - THE GERMAN-SPEAKING WORLD TODAY

Minimum Credits: 3
Maximum Credits: 3

Students who wish to use German as an effective professional tool or enroll at a German university benefit most from this course. They investigate and practice the structure and style of written German, participate in discussions on a variety of public and academic issues, listen to German lectures and broadcasts, and present German papers on topics of their choice.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any 1000 Level German Course
Course Attributes: West European Studies

GER 1103 - ADVANCED GERMAN 2: CREDIT LABORATORY

Minimum Credits: 1
Maximum Credits: 1

This course supplements advanced German 2 by providing authentic language exercises and practical information about everyday life in Germany. It is designed specifically for students preparing to matriculate into a German University, but will also prove useful to those with other travel goals.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

GER 1104 - GERMAN FOR SOCIAL SCIENTISTS 1

Minimum Credits: 3
Maximum Credits: 3

This course has a three-part teaching objective: a) it analyzes how the historical experience of the weimar republic and World War II shaped the politico-economic system and national identity in West Germany; b) it reviews major grammatical structures (of German passive voice, subjunctive I and II) necessary to comprehend scholarly materials in the social sciences; and c) it allows students to practice their German language skills in all four areas: reading writing, listening and speaking.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any 1000-Level German Course
Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Historical Analysis General Ed. Requirement

GER 1105 - LITERARY ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
General content, purposes, and methods of this course: students will learn the characteristic features of poetry, prose, and drama and will develop a technical vocabulary to interpret literary works in German. We will also learn about some of the different methodologies and theoretical approaches that literary critics employ to analyze texts. We will build upon and expand the reading techniques and strategies learned in 1000-level courses to prepare students for the more advanced literature and culture seminars at the 1200-level. Readings, class discussions, tests, oral reports and written assignments, including a journal, will be in German.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: Any 1000 level German Course
Course Attributes: DSAS Literature General Ed. Requirement

GER 1106 - GERMAN CULTURAL HISTORY

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to major developments and figures in European cultural history from the German tribes to the enlightenment (CA. 750 AD to 1785). It weaves together texts and artifacts from the time period covered and current print as well as audio-visual materials in order to analyze how past cultural history informs German and European collective identity today. This course will be conducted entirely in German.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: Any course from GER 1000-1099

GER 1108 - GREEN GERMANY

Minimum Credits: 3
Maximum Credits: 3
A course for advanced intermediate students of German (B1+ level according to CEFR, the Common European Framework of Reference) who want to gain a more thorough insight into German culture, and at the same time work towards a higher proficiency level in their language skills.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: Any 1000-level GER course (MIN GRADE: B-).
Course Attributes: DSAS Geographic Region General Ed. Requirement

GER 1204 - GERMAN FOR SOCIAL SCIENTISTS 2

Minimum Credits: 3
Maximum Credits: 3
This course has a three-part teaching objective: 1) it analyzes historical development and institutional structures of the European union and asks the question to which extent this supranational union was able to engender a collective identity; 2) it allows students to practice their German language skills in all four areas: reading, writing, listening and speaking; 3) it teaches students how to write an analytic seminar paper in German.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: Any 1100 level German course
GER 1220 - LITERATURE AND CULTURE 1750-1830

Minimum Credits: 3
Maximum Credits: 3
This course reviews one of the most famous and exciting periods of German literature: a period of great social and intellectual upheavals, of sentimental novels and revolutionary plays, of classical poems and folk tales, when an admired poet became an influential politician, and rebellious women wrote even though they were not supposed to. Students will read some of the classics of German literature, and learn about the historical context of these works. All primary readings and class discussions are in German.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, West European Studies

GER 1228 - LITERATURE AND CULTURE 1830-1890

Minimum Credits: 3
Maximum Credits: 3
Major literary and cultural documents from between about 1830 and 1890 are analyzed both formally and thematically in order to understand them in their social and historical contexts. Primary readings are in German.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GER 1000 OR 1001
Course Attributes: West European Studies

GER 1234 - LITERATURE AND CULTURE 1890-1918

Minimum Credits: 3
Maximum Credits: 3
Major literary and cultural documents from between about 1890 and 1918 are analyzed both formally and thematically in order to understand them in their social and historical contexts. Primary readings are in German.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 1252 - CURRENT LITERATURE AND CULTURE

Minimum Credits: 3
Maximum Credits: 3
In this course, students concentrate on the most recent trends in German literature and culture. Readings from a variety of genres and authors are discussed in the larger context of cultural trends and traditions which have a bearing on current literary and other issues. All readings are in German.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GER 1001 or 1001
Course Attributes: West European Studies

GER 1324 - SPECIAL TOPICS IN GERMAN PROSE

Minimum Credits: 3
Maximum Credits: 3
An in-depth investigation of a literary or cultural problem related to prose fiction. As the topic changes, this course may be repeated for credit.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: One 1100-level GER course

GER 1350 - GERMAN DRAMA

Minimum Credits: 3
Maximum Credits: 3
An overview, crossing several literary-historical periods, of the development of German drama.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any 1000-level GER course (MIN GRADE: B-).
Course Attributes: DSAS Creative Work General Ed. Requirement

GER 1380 - TOPICS IN GERMAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
A survey of the new German cinema. This course examines the cultural and social conditions that made possible and shaped the diversity of West German films since the sixties and continue to do so in the eighties. With the emphasis on the work of internationally renowned directors such as Fassbinder, Herzog, and Wenders, the course also pays tribute to the lesser known but equally important work of women directors and experimental filmmakers.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: West European Studies

GER 1390 - MINORITIES IN POST-WAR GERMANY

Minimum Credits: 3
Maximum Credits: 3
This course analyzes the complex nature of the relationship between the native and foreign population in Germany today. Topics include the history of immigration to Germany, the legal inscription of otherness, and the constitution of identity by the immigrant minority. Using literary and non literary documents as well as different media, students will be introduced to the manifold forces which shape collective images and cultural identities in Germany.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: Any Two 1000-level German Courses
Course Attributes: Russian & East European Studies, West European Studies

GER 1399 - SENIOR CAPSTONE SEMINAR

Minimum Credits: 3
Maximum Credits: 3
This course is for senior German majors. It will require students to write a senior thesis on a German topic, drawn from their own interests but also related to the focus of the seminar. The specific focus of the seminar will change each year, depending on the instructor, but will be constructed to highlight the intersections between multiple epochs, genres, themes, and/or disciplines. Every version of the seminar will require a senior thesis or project that allows the student to pursue his/her own interests within the topic of the seminar. Seminar readings will be in German.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: Any 1000 Level German Course and Any 1100 Level German Course; LVL: Senior
Course Attributes: Capstone Course

GER 1409 - EUROPEAN INTELLECTUAL HIST 2 1870-1940
Minimum Credits: 3
Maximum Credits: 3
A course of readings and discussions focused on major texts in the European intellectual tradition from the age of positivism to the second World War. There will be occasional lectures, especially on the social and institutional contexts, but the predominant emphasis will be on class discussions of primary readings. Students who wish to take the course for the German major will be asked to write their papers, and do a substantial portion of the reading, in German.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: Any Two 1000-level German Courses

GER 1410 - KAFKA AND THE MODERN WORLD

Minimum Credits: 1
Maximum Credits: 1
Kafka's major works are examined both formally and thematically with reference to the modernist tradition. Recurring issues include authority, alienation, mass society, guilt and punishment, truth, and writing. Regular assignments from the secondary literature introduce students to central questions of literary criticism and theory. Essays by Kierkegaard, Marx, Nietzsche, and Freud further elaborate the cultural context in which Kafka's texts were produced. All readings are in German.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Satisfactory/No Credit
Course Requirements: CREQ: GER 1510 or ENGLIT 1510
Course Attributes: DSAS Literature General Ed. Requirement

GER 1490 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 5
An in-depth investigation of a literary or cultural problem that lies outside of traditional literary-historical or genre classifications. As the topics change, this course may be repeated for credit.

Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

GER 1500 - GERMANIC MYTHS, LEGENDS AND SAGAS

Minimum Credits: 3
Maximum Credits: 3
This course presents a survey of Northern European cultural values from about 500 B.C. To about 1500 A.D. Sources include archaeological finds, sagas, ballads, legends, customs, superstitions, place names, and language expressions. Topics include social organization, distribution of labor and wealth, the position of women and children in family and society, and the uses of supernatural beliefs to achieve worldly goals. Where appropriate, parallels will be drawn between modern Northern European values and their formative myths from the distant past.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Childrens Literature, DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, Medieval & Renaissance Studies, West European Studies

GER 1502 - INDO-EUROPEAN FOLKTALES

Minimum Credits: 3
Maximum Credits: 3
German 1502 is a study of the esthetic, psychological, and social values reflected in a variety of European folklore genres, including magic tales, legends, proverbs, superstitions, and jests. The Grimms' pioneering collections constitute the course's nucleus, but it draws numerous supporting examples from other European countries as well.
GER 1503 - INDO-EUROPEAN FOLKTALES WRITING PRACTICUM

Minimum Credits: 1
Maximum Credits: 1
German 1503 is the writing practicum for German 1502. This practicum concentrates on the problems of grammar, style, organization, and documentation associated with the writing assignments for the course.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SNC Elective Basis

Course Attributes: Writing Requirement Course

GER 1504 - EUROPEAN IDENTITY BETWEEN HISTORY AND EUROPEAN UNION CULTURAL POLICY

Minimum Credits: 3
Maximum Credits: 3
This course explores the state of the European union today with respect to the issue of collective identity formation by integrating the historical development of the EU with studying its evolving institutional structure. The course examines how culture which was originally only an afterthought of European integration has gained in importance since the overarching permissive consensus with which European populations passively supported the integration process began to crumble with the Maastricht treaty of 1992. Through a variety of sources from across the social sciences, political theory and social philosophy, the course elucidates how EU cultural policy aims to engender a transnational European identity.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: DSAS Geographic Region General Ed. Requirement

GER 1506 - THEORIES & PRACTICES OF WORK IN GLOBAL PERSPECTIVE

Minimum Credits: 3
Maximum Credits: 3
Whether positively connoted as an ennobling activity engendering human self-consciousness and liberty (Hegel) or as toil and drudgery, work/labor is central to individual and collective human existence. We need to expend our physical and mental capacities to sustain our own lives as well as the lives of others. Work, therefore, has profound significance for the constitution of the individual self as well as for the organization of our society.

Hence, work has been the human activity and site of struggle for freedom and equality from the beginning of human history to today's demand for Social Justice. This course combines social philosophy and case studies of working conditions across the globe for engaging with the following questions. What is the justification for past and existing hierarchies of labor typically expressed in different pay and the lack thereof? What are the practical and ethical consequences of such labor hierarchies? What is the relationship between work and human dignity? What is the responsibility of the individual for working conditions domestically and globally? The course allows students to investigate the structures of the economy and choices we make as individuals has profound repercussions on our fellow human beings, in other words, we will recognize the interconnectedness of our world as a fundamental aspect of the human condition today. Theoretical readings range from Kant, Hegel, Marx and Arendt to current social theorists like Michael Hardt (Affective Labor), Maurizio Lazzarato (Immaterial Labor), Oskar Negt to Teju Cole and others. In addition, we will discuss documentaries and case studies on working conditions in our global economy. All materials and language of instruction are in English.

Academic Career: Undergraduate

Grade Component: LG/SNC Elective Basis

GER 1510 - KAFKA AND THE MODERN WORLD
GER 1512 - GERMAN LITERATURE AND EUROPEAN PHILOSOPHY: GOETHE'S FAUST

Minimum Credits: 3
Maximum Credits: 3
This course analyzes Goethe's Faust in its entirety with reference to its epistemological, ethical, and aesthetic investments. Students explore how this masterpiece of German literature staged and re-articulated important conceptual issues within the European philosophical tradition with supplementary readings from Plato, Aristotle, Spinoza, Leibniz, and Kant, as well as Whitehead and Deleuze. The goal of the readings is to construct a conceptual apparatus that can serve as framework of interpretive analysis as well as a reconfiguration of the perennial questions of philosophy and literature regarding their own essence.

Course Attributes: DSAS Geographic Region General Ed. Requirement, DSAS Literature General Ed. Requirement, DSAS Phil. Think or Ethics General Ed. Requirement

GER 1518 - BERTOLT BRECHT

Minimum Credits: 3
Maximum Credits: 3
The course discusses Bertolt Brecht in his various roles as playwright, poet, dramaturg, and critic. His theory of the epic theater is used as a backdrop to interpret his plays. His polemic against traditional theater is viewed not merely within the narrow constraints of Marxism, but in the wider context of Avant Garde theater. His influence on theater of the Twentieth Century outside of the German-speaking world is also analyzed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 1522 - GERMANY TODAY

Minimum Credits: 3
Maximum Credits: 3
In this course the current cultural, political, and social situation in the German speaking countries is assessed. What are the concerns of Germans, Austrians, the Swiss? By concentrating on current conditions and changes of public consciousness, issues important to German speakers are debated. Materials include articles from journals and newspapers, documentaries, slides, and contemporary works of literature. All materials are in English.

Course Attributes: DSAS Geographic Region General Ed. Requirement, West European Studies

GER 1524 - GERMAN CONTRIBUTIONS WORLD LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course investigates the aesthetic qualities and the cultural backgrounds of those German writers of the past 200 years who have genuinely become members of the world literature community. Authors discussed include Goethe, Nietzsche, Kafka, Brecht, and Mann. All materials are in English.

Academic Career: Undergraduate
GER 1526 - DRAMA OF IDEAS

Minimum Credits: 3  
Maximum Credits: 3  
Although it has been argued that "a poem should not mean, but be", many writers have unashamedly given their art a didactic function. This course identifies the types of causes that literary artists traditionally have championed, and then focuses on the literary techniques that they used to achieve their end. The course is thus a study of "the art of moral persuasion". The principal works investigated are "dramas of ideas" by such playwrights as Ibsen, Shaw, and Brecht, although supplemental prose writings are also included.
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

GER 1528 - VIENNA

Minimum Credits: 3  
Maximum Credits: 3  
Viennese culture in the age of modernism anticipates crucial issues, concerns, and debates of our time. The present lecture series introduces students to the multifaceted Viennese developments in art, literature, music, philosophy, and science from the late nineteenth century to World War II. Among the major figures discussed in this course are: Mach, Wittgenstein, Freud, Schnitzler, Kraus, Klimt, Schiele, Loos, Schonberg, Alban Berg. Readings are in English.

GER 1535 - OUTSIDERS IN GERMAN LITERATURE

Minimum Credits: 3
Maximum Credits: 3
This course surveys major works of German literature of the 18th, 19th and 20th centuries and develops literary analytical skills. Students will learn about various aspects of German culture by focusing on "outsiders"-individuals who live on the margins of a social order and, by their very marginality, help define accepted social norms. Readings include texts by Goethe, Kleist, Hoffmann, Buchner, Mann, Kafka, Borchert, Bachmann, Plenzdorf, and Wolf.
Academic Career: Undergraduate

Course Attributes: DSAS Literature General Ed. Requirement, West European Studies, Writing Requirement Course

GER 1540 - NIETZSCHE AND THE NIETZSCHEANS

Minimum Credits: 3
Maximum Credits: 3
Friedrich Nietzsche (1844-1900) continues to be one of the most influential modern philosophers, yet controversy surrounds almost every aspect of his life and work. This course will help students go beyond the controversy in order to consider Nietzsche's texts discerningly and how he approached the problems of truth, power, and morality. Close examination of his most important writings will be complemented by inquiry into Nietzsche's effects on Twentieth-Century philosophy, literature, and culture. The course will also survey major influences of Nietzsche's approaches on subsequent philosophers and scholars.

Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement, SCI Polymathic Contexts: Ethical/Policy GE. Req.

GER 1542 - MARX AND MARXISM

Minimum Credits: 3
Maximum Credits: 3
Having recently passed the 150th anniversary of the publication of capital volume 1, we recognize that our world has changed a great deal since its publication. Yet, in reviewing many of these changes, it is not overstated to say that the works of Karl Marx have provided the transformational impulse. Who was this person, Karl Marx? Why is it that in this post-cold war world his writings continue both to inspire and threaten contemporary readers? How have those inspired by Marx further developed his ideas to constitute the discourse of Marxism? These are some of the questions that this course will raise and try to answer. We will begin with discussions of key works by Marx. Concentrating on the question of culture and cultural analysis, we will then move on to examine some significant contributions to Marxism. The course will end by looking at contemporary attempts at rethinking Marxism.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: DSAS Phil. Think or Ethics General Ed. Requirement

GER 1544 - FREUD AND FREUDIANS

Minimum Credits: 3
Maximum Credits: 3
Freud is one of the most influential thinkers of the 20th century. His groundbreaking work on dreams, the Oedipus complex, and psychoanalytic method have profoundly changed our understanding of the psyche and social interaction. This course provides a basic survey of Freud's most
important and often controversial writings/discoveries within their historical context and with regards to significant criticisms of his work. It includes a brief survey of various branches of psychoanalysis to develop after Freud, especially those of Lacan and Kristeva.

GER 1546 - HOLOCAUST LITERATURE AND FILM

Minimum Credits: 3
Maximum Credits: 3
This course relies on primary cultural sources of the third Reich, especially film, but also literary, visual, architectural, musical, etc. To examine the parameters of Nazi culture. It will examine such diverse aspects as the leader principle, gender roles, racial hygiene, anti-Semitism, mass culture, propaganda, and visions of history. The cultural artifacts will be analyzed both in terms of their aesthetics as well as the social and historical context of their production.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 1548 - NEW GERMAN CINEMA

Minimum Credits: 3
Maximum Credits: 3
Devastated after World War II, starting in the 1960s a number of German directors like Herzog, Fassbinder, Wenders, Kluge, Annders-Abrahms managed to bring international attention back to German cinema. They competed against the film industry of Hollywood under difficult conditions of production, and in many instances made the difficult transition out of the art house and into the mainstream movie theater. Yet these names only represent a small portion of those directors active in the new German cinema. This class will examine the aesthetic and technical contributions of new German cinema as well as the historical and social context of its production. The technological, financial, and intellectual destruction caused by the experience of national socialism and World War II required creative responses that have led to a solid and symbolically rich body of work. In examining the themes and experimental forms of various filmmakers, students will gain insight into the issues that occupied the German public sphere from the 1960s onward.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

GER 1550 - COMPUTATIONAL METHODS IN HUMANITIES

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the use of computational modeling and programming to conduct text-based research in the humanities. Course goals include 1) learning how to identify research questions in the humanities that are amenable to computational analysis and processing and 2) designing and implementing XML-based computational systems to explore those questions. No prior programming experience or knowledge of foreign languages required.

GER 1598 - VIENNA NOW AND THEN: A FIELD TRIP

Minimum Credits: 1
Maximum Credits: 1
This course is a field trip to Vienna that gives students an insight into comparisons between the Austrian capital as gateway to the EU and "Vienna 1900," the major cultural center of the Austrian-Hungarian Monarchy. The course will focus on several key issues: the Austrian, in particular the Viennese role in the European Union and the supranational status of the Habsburg metropolis in Europe 1900; the rise of nationalism, racism, and anti-Semitism now and then; the socio-political situation of minorities; the city's attempts to cope with immigration as well as refugees in the early twentieth century and today; the multifaceted relationships between social classes, genders, and generations now and then; the clash between historicism and modernism in art, architecture, and literature. The field trip is connected to the course GER 1528 VIENNA. Students will visit the historical and civic sites discussed in this course; they will visit the university, national library, and the museums displaying the works of artists and architects such as Klimt, Schiele, and Loos. They will also have an opportunity to meet with a faculty member from the University of Vienna and/or a representative of the city council. The course will be taught in English.
Academic Career: Undergraduate
Course Component: Seminar

This course places the student in a work setting where they can gain additional practical experience in a supervised training environment.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: LG/SNC Elective Basis

GER 1907 - GERMAN LANGUAGE ABROAD: PITT IN BERLIN

Minimum Credits: 1
Maximum Credits: 5
The German Department and the Office of Study Abroad will launch a new "Pitt in Berlin" program in the Spring of 2020. In this program, as well as in some others we have, students of varying language ability will enroll in a language course abroad commensurate with their language level. Their language level is typically determined on-site, however, so students need to enroll ahead of time, not knowing what language course they will place into. For this reason we are creating a generic course number and title, German 1904 "German Language Abroad," to account for these situations. This course number, in effect a "placeholder", will allow students to enroll in a language course according to the regular time schedule. Upon return to Pitt, students meet with the Director of Undergraduate Studies in German to determine where the course taken fits into the language curriculum at Pitt and credit will be awarded accordingly.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GER 1990 - SENIOR THESIS

Minimum Credits: 1
Maximum Credits: 5
A course for senior honors German majors.
Academic Career: Undergraduate

Greek

GREEK 0011 - BEGINNING ANCIENT GREEK 1

Minimum Credits: 5
Maximum Credits: 5
This course is the first half of a two-term sequence introducing students to the morphology and syntax of classical attic Greek. Its purpose is to move students as quickly as possible to the reading of simple Greek prose.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Medieval & Renaissance Studies

GREEK 0021 - BEGINNING ANCIENT GREEK 2
Minimum Credits: 5
Maximum Credits: 5
This course is the second half of a two-term sequence introducing students to the morphology and syntax of classical attic Greek. Its purpose is to move students as quickly as possible to the reading of simple Greek prose.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: GREEK 0011
**Course Attributes:** DSAS Second Language General Ed. Requirement, Medieval & Renaissance Studies

**GREEK 0101 - BEGINNING ANCIENT GREEK 1**

Minimum Credits: 4
Maximum Credits: 4
GREEK 0101 constitutes one-half of the first year of instruction in Ancient Greek. The course introduces students to grammar and vocabulary with a view to reading original Greek texts. It also aims to help students develop effective study skills and habits that will facilitate readings of Greek prose and poetry in the second year and beyond.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis

**GREEK 0102 - BEGINNING ANCIENT GREEK 2**

Minimum Credits: 4
Maximum Credits: 4
GREEK 0102 constitutes the second half of the first year of instruction in Ancient Greek. The course continues to introduce students to grammar and vocabulary, and will allow them to read longer excerpts of original Greek texts towards the end of the term. It also aims to help students develop effective study skills and habits that will facilitate readings of Greek prose and poetry in the second year and beyond.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis

**GREEK 0210 - INTERMEDIATE GREEK: PROSE**

Minimum Credits: 3
Maximum Credits: 3
In this course students consolidate their grasp of Greek grammar and develop their skills of comprehension through close reading of selected prose texts, often one or more of the shorter dialogues of Plato.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: GREEK 0021 or 0102
**Course Attributes:** Medieval & Renaissance Studies

**GREEK 0220 - INTERMEDIATE GREEK: VERSE**

Minimum Credits: 3
Maximum Credits: 3
In this course students are introduced to the morphology and grammar of Homeric Greek and read selected portions of the Iliad or Odyssey.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SNC Elective Basis
**Course Requirements:** PREQ: GREEK 0210
**Course Attributes:** Medieval & Renaissance Studies

Minimum Credits: 1
Maximum Credits: 1
Writing practicum for students taking Greek 1302 as a writing course.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: GREEK 0210 and 0220; PREQ: ENG 0102 or ENGCMP (0002 or 0006 or 0020 or 0200 or 0203 or 0205 or 0207 or 0208 or 0210 or 0212) or ENGFLM 0210 or FP (0003 or 0006)
Course Attributes: West European Studies, Writing Requirement Course

GREEK 1400 - ADVANCED READINGS IN GREEK EPIC
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek epic poets. The specific authors and works vary from term to term; the course may be repeated for credit when the material covered is different.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: GREEK 1300 or 1302

GREEK 1402 - ADVANCED READINGS IN GREEK TRAGEDY
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected Greek tragedies. The specific authors and works vary from term to term; the course may be repeated for credit when the material covered is different.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: GREEK 1300 or 1302
Course Attributes: West European Studies

GREEK 1416 - ADVANCED READINGS IN GREEK HISTORIANS
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek historians. The specific authors and works vary from term to term; the course may be repeated for credit when the material covered is different.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: GREEK 1300 or 1302
Course Attributes: West European Studies

GREEK 1420 - ADVANCED READINGS IN GREEK PHILOSOPHY
Minimum Credits: 3
Maximum Credits: 3
In this course students read selected works by Greek philosophers. The specific authors and works vary from term to term; the course may be repeated for credit when the material covered is different.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PREQ: GREEK 1300 or 1302

GREEK 1700 - GREEK PROSE COMPOSITION

Minimum Credits: 3
Maximum Credits: 3
This course provides students with a thorough review of Greek grammar and practice in the writing of Greek prose.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

GREEK 1800 - HONORS COURSE/MAJORS

Minimum Credits: 3
Maximum Credits: 3
In this course undergraduate majors in classics who wish to graduate with honors (and are otherwise qualified) write an honors paper, usually in conjunction with a Greek reading course at the 1300 or 1400 level.
Academic Career: Undergraduate
Course Component: Thesis Research
Grade Component: Satisfactory/No Credit

GREEK 1900 - INTERNSHIP IN ANCIENT GREEK

Minimum Credits: 1
Maximum Credits: 3
Students may complete an internship for 1-3 credits to gain practical experience in a supervised training environment. Permission from a faculty advisor is required to enroll.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: LG/SNC Elective Basis

GREEK 1901 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes study in Greek in consultation with a member of the faculty.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SNC Elective Basis

GREEK 1902 - DIRECTED STUDY FOR UNDERGRADS

Minimum Credits: 1
Maximum Credits: 6
In this course a student undertakes directed study in Greek under the close guidance of a member of the faculty.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

GREEK 1903 - DIRECTED RESEARCH FOR UNDERGRADS

Minimum Credits: 1
Maximum Credits: 9
In this course a student undertakes directed research in the field of classical civilization under the close guidance of a member of the faculty.
GREEK 1904 - UNDERGRAD RESEARCH ASSISTANTSHIP

Minimum Credits: 1
Maximum Credits: 3
This course enables advanced majors to receive academic credit for serving as assistants to faculty members who are conducting research projects (e.g., compiling bibliography for a new class, preparing a work for publication, creating a conference presentation). This collaborative project will result in a meaningful experience that will provide the student with a foundation in the mechanics of research and publication. Given the variable aspects of this learning experience, there is not official syllabus. However, students and faculty who participate in this course are required to submit a signed contract prior to the start of the semester in which the assistantship will occur. This contract is subject to the approval of the undergraduate committee.

GREEK 1990 - UNDERGRADUATE TEACHING ASSISTANTSHIP IN GREEK

Minimum Credits: 1
Maximum Credits: 5
This course allows students to earn credits for serving as undergraduate teaching assistants in courses listed under the 'Greek' subject code. Admission requires permission of the department chair. Students may repeat for credit.

Hebrew

HEBREW 0101 - ELEMENTARY HEBREW 1

Minimum Credits: 5
Maximum Credits: 5
This course introduces students to the fundamentals of the Hebrew language. We study basic vocabulary, grammar and sentence structure, and learn to read and write Hebrew. Emphasis is learning to speak the language.

HEBREW 0102 - ELEMENTARY HEBREW 2

Minimum Credits: 5
Maximum Credits: 5
Continuation of the introductory work begun in Hebrew 1. Students further develop their reading, writing and speaking skills with the greatest emphasis being placed on oral communication.

HEBREW 0103 - INTERMEDIATE HEBREW 3
Minimum Credits: 3
Maximum Credits: 3
Students continue to develop the skills acquired in Hebrew 2 with emphasis on speaking and on understanding the spoken language. Readings this term include short stories and articles.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HEBREW 0104 - INTERMEDIATE HEBREW 4

Minimum Credits: 3
Maximum Credits: 3
Students continue to develop their Hebrew reading and speaking skills. Sophisticated Hebrew texts are introduced.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HEBREW 0105 - ADVANCED HEBREW 5

Minimum Credits: 3
Maximum Credits: 3
This course is for advanced level students and uses Hebrew language literature, print and electronic media, film, and TV shows. Emphasis is placed on conversation, modern Hebrew literature, and composition.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HEBREW 0106 - BIBLICAL HEBREW

Minimum Credits: 3
Maximum Credits: 3
This course introduces students to the grammar, syntax and vocabulary of Biblical Hebrew
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HEBREW 0111 - ELEMENTARY HEBREW 1

Minimum Credits: 4
Maximum Credits: 4
This course introduces students to the fundamentals of the Hebrew language. We study basic vocabulary, grammar and sentence structure, and learn to read and write Hebrew. Emphasis is learning to speak the language.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HEBREW 0112 - ELEMENTARY HEBREW 2

Minimum Credits: 4
Maximum Credits: 4
Continuation of the introductory work begun in Hebrew 1. Students further develop their reading, writing and speaking skills with the greatest emphasis being placed on oral communication.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
HEBREW 1065 - BIBLICAL HEBREW

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HEBREW 1259 - ISRAELI FILM AND TELEVISION

Minimum Credits: 3
Maximum Credits: 3
This course will survey different aspects of Israeli culture and society as reflected in Israeli cinema and television since the establishment of the state in 1948. No previous knowledge of Hebrew or Israel required. All readings will be in English and we will watch films and TV with English subtitles. Students with proficient Hebrew may enroll in HEBREW 1906 for a 1 credit add-on to work with Hebrew sources.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: DSAS Geographic Region General Ed. Requirement

HEBREW 1902 - DIRECTED STUDY - UNDERGRADUATE

Minimum Credits: 1
Maximum Credits: 4
Students may undertake a variety of individual reading or research projects under the close supervision of a faculty member. Regular meetings are required. Permission of the Jewish Studies coordinator and the faculty member required.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: Letter Grade

HEBREW 1905 - UNDERGRADUATE TEACHING ASSISTANT

Minimum Credits: 1
Maximum Credits: 4
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Satisfactory/No Credit

HEBREW 1906 - HEBREW LANGUAGE ADD-ON

Minimum Credits: 1
Maximum Credits: 4
Students may complete 1-4 credits of independent work in Hebrew as an add-on to a course in which Hebrew texts are taught in translation. Permission from the instructor is required to enroll.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SNC Elective Basis

Health and Human Development

HHD 0005 - LIFE SPAN DEVELOPMENT

Minimum Credits: 3
Maximum Credits: 3
This course follows the developing person from conception until the end of life. The course combines theory, research and practical applications from developmental psychology. Lecture topics include genetic influences on development; prenatal and birth factors; physical, cognitive, social, personality, and cultural variables which influence development in infancy, childhood, adolescence, early-, middle-, and late adulthood.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Attributes:** UPB Behavioral Sciences General Ed. Requirement

### HHD 0031 - MODERN DANCE 1

**Minimum Credits:** 1  
**Maximum Credits:** 1  
Introduces the college student to modern dance as a point of view, rather than a particular technique. There will be exercises to increase strength, and flexibility, as well as to teach techniques of movement, exploration and improvisation. Emphasis is on developing a sensitive awareness of one's own body movement in time and space.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

### HHD 0032 - MODERN DANCE 2

**Minimum Credits:** 1  
**Maximum Credits:** 1  
This course is designed for those students who have mastered beginning dance technique and wish to gain more advanced skills. Advanced technique and compositional work is stressed. Course objectives include increased technical skills, awareness and appreciation of modern dance as an art form, ease in phrasing rhythmic movement and skill in improvisational movement.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** LG/SNC Elective Basis

### HHD 0033 - BALLET 1

**Minimum Credits:** 1  
**Maximum Credits:** 1  
For absolute beginners introducing them to basic fundamentals of the classic ballet technique.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

### HHD 0034 - BALLET 2

**Minimum Credits:** 1  
**Maximum Credits:** 1  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

### HHD 0040 - CHOREOGRAPHY

**Minimum Credits:** 1  
**Maximum Credits:** 1  
The art of making dances. Studies dealing with timing, grouping, energy, quality, etc., Lead to the creation of dances. Designed for students who wish to explore the creative process or for those wanting more advanced dance training.  
**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade
HHD 0041 - JAZZ 1

Minimum Credits: 1  
Maximum Credits: 1  
Fundamentals of jazz dance for beginning dance students. Class includes warm-up, center floor, and cross floor movement combinations, contemporary jazz and pop music is emphasized.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: LG/SNC Elective Basis

HHD 0042 - JAZZ 2

Minimum Credits: 1  
Maximum Credits: 1  
A continuation of the basic fundamentals learned in Jazz 1. More emphasis is placed on longer routines and more complicated movement sequences. It is an intermediate jazz class.  
Academic Career: Undergraduate  
Course Component: Credit Laboratory  
Grade Component: LG/SNC Elective Basis

HHD 0044 - DANCE PRODUCTION

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed to familiarize students with both the technical and production aspects of dance and to increase appreciation of dance in all its forms.  
Academic Career: Undergraduate  
Course Component: Workshop  
Grade Component: LG/SNC Elective Basis

HHD 0050 - SPORTS AND DRUGS

Minimum Credits: 1  
Maximum Credits: 1  
This course presents medical and scientific information about the use of drugs in sports. It is especially designed for college athletes, but should also be of interest to students preparing for careers in athletic training, coaching, exercise science, health and physical education, physical therapy, and sports medicine.  
Academic Career: Undergraduate  
Course Component: Seminar  
Grade Component: Letter Grade

HHD 0060 - INTRODUCTION TO DANCE

Minimum Credits: 3  
Maximum Credits: 3  
A comprehensive overview of dance as an art form and physical activity, covering the history and philosophy of dance. Dance will be examined as a means of communication and expression, and its relationship to other art forms. A particular emphasis will be placed on Western dance forms and its multicultural roots.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

HHD 0196 - FIRST AID AND CPR
HHD 0244 - DANCE PRODUCTION 2

Minimum Credits: 2
Maximum Credits: 2
This course is designed to familiarize students with both the technical and production aspects of dance in all its forms. The students will have experiences with lighting, costume, choreography, public relations, and stage management.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 0473 - DANCE PEDAGOGY

Minimum Credits: 2
Maximum Credits: 2
This course is designed for physical education majors and all students with a desire to learn the how and why of teaching dance in an educational program. Through the lectures the students will cover the educational components of dance, i.e., Dance in education, dance for elementary and secondary schools, dance history and dance resources. The movement lab will introduce the students to the fundamentals of movement.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

HHD 0474 - LIFETIME ACTIVITIES 1

Minimum Credits: 1
Maximum Credits: 1
An introductory course for prospective instructors of health and physical activity. Includes experiences in the following: group exercise focused on aerobic, resistance, and flexibility; aquatic exercise, dance, yoga, Pilates, and others. Also covers topics such as history, safety, and methods of training and conditioning.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

HHD 0475 - LIFETIME ACTIVITIES 2

Minimum Credits: 1
Maximum Credits: 1
An introductory course for prospective instructors of health and physical activity that expands on the content taught in HPA 0474 (lifetime activities 1). Includes experiences in the following: group exercise focused on aerobic, resistance, and flexibility; aquatic exercise, dance, yoga, Pilates, and others. Also covers topics such as history, safety and methods of training and conditioning.
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

HHD 0477 - INTRODUCTION TO EXERCISE SCIENCE

Minimum Credits: 1
Maximum Credits: 1
This course will introduce students to the field of Exercise Science and its related professions. This course is intended for those students considering Exercise Science and its related professions as an academic major and for career placement. This course will involve exposure to the history and contemporary opportunities within Exercise Science that will involve both lecture and applied experiences.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**HHD 0497 - WATER SAFETY INSTRUCTOR**

- Minimum Credits: 2  
- Maximum Credits: 2  
The water safety instructor course is designed to earn certification to teach American Red Cross swimming and water safety courses. The course focuses on planning, organizing, sequencing, skill development, and Red Cross operational policies and procedures.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

**HHD 1001 - INTRO EDUCATIONAL PSYCHOLOGY**

- Minimum Credits: 3  
- Maximum Credits: 3  
A survey of current problems in education which psychological theory and research can address. Topics include developmental approaches to teaching, educational applications of learning theory, classroom management, and testing strategies for teachers.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**HHD 1002 - DEVELOPMENT: CONCEPTION THROUGH EARLY CHILDHOOD**

- Minimum Credits: 3  
- Maximum Credits: 3  
This course follows the developing child from the moment of conception until early adolescence. The course content includes the biological foundations of development, physical and motor changes, language, cognition, sex role development, personality, family and peer relationships, school influences, and examples of deviant development. Theory and application are integrated.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

**HHD 1003 - DEVELOPMENT: MIDDLE CHILDHOOD THROUGH ADOLESCENCE**

- Minimum Credits: 3  
- Maximum Credits: 3  
Adolescence is studied from a developmental perspective. Discussion begins with the history and cultural varieties of adolescence and proceeds to cover psychological accompaniments to puberty. Lectures and readings deal with cognitive growth, identity formation, moral development, family and peer relationships, psychological disturbance and education through the adolescent years.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: PSYED 1002

**HHD 1004 - ATTENTIONAL TEACHING PRACTICES**

- Minimum Credits: 3  
- Maximum Credits: 3  
**Academic Career:** Undergraduate
HHD 1005 - TEACHING GLOBALLY AND LOCALLY IN A DIVERSE WORLD

Minimum Credits: 3
Maximum Credits: 3
Students will be able to apply this knowledge specifically to their teaching practice as they begin their field experiences. We will critically engage in understanding the complex factors that impact education in the United States today, with an emphasis on Urban Education. A review of past teaching policies and practices will support a better understanding of the American schooling system in the 21st Century. In the Teaching Globally and Locally in a Diverse World class pre-service teachers will: (a) discuss strategies for teaching all children in a responsive, equitable manner, (b) learn to analyze the effects that marginalization has on children, (c) investigate the impact that race, culture, and socioeconomic status have on a child's education, and (d) review school reform and policy practices that have created various types of schools available to students in the United States. Knowing that the landscape of education is changing in the United States we will discuss the globalization of schooling in our society, along with the need for a higher technological understanding to prepare children for success in today's world.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1007 - METHODS OF EVIDENCE-BASED PRACTICE

Minimum Credits: 3
Maximum Credits: 3
This course provides an overview of both quantitative and qualitative research methods. Particular attention is paid to methods of observation, interviewing, and summarizing qualitative data. Students use qualitative or mixed methods to produce a final research project.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: CREQ: PSYED 1002

HHD 1010 - DEVELOPMENTAL DISABILITIES

Minimum Credits: 3
Maximum Credits: 3
A study of developmental disabilities and their impact on child/family development. Includes discussion of philosophy of service, legislation, and service systems.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: PSYED 1002

HHD 1011 - APPLIED HUMAN ANATOMY

Minimum Credits: 3
Maximum Credits: 3
This is a non-laboratory lecture discussion course in which all body systems are investigated. Primary emphasis is placed on the skeletal, articular, muscular, cardiovascular and nervous systems. In addition, the basic mechanical principles underlying human movement and an understanding of human structure are used to analyze movement and physical skills.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1012 - APPLIED HUMAN ANATOMY LAB

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade

**HHD 1013 - DEVELOPMENTAL PSYCHOPATHOLOGY**

Minimum Credits: 3
Maximum Credits: 3
Examines the traditional medical-model view of psychopathology in children and youth, presents alternative ways of looking at this behavior, and gives an introduction to the interpersonal skills needed for therapeutic intervention.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade
**Course Requirements:** CREQ: PSYED 1003

**HHD 1016 - DEVELOPMENT CURRICULUM AND ACTIVITIES**

Minimum Credits: 3
Maximum Credits: 3
Study of the theoretical rationale for activity and environmental programming; its relationship to the development of children and youth; and practical applications in media selection, use, and environmental design for various populations.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** LG/SU3 Elective Basis
**Course Requirements:** PLAN: Applied Developmental Psychology(BS)

**HHD 1021 - THEORY, MEANING AND PRACTICE OF PLAY AND ACTIVITY**

Minimum Credits: 3
Maximum Credits: 3
This course provides a comprehensive overview of the role of play and activity in human development, with a particular focus on ways of utilizing play and activity to promote positive growth in social, emotional, physical, and cognitive domains; and on interpreting the meaning of individual and group play and activity. Play and activity in the lives of persons of all ages will be considered with some emphasis on the early and school years. While academic learning is essential in this course, the focus will be on hands-on, real play as the ideal way to learn about it, and encouragement of a life-long playful spirit.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade

**HHD 1024 - FAMILY DYNAMICS**

Minimum Credits: 3
Maximum Credits: 3
Study of different family types in the American culture and an in-depth analysis of how each family structure contributes to the development (both functionally and dysfunctionally) of all family members, especially the children and youth of the family.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade
**Course Requirements:** PREQ: PSYED 1013

**HHD 1025 - CONTEMPORARY ISSUES IN COMMUNITY**

Minimum Credits: 3
Maximum Credits: 3
An introduction to the scope, organization and current issues in the child development and child and youth care field as related to the profession and to the variety of services to children and families. Field experiences include site visits to agencies providing a variety of services.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

HHD 1028 - DEVELOPMENTAL PRACTICE SEMINAR 1

Minimum Credits: 3
Maximum Credits: 3
A seminar for the integration of theory, research, practice skills, and experience related to developmentally focused child and youth care practice. The seminar is particularly focused on the internship experience and the related knowledge base.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HHD 1029 - DEVELOPMENTAL PRACTICE SEMINAR 2

Minimum Credits: 3
Maximum Credits: 3
A continuation of Developmental Practice Seminar 1 for the integration of theory, research, practice skills and experience related to developmentally focused child and youth care practice. The seminar is particularly focused on the internship experience and the related knowledge base.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PLAN: Applied Developmental Psych (BS)

HHD 1031 - RESEARCH IN SPORTS SCIENCE

Minimum Credits: 3
Maximum Credits: 3
A course designed to provide the student an understanding of the role of measurement and evaluation in the educational process, the ability to select and/or develop and administer appropriate tests, and the ability to use appropriate mathematical and statistical techniques in data analysis. Additionally the student will gain an introduction to the research process as practiced in health, physical education and sport.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1032 - PSYCHOSOCIAL ASPECTS OF ILLNESS

Minimum Credits: 3
Maximum Credits: 3
This course is designed to enable students to understand the nature of and dynamics of pediatric illness, appreciate the impact an acute or prolonged health care experience may have upon children throughout the developmental process, better understand a family health care philosophy and gain an understanding of the multi-faceted role child life specialists play in today's health care environment.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis

HHD 1033 - HUMAN PHYSIOLOGY

Minimum Credits: 3
Maximum Credits: 3
Develops knowledge of the functions of the human body. Covers the major systems (e.g., Circulatory, digestive, endocrine, excretory, nervous, reproductive, thermoregulatory). Introduces key concepts for understanding the physiological basis of human performance in sport, dance, and exercise.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1034 - EXERCISE SCIENCE SEMINAR 1

Minimum Credits: 2
Maximum Credits: 2
This one credit course will provide an introductory overview of the academic discipline and profession of exercise science and its related fields. The course will also provide established guidelines and procedures necessary for those students enrolled in the university of Pittsburgh movement science undergraduate program.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PLAN: Health and Physical Activity (BS

HHD 1035 - EXERCISE SCIENCE SEMINAR 2

Minimum Credits: 1
Maximum Credits: 1
This one credit course will provide final exposure to the profession of exercise science and its related fields. The course will also provide established guidelines and procedures necessary for professional interviews, resume, and other requirements necessary for job or graduate school application in an exercise or other health related field.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

HHD 1036 - DEVELOPMNTL MEANING CULTL DISTN

Minimum Credits: 3
Maximum Credits: 3
An exploration of major dimensions and issues of cultural diversity with a particular emphasis on their impact on the developing child and their implications for programs for children and youth.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Attributes: Global Studies

HHD 1041 - CHILD & YOUTH WORK PRACTICE 1

Minimum Credits: 1
Maximum Credits: 6
A university approved, agency based, supervised internship in developmental/interventive practice. This internship may focus on work with and/or for children, youth and families. Fifty hours of placement are required for each credit of registration.

Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

HHD 1042 - PHYSIOLOGY OF EXERCISE

Minimum Credits: 3
Maximum Credits: 3
A lecture and laboratory class in which the effects of exercise and sport upon body systems will be investigated. Reviews knowledge concerning physiological mechanisms which relate to improvements of physical performance.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: HPA 1033 and 1011 and 1012; CUM GPA 2.50; PLAN: Health and Physical Activity (BS)

HHD 1043 - CHILD/YOUTH PRACTICE 2

Minimum Credits: 6
Maximum Credits: 6
This course is a university approved, agency based, supervised internship in applied developmental practice which may or may not involve intervention practices. The internship may focus on work with and/or for children, youth and/or families. Fifty hours of on-site placement are required for each credit of registration.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PLAN: Health and Physical Activity (BS)

HHD 1044 - BIOMECHANICS

Minimum Credits: 3
Maximum Credits: 3
Required course for undergraduate students in athletic training, exercise science, and teacher education. Provides studies to develop knowledge of biomechanical concepts and principles. Includes experiences to develop proficiency in the diagnosis of motor performance errors. Also places emphasis on applications of biomechanics in making curriculum and instruction decisions in physical education programs.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Applied Developmental Psych (BS)

HHD 1045 - DIRECTED RESEARCH PRACTICUM

Minimum Credits: 2
Maximum Credits: 2
Students complete a comprehensive review of literature on a movement-related problem and then, under the guidance of a faculty member, design, conduct, and report an original research project.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: LG/SU3 Elective Basis
Course Requirements: HPA 1045

HHD 1050 - SUPRVSN ADM CHLD YOUTH WRK SETNG

Minimum Credits: 3
Maximum Credits: 3
This course focuses on issues and skill development in areas related to management and supervision in child and youth care programs. A modular format will cover the function of supervision and administration in child care; communication skills; supervisory functions and skills; program development and management; and current issues in child and youth care administration.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Applied Developmental Psych (BS)

HHD 1080 - PSYCHOLOGY AND THE MEDIA

Minimum Credits: 3
Maximum Credits: 3
Psychology and the media focuses on impact of electronic media (radio, television and internet) upon society, especially children. Course introduces students to various psychological theories (e.g., Social cognitive theory, information processing, uses and gratifications theory) to explain how we
respond to and learn from the media. Topics receiving special attention include media violence, advertising, health-related behaviors, news, media effects upon academic behavior, and cultural issues. A visit to a local radio or television station will be arranged.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1089 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HHD 1098 - DIRECTED RESEARCH

Minimum Credits: 1
Maximum Credits: 6
Student pursues research under the direction of a faculty member.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis

HHD 1099 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: LG/SU3 Elective Basis

HHD 1141 - FITNESS FOR INSTRUCTORS

Minimum Credits: 2
Maximum Credits: 2
Fitness for instructors will teach the student the major elements of fitness. How to assess fitness levels, determine fitness goals, design fitness programs and facilities. The course will be a combination of classroom, exercise, and practical experiences.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade

HHD 1169 - HEALTH FITNESS PRACTICUM 1

Minimum Credits: 1
Maximum Credits: 1
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: HPA 0474 and 0475 (MIN GRADE 'C-'); PLAN: Health and Physical Activity (BS), CUM GPA 2.50

HHD 1170 - HEALTH FITNESS PRACTICUM 2
This 1-credit course will provide HPA students the opportunity to observe, implement and practice the application of exercise testing, assessment and prescription, training, group instruction, and supervision in the health-fitness field using principles and techniques related to the HPA curriculum in a real health and fitness setting.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### HHD 1171 - RESISTANCE TRAINING INSTRUCTOR

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to provide students with the knowledge and practical skills needed to work one-on-one with fitness participants and to lead resistance training groups including: basic machine and free weight training skills; proper resistance training techniques; machine and free weight positioning; kinematics and placement; resistance training modifications and utilization of equipment such as kettle bells, stability balls, medicine balls, resistance bands and other tools. Upon completion of this course, students will be competent to develop high quality resistance training programming. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: HPA 0474 AND HPA 0475 (MIN GRADE 'C-')

### HHD 1172 - GROUP FITNESS INSTRUCTOR

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to provide students with the knowledge and practical skills needed to lead contemporary group exercise classes including Indoor Cycling, Water Aerobics, Aquatic Conditioning, Boot Camp Fitness, etc. Upon completion of this course, students will be competent to lead dynamic, high quality group exercise. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: HPA 0474 AND HPA 0475 (MIN GRADE 'C-')

### HHD 1173 - AEROBICS INSTRUCTOR

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to provide students with the knowledge and practical skills needed to lead aerobic group exercise classes including: General aerobics, hi-lo, step and Kickboxing. Upon completion of this course, students will be competent to lead dynamic, high-quality group exercise classes. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PREQ: HPA 0474 AND HPA 0475 (MIN GRADE 'C-')

### HHD 1174 - YOGA AND PILATES INSTRUCTOR

Minimum Credits: 1  
Maximum Credits: 1  
This course is designed to provide students with the knowledge and practical skills needed to lead Yoga and Pilates group exercise. Upon completion
of this course, students will be competent to lead dynamic, high-quality group exercise classes in Yoga and Pilates. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of resistance training instruction.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade
**Course Requirements:** PREQ: HPA 0474 AND HPA 0475 (MIN GRADE ’C’-)

**HHD 1175 - CARDIO CONDITIONING INSTRUCTOR**

- **Minimum Credits:** 1
- **Maximum Credits:** 1
This course is designed to provide students with the knowledge and practical skills needed to lead cardiovascular conditioning group exercise classes including: General aerobics, hi-lo, step, cycle exercise, Kickboxing, and others. Upon completion of this course, students will be competent to lead dynamic, high-quality group exercise classes with a focus on cardiovascular conditioning. It will provide necessary instructor skills such as leadership, appropriate exercise selection and program design, and effective cueing. Students will experience introductory leadership in a variety of traditional and contemporary modes of cardiovascular conditioning exercise.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade

**HHD 1198 - DIRECTED STUDY**

- **Minimum Credits:** 1
- **Maximum Credits:** 3
Student pursues study of various topics under the direction of faculty.

**Academic Career:** Undergraduate
**Course Component:** Directed Studies
**Grade Component:** LG/SNC Elective Basis

**HHD 1199 - DIRECT STUDY**

- **Minimum Credits:** 1
- **Maximum Credits:** 9
Directed Study working with a faculty member with Study Abroad

**Academic Career:** Undergraduate
**Course Component:** Directed Studies
**Grade Component:** Letter Grade

**HHD 1211 - ATHLETIC INJURY PREVENTION**

- **Minimum Credits:** 3
- **Maximum Credits:** 3
This course is designed to provide the student with an introduction to the athletic training profession. Topics to include medical terminology, mechanisms of injury, and recognition and treatment of common athletic injuries to major body parts.

**Academic Career:** Undergraduate
**Course Component:** Lecture
**Grade Component:** Letter Grade
**Course Requirements:** CREQ: HPA 1212

**HHD 1212 - ATHLETIC INJURY PREVENTION LABORATORY**

- **Minimum Credits:** 1
- **Maximum Credits:** 1
An introduction to basic taping techniques and injury evaluation techniques used in the profession of athletic training. Basic supportive strappings and paddings for immediate care and competition are presented as well as basic joint evaluation procedures, massage, and crutch fitting.
Academic Career: Undergraduate
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: CREQ: HPA 1211

**HHD 1224 - FITNESS ASSESSMENT AND EXERCISE PRESCRIPTION**

Minimum Credits: 3
Maximum Credits: 3
Fitness for instructors will teach the student the major elements of fitness. How to assess fitness levels, determine fitness goals, design fitness programs and facilities. The course will be a combination of classroom, exercise, and practical experiences.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: HPA 1033, HPA 1011 and HPA 1012; PLAN: Health and Physical Activity

**HHD 1226 - ASSESSMENT AND PRESCRIPTION FOR SPECIAL POPULATIONS**

Minimum Credits: 3
Maximum Credits: 3

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

**HHD 1233 - PRINCIPLES OF STRENGTH AND CONDITIONING**

Minimum Credits: 2
Maximum Credits: 2
Instruction is provided describing the principles for development of pre-season, in-season and off-season strength and conditioning programs. Laboratory experiences will include the theory and techniques of operating strength training equipment.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PREQ: HPA 0474, HPA 0475, HPA 1033, HPA 1011 and HPA 1012; PLAN: Health and Physical Activity (BS)

**HHD 1234 - COMMUNITY-BASED ACTION RESEARCH 2**

Minimum Credits: 2
Maximum Credits: 2

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

**HHD 1235 - COMMUNITY-BASED ACTION RESEARCH 1**

Minimum Credits: 2
Maximum Credits: 2

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade

**HHD 1241 - TEACHING EXPERIENCE 1**

Minimum Credits: 1
Maximum Credits: 1
One term clinical teaching experience with an instructor in "basic instruction physical education". Responsibilities include: teaching undergraduate students basic skills, physical fitness, and safety.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

### HHD 1242 - TEACHING EXPERIENCE 2

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

One term clinical teaching experience with an instructor in "basic instruction physical education". Responsibilities include teaching undergraduate students basic skills, physical fitness, and safety.

**Academic Career:** Undergraduate  
**Course Component:** Credit Laboratory  
**Grade Component:** Letter Grade

### HHD 1300 - NUTRITION IN EXERCISE AND SPORT

- **Minimum Credits:** 1  
- **Maximum Credits:** 1  

This course will provide the student with basic nutritional information as it pertains to sport and exercise performance. Topics of discussion include weight reduction and management, nutritional requirements for athletic performance and maintenance of a healthy lifestyle, proper eating habits, diet fads, disordered eating, and supplementation.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### HHD 1485 - NUTRITION AND HEALTH

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Nutrition and energy intake have been linked to health related outcomes. The focus of this course will be on educating students on the basic principles of proper nutrition, and how nutrition plays a role in the prevention and treatment of chronic diseases.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade

### HHD 1486 - BEHAVIOR CHANGE STRATEGIES

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will focus on behavioral strategies for modifying health related behaviors. Primary focus will be placed on physical activity, eating behaviors, and weight control. Emphasis will be placed on practical application of behavioral principles in health related environments.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** RESTRICTED HPA BS MAJORS

### HHD 1487 - CHRONIC DISEASE AND OBESITY

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will focus on treatment approaches to obesity including behavioral, pharmacological, and surgical procedures. This will involve expanding on existing knowledge of energy balance, physical activity, nutrition, and behavior modification. The application of this knowledge will encompass the development of interventions to address the obesity epidemic and provide practical knowledge in this area.

**Academic Career:** Undergraduate
HHD 1488 - WEIGHT MANAGEMENT AND PHYSICAL ACTIVITY

Minimum Credits: 2  
Maximum Credits: 2  
This course is designed for students who meet the clinical criteria for being overweight (body mass index > 25 kg/m²) and who desire to lose weight, improve their nutrition, and increase their exercise. This course will combine instruction on behavioral techniques to lose and maintain weight loss along with supervised cardiovascular and resistance exercise. Students will be assessed at the beginning and end of the course to monitor changes in weight, body composition, fitness and other factors. 

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

HHD 1489 - CONSIDERATIONS FOR HEALTH AND FITNESS PROGRAMMING

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

HHD 1491 - TEACHING HEALTH AND WELLNESS IN ELEMENTARY SCHOOLS

Minimum Credits: 3  
Maximum Credits: 3  
This class will focus on those factors that affect the health and well-being of children and how teachers may, through their work, promote the health of children both in and outside the educational setting. We will learn the importance of both promoting a healthy lifestyle within the young and the importance of advocating for a healthy environment in which all children and adults may flourish. Students will plan learning activities that will enhance the health knowledge, skills, attitudes and experience of young children. 

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

HHD 1542 - EVIDENCE-BASED INTERVENTIONS IN REAL WORLD CONTEXTS I

Minimum Credits: 3  
Maximum Credits: 3  
Evidence-based interventions (EBIS) are the foundation of effective and high-quality prevention and intervention programs in education, human services, and healthcare. Both pre-service and continuing education of interdisciplinary professionals must emphasize the acquisition of knowledge and applied competencies about diverse ebis in this continuously evolving area. Many forms of prevention and intervention are used in education, human services, and healthcare, but few such practices have 'practice-based evidence' conducted in real-world settings which validate their continued use. Thus, in this course, students will gain knowledge and skills in evidence-based contextual and individual interventions, their content, methodology, implementation, and evaluation. The course will help students who are interventionists but is not primarily clinical in orientation. Rather, it is designed to prepare future leaders’ practitioners, researchers, program administrators/directors, program evaluators, and policy specialists - in best practices and their implications 

Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade

HHD 1622 - CHILD LIFE PRACTICUM

Minimum Credits: 1  
Maximum Credits: 1
Credits for approved hospital-based child life practicum experience.
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: H/S/U Basis

HHD 1722 - CHILD LIFE INTERNSHIP

Minimum Credits: 1
Maximum Credits: 1
Credits for approved hospital-based child life internship placement.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: H/S/U Basis
Course Attributes: Undergraduate Internship

HHD 1995 - SPECIAL TOPICS

Minimum Credits: 3
Maximum Credits: 3
A flexible curriculum oriented to special research topics of interest to faculty or current issues of concern to educators. Focused on areas within either developmental movement and sport studies or exercise physiology.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SU3 Elective Basis
Course Requirements: PLAN: Health and Physical Activity (BS)

HHD 1996 - CLINICAL INTERNSHIP

Minimum Credits: 12
Maximum Credits: 12
Supervised clinical experience for the B.S. Degree student. The student is placed in a clinical setting appropriate to his/her degree interests and career goals and must complete a minimum of 25 hours of clinical work per credit hour. Supervision is provided by both a cooperating clinical supervisor and the university clinical advisor.
Academic Career: Undergraduate
Course Component: Internship
Grade Component: Letter Grade
Course Requirements: PREQ: HPA 1485, HPA 1011, HPA 1012, HPA 1031, HPA 1033, HPA 0474, HPA 0475, HPA 1224, HPA 1044, HPA 1042, HPA 1486, (HPA 1169 or 1170), HPA 1233, HPA 1487, HPA 1226, HPA 1489, and HPA 1035 (MIN GRADE 'C-')
Course Attributes: Undergraduate Internship

HHD 1998 - DIRECTED STUDY

Minimum Credits: 1
Maximum Credits: 6
The student proposes and carries out an independent study project under the direction and supervision of an appropriate member of the faculty.
Academic Career: Undergraduate
Course Component: Directed Studies
Grade Component: H/S/U Basis

Health and Rehabilitation Scs

HI 1011 - CLINICAL SCIENCES IN HEALTH INFORMATION MANAGEMENT

Minimum Credits: 3
Maximum Credits: 3
This course has multiple topics, including an introduction to the structure of human cells, tissues, organs and organ systems, and functions associated with them; a general overview of the predisposing factors and direct causes of disease, as well as their effects on the human body; an introduction to pharmacology; and word construction, pronunciation, spelling, definition and use of terms related to all areas of medical science, hospital service and health related professions.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** Restricted to PLANS: HIM-BS, BPH, or BS-H

**HRS 1000 - INTRODUCTION TO RESEARCH**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

The study of the nature of research and the applications of the scientific approach in the research procedures. The course focuses on concepts, design techniques and interpretations, as well as limiting factors and ethical considerations.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** PLAN: NS-BS, NS-BS (NSNDMS-TR), ND-MS (NSBS-TR)

**HRS 1001 - CASE STUDIES IN THE HEALTH AND REHABILITATION SCIENCES**

- **Minimum Credits:** 2  
- **Maximum Credits:** 2  

This interprofessional course will provide a dynamic introduction to the health and rehabilitation professions through case study representations and interactive engagement with faculty and students from the programs being represented each class. Students in the course will gain insight into each of the disciplines in the School of Health and Rehabilitation Sciences and the intersection with medical professions to create effective interdisciplinary healthcare teams.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 1006 - INTRO TO HUMAN NUTRITION**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course will cover an overview of the scientific principles of nutrition and application of these principles to humans throughout the life cycle. Major focuses of the course are the classification and function of the six major nutrients, review of current nutrition standards, safety of the food supply, and nutrition misinformation.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HRS 1008 - APPLC OF STATCL CONCEPTS IN HIM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

Designed to present student with the understanding of the research process. Student learns to analyze scientific reports to communicate with statisticians when research problems arise.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.
HRS 1009 - ORGANIZATIONAL THEORY & BEHAVIOR

Minimum Credits: 3
Maximum Credits: 3
The primary purpose of this course is to facilitate the student's attaining a more comprehensive, integrated and useful understanding of organizational culture, systems and behavior. The overall emphasis will be on formal organizations in both the public and private sector, however, the theory and concepts will be transferable to any type of organization.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS)

HRS 1017 - INTRODUCTION TO EPIDEMIOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course will introduce basic concepts of epidemiology for professionals in health and rehabilitation. Descriptive epidemiology, morbidity and mortality studies, and experimental epidemiology will be some of the topics explained and addressed.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
Course Attributes: Global Studies

HRS 1018 - SURVEY OF HEALTH AND REHABILITATION PROFESSIONS

Minimum Credits: 2
Maximum Credits: 2
An interdisciplinary faculty team will introduce students to health science professions in physical therapy and athletic training, occupational therapy, speech-language pathology and audiology, rehabilitation counseling, health information management, rehabilitation technology, emergency medicine, and disability studies. Classes will feature lectures and hands-on activities.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Satisfactory/No Credit
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1023 - HUMAN PHYSIOLOGY

Minimum Credits: 4
Maximum Credits: 4
This course has been designed in an effort to provide pre-clinical students with a foundational scientific knowledge base and conceptual understanding of physiological processes. Each organ system, and its contribution to the maintenance of homeostasis, will be discussed. Further, the essential components of each system will be explored, to the extent that life is supported. Some disease states will be discussed, in order to exhibit certain processes.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Clinical Dietetics-Nutrition (BS or BSH or BPH) or (NDNUTR-ND) or (NS-BS)

HRS 1025 - INTRODUCTION TO MICROBIOLOGY

Minimum Credits: 3
Maximum Credits: 3
An overview of medical microbiology introduces the student to medically important bacteria, fungi, viruses, parasites and to immunity.
Academic Career: Undergraduate
Course Component: Lecture
HRS 1052 - TOPICS IN CLINICAL PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PROG: Sch Hlth & Rehabilitation Scs

HRS 1095 - COMMUNITY CONNECTOR COURSE

Minimum Credits: 2
Maximum Credits: 2
This course is especially well-suited for students from SHRS, PHARM, NUR and School of Social Work. This seminar focuses on the patient population which is a high risk population who are vulnerable to frequent readmissions to the hospital. Emphasis will be placed on: 1) understanding this patient population, the health system and health behavior challenges associated with this population, and systematic needs associated with reducing their health care needs 2) The course will include presentations by researchers, clinicians, and healthcare industry experts. Students will need to be available for approximately 6, out-of-classroom activities during the semester. This course will expose students to the patient population through visits with clinicians at the hospital, home, and community, including in-home assessments, patient education sessions, and behavior change (motivational interviewing) techniques. Students may be paired with a nurse, speech language pathologist, occupational therapist, or physical therapist during one of these activities. Each out-of-classroom visit often requires a 4-hour block of time.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1099 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Provides advanced students an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.
Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SU3 Elective Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1421 - SECURITY, PRIVACY AND LEGAL ISSUES OF HEALTH INFORMATION SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Students in this course will explore legal, security, and privacy issues related to health information systems. Data availability, integrity and confidentiality of databases and networks, computer security, public key infrastructure, encryption/decryption techniques, and data recovery will be addressed as well as risk assessment, security policies, HIPAA, privacy, applicable health laws, and ethical issues in the management of health information.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1422 - COMPUTER PROGRAMMING FOR HEALTH INFORMATICS
Minimum Credits: 3
Maximum Credits: 3
This course is designed to introduce advanced computer programming technologies. The course will provide students with skills of solving real health informatics problems using computer programs. This course is not designed as first computer programming class. The instructor assumes that students have taken and are familiar with one or a few programming languages (such as BASIC, C/C++, JAVA, C#, PERL, PYTHON, RUBY) prior to taking this class. One or multiple programming languages may be used in this class to solve health informatics problems. This course is hands-on and project-oriented.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1424 - DATA BASE MANAGEMENT IN HEALTH CARE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1425 - GENOMICS AND PERSONALIZED CARE

Minimum Credits: 3
Maximum Credits: 3
This course is designed as an introductory-level course to data analytics and its application in genomics. In this course, students will learn techniques on data collection, data processing, modeling, data visualization, and result interpretation. Specific examples from genomics will be used to demonstrate the details of these techniques. Students will work on individual projects to extensively practice their data analytics skills. A number of web-based data analysis tools will be used in this course; therefore, students are not required to write their own data analysis programs.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1515 - REHABILITATION PSYCHOLOGY

Minimum Credits: 3
Maximum Credits: 3
This course explores rehabilitation psychology and the target population of this clinical psychology specialty, individuals with chronic illness and disability. Psychology and health professionals, regardless of their chosen career profession, will encounter persons with chronic illness and disability (CID). This course provides an overview of key concepts in working with individuals with CID, a discussion of different populations presenting with CID, and examination of evidence based approaches to intervention, and a review of diverse contexts in which counseling and psychology professions treat and interact with persons with CID.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1700 - COLLEGE ACHIEVEMENT AND CAREER PREPARATION SEMINAR

Minimum Credits: 1
Maximum Credits: 1
This course will focus on career development and job-placement theories, legislation, constructs, and research for persons with disabilities. Through this lens, the course will cover the history of and current practices related to self-advocacy, success strategies, and rights and responsibilities of persons with disabilities. The course will cover time management and goal setting, development of an individual educational plan and identification of services and programs that will lead to college success, and career planning including job-search and employer-negotiation strategies and
identification of community, state, and national resources of employment assistance. Using enablement and disablement models, leaders in the disability community will be invited to discuss their career pathways. The course will specifically focus on occupational and labor market information related to assistive technology and related health science and engineering. This course may be of interest to students with disabilities; students pursuing careers related to disability support, policy, or legislation; special education; and vocational/rehabilitation counseling.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1701 - INTRODUCTION TO ORTHOTICS AND PROSTHETICS

Minimum Credits: 2
Maximum Credits: 2
This will be a lecture, seminar, and laboratory course introducing some of the applied science and clinical aspects of the orthotics and prosthetics professions. Topics include: an overview of the profession; introduction to some basic anatomy, kinesiology and biomechanics related to orthotics and prosthetics; some pathologies, disabilities, injuries treated with orthoses or prostheses; introduction to patient evaluation and measurement; and introduction to fabrication of custom orthotics and prosthetics, using laboratory equipment. The course will be taught using hypothetical or actual case studies.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1702 - FUNDAMENTALS OF REHABILITATION ENGINEERING & TECHNOLOGY 1 LAB COMPONENT

Minimum Credits: 1
Maximum Credits: 1
This is the 1-credit lab component associated with HRS 1704. It is optional, for those who wish to get the hands-on experience in a clinic setting. Do not register for this course if you have not also registered for HRS 1704. Introduction to fundamental principles and practices related to multiple areas of assistive technology. Technology areas include: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomics, and man/machine modeling. In addition, common terminology, disability ethics and models of service delivery related to assistive technology are discussed.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1704 - FUNDAMENTALS OF REHABILITATION ENGINEERING & TECHNOLOGY 1

Minimum Credits: 2
Maximum Credits: 2
Introduction to fundamental principles and practices related to multiple areas of assistive technology. The technology area includes: seating and wheelchair mobility, augmentative communication, environmental control, computer access, transportation safety, prosthetics, worksite ergonomic, and man/machine modeling. In addition, common terminology, disability ethics, and models of service delivery related to assistive technology are discussed. **This course has been 3 credits in the past, which included a hands-on lab component. Due to the need for social distancing, this course is now 2 credits with an optional 1-credit lab component. If you wish to take the lab component, please also register for HRS 1702.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1706 - FUNDAMENTALS OF REHAB & ASSISTIVE TECHNOLOGY DESIGN

Minimum Credits: 4
Maximum Credits: 4
This course is the first course in a two-course sequence on Rehabilitation Engineering Design. RT 1102/2102 is in the Fall, and 1207/2207 is in the Spring. RT 1102/2102 covers the fundamentals of product design and development with a particular emphasis on assistive and rehabilitative technologies. The goal of this course is for students to learn both the design process and the tools necessary to develop high-quality designs.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.
Course Attributes: University Honors Course

**HRS 1709 - DSGN/FABRICATION WITH ENGR MATLS**

Minimum Credits: 1
Maximum Credits: 1
Course designed to teach students basic skills of designing and fabricating mechanical mechanisms and components. Solely lab based and will use "learn by doing" approach. Students gain experience working with engineering materials such as wood, plastics, aluminum, brass and steel. Fabrication techniques of turning, milling, cutting, drilling, tapping and welding will be used. Participate in the design and fabrication of various devices with increasing complexity. Shop safety, tool section, and equipment maintenance will be an important component of the course.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: H/S/U Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 1718 - PROJECT BASED TECHNOLOGY DESIGN**

Minimum Credits: 3
Maximum Credits: 3
This course is the second course in a two-course sequence on Rehabilitation Engineering Design. HRS 1706/2706 is in the Fall, and 1718/2718 is in the Spring. HRS 1718/2718 is a project-based design course in which students use design methods and tools learnt in 1706/2706, follow an iterative design and testing process with clients and experts, and develop assistive technology device prototypes for their clients.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HRS 1746 - SERVICE LEARNING THROUGH SUPERVISED FIELD PLACEMENTS IN REHAB AGENCIES**

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PREQ: HRS 1730 or 1732; MIN GRADE: ‘C-’ for listed Courses

**HRS 1905 - INTER-PROFESSIONAL STUDIES IN HEALTH, REHABILITATION AND DISABILITY IN IRELAND**

Minimum Credits: 2
Maximum Credits: 2
This short spring-break study abroad program is designed for a broad range of students with health-related interests. The course will help students develop inter-disciplinary clinical and research insights while addressing health, disability, rehabilitation and related issues. The programs provides students with an early introduction to the scope of practice of related disciplines and to models of inter-professional practice. Dublin, Ireland delivers an international context and learning opportunity that allows students to appreciate the influences of different policies and systems on collaborative clinical practices.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1906 - EDUCATION POLICY AND PRACTICE IN NORTHERN IRELAND

Minimum Credits: 3
Maximum Credits: 3
In this course, which will involve a combination of classroom and community based learning, students will learn about education policy and practice within the social and cultural context of Northern Ireland. Students will explore a wide range of topics including: education policy with specific reference to special education needs, the role of play in cognitive development, physical literacy, issues of disadvantage and mental health, models of collaborative, inter-professional practice, inclusion and equity in education, and community engagement.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 1909 - SUSTAINABLE FOOD SYSTEMS

Minimum Credits: 3
Maximum Credits: 3
Our food system is a multifaceted network of interconnected systems and relationships. In order to be able to feed ourselves well into the future, it must be sustainable. A sustainable food system is a system in which healthy food is provided to people while balancing the environmental, social and economic impacts. These dynamics force stakeholders to confront synergies and tradeoffs in agricultural practices, harvesting, transportation, manufacturing and distribution, healthy diets, and a reduction in wasted food.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HRS 2004 - PATHOPHYSIOLOGY ACROSS THE LIFE SPAN

Minimum Credits: 4
Maximum Credits: 4
This course is designed to provide the student with a comprehensive theoretical foundation of the phenomena that produce alterations in human physiologic function in diverse populations across the life span. Information gained in this course will prepare the student for subsequent courses related to the diagnosis and management of disease processes associated with pathophysiologic dysfunction/alterations in people of various ethnic/cultural groups across the life span.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HRS 2008 - ENTREPRENEUR SKILLS FOR NUTRITION PROFESSIONALS

Minimum Credits: 3
Maximum Credits: 3
This course will focus on the components of business planning, implementation and marketing for dietetics related products and services in a variety of settings. Working in teams and independently, students will identify potential products and services, develop business and marketing plans including financial and staffing considerations and present their plan to a panel of their peers and potential "buyers".
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: (Coordinated Mster in Dietetics); or SUBPLAN: (Clinical Dietetics & Nutrition) or (Wellness and Human Performance)

HRS 2623 - ADVANCED MEDICAL NUTRITION THERAPY 1
Minimum Credits: 3
Maximum Credits: 3

This is the first of a two-course sequence in advanced medical nutrition therapy. This course will build on the student's knowledge of medical nutrition therapy from her/his undergraduate coursework and will focus on the application of the nutrition care process at the practitioner level. The course will cover pathophysiology and treatment, nutrition implications, nutrition assessment and diagnosis, and nutrition interventions for acute and chronic diseases based on evidence-based research and guidelines. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class discussions, and problem-based learning through case studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS) or Nutrition and Dietetics (MS)

HRS 2624 - ADVANCED MEDICAL NUTRITION THERAPY 2

Minimum Credits: 2
Maximum Credits: 2

This is the second of a two-course sequence in advanced medical nutrition therapy. This course will build on the student's knowledge of medical nutrition therapy from her/his undergraduate coursework and HRS 2623 and will focus on the application of the nutrition care process at the practitioner level. The course will cover pathophysiology and treatment, nutrition implications, nutrition assessment and diagnosis, and nutrition interventions, including nutrition support, for acute and chronic diseases based on evidence-based research and guidelines. Teaching approaches for the course include lectures, guest speakers, assigned readings, in-class discussions, and problem-based learning through case studies.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2625 - NUTRITION COUNSELING METHODS

Minimum Credits: 3
Maximum Credits: 3

This is an advanced course that emphasizes counseling as a supportive process, characterized by a collaborative counselor-patient relationship that involves behavior and attitudinal change. It will focus on the conceptual foundations and philosophy of behavior change theories, with an emphasis on motivational interviewing, including application in practice to provide the learner with a collection of evidence-based strategies and counseling skills to promote behavior change in patients/clients.

Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS) or Health and Rehabilitation Scs (MS) or SBPLAN: Wellness and Human Performance or Clinical Dietetics & Nutrition

HRS 2631 - NUTRITION FOCUSED PHYSICAL EXAMINATION

Minimum Credits: 3
Maximum Credits: 3

Introduction to professional knowledge and skills in nutrition focused physical examination. The course is based on the knowledge/application of the NCP and Model in professional practice. Learning experiences will include formal class presentations, class discussions, case-based problem solving and simulation laboratory sessions. Knowledge based learning leading to examination technique simulations for anthropometric measurements for body composition, nutrition focused physical examination for malnutrition diagnosing and examination techniques, e.g., vital signs, head and neck exam, intra and extra-oral exams, heart and lung auscultation, as well as, abdominal auscultation and palpation are included. At the completion of the course competency in application of nutrition focused physical examination techniques will be assessed on an individual basis.

Academic Career: Graduate
Course Component: Credit Laboratory
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS) or Nutrition and Dietetics (MS)

HRS 2633 - PROFESSIONAL DEVELOPMENT
Minimum Credits: 3
Maximum Credits: 3
This course provides students with opportunities to explore through study, discussion and practical application, the issues and trends that are affecting food and nutrition professionals and the profession of dietetics. Included is an introduction to the history and structure of the profession of dietetics and to existing and emerging roles.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS) or Nutrition and Dietetics (MS)

HRS 2635 - PROFESSIONAL DEVELOPMENT

Minimum Credits: 2
Maximum Credits: 2
This course provides students with opportunities to explore through study, discussion and practical application, the issues and trends that are affecting food and nutrition professionals and the profession of dietetics. Included is an introduction to the history and structure of the profession of dietetics and to existing and emerging roles.
Academic Career: Graduate
Course Component: Lecture
Grade Component: Grad Letter Grade

HRS 2637 - PRACTICAL APPLICATIONS OF MEDICAL NUTRITION THERAPY 1

Minimum Credits: 1
Maximum Credits: 2
This weekly conference is designed to prepare students for their planned, supervised practice experiences to be completed at the assigned clinical facility. Teaching approaches for the course include lectures/presentations, group discussions, student presentations, guest lectures, and problem-based learning through case studies. Class exercises are designed to simulate supervised practice assignments and provide opportunity for the student to apply didactic content to the practice of food service management and the nutrition care process used in patient care. Class participation is an important component of the course. Group discussions are used to report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2638 - PRACTICAL APPLICATIONS OF MNT 2

Minimum Credits: 1
Maximum Credits: 1
This weekly conference is designed to prepare students for their planned, supervised practice experiences to be completed at the assigned clinical facility. Teaching approaches for the course include lectures/presentations, group discussions, student presentations, peer review exercises, and problem-based learning through case studies. Class exercises are designed to simulate supervised practice assignments and provide opportunity for the student to apply didactic content to the nutrition care process used in patient care. Class participation is an important component of the course. Group discussions are used to report on events and share experiences in order to broaden the class's perspective on dietetics practice in the acute care setting.
Academic Career: Graduate
Course Component: Practicum
Grade Component: Grad HSU Basis
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2640 - SUPERVISED PRACTICE : COMMUNITY NUTRITION

Minimum Credits: 2
Maximum Credits: 2
This course is a combination of dietetics related classroom, observation and supervised practice experiences in community settings. Emphasis is on
delivering food and nutrition services in community based settings with a focus on wellness. Core rotations are in the following areas: child and adult day care, WIC and breastfeeding support, congregate and home delivered meals (Meals-On-Wheels), schools, the Western Pennsylvania School for Blind Children, food banks and pantries and community-based wellness programs. Students are required to complete the core rotations and to meet course requirements through special projects in sites of their choice across the lifecycle. Course minimum: 120 hours.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2642 - SUPERVISED PRACTICE: CLINICAL 1

Minimum Credits: 5
Maximum Credits: 5
This course will provide supervised practice experience in the area of clinical dietetics. This course is designed to follow the topic sequence and content of HRS 2623: Advanced Medical Nutrition Therapy 1. It provides the students with the opportunity to apply their knowledge of the nutrition care process and medical nutrition therapy (MNT) to the practice of dietetics in the acute care setting. This involves planned learning experiences with a variety of patients at various stages of the health/illness continuum. Students will have opportunity to observe and then model the functions of a clinical dietitian. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing comprehensive nutritional care to individuals within the practice setting. This course is the first of two courses which will provide clinical dietetics supervised practice experience. In this course the initial skills required for the nutrition care process will be mastered: nutrition assessment, diet interviewing, developing a care plan, written documentation, and nutrition education/counseling. Supervised practice experience caring for patients with the following disease states will be provided: feeding difficulties, energy imbalances, cardiovascular diseases, diabetes mellitus, and renal disease. During this course the student will begin to develop and construct their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the site's Clinical Nutrition Department and/or the field of clinical dietetics. This is a two term project that will continue into HRS 2643: Supervised Practice: Clinical II.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2643 - SUPERVISED PRACTICE: CLINICAL 2

Minimum Credits: 5
Maximum Credits: 5
This course is the second of two courses which will provide supervised practice experience in the area of clinical dietetics. This course is designed to follow the topic sequence and content of HRS 2624: Advanced Medical Nutrition Therapy 2. It provides the students with the opportunity to apply their knowledge of nutrition assessment and medical nutrition therapy to the practice of dietetics in the acute care setting. This involves planned learning experiences with a variety of patients of all ages at various stages of the health/illness continuum. Students will have opportunity to observe and then model the functions of a clinical dietitian. Through the combination of planned learning activities and professional interaction, the students will demonstrate increasing level of proficiency in providing comprehensive nutritional care to individuals within the practice setting. Students will be assigned to their same primary site as the fall term; however selected rotations outside of the primary site may be necessary to provide appropriate learning activities. This course will build on skills mastered in HRS 2642 and will provide the students supervised practice experiences to develop and master new skills including calculating and assessing enteral and parenteral nutrition regimens. Supervised practice experience caring for patients with the following disease states/conditions will be provided: gastrointestinal, pancreatic, and liver disorders, cancer, critical illness, and patients requiring nutrition support. During this course the student will complete their Quality Improvement (QI) Research project. This project will give each student the opportunity to work independently on a QI project at the primary clinical site. The project should focus on an area that is relevant to the site's Clinical Nutrition Department and/or the field of clinical dietetics. This is a two term project that will build on the project content from HRS 264.

Academic Career: Graduate
Course Component: Clinical
Grade Component: Grad Letter Grade
Course Requirements: PLAN: Coordinated Master in Dietetics (MS)

HRS 2644 - SUPERVISED PRACTICE: MANAGEMENT OF NUTRITION CARE
The supervised practice experience activities for HRS 2644: Management of Nutrition Care are planned to provide the student with the opportunity to assume increased responsibility for the management of nutrition care to hospitalized patients. In this course, the student will function as a clinical dietitian at the clinical site and will independently conduct all phases of the nutrition care process. Students will continue in the same primary supervised practice facility where they were assigned for Supervised Practice: Clinical 1 and 2.

**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS)

### HRS 2645 - SUPERVISED PRACTICE MANAGEMENT IN LONG-TERM CARE

**Minimum Credits:** 2
**Maximum Credits:** 2

This course provides supervised practice experience in a long-term care setting. The course will provide supervised practice experience in the areas of food service management and also clinical dietetics to allow the student to carry out the nutrition care process for patients/residents in this population.

**Academic Career:** Graduate
**Course Component:** Clinical
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Coordinated Master in Dietetics (MS)

### HRS 2646 - FUNCTIONAL NUTRITION

**Minimum Credits:** 3
**Maximum Credits:** 3

This introductory course to functional nutrition is based on a food first approach to promotion of optimal health. Lectures and class activities will explore the scientific basis of medicinal foods and herbs used in cooking. Students will demonstrate practical application by incorporating 'health promoting foods and herbs' into meal planning and preparation with the goal of optimizing health for the prevention and treatment of diet and lifestyle related diseases.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade
**Course Requirements:** PLAN: Cord Master in Nutr and Dietics (CMD-MS) or Wellness and Human Performance (MSNUTR-SP)

### HRS 2650 - EXERCISE PHYSIOLOGY

**Minimum Credits:** 3
**Maximum Credits:** 3

The purpose of this course is to provide graduate students, within the field of rehabilitation science, the knowledge of theoretical and applied aspects of exercise physiology. An in-depth understanding of how the body responds when exposed to acute and chronic bouts of exercise will be provided through lectures and laboratories. Topics discussed will include physiological responses and adaptations of the cardiovascular, respiratory, metabolic, and neuromuscular systems to exercise; assessing cardiorespiratory fitness, body composition, anaerobic performance and muscular fitness; designing exercise programs for health and wellness and special populations; sport performance; environmental considerations.

**Academic Career:** Graduate
**Course Component:** Lecture
**Grade Component:** Grad Letter Grade

### HRS 2655 - RESEARCH METHODS AND APPLIED STATISTICS

**Minimum Credits:** 3
**Maximum Credits:** 3

This introductory course in research methods and applied statistics will address research study design and descriptive and inferential statistics related to the research process. Inferential statistics will include one-sample, two-sample and multi-sample inference. Topics covered will include issues related to measuring variables (reliability/validity), an introduction to epidemiology and measures of association, and interpreting scientific literature.
The course will include hands-on practice in running statistical tests previously taught in class. This course provides awareness about research methods and statistical analysis considerations needed by health sciences students. There are no pre-requisites.

**Academic Career:** Graduate  
**Course Component:** Lecture  
**Grade Component:** Grad Letter Grade

---

**Health Information Management**

**HI 1020 - HEALTH DATA SCIENCE PROGRAMMING USING PYTHON AND R**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course introduces the two most widely used statistical programming tools in data science: R and Python. Students will learn how to do data processing of various types of data and prepare the data to be ready for statistical analyses and machine learning. Programming techniques and analyses that are essential for health data scientists will be covered. This course will also cover the applications of graphical techniques and visualization for health data. This course covers how to do programming to implement various statistical methods and machine learning algorithms from the perspective of health data science. The approach of this course is practical, hands-on and project oriented.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** Restricted to PLANS: HIM-BS, BPH, or BS-H

---

**HI 1210 - HEALTH INFORMATION AND THE HEALTH CARE SYSTEM**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course will include an introduction the historical development of the health care field with emphasis on the organizational structure of health institutions, as well as federal, state, and local agencies and health informatics and information management associations. Emphasis will be placed on all the key functions that surround health informatics, health information management and data science and the use of technology, regulations, ethical principles and legal implications regarding these key functions. Information governance, data governance and the integrity of the health data that is used by health care organizations will be emphasized.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** Restricted to PLANS: HIM-BS, BPH, or BS-H

---

**HI 1230 - FINANCIAL MANAGEMENT & HEALTH CARE REIMBURSEMENT**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course is designed as an introductory level course to principles, concepts and issues of financial management in a health care organization. The aim is to provide an understanding of financial and reimbursement language, concepts, and processes to enhance the daily management performance of current and future leaders in health informatics and information management. Operational budgets, understanding financial trends and variances, developing financial negotiating strategy, quantifying productivity, interpreting reimbursement analytics, ensuring compliance, understanding health care reimbursement will all be discussed and applied in this course.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

---

**HI 1231 - TALENT MANAGEMENT AND HUMAN RESOURCES**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course discusses the principles and methods practiced in human resource management in the health care environment. The role of the supervisor
is emphasized, and practical applications in conjunction with theory are presented to the student. This course is a practical guide to human resource management in health care and covers topics such as recruitment, compensation and benefits, training, discipline, termination, legal issues, labor unions, and multi-human interactions that emerge in the workplace. It is also an overview of the laws and regulations that guide every decision related to managing people in the complex society in which we exist today.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### HI 1250 - FOUNDATIONS OF HEALTH INFORMATICS AND INFORMATION MANAGEMENT

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course introduces students to health informatics and information management including important concepts in computing and networking, digital health, data analytics, machine learning, data science, health technology intervention, electronic health records, data quality, health care standards, privacy and security, bioinformatics and digital imaging. Students will engage in hands-on applications of these concepts as well.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** Restricted to PLANS: HIM-BS, BPH, or BS-H

### HI 1410 - HEALTH VOCABULARY, TERMINOLOGY & CLASSIFICATION SYSTEMS

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course aims to evaluate the reference terminologies that are currently used in health care settings (SNOMED-CT, LOINC) as well as applications of data capture technologies (such as natural language processing, voice recognition, document imaging). Further, the course intends to introduce students to computer-assisted coding technology applications and evaluate the use of health care terminologies, vocabularies, and classification systems found both nationally and internationally.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### HI 1411 - QUALITY MANAGEMENT

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

This course focuses on principles and approaches to the assessment of quality in health care and how this impacts the role of the health informatics and information management professional. Theoretical and pragmatic issues related to quality management, utilization review, and risk management are addressed. Responsibilities of the governing board, medical staff and other health care personnel in relation to quality management and improvement is examined. Requirements of accrediting and licensing agencies related to quality management are presented. Practical applications of quality measures, resource use, and risk management are applied. Students will design, implement, and present a quality management project at designated clinical facilities.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

### HI 1430 - LEADERSHIP

- **Minimum Credits:** 3  
- **Maximum Credits:** 3

Leadership is a course designed to introduce and develop leadership behaviors. The goal of this course is to advance the capabilities in meeting current healthcare organization’s challenges through both leader and leadership development. It is not intended to provide a background on the evolution of thought on leadership or leadership theory. The course takes a developmental ânot training âapproach by providing a leadership
development framework that helps guide one in acquiring the characteristics and behaviors associated with good leadership.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** Restricted to PLANS: HIM-BS, BPH, or BS-H

**HI 1431 - REVENUE CYCLE MANAGEMENT**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide an introduction into revenue cycle management which includes the process of when the patient first makes an appointment, checking patient insurance eligibility, understanding payment methodologies, revenue, payment cycle management, claims audits, compliance, value-based purchasing and outpatient prospective payment systems. Clinical Documentation Improvement Programs and the increased use of CAC programs will also be explored as well as minimizing healthcare fraud.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HI 1437 - CLASSIFICATION SYSTEMS IN HEALTHCARE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will enable the student to apply the principles of taxonomy as well as understand the purposes of classifying diseases and operations. An in-depth study of ICD-10-CM, ICD-10-PCS and CPT-4 will be undertaken along with an introduction to ICD-11. The interaction of Diagnosis Related Groups (DRG's) with classification systems will be emphasized. Data quality, the Uniform Hospital Discharge Data Set as well as coding/sequencing guidelines for both inpatient and outpatient coding will be examined.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** Restricted to PLANS: HIM-BS, BPH, or BS-H

**HI 1450 - SECURITY, PRIVACY, LEGAL & ETHICAL ISSUES IN HEALTH CARE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course is designed to introduce basic knowledge of security, privacy, legal and ethical issues in health informatics and information management. In the first half of the course, the major focus will be on security techniques, including basic concepts, encryption and decryption methods, program operating systems, databases, and network security. In the second half of the course, we will shift our attention to the application of the concepts of privacy and security in the health care industry. Legal and ethical issues around the privacy and security of health information will also be discussed. Hospital law and aspects of handling confidential and health records information with actual cases and statutes will also be discussed.  
**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** Letter Grade  
**Course Requirements:** School of Health and Rehabilitation Sciences students only.

**HI 1451 - DATABASE DESIGN AND BIG DATA ANALYTICS**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course will provide students with the theoretical and technical aspects of database, specifically in data modeling, design of database, as well as learning the "language" to manage database. The second section will address advanced topics in database and big data, including transforming data, data warehousing and data mining, and analysis and visualization of data. Students will work extensively with Microsoft Excel, Access, and SQL server to gain practical experience in design and implementation of health-related databases. Students will also learn important healthcare business/consulting skills that include presenting data as information, writing executive summaries, and preparing professional reports that highlight healthcare data findings.
**HI 1452 - DIGITAL HEALTH AND ELECTRONIC HEALTH RECORD SYSTEM**

Minimum Credits: 3  
Maximum Credits: 3  
Digital health technologies include solutions for both health care providers and patients, ranging from Electronic Health Records, Telemedicine, Mobile Health, Wearable Devices, as well as many emerging Internet-of-Things devices and sensors. This course will provide students with opportunities to explore, analyze, and discuss key issues, principles and policies surrounding digital health. The responsibilities of the health informatics and information management professional, as well as the requirements of accrediting and licensing agencies related to digital health technologies will also be discussed. The final assignment of this course will task students to work with key health service stakeholders (who will share their knowledge throughout the course as well) to investigate and propose a practical digital health solution to tackle a specific health issue.

**HI 1453 - DATA ANALYTICS AND MACHINE LEARNING IN HEALTH SCIENCE**

Minimum Credits: 3  
Maximum Credits: 3  
This course is designed for students who want to learn data analytics and machine learning, as well as their applications in healthcare and health information systems across the healthcare continuum. Data analytics tools and methods, machine learning procedures and tools, and their applications in healthcare and health science will be discussed in this course. Students who finish this course should be able to use statistical and machine learning methods and tools to analyze various types of data sets in health science and make predictions and recommendations according to the obtained results.

**HI 1454 - DATA SCIENCE IN HEALTH INFORMATICS**

Minimum Credits: 3  
Maximum Credits: 3  
This is an introductory course to health data science and will cover data sources, types, collection methods, processing and analysis methods, and analysis result interpretation with an emphasis in health-related data. Assigned hands-on projects will enable students to have the skills to analyze various types of health data sets using different methods and have the ability to interpret the meaning of the results.

**HI 1471 - INTRO TO HEALTHCARE IT AND EMERGING TECHNOLOGIES**

Minimum Credits: 3  
Maximum Credits: 3  
This course will cover important health IT standards for clinical document and healthcare data exchange & interoperability such as Consolidated-Clinical Document Architecture (C-CDA), Fast Healthcare Interoperability Resource (FHIR). This course will also survey emerging health technologies such as cloud computing, artificial intelligence in healthcare, wearable devices and block chain technologies. The contents of the course can change and evolve as new standards and new technologies emerge.
HI 1485 - PROJECT MANAGEMENT & SYSTEMS ANALYSIS

Minimum Credits: 3
Maximum Credits: 3
This course will study how technology, people, and economics of software projects interact and the impact these elements have on managing software projects. The presentation of concepts of systems analysis and their relationship to health informatics and information management is a major emphasis of this course. Case problems and individual projects from health-care settings are assigned to develop proficiency.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

HI 1497 - CLINICAL INTERNSHIP

Minimum Credits: 3
Maximum Credits: 3
This clinical experience involves a six-week clinical affiliation at contracted health care sites or health-related organizations under the supervision of data science, health informatics or health information management professionals. Student assignments are structured to provide actual experiences in the administrative, managerial, technical and project-oriented areas of health informatics and information management, such as electronic health records development and training, project management, systems analysis, human resource management, health information systems, database management, data science, data analytics and other similar experiences.

Academic Career: Undergraduate
Course Component: Internship
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HI 1499 - INDEPENDENT STUDY

Minimum Credits: 1
Maximum Credits: 6
Provides student an opportunity to explore in depth an area of particular interest to them. It is the student's responsibility to find a faculty member willing to undertake such a tutorial.

Academic Career: Undergraduate
Course Component: Independent Study
Grade Component: LG/SU3 Elective Basis
Course Requirements: School of Health and Rehabilitation Sciences students only.

HI 1650 - INTRO TO STATISTICS AND RESEARCH DESIGN

Minimum Credits: 3
Maximum Credits: 3
This course is designed to provide students with a practical understanding of the use of statistics in health informatics and information management (HIIM). Descriptive statistics, inferential statistics, and some non-parametric statistics will be discussed and utilized with healthcare data or concepts. The use of Excel and SPSS will be used to run statistical tests and understand the meaning of the output generated. Research articles and statistical projects will be used to learn the meaning of statistics and its use in the field of HIIM. Epidemiology and epidemiologic research design and methods for the HIIM student will also be included. Types and purposes of epidemiology, measures of risk, and sources of data will be discussed.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: Restricted to PLANS: HIM-BS, BPH, or BS-H

HI 1651 - CAPSTONE PROJECT
Minimum Credits: 3
Maximum Credits: 3
This is the final capstone course where the faculty will assess students' attainment of all the required professional competencies in health informatics and information management (HIIM). This will be determined by completing the senior project, an independent project in which the student serves as a consultant to a particular health care facility in order to solve a problem. It will also be determined by completing a poster presentation of the senior project, the study preparation, taking both a mock exam developed by the HIM department based upon its curriculum and taking an entry-level nationally validated exam administered by AHIMA, the RHIA.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: School of Health and Rehabilitation Sciences students only.

**HIM 1438 - CANCER REGISTRY THRY & PRACT LAB**

Minimum Credits: 2
Maximum Credits: 2
Designed to provide students with practical experience in the design, development, performance and administration of various types of research databases. Primary focus is the organizational and operational functions of a cancer registry. Medical management of patient, physiology of disease process methodology used in evaluation extent of disease and assessing outcome through patient follow-up, use of ICD-O classification system is presented. Impact of data quality and availability in relation to utilization of the registry is stressed.

Academic Career: Undergraduate
Course Component: Credit Laboratory
Grade Component: Letter Grade
Course Requirements: CREQ: 1435 and 1436; PLAN: Health Information Management (BPH or BS or BS-H)

**HIM 1440 - HIM CLINICAL EDUCATION 1**

Minimum Credits: 1
Maximum Credits: 1
Clinical affiliation at contracted health care sites under the supervision of qualified health information management personnel. Student assignments are structured to provide actual experience in the technical and clinical areas of health information management, such as record retention and retrieval, release of information, coding and abstracting, chart analysis, etc.

Academic Career: Undergraduate
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); PREQ: 1415 and 1416; CREQ: 1435 and 1436

**HIM 1442 - APPLC OF STATCL CONCEPTS IN HIM**

Minimum Credits: 3
Maximum Credits: 3
Designed to provide students with a practical understanding of the use of statistics in health information management (HIM). This course will focus on management and organization of health information data and the appropriateness of using specific statistical techniques with data. Descriptive statistics, inferential statistics, and non-parametric methods will be discussed and utilized with HIM data or concepts. Database development, research articles and projects will be used to learn the meaning of statistics and its use in the field of HIM.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

**HIM 1445 - HUMAN RELATIONS IN HLTH CARE**

Minimum Credits: 2
Maximum Credits: 2
This course discusses principles of effective communication and interpersonal relationships. Course material will include information concerning communication skills, group therapy, diversity, conflict management, etc.
HIM 1455 - QUALITY MANAGEMENT

Minimum Credits: 2  
Maximum Credits: 2  
This course focuses on principles and approaches to assessment of quality in health care and how this impacts the role of the health information manager. Theoretical and pragmatic issues related to quality management, utilization review, and risk management is addressed. Responsibilities of the governing board, medical staff and other health care personnel in relation to quality management and improvement is examined. Requirements of accrediting and licensing agencies related to quality management are presented.

HIM 1456 - QUALITY MANAGEMENT LAB

Minimum Credits: 1  
Maximum Credits: 1  
This quality management laboratory focuses on the practical applications of managing the quality of health care, resource use, and risk. Students will design, implement, and present a quality management project at designated clinical facilities. Also, several in-class-online assignments will be required.

HIM 1460 - HIM CLINICAL EDUCATION 2

Minimum Credits: 1  
Maximum Credits: 1  
Practice and introduction to areas of impact for health information: revenue cycle management, quality assessment, case and care management, data analysis and business intelligence and information security areas.

HIM 1462 - EPIDEMIOLOGY

Minimum Credits: 2  
Maximum Credits: 2  
This course is an introductory course in epidemiology and epidemiologic methodology for the HIM student. It includes types and purposes of epidemiology, measures of risk, and sources of data. There will be an emphasis on epidemiological student designs related to HIM and Health Informatics. Students will design an epidemiological research proposal as part of the course requirements.

HIM 1465 - REIMBURSEMENT SEMINAR
Minimum Credits: 1
Maximum Credits: 1
An introduction to topics relating to reimbursement in the health care environment. The course will build on topics covered in Classification Systems including the role of coding in reimbursement and minimizing health care fraud. Additional areas include payment methodologies, revenue, and payment cycle management, claims audits, compliance, value-based purchasing and outpatient prospective payment systems. Clinical Documentation Improvement Programs and the increased use of CAC programs will also be explored.
Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H)

HIM 1470 - SUPERVISION HUMAN RESOURCES HC

Minimum Credits: 3
Maximum Credits: 3
This course discusses the principles and methods practiced in human resource management in the health care environment. The role of the supervisor is emphasized, and practical applications in conjunction with theory are presented to the student.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); PREQ: 1420

HIM 1475 - HIM NON-TRADITIONAL SETTING

Minimum Credits: 3
Maximum Credits: 3
An overview of health information systems in community-based facilities emphasizing information requirements of ambulatory-care centers, behavioral health, substance abuse, rehabilitation, emergency medicine, occupational health, long-term care, sub-acute care, home health care, hospice, dialysis, managed care, correctional facilities, dental care, and veterinary care settings. The role of the health information manager as a consultant in these settings is discussed. HIM consultants/professionals in these areas are invited to lecture as guest speakers from each of these settings. A 20-hour project is a major component and entails having the student conduct the project as a consultant in one of the health care areas listed above.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); CREQ: 1480

HIM 1480 - HIM CLINICAL EDUCATION 3

Minimum Credits: 2
Maximum Credits: 2
This clinical education experience provides students the opportunity to observe and participate in health information management activities in a variety of non-acute settings such as long-term care, ambulatory care, behavioral health, rehabilitation, home health, outsourcing companies, IT departments, and telemedicine.
Academic Career: Undergraduate
Course Component: Clinical
Grade Component: Letter Grade
Course Requirements: PLAN: Health Information Management (BPH or BS or BS-H); CREQ: 1475

HIM 1482 - LEGAL ASPECTS OF HEALTH CARE

Minimum Credits: 2
Maximum Credits: 2
This course discusses principles of hospital law and aspects of handling confidential and health records information. Actual cases and statutes are discussed.
Academic Career: Undergraduate
HIM 1486 - FINANCIAL MANAGEMENT FOR HIM

Minimum Credits: 2
Maximum Credits: 2
This course is designed as an intro level course to principles, concepts and issues of financial management in a health care organization. Focus on financial management viewed from the perspective of department/credit manager and supervisor. Institution-wide accounting and budgeting systems are discussed primarily as a framework for understanding how financial reporting, planning and control is linked to organizational effectiveness and how financial management responsibilities of the departmental manager relate to organization-level financial goals.

HIM 1490 - ELECTRONIC HEALTH RECORDS

Minimum Credits: 3
Maximum Credits: 3
This course addresses theoretical and pragmatic issues related to EHR technology, such as design and development, standards and clinical terminologies, privacy and security issues, model EHR systems, evaluation of EHR software systems, and outcomes research using the EHR will be addressed. The responsibilities of the health information management professional, as well as the requirements of accrediting and licensing agencies related to EHR, will also be discussed. The responsibilities and involvement of various members of the health care team in the development, use, evaluation, and dissemination of EHR technology will be emphasized.

HIM 1495 - HIM CLINICAL EDUCATION 4

Minimum Credits: 4
Maximum Credits: 4
This clinical experience involves a six-week clinical affiliation at contracted health care sites or health-related organizations under the supervision of qualified practitioners or health information management professionals. Student assignments are structured to provide actual experiences in the administrative, managerial, technical and project-oriented areas of health information management, such as electronic health records development and training, project management, systems analysis, human resource management, health information systems, database management, and other similar experiences.

HIM 1496 - CAPSTONE COURSE IN HIM

Minimum Credits: 3
Maximum Credits: 3
This is the final capstone course where the faculty will assess students' attainment of all the required professional competencies in health information management (HIM). This will be determined by completing the senior project, an independent project in which the student serves as a consultant to a particular health care facility in order to solve a problem. It will also be determined by completing a poster presentation of the senior project, the study preparation, taking both a mock exam developed by the HIM department based upon its curriculum and taking an entry-level nationally validated exam administered by AHIMA.
Hindi

HINDI 0101 - HINDI 1

Minimum Credits: 4
Maximum Credits: 4
The greatest part of the first term will be devoted to the presentation and practice of the basic sound patterns of the language, its fundamental sentence patterns, and sufficient vocabulary to illustrate and practice them. An introduction to the writing system will be offered together with the opportunity to acquire elementary writing and reading skills.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Attributes: Asian Studies, Global Studies

HINDI 0102 - HINDI 2

Minimum Credits: 4
Maximum Credits: 4
At the end of the second term of the first year of study the student should be able to produce all the significant sound patterns of the language, to recognize and use the major grammatical structures within a limited core vocabulary. The student should be able a) to engage in simple conversations with native speakers about a limited number of everyday situations and b) to read and write simple material related to the situations presented.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0281 or HINDI 0101; MIN GRADE: ‘C’
Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, Global Studies

HINDI 0103 - HINDI 3

Minimum Credits: 3
Maximum Credits: 3
The first term of the second year will concentrate on the further development of fluency in oral production and the improvement in the student's ability to understand the flow of speech as uttered by a native speaker. Increased attention will be paid to reading as a means of augmenting a vocabulary and writing as a drill and as a means of consolidating and communicating the knowledge gained.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0282 or HINDI 0102; MIN GRADE: ‘C’
Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, Global Studies

HINDI 0104 - HINDI 4

Minimum Credits: 3
Maximum Credits: 3
At the end of the second term of the second year the student should be able to converse comfortably with a native speaker on a variety of non-specialized subjects. The student will be offered an opportunity to experience and more fully understand the culture of the people who use the language through readings of various types. More complex writing tasks will be expected at this level.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
Course Requirements: PREQ: LING 0283 or HINDI 0103; MIN GRADE: 'C'
Course Attributes: Asian Studies, DSAS Second Language General Ed. Requirement, Global Studies

HINDI 0111 - INTRODUCTION TO HINDI LANGUAGE IN INDIA

Minimum Credits: 3
Maximum Credits: 3
This study abroad course will provide a basic introduction Hindi language for students with no or very little background in Hindi. It does not take the place of HINDI 0101 - Hindi 1 taught on the Pittsburgh campus.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HINDI 0112 - CONTINUING HINDI LANGUAGE IN INDIA

Minimum Credits: 3
Maximum Credits: 3
This study abroad course provides students with some background in Hindi to continue their language study. It does not take the place of a regularly sequenced Hindi language course taught on the Pittsburgh campus.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: Letter Grade

HINDI 1615 - MANY RAMAYANAS: TRADITION AND DIVERSITY IN MODERN INDIA

Minimum Credits: 3
Maximum Credits: 3
This course will introduce you to the great Hindu epic, the Ramayana, a blue-print for daily living in India. Although composed two millennia ago, the remarkable fluidity of the story has resulted in literally hundreds of Ramayanas, as it continues to be retold and reimagined while moving across space and time. Within the Ramayana itself there are many controversial episodes; among these the two most important are Sita's trial-by-fire and her subsequent banishment by her husband, Rama, and Rama's mutilation of Shurpanakha as punishment for the latter's bold romantic and sexual overtures. These incidents are of great import because the faithful and loyal Sita is the "Ideal Indian woman" in popular imagination even today. More significant is the fact that authors and commentators continue to use both these characters to address modern issues relating to gender inequality. The Ramayana is thus a rich source of information not just in literary terms, although its defining characteristic, its fluidity, is under threat, with groups on the ultraright attempting to dictate the "correct" version, but also in political, social and religious terms. This course will thus take a multi-disciplinary role in exploring the richness of what modern scholars have come to call the Ramayana tradition, and its role in India today; we will study its implications for women, its reception in South India, and its role in the rising tide of Indian nationalism, while eventually questioning whether its characteristic fluidity is at threat by those who insist on only one "pure" version.

Portuguese

PORT 0101 - ELEMENTARY PORTUGUESE 1

Minimum Credits: 3  
Maximum Credits: 3  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

PORT 0102 - ELEMENTARY PORTUGUESE 2

Minimum Credits: 3  
Maximum Credits: 3  
The second half of this introductory course continues to develop skills in the speaking, reading and writing of Portuguese.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

PORT 0103 - INTERMEDIATE PORTUGUESE 3

Minimum Credits: 3  
Maximum Credits: 3  
A continuation of the development of conversational as well as writing skills.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

PORT 0104 - INTERMEDIATE PORTUGUESE 4

Minimum Credits: 3  
Maximum Credits: 3  
Follows PORT 0103. A consolidation of speaking, reading and writing skills.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SU3 Elective Basis

Course Requirements: PREQ: PORT 0003 or 0103 or 1003 (MIN GRADE 'C' for Listed Courses)  
Course Attributes: African Studies, Latin American Studies, West European Studies
PORT 0120 - CONVERSATION

Minimum Credits: 3  
Maximum Credits: 3  
An intermediate course in Portuguese conversation.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: PORT 0004 or 1004 (MIN GRADE 'C' for Listed Courses)  
Course Attributes: Latin American Studies, West European Studies

PORT 0125 - GRAMMAR AND COMPOSITION

Minimum Credits: 3  
Maximum Credits: 3  
An intermediate course in grammar and composition for those who have completed PORT 0004/0104 or the equivalent.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: PORT 0004 or 1004 (MIN GRADE 'C' for Listed Courses)  
Course Attributes: Latin American Studies, West European Studies

PORT 1001 - ELEMENTARY PORTUGUESE 1

Minimum Credits: 5  
Maximum Credits: 5  
Basic elements of Brazilian Portuguese emphasizing a development of speaking, reading and writing skills. Introductory course.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: MIN CUM GPA: 2.0  
Course Attributes: African Studies, Latin American Studies, West European Studies

PORT 1002 - ELEMENTARY PORTUGUESE 2

Minimum Credits: 5  
Maximum Credits: 5  
The second half of this introductory course continues to develop skills in the speaking, reading and writing of Portuguese.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: PORT 0001 or 1001; MIN GRADE: 'C' FOR ALL LISTED COURSES  
Course Attributes: African Studies, Latin American Studies, West European Studies

PORT 1003 - INTERMEDIATE PORTUGUESE 3

Minimum Credits: 3  
Maximum Credits: 3  
A continuation of the development of conversational as well as writing skills.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: PORT 0002 or 1002 or 1010; MIN GRADE: 'C' FOR ALL LISTED COURSES  
Course Attributes: African Studies, Latin American Studies, West European Studies
PORT 1004 - INTERMEDIATE PORTUGUESE 4

Minimum Credits: 3  
Maximum Credits: 3  
Follows PORT 1003. Consolidation of speaking, reading and writing skills.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Requirements: PREQ: PORT 0003 or 1003; MIN GRADE: ’C’ FOR ALL LISTED COURSES  
Course Attributes: Latin American Studies, West European Studies

PORT 1010 - PORTUGUESE FOR SPANISH SPEAKERS 1

Minimum Credits: 3  
Maximum Credits: 3  
Portuguese for Spanish speakers is designed as an accelerated introductory course for native speakers of Spanish or English speakers with fluency in Spanish. It will be the equivalent of Portuguese 0001/1001 and Portuguese 0002/1002. This course concentrates on aspects of the Portuguese language that are most difficult for Spanish speakers, such as pronunciation, vocabulary, idioms and grammatical structures particular to Portuguese.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Latin American Studies, West European Studies

PORT 1031 - ELEMENTARY PORTUGUESE 1 FOR MBAS

Minimum Credits: 2  
Maximum Credits: 2  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis

PORT 1052 - LUSO-BRAZILIAN LITERATURE

Minimum Credits: 3  
Maximum Credits: 3  
This course studies various Portuguese or Brazilian literary topics according to the needs and interests of the students. Taught in Portuguese.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: Letter Grade  
Course Attributes: Latin American Studies

PORT 1053 - LUSO-BRAZILIAN TOPICS

Minimum Credits: 3  
Maximum Credits: 3  
This course deals with literary, linguistic or cultural topics, or a combination of these, relating to Portugal, Brazil or other Portuguese speaking areas.  
Academic Career: Undergraduate  
Course Component: Lecture  
Grade Component: LG/SNC Elective Basis  
Course Attributes: Latin American Studies

PORT 1061 - SURVEY OF BRAZILIAN LITERATURE

Minimum Credits: 3  
Maximum Credits: 3
A general overview of Brazilian literature from the middle ages to the present.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**PORT 1451 - SENSORY EXPLORATIONS OF THE LUSOSPHERE**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
What could be gained by a focus on the sensorial? What meanings are revealed through the honing in on the banal processes of our everyday lives? How are these often overlooked details connected to larger social phenomena and structures? How can the literary representation of individual food choice provide clues to the racial and migratory politics of late nineteenth-century Brazil? Through a critical examination of literary texts, art, performances, and films from Brazil, Angola, Mozambique, and Guinea Bissau that center on the senses and the sensorial, this course explores the woven logics of sensorial representation and cultural narratives of race, gender, class, politics, and nation in the Lusophone world. Aided by accompanying theoretical readings as well as individual research, students are expected to critically discuss both in the classroom with their peers and through formal writing assignments the connections between sensorial representations and cultural narratives related to nation building, (neo)coloniality, post-revolutionary disillusionment, historical reverberations in the contemporary present, among others, within the Lusosphere. Key concepts and issues: cultural cannibalism, the sensorial, (nation)alism, semiotics of food, aurality, affect, synestheticism, (post)colonialism, neocoloniality, gendered constructions of nation, and racial indigestion. Lectures and discussion will be in English. Course materials will be made available to students in English; however, students may choose to submit written work in English, Portuguese, and/or Spanish. This course is aimed at advanced undergraduate students.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**PORT 1458 - CULTURES OF THE PORTUGUESE SPEAKING WORLD**

**Minimum Credits:** 3  
**Maximum Credits:** 3  
This course presents an overview of the contemporary cultures of the Portuguese-speaking world. It is especially designed for students with little to no previous knowledge of these geographical regions. In the course, students will explore contemporary social realities throughout the Portuguese-speaking world (namely Brazil, Angola, Mozambique, and Cape Verde) through the close and critical reading of texts, literature, film, short videos, podcast episodes, TV programs, among other mediums. Students will be exposed to issues regarding gender, race, nation, sexuality, class, status, among other issues within a contemporary context. Students are expected to engage in critical discussions with the materials and the varying perspectives of their peers. The purpose of this course is not to merely passively digest content but to also think and express oneself critically in reaction to cultural representations both from the perspective of the respective nation and also from US perspectives. It is also necessary to keep in mind that rather than attempting an exhaustive survey of the Portuguese-speaking world in its entirety, the course provides merely a glimpse into the cultural offerings of these diverse and vast geographical regions; it is also an attempt to promote global and cultural understanding. Hopefully, through this exposure, it is also a starting point for further exploration and research in studies of the Portuguese-speaking world and beyond.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

**PORT 1902 - DIRECTED STUDY**

**Minimum Credits:** 1  
**Maximum Credits:** 6  
This course allows students to work in depth in areas of their choice, with the approval and supervision of a faculty member, who meets regularly with the student. Evaluation is by examination or by the production of a term paper or series of papers.

**Academic Career:** Undergraduate  
**Course Component:** Directed Studies

History

HIST 0010 - PROFESSIONAL DEVELOPMENT SEMINAR

Minimum Credits: 1
Maximum Credits: 1
You are at a family function and one of your relatives over hears what your major is asks you "do you know what you call a BA in history?" Then before you can answer or walk away, he/she responds with "waiter!" While this is the accepted wisdom of what happens to a history, is this the reality of life after college? The answer to that is an emphatic "no!" Therefore, in this class you will find out why this is false. Then you will prepare for the real world by practicing and implementing the skills needed to navigate your way through the process of finding a job or going on to graduate school.

Academic Career: Undergraduate
Course Component: Seminar
Grade Component: Satisfactory/No Credit

HIST 0050 - SOCIAL CHANGE

Minimum Credits: 3
Maximum Credits: 3
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HIST 0089 - MAGIC, MEDICINE AND SCIENCE

Minimum Credits: 3
Maximum Credits: 3
Dietary purges, ritualistic spells, mystical transformation, and the balance of self with nature. In each of these approaches is the presence of magic. Magic is a phenomenon common to all societies. In this course, we will study how it has contributed to religion, medicine, the healing arts, and to the emergence of modern scientific thought. Also the extent to which similar systems of belief have given birth to science, religion, magic and therapeutic practice will be explored.

Academic Career: Undergraduate

HIST 0100 - WESTERN CIVILIZATION 1

Minimum Credits: 3
Maximum Credits: 3
The study of others leads back to ourselves. We learn about men and women from the past in order to compare their experience to our own, hoping that the comparison will make us more aware of the opportunities and limitations of present-day life. As an introduction to history, this course tries to suggest the excitement and uncertainties of studying the past. We begin at the time of the crusades, and continue through Renaissance and Reformation to the eve of Industrial Revolution.

Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HIST 0101 - WESTERN CIVILIZATION 2
A history of the West from the Industrial Revolution to the late Twentieth Century, the period when Europe and its overseas extensions dominated world history.

**HIST 0103 - EUROPE IN THE 18TH CENTURY**

Minimum Credits: 3  
Maximum Credits: 3

It was the best of times, it was the worst of times; it was the age of wisdom, it was the age of foolishness; it was the epoch of belief, it was the epoch of incredulity; it was the season of light, it was the season of darkness. There was a king with a large jaw and a queen with a plain face on the throne of England; there was a king with a large jaw and a queen with a fair face on the throne of France. In both countries it was clearer than crystal to the lords of state, preservers of loaves, and fishes that things in general were settled forever. This course surveys the political, economic, social, and cultural history of Europe in the eighteenth century. Focusing on the major transformations of European society from the Age of Absolutism through the Age of Enlightenment to the Age of Revolution, the course explores local and interconnected histories of Britain, France, Spain, Denmark, Sweden, Russia, Austria, and the Dutch Republic. The course engages five major themes: 'Power, Politics, and Warfare', 'Social, Demographic, and Economic Change', 'Culture, Religion, and the Public Sphere', 'European Expansion Overseas', and 'Revolutionary Europe.' Readings include primary and secondary sources. The course is open to students of all levels.

**HIST 0110 - WHAT IS EUROPE?**

Minimum Credits: 3  
Maximum Credits: 3

**HIST 0125 - RELIGIONS OF THE WEST**

Minimum Credits: 3  
Maximum Credits: 3

This course is a historical introduction to the religious traditions that developed in ancient Near East and the Mediterranean. Our major emphasis is on the history of the religious traditions that emerged in late antiquity in this area and which continue to be major world religions: Judaism, Christianity, and Islam. We will also touch on Zoroastrianism. We focus on key concepts, historical developments, and contemporary issues. Throughout the course, we also examine interactions among these religious traditions. In the last part of the course we examine the issue of globalization and the spread of these religions around the world as well as the presence of "non-Western" religion in the "West." The course also serves as an introduction to the academic study of religion and provides a foundation for further coursework in Judaism, Christianity, and Islam. No prior knowledge of any of the religions studied is expected or assumed.

**HIST 0139 - VIKING AGE SCANDINAVIA**

Minimum Credits: 3  
Maximum Credits: 3
The Viking age, the period from 800 to 1050 AD Marks Scandinavia's transition from prehistoric to historic times. This course will reassess Viking activities as constructive as well as destructive. Raids, commerce and colonization are best illuminated by a blending of written and physical evidence. Through the sagas, secondary readings and an assessment of archaeological sources such topics as state formation, trade, technology, rise of cities, religion and the voyages to Greenland and America will be examined.

**Academic Career:** Undergraduate  
**Course Component:** Lecture  
**Grade Component:** LG/SNC Elective Basis

---

**HIST 0140 - THE HISTORY OF THE BOOK**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course examines European book history in global context, from clay tablets through the age of print. Focusing primarily on the medieval and early modern periods, it considers the history of the book from several perspectives: as a story of technologies, both manual (papermaking, printing) and intellectual (literacy, memory), as a story of artistic and cultural forms, as a story of reading, and as a story of global networks. We will consider issues including forgery; censorship; the role of political, religious, and economic forces in the production of books; the development of trust in the written word; the history of libraries; and the formation of reading communities.

**HIST 0150 - HISTORY OF MODERN IRELAND**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This class will examine how Britain came to Ireland and why in the context of that period (16th and 17th centuries). It will also examine the very complex relationships between the Catholic church and the British crown in the 17th century, as these relationships played a great role in the Cromwellian era. This will lead us to the heart of the class where we will trace the very complex relationship between modern Irish republicanism and Cromwell.

**HIST 0187 - WORLD WAR II-EUROPE**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

The causes of WW II are surveyed, including World War I, the Russian Revolution, the Great Depression, and the rise of fascist regimes. The determinants of German expansionism will be discussed and related to the outbreak of war in 1939. The military struggle receives attention, but such topics as economic mobilization, propaganda, occupation policies, resistance movements and the Holocaust are also discussed. The course concludes with an analysis of war time diplomacy, the Postwar settlement, and the onset of the Cold War.

**HIST 0190 - THE DICTATORS**

- **Minimum Credits:** 3  
- **Maximum Credits:** 3  

This course offers a venue to explore a large variety of political regimes frequently bounded together in the professional literature under the
conceputal umbrella of "dictatorship." After gaining an introductory overview and acquiring a conceptual toolkit we will systematically scrutinize the trajectories, structures, and policies of some twenty political regimes throughout the world aiming to identify their commonalities and singularities. These findings will allow us to search for shared patterns, identify types of political regimes, establish comparisons and connections between them, and understand every regime within a wider global context.

Grade Component: LG/SNC Elective Basis

HIST 0200 - BETWEEN KAFKA AND HITLER: HOW CENTRAL EUROPE SHAPE THE MODERN WORLD

Minimum Credits: 3
Maximum Credits: 3
This course offers an introduction to the historical experience of Central Europe, the most diverse and dynamic region of modern Europe. Close to twenty nations with together more than 200 million people exist today between the rivers Rhine and Dnepr, between the Baltic and the Aegean Seas, from Germany in the west to Estonia in the northeast and Greece in south. Since the 1800s, this region made its mark on the world through an astounding cultural and intellectual creativity. People like Hegel and Marx, Kafka and Freud, Albert Einstein and Marie Curie changed the way we think. Yet 20th-century Central Europe was also a place of unprecedented mass violence and destruction, the main theater of two world wars and the site of the Holocaust. During the Cold War, it became the focal point of a global ideological conflict that divided the world into east and west. Ever since the fall of the Iron Curtain, Central Europe is the place where these divided worlds are growing together again. The study of this region and the socioeconomic and cultural forces that shaped it provides a fascinating lens for a better understanding of the modern world. This includes the fact that many of those who built Pittsburgh came from Central Europe and left their mark in this city. The course serves as core course for the Central European Studies Certificate

HIST 0201 - THE BALTIC SEA: FROM THE VIKINGS TO POST-SOVIET RE-UNION

Minimum Credits: 3
Maximum Credits: 3
In this course we will explore the Baltic Sea region, and trace Northern Europe's history from the age of the Vikings to the post-Soviet re-union in 1991. We will study the history of this region and its diverse language communities: Scandinavians, Finns, Balts, Slavs and Germans. We will discuss how the Baltic Sea region was shaped by several European powers, in particular Denmark, Sweden, Poland-Lithuania, Russia, Prussia, and Germany. The course will cover the history of Northern Europe over the course of the last 1,000 years, including the Vikings, the Hanseatic League, the Reformation, the Thirty Years War, the Nordic Wars, the Enlightenment, Nordic Romanticism, the Russian Revolution, the two World Wars, the Cold War, and the renewal of the Baltic Sea region as a unified trading space after the collapse of the Soviet Union.

HIST 0300 - RUSSIA TO 1860

Minimum Credits: 3
Maximum Credits: 3
This course examines the social, political, economic and intellectual developments of Russia from the Great Reforms of Peter to the Emancipation of the Serfs in 1861.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis
HIST 0301 - RUSSIA TO 1917

Minimum Credits: 3
Maximum Credits: 3
This course analyzes the major social and economic problems of the Russian Empire from the emancipation of 1861 through the Revolution of 1917. The emphasis is on understanding the major issues that precipitate the first "socialist" Revolution in European history.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HIST 0302 - SOVIET RUSSIA

Minimum Credits: 3
Maximum Credits: 3
This course examines the history of the USSR from 1917 to the present. Particular attention is paid to the revolutionary transformation of society, the construction of the Soviet state and Soviet society, and to the ways in which state and society relate.
Academic Career: Undergraduate
Course Component: Lecture
Grade Component: LG/SNC Elective Basis

HIST 0400 - EAST ASIAN CIVILIZATION TO 1800

Minimum Credits: 3
Maximum Credits: 3
This course introduces major themes in the history of East Asia. It analyzes the relationships between East Asian thought systems; political, economic, and social institutions; and foreign influences for the purpose of understanding the forces that shaped the East Asian tradition. The course focuses on how this distinctive tradition produced two very different societies in China and Japan.
